REGULATIONS

**REGULATION (EU) No 1285/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

**on the implementation and exploitation of European satellite navigation systems and repealing
Council Regulation (EC) No 876/2002 and Regulation (EC) No 683/2008 of the European
Parliament and of the Council**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE
EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European
Union, and in particular Article 172 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national
parliaments,

Having regard to the opinion of the European Economic and
Social Committee ⁽¹⁾,

After consulting the Committee of the Regions,

Acting in accordance with the ordinary legislative procedure,

Whereas:

(1) The aim of the European satellite navigation policy is to provide the Union with two satellite navigation systems, the system established under the Galileo programme and the EGNOS system ('the systems'). These systems arise respectively from the Galileo and EGNOS programmes. Each infrastructure consists of satellites and a network of ground stations.

(2) The aim of the Galileo programme is to establish and operate the first global satellite navigation and positioning infrastructure specifically designed for civilian purposes, which can be used by a variety of public and

private actors in Europe and worldwide. The system established under the Galileo programme functions independently of other existing or potential systems, thus contributing amongst other things to the strategic autonomy of the Union, as emphasised by the European Parliament and the Council.

(3) The aim of the EGNOS programme is to improve the quality of open signals from existing global navigation satellite systems ('GNSS') as well as those from the open service offered by the system established under the Galileo programme, when they become available. The services provided by the EGNOS programme should cover, as a priority, the Member States' territories geographically located in Europe, including for this purpose the Azores, the Canary Islands and Madeira.

(4) The European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions have consistently given their full support to the Galileo and EGNOS programmes.

(5) Since the Galileo and EGNOS programmes are at an advanced development stage leading to systems in an exploitation phase, a specific legal instrument is required to meet their needs, particularly in terms of governance and security, to satisfy the requirement for sound financial management and to promote the use of the systems.

(6) The systems are infrastructures set up as trans-European networks of which the use extends well beyond the national boundaries of the Member States. Furthermore, the services offered through these systems contribute to a wide range of economic and social activities, including the development of trans-European networks in the areas of transport, telecommunications and energy infrastructures.

⁽¹⁾ OJ C 181, 21.6.2012, p. 179.

- (7) The Galileo and EGNOS programmes are an industrial policy tool and are part of the Europe 2020 strategy, as illustrated by the Commission Communication of 17 November 2010 entitled 'An integrated industrial policy for the globalisation era: putting competitiveness and sustainability at centre stage'. They are also referred to in the Commission Communication of 4 April 2011 entitled 'Towards a space strategy for the European Union that benefits its citizens'. Those programmes provide many advantages for the economy and citizens of the Union, whose cumulative value has been estimated at approximately EUR 130 billion in the period 2014-2034.
- (8) A growing number of economic sectors, in particular transport, telecommunications, agriculture and energy, increasingly use satellite navigation systems. Public authorities can also benefit from these systems in various areas such as emergency services, police, crisis management or border management. Developing the use of satellite navigation brings enormous benefits to the economy, society and the environment. Such socio-economic benefits are broken down into three main categories: direct benefits resulting from the growth of the space market, direct benefits resulting from the growth of the downstream market for GNSS-based applications and services, and indirect benefits resulting from the emergence of new applications in, or technology transfer to, other sectors, leading to new market opportunities in other sectors, productivity gains across industry and public benefits generated by a reduction in pollution or by improved levels of safety and security.
- (9) It is therefore important that the Union support the development of applications and services based on the systems. This will allow the citizens of the Union to reap the benefits derived from the systems, and ensure that public confidence in the Galileo and EGNOS programmes is maintained. The appropriate instrument to finance research and innovation activities relating to the development of GNSS-based applications is Horizon 2020 – the Framework Programme for Research and Innovation ("Horizon 2020") established by Regulation (EU) No 1291/2013 of the European Parliament and of the Council⁽¹⁾. However, a very specific upstream part of research and development activities should be financed from the budget allocated to the Galileo and EGNOS programmes under this Regulation, where such activities concern fundamental elements such as Galileo-enabled chipsets and receivers, which will facilitate the development of applications across different sectors of the economy. Such financing should nevertheless not jeopardise the deployment or exploitation of the infrastructures established under the programmes.
- (10) Given the increasing use of satellite navigation across a great number of fields of activity, an interruption in the supply of services could lead to significant harm to modern society and result in losses for many economic operators. In addition, due to their strategic aspect, satellite navigation systems are sensitive infrastructures, that could be susceptible to malicious use. These factors could affect the security of the Union, its Member States and its citizens. Security requirements should therefore be taken into account in the design, development, deployment and exploitation of the infrastructures established under the Galileo and EGNOS programmes in accordance with standard practices.
- (11) The Galileo programme includes a definition phase which has been completed, a development and validation phase until 2013, a deployment phase which was launched in 2008 and is due for completion in 2020, and an exploitation phase which should be launched progressively from 2014-15 in order to have a fully operational system in 2020. The first four operational satellites have been constructed and launched during the development and validation phase, while the full constellation of satellites should be completed during the deployment phase and replenishment should occur during the exploitation phase. The associated ground-based infrastructure should be developed and operated accordingly.
- (12) The EGNOS programme has been in the exploitation phase since its open service and 'safety of life' service were declared operational in October 2009 and March 2011 respectively. Subject to technical and financial constraints and on the basis of international agreements, the geographical coverage of the services provided by the EGNOS system could be extended to other regions of the world, in particular to the territories of candidate countries, of third countries associated with the Single European Sky and of countries in the European Neighbourhood Policy. However, such extension to other regions of the world should not be financed by the budgetary appropriations assigned to the Galileo and EGNOS programmes under Council Regulation (EU, Euratom) No 1311/2013⁽²⁾ and should not delay the extension of the coverage throughout the Member States' territories geographically located in Europe.
- (13) The original design of the Galileo safety-of-life service as provided for in Regulation (EC) No 683/2008 of the

⁽¹⁾ Regulation (EU) No 1291/2013 of the European Parliament and of the Council of 11 December 2013 establishing Horizon 2020 - The Framework Programme for Research and Innovation (2014-2020) and repealing Decision No 1982/2006/EC (See page 104 Of this Official Journal)

⁽²⁾ Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 (See page 884 Of this Official Journal).

European Parliament and of the Council ⁽¹⁾ has been re-profiled to ensure its interoperability with other GNSS, to respond effectively to safety-of-life user needs and to reduce the complexity, risks and costs of the required infrastructure.

- (14) To maximise the take-up of the EGNOS safety-of-life service, it should be provided without direct user charge. The Galileo public regulated service (PRS) should also be offered free of charge to the following PRS participants, within the meaning of Decision No 1104/2011/EU of the European Parliament and the Council ⁽²⁾: Member States, the Council, the Commission, the European External Action Service ("EEAS") and duly authorised Union agencies. The absence of charges should not be understood to affect the provisions regarding the costs of the functioning of a competent PRS authority as laid down in Decision No 1104/2011/EU.
- (15) In order to optimise the use of the services provided, the systems, networks and services emerging from the Galileo and EGNOS programmes should be compatible and interoperable with one another and, insofar as possible, with other satellite navigation systems and with conventional means of radio navigation where such compatibility and interoperability is laid down in an international agreement, without prejudice to the objective of strategic autonomy.
- (16) Since the Union is responsible, in principle, for financing the Galileo and EGNOS programmes in full, provision should be made for the Union to own all tangible and intangible assets created or developed under those programmes. In order to comply fully with any fundamental rights relating to ownership, the necessary arrangements should be made with existing owners, particularly with respect to essential elements of the infrastructures and their security. It should be understood that the provisions on ownership of intangible assets laid down in this Regulation do not cover intangible rights that are not transferable under relevant national laws. Such ownership by the Union should be without prejudice to the possibility for the Union, in accordance with this Regulation and where it is deemed appropriate on the basis of a case-by-case assessment, to make those assets available to third parties or to dispose of them. In particular, the Union should be able to transfer the ownership of or license the intellectual property rights arising from work under the Galileo and EGNOS programmes to third parties. In order to facilitate the market uptake of satellite navigation, there is a need to ensure that third parties can make optimum use in particular of the intellectual property rights arising

from the Galileo and EGNOS programmes which belong to the Union, including at social and economic level.

- (17) Assets created or developed outside the Galileo and EGNOS programmes are not affected by the provisions on ownership laid down in this Regulation. However, such assets might, on occasion, be relevant to the performance of the programmes. In order to encourage the development of new technology outside the Galileo and EGNOS programmes, the Commission should encourage third parties to draw its attention to relevant intangible assets and should, where it would be beneficial to the programmes, negotiate terms as to the appropriate use thereof.
- (18) The deployment and exploitation phases of the Galileo programme and the exploitation phase of the EGNOS programme should be entirely financed by the Union. However in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council ⁽³⁾, the Member States should be able to provide additional funding to the Galileo and EGNOS programmes or a contribution in kind, on the basis of appropriate agreements, in order to fund additional programme elements relating to the potential particular objectives of the Member States concerned. Third countries and international organisations should also be able to contribute to the programmes.
- (19) In order to ensure the continuity and stability of the Galileo and EGNOS programmes and considering their European dimension and their intrinsic European added value, sufficient and consistent funding is required over financial planning periods. It is also necessary to indicate the amount required between 1 January 2014 to 31 December 2020 to finance completion of the deployment phase of the Galileo programme and the exploitation phases of the Galileo and EGNOS programmes.
- (20) Regulation (EU, Euratom) No 1311/2013 allocates a maximum of EUR 7 071,73 million in current prices for the financing of activities relating to the Galileo and EGNOS programmes for the period from 1 January 2014 to 31 December 2020. For the sake of clarity and in order to facilitate cost control, that overall amount should be broken down into various categories. Nonetheless, in the interest of flexibility and to ensure the smooth running of the programmes, the Commission should be able to re-allocate funds from one category to another. The programme activities should also include the protection of the systems and their operation, including during the launch of satellites. In this respect, a contribution to the costs of services capable of providing such protection could be financed by the budget allocated to the Galileo and EGNOS programmes insofar as possible following rigorous cost management

⁽¹⁾ Regulation (EC) No 683/2008 of the European Parliament and of the Council of 9 July 2008 on the further implementation of the European satellite navigation programmes (EGNOS and Galileo) (OJ L 196, 24.7.2008, p. 1).

⁽²⁾ Decision No 1104/2011/EU of the European Parliament and the Council of 25 October 2011 on the rules for access to the public regulated service provided by the global navigation satellite system established under the Galileo programme (OJ L 287, 4.11.2011, p. 1).

⁽³⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union (OJ L 298, 26.10.2012, p. 1).

and full compliance with the maximum amount established in Regulation (EU, Euratom) No 1311/2013. Such contribution should be used only for the provision of data and services and not for the purchase of infrastructure. This Regulation lays down a financial envelope for the continuation of the Galileo and EGNOS programmes which is to constitute the prime reference amount, within the meaning of point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management⁽¹⁾ for the European Parliament and the Council during the annual budgetary procedure.

- (21) The activities for which the Union budget appropriations assigned to the Galileo and EGNOS programmes for the period 2014-2020 are to be granted should be specified in this Regulation. Such appropriations should be granted mainly for activities relating to the deployment phase of the Galileo programme, including management and monitoring activities for that phase, and activities relating to the exploitation of the system established under the Galileo programme, including actions preceding or in preparation for the exploitation phase of that programme, as well as for activities relating to the exploitation of the EGNOS system. They should also be granted for funding certain other activities required to manage and achieve the objectives of the Galileo and EGNOS programmes, in particular support for research and development of fundamental elements, such as Galileo enabled chipsets and receivers, including as appropriate positioning and integrity-monitoring software modules. Those elements constitute the interface between the services offered by the infrastructures and downstream applications, and facilitate the development of applications throughout various sectors of the economy. Their development acts as a catalyst for the maximisation of socio-economic benefits as it facilitates the market uptake of the services offered. The Commission should report annually to the European Parliament and the Council on the cost-management strategy pursued.
- (22) It is important to note that the investment and operating costs of the systems as estimated for the period 2014-2020 do not take account of unforeseen financial obligations which the Union may be obliged to assume, in particular those relating to liability arising from the performance of the services or Union ownership of the systems, especially with regard to any malfunctioning of the systems. Those obligations are the subject of a specific analysis by the Commission.
- (23) It should also be noted that the budgetary resources planned under this Regulation do not cover work financed by funds allocated to Horizon 2020, such as

that associated with the development of applications derived from the systems. Such work will help to optimise the use of the services provided in the context of the Galileo and EGNOS programmes, to ensure a good social and economic return on the investments made by the Union and to increase the know-how of businesses in the Union with regard to satellite navigation technology. The Commission should ensure that there is transparency and clarity regarding the different sources of funding for the different aspects of the programmes.

- (24) In addition, the revenue generated by the systems arising, in particular, from the commercial service provided by the system established under the Galileo programme, should accrue to the Union in order to partially compensate it for the investments that it has made previously, and that revenue should be used to support the objectives of the Galileo and EGNOS programmes. A revenue-sharing mechanism might also be provided for in contracts concluded with private sector entities.
- (25) In order to avoid the cost over-runs and delays which have affected the progress of the Galileo and EGNOS programmes in the past, efforts need to be stepped up to control risks which might lead to excess costs and/or delays as requested by the European Parliament in its resolution of 8 June 2011 on the mid-term review of the European satellite navigation programmes: implementation assessment, future challenges and financing perspectives⁽²⁾ and by the Council conclusions of 31 March 2011, and as shown by the Commission Communication of 29 June 2011 entitled 'A budget for Europe 2020'.
- (26) Sound public governance of the Galileo and EGNOS programmes requires, first, that there be a strict division of responsibilities and tasks, in particular between the Commission, the European GNSS Agency and the European Space Agency (ESA) and, second, that the governance be progressively adapted to the operational requirements of the systems.
- (27) Given that the Commission represents the Union, which, in principle, provides financing for the Galileo and EGNOS programmes alone and owns the systems, the Commission should be responsible for the progress of those programmes and their overall supervision. It should manage the funds allocated to the programmes under this Regulation, supervise the implementation of all activities of the programmes and ensure a clear division of responsibilities and tasks, in particular between the European GNSS Agency and ESA. Accordingly, in addition to the tasks associated with these general responsibilities and the other tasks incumbent upon it under this Regulation, the Commission should be assigned specific tasks. In order to optimise the

⁽¹⁾ OJ C 420, 20.12.2013, p. 1.

⁽²⁾ OJ C 380 E, 11.12.2012, p. 84.

resources and competences of the various stakeholders, it should be able to delegate certain tasks by means of delegation agreements, in accordance with Regulation (EU, Euratom) No 966/2012.

- (28) Considering the importance for the Galileo and EGNOS programmes of the ground-based infrastructure of the systems and its impact on their security, the determination of the location of the infrastructure should be one of the specific tasks assigned to the Commission. The deployment of the ground-based infrastructure of the systems should continue to follow an open and transparent process. The location of such infrastructure should be determined by taking into account geographical and technical limitations associated with the optimum geographical distribution of the ground-based infrastructure and the possible presence of existing installations and equipment suitable for the relevant tasks, as well as by ensuring compliance with the security needs of each ground station and with the national security requirements of each Member State.
- (29) The European GNSS Agency was set up by Regulation (EU) No 912/2010 of the European Parliament and of the Council ⁽¹⁾ in order to achieve the objectives of the Galileo and EGNOS programmes and implement certain tasks associated with the progress of those programmes. It is an agency of the Union which, as a body within the meaning of Regulation (EU, Euratom) No 966/2012, is subject to the obligations applicable to Union agencies. It should be assigned certain tasks associated with programme security and its potential designation as a competent PRS authority. It should also contribute to the promotion and marketing of the systems, including by establishing contacts with users and potential users of the services provided under the Galileo and EGNOS programmes, and it should collect information on their requirements and developments on the satellite navigation market. Furthermore, it should perform tasks which the Commission confers on it by means of one or more delegation agreements covering other various specific tasks associated with the programmes, in particular tasks associated with the exploitation phases of the systems, including the operational management of the programmes, the promotion of the applications and services on the satellite navigation market and the promotion of the development of fundamental elements relating to the programmes. In order for the Commission, representing the Union, to exercise its power of control fully, those delegation agreements should include the general conditions governing the management of funds entrusted to the European GNSS Agency.

The transfer of responsibility to the European GNSS Agency for tasks associated with the operational management of the Galileo and EGNOS programmes

and their exploitation should be gradual and conditional on the successful completion of an appropriate handover review as well as on the readiness of the European GNSS Agency to take on such tasks, in order to secure those programmes' continuity. For EGNOS, the handover should take place on 1 January 2014; for Galileo, it is expected to occur in 2016.

- (30) For the deployment phase of the Galileo programme, the Union should conclude a delegation agreement with ESA setting out the tasks of ESA in that phase. The Commission, representing the Union, should make every effort to conclude that delegation agreement within six months of the date of application of this Regulation. In order for the Commission to exercise its power of control fully, the delegation agreement should include the general conditions for managing the funds entrusted to ESA. In respect of activities exclusively financed by the Union, such conditions should ensure a degree of control comparable to that required if ESA were an agency of the Union.
- (31) For the exploitation phase of the Galileo and EGNOS programmes, the European GNSS Agency should conclude working arrangements with ESA setting out the latter's task in developing future generations of the systems and in providing technical support in relation to the existing generation of systems. Those arrangements should comply with Regulation (EU, Euratom) No 966/2012. They should not cover the role of ESA as regards activities relating to research and technology, or the early phases of evolution and research activities relating to the infrastructures established under the Galileo and EGNOS programmes. Such activities should be financed outside the scope of the budget allocated to the programmes, for instance by funds allocated to Horizon 2020.
- (32) Responsibility for the progress of the Galileo and EGNOS programmes includes, in particular, responsibility for their security and the security of their systems and operation. Except in the case of application of Council Joint Action 2004/552/CFSP ⁽²⁾, which needs to be reviewed to reflect the changes in the Galileo and EGNOS programmes, their governance and the changes to the Treaty on European Union and the Treaty on the Functioning of the European Union resulting from the Treaty of Lisbon, the Commission is responsible for security, even if certain security-related tasks are entrusted to the European GNSS Agency. It is the responsibility of the Commission to establish mechanisms to ensure suitable coordination between the various entities responsible for security.
- (33) In the application of this Regulation, for matters relating to security, the Commission should consult the relevant security experts of the Member States.

⁽¹⁾ Regulation (EU) No 912/2010 of the European Parliament and of the Council of 22 September 2010 setting up the European GNSS Agency, repealing Council Regulation (EC) No 1321/2004 on the establishment of structures for the management of the European satellite radio navigation programmes and amending Regulation (EC) No 683/2008 of the European Parliament and of the Council (OJ L 276, 20.10.2010, p. 11).

⁽²⁾ Council Joint Action 2004/552/CFSP of 12 July 2004 on aspects of the operation of the European satellite radio-navigation system affecting the security of the European Union (OJ L 246, 20.7.2004, p. 30).

- (34) Given the specific expertise of EEAS and its regular contact with administrations of third countries and international organisations, it is in a position to assist the Commission in performing certain of its tasks relating to the security of the systems and the Galileo and EGNOS programmes in the field of external relations, in accordance with Council Decision 2010/427/EU⁽¹⁾. The Commission should ensure that EEAS is fully associated with its activities in implementing security-related tasks in the field of external relations. To that end, all necessary technical support should be provided to EEAS.
- (35) To ensure the secure circulation of information, within the scope of this Regulation, the relevant security regulations should offer a degree of protection for EU-classified information equivalent to that provided by the rules on security as set out in the Annex to Commission Decision 2001/844/EC, ECSC, Euratom⁽²⁾ and by the security rules of the Council set out in the Annexes to Council Decision 2013/488/EU⁽³⁾. Each Member State should ensure that its national security regulations apply to all natural persons resident on its territory and to all legal entities established on its territory which deal with EU-classified information regarding the Galileo and EGNOS programmes. The security regulations of ESA and the Decision of 15 June 2011 of the High Representative of the Union for Foreign Affairs and Security Policy⁽⁴⁾ should be considered as equivalent to the rules on security set out in the Annex to Decision 2001/844/EC, ECSC, Euratom and to the security rules set out in the Annexes to Decision 2013/488/EU.
- (36) This Regulation is without prejudice to existing and future rules on access to documents adopted in accordance with Article 15(3) of the Treaty on the Functioning of the European Union (TFEU). Furthermore, this Regulation should not be understood as imposing an obligation on Member States to disregard their constitutional requirements in respect of access to documents.
- (37) In order to allocate the Union funds attributed to the Galileo and EGNOS programmes with a ceiling total that the Commission should not exceed, effective public procurement procedures should be applied and, in particular, contracts negotiated so as to ensure optimum use of resources, satisfactory services, smooth running of programmes, good risk management and compliance with the proposed schedule. The relevant contracting authority should make every effort to meet those requirements.
- (38) As the Galileo and EGNOS programmes will be, in principle, financed by the Union, public procurement under those programmes should comply with Union rules on public contracts and should aim, first and foremost, to obtain best value for money, control costs, mitigate risks, improve efficiency and reduce reliance on a single supplier. Open access and fair competition throughout the supply chain and the balanced offering of participation opportunities to industry at all levels, including, in particular, new entrants and small and medium-sized enterprises ('SMEs'), should be ensured. Possible abuse of dominant position and of long-term reliance on single suppliers should be avoided. In order to mitigate programme risks, to avoid reliance on a single source of supply and to ensure better overall control of the programmes and their costs and schedules, multiple sourcing should be pursued, wherever appropriate. Moreover, the development of European industry should be preserved and promoted in all areas relating to satellite navigation, in accordance with international agreements to which the Union is Part. The risk of poor contract performance or of non-performance should be mitigated as much as possible. To that end, contractors should demonstrate the sustainability of their contractual performance with respect to the commitments undertaken and the duration of the contract. Therefore, contracting authorities should, wherever appropriate, specify requirements relating to the reliability of supplies and of the provision of services.
- In addition, in the case of the purchase of goods and services of a sensitive nature, contracting authorities may subject such purchase to specific requirements, particularly with a view to ensuring security of information. Union industries should be permitted to rely on non-Union sources for certain components and services where substantial advantages are demonstrated in terms of quality and costs, taking account, however, of the strategic nature of the programmes and of Union security and export control requirements. Advantage should be taken of public sector investment and industrial experience and competence, including that acquired during the definition and development and validation phases of the programmes, while ensuring that the rules on competitive tendering are not contravened.
- (39) In order to better evaluate the total cost of a product, service or work being tendered, including its long term operational cost, the total cost over the useful lifecycle of the product, service or work being tendered should be taken into account wherever appropriate during the

⁽¹⁾ Council Decision 2010/427/EU of 26 July 2010 establishing the organisation and functioning of the European External Action Service (OJ L 201, 3.8.2010, p. 30).

⁽²⁾ 2001/844/EC, ECSC, Euratom: Commission Decision of 29 November 2001 amending its internal Rules of Procedure (OJ L 317, 3.12.2001, p. 1).

⁽³⁾ 2013/488/EU: Council Decision of 23 September 2013 on the security rules for protecting EU classified information (OJ L 274, 15.10.2013, p. 1).

⁽⁴⁾ OJ C 304, 15.10.2011, p. 7.

procurement, by using a cost effectiveness approach such as lifecycle costing when pursuing procurement based on the criterion of the most economically advantageous tender award. For that purpose, the contracting authority should make sure that the methodology intended to compute the costs for the useful lifecycle of a product, service or work is expressly mentioned in the contract documents or the contract notice and that it allows the accuracy of the information supplied by the tenderers to be verified.

- (40) Satellite navigation is a complex and constantly changing technology. This results in uncertainty and risk for public contracts concluded under the Galileo and EGNOS programmes, insofar as such contracts may involve long-term commitments to equipment or services. Those characteristics require specific measures to be implemented concerning public contracts which apply in addition to the rules laid down in Regulation (EU, Euratom) No 966/2012. The contracting authority should thus be able to restore a level playing-field when one or more companies have, prior to a call for tenders, privileged information on the activities associated with the call for tender. It should be possible to award a contract in the form of a conditional stage-payment contract, introduce an amendment, under certain conditions, in the context of its performance, or even impose a minimum level of subcontracting. Finally, due to the technological uncertainties that are a feature of the Galileo and EGNOS programmes, contract prices cannot always be forecast accurately and it is therefore desirable to conclude contracts in a specific form that do not stipulate a firm fixed price and include clauses to safeguard the financial interests of the Union.
- (41) It should be noted that, in accordance with Article 4(3) of the Treaty on European Union ("TEU"), the Member States should not take measures which could be detrimental to the Galileo and EGNOS programmes or the services. It should also be made clear that the Member States concerned should take all necessary measures to ensure the protection of the ground stations established on their territories. In addition, Member States and the Commission should work together and with appropriate international bodies and regulatory authorities to ensure that the radio spectrum necessary for the system established under the Galileo programme is available and protected to allow for the full development and implementation of applications based on that system, in compliance with Decision No 243/2012/EU of the European Parliament and of the Council⁽¹⁾.
- (42) In view of the global nature of the systems, it is essential that the Union enter into agreements with third countries and international organisations in the context of the Galileo and EGNOS programmes under Article 218 TFEU, in particular to ensure their smooth implementation, deal with certain questions relating to security and charging, optimise the services provided to citizens of the Union and meet the needs of third countries and international organisations. It is also useful, where necessary, to adapt existing agreements to changes in the Galileo and EGNOS programmes. When preparing or implementing those agreements, the Commission may have recourse to the assistance of EEAS, ESA and the European GNSS Agency, within the limits of the tasks allocated to them under this Regulation.
- (43) It should be confirmed that the Commission, in performing certain of its tasks of a non-regulatory nature, may have recourse, as required and insofar as necessary, to the technical assistance of certain external parties. Other entities involved in the public governance of the Galileo and EGNOS programmes may also make use of the same technical assistance in performing tasks entrusted to them under this Regulation.
- (44) The Union is based on respect for fundamental rights and in particular Articles 7 and 8 of the Charter of Fundamental Rights of the European Union expressly recognize the fundamental right to privacy and to the protection of personal data. Protection of personal data and private life should be ensured under the Galileo and EGNOS programmes.
- (45) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, wrongly paid or incorrectly used and, where appropriate, administrative and financial penalties in accordance with Regulation (EU, Euratom) No 966/2012.
- (46) It is necessary to ensure that the European Parliament and the Council are kept regularly informed about the implementation of the Galileo and EGNOS programmes, in particular with regard to risk management, cost, schedule and performance. In addition, the European Parliament, the Council and the Commission will meet in the Galileo Interinstitutional Panel in accordance with the Joint declaration on the Galileo Interinstitutional Panel published together with this Regulation.
- (47) Assessments, based on agreed indicators, should be carried out by the Commission in order to evaluate the effectiveness and efficiency of the measures taken to achieve the objectives of the Galileo and EGNOS programmes.

⁽¹⁾ Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7).

- (48) In order to ensure the security of the systems and their operation, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of the high level objectives necessary to ensure the security of the systems and their operation. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (49) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽¹⁾.
- (50) As sound public governance requires uniform management of the Galileo and EGNOS programmes, faster decision-making and equal access to information, representatives of the European GNSS Agency and ESA should be able to take part as observers in the work of the European GNSS Programmes Committee ("the Committee") established to assist the Commission. For the same reasons, representatives of third countries and international organisations who have concluded an international agreement with the Union should be able to take part in the work of the Committee subject to security constraints and as provided for in the terms of such agreement. These representatives of the European GNSS Agency, ESA, third countries and international organisations are not entitled to take part in Committee voting procedures.
- (51) Since the objective of this Regulation, namely the establishment and exploitation of satellite navigation systems, cannot be sufficiently achieved by the Member States since it exceeds the financial and technical capacities of any single Member State, and can therefore, by reason of its scale and effects, be better achieved by action at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 TEU. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.
- (52) The Galileo Joint Undertaking created by Council Regulation (EC) No 876/2002 ⁽²⁾ ceased its operations on

31 December 2006. Regulation (EC) No 876/2002 should therefore be repealed.

- (53) Given the need to evaluate the Galileo and EGNOS programmes, the extent of the changes to be made to Regulation (EC) No 683/2008, and in the interests of clarity and legal certainty, Regulation (EC) No 683/2008 should be repealed,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

GENERAL PROVISIONS

Article 1

Subject

This Regulation lays down the rules in relation to the implementation and exploitation of the systems under the European satellite navigation programmes, in particular those relating to the governance and the financial contribution of the Union.

Article 2

European satellite navigation systems and programmes

1. The European satellite navigation programmes, Galileo and EGNOS, shall cover all the activities needed to define, develop, validate, construct, operate, renew and improve the European satellite navigation systems, namely the system established under the Galileo programme and the EGNOS system, and to ensure their security and interoperability.

Those programmes shall also aim to maximise the socio-economic benefits of the European satellite navigation systems, in particular by promoting the use of the systems and fostering the development of applications and services based on those systems.

2. The system established under the Galileo programme shall be a civil system under civil control and an autonomous global navigation satellite system (GNSS) infrastructure consisting of a constellation of satellites and a global network of ground stations.

3. The EGNOS system shall be a regional satellite navigation system infrastructure monitoring and correcting open signals emitted by existing global satellite navigation systems, as well as the open service signals offered by the system established under the Galileo programme, when they become available. It consists of ground stations and several transponders installed on geostationary satellites.

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

⁽²⁾ Council Regulation (EC) No 876/2002 of 21 May 2002 setting up the Galileo Joint Undertaking (OJ L 138, 28.5.2002, p. 1).

4. The specific objectives of the Galileo programme shall be to ensure that the signals emitted by the system established under that programme can be used to fulfil the following functions:

- (a) to offer an open service (OS), which is free of charge to the user and provides positioning and synchronisation information intended mainly for high-volume satellite navigation applications;
- (b) to contribute, by means of Galileo open service signals and/or in cooperation with other satellite navigation systems, to integrity-monitoring services aimed at users of safety-of-life applications in compliance with international standards;
- (c) to offer a commercial service (CS) for the development of applications for professional or commercial use by means of improved performance and data with greater added value than those obtained through the open service;
- (d) to offer a public regulated service (PRS) restricted to government-authorised users, for sensitive applications which require a high level of service continuity, free of charge for the Member States, the Council, the Commission, EEAS and, where appropriate, duly authorised Union agencies; this service uses strong, encrypted signals. The question of whether to charge the other PRS participants referred to in Article 2 of Decision No 1104/2011/EU shall be assessed on a case-by-case basis and appropriate provisions shall be specified in the agreements concluded pursuant to Article 3(5) of that Decision;
- (e) to contribute to the search and rescue support service (SAR) of the COSPAS-SARSAT system by detecting distress signals transmitted by beacons and relaying messages to them.

5. The specific objectives of the EGNOS programme shall be to ensure that the signals emitted by the EGNOS system can be used to fulfil the following functions:

- (a) to offer an open service (OS), which is free of charge to the user, and provides positioning and synchronisation information intended mainly for high-volume satellite navigation applications in the area covered by the EGNOS system;
- (b) to offer a service for the dissemination of commercial data, namely the EGNOS Data Access Service (EDAS), to promote the development of applications for professional or commercial use by means of improved performance and data with greater added value than those obtained through its open service;

- (c) to offer a safety-of-life service (SoL) service aimed at users for whom safety is essential; this service, which is provided free of direct user charges, fulfils in particular the requirements of certain sectors for continuity, availability and accuracy and includes an integrity message alerting the user to any failure in, or out-of-tolerance signals from, systems augmented by the EGNOS system over the coverage area.

As a priority, those functions shall be provided within the Member States' territories geographically located in Europe as soon as possible.

The geographical coverage of the EGNOS system may be extended to other regions of the world, in particular to the territories of candidate countries, of third countries associated with the Single European Sky and of countries in the European Neighbourhood Policy, subject to technical feasibility and on the basis of international agreements. The cost of such extension, including the related exploitation costs, shall not be covered by the resources referred to in Article 9. Such extension shall not delay the extension of the geographical coverage of the EGNOS system throughout the Member States' territories geographically located in Europe.

Article 3

Galileo programme phasing

The Galileo programme shall consist of the following phases:

- (a) a definition phase during which the structure of the system was designed and its elements determined, which ended in 2001;
- (b) a development and validation phase, scheduled to be completed by 31 December 2013, comprising the construction and launch of the first satellites, the establishment of the first ground-based infrastructure and all the work and operations necessary to validate the system in orbit;
- (c) a deployment phase to be completed by 31 December 2020, comprising:
 - (i) the construction, establishment and protection of all space-based infrastructure, in particular of all the satellites necessary to achieve the specific objectives referred to in Article 2(4) and of the required spare satellites, and the related evolutive maintenance and operations;
 - (ii) the construction, establishment and protection of all ground-based infrastructure, in particular of the infrastructure required to control the satellites and process the satellite radio-navigation data, and of service centres and other ground-based centres, and the related evolutive maintenance and operations;

- (iii) preparations for the exploitation phase, including preparatory activities relating to the provision of the services referred to in Article 2(4);
- (d) an exploitation phase comprising:
 - (i) the management, maintenance, continuous improvement, evolution and protection of the space-based infrastructure, including replenishment and obsolescence management;
 - (ii) the management, maintenance, continuous improvement, evolution and protection of the ground-based infrastructure, in particular of service centres and other ground-based centres, networks and sites, including replenishment and obsolescence management;
 - (iii) the development of future generations of the system and the evolution of the services referred to in Article 2(4);
 - (iv) certification and standardisation operations associated with the programme;
 - (v) the provision and marketing of the services referred to in Article 2(4);
 - (vi) cooperation with other GNSS; and
 - (vii) all other activities needed to develop the system and ensure that the programme runs smoothly.
- (d) certification and standardisation operations associated with the programme;
- (e) the provision and marketing of the services referred to in Article 2(5);
- (f) all elements justifying the reliability of the system and its exploitation;
- (g) coordination activities relating to the completion of the specific objectives pursuant to the second and third subparagraphs of Article 2(5).

Article 5

Compatibility and interoperability of the systems

1. The systems, networks and services resulting from the Galileo and EGNOS programmes shall be compatible and interoperable from a technical point of view.
2. The systems, networks and services resulting from the Galileo and EGNOS programmes shall be compatible and interoperable with other satellite navigation systems and with conventional means of radio navigation, where such compatibility and interoperability requirements are laid down in an international agreement concluded pursuant to Article 29.

Article 6

Ownership

The Union shall be the owner of all tangible and intangible assets created or developed under the Galileo and EGNOS programmes. To that effect, agreements shall be concluded with third parties, wherever appropriate, with regard to existing ownership rights.

The Commission shall ensure, through an appropriate framework, the optimal use of the assets referred to in this Article; in particular, it shall manage the intellectual property rights relating to the Galileo and EGNOS programmes as effectively as possible, taking into account the need to protect and give value to the Union's intellectual property rights, the interests of all stakeholders, and the necessity of harmonious development of the markets and of new technologies. To that end, it shall ensure that the contracts entered into, under the Galileo and EGNOS programmes, include the possibility of transferring or licensing intellectual property rights arising from work performed under those programmes to third parties.

Article 4

The EGNOS exploitation phase

The EGNOS exploitation phase mainly comprises:

- (a) the management, maintenance, continuous improvement, evolution and protection of the space-based infrastructure, including replenishment and obsolescence management;
- (b) the management, maintenance, continuous improvement, evolution and protection of the ground-based infrastructure, in particular networks, sites and support facilities, including replenishment and obsolescence management;
- (c) the development of future generations of the system and the evolution of the services referred to in Article 2(5);

CHAPTER II

BUDGETARY CONTRIBUTION AND MECHANISMS

Article 7

Activities

1. The Union budgetary appropriations assigned to the Galileo and EGNOS programmes for the period 2014-2020 under this Regulation shall be granted to finance activities relating to:
 - (a) the completion of the deployment phase of the Galileo programme as referred to in Article 3(c);

- (b) the exploitation phase of the Galileo programme as referred to in Article 3(d);
- (c) the exploitation phase of the EGNOS programme as referred to in Article 4;
- (d) the management and monitoring of the Galileo and EGNOS programmes.

2. The Union budgetary appropriations assigned to the Galileo and EGNOS programmes shall, in accordance with Article 9(2), also be granted to finance activities relating to research and development of fundamental elements, such as Galileo-enabled chipsets and receivers.

3. The Union budgetary appropriations assigned to the Galileo and EGNOS programmes shall also cover Commission expenditure relating to the preparation, monitoring, inspection, audit and assessment activities required for the management of the programmes and the implementation of the specific objectives referred to in Article 2(4) and (5). Such expenditure may cover in particular:

- (a) studies and meetings with experts;
- (b) information and communication activities, including institutional communication on the policy priorities of the Union where they are directly linked to the objectives of this Regulation, with a particular view to creating synergies with other relevant Union policies;
- (c) IT technology networks, with the objective of processing or transferring data;
- (d) any other technical or administrative assistance given to the Commission for the management of the programmes.

4. The costs of the Galileo and EGNOS programmes and of the different phases of those programmes shall be clearly identified. The Commission shall, in accordance with the principle of transparent management, inform the European Parliament, the Council and the Committee referred to in Article 36 ("the Committee") on an annual basis of the allocation of Union funds, including the contingency reserve, to each of the activities specified in paragraphs 1, 2 and 3 of this Article and of the use of those funds.

Article 8

Financing of the Galileo and EGNOS programmes

1. In accordance with Article 9, the Union shall finance the activities relating to Galileo and EGNOS programmes referred to in Article 7(1), (2) and (3), to fulfil the objectives as set out in Article 2, without prejudice to any contribution from any other funding source, including those referred to in paragraphs 2 and 3 of this Article.

2. Member States may make a request to provide additional funding for the Galileo and EGNOS programmes to cover additional elements in particular cases, on condition that such additional elements do not create any financial or technical burden or any delay for the programme concerned. On the basis of a request from a Member State, the Commission shall decide, in accordance with the examination procedure referred to in Article 36(3), whether those two conditions have been met. The Commission shall communicate any impact on the Galileo and EGNOS programmes resulting from the application of this paragraph to the European Parliament, the Council and the Committee.

3. Third countries and international organisations may also provide additional funding for the Galileo and EGNOS programmes. The international agreements referred to in Article 29 shall stipulate the conditions and arrangements for their involvement.

4. The additional funding referred to in paragraphs 2 and 3 of this Article shall constitute external assigned revenue in accordance with Article 21(2) of Regulation (EU, Euratom) No 966/2012.

Article 9

Resources

1. The financial envelope for the implementation of the activities referred to in Article 7(1), (2) and (3) and for covering the risks associated with those activities is set at EUR 7 071,73 million in current prices for the period from 1 January 2014 to 31 December 2020.

The annual appropriations shall be authorised by the European Parliament and the Council within the limits of the multiannual financial framework.

The amount referred to in the first subparagraph shall be broken down in the following categories of expenditure in current prices:

- (a) for the activities referred to in point (a) of Article 7(1), EUR 1 930 million;
- (b) for the activities referred to in point (b) of Article 7(1), EUR 3 000 million;
- (c) for the activities referred to in point (c) of Article 7(1), EUR 1 580 million;
- (d) for the activities referred to in point (d) of Article 7(1) and in Article 7(3), EUR 561,73 million.

2. Without prejudice to any amounts allocated to the development of applications based on the systems within Horizon 2020, the budgetary appropriations assigned to the Galileo and EGNOS programmes, including assigned revenues, shall finance the activities as referred to in Article 7(2) up to a maximum of EUR 100 million at constant prices.

3. The Commission may re-allocate funds from one category of expenditure, as laid down in points (a) to (d) of the third subparagraph of paragraph 1, to another, up to a ceiling of 10 % of the amount referred to in the first subparagraph of paragraph 1. Where the re-allocation reaches a cumulative amount greater than 10 % of the amount referred to in the first subparagraph of paragraph 1, the Commission shall consult the Committee in accordance with the advisory procedure referred to in Article 36(2).

The Commission shall inform the European Parliament and the Council of any re-allocation of funds between categories of expenditure.

4. The appropriations shall be implemented in accordance with the applicable provisions of this Regulation and Regulation (EU, Euratom) No 966/2012.

5. Budgetary commitments for the Galileo and EGNOS programmes shall be appropriated in annual instalments.

6. The Commission shall manage the financial resources referred to in paragraph 1 in a transparent and cost-effective manner. The Commission shall report annually to the European Parliament and the Council on the cost-management strategy pursued.

Article 10

Revenue generated by the Galileo and EGNOS programmes

1. Revenue generated by the exploitation of the systems shall be collected by the Union, paid to the Union budget and allocated to the Galileo and EGNOS programmes, and in particular to the objective referred to in Article 2(1). If the income proves to exceed that required to fund the programme exploitation phases, any adaptation of the principle of allocation shall be approved by the European Parliament and the Council on the basis of a proposal from the Commission.

2. A revenue-sharing mechanism may be provided for in contracts concluded with private sector entities.

3. The interest generated by pre-financing payments made to entities responsible for implementing the budget indirectly shall be assigned to activities subject to the delegation agreement or the contract concluded between the Commission and the entity concerned. In accordance with the principle of sound financial management, the entities responsible for indirect implementation of the budget shall open accounts enabling the funds and corresponding interest to be identified.

CHAPTER III

PUBLIC GOVERNANCE OF THE GALILEO AND EGNOS PROGRAMMES

Article 11

Principles for governance of the Galileo and EGNOS programmes

Public governance of the Galileo and EGNOS programmes shall be based on the principles of:

- (a) a strict division of tasks and responsibilities between the various entities involved, in particular the Commission, the European GNSS Agency and ESA, under the overall responsibility of the Commission;
- (b) sincere cooperation between the entities referred to in point (a) and the Member States;
- (c) strong control of programmes, including for strict adherence to cost and schedule by all the entities involved, within their fields of responsibility, with respect to the objectives of the Galileo and EGNOS programmes;
- (d) optimisation and rationalisation of the use of existing structures, in order to avoid any duplications of technical expertise;
- (e) the use of the best practice project management systems and techniques to oversee the implementation of the Galileo and EGNOS programmes, in the light of the specific requirements and with the support of experts in the field.

Article 12

Commission's role

1. The Commission shall have overall responsibility for the Galileo and EGNOS programmes. It shall manage the funds allocated under this Regulation and oversee the implementation of all programme activities, in particular with respect to their cost, schedule and performance.

2. In addition to the overall responsibility referred to in paragraph 1 and the specific tasks referred to in this Regulation, the Commission shall:

- (a) ensure a clear division of tasks between the various entities involved in the Galileo and EGNOS programmes and to this end it shall allocate the tasks referred to in Article 14(2) and Article 15 respectively, in particular by means of delegation agreements, to the European GNSS Agency and ESA;
- (b) ensure the timely implementation of the Galileo and EGNOS programmes within the resources allocated to the programmes and in accordance with the objectives laid down in Article 2.

To that end, it shall establish and implement the appropriate instruments and structural measures necessary to identify, control, mitigate and monitor the risks associated with the programmes;

- (c) manage, on behalf of the Union and within its field of competence, relationships with third countries and international organisations;

(d) provide to the Member States and the European Parliament, in a timely manner, all relevant information pertaining to the Galileo and EGNOS programmes, in particular in terms of risk management, overall cost, annual operating costs of each significant item of Galileo infrastructure, revenues, schedule and performance, as well as an overview of the implementation of the project management systems and techniques referred to in point (e) of Article 11;

(e) assess the possibilities for promoting and ensuring the use of the European satellite navigation systems across the various sectors of the economy, including by analysing how to take advantage of the benefits generated by the systems.

3. For the smooth progress of the deployment and exploitation phases of the Galileo programme and the exploitation phase of the EGNOS programme referred to respectively in Articles 3 and 4, the Commission shall lay down, where necessary, the measures, required to:

(a) manage and reduce the risks inherent in the progress of the Galileo and EGNOS programmes;

(b) define the key decision stages to monitor and evaluate the implementation of the programmes;

(c) determine the location of the ground-based infrastructure of the systems in accordance with security requirements, following an open and transparent process and ensure its operation;

(d) determine the technical and operational specifications necessary to fulfil the functions referred to in points (b) and (c) of Article 2(4) and to implement systems evolutions.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 36(3).

Article 13

Security of the systems and their operation

1. The Commission shall ensure the security of the Galileo and EGNOS programmes, including the security of the systems and their operation. To that effect, the Commission shall:

(a) take into account the need for the oversight and integration within all the programmes of security-related requirements and standards;

(b) ensure that the overall effect of those requirements and standards will support the successful progress of the programmes, in particular in terms of costs, risk management and schedule;

(c) establish coordination mechanisms between the various bodies involved;

(d) take into account the security standards and requirements in force in order not to lower the general level of security and not to affect the functioning of existing systems based on those standards and requirements.

2. Without prejudice to Articles 14 and 16 of this Regulation and Article 8 of Decision No 1104/2011/EU, the Commission shall adopt delegated acts in accordance with Article 35, laying down the high level objectives necessary to ensure the security of the Galileo and EGNOS programmes referred to in paragraph 1.

3. The Commission shall establish the necessary technical specifications and other measures to implement the high level objectives referred to in paragraph 2. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 36(3).

4. EEAS shall continue to assist the Commission, in the exercise of its functions in the area of external relations, in accordance with Article 2(2) of Decision 2010/427/EU.

Article 14

The role of the European GNSS Agency

1. In accordance with the guidelines laid down by the Commission, the European GNSS Agency shall:

(a) ensure, with regard to the security of the Galileo and EGNOS programmes, and without prejudice to Articles 13 and 16:

(i) through its Security Accreditation Board, the security accreditation in accordance with Chapter III of Regulation (EU) No 912/2010; accordingly, it shall initiate and monitor the implementation of security procedures and perform system security audits;

(ii) the operation of the Galileo Security Monitoring Centre, as referred to in Article 6(d) of Regulation (EU) No 912/2010, in accordance with the standards and requirements referred to in Article 13 of this Regulation and the instructions pursuant to Joint Action 2004/552/CFSP;

(b) perform the tasks provided for in Article 5 of Decision No 1104/2011/EU, and assist the Commission in accordance with Article 8(6) of that Decision;

(c) contribute, in the context of the deployment and exploitation phases of the Galileo programme and the exploitation phase of the EGNOS programme, to the promotion and marketing of the services referred to in Article 2(4) and (5), including by carrying out the necessary market analysis, in particular through the market report produced annually by the European GNSS Agency on the market for applications and services, by establishing close contacts with users and potential users of the systems with a view to collecting information on their needs, by following developments in satellite navigation downstream markets, and by drawing up an action plan for the uptake by user community of the services referred to in Article 2(4) and (5), comprising in particular relevant actions relating to standardisation and certification.

2. The European GNSS Agency shall also perform other tasks relating to the implementation of the Galileo and EGNOS programmes, including programme management tasks, and shall be accountable for them. Those tasks shall be entrusted to it by the Commission by means of a delegation agreement adopted on the basis of a delegation decision, in accordance with Article 58(1)(c) of Regulation (EU, Euratom) No 966/2012 and shall include:

- (a) operational activities including systems infrastructure management, maintenance and continuous improvement of the systems, certification and standardisation operations and provision of the services referred to in Article 2(4) and (5);
- (b) development and deployment activities for the evolution and future generations of the systems, and contribution to the definition of service evolutions, including procurement;
- (c) promoting the development of applications and services based on the systems, as well as raising awareness of such applications and services, including identifying, connecting and coordinating the network of European centres of excellence in GNSS applications and services, drawing on public and private sector expertise, and evaluating measures relating to such promotion and awareness-raising;
- (d) promoting the development of fundamental elements, such as Galileo-enabled chipsets and receivers.

3. The delegation agreement referred to in paragraph 2 shall confer an appropriate level of autonomy and authority on the European GNSS Agency, with particular reference to the contracting authority, within the framework of Article 58(1)(c) and Article 60 of Regulation (EU, Euratom) No 966/2012. In addition, it shall lay down general conditions for the management of the funds entrusted to the European GNSS Agency and, in particular, the actions to be implemented, the relevant financing, management procedures, monitoring and control measures, the measures applicable in the event of

inadequate implementation of contracts in terms of costs, schedule and performance, as well as the rules regarding ownership of all tangible and intangible assets.

The monitoring and control measures shall, in particular, provide for a provisional cost forecast system, for systematic information to the Commission on costs and schedule, and, in the event of a discrepancy between the planned budgets, performance and schedule, for corrective action ensuring the implementation of the infrastructures within the limits of the budgets allocated.

4. The European GNSS Agency shall enter into the working arrangements with ESA that are necessary for the fulfilment of their respective tasks under this Regulation for the exploitation phase of the Galileo and EGNOS programmes. The Commission shall inform the European Parliament, the Council and the Committee of such working arrangements concluded by the European GNSS Agency and any changes thereto. Whenever appropriate, the European GNSS Agency may also consider having recourse to other public or private sector entities.

5. In addition to the tasks referred to in paragraphs 1 and 2 and within the scope of its mission, the European GNSS Agency shall provide the Commission with its technical expertise and supply any information necessary for the performance of its tasks under this Regulation, including for the assessment of the possibility of promoting and ensuring the use of the systems referred to in point (e) of Article 12(2).

6. The Committee shall be consulted on the delegation decision referred to in paragraph 2 of this Article, in accordance with the advisory procedure referred to in Article 36(2). The European Parliament, the Council and the Committee shall be informed in advance of the delegation agreements to be concluded by the Union, as represented by the Commission, and the European GNSS Agency.

7. The Commission shall inform the European Parliament, the Council and the Committee of the interim and final results of the evaluation of any procurement tenders and of any contracts with private sector entities, including the information relating to subcontracting.

Article 15

The role of the European Space Agency

1. For the deployment phase of the Galileo programme as referred to in Article 3(c), the Commission shall conclude a delegation agreement without delay with ESA detailing the latter's tasks, in particular as regards the design, development and procurement of the system. The delegation agreement with ESA shall be concluded on the basis of a delegation decision adopted by the Commission in accordance with Article 58(1)(c) of Regulation (EU, Euratom) No 966/2012.

The delegation agreement shall, insofar as necessary for the tasks and budget implementation delegated, lay down the general conditions for the management of the funds entrusted to ESA, and, in particular, the actions to be implemented as regards the design, development and procurement of the system, the relevant financing, management procedures and monitoring and control measures, the measures applicable in the event of inadequate implementation of contracts in terms of costs, schedule and performance, as well as the rules regarding ownership of all tangible and intangible assets.

The monitoring and control measures shall, in particular, provide for a provisional cost forecast system, for systematic information to the Commission on costs and schedule, and, in the event of a discrepancy between the planned budgets, performance and schedule, for corrective action ensuring the implementation of the infrastructures within the limits of the budgets allocated.

2. The Committee shall be consulted on the delegation decision referred to in paragraph 1 of this Article, in accordance with the advisory procedure referred to in Article 36(2). The European Parliament, the Council and the Committee shall be informed in advance of the delegation agreement to be concluded by the Union, as represented by the Commission, and ESA.

3. The Commission shall inform the European Parliament, the Council and the Committee of the interim and final results of the evaluation of the procurement tenders and of the contracts with private sector entities to be concluded by ESA, including the information relating to subcontracting.

4. For the exploitation phase of the Galileo and EGNOS programmes as referred to in Article 3(d) and Article 4, the working arrangements between the European GNSS Agency and ESA, referred to in Article 14(4) shall address the role of ESA during that phase and its co-operation with the European GNSS Agency, in particular as regards:

- (a) conception, design, monitoring, procurement and validation in the framework of the development of future generations of the systems;
- (b) technical support in the framework of operation and maintenance of the existing generation of the systems.

Those arrangements shall comply with Regulation (EU, Euratom) No 966/2012 and with the measures laid down by the Commission in accordance with Article 12(3).

5. Without prejudice to the delegation agreement and the working arrangements referred to in paragraphs 1 and 4

respectively, the Commission may request from ESA technical expertise and information necessary for the performance of its tasks under this Regulation.

CHAPTER IV

ASPECTS RELATING TO THE SECURITY OF THE UNION OR OF THE MEMBER STATES

Article 16

Joint Action

Whenever the security of the Union or its Member States may be affected by the operation of the systems, the procedures set out in Joint Action 2004/552/CFSP shall apply.

Article 17

Application of the rules on classified information

Within the scope of this Regulation:

- (a) each Member State shall ensure that its national security regulations offer a degree of protection of EU classified information equivalent to that provided by the rules on security as set out in the Annex to Decision 2001/844/EC, ECSC, Euratom and by the security rules of the Council set out in the Annexes to Decision 2013/488/EU;
- (b) Member States shall without delay inform the Commission of the national security regulation as referred to in point (a);
- (c) natural persons resident in and legal persons established in third countries may deal with EU classified information regarding the Galileo and EGNOS programmes only where they are subject, in those countries, to a security regulation ensuring a degree of protection at least equivalent to that provided by the Commission's rules on security set out in the Annex to Decision 2001/844/EC, ECSC, Euratom and by the security rules of the Council set out in the Annexes to Decision 2013/488/EU. The equivalence of the security regulation applied in a third country or international organisation shall be defined in a security of information agreement between the Union and that third country or international organisation in accordance with the procedure provided for in Article 218 TFEU and taking into account Article 13 of Decision 2013/488/EU;
- (d) without prejudice to Article 13 of Decision 2013/488/EU and to the rules governing the field of industrial security as set out in the Annex to Decision 2001/844/EC, ECSC, Euratom, a natural person or legal person, third country or international organisation may be given access to EU classified information where deemed necessary on a case by case basis, according to the nature and content of such information, the recipient's need-to-know and the degree of advantage to the Union.

CHAPTER V

PUBLIC PROCUREMENT

SECTION I

General provisions applicable to public procurement conducted as part of the deployment and exploitation phases of the Galileo programme and the exploitation phase of the EGNOS programme

Article 18

General principles

Without prejudice to measures required to protect the essential interests of the security of the Union or public security or to comply with Union export control requirements, Regulation (EU, Euratom) No 966/2012 shall apply to the deployment and exploitation phases of the Galileo programme and the exploitation phase of the EGNOS programme. Moreover, the following general principles shall also apply to the deployment and exploitation phases of the Galileo programme and to the exploitation phase of the EGNOS programme: open access and fair competition throughout the industrial supply chain, tendering on the basis of the provision of transparent and timely information, clear communication of the applicable procurement rules, selection and award criteria and any other relevant information allowing a level-playing field for all potential bidders.

Article 19

Specific objectives

During the procurement procedure, the following objectives shall be pursued by the contracting authorities in their calls for tender:

- (a) to promote the widest and most open participation possible throughout the Union by all economic operators, in particular by new entrants and SMEs, including through encouraging recourse to sub-contracting by the tenderers;
- (b) to avoid possible abuse of a dominant position and reliance on a single supplier;
- (c) to take advantage of prior public sector investments and lessons learned, as well as industrial experience and competences, including that acquired in the definition, development and validation and deployment phases of the Galileo and EGNOS programmes, while ensuring that competitive tendering rules are complied with;
- (d) to pursue multiple sourcing wherever appropriate in order to ensure better overall control of the Galileo and EGNOS programmes, their costs and schedule;
- (e) to take into account wherever appropriate the total cost over the useful lifecycle of the product, service or work being tendered.

SECTION 2

Specific provisions applicable to public procurement conducted as part of the deployment and exploitation phases of the Galileo programme and the exploitation phase of the EGNOS programme

Article 20

Establishing fair competition conditions

The contracting authority shall take the appropriate measures to ensure fair competition conditions when the previous involvement of a company in activities associated with the subject of the call for tender:

- (a) may confer significant advantages on that company in terms of privileged information and therefore may give rise to concerns as to compliance with the principle of equal treatment; or
- (b) affect normal competition conditions or the impartiality and objectivity of the award or performance of the contracts.

These measures shall not distort competition, or jeopardise equal treatment or the confidentiality of data collected about undertakings, their business relations and cost structure. In that context, those measures shall take into account the nature and particulars of the intended contract.

Article 21

Security of information

When contracts involve, require and/or contain classified information, the contracting authority shall specify in the tender documents the measures and requirements necessary to ensure the security of such information at the requisite level.

Article 22

Reliability of supply

The contracting authority shall specify in the tender documents its requirements in relation to the reliability of supplies and of the provision of services for the execution of the contract.

Article 23

Conditional stage-payment contracts

1. The contracting authority may award a contract in the form of a conditional stage-payment contract.
2. A conditional stage-payment contract shall include a fixed stage which shall be accompanied by a budgetary commitment which results in a firm commitment to provide the works, supplies or services contracted for that stage, and one or more stages which are conditional in terms of both budget and execution. The tender documents shall refer to the specific features of conditional stage-payment contracts. In particular, they shall specify the subject-matter of the contract, the price or the arrangements for determining the price and the arrangements for the provision of works, supplies and services at each stage.

3. The fixed stage obligations shall be part of a consistent whole; the same shall be true for the obligations under each conditional stage, taking into account the obligations under the previous stages.

4. The performance of each conditional stage shall be subject to a decision by the contracting authority, notified to the contractor in accordance with the contract. When a conditional stage is confirmed late or is not confirmed, the contractor may benefit, if the contract so provides and under the conditions laid down therein, from a tide-over allowance or a non-execution allowance.

5. Where, with regard to a particular stage, the contracting authority finds that works, supplies, or services agreed for that stage have not been completed, it may claim damages and terminate the contract, if the contract so provides and under the conditions laid down therein.

Article 24

Cost-reimbursement contracts

1. The contracting authority may opt for a full or partial cost-reimbursement contract up to a ceiling price, under the conditions laid down in paragraph 2.

The price to be paid for such contracts shall consist of reimbursement of all direct costs incurred by the contractor in performing the contract, such as expenditure on labour, materials, consumables, and use of the equipment and infrastructures necessary to perform the contract. These costs shall be increased by a fixed fee covering indirect costs and the profit, or a sum covering indirect costs and incentive fee compensation based on achieving objectives in respect of performance and delivery schedules.

2. The contracting authority may opt for a full or partial cost-reimbursement contract when it is objectively impossible to specify an accurate fixed price and if it can be reasonably shown that such a fixed price would be abnormally high due to the uncertainties inherent in performance of the contract because:

- (a) the contract has very complex features or features which require the use of a new technology and, therefore, includes a significant number of technical risks; or
- (b) the activities subject to the contract must, for operational reasons, start immediately even though it is not yet possible to determine a firm fixed price in full due to significant risks or because the performance of the contract depends in part on the performance of other contracts.

3. The ceiling price for a full or partial cost-reimbursement contract shall be the maximum price payable. It may be

exceeded only in duly justified exceptional circumstances subject to prior agreement by the contracting authority.

4. The tender documents of a procurement procedure for a full or partial cost-reimbursement contract shall specify:

- (a) the type of contract, namely whether it is a full or partial cost-reimbursement contract up to a ceiling price;
 - (b) for a partial cost-reimbursement contract, the elements of the contract subject to cost-reimbursement;
 - (c) the total ceiling price;
 - (d) the award criteria, which must enable an evaluation of the plausibility of the estimated overall budget, of the reimbursable costs, of the mechanisms for determining those costs, and the profit referred to in the tender to be evaluated;
 - (e) the mechanics of the increase referred to in paragraph 1 to be applied to direct costs;
 - (f) the rules and procedures which determine the eligibility of the costs planned by the tenderer for the performance of the contract, in accordance with the principles set out in paragraph 5;
 - (g) the accounting rules with which tenderers must comply;
 - (h) in the case of a partial cost-reimbursement contract to be converted into a firm fixed-price contract, the parameters for such conversion.
5. The costs declared by the contractor during the performance of a full or partial cost-reimbursement contract shall only be eligible if they:
- (a) are actually incurred in the course of the contract, with the exception of the costs for the equipment, infrastructures and intangible fixed assets necessary for performance of the contract which may be deemed eligible up to the whole of their purchase value;
 - (b) are referred to in the estimated overall budget which may be revised by amendments to the initial contract;
 - (c) are necessary for the performance of the contract;
 - (d) result from and are attributable to the performance of the contract;

- (e) are identifiable, verifiable, recorded in the contractor's accounting record and determined in accordance with the accounting standards referred to in the specifications and in the contract;
- (f) comply with the requirements of applicable tax and social law;
- (g) do not derogate from the terms of the contract;
- (h) are reasonable, justified, and comply with the requirements of sound financial management, in particular regarding economy and efficiency.

The contractor shall be responsible for its own cost accounting, keeping sound accounting records or any other document required to show that the costs for which reimbursement is requested have been incurred and comply with the principles set out in this Article. Costs which cannot be substantiated by the contractor shall be deemed ineligible and their reimbursement shall be refused.

6. The contracting authority shall be responsible for the following tasks in order to ensure correct performance of cost-reimbursement contracts:

- (a) determining the most realistic possible ceiling price, while providing the necessary flexibility to account for technical difficulties;
- (b) converting a partial cost-reimbursement contract into a full firm fixed-price contract as soon as it is possible to determine such a firm fixed-price during performance of the contract. For that reason, it shall determine the conversion parameters to convert a contract concluded on a cost-reimbursement basis to a firm fixed-price contract;
- (c) implementing monitoring and control measures which provide, in particular, an estimated cost forecast system;
- (d) determining suitable principles, tools and procedures for the performance of the contract, in particular for identifying and checking the eligibility of the costs declared by the contractor or its subcontractors during the performance of the contract, and for introducing amendments to the contract;
- (e) checking that the contractor and its subcontractors comply with the accounting standards stipulated in the contract and with the obligation to provide their accounting documents which should present a true and fair view of the accounts;
- (f) throughout the performance of the contract, continuously ensuring the effectiveness of the principles, tools and procedures referred to in point (d).

Article 25

Amendments

The contracting authority and the contractors may change the contract by an amendment on condition that the amendment fulfils all of the following conditions:

- (a) it does not alter the subject-matter of the contract,
- (b) it does not disturb the economic balance of the contract,
- (c) it does not introduce conditions which, if they had appeared initially in the contract documents, would have allowed for the admission of tenderers other than those initially admitted or would have allowed for the acceptance of a tender other than the one initially accepted.

Article 26

Subcontracting

1. The contracting authority shall request the tenderer to subcontract a share of the contract by competitive tendering at the appropriate levels of sub-contracting to companies other than those that belong to the tenderer's group in particular to new entrants and SMEs.

2. The contracting authority shall express the requisite share of the contract to be subcontracted in the form of a range from a minimum to a maximum percentage. It shall ensure that such percentages are proportionate to the objective and value of the contract, taking into account the nature of the sector of activity concerned, and in particular, the competitive conditions and the industrial potential observed.

3. If the tenderer indicates in its tender that it intends not to sub-contract any share of the contract or to subcontract a share smaller than the minimum range referred to in paragraph 2, it shall provide the reasons therefore to the contracting authority. The contracting authority shall submit that information to the Commission.

4. The contracting authority may reject subcontractors selected by the candidate at the stage of the main contract award procedure or by the tenderer selected for the performance of the contract. It shall justify its rejection in writing, which may be based only on the criteria used for selection of tenderers for the main contract.

CHAPTER VI

MISCELLANEOUS PROVISIONS

Article 27

Programming

The Commission shall adopt an annual work programme in the form of an implementation plan of the actions required to meet the specific objectives of the Galileo programme laid down in Article 2(4) according to the phases set out in Article 3 and the specific objectives of the EGNOS programme laid down in Article 2(5). The annual work programme shall also provide for the funding of those actions.

Those implementing measures shall be adopted in accordance with the examination procedure referred to in Article 36(3).

Article 28

Member States' action

The Member States shall take all necessary measures to ensure the good functioning of the Galileo and EGNOS programmes including measures to ensure the protection of the ground stations established on their territories which shall be at least equivalent to those required for the protection of European critical infrastructures within the meaning of Council Directive 2008/114/EC ⁽¹⁾. The Member States shall not take any measures which could be detrimental to the programmes or the services provided through their exploitation, in particular in terms of the continuity of the operation of the infrastructures.

Article 29

International agreements

The Union may enter into agreements with third countries and international organisations in the context of the Galileo and EGNOS programmes in accordance with the procedure laid down in Article 218 TFEU.

Article 30

Technical assistance

In order to carry out the technical tasks referred to in Article 12(2), the Commission may have recourse to the necessary technical assistance, in particular to the capacity and expertise of the national agencies competent in the space sector, or the assistance of independent experts and bodies capable of providing impartial analyses and opinions on the progress of the Galileo and EGNOS programmes.

The entities involved in the public governance of the programmes, other than the Commission, in particular, the European GNSS Agency and ESA, may also receive the same technical assistance in performing the tasks entrusted to them under this Regulation.

Article 31

Personal data and privacy protection

1. The Commission shall ensure that personal data and privacy are protected during the design, implementation and exploitation of the systems and that the appropriate safeguards are included therein.

2. All personal data handled in the context of the tasks and activities provided for in this Regulation shall be processed in

⁽¹⁾ Council Directive 2008/114/EC of 8 December 2008 on the identification and designation of European critical infrastructures and the assessment of the need to improve their protection (OJ L 345, 23.12.2008, p. 75).

accordance with the applicable law on personal data protection, in particular Regulation (EC) No 45/2001 of the European Parliament and of the Council ⁽²⁾ and Directive 95/46/EC of the European Parliament and of the Council ⁽³⁾.

Article 32

Protection of the Union's financial interests

1. The Commission shall take the appropriate measures to ensure that the financial interests of the Union are protected when actions financed under this Regulation are implemented, by the application of preventive measures against fraud, corruption and any other illegal activities, by effective checks and, if irregularities are detected, by the recovery of amounts unduly paid and, if necessary, by effective, proportionate and dissuasive penalties.

2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of document and on-the-spot checks, over all grant beneficiaries, contractors and subcontractors who have received Union funds under this Regulation.

The European Anti-fraud Office (OLAF) may carry out investigations, including on-the-spot checks and inspections of economic operators directly or indirectly concerned by such funding in accordance with the provisions and procedures laid down in Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council ⁽⁴⁾ and Council Regulation (Euratom, EC) No 2185/96 ⁽⁵⁾ with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or decision or a contract concerning Union financing.

Without prejudice to the first and second subparagraphs, international agreements with third countries and with international organisations, grant agreements, grant decisions and contracts resulting from the application of this Regulation shall contain provisions expressly empowering the Commission, the Court of Auditors and OLAF to conduct such audits and investigations in accordance with their respective competences.

⁽²⁾ Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data (OJ L 8, 12.1.2001, p. 1).

⁽³⁾ Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data (OJ L 281, 23.11.1995, p. 31).

⁽⁴⁾ Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1).

⁽⁵⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

Article 33

Information to the European Parliament and to the Council

1. The Commission shall ensure the implementation of this Regulation. Each year, when it presents the preliminary draft budget, it shall present a report to the European Parliament and to the Council on the implementation of the Galileo and EGNOS programmes. That report shall contain all information pertaining to the programmes, in particular in terms of risk management, overall cost, annual operating cost, revenues, schedule and performance, as referred to in point (d) of Article 12(2) and as regards the functioning of the delegation agreements concluded pursuant to Articles 14(2) and 15(1). It shall include:

- (a) an overview of the allocation and use of funds allocated to the programmes as referred to in Article 7(4);
- (b) information on the cost management strategy pursued by the Commission as referred to in Article 9(6);
- (c) an assessment of intellectual property rights management;
- (d) an overview of the implementation of the project management systems and techniques, including risk management systems and techniques, as referred to in point (d) of Article 12(2);
- (e) an evaluation of the measures taken to maximise the socio-economic benefits of the programmes.

2. The Commission shall inform the European Parliament and the Council of the interim and final results of the evaluation of the procurement tenders and of the contracts with private sector entities performed by the European GNSS Agency and ESA pursuant to Article 14(7) and Article 15(3) respectively.

It shall also inform the European Parliament and the Council:

- (a) of any re-allocation of funds between categories of expenditure performed pursuant to Article 9(3);
- (b) of any impact on the Galileo and EGNOS programmes resulting from the application of Article 8(2).

Article 34

Review of the implementation of this Regulation

1. By 30 June 2017, the Commission shall present an evaluation report on the implementation of this Regulation to

the European Parliament and the Council, with a view to a decision being taken on the renewal, modification or suspension of the measures taken pursuant to this Regulation concerning:

- (a) achieving the objectives of those measures, from the point of view of both results and impacts;
- (b) effectiveness of the use of resources;
- (c) European added value.

The evaluation shall also address technological developments relating to the systems, the scope for simplification, its internal and external coherence, the relevance of all objectives, as well as the contribution of the measures to the Union priorities of smart, sustainable and inclusive growth. It shall take into account the results of the evaluation on the long-term impact of the previous measures.

2. The evaluation shall take into account progress made with regard to the specific objectives of the Galileo and EGNOS programmes laid down in Article 2(4) and (5), respectively, on the basis of performance indicators such as:

- (a) for Galileo and as regards:
 - (i) its infrastructure deployment:
 - number and availability of operational satellites, and number of available on-ground spare satellites versus number of planned satellites referred to in the delegation agreement;
 - actual availability of the elements of the ground-based infrastructure (such as ground stations, control centres) versus planned availability;
 - (ii) service level:
 - service availability map per service versus service definition document;
 - (iii) cost:
 - cost performance index per major cost item of the programme based on a ratio comparing actual cost with budgeted cost;
 - (iv) schedule:
 - schedule performance index per major item of the programme based on comparing budgeted cost of work performed with budgeted cost of work scheduled;

(v) market level:

- market trend based on the percentage of Galileo and EGNOS receivers in the total number of receiver models included in the market report provided by the European GNSS Agency referred to in point (c) of Article 14(1).

(b) for EGNOS and as regards:

(i) its coverage extension:

- progress of the coverage extension versus agreed coverage extension plan;

(ii) service level:

- service availability index based on the number of airports with EGNOS-based approach procedures with an operational status versus the total number of airports with EGNOS-based approach procedures;

(iii) cost:

- cost performance index based on a ratio comparing actual cost with budgeted cost;

(iv) schedule:

- schedule performance index based on comparing budgeted cost of work performed with budgeted cost of work scheduled.

3. The bodies involved in the implementation of this Regulation shall provide the Commission with the data and information necessary to enable the actions concerned to be monitored and evaluated.

CHAPTER VII

DELEGATION AND IMPLEMENTING MEASURES

Article 35

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 13(2) shall be conferred on the Commission for an indeterminate period from 1 January 2014.

3. The delegation of power referred to in Article 13(2) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation

of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Article 13(2) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or the Council.

Article 36

Committee Procedure

1. The Commission shall be assisted by a Committee. That Committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

2. Where reference is made to this paragraph, Article 4 of Regulation (EU) No 182/2011 shall apply.

3. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

4. Representatives of the European GNSS Agency and ESA shall be involved as observers in the work of the Committee under the conditions laid down in its rules of procedure.

5. International agreements concluded by the Union in accordance with Article 29 may provide for the involvement, as appropriate, of representatives of third countries or international organisations in the work of the Committee under the conditions laid down in its rules of procedure.

6. The Committee shall meet regularly, preferably four times per year, on a quarterly basis. The Commission shall provide a report on programme progress at each meeting. Those reports shall give a general overview of programme status and developments, in particular in terms of risk management, cost, schedule and performance. At least once a year, those reports shall include the performance indicators referred to in Article 34(2).

CHAPTER VIII

FINAL PROVISIONS

Article 37

Repeals

1. Regulations (EC) No 876/2002 and (EC) No 683/2008 shall be repealed with effect from 1 January 2014.

2. Any measure adopted on the basis of Regulation (EC) No 876/2002 or Regulation (EC) No 683/2008 shall remain in force.

3. References to the repealed Regulation (EC) No 683/2008 shall be construed as references to this Regulation and shall be read in accordance with the correlation table set out in the Annex hereto.

Article 38

Entry into force

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

Joint declaration

by the European Parliament, the Council and the European Commission on the GALILEO INTERINSTITUTIONAL PANEL (GIP)

1. In view of the importance, uniqueness and complexity of the European GNSS programmes, the Union ownership of systems resulting from the programmes, the full financing of the Union budget of the programmes for the period 2014-2020, the European Parliament, the Council, and the European Commission recognise the need for close cooperation of the three institutions.
 2. A Galileo Interinstitutional Panel (GIP) will meet with the objective to facilitate each institution exercising its respective responsibility. To this end, the GIP will be set up in order to follow closely:
 - (a) the progress on the implementation of the European GNSS programmes, in particular with regard to the implementation of the procurement and the contract agreements, in particular with regard to the ESA;
 - (b) the International Agreements with third countries without prejudice to the provisions of Article 218 of the Treaty on the Functioning of the European Union;
 - (c) the preparation of satellite navigation markets;
 - (d) the effectiveness of the governance arrangements; and
 - (e) the annual review of the work programme.
 3. In accordance with existing rules, the GIP will respect the need for discretion in particular in view of the commercial-in-confidence and sensitive nature of certain data.
 4. The Commission will take account of the views expressed by the GIP.
 5. The GIP will be composed of seven representatives, of which:
 - three from the Council,
 - three from the EP,
 - one from the Commission,and will meet on a regular basis (in principle four times per year).
 6. The GIP does not affect the established responsibilities or interinstitutional relationships.
-

**REGULATION (EU) No 1286/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

establishing an action programme to improve the operation of taxation systems in the European Union for the period 2014-2020 (Fiscalis 2020) and repealing Decision No 1482/2007/EC

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 114 and 197 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) The multi-annual action programme for taxation which applied before 2014 has significantly contributed to facilitating and enhancing cooperation between tax authorities within the Union. The added value of that programme, including to the protection of the financial interests of Member States of the Union and of taxpayers, has been recognised by the tax administrations of the participating countries. The challenges identified for the next decade cannot be tackled if Member States do not look beyond the borders of their administrative territories or cooperate intensively with their counterparts. The Fiscalis programme, implemented by the Commission in cooperation with the participating countries, offers Member States a Union framework within which to develop those cooperation activities, and which is more cost-effective than if each Member State were to set up individual cooperation frameworks on a bilateral or multilateral basis. It is therefore appropriate to ensure the continuation of that programme by establishing a new programme in the same area.
- (2) The programme established under this Regulation, "Fiscalis 2020", and its success are vital in the present economic situation and should support cooperation in fiscal matters.
- (3) The activities under Fiscalis 2020, namely the European information systems as defined in this Regulation (European Information Systems), the joint actions for officials of tax authorities and the common training initiatives, are expected to contribute to the realisation of the Europe 2020 Strategy for smart, sustainable and inclusive growth by strengthening the functioning of the internal market, providing a framework within which to support activities enhancing the administrative capacity of tax authorities and advancing technical progress and innovation. In providing a framework for activities which strive for more efficient tax authorities, strengthen the competitiveness of businesses, promote employment and contribute to the protection of the financial and economic interests of the Member States of the Union and of taxpayers, Fiscalis 2020 will actively strengthen the functioning of the taxation systems in the internal market, while contributing to the gradual elimination of existing barriers and distortions within the internal market.
- (4) The scope of Fiscalis 2020 should be brought into line with current needs so as to focus on all taxes harmonised at Union level and other taxes in so far as they are relevant for the internal market and for administrative cooperation between the Member States.
- (5) To support the process of accession and association by third countries, Fiscalis 2020 should be open to the participation of acceding and candidate countries and to potential candidate countries and partner countries of the European Neighbourhood Policy if certain conditions are fulfilled and their participation supports only activities under Fiscalis 2020 which are aimed at fighting against tax fraud and tax evasion, and addressing aggressive tax planning. Considering the increasing level of interconnection of the world economy, Fiscalis 2020 should continue to provide for the possibility of inviting external experts to contribute to activities under Fiscalis 2020. External experts, such as representatives of governmental authorities, economic operators and their organisations or representatives of international organisations should be invited only where their contribution is considered to be essential for achieving the objectives of Fiscalis 2020.
- (6) The objectives and priorities of Fiscalis 2020 take into account the problems and challenges identified for taxation in the next decade. Fiscalis 2020 should continue to play a role in vital areas such as the coherent implementation of Union law in the field of taxation, securing the exchange of information and supporting administrative cooperation and enhancing the administrative capacity of tax authorities. Given the problem dynamics of new challenges identified, additional emphasis should be put on supporting the fight against tax fraud, tax evasion and aggressive tax planning. Emphasis should also be placed on reducing the administrative burden for tax authorities and the compliance costs for tax payers and preventing instances of double taxation.

⁽¹⁾ OJ C 143, 22.5.2012, p. 48 and OJ C 11, 15.1.2013, p. 84.

- (7) At an operational level, Fiscalis 2020 should implement, operate and support the European Information Systems and administrative cooperation activities, reinforce the skills and competences of tax officials, enhance the understanding and implementation of Union law in the field of taxation, and support the improvement of administrative procedures and the sharing and dissemination of good administrative practices. Those objectives should be pursued with an emphasis on supporting the fight against tax fraud, tax evasion and aggressive tax planning.
- (8) The programme tools which applied before Fiscalis 2020 should be supplemented in order to respond adequately to challenges awaiting tax authorities in the next decade and to remain in line with developments in Union law. Fiscalis 2020 should cover bilateral or multilateral controls and other forms of administrative cooperation as established in the relevant Union law on administrative cooperation; expert teams; public administration capacity-building actions providing specific and specialised coaching in the field of taxation to Member States facing particular and exceptional circumstances that justify such targeted actions; and, where necessary, studies and common communication activities in order to support the implementation of Union law in the field of taxation.
- (9) The European Information Systems play a vital role in interconnecting tax authorities and thus in reinforcing the taxation systems within the Union and should therefore continue to be financed and improved under Fiscalis 2020. In addition, it should be made possible to include in Fiscalis 2020 new tax-related information systems established under Union law. The European Information Systems should, where appropriate, be based on shared development models and IT architecture.
- (10) In the context of improving administrative cooperation more widely and supporting the fight against tax fraud, tax evasion and aggressive tax planning, it may be useful for the Union to conclude agreements with third countries in order to allow those countries to use the Union components of the European Information Systems to support a secure exchange of information between them and the Member States in the framework of bilateral tax agreements.
- (11) Common training activities should also be carried out under Fiscalis 2020. Fiscalis 2020 should continue to support participating countries in strengthening professional skills and knowledge relating to taxation through enhanced jointly developed training content that targets tax officials and economic operators. To that end, the current common training approach of the Fiscalis 2020, which was mainly based on central eLearning development, should develop into a multi-faceted training support programme for the Union.
- (12) Fiscalis 2020 should cover a period of seven years to align its duration with that of the multiannual financial framework laid down in Council Regulation (EU, Euratom) No 1311/2013 ⁽¹⁾.
- (13) This Regulation lays down a financial envelope for the entire duration of Fiscalis 2020 which is to constitute the prime reference amount, within the meaning of Point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management ⁽²⁾, for the European Parliament and the Council during the annual budgetary procedure.
- (14) In line with the Commission's commitment, set out in its Communication on the Budget Review of 2010, to coherence and simplification of funding programmes, resources should be shared with other Union funding instruments if the envisaged activities under Fiscalis 2020 pursue objectives which are common to various funding instruments, excluding however double financing.
- (15) The measures necessary for the financial implementation of this Regulation should be adopted in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council ⁽³⁾, and with Commission Delegated Regulation (EU) No 1268/2012 ⁽⁴⁾.
- (16) Participating countries should bear the cost of national elements of Fiscalis 2020 which would include, inter alia, the non-Union components of the European Information Systems, and any training which is not part of the common training initiatives.
- (17) Considering the importance of full participation of participating countries in joint actions, a co-financing rate of 100 % of the eligible costs in respect of travel and accommodation costs, costs linked to organisation of events and daily allowances is possible where it is necessary to achieve fully the objectives of Fiscalis 2020.
-
- ⁽¹⁾ Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the year 2014-2020 (see page 884 of this Official Journal).
- ⁽²⁾ OJ C 37, 20.12.2013, p. 1.
- ⁽³⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).
- ⁽⁴⁾ Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

- (18) The financial interests of the Union should be protected through appropriate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, unduly paid or incorrectly used and, where appropriate, penalties.
- (19) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission in respect of the establishment of annual work programmes. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽¹⁾.
- (20) Since the objective of this Regulation, namely establishing a multi-annual programme to improve the operation of the taxation systems in the internal market, cannot be sufficiently achieved by the Member States as they cannot efficiently perform the cooperation and coordination necessary to achieve that objective, the Union may adopt measures in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.
- (21) The Commission should be assisted by the Fiscalis 2020 Committee for the implementation of Fiscalis 2020.
- (22) To facilitate the evaluation of Fiscalis 2020, a proper framework for monitoring the results achieved by Fiscalis 2020 should be put in place from the very beginning. The Commission, together with participating countries, should establish adjustable indicators and set pre-defined baselines for monitoring the results of activities under Fiscalis 2020. A mid-term evaluation looking at the achievement of the objectives of Fiscalis 2020, its efficiency and its added value at the European level should be carried out. A final evaluation should, in addition, deal with the long-term impact and the sustainability effects of Fiscalis 2020. Full transparency with regular reporting on monitoring and with the submission of evaluation reports to the European Parliament and to the Council should be ensured.
- (23) Directive 95/46/EC of the European Parliament and of the Council ⁽²⁾ governs the processing of personal data carried out in the Member States in the context of this Regulation and under the supervision of the Member States competent authorities, in particular the public independent authorities designated by the Member

States. Regulation (EC) No 45/2001 of the European Parliament and of the Council ⁽³⁾ governs the processing of personal data carried out by Commission within the framework of this Regulation and under the supervision of the European Data Protection Supervisor. Any exchange or transmission of information by competent authorities should be in accordance with the rules on the transfer of personal data as laid down in Directive 95/46/EC and any exchange or transmission of information by the Commission should be in accordance with the rules on the transfer of personal data as laid down in Regulation (EC) No 45/2001.

- (24) This Regulation replaces Decision No 1482/2007/EC of the European Parliament and of the Council ⁽⁴⁾. That Decision should therefore be repealed,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

General provisions

Article 1

Subject matter

1. A multi-annual action programme "Fiscalis 2020" ("the programme") is hereby established to improve the operation of the taxation systems in the internal market and to support cooperation in relation thereto.
2. The programme shall cover the period 1 January 2014 to 31 December 2020.

Article 2

Definitions

For the purpose of this Regulation, the following definitions shall apply:

- (1) "tax authorities" means the public authorities and other bodies in the participating countries which are responsible for administering taxation or tax-related activities;
- (2) "external experts" means:
 - (a) representatives of governmental authorities, including those from countries not participating in the programme pursuant to Article 3(2);
 - (b) economic operators and organisations representing economic operators;
 - (c) representatives of international and other relevant organisations;

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by the Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

⁽²⁾ Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data (OJ L 281, 23.11.1995, p. 31).

⁽³⁾ Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data (OJ L 8, 12.1.2001, p. 1).

⁽⁴⁾ Decision No 1482/2007/EC of the European Parliament and of the Council of 11 December 2007 establishing a Community programme to improve the operation of taxation systems in the internal market (Fiscalis 2013) and repealing Decision No 2235/2002/EC (OJ L 330, 15.12.2007, p. 1).

- (3) "taxation" means the following:
- (a) value added tax provided for in Council Directive 2006/112/EC ⁽¹⁾;
 - (b) excise duties on alcohol provided for in Council Directive 92/83/EEC ⁽²⁾;
 - (c) excise duties on tobacco products provided for in Council Directive 2011/64/EU ⁽³⁾;
 - (d) taxes on energy products and electricity provided for in Council Directive 2003/96/EC ⁽⁴⁾;
 - (e) other taxes falling within the scope of Article 2(1)(a) of Council Directive 2010/24/EU ⁽⁵⁾ in so far as they are relevant for the internal market and for administrative cooperation between the Member States;
- (4) "bilateral or multilateral controls" means the coordinated checking of the tax liability of one or more related taxable persons organised by two or more participating countries with common or complementary interests, which include at least two Member States.

Article 3

Participation in the programme

1. Participating countries shall be the Member States and the countries referred to in paragraph 2, provided the conditions set out in that paragraph are met.
2. The programme shall be open to participation by any of the following countries:
 - (a) acceding countries, candidate countries and potential candidate countries benefiting from a pre-accession strategy, in accordance with the general principles and general terms and conditions for the participation of those countries in Union programmes established in the respective framework agreements, Association Council decisions or similar agreements;
 - (b) partner countries of the European Neighbourhood Policy provided that those countries have reached a sufficient level of approximation of the relevant legislation and administrative methods to those of the Union.

⁽¹⁾ Council Directive 2006/112/EC of 28 November 2006 on the common system of value added tax (OJ L 347, 11.12.2006, p. 1).

⁽²⁾ Council Directive 92/83/EEC of 19 October 1992 on the harmonization of the structures of excise duties on alcohol and alcoholic beverages (OJ L 316, 31.10.1992, p. 21).

⁽³⁾ Council Directive 2011/64/EU of 21 June 2011 on the structure and rates of excise duty applied to manufactured tobacco (OJ L 176, 5.7.2011, p. 24).

⁽⁴⁾ Council Directive 2003/96/EC of 27 October 2003 restructuring the Community framework for the taxation of energy products and electricity (OJ L 283, 31.10.2003, p. 51).

⁽⁵⁾ Council Directive 2010/24/EU of 16 March 2010 concerning mutual assistance for the recovery of claims relating to taxes, duties and other measures (OJ L 84, 31.3.2010, p. 1).

The partner countries referred to in point (b) of the first subparagraph shall participate in the programme in accordance with provisions to be determined with those countries following the establishment of framework agreements concerning their participation in Union programmes. Their participation shall support only activities under the programme which are aimed at fighting tax fraud and tax evasion and addressing aggressive tax planning.

Article 4

Participation in activities under the programme

External experts may be invited to contribute to selected activities organised under the programme wherever essential for the achievement of the objectives referred to in Articles 5 and 6. The external experts shall be selected by the Commission together with the participating countries, on the basis of their skills, experience and knowledge relevant to the specific activities, taking into account any potential conflict of interest, and striking a balance between business representatives and other civil society experts. A list of selected external experts shall be made public and shall be regularly updated.

Article 5

Overall objective and specific objective

1. The overall objective of the programme shall be to improve the proper functioning of the taxation systems in the internal market by enhancing cooperation between participating countries, their tax authorities and their officials.
2. The specific objective of the programme shall be to support the fight against tax fraud, tax evasion and aggressive tax planning and the implementation of Union law in the field of taxation by ensuring exchange of information, by supporting administrative cooperation and, where necessary and appropriate, by enhancing the administrative capacity of participating countries with a view to assisting in reducing the administrative burden on tax authorities and the compliance costs for taxpayers.
3. The achievement of the objectives referred to in this Article shall be measured on the basis, in particular, of the following:
 - (a) the availability of, and full access to, the common communication network for the European Information Systems;
 - (b) the feedback from participating countries on the results of actions under the programme.

