{COM(2008) 35 final}

DOCUMENTO DE TRABAJO DE LA COMISIÓN

Segundo informe de evolución sobre la estrategia para la simplificación del marco regulador

1. INTRODUCCIÓN

Iniciada en octubre de 2005, la estrategia para la simplificación del marco regulador¹ estableció un programa permanente de medidas de simplificación que deben adoptarse entre 2005 y 2008 con el fin de mejorar la calidad y la eficacia del acervo a la vez que se preservan sus principales objetivos en materia de políticas.

Este segundo informe de evolución, que complementa la Comunicación sobre el «*Segundo análisis estratégico del programa «Legislar mejor» en la Unión Europea*»², describe tanto en términos cualitativos como cuantitativos los resultados ya conseguidos, expone la vía a seguir para el legislador de la UE y tiene como objetivo proporcionar un nuevo impulso a la estrategia de simplificación, que es un elemento esencial de la política global sobre «Legislar mejor» y la Estrategia para el Crecimiento y el Empleo de la Unión Europea.

El presente informe también muestra que la Comisión está efectivamente cumpliendo sus compromisos en el marco del programa permanente.

Los ciudadanos y las empresas ya han visto resultados tangibles, y aún podrán ver más a medida que se adopte el gran número de iniciativas pendientes en la actualidad ante el legislador. Los esfuerzos se están centrando en proyectos que aportan importantes beneficios a las partes interesadas, tales como las pequeñas y medianas empresas (PYME) o empresas concretas, que, en demasiados casos, se enfrentan a unas exigencias regulatorias desproporcionadas.

La Comisión realizará un examen completo del acervo comunitario, comprobando si los instrumentos existentes todavía son necesarios, si se utiliza un estilo normativo adecuado y si las cargas impuestas son tan ligeras como sea compatible con los resultados políticos deseados. En este proceso también se identificarán nuevas iniciativas para su inclusión en el programa permanente de simplificación actualizado que se presentará a principios de 2009. A fin de conseguir una auténtica repercusión, este impulso también deberá continuar en la próxima legislatura.

Al mismo tiempo, cuando se encuentre la manera de facilitar la existencia a las empresas sin que ello afecte a los objetivos subyacentes de las políticas o se propongan otros cambios significativos en el marco regulador, la Comisión recurrirá al denominado mecanismo de acciones por vía rápida³, que contribuye a la reducción de las cargas administrativas en la UE con un objetivo del 25 %⁴ antes de 2012. El ejercicio a gran escala emprendido por la Comisión para determinar y medir las cargas administrativas en ámbitos prioritarios también impulsará el programa de simplificación.

2. SITUACIÓN DEL PROGRAMA PERMANENTE DE SIMPLIFICACIÓN

2.1. Visión general

Mediante la estrategia de simplificación de octubre de 2005 se determinó un grupo inicial de aproximadamente cien iniciativas para el programa permanente de 2005 a 2008. En noviembre de 2006 se añadieron cuarenta y tres nuevas iniciativas⁵ y otras dieciséis en octubre de 2007⁶, con lo que se amplió el alcance del ejercicio de simplificación a todos los ámbitos de las políticas y se extendió el calendario a 2009. El programa utiliza técnicas legislativas tales como la derogación, la codificación y la refundición⁷.

La aplicación del programa permanente se efectúa, en gran medida, de conformidad con el calendario previsto. Hasta la fecha, la Comisión ha adoptado más de la mitad del programa actualizado para el período 2005-2009.

De las iniciativas programadas para su adopción en 2007, la Comisión ha realizado el 80 % del programa.

Hasta la fecha, la Comisión ha adoptado noventa y una propuestas, compuestas de veinticuatro actos denominados actos autónomos, adoptados mediante el procedimiento de comitología, dieciséis adoptados por el legislador, cuarenta y cuatro todavía pendientes ante el legislador y siete que son o bien revisiones en las que no había necesidad de actuación legislativa, o bien iniciativas fusionadas.

Globalmente, desde octubre de 2005 la Comisión ya ha presentado aproximadamente cuatrocientos actos jurídicos para su derogación, modificación o sustitución. En consecuencia, se eliminarán del corpus legislativo de la Comunidad aproximadamente trescientos actos jurídicos, lo que representa aproximadamente cinco mil páginas del Diario Oficial. Además, desde la entrada en funciones de la Comisión, se han tomado o se han propuesto medidas para eliminar aproximadamente dos mil quinientos actos obsoletos del acervo.

2.2. Legislación ya adoptada

La aplicación de la estrategia de simplificación del marco regulador ya ha aportado auténticos beneficios a las empresas y los ciudadanos.

2.2.1. Actos adoptados por la Comisión

Hasta la fecha, se han adoptado veinticuatro iniciativas de simplificación como actos autónomos de la Comisión mediante el procedimiento de comitología (anexo 4). Por ejemplo:

- En 2005, la Comisión adoptó un reglamento por el que se establecen tasas reducidas y se introduce un programa de asistencia administrativa para las PYME que registran **productos farmacéuticos**. Con ello, se prevé una reducción para las PYME del 90 % de las tasas para asesoramiento científico, tasas reducidas para las PYME cuando solicitan autorizaciones de comercialización y la prestación de asistencia en materia de regulación para las PYME. Las PYME activas en este ámbito ya están utilizando ampliamente estas posibilidades.
- Se han modificado las normas relativas a la **prueba de la importación** en terceros países (en relación con **las restituciones por exportación diferenciadas** para determinados productos agrícolas) a fin de permitir a los exportadores que solicitan reembolsos utilizar

⁵ Documento de trabajo de la Comisión COM(2006) 690.

⁶ Programa legislativo y de trabajo de la Comisión para 2008 - COM(2007) 640.

⁷ La metodología de la Comisión para la simplificación y las definiciones de las técnicas legislativas relacionadas se detallan en la Comunicación de 2005.

información electrónica en el seguimiento y la localización de portacontenedores como una alternativa a los documentos aduaneros habituales (que son difíciles de obtener en algunos países).

- La Comisión ya ha adoptado una Recomendación sobre los **mercados de las comunicaciones electrónicas**, que centra la normativa en las operaciones al por mayor y que ha reducido de dieciocho a siete el número de mercados que pueden ser objeto de regulación *ex ante*. En consecuencia, se estima que los costes administrativos se están reduciendo entre el 25 % y el 30 % para los operadores de redes fijas y entre el 30 % y el 40 % para las autoridades reguladoras nacionales. Unos procedimientos simplificados de examen del mercado también permitirán un mayor ahorro para las autoridades reguladoras nacionales.

2.2.2. *Actos adoptados por el legislador*

La mayor parte del programa depende, para su adopción, del legislador, normalmente en el marco del procedimiento de codecisión. Hasta la fecha, se han adoptado dieciséis iniciativas de simplificación en el programa permanente del período 2005-2009 (anexo 5), por ejemplo:

- En el ámbito de la agricultura, el legislador adoptó la refundición de las **veintiuna organizaciones comunes de mercado en un único sistema** con el fin de agilizar y simplificar la Política Agrícola Común en beneficio tanto de los agricultores como de las administraciones y las empresas que trabajan con productos agrícolas. La creación de una única organización común del mercado permitirá reducir la legislación en el sector agrícola, mejorar su transparencia y hacer la política más fácilmente accesible. Ello implica la derogación de casi cincuenta actos del Consejo y sustituye más de seiscientos cincuenta artículos de carácter jurídico en las normativas actuales, y en aproximadamente doscientos se crea un entorno reglamentario global más sencillo sin cambiar las políticas subyacentes.
- La Directiva sobre recursos en **la contratación pública**. En 2003, se estimaba que este sector tenía un valor de 1 500 millones de EUR, lo que representa el 16,3 % del PIB de la EU 15. La nueva Directiva mejora los procedimientos nacionales de revisión que pueden utilizar las empresas si consideran que una autoridad pública ha adjudicado injustamente un contrato. En particular, la Directiva introduce un período suspensivo obligatorio entre la notificación de la decisión de adjudicación y la firma del contrato, con el fin de dar tiempo a los licitadores para que examinen la decisión y estudien si inician un procedimiento de revisión. Asimismo, la Directiva contiene normas adicionales destinadas a garantizar su eficacia. La introducción de estos nuevos derechos y mecanismos para los licitadores rechazados en los 27 Estados miembros es de capital importancia para asegurar que los contratos acaben yendo a la empresa que haya presentado la mejor oferta y, por tanto, para conseguir que las empresas y el público confíen en la equidad de los procedimientos de contratación pública. Entre las medidas de simplificación se incluye la derogación de los mecanismos existentes de conciliación y certificación por los cuales las empresas no han expresado ningún interés real y que no se utilizan en la actualidad.
- La Directiva sobre **servicios de pago** contribuye a la creación de una «zona única de pagos» en la UE que podría permitir un ahorro de 28 000 millones de EUR anuales a la economía de la UE. El objetivo es que los pagos electrónicos dentro de la UE – ya sea por tarjeta de crédito, tarjeta de débito, transferencia bancaria, ingreso en una cuenta o cualquier otro medio – sean tan fáciles, baratos y seguros como lo son en la actualidad los pagos «nacionales» efectuados dentro de un Estado miembro. Con esta Directiva se garantiza un acceso justo y abierto a los mercados de pagos y se incrementa y se normaliza la protección del consumidor. Los beneficios que aporta la simplificación proceden de la

armonización de los requisitos para el acceso a los mercados, la superación del efecto de fragmentación derivado de las divergencias entre las normas nacionales y de la UE en materia de requisitos de información, y la armonización de los derechos y las obligaciones básicos de los usuarios y los proveedores en favor de la seguridad y la eficacia. Un mercado de pagos más eficaz y competitivo también permitirá a cada europeo pagar menos por los servicios bancarios básicos, cuyo coste medio anual en la UE puede llegar a oscilar entre 34 y 252 EUR.

