ANNEX II

TECHNICAL SPECIFICATIONS FOR THE TRANSFER OF COMPUTER FILES TO THE EAGGF

from 16 October 2003

INTRODUCTION

These technical specifications apply in respect of the financial year 2003, which commenced on 16 October 2002.

1. **Transfer medium**

The coordinating body of the Member State must transfer the computer files and the relating documentation to the Commission through STATEL/STADIUM. The Commission will only support one installation of STATEL/STADIUM per Member State. The latest STADIUM client and more information on the use of STATEL/STADIUM shall be downloaded from the CIRCA website of the EAGGF.

2. **Computer file structure**

2.1. The Member State must create a computer record for each individual component of the EAGGF (Guarantee Section) payments and receipts. These components are the individual items of which the payment (receipt) to (from) the beneficiary consists.

2.2. The records must have a flat file structure. If fields have more than one value, separate records containing all data fields are required. Make sure that no double counting occurs ([1]).

2.3. All information for the same category of payments or receipts must be contained in the same computer file. Separate files relating to the same payments (e.g. for traders or inspections, or for basic and measure data) are not allowed.

2.4. The computer files must have the following characteristics:

1. The first record in the file (header row) contains the file description. The field names comprise an 'F' followed by the field number used in Annex I (the X-table). Only field names existing in this Annex are allowed.

2. The following records in the file are data (data rows), in the order indicated by the first record describing the file structure.

3. The fields are separated by a semicolon (;). The header row and data rows shall all contain the same number of semicolons. In the data rows, empty fields appear as a double semicolon (;;) within the record, or as a single semicolon (;) at the end of the record.

4. Records vary in length. Each record ends with a code 'CR LF' or 'carriage return – line feed' (in hexadecimal: 0D 0A). The header row never ends on a ';'. Data rows only end on a ';' if the last field is empty.

5. The file is in ASCII (code ISO 8859-1), except in the case of files from Greece, where either ELOT-928 or ISO 8859-7 coding shall be applied. Other codes (such as EBCDIC, TAR, ZIP, etc.) are not accepted.

6. Numeric fields:

(a) decimal separator: '.';

(b) the symbol (+ or -) appears on the far left, followed immediately by the figures. For positive numbers, the '+' sign is optional;

(c) fixed number of decimals (the details are set out in Annex III hereto);

(d) no spaces between digits. No spaces or other signs between thousands.

([1]) First read the preliminary remark concerning quantities in chapter 5 of Annex III.

7. Date field: 'YYYYMMDD' (year in four digits, month in two digits, day in two digits).

8. EAGGF budget code (field F109) format: 'B99-9999-999' (where 9 stands for any figure between 0 and 9) ([1]).

9. Quotation marks (' ') are not allowed at the beginning or at the end of the records. The semicolon field separator ';' must not be used in data in text format.

10. All fields: no spaces at the beginning or end of a field.

11. Files satisfying these rules will look like the following (example for financial year 2003):

F100;F101;F106;F107;F108;F109
BE01;154678;+152.50;EUR;20030715;B01-1000-123
BE01;024578;-1000.00;EUR;20030905;B01-2020-564
BE01;154985;9999.20;EUR;20030101;B01-1100-000
BE01;100078;+152.75;EUR;20030331;B01-1234-654
BE01;215452;+0.50;EUR;20030615;B01-1000-001 (Please note: +0.50 and not +.50)
BE01;123456;21550.15;EUR;20030101;B01-4000-010
etc.
(other data rows with the fields in the same order).

2.5. Data files with the characteristics as described under 2.4 shall be sent with consignment type 'X-TABLE-DATA' (see STADIUM client).

2.6. The computer program for checking the format of computer files before sending them to the Commission (WinCheckCsv) is included in the data transfer program (STADIUM client). The paying agencies are invited to download the check program from CIRCA separately for offline validation purposes.

3. **Documentation**

The coordinating body of the Member State must transfer two explanatory notes for each paying agency through STATEL/STADIUM:

1. The first to explain all differences, by budget heading and subheading, between the annual declaration ([2]), as part of the annual financial clearance procedure (not table 104), and the sum of the records in the computer files (Σ F106). The STADIUM client includes a specific consignment type for this transfer i.e. 'EXPLANATORY-NOTE'.

2. Secondly, any codes used for fields, for which Annex III does not enforce standard codes. The STADIUM client includes a specific consignment type for this kind of tabular transfer i.e. 'CODE-LIST'.