Article 6

Operational objectives and priorities of the programme

1. The operational objectives and priorities of the programme shall be the following:
 - (a) to implement, improve, operate and support the European Information Systems for taxation;
 - (b) to support administrative cooperation activities;
 - (c) to reinforce the skills and competence of tax officials;

- (d) to enhance the understanding and implementation of Union law in the field of taxation;
- (e) to support the improvement of administrative procedures and the sharing of good administrative practices.

2. The objectives and priorities referred to in paragraph 1 shall be pursued with a particular emphasis on supporting the fight against tax fraud, tax evasion and aggressive tax planning.

CHAPTER II

Eligible actions

Article 7

Eligible actions

1. The programme shall provide, under the conditions set out in the annual work programme referred to in Article 14, financial support for the following:

- (a) joint actions:
 - (i) seminars and workshops;
 - (ii) project groups, generally composed of a limited number of countries, operational during a limited period of time to pursue a predefined objective with a precisely described outcome;
 - (iii) bilateral or multilateral controls and other activities provided for in Union law on administrative cooperation, organised by two or more participating countries, which include at least two Member States;
 - (iv) working visits organised by the participating countries or another country to enable officials to acquire or increase their expertise or knowledge in tax matters;
 - (v) expert teams, namely structured forms of cooperation, with a non-permanent character, pooling expertise to perform tasks in specific domains, in particular in the European Information Systems, possibly with the support of online collaboration services, administrative assistance and infrastructure and equipment facilities;
 - (vi) public administration capacity-building and supporting actions;
 - (vii) studies;
 - (viii) communication projects;
 - (ix) any other activity in support of the overall, specific and operational objectives and priorities set out in Articles 5 and 6, provided that the necessity for such other activity is duly justified;

(b) European Information Systems building: the development, maintenance, operation and quality control of Union components of the European Information Systems set out

in point A of the Annex and new European Information Systems established under Union law, with a view to inter-connecting tax authorities efficiently;

- (c) common training activities: jointly developed training actions to support the necessary professional skills and knowledge relating to taxation.

Working visits referred to in point (a)(iv) of the first subparagraph shall not exceed one month. For working visits organised within third countries, only travel and subsistence (accommodation and daily allowance) costs shall be eligible under the programme.

Expert teams referred to in point (a)(v) of the first subparagraph shall be organised by the Commission in cooperation with the participating countries and, unless duly justified, shall not exceed one year.

2. The resources for the eligible actions referred to in this Article shall be allocated in a balanced manner and in proportion to the real needs of those actions.

3. When evaluating the programme, the Commission shall assess the need for introducing budgetary ceilings for the various eligible actions.

Article 8

Specific implementation provisions for joint actions

1. Participation in joint actions referred to in point (a) of the first subparagraph of Article 7(1) shall be on a voluntary basis.

2. Participating countries shall ensure that officials with an appropriate profile and qualifications, including language skills, are nominated to participate in the joint actions.

3. Participating countries shall, where appropriate, take the necessary measures to raise awareness of the joint actions and to ensure that use is made of the outputs generated.

Article 9

Specific implementation provisions for the European Information Systems

1. The Commission and the participating countries shall ensure that the European Information Systems referred to in point A of the Annex are developed, operated and appropriately maintained.

2. The Commission shall coordinate, in cooperation with the participating countries, those aspects of the establishment and functioning of the Union and non-Union components of the European Information Systems referred to in point A of the Annex which are necessary to ensure their operability, inter-connectivity and continuous improvement.

3. The use of the Union components of the European Information Systems referred to in point A of the Annex by non-participating countries shall be subject to agreements with those countries to be concluded in accordance with Article 218 of the Treaty on the Functioning of the European Union.

*Article 10***Specific implementation provisions for common training activities**

1. Participation in common training activities referred to in point (c) of the first subparagraph of Article 7(1) shall be on a voluntary basis.
2. Participating countries shall ensure that officials with an appropriate profile and qualifications, including language skills, are nominated to participate in the common training activities.
3. Participating countries shall integrate, where appropriate, jointly developed training content, including e-learning modules, training programmes and commonly agreed training standards into their national training programmes.

CHAPTER III

Financial framework*Article 11***Financial framework**

1. The financial envelope for the implementation of the programme shall be EUR 223 366 000 in current prices.
2. The financial allocation for the programme may also cover expenses pertaining to preparatory, monitoring, checking, audit and evaluation activities which are required on a regular basis for the management of the programme and the achievement of its objectives; in particular, studies, meetings of experts, information and communication activities related to the objectives laid down in this Regulation, expenses linked to IT networks focusing on information processing and exchange, together with all other technical and administrative assistance expenses incurred by the Commission for the management of the programme.

The share of administrative expenditure shall, in general, not exceed 5 % of the overall cost of the programme.

*Article 12***Types of intervention**

1. The Commission shall implement the programme in accordance with Regulation (EU, Euratom) No 966/2012.
2. Union financial support for activities provided for in Article 7 shall take the form of:
 - (a) grants;
 - (b) public procurement contracts;
 - (c) the reimbursement of costs incurred by external experts referred to in Article 4.
3. The co-financing rate for grants shall be up to 100 % of the eligible costs in the case of travel and accommodation costs, costs linked to the organisation of events and daily allowances.

That rate shall apply to all eligible actions with the exception of expert teams referred to in point (a)(v) of the first subparagraph

of Article 7(1). The applicable co-financing rate for expert teams, where those actions require the awarding of grants, shall be set out in the annual work programmes.

4. The Union components of the European Information Systems shall be financed by the programme. Participating countries shall, in particular, bear the costs of the acquisition, development, installation, maintenance and day-to-day operation of the non-Union components of the European Information Systems.

*Article 13***Protection of the financial interests of the Union**

1. The Commission shall take appropriate measures to ensure that, where actions financed under this Regulation are implemented, the financial interests of the Union are protected by the application of preventive measures against fraud, corruption and any other illegal activities by effective checks and, if irregularities are detected, by the recovery of the amounts unduly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties.
2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on the spot, over all grant beneficiaries, contractors and subcontractors who have received Union funds under this Regulation.
3. The European Anti-fraud Office (OLAF) may carry out investigations, including on-the-spot checks and inspections, in accordance with the provisions and procedures laid down in Regulation (EC) No 1073/1999 of the European Parliament and of the Council⁽¹⁾ and Council Regulation (Euratom, EC) No 2185/96⁽²⁾ with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract funded under this Regulation.

CHAPTER IV

Implementing powers*Article 14***Work programme**

In order to implement the programme, the Commission shall, by means of implementing acts, adopt annual work programmes, which shall set out the objectives pursued, the expected results, the method of implementation and their total amount. They shall also contain a description of the actions to be financed, an indication of the amount allocated to each action type and an indicative implementation timetable. The annual work programmes shall include for grants the priorities, the essential evaluation criteria and the maximum rate of co-financing. Those implementing acts shall be based on the results of previous years and shall be adopted in accordance with the examination procedure referred to in Article 15(2).

⁽¹⁾ Regulation (EC) No 1073/1999 of the European Parliament and of the Council of 25 May 1999 concerning investigations conducted by the European Anti-fraud Office (OLAF) (OJ L 136, 31.5.1999, p. 1).

⁽²⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

*Article 15***Committee procedure**

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.
2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

CHAPTER V

Monitoring and evaluation*Article 16***Monitoring of actions under the programme**

1. The Commission shall, in cooperation with the participating countries, monitor the programme and actions under it.
2. The Commission and participating countries shall establish qualitative and quantitative indicators and, where necessary, add new indicators during the course of the programme. The indicators shall be used to measure the effects of the programme against pre-defined baselines.
3. The Commission shall make public the outcome of the monitoring referred to in paragraph 1 and the indicators referred to in paragraph 2.
4. The outcome of the monitoring shall be used for the evaluation of the programme in accordance with Article 17.

*Article 17***Evaluation and review**

1. The Commission shall submit to the European Parliament and to the Council mid-term and final evaluation reports regarding the matters referred to in paragraphs 2 and 3. The results of those evaluations shall be integrated into decisions on possible renewal, modification or suspension of the programme for subsequent periods. Those evaluations shall be carried out by an independent external evaluator.

2. The Commission shall, by 30 June 2018, draw up a mid-term evaluation report on the achievement of the objectives of the actions under the programme, the efficiency of the use of resources and the added value at the European level of the programme. That report shall, additionally, address the simplification and the continued relevance of the objectives, as well as the contribution of the programme to the Union priorities of smart, sustainable and inclusive growth.

3. The Commission shall, by 31 December 2021, draw up a final evaluation report on the matters referred to in paragraph 2, and on the long-term impact and the sustainability of effects of the programme.

4. Upon request from the Commission, the participating countries shall provide it with all available data and information relevant for the purpose of contributing to its mid-term and final evaluation reports.

CHAPTER VI

Final provisions*Article 18***Repeal**

Decision No 1482/2007/EC is repealed with effect from 1 January 2014.

However, financial obligations related to actions pursued under that Decision shall continue to be governed by it until their completion.

*Article 19***Entry into force**

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

ANNEX

EUROPEAN INFORMATION SYSTEMS AND THEIR UNION COMPONENTS

A. The European Information Systems are the following:

- (1) the common communications network / common systems interface (CCN/CSI -CCN2), CCN mail3, the CSI bridge, the http bridge, CCN LDAP and related tools, CCN web portal, CCN monitoring;
- (2) supporting systems, in particular the application configuration tool for CCN, the activity reporting tool (ART2), Taxud electronic management of project online (TEMPO), service management tool (SMT), the user management system (UM), the BPM system, the availability dashboard and AvDB, IT service management portal, directory and user access management;
- (3) Programmes information and communication space (PICS);
- (4) the VAT-related systems, in particular, the VAT information exchange system (VIES) and the VAT refund, including the VIES initial application, the VIES monitoring tool, the Taxation statistical system, VIES-on-the-web, VIES-on-the-web configuration tool, the VIES and VAT refund test tools, the VAT number algorithms, the VAT exchange of e-forms, VAT on e-Services (VoeS); VoeS test tool, VAT e-forms test tool, mini one-stop-shop (MoSS);
- (5) recovery-related systems, in particular eforms for recovery of claims, eforms for uniform instrument permitting enforcement (UIPE) and for uniform notification form (UNF);
- (6) direct taxation-related systems, in particular taxation on savings system, taxation on savings test tool, e-forms for direct taxation, tax identification number TIN-on-the-web, the exchanges related to the Article 8 of Council Directive 2011/16/EU ⁽¹⁾ and associated test tools;
- (7) other taxation-related systems, in particular, the Taxes in Europe database (TEDB);
- (8) the excise systems, in particular the system for exchange of excise data (SEED), the Excise Movement and Control System (EMCS), MVS eforms, test application (TA);
- (9) other central systems, in particular, the Member States' Taxation Information and Communication system (TIC), the self-service testing system (SSTS), taxation-related statistics system, the central application for web forms, the central services / management information system for Excise (CS/MISE).

B. The Union components of the European Information Systems are:

- (1) IT assets such as the hardware, the software and the network connections of the systems, including the associated data infrastructure;
- (2) IT services necessary to support the development, the maintenance, the improvement and the operation of the systems; and
- (3) any other elements which, for reasons of efficiency, security and rationalisation, are identified by the Commission as common to participating countries.

⁽¹⁾ Council Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation and repealing Directive 77/799/EEC (OJ L 64, 11.3.2011, p. 1).

**REGULATION (EU) No 1287/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

establishing a Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME) (2014 - 2020) and repealing Decision No 1639/2006/EC

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 173 and 195 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

(1) The Commission adopted a Communication entitled "Europe 2020 - A strategy for smart, sustainable and inclusive growth" in March 2010 ("the Europe 2020 Strategy"). The Communication was endorsed by the European Council of June 2010. The Europe 2020 Strategy responds to the economic crisis and is intended to prepare the Union for the next decade. It sets five ambitious objectives on climate and energy, employment, innovation, education and social inclusion to be reached by 2020, and identifies key drivers for growth aimed at making the Union more dynamic and competitive. It also emphasises the importance of reinforcing the growth of the European economy while delivering a high level of employment, a low-carbon, resource- and energy-efficient economy and social cohesion. Small and medium-sized enterprises (SMEs) should play a crucial role in reaching the Europe 2020 Strategy objectives. Their role is reflected by the fact that SMEs are mentioned in six out of seven of the flagship initiatives of the Europe 2020 Strategy.

(2) In order to ensure that enterprises, particularly SMEs, play a central role in delivering economic growth in

the Union, which is a top priority, the Commission adopted a Communication entitled "An Integrated industrial policy for the globalization era, putting competitiveness and sustainability at centre stage" in October 2010, which was endorsed by the Council of December 2010. This is a flagship initiative of the Europe 2020 Strategy. The Communication sets out a strategy aiming to boost growth and jobs by maintaining and supporting a strong, diversified and competitive industrial base in Europe, in particular by improving framework conditions for enterprises and strengthening several aspects of the internal market, including business-related services.

(3) In June 2008 the Commission adopted a Communication entitled "Think Small First - A "Small Business Act for Europe", which was welcomed by the Council of December 2008. The Small Business Act (SBA) provides a comprehensive policy framework for SMEs, promotes entrepreneurship and anchors the "Think Small First" principle in law and policy in order to strengthen the competitiveness of SMEs. The SBA establishes ten principles and outlines policy and legislative actions to promote SMEs' potential to grow and create jobs. Implementation of the SBA contributes to achieving the objectives of the Europe 2020 Strategy. Several actions for SMEs have already been set out in the flagship initiatives.

(4) The SBA has since been the subject of a review, published in February 2011, on the basis of which the Council on 30 and 31 May 2011 adopted conclusions. That review takes stock of the implementation of the SBA and assesses the needs of SMEs operating in the present economic environment, in which they find it increasingly difficult to obtain access to finance and to markets. It presents an overview of the progress made in the first two years of the SBA, sets out new actions to respond to challenges resulting from the economic crisis that stakeholders have reported, and proposes ways to improve the uptake and implementation of the SBA with a clear role for stakeholders and business organisations on the front-line. The specific objectives of a programme for the competitiveness of enterprises and SMEs should reflect the priorities set out in that review. It is important to ensure that the implementation of such a programme is coordinated with the implementation of the SBA.

In particular, actions under the specific objectives should contribute to fulfilling the above-mentioned ten principles and the new actions identified in the process of reviewing the SBA.

⁽¹⁾ OJ C 181, 21.6.2012, p. 125.

⁽²⁾ OJ C 391, 18.12.2012, p. 37.

- (5) Council Regulation (EU, Euratom) No 1311/2013 ⁽¹⁾ lays down the multiannual financial framework for the years 2014-2020. That multiannual financial framework describes how the policy goals of increasing growth and creating more jobs in Europe, and establishing a low-carbon and more environment-aware economy and internationally prominent Union will be achieved.
- (6) In order to contribute to the reinforcement of competitiveness and sustainability of Union enterprises, in particular SMEs, to support existing SMEs, to encourage an entrepreneurial culture and to promote the growth of SMEs, the advancement of the knowledge society, and development based on balanced economic growth, a programme for the competitiveness of enterprises and SMEs ("the COSME programme") should be established.
- (7) The COSME programme should give high priority to the simplification agenda, in accordance with the Commission Communication of 8 February 2012 entitled "A Simplification agenda for the MFF 2014-2020". The spending of Union and Member States' funds on the promotion of the competitiveness of enterprises and SMEs should be better coordinated in order to ensure complementarity, better efficiency and visibility, as well as to achieve greater budgetary synergies.
- (8) The Commission has committed itself to mainstreaming climate action into Union spending programmes and to direct at least 20 % of the Union budget to climate-related objectives. It is important to ensure that climate change mitigation and adaptation as well as risk prevention is promoted in the preparation, design and implementation of the COSME programme. Measures covered by this Regulation should contribute to promoting the transition to a low-carbon and climate-resilient economy and society.
- (9) It follows from Council Decision 2001/822/EC ⁽²⁾ that entities and bodies of the overseas countries and territories are eligible to participate in the COSME programme.
- (10) The competitiveness policy of the Union is intended to put into place the institutional and policy arrangements that create conditions for the sustainable growth of enterprises, particularly SMEs. Achieving competitiveness and sustainability entails the ability to attain and maintain the economic competitiveness and growth of enterprises in accordance with sustainable development objectives. Improved productivity, including resource and energy productivity, is the primary source of sustainable income growth. Competitiveness also depends on companies' ability to take full advantage of opportunities such as the internal market. This is especially important for SMEs, which account for 99 % of enterprises in the Union, provide two out of three existing jobs in the private sector, and 80 % of newly-created jobs, and contribute more than half of the total added value created by enterprises in the Union. SMEs are a key driver for economic growth, employment and social integration.
- (11) The Commission Communication of 18 April 2012 entitled "Towards a rich job recovery" estimated that policies promoting a transition to a green economy such as resource-efficiency, energy-efficiency, and climate change policies could generate more than five million jobs by 2020, and in particular in the SME sector. Bearing this in mind, specific actions under the COSME programme could include promoting the development of sustainable products, services, technologies and processes, as well as resource- and energy-efficiency and corporate social responsibility.
- (12) Competitiveness has been put under the spotlight of Union policy-making in recent years because of the market, policy and institutional failures that undermine the competitiveness of Union enterprises, particularly SMEs.
- (13) The COSME programme should therefore address market failures which affect the competitiveness of the Union economy on a global scale and which undermine the capacity of enterprises, particularly SMEs, to compete with their counterparts in other parts of the world.
- (14) The COSME programme should particularly address SMEs, as defined in Commission Recommendation 2003/361/EC ⁽³⁾. In the application of this Regulation, the Commission should consult all relevant stakeholders, including organisations representing SMEs. Particular attention should be paid to micro enterprises, enterprises engaged in craft activities, the self-employed, the liberal professions and social enterprises. Attention should also be paid to potential, new, young and female entrepreneurs, as well as to other specific target groups, such as older people, migrants and entrepreneurs belonging to socially disadvantaged or vulnerable groups such as persons with disabilities and to the promotion of business transfers, spin-offs, spin-outs and second chances for entrepreneurs.

⁽¹⁾ Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 (See page 884 of this Official Journal).

⁽²⁾ Council Decision 2001/822/EC of 27 November 2001 on the association of the overseas countries and territories with the European Community ('Overseas Association Decision') (OJ L 314, 30.11.2001, p. 1).

⁽³⁾ Commission Recommendation 2003/361/EC of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises (OJ L 124, 20.5.2003, p. 36).

- (15) Many of the Union's competitiveness problems involve SMEs' difficulties in obtaining access to finance because they struggle to demonstrate their credit-worthiness and have difficulties in gaining access to risk capital. Those difficulties have a negative effect on the level and quality of the new enterprises created and on the growth and survival rate of enterprises, as well as on the readiness of new entrepreneurs to take over viable companies in the context of a transfer of business/succession. Union financial instruments put in place under Decision No 1639/2006/EC of the European Parliament and of the Council ⁽¹⁾ have a proven added value and have brought a positive contribution to at least 220 000 SMEs. The enhanced added value for the Union of the proposed financial instruments lies, inter alia, in strengthening the internal market for venture capital and in developing a pan-European SME finance market as well as in addressing market failures that cannot be addressed by Member States. The Union's actions should be coherent, consistent and complementary to the Member States' financial instruments for SMEs, provide a leverage effect and avoid creating market distortion, in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council ⁽²⁾. The entities entrusted with the implementation of the actions should ensure additionality and avoid double financing through Union resources.
- (16) The Commission should pay attention to the visibility of financing provided through the financial instruments of this Regulation so as to ensure that the availability of Union support is known and that the support provided is recognised in the market. To that end, there should also be an obligation for financial intermediaries to explicitly highlight to final recipients that financing was made possible through the support of the financial instruments under this Regulation. The Commission and the Member States should take adequate measures, including by means of user-friendly online systems, to disseminate information on the available financial instruments among SMEs and intermediaries. Those systems, which could include a single portal, should not duplicate existing systems.
- (17) The Enterprise Europe Network ("the Network") has proven its added value for European SMEs as a one-stop-shop for business support by helping enterprises to improve their competitiveness and explore business opportunities in the internal market and beyond. The streamlining of methodologies and working methods and provisions of a European dimension to business support services can only be achieved at Union level. In particular, the Network has helped SMEs to find cooperation or technology transfer partners in the internal market and third countries, obtain advice on sources of Union financing, on Union law and intellectual property and on Union programmes to encourage eco-innovation and sustainable production. It has also obtained feedback on Union law and standards. Its unique expertise is particularly important in overcoming information asymmetries and alleviating transaction costs associated with cross-border transactions.
- (18) A continued effort is needed to further optimise the quality of the services and performance of the Network, in particular with regard to SMEs' awareness and subsequent take-up of the services proposed, by further integrating internationalisation and innovation services, enhancing cooperation between the Network and regional and local SME stakeholders, consulting and better involving host organisations, reducing bureaucracy, improving IT support and enhancing the visibility of the Network and its services in the geographical regions covered.
- (19) The limited internationalisation of SMEs both within and outside Europe affects competitiveness. According to some estimates, currently 25 % of Union SMEs export or have exported at some point over the last three years, while only 13 % of Union SMEs export outside the Union on a regular basis and only 2 % have invested outside their home country. In addition, the 2012 Eurobarometer survey shows the untapped potential for SMEs' growth in green markets, within and outside the Union, in terms of internationalisation and access to public procurement. In line with the SBA, which called on the Union and the Member States to support and encourage SMEs to benefit from the growth of markets outside the Union, the Union provides financial assistance to several initiatives such as the EU Japan Centre for Industrial Cooperation and the China Intellectual Property Rights SME helpdesk. Union added value is created by promoting cooperation and by offering services at European level which complement but do not duplicate the core trade promotion services of Member States and which strengthen the combined efforts of public and private service providers in this field. Such services should include information on intellectual property rights, standards and public procurement rules and opportunities. Part II of the Council Conclusions of 6 December 2011, entitled "Reinforcing implementation of industrial policy across the EU", on the Commission Communication entitled "An Integrated industrial policy for the globalization era, putting competitiveness and sustainability at centre stage", should be fully taken into account. In that respect, a well-defined European cluster
- ⁽¹⁾ Decision No 1639/2006/EC of the European Parliament and of the Council of 24 October 2006 establishing a Competitiveness and Innovation Framework Programme (2007 to 2013) (OJ L 310, 9.11.2006, p. 15).
- ⁽²⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

strategy should complement national and regional efforts to encourage clusters towards excellence and international cooperation, taking into account the fact that the clustering of SMEs can be a key means of strengthening their capacity to innovate and to begin operating in overseas markets.

- (20) To improve the competitiveness of Union enterprises, particularly SMEs, the Member States and the Commission need to create a favourable business environment. The interests of SMEs and the sectors in which they are most active need particular attention. Initiatives at Union level are also necessary in order to exchange information and knowledge on a European scale, and digital services can be particularly cost-effective in this area. Such actions can help develop a level playing-field for SMEs.
- (21) The gaps, fragmentation and unnecessary red tape within the internal market prevent citizens, consumers and enterprises, particularly SMEs, from reaping its full benefits. Therefore a concerted effort on the part of Member States, the European Parliament, the Council and the Commission to address the implementation, legislative and information shortcomings is acutely necessary. In accordance with the principles of subsidiarity and proportionality, Member States, the European Parliament, the Council and the Commission should also collaborate to reduce and avoid unnecessary administrative and regulatory burdens on SMEs. Actions under the COSME programme - which is the sole Union programme that focuses specifically on SMEs - should contribute to the implementation of those aims, particularly by helping to improve the framework conditions for enterprises. Fitness checks and impact assessments financed under the COSME programme should play a role in this effort.
- (22) Another factor which affects competitiveness is the relatively weak entrepreneurial spirit in the Union. Only 45 % of Union citizens (and fewer than 40 % of women) would like to be self-employed as compared to 55 % of the population in the United States and 71 % in China (according to the 2009 Eurobarometer survey on entrepreneurship). According to the SBA, attention should be paid to all situations that entrepreneurs face, including start-up, growth, transfer and bankruptcy (second chance). Promotion of entrepreneurship education, as well as coherence and consistency enhancing measures such as benchmarking and exchanges of good practices provide a high Union added value.
- (23) The Erasmus for Young Entrepreneurs Programme was launched with a view to enabling new or aspiring entrepreneurs to gain business experience in a Member State other than their own and thus allow them to strengthen their entrepreneurial talents. In connection with the objective of improving the framework conditions for promoting entrepreneurship and entrepreneurial culture, the Commission should be able to take measures designed to help new entrepreneurs to improve their ability to develop their entrepreneurial know-how, skills and attitudes and to improve their technological capacity and enterprise management.
- (24) Global competition, demographic changes, resource constraints and emerging social trends generate challenges and opportunities for different sectors facing global challenges and characterised by a high proportion of SMEs. For example, design-based sectors need to adapt to benefit from the untapped potential of high demand for personalised, creative, inclusive products. As these challenges apply to all SMEs in the Union in these sectors, a concerted effort at Union level is necessary in order to create additional growth through initiatives accelerating the emergence of new products and services.
- (25) In support of action taken in Member States, the COSME programme may support initiatives in both sectoral and cross-sectoral areas with significant potential for growth and entrepreneurial activity, especially those with a high proportion of SMEs, accelerating the emergence of competitive and sustainable industries, based on the most competitive business models, improved products and processes, organisational structures or modified value chains. As outlined in the Commission Communication of 30 June 2010, entitled "Europe, the world's No 1 tourist destination – a new political framework for tourism in Europe", which was welcomed by the Council in October 2010, tourism is an important sector of the Union economy. Enterprises in this sector directly contribute 5 % of the Union's gross domestic product (GDP). The Treaty on the Functioning of the European Union ("TFEU") acknowledges the importance of tourism and outlines the Union's competences in this field. The European tourism initiatives can complement Member State actions by encouraging the creation of a favourable environment and by promoting cooperation between Member States, particularly by the exchange of good practices. Actions can include improving the tourism knowledge base by providing data and analysis, and developing transnational cooperation projects in close cooperation with the Member States while avoiding mandatory requirements for Union enterprises.
- (26) The COSME programme indicates actions for the objectives, the total financial envelope for pursuing those objectives, a minimum financial envelope for financial instruments, different types of implementing measures, and transparent arrangements for monitoring and evaluation and for protection of the Union's financial interests.

- (27) The COSME programme complements other Union programmes, while acknowledging that each instrument should work according to its own specific procedures. Thus, the same eligible costs should not receive double funding. With the aim of achieving added value and substantial impact of Union funding, close synergies should be developed between the COSME programme, Regulation (EU) No 1291/2013 of the European Parliament and of the Council⁽¹⁾ ("the Horizon 2020 programme"), Regulation (EU) No 1303/2013 of the European Parliament and of the Council⁽²⁾ ("the Structural Funds") and other Union programmes.
- (28) The principles of transparency and equal gender opportunity should be taken into account in all relevant initiatives and actions covered by the COSME programme. Respect for human rights and fundamental freedoms for all citizens should be also considered in those initiatives and actions.
- (29) The provision of grants to SMEs should be preceded by a transparent process. The award of grants and their payment should be transparent, unbureaucratic and in accordance with common rules.
- (30) This Regulation lays down a financial envelope for the entire duration of the COSME programme which is to constitute the prime reference amount, within the meaning of point 17 of the Interinstitutional Agreement between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management⁽³⁾, for the European Parliament and the Council during the annual budgetary procedure.
- (31) To ensure that financing is limited to tackling market, policy and institutional failures, and with a view to avoiding market distortions, funding from the COSME programme should comply with the State aid rules of the Union.
- (32) The Agreement on the European Economic Area and Protocols to Association Agreements provide for the participation of the countries concerned in Union programmes. Participation by other third countries should be possible when agreements and procedures so indicate.
- (33) It is important to ensure the sound financial management of the COSME programme and its implementation in the most effective and user-friendly manner possible, while also ensuring legal certainty and the accessibility of the COSME programme to all participants.
- (34) The COSME programme should be monitored and evaluated so as to allow for adjustments. A yearly report on its implementation should be made, presenting the progress achieved and the activities planned.
- (35) The implementation of the COSME programme should be monitored annually with the aid of key indicators for assessing results and impacts. These indicators, including relevant baselines, should provide the minimum basis for assessing the extent to which the objectives of the COSME programme have been achieved.
- (36) The interim report on the achievement of the objective of all actions supported under the COSME programme prepared by the Commission should also include an evaluation of low participation rates of SMEs, when this is identified in a significant number of Member States. Where appropriate, Member States could take the results of the interim report into account in their respective policies.
- (37) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, wrongly paid or incorrectly used and, where appropriate, administrative and financial penalties in accordance with Regulation (EU, Euratom) No 966/2012.
- (38) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission, to adopt annual work programmes for the implementation of the COSME programme. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council⁽⁴⁾. Some of the actions included in the annual work programme involve the co-ordination of actions at national level. In that connection, Article 5(4) of that Regulation should apply.
- (39) The power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of additions to the indicators, changes to certain specific details regarding the financial instruments and modifications to the indicative amounts that would exceed those amounts by more than 5 % of the value of the financial envelope in each case. It is of particular

⁽¹⁾ Regulation (EU) No 1291/2013 of the European Parliament and the Council of 11 December 2013 establishing Horizon 2020 - The Framework Programme for Research and Innovation (2014-2020) and repealing Decision No 1982/2006/EC (See page 104 of this Official Journal).

importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing-up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.

- (40) For reasons of legal certainty and clarity, Decision No 1639/2006/EC should be repealed,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

Subject matter

Article 1

Establishment

A programme for Union actions to improve the competitiveness of enterprises, with special emphasis on small and medium-sized enterprises (SMEs) ("the COSME programme"), is hereby established for the period from 1 January 2014 to 31 December 2020.

Article 2

Definition

For the purposes of this Regulation, "SMEs" shall mean micro, small and medium-sized enterprises, as defined in Recommendation 2003/361/EC.

Article 3

General objectives

1. The COSME programme shall contribute to the following general objectives, paying particular attention to the specific needs of SMEs established in the Union and of SMEs established in third countries participating in the COSME programme pursuant to Article 6:

- (a) strengthening the competitiveness and sustainability of the Union's enterprises, particularly SMEs;
 - (b) encouraging entrepreneurial culture and promoting the creation and growth of SMEs.
2. The achievement of the objectives referred to in paragraph 1 shall be measured by the following indicators:
- (a) performance of SMEs as regards sustainability;
 - (b) changes in unnecessary administrative and regulatory burdens on both new and existing SMEs;
 - (c) changes in the proportion of SMEs exporting within or outside the Union;
 - (d) changes in SME growth;

- (e) changes in the proportion of Union citizens who wish to be self-employed.

3. A detailed list of indicators and targets for the COSME programme is set out in the Annex.

4. The COSME programme shall support the implementation of the Europe 2020 Strategy and shall contribute to achieving the objective of smart, sustainable and inclusive growth. In particular, the COSME programme shall contribute to the headline target concerning employment.

CHAPTER II

Specific objectives and fields of action

Article 4

Specific objectives

1. The specific objectives of the COSME programme shall be:
- (a) to improve access to finance for SMEs in the form of equity and debt;
 - (b) to improve access to markets, particularly inside the Union but also at global level;
 - (c) to improve framework conditions for the competitiveness and sustainability of Union enterprises, particularly SMEs, including in the tourism sector;
 - (d) to promote entrepreneurship and entrepreneurial culture.
2. The need of enterprises to adapt to a low-emission, climate-resilient, resource- and energy-efficient economy shall be promoted in the implementation of the COSME programme.
3. To measure the impact of the COSME programme in achieving the specific objectives referred to in paragraph 1, the indicators set out in the Annex shall be used.
4. The annual work programmes referred to in Article 13 shall specify in detail all the actions to be implemented under the COSME programme.

Article 5

Budget

1. The financial envelope for the implementation of the COSME programme is set at EUR 2 298,243 million in current prices, of which no less than 60 % shall be allocated to financial instruments.

The annual appropriations shall be authorised by the European Parliament and by the Council within the limits of the multi-annual financial framework.

2. The financial envelope established under this Regulation may also cover expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are required for the management of the COSME programme and the achievement of its objectives. In particular it shall cover, in a cost effective manner, studies, meetings of experts, information and communication actions, including corporate communication of the political priorities of the Union as far as they

are related to the general objectives of the COSME programme, expenses linked to IT networks focusing on information processing and exchange, together with all other technical and administrative assistance expenses incurred by the Commission in the management of the COSME programme.

Those expenses shall not exceed 5 % of the value of the financial envelope.

3. The financial envelope for the COSME programme shall allocate the indicative amounts of 21,5 % of the value of the financial envelope to the specific objective referred to in Article 4(1)(b), 11 % to the specific objective referred to in Article 4(1)(c) and 2,5 % to the specific objective referred to in Article 4(1)(d). The Commission may depart from these indicative amounts but not by more than 5 % of the value of the financial envelope in each case. Should it prove necessary to exceed that limit, the Commission shall be empowered to adopt delegated acts in accordance with Article 23 modifying those indicative amounts.

4. The financial allocation may also cover the technical and administrative assistance expenses necessary to ensure the transition between the COSME programme and the measures adopted under Decision No 1639/2006/EC. If necessary, appropriations may be entered in the budget beyond 2020 to cover similar expenses, in order to enable the management of actions not yet completed by 31 December 2020.

Article 6

Participation of third countries

1. The COSME programme shall be open to the participation of:

(a) European Free Trade Association (EFTA) countries which are members of the European Economic Area (EEA), in accordance with the conditions laid down in the EEA Agreement, and other European countries when agreements and procedures so allow;

(b) acceding countries, candidate countries and potential candidates in accordance with the general principles and general terms and conditions for the participation of those countries in the Union's programmes established in the respective Framework Agreements and Association Council Decisions, or similar arrangements;

(c) countries falling within the scope of the European neighbourhood policies, when agreements and procedures so allow and in accordance with the general principles and general terms and conditions for the participation of those countries in the Union's programmes established in the respective Framework Agreements, Protocols to Association Agreements and Association Council Decisions.

2. An entity established in a country referred to in paragraph 1 may participate in parts of the COSME programme where that country participates under the conditions laid out in the respective agreements described in paragraph 1.

Article 7

Participation of entities of non-participating countries

1. In parts of the COSME programme in which a third country referred to in Article 6 does not participate, entities established in that country may participate. Entities established in other third countries may also participate in actions under the COSME programme.

2. The entities referred to in paragraph 1 shall not be entitled to receive Union financial contributions, except where it is essential for the COSME programme, in particular in terms of competitiveness and access to markets for Union enterprises. That exception shall not apply to profit-making entities.

Article 8

Actions to improve access to finance for SMEs

1. The Commission shall support actions which aim to facilitate and improve access to finance for SMEs in their start-up, growth and transfer phases, being complementary to the Member States' use of financial instruments for SMEs at national and regional level. In order to ensure complementarity, such actions shall be closely coordinated with those undertaken in the framework of cohesion policy, the Horizon 2020 programme and at national or regional level. Such actions shall aim to stimulate the take-up and supply of both equity and debt finance, which may include seed funding, angel funding and quasi-equity financing subject to market demand but excluding asset stripping.

2. In addition to the actions referred to in paragraph 1, Union support may also be given to actions to improve cross-border and multi-country financing, subject to market demand, thereby assisting SMEs to internationalise their activities in compliance with Union law.

The Commission may also examine the possibility of developing innovative financial mechanisms, such as crowdfunding, subject to market demand.

3. Details of the actions referred to in paragraph 1 are laid down in Article 17.

Article 9

Actions to improve access to markets

1. To continue improving the competitiveness and access to markets of Union enterprises, the Commission may support actions to improve SME access to the internal market, such as information provision (including through digital services) and awareness-raising in relation to, among others, Union programmes, law and standards.

2. Specific measures shall aim to facilitate SME access to markets outside the Union. Such measures may include providing information on existing barriers to market entry and business opportunities, public procurement and customs procedures, and improving support services in terms of standards and intellectual property rights in priority third countries. Those measures shall complement but not duplicate the core trade promotion activities of Member States.

3. Actions under the COSME programme may aim to foster international cooperation, including industrial and regulatory dialogues with third countries. Specific measures may aim to reduce differences between the Union and other countries in terms of regulatory frameworks for products, to contribute to the development of enterprise and industrial policy and to contribute to the improvement of the business environment.

Article 10

Enterprise Europe Network

1. The Commission shall support the Enterprise Europe Network ("the Network") to provide integrated business support services to Union SMEs that seek to explore opportunities in the internal market and in third countries. Actions undertaken through the Network may include the following:

- (a) provision of information and advisory services on Union initiatives and law; support for the enhancement of management capacities to increase the competitiveness of SMEs; support aimed at improving SMEs' financial knowledge, including information and advisory services on funding opportunities, access to finance and related coaching and mentoring schemes; measures to increase SME access to energy efficiency, climate and environmental expertise; and promotion of Union funding programmes and financial instruments (including the Horizon 2020 programme in cooperation with national contact points and the Structural Funds);
- (b) facilitation of cross-border business cooperation, R&D, technology and knowledge transfer and technology and innovation partnerships;
- (c) provision of a communication channel between SMEs and the Commission.

2. The Network may also be used to deliver services on behalf of other Union programmes such as the Horizon 2020 programme, including dedicated advisory services encouraging SME participation in other Union programmes. The Commission shall ensure that the various financial resources for the Network are coordinated efficiently and that services delivered by the Network on behalf of other Union programmes are funded by those programmes.

3. Implementation of the Network shall be closely coordinated with the Member States to avoid duplication of activities in accordance with the principle of subsidiarity.

The Commission shall assess the Network in terms of its effectiveness, governance and provisions of high-quality services across the Union.

Article 11

Actions to improve the framework conditions for the competitiveness and sustainability of Union enterprises, particularly SMEs

1. The Commission shall support actions to improve the framework conditions for the competitiveness and sustainability of Union enterprises, particularly SMEs, so as to enhance the effectiveness, coherence, coordination and consistency of national and regional policies promoting the competitiveness, sustainability and growth of Union enterprises.

2. The Commission may support specific actions to improve the framework conditions for enterprises, particularly SMEs, through a reduction in and avoidance of unnecessary administrative and regulatory burdens. Such actions may include measuring on a regular basis the impact of relevant Union law on SMEs, where appropriate by means of a scoreboard, support for independent expert groups and the exchange of information and good practices, including on the systematic application of the SME test at Union and Member State level.

3. The Commission may support actions intended to develop new competitiveness and business development strategies. Such actions may include the following:

- (a) measures to improve the design, implementation and evaluation of policies affecting the competitiveness and sustainability of enterprises, including through the sharing of good practices on framework conditions and on the management of world-class clusters and business networks; and through promoting transnational collaboration among clusters and business networks, the development of sustainable products, services, technologies and processes, as well as resource- and energy-efficiency and corporate social responsibility;
- (b) measures to address international aspects of competitiveness policies, focusing particularly on policy cooperation between Member States, other countries participating in the COSME programme and the Union's global trade partners;
- (c) measures to improve SME policy development, cooperation between policy makers, peer reviews and exchange of good practices among Member States, taking into account, where appropriate, available evidence and the views of stakeholders and particularly with a view to making it easier for SMEs to access Union programmes and measures, in accordance with the SBA Action Plan.

4. The Commission may, through promoting coordination, support actions taken in the Member States with a view to accelerating the emergence of competitive industries with market potential. Such support may include actions to promote the exchange of good practices and identifying skills and training requirements from industries, especially SMEs, in particular e-skills. It may also include actions to encourage the take-up of new business models and the cooperation of SMEs in new value chains as well as the commercial use of relevant ideas for new products and services.

5. The Commission may complement the actions of Member States to enhance the competitiveness and sustainability of Union SMEs in areas characterised by a significant growth potential, especially those with a high proportion of SMEs, such as the tourism sector. Such activities may include promoting cooperation between Member States, particularly through the exchange of good practices.

Article 12

Actions to promote entrepreneurship

1. The Commission shall contribute to promoting entrepreneurship and entrepreneurial culture by improving framework conditions affecting the development of entrepreneurship, including by reducing obstacles to the setting-up of enterprises. The Commission shall support a business environment and culture favourable to sustainable enterprises, start-ups, growth, business transfer, second chance (re-start), as well as spin-offs and spin-outs.

2. Particular attention shall be paid to potential, new, young, and female entrepreneurs, as well as other specific target groups;

3. The Commission may take actions such as mobility programmes for new entrepreneurs to improve their ability to develop their entrepreneurial know-how, skills and attitudes and to improve their technological capacity and enterprise management.

4. The Commission may support Member States' measures to build and facilitate entrepreneurial education, training, skills and attitudes, in particular among potential and new entrepreneurs.

CHAPTER III

Implementation of the COSME programme

Article 13

Annual work programmes

1. In order to implement the COSME programme, the Commission shall adopt annual work programmes in accordance with the examination procedure referred to in Article 21(2). Each annual work programme shall implement the objectives set out in this Regulation and shall set out in detail:

- (a) a description of the actions to be financed, the objectives pursued for each action, which shall be in accordance with the general and specific objectives laid down in Articles 3 and 4, the expected results, the method of implementation, an indication of the amount allocated to each action, a total amount for all actions and an indicative implementation timetable and payment profile;
- (b) appropriate qualitative and quantitative indicators for each action, for the purpose of analysing and monitoring effectiveness in delivering outcomes and achieving the objectives of the action concerned;
- (c) for grants and related measures, the essential evaluation criteria, which shall be set so as best to achieve the objectives pursued by the COSME programme, and the maximum rate of co-financing;
- (d) a separate detailed chapter on the financial instruments which shall, in accordance with Article 17 of this Regulation, reflect the information obligations under Regulation (EU, Euratom) No 966/2012, including the expected apportionment of the financial envelope between the Equity Facility for Growth and the Loan Guarantee Facility referred to in Articles 18 and 19 of this Regulation respectively, and information such as the level of guarantee and the relationship with the Horizon 2020 programme.

2. The Commission shall implement the COSME programme in accordance with Regulation (EU, Euratom) No 966/2012.

3. The COSME programme shall be implemented so as to ensure that actions supported take account of future developments and needs, particularly after the interim evaluation referred to in Article 15(3), and that they are relevant to evolving markets, the economy and changes in society.

Article 14

Support measures

1. In addition to the measures covered by the annual work programmes referred to in Article 13, the Commission shall regularly take support measures, including the following:

- (a) improvement of the analysis and monitoring of sectoral and cross-sectoral competitiveness issues;
- (b) the identification and dissemination of good practices and policy approaches, and their further development;
- (c) fitness checks of existing law and impact assessments of new Union measures that are of particular relevance to the competitiveness of enterprises, with a view to identifying areas of existing law that need to be simplified and ensuring that burdens on SMEs are minimised in areas in which new legislative measures are proposed;

(d) the evaluation of legislation affecting enterprises, particularly SMEs, industrial policy and competitiveness-related measures;

(e) the promotion of integrated and user-friendly online systems that provide information on programmes relevant for SMEs, whilst ensuring that they do not duplicate existing portals.

2. The total cost of these support measures shall not exceed 2,5 % of the COSME programme's financial envelope.

Article 15

Monitoring and evaluation

1. The Commission shall monitor the implementation and management of the COSME programme.

2. The Commission shall draw up an annual monitoring report examining the efficiency and effectiveness of supported actions in terms of financial implementation, results, costs and, where possible, impact. The report shall include information on beneficiaries, when possible, for each call for proposals, information on the amount of climate-related expenditure and the impact of support to climate-change objectives, relevant data regarding the loans provided by the Loan Guarantee Facility above and below EUR 150 000 to the extent that the collection of such information does not create an unjustified administrative burden for enterprises, especially SMEs. The monitoring report shall include the annual report on each financial instrument as required by Article 140(8) of Regulation (EU, Euratom) No 966/2012.

3. By 2018 at the latest, the Commission shall establish an interim evaluation report on the achievement of the objectives of all the actions supported under the COSME programme at the level of results and impacts, the efficiency of the use of resources and its European added value, with a view to a decision on the renewal, modification or suspension of the measures. The interim evaluation report shall also address the scope for simplification, its internal and external coherence, the continued relevance of all objectives, as well as the contribution of the measures to the Union priorities of smart, sustainable and inclusive growth. It shall take into account evaluation results on the long-term impact of the predecessor measures and shall feed into a decision on a possible renewal, modification or suspension of a subsequent measure.

4. The Commission shall establish a final evaluation report on the longer-term impact and sustainability of effects of the measures.

5. All grant beneficiaries and other parties involved who have received Union funds under this Regulation shall provide the Commission with the appropriate data and information necessary to permit the monitoring and evaluation of the measures concerned.

6. The Commission shall submit the reports referred to in paragraphs 2, 3 and 4 to the European Parliament and the Council and make them public.

CHAPTER IV

Financial provisions and forms of financial assistance

Article 16

Forms of financial assistance

The Union's financial assistance under the COSME programme may be implemented indirectly by delegating budget implementation tasks to the entities listed in Article 58(1)(c) of Regulation (EU, Euratom) No 966/2012.

Article 17

Financial instruments

1. Financial instruments under the COSME programme set up in accordance with Title VIII of Regulation (EU, Euratom) No 966/2012 shall be operated with the aim of facilitating access to finance for SMEs, in their start-up, growth and transfer phases. The financial instruments shall include an equity facility and a loan guarantee facility. The allocation of funds to those facilities shall take into account the demand from financial intermediaries.

2. The financial instruments for SMEs may, where appropriate, be combined with and complement:

(a) other financial instruments established by Member States and their managing authorities funded by national or regional funds or funded in the context of the operations of the Structural Funds, in accordance with Article 38(1)(a) of Regulation (EU) No 1303/2013;

(b) other financial instruments established by Member States and their managing authorities funded by national or regional programmes outside the operations of the Structural Funds;

(c) grants funded by the Union, including under this Regulation.

3. The Equity Facility for Growth and the Loan Guarantee Facility referred to in Articles 18 and 19 respectively may be complementary to the Member States' use of financial instruments for SMEs within the framework of Union cohesion policy.

4. The Equity Facility for Growth and the Loan Guarantee Facility may, where appropriate, allow the pooling of financial resources with Member States and/or regions willing to contribute part of the Structural Funds allocated to them in accordance with Article 38(1)(a) of Regulation (EU) No 1303/2013.

5. The financial instruments may generate acceptable returns to meet the objectives of other partners or investors. The Equity Facility for Growth may operate on a subordinated basis but shall aim to preserve the value of assets provided by the Union budget.

6. The Equity Facility for Growth and the Loan Guarantee Facility shall be implemented in accordance with Title VIII of Regulation (EU, Euratom) No 966/2012 and Commission Delegated Regulation (EU, Euratom) No 1268/2012 ⁽¹⁾.

7. The financial instruments under the COSME programme shall be developed and implemented in complementarity and coherence with those established for SMEs under the Horizon 2020 programme.

8. In accordance with Article 60(1) of Regulation (EU, Euratom) No 966/2012, the entities entrusted with the implementation of the financial instruments shall ensure visibility of Union action when they manage Union funds. To this end, the entrusted entity shall ensure that financial intermediaries explicitly inform final recipients that financing was made possible through the support of the financial instruments under the COSME programme. The Commission shall ensure that the ex post publication of information on recipients in accordance with Article 60(2)(e) of Regulation (EU, Euratom) No 966/2012 is easily accessible to potential final recipients.

9. Repayments generated by the second window of the High Growth and Innovative SME Facility established under Decision No 1639/2006/EC and received after 31 December 2013 shall be assigned, in accordance with Article 21(4) of Regulation (EU, Euratom) No 966/2012, to the Equity Facility for Growth referred to in Article 18 of this Regulation.

10. The financial instruments shall be implemented in compliance with the relevant State aid rules of the Union.

Article 18

Equity Facility for Growth

1. The Equity Facility for Growth (EFG) shall be implemented as a window of a single Union equity financial instrument supporting Union enterprises' growth and research and innovation (R&I) from the early stage, including seed, up to the growth stage. The single Union equity financial instrument shall be financially supported by the Horizon 2020 programme and the COSME programme.

2. The EFG shall focus on funds that provide: venture capital and mezzanine finance, such as subordinated and participating loans, to expansion and growth-stage enterprises, in particular those operating across borders, while having the possibility of making investments in early-stage funds in conjunction with the Equity Facility for R&I under the Horizon 2020 programme and providing co-investment facilities for business angels. In the case

of early stage investments, the investment from EFG shall not exceed 20 % of the total Union investment except in cases of multi-stage funds and funds-of-funds, where funding from the EFG and the Equity Facility for R&I under the Horizon 2020 programme shall be provided on a pro rata basis, on the basis of the funds' investment policy. The Commission may decide to amend the 20 % threshold in the light of changing market conditions. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 21(2).

3. The EFG and the Equity Facility for R&I under the Horizon 2020 programme shall use the same delivery mechanism.

4. Support from the EFG shall be in the form of one of the following investments:

- (a) directly by the European Investment Fund or other entities entrusted with the implementation of the EFG on behalf of the Commission; or
- (b) by funds-of-funds or investment vehicles investing across borders established by the European Investment Fund or other entities (including private or public sector managers) entrusted with the implementation of the EFG on behalf of the Commission together with investors from private and/or public financial institutions.

5. The EFG shall invest in intermediary risk capital funds including in funds-of-funds, providing investments for SMEs typically in their expansion and growth-stage. Investments under the EFG shall be long-term, i.e. usually involving 5 to 15 year positions in risk capital funds. In any event, the lifetime of the investments under the EFG shall not exceed 20 years from the time of signature of the agreement between the Commission and the entity entrusted with its implementation.

Article 19

The Loan Guarantee Facility

1. The Loan Guarantee Facility (LGF) shall provide:

- (a) counter-guarantees and other risk sharing arrangements for guarantee schemes including, where appropriate, co-guarantees;
- (b) direct guarantees and other risk sharing arrangements for any other financial intermediaries meeting the eligibility criteria referred to in paragraph 5.

⁽¹⁾ Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

2. The LGF shall be implemented as part of a single Union debt financial instrument for Union enterprises' growth and R&I, using the same delivery mechanism as the SME demand-driven window of the Debt Facility for R&I under the Horizon 2020 programme (RSI II).

3. The LGF shall consist of:

(a) guarantees for debt financing (including via subordinated and participating loans, leasing, or bank guarantees), which shall reduce the particular difficulties that viable SMEs face in accessing finance, either due to their perceived high risk or their lack of sufficient available collateral;

(b) securitisation of SME debt finance portfolios, which shall mobilise additional debt financing for SMEs under appropriate risk-sharing arrangements with the targeted institutions. Support for those securitisation transactions shall be conditional upon an undertaking by the originating institutions to use a significant part of the resulting liquidity or the mobilised capital for new SME lending within a reasonable period of time. The amount of this new debt financing shall be calculated in relation to the amount of the guaranteed portfolio risk. This amount and the period of time shall be negotiated individually with each originating institution.

4. The LGF shall be operated by the European Investment Fund or other entities entrusted with the implementation of the LGF on behalf of the Commission. Individual guarantees under the LGF may have a maturity of up to 10 years.

5. Eligibility under the LGF shall be determined for each intermediary on the basis of their activities and how effective they are in helping SME in accessing funding for viable projects. The LGF may be used by intermediaries supporting business in financing, inter alia, acquisition of tangible and intangible assets, working capital and for business transfers. Criteria relating to securitisation of SME debt financing portfolios shall include individual and multi-seller transactions as well as multi-country transactions. Eligibility shall be based on good market practices, in particular regarding the credit quality and risk diversification of the securitised portfolio.

6. The LGF shall, except for loans in the securitised portfolio, cover loans up to EUR 150 000 and with a minimum maturity of 12 months. The LGF shall also cover loans above EUR 150 000 in cases where SMEs who meet the criteria to be eligible under the COSME programme do not meet the criteria to be eligible under the SME window in the Debt Facility of the Horizon 2020 programme, and with a minimum maturity of 12 months.

Above that threshold, it shall be the responsibility of the financial intermediaries to demonstrate whether the SME is eligible or not under the SME window in the Debt Facility of the Horizon 2020 programme.

7. The LGF shall be designed in such way as to make it possible to report on SMEs supported, both in terms of number and volume of loans.

Article 20

Protection of the financial interests of the Union

1. The Commission shall take appropriate measures ensuring that, when actions financed under this Regulation are implemented, the financial interests of the Union are protected by the application of preventive measures against fraud, corruption and any other illegal activities, by effective checks and, if irregularities are detected, by the recovery of the amounts unduly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties.

2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on the spot checks, over all grant beneficiaries, contractors and subcontractors and other third parties who have received Union funds under this Regulation.

3. The European Anti-Fraud Office (OLAF) may carry out investigations, including on-the-spot checks and inspections, in accordance with the provisions and procedures laid down in Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council⁽¹⁾ and Council Regulation (Euratom, EC) No 2185/96⁽²⁾ with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract funded under this Regulation.

4. Without prejudice to paragraphs 1, 2 and 3, cooperation agreements with third countries and with international organisations, contracts, grant agreements and grant decisions resulting from the implementation of this Regulation shall contain provisions expressly empowering the Commission, the Court of Auditors and OLAF to conduct such audits and investigations, according to their respective competences.

⁽¹⁾ Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1).

⁽²⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

CHAPTER V

Committee and final provisions

Article 21

Committee procedure

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply. Where the Committee delivers no opinion, the Commission shall not adopt the draft implementing act and the third subparagraph of Article 5(4) of Regulation (EU) No 182/2011 shall apply.

Article 22

Delegated acts

1. The Commission shall be empowered to adopt delegated acts in accordance with Article 23 concerning additions to the indicators set out in the Annex where those indicators could help measure the progress in achieving the COSME programme's general and specific objectives.

2. The Commission shall be empowered to adopt delegated acts in accordance with Article 23 concerning changes to some specific details regarding the financial instruments. Those details are the share of investment from the EFG of the total Union investment in early stage venture capital funds and the composition of the securitised loan portfolios.

3. The Commission shall be empowered to adopt delegated acts in accordance with Article 23 concerning modifications to the indicative amounts specified in Article 5(3) that would exceed those amounts by more than 5 % of the value of the financial envelope in each case, should it prove necessary to exceed that limit.

Article 23

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 22 shall be conferred on the Commission for a period of seven years from 23 December 2013.

3. The delegation of power referred to in Article 22 may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated act already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Article 22 shall enter into force only if no objection has been expressed by either the European Parliament or the Council within a period of two months following the notification of that act to the European Parliament and the Council or if before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or the Council.

Article 24

Repeal and transitional provisions

1. Decision No 1639/2006/EC is repealed with effect from 1 January 2014.

2. However, actions initiated under Decision No 1639/2006/EC and financial obligations related to those actions shall continue to be governed by that Decision until their completion.

3. The financial allocation referred to in Article 5 may also cover the technical and administrative assistance expenses necessary to ensure the transition between the COSME programme and the measures adopted under Decision No 1639/2006/EC.

Article 25

Entry into force

This Regulation shall enter into force on the third day following its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

ANNEX

INDICATORS FOR GENERAL AND SPECIFIC OBJECTIVES AND TARGETS

General objective:	1. To strengthen the competitiveness and sustainability of the Union's enterprises, particularly SMEs	
A. Impact indicator ⁽¹⁾	Current situation	Long term target and milestone (2020)
A.1. Performance of SMEs as regards sustainability	Will be measured in on a regular basis, for example by means of a Eurobarometer survey	Increase in the proportion of Union SME producing green, i.e. environmentally friendly, products ⁽²⁾ compared to baseline (initial measurement)
A.2. Changes in unnecessary administrative and regulatory burden on both new and existing SMEs ⁽³⁾	Number of days to set up new SME in 2012: 5,4 working days	Marked reduction in number of days to set-up a new SME
	Cost of start-up in 2012: EUR 372	Marked reduction in the average start-up costs in the Union compared to baseline
	Number of Member States where the time needed to get licences and permits (including environmental permits) to take up and perform the specific activity of an enterprise is one month: 2	Marked increase in the number of Member States where the time needed to get licences and permits (including environmental permits) to take up and perform the specific activity of an enterprise is one month
	Number of Member States with a one-stop shop for business start-ups so that entrepreneurs can carry out all the required procedures (e.g. registration, tax, VAT and social security) via a single administrative contact point, whether physical (an office), virtual (web), or both in 2009: 18	Marked increase in the number of Member States with a one-stop shop for business start-ups
A.3. Changes in the proportion of SMEs exporting within or outside the Union	25 % of SMEs export and 13 % of SMEs export outside the Union (2009) ⁽⁴⁾	Increase in the proportion of SMEs exporting and increase in the proportion of SMEs exporting outside the Union compared to baseline
General objective:	2. To encourage an entrepreneurial culture and promote the creation and growth of SMEs	
Impact indicator	Current situation	Long term target and milestone (2020)
B.1. Changes in SME growth	In 2010 SMEs provided more than 58 % of total Union Gross Value Added	Increase of SME output (value added) and employees compared to baseline
	Total number of employees in SMEs in 2010: 87,5 million (67 % of private sector jobs in the Union)	
B.2. Changes in the proportion of Union citizens who wish to be self-employed	This figure is measured every two or three year by a Eurobarometer survey. The latest figure available is 37 % in 2012 (45 % in 2007 and 2009)	Increase in the proportion of Union citizens that would like to be self-employed compared to baseline

Specific objective:	To improve access to finance for SMEs in the form of equity and debt	
C. Financial instruments for growth	Latest known result (baseline)	Long term target (2020)
C.1. Number of firms benefiting from debt financing	As of 31 December 2012 EUR 13,4 billion in financing mobilised, reaching 219 000 SMEs (SME Guarantee (SMEG) Facility)	Value of financing mobilised ranging from EUR 14,3 billion to EUR 21,5 billion; number of firms receiving financing which benefit from guarantees from the COSME programme ranging from 220 000 to 330 000
C.2. Number of venture capital investments from the COSME programme and overall volume invested	As of 31 December 2012 EUR 2,3 billion in venture capital funding mobilised to 289 SMEs (High Growth and Innovative SME Facility, GIF)	Overall value of venture capital investments ranging from EUR 2,6 billion to EUR 3,9 billion; number of firms receiving venture capital investments from the COSME programme ranging from 360 to 540
C.3. Leverage ratio	Leverage ratio for the SMEG Facility 1:32 Leverage ratio for GIF 1:6,7	Debt instrument 1:20 - 1:30 Equity instrument 1:4 - 1:6 (5)
C.4. Additionality of the EFG and LGF	Additionality of the SMEG Facility: 64 % of final beneficiaries indicated that support was crucial to find the finance they needed Additionality of the GIF: 62 % of GIF final beneficiaries indicated that support was crucial to find the finance they needed	Increase in the proportion of final beneficiaries that consider the EFG or the LGF to provide funding that could not have been obtained by other means compared to baseline
Specific objective:	To improve access to markets, particularly inside the Union but also at global level	
D. International Industrial Cooperation	Latest known result (baseline)	Long term target (2020)
D.1. Number of cases of improved alignment between Union and third countries' regulations for industrial products	It is estimated that in regulatory co-operation with main trading partners (US, Japan, China, Brazil, Russia, Canada, India) there is an average of 2 relevant areas of significant alignment of technical regulations	4 relevant areas of significant alignment of technical regulations with main trading partners (US, Japan, China, Brazil, Russia, Canada, India)
E. Enterprise Europe Network	Latest known result (baseline)	Long term target (2020)
E.1. Number of partnership agreements signed	Partnership agreements signed: 2 475 (2012)	Partnership agreements signed: 2 500/year
E.2. Recognition of the Network amongst SME population	Recognition of the Network amongst SME population will be measured in 2015	Increase in the recognition of the Network amongst SME population compared to baseline
E.3. Client satisfaction rate (% SMEs stating satisfaction, added-value of specific service provided by the Network)	Client satisfaction rate (% SMEs stating satisfaction, added-value of specific service): 78 %	Client satisfaction rate (% SMEs stating satisfaction, added-value of specific service): > 82 %
E.4. Number of SMEs receiving support services	Number of SMEs receiving support services: 435 000 (2011)	Number of SMEs receiving support services: 500 000/year
E.5. Number of SMEs using digital services (including electronic information services) provided by the Network	2 million SMEs per year using digital services	2,3 million SMEs per year using digital services

Specific objective:	To improve framework conditions for the competitiveness and sustainability of Union enterprises, particularly SMEs, including in the tourism sector	
F. Activities to improve competitiveness	Latest known result (baseline)	Long term target (2020)
F.1. Number of simplification measures adopted	5 simplification measures per year (2010)	At least 7 simplification measures per year
F.2. Making the regulatory framework fit for purpose	Fitness checks have been launched since 2010. The only relevant fitness check so far is the on-going pilot project regarding "type approval for motor vehicles"	Up to 5 fitness checks to be launched over the course of the COSME programme
F.3. Number of Member States using the competitiveness proofing test	Number of Member States using the competitiveness proofing test: 0	Marked increase in the number of Member States using the competitiveness proofing test
F.4. Resource efficiency (which may include energy, materials or water, recycling, etc.) actions taken by SMEs	Will be measured on a regular basis, for example by means of a Eurobarometer survey	Increase in the proportion of Union SMEs that are taking at least one action to be more resource efficient (which may include energy, materials or water, recycling, etc.) compared to baseline (initial measurement) Increase in the proportion of Union SMEs that are planning to implement additional resource efficiency actions (which may include energy, materials or water, recycling, etc.) every two years compared to baseline (initial measurement)
G. Developing SME policy	Latest known result (baseline)	Long term target (2020)
G.1. Number of Member States using SME test	Number of Member States using SME test: 15	Marked increase in the number of Member States using SME test
Specific objective:	To improve framework conditions for the competitiveness and sustainability of Union enterprises, particularly SMEs, including in the tourism sector	
H. Tourism	Latest known result (baseline)	Long term target (2020)
H.1. Participation in transnational cooperation projects	Three countries covered per project in 2011	Increase in the number of Member States participating in transnational cooperation projects funded by the COSME Programme compared to baseline
H.2. Number of destinations adopting the sustainable tourism development models promoted by the European Destinations of Excellence	Number of European Destinations of Excellence awarded in total: 98 (on average 20 per year – in 2007-10, in 2008-20, in 2009-22, in 2010-25, in 2011-21)	More than 200 destinations adopting the sustainable tourism development models promoted by the European Destinations of Excellence (about 20 every year)
I. New Business Concepts	Latest known result (baseline)	Long term target (2020)
I.1. Number of new products/services in the market	Will be measured on a regular basis (So far this activity was restricted to analytical work of limited scale)	Increase in the cumulative number of new products/services compared to baseline (initial measurement)

Specific objective:	To promote entrepreneurship and entrepreneurial culture	
J. Support for entrepreneurship	Latest known result (baseline)	Long term target (2020)
J.1. Number of Member States implementing entrepreneurship solutions based on good practice identified through the programme	Number of Member States implementing entrepreneurship solutions: 22 (2010)	Marked increase in the number of Member States implementing entrepreneurship solutions
J.2. Number of Member States implementing entrepreneurship solutions targeting potential, young, new and female entrepreneurs, as well as other specific target groups	Currently, 12 Member States participate in the European Network of Mentors for Women Entrepreneurs. Currently, 6 Member States and 2 regions have a specific strategy for Entrepreneurship Education, 10 Member States have incorporated national objectives related to entrepreneurship education in broader lifelong learning strategies and in 8 Member States entrepreneurship strategies are currently under discussion	Marked increase in number of Member States implementing entrepreneurship solutions targeting potential, young, new and female entrepreneurs, as well as other specific target groups compared to baseline

(1) These indicators refer to developments in Enterprise and Industry policy area. The Commission itself is not solely responsible for the achievement of the targets. A range of other factors outside of the control of the Commission also affects outcomes in this area.

(2) Green products and services are those with a predominant function of reducing environmental risk and minimising pollution and resources. Products with environmental features (eco-designed, eco-labelled, organically produced, and with an important recycled content) are also included. Source: Flash Eurobarometer 342, "SMEs, Resource Efficiency and Green Markets".

(3) The Council Conclusions of 31 May 2011 included a call encouraging the Member States, where appropriate, to reduce the start-up time for new enterprises to three working days and the cost to EUR 100 by 2012, as well as the time needed to get licences and permits to take up and perform the specific activity of an enterprise to three months by the end of 2013.

(4) "Internationalisation of European SMEs", EIM, 2010, http://ec.europa.eu/enterprise/policies/sme/market-access/files/internationalisation_of_european_smes_final_en.pdf

(5) EUR 1 from the Union budget will result in EUR 20-30 in financing and EUR 4-6 in equity investments over the lifetime of the COSME programme.

**REGULATION (EU) No 1288/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

**establishing 'Erasmus+': the Union programme for education, training, youth and sport and
repealing Decisions No 1719/2006/EC, No 1720/2006/EC and No 1298/2008/EC**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 165(4) and 166(4) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure ⁽³⁾,

Whereas:

(1) The Commission's communication of 29 June 2011 entitled 'A Budget for Europe 2020' calls for a single programme in the field of education, training, youth and sport, including the international aspects of higher education, bringing together the action programme in the field of lifelong learning ('Lifelong Learning') established by Decision No 1720/2006/EC of the European Parliament and of the Council ⁽⁴⁾, the Youth in Action programme ('Youth in Action') established by Decision No 1719/2006/EC of the European Parliament and of the Council ⁽⁵⁾, the Erasmus Mundus action programme ('Erasmus Mundus') established by Decision No 1298/2008/EC of the European Parliament and of the Council ⁽⁶⁾, the ALFA III programme established by Regulation

(EC) No 1905/2006 of the European Parliament and of the Council ⁽⁷⁾, and the Tempus and Edulink programmes, in order to ensure greater efficiency, a stronger strategic focus and synergies to be exploited between the various aspects of the single programme. In addition, sport is proposed as part of that single programme (the 'Programme').

(2) The interim evaluation reports of the existing Lifelong Learning, Youth in Action and Erasmus Mundus programmes and the public consultation on the future of Union action in education, training and youth, as well as in higher education, revealed a strong and in some respects growing need for continuing cooperation and mobility in those fields at European level. The evaluation reports emphasised the importance of creating closer links between Union programmes and policy developments in education, training and youth, expressed the wish that Union action should be structured in such a way as to respond better to the lifelong learning paradigm, and pressed for a simpler, more user-friendly and more flexible approach to implementing such action and the end of the fragmentation of international higher education cooperation programmes.

(3) The Programme should focus on the accessibility of funding and the transparency of administrative and financial procedures, including through the use of information and communication technologies (ICTs) and digitisation. Streamlining and simplifying the organisation and management, and a sustained focus on reducing administrative expenditure, are also vital to the success of the Programme.

(4) The public consultation on the Union's strategic choices for the implementation of the new Union competence in the field of sport and the Commission's evaluation report on preparatory actions in the field of sport provided useful indications regarding priority areas for Union action, and illustrated the added value that the Union can bring in supporting activities aimed at generating, sharing and spreading experiences and knowledge about different issues affecting sport at the European level, provided that they are focused in particular at grassroots level.

⁽¹⁾ OJ C 181, 21.6.2012, p. 154.

⁽²⁾ OJ C 225, 27.7.2012, p. 200.

⁽³⁾ Position of the European Parliament of 19 November 2013 (not yet published in the Official Journal) and decision of the Council of 3 December 2013.

⁽⁴⁾ Decision No 1720/2006/EC of the European Parliament and of the Council of 15 November 2006 establishing an action programme in the field of lifelong learning (OJ L 327, 24.11.2006, p. 45).

⁽⁵⁾ Decision No 1719/2006/EC of the European Parliament and of the Council of 15 November 2006 establishing the Youth in Action programme for the period 2007 to 2013 (OJ L 327, 24.11.2006, p. 30).

⁽⁶⁾ Decision No 1298/2008/EC of the European Parliament and of the Council of 16 December 2008 establishing the Erasmus Mundus 2009-2013 action programme for the enhancement of quality in higher education and the promotion of intercultural understanding through cooperation with third countries (OJ L 340, 19.12.2008, p. 83).

⁽⁷⁾ Regulation (EC) No 1905/2006 of the European Parliament and of the Council of 18 December 2006 establishing a financing instrument for development cooperation (OJ L 378, 27.12.2006, p. 41).

- (5) The Europe 2020 strategy for smart, sustainable and inclusive growth defines the Union's growth strategy for the coming decade to support such growth, setting five ambitious objectives to be reached by 2020, particularly in the field of education, where the aim is to reduce early school-leaving rates to a level below 10 % and to enable at least 40 % of 30-34 year-olds to have completed tertiary or equivalent education. This also includes its flagship initiatives, in particular Youth on the Move and the Agenda for New Skills and Jobs.
- (6) In its conclusions of 12 May 2009, the Council called for a strategic framework for European cooperation in education and training (ET 2020), setting up four strategic objectives with a view to responding to the challenges that remain in creating a knowledge-based Europe and making lifelong learning a reality for all.
- (7) Pursuant to Articles 8 and 10 of the Treaty on the Functioning of the European Union (TFEU), as well as Articles 21 and 23 of the Charter of Fundamental Rights of the European Union, the Programme promotes inter alia equality between men and women and measures to combat discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation. There is a need to widen access for members of disadvantaged and vulnerable groups and actively to address the special learning needs of people with disabilities in the implementation of the Programme.
- (8) The Programme should include a strong international dimension, particularly as regards higher education, in order not only to enhance the quality of European higher education in pursuit of the broader ET 2020 objectives and the attractiveness of the Union as a study destination, but also to promote understanding between people and to contribute to the sustainable development of higher education in partner countries, as well as their broader socio-economic development, inter alia by stimulating "brain circulation" through mobility actions with partner-country nationals. To that end, funding should be made available from the Development Cooperation Instrument (DCI), the European Neighbourhood Instrument (ENI), the Instrument for Pre-accession Assistance (IPA) and the Partnership Instrument for cooperation with third countries (PI). Funds might also be made available from the European Development Fund (EDF) in accordance with the procedures governing it. The provisions of this Regulation should apply to the use of those funds, while ensuring conformity with the respective Regulations establishing those instruments and that fund.
- (9) In its resolution of 27 November 2009 on a renewed framework for European cooperation in the youth field (2010-2018), the Council emphasised the need to consider all young people as a resource in society and sought to facilitate their participation in the development of policies affecting them by means of a continuous structured dialogue between decision-makers and young people and youth organisations at all levels.
- (10) Bringing formal, non-formal and informal learning together in a single programme should create synergies and foster cross-sectoral cooperation across the various education, training and youth sectors. During the implementation of the Programme, the specific needs of the various sectors and, where appropriate, the role of local and regional authorities should be duly taken into account.
- (11) To support mobility, equity and study excellence, the Union should establish, on a pilot basis, a Student Loan Guarantee Facility to enable students, regardless of their social background, to take their Master's degree in another country to which participation in the Programme is open (the 'Programme country'). The Student Loan Guarantee Facility should be available to financial institutions which agree to offer loans for Master's studies in other Programme countries on favourable terms for students. This additional and innovative tool for learning mobility should neither replace any current, nor impede the development of any future, grant or loan system supporting student mobility at local, national or Union level. The Student Loan Guarantee Facility should be subject to close monitoring and evaluation, in particular concerning its market uptake in different countries. In accordance with Article 21(2) and (3), a mid-term evaluation report should be submitted to the European Parliament and to the Council no later than the end of 2017, with a view to obtaining political guidance on the continuation of the Student Loan Guarantee Facility.
- (12) Member States should endeavour to adopt all appropriate measures to remove legal and administrative obstacles to the proper functioning of the Programme. This includes resolving, where possible, administrative issues that create difficulties in obtaining visas and residency permits. In line with Council Directive 2004/114/EC⁽¹⁾, Member States are encouraged to establish fast-track admission procedures.

⁽¹⁾ Council Directive 2004/114/EC of 13 December 2004 on the conditions of admission of third-country nationals for the purposes of studies, pupil exchange, unremunerated training or voluntary service (OJ L 375, 23.12.2004, p. 12).

- (13) The Commission's communication of 20 September 2011 entitled 'Supporting growth and jobs – an agenda for the modernisation of Europe's higher education systems' sets out a framework within which the Union, Member States and higher education institutions can cooperate to boost the number of graduates, to improve the quality of education and to maximise the contribution that higher education and research can make to helping Member States' economies and societies emerge stronger from the global economic crisis.
- (14) In order to better address youth unemployment in the Union, particular attention should be paid to transnational cooperation between higher and vocational education institutions and businesses, with a view to improving students' employability and developing entrepreneurial skills.
- (15) The Bologna Declaration, signed by the Education Ministers of 29 European countries on 19 June 1999, established an intergovernmental process aimed at creating a European area of higher education, which requires continuous support at Union level.
- (16) The crucial role played by vocational education and training (VET) in helping to achieve a number of targets set out in the Europe 2020 strategy is widely acknowledged and defined in the renewed Copenhagen process (2011-2020), taking into account, in particular, its potential in addressing Europe's high level of unemployment, especially youth unemployment and long-term unemployment, promoting a culture of lifelong learning, countering social exclusion and promoting active citizenship. Quality traineeships and apprenticeships, including those in micro-enterprises and small and medium-sized enterprises, are needed in order to bridge the gap between the knowledge acquired through education and training and the skills and competences required in the world of work, as well as to enhance the employability of young people.
- (17) It is necessary to strengthen the intensity and extent of European cooperation between schools, and of the mobility of school staff and learners, in order to address the priorities set out in the Agenda for European Cooperation on Schools for the 21st century, namely to improve the quality of school education in the Union in the fields of competence development and in order to improve equity and inclusion within school systems and institutions, as well as to reinforce and provide support for the teaching profession and school leadership. In this context, the strategic targets on reducing early school leaving, improving performance in basic skills, and improving participation and quality in early childhood education and care, should be prioritised along with targets reinforcing the professional competences of school teachers and school leaders, and improving the educational opportunities for children with a migrant background and those at a socio-economic disadvantage.
- (18) The renewed European Agenda for Adult Learning included in the Council's resolution of 28 November 2011 aims at enabling all adults to develop and enhance their skills and competences throughout their lives. Particular attention should be paid to improving learning opportunities for the high number of low-skilled Europeans, in particular by improving literacy and numeracy and by promoting flexible learning pathways and second-chance measures.
- (19) The action of the European Youth Forum, the National Academic Recognition Information Centres (NARIC), the Eurydice, Euroguidance and Eurodesk networks, the eTwinning National Support Services, the National Europass Centres, and the National Information Offices in the neighbourhood countries is essential in order to achieve the objectives of the Programme, in particular by providing the Commission with regular, updated information regarding their various fields of activity and through the dissemination of the Programme results in the Union and in the partner countries.
- (20) Cooperation under the Programme with international organisations in the field of education, training, youth and sport, in particular with the Council of Europe, should be strengthened.
- (21) In order to contribute to the development of excellence in European integration studies worldwide, and to respond to the increasing need for knowledge of, and dialogue on, the European integration process and its development, it is important to stimulate excellence in teaching, research and reflection in this area by supporting academic institutions, associations active in the field of European integration and associations pursuing an aim of European interest, through the Jean Monnet Action.
- (22) Cooperation under the Programme with civil society organisations in the fields of education, training, youth and sport, at national and Union level is of great importance in order to create a broad sense of ownership in relation to lifelong learning strategies and policies and to take into consideration stakeholders' ideas and concerns at all levels.

- (23) The Commission's communication of 18 January 2011 entitled 'Developing the European Dimension in Sport' sets out the Commission's ideas for action at Union level in the field of sport following the entry into force of the Treaty of Lisbon, and proposes a list of concrete actions to be taken by the Commission and Member States in order to increase sport's European identity in three broad chapters: the societal role of sport, the economic dimension of sport and the organisation of sport. It is also necessary to take into account the added value of sport, including indigenous sport, and its contribution to the Union's cultural and historical heritage.
- (24) There is a need to focus in particular on grassroots sport and volunteering in sport, on account of the important role that they play in promoting social inclusion, equal opportunities and health-enhancing physical activity.
- (25) Improved transparency and recognition of qualifications and competences and extended acceptance of Union transparency and recognition tools should contribute to the development of quality education and training, and facilitate mobility for both lifelong learning and occupational purposes throughout Europe, between countries as well as across sectors. Opening up access to methods, practices and technologies used in other countries will help to improve employability.
- (26) To that end, it is recommended that extended use be made of the single Union framework for the transparency of qualifications and competences (Europass) established by Decision No 2241/2004/EC of the European Parliament and of the Council⁽¹⁾, the European Quality Assurance Register for Higher Education (EQAR) and the European Association for Quality Assurance in Higher Education (ENQA) established pursuant to Recommendation 2006/143/EC of the European Parliament and of the Council⁽²⁾, the European Qualifications Framework (EQF) established pursuant to the Recommendation of the European Parliament and of the Council of 23 April 2008⁽³⁾, the European Credit System for Vocational Education and Training (ECVET) established pursuant to the Recommendation of the European Parliament and of the Council of 18 June 2009⁽⁴⁾, the European Quality Assurance Reference Framework for Vocational Education and Training (EQAVET) established pursuant to the Recommendation of the European Parliament and of the Council of 18 June 2009⁽⁵⁾ and the European Credit Transfer and Accumulation System (ECTS).
- (27) In order to ensure greater efficiency in communication to the public at large and stronger synergies between the communication activities undertaken at the initiative of the Commission, the resources allocated to communication under this Regulation should also contribute to covering the corporate communication of the political priorities of the Union, provided that these are related to the general objective of this Regulation.
- (28) It is necessary to ensure the European added value of all actions carried out within the framework of the Programme, and their complementarity with activities undertaken by the Member States in compliance with Article 167(4) of the TFEU and with other activities, in particular those in the fields of culture and the media, employment, research and innovation, industry and enterprise, cohesion and development policy, as well as enlargement policy and initiatives, instruments and strategies in the field of regional policy and external relations.
- (29) The Programme is designed to have a positive and sustainable impact on education, training, youth and sport policies and practices. That systemic impact should be achieved through the various actions and activities envisaged in the Programme, which aim at fostering changes at institutional level and which lead, where appropriate, to innovation at system level. Individual projects for which financial support is sought from the Programme are not required to have any systemic impact as such. It is the cumulative result of those projects that should contribute to the attainment of systemic impact.
- (30) Effective performance management, including evaluation and monitoring, requires the development of specific, measurable and realistic performance indicators which can be measured over time and which reflect the logic of the intervention.
- (31) The Commission and the Member States should optimise the use of ICTs and new technologies in order to facilitate access to actions relating to education, training, youth and sport. This could include virtual mobility, which should complement, but not replace, learning mobility.
- ⁽¹⁾ Decision No 2241/2004/EC of the European Parliament and of the Council of 15 December 2004 on a single Community framework for the transparency of qualifications and competences (Europass) (OJ L 390, 31.12.2004, p. 6).
- ⁽²⁾ Recommendation 2006/143/EC of the European Parliament and of the Council of 15 February 2006 on further European cooperation in quality assurance in higher education (OJ L 64, 4.3.2006, p. 60).
- ⁽³⁾ Recommendation of the European Parliament and of the Council of 23 April 2008 on the establishment of the European Qualifications Framework for lifelong learning (OJ C 111, 6.5.2008, p. 1).
- ⁽⁴⁾ Recommendation of the European Parliament and of the Council of 18 June 2009 on the establishment of a European Quality Assurance Reference Framework for Vocational Education and Training (OJ C 155, 8.7.2009, p. 1).
- ⁽⁵⁾ Recommendation of the European Parliament and of the Council of 18 June 2009 on the establishment of a European Quality Assurance Reference Framework for Vocational Education and Training (OJ C 155, 8.7.2009, p. 1).

- (32) This Regulation lays down a financial envelope for the entire duration of the Programme which is to constitute the prime reference amount, within the meaning of Point 17 of the Interinstitutional Agreement between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management ⁽¹⁾, for the European Parliament and the Council during the annual budgetary procedure.
- (33) In order to ensure continuity in the funding support provided under the Programme to the functioning of bodies, the Commission should be able during the initial phase of the Programme to consider the costs directly linked to the implementation of the supported activities as eligible for financing, even if they were incurred by the beneficiary before the grant application was submitted.
- (34) There is a need to establish performance criteria on which the allocation of budget funds between Member States for the actions managed by the national agencies should be based.
- (35) The candidate countries for accession to the Union and those European Free Trade Association (EFTA) countries which form part of the European Economic Area (EEA) may participate in Union programmes on the basis of framework agreements, Association Council decisions or similar agreements.
- (36) The Swiss Confederation may participate in the Union programmes in accordance with an agreement to be signed between the Union and that country.
- (37) Individuals from an overseas country or territory (OCT) and competent public and/or private bodies and institutions from an OCT may participate in the programmes in accordance with Council Decision 2001/822/EC ⁽²⁾. The constraints imposed by the remoteness of the outermost regions of the Union and the OCTs should be taken into account when implementing the Programme.
- (38) The Commission and the High Representative of the European Union for Foreign Affairs and Security Policy, in their joint communication of 25 May 2011 entitled 'A new response to a changing Neighbourhood', outlined, inter alia, the aim of further facilitating neighbourhood countries' participation in Union mobility and capacity-building actions in higher education and the opening of the future education programme to the neighbourhood countries.
- (39) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, wrongly paid or incorrectly used and, where appropriate, penalties. While Union external assistance has an increasing need for financing, the economic and budgetary situation of the Union limits the resources available for such assistance. The Commission should, therefore, seek the most efficient and sustainable use of available resources, in particular through the use of financial instruments with leverage effect.
- (40) In order to enhance access to the Programme, the grants to support the mobility of individuals should be adjusted to the living and subsistence costs of the host country. In accordance with national law, Member States should also be encouraged to exempt those grants from any taxes and social levies. The same exemption should apply to public or private bodies awarding such financial support to the individuals concerned.
- (41) In accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council ⁽³⁾, volunteer time can be recognised as co-financing in the form of contributions in kind.
- (42) In its communication of 29 June 2011 entitled 'A Budget for Europe 2020', the Commission underlined its commitment to simplifying Union funding. The creation of a single programme on education, training, youth and sport should result in significant simplification, rationalisation and synergies in the management of the Programme. The implementation of the Programme should be further simplified by the use of lump-sum, unit-cost or flat-rate funding, as well as by reducing formal and bureaucratic requirements for beneficiaries and Member States.
- (43) Improving implementation and the quality of spending should constitute guiding principles for achieving the objectives of the Programme, whilst ensuring the optimal use of the financial resources.
- (44) It is important to ensure sound financial management of the Programme and its implementation in the most effective and user-friendly manner possible, whilst also ensuring legal certainty and the accessibility of the Programme to all participants.
- (45) In order to ensure a quick response to changing needs throughout the duration of the Programme, the power to adopt acts in accordance with Article 290 of the TFEU should be delegated to the Commission in respect of provisions relating to additional actions managed by the national agencies. It is of particular importance that

⁽¹⁾ OJ C 373, 20.12.2013, p. 1

⁽²⁾ Council Decision 2001/822/EC of 27 November 2001 on the association of the overseas countries and territories with the European Community ('Overseas Association Decision') (OJ L 314, 30.11.2001, p. 1).

⁽³⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure the simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.

(46) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽¹⁾.

(47) The Programme should cover three different fields, and the committee established under this Regulation should deal with both horizontal and sectoral issues. It is for the Member States to ensure that they send the relevant representatives to attend meetings of that committee in accordance with the topics on its agenda, and it is for the committee chair to ensure that meeting agendas clearly indicate the sector or sectors involved and the topics, according to each sector, to be discussed at each meeting. Where appropriate, and in accordance with the committee's rules of procedure and on an ad hoc basis, it should be possible to invite external experts, including representatives of the social partners, to participate in the committee meetings as observers.

(48) It is appropriate to ensure the correct closure of the Programme, in particular as regards the continuation of multi-annual arrangements for its management, such as the financing of technical and administrative assistance. As from 1 January 2014, the technical and administrative assistance should ensure, if necessary, the management of actions that have not yet been finalised under the predecessor programmes by the end of 2013.

(49) Since the objective of this Regulation, namely to establish the Programme, cannot be sufficiently achieved by the Member States but can rather, by reason of its scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity, as set out in Article 5 of the Treaty of the European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.

(50) Decisions No 1719/2006/EC, No 1720/2006/EC and No 1298/2008/EC should therefore be repealed.

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

(51) In order to ensure continuity in the funding support provided under the Programme, this Regulation should apply from 1 January 2014. For reasons of urgency, this Regulation should enter into force as soon as possible after its publication in the *Official Journal of the European Union*,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

General provisions

Article 1

Scope of the Programme

1. This Regulation establishes a programme for Union action in the field of education, training, youth and sport called 'Erasmus+' (the 'Programme').

2. The Programme shall be implemented for the period from 1 January 2014 to 31 December 2020.

3. The Programme shall cover the following fields, whilst respecting the structures and specific needs of the various sectors in the Member States:

(a) education and training at all levels, in a lifelong learning perspective, including school education (Comenius), higher education (Erasmus), international higher education (Erasmus Mundus), vocational education and training (Leonardo da Vinci) and adult learning (Grundtvig);

(b) youth (Youth in Action), particularly in the context of non-formal and informal learning;

(c) sport, in particular grassroots sport.

4. The Programme shall include an international dimension aimed at supporting the Union's external action, including its development objectives, through cooperation between the Union and partner countries.