- La derogación de la mayor parte de los requisitos de **preenvasado** existentes ha permitido eliminar normas nacionales y comunitarias para aproximadamente setenta productos de consumo. En la actualidad, las empresas tienen más flexibilidad para responder a las necesidades de los consumidores.
- En el ámbito de las **aduanas**, el legislador ha adoptado la decisión sobre la aduana electrónica, con la que se creará un sistema electrónico europeo para el intercambio de datos entre las autoridades públicas y las empresas. Unos procedimientos aduaneros más ágiles que utilicen sistemas aduaneros automatizados e interconectados impulsarán el comercio internacional. Cuando sea plenamente operativo, el sistema integrado debería permitir un ahorro de 2 500 millones de EUR anuales a las empresas, con lo que se sufraga con creces la inversión de entre 40 y 50 millones de EUR anuales efectuada por la Comisión y los Estados miembros. Está prevista la adopción en 2008 del Código Aduanero modernizado, con el que se reexaminará la legislación aduanera de la Comunidad.

2.3. Propuestas pendientes ante el legislador

En la actualidad, aproximadamente cuarenta y cuatro iniciativas de simplificación están pendientes ante el legislador. Entre ellas se incluye una serie de importantes propuestas cuya adopción contribuirá a simplificar el marco regulador, como por ejemplo:

- La innovadora revisión de la legislación de la UE en materia de seguros (**Solvencia II**), que mejorará la protección del tomador de un seguro en toda la UE a través de unos requisitos más uniformes y sensibles al riesgo para las empresas de seguros. Solvencia II promoverá una mejor gestión del riesgo, una fijación de precios con criterios sólidos y una mayor supervisión, con lo que se reforzará la confianza del consumidor. También se incrementará la competencia (especialmente en el negocio de los seguros masivos al por menor, como por ejemplo el seguro del automóvil o de la vivienda), se ejercerá una presión a la baja sobre algunos precios de los seguros, se alentará la innovación de los productos y se mejorará la competitividad internacional de los aseguradores europeos. Por último, el marco regulador será más transparente y fácil de utilizar, ya que una directiva sustituirá a las actuales normas dispersas que se encuentran en catorce diferentes directivas.
- El **código de conducta de los sistemas informatizados de reserva**, que se elaboró para un mercado que ha evolucionado significativamente con la cesión de esta actividad por parte de las líneas aéreas y el incremento de las reservas por internet, y ahora está listo para la introducción de más competencia. La Comisión propone que se dé mayor libertad a las fuerzas del mercado para hacer frente al pago de derechos de reserva más elevados de lo necesario por parte de las líneas aéreas y los pasajeros. Una mayor competencia mejorará la calidad de los servicios ofrecidos y reducirá los costes de distribución en el sector del transporte aéreo: se espera que los derechos de reserva por segmento de viaje bajen su precio entre 0,7 EUR y 0,9 EUR, con lo que se reducirán los costes totales entre 190 y 240 millones de EUR anuales.
- Los cambios de las normas que rigen **las redes y los servicios de comunicaciones electrónicas** tienen como objetivo garantizar una competencia eficaz, promover la

inversión, consolidar el mercado interior y reforzar los intereses de los consumidores. Se aboga por una reducción significativa de la regulación cuando exista una tendencia clara hacia la competencia. Un estudio independiente sobre la relación coste-beneficio de la Autoridad del Mercado de las Comunicaciones Electrónicas propuesta, estima que los posibles beneficios económicos son entre diez y treinta veces superiores a los costes operativos (entre 250 y 800 millones de EUR) debido a la menor incertidumbre reguladora y a la resolución más rápida de los casos. En el caso de los proveedores de servicios dependientes del espectro, la revisión introduce más flexibilidad, reduce el coste de las actividades empresariales y elimina barreras para la entrada de nuevos participantes. En consecuencia, los consumidores tendrán más oferta y unos precios más bajos para estos servicios.

- Una nueva Directiva sobre **el transporte terrestre de mercancías peligrosas** reunirá los tres tipos de transporte terrestre (por carretera, ferrocarril y vías navegables) en un único texto legislativo. Esta propuesta contiene disposiciones uniformes para los tres tipos de transporte (cuando es posible) y deroga disposiciones obsoletas. En particular, se derogarán dos directivas sobre asesores de seguridad para mercancías peligrosas y cuatro decisiones sobre excepciones nacionales. El resultado será un texto fácil de utilizar y transparente que reduzca el volumen del acervo en unas dos mil páginas.
- La revisión de la Directiva sobre los **juguets**, que actualizará los requisitos de seguridad y prevendrá los efectos nocivos a medio y largo plazo en los niños, a la vez que se mejora el funcionamiento del mercado interior de los juguetes. Como objetivo primario, la revisión pretende modernizar los requisitos de seguridad de los juguetes en lo que respecta a sus propiedades químicas, físicas y mecánicas. Asimismo, tendrá en cuenta los conocimientos científicos más recientes a fin de garantizar que en el mercado de la UE únicamente se encuentren juguetes seguros. Además, se mejorará la manera en que se aplica la Directiva dentro de los Estados miembros y se reforzará la obligación de que el Estado miembro efectúe una vigilancia adecuada y eficaz del mercado.

2.4. Iniciativas previstas de la Comisión (2008-2009)

La Comisión intensificará su actividad en los dos próximos años. El programa actualizado 2008-2009 (anexo 1) está compuesto por cuarenta y cinco iniciativas para 2008 y nueve iniciativas para 2009. A continuación se presentan ejemplos de próximas iniciativas de simplificación:

- La **revisión del acervo sobre Derecho de sociedades, contabilidad y auditoría**, que eliminará o reducirá una serie de requisitos administrativos que, en la actualidad, se consideran desfasados, excesivos o duplicados. Con ello se eliminarán algunos requisitos de información de las Directivas relativas al Derecho de sociedades, se simplificarán los requisitos de información para las empresas y se autorizará a los Estados miembros a seguir reduciendo los requisitos en materia de comunicación y auditoría para las PYME.
- La **revisión del Reglamento general de exención por categorías**, con la cual se recogerán en un documento todas las disposiciones relativas a las ayudas estatales que no están sometidas a la obligación de notificación, con lo que se reducirá la carga administrativa para los beneficiarios, los Estados miembros y la Comisión. El nuevo Reglamento general de exención por categorías incluirá ámbitos que ya figuran en las actuales exenciones por categorías sobre formación, empleo y PYME, así como nuevos ámbitos tales como el medio ambiente, el capital de riesgo y las ayudas regionales. También se mejorará considerablemente el acceso de las PYME a los programas de ayudas estatales: por ejemplo, las bonificaciones para las PYME, que se conceden además de las

ayudas básicas normalmente aplicables para inversión y empleo, se armonizarán y se incrementarán del 15 % al 20 % para las pequeñas empresas y del 7,5 % al 10 % para las medianas empresas.

