Joint Proposal for a

COUNCIL REGULATION

concerning restrictive measures in view of the situation in Syria and repealing
Regulation (EU) No 442/2011
EXPLANATORY MEMORANDUM

(2) The Council expanded the scope of its measures against Syria by way of Council Regulations on 2 September 2011, 23 September 2011, 13 October 2011 and 14 November, as well as making amendments and additions to the list of targeted persons and entities through successive Council Implementing Regulations. Further measures, which do not fall within the scope of Union law, are set out in corresponding CFSP Decisions of the Council.

(3) In view of the continued brutal repression and violation of human rights by the Government of Syria, the Council has now adopted Council Decision 2011/782/CFSP, by which it calls for new measures, namely a prohibition on the export of telecommunications monitoring equipment for use by the Syrian regime, a prohibition on the participation in certain infrastructure projects and investment in such projects, and additional restrictions on the transfers of funds and the provision of financial services.

(4) These measures fall within the scope of the Treaty on the Functioning of the European Union and, therefore, notably with a view to ensuring its uniform application by economic operators in all Member States, regulatory action at the level of the Union is necessary in order to implement them.

(5) In view of the extent of the amendments introduced, taken together with the various measures already adopted in relation to Syria, it is appropriate to consolidate all the measures into a new regulation which repeals and replaces Regulation (EU) No 442/2011.

ANNEX VI

List of key equipment and technology referred to in Article 9

General Notes

1. The object of the prohibitions contained in this Annex should not be defeated by the export of any non-prohibited goods (including plant) containing one or more prohibited components when the prohibited component or components are the principal element of the goods and can feasibly be removed or used for other purposes.

N.B.: In judging whether the prohibited component or components are to be considered the principal element, it is necessary to weigh the factors of quantity, value and technological know-how involved and other special circumstances which might establish the prohibited component or components as the principal element of the goods being procured.

2. The goods specified in this Annex include both new and used goods.

3. Definitions of terms between 'single quotation marks' are given in a technical note to the relevant item.

General Technology Note (GTN)

1. The "technology" "required" for the "development", "production" or "use" of prohibited goods remains under prohibition even when applicable to non-prohibited goods.

2. Prohibitions do not apply to that "technology" which is the minimum necessary for the installation, operation, maintenance (checking) and repair of those goods which are not prohibited or the export of which has been authorised in accordance with Regulation (EC) No 423/2007 or this Regulation.

3. Prohibitions on "technology" transfer do not apply to information "in the public domain", to "basic scientific research" or to the minimum necessary information for patent applications.