Article 2

Definitions

For the purposes of this Regulation, the following definitions shall apply:

(1) 'lifelong learning' means all general education, vocational education and training, non-formal learning and informal learning undertaken throughout life, resulting in an improvement in knowledge, skills and competences or participation in society within a personal, civic, cultural, social and/or employment-related perspective, including the provision of counselling and guidance services;

- (2) 'non-formal learning' means learning which takes place through planned activities (in terms of learning objectives and learning time) where some form of learning support is present (e.g. a student-teacher relationship), but which is not part of the formal education and training system;
- (3) 'informal learning' means learning resulting from daily activities related to work, family or leisure which is not organised or structured in terms of objectives, time or learning support; it may be unintentional from the learner's perspective;
- (4) 'structured dialogue' means the dialogue with young people and youth organisations which serves as a forum for continuous joint reflection on the priorities, implementation and follow-up of European cooperation in the youth field;
- (5) 'transnational' relates, unless otherwise indicated, to any action involving at least two Programme countries as referred to in Article 24(1);
- (6) 'international' relates to any action involving at least one Programme country and at least one third country ('partner country');
- (7) 'learning mobility' means moving physically to a country other than the country of residence, in order to undertake study, training or non-formal or informal learning; it may take the form of traineeships, apprenticeships, youth exchanges, volunteering, teaching or participation in a professional development activity, and may include preparatory activities, such as training in the host language, as well as sending, hosting and follow-up activities;
- (8) 'cooperation for innovation and the exchange of good practices' means transnational and international cooperation projects involving organisations active in the fields of education, training and/or youth, and may include other organisations;
- (9) 'support for policy reform' means any type of activity aimed at supporting and facilitating the modernisation of education and training systems, as well as support for the development of European youth policy, through the process of policy cooperation between Member States, in particular the Open Method of Coordination and the structured dialogue with young people;
- (10) 'virtual mobility' means a set of activities supported by information and communications technology, including e-learning, organised at institutional level, that realise or facilitate transnational and/or international, collaborative experiences in a context of teaching and/or learning;
- (11) 'staff' means persons who, on either a professional or a voluntary basis, are involved in education, training or youth non-formal learning, and may include professors, teachers, trainers, school leaders, youth workers and non-educational staff;
- (12) 'youth worker' means a professional or a volunteer involved in non-formal learning who supports young people in their personal socio-educational and professional development;
- (13) 'young people' means individuals aged between 13 and 30;
- (14) 'higher education institution' means:
- (a) any type of higher education institution which, in accordance with national law or practice, offers recognised degrees or other recognised tertiary level qualifications, whatever such establishment may be called;
- (b) any institution which, in accordance with national law or practice, offers vocational education or training at tertiary level;
- (15) 'joint degrees' means an integrated study programme offered by at least two higher education institutions resulting in a single degree certificate issued and signed by all the participating institutions jointly and recognised officially in the countries where the participating institutions are located;
- (16) 'double degree/multiple degree' means a study programme offered by at least two (double) or more (multiple) higher education institutions whereby the student receives, upon completion of the study programme, a separate degree certificate from each of the participating institutions;
- (17) 'youth activity' means an out-of-school activity (such as youth exchange, volunteering or youth training) carried out by a young person, either individually or in a group, in particular through youth organisations, and characterised by a non-formal learning approach;
- (18) 'partnership' means an agreement between a group of institutions and/or organisations in different Programme countries to carry out joint European activities in the fields of education, training, youth and sport or establishing a formal or informal network in a relevant field such as joint learning projects for pupils and their teachers in the form of class exchanges and individual long-term mobility, intensive programmes in higher education and cooperation between regional and local authorities to foster inter-regional, including cross-border, cooperation; it may be extended to institutions and/or organisations from partner countries with a view to strengthening the quality of the partnership;

- (19) 'key competences' means the basic set of knowledge, skills and attitudes which all individuals need for personal fulfilment and development, active citizenship, social inclusion and employment, as described in Recommendation 2006/962/EC of the European Parliament and of the Council ⁽¹⁾;
- (20) 'Open Method of Coordination' (OMC) means an inter-governmental method providing a framework for cooperation between the Member States, whose national policies can thus be directed towards certain common objectives; within the scope of the Programme, the OMC applies to education, training and youth;
- (21) 'Union transparency and recognition tools' means instruments that help stakeholders to understand, appreciate and, as appropriate, recognise learning outcomes and qualifications throughout the Union;
- (22) 'neighbourhood countries' means the countries and territories covered by the European Neighbourhood Policy;
- (23) 'dual career' means the combination of high-level sports training with general education or work;
- (24) 'grassroots sport' means organised sport practised at local level by amateur sportspeople, and sport for all.

Article 3

European added value

1. The Programme shall support only those actions and activities which present a potential European added value and which contribute to the achievement of the general objective as referred to in Article 4.
2. The European added value of the actions and activities of the Programme shall be ensured in particular through their:
 - (a) transnational character, particularly with regard to mobility and cooperation aimed at achieving a sustainable systemic impact;
 - (b) complementarity and synergy with other programmes and policies at national, Union and international level;
 - (c) contribution to the effective use of Union transparency and recognition tools.

⁽¹⁾ Recommendation 2006/962/EC of the European Parliament and of the Council of 18 December 2006 on key competences for lifelong learning (OJ L 394, 30.12.2006, p. 10).

Article 4

General objective of the Programme

The Programme shall contribute to the achievement of:

- (a) the objectives of the Europe 2020 strategy, including the headline education target;
- (b) the objectives of the strategic framework for European cooperation in education and training ('ET 2020'), including the corresponding benchmarks;
- (c) the sustainable development of partner countries in the field of higher education;
- (d) the overall objectives of the renewed framework for European cooperation in the youth field (2010-2018);
- (e) the objective of developing the European dimension in sport, in particular grassroots sport, in line with the Union work plan for sport; and
- (f) the promotion of European values in accordance with Article 2 of the Treaty on European Union.

CHAPTER II

Education and training

Article 5

Specific objectives

1. In line with the general objective of the Programme as specified in Article 4, in particular the objectives of ET 2020, as well as in support of the sustainable development of partner countries in the field of higher education, the Programme shall pursue the following specific objectives:
 - (a) to improve the level of key competences and skills, with particular regard to their relevance for the labour market and their contribution to a cohesive society, in particular through increased opportunities for learning mobility and through strengthened cooperation between the world of education and training and the world of work;
 - (b) to foster quality improvements, innovation excellence and internationalisation at the level of education and training institutions, in particular through enhanced transnational cooperation between education and training providers and other stakeholders;
 - (c) to promote the emergence and raise awareness of a European lifelong learning area designed to complement policy reforms at national level and to support the modernisation of education and training systems, in particular through enhanced policy cooperation, better use of Union transparency and recognition tools and the dissemination of good practices;

- (d) to enhance the international dimension of education and training, in particular through cooperation between Union and partner-country institutions in the field of VET and in higher education, by increasing the attractiveness of European higher education institutions and supporting the Union's external action, including its development objectives, through the promotion of mobility and cooperation between the Union and partner-country higher education institutions and targeted capacity-building in partner countries;
- (e) to improve the teaching and learning of languages and to promote the Union's broad linguistic diversity and intercultural awareness;
- (f) to promote excellence in teaching and research activities in European integration through the Jean Monnet activities worldwide, as referred to in Article 10.
2. For the purposes of evaluating the Programme, measurable and relevant indicators in relation to the specific objectives referred to in paragraph 1 are set out in Annex I.

Article 6

Actions of the Programme

1. In the field of education and training, the Programme shall pursue its objectives through the following types of actions:
- (a) learning mobility of individuals;
- (b) cooperation for innovation and the exchange of good practices; and
- (c) support for policy reform.
2. The specific Jean Monnet activities are described in Article 10.

Article 7

Learning mobility of individuals

1. Learning mobility of individuals shall support the following activities within the Programme countries referred to in Article 24(1):
- (a) the mobility of students in all cycles of higher education and of students, apprentices and pupils in vocational education and training. This mobility may take the form of studying at a partner institution or traineeships or gaining experience as an apprentice, assistant or trainee abroad. Degree mobility at Master's level may be supported through the Student Loan Guarantee Facility referred to in Article 20;
- (b) the mobility of staff, within the Programme countries referred to in Article 24(1). This mobility may take the

form of teaching or assistantships or participation in professional development activities abroad.

2. This action shall also support the international mobility of students and staff to and from partner countries as regards higher education, including mobility organised on the basis of joint, double or multiple degrees of high quality or joint calls.

Article 8

Cooperation for innovation and the exchange of good practices

1. Cooperation for innovation and the exchange of good practices shall support:
- (a) strategic partnerships between organisations and/or institutions involved in education and training or other relevant sectors aimed at developing and implementing joint initiatives and promoting peer learning and exchanges of experience;
- (b) partnerships between the world of work and education and training institutions in the form of:
- knowledge alliances between, in particular, higher education institutions and the world of work aimed at promoting creativity, innovation, work-based learning and entrepreneurship by offering relevant learning opportunities, including developing new curricula and pedagogical approaches;
 - sector skills alliances between education and training providers and the world of work aimed at promoting employability, contributing to the creation of new sector-specific or cross-sectoral curricula, developing innovative methods of vocational teaching and training and putting the Union transparency and recognition tools into practice;

- (c) IT support platforms, covering all education and training sectors, including in particular eTwinning, allowing peer learning, virtual mobility and exchanges of good practices and opening access for participants from neighbourhood countries.

2. This action shall also support development, capacity-building, regional integration, knowledge exchanges and modernisation processes through international partnerships between higher education institutions in the Union and in partner countries, in particular for peer learning and joint education projects, as well as through the promotion of regional cooperation and National Information Offices, in particular with neighbourhood countries.

*Article 9***Support for policy reform**

1. Support for policy reform shall include the activities initiated at Union level relating to:

- (a) the implementation of the Union policy agenda on education and training in the context of the OMC, as well as to the Bologna and Copenhagen processes;
- (b) the implementation in Programme countries of Union transparency and recognition tools, in particular the single Union framework for the transparency of qualifications and competences (Europass), the European Qualifications Framework (EQF), the European Credit Transfer and Accumulation System (ECTS), the European Credit System for Vocational Education and Training (ECVET), the European Quality Assurance Reference Framework for Vocational Education and Training (EQAVET), the European Quality Assurance Register for Higher Education (EQAR) and the European Association for Quality Assurance in Higher Education (ENQA), and the provision of support to Union-wide networks and European non-governmental organisations (NGOs) active in the field of education and training;
- (c) the policy dialogue with relevant European stakeholders in the field of education and training;
- (d) NARIC, the Eurydice and Euroguidance networks, and the National Europass Centres.

2. This action shall also support policy dialogue with partner countries and international organisations.

*Article 10***Jean Monnet activities**

The Jean Monnet activities shall aim to:

- (a) promote teaching and research on European integration worldwide among specialist academics, learners and citizens, in particular through the creation of Jean Monnet Chairs and other academic activities, as well as by providing aid for other knowledge-building activities at higher education institutions;
- (b) support the activities of academic institutions or associations active in the field of European integration studies and support a Jean Monnet label for excellence;
- (c) support the following institutions pursuing an aim of European interest:
 - (i) the European University Institute of Florence;
 - (ii) the College of Europe (Bruges and Natolin campuses);

- (iii) the European Institute of Public Administration (EIPA), Maastricht;

- (iv) the Academy of European Law, Trier;

- (v) the European Agency for Development in Special Needs Education, Odense;

- (vi) the International Centre for European Training (CIFE), Nice;

- (d) promote policy debate and exchanges between the academic world and policy-makers on Union policy priorities.

*CHAPTER III***Youth***Article 11***Specific objectives**

1. In line with the general objective of the Programme as specified in Article 4, in particular the objectives of the renewed framework for European cooperation in the youth field (2010–2018), the Programme shall pursue the following specific objectives:

- (a) to improve the level of key competences and skills of young people, including those with fewer opportunities, as well as to promote participation in democratic life in Europe and the labour market, active citizenship, intercultural dialogue, social inclusion and solidarity, in particular through increased learning mobility opportunities for young people, those active in youth work or youth organisations and youth leaders, and through strengthened links between the youth field and the labour market;
- (b) to foster quality improvements in youth work, in particular through enhanced cooperation between organisations in the youth field and/or other stakeholders;
- (c) to complement policy reforms at local, regional and national level and to support the development of knowledge and evidence-based youth policy as well as the recognition of non-formal and informal learning, in particular through enhanced policy cooperation, better use of Union transparency and recognition tools and the dissemination of good practices;
- (d) to enhance the international dimension of youth activities and the role of youth workers and organisations as support structures for young people in complementarity with the Union's external action, in particular through the promotion of mobility and cooperation between the Union and partner-country stakeholders and international organisations and through targeted capacity-building in partner countries.

2. For the purposes of evaluating the Programme, measurable and relevant indicators in relation to the specific objectives referred to in paragraph 1 are set out in Annex I.

Article 12

Actions of the Programme

The Programme shall pursue its objectives through the following types of actions:

- (a) learning mobility of individuals;
- (b) cooperation for innovation and the exchange of good practices;
- (c) support for policy reform.

Article 13

Learning mobility of individuals

1. Learning mobility of individuals shall support:
 - (a) the mobility of young people in non-formal and informal learning activities between the Programme countries; such mobility may take the form of youth exchanges and volunteering through the European Voluntary Service, as well as innovative activities building on existing provisions for mobility;
 - (b) the mobility of persons active in youth work or youth organisations and youth leaders; such mobility may take the form of training and networking activities.
2. This action shall also support the mobility of young people, persons active in youth work or youth organisations and youth leaders, to and from partner countries, in particular neighbourhood countries.

Article 14

Cooperation for innovation and the exchange of good practices

1. Cooperation for innovation and the exchange of good practices shall support:
 - (a) strategic partnerships aimed at developing and implementing joint initiatives, including youth initiatives and citizenship projects that promote active citizenship, social innovation, participation in democratic life and entrepreneurship, through peer learning and exchanges of experience;

- (b) IT support platforms allowing peer learning, knowledge-based youth work, virtual mobility and exchanges of good practice.

2. This action shall also support development, capacity-building and knowledge exchanges through partnerships between organisations in Programme countries and partner countries, in particular through peer learning.

Article 15

Support for policy reform

1. Support for policy reform shall include activities relating to:
 - (a) the implementation of the Union policy agenda on youth through the OMC;
 - (b) implementation in the Programme countries of Union transparency and recognition tools, in particular the Youthpass, and support for Union-wide networks and European youth NGOs;
 - (c) policy dialogue with relevant European stakeholders and structured dialogue with young people;
 - (d) the European Youth Forum, resource centres for the development of youth work and the Eurodesk network.
2. This action shall also support policy dialogue with partner countries and international organisations.

CHAPTER IV

Sport

Article 16

Specific objectives

1. In line with the general objective of the Programme, as specified in Article 4, and with the Union work plan for sport, the Programme shall focus in particular on grassroots sport and shall pursue the following specific objectives:
 - (a) to tackle cross-border threats to the integrity of sport, such as doping, match-fixing and violence, as well as all kinds of intolerance and discrimination;
 - (b) to promote and support good governance in sport and dual careers of athletes;
 - (c) to promote voluntary activities in sport, together with social inclusion, equal opportunities and awareness of the importance of health-enhancing physical activity through increased participation in, and equal access to, sport for all.

2. For the purposes of evaluating the Programme, measurable and relevant indicators in relation to the specific objectives referred to in paragraph 1 are set out in Annex I.

Article 17

Activities

1. The objectives of cooperation shall be pursued through the following transnational activities, which shall focus in particular on grassroots sport:

- (a) support for collaborative partnerships;
- (b) support for not-for-profit European sport events involving several Programme countries and contributing to the objectives set out in point (c) of Article 16(1);
- (c) support for strengthening the evidence base for policy-making;
- (d) dialogue with relevant European stakeholders.

2. The activities referred to in paragraph 1 may leverage supplementary funding from third parties such as private undertakings.

CHAPTER V

Financial provisions

Article 18

Budget

1. The financial envelope for the implementation of the Programme as from 1 January 2014 is set at EUR 14 774 524 000 in current prices.

The annual appropriations shall be authorised by the European Parliament and the Council within the limits of the multiannual financial framework.

2. The amount referred to in paragraph 1 shall be allocated to the actions of the Programme as follows, with a margin of flexibility not exceeding 5 % of each of the allocated amounts:

- (a) 77,5 % to education and training, from which the following minimum allocations shall be assigned:
 - (i) 43 % to higher education, representing 33,3 % of the total budget;
 - (ii) 22 % to vocational education and training, representing 17 % of the total budget;
 - (iii) 15 % to school education, representing 11,6 % of the total budget;

(iv) 5 % to adult learning, representing 3,9 % of the total budget;

(b) 10 % to youth;

(c) 3,5 % to the Student Loan Guarantee Facility;

(d) 1,9 % to Jean Monnet;

(e) 1,8 % to sport, of which no more than 10 % to the activity mentioned under point (b) of Article 17(1);

(f) 3,4 % as operating grants to national agencies; and

(g) 1,9 % to cover administrative expenditure.

3. Of the allocations referred to in points (a) and (b) of paragraph 2, at least 63 % shall be allocated to learning mobility of individuals, at least 28 % to cooperation for innovation and the exchange of good practices and 4,2 % to support for policy reform.

4. In addition to the financial envelope as indicated in paragraph 1, and in order to promote the international dimension of higher education, additional funding, as provided for in the different external instruments (Development Cooperation Instrument (DCI), the European Neighbourhood Instrument (ENI), the Partnership Instrument for cooperation with third countries (PI) and the Instrument for Pre-accession Assistance (IPA)), shall be allocated to actions in respect of learning mobility to or from partner countries, and to cooperation and policy dialogue with authorities, institutions and organisations from those countries. This Regulation shall apply to the use of those funds, while ensuring conformity with the Regulations respectively governing those external instruments, and, in the case of the DCI, fulfilling also the criteria for Official Development Assistance as established by the Development Assistance Committee of the Organisation for Economic Co-operation and Development.

The funding shall be made available through two multiannual allocations covering the first four years and the remaining three years respectively. The allocation of that funding shall be determined in the multiannual indicative programming of the external instruments referred to in the first subparagraph, in line with the identified needs and priorities of the countries concerned. Cooperation with partner countries may be based, where relevant, on additional appropriations from those countries to be made available in accordance with procedures to be agreed with them.

The student and staff mobility action between Programme countries and partner countries funded through the allocation from the DCI shall focus on areas that are relevant to the inclusive and sustainable development of developing countries.

5. The financial allocation for the Programme may also cover expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are required for the management of the Programme and the achievement of its objectives, in particular, studies, meetings of experts and information and communication actions, including corporate communication of the political priorities of the Union as far as they are related to the general objective of this Regulation, expenses linked to IT focusing on information processing and exchange, and all other technical and administrative assistance expenses incurred by the Commission for the management of the Programme.

6. The financial allocation may also cover the technical and administrative assistance expenses necessary to ensure the transition between the Programme and the measures adopted under Decisions No 1719/2006/EC, No 1720/2006/EC and No 1298/2008/EC. If necessary, appropriations could be entered in the budget beyond 2020 to cover similar expenses, in order to allow the management of actions and activities not yet completed by 31 December 2020.

7. The funds for the learning mobility of individuals referred to in point (a) of Article 6(1) and point (a) of Article 12 that are to be managed by a national agency or agencies (the 'national agency') shall be allocated on the basis of population and cost of living in the Member State, distance between capitals of Member States and performance. The performance parameter shall account for 25 % of the total funds according to the criteria referred to in paragraphs 8 and 9. As regards strategic partnerships referred to in point (a) of Article 8(1) and point (a) of Article 14(1) that are to be selected and managed by a national agency, the funds shall be allocated on the basis of criteria to be defined by the Commission in accordance with the examination procedure referred to in Article 36(3). Those formulae shall, as far as possible, be neutral with respect to the different education and training systems of the Member States, shall avoid substantial reductions in the annual budget allocated to Member States from one year to the next and shall minimise excessive imbalances in the level of grants allocated.

8. Allocation of funds based on performance shall apply in order to promote an efficient and effective use of resources. The criteria used to measure performance shall be based on the most recent data available and shall focus in particular on:

- (a) the level of annual realised outputs; and
- (b) the level of annual payments realised.

9. The allocation of funds for the year 2014 shall be based on the latest available data on actions carried out and the budget take-up under the Lifelong Learning, Youth in Action and Erasmus Mundus programmes up to and including 31 December 2013.

10. The Programme may provide support through specific innovative funding modalities, in particular those set out in Article 20.

Article 19

Specific funding modalities

1. The Commission shall implement the Union financial support in accordance with Regulation (EU, Euratom) No 966/2012.

2. The Commission may launch joint calls with partner countries or their organisations and agencies to finance projects on the basis of matching funds. Projects may be evaluated and selected through joint evaluation and selection procedures to be agreed upon by the funding agencies involved, in compliance with the principles set out in Regulation (EU, Euratom) No 966/2012.

3. Public bodies, as well as schools, higher education institutions and organisations in the fields of education, training, youth and sport that have received over 50 % of their annual revenue from public sources over the last two years shall be considered as having the necessary financial, professional and administrative capacity to carry out activities under the Programme. They shall not be required to present further documentation to demonstrate that capacity.

4. By way of derogation from Article 130(2) of Regulation (EU, Euratom) No 966/2012, and in duly justified cases, the Commission may consider the costs directly linked to the implementation of the supported activities and incurred during the first six months of 2014 as eligible for financing from 1 January 2014, even if they were incurred by the beneficiary before the grant application was submitted.

5. The amount referred to in point (c) of Article 137(1) of Regulation (EU, Euratom) No 966/2012 shall not apply to financial support for learning mobility granted to individuals.

Article 20

Student Loan Guarantee Facility

1. The Student Loan Guarantee Facility shall provide partial guarantees to financial intermediaries in respect of loans granted on the most favourable terms possible to students undertaking a second-cycle degree, such as a Master's degree, at a recognised higher education institution in a Programme country, as referred to in Article 24(1), which is neither their country of residence nor the country in which they obtained their qualification granting access to the Master's programme.

2. Guarantees issued through the Student Loan Guarantee Facility shall cover new eligible student loans up to a maximum of EUR 12 000 for a one-year programme and up to EUR 18 000 for a programme lasting up to two years, or their equivalent in local currency.

3. The management of the Student Loan Guarantee Facility at Union level shall be entrusted to the European Investment Fund (EIF) in accordance with Regulation (EU, Euratom) No 966/2012 on the basis of a delegation agreement with the Commission, setting out the detailed rules and requirements governing the implementation of the Student Loan Guarantee Facility and the respective obligations of the parties. On this basis, the EIF shall conclude agreements with financial intermediaries, such as banks, national and/or regional student lending institutions or other recognised financial institutions, and shall endeavour to select a financial intermediary from each Programme country, in order to ensure that students from all Programme countries have access to the Student Loan Guarantee Facility in a consistent and non-discriminatory manner.

4. Technical information on the functioning of the Student Loan Guarantee Facility is provided in Annex II.

CHAPTER VI

Performance, results and dissemination

Article 21

Monitoring and evaluation of performance and results

1. The Commission, in cooperation with the Member States, shall regularly monitor and report on the performance and results of the Programme as measured against its objectives, with particular regard to:

- (a) the European added value referred to in Article 3;
- (b) the distribution of funds associated with the education, training and youth sectors, with a view to ensuring, by the end of the Programme, an allocation of funding which guarantees a sustainable systemic impact;
- (c) the use of the funds derived from the external instruments as referred to in Article 18(4) and their contribution to the respective objectives and principles of those instruments.

2. In addition to carrying out its ongoing monitoring activities, the Commission shall submit a mid-term evaluation report by 31 December 2017 in order to assess the effectiveness of the measures taken to achieve the Programme's objectives and to evaluate the efficiency of the Programme and its European added value, accompanied, if appropriate, by a legislative proposal to amend this Regulation. The mid-term evaluation report shall address the scope for simplification of the Programme, its internal and external coherence, the continued relevance of all of its objectives, and the contribution made by the measures taken to the realisation of the Europe 2020 strategy. It shall also take into account the results of an evaluation of the long-term impact of the predecessor programmes (Lifelong Learning, Youth in Action, Erasmus Mundus and other international higher education programmes).

3. The Commission shall submit the mid-term evaluation report referred to in paragraph 2 to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions.

4. Without prejudice to the requirements set out in Chapter VIII and the obligations of national agencies as referred to in Article 28, Member States shall submit to the Commission, by 30 June 2017, a report on the implementation and the impact of the Programme in their respective territories.

5. The Commission shall submit a final evaluation of the Programme to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions by 30 June 2022.

Article 22

Communication and dissemination

1. The Commission, in cooperation with Member States, shall ensure the dissemination of information, publicity and follow-up with regard to all actions and activities supported under the Programme, as well as the dissemination of the results of the previous Lifelong Learning, Youth in Action and Erasmus Mundus programmes.

2. Beneficiaries of the projects supported through actions and activities as referred to in Articles 6, 10, 12, 17 and 20 should ensure that the results and impacts obtained are properly communicated and disseminated. This may include the provision of peer-to-peer information in relation to mobility opportunities.

3. The national agencies referred to in Article 28 shall develop a consistent policy with regard to the effective dissemination and exploitation of results of activities supported under the actions they manage within the Programme, shall assist the Commission in the general task of disseminating information concerning the Programme, including information in respect of actions and activities managed at national and Union level, and its results, and shall inform relevant target groups about the actions undertaken in their country.

4. The public and private bodies within the sectors covered by the Programme shall use the brand name 'Erasmus+' for the purpose of communication and dissemination of information relating to the Programme. For the different sectors of the Programme, the following brand names shall be used:

- 'Comenius', associated with school education;
- 'Erasmus', associated with all types of higher education within the Programme countries;
- 'Erasmus Mundus', associated with all types of higher education activities between the Programme countries and partner countries;
- 'Leonardo da Vinci', associated with vocational education and training;
- 'Grundtvig', associated with adult learning;

- 'Youth in Action', associated with non-formal and informal learning in the field of youth;
 - 'Sports', associated with activities in the field of sport.
5. Communication activities shall also contribute to the corporate communication of the political priorities of the Union, provided that they are related to the general objective of this Regulation.

CHAPTER VII

Access to the Programme

Article 23

Access

1. Any public or private body active in the fields of education, training, youth and grassroots sport may apply for funding within the Programme. In the case of the activities referred to in point (a) of Article 13(1) and point (a) of Article 14(1), the Programme shall support the participation of groups of young people who are active in youth work, but not necessarily in the context of a youth organisation.
2. When implementing the Programme, inter alia as regards the selection of participants and the award of scholarships, the Commission and the Member States shall ensure that particular efforts are made to promote social inclusion and the participation of people with special needs or with fewer opportunities.

Article 24

Country participation

1. The Programme shall be open to the participation of the following countries (the 'Programme countries'):
 - (a) the Member States;
 - (b) the acceding countries, candidate countries and potential candidates benefiting from a pre-accession strategy, in accordance with the general principles and general terms and conditions for the participation of those countries in Union programmes established in the respective framework agreements, Association Council decisions or similar agreements;
 - (c) those EFTA countries that are party to the EEA Agreement, in accordance with the provisions of that agreement;
 - (d) the Swiss Confederation, on the basis of a bilateral agreement to be concluded with that country;
 - (e) those countries covered by the European neighbourhood policy which have concluded agreements with the Union providing for the possibility of their participation in the Union's programmes, subject to the conclusion of a bilateral agreement with the Union on the conditions of their participation in the Programme.

2. The Programme countries shall be subject to all the obligations, and shall fulfil all the tasks set out in this Regulation in relation to Member States.

3. The Programme shall support cooperation with partner countries, in particular neighbourhood countries, in actions and activities as referred to in Articles 6, 10 and 12.

CHAPTER VIII

Management and audit system

Article 25

Complementarity

The Commission, in cooperation with the Member States, shall ensure the overall consistency and complementarity of the Programme with:

- (a) the relevant policies and programmes, in particular those relating to culture and the media, employment, research and innovation, industry and enterprise, cohesion and development policy, as well as enlargement policy and initiatives, instruments and strategies in the field of regional policy and external relations;
- (b) the other Union relevant sources of funding for education, training, youth and sport, in particular the European Social Fund and the other financial instruments relating to employment and social inclusion, the European Regional Development Fund and 'Horizon 2020' - the Framework Programme for Research and Innovation, as well as the financial instruments relating to justice and citizenship, health, external cooperation programmes and pre-accession assistance.

Article 26

Implementing bodies

The Programme shall be implemented in a consistent manner by the following bodies:

- (a) the Commission at Union level;
- (b) the national agencies at national level in the Programme countries.

Article 27

National authority

1. The term 'national authority' refers to one or more national authorities in accordance with national law and practice.
2. By 22 January 2014, the Member States shall notify the Commission, by way of a formal notification transmitted by their Permanent Representation, of the person(s) legally authorised to act on their behalf as the national authority for the purposes of this Regulation. In the event of replacement of the national authority during the course of the Programme's lifetime, the relevant Member State shall notify the Commission thereof immediately, in accordance with the same procedure.

3. The Member States shall take all appropriate measures to remove legal and administrative obstacles to the proper functioning of the Programme, including, where possible, measures aimed at resolving issues that give rise to difficulties in obtaining visas.

4. By 22 March 2014, the national authority shall designate a national agency or national agencies. In cases where there is more than one national agency, Member States shall establish an appropriate mechanism for the coordinated management of the implementation of the Programme at national level, particularly with a view to ensuring coherent and cost-efficient implementation of the Programme and effective contact with the Commission in this respect, and to facilitating the possible transfer of funds between agencies, thereby allowing for flexibility and better use of funds allocated to Member States. Without prejudice to Article 29(3), each Member State shall determine how it organises the relationship between its national authority and the national agency, including tasks such as the establishment of the national agency's annual work programme.

The national authority shall provide the Commission with an appropriate ex-ante compliance assessment that the national agency complies with points (c)(v) and (vi) of Article 58(1) and Article 60(1), (2) and (3) of Regulation (EU, Euratom) No 966/2012, and Article 38 of Commission Delegated Regulation (EU) No 1268/2012⁽¹⁾, as well as with the Union requirements for internal control standards for national agencies and rules for the management of Programme funds for grant support.

5. The national authority shall designate an independent audit body as referred to in Article 30.

6. The national authority shall base its ex-ante compliance assessment on its own controls and audits, and/or on controls and audits undertaken by the independent audit body referred to in Article 30.

7. Where the national agency designated for the Programme is the same as the national agency designated for the predecessor Lifelong Learning or Youth in Action programmes, the scope of the controls and audits for the ex-ante compliance assessment may be limited to the requirements that are new and specific to the Programme.

8. The national authority shall monitor and supervise the management of the Programme at national level. It shall inform and consult the Commission in due time prior to taking any decision that may have a significant impact on the management of the Programme, in particular regarding its national agency.

9. The national authority shall provide adequate co-financing for the operations of its national agency to ensure that the Programme is managed in compliance with the applicable Union rules.

10. In the event that the Commission rejects the designation of the national agency based on its evaluation of the ex-ante compliance assessment, the national authority shall ensure that the necessary remedial steps are taken to enable the national agency to comply with the minimum requirements set by the Commission, or shall designate another body as national agency.

11. Based on the national agency's yearly management declaration, the independent audit opinion thereon and the Commission's analysis of the national agency's compliance and performance, the national authority shall provide the Commission, by 31 October of each year, with information concerning its monitoring and supervision activities in relation to the Programme.

12. The national authority shall take responsibility for the proper management of the Union funds transferred by the Commission to the national agency by way of grant support to be awarded under the Programme.

13. In the event of any irregularity, negligence or fraud attributable to the national agency, or any serious shortcomings or underperformance on the part of the national agency, where this gives rise to claims by the Commission against the national agency, the national authority shall be liable to reimburse to the Commission the funds not recovered.

14. In the circumstances described in paragraph 13, the national authority may, on its own initiative or upon request from the Commission, revoke the mandate of the national agency. Should the national authority wish to revoke that mandate for any other justified reason, it shall notify the Commission of the revocation at least six months before the envisaged date of termination of the mandate of the national agency. In such cases, the national authority and the Commission shall formally agree on specific and timed transition measures.

15. In the event of revocation, the national authority shall carry out the necessary controls regarding the Union funds entrusted to the national agency whose mandate has been revoked, and shall ensure an unimpeded transfer to the new national agency of those funds and of all documents and management tools required for the management of the Programme. The national authority shall provide the national agency whose mandate has been revoked with the necessary financial support to continue to meet its contractual obligations vis-à-vis the beneficiaries of the Programme and the Commission pending the transfer of those obligations to a new national agency.

16. If so requested by the Commission, the national authority shall designate the institutions or organisations, or the types of such institutions and organisations, to be considered eligible to participate in specific Programme actions in their respective territories.

⁽¹⁾ Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

*Article 28***National agency**

1. The term 'national agency' refers to one or more national agencies in accordance with national law and practice.
2. The national agency shall:
 - (a) have legal personality or be part of an entity having legal personality, and be governed by the law of the Member State concerned; a ministry may not be designated as a national agency;
 - (b) have the adequate management capacity, staff and infrastructure to fulfil its tasks satisfactorily, ensuring efficient and effective management of the Programme and sound financial management of Union funds;
 - (c) have the operational and legal means to apply the administrative, contractual and financial management rules laid down at Union level;
 - (d) offer adequate financial guarantees, issued preferably by a public authority, corresponding to the level of Union funds it will be called upon to manage;
 - (e) be designated for the duration of the Programme.
3. The national agency shall be responsible for managing all stages of the project lifecycle of the following Programme actions, in conformity with points (c)(v) and (vi) of Article 58(1) of Regulation (EU, Euratom) No 966/2012 and with Article 44 of Delegated Regulation (EU) No 1268/2012:
 - (a) learning mobility of individuals, with the exception of mobility organised on the basis of joint or double/multiple degrees, large-scale volunteering projects and the Student Loan Guarantee Facility;
 - (b) strategic partnerships within the action 'cooperation for innovation and the exchange of good practices';
 - (c) the management of small-scale activities supporting the structured dialogue in the youth field within the action 'support for policy reform'.
4. By way of derogation from paragraph 3, the selection and award decisions for the strategic partnerships referred to in point (b) of paragraph 3 may be managed at Union level, if a decision to that effect is taken in accordance with the examination procedure referred to in Article 36(3) and only in specific cases where there are clear grounds for such centralisation.

5. The national agency shall issue grant support to beneficiaries either by way of a grant agreement or a grant decision, as specified by the Commission for the Programme action concerned.

6. The national agency shall report each year to the Commission and to its national authority in accordance with Article 60(5) of Regulation (EU, Euratom) No 966/2012. The national agency shall be in charge of implementing the observations issued by the Commission following its analysis of the yearly management declaration and of the independent audit opinion thereon.

7. The national agency may not without prior written authorisation from the national authority and the Commission delegate to a third party any task of Programme or budget implementation conferred on it. The national agency shall retain sole responsibility for any tasks delegated to a third party.

8. Where the mandate of a national agency is revoked, that national agency shall remain legally responsible for meeting its contractual obligations vis-à-vis the beneficiaries of the Programme and the Commission pending the transfer of those obligations to a new national agency.

9. The national agency shall be in charge of managing and winding up the financial agreements relating to the predecessor Lifelong Learning and Youth in Action programmes that are still open at the beginning of the Programme.

*Article 29***European Commission**

1. Within two months of receipt from the national authority of the ex-ante compliance assessment referred to in Article 27(4), the Commission shall accept, conditionally accept or reject the designation of the national agency. The Commission shall not enter into a contractual relationship with the national agency until it has accepted the ex-ante compliance assessment. In the event of conditional acceptance, the Commission may apply proportionate precautionary measures to its contractual relationship with the national agency.
2. Upon accepting the ex-ante compliance assessment by the national agency designated for the Programme, the Commission shall formalise the legal responsibilities with regard to the financial agreements relating to the predecessor Lifelong Learning and Youth in Action programmes which are still open at the start of the Programme.
3. In accordance with Article 27(4), the document governing the contractual relationship between the Commission and the national agency shall:
 - (a) stipulate the internal control standards for national agencies and the rules for the management of the Union funds for grant support by the national agencies;

(b) include the national agency work programme comprising the management tasks of the national agency to which Union support is provided;

(c) specify the reporting requirements for the national agency.

4. The Commission shall each year make the following Programme funds available to the national agency:

(a) funds for grant support in the Member State concerned for the actions of the Programme the management of which is entrusted to the national agency;

(b) a financial contribution in support of the Programme management tasks of the national agency. This shall be provided in the form of a flat-rate contribution to the operational costs of the national agency and shall be established on the basis of the amount of Union funds for grant support entrusted to the national agency.

5. The Commission shall set the requirements for the national agency work programme. The Commission shall not make Programme funds available to the national agency until the Commission has formally approved the national agency's work programme.

6. On the basis of the compliance requirements for national agencies referred to in Article 27(4), the Commission shall review the national management and control systems, in particular on the basis of the ex-ante compliance assessment provided to it by the national authority, the national agency's yearly management declaration and the opinion of the independent audit body thereon, taking due account of the yearly information provided by the national authority on its monitoring and supervision activities with regard to the Programme.

7. After assessing the yearly management declaration and the opinion of the independent audit body thereon, the Commission shall address its opinion and observations thereon to the national agency and the national authority.

8. In the event that the Commission cannot accept the yearly management declaration or the independent audit opinion thereon, or in the event of unsatisfactory implementation by the national agency of the Commission's observations, the Commission may implement any precautionary and corrective measures necessary to safeguard the Union's financial interests in accordance with Article 60(4) of Regulation (EU, Euratom) No 966/2012.

9. The Commission shall organise regular meetings with the network of national agencies in order to ensure coherent implementation of the Programme across all Programme countries.

Article 30

Independent audit body

1. The independent audit body shall issue an audit opinion on the yearly management declaration referred to in Article 60(5) of Regulation (EU, Euratom) No 966/2012.

2. The independent audit body shall:

(a) have the necessary professional competence to carry out public sector audits;

(b) ensure that its audits take account of internationally accepted audit standards;

(c) not be in a position of conflict of interest with regard to the legal entity of which the national agency forms part. In particular, it shall be independent, in terms of its functions, of the legal entity of which the national agency forms part.

3. The independent audit body shall give the Commission and its representatives, as well as the Court of Auditors, full access to all documents and reports in support of the audit opinion that it issues on the national agency's yearly management declaration.

CHAPTER IX

Control system

Article 31

Principles of the control system

1. The Commission shall take appropriate measures ensuring that, when actions financed under this Regulation are implemented, the financial interests of the Union are protected by the application of measures to prevent fraud, corruption and any other illegal activities, by effective controls and, if irregularities are detected, by the recovery of the amounts wrongly paid and, where appropriate, by effective, proportionate and dissuasive penalties.

2. The Commission shall be responsible for the supervisory controls with regard to the Programme actions and activities managed by the national agencies. It shall set the minimum requirements for the controls by the national agency and the independent audit body.

3. The national agency shall be responsible for the primary controls of grant beneficiaries for the Programme actions and activities referred to in Article 28(3). Those controls shall give reasonable assurance that the grants awarded are used as intended and in compliance with the applicable Union rules.

4. With regard to the Programme funds transferred to the national agencies, the Commission shall ensure proper coordination of its controls with the national authorities and the

national agencies, on the basis of the single audit principle and following a risk-based analysis. This provision shall not apply to investigations carried out by the European Anti-Fraud Office (OLAF).

Article 32

Protection of the financial interests of the Union

1. The Commission or its representatives and the Court of Auditors shall have the power to conduct audits, on the basis of documents and on the spot, in relation to all grant beneficiaries, contractors, subcontractors and other third parties who have received Union funds. They may also conduct audits and carry out controls in relation to the national agencies.

2. OLAF may carry out on-the-spot controls and inspections of economic operators concerned directly or indirectly by such funding in accordance with the procedure laid down in Council Regulation (Euratom, EC) No 2185/96 ⁽¹⁾, with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract concerning Union funding.

3. Without prejudice to paragraphs 1 and 2, cooperation agreements with third countries and international organisations, and grant agreements, grant decisions and contracts resulting from the implementation of this Regulation, shall expressly empower the Commission, the Court of Auditors and OLAF to conduct such audits and carry out on-the-spot controls and inspections.

CHAPTER X

Delegation of powers and implementing provisions

Article 33

Delegation of powers to the Commission

In order to place the management of tasks at the most appropriate level, the Commission shall be empowered to adopt delegated acts in accordance with Article 34 concerning the amendment of Article 28(3), but only in respect of providing for additional actions to be managed by the national agencies.

Article 34

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 33 shall be conferred on the Commission for the duration of the Programme.

⁽¹⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

3. The delegation of power referred to in Article 33 may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Article 33 shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 35

Implementation of the Programme

In order to implement the Programme, the Commission shall adopt annual work programmes by way of implementing acts in accordance with the examination procedure referred to in Article 36(3). Each annual work programme shall ensure that the general and specific objectives set out in Articles 4, 5, 11 and 16 are implemented annually in a consistent manner and shall outline the expected results, the method of implementation and its total amount. The annual work programmes shall also contain a description of the actions to be financed, an indication of the amount allocated to each action and of the distribution of funds between the Member States for the actions to be managed through the national agencies, and an indicative implementation timetable. They shall include, in the case of grants, the maximum rate of co-financing, which shall take into account the specificities of the target groups, in particular their co-financing capacity and the possibilities of attracting funding from third parties. In particular, for actions targeting organisations with limited financial capacities, the rate of co-financing shall be set at least at 50 %.

Article 36

Committee procedure

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

2. The committee may meet in specific configurations to deal with sectoral issues. Where appropriate, in accordance with its rules of procedure and on an ad hoc basis, external experts, including representatives of the social partners, may be invited to participate in its meetings as observers.

3. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

CHAPTER XI

Final provisions

Article 37

Repeal and transitional provisions

1. Decisions No 1719/2006/EC, No 1720/2006/EC and No 1298/2008/EC shall be repealed with effect from 1 January 2014.

2. Actions initiated on or before 31 December 2013 on the basis of Decisions No 1719/2006/EC, No 1720/2006/EC and No 1298/2008/EC shall be administered, where relevant, in conformity with the provisions of this Regulation.

3. Member States shall ensure at national level the unimpeded transition between the actions carried out in the context of the previous programmes in the fields of lifelong learning, youth and international cooperation in higher education and those to be implemented under the Programme.

Article 38

Entry into force

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

ANNEX I

INDICATORS FOR THE EVALUATION OF THE PROGRAMME

The Programme will be monitored closely on the basis of a set of indicators intended to measure the extent to which the general and specific objectives of the Programme have been achieved and with a view to minimising administrative burdens and costs. To that end, data will be collected as regards the following set of key indicators:

Europe 2020 headline education target	The percentage of 18-24 year-olds with only lower-secondary education who are not enrolled in education or training
	The percentage of 30-34 year-olds with completed tertiary or equivalent education
Mobility benchmark, in line with the Council conclusions on a benchmark for learning mobility	The percentage of higher education graduates who have had a period of higher education-related study or training (including work placements) abroad
	The percentage of 18-34 year-olds with an initial vocational education and training qualification who have had an initial vocational education and training-related study or training period (including work placements) abroad
Quantitative (general)	The number of staff supported by the Programme, by country and by sector
	The number of participants with special needs or fewer opportunities
	The number and type of organisations and projects, by country and by action
Education and training	The number of pupils, students and trainees participating in the Programme, by country, sector, action and gender
	The number of higher education students receiving support to study in a partner country, as well as the number of students from a partner country coming to study in a Programme country
	The number of partner country higher education institutions involved in mobility and cooperation actions
	The number of users of Euroguidance
	The percentage of participants who have received a certificate, diploma or other kind of formal recognition of their participation in the Programme
	The percentage of participants declaring that they have increased their key competences
	The percentage of participants in long-term mobility declaring that they have increased their language skills
Jean Monnet	The number of students receiving training through Jean Monnet activities
Youth	The number of young people engaged in mobility actions supported by the Programme, by country, action and gender
	The number of youth organisations from both Programme countries and partner countries involved in international mobility and cooperation actions
	The number of users of the Eurodesk network
	The percentage of participants who have received a certificate – for example a Youthpass –, diploma or other kind of formal recognition of their participation in the Programme

	The percentage of participants declaring that they have increased their key competences
	The percentage of participants in voluntary activities declaring that they have increased their language skills
Sport	Size of membership of sport organisations applying for, and taking part in, the Programme, by country
	The percentage of participants who have used the results of cross-border projects to: (a) combat threats to sport; (b) improve good governance and dual careers; (c) enhance social inclusion, equal opportunities and participation rates

ANNEX II

TECHNICAL INFORMATION CONCERNING THE STUDENT LOAN GUARANTEE FACILITY

1. Selection of financial intermediaries

Following a call for expressions of interest, financial intermediaries shall be selected in conformity with best market practice, having regard to, inter alia:

- (a) the volume of financing to be made available to students;
- (b) the most favourable possible terms offered to students, subject to compliance with the minimum standards of lending as set out in paragraph 2;
- (c) access to finance by all residents of Programme countries as referred to in Article 24(1);
- (d) fraud prevention measures; and
- (e) adherence to Directive 2008/48/EC of the European Parliament and of the Council ⁽¹⁾.

2. Protection for borrowers

The following safeguards are the minimum terms which must be provided by financial intermediaries wishing to provide student loans guaranteed by the Student Loan Guarantee Facility:

- (a) no collateral or parental guarantee shall be requested;
- (b) loans shall be granted on a non-discriminatory basis;
- (c) as part of the assessment process, the financial intermediary shall consider the student's risk of over-indebtedness, taking into account levels of accrued debt and any judicial decision relating to an unpaid debt; and
- (d) repayment shall be based upon a hybrid model combining 'mortgage-based' standardised payments with social safeguards, in particular:
 - (i) an interest rate that is significantly lower than the market rate;
 - (ii) an initial grace period before the commencement of repayments, lasting a minimum of 12 months after the end of the study programme or, where national law does not provide for such delays, a provision whereby nominal repayments are to be made during that 12-month period;
 - (iii) a provision for a 'repayment holiday' of a minimum duration of 12 months over the lifetime of the loan, which can be invoked at the graduate's request, or, where national law does not provide for such delays, a provision whereby nominal repayments are to be made during that 12-month period;
 - (iv) an option to defer the payment of interest during the study period;
 - (v) insurance against death or disability; and
 - (vi) no penalties for early total or partial repayment.

Financial intermediaries may offer income-contingent repayments, as well as improved terms such as longer grace periods, longer 'repayment holidays' or later maturity, to take into account specific needs of graduates, such as those who subsequently pursue doctoral studies, or to allow graduates more time in which to find employment. The provision of such improved terms shall be taken into consideration in the procedure for the selection of financial intermediaries.

3. Monitoring and evaluation

The Student Loan Guarantee Facility shall be subject to monitoring and evaluation, as referred to in Article 21 of this Regulation, and on the basis of Article 140(8) of Regulation (EU, Euratom) No 966/2012.

⁽¹⁾ Directive 2008/48/EC of the European Parliament and of the Council of 23 April 2008 on credit agreements for consumers and repealing Council Directive 87/102/EEC (OJ L 133, 22.5.2008, p. 66).

As part of this process, the Commission shall report on the effects of the Student Loan Guarantee Facility on beneficiaries and on higher education systems. The Commission's report shall include, inter alia, data on, as well as proposed measures to deal with any areas of concern with regard to:

- (a) the number of students in receipt of loans backed by the Student Loan Guarantee Facility, including data on their completion rates;
- (b) the volume of lending contracted by financial intermediaries;
- (c) the level of interest rates;
- (d) outstanding debt and default levels, including any measures taken by financial intermediaries against those who default on their loans;
- (e) fraud prevention measures taken by financial intermediaries;
- (f) the profile of students supported, including their socio-economic background, subject of study, country of origin and country of destination, in accordance with national data protection legislation;
- (g) geographical balance of uptake; and
- (h) geographical coverage of financial intermediaries.

Notwithstanding the powers conferred on the European Parliament and the Council by Article 140(9) of Regulation (EU, Euratom) No 966/2012, the Commission shall consider proposing appropriate regulatory changes, including legislative changes, if the predicted market uptake or the participation of financial intermediaries is not satisfactory.

4. Budget

The budgetary allocation shall cover the full cost of the Student Loan Guarantee Facility, including payment obligations towards participating financial intermediaries calling upon the partial guarantees and management fees for the EIF.

The budget assigned to the Student Loan Guarantee Facility, as referred to in point (c) of Article 18(2), shall be no more than 3,5 % of the total budget for the Programme.

5. Visibility and awareness-raising

Each participating financial intermediary shall contribute to the promotion of the Student Loan Guarantee Facility by providing information to prospective students. To that end, the Commission shall, inter alia, provide national agencies in Programme countries with the necessary information to enable them to act as conduits for information concerning the Student Loan Guarantee Facility.

**REGULATION (EU) No 1289/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

amending Council Regulation (EC) No 539/2001 listing the third countries whose nationals must be in possession of visas when crossing the external borders and those whose nationals are exempt from that requirement

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular point (a) of Article 77(2) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Acting in accordance with the ordinary legislative procedure ⁽¹⁾,

Whereas:

- (1) The reciprocity mechanism to be implemented if a third country listed in Annex II to Council Regulation (EC) No 539/2001 ⁽²⁾ applies a visa requirement for nationals of at least one Member State needs to be adapted in the light of the entry into force of the Treaty of Lisbon and of the case-law of the Court of Justice of the European Union on secondary legal bases. In addition, that mechanism needs to be adapted to provide for a Union response as an act of solidarity, if a third country listed in Annex II to Regulation (EC) No 539/2001 applies a visa requirement for nationals of at least one Member State.
- (2) Upon receipt of a notification from a Member State that a third country listed in Annex II to Regulation (EC) No 539/2001 applies a visa requirement for nationals of that Member State, all Member States should react in common, thus providing a Union response to a situation which affects the Union as a whole and subjects its citizens to differing treatment.
- (3) Full visa reciprocity is an objective which the Union should pursue in a proactive manner in its relations with third countries, thus contributing to improving the credibility and consistency of the Union's external policy.
- (4) This Regulation should establish a mechanism for the temporary suspension of the exemption from the visa

requirement for a third country listed in Annex II to Regulation (EC) No 539/2001 ("the suspension mechanism") in an emergency situation, where an urgent response is needed in order to resolve the difficulties faced by at least one Member State, and taking account of the overall impact of the emergency situation on the Union as a whole.

- (5) For the purposes of the suspension mechanism, a substantial and sudden increase indicates an increase exceeding a threshold of 50 %. It may also indicate a lower increase if the Commission deems it applicable in the particular case notified by the Member State concerned.
- (6) For the purposes of the suspension mechanism, a low recognition rate indicates a recognition rate of asylum applications of around 3 or 4 %. It may also indicate a higher recognition rate if the Commission deems it applicable in the particular case notified by the Member State concerned.
- (7) It is necessary to avoid and counter any abuse resulting from exemption from the visa requirement for short-stay visits for nationals of a third country where they pose a threat to the public policy (*ordre public*) and internal security of the Member State concerned.
- (8) This Regulation should provide a legal basis for the visa requirement or for the exemption from that requirement for holders of travel documents issued by certain entities recognised by the Member State concerned as subjects of international law which are not intergovernmental international organisations.
- (9) As the rules applicable for refugees and stateless persons introduced by Council Regulation (EC) No 1932/2006 ⁽³⁾, do not apply to such persons when they are residing in the United Kingdom or Ireland, it is necessary to clarify the situation concerning the visa requirement for certain refugees and stateless persons who reside in the United Kingdom or in Ireland. This Regulation should leave Member States free to decide on the exemption from the visa requirement for that category of persons in compliance with their international obligations. The Member States should notify such decisions to the Commission.

⁽¹⁾ Position of the European Parliament of 12 September 2013 (not yet published in the Official Journal) and decision of the Council of 5 December 2013.

⁽²⁾ Council Regulation (EC) No 539/2001 of 15 March 2001 listing the third countries whose nationals must be in possession of visas when crossing the external borders and those whose nationals are exempt from that requirement (OJ L 81, 21.3.2001, p. 1).

⁽³⁾ Council Regulation (EC) No 1932/2006 of 21 December 2006 amending Regulation (EC) No 539/2001 listing the third countries whose nationals must be in possession of visas when crossing the external borders and those whose nationals are exempt from that requirement (OJ L 405, 30.12.2006, p. 23).

- (10) Regulation (EC) No 539/2001 should be without prejudice to application of international agreements concluded by the European Community before the entry into force of that Regulation which imply the need to derogate from the common visa rules, while taking into account the case-law of the Court of Justice of the European Union.
- (11) In order to ensure the adequate involvement of the European Parliament and of the Council in the second phase of application of the reciprocity mechanism, given the particularly sensitive political nature of the suspension of the exemption from the visa requirement for all the nationals of a third country listed in Annex II to Regulation (EC) No 539/2001 and its horizontal implications for the Member States, the Schengen associated countries and the Union itself, in particular for their external relations and for the overall functioning of the Schengen area, the power to adopt acts in accordance with Article 290 of the Treaty of the Functioning of the European Union should be delegated to the Commission in respect of certain elements of the reciprocity mechanism. Conferring such power on the Commission takes into account the need for political discussion on the Union policy on visas in the Schengen area. It reflects also the need to ensure adequate transparency and legal certainty in the application of the reciprocity mechanism to all the nationals of the third country concerned, in particular through the corresponding temporary amendment of Annex II to Regulation (EC) No 539/2001. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of the relevant documents to the European Parliament and to the Council.
- (12) In order to ensure the efficient application of the suspension mechanism and of certain provisions of the reciprocity mechanism and in particular in order to allow for all relevant factors and the possible implications of the application of those mechanisms to be adequately taken into account, implementing powers should be conferred on the Commission with regard to the determination of the categories of nationals of the third country concerned who should be subject to a temporary suspension of the exemption from the visa requirement within the framework of the reciprocity mechanism, and of the corresponding duration of that suspension, as well as the powers to implement the suspension mechanism. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council⁽¹⁾. The examination procedure should be used for the adoption of such implementing acts.
- (13) As regards Iceland and Norway, this Regulation constitutes a development of the provisions of the
- Schengen *acquis* within the meaning of the Agreement concluded by the Council of the European Union and the Republic of Iceland and the Kingdom of Norway concerning the latter's association with the implementation, application and development of the Schengen *acquis*⁽²⁾ which fall within the area referred to in Article 1, point (B), of Council Decision 1999/437/EC⁽³⁾.
- (14) As regards Switzerland, this Regulation constitutes a development of the provisions of the Schengen *acquis* within the meaning of the Agreement between the European Union, the European Community and the Swiss Confederation on the Swiss Confederation's association with the implementation, application and development of the Schengen *acquis*⁽⁴⁾ which fall within the area referred to in Article 1, point (B), of Decision 1999/437/EC read in conjunction with Article 3 of Council Decision 2008/146/EC⁽⁵⁾.
- (15) As regards Liechtenstein, this Regulation constitutes a development of the provisions of the Schengen *acquis* within the meaning of the Protocol between the European Union, the European Community, the Swiss Confederation and the Principality of Liechtenstein on the accession of the Principality of Liechtenstein to the Agreement between the European Union, the European Community and the Swiss Confederation on the Swiss Confederation's association with the implementation, application and development of the Schengen *acquis*⁽⁶⁾ which fall within the area referred to in Article 1, point (B), of Decision 1999/437/EC read in conjunction with Article 3 of Council Decision 2011/350/EU⁽⁷⁾.
- (16) This Regulation constitutes a development of the provisions of the Schengen *acquis* in which the United Kingdom does not take part, in accordance with Council Decision 2000/365/EC⁽⁸⁾; the United Kingdom is therefore not taking part in its adoption and is not bound by it or subject to its application.

⁽²⁾ OJ L 176, 10.7.1999, p. 36.

⁽³⁾ Council Decision 1999/437/EC of 17 May 1999 on certain arrangements for the application of the Agreement concluded by the Council of the European Union and the Republic of Iceland and the Kingdom of Norway concerning the association of those two States with the implementation, application and development of the Schengen *acquis* (OJ L 176, 10.7.1999, p. 31).

⁽⁴⁾ OJ L 53, 27.2.2008, p. 52.

⁽⁵⁾ Council Decision 2008/146/EC of 28 January 2008 on the conclusion, on behalf of the European Community, of the Agreement between the European Union, the European Community and the Swiss Confederation on the Swiss Confederation's association with the implementation, application and development of the Schengen *acquis* (OJ L 53, 27.2.2008, p. 1).

⁽⁶⁾ OJ L 160, 18.6.2011, p. 21.

⁽⁷⁾ Council Decision 2011/350/EU of 7 March 2011 on the conclusion, on behalf of the European Union, of the Protocol between the European Union, the European Community, the Swiss Confederation and the Principality of Liechtenstein on the accession of the Principality of Liechtenstein to the Agreement between the European Union, the European Community and the Swiss Confederation on the Swiss Confederation's association with the implementation, application and development of the Schengen *acquis*, relating to the abolition of checks at internal borders and movement of persons (OJ L 160, 18.6.2011, p. 19).

⁽⁸⁾ Council Decision 2000/365/EC of 29 May 2000 concerning the request of the United Kingdom of Great Britain and Northern Ireland to take part in some of the provisions of the Schengen *acquis* (OJ L 131, 1.6.2000, p. 43).

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

- (17) This Regulation constitutes a development of the provisions of the Schengen *acquis* in which Ireland does not take part, in accordance with Council Decision 2002/192/EC ⁽¹⁾; Ireland is therefore not taking part in its adoption and is not bound by it or subject to its application.
- (18) Regulation (EC) No 539/2001 should therefore be amended accordingly,

HAVE ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 539/2001 is hereby amended as follows:

(1) Article 1 is amended as follows:

(a) paragraph 4 is replaced by the following:

"4. Where a third country listed in Annex II applies a visa requirement for nationals of at least one Member State, the following provisions shall apply:

(a) within 30 days of the implementation by the third country of the visa requirement or, in cases where the visa requirement existing on 9 January 2014 is maintained, within 30 days of that date, the Member State concerned shall notify the European Parliament, the Council and the Commission thereof in writing.

That notification:

- (i) shall specify the date of implementation of the visa requirement and the types of travel documents and visas concerned;
- (ii) shall include a detailed explanation of the preliminary measures that the Member State concerned has taken with a view to ensuring visa-free travel with the third country in question and all relevant information.

Information about that notification shall be published without delay by the Commission in the *Official Journal of the European Union*, including information on the date of implementation of the visa requirement and the types of travel documents and visas concerned.

If the third country decides to lift the visa requirement before the expiry of the deadline referred to in the first subparagraph of this point, the notification shall not be made or shall be withdrawn and the information shall not be published;

(b) the Commission shall, immediately following the date of the publication referred to in the third subparagraph of point (a) and in consultation with the Member State concerned, take steps with the authorities of the third country in question, in particular in the political, economic and commercial fields, in order to restore or introduce visa-free travel and shall inform the European Parliament and the Council of those steps without delay;

(c) if within 90 days of the date of the publication referred to in the third subparagraph of point (a) and despite all the steps taken in accordance with point (b), the third country has not lifted the visa requirement, the Member State concerned may request the Commission to suspend the exemption from the visa requirement for certain categories of nationals of that third country. Where a Member State makes such a request, it shall inform the European Parliament and the Council thereof;

(d) the Commission shall, when considering further steps in accordance with point (e), (f) or (h), take into account the outcome of the measures taken by the Member State concerned with a view to ensuring visa-free travel with the third country in question, the steps taken in accordance with point (b), and the consequences of the suspension of the exemption from the visa requirement for the external relations of the Union and its Member States with the third country in question;

(e) if the third country concerned has not lifted the visa requirement, the Commission shall, at the latest six months of the date of the publication referred to in the third subparagraph of point (a) and subsequently at intervals not exceeding six months within a total period which may not extend beyond the date on which the delegated act referred to in point (f) takes effect or is objected to:

(i) adopt, at the request of the Member State concerned or on its own initiative, an implementing act temporarily suspending the exemption from the visa requirement for certain categories of nationals of the third country concerned for a period of up to six months. That implementing act shall determine a date, within 90 days of its entry into force, on which the suspension of the exemption from the visa requirement is to take effect, taking into account the available resources in the consulates of the Member States. When adopting subsequent implementing acts, the Commission may extend the period of that suspension by further periods of up to six months and may modify the categories of nationals of the third country in question for which the exemption from the visa requirement is suspended.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 4a(2). Without prejudice to the application of Article 4, during the periods of suspension all the categories of

⁽¹⁾ Council Decision 2002/192/EC of 28 February 2002 concerning Ireland's request to take part in some of the provisions of the Schengen *acquis* (OJ L 64, 7.3.2002, p. 20).

nationals of the third country referred to in the implementing act shall be required to be in possession of a visa when crossing the external borders of the Member States; or

- (ii) submit to the committee referred to in Article 4a(1) a report assessing the situation and stating the reasons why it decided not to suspend the exemption from the visa requirement and inform the European Parliament and the Council thereof.

All relevant factors, such as those referred to in point (d), shall be taken into account in that report. The European Parliament and the Council may have a political discussion on the basis of that report;

- (f) if within 24 months of the date of the publication referred to in the third subparagraph of point (a), the third country concerned has not lifted the visa requirement, the Commission shall adopt a delegated act in accordance with Article 4b temporarily suspending the application of Annex II for a period of 12 months for the nationals of that third country. The delegated act shall determine a date, within 90 days of its entry into force, on which the suspension of the application of Annex II is to take effect, taking into account the available resources in the consulates of the Member States and shall amend Annex II accordingly. That amendment shall be made through inserting next to the name of the third country in question a footnote indicating that the exemption from the visa requirement is suspended with regard to that third country and specifying the period of that suspension.

As of the date when the suspension of the application of Annex II for the nationals of the third country concerned takes effect or when an objection to the delegated act is expressed pursuant to Article 4b(5), any implementing act adopted pursuant to point (e) concerning that third country shall expire.

Where the Commission submits a legislative proposal as referred to in point (h), the period of suspension referred to in the first subparagraph of this point shall be extended by six months. The footnote referred to in that subparagraph shall be amended accordingly.

Without prejudice to the application of Article 4, during the periods of that suspension the nationals of the third country concerned by the delegated act shall be required to be in possession of a visa when crossing the external borders of the Member States;

- (g) any subsequent notification made by another Member State pursuant to point (a) concerning the same third country during the period of application of measures adopted pursuant to point (e) or (f) with regard to that third country shall be merged

into the ongoing procedures without the deadlines or periods set out in those points being extended;

- (h) if within six months of the entry into force of the delegated act referred to in point (f) the third country in question has not lifted the visa requirement, the Commission may submit a legislative proposal for amending this Regulation in order to transfer the reference to the third country from Annex II to Annex I;
- (i) the procedures referred to in points (e), (f) and (h) shall not affect the right of the Commission to submit at any time a legislative proposal for amending this Regulation in order to transfer the reference to the third country concerned from Annex II to Annex I;
- (j) where the third country in question lifts the visa requirement, the Member State concerned shall immediately notify the European Parliament, the Council and the Commission thereof. The notification shall be published without delay by the Commission in the *Official Journal of the European Union*.

Any implementing or delegated act adopted pursuant to point (e) or (f) concerning the third country in question shall expire seven days after the publication referred to in the first subparagraph of this point. Where the third country in question has introduced a visa requirement for nationals of two or more Member States, the implementing or delegated act concerning that third country shall expire seven days after the publication of the notification concerning the last Member State whose nationals were subject to visa requirement by that third country. The footnote referred to in the first subparagraph of point (f) shall be deleted upon expiry of the delegated act concerned. The information on that expiry shall be published without delay by the Commission in the *Official Journal of the European Union*.

Where the third country in question lifts the visa requirement without the Member State concerned notifying it in accordance with the first subparagraph of this point, the Commission shall on its own initiative proceed without delay with the publication referred to in that subparagraph, and the second subparagraph of this point shall apply.";

- (b) paragraph 5 is deleted;

- (2) the following Articles are inserted:

"Article 1a

1. By way of derogation from Article 1(2), the exemption from the visa requirement for nationals of a third country listed in Annex II shall be temporarily suspended in emergency situations, as a last resort, in accordance with this Article.

2. A Member State may notify the Commission if it is confronted, over a six-month period, in comparison with the same period in the previous year or with the last six months prior to the implementation of the exemption from the visa requirement for nationals of a third country listed in Annex II, with one or more of the following circumstances leading to an emergency situation which it is unable to remedy on its own, namely a substantial and sudden increase in the number of:

- (a) nationals of that third country found to be staying in the Member State's territory without a right thereto;
- (b) asylum applications from the nationals of that third country for which the recognition rate is low, where such an increase is leading to specific pressures on the Member State's asylum system;
- (c) rejected readmission applications submitted by the Member State to that third country for its own nationals.

The comparison with the six-month period prior to the implementation of the exemption from the visa requirement as referred to in the first subparagraph shall only be applicable during a period of seven years from the date of implementation of the exemption from the visa requirement for nationals of that third country.

The notification referred to in the first subparagraph shall state the reasons on which it is based and shall include relevant data and statistics as well as a detailed explanation of the preliminary measures that the Member State concerned has taken with a view to remedying the situation. The Commission shall inform the European Parliament and the Council immediately of such notification.

3. The Commission shall examine any notification made pursuant to paragraph 2, taking into account:

- (a) whether any of the situations described in paragraph 2 are present;
- (b) the number of Member States affected by any of the situations described in paragraph 2;
- (c) the overall impact of the increases referred to in paragraph 2 on the migratory situation in the Union as it appears from the data provided by the Member States;
- (d) the reports prepared by the European Agency for the Management of Operational Cooperation at the External Borders of the Member States of the European Union,

the European Asylum Support Office or the European Police Office (Europol) if circumstances so require in the specific case notified;

- (e) the overall question of public policy and internal security, in consultations with the Member State concerned.

The Commission shall inform the European Parliament and the Council of the results of its examination.

4. Where the Commission, on the basis of the examination referred to in paragraph 3, and taking into account the consequences of a suspension of the exemption from the visa requirement for the external relations of the Union and its Member States with the third country concerned, while working in close cooperation with that third country to find alternative long-term solutions, decides that action is needed, it shall, within three months of receipt of the notification referred to in paragraph 2, adopt an implementing act temporarily suspending the exemption from the visa requirement for the nationals of the third country concerned for a period of six months. That implementing act shall be adopted in accordance with the examination procedure referred to in Article 4a(2). The implementing act shall determine the date on which the suspension of the exemption from the visa requirement is to take effect.

Without prejudice to the application of Article 4, during the periods of that suspension the nationals of the third country concerned by the implementing act shall be required to be in possession of a visa when crossing the external borders of the Member States.

5. Before the end of the period of validity of the implementing act adopted pursuant to paragraph 4, the Commission, in cooperation with the Member State concerned, shall submit a report to the European Parliament and to the Council. The report may be accompanied by a legislative proposal for amending this Regulation in order to transfer the reference to the third country concerned from Annex II to Annex I.

6. Where the Commission has submitted a legislative proposal pursuant to paragraph 5, it may extend the validity of the implementing act adopted pursuant to paragraph 4 by a period not exceeding 12 months. The decision to extend the validity of the implementing act shall be adopted in accordance with the examination procedure referred to in Article 4a(2).

Article 1b

By 10 January 2018, the Commission shall submit a report to the European Parliament and to the Council assessing the effectiveness of the reciprocity mechanism provided for in Article 1(4) and the suspension mechanism provided for in Article 1a and shall, if necessary, submit a legislative proposal for amending this Regulation. The European Parliament and the Council shall act on such a proposal by the ordinary legislative procedure.";

(3) Article 4 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. A Member State may provide for exceptions from the visa requirement provided for by Article 1(1) or from the exemption from the visa requirement provided for by Article 1(2) as regards:

- (a) holders of diplomatic passports, service/official passports or special passports;
- (b) civilian air and sea crew members in the performance of their duties;
- (c) civilian sea crew members, when they go ashore, who hold a seafarer's identity document issued in accordance with the International Labour Organisation Conventions No 108 of 13 May 1958 or No 185 of 16 June 2003 or the International Maritime Organisation Convention on Facilitation of International Maritime Traffic of 9 April 1965;
- (d) crew and members of emergency or rescue missions in the event of disaster or accident;
- (e) civilian crew of ships navigating in international inland waters;
- (f) holders of travel documents issued by intergovernmental international organisations of which at least one Member State is member, or by other entities recognised by the Member State concerned as subjects of international law, to officials of those organisations or entities.";

(b) in paragraph 2 the following point is added:

"(d) without prejudice to the requirements stemming from the European Agreement on the Abolition of Visas for Refugees signed at Strasbourg on 20 April 1959, recognised refugees and stateless persons and other persons who do not hold the nationality of any country who reside in the United Kingdom or in Ireland and are holders of a travel document issued by the United Kingdom or Ireland, which is recognised by the Member State concerned.";

(4) the following Articles are inserted:

"Article 4a

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011 of the European Parliament and of the Council (*).

2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

3. Where the committee delivers no opinion, the Commission shall not adopt the draft implementing act and the third subparagraph of Article 5(4) of Regulation (EU) No 182/2011 shall apply.

Article 4b

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in point (f) of Article 1(4) shall be conferred on the Commission for a period of five years from 9 January 2014. The Commission shall draw up a report in respect of the delegation of power not later than nine months before the end of the five-year period. The delegation of power shall be tacitly extended for periods of an identical duration, unless the European Parliament or the Council opposes such extension not later than three months before the end of each period.

3. The delegation of power referred to in point (f) of Article 1(4) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to point (f) of Article 1(4) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of four months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

(*) Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13)."

Article 2

Article 1a of Regulation (EC) No 539/2001 as amended by this Regulation, and in particular the provisions of the second subparagraph of paragraph 2 thereof, shall apply also to third countries with regard to whose nationals the exemption from the visa requirement was introduced before 9 January 2014.

Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in the Member States in accordance with the Treaties.

**REGULATION (EU) No 1290/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

laying down the rules for participation and dissemination in "Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020)" and repealing Regulation (EC) No 1906/2006

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 173, 183, and the second paragraph of Article 188 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the Court of Auditors ⁽¹⁾,

Having regard to the opinion of the European Economic and Social Committee ⁽²⁾,

Acting in accordance with the ordinary legislative procedure ⁽³⁾,

Whereas:

(1) "Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020)" ("Horizon 2020") is established by Regulation (EU) No 1291/2013 of the European Parliament and of the Council ⁽⁴⁾. That Regulation needs to be complemented by rules for participation in indirect actions undertaken under Horizon 2020, and for exploitation and dissemination of the results of those actions.

(2) Horizon 2020 should be implemented with a view to contributing directly to creating industrial leadership, growth and employment as well as citizens' welfare in Europe, and should reflect the strategic vision of the Commission Communication of 6 October 2010 entitled "Europe 2020 Flagship Initiative Innovation", in which the Commission commits itself to radically simplify access for participants.

⁽¹⁾ OJ C 318, 20.10.2012, p. 1.

⁽²⁾ OJ C 181, 21.6.2012, p. 111.

⁽³⁾ Position of the European Parliament of 21 November 2013 (not yet published in the Official Journal)

⁽⁴⁾ Regulation (EU) No 1291/2013 of the European Parliament and of the Council of 11 December 2013 establishing Horizon 2020 – The Framework Programme for Research and Innovation (2014 to 2020) and repealing Decision 1982/2006/EC (See page 104 of this Official Journal).

(3) Horizon 2020 should support the achievement and functioning of the European Research Area in which researchers, scientific knowledge and technology circulate freely, by strengthening cooperation both between the Union and the Member States, and among the Member States, in particular through the application of a coherent set of rules.

(4) The rules for participation, exploitation and dissemination in Horizon 2020 laid down in this Regulation ("the Rules") should adequately reflect the recommendations of the European Parliament in its resolution of 11 November 2010 on simplifying the implementation of the Research Framework Programmes ⁽⁵⁾, and of the Council with regard to the simplification of the administrative and financial requirements of the research framework programmes. The Rules should provide continuity to the simplification measures already implemented under Decision No 1982/2006/EC of the European Parliament and of the Council ⁽⁶⁾. They should take up the recommendations made in the final report of the Expert Group entitled 'Interim Evaluation of the 7th Framework Programme' of 12 November 2010 and they should enable further progress in reducing the administrative burden for participants and the complexity of the financial provisions in order to facilitate participation and reduce the number of financial errors. The Rules should also duly reflect the concerns raised and recommendations made by the research community resulting from the debate initiated by the Commission Communication of 29 April 2010 entitled "Simplifying the implementation of the research framework programmes", and the subsequent Green Paper of 9 February 2011 entitled "From Challenges to Opportunities: Towards a Common Strategic Framework for EU Research and Innovation funding".

(5) The interim evaluation of Horizon 2020 should include an evaluation of the new funding model, including its impact on funding levels, on participation in Horizon 2020 and on the attractiveness of Horizon 2020.

(6) The Commission or the relevant funding body should ensure that guidance and information is made available to all potential participants at the time of publication of the call for proposals.

⁽⁵⁾ OJ C 74E, 13.3.2012, p. 34.

⁽⁶⁾ Decision No 1982/2006/EC of the European Parliament and of the Council of 18 December 2006 concerning the Seventh Framework Programme of the European Community for research, technological development and demonstration activities (2007-2013) (OJ L 412, 30.12.2006, p. 1).

- (7) In order to ensure coherence with other Union funding programmes, Horizon 2020 should be implemented in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council ⁽¹⁾, and Commission Delegated Regulation (EU) 1268/2012 ⁽²⁾, taking due account of the specific nature of research and innovation activities.
- (8) An integrated approach should be ensured by bringing together activities covered by the Seventh Framework Programme for research, technological development and demonstration activities (2007-2013) adopted by Decision No 1982/2006/EC, the Competitiveness and Innovation Framework Programme established by Decision No 1639/2006/EC of the European Parliament and of the Council ⁽³⁾ and the European Institute of Innovation and Technology (the EIT) established by Regulation (EC) No 294/2008 of the European Parliament and of the Council ⁽⁴⁾ to make participation easier, create a more coherent set of instruments and increase the scientific and economic impact, while avoiding duplication and fragmentation. Common rules should apply in order to ensure a coherent framework which should facilitate participation in programmes receiving Union financial contributions from the budget of Horizon 2020, including participation in programmes managed by the EIT, joint undertakings or any other structures under Article 187 of the Treaty on the Functioning of the European Union (TFEU), and participation in programmes undertaken by Member States pursuant to Article 185 TFEU.
- (9) Actions which fall within the scope of this Regulation should respect fundamental rights and observe the principles acknowledged in particular by the Charter of Fundamental Rights of the European Union. Such actions should be in conformity with any legal obligation including international law and with any relevant Commission decisions such as the Commission notice of 28 June 2013 ⁽⁵⁾, as well as with ethical principles, which include avoiding any breach of research integrity.
- (10) In line with the objectives of international cooperation as set out in Articles 180 and 186 TFEU, the participation of legal entities established in third countries and of international organisations should be promoted. The implementation of the Rules should be in conformity with the measures adopted in accordance with Articles 75 and 215 TFEU and should be in compliance with international law. Moreover, the implementation of the Rules should duly take into account the conditions for the participation of Union entities in third countries' corresponding programmes.
- (11) The Rules should provide a coherent, comprehensive and transparent framework to ensure the most efficient implementation possible, taking into account the need for easy access by all participants through simplified procedures, in particular with regard to micro-, small-, and medium-sized enterprises (SMEs). The financial assistance from the Union could be provided in various forms.

However, flexibility to adopt specific rules should be ensured when justified by the specific needs of the respective actions. In order to take into account the specific operating needs as identified in the framework of the relevant basic act of the bodies set up under Article 187 TFEU, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure the simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.

- (12) In line with the principle of transparency and in addition to the publicity requirement set out in Regulation (EU, Euratom) No 966/2012 and in Regulation (EU) No 1268/2012, the Commission should publish open calls for proposals on the internet pages of Horizon 2020, through specific information channels, and should ensure their wide dissemination, including via national contact points and upon request in accessible formats, where practicable.
- (13) The selection and award criteria laid down in this Regulation should be applied in a transparent way and based on objective and measurable parameters, taking into account the overall aim of Horizon 2020 to achieve a well-functioning European Research Area.
- (14) In general, the period between the final date for the submission of complete proposals and the signing of grant agreements with applicants or notifying grant decisions to them should be shorter than the period provided for in Regulation (EU, Euratom) No 966/2012. In duly justified cases and for actions of the European Research Council a longer period should be allowed.

⁽¹⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

⁽²⁾ Commission Delegated Regulation (EU) No 1268/2012 of 29.10.2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

⁽³⁾ Decision No 1639/2006/EC of the European Parliament and of the Council of 24 October 2006 establishing a Competitiveness and Innovation Framework Programme (2007 to 2013) (OJ L 310, 9.11.2006, p. 15).

⁽⁴⁾ Regulation (EC) No 294/2008 of the European Parliament and of the Council of 11 March 2008 establishing the European Institute of Innovation and Technology (OJ L 97, 9.4.2008, p. 1).

⁽⁵⁾ OJ C 205, 19.7.2013, p. 9.

- (15) The Commission should continue its efforts to simplify the procedures in ways made possible by the improvement of IT systems, such as the further expansion of the portal for participants which should function as the single entry point from the moment of publication of the calls for proposals, through submission of proposals, until implementation of the action, with the aim of establishing a one-stop shop. The system may also provide feedback to applicants on the progress and the timeline of their applications.
- (16) The handling of confidential data and classified information should be governed by all relevant Union law, including the Institutions' internal rules, such as Commission Decision 2001/844/EC, ECSC, Euratom⁽¹⁾ which lays down the provisions on security of European Union classified information.
- (17) It is necessary to establish the minimum conditions for participation, both as a general rule and with regard to the specificities of the actions under Horizon 2020. In particular, rules should be laid down regarding the number of participants and their places of establishment. In the case of an action without the participation of an entity established in a Member State, the attainment of the objectives laid down in Articles 173 and 179 TFEU should be pursued.
- (18) Pursuant to Council Decision 2001/822/EC⁽²⁾, legal entities of overseas countries and territories are eligible to participate in Horizon 2020 subject to the specific conditions laid down in the latter.
- (19) The Commission should consider the timings of calls for proposals and requests for information taking into account, where possible, standard holiday periods.
- (20) In the case of unsuccessful proposals, the Commission should give feedback to the applicants concerned.
- (21) Clear and transparent mechanisms to develop calls for proposals on specific topics should enable a level playing field, increase the attractiveness of Horizon 2020 and increase participation.
- (22) The Commission should in all aspects of Horizon 2020 act in accordance with the principles of the European Code of Good Administrative Behaviour as set out in the annex to Commission Decision 2000/633/EC, ECSC, Euratom⁽³⁾.
- (23) It is appropriate to establish the terms and conditions for providing Union funding to participants in actions under Horizon 2020. In order to reduce the complexity of the existing funding rules, a simplified cost reimbursement system should be adopted with enhanced use of lump sums, flat rates and unit costs.
- (24) The reimbursement rates in this Regulation are referred to as maximums in order to comply with the non-profit requirement and the co-financing principle, and to allow participants to request a lower rate. In principle, the reimbursement rates should however be 100 % or 70 %.
- (25) The OECD definitions regarding Technological Readiness Level (TRL) should be taken into account in the classification of technological research, product development and demonstration activities.
- (26) Specific challenges in the area of research and innovation should be addressed through new forms of funding such as prizes, pre-commercial procurement, public procurement of innovative solutions, the SME Instrument and the Fast Track to Innovation actions, which require specific rules.
- (27) In order to maintain a level playing field for all undertakings active in the internal market, funding provided by Horizon 2020 should be designed in accordance with State aid rules so as to ensure the effectiveness of public spending and prevent market distortions such as crowding-out of private funding, the creation of ineffective market structures or the preservation of inefficient firms. Care should be taken to ensure that funding of innovation actions neither distorts competition nor leads to market interference without sufficient cause.
- (28) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, ensuring an appropriate balance between trust and control.
- (29) In accordance with Regulation (EU, Euratom) No 966/2012, the Rules should provide the basis for a wider acceptance of the usual cost accounting practices of the beneficiaries.

⁽¹⁾ 2001/844/EC, ECSC, Euratom: Commission Decision of 29 November 2001 amending its internal Rules of Procedure (OJ L 317, 3.12.2001).

⁽²⁾ Council Decision 2001/822/EC of 27 November 2001 on the association of the overseas countries and territories with the European Community ('Overseas Association Decision') (OJ L 314, 30.11.2001, p. 1).

⁽³⁾ 2000/633/EC, ECSC, Euratom: Commission Decision of 17 October 2000 amending its Rules of Procedure (OJ L 267, 20.10.2000, p. 63).

- (30) The participant Guarantee Fund set up under Regulation (EC) No 1906/2006 of the European Parliament and of the Council ⁽¹⁾ and managed by the Commission has proved to be an important safeguard mechanism which mitigates the risks associated with the amounts due and not reimbursed by defaulting participants. Therefore, a new participant Guarantee Fund ("the Fund") should be established. In order to ensure more efficient management and better coverage of participants' risk, the Fund should cover actions under the programme set up under Decision No 1982/2006/EC, under the programme set up by Council Decision 2006/970/Euratom ⁽²⁾, under the programme set up by Council Decision 2012/93/Euratom ⁽³⁾ as well as actions under Horizon 2020 and Regulation (Euratom) No 1314/2013 of the Council ⁽⁴⁾. Programmes managed by entities other than Union funding bodies should not be covered by the Fund.
- (31) In order to enhance transparency, the names of experts that have assisted the Commission or relevant funding bodies in the application of this Regulation should be published. Where the publication of the name would endanger the security or integrity of the expert or would unduly prejudice his or her privacy, the Commission or funding bodies should be able to refrain from the publication of such names.
- (32) Personal data relating to the experts should be processed in accordance with Regulation (EC) No 45/2001 of the European Parliament and of the Council ⁽⁵⁾.
- (33) Rules governing the exploitation and dissemination of results should be laid down to ensure that participants protect, exploit and disseminate those results as appropriate, and to provide for the possibility of additional exploitation conditions in the European strategic interest. Participants that have received Union funding, and that plan to exploit the results generated with such funding primarily in third countries not associated with Horizon 2020, should indicate how the Union funding will benefit Europe's overall competitiveness (reciprocity principle), as set out in the grant agreement.
- (34) In the case of research with the potential for further development into a novel medical technology (such as drugs, vaccines and medical diagnostics), measures should be taken to ensure the immediate exploitation and dissemination of the results, where appropriate.
- (35) Despite the success of existing Union debt and equity financial instruments for research, development, innovation and growth, access to risk finance remains a key issue, in particular for innovative SMEs. In order to allow their most effective use, debt and equity financial instruments should be allowed to be combined with each other and with grants funded under the Union budget, including under Horizon 2020. Moreover, the Commission should, in particular, ensure continuity of the Risk-Sharing Finance Facility (RSFF) set up under Decision No 1982/2006/EC and the early stage part of the High-Growth and Innovative SME Facility (GIF1) set up under Decision No 1639/2006/EC within their succeeding debt and equity financial instruments under Horizon 2020, respectively the 'Union loan & guarantee service for Research and innovation' and the 'Union Equity Instruments for research and innovation'. In this context, revenues and repayments generated by any of those financial instruments should directly benefit the financial instruments set up under Horizon 2020.
- (36) The Commission should ensure sufficient complementarities between the SME instrument under Horizon 2020 and the financial instruments under Horizon 2020 and the COSME programme established under Regulation (EU) No 1287/2013 of the European Parliament and of the Council ⁽⁶⁾, as well as with schemes and instruments set up jointly with Member States, such as the Eurostars Joint Programme ⁽⁷⁾.
- (37) For reasons of legal certainty and clarity, Regulation (EC) No 1906/2006 should be repealed,
- ⁽¹⁾ Regulation No 1906/2006/EC of the European Parliament and of the Council of 18 December 2006 laying down the rules for the participation of undertakings, research centres and universities in actions under the Seventh Framework Programme and for the dissemination of research results (2007-2013) (OJ L 391, 30.12.2006, p. 1).
- ⁽²⁾ Council Decision 2006/970/Euratom of 18 December 2006 concerning the Seventh Framework Programme of the European Atomic Energy Community (Euratom) for nuclear research and training activities (2007 to 2011) (OJ L 400, 30.12.2006, p. 60).
- ⁽³⁾ 2012/93/Euratom: Council Decision of 19 December 2011 concerning the Framework Programme of the European Atomic Energy Community for nuclear research and training activities (2012 to 2013) (OJ L 47, 18.2.2012, p. 25).
- ⁽⁴⁾ Regulation (Euratom) No 1314/2013 of the Council on the Research and Training Programme of the European Atomic Energy Community (2014-2018) complementing Horizon 2020 - the Framework Programme for Research and Innovation (See page 948 of this Official Journal).
- ⁽⁵⁾ Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data (OJ L 8, 12.1.2001, p. 1).
- ⁽⁶⁾ Regulation (EU) No 1287/2013 of the European Parliament and of the Council of 11 December 2013 establishing a Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME) (2014 - 2020) and repealing Decision No 1639/2006/EC (See page 33 of this Official Journal).
- ⁽⁷⁾ Decision No 743/2008/EC of the European Parliament and of the Council of 9 July 2008 on the Community's participation in a research and development programme undertaken by several Member States aimed at supporting research and development performing small and medium-sized enterprises (OJ L 201, 30.7.2008, p. 58).

HAVE ADOPTED THIS REGULATION:

TITLE I

INTRODUCTORY PROVISIONS

Article 1

Subject matter and scope

1. This Regulation lays down specific rules for participation in indirect actions undertaken under Regulation (EU) No 1291/2013, including participation in indirect actions funded by funding bodies in accordance with Article 9(2) of that Regulation.

This Regulation also lays down the rules governing the exploitation and dissemination of results.

2. Subject to the specific rules laid down in this Regulation, the relevant rules of Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012 shall apply.

3. Regulation (EC) No 294/2008 or any basic act which entrusts budget implementation tasks to a funding body under Article 185 TFEU may establish rules which depart from those laid down in this Regulation. In order to take into account their specific operating needs and subject to the rules established in the relevant basic act, the Commission shall be empowered to adopt delegated acts in accordance with Article 56, with regard to funding bodies set up under Article 187 TFEU concerning:

- (a) the conditions for participation in calls for proposals issued by funding bodies established in the area of aeronautics with a view to reducing the minimum number of participants set out in Article 9(1);
- (b) the eligibility for funding as set out in Article 10, allowing funding bodies established in the area of bio-based industries and of innovative medicines to limit the eligibility for funding to specific types of participants;
- (c) the rules governing exploitation and dissemination of results, allowing funding bodies established in the area of innovative medicines to:
 - (i) extend the possibilities of transfer and licensing of results and background for affiliated entities, purchasers and any successor entity, in accordance

with the grant agreement and without the consent of other participants referred to in Article 44(1) and (2);

- (ii) allow for specific agreements for access rights to background for developing results for commercialisation or commercialising results themselves (direct exploitation) referred to in Article 48(2) to (4);

- (iii) complement the rules by introducing provisions on ownership and access to data, knowledge and information which are outside of the objectives of an action and which are not needed for implementing and exploiting the action (sideground) referred to in Article 41(2) and Articles 45 to 48;

- (iv) extend rules on exploitation to other purposes than implementing the action (research use) or developing results for commercialisation or commercialising results themselves (direct exploitation) referred to in Article 48;

- (v) set out specific criteria for allowing sub-licensing from one participant to another participant in the same action referred to in Article 46(2);

- (vi) extend, under the conditions defined in the consortium agreement referred to in Article 24(2), the access rights of participants, their affiliated entities and third parties as licensees to results or background for purposes other than implementing the action (research use) under appropriate conditions including financial terms, or developing results for commercialisation or commercialising results themselves (direct exploitation), as referred to in Articles 46 to 48;

- (vii) make access rights for direct exploitation conditional upon the agreement of the participants concerned, as referred to in Article 48;

- (viii) render optional the dissemination through scientific publication in the form of open access, as referred to in Article 43(2);

- (d) the funding of the actions, allowing funding bodies in the area of electronic components and systems to apply reimbursement rates different to those set out in Article 28(3) in cases where one or more Member States co-fund a participant or an action.