- La **revisión de Intrastat**, con la cual se reducirá la carga que representa para las empresas el sistema de recogida de datos para las estadísticas de la Comunidad relativas al comercio de productos entre Estados miembros. La Comisión propondrá, a corto plazo, una mayor simplificación de este sistema con arreglo a criterios tradicionales mediante la reducción del número de partidas de la nomenclatura y el incremento de los umbrales para eximir a un gran número de empresas. Se estima que podrían verse eximidas de la obligación de comunicar estadísticas hasta un máximo de ciento noventa mil empresas. Al mismo tiempo, la Comisión investigará otras opciones a largo plazo incluida la posibilidad de pasar a utilizar un sistema de información de flujo único⁸.
- El futuro Reglamento sobre **neumáticos y dispositivos de seguridad avanzados**, que sustituirá aproximadamente cincuenta directivas diferentes mediante un único reglamento. De esta manera, se aligerará sustancialmente la carga para los Estados miembros, que ya no deberán transponer las normas de la CE en este ámbito. Además, las referencias directas a los Reglamentos de la CEPE acelerarán considerablemente la alineación de la legislación de la UE con las normas de la CEPE, con lo que se permitirá que la industria se adapte más rápidamente a la evolución técnica a nivel internacional.
- La revisión de la Directiva sobre **residuos de aparatos eléctricos y electrónicos** y la Directiva sobre restricciones a la utilización de determinadas sustancias peligrosas en aparatos eléctricos y electrónicos, con el fin de aclarar conceptos, facilitar su aplicación y su cumplimiento, reducir los costes administrativos para los fabricantes y las administraciones y proporcionar a los operadores un entorno más transparente en condiciones de igualdad.
- La propuesta de Directiva marco sobre **derechos del consumidor**, que proporcionará definiciones comunes y regulará los principales derechos contractuales y vías de recurso del consumidor. Al simplificar y clarificar el marco regulador para las empresas y los consumidores, contribuirá al funcionamiento del mercado interior y a la confianza del consumidor.
- La modernización y la refundición del sistema de control de la **política pesquera común**, que permitirá limitar las restricciones que sufre el sector e incrementar el uso de las herramientas de las tecnologías de la información a fin de reducir las obligaciones de comunicación.

Asimismo, las iniciativas de simplificación que afectan especialmente a las PYME se destacarán en la *«Ley de la Pequeña Empresa para Europa»*, que se pondrá en marcha en 2008.

2.5. Simplificación más allá del programa permanente

La simplificación no se limita a programas con objetivos tales como el programa permanente de simplificación, el programa de reducción de las cargas administrativas y el programa de codificación. El mismo imperativo de simplicidad debe aplicarse de manera general a todas las propuestas legislativas, así como a los procedimientos operativos. Por ejemplo:

⁸ Las estadísticas de Intrastat se elaboran en la actualidad mediante un sistema en el que cada país transmite información tanto sobre los flujos de importación como sobre los de exportación. Así pues, cada flujo se comunica dos veces.

- En el ámbito de la investigación – que es un componente clave de la Estrategia de Lisboa – también se han propuesto medidas concretas⁹ de simplificación del **7º Programa Marco para acciones de investigación, desarrollo tecnológico y demostración**. Se han modificado las normas administrativas y financieras en consecuencia y se ha agilizado la gestión del Programa Marco y los proyectos concretos de investigación.
- La Comisión ha propuesto simplificar la estructura del Programa **Erasmus Mundus** durante su segunda fase (2009-13). La actuación comunitaria en el ámbito de la enseñanza superior en relación con terceros países será más coherente gracias a la racionalización de una amplia gama de programas existentes, gestionados en la actualidad con normas diferentes a pesar de que cubran esencialmente las mismas áreas. Con ello se creará un único punto de entrada para las partes interesadas que participan en la cooperación académica con terceros países y la movilidad internacional.
- La Comisión ha sustituido y actualizado cuatro comunicaciones independientes sobre diferentes cuestiones jurisdiccionales en una **Comunicación consolidada sobre cuestiones jurisdiccionales** en el marco del Reglamento comunitario sobre fusiones, que ha permitido una simplificación inmediata de las prácticas y la orientación administrativa.
- La introducción del «**cuaderno diario de pesca electrónico**» ha permitido que los pescadores y las administraciones nacionales puedan efectuar todo el proceso de comunicación de datos sin utilizar el papel.
- En los nuevos reglamentos en materia de política de cohesión para el período 2007-2013 se ha reducido el número de fondos y de fases de programación, y se ha simplificado la gestión financiera, con lo que se ha incrementado la flexibilidad que tienen las autoridades locales para gestionar los programas sobre el terreno. Se han armonizado las normas que rigen el Fondo de Cohesión y los Fondos Estructurales de manera que las autoridades locales y los beneficiarios solamente deben aplicar un conjunto de normas para ambos fondos. En esta misma línea, un nuevo reglamento de la Comisión relativo a la aplicación de los Fondos Estructurales ha sustituido a los diez reglamentos de aplicación.

Además, la plena realización del mercado interior sigue siendo uno de los medios más poderosos para mejorar el entorno empresarial. La eliminación de barreras entre Estados miembros ha incrementado el PIB de la UE en 223 000 millones de EUR, lo que equivale a un 2,2 %, en los diez años siguientes a la finalización del paquete del Mercado Interior en 1993. Es decir, 1 450 EUR de renta adicional por hogar. Además, el empleo se ha incrementado el 1,4 %, con lo que se han creado 2,75 millones de nuevos empleos. Con un conjunto único de normas de la UE, las empresas no tienen que descubrir y descifrar veintisiete series diferentes de normas nacionales, adaptar sus productos o servicios a ellas y demostrar que las cumplen. Por ejemplo:

- La Comisión ha propuesto recientemente la modificación de las **homologaciones de vehículos** de la UE mediante la introducción de normas armonizadas para los vehículos con motor de hidrógeno, con lo que se permite que los fabricantes se beneficien de economías de escala gracias a unas mayores series de producción para todo el mercado europeo, y se garantiza a los consumidores de la UE que estos vehículos innovadores cumplirán unas elevadas normas de seguridad y protección del medio ambiente. Con la adaptación del sistema de homologaciones a las tecnologías del futuro también se permitirá

⁹ SEC(2005) 431, Documento de trabajo de los servicios de la Comisión: Simplificación en el 7º Programa Marco COM(2005) 119 final.

que la industria automovilística de la UE mantenga su posición frente a sus principales competidores, mejorando su competitividad en los mercados de terceros países.

- En diciembre de 2007, la Comisión propuso una nueva directiva que tiene como objetivo eliminar los obstáculos al **comercio intracomunitario de productos relacionados con la defensa**. Hasta la fecha, la circulación de estos productos dentro del mercado interior ha estado restringida por una serie de procedimientos nacionales diferentes que no solamente imponen a las empresas y las autoridades públicas una carga administrativa que supera los 430 millones de EUR al año, sino que también introducen unos largos plazos de ejecución, de hasta varios meses. Esta carga es claramente desproporcionada en relación con las necesidades reales de control, tal como demuestra el hecho de que, aunque se expidan aproximadamente once mil quinientas licencias al año para transferencias intracomunitarias, solamente se han denegado tres solicitudes durante el período 2004-2006. Esta propuesta contribuirá a que la industria de defensa europea sea económica y tecnológicamente más competitiva, mejorará las condiciones de la participación de PYME en el desarrollo y la producción de armamento, permitirá que los Estados miembros satisfagan sus necesidades militares en unas condiciones de seguridad adecuadas con un coste menor y reforzará la seguridad de la contratación pública y la cooperación industrial.

2.6. Instrumentos de comunicación y consulta de las partes interesadas

Una información clara y transparente sobre los progresos en la aplicación del programa de simplificación es de capital importancia para garantizar que este programa se siga aplicando con la misma energía. Con este fin, la Comisión ha creado un sitio web sobre simplificación¹⁰ para proporcionar información general sobre la estrategia de simplificación y permitir que las partes interesadas comprueben los progresos del programa permanente. Además, en una serie de otros sectores (por ejemplo la agricultura) la consulta con las partes interesadas y los expertos sectoriales de los Estados miembros se ve facilitada a través de grupos sectoriales.

La Comisión, de conformidad con su intención de simplificar la vida práctica de las partes interesadas, puso en marcha en otoño de 2007 un nuevo sitio web de consulta en línea para poder conocer las preocupaciones y las sugerencias de las empresas en relación con las cargas que imponen la legislación y la burocracia en general. La Comisión utilizará de la mejor manera posible esta información procedente de las partes interesadas. Cualquier contribución que aborde asuntos más amplios relativos al contenido de la regulación, aunque esté principalmente concebida para el «Programa de Acción para la Reducción de las Cargas Administrativas en la Unión Europea», se tendrá en cuenta a la hora de configurar la estrategia de simplificación.

3. PROGRAMA DE CODIFICACIÓN

La codificación¹¹ es un elemento clave de la acción de la Comisión destinada a reducir el tamaño del acervo y hacerlo más accesible.

El programa de codificación incluye aproximadamente cuatrocientos actos de codificación, la mayor parte de los cuales son propuestas legislativas. Un total de ochenta y siete de estos actos ya han superado con éxito el proceso de codificación y han sido adoptados y publicados en el Diario Oficial (sesenta y dos actos de la Comisión y veinticinco del Parlamento Europeo y del Consejo). Estos ochenta y siete actos sustituyen a trescientos cuarenta y ocho actos anteriores. Además, sesenta y cinco actos están pendientes ante el legislador y la Comisión

¹⁰ http://ec.europa.eu/enterprise/regulation/better_regulation/simplification/intro.htm

¹¹ Véase nota nº 7.

adoptará próximamente cuatro actos. De esta manera, la Comisión ya ha finalizado ciento cincuenta y dos actos de codificación.