The explanatory note shall have the look and feel of an ordinary letter. In particular the identity of the sender or the identity of the paying agency and the name or administrative unit of the addressee shall be clearly marked.

4. **Data transfer**

The coordinating body must send the computer files completely and only once.

If the coordinating body notices that false data were transmitted or a problem occurred with the data transfer, the Commission has to be informed immediately. All files, which contain incorrect information, are to be indicated. Therefore, the Commission is to be asked to delete these files. Thereafter, in order to avoid an overlapping of computer records or data files, the coordinating body must send the corrected computer files to replace entirely the previous incorrect information.

([1]) From financial year 2004 onwards these codes will be changed within the traditional budgetary nomenclature. Further explanation is given in 'F109 EAGGF budget code' of Annex III.

([2]) Annual declaration: data sent through STATEL/STADIUM using consignment type 'ANNUAL_DECLARATION'.

'D' = data element to be deleted compared to the previous version of this Regulation.

Where a data request makes no sense under particular circumstances or is not applicable for the Member States concerned, then put null value, which shall be represented by two consecutive semicolons (;;) in the CSV format data file.

1. DATA RELATING TO PAYMENTS

F100: Name of paying agency

Required format: to be expressed by a code (see the code list F100.XLS kept up-to-date on CIRCA).

http://forum.europa.eu.int/Members/irc/agri/Home/main

F101: Reference number of payment

The reference number identifying the payment clearly in the paying agency's accounts. Removals relating to food aid shall not be considered as sales of intervention products. In this particular case field F101 can be ignored.

F102: Reference number of previous payment

The reference number identifying the payment clearly in the paying agency's accounts as an advance or an amount recovered.

F103: Type of payment

Required format: to be expressed by a one-character code corresponding to the following code list:

Code	Significance
0	Food aid
1	Advance or partial payment
2	Final payment (first and single payment; or settlement of the balance after advance payment; or normal export refund payment)
3	Recovery/reimbursement (following a penalty)/corrections
4	Receipt of amounts (not preceded by an advance or final payment)
5	Pre-financing payment export refund
6	No financial transaction

Code '6' refers to public storage where the Commission needs details of movement of quantities but where no financial transactions are involved.

F103B: Private sector contribution

This field is related to field F510A where the Commission asks for the percentage of EAGGF funding in the area of rural development. Depending on a country's interpretation of the percentage under F510A, field F103B might be required or not. If the EAGGF funding is expressed as a percentage as against the total investment, the amount of the private sector contribution shall be given here. Total investment being defined as the total costs eligible under EAGGF. If on the contrary F510A is expressed as a percentage as against the total eligible public expenditure, i.e. national and European, then this field can be ignored.

Required format: +99……99.99 or -99……99.99, where 9 stands for a digit from 0 to 9.

F105: Payment with penalty

Required format: yes = 'Y'; no = 'N'.

F105A: Reduction under Articles 3 and 4 of Council Regulation (EC) No 1259/1999 (OJ L 160, 26.6.1999, p. 113)

The field F105A of the Xs-table must be used to indicate the amounts retained (negative amounts) on the basis of Articles 3 and 4 of Regulation (EC) No 1259/1999. Field F105A must be used for each budget item where a retention has been made.

There is no specific budget post on which to declare payments made using the amounts retained on the basis of Articles 3 and 4 of Regulation (EC) No 1259/1999. These payments shall therefore be indicated in field F105A of the corresponding budget headings (050401054030, 050401064040, 050401084050 and 050401114070). They appear as positive amounts indicating that the expenditure is financed via penalties for non-respect of environmental protection regimes or the system of modulation.

In the domain of arable crops on the other hand, F105A will appear as a negative amount indicating a reduction of the direct aid.

Required format: +99……99.99 or -99……99.99, where 9 stands for any number from 0 to 9 inclusive.

F106: Amount

Amount of each individual item of payment in the currency identified in field F107. The sum of these amounts (F106) by budget code (F109) shall, in principle, correspond with the amounts declared in table 104. The amounts in field F106 relate to the EAGGF expenditure only. National expenditure shall not appear under this heading.

For public storage the sum of the amounts shall, in principle, correspond, as far as purchases are concerned, with the amounts declared in line 4 of table 1 of the FAUDIT-ED declaration. In the case of sales, give details of total values in line 1 of table 53.

Required format: +99……99.99 or -99……99.99, where 9 stands for a digit from 0 to 9.