A funding body entrusted with budget implementation tasks under points (i) or (ii) of point (c) of Article 58(1) of Regulation (EU, Euratom) No 966/2012, may apply rules which depart from those laid down in this Regulation, subject to the consent of the Commission, if its specific operating needs so require. The Commission shall give its consent in such cases only if those rules are in compliance with the general principles established in this Regulation.

4. This Regulation shall not apply to direct actions carried out by the Joint Research Centre (JRC).

Article 2

Definitions

1. For the purposes of this Regulation, the following definitions apply:

- (1) 'access rights' means rights to use results or background under the terms and conditions laid down in accordance with this Regulation;
- (2) 'affiliated entity' means any legal entity that is under the direct or indirect control of a participant, or under the same direct or indirect control as the participant, or that is directly or indirectly controlling a participant. Control may take any of the forms set out in Article 8(2);
- (3) 'associated country' means a third country which is party to an international agreement with the Union, as identified in Article 7 of Regulation (EU) No 1291/2013;
- (4) 'background' means any data, know-how or information whatever its form or nature, tangible or intangible, including any rights such as intellectual property rights, which is: (i) held by participants prior to their accession to the action; (ii) needed for carrying out the action or for exploiting the results of the action; and (iii) identified by the participants in accordance with Article 45;
- (5) 'basic act' means a legal act adopted by the Union institutions in the form of a regulation, a directive or a decision within the meaning of Article 288 TFEU which provides a legal basis for the action;
- (6) 'innovation action' means an action primarily consisting of activities directly aimed at producing plans and arrangements or designs for new, altered or improved products, processes or services. For this purpose they may include prototyping, testing, demonstrating, piloting, large-scale product validation and market replication;

(7) 'coordination and support action' means an action consisting primarily of accompanying measures such as standardisation, dissemination, awareness-raising and communication, networking, coordination or support services, policy dialogues and mutual learning exercises and studies, including design studies for new infrastructure, and may also include complementary activities of networking and coordination between programmes in different countries;

(8) 'dissemination' means the public disclosure of the results by any appropriate means (other than resulting from protecting or exploiting the results), including by scientific publications in any medium;

(9) 'exploitation' means the use of results in further research activities other than those covered by the action concerned, or in developing, creating and marketing a product or process, or in creating and providing a service, or in standardisation activities;

(10) 'fair and reasonable conditions' means appropriate conditions, including possible financial terms or royalty-free conditions, taking into account the specific circumstances of the request for access, for example the actual or potential value of the results or background to which access is requested and/or the scope, duration or other characteristics of the exploitation envisaged;

(11) 'funding body' means a body or authority, other than the Commission, as referred to in point (c) of Article 58(1) of Regulation (EU, Euratom) No 966/2012, to which the Commission has entrusted budget implementation tasks in accordance with Article 9(2) of Regulation (EU) No 1291/2013;

(12) 'international European interest organisation' means an international organisation, the majority of whose members are Member States or associated countries, and whose principal objective is to promote scientific and technological cooperation in Europe;

(13) 'legal entity' means any natural person, or any legal person created and recognised as such under national law, Union law or international law, which has legal personality and which may, acting in its own name, exercise rights and be subject to obligations;

(14) 'non-profit legal entity' means a legal entity which by its legal form is non-profit-making or which has a legal or statutory obligation not to distribute profits to its shareholders or individual members;

- (15) 'participant' means any legal entity carrying out an action or part of an action under Regulation (EU) No 1291/2013 having rights and obligations with regard to the Union or another funding body under this Regulation;
- (16) 'programme co-fund action' means an action funded through a grant the main purpose of which is supplementing individual calls or programmes funded by entities, other than Union funding bodies, managing research and innovation programmes. A programme co-fund action may also include complementary activities of networking and coordination between programmes in different countries;
- (17) 'pre-commercial procurement' means the procurement of research and development services involving risk-benefit sharing under market conditions, and competitive development in phases, where there is a clear separation of the research and development services procured from the deployment of commercial volumes of end-products;
- (18) 'public procurement of innovative solutions' means procurement where contracting authorities act as a launch customer for innovative goods or services which are not yet available on a large-scale commercial basis, and may include conformity testing;
- (19) 'results' means any tangible or intangible output of the action, such as data, knowledge or information, that is generated in the action, whatever its form or nature, whether or not it can be protected, as well as any rights attached to it, including intellectual property rights;
- (20) 'SME' means micro-, small- and medium-sized enterprises, as defined in Commission Recommendation 2003/361/EC ⁽¹⁾;
- (21) 'work programme' means the document adopted by the Commission for the implementation of the specific programme in accordance with Article 5 of Council Decision 2013/743/EU of 3 December 2013 ⁽²⁾;
- (22) 'work plan' means the document similar to the Commission work programme adopted by funding bodies entrusted with part of the implementation of Horizon 2020 in accordance with Article 9(2) of Regulation (EU) No 1291/2013.

⁽¹⁾ Commission Recommendation 2003/361/EC of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises (OJ L 124, 20.5.2003, p. 36).

⁽²⁾ Council Decision 2013/743/EU of 11 December 2013 establishing the Specific Programme Implementing Horizon 2020 - The Framework Programme for Research and Innovation (2014 - 2020) (See page 965 of this Official Journal).

2. For the purposes of this Regulation, an entity which does not have legal personality under the applicable national law shall be considered as being assimilated to a legal entity provided that the conditions set out in Article 131(2) of Regulation (EU, Euratom) No 966/2012 and Article 198 of Regulation (EU) No 1268/2012 are complied with.

3. For the purposes of this Regulation, grant recipients shall not be considered to be funding bodies.

Article 3

Confidentiality

Subject to the conditions established in the implementing agreements, decisions or contracts, any data, knowledge and information communicated as confidential in the framework of an action shall be kept confidential, taking due account of Union law regarding the protection of and access to classified information.

Article 4

Information to be made available

1. Without prejudice to Article 3, the Commission shall, upon request, make available to the Union institutions, bodies, offices or agencies, any Member State or associated country, any useful information in its possession concerning results generated by a participant in an action that has received Union funding, provided that both the following conditions are met:

- (a) the information concerned is relevant to public policy;
- (b) the participants have not provided sound and sufficient reasons for withholding the information concerned.

In actions under the specific objective 'Secure societies - Protecting freedom and security of Europe and its citizens', the Commission shall upon request make available to Union institutions, bodies, offices or agencies or to Member States' national authorities any useful information in its possession concerning results generated by a participant in an action that has received Union funding. The Commission shall notify the participant of such communication. Where a Member State or Union institution, body, office or agency requests the communication of information, the Commission shall also notify such communication to all Member States.

2. The provision of information pursuant to paragraph 1 shall not be deemed to transfer to the recipient any rights or obligations of the Commission or of the participants. However, the recipient shall treat any such information as confidential unless it becomes public or is made available publicly by the participants, or unless it was communicated to the Commission without restrictions concerning confidentiality. The Commission rules on security shall apply regarding classified information.

*Article 5***Guidance and information for potential participants**

In accordance with Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012, the Commission or the relevant funding body shall ensure that sufficient guidance and information is made available to all potential participants at the time of publication of the call for proposals, in particular the applicable model grant agreement.

TITLE II

RULES FOR PARTICIPATION

CHAPTER I

General provisions*Article 6***Forms of funding**

In accordance with Article 10 of Regulation (EU) No 1291/2013, funding may take one or several of the forms provided for by Regulation (EU, Euratom) No 966/2012, in particular grants, prizes, procurement or financial instruments.

*Article 7***Legal entities that may participate in actions**

1. Any legal entity, regardless of its place of establishment, or international organisation may participate in an action provided that the conditions laid down in this Regulation have been met, together with any conditions laid down in the relevant work programme or work plan.

2. The relevant work programme may restrict the participation in Horizon 2020 or parts thereof of legal entities established in third countries where conditions for the participation of legal entities from Member States, or of their affiliated entities established in a third country, in the third country's research and innovation programmes are considered to be prejudicial to the Union's interests.

3. The relevant work programme or work plan may exclude entities unable to provide satisfactory security guarantees, including as regards personnel security clearance if justified by security reasons.

4. The JRC may participate in actions with the same rights and obligations as a legal entity established in a Member State.

*Article 8***Independence**

1. Two legal entities shall be regarded as independent of each other where neither is under the direct or indirect control of the other or under the same direct or indirect control as the other.

2. For the purposes of paragraph 1, control may, in particular, take either of the following forms:

- (a) the direct or indirect holding of more than 50 % of the nominal value of the issued share capital in the legal entity concerned, or of a majority of the voting rights of the shareholders or associates of that entity;
- (b) the direct or indirect holding, in fact or in law, of decision-making powers in the legal entity concerned.

3. For the purposes of paragraph 1, the following relationships between legal entities shall not in themselves be deemed to constitute controlling relationships:

- (a) the same public investment corporation, institutional investor or venture-capital company has a direct or indirect holding of more than 50 % of the nominal value of the issued share capital or a majority of voting rights of the shareholders or associates;
- (b) the legal entities concerned are owned or supervised by the same public body.

CHAPTER II

Grants

Section I

Award procedure*Article 9***Conditions for participation**

1. The following minimum conditions shall apply:

- (a) at least three legal entities shall participate in an action;
- (b) three legal entities shall each be established in a different Member State or associated country; and
- (c) the three legal entities referred to in point (b) shall be independent of each other within the meaning of Article 8.

2. For the purposes of paragraph 1, where one of the participants is the JRC, or an international European interest organisation or an entity created under Union law, it shall be deemed to be established in a Member State or associated country other than any Member State or associated country in which another participant in the same action is established.

3. By way of derogation from paragraph 1, the minimum condition shall be the participation of one legal entity established in a Member State or associated country, in the case of:

- (a) European Research Council (ERC) frontier research actions;
- (b) the SME instrument, where the action has a clear European added value;
- (c) programme co-fund actions; and
- (d) justified cases provided for in the work programme or work plan.

4. By way of derogation from paragraph 1, in the case of coordination and support actions and training and mobility actions, the minimum condition shall be the participation of one legal entity.

5. Where appropriate and duly justified, work programmes or work plans may provide for additional conditions according to specific policy requirements or to the nature and objectives of the action, including inter alia conditions regarding the number of participants, the type of participant and the place of establishment.

Article 10

Eligibility for funding

1. The following participants are eligible for funding from the Union:

- (a) any legal entity established in a Member State or associated country, or created under Union law;
- (b) any international European interest organisation;
- (c) any legal entity established in a third country identified in the work programme.

2. In the case of a participating international organisation or in the case of a participating legal entity established in a third country, neither of which are eligible for funding according to paragraph 1, funding from the Union may be granted provided that at least one of the following conditions is fulfilled:

- (a) the participation is deemed essential for carrying out the action by the Commission or the relevant funding body;
- (b) such funding is provided for under a bilateral scientific and technological agreement or any other arrangement between

the Union and the international organisation or, for entities established in third countries, the country in which the legal entity is established.

Article 11

Calls for proposals

1. Calls for proposals shall be issued in accordance with Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/12, taking account in particular of the need for transparency and non-discrimination, and for flexibility appropriate to the diverse nature of the research and innovation sectors.

2. As an exception and without prejudice to the other cases provided for in Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012, calls for proposals shall not be issued for coordination and support actions and programme co-fund actions to be carried out by legal entities identified in the work programmes or work plans provided that the action does not fall within the scope of a call for proposals.

3. In accordance with the relevant rules of Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012, sufficient time periods for preparing proposals shall be provided, with reasonable notice of upcoming calls for proposals through the publication of a work programme and a reasonable time period between the publication of a call for proposals and the deadline for submitting a proposal.

Article 12

Joint calls with third countries or with international organisations

1. Joint calls for proposals with third countries or their scientific and technological organisations and agencies or with international organisations may be issued to jointly fund actions in priority areas of common interest and expected mutual benefit where there is a clear added value for the Union. Proposals shall be evaluated and selected through joint evaluation and selection procedures to be agreed upon. Such evaluation and selection procedures shall ensure compliance with the principles set out in Title VI of Regulation (EU, Euratom) No 966/2012 and involve a balanced group of independent experts appointed by each party.

2. Legal entities receiving funding from the Union shall conclude a grant agreement with the Union or the relevant funding body. That grant agreement shall include a description of the work to be done by those participants and by the participating legal entities from the third countries involved.

3. Legal entities receiving funding from the Union shall conclude a coordination agreement with the participating legal entities receiving funding from the relevant third countries or international organisations.

Article 13

Proposals

1. Proposals shall include a draft plan for the exploitation and dissemination of the results, where provided for in the work programme or work plan.
2. Any proposal for research on human embryonic stem cells shall include, as appropriate, details of licensing and control measures that will be taken by the competent authorities of the Member States concerned as well as details of the ethical approvals that will be provided. As regards the derivation of human embryonic stem cells, institutions, organisations and researchers shall be subject to strict licensing and control in accordance with the legal framework of the Member States concerned.
3. A proposal which contravenes ethical principles or any applicable legislation, or which does not fulfil the conditions set out in Decision No 2013/743/EU, in the work programme, in the work plan or in the call for proposals may be excluded from the evaluation, selection and award procedures at any time.
4. Where relevant and specified in the work programme or the work plan, proposals shall explain how and to what extent gender analysis is relevant to the content of the intended project.

Article 14

Ethics review

1. The Commission shall systematically carry out ethics reviews for proposals raising ethical issues. That review shall verify the respect of ethical principles and legislation and, in the case of research carried out outside the Union, that the same research would have been allowed in a Member State.
2. The Commission shall make the process of the ethics review as transparent as possible and ensure that it is carried out in a timely manner avoiding, where possible, the resubmission of documents.

Article 15

Selection and award criteria

1. The proposals submitted shall be evaluated on the basis of the following award criteria:
 - (a) excellence;
 - (b) impact;
 - (c) quality and efficiency of the implementation.
2. Only the criterion referred to in point (a) of paragraph 1 shall apply to proposals for ERC frontier research actions.

3. The criterion referred to in point (b) of paragraph 1 may be given a higher weighting for proposals for innovation actions.

4. The work programme or work plan shall lay down further details of the application of the award criteria laid down in paragraph 1, and specify weightings and thresholds.

5. The Commission shall take into account the possibility of a two-stage submission procedure provided for in Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012, where appropriate and consistent with the objectives of the call for proposals.

6. Proposals shall be ranked according to the evaluation results. The selection shall be made on the basis of that ranking.

7. The evaluation shall be carried out by independent experts.

8. In the case of a legal entity referred to in Article 11(2) or in other duly justified exceptional circumstances, the evaluation may be carried out in a manner derogating from paragraph 7. In each case of such evaluation the Commission shall provide the Member States with detailed information on the evaluation procedure used and its outcome.

9. In cases where the requested funding from the Union for the action is equal or superior to EUR 500 000, the Commission or the relevant funding body shall, by means compatible with national law, verify in advance the financial capacity of only the coordinators. Furthermore, whenever there are grounds to doubt the financial capacity of the coordinator or other participants on the basis of available information, the Commission or the relevant funding body shall verify their financial capacity.

10. The financial capacity shall not be verified either in respect of legal entities whose viability is guaranteed by a Member State or an associated country or in respect of higher and secondary education establishments.

11. Financial capacity may be guaranteed by any other legal entity, whose financial capacity shall in turn be verified in accordance with paragraph 9.

Article 16

Evaluation review procedure

1. The Commission or the relevant funding body shall provide a transparent evaluation review procedure for applicants which consider that the evaluation of their proposal has not been carried out in accordance with the procedures set out in this Regulation, the relevant work programme, work plan or the call for proposals.

2. A request for review shall relate to a specific proposal, and shall be submitted by the coordinator of the proposal within 30 days of the date on which the Commission or the relevant funding body informs the coordinator of the evaluation results.

3. The Commission or the relevant funding body shall be responsible for the examination of the request referred to in paragraph 2. The examination shall cover only the procedural aspects of the evaluation, and not the merits of the proposal.

4. An evaluation review committee composed of Commission staff or of staff of the relevant funding body shall provide an opinion on the procedural aspects of the evaluation process. It shall be chaired by an official of the Commission or of the relevant funding body, from a department other than that responsible for the call for proposals. The committee may recommend one of the following:

(a) re-evaluation of the proposal primarily by evaluators not involved in the previous evaluation;

(b) confirmation of the initial evaluation.

5. On the basis of the recommendation referred to in paragraph 4, a decision shall be taken by the Commission or the relevant funding body and notified to the coordinator of the proposal. The Commission or the relevant funding body shall take such decision without undue delay.

6. The review procedure shall not delay the selection process of proposals which are not the subject of requests for review.

7. The review procedure shall not preclude any other actions the participant may take in accordance with Union law.

Article 17

Enquiries and complaints

1. The Commission shall ensure the existence of a procedure for participants to make enquiries or complaints about their involvement in Horizon 2020.

2. The Commission shall ensure that information on how to register concerns, enquiries or complaints is made available to all participants and is published on-line.

Article 18

Grant agreement

1. The Commission shall, in close cooperation with the Member States, draw up model grant agreements between the Commission or the relevant funding body and the participants

in accordance with this Regulation. If a significant modification of a model grant agreement is required, the Commission shall, in close cooperation with the Member States, revise it as appropriate.

2. The Commission or the relevant funding body shall enter into a grant agreement with the participants. The removal or substitution of an entity before signature of the grant agreement shall be duly justified.

3. The grant agreement shall establish the rights and obligations of the participants and of either the Commission or the relevant funding body in compliance with this Regulation. It shall also establish the rights and obligations of legal entities which become participants during the implementation of the action, as well as the role and tasks of a consortium coordinator.

4. On the basis of a requirement in a work programme or work plan, the grant agreement may establish rights and obligations of the participants with regard to access rights, exploitation and dissemination, in addition to those laid down in this Regulation.

5. The grant agreement shall, where appropriate and to the extent possible, reflect the general principles laid down in the Commission Recommendation on the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers, principles of research integrity, the Commission Recommendation on the management of intellectual property in knowledge transfer activities, the Code of Practice for universities and other public research institutions as well as the gender equality principle laid down in Article 16 of Regulation (EU) No 1291/2013.

6. The grant agreement shall, where appropriate, contain provisions ensuring the respect of ethical principles, including the establishment of an independent ethics board and the right of the Commission to carry out an ethics audit by independent experts.

7. In duly justified cases, specific grants for actions may form part of a framework partnership in accordance with Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012.

Article 19

Grant decisions

Where appropriate, and in duly justified cases, the Commission, in accordance with Article 121(1) of Regulation (EU, Euratom) No 966/2012, or the relevant funding body, may notify grant decisions instead of entering into grant agreements. The provisions of this Regulation referring to grant agreements shall apply *mutatis mutandis*.

*Article 20***Time to grant**

1. In accordance with Article 128(2) of Regulation (EU, Euratom) No 966/2012, calls for proposals shall specify the planned date by which all applicants shall be informed of the outcome of the evaluation of their application and the indicative date for the signature of grant agreements or the notification of grant decisions.

2. The dates referred to in paragraph 1 shall be based on the following periods:

- (a) for informing all applicants of the outcome of the scientific evaluation of their application, a maximum period of five months from the final date for submission of complete proposals;
- (b) for signing grant agreements with applicants or notifying grant decisions to them, a maximum period of three months from the date of informing applicants they have been successful.

3. The periods referred to in paragraph 2 may be exceeded for actions of the ERC and in exceptional, duly justified cases, in particular where actions are complex, where there is a large number of proposals or where requested by the applicants.

4. Participants shall be given reasonable time to submit the information and documentation required for the signature of the grant agreement. The Commission shall make decisions and requests for information as promptly as possible. Where possible, resubmission of documents shall be avoided.

*Article 21***Time to Pay**

Participants shall be paid in a timely manner in accordance with Regulation (EU, Euratom) No 966/2012. When a payment has been made to the coordinator, the Commission or the relevant funding body shall notify the participants thereof.

*Article 22***Secure electronic system**

All exchanges with participants, including the conclusion of grant agreements, the notification of grant decisions and any amendments thereto, may be made through an electronic exchange system set up by the Commission or by the relevant funding body, as stipulated in Article 179 of Regulation (EU) No 1268/2012.

*Section II***Implementation***Article 23***Implementation of actions**

1. Participants shall implement actions in compliance with all the conditions and obligations set out in this Regulation, Regulation (EU, Euratom) No 966/2012, Regulation (EU) No 1268/2012, Decision 2013/743/EU, the work programme or work plan, the call for proposals and the grant agreement.

2. Participants shall make no commitments which are incompatible with this Regulation or the grant agreement. Where a participant fails to comply with its obligations regarding the technical implementation of the action, the other participants shall comply with the obligations without any additional Union funding unless the Commission or the relevant funding body expressly relieves them of that obligation. In the event of a participant defaulting, the Commission may, in accordance with point (a) of Article 39(3) transfer the amount due from the Participant Guarantee Fund referred to in Article 38 to the coordinator of the action. The financial responsibility of each participant shall be limited to its own debt subject to the provisions relating to the Participant Guarantee Fund. Participants shall ensure that the Commission or the relevant funding body is informed in due time of any event which might significantly affect the implementation of the action or the interests of the Union.

3. Participants shall implement the action and shall take all necessary and reasonable measures to that end. They shall have the appropriate resources as and when needed for carrying out the action. Where it is necessary for the implementation of the action, they may call upon third parties, including subcontractors, to carry out work under the action or may use resources made available by third parties by means of contributions in kind, according to the conditions set out in the grant agreement. Participants shall retain responsibility towards the Commission or the relevant funding body and towards the other participants for the work carried out.

4. The award of subcontracts for carrying out certain elements of the action shall be limited to the cases provided for in the grant agreement and to duly justified cases that could not be clearly foreseen at the time of entry into force of the grant agreement.

5. Third parties other than subcontractors may carry out work under the action under the conditions laid down in the grant agreement. The third party and the work to be carried out by it shall be identified in the grant agreement.

Costs incurred by those third parties may be deemed eligible if the third party meets all the following conditions:

- (a) it would be eligible for funding if it were a participant;

(b) it is an affiliated entity or has a legal link to a participant implying a collaboration not limited to the action;

(c) it is identified in the grant agreement;

(d) it abides by the rules applicable to the participant under the grant agreement with regard to eligibility of costs and control of expenditure;

(e) it accepts joint and several liability with the participant for the Union contribution corresponding to the amount declared by the third party, if required by the Commission or the relevant funding body.

6. Third parties may also make available resources to a participant by means of contributions in kind to the action. Costs incurred by third parties in relation to such contributions which are made free of charge are eligible for funding provided they meet the conditions established in the grant agreement.

7. The action may involve financial support to third parties under the conditions established in Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012. The amounts referred to in point (c) of Article 137(1) of Regulation (EU, Euratom) No 966/2012 may be exceeded where it is necessary to achieve the objectives of an action.

8. The action carried out by participants which are contracting authorities within the meaning of Directive 2004/17/EC of the European Parliament and of the Council⁽¹⁾, Directive 2004/18/EC of the European Parliament and of the Council⁽²⁾ and Directive 2009/81/EC of the European Parliament and of the Council⁽³⁾ may involve or have as their primary aim the pre-commercial procurement and procurement of innovative solutions, where provided for in a work programme or a work plan and required for its implementation. In such cases, the rules set out in Article 51(2), (4) and (5) of this Regulation shall apply to the procurement procedures carried out by the participants.

9. Participants shall comply with national legislation, regulations and ethical rules in the countries where the action will

⁽¹⁾ Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors (OJ L 134, 30.4.2004, p. 1).

⁽²⁾ Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (OJ L 134, 30.4.2004, p. 114).

⁽³⁾ Directive 2009/81/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of procedures for the award of certain works contracts, supply contracts and service contracts by contracting authorities or entities in the fields of defence and security, and amending Directives 2004/17/EC and 2004/18/EC (OJ L 216, 20.8.2009, p. 76).

be carried out. Where appropriate, participants shall seek the approval of the relevant national or local ethics committees prior to the start of the action.

10. Work using animals shall be carried out in accordance with Article 13 TFEU and shall comply with the requirement to replace, reduce and refine the use of animals for scientific purposes in accordance with Union law and in particular with Directive 2010/63/EU of the European Parliament and of the Council⁽⁴⁾.

Article 24

Consortium

1. The members of any consortium wishing to participate in an action shall appoint one of them to act as coordinator, which shall be identified in the grant agreement. The coordinator shall be the principal point of contact between the members of the consortium in relations with the Commission or the relevant funding body, unless specified otherwise in the grant agreement, or in the event of non-compliance with its obligations under the grant agreement.

2. The members of a consortium participating in an action shall conclude an internal agreement ("the consortium agreement") establishing their rights and obligations with respect to the implementation of the action in compliance with the grant agreement, except in duly justified cases provided for in the work programme or work plan or call for proposals. The Commission shall publish guidelines on the main issues that may be addressed by participants in the consortium agreement.

3. The consortium agreement may stipulate *inter alia* the following:

(a) the internal organisation of the consortium;

(b) the distribution of the Union funding;

(c) rules on dissemination, use and access rights, additional to those in Title III, Chapter 1 of this Regulation, and to the provisions in the grant agreement;

(d) arrangements for settling internal disputes;

(e) liability, indemnification and confidentiality arrangements between the participants.

⁽⁴⁾ Directive 2010/63/EU of the European Parliament and of the Council of 22 September 2010 on the protection of animals used for scientific purposes (OJ L 276, 20.10.2010, p. 33).

The members of the consortium may make any arrangements in the consortium they deem fit to the extent that those arrangements are not in conflict with the grant agreement or this Regulation.

4. The consortium may propose to add or remove a participant or change the coordinator in accordance with the relevant provisions of the grant agreement, provided that the change is in conformity with the conditions for participation, does not adversely affect the implementation of the action and is not contrary to the principle of equal treatment.

Section III

Forms of grants and funding rules

Article 25

Forms of grants

Grants may take any of the forms provided for in Article 123 of Regulation (EU, Euratom) No 966/2012, taking into account the objectives of the action.

Article 26

Eligibility of costs

1. Conditions for eligibility of costs are defined in Article 126 of Regulation (EU, Euratom) No 966/2012. Costs incurred by third parties under the action may be eligible according to the provisions of this Regulation and of the grant agreement.

2. Ineligible costs are those not complying with the conditions of paragraph 1, including, in particular, provisions for possible future losses or charges, exchange losses, costs related to return on capital, costs reimbursed in respect of another Union action or programme, debt and debt service charges and excessive or reckless expenditure.

Article 27

Direct eligible personnel costs

1. Without prejudice to the conditions laid down in Article 26, direct eligible personnel costs shall be limited to salaries plus social security charges and other costs included in the remuneration of personnel assigned to the action, arising from national law or from the employment contract.

2. Without prejudice to the conditions laid down in Article 26, additional remuneration to personnel of participants that are non-profit legal entities assigned to the action, including payments on the basis of supplementary contracts regardless of their nature, may also be considered as direct eligible personnel costs, up to the amount set out in paragraph 3, if they fulfil the following additional conditions:

(a) it is part of the usual remuneration practices of the participant and is paid in a consistent manner whenever the same kind of work or expertise is required;

(b) the criteria used to calculate the supplementary payments are objective and of general application by the participant, independent of the source of funding used.

3. Additional remuneration may be eligible up to EUR 8 000 per year and per person. In relation to a person not working exclusively for the action, a limit per hour shall apply. The limit per hour shall be calculated by dividing EUR 8 000 by the number of annual productive hours calculated in accordance with Article 31.

Article 28

Funding of the action

1. The funding of an action shall not exceed the total eligible costs minus the receipts of the action.

2. The following shall be considered as receipts of the action:

(a) resources made available by third parties to the participants by means of financial transfers or contributions in kind free of charge, the value of which has been declared as eligible costs by the participant, provided that they have been contributed by the third party specifically to be used in the action;

(b) income generated by the action, except income generated by the exploitation of the results of the action;

(c) income generated from the sale of assets purchased under the grant agreement up to the value of the cost initially charged to the action by the participant.

3. A single reimbursement rate of the eligible costs shall be applied per action for all activities funded therein. The maximum rate shall be fixed in the work programme or work plan.

4. The Horizon 2020 grant may reach a maximum of 100 % of the total eligible costs, without prejudice to the co-financing principle.

5. The Horizon 2020 grant shall be limited to a maximum of 70 % of the total eligible costs for innovation actions and programme co-fund actions.

By way of derogation from paragraph 3, the Horizon 2020 grant may, for innovation actions, reach a maximum of 100 % of the total eligible costs for non-profit legal entities, without prejudice to the co-financing principle.

6. The reimbursement rates determined in this Article shall also apply in the case of actions where flat rate, unit or lump-sum financing is fixed for the whole or part of the action.

Article 29

Indirect costs

1. Indirect eligible costs shall be determined by applying a flat rate of 25 % of the total direct eligible costs, excluding direct eligible costs for subcontracting and the costs of resources made available by third parties which are not used on the premises of the beneficiary, as well as financial support to third parties.

2. By way of derogation from paragraph 1, indirect costs may be declared in the form of a lump sum or unit costs when provided for in the work programme or work plan.

Article 30

Evaluation of the funding levels

The interim evaluation of Horizon 2020 shall include an evaluation of the impact of the various features introduced by the new funding levels laid down in Articles 27, 28 and 29 of this Regulation, with the aim of evaluating whether the new approach has led to undesired situations adversely affecting the attractiveness of Horizon 2020.

Article 31

Annual productive hours

1. Eligible personnel costs shall cover only the actual hours worked by the persons directly carrying out work under the action. Evidence regarding the actual hours worked shall be provided by the participant, usually through a time recording system.

2. For persons working exclusively for the action, no time recording is required. In such cases, the participant shall sign a declaration confirming that the person concerned has worked exclusively for the action.

3. The grant agreement shall contain:

- (a) the minimum requirements for the time recording system;
- (b) the option to choose between a fixed number of annual productive hours and the method for establishing the

number of annual productive hours to be used for the calculation of the hourly personnel rates, taking account of the participant's usual accounting practices.

Article 32

Owners of SMEs and natural persons without a salary

The owners of SMEs who do not receive a salary, and other natural persons who do not receive a salary, may charge personnel costs on the basis of a unit cost.

Article 33

Unit costs

1. In accordance with Article 124 of Regulation (EU, Euratom) No 966/2012, the Commission may establish methods to determine unit costs based on:

(a) statistical data or similar objective means;

(b) auditable historical data of the participant.

2. Direct eligible personnel costs may be financed on the basis of unit costs determined according to the participant's usual cost accounting practices, provided that they comply with the following cumulative criteria:

(a) they are calculated on the basis of the total actual personnel costs recorded in the participant's general accounts which may be adjusted by the participant on the basis of budgeted or estimated elements according to the conditions defined by the Commission;

(b) they comply with Articles 26 and 27;

(c) they ensure compliance with the non-profit requirement and the avoidance of double funding of costs;

(d) they are calculated with due regard to Article 31.

Article 34

Certificate on the financial statements

The certificate on the financial statements shall cover the total amount of the grant claimed by a participant under the form of reimbursement of actual costs and under the form of unit costs referred to in Article 33(2), excluding the amounts declared on the basis of lump sums, flat rates and unit costs other than those determined according to the participant's usual cost accounting practices. The certificate shall be submitted only when that amount is equal to or greater than EUR 325 000 at the time of claiming the payment of the balance of the grant.

*Article 35***Certificate on the methodology**

1. Participants that calculate and claim direct personnel costs on the basis of unit costs in accordance with Article 33(2) may submit to the Commission a certificate on the methodology. That methodology shall comply with the conditions set out in Article 33(2) and meet the requirements of the grant agreement.
2. Where the Commission accepts a certificate on the methodology, it shall be valid for all actions financed under Regulation (EU) No 1291/2013 and the participant shall calculate and claim costs on the basis of it. Once the Commission has accepted a certificate on the methodology, it shall not attribute any systemic or recurrent error to the accepted methodology.

*Article 36***Certifying auditors**

1. The certificates on the financial statements and on the methodology referred to in Articles 34 and 35 shall be established by an independent auditor qualified to carry out statutory audits of accounting documents in accordance with Directive 2006/43/EC of the European Parliament and of the Council ⁽¹⁾ or similar national regulations, or by a competent and independent public officer in whom the relevant national authorities have vested the legal capacity to audit the participant and who has not been involved in the preparation of the financial statements.
2. Upon request by the Commission, the Court of Auditors or the European Anti-fraud Office (OLAF), the auditor who delivers the certificate on the financial statements and on the methodology shall grant access to the supporting documents and audit working papers on the basis of which a certificate on the financial statements or on the methodology was issued.

*Article 37***Cumulative funding**

An action for which a grant from the Union budget has been awarded may also give rise to the award of a grant on the basis of Regulation (EU) No 1291/2013, provided that the grants do not cover the same cost items.

Section IV**Guarantees***Article 38***Participant Guarantee Fund**

1. A participant guarantee fund (the "Fund") is hereby established and shall cover the risk associated with non-recovery of

sums due to the Union under actions financed through grants by the Commission under Decision No 1982/2006/EC and by the Commission or Union funding bodies under "Horizon 2020" according to the rules set out in this Regulation. The Fund shall replace and succeed the Participant Guarantee Fund set up under Regulation (EC) No 1906/2006.

2. The Fund shall be operated in accordance with Article 39. Any financial interest generated by the Fund shall be added to the Fund and shall serve exclusively for the purposes set out in Article 39(3).
3. Where interest is insufficient to cover the operations described in Article 39(3), the Fund shall not intervene and the Commission or the relevant Union funding body shall recover directly from participants or third parties any amount owed.
4. The Fund shall be considered a sufficient guarantee under Regulation (EU, Euratom) No 966/2012. No additional guarantee or security may be accepted from participants or imposed upon them except in the case described in paragraph 3 of this Article.
5. Participants in actions under Horizon 2020 whose risk is covered by the Fund shall make a contribution of 5 % of the Union funding for the action. At the end of the action the amount contributed to the Fund shall be returned to the participants, via the coordinator.
6. The rate of the participants' contribution to the Fund set out in paragraph 5 may be reduced on the basis of the interim evaluation of Horizon 2020.

*Article 39***Operation of the Fund**

1. The Fund shall be managed by the Union, represented by the Commission acting as executive agent on behalf of the participants, in accordance with the conditions established by the grant agreement.

The Commission may manage the Fund directly or entrust the financial management of the Fund either to the European Investment Bank or to an appropriate financial institution ("the depository bank"). The depository bank shall manage the Fund pursuant to the instructions of the Commission.

2. The participants' contribution to the Fund may be offset from the initial pre-financing and be paid to the Fund on behalf of the participants.
3. Where amounts are due to the Union by a participant, the Commission may, without prejudice to penalties which may be imposed on the defaulting participant, take either of the following actions:

⁽¹⁾ Directive 2006/43/EC of the European Parliament and of the Council of 17 May 2006 on statutory audits of annual accounts and consolidated accounts, amending Council Directives 78/660/EEC and 83/349/EEC and repealing Council Directive 84/253/EEC (OJ L 157, 9.6.2006, p. 87).

(a) transfer, or order the depository bank to transfer, directly the amount due from the Fund to the coordinator of the action. That transfer shall be made after the termination or withdrawal of the participation of the defaulting participant if the action is still ongoing and if the remaining participants agree to implement it according to the same objectives. Amounts transferred from the Fund shall be regarded as Union funding;

(b) recover effectively that amount from the Fund.

The Commission shall issue a recovery order against that participant or third party to the benefit of the Fund. The Commission may adopt to that end a recovery decision in accordance with Regulation (EU, Euratom) No 966/2012.

4. The amounts recovered shall constitute revenue assigned to the Fund within the meaning of Article 21(4) of Regulation (EU, Euratom) No 966/2012. Once the implementation of all grants whose risk is covered by the Fund is complete, any sums outstanding shall be recovered by the Commission and entered into the budget of the Union, subject to decisions of the legislative authority.

CHAPTER III

Experts

Article 40

Appointment of independent experts

1. The Commission and, where appropriate, funding bodies may appoint independent experts to evaluate proposals in accordance with Article 15 or to advise on or assist with:

- (a) the evaluation of proposals;
- (b) the monitoring of the implementation of actions carried out under Regulation (EU) No 1291/2013 as well as of previous Research and/or Innovation Programmes;
- (c) the implementation of Union research and innovation policy or programmes including Horizon 2020, as well as the achievement and functioning of the European Research Area;
- (d) the evaluation of Research and Innovation Programmes;
- (e) the design of the Union research and innovation policy, including the preparation of future programmes.

2. Independent experts shall be chosen on the basis of their skills, experience and knowledge appropriate to carry out the

tasks assigned to them. In cases where independent experts have to deal with classified information, the appropriate security clearance shall be required before appointment.

Independent experts shall be identified and selected on the basis of calls for applications from individuals and calls addressed to relevant organisations such as research agencies, research institutions, universities, standardisation organisations, civil society organisations or enterprises with a view to establishing a database of candidates.

The Commission or the relevant funding body may, if deemed appropriate and in duly justified cases, select in a transparent manner any individual expert with the appropriate skills not included in the database.

When appointing independent experts, the Commission or the relevant funding body shall take appropriate measures to seek a balanced composition within the expert groups and evaluation panels in terms of various skills, experience, knowledge, geographical diversity and gender, and taking into account the situation in the field of the action. Where appropriate, private-public sector balance shall also be sought.

The Commission or the relevant funding body may call upon the advice of advisory bodies for the appointment of independent experts. In the case of ERC frontier research actions, the Commission shall appoint experts on the basis of a proposal from the Scientific Council of the ERC.

3. The Commission or the relevant funding body shall ensure that an expert faced with a conflict of interest in relation to a matter on which the expert is required to provide an opinion does not evaluate, advise or assist on the specific matter in question.

4. All exchanges with independent experts, including the conclusion of contracts for their appointment and any amendment thereto, may be done through electronic exchange systems set up by the Commission or by the relevant funding body as stipulated in Article 287(4) of Regulation (EU) No. 1268/2012.

5. The names of experts appointed in a personal capacity, who have assisted the Commission or the funding bodies in implementation of Regulation (EU) No 1291/2013 and Decision 2013/743/EU shall be published, together with their area of expertise, at least once a year on the internet site of the Commission or the relevant funding body. Such information shall be collected, processed and published in accordance with Regulation (EC) No 45/2001.

TITLE III

**RULES GOVERNING THE EXPLOITATION AND
DISSEMINATION OF RESULTS**

CHAPTER I

Grants

Section I

Results

Article 41

Ownership of results

1. Results shall be owned by the participant generating them.
2. Where participants in an action have jointly generated results, and where their respective contribution to the joint results cannot be ascertained, or where it is not possible to separate such joint results for the purpose of applying for, obtaining or maintaining the relevant intellectual property rights protection, they shall have joint ownership of those results. The joint owners shall establish an agreement regarding the allocation and terms of exercise of that joint ownership in accordance with their obligations under the grant agreement. The joint owners may agree not to continue with joint ownership but decide on an alternative regime, *inter alia* by transferring their ownership shares to a single owner with access rights for the other participants, once the results have been generated.

Unless otherwise agreed in the joint ownership agreement, each joint owner shall be entitled to grant non-exclusive licences to third parties to exploit the jointly owned results, without any right to sub-license, subject to the following conditions:

- (a) prior notice shall be given to the other joint owners;
 - (b) fair and reasonable compensation shall be provided to the other joint owners.
3. If employees or any party working for a participant are entitled to claim rights to the results generated, the participant concerned shall ensure that it is possible for those rights to be exercised in a manner compatible with its obligations under the grant agreement.

Article 42

Protection of results

1. Where results are capable of or may reasonably be expected to be capable of commercial or industrial exploitation, the participant owning those results shall examine the possibility of protecting them. The participant shall, if possible, reasonable and justified given the circumstances, adequately protect them for an appropriate period of time and with an

appropriate territorial coverage, having due regard to its legitimate interests, and the legitimate interests, particularly the commercial interests, of the other participants in the action.

2. Where a participant that has received Union funding intends not to protect results generated by it for reasons other than impossibility under Union or national law or the lack of potential for commercial or industrial exploitation, and unless the participant intends to transfer them to another legal entity established in a Member State or associated country in view of their protection, it shall inform the Commission or the relevant funding body before any dissemination relating to those results takes place. The Commission, on behalf of the Union, or the relevant funding body may, with the consent of the participant concerned, assume ownership of those results and take the necessary steps for their adequate protection.

The participant may refuse consent only if it demonstrates that its legitimate interests would suffer significant harm. No dissemination relating to those results may take place until the Commission or the relevant funding body has taken a decision not to assume ownership of the results or has decided that it will assume ownership and has taken the necessary steps to ensure their protection. The Commission or the relevant funding body shall make such decision without undue delay. The grant agreement shall lay down time-limits in this respect.

3. Where a participant that has received Union funding intends to abandon the protection of results or intends not to seek the extension of such protection for reasons other than the lack of potential for commercial or industrial exploitation within a period that shall not exceed five years following the payment of the balance, it shall inform the Commission or the relevant funding body, which may continue or extend protection by assuming ownership thereof. The participant may refuse consent only if it demonstrates that its legitimate interests would suffer significant harm. The grant agreement shall lay down time-limits in this respect.

Article 43

Exploitation and dissemination of results

1. Each participant that has received Union funding shall use its best efforts to exploit the results it owns, or to have them exploited by another legal entity, in particular through the transfer and licensing of results in accordance with Article 44.

Any additional exploitation obligations shall be laid down in the grant agreement. In the case of research with the potential to address major societal challenges, additional exploitation obligations may include licensing on non-exclusive terms. Any such additional obligations shall be indicated in the work programme or work plan.

2. Subject to any restrictions due to the protection of intellectual property, security rules or legitimate interests, each participant shall through appropriate means disseminate the results it owns as soon as possible. The grant agreement may lay down time-limits in this respect.

Any additional dissemination obligations shall be laid down in the grant agreement and indicated in the work programme or work plan.

With regard to the dissemination of results through scientific publications, open access shall apply under the terms and conditions laid down in the grant agreement. Costs relating to open access to scientific publications that result from research funded under Horizon 2020, incurred within the duration of an action, shall be eligible for reimbursement under the conditions of the grant agreement. With due regard to Article 18 of Regulation (EU) No 1291/2013, the grant agreement shall not stipulate conditions regarding open access to publications which would result in additional publishing costs after the completion of an action.

With regard to the dissemination of research data, the grant agreement may, in the context of the open access to and the preservation of research data, lay down terms and conditions under which open access to such results shall be provided, in particular in ERC frontier research and FET (Future and Emerging Technologies) research or in other appropriate areas, and taking into consideration the legitimate interests of the participants and any constraints pertaining to data protection rules, security rules or intellectual property rights. In such cases, the work programme or work plan shall indicate if the dissemination of research data through open access is required.

Prior notice of any dissemination activity shall be given to the other participants. Following notification, a participant may object if it demonstrates that its legitimate interests in relation to its results or background would suffer significant harm by the intended dissemination. In such cases, the dissemination may not take place unless appropriate steps are taken to safeguard those legitimate interests. The grant agreement shall lay down time-limits in this respect.

3. For the purposes of monitoring and dissemination by the Commission or the relevant funding body, participants shall provide any information on their exploitation and dissemination related activities, and provide any documents necessary in accordance with the conditions laid down in the grant agreement. Subject to the legitimate interests of the participants which have provided the information, such information shall be made publicly available. The grant agreement shall, inter alia, lay down time-limits with respect to such reporting obligations.

4. All patent applications, standards, publications or any other dissemination, including those in electronic form, relating to results shall, if possible, include a statement, which

may include visual means, that the action received financial support from the Union. The terms of that statement shall be established in the grant agreement.

Article 44

Transfer and licensing of results

1. Where a participant transfers ownership of results, it shall pass on its obligations under the grant agreement regarding those results to the transferee, including the obligation to pass them on in any subsequent transfer.

Without prejudice to confidentiality obligations arising from laws or regulations in the case of mergers and acquisitions, where other participants still enjoy access rights or may still request the granting of access rights to the results to be transferred, a participant which intends to transfer the results shall give prior notice to the other participants, together with sufficient information concerning the intended new owner of the results, to permit the other participants to analyse the effect of the intended transfer on the possible exercise of their access rights.

Following notification, a participant may object to the transfer of ownership if it demonstrates that the intended transfer would adversely affect the exercise of its access rights. In such a case, the transfer may not take place until agreement has been reached between the participants concerned. The grant agreement shall lay down time-limits in this respect.

The other participants may by prior written agreement waive their right to prior notice and to object to transfers of ownership from one participant to a specifically identified third party.

2. Provided that access rights to the results can be exercised, and that any additional exploitation obligations are complied with by the participant which owns the results, the latter may grant licences or otherwise grant the right to exploit them to any legal entity, including on an exclusive basis. Exclusive licences for results may be granted subject to consent by all the other participants concerned that they will waive their access rights thereto.

3. With regard to results which are generated by participants that have received Union funding, the grant agreement may provide that the Commission or the relevant funding body may object to transfers of ownership or to grants of an exclusive licence to third parties established in a third country not associated with Horizon 2020, if it considers that the grant or transfer is not in accordance with the interests of developing the competitiveness of the Union economy, or is inconsistent with ethical principles or security considerations.

In such cases, the transfer of ownership or grant of exclusive licence shall not take place unless the Commission or the relevant funding body is satisfied that appropriate safeguards will be put in place.

Where appropriate, the grant agreement shall provide that the Commission or the relevant funding body is to be notified in advance of any such transfer of ownership or grant of an exclusive licence. The grant agreement shall lay down time-limits in this respect.

Section II

Access rights to background and results

Article 45

Background

Participants shall identify the background for their action in any manner in a written agreement.

Article 46

Access rights principles

1. Any request to exercise access rights or any waiving of access rights shall be made in writing.
2. Unless otherwise agreed by the owner of the results or background to which access is requested, access rights shall not include the right to sub-license.
3. Participants in the same action shall inform each other before their accession to the grant agreement of any legal restriction or limit to granting access to their background. Any agreement concluded thereafter by a participant regarding background shall ensure that any access rights may be exercised.
4. The termination of the participation in an action shall not affect the obligation of such a participant to grant access under the terms and conditions established in the grant agreement.
5. The consortium agreement may stipulate that where a participant defaults on its obligations and such default is not remedied, such a defaulting participant shall no longer enjoy access rights.

Article 47

Access rights for implementation

1. A participant shall enjoy access rights to the results of another participant in the same action if those results are needed by the former to carry out its work under the action.

Such access shall be granted on a royalty-free basis.

2. A participant shall enjoy access rights to background of another participant in the same action if this background is

needed by the former to carry out its work under the action, and subject to any restrictions or limits pursuant to Article 46(3).

Such access shall be granted on a royalty-free basis, unless otherwise agreed by the participants before their accession to the grant agreement.

Article 48

Access rights for exploitation

1. A participant shall enjoy access rights to the results of another participant in the same action if those results are needed by the former to exploit its own results.

Subject to agreement, such access shall be granted under fair and reasonable conditions.

2. A participant shall enjoy access rights to background of another participant in the same action if this background is needed by the former to exploit its own results, and subject to any restrictions or limits pursuant to Article 46(3).

Subject to agreement, such access shall be granted under fair and reasonable conditions.

3. An affiliated entity established in a Member State or associated country shall, unless otherwise provided for in the consortium agreement, also have access rights to results and, subject to any restrictions or limits pursuant to Article 46(3), to background under fair and reasonable conditions if those results and background are needed to exploit the results generated by the participant to which it is affiliated. Such access rights shall be requested and obtained directly from the participant owning the results or background unless otherwise agreed in accordance with Article 46(2).

4. A request for access under paragraphs 1, 2 or 3 may be made up to one year after the end of the action, unless the participants agree on a different time-limit.

Article 49

Access rights for the Union and the Member States

1. The Union institutions, bodies, offices or agencies shall, for the duly justified purpose of developing, implementing and monitoring Union policies or programmes, enjoy access rights solely to the results of a participant that has received Union funding. Such access rights are limited to non-commercial and non-competitive use.

Such access shall be granted on a royalty-free basis.

2. Regarding actions under the specific objective 'Secure societies - Protecting freedom and security of Europe and its citizens' set out in Part III of Annex I to Regulation (EU) No 1291/2013, Union institutions, bodies, offices and agencies, as well as Member States' national authorities, shall, for the purpose of developing, implementing and monitoring their policies or programmes in this area, enjoy the necessary access rights to the results of a participant that has received Union funding. Such access rights shall be limited to non-commercial and non-competitive use. Such access rights shall be granted on a royalty-free basis and upon bilateral agreement defining specific conditions aimed at ensuring that those rights will be used only for the intended purpose and that appropriate confidentiality obligations will be in place. Such access rights shall not extend to the participant's background. The requesting Member State, Union institution, body, office or agency shall notify all Member States of such requests. The Commission rules on security shall apply regarding classified information.

TITLE IV

SPECIFIC PROVISIONS

Article 50

Prizes

1. Union funding may take the form of prizes as defined in Title VII of Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012.

2. Any prize awarded shall be conditional upon the acceptance of the appropriate publicity obligations. Regarding the dissemination of results, Title III of this Regulation shall apply. The work programme or work plan may contain specific obligations regarding exploitation and dissemination.

Article 51

Procurement, pre-commercial procurement and public procurement of innovative solutions

1. Any procurement carried out by the Commission on its own behalf or jointly with Member States shall be subject to the rules on public procurement set out in Regulation (EU, Euratom) No 966/2012 and Regulation (EU) No 1268/2012.

2. Union funding may take the form of pre-commercial procurement or the procurement of innovative solutions carried out by the Commission or the relevant funding body on its own behalf or jointly with contracting authorities from Member States and associated countries.

The procurement procedures:

(a) shall comply with the principles of transparency, non-discrimination, equal treatment, sound financial management, proportionality, with competition rules and,

where applicable, with Directives 2004/17/EC, 2004/18/EC and 2009/81/EC, or, where the Commission acts on its own behalf, with Regulation (EU, Euratom) No 966/2012;

(b) may provide for specific conditions such as the place of performance of the procured activities being limited for pre-commercial procurement, to the territory of the Member States and of countries associated to Horizon 2020 where duly justified by the objectives of the actions;

(c) may authorise the award of multiple contracts within the same procedure (multiple sourcing);

(d) shall provide for the award of the contracts to the tender(s) offering best value for money.

3. Unless otherwise stipulated in the call for tenders, results generated by procurement carried out by the Commission shall be owned by the Union.

4. Specific provisions regarding ownership, access rights and licensing shall be laid down in the contracts regarding pre-commercial procurement to ensure maximum uptake of the results and to avoid any unfair advantage. The contractor generating results in pre-commercial procurement shall own at least the attached intellectual property rights. The contracting authorities shall enjoy at least royalty-free access rights to the results for their own use and the right to grant, or require the participating contractors to grant, non-exclusive licences to third parties to exploit the results under fair and reasonable conditions without any right to sub-license. If a contractor fails to commercially exploit the results within a given period after the pre-commercial procurement as identified in the contract, it shall transfer any ownership of the results to the contracting authorities.

5. Specific provisions regarding ownership, access rights and licensing may be laid down in the contracts regarding public procurement of innovative solutions to ensure maximum uptake of the results and to avoid any unfair advantage.

Article 52

Financial Instruments

1. Financial instruments may take any of the forms referred to in, and shall be implemented in accordance with, Title VIII of Regulation (EU, Euratom) No 966/2012 and may be combined with each other and with grants funded under the Union budget, including under Regulation (EU) No 1291/2013.

2. By way of derogation from the second subparagraph of Article 140(6) of Regulation (EU, Euratom) No 966/2012, both revenues and annual repayments generated by a financial instrument established under Regulation (EU) No 1291/2013 shall be assigned, in accordance with Article 21(4) of Regulation No 966/2012, to that financial instrument.

3. By way of derogation from the second subparagraph of Article 140(6) of Regulation (EU, Euratom) No 966/2012, both revenues and annual repayments generated by the Risk Sharing Finance facility set up under Decision No 1982/2006/EC and the early stage part of the High-Growth and Innovative SME Facility (GIF1) set up under Decision No 1639/2006/EC, shall be assigned, in accordance with Article 21(4) of Regulation (EU, Euratom) No 966/2012, to the succeeding financial instruments under Regulation (EU) No 1291/2013.

Article 53

SME Instrument

1. Only SMEs may apply for calls for proposals issued under the dedicated SME instrument referred to in Article 22 of Regulation (EU) No 1291/2013. They may cooperate with other companies, and with research organisations or universities.

2. Once a company has been validated as an SME, that legal status shall be assumed to prevail for the entire duration of the project, even in cases where the company, due to its growth, later exceeds the ceilings of the SME definition.

3. In the case of the SME instrument or grants by funding bodies or by the Commission targeting SMEs, the grant agreement may lay down specific provisions, in particular on ownership, access rights, exploitation and dissemination.

Article 54

Fast Track to Innovation

1. In accordance with Article 7, any legal entity may participate in a Fast Track to Innovation ("FTI") action. Actions funded under FTI shall be innovation actions. The FTI call shall be open to proposals relating to any technology field under the specific objective "Leadership in enabling and industrial technologies" set out in point 1 of Part II of Annex I to Regulation (EU) No 1291/2013 or to any of the specific objectives under the priority "Societal challenges" set out in points 1 to 7 of Part III of Annex I to that Regulation.

2. Proposals may be submitted at any time. The Commission shall set three cut-off dates per year to evaluate proposals. The period between a cut-off date and signature of the grant agreement or notification of the grant decision shall not

exceed six months. Proposals shall be ranked according to the impact, quality and efficiency of implementation and excellence, with the criterion of impact given a higher weighting. No more than five legal entities shall participate in any one action. The amount of the grant shall not exceed EUR 3 million.

Article 55

Other specific provisions

1. In the case of actions involving security-related activities, the grant agreement may lay down specific provisions, in particular on pre-commercial public procurement, procurement of innovative solutions, changes to the consortium's composition, classified information, exploitation, dissemination, open access to research publications, transfers and licences of results.

2. In the case of actions to support existing or new research infrastructures, the grant agreement may lay down specific provisions relating to users of the infrastructure and to the users' access to them.

3. In the case of ERC frontier research actions, the grant agreement may lay down specific provisions, in particular on access rights, portability and dissemination, or relating to participants, researchers and any party concerned by the action.

4. In the case of training and mobility actions, the grant agreement may lay down specific provisions on commitments relating to the researchers benefiting from the action, ownership, access rights and portability.

5. In the case of coordination and support actions, the grant agreement may lay down specific provisions, in particular on ownership, access rights, exploitation and dissemination of results.

6. In the case of the Knowledge and Innovation Communities of the EIT, the grant agreement may lay down specific provisions, in particular on ownership, access rights, exploitation and dissemination.

TITLE V

FINAL PROVISIONS

Article 56

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 1(3) shall be conferred on the Commission for the duration of Horizon 2020.

3. The delegation of power referred to in Article 1(3) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Article 1(3) shall enter into force only if no objection has been expressed either by the European Parliament or by the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 57

Repeal and transitional provisions

1. Regulation (EC) No 1906/2006 is repealed with effect from 1 January 2014.

2. Without prejudice to paragraph 1, this Regulation shall not affect the continuation or modification, including the total or partial termination, of the actions concerned, until their closure, or until the award of financial assistance by the Commission or funding bodies under Decision No 1982/2006/EC or any other legislation applying to that assistance on 31 December 2013, which shall continue to apply to the actions concerned until their closure.

3. Any sums from the participant Guarantee Fund set up by Regulation (EC) No 1906/2006 as well as all its rights and obligations shall be transferred to the Fund as of 31 December 2013. The participants in actions under Decision No 1982/2006/EC signing grant agreements after 31 December 2013 shall make their contribution to the Fund.

Article 58

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

**REGULATION (EU) No 1291/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

**establishing Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020)
and repealing Decision No 1982/2006/EC**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 173(3) and 182(1) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure ⁽³⁾,

Whereas:

(1) It is the Union's objective to strengthen its scientific and technological bases by achieving a European Research Area ("ERA") in which researchers, scientific knowledge and technology circulate freely, and by encouraging the Union to advance towards a knowledge society and to become a more competitive and sustainable economy in respect of its industry. To pursue that objective the Union should carry out activities to implement research, technological development, demonstration and innovation, promote international cooperation, disseminate and optimise results and stimulate training and mobility.

(2) It is also the Union's objective to ensure that the conditions necessary for the competitiveness of Union

industry exist. For this purpose, action should be aimed at fostering better exploitation of the industrial potential of policies of innovation, research and technological development.

(3) The Union is committed to achieving the Europe 2020 strategy which set the objectives of smart, sustainable and inclusive growth, highlighting the role of research and innovation as key drivers of social and economic prosperity and of environmental sustainability and setting itself the goal of increasing spending on research and development in order to attract private investment of up to two thirds of total investments, thereby reaching an accumulative total of 3 % of gross domestic product (GDP) by 2020 while developing an innovation intensity indicator. The general budget of the Union should mirror this ambitious goal by making a shift towards funding future-oriented investments, such as research, development and innovation. In this context, the flagship initiative 'Innovation Union' of the Europe 2020 strategy sets out a strategic and integrated approach to research and innovation, setting the framework and objectives to which future Union research and innovation funding should contribute. Research and innovation are also key factors for other flagship initiatives of the Europe 2020 strategy, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'Digital Agenda for Europe', and other policy objectives, such as climate and energy policy. Moreover, for achieving the objectives of the Europe 2020 strategy relating to research and innovation, cohesion policy has a key role to play through capacity-building and providing a stairway to excellence.

(4) The Commission Communication of 19 October 2010 entitled "The EU Budget Review" put forward key principles which should underpin the future general budget of the Union, namely focusing on instruments with proven Union added value, becoming more results-driven and leveraging other public and private sources of funding. It also proposed to bring the full range of Union instruments for research and innovation together in a common strategic framework.

(5) The European Parliament called for the radical simplification of Union research and innovation funding in its resolution of 11 November 2010 ⁽⁴⁾, highlighted the importance of the Innovation Union to transform Europe for the post-crisis world in its resolution of

⁽¹⁾ OJ C 181, 21.6.2012, p. 111.

⁽²⁾ OJ C 277, 13.9.2012, p. 143.

⁽³⁾ Position of the European Parliament of 21 November 2013 (not yet published in the Official Journal) and decision of the Council of 3 December 2013.

⁽⁴⁾ OJ C 74 E, 13.3.2012, p. 34.

12 May 2011 ⁽¹⁾, drew attention to important lessons to be learned following the interim evaluation of the Seventh Framework Programme in its resolution of 8 June 2011 ⁽²⁾ and supported the concept of a common strategic framework for research and innovation funding in its resolution of 27 September 2011 ⁽³⁾.

(6) On 26 November 2010, the Council called for future Union funding programmes to focus more on Europe 2020 priorities, address societal challenges and key technologies, facilitate collaborative and industry-driven research, streamline the instruments, radically simplify access, reduce time to market and further strengthen excellence.

(7) At its meeting of 4 February 2011, the European Council supported the concept of the common strategic framework for Union research and innovation funding to improve the efficiency of such funding at national and Union level and called on the Union to rapidly address remaining obstacles to attracting talent and investment in order to complete the ERA by 2014 and to achieve a genuine single market for knowledge, research and innovation.

(8) The Commission Green Paper of 9 February 2011 entitled 'From Challenges to Opportunities: Towards a Common Strategic Framework for EU Research and Innovation funding' identified key questions on how to achieve the ambitious objectives set in the Commission Communication of 19 October 2010 and launched a broad consultation, in the course of which stakeholders and Union institutions largely agreed with the ideas presented therein.

(9) The importance of a coherent strategic approach was also underlined in opinions delivered by the European Research Area and Innovation Committee (ERAC) on 3 June 2011, the Committee of the Regions on 30 June 2011 ⁽⁴⁾, and the European Economic and Social Committee on 13 July 2011 ⁽⁵⁾.

(10) In its Communication of 29 June 2011 entitled 'A Budget for Europe 2020', the Commission proposed to address with a single common strategic framework for research and innovation the areas covered by the Seventh Framework Programme of the European Community for research, technological development and demonstration activities (2007-2013) ('the Seventh Framework Programme') adopted by Decision No 1982/2006/EC of

the European Parliament and of the Council ⁽⁶⁾, and the innovation part of the Competitiveness and Innovation Framework Programme (2007 to 2013) established by Decision No 1639/2006/EC of the European Parliament and of the Council ⁽⁷⁾, as well as the European Institute of Innovation and Technology (the 'EIT') established by Regulation (EC) No 294/2008 of the European Parliament and of the Council ⁽⁸⁾, in order to contribute to attaining the Europe 2020 strategy target of raising spending on research and development to 3 % of GDP by 2020. In that Communication, the Commission also committed to mainstream climate change into Union spending programmes and to direct at least 20 % of the general budget of the Union to climate-related objectives.

Climate action and resource efficiency are mutually reinforcing objectives for achieving sustainable development. The specific objectives relating to both should be complemented through the other specific objectives of Horizon 2020 – the Framework Programme for Research and Innovation 2014-2020 ('Horizon 2020'), established by this Regulation. As a result it is expected that at least 60 % of the overall Horizon 2020 budget should be related to sustainable development. It is also expected that climate-related expenditure should exceed 35 % of the overall Horizon 2020 budget, including mutually compatible measures improving resource efficiency. The Commission should provide information on the scale and results of support to climate change objectives. Climate-related expenditure under Horizon 2020 should be tracked in accordance with the methodology stated in that Communication.

(11) Horizon 2020 focuses on three priorities, namely generating excellent science in order to strengthen the Union's world-class excellence in science, fostering industrial leadership to support business, including micro, small and medium-sized enterprises (SMEs) and innovation, and tackling societal challenges, in order to respond directly to the challenges identified in the Europe 2020 strategy by supporting activities covering the entire spectrum from research to market. Horizon 2020 should support all stages in the research and innovation chain, including non-technological and social innovation and activities that are closer to the market, with innovation and research actions having a different funding rate based on the principle that the closer to the market the supported activity is, the larger the additional funding from other sources should be. Activities closer to the market include innovative financial instruments, and they aim to satisfy the needs of a broad spectrum of

⁽¹⁾ OJ C 377 E, 7.12.2012, p. 108.

⁽²⁾ OJ C 380 E, 11.12.2012, p. 9.

⁽³⁾ OJ C 56 E, 26.2.2013, p. 1.

⁽⁴⁾ OJ C 259, 2.9.2011, p. 1.

⁽⁵⁾ OJ C 318, 29.10.2011, p. 121.

⁽⁶⁾ Decision No 1982/2006/EC of the European Parliament and of the Council of 18 December 2006 concerning the Seventh Framework Programme of the European Community for research, technological development and demonstration activities (2007-2013) (OJ L 412, 30.12.2006, p. 1).

⁽⁷⁾ Decision No 1639/2006/EC of the European Parliament and of the Council of 24 October 2006 establishing a Competitiveness and Innovation Framework Programme (2007 to 2013) (OJ L 310, 9.11.2006, p. 15).

⁽⁸⁾ Regulation (EC) No 294/2008 of the European Parliament and of the Council of 11 March 2008 establishing the European Institute of Innovation and Technology (OJ L 97, 9.4.2008, p. 1).

- Union policies by placing emphasis on the widest possible use of knowledge generated by the supported activities up to the commercial exploitation of that knowledge. The priorities of Horizon 2020 should also be supported through a programme on nuclear research and training established by Council Regulation (Euratom) No 1314/2013 ⁽¹⁾.
- (12) Horizon 2020 should be open to new participants with a view to ensuring extensive and excellent cooperation with partners throughout the Union and with a view to ensuring an integrated ERA.
- (13) The Joint Research Centre (JRC) should provide customer-driven scientific and technical support to Union policies while flexibly responding to new policy demands.
- (14) In the context of the knowledge triangle of research, innovation and education, the Knowledge and Innovation Communities (KICs) under the EIT should strongly contribute to addressing the objectives of Horizon 2020, including the societal challenges, notably by integrating research, innovation and education. The EIT should foster entrepreneurship in its higher education, research and innovation activities. In particular, it should promote excellent entrepreneurial education and support the creation of start-ups and spin-offs.
- (15) In accordance with Article 182(1) of the Treaty on the Functioning of the European Union (TFEU), Horizon 2020 fixes the maximum overall amount and lays down the detailed rules for Union financial participation therein and the respective shares in each of the activities provided for.
- (16) This Regulation lays down a financial envelope for the entire duration of Horizon 2020 which is to constitute the prime reference amount, within the meaning of point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management ⁽²⁾, for the European Parliament and the Council during the annual budgetary procedure.
- (17) An appropriate proportion of the budget for research infrastructures should be devoted to e-infrastructures.
- (18) Activities within the specific objective 'Future and Emerging Technologies (FET)' should be complementary to the activities within the other parts of Horizon 2020 and, where possible, synergies should be sought.
- (19) It is appropriate to ensure a correct closure of Horizon 2020 and its predecessor programmes, in particular regarding the continuation of multi-annual arrangements for their management, such as the financing of technical and administrative assistance.
- (20) Simplification is a central aim of Horizon 2020 which should be fully reflected in its design, rules, financial management and implementation. Horizon 2020 should aim to attract the strong participation of universities, research centres, industry and specifically SMEs and be open to new participants, as it brings together the full range of research and innovation support in one common strategic framework, including a streamlined set of forms of support, and uses rules for participation with principles applicable to all actions under Horizon 2020. Simpler funding rules should reduce the administrative costs for participation and contribute to the prevention and reduction of financial errors.
- (21) Horizon 2020 should contribute to the aims of the European Innovation Partnerships in line with the flagship initiative 'Innovation Union', bringing together all relevant actors across the whole research and innovation chain with a view to streamlining, simplifying and better coordinating instruments and initiatives.
- (22) With the aim of deepening the relationship between science and society and reinforcing public confidence in science, Horizon 2020 should foster the informed engagement of citizens and civil society in research and innovation matters by promoting science education, by making scientific knowledge more accessible, by developing responsible research and innovation agendas that meet citizens' and civil society's concerns and expectations and by facilitating their participation in Horizon 2020 activities. The engagement of citizens and civil society should be coupled with public outreach activities to generate and sustain public support for Horizon 2020.
- (23) There should be an appropriate balance between small and large projects within the priority 'Societal challenges' and the specific objective 'Leadership in enabling and industrial technologies'.

⁽¹⁾ Council Regulation (Euratom) No 1314/2013 of 11 December 2013 on the Research and Training Programme of the European Atomic Energy Community (2014-2018) complementing the Horizon 2020 Framework Programme for Research and Innovation (See page 948 of this Official Journal).

⁽²⁾ OJ C 373, 20.12.2013, p. 1.

- (24) The implementation of Horizon 2020 should respond to the evolving opportunities and needs of science and technology, industry, policies and society. As such, the agendas should be set in close liaison with stakeholders from all sectors concerned, and sufficient flexibility should be allowed for new developments. External advice should be sought on a continuous basis for the duration of Horizon 2020, also making use of relevant structures such as European Technology Platforms, Joint Programming Initiatives, the European Innovation Partnerships as well as advice from scientific panels, such as the Scientific Panel for Health.
- (25) The activities developed under Horizon 2020 should promote equality between women and men in research and innovation, by addressing in particular the underlying causes of gender imbalance, by exploiting the full potential of both female and male researchers, and by integrating the gender dimension into the research and innovation content as well as by paying particular attention to ensuring gender balance, subject to the situation in the field of research and innovation concerned, in evaluation panels and in other relevant advisory and expert bodies in order to improve the quality of research and to stimulate innovation. Activities should also aim at implementation of principles relating to equality between women and men as laid down in Articles 2 and 3 of the Treaty on European Union and in Article 8 TFEU.
- (26) Horizon 2020 should contribute to the attractiveness of the research profession in the Union. Adequate attention should be paid to the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers, as set out in the Commission Recommendation of 11 March 2005⁽¹⁾, together with other relevant reference frameworks defined in the context of the ERA, while respecting their voluntary nature.
- (27) In order to be able to compete globally, to effectively address major societal challenges, and to achieve the objectives of the Europe 2020 strategy, the Union should make full use of its human resources. In that context, Horizon 2020 should contribute to achieving the ERA, encouraging the development of framework conditions to help European researchers to remain in or to return to Europe, attract researchers from around the world and make Europe a more attractive destination for the best researchers.
- (28) To increase the circulation and exploitation of knowledge, open access to scientific publications should be ensured. Furthermore, open access to research data resulting from publicly funded research under Horizon 2020 should be promoted, taking into account constraints pertaining to privacy, national security and intellectual property rights.
- (29) Research and innovation activities supported by Horizon 2020 should respect fundamental ethical principles. The opinions of the European Group on Ethics in Science and New Technologies should be taken into account. Article 13 TFEU should also be taken into account in research activities, and the use of animals in research and testing should be reduced, with a view ultimately to replacing their use. All activities should be carried out ensuring a high level of human health protection in accordance with Article 168 TFEU.
- (30) Horizon 2020 should have due consideration for equal treatment and non-discrimination in research and innovation content throughout all stages of the research cycle.
- (31) The Commission does not explicitly solicit the use of human embryonic stem cells. The use, if any, of human stem cells, be they adult or embryonic, depends on the judgment of the scientists in view of the objectives they want to achieve and is subject to stringent ethics review. No project involving the use of human embryonic stem cells should be funded that does not obtain the necessary approvals from the Member States. No activity should be funded that is forbidden in all Member States. No activity should be funded in a Member State where such activity is forbidden.
- (32) To achieve maximum impact, Horizon 2020 should develop close synergies with other Union programmes in areas such as education, space, environment, energy, agriculture and fisheries, competitiveness and SMEs, internal security, culture and media.
- (33) Both Horizon 2020 and the cohesion policy seek a more comprehensive alignment with the objectives of the Europe 2020 strategy. This approach calls for increased synergies between Horizon 2020 and the cohesion policy. Therefore Horizon 2020 should also develop close interactions with the European Structural and Investment Funds, which can specifically help to strengthen local, regional and national research and innovation capabilities, particularly in the context of smart specialisation strategies.

⁽¹⁾ OJ L 75, 22.3.2005, p. 67.

- (34) SMEs constitute a significant source of innovation, growth and jobs in Europe. Therefore the strong participation of SMEs, as defined in Commission Recommendation 2003/361/EC ⁽¹⁾, is needed in Horizon 2020. This should support the aims of the Small Business Act, as set out in the Commission Communication of 25 June 2008 entitled "Think Small First" - A "Small Business Act" for Europe". Horizon 2020 should provide a range of means to support the research and innovation activities and capacities of SMEs throughout the different stages of the innovation cycle.
- (35) The Commission should carry out evaluations and record the rate of participation by SMEs in Horizon 2020. If the target of 20 % of the total combined budget for the specific objective "Leadership in enabling and industrial technologies" and the priority "Societal challenges" going to SMEs is not achieved, the Commission should examine the reasons for this situation and should propose, without delay, adequate new measures for allowing SMEs to increase their participation.
- (36) The implementation of Horizon 2020 may give rise to supplementary programmes involving the participation of certain Member States only, the participation of the Union in programmes undertaken by several Member States, or the setting up of joint undertakings or other arrangements within the meaning of Articles 184, 185 and 187 TFEU. Such supplementary programmes should be identified and implemented in an open, transparent and efficient way.
- (37) In order to reduce the time from idea to market, using a bottom-up approach, and to increase the participation of industry, SMEs and first-time applicants in Horizon 2020, the Fast Track to Innovation (FTI) pilot should be implemented within the specific objective "Leadership in enabling and industrial technologies" and within the priority "Societal challenges". It should stimulate private sector investment in research and innovation, promote research and innovation with a focus on value creation and accelerate the development of technologies into innovative products, processes and services.
- (38) The implementation of Horizon 2020 should recognise the unique role that universities play within the scientific and technological base of the Union as institutions of excellence in higher education, research and innovation, with an essential role in linking the European Higher Education Area and the ERA.
- (39) With the aim of achieving the greatest possible impact of Union funding, Horizon 2020 should develop closer synergies, which may also take the form of public-public partnerships, with international, national and regional programmes that support research and innovation. In this context, Horizon 2020 should encourage the optimal use of resources and avoid unnecessary duplication.
- (40) A greater impact should also be achieved by combining Horizon 2020 and private sector funds within public-private partnerships in key areas where research and innovation could contribute to Europe's wider competitiveness goals, leverage private investment and help tackle societal challenges. Those partnerships should be based on a long-term commitment, including a balanced contribution from all partners, be accountable for the achievement of their targets and be aligned with the Union's strategic goals relating to research, development and innovation. The governance and functioning of those partnerships should be open, transparent, effective and efficient and give the opportunity to a wide range of stakeholders active in their specific areas to participate. The public-private partnerships in the form of Joint Technology Initiatives (JTIs) launched under the Seventh Framework Programme may be continued using structures better suited to their purpose.
- (41) Horizon 2020 should promote cooperation with third countries based on common interest and mutual benefit. International cooperation in science, technology and innovation should be targeted to contribute to achieving the objectives of the Europe 2020 strategy to strengthen competitiveness, contribute to tackling societal challenges and support Union external and development policies, including by developing synergies with external programmes and contributing to the Union's international commitments, such as the achievement of the United Nations' Millennium Development Goals. International cooperation activities should be maintained at least at the level of the Seventh Framework Programme.
- (42) In order to maintain a level playing field for all undertakings active in the internal market, funding from Horizon 2020 should be designed in accordance with State aid rules so as to ensure the effectiveness of public spending and to prevent market distortions, such as crowding-out of private funding, creating ineffective market structures or preserving inefficient businesses.

⁽¹⁾ Commission Recommendation 2003/361/EC of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises (OJ L 124, 20.5.2003, p. 36).

- (43) The European Council of 4 February 2011 recognised the need for a new approach to control and risk management in Union research funding, calling for a new balance between trust and control and between risk-taking and risk avoidance. The European Parliament, in its resolution of 11 November 2010 on simplifying the implementation of the Research Framework Programmes, called for a pragmatic shift towards administrative and financial simplification and stated that the management of European research funding should be more trust-based and risk-tolerant towards participants. The interim evaluation report of the Seventh Framework Programme concludes that a more radical approach is needed to attain a quantum leap in simplification and that the risk-trust balance needs to be redressed.
- (44) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, wrongly paid or incorrectly used and, where appropriate, the imposition of penalties. A revised control strategy, shifting focus from minimisation of error rates towards risk-based control and fraud detection, should reduce the control burden for participants.
- (45) It is important to ensure sound financial management of Horizon 2020 and its implementation in the most effective and user-friendly manner possible, while also ensuring legal certainty and the accessibility of Horizon 2020 to all participants. It is necessary to ensure compliance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council⁽¹⁾ and with the requirements of simplification and better regulation.
- (46) Effective performance management, including evaluation and monitoring, requires development of specific performance indicators which can be measured over time, which are realistic and reflect the logic of the intervention, and which are relevant to the appropriate hierarchy of objectives and activities. Appropriate coordination mechanisms should be put in place between the implementation and monitoring of Horizon 2020 and the monitoring of progress, achievements and functioning of the ERA.
- (47) By the end of 2017, as part of the Horizon 2020 interim evaluation, both existing and new public-private partnerships, including the JTI, should be subject to an in-depth assessment, which should include, inter alia, an analysis of their openness, transparency and effectiveness. That assessment should take into consideration the evaluation of the EIT as outlined in Regulation (EC) No 294/2008 so as to allow for an assessment based on common principles.
- (48) Since the objectives of this Regulation, namely strengthening the overall research and innovation framework and coordinating efforts across the Union, cannot be sufficiently achieved by the Member States but can rather, by reason of avoiding duplication, retaining critical mass in key areas and ensuring that public financing is used in an optimal way, be better achieved at the level of the Union, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.
- (49) For reasons of legal certainty and clarity, Decision No 1982/2006/EC should be repealed,

HAVE ADOPTED THIS REGULATION:

TITLE I

GENERAL PROVISIONS

Article 1

Subject matter

This Regulation establishes Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020) ("Horizon 2020") and determines the framework governing Union support to research and innovation activities, thereby strengthening the European scientific and technological base and fostering benefits for society as well as better exploitation of the economic and industrial potential of policies of innovation, research and technological development.

Article 2

Definitions

For the purposes of this Regulation the following definitions apply:

- (1) 'research and innovation activities' mean the whole spectrum of activities of research, technological development, demonstration and innovation, including the promotion of cooperation with third countries and international organisations, the dissemination and optimisation of results and the stimulation of high quality training and mobility of researchers in the Union;
- (2) 'direct actions' mean research and innovation activities undertaken by the Commission through its Joint Research Centre (JRC);

⁽¹⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

- (3) 'indirect actions' mean research and innovation activities to which the Union provides financial support and which are undertaken by participants;
- (4) 'public-private partnership' means a partnership where private sector partners, the Union and, where appropriate, other partners, such as public sector bodies, commit to jointly support the development and implementation of a research and innovation programme or activities;
- (5) 'public-public partnership' means a partnership where public sector bodies or bodies with a public service mission at local, regional, national or international level commit with the Union to jointly support the development and implementation of a research and innovation programme or activities;
- (6) 'research infrastructures' mean facilities, resources and services that are used by the research communities to conduct research and foster innovation in their fields. Where relevant, they may be used beyond research, for example for education or public services. They include major scientific equipment or sets of instruments; knowledge-based resources such as collections, archives or scientific data; e-infrastructures such as data and computing systems and communication networks; and any other infrastructure of a unique nature essential to achieving excellence in research and innovation. Such infrastructures may be 'single-sited', 'virtual' or 'distributed';
- (7) 'smart specialisation strategy' has the same meaning as smart specialisation strategy as defined in point (3) of Article 2 of Regulation (EU) No 1303/2013 of the European Parliament and of the Council⁽¹⁾.

Article 3

Establishment of Horizon 2020

Horizon 2020 is hereby established for the period from 1 January 2014 to 31 December 2020.

Article 4

Union added value

Horizon 2020 shall maximise Union added value and impact, focusing on objectives and activities that cannot be efficiently realised by Member States acting alone. Horizon 2020 shall

⁽¹⁾ Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (See page 320 of this Official Journal).

play a central role in the delivery of the Europe 2020 strategy for smart, sustainable and inclusive growth ("Europe 2020 strategy") by providing a common strategic framework for the Union's funding of excellent research and innovation, thus acting as a vehicle for leveraging private and public investment, creating new job opportunities and ensuring Europe's long-term sustainability, growth, economic development, social inclusion and industrial competitiveness, as well as addressing societal challenges across the Union.

Article 5

General objective, priorities and specific objectives

1. The general objective of Horizon 2020 is to contribute to building a society and an economy based on knowledge and innovation across the Union by leveraging additional research, development and innovation funding and by contributing to attaining research and development targets, including the target of 3 % of GDP for research and development across the Union by 2020. It shall thereby support the implementation of the Europe 2020 strategy and other Union policies, as well as the achievement and functioning of the European Research Area (ERA). The first set of relevant performance indicators for assessing progress against the general objective is set out in the introduction of Annex I.

2. The general objective set out in paragraph 1 shall be pursued through three mutually reinforcing priorities dedicated to:

- (a) Excellent science;
- (b) Industrial leadership;
- (c) Societal challenges.

The specific objectives corresponding to each of those three priorities are set out in Parts I to III of Annex I, together with the broad lines of activities.

3. The general objective set out in paragraph 1 shall also be pursued through the specific objectives 'Spreading excellence and widening participation' and 'Science with and for society' set out in Parts IV and V of Annex I respectively, together with the broad lines of activities.

4. The JRC shall contribute to the general objective and the priorities set out in paragraphs 1 and 2 respectively by providing scientific and technical support to Union policies in collaboration with relevant national and regional research stakeholders, where appropriate, for example on the development of smart specialisation strategies. The specific objective and the broad lines of activities are set out in Part VI of Annex I.

5. The European Institute of Innovation and Technology (EIT) shall contribute to the general objective and the priorities set out in paragraphs 1 and 2 respectively, with the specific objective of integrating the knowledge triangle of higher education, research and innovation. The relevant performance indicators for the EIT are set out in the introduction of Annex I and the specific objective together with the broad lines of activities are set out in Part VII of Annex I.

6. Within the priorities, specific objectives and broad lines of activities referred to in paragraphs 2 and 3, account may be taken of new and unforeseen needs that arise during the period of implementation of Horizon 2020. This may, if duly justified, include responses to emerging opportunities, crises and threats, as well as responses to needs relating to the development of new Union policies.

Article 6

Budget

1. The financial envelope for the implementation of Horizon 2020 is set at EUR 77 028,3 million in current prices, of which a maximum of EUR 74 316,9 million shall be allocated to activities under Title XIX TFEU.

The annual appropriations shall be authorised by the European Parliament and by the Council within the limits of the multi-annual financial framework.

2. The amount for activities under Title XIX TFEU shall be distributed among the priorities set out in Article 5(2) of this Regulation as follows:

- (a) Excellent science, EUR 24 441,1 million in current prices;
- (b) Industrial leadership, EUR 17 015,5 million in current prices;
- (c) Societal challenges, EUR 29 679 million in current prices.

The maximum overall amount for the Union financial contribution from Horizon 2020 to the specific objectives set out in Article 5(3) and to the non-nuclear direct actions of the JRC shall be as follows:

- (i) Spreading excellence and widening participation, EUR 816,5 million in current prices;
- (ii) Science with and for society, EUR 462,2 million in current prices;
- (iii) Non-nuclear direct actions of the JRC, EUR 1 902,6 million in current prices.

The indicative breakdown for the priorities and specific objectives set out in Article 5(2) and (3) is set out in Annex II.

3. The EIT shall be financed through a maximum contribution from Horizon 2020 of EUR 2 711,4 million in current prices as set out in Annex II.

4. The financial envelope of Horizon 2020 may cover expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are required for the management of Horizon 2020 and the achievement of its objectives, in particular studies and meetings of experts, in so far as they are related to the objectives of Horizon 2020, expenses linked to information technology networks focusing on information processing and exchange, together with all other technical and administrative assistance expenses incurred by the Commission for the management of Horizon 2020.

Where necessary and duly justified, appropriations may be entered in the Horizon 2020 budget beyond 2020 to cover technical and administrative assistance expenses, in order to enable the management of actions not yet completed by 31 December 2020. Horizon 2020 shall fund neither the construction nor the operation of the Galileo programme, the Copernicus programme or the European Joint Undertaking for ITER.

5. In order to respond to unforeseen situations or to new developments and needs the Commission may, following the interim evaluation of Horizon 2020 as referred to in Article 32(3) and the results of the review of the EIT referred to in Article 32(2), within the annual budgetary procedure review the amounts set out for the priorities and the specific objectives 'Spreading excellence and widening participation' and 'Science with and for society' in paragraph 2 of this Article and the indicative breakdown by specific objectives within these priorities set out in Annex II and the contribution to the EIT in paragraph 3 of this Article. The Commission may also, subject to the same conditions, transfer appropriations between the priorities and specific objectives as well as the EIT up to a maximum of 7,5 % of the total initial allocation of each priority and the specific objectives 'Spreading excellence and widening participation' and 'Science with and for society', and up to a maximum of 7,5 % of the initial indicative breakdown of each specific objective and up to a maximum of 7,5 % of the contribution to the EIT. No such transfer shall be allowed in respect of the amount set out for the direct actions of the JRC in paragraph 2 of this Article.

Article 7

Association of third countries

1. Horizon 2020 shall be open to the association of:

- (a) acceding countries, candidate countries and potential candidates, in accordance with the general principles and general terms and conditions for the participation of those countries in Union programmes established in the respective framework agreements and decisions of association councils or similar agreements;

(b) European Free Trade Association (EFTA) members, or countries or territories covered by the European Neighbourhood Policy that fulfil all of the following criteria:

- (i) a good capacity in science, technology and innovation;
- (ii) a good track record of participation in Union research and innovation programmes;
- (iii) fair and equitable dealing with intellectual property rights;

(c) countries or territories associated to the Seventh Framework Programme.

2. Specific terms and conditions regarding the participation of associated countries in Horizon 2020, including the financial contribution based on the GDP of the associated country, shall be determined by international agreements between the Union and the associated countries.

The terms and conditions regarding the association of the EFTA States that are party to the Agreement on the European Economic Area (EEA) shall be in accordance with the provisions of that Agreement.

TITLE II

IMPLEMENTATION

CHAPTER I

Implementation, management and forms of support

Article 8

Implementation by means of a specific programme and the contribution to the EIT

Horizon 2020 shall be implemented through the consolidated specific programme established by Council Decision 2013/743/EU⁽¹⁾, which shall specify the objectives and the detailed rules for implementation, and through a financial contribution to the EIT.

The specific programme shall set out one Part for each of the three priorities set out in Article 5(2), one Part for each of the specific objectives referred to in Article 5(3) and one Part for the non-nuclear direct actions of the JRC.

There shall be effective coordination between the three priorities of Horizon 2020.

⁽¹⁾ Council Decision 2013/743/EU of 3 December 2013 establishing the specific programme implementing Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020) and repealing Decisions 2006/971/EC, 2006/972/EC, 2006/973/EC, 2006/974/EC and 2006/975/EC (See page 965 of this Official Journal).

Article 9

Management

1. Horizon 2020 shall be implemented by the Commission in accordance with Regulation (EU, Euratom) No 966/2012.

2. The Commission may also entrust part of the implementation of Horizon 2020 to the funding bodies referred to in point (c) of Article 58(1) of Regulation (EU, Euratom) No 966/2012.

Article 10

Forms of Union support

1. Horizon 2020 shall support indirect actions through one or several of the forms of funding provided for by Regulation (EU, Euratom) No 966/2012, in particular grants, prizes, procurement and financial instruments. Financial instruments shall be the main form of funding for activities close to market that are supported under Horizon 2020.

2. Horizon 2020 shall also support direct actions undertaken by the JRC.

3. Where the direct actions undertaken by the JRC contribute to initiatives established under Article 185 or Article 187 TFEU, this contribution shall not be considered as part of the financial contribution allocated to those initiatives.

Article 11

Rules for participation and dissemination of results

The rules for participation and dissemination of results laid down in Regulation (EU) No 1290/2013 of the European Parliament and of the Council⁽²⁾ shall apply to indirect actions.

CHAPTER II

Programming

Section I

General principles

Article 12

External advice and societal engagement

1. For the implementation of Horizon 2020, account shall be taken of advice and inputs provided by independent advisory groups of high level experts set up by the Commission from a broad constituency of stakeholders, including research, industry and civil society, to provide the necessary inter-disciplinary and cross-sectoral perspectives, taking account of relevant existing initiatives at Union, national and regional level. Other inputs

⁽²⁾ Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (See page 81 of this Official Journal).

will be provided from dialogue structures created under international science and technology agreements; forward-looking activities; targeted public consultations, including, where appropriate, consultations of national and regional authorities or stakeholders; and transparent and interactive processes that ensure that responsible research and innovation is supported.

Advice on the identification and design of strategic priorities by the European Research Area and Innovation Committee (ERAC), other ERA-related groups and the Enterprise Policy Group (EPG) shall, where appropriate, also be taken into consideration.