A fin de completar el programa de codificación para finales de 2008 (anexo 2), se han tomado medidas para poner fin al retraso en la traducción a las nuevas lenguas de la UE de los textos que se están codificando. La adopción por el legislador de actos codificados está sujeta a las normas establecidas en el Acuerdo Interinstitucional de 20 de diciembre de 1994 sobre un Método de Trabajo Acelerado con vistas a la Codificación Oficial de los Textos Legislativos.

4. ASPECTOS INTERINSTITUCIONALES

4.1. Propuestas pendientes ante el legislador

La responsabilidad por una simplificación con éxito se comparte entre todas las partes implicadas en el proceso de toma de decisiones. En 2007, el legislador consiguió eliminar el retraso de las propuestas que se originó con el programa de simplificación para el período 2003-2004.

No obstante, todavía se encuentran pendientes ante el legislador cuarenta y cuatro propuestas del programa permanente del período 2005-2009 (anexo 3). En el caso de las directivas, las normas de la CE deben transponerse posteriormente a la legislación nacional. Por consiguiente, pueden transcurrir varios años antes de que los ciudadanos y las empresas puedan disfrutar de los beneficios de la simplificación, y percibirlos.

La Comisión, por consiguiente, ha alentado a las demás instituciones a adoptar sus propuestas de simplificación en el plazo más breve posible.

4.2. La simplificación y las demás instituciones

En el marco de la Estrategia de Lisboa para el Crecimiento y el Empleo, el Consejo de Competitividad supervisa la aplicación del programa «Legislar mejor» en un informe de evolución al final de cada Presidencia, en el que se indican, entre otras cosas, los progresos del programa permanente de simplificación. Si bien la Comisión acoge con satisfacción el interés continuado del Consejo por la mejora de la legislación en general y por la simplificación en particular, observa que los métodos de trabajo del Consejo para el examen de las propuestas de simplificación todavía no han cambiado en lo fundamental, a pesar de los compromisos contraídos en el Acuerdo Interinstitucional «Legislar mejor».

En su Resolución sobre la estrategia para la simplificación del marco regulador¹², el Parlamento Europeo acogió favorablemente el programa de la Comisión sobre codificación y acordó que debía promoverse y respaldarse el programa de simplificación mediante las correspondientes iniciativas de simplificación nacionales. El Parlamento invita asimismo a las tres instituciones a celebrar un acuerdo interinstitucional sobre métodos de trabajo acelerados para medidas de simplificación. La Comisión aprecia el apoyo constructivo del Parlamento y las medidas ya tomadas para aplicar el programa «Legislar mejor». En particular, se congratula de la modificación de los procedimientos internos del Parlamento para examinar las propuestas de codificación y refundición, con lo que se clarifica la división de responsabilidades entre las comisiones y se protegen las partes codificadas de modificaciones indebidas sobre su contenido.

¹² Número de referencia del PE: A6-0271/2007 / P6_TA-PROV(2007)0365

Por consiguiente, la Comisión alienta al Consejo y al Parlamento a que velen por una rápida adopción de sus propuestas de simplificación pendientes y por que se mantenga durante el proceso el contenido de simplificación.

4.3. Cooperación con el Comité Económico y Social Europeo y el Comité de las Regiones

La Comisión ha tratado de articular mejor la consulta a la sociedad civil organizada sobre la calidad reguladora del acervo.

A petición de la Comisión, el CESE emitió en septiembre de 2007 su dictamen sobre las posibilidades de simplificación del marco regulador en el sector de las máquinas. En esta acción debían incluirse tanto normas de sectores específicos como la legislación más general que afecta a las máquinas, como por ejemplo la salud, la seguridad y la protección del medio ambiente. La Comisión tiene la intención de proseguir su cooperación y ya ha pedido al Comité otros informes sobre otros sectores clave, tales como el sector de la construcción y los servicios a las empresas.

La Comisión también acoge favorablemente el informe sobre «Legislar mejor» adoptado por el Comité de las Regiones en octubre de 2007¹³.

5. CONCLUSIONES / OBSERVACIONES FINALES

En la actualidad, la reducción de la burocracia está firmemente incorporada a la agenda política de la Comunidad. Al igual que los otros componentes del programa «Legislar mejor» elaborado por la Comisión al inicio de su mandato, la Estrategia de Simplificación ha alcanzado velocidad de crucero y está proporcionando sus primeros beneficios tangibles, que son impresionantes. La Comisión finalizará el examen de las aproximadamente noventa y cinco mil páginas del acervo comunitario a fin de determinar los ámbitos en los que podrían centrarse en el futuro las actividades de simplificación, e integrará los resultados en el programa permanente de simplificación actualizado que se presentará a principios de 2009. La Comisión está determinada a concluir con éxito el actual Programa Permanente y a lograr que el acervo sea lo más sencillo, ágil y actualizado posible. Se ha puesto en práctica un método, y la acción está produciendo resultados.

No obstante, resulta evidente que el marco regulador no puede ser mejorado solamente por la Comisión. Más que nunca, se precisa un compromiso genuino, coordinado y determinado a todos los niveles reguladores para traducir las buenas intenciones políticas en resultados tangibles y garantizar que se cumplan las expectativas auténticas de las empresas y los ciudadanos. Por su parte, el Parlamento Europeo y el Consejo comparten la responsabilidad institucional de impulsar las propuestas de la Comisión hasta la fase final de adopción. Hasta la fecha, a pesar de los esfuerzos reconocidos, se ha adoptado menos de una cuarta parte de las propuestas de simplificación presentadas por la Comisión que necesitan la adopción del legislador. Naturalmente, es de capital importancia que se preserve el contenido de simplificación de estas propuestas durante el proceso de toma de decisiones.

En este mismo sentido, las autoridades nacionales, regionales o locales responsables de la transposición y la aplicación de la legislación de la UE deberían esforzarse a fin de complementar el trabajo efectuado en Bruselas. En demasiados casos, una transposición fuera de plazo, o la denominada «sobre-regulación», socavan el efecto simplificador de las normas

¹³ Dictamen del Comité de las Regiones sobre el tema «Paquete legislar mejor 2005 y 2006». CdR397/2006 fin.

de la UE. Se espera que el trabajo realizado en la actualidad para determinar y medir las cargas administrativas en determinados ámbitos políticos proporcione interesantes lecciones a este respecto. En línea con su reciente Comunicación «Una Europa de resultados – la aplicación del derecho comunitario», la Comisión intensificará sus actividades al inicio del proceso a fin de evitar las infracciones de la legislación de la CE mejorando la calidad de la asistencia que ofrece a los Estados miembros para facilitar la correcta transposición y aplicación de las directivas.

Por último, dado que la mayor parte del ámbito regulador de la UE no se configura a nivel de la Comunidad, también deben desarrollarse o reforzarse programas de simplificación a nivel nacional (y, cuando proceda, regional) para hacer frente a la ingente burocracia que surge con independencia de la legislación de la UE. En el futuro, la Comisión insistirá en este aspecto cuando examine los programas nacionales de reforma presentados en el contexto de la Agenda de Lisboa.

2008¹⁴				
1.	Legislative proposals arising from the Communication on the 'Health Check' in the Common Agricultural Policy	Revision	Following the 2007 Communication on the "Health Check" in the Common Agricultural Policy (CAP), the legislative proposals will provide options aiming at making the Single Payment Scheme more effective, adapting the market support instruments and addressing the new challenges facing the sector. The "Health Check" is not a fundamental reform, rather it essentially aims to ensure that the CAP functions effectively and to simplify it where possible. This initiative arises from the review clauses regarding the Single Payment Scheme and certain agricultural markets that were included in the 2003/04 CAP reforms.	
2.	Commission Regulation on information and promotion actions for agricultural products on the internal market and in third countries	Revision	This initiative has as objective to establish the conditions regarding co-financing of information and promotion programmes for agricultural products in the internal market and in third countries. It will take the form of a consolidation of two existing Commission Regulations ((EC) No 1071/2005 and (EC) No 1346/2005).	X

¹⁴ As adopted in the Commission Legislative and Work Programme of the Commission 2008 - COM(2007) 640.