F107: Currency unit

Required format: ISO 4217 code: DKK, EUR, GBP, SEK, etc.

F108: Date of payment

The date determining the month of declaration to the EAGGF.

Required format: 'YYYYMMDD' (year in four digits, month in two digits, day in two digits).

F109: EAGGF budget code

The full code of the activity based budgeting structure must be given, including the title, chapter, Article, item and subitem.

Required ABB-format without spaces: '999999999999999', where 9 stands for a digit from 0 to 9. Missing positions shall be filled with zeroes (for example, 05020901160 becomes 050209011600000).

F110: Marketing year or period

For intervention products, the Commission needs to know the marketing year to which the product corresponds or the quota period it is to be set off against. For example, in the case of cereals this may well be a previous marketing year rather than the current one.

2. DATA RELATING TO BENEFICIARY (APPLICANT)

Preliminary remark: the fields F200, F201, F202A, F202B and F202C must be used to identify the beneficiary of a payment i.e. the final beneficiary. The fields F220, F221, F222A, F222B and F222C must additionally be used if a payment is made to the beneficiary through an intermediate organisation. If the intermediate organisation is also the final beneficiary the same data have to be completed in the fields F220, F221, F222A, F222B and F222C as indicated in the fields F200, F201, F202A, F202B and F202C.

The field F207 is only related to the field F200.

F200: Identification code

The individual unique identifier allocated to applicants at Member State level.

F201: Name

The applicant's last name and first name, or the business name.

F202A: Applicant's address (street and number)

F202B: Applicant's address (international postcode)

F202C: Applicant's address (municipality or city)

F205: Holding in less-favoured region

Where this affects the rate of aid.

Required format: yes = 'Y'; no = 'N'.

F205A: Young farmer

Required format: yes = 'Y'; no = 'N'.

F206: Producers of heavy/light lambs

Required format: for the ewe and goat premiums the following code list is required:

— 'H' heavy lamb

See preliminary remarks in heading 5 (data relating to products).

For rural development the quantity paid shall be expressed in the unit appropriate to the agri-environmental submeasure mentioned in F500. The Member States must use the Transit Customs Office List (COL ([1])). This is the list of authorised customs offices for Community/common transit operations. It may be that due to its objective of 'transit operations' some of the customs offices might be missing although this will be the exception. In that case the Member State shall provide the name of the customs office in full.

Required format: The format of the COL code consists of two positions to denote the country followed by six numeric positions that define the customs office. For instance 'NL146123'.

F802B: Customs office of exit

Indicate the customs office, which certifies that products covered by refund applications have left the customs territory of the Community. The Member States must use the Transit Customs Office List (COL ([2])). This is the list of authorised customs offices for Community/common transit operations. It may be that due to its objective of 'transit operations' some of the customs offices might be missing although this will be the exception. In that case the Member State shall provide the name of the customs office in full.

This information is vital for the auditors in connection with the application of Regulation (EEC) No 386/90 concerning substitution checks. The information is available in T5 or equivalent documents.

Required format: The format of the COL code consists of two positions to denote the country followed by six numeric positions that define the customs office. For instance 'NL146123'.

In view of harmonisation, the Member States shall also use the miscellaneous category (codes Q*) of the nomenclature of countries and territories for the external trade statistics. It is known that that nomenclature does not cover all special export refund cases but the Commission does not require that kind of detail. Member States shall therefore convert their special national codes to the broader categories of the nomenclature of countries and territories for the external trade statistics before sending their data to the Commission.

F808: Date of advance fixing

If fixed in advance, the date on which the rate of refund was set.

9. ADDITIONAL INFORMATION ON BUYING-IN AND SALES FROM PUBLIC STORAGE

These transactions (buying-in and sales) fall under the budget heading covering other costs. In the case of buying-in, provide details of total quantities and values in line 4 of Table 1 (or 51). In the case of sales, give details of total quantities and values in line 1 of Table 53.

The Commission needs details of movements of quantities bought in, sales and losses even where no financial transactions are involved, as is the case with free sales of foodstuffs and losses within the tolerances allowed. For intervention products, the emphasis is on detailed stock movements rather than on the financial implications. The difference with the FAUDIT-ED system is that the Commission is not interested in the cumulative totals. The Commission also wants the information in the 'X-table' to reflect the actual transactions. Table 8 (Public storage – Public stock position and movements) supplements the above data.