2. Full account shall also be taken of relevant aspects of the research and innovation agendas established by, inter alia, the EIT, European Technology Platforms and European Innovation Partnerships, as well as of advice from scientific panels such as the Scientific Panel for Health.

Article 13

Synergies with national programmes and joint programming

1. For the implementation of Horizon 2020, account shall be taken of the need to build appropriate synergies and complementarities between national and European research and innovation programmes, for example in areas where coordination efforts are made through the Joint Programming Initiatives.

2. Union support to Joint Programming Initiatives may be considered with any support to be delivered through the instruments referred to in Article 26, subject to the conditions and criteria laid down for such instruments.

Article 14

Cross-cutting issues

1. Linkages and interfaces shall be implemented across and within the priorities of Horizon 2020. Particular attention shall be paid in this respect to:

- (a) the development and application of key enabling and industrial technologies as well as future and emerging technologies;
- (b) areas relating to bridging from discovery to market application;
- (c) interdisciplinary and cross-sectoral research and innovation;
- (d) social and economic sciences and humanities;

- (e) climate change and sustainable development;
- (f) fostering the functioning and achievement of the ERA and of the flagship initiative 'Innovation Union';
- (g) framework conditions in support of the flagship initiative "Innovation Union";
- (h) contributing to all relevant Europe 2020 flagship initiatives (including the Digital Agenda for Europe);
- (i) widening participation across the Union in research and innovation and helping to close the research and innovation divide in Europe;
- (j) international networks for excellent researchers and innovators such as European Cooperation in Science and Technology (COST);
- (k) cooperation with third countries;
- (l) responsible research and innovation including gender;
- (m) SME involvement in research and innovation and broader private sector participation;
- (n) enhancing the attractiveness of the research profession; and
- (o) facilitating cross-border and cross-sector mobility of researchers.

2. Where an indirect action is supported which is of high relevance to several of the priorities or specific objectives referred to in Article 5(2) and (3), the financial amount for that action may be combined from the amounts allocated to each priority or specific objective concerned.

Article 15

Evolving nature of science, technology, innovation, economies and society

Horizon 2020 shall be implemented in a manner ensuring that the priorities and actions supported are relevant to changing needs and take account of the evolving nature of science, technology, innovation, economies and society in a globalised world, where innovation includes business, organisational, technological, societal and environmental aspects. Proposals for changes to the priorities and actions under Horizon 2020 shall take into account the external advice referred to in Article 12 as well as the recommendations from the interim evaluation referred to in Article 32(3).

*Article 16***Gender equality**

Horizon 2020 shall ensure the effective promotion of gender equality and the gender dimension in research and innovation content. Particular attention shall be paid to ensuring gender balance, subject to the situation in the field of research and innovation concerned, in evaluation panels and in bodies such as advisory groups and expert groups.

The gender dimension shall be adequately integrated in research and innovation content in strategies, programmes and projects and followed through at all stages of the research cycle.

*Article 17***Researchers' careers**

Horizon 2020 shall be implemented in accordance with Regulation (EU) No 1290/2013, which shall contribute to the reinforcement of a single market for researchers and attractiveness of researchers' careers across the Union in the context of the ERA, by taking into account the transnational character of the majority of the actions supported under it.

*Article 18***Open access**

1. Open access to scientific publications resulting from publicly funded research under Horizon 2020 shall be ensured. It shall be implemented in accordance with Regulation (EU) No 1290/2013.

2. Open access to research data resulting from publicly funded research under Horizon 2020 shall be promoted. It shall be implemented in accordance with Regulation (EU) No 1290/2013.

*Article 19***Ethical principles**

1. All the research and innovation activities carried out under Horizon 2020 shall comply with ethical principles and relevant national, Union and international legislation, including the Charter of Fundamental Rights of the European Union and the European Convention on Human Rights and its Supplementary Protocols.

Particular attention shall be paid to the principle of proportionality, the right to privacy, the right to the protection of personal data, the right to the physical and mental integrity of a person, the right to non-discrimination and the need to ensure high levels of human health protection.

2. Research and innovation activities carried out under Horizon 2020 shall have an exclusive focus on civil applications.

3. The following fields of research shall not be financed:

- (a) research activity aiming at human cloning for reproductive purposes;
- (b) research activity intended to modify the genetic heritage of human beings which could make such changes heritable⁽¹⁾;
- (c) research activities intended to create human embryos solely for the purpose of research or for the purpose of stem cell procurement, including by means of somatic cell nuclear transfer.

4. Research on human stem cells, both adult and embryonic, may be financed, depending both on the contents of the scientific proposal and the legal framework of the Member States involved. No funding shall be granted for research activities that are prohibited in all the Member States. No activity shall be funded in a Member State where such activity is forbidden.

5. The fields of research set out in paragraph 3 of this Article may be reviewed within the context of the interim evaluation set out in Article 32(3) in the light of scientific advances.

*Article 20***Complementarity with other Union programmes**

Horizon 2020 shall be implemented in a way which is complementary to other Union funding programmes and policies, including the European Structural and Investment Funds (ESI Funds), the Common Agricultural Policy, the Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME) (2014–2020), the Erasmus+ programme and the Life Programme.

*Article 21***Synergies with the ESI Funds**

In addition to Union, national and regional structural policies, Horizon 2020 shall also contribute to the closing of the research and innovation divide within the Union by promoting synergies with the ESI Funds. Where possible, cumulative funding may be used as set out in Regulation (EU) No 1290/2013.

⁽¹⁾ Research relating to cancer treatment of the gonads can be financed.

Section II

Specific fields of action

Article 22

Micro, small and medium-sized enterprises

1. Particular attention shall be paid to ensuring the adequate participation of, and research and innovation impact on, micro, small and medium-sized enterprises (SMEs) throughout the implementation of Horizon 2020. Quantitative and qualitative assessments of SME participation shall be undertaken as part of the evaluation and monitoring arrangements.

2. In addition to the establishment of better conditions for SMEs to participate in all relevant opportunities in Horizon 2020, specific actions shall be undertaken. In particular, a dedicated SME instrument that is targeted at all types of SMEs with an innovation potential, in a broad sense, shall be created under a single centralised management system and implemented primarily in a bottom-up manner through a continuously open call tailored to the needs of SMEs as set out under the specific objective "Innovation in SMEs" in Point 3.3.(a) of Part II of Annex I. That instrument shall take account of the specific objective "Leadership in enabling and industrial technologies" set out in Point 1 of Part II of Annex I and each of the specific objectives under the priority "Societal challenges" set out in Points 1 to 7 of Part III of Annex I and shall be implemented in a consistent manner.

3. The integrated approach set out in paragraphs 1 and 2 and the simplification of procedures should lead to a minimum of 20 % of the total combined budget for the specific objective "Leadership in enabling and industrial technologies" and the priority "Societal challenges" going to SMEs.

4. Particular attention shall be paid to the adequate representation of SMEs in public-private partnerships referred to in Article 25.

Article 23

Collaborative projects and partnership programmes

Horizon 2020 should be implemented primarily through transnational collaborative projects, delivered through calls for proposals in the Horizon 2020 work programmes provided for in Decision 2013/743/EU. Those projects will be complemented by public-private and public-public partnerships. The partnerships will be designed with the involvement of Member States and shall develop principles for their internal management.

Article 24

Fast Track to Innovation

Fast Track to Innovation (FTI) shall be implemented in the form of a full-scale pilot in accordance with Article 54 of Regulation (EU) No 1290/2013, establishing an FTI call starting in 2015.

Article 25

Public-private partnerships

1. Horizon 2020 may be implemented through public-private partnerships where all the partners concerned commit to supporting the development and implementation of pre-competitive research and of innovation activities of strategic importance to the Union's competitiveness and industrial leadership or to addressing specific societal challenges. Public-private partnerships shall be implemented in such a way that full participation of the best European players is not impeded.

2. The involvement of the Union in public-private partnerships shall make use of the pre-existing and lean governance structures and may take one of the following forms:

- (a) financial contributions from the Union to joint undertakings established pursuant to Article 187 TFEU under the Seventh Framework Programme, subject to the amendment of their basic acts; to new public-private partnerships established pursuant to Article 187 TFEU; and to other funding bodies referred to in points (iv) and (vii) of point (c) of Article 58(1) of Regulation (EU, Euratom) No 966/2012. This form of partnerships shall only be implemented where the scope of the objectives pursued and the scale of the resources required justify it taking full account of the relevant impact assessments, and where other forms of partnerships would not fulfil the objectives or would not generate the necessary leverage;
- (b) contractual arrangements between the partners referred to in paragraph 1, which specify the objectives of the partnership, respective commitments of the partners, key performance indicators, and outputs to be delivered, including the identification of research and innovation activities that require support from Horizon 2020.

With a view to involving interested partners, including, as appropriate, end-users, universities, SMEs and research institutions, public-private partnerships shall make public funds accessible through transparent processes and mainly through competitive calls, governed by rules for participation in compliance with those of Horizon 2020. Exceptions to the use of competitive calls should be duly justified.

3. Public-private partnerships shall be identified and implemented in an open, transparent and efficient way. Their identification shall be based on all of the following criteria:

- (a) the demonstration of the added value of the action at Union level and of the choice of the instrument to be used;
- (b) the scale of impact on industrial competitiveness, job creation, sustainable growth and socio-economic issues, including societal challenges, assessed against clearly specified and measurable objectives;

- (c) the long-term commitment, including a balanced contribution from all partners based on a shared vision and clearly defined objectives;
- (d) the scale of the resources involved and the ability to leverage additional investments in research and innovation;
- (e) a clear definition of roles for each of the partners and agreed key performance indicators over the period chosen;
- (f) complementarity with other parts of Horizon 2020 and alignment with the Union research and innovation strategic priorities, in particular those of the Europe 2020 strategy.

Where appropriate, complementarity between priorities and activities and the involvement of Member States shall be ensured in public-private partnerships.

4. The research priorities covered by public-private partnerships may, where appropriate, be included in regular calls in Horizon 2020 work programmes, in order to develop new synergies with research and innovation activities of strategic importance.

Article 26

Public-public partnerships

1. Horizon 2020 shall contribute to the strengthening of public-public partnerships, as and when appropriate, where actions at regional, national or international level are jointly implemented within the Union.

Particular attention shall be paid to Joint Programming Initiatives between Member States. Joint Programming Initiatives receiving support from Horizon 2020 shall remain open to the participation of any Member State or associated country.

2. Public-public partnerships may be supported either within, or across, the priorities set out in Article 5(2), in particular through:

- (a) an ERA-NET instrument using grants to support public-public partnerships in their preparation, establishment of networking structures, design, implementation and coordination of joint activities, as well as Union topping-up of no more than one joint call a year, and of actions of a transnational nature;
- (b) Union participation in programmes undertaken by several Member States in accordance with Article 185 TFEU where the participation is justified by the scope of the objectives pursued and the scale of the resources required.

For the purposes of point (a) of the first subparagraph, top-up funding shall be conditional on the demonstration of the added value of the action at Union level and on prior indicative financial commitments in cash or in kind of the participating entities to the joint calls and actions. One of the objectives of the ERA-NET instrument may, where possible, be to harmonise rules and implementation modalities of the joint calls and actions. It may also be used in order to prepare for an initiative pursuant to Article 185 TFEU.

For the purposes of point (b) of the first subparagraph, such initiatives shall only be proposed in cases where there is a need for a dedicated implementation structure and where there is a high level of commitment of the participating countries to integration at scientific, management and financial levels. In addition, proposals for such initiatives shall be identified on the basis of all of the following criteria:

- (a) a clear definition of the objective to be pursued and its relevance to the objectives of Horizon 2020 and broader Union policy objectives;
- (b) indicative financial commitments of the participating countries, in cash or in kind, including prior commitments to align national and/or regional investments for transnational research and innovation and, where appropriate, to pool resources;
- (c) the added value of the action at Union level;
- (d) the critical mass, with regard to the size and the number of programmes involved, the similarity or complementarity of activities and the share of relevant research they cover;
- (e) the appropriateness of Article 185 TFEU for achieving the objectives.

Article 27

International cooperation with third countries and international organisations

1. Legal entities, as defined in point 13 of Article 2(1) of Regulation (EU) No 1290/2013, established in third countries and international organisations shall be eligible to participate in indirect actions of Horizon 2020 under the conditions set out in that Regulation. International cooperation with third countries and international organisations shall be promoted and integrated into Horizon 2020 to achieve, in particular, the following objectives:

- (a) strengthening the Union's excellence and attractiveness in research and innovation as well as its economic and industrial competitiveness;

(b) effectively tackling common societal challenges;

(c) supporting the Union's external and development policy objectives, complementing external and development programmes including international commitments and their related goals, such as the achievement of the United Nations' Millennium Development Goals. Synergies with other Union policies will be sought.

2. Targeted actions with the objective of promoting cooperation with specific third countries or groups of third countries, including strategic partners of the Union, shall be implemented on the basis of a strategic approach as well as common interest, priorities, and mutual benefit, taking into account their scientific and technological capabilities and specific needs, market opportunities, and the expected impact of such actions.

Reciprocal access to third country programmes should be encouraged and, where appropriate, monitored. In order to maximise the impact of international cooperation, coordination and synergies with initiatives of Member States and associated countries shall be promoted. The nature of the cooperation may vary according to the specific partner countries.

Cooperation priorities shall take into account developments in Union policies, opportunities for cooperation with third countries, and fair and equitable dealing with intellectual property rights.

3. In addition, horizontal and cross-cutting activities to promote the strategic development of international cooperation shall be implemented under Horizon 2020.

Article 28

Information, communication, exploitation and dissemination

The Commission shall implement information and communication actions concerning Horizon 2020, including communication measures concerning supported projects and results. In particular, it shall provide timely and thorough information to Member States.

The part of the Horizon 2020 budget allocated to communication shall also cover the corporate communication of the Union's political priorities to the extent that they are related to the general objective of this Regulation.

Activities to disseminate information and carry out communication activities shall be an integral part of all actions supported by Horizon 2020. Information and communication concerning Horizon 2020, including on supported projects, shall be made available and accessible in digital form.

In addition, the following specific actions shall be supported:

(a) initiatives aimed at widening awareness and facilitating access to funding under Horizon 2020, in particular for those regions or types of participants that have a relatively low participation;

(b) targeted assistance to projects and consortia to provide them with adequate access to the necessary skills to optimise the communication, exploitation and dissemination of results;

(c) actions which bring together and disseminate results from a range of projects, including those that may be funded from other sources, to provide user-friendly databases and reports that summarise key findings, and, where relevant, communication and dissemination to the scientific community, industry and the general public;

(d) dissemination to policy makers, including standardisation bodies, to promote the use of policy-relevant results by the appropriate bodies at international, Union, national and regional level;

(e) initiatives to foster dialogue and debate on scientific, technological and innovation related issues with the public through involvement of the research and innovation community and civil society organisations, and to take advantage of social media and other innovative technologies and methodologies, especially in order to help raise public awareness of the benefits of research and innovation in meeting societal challenges.

CHAPTER III

Control

Article 29

Control and audit

1. The control system set up for the implementation of this Regulation shall be so designed as to provide reasonable assurance of achieving sufficient reduction and adequate management of the risks relating to the effectiveness and efficiency of the operations as well as the legality and regularity of the underlying transactions, taking into account the multi-annual character of programmes as well as the nature of the payments concerned.

2. The control system shall ensure an appropriate balance between trust and control, taking into account administrative and other costs of controls at all levels, especially for participants, so that the objectives of Horizon 2020 can be achieved and the most excellent researchers and the most innovative enterprises are attracted to it.

3. As part of the control system, the audit strategy for expenditure on indirect actions under Horizon 2020 shall be based on the financial audit of a representative sample of expenditure across Horizon 2020 as a whole. That representative sample shall be complemented by a selection based on an assessment of the risks related to expenditure.

Audits of expenditure on indirect actions under Horizon 2020 shall be carried out in a coherent manner in accordance with the principles of economy, efficiency and effectiveness in order to minimise the audit burden on the participants.

Article 30

Protection of the financial interests of the Union

1. The Commission shall take appropriate measures to ensure that, when actions financed under this Regulation are implemented, the financial interests of the Union are protected by the application of preventive measures against fraud, corruption and any other illegal activities, by effective checks and, if irregularities are detected, by the recovery of the amounts wrongly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties.

2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on the spot, over all grant beneficiaries, contractors and subcontractors who have received Union funds under Horizon 2020.

Without prejudice to paragraph 3, audits by the Commission may be carried out up to two years after the payment of the balance.

3. The European Anti-Fraud Office (OLAF) may carry out investigations, including on-the-spot checks and inspections, in accordance with the provisions and procedures laid down in Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council⁽¹⁾ and Council Regulation (Euratom, EC) No 2185/96⁽²⁾, with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with any Horizon 2020 grant agreement, grant decision or contract.

4. Without prejudice to paragraphs 1, 2 and 3, cooperation agreements with third countries and with international organisations, grant agreements, grant decisions and contracts, resulting from the implementation of this Regulation, shall contain provisions expressly empowering the Commission, the Court of Auditors and OLAF to conduct such audits and investigations, in accordance with their respective competences.

⁽¹⁾ Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1).

⁽²⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

CHAPTER IV

Monitoring and evaluation

Article 31

Monitoring

1. The Commission shall monitor annually the implementation of Horizon 2020, its specific programme and the activities of the EIT. That monitoring, which shall be based on quantitative and, where appropriate, qualitative evidence, shall include information on cross-cutting topics such as social and economic sciences and humanities, sustainability and climate change, including information on the amount of climate related expenditure, SME participation, private sector participation, gender equality, widening participation and progress against performance indicators. The monitoring shall also include information on the extent of funding for public-private and public-public partnerships, including Joint Programming Initiatives. The monitoring of funding for public-private partnerships shall, where appropriate, be undertaken in close consultation with the participants.

2. The Commission shall report and make publicly available the results of that monitoring.

Article 32

Evaluation

1. Evaluations shall be carried out in a sufficiently timely manner to feed into the decision-making process.

2. By 31 December 2017, the Commission shall carry out, with the assistance of independent experts selected on the basis of a transparent process, a review of the EIT, taking into account the evaluation provided for in Article 16 of Regulation (EC) No 294/2008. The KIC call in 2018 shall be launched subject to a positive outcome of that review. The review shall assess the progress of the EIT against all of the following:

- (a) the level of consumption and the efficiency in the use of the funds allocated according to Article 6(3) of this Regulation, differentiating between the amount used for the development of the first wave of KICs and the effect of the seed money for the subsequent waves, and the ability of the EIT to attract funds from the partners in the KICs and especially from the private sector, as set out in Regulation (EC) No 294/2008;
- (b) the contribution of the EIT and the KICs to the priority "Societal challenges" and the specific objective "Leadership in enabling and industrial technologies" and the performance assessed on the basis of the indicators defined in Annex I;
- (c) the contribution of the EIT and the KICs to the integration of higher education, research and innovation;

(d) the ability of the KICs to integrate relevant new partners where they can provide added value.

3. By 31 December 2017, and taking into account the ex-post evaluation of the Seventh Framework Programme to be completed by 31 December 2015 and the review of the EIT, the Commission shall carry out, with the assistance of independent experts, selected on the basis of a transparent process, an interim evaluation of Horizon 2020, its specific programme, including the European Research Council (ERC), and the activities of the EIT.

The interim evaluation shall assess the progress of the different parts of Horizon 2020 against all of the following:

- (a) the achievements (at the level of results and progress towards achieving an impact, based, where applicable, on the indicators outlined in Annex II of the specific programme) of the objectives of Horizon 2020 and continued relevance of all related measures;
- (b) the efficiency and use of resources, with particular attention to cross-cutting issues and other elements referred to in Article 14(1); and
- (c) Union added value.

As part of the interim evaluation both existing and new public-private partnerships, including the JTI, shall be subject to an in-depth assessment, which shall include, inter alia, analysis of their openness, transparency and effectiveness. That assessment shall take into consideration the evaluation of the EIT as provided for in Article 16 of Regulation (EC) No 294/2008 so as to allow for an assessment based on common principles.

As part of the interim evaluation, FTI shall be subject to an in-depth assessment which shall include an assessment of inter alia its contribution to innovation, industry participation, participation of new applicants, operational effectiveness and financing, and leverage of private investment. Further implementation of the FTI shall be determined on the basis of the evaluation results, and may be adjusted or expanded accordingly.

The interim evaluation shall take into consideration aspects relating to the dissemination and exploitation of research results.

The interim evaluation shall also take into consideration the scope for further simplification and aspects relating to access to funding opportunities for participants in all regions and for the private sector, notably SMEs, as well as the scope for promoting gender balance. It shall additionally take into account the contribution of the measures to the objectives of the Europe 2020 strategy, results as regards the long-term impact of the predecessor measures, and the degree of synergy and interaction with other Union funding programmes, including the ESI Funds.

As part of the interim evaluation, the funding model of Horizon 2020 shall be thoroughly assessed against, inter alia, the following indicators:

- the participation of participants that have at their disposal high-end research infrastructures or have a history of using full-costing in the Seventh Framework Programme;
- the simplification for participants that have at their disposal high-end research infrastructures or have a history of using full-costing in the Seventh Framework Programme;
- the acceptance of the usual accounting practices of beneficiaries;
- extent of use of the additional remuneration to personnel as referred to in Article 27 of Regulation (EU) No 1290/2013.

The interim evaluation shall also take into consideration, where appropriate, information on coordination with research and innovation activities carried out by Member States, including in areas where there are Joint Programming Initiatives.

4. By 31 December 2023, the Commission shall carry out, with the assistance of independent experts, selected on the basis of a transparent process, an ex-post evaluation of Horizon 2020, its specific programme and the activities of the EIT. That evaluation shall cover the rationale, implementation and achievements, as well as the longer-term impacts and sustainability of the measures, to feed into a decision on a possible renewal, modification or suspension of any subsequent measure. The evaluation shall take into consideration aspects relating to the dissemination and exploitation of research results.

5. The performance indicators for assessing progress against the general objective of Horizon 2020 and for the EIT, as set out in the introduction of Annex I, and for the specific objectives as established in the specific programme, including relevant baselines, shall provide the minimum basis for assessing the extent to which the objectives of Horizon 2020 have been achieved.

6. Where appropriate and available, Member States shall provide the Commission with the data and information necessary to make it possible to monitor and evaluate the measures concerned.

7. The Commission shall communicate the conclusions of the evaluations referred to in this Article, accompanied by its observations, to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions.

TITLE III

FINAL PROVISIONS

*Article 33***Repeal and transitional provisions**

1. Decision No 1982/2006/EC is repealed with effect from 1 January 2014.
2. Notwithstanding paragraph 1, actions initiated under Decision No 1982/2006/EC and financial obligations related to those actions shall continue to be governed by that Decision until their completion.
3. The financial envelope referred to in Article 6 of this Regulation may also cover the technical and administrative assistance expenses necessary to ensure the transition from the measures adopted under Decision No 1982/2006/EC to Horizon 2020.

*Article 34***Entry into force**

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

ANNEX I

Broad lines of the specific objectives and activities

The general objective of Horizon 2020 is to build a society and a world-leading economy based on knowledge and innovation across the whole Union, while contributing to sustainable development. It will support the Europe 2020 strategy and other Union policies as well as the achievement and functioning of the European Research Area (ERA).

The performance indicators for assessing progress against this general objective are:

- the research and development (R&D) target (3 % of GDP) of the Europe 2020 strategy;
- the innovation output indicator in the context of the Europe 2020 strategy ⁽¹⁾;
- the share of researchers in the active population.

This general objective shall be pursued through three distinct, yet mutually reinforcing, priorities, each containing a set of specific objectives. They will be implemented in a seamless manner in order to foster interactions between the different specific objectives, avoid any duplication of effort and reinforce their combined impact.

The Joint Research Centre (JRC) shall contribute to the general objective and priorities of Horizon 2020 with the specific objective of providing customer-driven scientific and technical support to Union policies.

The European Institute of Innovation and Technology (EIT) shall contribute to the general objective and priorities of Horizon 2020 with the specific objective of integrating the knowledge triangle of higher education, research and innovation. The indicators for assessing the performance of the EIT are:

- organisations from universities, business and research integrated in the Knowledge and Innovation Communities (KICs);
- collaboration inside the knowledge triangle leading to the development of innovative products, services and processes.

This Annex sets out the broad lines of the specific objectives and activities referred to in Article 5(2), (3), (4) and (5).

Cross-cutting issues and support measures in Horizon 2020

Cross-cutting issues, an indicative list of which is found in Article 14, will be promoted between specific objectives of the three priorities as necessary to develop new knowledge, key competences and major technological breakthroughs as well as translating knowledge into economic and societal value. Furthermore, in many cases, interdisciplinary solutions will have to be developed which cut across the multiple specific objectives of Horizon 2020. Horizon 2020 will provide incentives for actions dealing with such cross-cutting issues, including by the efficient bundling of budgets.

Social sciences and humanities

Social sciences and humanities research will be fully integrated into each of the priorities of Horizon 2020 and each of the specific objectives and will contribute to the evidence base for policy making at international, Union, national, regional and local level. In relation to societal challenges, social sciences and humanities will be mainstreamed as an essential element of the activities needed to tackle each of the societal challenges to enhance their impact. The specific objective of the societal challenge 'Europe in a changing world - Inclusive, innovative and reflective societies' will support social sciences and humanities research by focusing on inclusive, innovative and reflective societies.

Science and society

The relationship between science and society as well as the promotion of responsible research and innovation, science education and culture shall be deepened and public confidence in science reinforced by activities of Horizon 2020 favouring the informed engagement of citizens and civil society in research and innovation.

⁽¹⁾ COM(2013)0624.

Gender

Promoting gender equality in science and innovation is a commitment of the Union. In Horizon 2020, gender will be addressed as a cross-cutting issue in order to rectify imbalances between women and men, and to integrate a gender dimension in research and innovation programming and content.

SMEs

Horizon 2020 will encourage and support the participation of SMEs in an integrated way across all specific objectives. In accordance with Article 22, measures set out under the specific objective 'Innovation in SMEs' (dedicated SME instrument) shall be applied in the specific objective 'Leadership in enabling and industrial technologies' and in the priority 'Societal challenges'.

Fast Track to Innovation (FTI)

FTI, as set out in Article 24, will support innovation actions under the specific objective "Leadership in enabling and industrial technologies" and under the priority 'Societal challenges', with a bottom-up-driven logic on the basis of a continuously open call, and with 'time to grant' not exceeding six months.

Widening participation

The research and innovation potential of the Member States, despite some recent convergence, remains very different, with large gaps between "innovation leaders" and "modest innovators". Activities shall help close the research and innovation divide in Europe by promoting synergies with the European Structural and Investment Funds (ESI Funds) and also by specific measures to unlock excellence in low performing research, development and innovation (RDI) regions, thereby widening participation in Horizon 2020 and contributing to the realisation of the ERA.

International Cooperation

International cooperation with third countries and international, regional or global organisations is necessary to effectively address many specific objectives set out in Horizon 2020. International cooperation is essential for frontier and basic research in order to reap the benefits from emerging science and technology opportunities. Cooperation is necessary for addressing societal challenges and enhancing the competitiveness of European industry. Promoting R&I staff mobility at an international level is also crucial to enhance this global cooperation. International cooperation in research and innovation is a key aspect of the Union's global commitments. International cooperation will, therefore, be promoted in each of the three priorities of Horizon 2020. In addition, dedicated horizontal activities will be supported in order to ensure the coherent and effective development of international cooperation across Horizon 2020.

Sustainable development and climate change

Horizon 2020 will encourage and support activities towards exploiting Europe's leadership in the race to develop new processes and technologies promoting sustainable development, in a broad sense, and combating climate change. Such a horizontal approach, fully integrated in all Horizon 2020 priorities, will help the Union to prosper in a low-carbon, resource-constrained world while building a resource-efficient, sustainable and competitive economy.

Bridging from discovery to market application

Bridging actions throughout Horizon 2020 are aimed at bringing discovery to market application, leading to exploitation and commercialisation of ideas whenever appropriate. The actions should be based on a broad innovation concept and stimulate cross-sectoral innovation.

Cross-cutting support measures

The cross-cutting issues will be supported by a number of horizontal support measures, including support to: enhancing the attractiveness of the research profession, including the general principles of the European Charter for Researchers; strengthening the evidence base and the development of and support for ERA (including the five ERA initiatives) and the Innovation Union; improving framework conditions in support of the Innovation Union, including the principles of the Commission Recommendation on the management of intellectual property ⁽¹⁾ and exploring the possibility of setting up an European Intellectual Property Rights valorisation instrument; administration and coordination of international networks for excellent researchers and innovators, such as COST.

⁽¹⁾ Commission Recommendation on the management of intellectual property in knowledge transfer activities and Code of Practice for universities and other public research organisations (C(2008) 1329, of 10.4.2008).

PART I.

PRIORITY 'Excellent science'

This Part aims to reinforce and extend the excellence of the Union's science base and to consolidate the ERA in order to make the Union's research and innovation system more competitive on a global scale. It consists of four specific objectives:

- (a) "The European Research Council (ERC)" shall provide attractive and flexible funding to enable talented and creative individual researchers and their teams to pursue the most promising avenues at the frontier of science, on the basis of Union-wide competition.
- (b) "Future and emerging technologies (FET)" shall support collaborative research in order to extend Europe's capacity for advanced and paradigm-changing innovation. It shall foster scientific collaboration across disciplines on radically new, high-risk ideas and accelerate development of the most promising emerging areas of science and technology as well as the Union-wide structuring of the corresponding scientific communities.
- (c) "Marie Skłodowska-Curie actions" shall provide excellent and innovative research training as well as attractive career and knowledge-exchange opportunities through cross-border and cross-sector mobility of researchers to best prepare them to face current and future societal challenges.
- (d) "Research infrastructures" shall develop and support excellent European research infrastructures and assist them to contribute to the ERA by fostering their innovation potential, attracting world-level researchers and training human capital, and complement this with the related Union policy and international cooperation.

Each of those objectives has been proven to have high Union added value. Together, they form a powerful and balanced set of activities which, in concert with activities at national, regional and local level, span the breadth of Europe's needs regarding advanced science and technology. Bringing them together in a single programme will enable them to operate with greater coherence, in a rationalised, simplified and more focused way, while maintaining the continuity which is vital to sustain their effectiveness.

The activities are inherently forward-looking, building skills in the long term, focusing on the next generation of science, technology, researchers and innovations and providing support for emerging talent from across the Union and associated countries, as well as worldwide. In view of their science-driven nature and largely 'bottom-up', investigator-driven funding arrangements, the European scientific community will play a strong role in determining the avenues of research followed under Horizon 2020

PART II.

PRIORITY 'Industrial leadership'

This Part aims to speed up development of the technologies and innovations that will underpin tomorrow's businesses and help innovative European SMEs to grow into world-leading companies. It consists of three specific objectives:

- (a) "Leadership in enabling and industrial technologies" shall provide dedicated support for research, development and demonstration and, where appropriate, for standardisation and certification, on information and communications technology (ICT), nanotechnology, advanced materials, biotechnology, advanced manufacturing and processing and space. Emphasis will be placed on interactions and convergence across and between the different technologies and their relations to societal challenges. User needs shall be taken into account in all these fields.
- (b) "Access to risk finance" shall aim to overcome deficits in the availability of debt and equity finance for R&D and innovation-driven companies and projects at all stages of development. Together with the equity instrument of the Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME) (2014-2020) it shall support the development of Union-level venture capital.
- (c) "Innovation in SMEs" shall provide SME-tailored support to stimulate all forms of innovation in SMEs, targeting those with the potential to grow and internationalise across the single market and beyond.

The activities shall follow a business-driven agenda. The budgets for the specific objectives 'Access to risk finance' and 'Innovation in SMEs' will follow a demand-driven, bottom-up logic. Those budgets shall be complemented by the use of financial instruments. A dedicated SME instrument shall be implemented primarily in a bottom-up manner, tailored to the needs of SMEs, taking account of the specific objectives of the priority 'Societal challenges' and the specific objective 'Leadership in enabling and industrial technologies'.

Horizon 2020 will take an integrated approach to the participation of SMEs, taking into account, inter alia, their knowledge and technology transfer needs, which should lead to a minimum of 20 % of the total combined budgets for all specific objectives of the priority 'Societal challenges' and the specific objective 'Leadership in enabling and industrial technologies' being devoted to SMEs.

The specific objective 'Leadership in enabling and industrial technologies' shall follow a technology-driven approach to develop enabling technologies that can be used in multiple areas, industries and services. Applications of these technologies to meet societal challenges shall be supported together with the priority 'Societal challenges'.

PART III.

PRIORITY 'Societal challenges'

This Part responds directly to the policy priorities and societal challenges that are identified in the Europe 2020 strategy and that aim to stimulate the critical mass of research and innovation efforts needed to achieve the Union's policy goals. Funding shall be focused on the following specific objectives:

- (a) Health, demographic change and well-being;
- (b) Food security, sustainable agriculture and forestry, marine, maritime and inland water research, and the bioeconomy;
- (c) Secure, clean and efficient energy;
- (d) Smart, green and integrated transport;
- (e) Climate action, environment, resource efficiency and raw materials;
- (f) Europe in a changing world - Inclusive, innovative and reflective societies;
- (g) Secure societies - Protecting freedom and security of Europe and its citizens.

All the activities shall take a challenge-based approach, which may include basic research, applied research, knowledge transfer or innovation, focusing on policy priorities without predetermining the precise choice of technologies or solutions that should be developed. Non-technological, organisational and systems innovation as well as public sector innovation will be given attention in addition to technology-driven solutions. The emphasis shall be on bringing together a critical mass of resources and knowledge across different fields, technologies and scientific disciplines and research infrastructures in order to address the challenges. The activities shall cover the full cycle from basic research to market, with a new focus on innovation-related activities, such as piloting, demonstration activities, test-beds, support for public procurement, design, end-user driven innovation, social innovation, knowledge transfer and market take-up of innovations and standardisation.

PART IV.

SPECIFIC OBJECTIVE 'SPREADING EXCELLENCE AND WIDENING PARTICIPATION'

The specific objective 'Spreading excellence and widening participation' is to fully exploit the potential of Europe's talent pool and to ensure that the benefits of an innovation-led economy are both maximised and widely distributed across the Union in accordance with the principle of excellence.

PART V.

SPECIFIC OBJECTIVE 'SCIENCE WITH AND FOR SOCIETY'

The aim of the specific objective 'Science with and for society' is to build effective cooperation between science and society, to recruit new talent for science and to pair scientific excellence with social awareness and responsibility.

PART VI.

NON-NUCLEAR DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC)

The JRC's activities shall be an integral part of Horizon 2020, in order to provide robust, evidence-based support for Union policies. This shall be driven by customer needs, complemented by forward-looking activities.

PART VII.

THE EUROPEAN INSTITUTE OF INNOVATION AND TECHNOLOGY (EIT)

The EIT shall play a major role by bringing together excellent research, innovation and higher education thus integrating the knowledge triangle. The EIT shall do so primarily through the KICs. In addition it shall ensure that experiences are shared between and beyond the KICs through targeted dissemination and knowledge sharing measures, thereby promoting a faster uptake of innovation models across the Union.

PART I

EXCELLENT SCIENCE**1. European Research Council (ERC)****1.1. Specific objective**

The specific objective is to reinforce the excellence, dynamism and creativity of European research.

Europe has set out its ambition to move to a new economic model based on smart, sustainable and inclusive growth. This type of transformation will need more than incremental improvements to current technologies and knowledge. It will require much higher capacity for basic research and science-based innovation fuelled by radical new knowledge, allowing Europe to take a leading role in creating the scientific and technological paradigm shifts which will be the key drivers of productivity growth, competitiveness, wealth, sustainable development and social progress in the future industries and sectors. Such paradigm shifts have historically tended to originate from the public-sector science base before going on to lay the foundations for whole new industries and sectors.

World-leading innovation is closely associated with excellent science. Once the undisputed leader, Europe has fallen behind in the race to produce the very best cutting-edge science and has played a secondary role to the United States in the major post-war technological advances. Although the Union remains the largest producer of scientific publications in the world, the United States produces twice as many of the most influential papers (the top 1 % by citation count). Similarly, international university rankings show that US universities dominate the top places. In addition, 70 % of the world's Nobel Prize winners are based in the United States.

One part of the challenge is that while Europe and the United States invest similar amounts in their public-sector science bases, the Union has nearly three times as many public-sector researchers, resulting in significantly lower investment per researcher. Moreover, US funding is more selective about allocating resources to the leading researchers. This helps to explain why the Union's public-sector researchers are, on average, less productive and, altogether, make less combined scientific impact than their far less numerous US counterparts.

Another major part of the challenge is that in many European countries the public and private sector still does not offer sufficiently attractive conditions for the best researchers. It can take many years before talented young researchers are able to become independent scientists in their own right. This leads to a dramatic waste of Europe's research potential by delaying and in some cases even inhibiting the emergence of the next generation of researchers, who bring new ideas and energy, and by enticing excellent researchers starting their career to seek advancement elsewhere.

Furthermore, these factors compound Europe's relative unattractiveness in the global competition for scientific talent.

1.2. Rationale and Union added value

The ERC was created to provide Europe's best researchers, both women and men, with the resources they need to allow them to compete better at global level, by funding individual teams on the basis of pan-European competition. It operates autonomously: an independent Scientific Council made up of scientists, engineers and scholars of the highest repute and expertise, of both women and men in different age groups, establishes the

overall scientific strategy and has full authority over decisions on the type of research to be funded. These are essential features of the ERC, guaranteeing the effectiveness of its scientific programme, the quality of its operations and peer-review process and its credibility in the scientific community.

Operating across Europe on a competitive basis, the ERC is able to draw on a wider pool of talents and ideas than would be possible for any national scheme. The best researchers and the best ideas compete against each other. Applicants know they have to perform at the highest level, the reward being flexible funding on a level playing field, irrespective of local bottlenecks or the availability of national funding.

Frontier research funded by the ERC is thereby expected to have a substantial direct impact in the form of advances at the frontiers of knowledge, opening the way to new and often unexpected scientific and technological results and new areas for research which, ultimately, can generate the radically new ideas which will drive innovation and business inventiveness and tackle societal challenges. This combination of excellent individual scientists with innovative ideas underpins every stage of the innovation chain.

Beyond this, the ERC has a significant structural impact by generating a powerful stimulus for driving up the quality of the European research system, over and above the researchers and projects which the ERC funds directly. ERC-funded projects and researchers set a clear and inspirational target for frontier research in Europe, raise its profile and make it more attractive for the best researchers at global level. The prestige of hosting ERC grant-holders and the accompanying 'stamp of excellence' are intensifying competition between Europe's universities and other research organisations to offer the most attractive conditions for top researchers. And the ability of national systems and individual research institutions to attract and host ERC grant-winners sets a benchmark allowing them to assess their relative strengths and weaknesses and reform their policies and practices accordingly. ERC funding is therefore in addition to ongoing efforts at Union, national and regional level to reform, build capacity and unlock the full potential and attractiveness of the European research system.

1.3. *Broad lines of the activities*

The fundamental activity of the ERC shall be to provide attractive long-term funding to support excellent investigators and their research teams to pursue ground-breaking, high-gain/high-risk research.

ERC funding shall be awarded in accordance with the following well-established principles. Scientific excellence shall be the sole criterion on which ERC grants are awarded. The ERC shall operate on a 'bottom-up' basis without predetermined priorities. The ERC grants shall be open to individual teams of researchers of any age, gender, and from any country in the world, working in Europe. The ERC shall aim to foster healthy competition across Europe based on robust, transparent and impartial evaluation procedures which address, in particular, potential gender bias.

The ERC shall give particular priority to assisting the best starting researchers with excellent ideas to make the transition to independence by providing adequate support at the critical stage when they are setting up or consolidating their own research team or programme. The ERC will also continue to provide appropriate levels of support for established researchers.

The ERC shall also give support, as necessary, to new ways of working in the scientific world with the potential to create breakthrough results and to facilitate exploration of the commercial and social innovation potential of the research which it funds.

By 2020, the ERC shall therefore aim to demonstrate that the best researchers are participating in the ERC's competitions, that ERC funding has led to scientific publications of the highest quality and to research results with high societal and economic potential impact, and that the ERC has contributed significantly to making Europe a more attractive environment for the world's best scientists. In particular, the ERC shall target a measurable improvement in the Union's share of the world's top 1 % most highly cited publications. In addition it shall aim at a substantial increase in the number of excellent researchers from outside Europe whom it funds. The ERC shall share experience and best practices with regional and national research funding agencies in order to promote the support of excellent researchers. In addition, the ERC shall further raise the visibility of its programmes.

The ERC's Scientific Council shall continuously monitor the ERC's operations and evaluation procedures and consider how best to achieve its objectives by means of grant schemes that emphasise effectiveness, clarity, stability and simplicity, both for applicants and in their implementation and management, and, as necessary, to respond to emerging needs. It shall endeavour to sustain and further refine the ERC's world-class peer-review system which is based on fully transparent, fair and impartial treatment of proposals so that it can identify

ground-breaking scientific excellence, breakthrough ideas and talent regardless of a researcher's gender, nationality, institution or age. Finally, the ERC shall continue conducting its own strategic studies to prepare for and support its activities, maintain close contacts with the scientific community, the regional and national funding agencies and other stakeholders and aim to make its activities complement research conducted at other levels.

The ERC will ensure transparency in communication about its activities and results to the scientific community and the general public and maintain updated data from funded projects.

2. **Future and Emerging Technologies (FET)**

2.1. *Specific objective*

The specific objective is to foster radically new technologies with the potential to open new fields for scientific knowledge and technologies and contribute to the European next generation industries, by exploring novel and high-risk ideas building on scientific foundations. By providing flexible support to goal-oriented and interdisciplinary collaborative research on various scales and by adopting innovative research practices, the aim is to identify and seize opportunities of long-term benefit for citizens, the economy and society. FET will bring Union added value to the frontiers of modern research.

FET shall promote research and technology beyond what is known, accepted or widely adopted and shall foster novel and visionary thinking to open promising paths towards powerful new technologies, some of which could develop into leading technological and intellectual paradigms for the decades ahead. FET shall foster efforts to pursue small-scale research opportunities across all areas, including emerging themes and grand scientific and technological challenges that require close collaboration between programmes across Europe and beyond. This approach shall be driven by excellence and extends to exploring pre-competitive ideas for shaping the future of technology, enabling society and industry to benefit from multi-disciplinary research collaboration that needs to be engaged at European level by making the link between research driven by science and research driven by societal goals and challenges or by industrial competitiveness.

2.2. *Rationale and Union added value*

Radical breakthroughs with a transformative impact increasingly rely on intense collaboration across disciplines in science and technology (for instance, information and communication, biology, bioengineering and robotics, chemistry, physics, mathematics, medicine modelling, Earth system sciences, material sciences, neuro- and cognitive sciences, social sciences or economics) and with the arts, behavioural sciences and humanities. This may require not only excellence in science and technology but also new attitudes and novel interactions between a broad range of players in research.

While some ideas can be developed on a small scale, others may be so challenging that they require a large collaborative effort over a substantial period of time. Major economies worldwide have recognised this, and there is growing global competition to identify and pursue emerging technological opportunities at the frontier of science which can generate a considerable impact on innovation and benefits for society. To be effective, these types of activities may need to be built up quickly to a large scale by a common European effort around common goals to build critical mass, foster synergies and obtain optimal leveraging effects.

FET shall address the entire spectrum of science-driven innovation: from bottom-up, small-scale early explorations of embryonic and fragile ideas to building new research and innovation communities around transformative emerging research areas and large collaborative research initiatives built around a research agenda aiming to achieve ambitious and visionary goals. These three levels of engagement each have their own specific value, while being complementary and synergistic. For example, small-scale explorations can reveal needs for developing new themes that can lead to large-scale action based on appropriate roadmaps. They may involve a wide range of research players, including young researchers and research-intensive SMEs, and stakeholder communities (civil society, policymakers, industry and public researchers), clustered around evolving research agendas as they take shape, mature and diversify.

2.3. *Broad lines of activities*

While FET aims to be visionary, transformative and unconventional, its activities shall follow different logics, from completely open to varying degrees of structuring of topics, communities and funding.

The activities shall give firmer shape to different logics for action, on the appropriate scale, identifying and seizing opportunities of long-term benefit for citizens, the economy and society:

- (a) By fostering novel ideas ('FET Open'), FET shall support early stage science and technology research exploring new foundations for radically new future technologies by challenging current paradigms and venturing into unknown areas. A bottom-up selection process widely open to any research ideas shall build up a diverse portfolio of targeted projects. Early detection of promising new areas, developments and trends, along with attracting new and high-potential research and innovation players, will be key factors.
- (b) By nurturing emerging themes and communities ('FET Proactive'), FET shall, in close association with the societal challenges and industrial leadership themes, address a number of promising exploratory research themes with the potential to generate a critical mass of inter-related projects that, together, make up a broad and multi-faceted exploration of the themes and build a European pool of knowledge.
- (c) By pursuing grand interdisciplinary scientific and technological challenges ('FET Flagships'), FET shall, taking into full account the outcome of FET preparatory projects, support ambitious large-scale, science and technology-driven research aiming to achieve a scientific and technological breakthrough in areas identified as relevant in an open and transparent manner involving the Member States and relevant stakeholders. Such activities could benefit from the coordination between European, national and regional agendas. The scientific advance should provide a strong and broad basis for future technological innovation and economic application, plus novel benefits for society. These activities shall be realised using the existing funding instruments.

40 % of FET resources will be devoted to FET Open.

3. **Marie Skłodowska-Curie Actions**

3.1. *Specific objective*

The specific objective is to ensure optimal development and dynamic use of Europe's intellectual capital in order to generate, develop and transfer new skills, knowledge and innovation and, thus, to realise its full potential across all sectors and regions.

Well-trained, dynamic and creative researchers are the essential element for the best science and the most productive research-based innovation.

Although Europe hosts a large and diversified pool of skilled human resources for research and innovation, this needs to be constantly replenished, improved and adapted to the rapidly evolving needs of the labour market. In 2011 only 46 % of this pool worked in the business sector, which is much lower than in Europe's main economic competitors, e.g. 69 % in China, 73 % in Japan and 80 % in the United States. In addition, demographic factors mean that a disproportionate number of researchers will reach retirement age in the next few years. This, combined with the need for many more high-quality research jobs as the research intensity of the European economy increases, will be one of the main challenges facing European research, innovation and education systems in the years ahead.

The necessary reform must start at the first stages of the researchers' careers, during their doctoral studies or comparable post-graduate training. Europe must develop state-of-the-art, innovative training schemes, consistent with the highly competitive and increasingly inter-disciplinary requirements of research and innovation. Significant involvement of businesses, including SMEs and other socio-economic actors, will be needed to equip researchers with the cross-cutting innovation and entrepreneurial skills demanded by the jobs of tomorrow and encourage them to consider their careers in industry or in the most innovative companies. It will also be important to enhance the mobility of these researchers, as it currently remains at a too modest level: in 2008, only 7 % of European doctoral candidates were trained in another Member State, whereas the target is 20 % by 2030.

This reform must continue through every stage of researchers' careers. It is vital to increase the mobility of researchers at all levels, including mid-career mobility, not only between countries but also between the public and private sectors. This creates a strong stimulus for learning and developing new skills. It is also a key factor in cooperation between academics, research centres and industry across countries. The human factor is the backbone

of sustainable cooperation which is the key driver for an innovative and creative Europe able to face societal challenges, and key to overcoming fragmentation of national policies. Collaborating and sharing knowledge, through individual mobility at all stages of a career and through exchanges of highly skilled R&I staff, are essential for Europe to re-take the path to sustainable growth, to tackle societal challenges and thereby contribute to overcoming disparities in research and innovation capacities.

In this context, Horizon 2020 should also encourage career development and mobility of researchers through improved conditions to be defined for the portability of Horizon 2020 grants.

Marie Skłodowska-Curie actions will ensure effective equal opportunities for the mobility of male and female researchers, including through specific measures to remove barriers.

If Europe is to match its competitors in research and innovation, it must entice more young women and men to embark on research careers and provide highly attractive opportunities and environments for research and innovation. The most talented individuals, from Europe and elsewhere, should see Europe as a pre-eminent place to work. Gender equality, high-quality and reliable employment and working conditions and recognition are crucial aspects that must be secured in a consistent way across the whole of Europe.

3.2. *Rationale and Union added value*

Neither Union funding alone nor Member States individually will be able to address this challenge. Although Member States have introduced reforms to improve their tertiary education institutions and modernise their training systems, progress is still uneven across Europe, with big differences between countries. Overall, scientific and technological cooperation between the public and private sectors generally remains weak in Europe. The same applies to gender equality and to the efforts to attract students and researchers from outside the ERA. Currently around 20 % of the doctoral candidates in the Union are citizens of third countries, whereas about 35 % in the United States come from abroad. To speed up this change, a strategic approach that goes beyond national borders is required at Union level. Union funding is crucial to create incentives for and encourage the indispensable structural reforms.

The Marie Skłodowska-Curie actions have made remarkable progress to promote mobility, both transnational and intersectoral, and to open research careers at European and international level, with excellent employment and working conditions following the principles of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers. There is no equivalent in Member States as far as their scale and scope, funding, international character, generation and transfer of knowledge are concerned. They have strengthened the resources of those institutions able to attract researchers internationally and thereby encouraged the spread of centres of excellence around the Union. They have served as a role model with a pronounced structuring effect by spreading their best practices at national level. The bottom-up approach taken by Marie Skłodowska-Curie actions has also allowed a large majority of those institutions to train and upgrade the skills of a new generation of researchers able to tackle societal challenges.

Further development of the Marie Skłodowska-Curie actions will make a significant contribution to development of the ERA. With their Europe-wide competitive funding structure, Marie Skłodowska-Curie actions will, whilst respecting the principle of subsidiarity, encourage new, creative and innovative types of training such as joint or multiple doctoral degrees and industrial doctorates, involving research, innovation and education players who will have to compete globally for a reputation of excellence. By providing Union funding for the best research and training programmes following the principles for innovative doctoral training in Europe, they will also promote wider dissemination and take-up, moving towards more structured doctoral training.

Marie Skłodowska-Curie grants will also be extended to the temporary mobility of experienced researchers and engineers from public institutions to the private sector or vice versa, thereby encouraging and supporting universities, research centres and businesses, and other socio-economic actors to cooperate with one another on a European and international scale. With the aid of their well-established, transparent and fair evaluation system, Marie Skłodowska-Curie actions will identify excellent talents in research and innovation in an international competition which gives prestige and therefore motivation for researchers to advance their career in Europe.

The societal challenges to be addressed by highly skilled R&I staff are not just Europe's problem. These are international challenges of colossal complexity and magnitude. The best researchers in Europe and in the world need to work together across countries, sectors and disciplines. Marie Skłodowska-Curie actions will play a key role in this respect by supporting staff exchanges that will foster collaborative thinking through international and intersectoral knowledge-sharing that is so crucial for open innovation.

The co-funding mechanism of the Marie Skłodowska-Curie actions will be crucial to expand Europe's pool of talents. The numerical and structural impact of Union action will be increased by leveraging regional, national and international funding, both public and private, to create new programmes with similar and complementary goals and to adapt existing ones to international and intersectoral training, mobility and career development. Such a mechanism will forge stronger links between research and education efforts at national and Union level.

All the activities under this challenge will contribute to creating a whole new mindset in Europe that is crucial for creativity and innovation. Marie Skłodowska-Curie funding measures will strengthen pooling of resources in Europe and thereby lead to improvements in coordination and governance of researchers' training, mobility and career development. They will contribute to the policy goals outlined in the flagship initiatives 'Innovation Union', 'Youth on the Move' and 'Agenda for New Skills and Jobs' and will be vital to turn the ERA into reality. The Marie Skłodowska-Curie actions will therefore be developed in close synergy with other programmes supporting these policy objectives, including the Erasmus+ programme and the KICs of the EIT.

3.3. *Broad lines of activities*

(a) Fostering new skills by means of excellent initial training of researchers

The goal is to train a new generation of creative and innovative researchers, able to convert knowledge and ideas into products and services for economic and social benefit in the Union.

Key activities shall be to provide excellent and innovative training to early-stage researchers at post-graduate level through interdisciplinary projects, including mentoring to transfer knowledge and experience between researchers or doctoral programmes, helping researchers to develop their research career and involving universities, research institutions, research infrastructures, businesses, SMEs and other socio-economic groups from different Member States, associated countries and/or third countries. This will improve career prospects for young post-graduate researchers in both the public and private sectors.

(b) Nurturing excellence by means of cross-border and cross-sector mobility

The goal is to enhance the creative and innovative potential of experienced researchers at all career levels by creating opportunities for cross-border and cross-sector mobility.

Key activities shall be to encourage experienced researchers to broaden or deepen their skills by means of mobility by opening attractive career opportunities in universities, research institutions, research infrastructures, businesses, SMEs and other socio-economic groups all over Europe and beyond. This should enhance the innovativeness of the private sector and promote cross-sector mobility. Opportunities to be trained and to acquire new knowledge in a third-country high-level research institution, to restart a research career after a break and to (re-)integrate researchers into a longer-term research position in Europe, including in their country of origin, after a trans-national/international mobility experience covering return and reintegration aspects, shall also be supported.

(c) Stimulating innovation by means of cross-fertilisation of knowledge

The goal is to reinforce international cross-border and cross-sector collaboration in research and innovation by means of exchanges of research and innovation personnel in order to be able to face global challenges better.

Key activities shall be to support exchanges of R&I staff among a partnership of universities, research institutions, research infrastructures, businesses, SMEs and other socio-economic groups, both within Europe and worldwide. This will include fostering cooperation with third countries.

(d) Increasing the structural impact by co-funding the activities

The goal is, by leveraging additional funds, to increase the numerical and structural impact of Marie Skłodowska-Curie actions and to foster excellence at national level in researchers' training, mobility and career development.

Key activities shall be, with the aid of a co-funding mechanism, to encourage regional, national and international organisations, both public and private, to create new programmes and to adapt existing ones to international and intersectoral training, mobility and career development. This will increase the quality of

research training in Europe at all career stages, including at doctoral level, foster free circulation of researchers and scientific knowledge in Europe, promote attractive research careers by offering open recruitment and attractive working conditions, and support research and innovation cooperation between universities, research institutions and enterprises and cooperation with third countries and international organisations.

(e) Specific support and policy action

The goals are to monitor progress, identify gaps and barriers in the Marie Skłodowska-Curie actions and to increase their impact. In this context, indicators shall be developed and data related to researchers' mobility, skills, careers and gender equality analysed, seeking synergies and close coordination with the policy support actions on researchers, their employers and funders carried out under the specific objective 'Europe in a changing world - Inclusive, innovative and reflective societies'. The activity shall further aim at raising awareness of the importance and attractiveness of a research career and at disseminating research and innovation results emanating from work supported by Marie Skłodowska-Curie actions.

4. Research Infrastructures

4.1. Specific objective

The specific objective is to endow Europe with world-class research infrastructures which are accessible to all researchers in Europe and beyond and which fully exploit their potential for scientific advance and innovation.

Research infrastructures are key determinants of Europe's competitiveness across the full breadth of scientific domains and essential to science-based innovation. In many fields research is impossible without access to supercomputers, analytical facilities, radiation sources for new materials, clean rooms and advanced metrology for nanotechnologies, specially equipped labs for biological and medical research, databases for genomics and social sciences, observatories and sensors for the Earth sciences and the environment, high-speed broadband networks for transferring data, etc. Research infrastructures are necessary to carry out the research needed to address major societal challenges. They propel collaboration across borders and disciplines and create a seamless and open European space for online research. They promote mobility of people and ideas, bring together the best scientists from across Europe and the world and enhance scientific education. They challenge researchers and innovative companies to develop state of the art technology. In this way, they strengthen Europe's high-tech innovative industry. They drive excellence within the European research and innovation communities and can be outstanding showcases of science for society at large.

Europe must establish, on the basis of commonly agreed criteria, an adequate, stable base for building, maintaining and operating research infrastructures if its research is to remain world-class. This requires substantial and effective cooperation between Union, national and regional funders for which strong links with the cohesion policy will be pursued to ensure synergies and a coherent approach.

This specific objective addresses a core commitment of the flagship initiative 'Innovation Union', which highlights the crucial role played by world-class research infrastructures in making ground-breaking research and innovation possible. The initiative stresses the need to pool resources across Europe, and in some cases globally, in order to build and operate research infrastructures. Equally, the flagship initiative 'Digital Agenda for Europe' emphasises the need to reinforce Europe's e-infrastructures and the importance of developing innovation clusters to build Europe's innovative advantage.

4.2. Rationale and Union added value

State-of-the-art research infrastructures are becoming increasingly complex and costly, often requiring integration of different equipment, services and data sources and extensive transnational collaboration. No single country has enough resources to support all the research infrastructures it needs. The European approach to research infrastructures has made remarkable progress in recent years with continuously developing and implementing the European Strategy Forum on Research Infrastructures (ESFRI) roadmap for infrastructures, integrating and opening national research facilities and developing e-infrastructures underpinning an open digital ERA. The networks of research infrastructures across Europe strengthen its human resource base by providing world-class training for a new generation of researchers and engineers and promoting interdisciplinary collaboration. Synergies with Marie Skłodowska-Curie actions will be encouraged.

Further development and wider use of research infrastructures at European level will make a significant contribution to development of the ERA. While the role of Member States remains central in developing and financing research infrastructures, the Union plays an important part in supporting infrastructure at European level such as encouraging co-ordination of European research infrastructures, by fostering the emergence of new and integrated facilities, opening up and supporting broad access to national and European infrastructures, and making sure that regional, national, European and international policies are consistent and effective. It is necessary to avoid duplication and fragmentation of efforts, to foster coordinated and effective use of the facilities and, where appropriate, to pool resources so that Europe can also acquire and operate research infrastructures at world-class level.

ICT has transformed science by enabling remote collaboration, massive data processing, in silico experimentation and access to distant resources. Research therefore becomes increasingly transnational and interdisciplinary, requiring the use of ICT infrastructures that are as supranational as science itself.

The efficiencies of scale and scope achieved by a European approach to construction, use and management of research infrastructures, including e-infrastructures, will make a significant contribution to boosting Europe's research and innovation potential and make the Union more competitive at international level.

4.3. *Broad lines of the activities*

The activities shall aim at developing the European research infrastructures for 2020 and beyond, fostering their innovation potential and human resources and reinforcing European research infrastructure policy.

(a) Developing the European research infrastructures for 2020 and beyond

The aim shall be to facilitate and support actions linked to: (1) the preparation, implementation and operation of the ESFRI and other world-class research infrastructures, including the development of regional partner facilities, when a strong added value for Union intervention exists; (2) the integration of and transnational access to national and regional research infrastructures of European interest, so that European scientists can use them, irrespective of their location, to conduct top-level research; (3) the development, deployment and operation of e-infrastructures to ensure world-leading capability in networking, computing and scientific data.

(b) Fostering the innovation potential of research infrastructures and their human resources

The aims shall be to encourage research infrastructures to act as early adopters or developers of cutting-edge technology, to promote R&D partnerships with industry, to facilitate industrial use of research infrastructures and to stimulate the creation of innovation clusters. This activity shall also support training and/or exchanges of staff managing and operating research infrastructures.

(c) Reinforcing European research infrastructure policy and international cooperation

The aim shall be to support partnerships between relevant policymakers and funding bodies, mapping and monitoring tools for decision-making and also international cooperation activities. European research infrastructures may be supported in their international relations activities.

The objectives set out under activity lines (b) and (c) shall be pursued by dedicated actions, as well as within the actions developed under activity line (a), when appropriate.

PART II

INDUSTRIAL LEADERSHIP

1. **Leadership in enabling and industrial technologies**

The specific objective is to maintain and build global leadership through research and innovation in enabling technologies and space, which underpin competitiveness across a range of existing and emerging industries and sectors.

The global business environment is changing rapidly and the objectives of the Europe 2020 strategy present challenges and opportunities to European industry. Europe needs to accelerate innovation, transforming the knowledge generated to underpin and enhance existing products, services and markets, and to create new ones while maintaining focus on quality and sustainability. Innovation should be exploited in the widest sense, going beyond technology to include business, organisational and social aspects.

To stay at the forefront of global competition with a strong technological base and industrial capabilities, increased strategic investments in research, development, validation and piloting are required in ICT, nanotechnologies, advanced materials, biotechnology, advanced manufacturing and processing, and space.

The successful mastering, integration and deployment of enabling technologies by European industry is a key factor in strengthening Europe's productivity and innovation capacity and ensuring that Europe has an advanced, sustainable and competitive economy, global leadership in hi-tech application sectors and the ability to develop effective and sustainable solutions for societal challenges. The pervasive nature of such activities can spur further progress through complementary inventions, applications and services, ensuring a higher return on investment in these technologies than in any other field.

These activities will contribute to the objectives of the flagship initiatives 'Innovation Union', 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'Digital Agenda for Europe' of the Europe 2020 strategy, as well as to Union space policy objectives.

Complementarities with other activities in Horizon 2020

The activities under the specific objective 'Leadership in Enabling and Industrial Technologies' will be primarily based on research and innovation agendas mainly defined by industry and business, including SMEs, together with the research community and Member States in an open and transparent manner and have a strong focus on leveraging private sector investment and on innovation.

The integration of enabling technologies in solutions for the societal challenges shall be supported together with the relevant challenges. Applications of enabling technologies that do not fall under the societal challenges, but are important for reinforcing the competitiveness of European industry, shall be supported under the specific objective 'Leadership in Enabling and Industrial Technologies'. Appropriate coordination should be sought with the priorities 'Excellent Science' and 'Societal Challenges'.

A common approach

The approach shall include both agenda-driven activities and more open areas to promote innovative projects and breakthrough solutions covering the whole value chain, including R&D, large-scale pilots and demonstration activities, test beds and living labs, prototyping and product validation in pilot lines. Activities shall be designed to boost industrial competitiveness by stimulating industry, and in particular SMEs, to make more research and innovation investment, including through open calls. Adequate focus will be given to small and medium scale projects.

An integrated approach to Key Enabling Technologies

A major component of the specific objective 'Leadership in Enabling and Industrial Technologies' are Key Enabling Technologies (KETs), defined as micro- and nanoelectronics, photonics, nanotechnology, biotechnology, advanced materials and advanced manufacturing systems⁽¹⁾. These multi-disciplinary, knowledge and capital-intensive technologies cut across many diverse sectors providing the basis for significant competitive advantage for European industry, for stimulating growth and for creating new jobs. An integrated approach, promoting the combination, convergence and cross-fertilisation effect of KETs in different innovation cycles and value chains can deliver promising research results and open the way to new industrial technologies, products, services and novel applications (e.g. in space, transport, agriculture, fisheries, forestry, environment, food, health and energy). The numerous interactions of KETs and other industrial enabling technologies will therefore be exploited in a flexible manner, as an important source of innovation. This will complement support for research and innovation in KETs that may be provided by national or regional authorities under the Cohesion Policy Funds within the framework of smart specialisation strategies.

Innovation requires enhanced cross-technology research efforts. Therefore, multidisciplinary and multi-KET projects should be an integral part of the priority 'Industrial Leadership'. The Horizon 2020 implementation structure supporting KETs and cross-cutting KET activities (multi KETs) should ensure synergies and effective coordination, among others, with societal challenges. In addition, synergies will be sought, where appropriate, between KET activities and the activities under the cohesion policy for 2014-2020, as well as with the EIT.

⁽¹⁾ COM(2009)0512.

For all the enabling and industrial technologies, including the KETs, a major aim will be to foster interactions between the technologies and with the applications under the societal challenges. This shall be fully taken into account in developing and implementing the agendas and priorities. It requires that stakeholders representing the different perspectives are fully involved in priority setting and implementation. In certain cases, it will also require actions that are jointly funded by the enabling and industrial technologies and by the relevant societal challenges. This could include joint funding for public-private partnerships that aim to develop technologies, foster innovation and apply such technologies to address societal challenges.

ICT plays an important role as it provides the key basic infrastructures, technologies and systems for vital economic and social processes and new private and public products and services. European industry needs to remain at the cutting edge of technological developments in ICT, where many technologies are entering a new disruptive phase, opening up new opportunities.

Space is a rapidly growing sector which delivers information vital to many areas of modern society, meeting its fundamental demands, addresses universal scientific questions, and serves to secure the Union's position as a major player on the international stage. Space research underpins all activities undertaken in space, but is currently addressed in programmes run by Member States, the European Space Agency (ESA) or in the context of Union Framework Programmes for Research. Union level action and investment in space research are required in accordance with Article 189 TFEU, in order to maintain the competitive edge, to safeguard Union space infrastructures and programmes such as Copernicus and Galileo and to sustain a future role for Europe in space.

In addition, innovative downstream services and user-friendly applications using space derived information represent an important source of growth and job creation, and their development represents an important opportunity for the Union.

Partnering and added value

Europe can achieve critical mass through partnering, clusters and networks, standardisation, promoting cooperation between different scientific and technological disciplines and sectors with similar research and development needs, leading to breakthroughs, new technologies and innovative product, service and process solutions.

The development and implementation of research and innovation agendas including through public-private partnerships, but also by the building of effective industry-academia links, the leveraging of additional investments, the access to risk finance, standardisation and the support to pre-commercial procurement and the procurement of innovative products and services, are all aspects that are essential in addressing competitiveness.

In this regard, strong links with the EIT are also needed to produce and promote entrepreneurial top talents and to speed up innovation by bringing together people from different countries, disciplines and organisations.

Union level collaboration can also support trade opportunities through the support for the development of European or international standards for new emerging products and services and technologies. Development of such standards following consultation of relevant stakeholders, including those from science and industry, could have a positive impact. Activities in support of standardisation and interoperability, safety and pre-regulatory activities will be promoted.

1.1. *Information and Communication Technologies (ICT)*

1.1.1. Specific objective for ICT

In line with the flagship initiative 'Digital Agenda for Europe' ⁽¹⁾, the specific objective of ICT research and innovation (R&I) is to enable Europe to support, develop and exploit the opportunities brought by ICT progress for the benefits of its citizens, businesses and scientific communities.

⁽¹⁾ COM(2010)0245.

As the world's largest economy and representing the largest share of the world's ICT market, worth more than EUR 2 600 billion (EUR 2 600 000 000 000) in 2011, Europe should have legitimate ambitions for its businesses, governments, research and development centres and universities to lead European and global developments in ICT, to grow new business, and to invest more in ICT innovations.

By 2020, Europe's ICT sector should supply at least the equivalent of its share of the global ICT market, which was about one third in 2011. Europe should also grow innovative businesses in ICT so that one third of all business investment in ICT R&D in the Union, which amounted to more than EUR 35 billion per year in 2011, is made by companies created within the last two decades. This would require an increase in public investments in ICT R&D in ways that leverage private spending, towards the goal of amplifying investments in the next decade, and significantly more European poles and clusters of world-class excellence in ICT.

To master increasingly complex and multidisciplinary technology and business chains in ICT, partnering, risk-sharing and mobilisation of critical mass across the Union are needed. Union level action should help industry address a single market perspective and achieve economies of scale and scope. Collaboration around common, open technology platforms with spill-over and leverage effects will allow a wide range of stakeholders to benefit from new developments and create further innovations. Partnering at Union level also enables consensus building, establishes a visible focal point for international partners, and will support the development of standards and interoperable solutions both in the Union and worldwide.

1.1.2. Rationale and Union added value

ICT underpins innovation and competitiveness across a broad range of private and public markets and sectors, and enables scientific progress in all disciplines. Over the next decade, the transformative impact of digital technologies and ICT components, infrastructures and services will be increasingly visible in all areas of life. Computing, communication and data storage resources will continue to spread over the coming years. Vast amounts of information and data, including real-time, will be generated by sensors, machines and information-enhanced products, making action at a distance commonplace, enabling global deployment of business processes and sustainable production sites allowing the creation of a wide range of services and applications.

Many critical commercial and public services and all key processes of knowledge production in science, learning, business and the culture and creative sector as well as the public sector will be provided, and thus made more accessible, through ICT. ICT will provide the critical infrastructure for production and business processes, communication and transactions. ICT will also be indispensable in contributing to key societal challenges, as well as to societal processes such as community formation, consumer behaviour, political participation and public governance, for example by means of social media and collective-awareness platforms and tools. It is crucial to support and integrate research which takes a user-centred perspective in order to develop competitive solutions.

The Union support to ICT research and innovation makes a significant contribution to the development of the next generation technologies and applications as it makes up a large part of total spending on collaborative, mid-to-high risk R&I in Europe. Public investment in ICT research and innovation at Union level has been and remains essential to mobilise the critical mass leading to breakthroughs and to a wider uptake and better use of innovative solutions, products and services. It continues to play a central role in developing open platforms and technologies applicable across the Union, in testing and piloting innovations in real pan-European settings and in optimising resources when addressing Union competitiveness and tackling common societal challenges. Union support to ICT research and innovation is also enabling hi-tech SMEs to grow and capitalise on the size of Union-wide markets. It is strengthening collaboration and excellence amongst Union scientists and engineers, reinforcing synergies with and between national budgets, and acting as a focal point for collaboration with partners outside Europe.

Successive evaluations of ICT activities in the Seventh Framework Programme have shown that focused ICT research and innovation investment undertaken at Union level has been instrumental in building industrial leadership in areas like mobile communications and safety-critical ICT systems, and to address challenges like energy-efficiency, health, food security, transport or demographic change. Union investments in ICT research infrastructures have provided European researchers with the world's best research networking and computing facilities.

1.1.3. Broad lines of the activities

A number of activity lines shall target ICT industrial and technological leadership challenges and cover generic ICT research and innovation agendas, including notably:

- (a) A new generation of components and systems: engineering of advanced, embedded and energy- and resource-efficient components and systems;
- (b) Next generation computing: advanced and secure computing systems and technologies, including cloud computing;
- (c) Future Internet: software, hardware, infrastructures, technologies and services;
- (d) Content technologies and information management: ICT for digital content and for cultural and creative industries;
- (e) Advanced interfaces and robots: robotics and smart spaces;
- (f) Micro- and nanoelectronics and photonics: key enabling technologies related to micro- and nanoelectronics and to photonics covering also quantum technologies.

These six major activity lines are expected to cover the full range of needs, taking into account the competitiveness of European industry on a global scale. These would include industrial leadership in generic ICT-based solutions, products and services needed to tackle major societal challenges as well as application-driven ICT research and innovation agendas which will be supported together with the relevant societal challenge. In view of the ever increasing advancement of technology in all areas of life, the interaction between humans and technology will be important in this respect, and part of the application-driven ICT research mentioned above.

These six activity lines shall also include ICT specific research infrastructures such as living labs for experimentation, and infrastructures for underlying key enabling technologies and their integration in advanced products and innovative smart systems, including equipment, tools, support services, clean rooms and access to foundries for prototyping.

Horizon 2020 will support research and development of ICT systems in full respect of the fundamental rights and freedoms of natural persons and in particular their right to privacy.

1.2. *Nanotechnologies*

1.2.1. Specific objective for nanotechnologies

The specific objective of nanotechnologies research and innovation is to secure Union leadership in this high growth global market, by stimulating scientific and technological advancements and investment in nanotechnologies and their uptake in high added value, competitive products and services across a range of applications and sectors.

By 2020, nanotechnologies will be mainstreamed, that is seamlessly integrated with most technologies and applications, driven by consumer benefits, quality of life, healthcare, sustainable development and the strong industrial potential for achieving previously unavailable solutions for productivity and resource efficiency.

Europe must also set the global benchmark on safe and responsible nanotechnology deployment and governance ensuring both high societal and industrial returns combined with high standards of safety and sustainability.

Products using nanotechnologies represent a world market which Europe cannot afford to ignore. Market estimates of the value of products incorporating nanotechnology as the key component reach EUR 700 billion by 2015 and EUR 2 trillion by 2020, with a corresponding 2 and 6 million jobs respectively. Europe's nanotechnology companies should exploit this double digit market growth and be capable of capturing a market share at least equal to Europe's share of global research funding (i.e. a quarter) by 2020.

1.2.2. Rationale and Union added value

Nanotechnologies are a spectrum of evolving technologies with proven potential, having revolutionary impact for example in materials, ICT, transport mobility, life sciences, healthcare (including treatment), consumer goods and manufacturing once the research is translated into breakthrough, sustainable and competitive products and production processes.

Nanotechnologies have a critical role to play in addressing the challenges identified by the Europe 2020 strategy. The successful deployment of these key enabling technologies will contribute to the competitiveness of Union industry by enabling novel and improved products or more efficient processes and provide responses to today's and future societal challenges.

The global research funding for nanotechnologies has doubled from around EUR 6,5 billion in 2004 to around EUR 12,5 billion in 2008, with the Union accounting for about a quarter of this total. The Union has recognised research leadership in nanosciences and nanotechnologies with a projection of some 4 000 companies in the Union by 2015. This research leadership must be maintained and amplified and further translated into practical use and commercialisation.

Europe now needs to secure and build on its position in the global market by promoting wide scale cooperation in and across many different value chains and between different industrial sectors to realise the process scale-up of these technologies into safe, sustainable and viable commercial products. The issues of risk assessment and management as well as responsible governance are emerging as determining factors of future impact of nanotechnologies on society, the environment and the economy.

Thus, the focus of activities shall be on the widespread, responsible and sustainable application of nanotechnologies into the economy, to enable benefits with high societal and industrial impact. To ensure the potential opportunities, including setting-up new companies and generating new jobs, research should provide the necessary tools to allow for standardisation and regulation to be correctly implemented.

1.2.3. Broad lines of the activities

(a) Developing next generation nanomaterials, nanodevices and nanosystems

Aiming at fundamentally new products enabling sustainable solutions in a wide range of sectors.

(b) Ensuring the safe and sustainable development and application of nanotechnologies

Advancing scientific knowledge of the potential impact of nanotechnologies and nanosystems on health or on the environment, and providing tools for risk assessment and management along the entire life cycle, including standardisation issues.

(c) Developing the societal dimension of nanotechnology

Focusing on governance of nanotechnology for societal and environmental benefit.

(d) Efficient and sustainable synthesis and manufacturing of nanomaterials, components and systems

Focusing on new operations, smart integration of new and existing processes, including technology convergence, as well as up-scaling to achieve high precision large-scale production of products and flexible and multi-purpose plants that ensure the efficient transfer of knowledge into industrial innovation.

(e) Developing and standardisation of capacity-enhancing techniques, measuring methods and equipment

Focusing on the underpinning technologies supporting the development and market introduction of safe complex nanomaterials and nanosystems.

1.3. *Advanced materials*

1.3.1. Specific objective for advanced materials

The specific objective of advanced materials research and innovation is to develop materials with new functionalities and improved in-service performance, for more competitive and safe products that minimise the impact on the environment and the consumption of resources.

Materials are at the core of industrial innovation and are key enablers. Advanced materials with higher knowledge content, new functionalities and improved performance are indispensable for industrial competitiveness and sustainable development across a broad range of applications and sectors.

1.3.2. Rationale and Union added value

New advanced materials are needed in developing better performing and sustainable products and processes and for substituting scarce resources. Such materials are a part of the solution to our industrial and societal challenges, offering better performance in their use, lower resource and energy requirements, and sustainability during the entire life-cycle of the products.

Application-driven development often involves the design of totally new materials, with the ability to deliver planned in-service performances. Such materials are an important element in the supply chain of high value manufacturing. They are also the basis for progress in cross-cutting technology areas (for example healthcare technologies, biosciences, electronics and photonics) and in virtually all market sectors. The materials themselves represent a key step in increasing the value of products and their performance. The estimated value and impact of advanced materials is significant, with an annual growth rate of about 6 % and expected market size of the order of EUR 100 billion by 2015.

Materials shall be conceived according to a full life-cycle approach, from the supply of available materials to end of life (cradle to cradle), with innovative approaches to minimise the resources (including energy) required for their transformation or to minimise negative impacts for humans and the environment. Continuous use, recycling or secondary end-of-life utilisation of the materials shall also be covered, as well as related societal innovation, such as changes in consumer behaviour and new business models.

To accelerate progress, a multidisciplinary and convergent approach shall be fostered, involving chemistry, physics, engineering sciences, theoretical and computational modelling, biological sciences and increasingly creative industrial design.

Novel green innovation alliances and industrial symbiosis shall be fostered allowing industries to diversify and expand their business models, re-using their waste as a basis for new productions.

1.3.3. Broad lines of the activities

(a) Cross-cutting and enabling materials technologies

Research on materials by design, functional materials, multifunctional materials with higher knowledge content, new functionalities and improved performance, and structural materials for innovation in all industrial sectors, including the creative industries.

(b) Materials development and transformation

Research and development to ensure efficient, safe and sustainable development and scale-up to enable industrial manufacturing of future design-based products towards a "no-waste" management of materials in Europe.

(c) Management of materials components

Research and development for new and innovative techniques for materials and their components and systems.

(d) Materials for a sustainable, resource-efficient and low emission industry

Developing new products and applications, business models and responsible consumer behaviour that reduce energy demand and facilitate low-carbon production.

(e) Materials for creative industries, including heritage

Applying design and the development of converging technologies to create new business opportunities, including the preservation and restoration of materials with historical or cultural value, as well as novel materials.

(f) Metrology, characterisation, standardisation and quality control

Promoting technologies such as characterisation, non-destructive evaluation, continuous assessing and monitoring and predictive modelling of performance for progress and impact in materials science and engineering.

(g) Optimisation of the use of materials

Research and development to investigate substitution and alternatives to the use of materials and innovative business model approaches and identification of critical resources.

1.4. *Biotechnology*

1.4.1. Specific objective for biotechnology

The specific objective of biotechnology research and innovation is to develop competitive, sustainable, safe and innovative industrial products and processes and contribute as an innovation driver in a number of European sectors, like agriculture, forestry, food, energy, chemical and health as well as the knowledge-based bioeconomy.

A strong scientific, technological and innovation base in biotechnology will support European industries securing leadership in this key enabling technology. This position will be further strengthened by integrating the health and safety assessment, the economic and environmental impact of use of the technology and the management aspects of the overall and specific risks in the deployment of biotechnology.

1.4.2. Rationale and Union added value

Powered by the expansion of the knowledge of living systems, biotechnology is set to deliver a stream of new applications and to strengthen the Union's industrial base and its innovation capacity. Examples of the rising importance of biotechnology are in industrial applications including biopharmaceuticals, food and feed production and biochemicals, of which the market share of the latter is estimated to increase by up to 12 % to 20 % of chemical production by 2015. A number of the so-called twelve principles of Green Chemistry are also addressed by biotechnology, due to the selectivity and efficiency of biosystems. The possible economic burdens for Union enterprises can be reduced by harnessing the potential of biotechnology processes and bio-based products to reduce CO₂ emissions, estimated to range from between 1 to 2,5 billion tonnes CO₂ equivalent per year by 2030.

In Europe's biopharmaceutical sector, already some 20 % of the current medicines are derived from biotechnology, with up to 50 % of new medicines. Biotechnology will play a major role in the transition towards a bio-based economy by developing new industrial processes. Biotechnology also opens new avenues for the development of a sustainable agriculture, aquaculture and forestry and for exploiting the huge potential of marine resources for producing innovative industrial, health, energy, chemical and environmental applications. The emerging sector of marine (blue) biotechnology has been predicted to grow by 10 % a year.

Other key sources of innovation are at the interface between biotechnology and other enabling and converging technologies, in particular nanotechnologies and ICT, with applications such as sensing and diagnosing.

1.4.3. Broad lines of the activities

(a) Boosting cutting-edge biotechnologies as a future innovation driver

Development of emerging technology areas such as synthetic biology, bioinformatics and systems biology, which hold great promise for innovative products and technologies and completely novel applications.

(b) Biotechnology-based industrial products and processes

Developing industrial biotechnology and industrial scale bio-process design for competitive industrial products and sustainable processes (e.g. chemical, health, mining, energy, pulp and paper, fibre-based products and wood, textile, starch, food processing) and its environmental and health dimensions, including clean-up operations.

(c) Innovative and competitive platform technologies

Development of platform technologies (e.g. genomics, meta-genomics, proteomics, metabolomics, molecular tools, expression systems, phenotyping platforms and cell-based platforms) to enhance leadership and competitive advantage in a wide number of sectors that have economic impacts.

1.5. *Advanced manufacturing and processing*

1.5.1. Specific objective

The specific objective of advanced manufacturing and processing research and innovation is to transform today's manufacturing enterprises, systems and processes. This will be done *inter alia* by leveraging key enabling technologies in order to achieve more knowledge-intensive, sustainable, resource- and energy-efficient trans-sectoral manufacturing and processing technologies, resulting in more innovative products, processes and services. Enabling new, sustainable products, processes and services and their competitive deployment, as well as advanced manufacturing and processing is also essential for achieving the objectives of the priority 'Societal challenges'.

1.5.2. Rationale and Union added value

The manufacturing sector is of high importance to the European economy, contributing to around 17 % of GDP and accounting for some 22 million jobs in the Union in 2007. With the lowering of economic barriers to trade and the enabling effect of communications technology, manufacturing is subject to strong competition and has been gravitating to countries of lowest overall cost. The European approach to manufacturing therefore has to change radically to remain globally competitive, and Horizon 2020 can help bring together all the relevant stakeholders to achieve this.

Europe needs to increase investment at Union level to maintain European leadership and competence in manufacturing technologies and make the transition to high-value, knowledge-intensive goods, creating the conditions and assets for sustainable production and provision of lifetime service around a manufactured product. Resource intensive manufacturing and process industries need to further mobilise resources and knowledge at Union level and increase the investment in research, development and innovation to enable further progress towards a competitive low-carbon, resource-efficient and sustainable economy and to comply with the agreed Union-wide reductions in greenhouse gas emissions by 2050 for industrial sectors ⁽¹⁾.

With strong Union policies, Europe would grow its existing industries and nurture the emerging industries of the future. The estimated value and impact of the sector of advanced manufacturing systems is significant, with an expected market size around EUR 150 billion by 2015 and compound annual growth rate of about 5 %.

It is crucial to retain knowledge and competence in order to keep manufacturing and processing capacity in Europe. The emphasis of the research and innovation activities shall be on sustainable and safe manufacturing and processing, introducing the necessary technical innovation and customer-orientation to produce high knowledge content products and services with low material and energy consumption.

Europe also needs to transfer these enabling technologies and knowledge to other productive sectors, such as construction, which is a major source of greenhouse gases with building activities accounting for around 40 % of all energy consumption in Europe, giving rise to 36 % of the CO₂ emissions. The construction sector, generating 10 % of GDP and providing some 16 million jobs in Europe in 3 million enterprises, of which 95 % are SMEs, needs to adopt innovative materials and manufacturing approaches to mitigate its environmental impact.

1.5.3. Broad lines of the activities

(a) Technologies for Factories of the Future

Promoting sustainable industrial growth by facilitating a strategic shift in Europe from cost-based manufacturing to an approach based on resource efficiency and the creation of high added value products and ICT-enabled intelligent and high performance manufacturing in an integrated system.

(b) Technologies enabling energy-efficient systems and energy-efficient buildings with a low environmental impact

Reducing energy consumption and CO₂ emissions by the research, development and deployment of sustainable construction technologies and systems, addressing the whole value chain as well as reducing the overall environmental impact of buildings.

⁽¹⁾ COM(2011)0112.

(c) Sustainable, resource-efficient and low-carbon technologies in energy-intensive process industries

Increasing the competitiveness of process industries, by drastically improving resource and energy efficiencies and reducing the environmental impact of such industrial activities through the whole value chain, promoting the adoption of low-carbon technologies, more sustainable industrial processes and, where applicable, the integration of renewable energy sources.

(d) New sustainable business models

Deriving concepts and methodologies for adaptive, knowledge-based business models in customised approaches, including alternative resource-productive approaches.

1.6. *Space*

1.6.1. Specific objective for space

The specific objective of space research and innovation is to foster a cost-effective competitive and innovative space industry (including SMEs) and research community to develop and exploit space infrastructure to meet future Union policy and societal needs.

Strengthening the European public and private space sector by boosting space research and innovation is vital to maintain and safeguard Europe's capability to use space in support of Union policies, international strategic interests and competitiveness amongst established and emerging space faring nations. Action at Union level will be carried out in conjunction with space research activities of the Member States and the European Space Agency (ESA), aiming at building up complementarity amongst different actors.

1.6.2. Rationale and Union added value

Space is an important, but frequently invisible enabler of diverse services and products crucial to modern day society, such as navigation and communication, as well as weather forecasts and geographic information derived from Earth observation by satellites. Policy formulation and implementation at European, national and regional level increasingly depend on space-derived information. The global space sector is rapidly growing and expanding into new regions (e.g. China, South America and Africa). European industry is at present a considerable exporter of first-class satellites for commercial and scientific purposes. Increasing global competition is challenging Europe's position in this area.

Thus Europe has an interest in ensuring that its industry continues to thrive in this fiercely competitive market. In addition, data from European science satellites and probes have resulted in some of the most significant scientific breakthroughs in the last decades in Earth sciences, fundamental physics, astronomy and planetology. In addition, innovative space technologies, e.g. robotics, have contributed to the progress of knowledge and technology in Europe. With this unique capacity, the European space sector has a critical role to play in addressing the challenges identified by the Europe 2020 strategy.

Research, technology development and innovation underpin capacities in space which are vital to European society. While the United States spends around 25 % of its space budget on R&D, the Union spends less than 10 %. Moreover, space research in the Union is addressed in the national programmes of Member States, ESA programmes and the Union Framework Programmes for research.

To maintain Europe's technological and competitive edge and to capitalise on investments, Union level action, having regard to Article 4(3) and Article 189 TFEU, is needed in conjunction with the space research activities of the Member States and the ESA, which has managed industrial satellite development and deep space missions on an intergovernmental basis for the ESA Member States since 1975. Union level action is also needed to promote the participation of the best researchers from all Member States, and to lower the barriers for collaborative space research projects across national borders.

In addition, the information provided by European satellites will offer an increasing potential for further development of innovative satellite-based downstream services. This is a typical activity sector for SMEs and should be supported by research and innovation measures in order to reap the full benefits of this opportunity, and especially of the considerable investments made on the two Union programmes Galileo and Copernicus.

Space naturally transcends terrestrial boundaries, providing a unique vantage point of global dimension, thus giving rise to large-scale projects which are carried out in international co-operation. To play a significant role in such international space activities in the next decades, both a common European space policy and European level space research and innovation activities are indispensable.

Space research and innovation under Horizon 2020 aligns with the Union space policy priorities and the needs of the European operational programmes as they continue to be defined by the Council and the Commission ⁽¹⁾.

European Space infrastructure such as the Copernicus and Galileo programmes are a strategic investment, and the development of innovative downstream applications is necessary. To this end, the application of space technologies shall be supported through the respective specific objectives of the priority 'Societal challenges', where appropriate, with the aim of securing socio-economic benefits as well as return on investment and European leadership in downstream applications.