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
3.	Private Storage: Commission Regulation laying down common rules for private storage of agricultural products under Common Agricultural Policy	Revision	The aim of the proposal is to replace multiple sectoral rules by horizontal ones and to simplify management mechanisms relating to the private storage of agricultural products. Existing sectoral provisions, which may vary from one sector to another, will be examined with a view to eliminating unnecessary provisions and to harmonising the system of private storage.	
4.	Council Regulation amending Regulation (EC) No 1234/2007 establishing a common organisation of markets (CMO) and on specific provisions for certain agricultural products (single CMO regulation)	Revision, recast and repeal	The single common market organisation (CMO) regulation, scheduled for adoption by Council in October 2007, merges existing CMOs into a single text. It does not modify policy but streamlines and harmonises legislation. Various substantive amendments were made in the meantime to the existing CMOs. This is notably the case in the milk, the sugar and the fruit and vegetables sectors. It is important to incorporate these amendments into the single CMO in order to achieve the aim of having one single simplified legal text which will facilitate the access to the existing legislation and thus create a much higher degree of transparency and legal clarity. The initiative thus concerns the subsequent Commission proposal.	X
5.	Milk Package (two separate initiatives): 1) Commission Regulation laying down certain implementing rules with regard to intervention for butter 2) Commission Regulation laying down certain implementing rules with regard to intervention for skimmed milk powder	Revision	The purpose of the initiative is to simplify the procedures relating to intervention buying of butter, to abolish national butter quality grades, and to abolish private storage aid for cream and skimmed milk powder. Technical clarifications and simplification (e.g. concerning the security provisions) will improve the readability of the text.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
6.	Streamline Controls: Amendment of Commission Regulation (EC) No 796/2004 regarding the detailed rules of cross compliance and the integrated administration and control system	Revision	This proposal stems directly from the Commission report to the Council on the application of the system of cross-compliance (COM(2007) 147). Its amendments will lead to simpler and more effective rules concerning the controls on direct payments to farmers with regard to the selection of the control sample, the timing of these controls, and the specific rules concerning on the spot checks.	X
7.	Starch Production Refunds: Commission Regulation amending Regulation (EEC) No 1722/93 laying down detailed rules for the application of Council Regulation (EEC) No 1766/92 concerning production refunds in the cereals sector	Revision	Objective of this initiative is the simplification of control procedures by increasing the threshold for special control requirements. It will simplify the business environment in which EU starch producers operate by eliminating the unnecessary / disproportionate administrative measures related to the control on modified starches This proposal has been elaborated following the consultation of NGOs/stakeholders.	X
8.	Controls of export refunds: Commission Regulation amending Regulations (EC) No 2090/2002, (EC) No 3122/94 and (EC) No 800/1999 as regards physical and substitution controls in the framework of export refunds on agricultural products	Revision	Modification of Regulation (EC) No 2090/2002 laying down detailed rules for applying Council Regulation (EC) No 386/90 as regards physical checks carried out when agricultural products qualifying for refunds are exported.	X
9.	Fresh fruit and vegetables: proposal for a Commission Regulation laying down the marketing standards for fresh fruit and vegetables and establishing requirements on checks on conformity to these marketing standards	Revision	The objective of the proposal is to merge 34 regulations on marketing standards for fresh fruit and vegetables into one regulation, reduce the list of products covered by marketing standards and rationalise checking operations.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
10.	Common market organisation of wine: amendment of the Council Regulation establishing the single Common Market Organisation Regulation (EC) No 1234/2007 to include the provisions with regard the common market organisation of wine.	Revision	The amendment will include the specific rules concerning the common organisation of the wine market into the general rules concerning the organisation of the common market in agricultural produce. This will clarify and simplify the EU legislation.	X
11.	Commission Regulation on the application of Articles 87 and 88 of the Treaty to regional aid, SME, R&D, environmental aid, employment, training. (General Block Exemption Regulation - final adoption)	Revision	The final objective pursued by the Commission is to group all existing Block Exemption Regulations into one single Regulation for the first time ever. This will bring a qualitative impact in terms of clarity, predictability and transparency of EU rules for business and national and regional authorities. The new GBER will cover areas already covered by block exemptions (training, employment, SME) and new areas (environment, risk capital, regional aid). Texts on research and capital risk were adopted in 2006, but those applicable to the environment will be adopted in 2007. Finalisation of the draft new GBER is scheduled for 2007 and formal adoption by the Commission in 2008.	
12.	Council Directive 2001/23/EC on the approximation of the laws of the Member States relating to the safeguarding of employees' rights in the event of transfers of undertakings, businesses or parts of undertakings or businesses	Revision	Directive 2001/23/EC does not contain any provisions on conflict of laws. As a result, there is a lack of clarity as to how to apply the provisions of the Directive to cross-border transfers. The aim of the proposal - to be made by the Commission following the two phases of consultation of social partners - is therefore to clarify the application of the Directive to cross-border operations. The proposal would increase legal certainty for economic and judicial agents and result in costs savings for undertakings and better protection for workers. <i>Following the results of the first phase of consultations which took</i>	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			<i>place in November 2007, it appears that the revision of the Directive is not necessary.</i>	
13.	Community initiative on work-related musculoskeletal disorders	Recast	The objective of this initiative is to integrate into a single legislative instrument the provisions on the protection of the health and safety of workers from the risks of musculo-skeletal disorders at work. These provisions are currently fragmented over different directives, namely Council Directive 90/269/EEC on the minimum health and safety requirements for the manual handling of loads and Council Directive 90/270/EEC on the minimum health and safety requirements for work with display screen equipment. A single legislative instrument would be more comprehensive, clearer and easier to apply. It will benefit employers in terms of legal clarity and workers in terms of providing better protection against the risks of musculo-skeletal disorders.	
14.	Revision of the Pharmaceutical "Variations" Regulations: change to the legal basis, in Directives 2001/83/EC on the Community code relating to medicinal products for human use and 2001/82/EC for veterinary use	Revision	The objective is to simplify the rules concerning post-licensing changes to medicines (so-called 'Variations' Regulations). Administrative management of these rules currently mobilise more than 60% of the human resources and financial costs of companies' regulatory departments. In some cases, this burden may hinder innovation by preventing the introduction of changes that are beneficial to patients and society. The objective of this initiative is to reduce the administrative burden for industry by streamlining the circumstances obliging industry to fill applications for variations of human and	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			veterinary medical products. The current legal basis for implementing rules on changes to the marketing authorisation doesn't allow the Commission to set rules for purely national marketing authorisation. This legal basis should be widened to close the gap for harmonisation. This initiative aims at changing the legal basis for Directives: 2001/83/EC on the Community code relating to medicinal products for human use and Directive 2001/82/EC on the Community code relating to medicinal products for veterinary use.	
15.	Revision of the pharmaceutical "Variations" Regulations: simplification and modernisation of Regulation (EC) No 1084/2003 and (EC) No 1085/2003	Revision	The objective is to reduce the administrative burden for industry by simplifying the rules for variations of human and veterinary medicinal products. The Variations regulation are implementing rules adopted by the Commission on changes to the marketing authorisation of pharmaceuticals.	
16.	Regulation on Advanced Safety Features and Tyres	Revision	The proposal will simplify EC legislation in the domain of vehicle safety by replacing existing legislation in the area into one main Regulation. It will include electronic stability control and low rolling resistance tyres. The proposal will repeal some 50 separate Directives and will replace them, where appropriate, with references to UNECE Regulations. The beneficiaries of the simplification aspect of this proposal will primarily be vehicle manufacturers and national approval authorities. Replacing Directives with a Regulation will also ease the administrative burden on the Member States since they would not have to transpose legal acts in the domain of vehicle safety in the future. Furthermore, references to UNECE Regulations will avoid the existing duplication between EU and UNECE law and will thus lead to "better regulation".	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
17.	Textiles: simplification and replacement by a single regulation	Revision	The replacement of 3 Directives by 1 Regulation will simplify procedures for Member States, companies and the Commission leading to shorter periods for adoption of new fibre names. The standard methods of quantitative analysis of binary and ternary textile fibre mixtures currently included in two of the directives are to be transferred to the standardisation process. This means that consumers and companies could benefit faster from the use of new innovative products. Innovation and technological developments will be thus encouraged. In addition, the legal nature of the legislation (Regulation) will facilitate the application of technical adaptations by the Member States.	
18.	Pressure Vessels and Transportable Pressure Equipment	Repeal	The objective is to repeal 4 Directives on Pressure Vessels (76/767/EEC, 84/525/EEC, 84/526/EEC, 84/527/EEC) and integration of the still relevant provisions into the revision of Directive 99/36/EC (Transportable Pressure Equipment).	
19.	Metrology: extension of the scope of Directive 2004/22/EC on measuring instruments and repeal of 8 "old approach" methodology Directives	Repeal	The objective is to provide for a coherent legal framework for legal metrology. The extension of the scope of the Directive is the legal prerequisite for the repeal of the following "old approach" Directives.	