1.6.3. Broad lines of the activities

(a) Enabling European competitiveness, non-dependence and innovation of the European space sector

This entails safeguarding and further developing a competitive, sustainable and entrepreneurial space industry in combination with a world-class space research community to maintain and strengthen European leadership and non-dependence in space systems to foster innovation in the space sector, and to enable space-based terrestrial innovation, for example by using remote sensing and navigation data.

(b) Enabling advances in space technologies

This aims at developing advanced and enabling space technologies and operational concepts from idea to demonstration in space. This includes technologies supporting access to space, technologies for the protection of space assets from threats such as debris and solar flares, as well as satellite telecommunication, navigation and remote sensing. The development and application of advanced space technologies requires the continuous education and training of highly skilled engineers and scientists as well as strong links between them and the users of space applications.

(c) Enabling exploitation of space data

A considerably increased exploitation of data from European satellites (scientific, public or commercial) can be achieved if further effort is made for the processing, archiving, validation, standardisation and sustainable availability of space data as well as for supporting the development of new information products and services resulting from those data, having regard to Article 189 TFEU, including innovations in data handling, dissemination and interoperability, in particular promotion of access to and exchange of Earth science data and metadata. These activities can also ensure a higher return on investment of space infrastructure and contribute to tackling societal challenges, in particular if coordinated in a global effort such as through the Global Earth Observation System of Systems (GEOSS), namely by fully exploiting the Copernicus programme as its main European contribution, the European satellite navigation programme Galileo or the Intergovernmental Panel on Climate Change (IPCC) for climate change issues. A fast introduction of these innovations into the relevant application and decision-making processes will be supported. This also includes the exploitation of data for further scientific investigation.

(d) Enabling European research in support of international space partnerships

Space undertakings have a fundamentally global character. This is particularly clear for activities such as Space Situational Awareness (SSA), and many space science and exploration projects. The development of cutting edge space technology is increasingly taking place within such international partnerships. Ensuring access to these constitutes an important success factor for European researchers and industry. The definition and implementation of long-term roadmaps and the coordination with international partners are essential to this objective.

2. Access to risk finance

2.1. Specific objective

The specific objective is to help address market deficiencies in accessing risk finance for research and innovation.

⁽¹⁾ COM(2011)0152.

The investment situation in the R&I domain is dire, particularly for innovative SMEs and mid-caps with a high potential for growth. There are several major market gaps in the provision of finance, as the innovations required to achieve policy goals are proving too risky, typically, for the market to bear and therefore the wider benefits to society are not fully captured.

A facility for debt ('Debt facility') and a facility for equity ('Equity facility') will help overcome such problems by improving the financing and risk profiles of the R&I activities concerned. This, in turn, will ease access by firms and other beneficiaries to loans, guarantees and other forms of risk finance; promote early-stage investment and the development of existing and new venture capital funds; improve knowledge transfer and the market in intellectual property; attract funds to the venture capital market; and, overall, help catalyse the passage from the conception, development and demonstration of new products and services to their commercialisation.

The overall effect will be to increase the willingness of the private sector to invest in R&I and hence contribute to reaching a key Europe 2020 target: 3 % of Union GDP invested in R&D by the end of the decade with two-thirds contributed by the private sector. The use of financial instruments will also help achieve the R&I objectives of all sectors and policy areas crucial for tackling the societal challenges, for enhancing competitiveness, and for supporting sustainable, inclusive growth and the provision of environmental and other public goods.

2.2. *Rationale and Union added value*

A Union-level Debt facility for R&I is needed to increase the likelihood that loans and guarantees are made and R&I policy objectives achieved. The current gap in the market between the demand for and supply of loans and guarantees for risky R&I investments, addressed by the current Risk-Sharing Finance Facility (RSFF), is likely to persist, with commercial banks remaining largely absent from higher-risk lending. Demand for RSFF loan finance has been high since the launch of the facility in mid-2007: in its first phase (2007-2010), its take-up exceeded initial expectations by more than 50 % in terms of active loan approvals (EUR 7,6 billion versus a forecast EUR 5 billion).

Furthermore, banks typically lack the ability to value knowledge assets, such as intellectual property, and therefore are often unwilling to invest in knowledge-based companies. The consequence is that many established innovative companies – both large and small – cannot obtain loans for higher-risk R&I activities. In the design and implementation of its facilit(y)(ies), which will be carried out in partnership with one or several entrusted entities in compliance with Regulation (EU, Euratom) No 966/2012, the Commission will ensure that appropriate levels and forms of technological and financial risks will be taken into account, in order to meet the identified needs.

These market gaps stem, at root, from uncertainties, information asymmetries and the high costs of attempting to address these issues: recently established firms have too short a track record to satisfy potential lenders, even established firms often cannot provide enough information, and at the start of an R&I investment it is not at all certain whether the efforts undertaken will actually result in a successful innovation.

Additionally, enterprises at the concept development stage or working in emerging areas typically lack sufficient collateral. Another disincentive is that even if R&I activities give rise to a commercial product or process, it is not at all certain that the company that has made the effort will be able to exclusively appropriate the benefits deriving from it.

In terms of Union added value, the Debt facility will help remedy market deficiencies that prevent the private sector from investing in R&I at an optimum level. Its implementation will enable the pooling of a critical mass of resources from the Union budget and, on a risk-sharing basis, from the financial institution(s) entrusted with its implementation. It will stimulate firms to invest more of their own money in R&I than they would otherwise have done. In addition, the Debt facility will help organisations, both public and private, to reduce the risks of undertaking the pre-commercial procurement or procurement of innovative products and services.

A Union-level Equity facility for R&I is needed to help improve the availability of equity finance for early and growth-stage investments and to boost the development of the Union venture capital market. During the technology transfer and start-up phase, new companies face a 'valley of death' where public research grants stop and it is not possible to attract private finance. Public support aiming to leverage private seed and start-up funds to fill this gap is currently too fragmented and intermittent, or its management lacks the necessary expertise. Furthermore, most venture capital funds in Europe are too small to support the continued growth of innovative companies and do not have the critical mass to specialise and operate transnationally.

The consequences are serious. Before the financial crisis, the amount invested in SMEs by European venture capital funds was about EUR 7 billion a year, while figures for 2009 and 2010 were within the EUR 3-4 billion range. Reduced funding for venture capital has affected the number of start-ups targeted by venture capital funds: in 2007, some 3 000 SMEs received venture capital funding, compared to only around 2 500 in 2010.

In terms of Union added value, the Equity facility for R&I will complement national and regional schemes that cannot cater for cross-border investments in R&I. The early-stage deals will also have a demonstration effect that can benefit public and private investors across Europe. For the growth phase, only at European level is it possible to achieve the necessary scale and the strong participation of private investors that are essential to the functioning of a self-sustaining venture capital market.

The Debt and Equity facilities, supported by a set of accompanying measures, will support the achievement of Horizon 2020 policy objectives. To this end, they will be dedicated to consolidating and raising the quality of Europe's science base; promoting research and innovation with a business-driven agenda; and addressing societal challenges, with a focus on activities such as piloting, demonstration, test-beds and market uptake. Specific support actions such as information and coaching activities for SMEs should be provided. Regional authorities, SMEs associations, chambers of commerce and relevant financial intermediaries may be consulted, where appropriate, in relation to the programming and implementation of these activities.

In addition, they will help tackle the R&I objectives of other programmes and policy areas, such as the Common Agricultural Policy, climate action (transition to a low-carbon economy and adaptation to climate change), and the Common Fisheries Policy. Complementarities with national and regional financial instruments will be developed in the context of the Common Strategic Framework for Cohesion Policy 2014-2020, where an increased role for financial instruments is foreseen.

The design of the Debt and Equity facilities takes account of the need to address the specific market deficiencies, and the characteristics (such as degree of dynamism and rate of company creation) and financing requirements of these and other areas without creating market distortions. The use of financial instruments must have a clear European added value and should provide leverage and function as a complement to national instruments. Budgetary allocations between the instruments may be adapted during the course of Horizon 2020 in response to changing economic conditions.

The Equity facility and the SME window of the Debt facility will be implemented as part of two Union financial instruments that provide equity and debt to support SMEs' R&I and growth, in conjunction with the equity and debt facilities under COSME. Complementarity between Horizon 2020 and COSME will be ensured.

2.3. *Broad lines of the activities*

- (a) The Debt facility providing debt finance for R&I: 'Union loan and guarantee service for research and innovation'

The goal is to improve access to debt financing – loans, guarantees, counter-guarantees and other forms of debt and risk finance – for public and private entities and public-private partnerships engaged in research and innovation activities requiring risky investments in order to come to fruition. The focus shall be on supporting research and innovation with a high potential for excellence.

Given that one of the objectives of Horizon 2020 is to contribute to narrowing the gap between R&D and innovation, helping to bring new or improved products and services to the market, and taking into account the critical role that the proof-of-concept stage plays in the knowledge transfer process, mechanisms may be introduced enabling financing for the proof-of-concept stages that are necessary in order to validate the importance, relevance and future innovatory impact of the research results or invention involved in the transfer.

The target final beneficiaries shall potentially be legal entities of all sizes that can borrow and repay money and, in particular, SMEs with the potential to carry out innovation and grow rapidly; mid-caps and large firms; universities and research institutions; research infrastructures and innovation infrastructures; public-private partnerships; and special-purpose vehicles or projects.

The funding of the Debt facility shall have two main components:

- (1) Demand-driven, providing loans and guarantees on a first-come, first-served basis, with specific support for beneficiaries such as SMEs and mid-caps. This component shall respond to the steady and continuing growth seen in the volume of RSFF lending, which is demand-led. Under the SME window, activities shall be supported that aim to improve access to finance for SMEs and other entities that are R&D- and/or innovation-driven. This could include support at phase 3 of the SME instrument, subject to the level of demand.
 - (2) Targeted, focusing on policies and key sectors crucial for tackling societal challenges, enhancing industrial leadership and competitiveness, supporting sustainable, low-carbon, inclusive growth, and providing environmental and other public goods. This component shall help the Union address research and innovation aspects of sectoral policy objectives.
- (b) The Equity facility providing equity finance for R&I: 'Union equity instruments for research and innovation'

The goal is to contribute to overcoming the deficiencies of the European venture capital market and provide equity and quasi-equity to cover the development and financing needs of innovating enterprises from the seed stage through to growth and expansion. The focus shall be on supporting the objectives of Horizon 2020 and related policies.

The target final beneficiaries shall be potentially enterprises of all sizes undertaking or embarking on innovation activities, with a particular focus on innovative SMEs and mid-caps.

The Equity facility will focus on early-stage venture capital funds and funds-of-funds providing venture capital and quasi-equity (including mezzanine capital) to individual portfolio enterprises. The facility will also have the possibility to make expansion and growth-stage investments in conjunction with the Equity Facility for Growth under COSME, to ensure a continuum of support during the start-up and development of companies.

The Equity facility, which will be primarily demand-driven, shall use a portfolio approach, where venture capital funds and other comparable intermediaries select the firms to be invested in.

Earmarking may be applied to help achieve particular policy goals, building on the positive experience in the Competitiveness and Innovation Framework Programme (2007 to 2013) with earmarking for eco-innovation, for example for achieving goals related to the identified societal challenges.

The start-up window, supporting the seed and early stages, shall enable equity investments in, amongst others, knowledge-transfer organisations and similar bodies through support to technology transfer (including the transfer of research results and inventions stemming from the sphere of public research to the productive sector, for example through proof-of-concept), seed capital funds, cross-border seed and early-stage funds, business angel co-investment vehicles, intellectual property assets, platforms for the exchange and trading of intellectual property rights, and early-stage venture capital funds and funds-of-funds operating across borders and investing in venture capital funds. This could include support at phase 3 of the SME instrument, subject to the level of demand.

The growth window shall make expansion and growth-stage investments in conjunction with the Equity Facility for Growth under COSME, including investments in private and public sector funds-of-funds operating across borders and investing in venture capital funds, most of which will have a thematic focus that supports the goals of the Europe 2020 strategy.

3. Innovation In SMEs

3.1. Specific objective

The specific objective is to stimulate sustainable economic growth by means of increasing the levels of innovation in SMEs, covering their different innovation needs over the whole innovation cycle for all types of innovation, thereby creating more fast-growing, internationally active SMEs.

Considering the central role of SMEs in Europe's economy, research and innovation in SMEs will play a crucial role in increasing competitiveness, boosting economic growth and job creation and thus in achieving the objectives of the Europe 2020 strategy and notably its flagship initiative 'Innovation Union'.

However, SMEs have – despite their important economic and employment share and significant innovation potential – several types of problems to become more innovative and more competitive, including shortage of financial resources and access to finance, shortage in skills in innovation management, weaknesses in networking and cooperation with external parties, and insufficient use of public procurement to foster innovation in SMEs. Although Europe produces a similar number of start-up companies to the United States, European SMEs are finding it much harder to grow into large companies than their US counterparts. The internationalised business environment with increasingly interlinked value chains puts further pressure on them. SMEs need to enhance their research and innovation capacity. They need to generate, take up and commercialise new knowledge and business ideas faster and to a greater extent to compete successfully on fast evolving global markets. The challenge is to stimulate more innovation in SMEs, thereby enhancing their competitiveness, sustainability and growth.

The proposed actions aim to complement national and regional business innovation policies and programmes, to foster cooperation between SMEs, including transnational cooperation, clusters and other innovation-relevant actors in Europe, to bridge the gap between R&D and successful market uptake, to provide a more business innovation friendly environment, including demand-side measures and measures geared to boosting the transfer of knowledge, and to support taking into account the changing nature of innovation processes, new technologies, markets and business models.

Strong links with industry-specific Union policies, notably COSME and the Cohesion Policy Funds, will be established to ensure synergies and a coherent approach.

3.2. *Rationale and Union added value*

SMEs are key drivers of innovation due to their ability to quickly and efficiently transform new ideas in successful businesses. They serve as important conduits of knowledge spill-over bringing research results to the market. SMEs have a key role to play in technology and knowledge transfer processes, contributing to the market transfer of innovations stemming from the research carried out in universities, research bodies and research performing companies. The last twenty years have shown that entire sectors have been renewed and new industries created driven by innovative SMEs. Fast growing enterprises are crucial for the development of emerging industries and for the acceleration of the structural changes that Europe needs to become a knowledge-based and sustainable economy with sustained growth and high quality jobs.

SMEs can be found in all sectors of the economy. They form a more important part of the European economy than of other regions such as the United States. All types of SMEs can innovate. They need to be encouraged and supported to invest in research and innovation and to enhance their capacity to manage innovation processes. In doing so they should be able to draw on the full innovative potential of the internal market and the ERA so as to create new business opportunities in Europe and beyond and to contribute to find solutions to key societal challenges.

Participation in Union research and innovation strengthens the R&D and technology capability of SMEs, increases their capacity to generate, absorb and use new knowledge, enhances the economic exploitation of new solutions, boosts innovation in products, services and business models, promotes business activities in larger markets and internationalises the knowledge networks of SMEs. SMEs that have a good innovation management in place, thereby often relying on external expertise and skills, outperform others.

Cross-border collaborations are an important element in the innovation strategy of SMEs to overcome some of their size-related problems, such as access to technological and scientific competences and new markets. They contribute to turn ideas into profit and company growth and in return to increase private investment in research and innovation.

Regional and national programmes for research and innovation, often backed by European cohesion policy, play an essential role in promoting SMEs. In particular, Cohesion Policy Funds have a key role to play through building capacity and providing a stairway to excellence for SMEs in order to develop excellent projects that may compete for funding under Horizon 2020. Nevertheless, only a few national and regional programmes provide funding for transnational research and innovation activities carried out by SMEs, the Union-wide diffusion

and uptake of innovative solutions or cross-border innovation support services. The challenge is to provide SMEs with thematically open support to realise international projects in line with companies' innovation strategies. Actions at Union level are therefore necessary to complement activities undertaken at national and regional level, to enhance their impact and to open up the research and innovation support systems.

3.3. *Broad lines of the activities*

(a) Mainstreaming SME support especially through a dedicated instrument

SMEs shall be supported across Horizon 2020. For this purpose, to participate in Horizon 2020, better conditions for SMEs shall be established. In addition, a dedicated SME instrument shall provide staged and seamless support covering the whole innovation cycle. The SME instrument shall be targeted at all types of innovative SMEs showing a strong ambition to develop, grow and internationalise. It shall be provided for all types of innovation, including service, non-technological and social innovations, given each activity has a clear European added value. The aim is to develop and capitalise on the innovation potential of SMEs by filling the gap in funding for early stage high-risk research and innovation, stimulating innovations and increasing private-sector commercialisation of research results.

The instrument will operate under a single centralised management system, light administrative regime and a single entry point. It shall be implemented primarily in a bottom-up manner through a continuously open call.

All of the specific objectives of the priority 'Societal challenges', and the specific objective 'Leadership in enabling and industrial technologies' will apply the dedicated SME instrument and allocate an amount for this.

(b) Support for research-intensive SMEs

The goal is to promote transnational market-oriented innovation of R&D performing SMEs. A specific action shall target research-intensive SMEs in any sectors that show the capability to commercially exploit the project results. This action will be built on the Eurostars Programme.

(c) Enhancing the innovation capacity of SMEs

Transnational activities assisting the implementation of and complementing the SME specific measures across Horizon 2020 shall be supported, notably to enhance the innovation capacity of SMEs. These activities shall be coordinated with similar national measures when appropriate. Close cooperation with the National Contact Point (NCP) Network and the Enterprise Europe Network (EEN) is envisaged.

(d) Supporting market-driven innovation

Transnational market-driven innovation to improve the framework conditions for innovation shall be supported, and the specific barriers preventing, in particular, the growth of innovative SMEs shall be tackled.

PART III

SOCIETAL CHALLENGES

1. Health, demographic change and well-being

1.1. *Specific objective*

The specific objective is to improve the lifelong health and well-being of all.

Lifelong health and well-being for all - children, adults and older people - high-quality, economically sustainable and innovative health and care systems, as part of welfare systems, and opportunities for new jobs and growth are the aims of the support provided to research and innovation in response to this challenge, and they will make a major contribution to the Europe 2020 strategy.

The cost of Union health and social care systems is rising, with care and prevention measures in all ages increasingly expensive. The number of Europeans aged over 65 is expected to nearly double from 85 million in 2008 to 151 million by 2060, and the number of those over 80 is expected to rise from 22 to 61 million in the same period. Reducing or containing these costs so that they do not become unsustainable depends partly on improving the lifelong health and well-being of all and therefore on the effective prevention, treatment and management of disease and disability.

Chronic conditions and diseases are major causes of disability, ill-health, health-related retirement and premature death, and present considerable social and economic costs.

In the Union, cardiovascular disease annually accounts for more than 2 million deaths and costs the economy more than EUR 192 billion while cancer accounts for a quarter of all deaths and is the number one cause of death for people aged 45-64. Over 27 million people in the Union suffer from diabetes and over 120 million from rheumatic and musculoskeletal conditions. Rare diseases remain a major challenge, affecting approximately 30 million people across Europe. The total cost of brain disorders (including, but not limited to those affecting mental health, including depression) has been estimated at EUR 800 billion. It is estimated that mental disorders alone affect 165 million people in the Union, at a cost of EUR 118 billion. These sums are expected to rise significantly, largely as a result of Europe's ageing population and the associated increases in neurodegenerative diseases. Environmental, occupational, life-style and socio-economic factors are relevant in several of these conditions with up to one third of the global disease burden estimated to be related to these.

Infectious diseases (e.g. HIV/AIDS, tuberculosis and malaria), are a global concern, accounting for 41 % of the 1,5 billion disability adjusted life years worldwide, with 8 % of these in Europe. Poverty-related and neglected diseases are also a global concern. Emerging epidemics, re-emerging infectious diseases (including water-related diseases) and the threat of increasing anti-microbial resistance must also be prepared for. Increased risks for animal-borne diseases should be considered.

Meanwhile, drug and vaccine development processes are becoming more expensive and less effective. Efforts to increase the success of drug and vaccine development include alternative methods to replace classical safety and effectiveness testing. Persistent health inequalities and the needs of specific population groups (e.g. those suffering from rare diseases) must be addressed, and access to effective and competent health and care systems must be ensured for all Europeans irrespective of their age or background.

Other factors, such as nutrition, physical activity, wealth, inclusion, engagement, social capital and work, also affect health and well-being, and a holistic approach must be taken.

Due to higher life expectancy the age and population structure in Europe will change. Therefore, research furthering lifelong health, active ageing and well-being for all will be a cornerstone of the successful adaptation of societies to demographic change.

1.2. *Rationale and Union added value*

Disease and disability are not stopped by national borders. An appropriate European level research, development and innovation effort, in cooperation with third countries and with the involvement of all stakeholders, including patients and end-users, can and should make a crucial contribution to addressing these global challenges, thereby working to achieve the United Nations' Millennium Development Goals, deliver better health and well-being for all, and position Europe as a leader in the rapidly expanding global markets for health and well-being innovations.

The response depends on excellence in research to improve our fundamental understanding of the determinants of health, disease, disability, healthy employment conditions, development and ageing (including of life expectancy), and on the seamless and widespread translation of the resulting and existing knowledge into innovative, scalable, effective, accessible and safe products, strategies, interventions and services. Furthermore, the pertinence of these challenges across Europe and in many cases, globally, demands a response characterised by long-term and coordinated support for co-operation between excellent, multidisciplinary and multi-sector teams. It is also necessary to address the challenge from the perspective of the social and economic sciences and humanities.

Similarly, the complexity of the challenge and the interdependency of its components demand a European level response. Many approaches, tools and technologies have applicability across many of the research and innovation areas of this challenge and are best supported at Union level. These include understanding the molecular basis of disease, the identification of innovative therapeutic strategies and novel model systems, the multidisciplinary application of knowledge in physics, chemistry and systems biology, the development of long-term cohorts and the conduct of clinical trials (including focus on the development and effects of medicines in all age groups), the clinical use of "-omics", systems biomedicine and the development of ICT and their applications in healthcare practice, notably e-health. The requirements of specific populations are also best addressed in an integrated manner, for example in the development of stratified and/or personalised medicine, in the treatment of rare diseases, and in providing assisted and independent living solutions.

To maximise the impact of Union level actions, support will be provided to the full spectrum of research, development and innovation activities from basic research through translation of knowledge on disease to new therapeutics, to large trials, piloting and demonstration actions, by mobilising private investment; to public and pre-commercial procurement for new products, services and scalable solutions, which are, when necessary, interoperable and supported by defined standards and/or common guidelines. This coordinated, European effort will increase the scientific capabilities in health research and contribute to the ongoing development of the ERA. It will also interface, as and when appropriate, with activities developed in the context of the Health for Growth Programme, the Joint Programming Initiatives, including "Neurodegenerative Disease Research", "A Healthy Diet for a Healthy Life", "Antimicrobial resistance" and "More Years, Better Lives", and the European Innovation Partnership on Active and Healthy Ageing.

The Scientific Panel for Health will be a science-led stakeholder platform which elaborates scientific input concerning this societal challenge. It will provide a coherent scientific focused analysis of research and innovation bottlenecks and opportunities related to this societal challenge, contribute to the definition of its research and innovation priorities and encourage Union-wide scientific participation in it. Through active cooperation with stakeholders, it will help to build capabilities and to foster knowledge sharing and stronger collaboration across the Union in this field.

1.3. *Broad lines of the activities*

Effective health promotion, supported by a robust evidence base, prevents disease, contributes to well-being and is cost effective. Promotion of health, active ageing, well-being and disease prevention also depend on an understanding of the determinants of health, on effective preventive tools on effective health and disease surveillance and preparedness, and on effective screening programmes. Effective health promotion is also facilitated by the provision of better information to citizens which encourages responsible health choices.

Successful efforts to prevent, detect early, manage, treat and cure disease, disability, frailty and reduced functionality are underpinned by the fundamental understanding of their determinants and causes, processes and impacts, as well as factors underlying good health and well-being. Improved understanding of health and disease will demand close linkage between fundamental, clinical, epidemiological and socio-economic research. Effective sharing of data, standardised data processing and the linkage of these data with large-scale cohort studies is also essential, as is the translation of research findings into the clinic, in particular through the conduct of clinical trials, which should address all age groups to ensure that medicines are adapted to their use.

The resurgence of old infectious diseases, including tuberculosis, and the increased prevalence of vaccine-preventable diseases further underlines the need for a comprehensive approach towards poverty-related and neglected diseases. Likewise, the growing problem of anti-microbial resistance demands a similarly comprehensive approach.

Personalised medicine should be developed in order to suit preventive and therapeutic approaches to patient requirements, and must be underpinned by the early detection of disease. It is a societal challenge to adjust to the further demands on health and care sectors due to the ageing population. If effective health and care is to be maintained for all ages, efforts are required to improve decision making in prevention and in treatment provision, to identify and support the dissemination of best practice in the health and care sectors, and to support integrated care. A better understanding of ageing processes and the prevention of age-related illnesses are the basis for keeping European citizens healthy and active throughout the course of their lives. Similarly important is the wide uptake of technological, organisational and social innovations empowering in particular older persons, persons with chronic diseases as well as disabled persons to remain active and independent. Doing so will contribute to increasing their physical, social, and mental well-being and lengthening the duration thereof.

All of these activities shall be undertaken in such a way as to provide support throughout the research and innovation cycle, strengthening the competitiveness of the European based industries and development of new

market opportunities. Emphasis will also be placed on engaging all health stakeholders – including patients and patient organisations, and health and care providers – in order to develop a research and innovation agenda that actively involves citizens and reflects their needs and expectations.

Specific activities shall include: understanding the determinants of health (including nutrition, physical activity and gender, and environmental, socio-economic, occupational and climate-related factors); improving health promotion and disease prevention; understanding disease and improving diagnosis and prognosis; developing effective prevention and screening programmes and improving the assessment of disease susceptibility; improving the surveillance of infectious diseases and preparedness for combating epidemics and emerging diseases; developing new and better preventive and therapeutic vaccines and drugs; using in-silico medicine for improving disease management and prediction; developing regenerative medicine and adapted treatments, and treating disease, including palliative medicine; transferring knowledge to clinical practice and scalable innovation actions; improving health information and better collection and use of health cohort and administrative data; standardised data analysis and techniques; active ageing, and independent and assisted living; individual awareness and empowerment for self-management of health; promotion of integrated care, including psychosocial aspects; improving scientific tools and methods to support policy making and regulatory needs; optimising the efficiency and effectiveness of healthcare provision; and reducing health disparities and inequalities by evidence-based decision making and dissemination of best practice and by innovative technologies and approaches. Active involvement of healthcare providers must be encouraged in order to secure rapid take-up and implementation of results.

2. **Food security, sustainable agriculture and forestry, marine, maritime and inland water research, and the bioeconomy**

2.1. *Specific objective*

The specific objective is to secure sufficient supplies of safe, healthy and high quality food and other bio-based products, by developing productive, sustainable and resource-efficient primary production systems, fostering related ecosystem services and the recovery of biological diversity, alongside competitive and low-carbon supply, processing and marketing chains. This will accelerate the transition to a sustainable European bioeconomy, bridging the gap between new technologies and their implementation.

Over the coming decades, Europe will be challenged by increased competition for limited and finite natural resources, by the effects of climate change, in particular on primary production systems (agriculture including animal husbandry and horticulture, forestry, fisheries and aquaculture), and by the need to provide a sustainable, safe and secure food supply for the European and an increasing global population. A 70 % increase of the world food supply is estimated to be required to feed the 9 billion global population by 2050. Agriculture accounts for about 10 % of Union greenhouse gas emissions, and while declining in Europe, global emissions from agriculture are projected to increase up to 20 % by 2030. Furthermore, Europe will need to ensure sufficient and sustainably produced supplies of raw materials, energy and industrial products, under conditions of decreasing fossil carbon resources (oil and liquid gas production expected to decrease by about 60 % by 2050), while maintaining its competitiveness. Biowaste (estimated at up to 138 million tonnes per year in the Union, of which up to 40 % is land-filled) represents a huge problem and cost, despite its high potential added value.

For example, an estimated 30 % of all food produced in developed countries is discarded. Major changes are needed to reduce this amount by 50 % in the Union by 2030 ⁽¹⁾. In addition, national borders are irrelevant in the entry and spread of animal and plant pests and diseases, including zoonotic diseases, and food borne pathogens. While effective national prevention measures are needed, action at Union level is essential for ultimate control and the effective running of the single market. The challenge is complex, affects a broad range of interconnected sectors and requires a holistic and systemic approach.

⁽¹⁾ COM (2011)0112.

More and more biological resources are needed to satisfy market demand for a secure and healthy food supply, biomaterials, biofuels and bio-based products, ranging from consumer products to bulk chemicals. However, the capacities of the terrestrial and aquatic ecosystems required for their production are limited, while there are competing claims for their utilisation, and often not optimally managed, as shown for example by a severe decline in soil carbon content and fertility and fish stock depletion. There is under-utilised scope for fostering ecosystem services from farmland, forests, marine and fresh waters by integrating agronomic, environmental and social goals into sustainable production and consumption.

The potential of biological resources and ecosystems could be used in a much more sustainable, efficient and integrated manner. For examples, the potential of biomass from agriculture, forests and waste streams from agricultural, aquatic, industrial, and also municipal origins could be better harnessed.

In essence, a transition is needed towards an optimal and renewable use of biological resources and towards sustainable primary production and processing systems that can produce more food, fibre and other bio-based products with minimised inputs, environmental impact and greenhouse gas emissions, enhanced ecosystem services, zero-waste and adequate societal value. The aim is establishing food production systems that strengthen, reinforce and nourish the resource base and enable sustainable wealth generation. Responses to the way food production is generated, distributed, marketed, consumed and regulated must be better understood and developed. A critical effort of interconnected research and innovation, as well as a continuous dialogue between political, social, economic and other stakeholder groups, is a key element for this to happen, in Europe and beyond.

2.2. *Rationale and Union added value*

Agriculture, forestry, fisheries and aquaculture together with the bio-based industries are the major sectors underpinning the bioeconomy. The bioeconomy represents a large and growing market estimated to be worth over EUR 2 trillion, providing 20 million jobs and accounting for 9 % of total employment in the Union in 2009. Investments in research and innovation under this societal challenge will enable Europe to take leadership in the concerned markets and will play a role in achieving the goals of the Europe 2020 strategy and its flagship initiatives 'Innovation Union' and 'Resource-efficient Europe'.

A fully functional European bioeconomy – encompassing the sustainable production of renewable resources from land, fisheries and aquaculture environments and their conversion into food, feed, fibre bio-based products and bioenergy as well as into the related public goods - will generate high Union added value. In parallel to the market-related function, the bioeconomy sustains also a wide range of public goods functions, biodiversity and ecosystem services. Managed in a sustainable manner, it can reduce the environmental footprint of primary production and the supply chain as a whole. It can increase their competitiveness, enhance Europe's self-reliance and provide jobs and business opportunities essential for rural and coastal development. The food security, sustainable agriculture and farming, aquatic production, forestry and overall bioeconomy – related challenges are of a European and global nature. Actions at Union level are essential to bring together clusters to achieve the necessary breadth and critical mass to complement efforts made by a single Member State or groups of Member States. A multi-actor approach will ensure the necessary cross-fertilising interactions between researchers, businesses, farmers/producers, advisors and end-users. The Union level is also necessary to ensure coherence in addressing this challenge across sectors and with strong links to relevant Union policies. Coordination of research and innovation at Union level will stimulate and help to accelerate the required changes across the Union.

Research and innovation will interface with and support elaboration of a wide spectrum of Union policies and related targets, including the Common Agriculture Policy (in particular the Rural Development Policy, the Joint Programming Initiatives, including "Agriculture, Food Security and Climate Change", "A Healthy Diet for a Healthy Life" and "Healthy and Productive Seas and Oceans") and the European Innovation Partnership 'Agricultural Productivity and Sustainability' and the European Innovation Partnership on Water, the Common Fisheries Policy, the Integrated Maritime Policy, the European Climate Change Programme, the Water Framework Directive ⁽¹⁾, the Marine Strategy Framework Directive ⁽²⁾, the EU Forestry Action Plan, the Soil Thematic Strategy, the Union's 2020 Biodiversity Strategy, the Strategic Energy Technology Plan, the Union's innovation and industrial policies, external and development aid policies, plant health strategies, animal health and welfare strategies and

⁽¹⁾ Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

⁽²⁾ Directive 2008/56/EC of the European Parliament and of the Council of 17 June 2008 establishing a framework for community action in the field of marine environmental policy (Marine Strategy Framework Directive) (OJ L 164, 25.6.2008, p. 19).

regulatory frameworks to protect the environment, health and safety, to promote resource efficiency and climate action, and to reduce waste. A better integration of the full cycle from basic research to innovation into related Union policies will significantly improve their Union added value, provide leverage effects, increase societal relevance, provide healthy food products and help to further develop sustainable land, seas and oceans management and bioeconomy markets.

For the purpose of supporting Union policies related to the bioeconomy and to facilitate governance and monitoring of research and innovation, socio-economic research and forward-looking activities will be performed in relation to the bioeconomy strategy, including development of indicators, data bases, models, foresight and forecast, and impact assessment of initiatives on the economy, society and the environment.

Challenge-driven actions focusing on social, economic and environmental benefits and the modernisation of the bioeconomy associated sectors and markets shall be supported through multi-disciplinary research, driving innovation and leading to the development of new strategies, practices, sustainable products and processes. It shall also pursue a broad approach to innovation ranging from technological, non-technological, organisational, economic and social innovation to, for instance, ways for technology transfer, novel business models, branding and services. The potential of farmers and SMEs to contribute to innovation must be recognised. The approach to the bioeconomy shall take account of the importance of local knowledge and diversity.

2.3. *Broad lines of activities*

(a) Sustainable agriculture and forestry

The aim is to supply sufficient food, feed, biomass and other raw-materials, while safeguarding natural resources, such as water, soil and biodiversity, in a European and world-wide perspective, and enhancing ecosystems services, including coping with and mitigating climate change. The activities shall focus on increasing the quality and value of agricultural products by delivering more sustainable and productive agriculture, including animal husbandry and forestry systems, which are diverse, resilient and resource-efficient (in terms of low-carbon and low external input and water), protect natural resources, produce less waste and can adapt to a changing environment. Furthermore, the activities shall focus on developing services, concepts and policies for thriving rural livelihoods and encouraging sustainable consumption.

In particular for forestry, the aim is to sustainably produce biomass and bio-based products and deliver ecosystem services, with due consideration to economic, ecological and social aspects of forestry. Activities will focus on the further development of production and sustainability of resource-efficient forestry systems which are instrumental in the strengthening of forest resilience and biodiversity protection, and which can meet increased biomass demand.

The interaction of functional plants with health and well being, as well as the exploitation of horticulture and forestry for the development of urban greening, will also be considered.

(b) Sustainable and competitive agri-food sector for a safe and healthy diet

The aim is to meet the requirements of citizens and the environment for safe, healthy and affordable food, and to make food and feed processing, distribution and consumption more sustainable and the food sector more competitive while also considering the cultural component of food quality. The activities shall focus on healthy and safe food for all, informed consumer choices, dietary solutions and innovations for improved health, and competitive food processing methods that use less resources and additives and produce less by-products, waste and greenhouse gases.

(c) Unlocking the potential of aquatic living resources

The aim is to manage, sustainably exploit and maintain aquatic living resources to maximise social and economic benefits/returns from Europe's oceans, seas and inland waters while protecting biodiversity. The activities shall focus on an optimal contribution to secure food supplies by developing sustainable and environmentally friendly fisheries, on sustainable management of ecosystems providing goods and services, on competitive as well as environmentally friendly European aquaculture in the context of the global economy, and on boosting marine and maritime innovation through biotechnology to fuel smart "blue" growth.

(d) Sustainable and competitive bio-based industries and supporting the development of a European bioeconomy

The aim is the promotion of low-carbon, resource-efficient, sustainable and competitive European bio-based industries. The activities shall focus on fostering the knowledge-based bioeconomy by transforming conventional industrial processes and products into bio-based resource and energy efficient ones, the development of integrated second and subsequent generation biorefineries, optimising the use of biomass from primary production including residues, biowaste and bio-based industry by-products, and opening new markets through supporting standardisation and certification systems as well as regulatory and demonstration/field trial activities, while taking into account the implications of the bioeconomy on land use and land use changes, as well as the views and concerns of civil society.

(e) Cross-cutting marine and maritime research

The aim is to increase the impact of Union seas and oceans on society and economic growth through the sustainable exploitation of marine resources as well as the use of different sources of marine energy and the wide range of different uses that is made of the seas.

Activities shall focus on cross-cutting marine and maritime scientific and technological challenges with a view to unlocking the potential of seas and oceans across the range of marine and maritime industries, while protecting the environment and adapting to climate change. A strategic coordinated approach for marine and maritime research across all challenges and priorities of Horizon 2020 will also support the implementation of relevant Union policies to help deliver key blue growth objectives.

3. Secure, clean and efficient energy

3.1. Specific objective

The specific objective is to make the transition to a reliable, affordable, publicly accepted, sustainable and competitive energy system, aiming at reducing fossil fuel dependency in the face of increasingly scarce resources, increasing energy needs and climate change.

The Union intends to reduce greenhouse gas emissions by 20 % below 1990 levels by 2020, with a further reduction to 80-95 % by 2050. In addition, renewables should cover 20 % of final energy consumption in 2020 coupled with a 20 % energy efficiency target. Achieving these objectives will require an overhaul of the energy system combining low carbon profile and the development of alternatives to fossil fuels, energy security and affordability, while at the same time reinforcing Europe's economic competitiveness. Europe is currently far from this overall goal. 80 % of the European energy system still relies on fossil fuels, and the sector produces 80 % of all the Union's greenhouse gas emissions. With a view to achieving the Union's long-term climate and energy objectives, it is appropriate to increase the share of the budget dedicated to renewable energy, end-user energy efficiency, smart grids and energy storage activities as compared to the Seventh Framework Programme, and increase the budget dedicated to market uptake of energy innovation activities undertaken under the Intelligent Energy Europe Programme within the Competitiveness and Innovation Framework Programme (2007 to 2013). The total allocation to these activities shall endeavour to reach at least 85 % of the budget under this societal challenge. Every year 2,5 % of the Union GDP is spent on energy imports and this is likely to increase. This trend would lead to total dependence on oil and gas imports by 2050. Faced with volatile energy prices on the world market, coupled with concerns over security of supply, European industries and consumers are spending an increasing share of their income on energy. European cities are responsible for 70-80 % ⁽¹⁾ of the total energy consumption in the Union and for about the same share of greenhouse gas emissions.

The Roadmap for moving to a competitive low-carbon economy in 2050 ⁽²⁾ suggests that the targeted reductions in greenhouse gas emissions will have to be met largely within the territory of the Union. This would entail reducing CO₂ emissions by over 90 % by 2050 in the power sector, by over 80 % in industry, by at least 60 % in transport and by about 90 % in the residential sector and services. The Roadmap also shows that *inter alia* natural gas, in the short to medium term, can contribute to the transformation of the energy system, combined with the use of carbon capture and storage (CCS) technology.

To achieve these ambitious reductions, significant investments need to be made in research, development, demonstration and market roll-out at affordable prices of efficient, safe, secure and reliable low-carbon energy technologies and services, including gas, electricity storage and the roll-out of small and micro-scale energy systems. These must go hand in hand with non-technological solutions on both the supply and demand sides, including by initiating participation processes and integrating consumers. All this must be part of an integrated sustainable low-carbon policy, including mastering key enabling technologies, in particular ICT solutions and advanced

⁽¹⁾ World Energy Outlook 2008, OECD- IEA, 2008.

⁽²⁾ COM(2011)0112.

manufacturing, processing and materials. The goal is to develop and produce efficient energy technologies and services, including the integration of renewable energy, that can be taken up widely on European and international markets and to establish intelligent demand-side management based on an open and transparent energy trade market and secure intelligent energy efficiency management systems.

3.2. *Rationale and Union added value*

New technologies and solutions must compete on cost and reliability against energy systems with well-established incumbents and technologies. Research and innovation are critical to make these new, cleaner, low-carbon, more efficient energy sources commercially attractive on the scale needed. Neither industry alone, nor Member States individually, are able to bear the costs and risks, for which the main drivers (transition to a low-carbon economy, providing affordable and secure energy) are outside the market.

Speeding up this development will require a strategic approach at Union level, spanning energy supply, demand and use in buildings, services, domestic use, transport and industrial value chains. This will entail aligning resources across the Union, including Cohesion Policy Funds, in particular through the national and regional strategies for smart specialisation, emission trading schemes (ETS), public procurement and other financing mechanisms. It will also require regulatory and deployment policies for renewables and energy efficiency, tailored technical assistance and capacity-building to remove non-technological barriers.

The Strategic Energy Technology Plan (SET Plan) offers such a strategic approach. It provides a long-term agenda to address the key innovation bottlenecks that energy technologies are facing at the frontier research and R&D/proof-of-concept stages and at the demonstration stage when companies seek capital to finance large, first-of-a-kind projects and to open the market deployment process. Newly emerging technologies with disruptive potential will not be neglected.

The resources required to implement the SET Plan in full have been estimated at EUR 8 billion per year over the next 10 years⁽¹⁾. This is well beyond the capacity of individual Member States or research and industrial stakeholders alone. Investments in research and innovation at Union level are needed, combined with mobilisation of efforts across Europe in the form of joint implementation and risk and capacity sharing. Union funding of energy research and innovation shall therefore complement Member States' activities by focusing on cutting-edge technologies and activities with clear Union added value, in particular those with high potential to leverage national resources and create jobs in Europe. Action at Union level shall also support high-risk, high-cost, long-term programmes beyond the reach of individual Member States, pool efforts to reduce investment risks in large-scale activities such as industrial demonstration, and develop Europe-wide, interoperable energy solutions.

Implementation of the SET Plan as the research and innovation pillar of European energy policy will reinforce the Union's security of supply and the transition to a low-carbon economy, help to link research and innovation programmes with trans-European and regional investments in energy infrastructure and increase the willingness of investors to release capital for projects with long lead-times and significant technology and market risks. It will create opportunities for innovation for small and large companies and help them become or remain competitive at world level, where opportunities for energy technologies are large and increasing.

On the international scene, the action taken at Union level provides a critical mass to attract interest from other technology leaders and to foster international partnerships to achieve the Union's objectives. It will make it easier for international partners to interact with the Union to build common action where there is mutual benefit and interest.

The activities under this societal challenge will therefore form the technological backbone of European energy and climate policy. They will also contribute to achieving the flagship initiative 'Innovation Union' in the field of energy and the policy goals outlined in the flagship initiatives 'Resource-efficient Europe', 'An Industrial Policy for the Globalisation Era' and 'Digital agenda for Europe'.

⁽¹⁾ COM(2009)0519.

Research and innovation activities on nuclear fission and fusion energy are carried out in the Euratom programme established by Regulation (Euratom) No 1314/2013. Where appropriate, possible synergies between this societal challenge and the Euratom programme should be envisaged.

3.3. *Broad lines of the activities*

(a) Reducing energy consumption and carbon footprint by smart and sustainable use

Activities shall focus on research and full-scale testing of new concepts, non-technological solutions, more efficient, socially acceptable and affordable technology components and systems with in-built intelligence, to allow real-time energy management for new and existing near-zero-emission, near-zero-energy and positive energy buildings, retrofitted buildings, cities and districts, renewable heating and cooling, highly efficient industries and mass take-up of energy efficiency and energy saving solutions and services by companies, individuals, communities and cities.

(b) Low-cost, low-carbon electricity supply

Activities shall focus on research, development and full scale demonstration of innovative renewables, efficient, flexible and low carbon emission fossil power plants and carbon capture and storage, or CO₂ re-use technologies, offering larger scale, lower cost, environmentally safe technologies with higher conversion efficiency and higher availability for different market and operating environments.

(c) Alternative fuels and mobile energy sources

Activities shall focus on research, development and full scale demonstration of technologies and value chains to make bioenergy and other alternative fuels more competitive and sustainable for power and heat and for surface, maritime and air transport, with potential for more efficient energy conversion, to reduce time to market for hydrogen and fuel cells and to bring new options showing long-term potential to maturity.

(d) A single, smart European electricity grid

Activities shall focus on research, development and full scale demonstration of new smart energy grid technologies, back-up and balancing technologies enabling higher flexibility and efficiency, including conventional power plants, flexible energy storage, systems and market designs to plan, monitor, control and safely operate interoperable networks, including standardisation issues, in an open, decarbonised, environmentally sustainable, climate-resilient and competitive market, under normal and emergency conditions.

(e) New knowledge and technologies

Activities shall focus on multi-disciplinary research for clean, safe and sustainable energy technologies (including visionary actions) and joint implementation of pan-European research programmes and world-class facilities.

(f) Robust decision making and public engagement

Activities shall focus on the development of tools, methods, models and forward-looking and perspective scenarios for a robust and transparent policy support, including activities on public engagement, user involvement, environmental impact and sustainability assessment improving the understanding of energy-related socio-economic trends and prospects.

(g) Market uptake of energy innovation - building on Intelligent Energy Europe

Activities shall build upon and further enhance those undertaken within the Intelligent Energy Europe (IEE) programme. They shall focus on applied innovation and promotion of standards to facilitate the market uptake of energy technologies and services, to address non-technological barriers and to accelerate the cost-effective implementation of the Union's energy policies. Attention will also be given to innovation for the smart and sustainable use of existing technologies.

4. **Smart, Green And Integrated Transport**

4.1. *Specific objective*

The specific objective is to achieve a European transport system that is resource-efficient, climate- and environmentally-friendly, safe and seamless for the benefit of all citizens, the economy and society.

Europe must reconcile the growing mobility needs of its citizens and goods and the changing needs shaped by new demographic and societal challenges with the imperatives of economic performance and the requirements of an energy-efficient low-carbon society and climate-resilient economy. Despite its growth, the transport sector must achieve a substantial reduction in greenhouse gases and other adverse environmental impacts, and must break its dependency on oil and other fossil fuels, while maintaining high levels of efficiency and mobility and promoting territorial cohesion.

Sustainable mobility can only be achieved through a radical change in the transport system, including in public transport, inspired by breakthroughs in transport research, far-reaching innovation, and a coherent, Europe-wide implementation of greener, safer, more reliable and smarter transport solutions.

Research and innovation must bring about focused and timely advances for all transport modes that will help achieve key Union policy objectives, while boosting economic competitiveness, supporting the transition to a climate-resilient, energy-efficient and low-carbon economy, and maintaining global market leadership both for the service industry as well as the manufacturing industry.

Although the necessary investments in research, innovation and deployment will be significant, failing to improve the sustainability of the whole transport and mobility system and failing to maintain European technological leadership in transport will result in unacceptably high societal, ecological, and economic costs in the long term, and damaging consequences on European jobs and long-term economic growth.

4.2. *Rationale and Union added value*

Transport is a major driver of Europe's economic competitiveness and growth. It ensures the mobility of people and goods necessary for an integrated European single market, territorial cohesion and an open and inclusive society. It represents one of Europe's greatest assets in terms of industrial capability and quality of service, playing a leading role in many world markets. Transport industry and transport equipment manufacturing together represent 6,3 % of the Union GDP. The transport sector's overall contribution to the Union economy is even greater, taking into account trade, services and mobility of workers. At the same time, the European transport industry faces increasingly fierce competition from other parts of the world. Breakthrough technologies will be required to secure Europe's future competitive edge and to mitigate the drawbacks of our current transport system.

The transport sector is a major contributor to greenhouse gases and generates up to a quarter of all emissions. It is also a major contributor to other air pollution problems. Transport is still 96 % dependent on fossil fuels. It is essential to reduce this environmental impact through targeted technological improvement, bearing in mind that each mode of transport faces varying challenges and is characterised by different technology integration cycles. Moreover, congestion is an increasing problem; systems are not yet sufficiently smart; alternative options for shifting towards more sustainable modes of transport are not always attractive; road fatalities remain dramatically high at 34 000 per year in the Union; citizens and businesses expect a transport system that is accessible to all, safe and secure. The urban context poses specific challenges and provides opportunities to the sustainability of transport and for a better quality of life.

Within a few decades the expected growth rates of transport would drive European traffic into a gridlock and make its economic costs and societal impact unbearable, with adverse economic and societal repercussions. If trends of the past continue in the future, passenger-kilometres are predicted to double over the next 40 years and grow twice as fast for air travel. CO₂ emissions would grow 35 % by 2050 ⁽¹⁾. Congestion costs would increase by about 50 %, to nearly EUR 200 billion annually. The external costs of accidents would increase by about EUR 60 billion compared to 2005.

⁽¹⁾ Commission White Paper "Roadmap to a Single European Transport Area – Towards a competitive and resource efficient transport system" (COM(2011)0144).

Business-as-usual is therefore not an option. Research and innovation, driven by policy objectives and focused on the key challenges, shall contribute substantially to achieve the Union's targets of limiting global temperature increase to 2 °C, cutting 60 % of CO₂ emissions from transport, drastically reducing congestion and accident costs, and virtually eradicating road deaths by 2050 ⁽¹⁾.

The problems of pollution, congestion, safety and security are common throughout the Union and call for collaborative Europe-wide responses. Accelerating the development and deployment of new technologies and innovative solutions for vehicles ⁽¹⁾, infrastructures and transport management will be essential to achieve a cleaner, safer, more secure, accessible and more efficient intermodal and multimodal transport system in the Union; to deliver the results necessary to mitigate climate change and improve resource efficiency; and to maintain European leadership on the world markets for transport-related products and services. These objectives cannot be achieved through fragmented national efforts alone.

Union level funding of transport research and innovation will complement Member States' activities by focusing on activities with a clear European added value. This means that emphasis will be placed on priority areas that match European policy objectives where a critical mass of effort is necessary, where Europe-wide, interoperable or multimodal integrated transport solutions can help remove bottlenecks in the transport system, or where pooling efforts transnationally and making better use of and effectively disseminating existing research evidence can reduce research investment risks, pioneer common standards and shorten time to market of research results.

Research and innovation activities shall include a wide range of initiatives, including relevant public-private partnerships, that cover the full innovation chain and follow an integrated approach to innovative transport solutions. Several activities are specifically intended to help bring results to the market: a programmatic approach to research and innovation, demonstration projects, market take-up actions and support for standardisation, regulation and innovative procurement strategies all serve this goal. In addition, using stakeholders' engagement and expertise will help bridge the gap between research results and their deployment in the transport sector.

Investing in research and innovation for a greener, smarter and fully integrated reliable transport system will make an important contribution to the objectives of the Europe 2020 strategy and of its flagship initiative 'Innovation Union'. The activities will support the implementation of the White Paper "Roadmap to a Single European Transport Area - Towards a competitive and resource efficient transport system". They will also contribute to the policy goals outlined in the flagship initiatives 'Resource-efficient Europe', 'An Industrial Policy for the Globalisation Era' and 'Digital Agenda for Europe'. They will also interface with the relevant Joint Programming Initiatives.

4.3. *Broad lines of the activities*

The activities will be organised in such a way as to allow for an integrated and mode-specific approach as appropriate. Multiannual visibility and continuity will be necessary in order to take into account the specificities of each transport mode and the holistic nature of challenges, as well as the relevant Strategic Research and Innovation Agendas of the transport-related European Technology Platforms.

(a) Resource-efficient transport that respects the environment

The aim is to minimise transport systems' impact on climate and the environment (including noise and air pollution) by improving their quality and efficiency in the use of natural resources and fuel, and by reducing greenhouse gas emissions and dependence on fossil fuels.

The focus of activities shall be to reduce resource consumption, particularly fossil fuels, greenhouse gas emissions and noise levels, as well as to improve transport and vehicle efficiency; to accelerate the development, manufacturing and deployment of a new generation of clean (electric, hydrogen and other low or zero emission) vehicles, including through breakthroughs and optimisation in engines, energy storage and infrastructure; to explore and exploit the potential of alternative and sustainable fuels and innovative and more efficient propulsion and operating systems, including fuel infrastructure and charging; to optimise the planning and use of infrastructures, by means of intelligent transport systems, logistics, and smart equipment; and to increase the use of demand management and public and non-motorised transport, and of intermodal mobility chains, particularly in urban areas. Innovation aimed at achieving low or zero emissions in all modes of transport will be encouraged.

⁽¹⁾ "Vehicles" is to be understood in a broad sense, including all means of transport.

(b) Better mobility, less congestion, more safety and security

The aim is to reconcile the growing mobility needs with improved transport fluidity, through innovative solutions for seamless, intermodal, inclusive, accessible, affordable, safe, secure, healthy, and robust transport systems.

The focus of activities shall be to reduce congestion, improve accessibility, interoperability and passenger choices, and to match user needs by developing and promoting integrated door-to-door transport, mobility management and logistics; to enhance intermodality and the deployment of smart planning and management solutions; and to drastically reduce the occurrence of accidents and the impact of security threats.

(c) Global leadership for the European transport industry

The aim is to reinforce the competitiveness and performance of European transport manufacturing industries and related services (including logistic processes, maintenance, repair, retrofitting and recycling) while retaining areas of European leadership (e.g. aeronautics).

The focus of activities shall be to develop the next generation of innovative air, waterborne and land transport means, ensure sustainable manufacturing of innovative systems and equipment and to prepare the ground for future transport means, by working on novel technologies, concepts and designs, smart control systems and interoperable standards, efficient production processes, innovative services and certification procedures, shorter development times and reduced lifecycle costs without compromising operational safety and security.

(d) Socio-economic and behavioural research and forward-looking activities for policy making

The aim is to support improved policy making which is necessary to promote innovation and meet the challenges raised by transport and the societal needs related to it.

The focus of activities shall be to improve the understanding of transport-related socio-economic impacts, trends and prospects, including the evolution of future demand, and provide policy makers with evidence-based data and analyses. Attention will also be paid to the dissemination of results emerging from these activities.

5. Climate action, Environment, Resource Efficiency and Raw Materials

5.1. Specific objective

The specific objective is to achieve a resource- and water-efficient and climate change resilient economy and society, the protection and sustainable management of natural resources and ecosystems, and a sustainable supply and use of raw materials, in order to meet the needs of a growing global population within the sustainable limits of the planet's natural resources and ecosystems. Activities will contribute to increasing European competitiveness and raw materials security and to improving well being, whilst assuring environmental integrity, resilience and sustainability with the aim of keeping average global warming below 2 °C and enabling ecosystems and society to adapt to climate change and other environmental changes.

During the 20th century, the world increased both its fossil fuel use and the extraction of material resources by a factor of ten. This era of seemingly plentiful and cheap resources is coming to an end. Raw materials, water, air, biodiversity and terrestrial, aquatic and marine ecosystems are all under pressure. Many of the world's major ecosystems are being degraded, with up to 60 % of the services that they provide being used unsustainably. In the Union, some 16 tonnes of materials are used per person each year, of which 6 tonnes are wasted, with half going to landfill. The global demand for resources continues to increase with the growing population and rising aspirations, in particular of middle-income earners in emerging economies. Economic growth needs to be decoupled from resource use.

The average temperature of the Earth's surface has increased by about 0,8 °C over the past 100 years and is projected to increase by between 1,8 to 4 °C by the end of the 21st century (relative to the 1980-1999 average) ⁽¹⁾. The likely impacts on natural and human systems associated with these changes will challenge the planet and its ability to adapt, as well as threaten future economic development and the well being of humanity.

⁽¹⁾ IPCC 4th Assessment Report, 2007, (www.ipcc.ch).

The growing impacts from climate change and environmental problems, such as ocean acidification, changes in ocean circulation, increase of seawater temperature, ice melting in the Arctic and decreased seawater salinity, land degradation and use, loss of soil fertility, water scarcity, droughts and floods, seismic and volcanic hazards, changes in spatial distribution of species, chemical pollution, over-exploitation of resources, and biodiversity loss, indicate that the planet is approaching its sustainability boundaries. For example, without improvements in efficiency across all sectors, including through innovative water systems, water demand is projected to overshoot supply by 40 % in 20 years time, which will lead to severe water stress and shortages. Forests are disappearing at an alarmingly high rate of 5 million hectares per year. Interactions between resources can cause systemic risks, with the depletion of one resource generating an irreversible tipping point for other resources and ecosystems. Based on current trends, the equivalent of more than two planet Earths will be needed by 2050 to support the growing global population.

The sustainable supply and resource-efficient management of raw materials, including their exploration, extraction, processing, re-use, recycling and substitution, is essential for the functioning of modern societies and their economies. European sectors, such as construction, chemicals, automotive, aerospace, machinery and equipment, which provide a total added value of some EUR 1,3 trillion and employment for approximately 30 million people, heavily depend on access to raw materials. However, the supply of raw materials to the Union is coming under increasing pressure. Furthermore, the Union is highly dependent on imports of strategically important raw materials, which are being affected at an alarming rate by market distortions.

Moreover, the Union still has valuable mineral deposits, whose exploration, extraction and processing is limited by a lack of adequate technologies, by inadequate waste cycle management and by lack of investment, and hampered by increased global competition. Given the importance of raw materials for European competitiveness, for the economy and for their application in innovative products, the sustainable supply and resource-efficient management of raw materials is a vital priority for the Union.

The ability of the economy to adapt and become more climate change resilient and resource-efficient and at the same time to remain competitive depends on high levels of eco-innovation, of a societal, economic, organisational and technological nature. With the global market for eco-innovation worth around EUR 1 trillion per year and expected to triple by 2030, eco-innovation represents a major opportunity to boost competitiveness and job creation in European economies.

5.2. *Rationale and Union added value*

Meeting Union and international targets for greenhouse gas emissions and concentrations and coping with climate change impacts requires a transition towards a low-carbon society and the development and deployment of cost-effective and sustainable technological and non-technological solutions, and mitigation and adaptation measures, and a stronger understanding of societal responses to these challenges. Union and global policy frameworks must ensure that ecosystems and biodiversity are protected, valued and appropriately restored in order to preserve their ability to provide resources and services in the future. Water challenges in the rural, urban and industrial environments need to be addressed to promote water system innovation and resource efficiency and to protect aquatic ecosystems. Research and innovation can help secure reliable and sustainable access to and exploitation of raw materials on land and sea bed and ensure a significant reduction in resource use and wastage.

The focus of Union actions shall therefore be on supporting key Union objectives and policies covering the whole innovation cycle and the elements of the knowledge triangle, including the Europe 2020 strategy; the flagship initiatives 'Innovation Union', 'An industrial policy for the globalisation era', 'Digital Agenda for Europe' and 'Resource-efficient Europe' and the corresponding Roadmap⁽¹⁾; the Roadmap for moving to a competitive low-carbon economy in 2050; 'Adapting to climate change: Towards a European framework for action'⁽²⁾; the Raw Materials Initiative⁽³⁾; the Union's Sustainable Development Strategy⁽⁴⁾; an Integrated Maritime Policy for the Union⁽⁵⁾; the Marine Strategy Framework Directive; the Water Framework Directive and the Directives based on it; the Floods Directive⁽⁶⁾; the Eco-innovation Action Plan; and the General Union Environment Action Programme to 2020⁽⁷⁾. These actions shall, when appropriate, interface with relevant European Innovation Partnerships and Joint Programming Initiatives. These actions shall reinforce the ability of society to become more resilient to environmental and climate change and ensure the availability of raw materials.

⁽¹⁾ COM (2011)0571.

⁽²⁾ COM (2009)0147.

⁽³⁾ COM(2011)0025.

⁽⁴⁾ COM(2009)0400.

⁽⁵⁾ COM(2007)0575.

⁽⁶⁾ Directive 2007/60/EC of the European Parliament and of the Council of 23 October 2007 on the assessment and management of flood risks (OJ L 288, 6.11.2007, p. 27).

⁽⁷⁾ COM(2012)0710.

Given the transnational and global nature of the climate and the environment, their scale and complexity, and the international dimension of the raw materials supply chain, activities have to be carried out at the Union level and beyond. The multi-disciplinary character of the necessary research requires pooling complementary knowledge and resources in order to effectively tackle this challenge in a sustainable way. Reducing resource use and environmental impacts, whilst increasing competitiveness, will require a decisive societal and technological transition to an economy based on a sustainable relationship between nature and human well-being. Coordinated research and innovation activities will improve the understanding and forecasting of climate and environmental change in a systemic and cross-sectoral perspective, reduce uncertainties, identify and assess vulnerabilities, risks, costs and opportunities, as well as expand the range and improve the effectiveness of societal and policy responses and solutions. Actions will also seek to improve research and innovation delivery and dissemination to support policy making and to empower actors at all levels of society to actively participate in this process.

Addressing the availability of raw materials calls for co-ordinated research and innovation efforts across many disciplines and sectors to help provide safe, economically feasible, environmentally sound and socially acceptable solutions along the entire value chain (exploration, extraction, processing, design, sustainable use and re-use, recycling and substitution). Innovation in these fields will provide opportunities for growth and jobs, as well as innovative options involving science, technology, the economy, society, policy and governance. For these reasons, European Innovation Partnerships on Water and Raw Materials have been launched.

Responsible eco-innovation may provide valuable new opportunities for growth and jobs. Solutions developed through Union level action will counter key threats to industrial competitiveness and enable rapid uptake and replication across the single market and beyond. This will enable the transition towards a green economy that takes into account the sustainable use of resources. Partners for this approach will include international, European and national policy makers, international and Member State research and innovation programmes, European business and industry, the European Environment Agency and national environment agencies, and other relevant stakeholders.

In addition to bilateral and regional cooperation, Union level actions will also support relevant international efforts and initiatives, including the Intergovernmental Panel on Climate Change (IPCC), the Intergovernmental Platform on Biodiversity and Ecosystem Services (IPBES) and the Group on Earth Observations (GEO).

5.3. *Broad lines of the activities*

(a) Fighting and adapting to climate change

The aim is to develop and assess innovative, cost-effective and sustainable adaptation and mitigation measures and strategies, targeting both CO₂ and non-CO₂ greenhouse gases and aerosols, and underlining both technological and non technological green solutions, through the generation of evidence for informed, early and effective action and the networking of the required competences. Activities shall focus on improving the understanding of climate change and the risks associated with extreme events and abrupt climate-related changes with a view to providing reliable climate projections; assessing impacts at global, regional and local level, and vulnerabilities; developing innovative cost-effective adaptation and risk prevention and management measures; and supporting mitigation policies and strategies, including studies that focus on impact from other sectoral policies.

(b) Protecting the environment, sustainably managing natural resources, water, biodiversity and ecosystems

The aim is to provide knowledge and tools for the management and protection of natural resources, in order to achieve a sustainable balance between limited resources and the present and future needs of society and the economy. Activities shall focus on furthering our understanding of biodiversity and the functioning of ecosystems, their interactions with social systems and their role in sustaining the economy and human well-being; developing integrated approaches to address water-related challenges and the transition to sustainable management and use of water resources and services; and providing knowledge and tools for effective decision making and public engagement.

(c) Ensuring the sustainable supply of non-energy and non-agricultural raw materials

The aim is to improve the knowledge base on raw materials and develop innovative solutions for the cost-effective, resource-efficient and environmentally friendly exploration, extraction, processing, use and re-use, recycling and recovery of raw materials and for their substitution by economically attractive and environmentally sustainable alternatives with a lower environmental impact, including closed-loop processes and

systems. Activities shall focus on improving the knowledge base on the availability of raw materials; promoting the sustainable and efficient supply, use and re-use of raw materials, including mineral resources, from land and sea; finding alternatives for critical raw materials; and improving societal awareness and skills on raw materials.

(d) Enabling the transition towards a green economy and society through eco-innovation

The aim is to foster all forms of eco-innovation that enable the transition to a green economy. Activities shall, inter alia, build upon and enhance those undertaken in the Eco-Innovation Programme and focus on strengthening eco-innovative technologies, processes, services and products, including exploring ways to reduce the quantities of raw materials in production and consumption, overcoming barriers in this context, and boosting their market uptake and replication, with special attention for SMEs; supporting innovative policies, sustainable economic models and societal changes; measuring and assessing progress towards a green economy; and fostering resource efficiency through digital systems.

(e) Developing comprehensive and sustained global environmental observation and information systems

The aim is to ensure the delivery of the long-term data and information required to address this challenge. Activities shall focus on the capabilities, technologies and data infrastructures for Earth observation and monitoring from both remote sensing and in situ measurements that can continuously provide timely and accurate information and permit forecasts and projections. Free, open and unrestricted access to interoperable data and information will be encouraged. Activities shall help define future operational activities of the Copernicus programme and enhance the use of Copernicus data for research activities.

(f) Cultural heritage

The aim is to research into the strategies, methodologies and tools needed to enable a dynamic and sustainable cultural heritage in Europe in response to climate change. Cultural heritage in its diverse physical forms provides the living context for resilient communities responding to multivariate changes. Research in cultural heritage requires a multidisciplinary approach to improve the understanding of historical material. Activities shall focus on identifying resilience levels through observations, monitoring and modelling as well as provide for a better understanding on how communities perceive and respond to climate change and seismic and volcanic hazards.

6. Europe In A Changing World - Inclusive, Innovative And Reflective Societies

6.1. Specific objective

The specific objective is to foster a greater understanding of Europe, provide solutions and support inclusive, innovative and reflective European societies in a context of unprecedented transformations and growing global interdependencies.

Europe is confronted with major socio-economic challenges which significantly affect its common future. These include growing economic and cultural interdependencies, ageing and demographic change, social exclusion and poverty, integration and disintegration, inequalities and migration flows, a growing digital divide, fostering a culture of innovation and creativity in society and enterprises, and a decreasing sense of trust in democratic institutions and between citizens within and across borders. These challenges are enormous and they call for a common European approach, based upon shared scientific knowledge that social sciences and humanities, among others, can provide.

Significant inequalities persist in the Union both across countries and within them. In 2011 the Human Development Index, an aggregate measure of progress in health, education and income, scores the Member States between 0,771 and 0,910, thus reflecting considerable divergences between countries. Significant gender inequalities also persist: for instance, the gender pay gap in the Union remains at an average of 17,8 % in favour of men ⁽¹⁾. In 2011, one in every six Union citizens (around 80 million people) was at risk of poverty. Over the past two decades the poverty of young adults and families with children has risen. The youth unemployment rate is above 20 %. 150 million Europeans (some 25 %) have never used the internet and may never get sufficient digital literacy. Political apathy and polarisation in elections has also risen, reflecting citizens' faltering trust in current political systems.

⁽¹⁾ COM(2010)0491.

These figures suggest that some social groups and communities are persistently left out of social and economic development and/or democratic politics. These inequalities do not only stifle societal development but hamper the economies in the Union and reduce the research and innovation capacities within and across countries.

A central challenge in addressing these inequalities will be the fostering of settings in which European, national and ethnic identities can coexist and be mutually enriching.

Moreover, the number of Europeans aged over 65 is expected to rise significantly by 42 % from 87 million in 2010 to 124 million in 2030. This presents a major challenge for the economy, society and the sustainability of public finances.

Europe's productivity and economic growth rates have been relatively decreasing for four decades. Furthermore, its share of the global knowledge production and its innovation performance lead compared to key emerging economies such as Brazil and China are declining fast. Although Europe has a strong research base, it needs to make this base a powerful asset for innovative goods and services.

It is well-known that Europe needs to invest more in science and innovation and that it will also have to coordinate these investments better than in the past. Since the financial crisis many economic and social inequalities in Europe have been aggravated even further, and the return of pre-crisis rates of economic growth seems a long way off for most of the Union. The current crisis also suggests that it is challenging to find solutions to crises that reflect the heterogeneity of Member States and their interests.

These challenges must be tackled together and in innovative and multi-disciplinary ways because they interact in complex and often unexpected ways. Innovation may lead to weakening inclusiveness, as can be seen, for instance, in the phenomena of digital divide or labour market segmentation. Social innovation and social trust are sometimes difficult to reconcile in policies, for instance in socially depressed areas in large cities in Europe. Besides, the conjunction of innovation and citizens' evolving demands also lead policymakers and economic and social actors to find new answers that ignore established boundaries between sectors, activities, goods or services. Phenomena such as the growth of Internet, of the financial systems, of the ageing economy and of the ecological society abundantly show how it is necessary to think and respond to these issues across their dimensions of inclusiveness and innovation at the same time.

The in-built complexity of these challenges and the evolutions of demands thus make it essential to develop innovative research and new smart technologies, processes and methods, social innovation mechanisms, coordinated actions and policies that will anticipate or influence major evolutions for Europe. It calls for a renewed understanding of determinants of innovation. In addition, it calls for understanding the underlying trends and impacts within these challenges and rediscovering or reinventing successful forms of solidarity, behaviour, coordination and creativity that make Europe distinctive in terms of inclusive, innovative and reflective societies compared to other regions of the world.

It also requires a more strategic approach to cooperation with third countries, based on a deeper understanding of the Union's past and its current and future role as a global player.

6.2. *Rationale and Union added value*

These challenges go beyond national borders and thus call for more complex comparative analyses to develop a base upon which national and European policies can be better understood. Such comparative analyses should address mobility (of people, goods, services and capital but also of competences, knowledge and ideas) and forms of institutional cooperation, intercultural interactions and international cooperation. If these challenges are not better understood and anticipated, forces of globalisation also push European countries to compete with each other rather than cooperate, thus accentuating differences in Europe rather than commonalities and a right balance between cooperation and competition. Addressing such critical issues, including socio-economic challenges, only at national level, carries the danger of inefficient use of resources, externalisation of problems to other European and non-European countries and the accentuation of social, economic and political tensions that may directly affect the aims of the Treaties regarding its values, in particular Title I of the Treaty on European Union.

In order to understand, analyse and build inclusive, innovative and reflective societies, Europe requires a response which unfolds the potential of shared ideas for the European future to create new knowledge, technologies and capabilities. The concept of inclusive societies acknowledges the diversity in culture, regions and socio-economic settings as a European strength. Turning European diversity into a source of innovation and development is needed. Such endeavour will help Europe tackle its challenges not only internally but also as a global player on the international scene. This, in turn, will also help Member States benefit from experiences elsewhere and allow them to better define their own specific actions corresponding to their respective contexts.

Fostering new modes of cooperation between countries within the Union and worldwide, as well as across relevant research and innovation communities, will therefore be a central task under this societal challenge. Supporting social and technological innovation processes, encouraging smart and participatory public administration, as well as informing and promoting evidence-based policy making will be systematically pursued in order to enhance the relevance of all these activities for policymakers, social and economic actors, and citizens. Research and innovation will be a precondition for the competitiveness of European businesses and services with particular attention to sustainability, advancing education, increasing employment, and reducing poverty.

Union funding under this challenge will thus support the development, implementation and adaptation of key Union policies, notably the objectives of the Europe 2020 strategy. It will interface, as and when appropriate, with Joint Programming Initiatives, including "Cultural Heritage", "More Years, Better Lives" and "Urban Europe", and coordination with the JRC direct actions will be pursued.

6.3. *Broad lines of activities*

6.3.1. Inclusive societies

The aim is to gain a greater understanding of the societal changes in Europe and their impact on social cohesion, and to analyse and develop social, economic and political inclusion and positive inter-cultural dynamics in Europe and with international partners, through cutting-edge science and interdisciplinarity, technological advances and organisational innovations. The main challenges to be tackled concerning European models for social cohesion and well-being are, inter alia, migration, integration, demographic change, the ageing society and disability, education and lifelong learning, as well as the reduction of poverty and social exclusion taking into account the different regional and cultural characteristics.

Social sciences and humanities research plays a leading role here as it explores changes over time and space and enables exploration of imagined futures. Europe has a huge shared history of both co-operation and conflict. Its dynamic cultural interactions provide inspiration and opportunities. Research is needed to understand identity and belonging across communities, regions and nations. Research will support policymakers in designing policies that foster employment, combat poverty and prevent the development of various forms of divisions, conflict and political and social exclusion, discrimination and inequalities, such as gender and intergenerational inequalities, discrimination due to disability or ethnic origin, or digital or innovation divides, in European societies and in other regions of the world. It shall in particular feed into the implementation and the adaptation of the Europe 2020 strategy and the broad external action of the Union.

The focus of activities shall be to understand and foster or implement:

- (a) the mechanisms to promote smart, sustainable and inclusive growth;
- (b) trusted organisations, practices, services and policies that are necessary to build resilient, inclusive, participatory, open and creative societies in Europe, in particular taking into account migration, integration and demographic change;
- (c) Europe's role as a global actor, notably regarding human rights and global justice;
- (d) the promotion of sustainable and inclusive environments through innovative spatial and urban planning and design.

6.3.2. Innovative societies

The aim is to foster the development of innovative societies and policies in Europe through the engagement of citizens, civil society organisations, enterprises and users in research and innovation and the promotion of coordinated research and innovation policies in the context of globalisation and the need to promote the highest ethical standards. Particular support will be provided for the development of the ERA and the development of framework conditions for innovation.

Cultural and societal knowledge is a major source of creativity and innovation, including business, public sector and social innovation. In many cases social and user-led innovations also precede the development of innovative technologies, services and economic processes. The creative industries are a major resource to tackle societal challenges and for competitiveness. As interrelations between social and technological innovation are complex, and rarely linear, further research, including cross-sectoral and multidisciplinary research, is needed into the development of all types of innovation and activities funded to encourage its effective development into the future.

The focus of activities shall be to:

- (a) strengthen the evidence base and support for the flagship initiative "Innovation Union" and ERA;
- (b) explore new forms of innovation, with special emphasis on social innovation and creativity, and understand how all forms of innovation are developed, succeed or fail;
- (c) make use of the innovative, creative and productive potential of all generations;
- (d) promote coherent and effective cooperation with third countries.

6.3.3. Reflective societies - cultural heritage and European identity

The aim is to contribute to an understanding of Europe's intellectual basis – its history and the many European and non-European influences – as an inspiration for our lives today. Europe is characterized by a variety of different peoples (including minorities and indigenous people), traditions and regional and national identities as well as by different levels of economic and societal development. Migration and mobility, the media, industry and transport contribute to the diversity of views and lifestyles. This diversity and its opportunities should be recognized and considered.

European collections in libraries, including digital ones, archives, museums, galleries and other public institutions have a wealth of rich, untapped documentation and objects for study. These archival resources, together with intangible heritage, represent the history of individual Member States but also the collective heritage of a Union that has emerged through time. Such materials should be made accessible, also through new technologies, to researchers and citizens to enable a look to the future through the archive of the past. Accessibility and preservation of cultural heritage in these forms is needed for the vitality of the living engagements within and across European cultures now and contributes to sustainable economic growth.

The focus of activities shall be to:

- (a) study European heritage, memory, identity, integration and cultural interaction and translation, including its representations in cultural and scientific collections, archives and museums, to better inform and understand the present by richer interpretations of the past;
- (b) research into European countries' and regions' history, literature, art, philosophy and religions and how these have informed contemporary European diversity;
- (c) research on Europe's role in the world, on the mutual influence and ties between the regions of the world, and a view from outside on European cultures.

7. **Secure Societies - Protecting Freedom And Security Of Europe And Its Citizens**

7.1. *Specific objective*

The specific objective is to foster secure European societies in a context of unprecedented transformations and growing global interdependencies and threats, while strengthening the European culture of freedom and justice.

Europe has never been so peacefully consolidated, and the levels of security enjoyed by European citizens are high compared to other parts of the world. However, Europe's vulnerability continues to exist in a context of ever-increasing globalisation in which societies are facing security threats and challenges that are growing in scale and sophistication.

The threat of large-scale military aggressions has decreased and security concerns are focused on new multifaceted, interrelated and transnational threats. Aspects such as human rights, environmental degradation, political stability and democracy, social issues, cultural and religious identity or migration need to be taken into account. In this context the internal and external aspects of security are inextricably linked. In order to protect freedom and security, the Union requires effective responses using a comprehensive and innovative suite of security instruments. Research and innovation can play a clear supporting role although it cannot alone guarantee security. Research and innovation activities should aim at understanding, detecting, preventing, deterring, preparing and protecting against security threats. Furthermore, security presents fundamental challenges that cannot be resolved by independent and sector-specific treatment but rather need more ambitious, coordinated and holistic approaches.

Many forms of insecurity, whether from crime, violence, terrorism, natural or man-made disasters, cyber attacks or privacy abuses, and other forms of social and economic disorders increasingly affect citizens.

According to estimates, there are likely to be up to 75 million direct victims of crime every year in Europe⁽¹⁾. The direct cost of crime, terrorism, illegal activities, violence and disasters in Europe has been estimated at least EUR 650 billion (about 5 % of the Union GDP) in 2010. Terrorism has shown its fatal consequences in several parts of Europe and worldwide costing many lives and important economic losses. It also has a significant cultural and global impact.

Citizens, firms and institutions are increasingly involved in digital interactions and transactions in social, financial and commercial areas of life, but the development of Internet has also led to cyber crime worth billions of Euros each year, to cyber attacks on critical infrastructures and to breaches of privacy affecting individuals or entities across the continent. Changes in the nature and perception of insecurity in everyday life are likely to affect citizens' trust not only in institutions but also in each other.

In order to anticipate, prevent and manage these threats, it is necessary to understand the causes, develop and apply innovative technologies, solutions, foresight tools and knowledge, stimulate cooperation between providers and users, find civil security solutions, improve the competitiveness of the European security industry and services, including ICT, and prevent and combat the abuse of privacy and breaches of human rights in the Internet and elsewhere, while ensuring European citizens' individual rights and freedom.

To enhance better cross-border collaboration between different kinds of emergency services, attention should be given to interoperability and standardisation.

Finally, as security policies should interact with different social policies, enhancing the societal dimension of security research will be an important aspect of this societal challenge.

Respecting fundamental values such as freedom, democracy, equality and the rule of law must be the base of any activity undertaken in the context of this challenge to provide security to European citizens.

7.2. *Rationale and Union added value*

The Union and its citizens, industry and international partners are confronted with a range of security threats like crime, terrorism, illegal trafficking and mass emergencies due to natural or man-made disasters. These threats can span across borders and aim at physical targets or the cyberspace with attacks arising from different sources. Attacks against information or communication systems of public authorities and private entities, for instance, not only undermine the citizens' trust in information and communication systems and lead to direct financial losses and a loss of business opportunities, but may also seriously affect critical infrastructure and services such as energy, aviation and other transport, water and food supply, health, finance or telecommunications.

These threats could possibly endanger the inner foundations of our society. Technology and creative design can bring an important contribution to any response to be made. Yet, new solutions should be developed while bearing in mind the appropriateness of the means and their adequacy to the societal demand, in particular in terms of guarantees for citizens' fundamental rights and freedoms.

Finally, security also represents a major economic challenge, considering Europe's share of the fast growing global security market. Given the potential impact of some threats on services, networks or businesses, the deployment of adequate security solutions has become critical for the economy and European manufacturing competitiveness. Cooperation among Member States but also with third countries and international organisations is part of this challenge.

Union research and innovation funding under this societal challenge will thus support the development, implementation and adaptation of key Union policies, notably the objectives of the Europe 2020 strategy, the Common Foreign and Security Policy, the Union's Internal Security Strategy and the flagship initiative 'Digital Agenda for Europe'. Coordination with the JRC direct actions will be pursued.

⁽¹⁾ COM(2011)0274.

7.3. *Broad lines of activities*

The aim is to support Union policies for internal and external security and to ensure cyber security, trust and privacy in the Digital Single Market, whilst at the same time improving the competitiveness of the Union's security industry and services, including ICT. The activities will include a focus on the research and development of the next generation of innovative solutions, by working on novel concepts, designs and interoperable standards. This will be done by developing innovative technologies and solutions that address security gaps and lead to a reduction in the risk from security threats.

These mission-oriented actions will integrate the demands of different end-users (citizens, businesses, civil society organisations and administrations, including national and international authorities, civil protection, law enforcement, border guards, etc.) in order to take into account the evolution of security threats and privacy protection and the necessary societal aspects.

The focus of activities shall be to:

- (a) fight crime, illegal trafficking and terrorism, including understanding and tackling terrorist ideas and beliefs;
- (b) protect and improve the resilience of critical infrastructures, supply chains and transport modes;
- (c) strengthen security through border management;
- (d) improve cyber security;
- (e) increase Europe's resilience to crises and disasters;
- (f) ensure privacy and freedom, including in the Internet, and enhance the societal legal and ethical understanding of all areas of security, risk and management;
- (g) enhance standardisation and interoperability of systems, including for emergency purposes;
- (h) support the Union's external security policies, including conflict prevention and peace-building.

PART IV

SPREADING EXCELLENCE AND WIDENING PARTICIPATION

1. Specific objective

The specific objective is to fully exploit the potential of Europe's talent pool and to ensure that the benefits of an innovation-led economy are both maximised and widely distributed across the Union in accordance with the principle of excellence.

Despite a recent tendency for the innovation performances of individual countries and regions to converge, sharp differences among Member States still remain. Furthermore, by putting national budgets under constraint, the current financial crisis is threatening to widen gaps. Exploiting the potential of Europe's talent pool and maximising and spreading the benefits of innovation across the Union is vital for Europe's competitiveness and its ability to address societal challenges in the future.

2. Rationale and Union added value

In order to progress towards a sustainable, inclusive and smart society, Europe needs to make the best use of the intelligence that is available in the Union and to unlock untapped R&I potential.

By nurturing and connecting pools of excellence, the activities proposed will contribute to strengthening the ERA.

3. Broad lines of the activities

Specific actions will facilitate the spreading of excellence and widening of participation through the following actions:

- Teaming of excellent research institutions and low performing RDI regions aiming at the creation of new (or significant upgrade of existing) centres of excellence in low performing RDI Member States and regions.

- Twinning of research institutions aiming at significantly strengthening a defined field of research in an emerging institution through links with at least two internationally-leading institutions in a defined field.
- Establishing 'ERA Chairs' to attract outstanding academics to institutions with a clear potential for research excellence, in order to help these institutions fully unlock this potential and hereby create a level playing field for research and innovation in the ERA. Possible synergies with ERC activities should be explored.
- A Policy Support Facility to improve the design, implementation and evaluation of national/regional research and innovation policies.
- Supporting access to international networks for excellent researchers and innovators who lack sufficient involvement in European and international networks, including COST.
- Strengthening the administrative and operational capacity of transnational networks of National Contact Points, including through training, so that they can provide better support to potential participants.

PART V

SCIENCE WITH AND FOR SOCIETY

1. **Specific objective**

The aim is to build effective cooperation between science and society, to recruit new talent for science and to pair scientific excellence with social awareness and responsibility.

2. **Rationale and Union added value**

The strength of the European science and technology system depends on its capacity to harness talent and ideas from wherever they exist. This can only be achieved if a fruitful and rich dialogue and active cooperation between science and society is developed to ensure a more responsible science and to enable the development of policies more relevant to citizens. Rapid advances in contemporary scientific research and innovation have led to a rise of important ethical, legal and social issues that affect the relationship between science and society. Improving the cooperation between science and society to enable a widening of the social and political support to science and to technology in all Member States is an increasingly crucial issue which the current economic crisis has greatly exacerbated. Public investment in science requires a vast social and political constituency sharing the values of science, educated and engaged in its processes and able to recognise its contributions to knowledge, to society and to economic progress.

3. **Broad lines of activities**

The focus of activities shall be to:

- (a) make scientific and technological careers attractive to young students, and foster sustainable interaction between schools, research institutions, industry and civil society organisations;
- (b) promote gender equality in particular by supporting structural changes in the organisation of research institutions and in the content and design of research activities;
- (c) integrate society in science and innovation issues, policies and activities in order to integrate citizens' interests and values and to increase the quality, relevance, social acceptability and sustainability of research and innovation outcomes in various fields of activity from social innovation to areas such as biotechnology and nanotechnology;
- (d) encourage citizens to engage in science through formal and informal science education, and promote the diffusion of science-based activities, namely in science centres and through other appropriate channels;
- (e) develop the accessibility and the use of the results of publicly-funded research;
- (f) develop the governance for the advancement of responsible research and innovation by all stakeholders (researchers, public authorities, industry and civil society organisations), which is sensitive to society needs and demands, and promote an ethics framework for research and innovation;

- (g) take due and proportional precautions in research and innovation activities by anticipating and assessing potential environmental, health and safety impacts;
- (h) improve knowledge on science communication in order to improve the quality and effectiveness of interactions between scientists, general media and the public.

PART VI

NON-NUCLEAR DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC)

1. **Specific objective**

The specific objective is to provide customer-driven scientific and technical support to Union policies, while flexibly responding to new policy demands.

2. **Rationale and Union added value**

The Union has defined an ambitious policy agenda to 2020 which addresses a set of complex and interlinked challenges, such as sustainable management of resources and competitiveness. In order to successfully tackle these challenges, robust scientific evidence is needed which cuts across different scientific disciplines and allows the sound assessment of policy options. The JRC, playing its role as the science service for Union policy making, will provide the required scientific and technical support throughout all stages of the policy-making cycle, from conception to implementation and assessment. To contribute to this specific objective it will focus its research clearly on Union policy priorities while enhancing cross-cutting competences and cooperation with the Member States.

The JRC's independence of special interests, whether private or national, combined with its scientific-technical reference role enable it to facilitate the necessary consensus building between stakeholders and policy makers. Member States and Union citizens benefit from the research of the JRC, most visibly in areas such as health and consumer protection, environment, safety and security, and management of crises and disasters.

More specifically, Member States and regions will also benefit from support to their Smart Specialisation Strategies.

The JRC is an integral part of the ERA and will continue to actively support its functioning through close collaboration with peers and stakeholders, maximising access to its facilities and through the training of researchers and by close cooperation with Member States and international institutions that pursue similar objectives. This will also promote the integration of new Member States and associated countries for which the JRC will continue to provide dedicated training courses on the scientific-technical basis of the body of Union law. The JRC will establish coordination links with other relevant Horizon 2020 specific objectives. As a complement to its direct actions and for the purpose of further integration and networking in the ERA, the JRC may also participate in Horizon 2020 indirect actions and co-ordination instruments in areas where it has the relevant expertise to produce Union added value.

3. **Broad lines of activities**

The JRC activities in Horizon 2020 will focus on the Union policy priorities and the societal challenges addressed by them. These activities are aligned with the objectives of the Europe 2020 strategy, and with the headings 'Security and citizenship' and 'Global Europe' of the Multiannual Financial Framework for 2014-2020.

The JRC's key competence areas will be energy, transport, environment and climate change, agriculture and food security, health and consumer protection, information and communication technologies, reference materials, and safety and security (including nuclear safety and security in the Euratom programme). The JRC activities in these areas will be conducted taking into account relevant initiatives at the level of regions, Member States or the Union, within the perspective of shaping the ERA.

These competence areas will be significantly enhanced with capacities to address the full policy cycle and to assess policy options. This includes:

- (a) anticipation and foresight - pro-active strategic intelligence on trends and events in science, technology and society and their possible implications for public policy;

- (b) economics - for an integrated service covering both the scientific-technical and the macro-economic aspects;
- (c) modelling - focusing on sustainability and economics and making the Commission less dependent on outside suppliers for vital scenario analysis;
- (d) policy analysis - to allow cross-sectoral investigation of policy options;
- (e) impact assessment - providing scientific evidence to support policy options.

The JRC shall continue to pursue excellence in research and extensive interaction with research institutions as the basis for credible and robust scientific-technical policy support. To that end, it will strengthen collaboration with European and international partners, inter alia by participation in indirect actions. It will also carry out exploratory research and build up competences in emerging, policy-relevant areas on a selective basis.

The JRC shall focus on:

3.1. *Excellent science*

Carry out research to enhance the scientific evidence base for policy making and examine emerging fields of science and technology, including through an exploratory research programme.

3.2. *Industrial leadership*

Contribute to European competitiveness through support to the standardisation process and standards with pre-normative research, development of reference materials and measurements, and harmonisation of methodologies in five focal areas (energy; transport; the flagship initiative 'Digital Agenda for Europe'; security and safety; consumer protection). Carry out safety assessments of new technologies in areas such as energy and transport and health and consumer protection. Contribute to facilitating the use, standardisation and validation of space technologies and data, in particular to tackle the societal challenges.

3.3. *Societal challenges*

(a) Health, demographic change and well-being

Contribute to health and consumer protection through scientific and technical support in areas such as food, feed and consumer products; environment and health; health-related diagnostic and screening practices; and nutrition and diets.

(b) Food security, sustainable agriculture and forestry, marine, maritime and inland water research, and the bioeconomy

Support the development, implementation and monitoring of European agriculture and fisheries policies, including food safety and security, and the development of a bio-economy through e.g. crop production forecasts, technical and socio-economic analyses and modelling, and promote healthy and productive seas.

(c) Secure, clean and efficient energy

Support the 20-20-20 climate and energy targets with research on technological and economic aspects of energy supply, efficiency, low-carbon technologies, and energy/electricity transmission networks.

(d) Smart, green and integrated transport

Support the Union's policy for the sustainable, safe and secure mobility of persons and goods with laboratory studies, modelling and monitoring approaches, including low-carbon technologies for transport, such as electrification, clean and efficient vehicles and alternative fuels, and smart mobility systems.

(e) Climate action, environment, resource efficiency and raw materials

Investigate the cross-sectoral challenges of the sustainable management of natural resources through monitoring of key environmental variables and the development of an integrated modelling framework for sustainability assessment.

Support resource efficiency, emission reductions and sustainable supply of raw materials through the integrated social, environmental and economic assessments of clean production processes, technologies, and products and services.

Support Union development policy goals with research to help ensure adequate supplies of essential resources focusing on monitoring environmental and resource parameters, food safety and security related analyses, and knowledge transfer.

(f) Europe in a changing world - Inclusive, innovative and reflective societies

Contribute to and monitor the implementation of the flagship initiative 'Innovation Union' with macro-economic analyses of the drivers and barriers of research and innovation, and development of methodologies, scoreboards and indicators.

Support the ERA by monitoring the functioning of the ERA and analysing drivers of and barriers to some of its key elements, and by research networking, training, and opening JRC facilities and databases to users in Member States and in candidate and associated countries.

Contribute to the key goals of the flagship initiative 'Digital Agenda for Europe' by qualitative and quantitative analyses of economic and social aspects (Digital Economy, Digital Society, Digital Living).

(g) Secure societies - Protecting freedom and security of Europe and its citizens

Support internal safety and security through the identification and assessment of the vulnerability of critical infrastructures as vital components of societal functions, and through the operational performance assessment and social and ethical evaluation of technologies related to the digital identity. Address global security challenges, including emerging or hybrid threats, through the development of advanced tools for information mining and analysis as well as for crisis management.

Enhance the Union's capacity for managing natural and man-made disasters by strengthening the monitoring of infrastructures and the development of test facilities and of global multi-hazard early warning and risk management information systems, making use of satellite-based Earth observation frameworks.

PART VII

THE EUROPEAN INSTITUTE OF INNOVATION AND TECHNOLOGY (EIT)

1. Specific objective

The specific objective is to integrate the knowledge triangle of higher education, research and innovation and thus to reinforce the Union's innovation capacity and address societal challenges.

Europe is facing a number of structural weaknesses when it comes to innovation capacity and the ability to deliver new services, products and processes, thereby hampering sustainable economic growth and job creation. Among the main issues at hand are Europe's relatively poor record in talent attraction and retention; the under-utilisation of existing research strengths in terms of creating economic or social value; the lack of research results brought to the market; low levels of entrepreneurial activity and mindset; low leverage of private investment in R&D; a scale of resources, including human resources, in poles of excellence which is insufficient to compete globally; and an excessive number of barriers to collaboration within the knowledge triangle of higher education, research and innovation on a European level.

2. Rationale and Union added value

If Europe is to compete on an international scale, these structural weaknesses need to be overcome. The elements identified above are common across Member States and affect the Union's innovation capacity as a whole.

The EIT will address these issues by promoting structural changes in the European innovation landscape. It will do so by fostering the integration of higher education, research and innovation of the highest standards, notably through its Knowledge and Innovation Communities (KICs), thereby creating new environments conducive to innovation, and by promoting and supporting a new generation of entrepreneurial people and by stimulating the creation of innovative spin-offs and start-ups. In doing so, the EIT will contribute fully to the objectives of the Europe 2020 strategy and notably to the flagship initiatives 'Innovation Union' and 'Youth on the Move'.

In addition, the EIT and its KICs should seek synergies and interaction across the priorities of Horizon 2020 and with other relevant initiatives. In particular, the EIT will contribute through the KICs to the specific objectives of the priority "Societal challenges" and to the specific objective "Leadership in enabling and industrial technologies".

Integrating education and entrepreneurship with research and innovation

The specific feature of the EIT is to integrate higher education and entrepreneurship with research and innovation as links in a single innovation chain across the Union and beyond, which should lead, inter alia, to an increase of innovative services, products and processes brought to the market.

Business logic and a results-oriented approach

The EIT, through its KICs, operates in line with business logic and takes a results-oriented approach. Strong leadership is a pre-requisite: each KIC is driven by a CEO. KIC partners are represented by single legal entities to allow more streamlined decision-making. KICs must produce clearly defined annual business plans, setting out a multiannual strategy and including an ambitious portfolio of activities from education to business creation, with clear targets and deliverables, looking for both market and societal impact. The current rules concerning participation, evaluation and monitoring of KICs allow fast-track, business-like decisions. Business and entrepreneurs should have a strong role in driving activities in KICs, and the KICs should be able to mobilize investment and long-term commitment from the business sector.

Overcoming fragmentation with the aid of long-term integrated partnerships

The EIT KICs are highly integrated ventures, bringing together partners from industry including SMEs, higher education, research and technology institutes, renowned for their excellence, in an open, accountable and transparent manner. KICs allow partners from across the Union and beyond to unite in new, cross-border configurations, optimise existing resources and open up access to new business opportunities through new value chains, addressing higher-risk, larger-scale challenges. KICs are open to participation of new entrants bringing added value to the partnership, including SMEs.

Nurturing Europe's main innovation asset: its highly talented people

Talent is a key ingredient of innovation. The EIT nurtures people and interactions between them, by putting students, researchers and entrepreneurs at the centre of its innovation model. The EIT will provide an entrepreneurial and creative culture and cross-disciplinary education to talented people, through EIT-labelled Masters and PhD degrees, intended to emerge as an internationally recognised brand of excellence. In doing so, the EIT strongly promotes mobility and training within the knowledge triangle.

3. **Broad lines of the activities**

The EIT shall operate mainly through the KICs particularly in areas which offer a true innovation potential. While the KICs have overall substantial autonomy in defining their own strategies and activities, there are a number of innovative features common to all KICs where coordination and synergies shall be sought. The EIT will moreover enhance its impact by disseminating good practices on how to integrate the knowledge triangle and the development of entrepreneurship, integrating relevant new partners where they can provide added value, and by actively fostering a new culture of knowledge sharing.

(a) Transferring and applying higher education, research and innovation activities for new business creation

The EIT shall aim to create an environment to develop the innovative potential of people and to capitalise on their ideas, irrespective of their place in the innovation chain. Thereby, the EIT will also help to address the 'European paradox' that excellent existing research is far from being harnessed to the full. In doing so, the EIT shall help to bring ideas to the market. Chiefly through its KICs and its focus on fostering entrepreneurial mindsets, it will create new business opportunities in the form of both start-ups and spin-offs but also within existing industry. Focus will be on all forms of innovation, including technological, social and non-technological innovation.

(b) Cutting-edge and innovation-driven research in areas of key economic and societal interest

The EIT's strategy and activities shall be driven by a focus on areas which offer a true innovation potential and have a clear relevance to the societal challenges addressed in Horizon 2020. By addressing key societal challenges in a comprehensive way, the EIT will promote inter- and multi-disciplinary approaches and help focus the research efforts of the partners in the KICs.

(c) Development of talented, skilled and entrepreneurial people with the aid of education and training

The EIT shall fully integrate education and training at all stages of careers and support and facilitate the development of new and innovative curricula to reflect the need for new profiles engendered by complex societal and economic challenges. To this end, the EIT will play a key role in promoting new joint or multiple degrees and diplomas in Member States, respecting the principle of subsidiarity.

The EIT will also play a substantial role in fine-tuning the concept of 'entrepreneurship' through its educational programmes, which promote entrepreneurship in a knowledge-intensive context, building on innovative research and contributing to solutions of high societal relevance.

(d) Dissemination of best practice and systemic knowledge-sharing

The EIT shall aim to pioneer new approaches in innovation and to develop a common innovation and knowledge-transfer culture, including in SMEs. This could happen, inter alia, by sharing the diverse experience of the KICs through various dissemination mechanisms, such as a stakeholder platform and a fellowship scheme.

(e) International dimension

The EIT acts conscientious of the global context it operates in and shall help to forge links with key international partners in accordance with Article 27(2). By scaling up centres of excellence through the KICs and by fostering new educational opportunities, it will aim to make Europe more attractive for talent from abroad.

(f) Enhancing European wide impact through an innovative funding model

The EIT will make a strong contribution to the objectives set in Horizon 2020, in particular by addressing societal challenges in a way complementing other initiatives in these areas. Within the framework of Horizon 2020 it will test out new and simplified approaches to funding and governance and thereby play a pioneering role within the European innovation landscape. Part of the annual contribution will be attributed to KICs in a competitive way. The EIT's approach to funding will be firmly based on a strong leverage effect, mobilising both public and private funds at national and Union level, and it will be communicated, in a transparent manner, to the Member States and relevant stakeholders. Moreover, it will employ entirely new vehicles for targeted support to individual activities through the EIT Foundation.

(g) Linking regional development to European opportunities

Through the KICs and their co-location centres – nodes of excellence, bringing together higher education, research and business partners in a given geographical location – the EIT will also be linked to regional policy. In particular, it shall ensure a better connection between higher education institutions, the labour market and regional innovation and growth, in the context of regional and national smart specialisation strategies. In doing so, it will contribute to the objectives of the Union's cohesion policy.

ANNEX II

Breakdown of the budget

The indicative breakdown for Horizon 2020 is as follows:

	EUR million in current prices
I Excellent science, of which:	24 441,1
1. European Research Council (ERC)	13 094,8
2. Future and Emerging Technologies (FET)	2 696,3
3. Marie Skłodowska-Curie actions	6 162
4. Research infrastructures	2 488
II Industrial leadership, of which:	17 015,5
1. Leadership in enabling and industrial technologies (*), (****)	13 557
2. Access to risk finance (**)	2 842,3
3. Innovation in SMEs (***)	616,2
III Societal challenges, of which (****)	29 679
1. Health, demographic change and well-being	7 471,8
2. Food security, sustainable agriculture and forestry, marine, maritime and inland water research, and the bioeconomy	3 851,4
3. Secure, clean and efficient energy	5 931,2
4. Smart, green and integrated transport	6 339,4
5. Climate action, environment, resource efficiency and raw materials	3 081,1
6. Europe in a changing world – Inclusive, innovative and reflective societies	1 309,5
7. Secure societies – Protecting freedom and security of Europe and its citizens	1 694,6
IV Spreading excellence and widening participation	816,5
V Science with and for society	462,2
VI Non-nuclear direct actions of the Joint Research Centre (JRC)	1 902,6
VII The European Institute of Innovation and Technology (EIT)	2 711,4
TOTAL	77 028,3

(*) Including EUR 7 711 million for Information and Communication Technologies (ICT) of which EUR 1 594 million for photonics and micro- and nanoelectronics, EUR 3 851 million for nanotechnologies, advanced materials and advanced manufacturing and processing, EUR 516 million for biotechnology and EUR 1 479 million for space. As a result, EUR 5 961 million will be available to support Key Enabling Technologies.

(**) Around EUR 994 million of this amount may go towards the implementation of Strategic Energy Technology Plan (SET Plan) projects. Around one third of this may go to SMEs.

(***) Within the target of allocating a minimum of 20 % of the total combined budgets for the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' for SMEs, a minimum of 5 % of those combined budgets will be initially allocated to the dedicated SME instrument. A minimum of 7 % of the total budgets of the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' will be allocated to the dedicated SME instrument averaged over the duration of Horizon 2020.

(****) The Fast Track to Innovation (FTI) pilot actions will be funded from the specific objective 'Leadership in enabling and industrial technologies' and from the relevant specific objectives of the priority 'Societal challenges'. A sufficient number of projects will be launched in order to allow a full evaluation of the FTI pilot.

REGULATION (EU) No 1292/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013
amending Regulation (EC) No 294/2008 establishing the European Institute of Innovation and
Technology

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 173(3) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Acting in accordance with the ordinary legislative procedure ⁽²⁾,

Whereas:

- (1) The Europe 2020 strategy for smart, sustainable and inclusive growth assigns a prominent role to the European Institute of Innovation and Technology ("the EIT") which contributes to a number of flagship initiatives.
- (2) During the period from 2014 to 2020 the EIT should contribute to the objectives of the "Horizon 2020 - The Framework Programme for Research and Innovation" established by Regulation (EU) No 1291/2013 ⁽³⁾ of the European Parliament and of the Council ("Horizon 2020") by integrating the knowledge triangle of higher education, research and innovation.
- (3) In order to ensure a coherent framework for participants in Horizon 2020, Regulation (EU) No 1290/2013 of the European Parliament and of the Council ⁽⁴⁾ ('Rules for Participation') should apply to the EIT.
- (4) The rules concerning the management of intellectual property rights are defined in the Rules for Participation.
- (5) The rules concerning the association of third countries are defined in Horizon 2020.

⁽¹⁾ OJ C 181, 21.6.2012, p. 122.

⁽²⁾ Position of the European Parliament of 21 November 2013 (not yet published in the OJ)

⁽³⁾ Regulation (EU) No 1291/2013 of the European Parliament and of the Council of 11 December 2013 establishing Horizon 2020 - The Framework Programme for Research and Innovation (2014-2020) (See page 104 of this Official Journal)

⁽⁴⁾ Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in "Horizon 2020" – the Framework Programme for Research and Innovation (2014-2020) (See page 81 of this Official Journal) contained

- (6) The EIT should foster entrepreneurship in its higher education, research and innovation activities. In particular, it should promote excellent entrepreneurial education and support the creation of start-ups and spin-offs.
- (7) The EIT should directly engage with national and regional representatives and other stakeholders from across the innovation chain, generating beneficial effects on both sides. In order to render such dialogue and exchange more systematic, an EIT Stakeholder Forum should be established, bringing together the wider community of stakeholders around horizontal issues. The EIT should also carry out information and communication activities targeting relevant stakeholders.
- (8) The EIT should promote an appropriately balanced participation between the different actors from the knowledge triangle involved in the Knowledge and Innovation Communities ("KICs"). Furthermore, it should promote strong participation from the private sector, in particular micro-/small and medium-sized enterprises ("SMEs").
- (9) The scope of the EIT contribution to the KICs should be defined and the origins of the KICs' financial resources clarified.
- (10) The composition of the EIT bodies should be simplified. The functioning of the EIT Governing Board should be streamlined and the respective roles and tasks of the Governing Board and the Director should be further clarified.
- (11) New KICs, including their priority fields and the organisation and timing of the selection process, should be launched on the basis of modalities defined in the Strategic Innovation Agenda following an open, transparent and competitive process.
- (12) The KICs should broaden their educational activities to enhance the skills base across the Union, by providing professional and other appropriate training courses.
- (13) Cooperation on the organisation of monitoring and evaluations of the KICs between the Commission and the EIT is required in order to ensure coherence with the overall Union-level monitoring and evaluation system. In particular, there should be clear principles for monitoring the KICs and the EIT.

- (14) The KICs should seek synergies with relevant Union, national and regional initiatives.
- (15) In order to ensure broader participation of organisations from different Members States in the KICs, partner organisations should be established in at least three different Member States.
- (16) The EIT and the KICs should develop outreach activities and disseminate best practices, including through the Regional Innovation Scheme.
- (17) The criteria and procedures for the financing, monitoring and evaluation of the activities of the KICs should be adopted by the EIT prior to launching the KIC selection process.
- (18) The EIT Triennial Work Programme should take into account the Commission's opinion concerning the EIT's specific objectives, as defined in Horizon 2020, and its complementarities with Union policies and instruments.
- (19) The EIT, being under Horizon 2020, will be part of the mainstreaming of climate change expenditure as defined in Horizon 2020.
- (20) The evaluation of the EIT should provide timely input for the evaluation of Horizon 2020 in 2017 and 2023.
- (21) The Commission should strengthen its role in monitoring the implementation of specific aspects of EIT activities.
- (22) This Regulation lays down a financial envelope for the entire duration of Horizon 2020 which is to constitute the prime reference amount, within the meaning of point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management⁽¹⁾, for the European Parliament and the Council during the annual budgetary procedure. The financial contribution for the EIT should be provided from Horizon 2020.
- (23) Contrary to initial expectations, the EIT Foundation will not receive a direct contribution from the Union budget, and the Union discharge procedure should therefore not apply to it.
- (24) For reasons of clarity, the Annex to Regulation (EC) No 294/2008 of the European Parliament and of the Council⁽²⁾ should be replaced by a new Annex.
- (25) Regulation (EC) No 294/2008 should therefore be amended accordingly,

HAVE ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 294/2008 is amended as follows:

(1) Article 2 is amended as follows:

(a) point 1 is replaced by the following:

"1. "innovation" means the process, including its outcome, by which new ideas respond to societal or economic needs and demand and generate new products, services or business and organisational models that are successfully introduced into an existing market or that are able to create new markets and that provide value to society;"

(b) point 2 is replaced by the following:

"2. "Knowledge and Innovation Community" (KIC) means an autonomous partnership of higher education institutions, research organisations, companies and other stakeholders in the innovation process in the form of a strategic network, regardless of its precise legal form, based on joint mid- to long-term innovation planning to meet the EIT challenges and contribute to attaining the objectives established under Regulation (EU) No 1291/2013 of the European Parliament and of the Council^(*) ("Horizon 2020");

^(*) Regulation (EU) No 1291/2013 of 11 December 2013 of the European Parliament and of the Council establishing Horizon 2020 - The Framework Programme for Research and Innovation (2014-2020) and repealing Decision No 1982/2006/EC (OJ L 347, 20.12.2013, p. 104).";

(c) point 3 is replaced by the following:

"3. "co-location centre" means a geographical area where the main knowledge triangle partners are based and can easily interact, providing the focal point for the KICs' activity in that area;"

(d) point 4 is deleted;

(e) point 5 is replaced by the following:

"5. "partner organisation" means any organisation which is a member of a KIC and may include, in particular, higher education institutions, research organisations, public or private companies, financial institutions, regional and local authorities, foundations and non-profit organisations;"

⁽¹⁾ OJ C 373, 20.12.2013, p. 1.

⁽²⁾ Regulation (EC) No 294/2008 of the European Parliament and of the Council of 11 March 2008 establishing the European Institute of Innovation and Technology (OJ L 97, 9.4.2008, p. 1).

(f) point 9 is replaced by the following:

"9. "Strategic Innovation Agenda" (SIA) means a policy document outlining the priority fields and the long-term strategy of the EIT for future initiatives, including an overview of planned higher education, research and innovation activities over a period of seven years;"

(g) the following point is added:

"9a. "Regional Innovation Scheme" (RIS) means an outreach scheme targeted at partnerships between higher education institutions, research organisations, companies and other stakeholders, in order to foster innovation across the Union;"

(h) the following points are added:

"10. "Stakeholder Forum" means a platform open to representatives of national, regional and local authorities, organised interests and individual entities from business, higher education, research, associations, civil society and cluster organisations, as well as other interested parties from across the knowledge triangle;

11. "KIC added-value activities" means activities carried out by partner organisations or KIC legal entities, if applicable, contributing to the integration of the knowledge triangle of higher education, research and innovation, including the establishment, administrative and coordination activities of the KICs, and contributing to the overall objectives of the EIT."

(2) Article 3 is replaced by the following:

"Article 3

Mission and Objectives

The EIT's mission is to contribute to sustainable European economic growth and competitiveness by reinforcing the innovation capacity of the Member States and the Union in order to address major challenges faced by European society. It shall do this by promoting synergies and cooperation among, and integrating, higher education, research and innovation of the highest standards, including by fostering entrepreneurship.

The EIT' General Objectives, Specific Objectives and result indicators for the period from 2014 to 2020 are defined in Horizon 2020."

(3) Article 4(1) is amended as follows:

(a) point (a) is replaced by the following:

"(a) a Governing Board composed of high-level members experienced in higher education, research, innovation and business. It shall be responsible for steering the activities of the EIT, for the selection, designation and evaluation of the KICs, and for all other strategic decisions. It shall be assisted by an Executive Committee;"

(b) point (b) is deleted;

(c) point (c) is replaced by the following:

"(c) a Director, appointed by the Governing Board, who shall be responsible to the Governing Board for the administrative and financial management of the EIT and shall be the legal representative of the EIT;"

(4) Article 5(1) is amended as follows:

(a) point (a) is replaced by the following:

"(a) identify, in accordance with the SIA, its main priorities and activities;"

(b) point (c) is replaced by the following:

"(c) select and designate KICs in the priority fields in accordance with Article 7 and define their rights and obligations by agreement, provide them with appropriate support, apply appropriate quality control measures, continuously monitor and periodically evaluate their activities, ensure an appropriate level of coordination and facilitate communication and thematic cooperation between the KICs;"

(c) point (f) is replaced by the following:

"(f) promote the dissemination of best practices for the integration of the knowledge triangle, including among KICs, in order to develop a common innovation and knowledge transfer culture, and encourage participation in outreach activities, including in the RIS;"

(d) point (h) is replaced by the following:

"(h) promote multidisciplinary approaches to innovation, including the integration of technological, social and non-technological solutions, organisational approaches and new business models;"

(e) the following points are added:

- "(i) ensure complementarity and synergy between EIT activities and other Union programmes, where appropriate;
- (j) promote the KICs as excellent innovation partners inside and outside the Union;
- (k) establish a Stakeholder Forum to inform about the activities of the EIT, its experiences, best practices and contribution to Union innovation, research and education policies and objectives and to allow stakeholders to express their views. A meeting of the Stakeholder Forum shall be convened at least once a year. Member States' representatives shall meet in a special configuration, within the meeting of the Stakeholder Forum, to ensure appropriate communication and flow of information with the EIT, and be informed of the achievements of, give advice to, and share experiences with, the EIT and the KICs. The special configuration of Member States' representatives within the Stakeholder Forum shall also ensure appropriate synergies and complementarities between EIT and KIC activities with national programmes and initiatives, including the potential national co-financing of KIC activities."

(5) Article 6 is amended as follows:

(a) paragraph 1 is amended as follows:

(i) point (b) is replaced by the following:

"(b) cutting-edge and innovation-driven research in areas of key economic and societal interest and drawing on the results of European and national research, with the potential to strengthen Europe's competitiveness at international level and find solutions for the major challenges faced by European society;"

(ii) point (c) is replaced by the following:

"(c) education and training activities at masters and doctoral level, as well as professional training courses, in disciplines with the potential to meet future European socio-economic needs and which expand the Union's talent base, promote the development of innovation-related skills, the improvement of managerial and entrepreneurial skills and the mobility of researchers and students, and foster knowledge-sharing, mentoring and networking among the recipients of EIT-labelled degrees and training;"

(iii) point (d) is replaced by the following:

"(d) outreach activities and the dissemination of best practices in the innovation sector with a focus on the development of cooperation between higher education, research and business, including the service and financial sectors;"

(iv) the following point is added:

"(e) to seek synergies and complementarities between KIC activities and existing European, national and regional programmes, where appropriate;"

(b) paragraph 2 is replaced by the following:

"2. KICs shall have substantial overall autonomy to define their internal organisation and composition, as well as their precise agenda and working methods. In particular, KICs shall:

- (a) establish governance arrangements which reflect the knowledge triangle of higher education, research and innovation;
- (b) aim to be open to new members whenever they add value to the partnership;
- (c) function in an open and transparent way, in accordance with their internal rules;
- (d) establish business plans with objectives and key performance indicators;
- (e) develop strategies for financial sustainability."

(6) Article 7 is amended as follows:

(a) paragraph 1 is replaced by the following:

"1. A partnership shall be selected and designated by the EIT to become a KIC following a competitive, open and transparent procedure. Detailed criteria for the selection of the KICs, based on the principles of excellence and innovation relevance, shall be adopted and published by the EIT. External and independent experts shall be involved in the selection process;"

(b) the following paragraph is inserted:

"1a. The EIT shall launch the selection and designation of KICs according to the priority fields and time schedule defined in the SIA;"

(c) paragraph 2 is replaced by the following:

"2. In accordance with the principles enshrined in paragraph 1, the selection criteria for the designation of a KIC shall, inter alia, include:

- (a) the current and potential innovation capacity, including entrepreneurship, within the partnership as well as its excellence in higher education, research and innovation;
- (b) the partnership's capacity to achieve the goals of the SIA and thereby contribute to the general objective and priorities of Horizon 2020;
- (c) a multidisciplinary approach to innovation, including the integration of technological, social and non-technological solutions;
- (d) the partnership's capacity to ensure sustainable and long-term self-supporting financing, including a substantial and increasing contribution from the private sector, industry and services;
- (e) an appropriately balanced participation in the partnership of organisations active in the knowledge triangle of higher education, research and innovation;
- (f) the demonstration of a plan for the management of intellectual property appropriate to the sector concerned, including the way in which contributions from the various partner organisations have been taken into account;
- (g) measures to support the involvement of, and cooperation with, the private sector, including the financial sector and in particular SMEs, as well as the creation of start-ups, spin-offs and SMEs, with a view to the commercial exploitation of the results of the activities of KICs;
- (h) readiness to establish concrete measures to interact and cooperate with the public and third sectors, as appropriate;
- (i) readiness to interact with other organisations and networks outside the KIC with the aim of sharing best practices and excellence;
- (j) readiness to establish concrete proposals for synergies with Union and other relevant initiatives.";

(d) paragraph 3 is replaced by the following:

"3. The minimum condition to form a KIC is the participation of at least three partner organisations, established in at least three different Member States. All such partner organisations must be independent of each other, within the meaning of Article 8 of Regulation (EU) No 1290/2013 of the European Parliament and of the Council (*).

(*) Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in "Horizon 2020 – the Framework Programme for Research and Innovation (2014-2020)" and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).";

(e) paragraph 4 is replaced by the following:

"4. In addition to the condition set out in paragraph 3, at least two thirds of the partner organisations forming a KIC shall be established in the Member States. At least one higher education institution and one private company shall be part of each KIC.";

(f) the following paragraph is added:

"5. The EIT shall adopt and publish criteria and procedures for financing, monitoring and evaluating the activities of the KICs prior to the launching of the selection procedure for new KICs. The special configuration of Member States' representatives within the Stakeholder Forum shall be promptly informed of them.".

(7) The following Articles are inserted:

"Article 7a

Principles for the evaluation and monitoring of KICs

The EIT shall, on the basis of key performance indicators set out, inter alia, in Regulation (EU) No 1291/2013 and in the SIA, and in cooperation with the Commission, organise continuous monitoring and periodic external evaluations of the output, results and impact of each KIC. The results of such monitoring and evaluations shall be reported to the European Parliament and to the Council and shall be made public.

Article 7b

Duration, continuation and termination of a KIC

1. Subject to the outcome of the continuous monitoring and periodic evaluations and to the specificities of particular fields, a KIC shall normally have a time-frame of seven to fifteen years.

2. The EIT may establish a framework partnership agreement with a KIC for an initial period of seven years.

3. The Governing Board may decide to extend the framework partnership agreement with a KIC beyond the period initially set, within the limits of the financial envelope referred to in Article 19, if this is the most appropriate way to achieve the objectives of the EIT.

4. In the event that evaluations of a KIC show inadequate results, the Governing Board shall take appropriate measures, including the reduction, modification or withdrawal of its financial support or the termination of the agreement."

(8) In Article 8(2), the following point is inserted:

"(aa) disseminate best practices on horizontal issues;"

(9) Article 10 is deleted.

(10) Article 13(2) is replaced by the following:

"2. The EIT shall make public its rules of procedure, its specific financial rules referred to in Article 21(1) and the detailed criteria for the selection of the KICs referred to in Article 7 before issuing calls for proposals for the selection of the KICs."

(11) Article 14 is amended as follows:

(a) paragraph 2 is replaced by the following:

"2. The KICs shall be financed, in particular, from the following sources:

- (a) contributions from partner organisations, forming a substantial source of funding;
- (b) voluntary contributions from Member States, third countries or public authorities within them;
- (c) contributions from international bodies or institutions;
- (d) revenue generated by the KICs' own assets and activities and royalties from intellectual property rights;
- (e) capital endowments, including those managed by the EIT Foundation;
- (f) bequests, donations and contributions from individuals, institutions, foundations or any other national bodies;
- (g) the contribution from the EIT;
- (h) financial instruments, including those funded from the general budget of the Union.

Contributions may include contributions in kind."

(b) paragraph 4 is replaced by the following:

"4. The EIT contribution to the KICs may cover up to 100 % of the total eligible costs of KIC added-value activities.";

(c) the following paragraphs are added:

"6. The EIT contribution shall not, on average, exceed 25 % of a KIC's overall funding.

7. The EIT shall establish a competitive review mechanism for allocating an appropriate share of its financial contribution to the KICs. It shall include assessing the KICs' business plans and performance as measured by continuous monitoring."

(12) Article 15 is replaced by the following:

"Article 15

Programming and reporting

1. The EIT shall adopt a rolling triennial work programme, based on the SIA, once it is adopted, containing a statement of the major priorities and planned initiatives of the EIT and the KICs, including an estimate of financing needs and sources. It shall also contain appropriate indicators for monitoring the KICs and EIT activities using a results-oriented approach. The preliminary rolling triennial work programme shall be submitted by the EIT to the Commission by 31 December of the year which ends two years before the entry into force of the triennial work programme in question (year N - 2).

The Commission shall deliver an opinion on EIT specific objectives as defined in Horizon 2020 and its complementarities with Union policies and instruments within three months of the submission of the work programme. The EIT shall take due account of the Commission opinion and, in the event of disagreement, justify its position. The final work programme shall be transmitted by the EIT to the European Parliament, the Council, the Commission, the European Economic and Social Committee and the Committee of the Regions for information. Upon request, the Director shall present the final work programme to the committee responsible of the European Parliament.

2. The EIT shall adopt an annual report by 30 June each year. The report shall outline the activities conducted by the EIT and the KICs during the preceding calendar year and assess the results with respect to the objectives, indicators and timetable set, the risks associated with the activities carried out, the use of resources and the general operation of the EIT. The EIT shall transmit the annual report to the European Parliament and the Council and inform them of the activities of the EIT, its contribution to Horizon 2020 and to the Union innovation, research and education policies and objectives at least once a year."

(13) Article 16 is amended as follows:

- (a) in paragraph 2, the word "five" is replaced by the word "three";
- (b) the following paragraph is inserted:

"2a. The Commission may carry out further evaluations of themes or topics of strategic relevance, with the assistance of independent experts, to examine the progress made by the EIT towards the objectives set, identify the factors contributing to the implementation of the activities and identify best practices. In so doing, the Commission shall fully consider the administrative impact on the EIT and the KICs."

(14) Article 17 is amended as follows:

- (a) paragraph 2 is replaced by the following:

"2. The SIA shall define the priority fields and the long-term strategy for the EIT and shall include an assessment of its socioeconomic impact and its capacity to generate the best innovation added-value. The SIA shall take into account the results of the monitoring and evaluation of the EIT as referred to in Article 16."

- (b) the following paragraph is inserted:

"2a. The SIA shall include an analysis of potential and appropriate synergies and complementarities between EIT activities and other Union initiatives, instruments and programmes."

- (c) paragraph 4 is replaced by the following:

"4. Acting on a proposal from the Commission, the European Parliament and the Council shall adopt the SIA in accordance with Article 173(3) of the Treaty on the Functioning of the European Union."

(15) Article 19 is replaced by the following:

"Article 19

Budgetary commitments

1. The financial envelope from Horizon 2020 for the implementation of this Regulation during the period from 1 January 2014 to 31 December 2020 is set at EUR 2 711,4 million in current prices.

2. That amount shall constitute the prime reference for the European Parliament and the Council during the budgetary procedure, within the meaning of point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the

Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (*).

3. The annual appropriations shall be authorised by the European Parliament and the Council within the limits of the financial framework. The EIT financial contribution to the KICs shall be provided under this financial envelope.

(*) OJ C 373, 20.12.2013, p. 1."

(16) Article 20 is amended as follows:

- (a) paragraph 5 is replaced by the following:

"5. The Governing Board shall adopt the draft estimate, accompanied by a draft establishment plan and the preliminary rolling triennial work programme and forward them to the Commission by 31 December of the year N - 2."

- (b) paragraph 6 is replaced by the following:

"6. On the basis of the estimate, the Commission shall enter in the draft general budget of the Union the estimates it deems necessary for the amount of the subsidy to be charged to the general budget."

(17) Article 21 is amended as follows:

- (a) the following paragraph is inserted:

"1a. The financial contribution to the EIT shall be implemented in accordance with Regulation (EU) No 1290/2013 and with Regulation (EU) No 1291/2013."

- (b) paragraph 4 is replaced by the following:

"4. Upon a recommendation from the Council, the European Parliament shall, before 15 May of the year N + 2, give a discharge for the year N to the Director in respect of the implementation of the EIT budget."

(18) Article 22(4) is deleted.

(19) The following Article is inserted:

"Article 22a

Winding up of the EIT

In the event of the EIT being wound up, its liquidation shall take place under the supervision of the Commission in accordance with the applicable laws. The agreements with the KICs and the act establishing the EIT Foundation shall lay down the appropriate provisions in such situation."

Article 2

The Annex to Regulation (EC) No 294/2008 shall be replaced by the Annex to this Regulation.

Article 3

This Regulation shall enter into force on 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

ANNEX

Statutes of the European Institute of Innovation and Technology

SECTION 1

COMPOSITION OF THE GOVERNING BOARD

1. The Governing Board shall consist both of appointed and of representative members.
2. There shall be 12 appointed members, appointed by the Commission, providing a balance between those with experience in business, higher education and research. They shall have a four-year non-renewable term of office.

Whenever necessary, the Governing Board shall submit to the Commission a proposal for appointment of a new member(s). The candidate(s) shall be chosen on the basis of the outcome of a transparent and open procedure, involving consultation with stakeholders.

The Commission shall have regard to the balance between higher education, research, innovation and business experience as well as to gender and geographical balance and an appreciation of the higher education, research and innovation environment across the Union.

The Commission shall appoint the member(s) and inform the European Parliament and the Council of the selection process and of the final appointment of those members of the Governing Board.

In the event that an appointed member is unable to complete his/her term of office, a substitute member shall be appointed by the same procedure as the incapacitated member in order to complete the latter's term of office. A substitute member who has served for a period of less than two years may be re-appointed by the Commission for an additional period of four years at the request of the Governing Board.

During a transitional period, the Board members initially appointed for a six-year period shall complete their term of office. Until that time there shall be 18 appointed members. Within six months of entry into force of this Regulation, one third of the twelve members appointed in 2012 shall be chosen by the Governing Board with the Commission's approval to serve for a two-year period, one third for a four-year period and one third for a six-year period.

In exceptional and duly justified circumstances, in order to maintain the integrity of the Governing Board, the Commission may, at its own initiative, terminate the term of office of a member of the Board.

3. There shall be three representative members elected by the KICs from among their partner organisations. They shall have a two-year term of office, renewable once. Their term of office shall cease if they leave the KIC.

The conditions and procedures for the election and replacement of the representative members shall be adopted by the Governing Board on the basis of a proposal from the Director. This mechanism shall ensure an appropriate representation of diversity and shall take into account the evolution of the KICs.

During a transitional period, the representative members initially elected for a three-year period shall complete their term of office. Until that time there shall be four representative members.

4. The Governing Board members shall act in the interests of the EIT, safeguarding its goals and mission, identity, autonomy and coherence, in an independent and transparent way.

SECTION 2

RESPONSIBILITIES OF THE GOVERNING BOARD

The Governing Board shall take necessary strategic decisions, in particular:

- (a) adopt the EIT's draft Strategic Innovation Agenda (SIA), triennial rolling work programme, budget, annual accounts and balance sheet and annual activity report, on the basis of a proposal from the Director;
- (b) adopt criteria and procedures for financing, monitoring and evaluating the activities of the KICs, on the basis of a proposal from the Director;
- (c) adopt the selection procedure of the KICs;

- (d) select and designate a partnership as a KIC or withdraw the designation where appropriate;
- (e) ensure the continuing evaluation of the activities of the KICs;
- (f) adopt its rules of procedure, those for the Executive Committee, as well as the specific financial rules of the EIT;
- (g) define, with the Commission's agreement, appropriate fees for members of the Governing Board and of the Executive Committee; such fees shall be benchmarked against similar remuneration in the Member States;
- (h) adopt a procedure for selecting the Executive Committee and the Director;
- (i) appoint and if necessary dismiss the Director, and exercise disciplinary authority over him/her;
- (j) appoint the Accounting Officer and the members of the Executive Committee;
- (k) adopt a code of good conduct regarding conflicts of interest;
- (l) establish, where appropriate, advisory groups which may have a defined duration;
- (m) set up an Internal Auditing Function in accordance with Commission Regulation (EC, Euratom) No 2343/2002 ⁽¹⁾;
- (n) be empowered to establish a Foundation with the specific objective of promoting and supporting the activities of the EIT;
- (o) decide on the language policy of the EIT, taking into account existing principles on multilingualism and the practical requirements of its operations;
- (p) promote the EIT globally, so as to raise its attractiveness and make it a world-class body for excellence in higher education, research and innovation.

SECTION 3

FUNCTIONING OF THE GOVERNING BOARD

1. The Governing Board shall elect its Chairperson from among the appointed members. The term of office of the Chairperson shall be two years, renewable once.
2. Without prejudice to paragraph 3, the Governing Board shall adopt decisions by simple majority of members having a right to vote.

However, decisions under points (a), (b), (c), (i) and (o) of Section 2, and under paragraph 1 of this Section shall require a majority of two thirds of its members having the right to vote.
3. The representative members may not vote on decisions under points (b), (c), (d), (e), (f), (g), (i), (j), (k), (o) and (p) of Section 2.
4. The Governing Board shall meet in ordinary session at least three times a year and in extraordinary session when convened by its Chairperson or at the request of at least one third of all its members.
5. The Governing Board shall be assisted by the Executive Committee. The Executive Committee shall consist of three appointed members and the Chairperson of the Governing Board, who shall also chair the Executive Committee. The three members other than the Chairperson shall be chosen by the Governing Board from among the Governing Board's appointed members. The Governing Board may delegate specific tasks to the Executive Committee.

SECTION 4

THE DIRECTOR

1. The Director shall be a person with expertise and high reputation in the areas where the EIT operates. The Director shall be appointed by the Governing Board for a term of office of four years. The Governing Board may extend that term of office once by a four-year period when it considers that the interests of the EIT are best served by so doing.

⁽¹⁾ Commission Regulation (EC, Euratom) No 2343/2002 of 23 December 2002 on the framework Financial Regulation for the bodies referred to in Article 185 of Council Regulation (EC, Euratom) No 1605/2002 on the Financial Regulation applicable to the general budget of the European Communities (O) L 357, 31.12.2002, p. 72.

2. The Director shall be responsible for operations and for the day-to-day management of the EIT and shall be its legal representative. The Director shall be accountable to the Governing Board and report to it on an ongoing basis on the development of the EIT activities.
3. The Director shall in particular:
 - (a) organise and manage the activities of the EIT;
 - (b) support the Governing Board and the Executive Committee in their work, provide the secretariat for their meetings and supply all information necessary for the performance of their duties;
 - (c) prepare a draft SIA, a preliminary rolling triennial work programme, the draft annual report and the draft annual budget for submission to the Governing Board;
 - (d) prepare and administer the KICs selection process and ensure that the various stages of that process are carried out in a transparent and objective manner;
 - (e) prepare, negotiate and conclude contractual agreements with the KICs;
 - (f) organise the Stakeholder Forum, including the special configuration of Member States' representatives;
 - (g) ensure the implementation of effective monitoring and evaluation procedures relating to the performance of the EIT in accordance with Article 16 of this Regulation;
 - (h) be responsible for administrative and financial matters, including the implementation of the EIT budget, taking due account of advice received from the Internal Auditing Function;
 - (i) be responsible for all staff matters;
 - (j) submit the draft annual accounts and balance sheet to the Internal Auditing Function, and subsequently to the Governing Board, through the Executive Committee;
 - (k) ensure that the obligations of the EIT with regard to the contracts and agreements it has concluded are met;
 - (l) ensure effective communication with the Union's institutions;
 - (m) act in the interests of the EIT, safeguarding its goals and mission, identity, autonomy and coherence, in an independent and transparent way.

SECTION 5

STAFF OF THE EIT

1. The staff of the EIT shall consist of personnel employed directly by the EIT under fixed-term contracts. The conditions of employment of other servants of the European Union shall apply to the Director and the staff of the EIT.
 2. Experts may be seconded to the EIT for a limited period. The Governing Board shall adopt provisions enabling seconded experts to work at the EIT and defining their rights and responsibilities.
 3. The EIT shall exercise, with regard to its staff, the powers which are devolved to the authority authorised to conclude contracts with its staff.
 4. A member of staff may be required to make good, in whole or in part, any damage suffered by the EIT as a result of serious misconduct on his/her part in the course of or in connection with the performance of his/her duties.
-

**REGULATION (EU) No 1293/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

**on the establishment of a Programme for the Environment and Climate Action (LIFE) and repealing
Regulation (EC) No 614/2007**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 192 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure ⁽³⁾,

Whereas:

(1) Union environmental and climate policy and legislation have delivered substantial improvements to the state of the environment. However, major environmental and climate challenges remain which, if left unaddressed, will have significant consequences for the Union.

(2) Tackling those environmental and climate challenges should, due to their scale and complexity, be funded primarily through the Union's major funding programmes. In its Communication of 29 June 2011 entitled "A Budget for Europe 2020", recognising the climate change challenge, the Commission stated that it intends to increase the climate-related proportion of the Union budget to at least 20 % with contributions from different policies. This Regulation should contribute to the achievement of that goal.

(3) Those Union funding programmes cannot address all specific needs relating to the environment and climate action. For the environment and for climate action, specific approaches are required to deal with uneven integration of their objectives into Member States' practices, uneven and inadequate implementation of the legislation in the Member States, and insufficient dissemination of information about, and promotion of, policy goals. It is appropriate to provide a follow-up to the programme established by Regulation (EC) No 614/2007 of the European Parliament and of the Council ⁽⁴⁾ and adopt a new regulation. Therefore, this Regulation should establish a dedicated funding Programme for the Environment and Climate Action (the "LIFE Programme"). In order for Union funding to achieve substantial impact, close synergies and complementarity should be developed between the LIFE Programme and other Union funding programmes.

(4) Environmental assets are unevenly distributed across the Union, but their benefits concern, and are felt by, the Union as a whole. The Union's obligation to preserve those assets calls for the consistent application of the principles of solidarity and responsibility sharing, which require that some Union environmental and climate problems be better addressed at regional or local level. Since 1992, LIFE programmes have played an essential role for better solidarity and responsibility sharing in preserving the common good of the Union's environment and climate. The LIFE Programme should continue playing that role.

(5) Given its characteristics and size, the LIFE Programme cannot solve all environmental and climate problems. Rather, its objective should be to act as a catalyst for changes in policy development and implementation by providing and disseminating solutions and best practices to achieve environmental and climate goals, and by promoting innovative environmental and climate change technologies. In that endeavour, the LIFE Programme should support the implementation of the General Union Environment Action Programme to 2020 "Living well, within the limits of our planet" as established by Decision of the European Parliament and of the Council ⁽⁵⁾ ("7th Environment Action Programme").

⁽¹⁾ OJ C 191, 29.6.2012, p. 111.

⁽²⁾ OJ C 277, 13.9.2012, p. 61.

⁽³⁾ Position of the European Parliament of 21 November 2013 (not yet published in the Official Journal) and decision of the Council of 5 December 2013.

⁽⁴⁾ Regulation (EC) No 614/2007 of the European Parliament and of the Council of 23 May 2007 concerning the Financial Instrument for the Environment (LIFE+) (OJ L 149, 9.6.2007, p. 1).

⁽⁵⁾ Decision of the European Parliament and of the Council of 20 November 2013 on a General Union Environment Action Programme to 2020 "Living well, within the limits of our planet".

- (6) This Regulation lays down a financial envelope of EUR 3 456,655 million in current prices, which amounts to 0,318 % of the total amount of commitment appropriations referred to in Council Regulation (EU, Euratom) No 1311/2013 ⁽¹⁾, for the entire duration of the LIFE Programme which is to constitute the prime reference amount, within the meaning of Point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, cooperation in budgetary matters and on sound financial management ⁽²⁾, for the European Parliament and the Council during the annual budgetary procedure.
- (7) In line with the conclusions of the Luxembourg European Council of December 1997 and of the Thessaloniki European Council of June 2003, candidate countries and the Western Balkan countries involved in the Stabilisation and Association Process, as well as countries to which the European Neighbourhood Policy applies, should be eligible to participate in Union programmes, in accordance with the conditions laid down in the relevant bilateral or multilateral agreements concluded with those countries.
- (8) Pursuant to Council Decision 2001/822/EC ⁽³⁾ (the Overseas Association Decision), individuals from an overseas country or territory (OCT) and, where applicable, the relevant public and/or private bodies and institutions in an OCT are eligible to participate in Union programmes, subject to the rules and objectives of the programme in question, as well as to the arrangements applicable to the Member State to which the OCT is linked.
- (9) For environmental and climate action-related investments within the Union to be effective, some activities need to be implemented outside its borders. Those investments may not always be financed under the Union's external action financial instruments. Interventions in countries not directly participating in the LIFE Programme, and participation of legal persons based in those countries in activities financed under the LIFE Programme should exceptionally be possible, provided specific conditions set out in this Regulation are met.
- (10) This Regulation should also provide a framework for cooperation with and for providing support to relevant international organisations with a view to responding to

environmental and climate policy needs that do not fall within the scope of external action financial instruments, such as certain studies.

- (11) Environmental and climate requirements should be integrated into the Union's policies and activities. The LIFE Programme should therefore be complementary to other Union funding programmes, including the European Regional Development Fund ⁽⁴⁾, the European Social Fund ⁽⁵⁾, the Cohesion Fund ⁽⁶⁾, the European Agriculture Guarantee Fund ⁽⁷⁾, the European Agricultural Fund for Rural Development ⁽⁸⁾, the European Maritime and Fisheries Fund, and Horizon 2020 - The Framework Programme for Research and Innovation ⁽⁹⁾ ("Horizon 2020").

The Commission and Member States should ensure such complementarity at all levels. At Union level, complementarity should be ensured by establishing structured cooperation between the LIFE Programme and the shared-management Union funding programmes in the Common Strategic Framework, established by Regulation of the European Parliament and of the Council (EU) No 1303/2013 ⁽¹⁰⁾ ("Common Provisions Regulation"), in particular in order to promote funding of activities that complement integrated projects or support the use of solutions, methods and approaches developed under the LIFE Programme. The LIFE Programme should also encourage the uptake of the results of environmental and climate-related research and innovation of Horizon 2020. Within this context it should offer co-financing opportunities for projects with clear environmental and climate benefits in order to ensure synergies between the LIFE Programme and Horizon 2020. Coordination is required to prevent double funding. The Commission

⁽⁷⁾ Council Regulation (EC) No 1290/2005 of 21 June 2005 on the financing of the common agricultural policy (OJ L 209, 11.8.2005, p. 1).

⁽⁸⁾ Regulation (EC) No 1290/2005.

⁽⁹⁾ Regulation (EU) No 1291/2013 of the European Parliament and of the Council of 11 December 2013 establishing Horizon 2020 - The Framework Programme for research and Innovation (2014-2020) and repealing Decision No 1982/2006/EC (See page 104 of this Official Journal).

⁽¹⁰⁾ Regulation of the European Parliament and of the Council (EU) No 1303/2013 of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (See page 320 of this Official Journal).

should take steps to prevent overlap and additional administrative burden on project beneficiaries arising from reporting obligations from different financial instruments. To ensure clarity and the practical feasibility of integrated projects under the LIFE Programme, potential arrangements for cooperation should be laid down at an early stage. Member States should envisage referring to such arrangements in their Partnership Agreements to ensure that advantages of integrated projects can be taken into account during the drawing-up of operational or rural development programmes.

(12) Halting and reversing the loss of biodiversity and improving resource efficiency, together with addressing environment and health-related concerns, remain key challenges for the Union. These challenges require increased efforts at Union level to provide solutions and best practices that help to achieve the targets of the Commission Communication of 3 March 2010 entitled "Europe 2020: a strategy for smart, sustainable and inclusive growth" (the "Europe 2020 Strategy"). In addition, improved governance, in particular through awareness raising and stakeholder involvement, is essential to deliver environmental objectives. Therefore the sub-programme for Environment should have three priority areas for action: Environment and Resource Efficiency, Nature and Biodiversity, and Environmental Governance and Information. It should be possible for projects financed by the LIFE Programme to contribute to the achievement of the specific objectives of more than one of those priority areas and to involve the participation of more than one Member State.

(13) The Commission Communication of 20 September 2011 entitled "Roadmap to a Resource Efficient Europe" proposed the milestones and actions that are needed to put the Union on a path to resource-efficient and sustainable growth. Therefore, the priority area Environment and Resource Efficiency should support the effective implementation of Union environmental policy by the public and private sectors, in particular in the environmental sectors covered by the Roadmap to a Resource Efficient Europe, by facilitating the development and sharing of new solutions and best practices. In this context the Commission should ensure consistency and avoid overlap with Horizon 2020.

(14) The Commission Communication of 3 May 2011 entitled "Our life insurance, our natural capital: an EU biodiversity strategy to 2020" (the "Union Biodiversity Strategy to 2020") has set targets to halt and reverse biodiversity loss. Those targets include, inter alia, the

full implementation of Council Directive 92/43/EEC⁽¹⁾ and Directive 2009/147/EC of the European Parliament and of the Council⁽²⁾, as well as maintaining and restoring ecosystems and their services. The LIFE Programme should contribute to achieving those targets. Therefore, the priority area Nature and Biodiversity should focus on the implementation and management of the Natura 2000 network set up under Directive 92/43/EEC, in particular in relation to the prioritised action framework prepared on the basis of Article 8 of that Directive, on the development and dissemination of best practices in relation to biodiversity and Directives 92/43/EEC and 2009/147/EC, as well as on the wider biodiversity challenges identified by the Union Biodiversity Strategy to 2020.

(15) The contribution of the LIFE Programme to the annual funding needs of the Natura 2000 network should be seen in the context of secured biodiversity expenses from other Union funds. Particular importance should be given to integrated projects under the LIFE Programme as a coordinated funding mechanism for the Natura 2000 network, given their potential to leverage funds and to increase the absorption capacity for nature and biodiversity spending within other Union funds.

(16) Forests play a significant role for environment and climate as regards, for instance, biodiversity, water, soil, and climate change mitigation and adaptation. Forests and soils help to regulate the climate by taking up carbon dioxide (CO₂) from the atmosphere and storing immense amounts of carbon. To optimise that role, the provision of relevant, compatible data and information is necessary. This Regulation should therefore also represent a framework for supporting synergies between environmental and climate actions associated with forests and soils, including their monitoring. Other areas for increased synergies are water scarcity and droughts, as well as management of flood risks.

(17) With a view to optimising the use of LIFE Programme resources, synergies between actions under the sub-programme for Environment, in particular to protect biodiversity, and climate change mitigation and adaptation measures under the sub-programme for Climate Action should be fostered.

⁽¹⁾ Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7).

⁽²⁾ Directive 2009/147/EC of the European Parliament and of the Council of 30 November 2009 on the conservation of wild birds (OJ L 20, 26.1.2010, p. 7).

- (18) The Commission Communication of 15 December 2011 entitled "A Roadmap for moving to a competitive low carbon economy in 2050" (the "Roadmap 2050") acknowledged that testing new approaches to climate change mitigation would remain essential for moving to a low-carbon economy. Adaptation to climate change, as a cross-cutting Union priority, also needs to be ensured. Moreover, governance promotion and awareness raising is essential to deliver constructive results and to ensure stakeholder involvement. Therefore, the sub-programme for Climate Action should support efforts contributing to three priority areas: Climate Change Mitigation, Climate Change Adaptation and Climate Governance and Information. It should be possible for projects financed by the LIFE Programme to contribute to the achievement of the specific objectives of more than one of those priority areas and to involve the participation of more than one Member State.
- (19) The priority area Climate Change Mitigation should contribute to the development and implementation of Union climate-related policy and legislation, in particular with regard to greenhouse gas monitoring and reporting, policies related to land use, land-use change and forestry, conservation of natural carbon sinks, the emissions trading system, Member States' effort to reduce greenhouse gas emissions, carbon capture and storage, renewable energy, energy efficiency, transport and fuels, ozone layer protection and fluorinated gases. The construction of carbon capture and storage infrastructure is considered beyond the scope of the LIFE Programme and is therefore not to be supported.
- (20) The first consequences of climate change can already be seen in Europe and worldwide, such as extreme weather conditions leading to floods and droughts, and rising temperatures and sea levels. The priority area Climate Change Adaptation should therefore help populations, economic sectors and regions to adapt to such impacts through specific adaptation measures and strategies, in order to ensure a more resilient Union. Actions in this field should be complementary to actions eligible for funding under the civil protection financial instrument as established by Decision No 1313/2013/EU of the European Parliament and of the Council⁽¹⁾. The construction of large infrastructure is considered beyond the scope of the LIFE Programme and is therefore not to be supported.
- (21) Full implementation of environmental and climate policy and legislation is inextricably linked to achieving better governance, improving stakeholder involvement and disseminating information. Therefore, the priority areas Governance and Information should in both sub-programmes support the development of cooperation platforms and the sharing of best practices for more effective compliance and enforcement, including training programmes for judges and public prosecutors, and should generate support from the public and stakeholders for the Union's policy-making efforts in the areas of environment and climate. In particular, they should support improvements in the dissemination of knowledge base and best practices in the implementation of Union legislation, in awareness raising, and in public participation, access to information and access to justice on environmental matters.
- (22) In the framework of this Regulation, support should be provided in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council⁽²⁾. Projects financed under the LIFE Programme should meet eligibility and award criteria to secure the best possible use of Union funds and to ensure Union added value. When evaluating Union added value, the Commission should pay particular attention, as applicable to the priority areas, to the potential of projects to be replicated and transferred, the sustainability of their results and the contribution to achieving the general and specific objectives of the priority areas as well as to the thematic priorities implemented through the project topics. Projects with cross-sectoral impacts should be encouraged. The Commission should also promote and encourage the use of green public procurement, in particular when implementing projects.
- (23) In order to maintain a level playing field for all undertakings active in the internal market and to avoid undue distortions of competition, funding provided under the LIFE Programme should address market failures, where appropriate. Moreover, in cases where funding constitutes state aid within the meaning of Article 107(1) of the Treaty on the Functioning of the European Union (TFEU), it should be designed in a way consistent with state aid rules so as to prevent market distortions, such as crowding-out of private funding, creating ineffective market structures or preserving inefficient companies,

⁽¹⁾ Decision 1313/2013/EU of the European Parliament and of the Council of 17 December 2013 on a Union Civil Protection Mechanism (See page 924 of this Official Journal).

⁽²⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the Financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

and may not be put into effect until it is approved by the Commission in accordance with Article 108(3) TFEU, unless it complies with a regulation adopted pursuant to Council Regulation (EC) No 994/98 ⁽¹⁾.

exploit synergies and ensure consistency between different Union funding sources by providing a strategic environmental and climate focus while ensuring that procedures are simplified.

- (24) In order to improve the implementation of environmental and climate policy and enhance the integration of environmental and climate objectives in other policies, the LIFE Programme should promote projects that support integrated approaches to the implementation of environmental and climate legislation and policy. Such integrated projects should serve as concrete tools for enhancing the integration of environment and climate objectives into other Union policies and into overall Union expenditure in line with the Europe 2020 strategy. They should provide examples of good practice for efficient and well-coordinated implementation of Union environmental and climate policy in Member States and regions. For the sub-programme for Environment, integrated projects should focus primarily on the implementation of the Union Biodiversity Strategy to 2020, with particular regard to the effective management and consolidation of the Natura 2000 network set up by Directive 92/43/EEC through the implementation of prioritised action frameworks prepared on the basis of Article 8 of that Directive, of Directive 2000/60/EC of the European Parliament and of the Council ⁽²⁾, and of waste and air legislation.
- (25) Integrated projects, while focusing on the themes identified, should be multi-purpose delivery mechanisms (e.g. aiming at environmental benefits and capacity-building) that make it possible to achieve results in other policy areas, in particular the marine environment in accordance with the objectives of Directive 2008/56/EC of the European Parliament and of the Council ⁽³⁾. Integrated projects could also be envisaged in other environmental areas. For the sub-programme for Climate Action, those projects should in particular concern climate change mitigation and adaptation strategies and action plans.
- (26) Integrated projects should support only a series of specific activities and measures, while other activities that complement those included in the project should be funded from other Union funding programmes, as well as from national, regional and private sector funds. Funding through the LIFE Programme should
- (27) Integrated projects, having a strong focus on implementation of Union environmental and climate legislation and policy through integrated approaches, require action in all parts of the Union and in all sectors targeted in this Regulation. This calls for the introduction of a distributional element in the selection process to facilitate geographical balance, and for Member States to endeavour, if necessary supported by a LIFE technical assistance project, to prepare and propose at least one integrated project during the LIFE programming period.
- (28) Given the novelty of the integrated project approach, stakeholders should be supported, when needed, by technical assistance. A two-stage application procedure should alleviate the application phase. In the first stage, a financial plan should indicate which other Union, national or private funding sources are to be mobilised and to what extent. Only in the second stage should letters of intent from at least one other funding source be required so as to ensure that the requirement of mobilisation of an additional funding source is fulfilled. The extent to which other Union funds are mobilised should be taken into account during the award phase.
- (29) The success of integrated projects is dependent on close cooperation between national, regional and local authorities and the non-state actors concerned by the LIFE Programme's objectives. The principles of transparency and disclosure of decisions concerning the development, implementation, assessment and monitoring of projects should therefore be applied.
- (30) For projects under the sub-programme for the Environment, other than integrated projects, a proportionate distribution of funds among all Member States for the duration of the first multiannual work programme should, in line with the principles of solidarity and responsibility sharing, be made through the establishment of indicative national allocations.
- (31) In order to build Member States' capacity to participate in the LIFE Programme, guaranteed funding for capacity-building projects should be made available to any Member State that meets the relevant requirements established by this Regulation. Such funding should be made available on the basis of an agreed capacity-building plan outlining the interventions and funding required.

⁽¹⁾ Council Regulation (EC) No 994/98 of 7 May 1998 on the application of Articles 92 and 93 of the Treaty establishing the European Community to certain categories of horizontal State aid (OJ L 142, 14.5.1998, p. 1).

⁽²⁾ Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

⁽³⁾ Directive 2008/56/EC of the European Parliament and of the Council of 17 June 2008 establishing a framework for Community action in the field of marine environmental policy (Marine Strategy Framework Directive) (OJ L 164, 25.6.2008, p. 19).

- (32) Quality should serve as the overarching criterion governing the project evaluation and award process in the LIFE Programme. The distributional elements introduced for the purpose of reflecting geographical balance are of an indicative nature and should not suggest secured funds or allocations per Member State.
- (33) The Union is a party to the United Nations Economic Commission for Europe (UNECE) Convention on Access to Information, Public Participation and Access to Justice in Environmental matters (the "Aarhus Convention"). The work of non-governmental organisations (NGOs) and networks of non-profit-making entities which pursue an aim of general Union interest should therefore be supported, since they are effective in supporting the aims of the Aarhus Convention by advocating the concerns and views of Union citizens as part of the policy development process as well as in supporting its implementation, and in raising awareness of environmental and climate-related problems and policy responses. It is appropriate for the LIFE Programme to support a broad range of NGOs as well as networks of non-profit-making entities which pursue an aim of general Union interest, primarily active in the field of environment or climate action, through the competitive and transparent award of operating grants, in order to help them make effective contributions to Union policy, and to promote and strengthen implementation and enforcement of Union environmental and climate objectives, as well as build up and strengthen their capacity to become more efficient partners.
- (34) In order to carry out its role in the initiation of environmental and climate policy development and implementation, the Commission should use resources from the LIFE Programme to support the initiation, implementation and mainstreaming of Union environmental and climate policy and legislation, including the purchase of services and goods. Financial resources allocated to communication activities under this Regulation should also cover corporate communication on the political priorities of the Union, as well as on the implementation and transposition status of all major Union environmental and climate legislation.
- (35) The current gap in the market between the demand for and supply of loans, equity and risk capital is likely to persist in the context of a financial crisis and, it is appropriate, therefore, to allow the use of financial instruments to support projects with revenue generating capacity in the areas of environment or climate. Financial instruments supported by the LIFE Programme should be used to address specific market needs in a cost-effective way, in line with the objectives of the Programme, and should not crowd out private financing. It should be possible to combine financial instruments with grants funded from the Union budget, including under this Regulation.
- (36) The experience of past LIFE programmes has highlighted the need to focus efforts on concrete environmental and climate policy priorities and areas for action. Those thematic priorities should not be exhaustive to allow applicants to submit proposals in other areas and to incorporate new ideas to react to new challenges. Multi-annual work programmes should also be flexible to achieve the LIFE Programme targets and objectives, while providing the necessary stability of project topics implementing the thematic priorities for potential applicants to plan, prepare and submit proposals. The first multiannual work programme should be valid for four years to be followed by a second work programme of three years' duration. Both work programmes should contain a non-exhaustive list of project topics implementing the thematic priorities.
- (37) The experience of past LIFE programmes has highlighted the importance of LIFE national contact points, in particular in providing support to applicants and beneficiaries and thereby contributing to the successful implementation of the programmes. The system of LIFE national and regional contact points should therefore be continued and, where possible, strengthened, in particular in Member States with low project uptake, and collaboration between the Commission and the LIFE national contact points and amongst LIFE national and regional contact points should be reinforced. The experience of past LIFE programmes has also highlighted the importance of ensuring the effective dissemination of project results and networking activities to increase the leverage effect and Union added value of the LIFE Programme, in particular through the organisation of seminars, workshops and other activities aiming at the exchange of experience, knowledge and good practices within the Union. The Commission should therefore continue and strengthen targeted dissemination activities, including those with a specific focus on integrated projects, in particular in Member States with low project uptake, and in relation to specific sectors, and facilitate the cooperation and exchange of experiences between LIFE beneficiaries and others. The Commission should also continue to regularly publish the list of projects financed through the LIFE Programme, including a short description of objectives and results achieved and a summary of the funds committed using appropriate media and technologies.

- (38) With a view to simplifying the LIFE Programme and reducing the administrative burden for applicants and beneficiaries, more use should be made of flat rates and lump sums without compromising the eligibility of VAT and of permanent staff costs under the conditions laid down by Regulation (EU, Euratom) No 966/2012. As per current practice, the sum of the public organisations' (as coordinating beneficiary and/or associated beneficiary) contributions to the project should exceed by at least 2 % the sum of the salary costs of the personnel of national administrations charged to the project. Union funds should not be used to subsidise national budgets, for example, to cover VAT costs. However, only limited information is available on the amounts of Union funds used to cover VAT. The Commission should, therefore, provide an overview, in the mid-term and ex-post evaluations of the LIFE Programme, of VAT reimbursements per Member State that project beneficiaries under the LIFE Programme have requested at the final payment stage.
- (39) The maximum co-financing rates should be set at such levels as are necessary to maintain the effective level of support provided by the LIFE Programme.
- (40) The LIFE Programme and its sub-programmes should be regularly monitored and evaluated based on corresponding performance indicators to allow for readjustments, including any necessary revision of the thematic priorities. When further defining the performance indicators for the assessment of programmes and projects, the Commission should place emphasis on quality monitoring on the basis of performance indicators and expected results and impacts. The Commission should also propose a method for monitoring the long-term success of projects, in particular in the priority area Nature and Biodiversity. In order to provide evidence of the co-benefits that both sub-programmes can bring to climate action and biodiversity, and to provide information on the level of spending, the monitoring of the LIFE Programme should track climate-related expenditure and biodiversity-related expenditure, as defined in "A Budget for Europe 2020". Such tracking should be based on a simple methodology by placing the expenditure in one of three categories: climate/biodiversity-related expenditure only (to be counted as 100 %), significantly climate/biodiversity-related expenditure (to be counted as 40 %), and not climate/biodiversity-related expenditure (to be counted as 0 %). That methodology should not exclude the use of more precise methodologies, where appropriate.
- (41) Given the long-standing experience of the Commission in managing the LIFE Programme and projects, and the positive experience of LIFE beneficiaries with external Monitoring Teams, management of the LIFE Programme should remain within the Commission. Any change in the management structure of the LIFE Programme and of the projects should be subject to an ex-ante cost-benefit analysis and give special consideration to ensuring adequate and comprehensive expertise, in particular in the priority area Nature and Biodiversity.
- (42) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, unduly paid or incorrectly used and, where appropriate, penalties.
- (43) In order to secure the best possible evaluation of the use of Union funds, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of performance indicators applicable to thematic priorities for the sub-programme for Environment and the priority areas for the sub-programme for Climate Action, of modification of the thematic priorities set out in Annex III, and of increasing the percentage of the budget allocated to grants for projects supporting the conservation of nature and biodiversity. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (44) In order to ensure uniform conditions for the implementation of this Regulation relating to the adoption of the multiannual work programmes, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽¹⁾
- (45) If the Committee for the LIFE Programme for the Environment and Climate Action does not deliver any opinion on a draft implementing act, the Commission should, in accordance with the second subparagraph of Article 5(4) of Regulation (EU) No 182/2011, not adopt the draft implementing act. The recourse to this procedure should be justified, inter alia, by the need to assess the proportionate distribution of funds between integrated projects, in particular the maximum amount that a single integrated project may receive.

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

- (46) To ensure efficient transition between the measures adopted under Regulation (EC) No 614/2007 and the LIFE Programme, it is necessary to continue to monitor, audit and qualitatively assess the activities financed under that Regulation following its expiry.
- (47) The added value of the LIFE Programme derives from the specificity of its approach and focus which make its interventions particularly adapted to environmental and climate needs. The LIFE Programme can contribute to more effective implementation of environmental policies than Member States acting on their own because of increased pooling of resources and expertise. It also provides the platform for developing and exchanging best practices and knowledge, improving, catalysing, and accelerating changes in the implementation of the *acquis*, and building capacity, supporting private actors, in particular SMEs, in testing small-scale technologies and solutions, and allowing Member States and stakeholders to learn from each other. Moreover, the LIFE Programme creates synergies across Union and national funds while leveraging additional private sector funds, thereby increasing the coherence of Union intervention and promoting a more homogeneous implementation of the *acquis*.
- (48) Since the objectives of this Regulation, namely contributing to the implementation and development of Union environmental and climate policy and legislation, including the integration of the environment and climate objectives into other policies, and promoting better governance, cannot be sufficiently achieved by the Member States but can rather, by reason of scale and effects of this Regulation, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.
- (49) Regulation (EC) No 614/2007 should therefore be repealed,

HAVE ADOPTED THIS REGULATION:

TITLE I

THE PROGRAMME FOR THE ENVIRONMENT AND CLIMATE ACTION (LIFE)

Article 1

Establishment

A Programme for the Environment and Climate Action covering the period from 1 January 2014 to 31 December 2020 (the "LIFE Programme") is hereby established.

Article 2

Definitions

For the purposes of this Regulation, the following definitions apply:

- (a) "pilot projects" means projects that apply a technique or method that has not been applied or tested before, or elsewhere, that offer potential environmental or climate advantages compared to current best practice and that can subsequently be applied on a larger scale to similar situations;
- (b) "demonstration projects" means projects that put into practice, test, evaluate and disseminate actions, methodologies or approaches that are new or unknown in the specific context of the project, such as the geographical, ecological, socio-economic context, and that could be applied elsewhere in similar circumstances;
- (c) "best practice projects" means projects that apply appropriate, cost-effective and state-of-the-art techniques, methods and approaches taking into account the specific context of the project;
- (d) "integrated projects" means projects implementing on a large territorial scale, in particular, regional, multi-regional, national or trans-national scale, environmental or climate plans or strategies required by specific Union environmental or climate legislation, developed pursuant to other Union acts or developed by Member States' authorities, primarily in the areas of nature, including, inter alia, Natura 2000 network management, water, waste, air and climate change mitigation and adaptation, while ensuring involvement of stakeholders and promoting the coordination with and mobilisation of at least one other relevant Union, national or private funding source;
- (e) "technical assistance projects" means projects providing, by way of action grants, financial support to help applicants prepare integrated projects, and in particular to ensure that those projects comply with the timing, technical and financial requirements of the LIFE Programme in coordination with funds referred to in Article 8(3);
- (f) "capacity-building projects" means projects providing, by way of action grants, financial support to the activities required to build the capacity of Member States, including LIFE national or regional contact points, with a view to enabling Member States to participate more effectively in the LIFE Programme;

- (g) "preparatory projects" means projects primarily identified by the Commission in cooperation with Member States to support specific needs for the development and implementation of Union environmental or climate policy and legislation;
- (h) "information, awareness and dissemination projects" means projects aimed at supporting communication, dissemination of information and awareness raising in the fields of the sub-programmes for Environment and Climate Action.

Article 3

General objectives and performance indicators

1. The LIFE Programme shall in particular have the following general objectives:

- (a) to contribute to the shift towards a resource-efficient, low-carbon and climate-resilient economy, to the protection and improvement of the quality of the environment and to halting and reversing biodiversity loss, including the support of the Natura 2000 network and tackling the degradation of ecosystems;
- (b) to improve the development, implementation and enforcement of Union environmental and climate policy and legislation, and to act as a catalyst for, and promote, the integration and mainstreaming of environmental and climate objectives into other Union policies and public and private sector practice, including by increasing the public and private sector's capacity;
- (c) to support better environmental and climate governance at all levels, including better involvement of civil society, NGOs and local actors;
- (d) to support the implementation of the 7th Environment Action Programme.

In pursuing those objectives, the LIFE Programme shall contribute to sustainable development and to the achievement of the objectives and targets of the Europe 2020 Strategy and of relevant Union environmental and climate strategies and plans.

2. The general objectives set out in paragraph 1 shall be pursued through the following sub-programmes:

- (a) the sub-programme for Environment;
- (b) the sub-programme for Climate Action.

3. The performance of the LIFE Programme shall be assessed, in particular, against the following indicators:

- (a) as regards the general objective referred to in point (a) of paragraph 1, attributable environmental and climate

improvements. In relation to the objective of contributing to halting and reversing biodiversity loss, attributable environmental improvements shall be measured through the percentage of the Natura 2000 network restored or brought to adequate management, surface and type of ecosystems restored, and number and type of habitats and species targeted with improving conservation status;

- (b) as regards the general objectives linked to development and implementation referred to in point (b) of paragraph 1, the number of interventions developed or undertaken that implement plans, programmes or strategies pursuant to Union environmental or climate policy and legislation, and the number of interventions suitable for replication or transfer;

- (c) as regards the general objectives linked to integration and mainstreaming referred to in point (b) of paragraph 1, the number of interventions achieving synergies with or mainstreamed into other Union funding programmes, or integrated into public or private sector practice;

- (d) as regards the general objective referred to in point (c) of paragraph 1, the number of interventions to ensure better governance, dissemination of information and awareness of environmental and climate aspects.

The Commission shall be empowered to adopt delegated acts in accordance with Article 29 to further define the performance indicators in view of their application to the priority areas and thematic priorities referred to in Article 9 and Annex III respectively as regards the sub-programme for Environment, and in Article 13 as regards the sub-programme for Climate Action.

Article 4

Budget

1. The financial envelope for the implementation of the LIFE Programme for the period from 2014 to 2020 is set at EUR 3 456 655 000 in current prices, which amounts to 0,318 % of the total amount of commitment appropriations as referred to in Regulation (EU) No 1311/2013.

The annual appropriations shall be authorised by the European Parliament and by the Council within the limits of the multi-annual financial framework.

2. The budgetary breakdown for the sub-programmes shall be as follows:

- (a) EUR 2 592 491 250 of the overall financial envelope referred to in paragraph 1 shall be allocated to the sub-programme for Environment;

- (b) EUR 864 163 750 of the overall financial envelope referred to in paragraph 1 shall be allocated to the sub-programme for Climate Action.

Article 5

Participation of third countries in the LIFE Programme

The LIFE Programme shall be open to the participation of the following countries:

- (a) European Free Trade Association (EFTA) countries which are parties to the Agreement on the European Economic Area (EEA);
- (b) candidate countries, potential candidates and acceding countries to the Union;
- (c) countries to which the European Neighbourhood Policy applies;
- (d) countries which have become members of the European Environmental Agency in accordance with Council Regulation (EC) No 933/1999 ⁽¹⁾.

Such participation shall be pursued in accordance with the conditions laid down in the respective bilateral or multilateral agreements establishing the general principles for those third countries' participation in Union programmes.

Article 6

Activities outside the Union or in overseas countries and territories

1. Without prejudice to Article 5, the LIFE Programme may finance activities outside the Union and in overseas countries and territories (OCTs) in accordance with Decision 2001/822/EC (the Overseas Association Decision), provided those activities are necessary to achieve Union environmental and climate objectives and to ensure the effectiveness of interventions carried out in Member State territories to which the Treaties apply.
2. A legal person established outside the Union may be able to participate in the projects referred to in Article 18, provided the beneficiary coordinating the project is based in the Union and the activity to be carried out outside the Union meets the requirements set out in paragraph 1 of this Article.

Article 7

International cooperation

In the course of implementing the LIFE Programme, cooperation with relevant international organisations, and with

⁽¹⁾ Council Regulation (EC) No 933/1999 of 29 April 1999 amending Regulation (EEC) No 1210/90 on the establishment of the European Environmental Agency and the European environment information and observation network (OJ L 117, 5.5.1999, p. 1).

their institutions and bodies, shall be possible where needed for the purpose of achieving the general objectives set out in Article 3.

Article 8

Complementarity

1. The Commission and the Member States shall ensure that support from the LIFE Programme is consistent with the policies and priorities of the Union and complementary to other financial instruments of the Union while also ensuring that simplification measures are implemented.

2. Operations financed under the LIFE Programme shall comply with Union and national law, including Union state aid rules. In particular, funding under the LIFE Programme which constitutes state aid within the meaning of Article 107(1) TFEU shall be notified by Member States to the Commission and may not be put into effect until it is approved by the Commission in accordance with Article 108(3) TFEU, unless it complies with a regulation adopted pursuant to Article 2(1) and Article 8 of Regulation (EC) No 994/98.

3. In accordance with their respective responsibilities, the Commission and the Member States shall ensure coordination between the LIFE Programme and the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development, and the European Maritime and Fisheries Fund, in order to create synergies, particularly in the context of integrated projects, and to support the use of solutions, methods and approaches developed under the LIFE Programme. Such coordination shall take place within the framework established by the Common Provisions Regulation and through the Common Strategic Framework and the mechanisms set out in the Partnership Agreements as required by that Regulation.

4. The Commission shall also ensure consistency and synergies, and avoid overlap between the LIFE Programme and other Union policies and financial instruments, in particular Horizon 2020 and those in the framework of the Union's external action.

TITLE II

THE SUB-PROGRAMMES

CHAPTER 1

The sub-programme for Environment

Article 9

Priority areas of the sub-programme for Environment

1. The sub-programme for Environment shall have three priority areas:

- (a) Environment and Resource Efficiency;

(b) Nature and Biodiversity;

(c) Environmental Governance and Information.

2. The priority areas referred to in paragraph 1 encompass the thematic priorities set out in Annex III.

The Commission shall be empowered to adopt delegated acts, where necessary, in accordance with Article 29 to add, delete or amend the thematic priorities set out in Annex III based on the following criteria:

- (a) the priorities set out in the 7th Environment Action Programme;
- (b) the specific objectives set out for each priority area referred to in Articles 10, 11 and 12;
- (c) the experience gathered in the implementation of the multi-annual work programme referred to in Article 24;
- (d) the experience gathered in the implementation of the integrated projects;
- (e) the priorities derived from new Union environmental legislation adopted after 23 December 2013; or
- (f) the experience gathered in the implementation of existing Union environmental legislation and policy.

The Commission shall review and, if necessary, revise the thematic priorities set out in Annex III at the latest by the mid-term evaluation of the LIFE Programme referred to in point (a) of Article 27(2).

3. At least 55 % of the budgetary resources allocated to projects supported by way of action grants under the sub-programme for Environment shall be dedicated to projects supporting the conservation of nature and biodiversity.

4. The Commission shall be empowered to adopt delegated acts in accordance with Article 29 in order to increase the percentage referred to in paragraph 3 of this Article by a maximum of 10 %, provided that the total funds requested over two consecutive years by way of proposals that fall under the priority area of Nature and Biodiversity and that meet minimum quality requirements exceed by more than 20 % the corresponding amount calculated for the two years preceding those years.

Article 10

Specific objectives for the priority area Environment and Resource Efficiency

The specific objectives of the sub-programme for Environment for the priority area Environment and Resource Efficiency shall in particular be:

(a) to develop, test and demonstrate policy or management approaches, best practices and solutions, including development and demonstration of innovative technologies, to environmental challenges, suitable for being replicated, transferred or mainstreamed, including with respect to the link between the environment and health, and in support of resource efficiency-related policy and legislation, including the Roadmap to a Resource Efficient Europe;

(b) to support the application, development, testing and demonstration of integrated approaches for the implementation of plans and programmes pursuant to Union environmental policy and legislation, primarily in the areas of water, waste and air;

(c) to improve the knowledge base for the development, implementation, assessment, monitoring and evaluation of Union environmental policy and legislation, and for the assessment and monitoring of the factors, pressures and responses that impact on the environment within and outside the Union.

Article 11

Specific objectives for the priority area Nature and Biodiversity

The specific objectives of the sub-programme for Environment for the priority area Nature and Biodiversity shall in particular be:

(a) to contribute to the development and implementation of Union policy and legislation in the area of nature and biodiversity, including the Union Biodiversity Strategy to 2020, and Directives 92/43/EEC and 2009/147/EC, in particular by applying, developing, testing and demonstrating approaches, best practices and solutions;

(b) to support the further development, implementation and management of the Natura 2000 network set up under Article 3 of Directive 92/43/EEC, in particular the application, development, testing and demonstration of integrated approaches for the implementation of the prioritised action frameworks prepared on the basis of Article 8 of that Directive;

(c) to improve the knowledge base for the development, implementation, assessment, monitoring and evaluation of Union nature and biodiversity policy and legislation, and for the assessment and monitoring of the factors, pressures and responses that impact on nature and biodiversity within and outside the Union.

Article 12

Specific objectives for the priority area Environmental Governance and Information

The specific objectives of the sub-programme for Environment for the priority area Environmental Governance and Information shall in particular be:

- (a) to promote awareness raising on environmental matters, including generating public and stakeholder support of Union policy-making in the field of the environment, and to promote knowledge on sustainable development and new patterns for sustainable consumption;
- (b) to support communication, management, and dissemination of information in the field of the environment, and to facilitate knowledge sharing on successful environmental solutions and practice, including by developing cooperation platforms among stakeholders and training;
- (c) to promote and contribute to more effective compliance with and enforcement of Union environmental legislation, in particular by promoting the development and dissemination of best practices and policy approaches;
- (d) to promote better environmental governance by broadening stakeholder involvement, including NGOs, in consultation on and implementation of policy.

CHAPTER 2

The sub-programme for Climate Action

Article 13

Priority areas of the sub-programme for Climate Action

The sub-programme for Climate Action shall have three priority areas:

- (a) Climate Change Mitigation;
- (b) Climate Change Adaptation;
- (c) Climate Governance and Information.

Article 14

Specific objectives for the priority area Climate Change Mitigation

With a view to contributing to the reduction of greenhouse gas emissions, the priority area Climate Change Mitigation shall in particular have the following specific objectives:

- (a) to contribute to the implementation and development of Union policy and legislation on climate change mitigation, including mainstreaming across policy areas, in particular by developing, testing and demonstrating policy or management approaches, best practices and solutions for climate change mitigation;
- (b) to improve the knowledge base for the development, assessment, monitoring, evaluation and implementation of

effective climate change mitigation actions and measures and to enhance the capacity to apply that knowledge in practice;

- (c) to facilitate the development and implementation of integrated approaches, such as for climate change mitigation strategies and action plans, at local, regional or national level;
- (d) to contribute to the development and demonstration of innovative climate change mitigation technologies, systems, methods and instruments that are suitable for being replicated, transferred or mainstreamed.

Article 15

Specific objectives for the priority area Climate Change Adaptation

With a view to contributing to supporting efforts leading to increased resilience to climate change, the priority area Climate Change Adaptation shall in particular have the following specific objectives:

- (a) to contribute to the development and implementation of Union policy on climate change adaptation, including mainstreaming across policy areas, in particular by developing, testing and demonstrating policy or management approaches, best practices and solutions for climate change adaptation, including, where appropriate, ecosystem-based approaches;
- (b) to improve the knowledge base for the development, assessment, monitoring, evaluation and implementation of effective climate change adaptation actions and measures, prioritising, where appropriate, those applying an ecosystem-based approach, and to enhance the capacity to apply that knowledge in practice;
- (c) to facilitate the development and implementation of integrated approaches, such as for climate change adaptation strategies and action plans, at local, regional or national level, prioritising, where appropriate, ecosystem-based approaches;
- (d) to contribute to the development and demonstration of innovative climate change adaptation technologies, systems, methods and instruments that are suitable for being replicated, transferred or mainstreamed.

Article 16

Specific objectives for the priority area Climate Governance and Information

The specific objectives of the priority area Climate Governance and Information shall in particular be:

- (a) to promote awareness raising on climate matters, including generating public and stakeholder support of Union policy-making in the field of the climate, and to promote knowledge on sustainable development;

- (b) to support communication, management, and dissemination of information in the field of the climate and to facilitate knowledge sharing on successful climate solutions and practice, including by developing cooperation platforms among stakeholders and training;
- (c) to promote and contribute to more effective compliance with and enforcement of Union climate legislation, in particular by promoting the development and dissemination of best practices and policy approaches;
- (d) to promote better climate governance by broadening stakeholder involvement, including NGOs, in consultation on and implementation of policy.

TITLE III

COMMON IMPLEMENTING PROVISIONS

CHAPTER 1

Funding

Article 17

Types of funding

1. Union funding may take the following legal forms:
 - (a) grants;
 - (b) public procurement contracts;
 - (c) contributions to financial instruments in accordance with provisions on financial instruments under Regulation (EU, Euratom) No 966/2012, in particular Articles 139 and 140 thereof, and with operational requirements set out in specific Union acts;
 - (d) any other interventions needed for the purpose of achieving the general objectives set out in Article 3.
2. The Commission shall implement this Regulation in accordance with Regulation (EU, Euratom) No 966/2012.
3. Funding under this Regulation which constitutes state aid within the meaning of Article 107(1) TFEU shall be implemented in a way consistent with the relevant Union state aid rules.
4. At least 81 % of the budgetary resources for the LIFE Programme shall be allocated to projects supported by way of action grants or, where appropriate, financial instruments as referred to in point (c) of paragraph 1.

The Commission may include those financial instruments as part of the multiannual work programme referred to in Article 24, subject to an ex-ante evaluation as referred to in point (f) of Article 140(2) of Regulation (EU, Euratom) No 966/2012.

5. A maximum of 30 % of the budgetary resources allocated to action grants in accordance with paragraph 4 may be allocated to integrated projects. That maximum percentage shall be re-evaluated in the framework of the mid-term evaluation of the LIFE Programme referred to in point (a) of Article 27(2) and accompanied, if appropriate, by a legislative proposal.

Article 18

Projects

Action grants may finance the following projects:

- (a) pilot projects;
- (b) demonstration projects;
- (c) best practice projects;
- (d) integrated projects;
- (e) technical assistance projects;
- (f) capacity-building projects;
- (g) preparatory projects;
- (h) information, awareness, and dissemination projects;
- (i) any other projects needed for the purpose of achieving the general objectives set out in Article 3.

Article 19

Eligibility and award criteria and project selection

1. Projects referred to in Article 18 shall satisfy the eligibility criteria based on the definitions set out in Article 2 and the following award criteria:
 - (a) being of Union interest by making a significant contribution to the achievement of one of the general objectives of the LIFE Programme set out in Article 3 as well as the specific objectives for the priority areas listed in Article 9, the thematic priorities set out in Annex III, or the specific objectives for the priority areas listed in Article 13;
 - (b) ensuring a cost-effective approach and being technically and financially coherent; and
 - (c) being sound in the proposed implementation.

2. The award of projects shall be subject to the projects meeting minimum quality requirements in conformity with the relevant provisions of Regulation (EU, Euratom) No 966/2012.

3. Projects financed by the LIFE Programme under one priority area shall avoid undermining environmental or climate objectives in another priority area and, where possible, promote synergies between different objectives as well as the use of green public procurement.

4. The Commission shall ensure geographical balance for integrated projects by indicatively allocating at least three integrated projects to each Member State, ensuring at least one integrated project under the sub-programme for Environment and at least one integrated project under the sub-programme for Climate Action during the LIFE programming period referred to in Article 1.

Integrated projects shall be distributed with a view to meeting the targets set in accordance with point (c) of Article 24(2) for each of the areas referred to in point (d) of Article 2.