20.	Eco-management and audit scheme: revision of the Regulation (EC) No 761/2001 of 19 March 2001 allowing voluntary participation by organisations in a Community eco-management and audit scheme (EMAS)	Revision	The revision aims at improving environmental performance of the organisations participating and increasing participation from both industrial and public sector. Legal compliance and environmental performance improvement of the participating organisations will be facilitated by providing access to advice on environmental legal obligations and guidance on the best environmental management practice. Administrative burden will be reduced for large corporations	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			by allowing corporate registration and for small organisations by cluster registration. All participating organisations will benefit from reduced procedural requirements, simplified rules for the use of logo and harmonised rules for accreditation, verification and registration. In addition SMEs and small local authorities will benefit from reduced verification and reporting obligations and lower registration fees. Synergies with other environmental management systems will be facilitated. Incentives and regulatory relief for participating organisations by the member states will be encouraged.	
21.	Eco-label award scheme: revision of Regulation (EC) No 1980/2000 of the European Parliament and of the Council of 17 July 2000 on a revised Community eco-label award scheme	Revision	The revision aims at enhancing effectiveness and market impact by increasing the range of eligible product groups and the number of eco-labelled goods and services actually available to the consumer. For this purpose, the procedure of developing and adopting eco-label criteria will be thoroughly changed and simplified. Economic stakeholders will be involved to a greater extent into the process, thereby increasing ownership and self-regulatory aspects of the scheme, whereas the administrative burden put on Member States will be reduced. Once the criteria are adopted, it will be easy for economic operators to apply for the award of the eco-label to their products. Synergies with existing eco-labels at national level will be facilitated and limits will be put on the costs and fees Member States' authorities may charge on the applicant. Furthermore, the criteria should be defined in such a way that they can be easily used for the purpose of green public procurement.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
22.	Biocides: revision of the legislation on the placing of biocidal products on the market	Recast	This proposal follows the 2007 Report on the implementation of the Biocides Directive (98/8/EC). The objective is to provide a revised legal framework for regulating the placing on the market of biocidal products. The revision aims to address concerns regarding complexity and the cost, as well as the availability of certain biocidal products, and bring about a significant simplification of the current legislative framework and procedures. The revision of the biocides legislative framework will bring it in line with the EU Chemicals policy (REACH Regulation).	X
23.	WEEE: revision of Directive 2002/96/EC on Waste Electric and Electronic Equipments	Revision	The revision of the Directive 2002/96/EC will examine possibilities to increase the efficiency and effectiveness of the directive in achieving its environmental goals and eliminate any unnecessary costs to business, consumers, NGOs and public authorities arising from implementation of the directive. The revision will concern the targets, scope, treatment requirement and the operation of the producer responsibility provisions.	
24.	RoHS: revision of Directive 2002/95/EC on the limitation of the use of certain hazardous substances in the electric and electronic equipments	Revision	The revision aims at clarifying concepts and facilitate the implementation and enforcement while increasing the environmental benefits. It will enhance legal certainty for all stakeholders and will facilitate implementation by manufacturers by streamlining the mechanism for granting exemptions and enforcement by national authorities through market surveillance and administrative cooperation clauses. It will furthermore provide a more transparent level playing field for manufacturers and simplify procedures through introduction of harmonised compliance checking. Most of these measures will also enhance the internal market effect of the Directive and reduce	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			administrative costs for administrations and manufacturers.	
25.	Ozone layer: revision of Regulation (EC) No 2037/2000 on substances that deplete the ozone layer	Recast	As the production and consumption of the substances covered have been reduced or phased out, many provisions of the Regulation, after seven years in force, need to be repealed or updated. Other provisions may benefit from simplification such as clarification of definitions and procedures and interaction with other pieces of legislation. This will reduce the cases of ambiguous interpretation and the risk of infringements and consequent administrative burdens. In particular, most of the administrative cost reduction will result from ending exemption provisions on some uses of ozone depleting substances. The beneficiaries will be the Member States and the Commission. Overall, the cost savings from ending the exemptions is expected to exceed any additional cost associated with new control measures to combat illegal trade of ozone depleting substances.	
26.	SEIS: legislative proposal to follow up the Communication on a Shared Environmental Information System (SEIS)	Revision	Following the 2007 Communication the Commission will adopt legislative proposals underpinning the development of SEIS that could address reporting streamlining and/or coherence of approaches to monitoring and information. This initiative aims to improve the availability, quality and comparability of data, avoid redundancies in reporting requirements to Member States and therefore, the administrative burden, remove obstacles related to information accessibility and enhance the coherence of monitoring systems and	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			indicators.	
27.	Revision of Regulation (EC) No 638/2004 of the EP and of the Council on Community statistics relating to the trading of goods between Member States	Revision	Simplification of Intrastat with a view to alleviate the statistical reporting of economic operators, in particular SMEs, taking into account the outcome of the ongoing pilot project of administrative costs and a future feasibility study to analyse workability of a collection system limited to one flow.	
28.	Modernisation and recast of the CFP control system under Regulation (EC) No 2847/93	Recast	The main objectives are the review, harmonisation and simplification of existing rules - Regulation (EC) No 2847/93 - in the fisheries control area. The modernisation of the procedures will facilitate a better enforcement by alleviating the burden and constraints for the sector and public administrations and increasing the use of IT tools to reduce reporting obligations (e.g. reducing administrative burdens). It would be also of interest for NGOs which campaign for stringent and effective rules.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
29.	Proposal for a Commission Regulation laying down implementing rules for the collection and management of data needed to conduct the CFP	Revision	The proposal is intended to establish implementing rules according to the new framework Council Regulation on data collection, currently under discussion at the Council. The main innovations will include the support for new approaches such as fleet and area based management and the move towards the ecosystem approach as well as the promotion of a more regional approach to data collection. Moreover, new provisions for the access to data are to be included.	X
30.	Revision of the company law, accounting and auditing acquis	Revision	Measures to simplify the company law environment for companies in the context of the "Better Regulation" framework.	
31.	Consolidation of accounting standards and interpretations endorsed for use in the EU	Recast	Commission will prepare a consolidated version of all International Financial Reporting Standards (IFRS) in force as per 31.12.2007. It will enable constituents to refer to only one Regulation as it will contain all endorsed IFRS. In this context any translation errors contained in the current Regulations will be corrected.	
32.	Recasting - Codification Motor insurance Directive	Codification	Codification of the current 6 Directives into one single Motor Insurance Directive in order to have a motor insurance acquis more comprehensible, easier to apply and more effective in achieving its goals.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
33.	Proposal for a Framework Directive on Consumer Contractual Rights	Revision	The overall aim of the revision of the acquis, is to simplify and improve the coherence of the consumer regulatory framework and thus enhance legal certainty both for consumers and business. The legal instrument will be a combination of codification and repeal of parts of existing directives and enactment of new rules. The revision will be based on a mixed approach consisting of the adoption of a horizontal instrument, underpinned whenever required by vertical revisions of existing directives. This framework instrument would systematise and regulate in a uniform fashion common features of the consumer acquis. The instrument would provide common definitions and regulate the main consumer contractual rights and remedies. It would also regulate consistently the contractual aspects of sales which are currently scattered across several Directives.	
34.	Simplify procedures of listing and publishing information in the veterinary and zootechnical fields	Revision	The general objective is to harmonise and simplify, essentially by means of electronic tools, the current procedures for listing, updating and publishing information in the veterinary and zootechnical fields such as lists of approved animal health establishments and breeding organisations in Member States and Third Countries and lists of certain national reference laboratories. 22 Council acts are concerned.	X
35.	Harmonisation of Maximum Residues Levels (MRL) for pesticides	Revision	The main objective of this proposal will concern the transfer and update by comitology of the list of MRLs (Annex II) and temporary MRLs (Annex III) based on European Food Safety Agency (EFSA) assessment and mathematical models/expert calculations. The proposal will be a final step towards harmonisation of divergent national MRLs.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			Completion of the replacement of 4 Directives by one Regulation.	
36.	Review of the provisions related to the total feed ban	Revision	A ban on the feeding of mammalian meat and bone meal (MBM) to cattle, sheep and goats was introduced as of July 1994. This partial ban was extended to a total EU wide suspension on the use of processed animal protein in feed for any animals farmed for the production of food on 1 January 2001 with some exceptions like the use of fish meal for non-ruminants. Any presence of prohibited constituents of animal origin in feed is considered as a breach of the feed ban i.e. the zero-tolerance. Following the adoption of the TSE Road map the Commission issued a Commission staff working paper i.e. Work Programme on TSE [SEC(2006) 1527] on future legislative actions in the field of transmissible spongiform encephalopathy. One of the topics concerns a revision of the feed ban provisions. The starting point when revising the current feed ban provisions should be risk-based but at the same time taking into account the control tools in place to evaluate and ensure the proper implementation of this feed ban.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
37.	Revision of food safety in EU Switzerland trade in agricultural products - Decision n° 1/2008 of the Joint Veterinary Committee set up by the Agreement between the European Community and the Swiss Confederation on trade in agricultural products amending appendix to Annex 11 to the Agreement - Decision to amend Commission Decision 2001/881/EC on import controls to abolish border inspections posts between EC and Switzerland	Revision	The revision of the safety provisions will consist of: - Completion of the equivalence determination between the Swiss legislation related to food safety and veterinary policies including border veterinary controls and import conditions, updating of the content of the Agreement with regard to legislations adopted since the last Agreement modification. - As Switzerland has accepted to apply the EC acquis in relation to animal health, food safety and hygiene controls, a uniform high level of protection will therefore exist in the EC and Switzerland. This permits the abolition of border controls on trade in animals and animal products between the two.	X
38.	Recast of basic safety standards legislation for the protection against the dangers arising from exposure to ionising radiation	Recast	Recast into a single Council Directive of relevant Euratom acts on radiation protection including a substantial revision of the Basic Safety Standards (BSS) directive. The objective is to bring the BSS directive in line with the forthcoming recommendations of the International Commission on Radiological protection (ICRP), when available. At the same time the legislation in the field of radiation protection has to be simplified.	
39.	Legislative proposal revising Council Directive 2006/67/EC with the aim of strengthening the European emergency oil stocks system	Revision	The current system of emergency oil stocks shows limitations and shortcomings on several accounts. The provisions of the existing legislation will be revised in order to create a system for coping with oil supply disruptions. The new proposal will replace existing Directives and contribute to simplification of EU legislation.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
40.	Recasting of Directive 2002/91/EC of 16 December 2002 on the Energy Performance of Buildings	Recast or Revision	The Energy Performance of Buildings Directive makes certificates for the energy performance of buildings mandatory when buildings are constructed, sold or rented out and requires minimum energy performance requirements for new buildings and existing building which undergo major renovation. Furthermore, the Directive requires regular inspections of boilers and air-conditioning systems in order to guarantee their energy efficient operation. An amended Directive could enlarge the scope to more buildings, strengthen and specify some of these requirements and add, for instance, financing aspects. The changes under consideration aim at overcoming multiple barriers that hinder the utilization of the vast potential for energy demand reductions in the buildings sector. The recasting of the Directive is part of package on the Strategic Energy Review and included in the Energy Efficiency Action Plan. The amendments will cover some articles of the Directive and add new ones. The "simplification" will consist of using the "recasting" technique to facilitate reading and comprehension for the implementing authorities and for the many stakeholders affected.	X
41.	Recast of Council Directive 92/75/EEC of 22 September 1992 on the indication by labelling and standard product information of the consumption of energy and other resources by household appliances	Recast	Amend the existing framework Directive to enlarge its scope (beyond domestic appliances) and update for modern communication tools (e.g. internet) to enhance public/consumer awareness on efficient products. The simplification will be obtained by using the recasting technique for consolidating the original Directive with its amendment in one single document.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
42.	Proposal to recast the legislation concerning the "first railway package" following the report in 2006 of its implementation, in particular for the requirements concerning the relations between infrastructure managers and railway undertakings	Recast	The first and successive railway packages are legal instruments to achieve the Community's objective to create a European Railway Area through market opening, as well as technical and regulatory market integration. As rail markets transform, an ongoing review of the suitability of the EU legal framework appears appropriate with possible simplification and streamlining. The Commission intends to present a communication accompanied by a proposal for modification/recast of the existing acts, especially Directives 91/440/EEC and 2001/14/EC. The political goal is to enhance the competitiveness of rail transport in Europe and to hence contribute to achieving the objectives of the Lisbon strategy. The recast aims at a simplification of the text of the three Directives of the 1st railway package by merging them into one legal act, a 'railway access code'. By eliminating existing cross-references between the Directives the reading and implementation will be come easier for the implementing authorities and the many stakeholders affected.	
43.	Revision of the Council Directive 94/56/EC establishing the fundamental principles governing the investigation of civil aviation accidents and incidents and of Directive 2003/42/EC on occurrence reporting in civil aviation	Revision or Recast	The older directive needs to be modernised following the establishment of EASA and following the advice of the Group of Experts established by EC Decision 2003/425/EC. In addition the newer directive needs to be built on to create a minimum set of centralised functions, including a database to allow appropriate entities to carry out trend analysis or other studies, and keep track of safety recommendations, while providing information to the general public. Both directives will be replaced by a single piece of legislation. The objective of the simplification is to take advantage of the necessary revision of the Directive 94/56 to adapt it to recent developments by merging it with Directive 2003/42/EC to create a single legislative act as both	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			directives deal with the use of feedback information to improve accident prevention.	
44.	Modernise the Marine Equipment Directive 96/98/EC	Recast or Revision	The objective is to modernise and reform the existing system established by Council Directive 96/98/EC on marine equipment. Its main objectives are: 1) to produce a consolidated version of the text following the successive amendments of the Directive 2) to improve the functioning of the Directive's system by addressing the existing shortcomings ; 3) to adapt it to the reform of the New Approach. It is intended to abrogate the existing Directive and replace it with an entirely new one, while recourse to recast is not excluded. At present, the Directive needs periodic amendments in order to keep pace with the safety requirements and technical standards produced by the International Maritime Organisation as well as the international and European standardisation bodies. This produces an inevitable mismatch between the European and international regulatory frameworks, sometimes spanning several years, whose correction will greatly facilitate the work of the sectors concerned and thus favour the competitiveness of the European marine equipment industry. Furthermore, the adaptation of the directive to the new regulatory framework for the free movement of goods (revision of the new	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
			approach) is expected to improve the readability of this instrument and reduce the administrative burden on the industry. Timing of adoption is conditional on significant progress being achieved by December 2007 in the legislative process as regards the revision of the New Approach.	
45.	Transport of radioactive material	Recast	The objective is to update and simplify the Community regulatory framework for transporting radioactive material There are currently more than 20 Directives, Regulations and Recommendations governing the transport of radioactive material within the EU. Harmonisation will lead to simplification of rules and procedures.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
2009				
46.	Amendment to Annex IV to Regulation (EC) No 2003/2003 on fertilizers	Revision	It is intended to amend Annex IV of Regulation (EC) No 2003/2003 in order to ensure that CEN Standards can be considered as official methods of analysis to be used as reference for official controls. Their updated version delivered by CEN will no longer be included in the legal act but will exist in the form of separate standards to which the Community law will refer – the detailed description of test methods currently contained in the Annex will be deleted.	
47.	Repeal of 24 Directives on agricultural and forestry tractors	Repeal	The proposal will simplify EC legislation on agricultural and forestry tractors by replacing existing legislation (including the present Framework Directive and the separate Directives) by one main Regulation. It will introduce improved requirements for tractor brakes as well.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
48.	Simplification of Directives concerning medical devices, active implantable medical devices, blood and plasma	Recast	The objective is to simplify and strengthen the rules in order to ensure a high level of health protection while at the same time ensuring a smooth functioning of the internal market.	
49.	Repeal of 14 Directives on two and three wheelers	Repeal	The proposal will simplify EC legislation on 2 and 3-wheel motor vehicles by replacing existing legislation (including the present Framework Directive and the separate Directives) by one main Regulation.. It will introduce a) modern emissions legislation b) ABS and c) Automatic emergency braking for 2 and 3-wheelers.	X
50.	Mutual acceptance of personnel licences and harmonisation of technical requirements in civil aviation	Repeal	Repeal of Council Directive 91/670 on mutual acceptance of personnel licences for the exercise of functions in civil aviation and Council Regulation 3922/91 on the harmonisation of technical requirements and administrative procedures in the field of civil aviation.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
51.	Recast of Regulation (EC) No 3821/85 on recording equipment in road transport	Recast	Enhancing road safety, fair competition and adequate working conditions for professional drivers. More specifically: - improve the capacity of the system to resist to attempts to tamper with or alter the data on driving time and speed. - reduce administrative costs for undertakings which use the tachograph on their fleets and for control officers carrying out checks. The Regulation were amended 11 times and have to be simplified.	
52.	Proposal for a Council Directive amending Directive 77/388/EEC as regards the VAT treatment of public authorities and the exemptions for certain activities in the public interest	Review	The proposal aims at ensuring a more <u>harmonised</u> and <u>neutral</u> VAT system. Harmonisation: due to certain options and vague definitions, the practical application of the provisions related to public authorities varies widely among Member States creating differences in the VAT treatment of public authorities between Member States. Neutrality: distortions of competition between the public and the private sector and several economic inefficiencies as well as tax avoidance schemes are the main disadvantages of the current rules.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiatives to COM (2005) 535 and COM(2006) 690
53.	Proposal for a Council Directive replacing Directive 92/12/EEC on the general arrangements for products subject to excise duty and on the holding, movement and monitoring of such products.	Review	The proposal will modernise and simplify the provisions of the Directive, integrate judgements of the ECJ, as well as guidelines of the excise committee and adapt the Directive to support the computerisation of the procedures for the movement of excise products under suspension of excise duty.	
54.	Recast of Council Directive 2003/49/EC on a common system of taxation applicable to interest and royalty payments made between associated companies of different Member States as amended.	Recast	Consolidation of the legal text and adoption of simplified procedures relating to exemption from withholding tax.	

ANNEX 2

Indicative list of planned codification for 2008

	Policy area	Short title	Full title
Commission Autonomous Act			
1	Agriculture and Rural Development	Recast 1988D0566 (by DG) - décision Commission	Proposal for a COMMISSION DECISION listing the products referred in the second subparagraph of Article 3 (1) of Council Regulation No 1898/87 (recast version) (1988d0566)
2	Agriculture and Rural Development	Recast 1997R0936 (by DG) - Commission Regulation opening and providing for the administration of tariff quotas	Proposal for a COMMISSION REGULATION opening and providing for the administration of tariff quotas for high-quality fresh, chilled and frozen beef and for frozen buffalo meat (1997R0936)
3	Agriculture and Rural Development	Recast 1992R0094 (by DG) - règlement Commission	Proposal for a COMMISSION REGULATION laying down detailed rules for implementing the arrangements for imports from third countries provided for in Regulation (EEC) No 2092/91 on organic products of agricultural products and indications referring thereto on agricultural products and foodstuffs (recast version) (1992R0094)
4	Agriculture and Rural Development	Codification 2001R1799 - Commission Regulation laying down the marketing standard for citrus fruit	Proposal of a Commission Regulation (EC) No 1799/2001 of 12 September 2001 laying down the marketing standard for citrus fruit
5	Agriculture and Rural Development	Codification 1996R2449 - règlement Commission	Proposal for a Commission Regulation opening and providing for the administration of certain annual tariff quotas for products covered by CN codes 0714 10 91, 0714 10 99, 0714 90 11 and 0714 90 19 originating in certain third countries other than Thailand (codified version)
6	Agriculture and Rural Development	Codification 1993R2131 - règlement Commission	Proposal for a Commission Regulation laying down the procedures and conditions for the sale of cereals held by intervention agencies (codified version)
7	Agriculture and Rural Development	Codification 1982R1859 - Regulation Commission - Selection of holdings for determining income	Proposal for a Commission Regulation (EEC) No 1859/82 of 12 June 1982 concerning the selection of returning holdings for the purpose of determining incomes of agricultural holdings
8	Agriculture and Rural Development	Codification 1990R3444 - Commission Regulation (laying down detailed rules for granting private storage aid	Proposal for a Commission Regulation (EEC) No 3444/90 of 27 November 1990 laying down detailed rules for granting private storage aid for pigmeat
9	Agriculture and Rural Development	Codification 1989R0120 - Commission Regulation (EEC) laying down common detailed rules for the application of export	Proposal for a Commission Regulation (EEC) No 120/89 of 19 January 1989 laying down common detailed rules for the application of export levies and charges on agricultural products
10	Agriculture and Rural Development	Codification 1985R2220 Commission Regulation (EEC) laying down common detailed rules for the application of the system	Proposal for a Commission Regulation (EEC) No 2220/85 of 22 December 1985 laying down common detailed rules for the application of the system of securities for agricultural products
11	Agriculture and Rural Development	Codification 2001R0214 - Commission Regulation laying down detailed rules for the application of Council Regu	Proposal of a Commission Regulation (EC) No 214/2001 of 12 January 2001 laying down detailed rules for the application of Council Regulation (EC) No 1255/1999 as regards intervention on the market for skimmed-milk powder
12	Agriculture and Rural Development	Codification 1992R2342 - règlement Commission	Proposal for a Commission Regulation on imports of pure-bred breeding animals of the bovine species from the third countries and on granting of export refunds thereon and repealing Regulation (EEC) No 1544/79 (codified version)
13	Agriculture and Rural Development	Codification 1982R1964 - règlement Commission	Proposal for a Commission Regulation laying down the conditions for granting special export refunds on certain cuts of boned meat of animals (codified version)
14	Agriculture and Rural Development	Codification 2002R2377 - Regulation Commission - Administration of Community tariff quotas for malting barley	Proposal for a Commission Regulation (EC) No 2377/2002 of 27 December 2002 opening and providing for the administration of a Community tariff quota for malting barley from third countries and derogating from Council Regulation (EC) No 1766/92
15	Agriculture and Rural Development	Codification 2002R2375 - Regulation Commission - Administration of Community tariff quotas for wheat	Proposal for a Commission Regulation (EC) No 2375/2002 of 27 December 2002 opening and providing for the administration of a Community tariff quotas for common wheat of a quality other than quality from third countries and derogating from Council Regulation (EEC) No 1766/92

16	Agriculture and Rural Development	Codification 1993R2273 - Commission Regulation determining the intervention centres for cereals	Proposal for a Commission Regulation (EEC) No 2273/93 of 28 October 1993 determining the intervention centres for cereals
17	Agriculture and Rural Development	Codification 1997R2331 - Regulation Commission - Special conditions for granting export refunds	Proposal for a Commission Regulation (EC) No 2331/97 of 25 November 1997 on special conditions for granting export refunds on certain pigmeat products
18	Agriculture and Rural Development	Codification 2001R1543 Commission Regulation laying down the marketing standard for lettuces and curled-leave	Proposal for a Commission Regulation (EC) No 1543/2001 of 27 June 2001 laying down the marketing standard for lettuces and curled-leave and broad-leaved (Batavian) endives
19	Agriculture and Rural Development	codification 2001R0912 Commission Regulation laying down the marketing standard for beans	Proposal for a Commission Regulation (EC) No 912/2001 of 10 May 2001 laying down the marketing standard for beans
20	Agriculture and Rural Development	Codification 1999R0730 - Commission Regulation laying down the marketing standard for carrots	Proposal for a Commission Regulation (EC) No 730/1999 of 7 April 1999 laying down the marketing standard for carrots
21	Agriculture and Rural Development	Codification 1997R2288 - Commission Regulation laying down marketing standards for garlic	Prôposal for a Commission Regulation (EC) No 2288/97 of 18 November 1997 laying down marketing standards for garlic
22	Agriculture and Rural Development	Codification 1988R1677 - Commission Regulation laying down quality standards for cucumbers	Proposal for a Commission Regulation (EEC) No 1677/88 of 15 June 1988 laying down quality standards for cucumbers
23	Agriculture and Rural Development	Codification 1987R1591 - Commission Regulation laying down quality standards for cabbages	Proposal for a Commission Regulation (EEC) No 1591/87 of 5 June 1987 laying down quality standards for cabbages, Brussels sprouts, ribbed celery and spinach
24	Agriculture and Rural Development	Codification 1978R3077 -Regulation Com-Equivalence of Community certificates and attestations accompanying imported hops	Proposal for a Commission Regulation (EEC) No 3077/78 of 21 December 1978 on the equivalence with Community certificates and attestations accompanying hops imported from non-member countries
25	Agriculture and Rural Development	Codification 1978R3076 - Regulation Commission - Importation of hops from non-member countries	Proposal for a Commission Regulation (EEC) No 3076/78 of 21 December 1978 on the importation of hops from non-member countries
26	Agriculture and Rural Development	Codification 1999R0800 - Regulation Commission - Detailed rules on the system of export refunds	Proposal for a Commission Regulation (EC) No 800/1999 of 15 April 1999 laying down common detailed rules for the application of the system of export refunds on agricultural products
27	Agriculture and Rural Development	Recast 2000R2707 (by DG) - Commission Regulation laying down rules for applying Council Regulation (EC) No 12	Proposal for a COMMISSION REGULATION laying down rules for applying Council Regulation (EC) No 1255/1999 as regards Community aid for supplying milk and certain milk products to pupils in educational establishments (2000R2707)
28	Agriculture and Rural Development	Codification 1994R2659 - règlement Commission	Proposal for a Commission Regulation on detailed rules for the granting of private storage aid for Grana padano, Parmigiano-Reggiano and Provolone cheeses (codified version)
29	Agriculture and Rural Development	Codification 2001R1788 - règlement Commission	Proposal for a Commission Regulation laying down detailed rules for implementing the provisions concerning the certificate of inspection for imports from third countries under Article 11 of Council Regulation (EEC) No 2092/91 on organic production of agricultural products and indications referring thereto on agricultural products and foodstuffs (codified version)