In order to evaluate compliance with the provision of mobilisation of Union, national or private funds referred to in point (d) of Article 2, proposals for integrated projects shall be accompanied by:

- (a) at the first stage of the application process: a financial plan; and
- (b) at the second stage of the application process: at least one letter of intent indicating the extent to which other relevant Union, national or private funding sources are to be mobilised, and specifying such sources of funding.

5. The Commission shall, for the duration of the first multiannual work programme, ensure geographical balance for projects other than integrated projects submitted under the sub-programme for Environment, by proportionately distributing funds among all Member States according to indicative national allocations established in accordance with the criteria set out in Annex I. Where indicative national allocations are not applicable, projects shall be selected exclusively on the basis of merit.

6. If the sum of co-financing that is necessary for funding projects, other than integrated projects, that are submitted by a Member State, and that are on the list compiled by the Commission at the end of the selection procedure is less than the indicative allocation for that Member State, the Commission shall, subject to the conditions laid down in paragraphs 1 and 2 being met, use the balance of that indicative national allocation to co-finance those projects submitted by other Member States, excluding projects in OCTs, that make the greatest contribution to the achievement of the general objectives set out in Article 3.

When presenting the list of projects to be co-financed, the Commission shall report to the Committee for the LIFE Programme for the Environment and Climate Action on how it took into account the allocation criteria established in accordance with paragraphs 4 and 5.

7. The Commission shall have special regard to transnational projects where transnational cooperation is essential to guarantee environmental protection and climate objectives, and shall endeavour to ensure that at least 15 % of the budgetary resources dedicated to projects are allocated to transnational projects. The Commission shall consider the award of funding to transnational projects even in cases where the indicative national allocation balance of one or more Member States participating in those transnational projects has been exceeded.

8. During the first multiannual work programme, a Member State shall be eligible for funding for one capacity-building project up to an amount of EUR 1 000 000 provided it meets one of the following criteria:

- (a) the Member State's average absorption level of its indicative national allocation for the years 2010, 2011 and 2012, as established under Article 6 of Regulation (EC) No 614/2007, is below 70 %;
- (b) the Member State's GDP per capita in 2012 was below 90 % of the Union average; or
- (c) the Member State acceded to the Union after 1 January 2013.

During the second multiannual work programme, a Member State shall be eligible for funding for one capacity-building project up to an amount of EUR 750 000 provided it meets the following criteria:

- (a) the Member State's average absorption level of its indicative national allocation for the years 2014, 2015 and 2016, referred to in paragraph 5, is below 70 %; and
- (b) the Member State's average absorption level of its indicative national allocation for the years 2014, 2015 and 2016 has increased compared to the average absorption level for the years 2010, 2011 and 2012.

In order to be eligible for funding for capacity-building projects, a Member State shall commit to maintaining resources dedicated to the LIFE Programme, including inter alia staffing levels, at levels that are no lower than those in place in 2012, for the duration of the relevant multiannual work programme. That commitment shall be set out in the capacity-building plan referred to in paragraph 9.

By way of exception to the eligibility provisions of the first and second subparagraphs and for the entire duration of the LIFE Programme, a Member State shall be ineligible for funding for capacity-building projects if its GDP per capita in 2012 was above 105 % of the Union average. Funding for capacity-building projects shall be limited to one project per Member State per multiannual work programme.

9. The Commission shall establish a fast-track award procedure for all capacity-building projects. Applications for such capacity-building projects may be submitted as from 23 December 2013. Applications shall be based on a capacity-building plan to be agreed between the Member State and the Commission outlining the interventions to be funded by the LIFE Programme in order to develop the Member State's capacity to submit successful applications for funding for projects under the sub-programmes for Environment and Climate Action. Such interventions may include, but shall not be limited to:

- (a) recruitment of new personnel and training for LIFE national or regional contact points;
- (b) facilitating exchanges of experience and best practices and promoting the dissemination and use of results of projects under the LIFE Programme;
- (c) 'train the trainer' approaches;
- (d) exchange and secondment programmes between public authorities in Member States, in particular 'best in class' exchange activities.

The interventions covered by the capacity-building plan may include the procurement of experts to address ad-hoc gaps in technical and process capability, but may not include the procurement of experts whose primary function is the drafting of proposals for submission under the annual calls for proposals.

The capacity-building plan shall also outline estimates for the costs of such interventions.

Article 20

Co-financing rates and eligibility of costs for projects

1. The maximum co-financing rates for the projects referred to in Article 18 shall be:

- (a) for the duration of the first multiannual work programme, up to 60 % of eligible costs for all projects, other than those specified in point (c), funded under both sub-programmes for Environment and Climate Action;
- (b) for the duration of the second multiannual work programme, up to 55 % of eligible costs for all projects, other than those specified in point (c), funded under both sub-programmes for Environment and Climate Action;
- (c) for the entire duration of the LIFE Programme:
 - (i) up to 60 % of eligible costs for projects referred to in points (d), (e) and (g) of Article 18;
 - (ii) subject to point (iii), up to 60 % of eligible costs for projects funded under the priority area Nature and Biodiversity in the sub-programme for Environment;

- (iii) up to 75 % of eligible costs for projects funded under the priority area Nature and Biodiversity in the sub-programme for Environment that concern priority habitats or species for the implementation of Directive 92/43/EEC or the species of birds considered as a priority for funding by the Committee for Adaptation to Technical and Scientific Progress set up pursuant to Article 16 of Directive 2009/147/EC when necessary to achieve the conservation objective;

- (iv) up to 100 % of eligible costs for projects referred to in point (f) of Article 18.

2. Conditions for the eligibility of costs are laid down in Article 126 of Regulation (EU, Euratom) No 966/2012. Such costs shall include VAT and staff costs.

The Commission shall provide an overview, in the mid-term and ex-post evaluations of the LIFE Programme, of VAT reimbursements per Member State that project beneficiaries under the LIFE Programme have requested at the final payment stage.

3. Costs relating to the purchase of land shall be considered eligible for Union financing for projects referred to in Article 18 provided that:

- (a) the purchase will contribute to improving, maintaining and restoring the integrity of the Natura 2000 network set up under Article 3 of Directive 92/43/EEC, including through improving connectivity by the creation of corridors, stepping stones, or other elements of green infrastructure;
- (b) land purchase is the only or most cost-effective way of achieving the desired conservation outcome;
- (c) the land purchased is reserved in the long term for uses consistent with the objectives set out in Articles 11, 14 or 15; and
- (d) the Member State concerned shall, by way of transfer or otherwise, ensure the long-term assignment of such land to nature conservation purposes.

Article 21

Operating grants

1. Operating grants shall support certain operational and administrative costs of non-profit making entities which pursue an aim of general Union interest, are primarily active in the field of environment or climate action and are involved in the development, implementation and enforcement of Union policy and legislation.

2. The maximum rate of Union co-financing for operating grants referred to in paragraph 1 shall be 70 % of eligible costs.

Article 22

Other types of activities

The LIFE Programme may finance activities implemented by the Commission in support of the initiation, implementation and mainstreaming of Union environmental and climate policies and legislation for the purpose of achieving the general objectives set out in Article 3. Such activities may include:

- (a) information and communication, including awareness raising campaigns. Financial resources allocated to communication activities pursuant to this Regulation shall also cover corporate communication regarding the political priorities of the Union, as well as regarding the implementation and transposition status of all major Union environmental and climate legislation;
- (b) studies, surveys, modelling and scenario building;
- (c) preparation, implementation, monitoring, checking and evaluation of projects, policies, programmes and legislation;
- (d) workshops, conferences and meetings;
- (e) networking and best-practice platforms;
- (f) any other activities needed for the purpose of achieving the general objectives referred to in Article 3.

Article 23

Beneficiaries

The LIFE Programme may fund public and private bodies.

With a view to ensuring the visibility of the LIFE Programme, the beneficiaries shall publicise the LIFE Programme and the results of their projects, always mentioning the Union support received. The LIFE Programme logo, depicted in Annex II, shall be used for all communication activities and appear on notice boards at strategic places visible to the public. All durable goods acquired in the framework of the LIFE Programme shall bear the LIFE Programme logo except in cases specified by the Commission.

CHAPTER 2

Implementing measures

Article 24

Multiannual work programmes

1. The Commission shall, by means of implementing acts, adopt multiannual work programmes for the LIFE Programme. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 30(2).

The duration of the first multiannual work programme shall be four years and the duration of the second multiannual work programme shall be three years.

2. Each multiannual work programme shall specify, in line with the general objectives set out in Article 3, the following:

- (a) the allocation of funds between priority areas and between different types of funding within each sub-programme in conformity with Articles 9(3), 17(4) and 17(5). No further pre-allocation for project action grants between or within each priority area shall take place, with the exception of technical assistance projects and capacity-building projects;
- (b) the project topics implementing the thematic priorities set out in Annex III for projects to be financed for the period covered by the multiannual work programme;
- (c) qualitative and quantitative outcomes, indicators and targets for each priority area and type of projects for the period covered by the multiannual work programme in accordance with the performance indicators pursuant to Article 3(3) and the specific objectives set out for each priority area in Articles 10, 11, 12, 14, 15 and 16;
- (d) the technical methodology for the project selection procedure and selection and award criteria for grants in conformity with Articles 2 and 19 of this Regulation and the relevant provisions of Regulation (EU, Euratom) No 966/2012;
- (e) indicative timetables for the calls for proposals for the period covered by the multiannual work programme.

3. In the framework of the multiannual work programmes the Commission shall publish annual calls for proposals for the priority areas listed in Article 9(1) and Article 13. The Commission shall ensure that unused funds in a given call for proposals are reallocated between the different types of projects referred to in Article 18.

4. The Commission shall, by means of an implementing act, review the multiannual work programme at the latest by the mid-term evaluation of the LIFE Programme. That implementing act shall be adopted in accordance with the examination procedure referred to in Article 30(2).

Article 25

Methods of implementation

The Commission shall implement the activities in pursuit of the general objectives set out in Article 3 of this Regulation in accordance with the methods of implementation of the budget set out in Article 58 of Regulation (EU, Euratom) No 966/2012, in particular direct or indirect management by the Commission on a centralised basis, or joint management with international organisations.

Article 26

Administrative and technical assistance

The financial allocation of the LIFE Programme may also cover necessary expenditure relating to preparatory, monitoring, control, audit, communication and evaluation activities required directly for the management of the LIFE Programme and the achievement of its general objectives set out in Article 3.

The Commission shall, on a regular basis and in collaboration with the LIFE national contact points, organise seminars and workshops, publish lists of projects funded under the LIFE Programme or undertake other activities to facilitate exchanges of experience, knowledge and best practices on all projects and the replication and transfer of project results across the Union. To that end, the Commission shall undertake activities targeting the dissemination of project results amongst LIFE beneficiaries and others with a specific focus, where relevant, on Member States with a low uptake of LIFE funds and shall facilitate the communication and cooperation between completed or ongoing projects with new project beneficiaries, applicants or stakeholders in the same field.

The Commission shall also organise specific seminars, workshops or, where appropriate, other types of activities at least every two years to facilitate exchanges of experience, knowledge and best practices as regards the design, preparation and implementation of integrated projects as well as on the effectiveness of the assistance provided through technical assistance projects. Those activities shall involve national or regional administrations managing other Union funds and other relevant stakeholders.

Article 27

Monitoring and evaluation

1. The Commission shall regularly monitor and report on the implementation of the LIFE Programme (and its sub-programmes), including the amount of climate-related expenditure and biodiversity-related expenditure. It shall also assess synergies between the LIFE Programme and other complementary Union programmes, and in particular between its sub-programmes.

The Commission shall calculate indicative national allocations, in accordance with the criteria set out in Annex I, for the duration of the second multiannual work programme exclusively for the purposes of benchmarking Member States' performance.

2. The Commission shall submit to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions the following reports:

(a) no later than 30 June 2017, an external and independent mid-term evaluation report of the LIFE Programme (and its sub-programmes), including qualitative and quantitative aspects of its implementation, the amount of climate-related expenditure and biodiversity-related expenditure, the extent to which synergies between the objectives have been reached, and its complementarity with other relevant Union programmes, the achievement of the objectives of all the measures (at the level of results and impacts, when possible), the efficiency of the use of resources and the Union added value of the Programme, with a view to taking a decision on the renewal, modification or suspension of the measures. That mid-term evaluation report shall also include a quantitative and qualitative analysis of the contribution of the LIFE Programme to the conservation status of habitats and species listed under Directives 92/43/EEC and 2009/147/EC. The evaluation shall additionally address the scope for simplification, its internal and external coherence, the continued relevance of all objectives, as well as the contribution of the measures under the LIFE Programme to the Europe 2020 Strategy objectives and targets and to sustainable development. It shall take into account evaluation results on the long-term impact of LIFE+. The mid-term evaluation report shall be accompanied by remarks by the Commission including the manner in which the findings of the mid-term evaluation shall be taken into account when implementing the LIFE Programme, and, in particular, the extent to which the thematic priorities set out in Annex III need to be modified.

The mid-term evaluation report shall contain or be accompanied by a thorough assessment of the extent and quality of the demand for, planning and implementation of integrated projects. A special focus shall be given to the realised or expected success of integrated projects in leveraging other Union funds, taking into account, in particular, the benefits of increased coherence with other Union funding instruments, the extent to which stakeholders have been involved and the extent to which previous projects under LIFE+ have been or are expected to be covered by integrated projects.

(b) no later than 31 December 2023, an external and independent ex-post evaluation report covering the implementation and results of the LIFE Programme (and its sub-programmes), including the amount of climate-related expenditure and biodiversity-related expenditure, the extent to which the LIFE Programme as a whole, and each of its sub-programmes, has achieved its objectives, the extent to

which synergies between the various objectives have been realised, and the contribution of the LIFE Programme to achieving the Europe 2020 Strategy objectives and targets. The ex-post evaluation report shall also examine the extent to which integration of environment and climate objectives into other Union policies has been achieved and, to the extent possible, the economic benefit achieved through the LIFE Programme as well as the impact and added value for the communities involved.

3. The Commission shall make the results of the evaluations undertaken pursuant to this Article publicly available.

Article 28

Protection of the financial interests of the Union

1. The Commission shall take appropriate measures to ensure that, where activities financed under this Regulation are implemented, the financial interests of the Union are protected by the application of preventive measures against fraud, corruption and any other illegal activities, by effective checks and, if irregularities are detected, by the recovery of the amounts unduly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties.

2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on-the-spot checks, over all beneficiaries, contractors and subcontractors who have received Union funds under the LIFE Programme.

The European Anti-fraud Office (OLAF) may carry out on-the-spot checks and inspections on economic operators concerned directly or indirectly by such funding in accordance with the procedures laid down in Council Regulation (Euratom, EC) No 2185/96 ⁽¹⁾ with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract concerning Union funding.

Without prejudice to the first and second subparagraphs, cooperation agreements with third countries and international organisations and grant agreements, grant decisions and contracts resulting from the implementation of this Regulation shall expressly empower the Commission, the Court of Auditors and OLAF to conduct such audits, on-the-spot checks and inspections.

3. Beneficiaries of Union funds shall keep available to the Commission, for a period of five years following the last payment in respect of any project, all supporting documents regarding the expenditure on that project.

⁽¹⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

TITLE IV

FINAL PROVISIONS

Article 29

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Articles 3(3), 9(2) and 9(4) shall be conferred on the Commission for a period of seven years from 23 December 2013.

3. The delegation of power referred to in Articles 3(3), 9(2) and 9(4) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Articles 3(3), 9(2) and 9(4) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 30

Committee procedure

1. The Commission shall be assisted by the Committee for the LIFE Programme for the Environment and Climate Action. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Where the Committee delivers no opinion, the Commission shall not adopt the draft implementing act and the third subparagraph of Article 5(4) of Regulation (EU) No 182/2011 shall apply.

Article 31

Repeal

Regulation (EC) No 614/2007 is repealed with effect from 1 January 2014.

References to the repealed Regulation shall be construed as references to this Regulation.

*Article 32***Transitional measures**

1. Notwithstanding the first paragraph of Article 31, measures started before 1 January 2014 pursuant to Regulation (EC) No 614/2007 shall, until their completion, continue to be governed by that Regulation and shall comply with the technical provisions defined therein. The Committee referred to in Article 30(1) of this Regulation shall replace the Committee referred to in Article 13(1) of Regulation (EC) No 614/2007 from 23 December 2013.

2. The financial allocation for the LIFE Programme may also cover technical and administrative assistance expenses, including any obligatory monitoring, communication and evaluation required pursuant to Regulation (EC) No 614/2007 following its expiry, to ensure the transition between the measures adopted pursuant to Regulation (EC) No 614/2007 and the LIFE Programme.

3. The amounts needed within the financial envelope to provide for monitoring, communication and auditing measures in the period following 31 December 2020 shall be deemed to be confirmed only if they are consistent with the financial framework applicable from 1 January 2021.

4. The appropriations corresponding to assigned revenue arising from the repayment of amounts wrongly paid pursuant to Regulation (EC) No 614/2007 shall be used, in accordance with Article 21 of Regulation (EU, Euratom) No 966/2012, to finance the LIFE Programme.

*Article 33***Entry into force**

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

ANNEX I

Criteria for establishing indicative national allocations for projects, other than integrated projects, submitted under the sub-programme for Environment

In line with the principles of solidarity and responsibility sharing, the Commission shall allocate funds among all Member States for the LIFE programming period referred to in Article 1 for projects, other than integrated projects, based on the following criteria:

(a) Population

- (i) total population of each Member State (50 % weighting); and
- (ii) population density of each Member State, up to a limit of twice the Union's average population density (5 % weighting)

(b) Nature and Biodiversity

- (i) total area of Natura 2000 sites for each Member State expressed as a proportion of the total area of Natura 2000 (25 % weighting); and
 - (ii) proportion of a Member State's territory covered by Natura 2000 sites (20 % weighting).
-

ANNEX II

The LIFE Programme logo

ANNEX III

Thematic priorities for the sub-programme for Environment referred in Article 9

A. Priority area Environment and Resource Efficiency:

- (a) Thematic priorities for Water, including the marine environment: activities for the implementation of the specific objectives for water set out in the Roadmap for a Resource-Efficient Europe and the 7th Environment Action Programme, in particular:
- (i) integrated approaches for the implementation of Directive 2000/60/EC;
 - (ii) activities for the implementation of Directive 2007/60/EC of the European Parliament and of the Council ⁽¹⁾;
 - (iii) activities for the implementation of the programme of measures of Directive 2008/56/EC with a view to achieving good environmental status of marine waters;
 - (iv) activities to ensure safe and efficient use of water resources, improving quantitative water management, preserving a high level of water quality and avoiding misuse and deterioration of water resources.
- (b) Thematic priorities for Waste: activities for the implementation of the specific objectives for waste set out in the Roadmap for a Resource-Efficient Europe and the 7th Environment Action Programme, in particular:
- (i) integrated approaches for the implementation of waste plans and programmes;
 - (ii) activities for the implementation and development of Union waste legislation, with particular emphasis on the first steps of the Union waste hierarchy (prevention, re-use and recycling);
 - (iii) activities for resource efficiency and lifecycle impact of products, consumption patterns and dematerialisation of the economy.
- (c) Thematic priorities for Resource Efficiency, including soil and forests, and green and circular economy: activities for the implementation of the Roadmap for a Resource-Efficient Europe and of the 7th Environment Action Programme that are not covered by other thematic priorities referred to in this Annex, in particular:
- (i) activities for industrial symbiosis and knowledge transfer, and development of new models for the shift towards a circular and green economy;
 - (ii) activities for the Soil Thematic Strategy (Commission Communication of 22 September 2006 entitled "Thematic Strategy for Soil Protection") with special emphasis on mitigation and compensation of soil sealing, and improved land use;
 - (iii) activities for forest monitoring and information systems, and to prevent forest fires.
- (d) Thematic priorities for Environment and Health, including chemicals and noise: support activities for the implementation of the specific objectives for environment and health set out in the 7th Environment Action Programme, in particular:
- (i) support activities for the implementation of Regulation (EC) No 1907/2006 of the European Parliament and of the Council ⁽²⁾ (REACH) and Regulation (EU) No 528/2012 of the European Parliament and of the Council ⁽³⁾ (Biocidal Products Regulation) to ensure a safer, more sustainable or economical use of chemicals (including nanomaterials);

⁽¹⁾ Directive 2007/60/EC of the European Parliament and of the Council of 23 October 2007 on the assessment and management of flood risks (OJ L 288, 6.11.2007, p. 27).

⁽²⁾ Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC (OJ L 396, 30.12.2006, p. 27).

⁽³⁾ Regulation (EU) No 528/2012 of the European Parliament and of the Council of 22 May 2012 concerning the making available on the market and use of biocidal products (OJ L 167, 27.6.2012, p. 1).

- (ii) support activities to facilitate the implementation of Directive 2002/49/EC of the European Parliament and of the Council ⁽¹⁾ (Noise Directive) in order to achieve noise levels that do not give rise to significant negative impacts on and risks to human health;
 - (iii) support activities for avoiding major accidents in particular facilitating the implementation of Directive 2012/18/EU of the European Parliament and of the Council ⁽²⁾ (Seveso III Directive).
- (e) Thematic priorities for Air quality and emissions, including urban environment: support activities for the implementation of the specific objectives for air and emissions in the Roadmap for a Resource-Efficient Europe and the 7th Environment Action Programme, in particular:
- (i) integrated approaches to the implementation of Air quality legislation;
 - (ii) support activities to facilitate compliance with Union air quality and related air emissions standards including Directive 2001/81/EC of the European Parliament and the Council ⁽³⁾ (National Emissions Ceilings Directive);
 - (iii) support activities for the enhanced implementation of Directive 2010/75/EU of the European Parliament and of the Council ⁽⁴⁾ (Industrial Emissions Directive) with a special emphasis on improving the process of defining and implementing best available techniques, ensuring easy public access to information and enhancing the contribution of the Industrial Emissions Directive to innovation.
- B. Priority area Nature and Biodiversity:
- (a) Thematic priorities for Nature: activities for the implementation of Directives 92/43/EEC and 2009/147/EC, in particular:
- (i) activities aimed at improving the conservation status of habitats and species, including marine habitats and species, and bird species, of Union interest;
 - (ii) activities in support of the Natura 2000 network bio-geographical seminars;
 - (iii) integrated approaches for the implementation of prioritised action frameworks.
- (b) Thematic priorities for Biodiversity: activities for the implementation of the Union Biodiversity Strategy to 2020, in particular:
- (i) activities aimed at contributing to the achievement of Target 2;
 - (ii) activities aimed at contributing to the achievement of Targets 3, 4 and 5.
- C. Priority area Environmental Governance and Information
- (a) information, communication and awareness raising campaigns in line with the priorities of the 7th Environment Action Programme;
- (b) activities in support of effective control process as well as measures to promote compliance in relation to Union environmental legislation, and in support of information systems and information tools on the implementation of Union environmental legislation.

⁽¹⁾ Directive 2002/49/EC of the European Parliament and of the Council of 25 June 2002 relating to the assessment and management of environmental noise (OJ L 189, 18.7.2002, p. 12).

⁽²⁾ Directive 2012/18/EU of the European Parliament and of the Council of 4 July 2012 on the control of major-accident hazards involving dangerous substances, amending and subsequently repealing Council Directive 96/82/EC (OJ L 197, 24.7.2012, p. 1).

⁽³⁾ Directive 2001/81/EC of the European Parliament and the Council of 23 October 2001 on national emission ceilings for certain atmospheric pollutants (OJ L 309, 27.11.2001, p. 22).

⁽⁴⁾ Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control) (OJ L 334, 17.12.2010, p. 17).

Commission statements

Maximum amount that a single IP may receive

The Commission attaches high importance to ensuring a proportionate distribution of funds among integrated projects in order to fund as many integrated projects as possible and guarantee a balanced distribution of integrated projects among all Member States. In this context, the Commission will propose when discussing the draft work programme with the members of the LIFE committee the maximum amount that a single integrated project may receive. This proposal will be submitted as part of the methodology for project selection to be adopted as part of the multiannual work programme.

Status of funding Biodiversity in OCTs

The Commission attaches high importance to the protection of environment and biodiversity in Overseas Countries and Territories, as is illustrated by the Overseas Association Decision proposal which includes these sectors in the areas of cooperation between the European Union and OCTs and outlines the different actions which could be eligible for funding by the European Union in this regard.

The BEST preparatory action has been a successful initiative that has been embraced by OCTs and has delivered tangible results for biodiversity and ecosystem services. As BEST is drawing to a close, the Commission is favourably considering following up on it under one of the new instruments, namely Global Public Goods and Challenges programme under the Development Cooperation Instrument.

This specific possibility for funding biodiversity in OCTs will be complemented by the opportunities offered under Article 6 of the LIFE programme for the period 2014-2020.

**REGULATION (EU) No 1294/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

**establishing an action programme for customs in the European Union for the period 2014-2020
(Customs 2020) and repealing Decision No 624/2007/EC**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 33 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Acting in accordance with the ordinary legislative procedure ⁽¹⁾,

Whereas:

(1) The multi-annual action programme for customs which applied before 2014 has significantly contributed to facilitating and enhancing cooperation between customs authorities within the Union. Many of the activities in the customs area are of a cross-border nature, involving and affecting all Member States, and therefore they cannot be effectively and efficiently delivered by individual Member States. A customs programme at Union level, implemented by the Commission, offers Member States a Union framework to develop those cooperation activities, which is more cost-efficient than if each Member State were to set up individual cooperation frameworks on a bilateral or multilateral basis. It is therefore appropriate to ensure the continuation of the previous multi-annual action programme for customs by establishing a new programme in the same area, the Customs 2020 programme ('the Programme').

(2) The activities under the Programme, namely the European Information Systems, the joint actions for customs officials and the common training initiatives, will contribute to the realisation of the Europe 2020 Strategy for smart, sustainable and inclusive growth by strengthening the functioning of the internal market. In providing a framework for activities which strive for more efficient and modernised customs authorities, strengthen the competitiveness of businesses, promote

employment and rationalise and coordinate the Member States' actions to protect their financial and economic interests and those of the Union, the Programme will actively strengthen the functioning of the customs union, so that businesses and citizens can benefit from the full potential of the internal market and of global trade.

(3) In order to support the process of accession and association by third countries, the Programme should be open to the participation of acceding and candidate countries as well as potential candidates and partner countries of the European Neighbourhood Policy if certain conditions are fulfilled. Considering the increasing interconnectivity of the world economy, the Programme should continue to provide the possibility of involving external experts, such as officials of third countries, representatives of international organisations or economic operators in certain activities. The participation of external experts is considered to be essential whenever the objectives of a programme cannot be achieved without the contribution of those experts. The setting up of the European External Action Service under the authority of the High Representative of the Union for Foreign Affairs and Security Policy facilitates policy coordination and coherence in an area which is a relevant component of the Union's external strategies and actions, both on a bilateral and multilateral basis.

(4) The objectives of the Programme should take into account the problems and challenges identified for customs in the next decade. The Programme should continue to play a role in vital areas such as the coherent implementation of Union law in the field of customs and related matters. Moreover, the Programme should focus on protecting the financial and economic interests of the Union and safeguarding safety and security. This should encompass, inter alia, cooperation and information pooling between national and Union market monitoring authorities and the customs authorities. The Programme should also be dedicated to trade facilitation, inter alia, through collaborative efforts to fight fraud and increasing the administrative capacity of customs authorities. In that perspective, a cost-benefit analysis of detection equipment and related technology should be carried out in order to facilitate the acquisition of modern customs control tools by customs authorities after 2020. Methods facilitating the acquisition of modern customs control tools, including joint public procurement, should also be explored.

(5) The programme tools which applied before 2014 have proven to be adequate and should therefore be retained. In view of the need for more structured operational cooperation, additional tools should be added, namely expert teams composed of Union and national experts

⁽¹⁾ Position of the European Parliament of 21 November 2013 (not yet published in the Official Journal)

to perform tasks jointly in specific domains and public administration capacity-building actions which should provide specialised assistance to those participating countries in need of administrative capacity building.

- (6) The European Information Systems play a vital role in reinforcing the customs systems within the Union and should therefore continue to be financed under the Programme. In addition, it should be made possible to include in the Programme new customs-related information systems established under Union law. The European Information Systems should, where appropriate, be based upon shared development models and IT architecture, in order to increase the flexibility and efficiency of customs administration.
- (7) Human competency building should also be carried out in the form of common training and should be realised through the Programme. Customs officials need to build up and update their knowledge and the skills required to serve the needs of the Union. The Programme should be essential to strengthen human capacities through enhanced training support that targets customs officials as well as economic operators. To that end, the current common training approach of the Union, which was mainly based on central eLearning development, should develop into a multifaceted training support programme for the Union.
- (8) The Programme should give due importance, and allocate an adequate share of its budget, to the functioning of the existing European Information Systems for customs and to the development of new European Information Systems necessary for the implementation of the Union Customs Code. At the same time, the appropriate means should be dedicated to activities bringing together officials working with customs and to human competency building. Moreover, the Programme should provide for a certain degree of budgetary flexibility in order to respond to changes in policy priorities.
- (9) The Programme should cover a period of seven years to align its duration with that of the multiannual financial framework laid down in Council Regulation (EU, Euratom) No 1311/2013 ⁽¹⁾.
- (10) This Regulation lays down a financial envelope for the entire duration of the Programme which is to constitute the prime reference amount, within the meaning of point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council

and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management ⁽²⁾, for the European Parliament and the Council during the annual budgetary procedure.

- (11) In line with the Commission's commitment, set out in its Communication of 19 October 2010 entitled 'The EU Budget Review', to coherence and simplification of funding programmes, resources should be shared with other Union funding instruments if the envisaged activities under the Programme pursue objectives which are common to various funding instruments, excluding however double financing. Actions under the Programme should ensure coherence in the use of the Union's resources supporting the functioning of the customs union.
- (12) The measures necessary for the financial implementation of this Regulation should be adopted in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council ⁽³⁾ and with Commission Delegated Regulation (EU) No 1268/2012 ⁽⁴⁾.
- (13) The financial interests of the Union should be protected through appropriate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, unduly paid or incorrectly used, and, where appropriate, penalties.
- (14) Cooperation on intelligent risk assessment is vital in order to allow compliant and trustworthy businesses to gain maximum benefit from the simplification of the e-administration of customs, and allowing irregularities to be targeted.
- (15) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission in respect of the establishment of the annual work programmes. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽⁵⁾.

⁽²⁾ OJ C 373, 20.12.2013, p. 1.

⁽³⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

⁽⁴⁾ Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

⁽⁵⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

⁽¹⁾ Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the year 2014-2020 (See page 884 of this Official Journal).

(16) In order to respond appropriately to changes in policy priorities, the power to adopt acts in accordance with Article 290 of the Treaty on the Functioning of the European Union should be delegated to the Commission in respect of amending the list of indicators to measure the achievement of the specific objectives and modifying the indicative amounts allocated to each type of action. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.

(17) Since the objective of this Regulation, namely establishing a multiannual programme to improve the functioning of the customs union, cannot be sufficiently achieved by the Member States as they cannot efficiently perform the cooperation and coordination necessary to carry out the Programme, but can rather, by reason of its scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.

(18) The Commission should be assisted by the Customs 2020 Committee for the implementation of the Programme.

(19) To facilitate the evaluation of the Programme, a proper framework for monitoring the results achieved by the Programme should be put in place from the very beginning. A mid-term evaluation looking at the achievement of the objectives of the Programme, its efficiency and its added value at the European level, should be carried out. A final evaluation should, in addition, deal with the long-term impact and the sustainability effects of the Programme. Full transparency with regular reporting on monitoring and evaluation to the European Parliament and to the Council should be ensured. Those evaluations should be based on indicators, measuring the effects of the Programme against pre-defined baselines. The indicators should, inter alia, measure the time during which the Common Communication Network is available without system failures, as this is the condition for the proper functioning of all the European Information Systems, for customs authorities to cooperate efficiently within the customs union.

(20) Directive 95/46/EC of the European Parliament and of the Council⁽¹⁾ governs the processing of personal data carried out in the Member States in the context of this Regulation and under the supervision of the Member

States competent authorities, in particular the public independent authorities designated by the Member States. Regulation (EU) No 45/2001 of the European Parliament and of the Council⁽²⁾ governs the processing of personal data carried out by the Commission within the framework of this Regulation and under the supervision of the European Data Protection Supervisor. Any exchange or transmission of information by competent authorities should be in accordance with the rules on the transfer of personal data as laid down in Directive 95/46/EC and any exchange or transmission of information by the Commission should be in accordance with the rules on the transfer of personal data as laid down in Regulation (EC) No 45/2001.

(21) This Regulation replaces Decision No 624/2007/EC of the European Parliament and of the Council⁽³⁾. That Decision should therefore be repealed,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

GENERAL PROVISIONS

Article 1

Subject matter

1. A multiannual action programme "Customs 2020" ("the Programme") is hereby established to support the functioning of the customs union.

2. The Programme shall cover the period from 1 January 2014 to 31 December 2020.

Article 2

Definitions

For the purpose of this Regulation, the following definitions shall apply:

(1) "customs authorities" means the authorities responsible for applying rules on customs;

(2) "external experts" means:

(a) representatives of governmental authorities, including those from countries not participating in the Programme, pursuant to Article 3(2);

⁽¹⁾ Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data (OJ L 281, 23.11.1995, p. 31).

⁽²⁾ Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data (OJ L 8, 12.1.2001, p. 1).

⁽³⁾ Decision N^o 624/2007/EC of the European Parliament and the Council of 23 May 2007 establishing an action programme for customs in the Community (Customs 2013) (OJ L 154, 14.6.2007, p. 25).

- (b) economic operators and organisations representing economic operators;
- (c) representatives of international and other relevant organisations.

Article 3

Participation in the Programme

1. Participating countries shall be the Member States and the countries referred to in paragraph 2, provided that the conditions set out in that paragraph are met.
2. The Programme shall be open to participation by any of the following countries:
 - (a) acceding countries, candidate countries and potential candidates benefiting from a pre-accession strategy, in accordance with the general principles and general terms and conditions for the participation of those countries in Union programmes established in the respective framework agreements, Association Council decisions or similar agreements;
 - (b) partner countries of the European Neighbourhood Policy provided that those countries have reached a sufficient level of approximation of the relevant legislation and administrative methods to those of the Union.

The partner countries referred to in point (b) of the first subparagraph shall participate in the Programme in accordance with provisions to be determined with those countries following the establishment of framework agreements concerning their participation in Union programmes.

Article 4

Contribution to the activities under the Programme

External experts may be invited to contribute to selected activities organised under the Programme wherever this is essential for the achievement of the objectives referred to in Articles 5 and 6. The external experts shall be selected by the Commission together with the participating countries, on the basis of their skills, experience and knowledge relevant to the specific activities.

Article 5

General objective and specific objectives

1. The general objective of the Programme shall be to support the functioning and modernisation of the customs union in order to strengthen the internal market by means of cooperation between participating countries, their customs authorities and their officials. The general objective shall be pursued through the achievement of specific objectives.

2. The specific objectives shall be to support customs authorities in protecting the financial and economic interests of the Union and of the Member States, including the fight against fraud and the protection of intellectual property rights, to increase safety and security, to protect citizens and the environment, to improve the administrative capacity of the customs authorities and to strengthen the competitiveness of European businesses.

The specific objectives shall be achieved, in particular by:

- (a) computerisation;
- (b) ensuring modern and harmonised approaches to customs procedures and controls;
- (c) facilitating legitimate trade;
- (d) reducing compliance costs and administrative burden; and
- (e) enhancing the functioning of the customs authorities.

3. The achievement of the specific objectives shall be measured on the basis of the indicators listed in Annex I. Where necessary, those indicators may be revised during the course of the Programme.

The Commission shall be empowered to adopt delegated acts in accordance with Article 15 amending the list of indicators laid down in Annex I.

Article 6

Operational objectives

The operational objectives of the Programme shall be the following:

- (a) to support the preparation, coherent application and effective implementation of Union law and policy in the field of customs;
- (b) to develop, improve, operate and support the European Information Systems for customs;
- (c) to identify, develop, share and apply best working practices and administrative procedures, in particular further to benchmarking activities;
- (d) to reinforce the skills and competences of customs officials;
- (e) to improve cooperation between customs authorities and international organisations, third countries, other governmental authorities, including Union and national market surveillance authorities, as well as economic operators and organisations representing economic operators.

CHAPTER II

ELIGIBLE ACTIONS

Article 7

Eligible actions

The Programme shall provide, under the conditions set out in the annual work programme referred to in Article 14, financial support for the following types of action:

(a) joint actions:

- (i) seminars and workshops;
- (ii) project groups, generally composed of a limited number of countries, operational during a limited period of time to pursue a predefined objective with a precisely defined outcome, including coordination or benchmarking;
- (iii) working visits organised by the participating countries or another country to enable officials to acquire or increase their expertise or knowledge in customs matters; for working visits organised within third countries only travel and subsistence (accommodation and daily allowance) costs are eligible under the Programme;
- (iv) monitoring activities carried out by joint teams made up of Commission officials and officials of the participating countries to analyse customs practices, identify any difficulties in implementing rules and, where appropriate, make suggestions for the adaptation of Union rules and working methods;
- (v) expert teams, namely structured forms of cooperation, with a non-permanent or permanent character, pooling expertise to perform tasks in specific domains or carry out operational activities, possibly with the support of online collaboration services, administrative assistance and infrastructure and equipment facilities;
- (vi) customs administration capacity building and supporting actions;
- (vii) studies;
- (viii) jointly developed communication actions;
- (ix) any other activity in support of the general, specific and operational objectives set out in Articles 5 and 6;

(b) IT capacity building: development, maintenance, operation and quality control of Union components of the European Information Systems set out in Section A of Annex II and new European Information Systems established under Union law;

(c) human competency building: common training actions to support the necessary professional skills and knowledge relating to customs.

Article 8

Specific implementation provisions for joint actions

1. Participation in joint actions referred to in point (a) of Article 7 shall be on a voluntary basis.
2. Participating countries shall ensure that officials with an adequate profile and qualifications are nominated to participate in the joint actions.
3. Participating countries shall, when appropriate, take the measures necessary for the implementation of the joint actions, in particular by raising awareness on those actions and by ensuring that an optimal use is made of the outputs generated.

Article 9

Specific implementation provisions for IT capacity building

1. The Commission and the participating countries shall ensure that the European Information Systems referred to in Section A of Annex II are developed, operated and appropriately maintained.
2. The Commission shall coordinate, in cooperation with the participating countries, those aspects of the establishment and functioning of the Union components, listed in Section B of Annex II, and non-Union components, described in Section C of Annex II, of the European Information Systems referred to in Section A of Annex II which are necessary to ensure their operability, interconnectivity and continuous improvement.
3. The Union shall bear the cost of acquisition, development, installation, maintenance and day-to-day operation of the Union components. The cost of acquisition, development, installation, maintenance and day-to-day operation of the non-Union components shall be borne by the participating countries.

Article 10

Specific implementation provisions for human competency building

1. Participation in the common training actions referred to in point (c) of Article 7 shall be on a voluntary basis.

2. Participating countries shall, where appropriate, integrate jointly developed training content, including e-learning modules, training programmes and commonly agreed training standards into their national training programmes.

3. Participating countries shall ensure that their officials receive the initial and continuing training necessary to acquire common professional skills and knowledge in accordance with the training programmes.

4. Participating countries shall provide the linguistic training necessary for officials to ascertain a sufficient level of linguistic competence for participation in the Programme.

3. The co-financing rate for grants shall be up to 100 % of the eligible costs in the case of daily allowances, travel and accommodation costs and costs linked to the organisation of events.

The applicable co-financing rate where actions require the awarding of grants shall be set out in the annual work programmes.

4. The financial allocation for the Programme may also cover:

(a) expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are required for the management of the Programme and the achievement of its objectives, in particular, studies, meetings of experts, information and communication actions, including corporate communication of the political priorities of the Union insofar as they are related to the objectives of this Programme;

(b) expenses linked to IT networks focusing on information processing and exchange; and

(c) all other technical and administrative assistance expenses incurred by the Commission for the management of the Programme.

CHAPTER III

FINANCIAL FRAMEWORK

Article 11

Financial framework

1. The financial envelope for the implementation of the Programme for the period 2014-2020 is set at EUR 522 943 000 in current prices.

The annual appropriations shall be authorised by the European Parliament and the Council within the limits of the multiannual financial framework.

2. Within the financial envelope for the Programme, indicative amounts shall be allocated to eligible actions listed in Article 7, within the percentages set out in Annex III for each type of action. The Commission may depart from the indicative allocation of funds set out in that Annex, but may not increase the allocated share of the financial envelope by more than 10 % for each type of action.

Should it prove necessary to exceed that limit, the Commission shall be empowered to adopt delegated acts in accordance with Article 15 modifying the indicative allocation of funds set out in that Annex III.

Article 12

Types of intervention

1. The Commission shall implement the Programme in accordance with Regulation (EU, Euratom) No 966/2012.

2. Union financial support for eligible actions provided for in Article 7 shall take the form of:

(a) grants;

(b) public procurement contracts;

(c) reimbursement of costs incurred by the external experts referred to in Article 4.

Article 13

Protection of the financial interests of the Union

1. The Commission shall take appropriate measures ensuring that, where actions financed under this Regulation are implemented, the financial interests of the Union are protected by the application of preventive measures against fraud, corruption and any other illegal activities by effective checks and, if irregularities are detected, by the recovery of the amounts unduly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties.

2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on the spot, over all grant beneficiaries, contractors and subcontractors who have received Union funds under this Regulation.

3. The European Anti-fraud Office (OLAF) may carry out investigations, including on-the-spot checks and inspections, in accordance with the provisions and procedures laid down in Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council⁽¹⁾ and Council Regulation

⁽¹⁾ Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1).

(Euratom, EC) No 2185/96 ⁽¹⁾ with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract funded under this Regulation.

CHAPTER IV

IMPLEMENTING POWERS

Article 14

Work programme

1. In order to implement the Programme, the Commission shall adopt annual work programmes by means of implementing acts. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 16(2).

Each annual work programme shall implement the objectives of the Programme by determining the following:

- (a) the actions in accordance with the general, specific and operational objectives as set out in Articles 5 and 6, the method of implementation including, where appropriate, the modalities for the establishment of expert teams referred to in point (v) of point (a) of Article 7 and the expected results;
- (b) a breakdown of the budget per type of action;
- (c) the co-financing rate for grants referred to in Article 12(3).

2. In preparing the annual work programme, the Commission shall take into account the common approach regarding the customs policy. That approach shall be regularly reviewed and established in a partnership between the Commission and the Member States in the Customs Policy Group, composed of the heads of customs administrations from the Member States or their representatives and the representatives of the Commission.

The Commission shall keep the Customs Policy Group regularly informed of measures relating to the implementation of the Programme.

Article 15

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

⁽¹⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

2. The power to adopt delegated acts referred to in the second subparagraph of Article 5(3) and in the second subparagraph of Article 11(2) shall be conferred on the Commission for a period commencing on 1 January 2014 and ending on 31 December 2020.

3. The delegation of power referred to in the second subparagraph of Article 5(3) and in the second subparagraph of Article 11(2) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect on the day following publication in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to the second subparagraph of Article 5(3) and the second subparagraph of Article 11(2) shall enter into force only if no objection has been expressed either by the European Parliament or by the Council within a period of two months of the notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 16

Committee procedure

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

CHAPTER V

MONITORING AND EVALUATION

Article 17

Monitoring of actions under the Programme

1. The Commission shall, in cooperation with the participating countries, monitor the implementation of the Programme and actions under it on the basis of the indicators referred to in Annex I.

2. The Commission shall make public the outcome of the monitoring.

3. The outcome of the monitoring shall be used for the evaluation of the Programme in accordance with Article 18.

*Article 18***Evaluation**

1. The Commission shall submit to the European Parliament and to the Council a mid-term and a final evaluation report of the Programme regarding the matters referred to in paragraphs 2 and 3. The results of those evaluations, including the identification of major shortcomings, shall be integrated into decisions on the possible renewal, modification or suspension of the Programme for subsequent periods. Those evaluations shall be carried out by an independent external evaluator.

2. The Commission shall, by 30 June 2018, draw up a mid-term evaluation report on the achievement of the objectives of the actions under the Programme, the efficiency of the use of resources and the added value of the Programme at the European level. That report shall, additionally, address the simplification and the continued relevance of the objectives, as well as the contribution of the Programme to the Union priorities of smart, sustainable and inclusive growth.

3. The Commission shall, by 31 December 2021, draw up a final evaluation report on the matters referred to in paragraph 2, and on the long-term impact and the sustainability of the effects of the Programme.

4. Upon request from the Commission, the participating countries shall provide it with all data and information relevant for the purpose of contributing to its mid-term and final evaluation reports.

CHAPTER VI

FINAL PROVISIONS*Article 19***Repeal**

Decision No 624/2007/EC is repealed with effect from 1 January 2014.

However, financial obligations related to actions pursued under that Decision shall continue to be governed by it until their completion.

*Article 20***Entry into force**

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

ANNEX I

Indicators

The achievement of the specific objectives referred to in Article 5(2) shall be measured on the basis of the following indicators:

- (a) the feedback from participants in actions under the Programme and users of the Programme index which will measure the perception of Programme stakeholders regarding the impact of the actions under the Programme inter alia in terms of:
 - (i) networking impact of the actions under the Programme;
 - (ii) cooperation impact of actions under the Programme;
 - (b) the number of guidelines and recommendations issued following activities under the Programme relating to modern and harmonised approaches to customs procedures;
 - (c) the Common Communication Network for the European Information Systems Indicator, which will measure the availability of the common network which is indispensable for the running of the customs-related European Information Systems. The network should be available 98 % of the time;
 - (d) the Union Law and Policy Application and Implementation Index, which will measure the progress in the preparation, application and implementation of Union law and policy in the field of customs inter alia on the basis of:
 - (i) the number of actions under the Programme organised in this area, in particular relating to the protection of intellectual property rights, the issues of safety and security, the fight against fraud and the security in the supply chain;
 - (ii) the number of recommendations issued following those actions;
 - (e) the European Information System Availability Indicator, which will measure the availability of the Union components of IT customs applications. These should be available 97 % of the time during business hours and 95 % of the time otherwise;
 - (f) the Best Practices and Guideline Index, which will measure the evolution in the identification, development, sharing and application of best working practices and administrative procedures inter alia on the basis of:
 - (i) the number of actions under the Programme organised in this area;
 - (ii) the number of guidelines and best practices shared;
 - (g) the Learning Index, which will measure the progress resulting from actions under the Programme aiming to reinforce skills and competences of customs officials, inter alia on the basis of:
 - (i) the number of officials trained by using common training material of the Union;
 - (ii) the number of times Programme eLearning modules were downloaded;
 - (h) the Cooperation with third parties Indicator, which will establish how the Programme supports authorities other than Member States' customs authorities by measuring the number of actions under the Programme supporting that objective.
-

ANNEX II

European Information Systems and their Union and non-Union components

A. The European Information Systems are the following:

- (1) the common communications network/common systems interface (CCN/CSI – CCN2), CCN mail3, the CSI bridge, the http bridge, CCN LDAP and related tools, CCN web portal, CCN monitoring;
- (2) supporting systems, in particular the application configuration tool for CCN, the activity reporting tool (ART2), Taxud electronic management of project online (TEMPO), service management tool (SMT), the user management system (UM), the BPM system, the availability dashboard and AvDB, IT service management portal, directory and user access management;
- (3) Programmes information and communication space (PICS);
- (4) the customs movement systems, in particular the (New) Computerised Transit System ((N)CTS), NCTS TIR for Russia, the Export Control System (ECS) and the Import Control system (ICS). The following applications/components are supporting these systems: the system to exchange data with third countries (SPEED bridge), the SPEED Edifact Converter Node (SPEED-ECN), the Standard SPEED Test Application (SSTA), the Standard Transit Test Application (STTA), the Transit Test Application (TTA), the Central Services/Reference Data (CSR2) and the Central Services/Management Information System (CS/MIS);
- (5) the Community Risk Management System (CRMS) covering the Risk Information Forms (RIF) and the Common Profiles CPCA functional domains;
- (6) the Economic Operators System (EOS) covering the Economic Operator Registration and Identification (EORI), the Authorised Economic Operators (AEO), the Regular Shipping Services (RSS) and the mutual recognition with partner countries functional domains. The Generic Web Service is a support component for this system;
- (7) the tariff system (TARIC3) which is a reference data system for other applications such as the quota management system (QUOTA2), the surveillance management and monitoring system (SURV2), the European Binding Tariff Information system (EBTI3) the European Customs Inventory of Chemical Substances (ECICS2). The Combined Nomenclature (CN) and the suspensions (Suspensions) applications are managing legal information with a direct link to the tariff system;
- (8) the applications for control purposes, in particular the Specimen Management System (SMS) and the Information System for Processing Procedures (ISPP);
- (9) the anti-COUNTERFEIT and anti-PIRACY System (COPIS);
- (10) the Data Dissemination System (DDS2) managing all information which is accessible to the public via the Internet;
- (11) the Anti-Fraud Information System (AFIS); and
- (12) any other systems included in the multiannual strategic plan provided for in Article 8(2) of Decision No 70/2008/EC of the European Parliament and of the Council⁽¹⁾, and the successors of that plan.

B. The Union components of the European Information Systems are:

- (1) IT assets such as the hardware, the software and the network connections of the systems, including the associated data infrastructure;

⁽¹⁾ Decision No 70/2008/EC of the European Parliament and of the Council of 15 January 2008 on a paperless environment for customs and trade (OJ L 23, 26.1.2008, p. 21).

- (2) IT services necessary to support the development, the maintenance, the improvement and the operation of the systems; and
 - (3) any other elements which, for reasons of efficiency, security and rationalisation, are identified by the Commission as common to participating countries.
- C. The non-Union components of the European Information Systems are all those components which are not identified as Union components in Section B.
-

ANNEX III

Indicative allocation of funds

The indicative allocation of funds to eligible actions listed in Article 7 is the following:

Types of action	Share of the financial envelope (in %)
Joint actions	maximum 20 %
IT capacity building	at least 75 %
Human competency building	maximum 5 %

**REGULATION (EU) No 1295/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

**establishing the Creative Europe Programme (2014 to 2020) and repealing Decisions No
1718/2006/EC, No 1855/2006/EC and No 1041/2009/EC**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 166(4), the first indent of Article 167(5) and Article 173(3) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure ⁽³⁾,

Whereas:

(1) The Treaty on the Functioning of the European Union (TFEU) aims at an ever closer union among the peoples of Europe and confers on the Union the task, inter alia, of contributing to the flowering of cultures of Member States, while respecting their national and regional diversity and at the same time ensuring that the conditions necessary for the competitiveness of the Union's industry exist. In that respect, the Union, where necessary, supports and supplements Member States' actions to respect cultural and linguistic diversity, in accordance with Article 167 TFEU and the 2005 Unesco Convention on the Protection and Promotion of the Diversity of Cultural Expressions (the "2005 Unesco Convention"), to strengthen the competitiveness of the cultural and creative sectors and to facilitate adaptation to industrial changes.

(2) Union support for the cultural and creative sectors is based primarily on the experience acquired with the Union programmes set out in Decision No 1718/2006/EC of the European Parliament and of the Council ⁽⁴⁾ (the "MEDIA programme"), Decision No 1855/2006/EC of the European Parliament and of

the Council ⁽⁵⁾ (the "Culture programme") and Decision No 1041/2009/EC of the European Parliament and of the Council ⁽⁶⁾ (the "MEDIA Mundus programme"). Decision No 1622/2006/EC of the European Parliament and of the Council ⁽⁷⁾ (the "European Capitals of Culture action") and Decision No 1194/2011/EU of the European Parliament and of the Council ⁽⁸⁾ (the "European Heritage Label action") also contribute to Union support for the cultural and creative sectors.

(3) The Commission Communication on a European agenda for culture in a globalising world, endorsed by the Council in its resolution of 16 November 2007 ⁽⁹⁾ and by the European Parliament in its resolution of 10 April 2008 ⁽¹⁰⁾, sets the objectives for future activities of the Union for the cultural and creative sectors. It aims to promote cultural diversity and intercultural dialogue, culture as a catalyst for creativity in the framework for growth and jobs and culture as a vital element in the Union's international relations.

(4) With regard to the Charter of Fundamental Rights of the European Union and in particular Articles 11, 21 and 22 thereof, the cultural and creative sectors make an important contribution to the fight against all forms of discrimination, including racism and xenophobia, and are an important platform for freedom of expression and for the promotion of respect for cultural and linguistic diversity.

(5) The 2005 Unesco Convention, which entered into force on 18 March 2007 and to which the Union is a party, underlines that cultural activities, goods and services have both an economic and a cultural nature, because they convey identities, values and meanings, and must not, therefore, be treated as solely having commercial value. That convention aims to strengthen international cooperation, including international co-production and co-distribution agreements, and solidarity so as to favour the cultural expression of all countries and individuals.

⁽¹⁾ OJ C 181, 21.6.2012, p. 35.

⁽²⁾ OJ C 277, 13.9.2012, p. 156.

⁽³⁾ Position of the European Parliament of 19 November 2013 (not yet published in the Official Journal) and decision of the Council of 5 December 2013.

⁽⁴⁾ Decision No 1718/2006/EC of the European Parliament and of the Council of 15 November 2006 concerning the implementation of a programme of support for the European audiovisual sector (MEDIA 2007) (OJ L 327, 24.11.2006, p. 12).

⁽⁵⁾ Decision No 1855/2006/EC of the European Parliament and of the Council of 12 December 2006 establishing the Culture Programme (2007 to 2013) (OJ L 372, 27.12.2006, p. 1).

⁽⁶⁾ Decision No 1041/2009/EC of the European Parliament and of the Council of 21 October 2009 establishing an audiovisual cooperation programme with professionals from third countries (MEDIA Mundus) (OJ L 288, 4.11.2009, p. 10).

⁽⁷⁾ Decision No 1622/2006/EC of the European Parliament and of the Council of 24 October 2006 establishing a Community action for the European Capital of Culture event for the years 2007 to 2019 (OJ L 304, 3.11.2006, p. 1).

⁽⁸⁾ Decision No 1194/2011/EU of the European Parliament and of the Council of 16 November 2011 establishing a European Union action for the European Heritage Label (OJ L 303, 22.11.2011, p. 1).

⁽⁹⁾ OJ C 287, 29.11.2007, p. 1.

⁽¹⁰⁾ OJ C 247 E, 15.10.2009, p. 32.

It also states that due attention is to be paid to the special circumstances and needs of various social groups, including persons belonging to minorities. Accordingly, a support programme for the cultural and creative sectors should foster cultural diversity at international level in line with that convention.

- (6) Promoting tangible and intangible cultural heritage, in the light of, inter alia, the 2003 Unesco Convention for the Safeguarding of the Intangible Cultural Heritage and the 1972 Unesco Convention Concerning the Protection of the World Cultural and Natural Heritage, should also contribute to the enhancement of the value of the relevant sites whilst giving to peoples a sense of ownership of the cultural and historical value of such sites.
- (7) The Commission Communication entitled "Europe 2020 – A strategy for smart, sustainable and inclusive growth" (the "Europe 2020 Strategy") defines a strategy that aims to turn the Union into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion. In that communication, the Commission noted that the Union needs to provide more attractive framework conditions for innovation and creativity. In that regard, cultural and creative sectors are a source of innovative ideas that can be turned into products and services that create growth and jobs and help address societal changes. Moreover, excellence and competitiveness in those sectors are primarily the result of efforts on the part of artists, creators and professionals that need to be promoted. For that purpose, access to finance for the cultural and creative sectors should be improved.
- (8) In its conclusions on mobility information services for artists and for culture professionals⁽¹⁾, the Council confirmed the importance of the mobility of artists and cultural professionals for the Union and for achieving its objectives within the Europe 2020 Strategy, and called on the Member States and the Commission, within their respective spheres of competences and with due regard to the principle of subsidiarity, to facilitate the provision of comprehensive and accurate information to artists and cultural professionals seeking to be mobile within the Union.
- (9) In order to contribute to the enhancement of a shared cultural area, it is important to promote the transnational mobility of cultural and creative players and the transnational circulation of cultural and creative works, including audiovisual works and products, thereby promoting cultural exchanges and intercultural dialogue.
- (10) The MEDIA, Culture and MEDIA Mundus programmes have been the subject of regular monitoring and external evaluations, and public consultations have been organised on their future, from which it emerges that those programmes play a very important role in protecting and promoting Europe's cultural and linguistic diversity and that they are relevant for the needs of the cultural and creative sectors. It also appears from those monitoring, evaluation and consultation activities, as well as from various independent studies, in particular the study on the entrepreneurial dimension of cultural and creative industries, that the cultural and creative sectors are facing common challenges, namely the rapid change caused by the digital shift and globalisation, market fragmentation relating to linguistic diversity, difficulties in accessing finance, complex administrative procedures and a shortage of comparable data, which all require action at Union level.
- (11) The European cultural and creative sectors are inherently diversified along national and linguistic lines, which results in a culturally rich and highly independent cultural landscape, providing a voice for the different cultural traditions of Europe's heritage. However, such diversification also gives rise to a series of obstacles that impede the smooth transnational circulation of cultural and creative works and hamper the mobility of cultural and creative players within and outside the Union, which can lead to geographical imbalances and, subsequently, to a limited choice for the consumer.
- (12) Given that the European cultural and creative sectors are characterised by linguistic diversity which leads in some sectors to fragmentation along linguistic lines, subtitling, dubbing and audio description are essential to the circulation of cultural and creative works, including audiovisual works.
- (13) The digital shift is having a massive impact on how cultural and creative goods and services are made, disseminated, accessed, consumed and monetised. While the need to seek a new balance between the increasing accessibility of cultural and creative works, fair remuneration of artists and creators and the emergence of new business models is recognised, the changes resulting from the digital shift offer wide opportunities for the European cultural and creative sectors and for European society in general. Lower distribution costs, new distribution channels, the potential for new and for increased audiences and new opportunities for niche products can facilitate access and increase circulation of cultural and creative works worldwide. In order to use those opportunities to the full and adapt to the context of the digital shift and globalisation, the cultural and creative sectors need to develop new skills and require

⁽¹⁾ OJ C 175, 15.6.2011, p. 5.

- greater access to finance in order to upgrade equipment, develop new production and distribution methods and adapt their business models.
- (14) Current distribution practices underpin the film financing system. However, there is an increasing need to promote the emergence of attractive legal online offers and to encourage innovation. Therefore, it is essential to promote new distribution modes in order to allow new business models to emerge.
- (15) Digitisation of cinemas has been an ongoing issue for many small cinema operators, particularly single-screen operators, due to the high costs of the digital equipment. While the Member States have primary competence for culture and should therefore continue to address that issue at national, regional and local level, as appropriate, there is potential for financing from Union programmes and funds, in particular those aimed at local and regional development.
- (16) Audience development, especially as regards young people, requires a specific commitment on the part of the Union, to support, in particular, media and film literacy.
- (17) One of the greatest challenges for the cultural and creative sectors, especially for micro, small and medium-sized enterprises ("SMEs") and micro, small and medium-sized organisations, including not-for-profit and non-governmental organisations, is the difficulty they face in accessing the funds that they need to finance their activities, to grow, and to maintain and increase their competitiveness or internationalise their activities. While that is a common challenge for SMEs generally, the situation is significantly more difficult in the cultural and creative sectors due to the intangible nature of many of their assets, the prototype profile of their activities, and their intrinsic need to take risks and experiment in order to innovate. Such risk-taking needs to be understood and supported also by the financial sector.
- (18) As a pilot project, the European Creative Industries Alliance is a cross-sectoral initiative that primarily supports the creative industries at policy level. It aims at leveraging additional funds for creative industries and at stimulating the demand for creative industries' services by other industries and sectors. Testing of new tools for better support for innovation in creative industries will take place and will be leveraged to feed into a policy learning platform composed of European, national and regional stakeholders.
- (19) Bringing together the current MEDIA, Culture and MEDIA Mundus programmes for the cultural and creative sectors within a single comprehensive programme (the "Programme") would more effectively support SMEs and micro, small and medium-sized organisations in their efforts to take advantage of the opportunities offered by the digital shift and globalisation and would help them to address issues currently leading to market fragmentation. To be effective, the Programme should take into account the specific nature of the different sectors, their different target groups and their particular needs through tailor-made approaches within two independent sub-programmes and a cross-sectoral strand. In particular, it is important to ensure synergies at the level of implementation between the Programme and the national and regional strategies for smart specialisation. To that end, the Programme should establish a coherent support structure for the different cultural and creative sectors consisting of a grants system complemented by a financial instrument.
- (20) The Programme should take into account the dual nature of culture and cultural activities, recognising, on the one hand, the intrinsic and artistic value of culture and, on the other hand, the economic value of those sectors, including their broader societal contribution to creativity, innovation and social inclusion.
- (21) With regard to the implementation of the Programme, the intrinsic value of culture and the specific nature of the cultural and creative sectors should be taken into account, including the importance of not-for-profit organisations and projects under a Culture Sub-programme.
- (22) A self-standing financial instrument, the Cultural and Creative Sectors Guarantee Facility (the "Guarantee Facility"), should enable the cultural and creative sectors at large to grow, and in particular should provide sufficient leverage for new actions and opportunities. Selected financial intermediaries should act in favour of cultural and creative projects to ensure a balanced loans portfolio in terms of geographical coverage and sector representation. Moreover, public and private organisations have an important role to play in that context, in order to achieve a broad approach under the Guarantee Facility.
- (23) Funding should also be provided for the European Capitals of Culture action and for the administration of the European Heritage Label action, as they contribute to the strengthening of the feeling of belonging to a common cultural area, to the stimulation of intercultural dialogue and mutual understanding and to the enhancement of the value of cultural heritage.

- (24) In addition to Member States and overseas countries and territories which are eligible to participate in the Programme pursuant to Article 58 of Council Decision 2001/822/EC ⁽¹⁾, the Programme should also be open, subject to certain conditions, to the participation of European Free Trade Association ("EFTA") countries which are parties to the Agreement on the European Economic Area ("EEA") and of the Swiss Confederation. Accessing countries, candidate countries and potential candidate countries benefiting from a pre-accession strategy as well as countries covered by the European Neighbourhood Policy should also be able to participate in the Programme, except as regards the Guarantee Facility.
- (25) The Programme should further be open for bilateral or multilateral cooperation actions with third countries on the basis of additional appropriations to be defined, and specific arrangements to be agreed upon, with the parties concerned.
- (26) Cooperation in the cultural and audiovisual fields should be fostered between the Programme and international organisations such as Unesco, the Council of Europe, the Organisation for Economic Co-operation and Development ("OECD") and the World Intellectual Property Organisation ("WIPO").
- (27) It is necessary to ensure the European added value of all actions and activities carried out within the Programme, their complementarity to Member States' activities, their compliance with Article 167(4) TFEU and their consistency with other Union activities, in particular in the fields of education, employment, the internal market, enterprise, youth, health, citizenship and justice, research and innovation, industrial and cohesion policy, tourism and external relations, trade and development, and the digital agenda.
- (28) In compliance with the principles for performance-related assessment, the procedures for monitoring and evaluating the Programme should include detailed annual reports and should refer to specific, measurable, achievable, relevant and time-bound targets and indicators, including qualitative ones. Procedures for monitoring and evaluation ought to take into account the work of relevant players such as Eurostat, and the findings of the ESS-net Culture project and of the Unesco Institute for Statistics. In that context, as regards the audiovisual sector, the Union's participation in the European Audiovisual Observatory (the "Observatory") should be continued.
- (29) In order to ensure optimal monitoring and evaluation of the Programme during its entire duration, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of the adoption of additional quantitative and qualitative indicators. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (30) As stated in the Commission report of 30 July 2010 on the impact of the European Parliament and Council Decisions modifying the legal bases of the European Programmes in the areas of Lifelong Learning, Culture, Youth and Citizenship, the substantial shortening of the delays in the management procedures has increased the efficiency of programmes. Particular care should be taken to ensure that administrative and financial procedures continue to be simplified, including through the use of sound, objective and regularly updated systems for determining lump sums, unit costs and flat-rate financing.
- (31) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽²⁾.
- (32) In accordance with Council Regulation (EC) No 58/2003 ⁽³⁾, the Commission has since 2009 entrusted the Education, Audiovisual and Culture Executive Agency with implementation tasks for the management of Union action in the fields of education, audiovisual and culture. The Commission may therefore use, on the basis of a cost-benefit analysis, an existing executive agency for the implementation of the Programme, as provided for in that Regulation.
- (33) This Regulation lays down a financial envelope for the entire duration of the Programme, which is to constitute the prime reference amount, within the meaning of point 17 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council

⁽¹⁾ Council Decision 2001/822/EC of 27 November 2001 on the association of the overseas countries and territories with the European Community ("Overseas Association Decision") (OJ L 314, 30.11.2001, p. 1).

⁽²⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

⁽³⁾ Council Regulation (EC) No 58/2003 of 19 December 2002 laying down the statute for executive agencies to be entrusted with certain tasks in the management of Community programmes (OJ L 11, 16.1.2003, p. 1).

and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management⁽¹⁾, for the European Parliament and the Council during the annual budgetary procedure.

- (34) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including measures for the prevention, detection and investigation of irregularities, the recovery of funds lost, unduly paid or incorrectly used and, where appropriate, administrative and financial penalties in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council⁽²⁾ (the "Financial Regulation").
- (35) With regard to the European Anti-Fraud Office ("OLAF") and pursuant to Council Regulation (Euratom, EC) No 2185/96⁽³⁾ and Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council⁽⁴⁾, appropriate measures should be drawn up and implemented to prevent fraud and to recover funds which have been lost or transferred or used improperly.
- (36) Since the objectives of this Regulation, namely to safeguard, develop and promote European cultural and linguistic diversity, to promote Europe's cultural heritage and to strengthen the competitiveness of the European cultural and creative sectors, in particular of the audiovisual sector, cannot be sufficiently achieved by the Member States, given the transnational and international character of the Programme, but can rather, by reason of its scale and expected effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.
- (37) Decisions No 1718/2006/EC, No 1855/2006/EC and No 1041/2009/EC should therefore be repealed.
- (38) Provision should be made for measures governing the transition from the MEDIA, Culture and MEDIA Mundus programmes to the Programme.

⁽¹⁾ OJ C 420 du 20.12.2013, p. 1

⁽²⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

⁽³⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

⁽⁴⁾ Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1).

(39) In order to ensure continuity in the funding support provided under the Programme, the Commission should be able to consider the costs directly linked to the implementation of the supported actions and activities as eligible for financing, even if they are incurred by the beneficiary before the grant application is submitted.

(40) In order to ensure continuity in the funding support provided under the Programme, this Regulation should apply from 1 January 2014. For reasons of urgency, this Regulation should enter into force as soon as possible after its publication in the *Official Journal of the European Union*,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

General provisions

Article 1

Establishment and duration

1. This Regulation establishes the Creative Europe Programme for support to the European cultural and creative sectors (the "Programme").
2. The Programme shall be implemented for the period from 1 January 2014 to 31 December 2020.

Article 2

Definitions

For the purposes of this Regulation, the following definitions shall apply:

- (1) 'cultural and creative sectors' means all sectors whose activities are based on cultural values and/or artistic and other creative expressions, whether those activities are market- or non-market-oriented, whatever the type of structure that carries them out, and irrespective of how that structure is financed. Those activities include the development, the creation, the production, the dissemination and the preservation of goods and services which embody cultural, artistic or other creative expressions, as well as related functions such as education or management. The cultural and creative sectors include inter alia architecture, archives, libraries and museums, artistic crafts, audiovisual (including film, television, video games and multimedia), tangible and intangible cultural heritage, design, festivals, music, literature, performing arts, publishing, radio and visual arts;
- (2) 'SMEs' means micro, small and medium-sized enterprises, as defined in Commission Recommendation 2003/361/EC⁽⁵⁾;

⁽⁵⁾ Commission Recommendation 2003/361/EC of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises (OJ L 124, 20.5.2003, p. 36).

- (3) 'participating financial intermediaries' means financial intermediaries within the meaning of the second subparagraph of Article 139(4) of the Financial Regulation, selected under the Guarantee Facility in accordance with the Financial Regulation and with Annex I to this Regulation, providing or planning to provide:
- (a) loans to SMEs and to micro, small and medium-sized organisations in the cultural and creative sectors (guarantees from the European Investment Fund ("EIF")); or
 - (b) loan guarantees to other financial intermediaries providing loans to SMEs and to micro, small and medium-sized organisations in the cultural and creative sectors (counter-guarantees from the EIF);
- (4) 'capacity-building providers' means entities capable of providing expertise in accordance with Annex I in order to enable participating financial intermediaries to assess effectively the specificities and risks associated with SMEs and micro, small and medium-sized organisations in the cultural and creative sectors and with their projects.

Article 3

General objectives

The general objectives of the Programme shall be:

- (a) to safeguard, develop and promote European cultural and linguistic diversity and to promote Europe's cultural heritage;
- (b) to strengthen the competitiveness of the European cultural and creative sectors, in particular of the audiovisual sector, with a view to promoting smart, sustainable and inclusive growth.

Article 4

Specific objectives

The specific objectives of the Programme shall be:

- (a) to support the capacity of the European cultural and creative sectors to operate transnationally and internationally;
- (b) to promote the transnational circulation of cultural and creative works and transnational mobility of cultural and creative players, in particular artists, as well as to reach new and enlarged audiences and improve access to cultural and creative works in the Union and beyond, with a particular focus on children, young people, people with disabilities and under-represented groups;
- (c) to strengthen the financial capacity of SMEs and micro, small and medium-sized organisations in the cultural and

creative sectors in a sustainable way, while endeavouring to ensure a balanced geographical coverage and sector representation;

- (d) to foster policy development, innovation, creativity, audience development and new business and management models through support for transnational policy cooperation.

Article 5

European added value

1. Recognising the intrinsic and economic value of culture, the Programme shall support actions and activities with a European added value in the cultural and creative sectors. It shall contribute to the achievement of the objectives of the Europe 2020 Strategy and its flagship initiatives.

2. European added value shall be ensured through one or more of the following:

- (a) the transnational character of actions and activities which complement regional, national, international and other Union programmes and policies, and the impact of such actions and activities on the cultural and creative sectors as well as on citizens and on their knowledge of cultures other than their own;
- (b) the development and promotion of transnational cooperation between cultural and creative players, including artists, audiovisual professionals, cultural and creative organisations and audiovisual operators, focused on stimulating more comprehensive, rapid, effective and long-term responses to global challenges;
- (c) the economies of scale and critical mass which Union support fosters, creating a leverage effect for additional funds;
- (d) ensuring a more level playing field in the European cultural and creative sectors by taking account of low production capacity countries and/or countries or regions with a restricted geographical and/or linguistic area.

Article 6

Structure of the Programme

The Programme shall consist of:

- (a) a MEDIA Sub-programme;
- (b) a Culture Sub-programme;
- (c) a Cross-sectoral Strand.

*Article 7***Logos of the Sub-programmes**

1. The Commission shall ensure the visibility of the Programme through the use of logos, which shall be specific to each of the Sub-programmes.
2. The beneficiaries of the MEDIA Sub-programme shall use the logo set out in Annex II. The Commission shall establish details for the use of that logo and shall communicate them to the beneficiaries.
3. The beneficiaries of the Culture Sub-programme shall use a logo which shall be established by the Commission. The Commission shall establish details for the use of that logo and shall communicate them to the beneficiaries.
4. The Commission and the Creative Europe Desks referred to in Article 16 shall also be entitled to use the logos of the Sub-programmes.

*Article 8***Access to the Programme**

1. The Programme shall foster cultural diversity at international level in line with the 2005 Unesco Convention.
2. The Programme shall be open to the participation of the Member States.
3. Without prejudice to paragraph 4, the Programme shall be open to the participation of the following countries provided that they pay additional appropriations and that, for the MEDIA Sub-programme, they meet the conditions set out in Directive 2010/13/EU of the European Parliament and of the Council ⁽¹⁾:
 - (a) acceding countries, candidate countries and potential candidate countries benefiting from a pre-accession strategy, in accordance with the general principles and general terms and conditions for the participation of those countries in Union programmes established in the respective framework agreements, Association Council decisions or similar agreements;
 - (b) EFTA countries that are party to the EEA Agreement, in accordance with that Agreement;
 - (c) the Swiss Confederation, on the basis of a bilateral agreement with that country;
 - (d) countries covered by the European Neighbourhood Policy, in accordance with the procedures established with those countries following the framework agreements providing for their participation in Union programmes.

⁽¹⁾ Directive 2010/13/EU of the European Parliament and of the Council of 10 March 2010 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the provision of audiovisual media services (Audiovisual Media Services Directive) (OJ L 95, 15.4.2010, p. 1).

4. The countries referred to in points (a) and (d) of paragraph 3 shall be precluded from participating in the Guarantee Facility.

5. The Programme shall be open for bilateral or multilateral cooperation actions targeted at selected countries or regions on the basis of additional appropriations paid by, and specific arrangements to be agreed upon with, those countries or regions.

6. The Programme shall permit cooperation and joint actions with countries not participating in the Programme and with international organisations which are active in the cultural and creative sectors such as Unesco, the Council of Europe, the OECD or the WIPO on the basis of joint contributions for the realisation of the Programme's objectives.

CHAPTER II

MEDIA Sub-programme*Article 9***Priorities of the MEDIA Sub-programme**

1. The priorities in the field of reinforcing the European audiovisual sector's capacity to operate transnationally shall be the following:
 - (a) facilitating the acquisition and improvement of skills and competences of audiovisual professionals and the development of networks, including the use of digital technologies to ensure adaptation to market development, testing new approaches to audience development and testing new business models;
 - (b) increasing the capacity of audiovisual operators to develop European audiovisual works with a potential to circulate in the Union and beyond and to facilitate European and international co-production, including with television broadcasters;
 - (c) encouraging business-to-business exchanges by facilitating access to markets and business tools enabling audiovisual operators to increase the visibility of their projects on Union and international markets.
2. The priorities in the field of promoting transnational circulation shall be the following:
 - (a) supporting theatrical distribution through transnational marketing, branding, distribution and exhibition of audiovisual works;
 - (b) promoting transnational marketing, branding and distribution of audiovisual works on all other non-theatrical platforms;

- (c) supporting audience development as a means of stimulating interest in, and improving access to, European audiovisual works, in particular through promotion, events, film literacy and festivals;
- (d) promoting new distribution modes in order to allow the emergence of new business models.

Article 10

Support measures of the MEDIA Sub-programme

In order to implement the priorities set out in Article 9, the MEDIA Sub-programme shall provide support for:

- (a) the development of a comprehensive range of training measures promoting the acquisition and improvement of skills and competences by audiovisual professionals, knowledge-sharing and networking initiatives, including the integration of digital technologies;
- (b) the development of European audiovisual works, in particular films and television works such as fiction, documentaries and children's and animated films, as well as interactive works such as video games and multimedia with enhanced cross-border circulation potential;
- (c) activities aiming to support European audiovisual production companies, in particular independent production companies, with a view to facilitating European and international co-productions of audiovisual works including television works;
- (d) activities helping European and international co-production partners to come together and/or providing indirect support for audiovisual works co-produced by international co-production funds based in a country participating in the Programme;
- (e) facilitating access to professional audiovisual trade events and markets and the use of online business tools inside and outside the Union;
- (f) establishing systems of support for the distribution of non-national European films through theatrical distribution and on other platforms, as well as for international sales activities, in particular the subtitling, dubbing and audio description of audiovisual works;
- (g) facilitating the circulation of European films worldwide and of international films in the Union on all distribution platforms, via international cooperation projects in the audiovisual sector;
- (h) a European cinema operators' network screening a significant proportion of non-national European films;

- (i) initiatives presenting and promoting a diversity of European audiovisual works, including short films, such as festivals and other promotional events;
- (j) activities aimed at promoting film literacy and at increasing audiences' knowledge of, and interest in, European audiovisual works, including the audiovisual and cinematographic heritage, in particular among young audiences;
- (k) innovative actions testing new business models and tools in areas likely to be influenced by the introduction and use of digital technologies.

Article 11

European Audiovisual Observatory

1. The Union shall be a member of the Observatory for the duration of the Programme.
2. The Union's participation in the Observatory shall contribute to the achievement of the priorities of the MEDIA Sub-programme by:
 - (a) encouraging transparency and the establishment of a level playing field as regards the accessibility of legal and financial/market information, and contributing to the comparability of legal and statistical information;
 - (b) providing data and market analysis useful for the elaboration of the action lines of the MEDIA Sub-programme and for the evaluation of their impact on the market.
3. The Commission shall represent the Union in its dealings with the Observatory.

CHAPTER III

Culture Sub-programme

Article 12

Priorities of the Culture Sub-programme

1. The priorities in the field of reinforcing the cultural and creative sectors' capacity to operate transnationally shall be the following:
 - (a) supporting actions providing cultural and creative players with skills, competences and know-how that contribute to strengthening the cultural and creative sectors, including encouraging adaptation to digital technologies, testing innovative approaches to audience development and testing new business and management models;

(b) supporting actions enabling cultural and creative players to cooperate internationally and to internationalise their careers and activities in the Union and beyond, where possible on the basis of long-term strategies;

(c) providing support to strengthen European cultural and creative organisations and international networking in order to facilitate access to professional opportunities.

2. The priorities in the field of promoting transnational circulation and mobility shall be the following:

(a) supporting international touring, events, exhibitions and festivals;

(b) supporting the circulation of European literature with a view to ensuring its widest possible accessibility;

(c) supporting audience development as a means of stimulating interest in, and improving access to, European cultural and creative works and tangible and intangible cultural heritage.

Article 13

Support measures of the Culture Sub-programme

1. In order to implement the priorities set out in Article 12, the Culture Sub-programme shall provide support for:

(a) transnational cooperation projects bringing together cultural and creative organisations from different countries to undertake sectoral or cross-sectoral activities;

(b) activities by European networks of cultural and creative organisations from different countries;

(c) activities by organisations with a European vocation fostering the development of emerging talent and stimulating the transnational mobility of cultural and creative players and circulation of works, with the potential to exert a broad influence on the cultural and creative sectors and to provide for lasting effects;

(d) literary translation and its further promotion;

(e) special actions designed to make the richness and diversity of European cultures more visible and to stimulate intercultural dialogue and mutual understanding, including Union cultural prizes, the European Capitals of Culture action and the European Heritage Label action.

2. The measures set out in paragraph 1 shall support, in particular, not-for-profit projects.

CHAPTER IV

Cross-sectoral Strand

Article 14

Cultural and Creative Sectors Guarantee Facility

1. The Commission shall establish a Guarantee Facility targeting the cultural and creative sectors.

The Guarantee Facility shall operate as a self-standing instrument and shall be set up and managed in accordance with Title VIII of the Financial Regulation.

2. The Guarantee Facility shall have the following priorities:

(a) to facilitate access to finance for SMEs and micro, small and medium-sized organisations in the cultural and creative sectors;

(b) to improve the capacity of participating financial intermediaries to assess the risks associated with SMEs and micro, small and medium-sized organisations in the cultural and creative sectors and with their projects, including through technical assistance, knowledge-building and networking measures.

The priorities shall be implemented in accordance with Annex I.

3. In accordance with Article 139(4) of the Financial Regulation, the Commission shall implement the Guarantee Facility in an indirect management mode by entrusting tasks to the EIF as referred to in point (iii) of Article 58(1)(c) of that Regulation, subject to the terms of an agreement between the Commission and the EIF.

Article 15

Transnational policy cooperation

1. In order to promote transnational policy cooperation, the Cross-sectoral Strand shall support:

(a) transnational exchange of experiences and know-how in relation to new business and management models, peer-learning activities and networking among cultural and creative organisations and policy-makers related to the development of the cultural and creative sectors, promoting digital networking where appropriate;

(b) the collection of market data, studies, analysis of labour market and skills needs, European and national cultural policies analysis and support for statistical surveys based on instruments and criteria specific to each sector and evaluations, including measurement of all aspects of the impact of the Programme;

(c) payment of the contribution fee for Union membership of the Observatory to foster data collection and analysis in the audiovisual sector;

- (d) testing of new and cross-sectoral business approaches to funding, distributing and monetising creation;
- (e) conferences, seminars and policy dialogue, including in the field of cultural and media literacy, promoting digital networking where appropriate;
- (f) the Creative Europe Desks referred to in Article 16 and the performance of their tasks.

2. By 30 June 2014, the Commission shall carry out a feasibility study exploring the possibility of collecting and analysing data in the cultural and creative sectors other than the audiovisual sector, and shall present the results of that study to the European Parliament and to the Council.

Depending on the results of the feasibility study, the Commission may submit a proposal to amend this Regulation accordingly.

Article 16

Creative Europe Desks

1. The countries participating in the Programme, acting together with the Commission, shall establish Creative Europe Desks in accordance with their national law and practice (the "Creative Europe Desks").
2. The Commission shall support a network of Creative Europe Desks.
3. The Creative Europe Desks shall carry out the following tasks, while taking into account the specific characteristics of each sector:
 - (a) provide information about, and promote, the Programme in their country;
 - (b) assist the cultural and creative sectors in relation to the Programme and provide basic information on other relevant support opportunities available under Union policy;
 - (c) stimulate cross-border cooperation within the cultural and creative sectors;
 - (d) support the Commission by providing assistance regarding the cultural and creative sectors in the countries participating in the Programme, for example through the provision of available data on those sectors;
 - (e) support the Commission in ensuring proper communication and dissemination of the results and impacts of the Programme;

- (f) ensure the communication and dissemination of information concerning the Union funding awarded and the results obtained for their country.

4. The Commission, acting together with the Member States, shall ensure the quality and results of the service provided by the Creative Europe Desks through regular and independent monitoring and evaluation.

CHAPTER V

Performance results and dissemination

Article 17

Consistency and complementarity

1. The Commission, in cooperation with the Member States, shall ensure the overall consistency and complementarity of the Programme with:

- (a) relevant Union policies, such as those in the fields of education, employment, health, the internal market, the digital agenda, youth, citizenship, external relations, trade, research and innovation, enterprise, tourism, justice, enlargement and development;
- (b) other relevant Union funding sources in the field of culture and media policies, in particular the European Social Fund, the European Regional Development Fund and the research and innovation programmes, as well as the financial instruments relating to justice and citizenship, external cooperation programmes and the pre-accession instruments.

2. This Regulation shall apply and be implemented without prejudice to the international commitments of the Union.

Article 18

Monitoring and evaluation

1. The Commission shall ensure regular monitoring and external evaluation of the Programme against the qualitative and quantitative performance indicators set out below:

- (a) indicators for the general objectives referred to in Article 3:
 - (i) the cultural and creative sectors' level, change in and share of employment and share of gross domestic product;
 - (ii) the number of people accessing European cultural and creative works, including, where possible, works from countries other than their own;

- (b) indicators for the specific objective referred to in point (a) of Article 4:
- (i) the scale of international activities of cultural and creative organisations and the number of transnational partnerships created;
 - (ii) the number of learning experiences and activities supported by the Programme which have improved the competences and increased the employability of cultural and creative players, including audiovisual professionals;
- (c) indicators for the specific objective referred to in point (b) of Article 4 as regards the MEDIA Sub-programme:
- (i) the number of admissions for non-national European films in Europe and European films worldwide (10 most important non-European markets) in cinemas;
 - (ii) the percentage of European audiovisual works in cinemas, on television and on digital platforms;
 - (iii) the number of people in the Member States accessing non-national European audiovisual works and the number of people in the countries participating in the Programme accessing European audiovisual works;
 - (iv) the number of European video games produced in the Union as well as in the countries participating in the Programme;
- (d) indicators for the specific objective referred to in point (b) of Article 4 as regards the Culture Sub-programme:
- (i) the number of people directly and indirectly reached through projects supported by the Programme;
 - (ii) the number of projects addressed to children, young people and under-represented groups and the estimated number of people reached;
- (e) indicators for the specific objective referred to in point (c) of Article 4:
- (i) the volume of loans guaranteed in the framework of the Guarantee Facility, categorised by national origin, size and sectors of SMEs and micro, small and medium-sized organisations;
 - (ii) the volume of loans granted by participating financial intermediaries, categorised by national origin;
 - (iii) the number and geographical spread of participating financial intermediaries;
 - (iv) the number of SMEs and micro, small and medium-sized organisations benefiting from the Guarantee Facility, categorised by national origin, size and sectors;
 - (v) the average default rate of loans;
 - (vi) the achieved leverage effect of guaranteed loans in relation to the indicative leverage effect (1:5,7);
- (f) indicators for the specific objective referred to in point (d) of Article 4:
- (i) the number of Member States making use of the results of the open method of coordination in their national policy development;
 - (ii) the number of new initiatives and policy outcomes.
2. The results of the monitoring and evaluation process shall be taken into account in the implementation of the Programme.
3. In addition to regularly monitoring the Programme, the Commission shall establish a mid-term evaluation report, based on an external and independent evaluation, which:
- (a) includes qualitative and quantitative elements, in order to assess the effectiveness of the Programme in achieving its objectives, the efficiency of the Programme, and its European added value;
 - (b) addresses the scope for simplification of the Programme, its internal and external coherence, the continued relevance of all its objectives and the contribution of the measures to the Union priorities of smart, sustainable and inclusive growth;
 - (c) takes into account evaluation results concerning the long-term impact of Decisions No 1718/2006/EC, No 1855/2006/EC and No 1041/2009/EC.
4. The Commission shall submit the mid-term evaluation report referred to in paragraph 3 to the European Parliament and the Council by 31 December 2017.
5. On the basis of a final external and independent evaluation, the Commission shall establish a final evaluation report which assesses the longer-term impacts and the sustainability of the Programme on the basis of the selected quantitative and qualitative indicators. With regard to the specific objective referred to in point (c) of Article 4, the Commission shall also evaluate the effects of the Guarantee Facility on access to bank loans and the associated costs for SMEs and micro, small and medium-sized organisations in the cultural and creative sectors.
6. The Commission shall submit the final evaluation report referred to in paragraph 5 to the European Parliament and the Council by 30 June 2022.

Article 19

Communication and dissemination

1. The Commission shall provide the countries participating in the Programme with information concerning the projects which have received the Union's funding, by transmitting the selection decisions within two weeks of their adoption.
2. Beneficiaries of the projects supported by the Programme shall ensure the communication and dissemination of information concerning the Union's funding they have received and the results obtained.
3. The Commission shall ensure the dissemination of relevant information to the Creative Europe Desks.

CHAPTER VI

Delegated acts

Article 20

Delegation of powers to the Commission

The Commission shall be empowered to adopt delegated acts in accordance with Article 21 in order to supplement the qualitative and quantitative performance indicators laid down in Article 18(1).

Article 21

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The power to adopt delegated acts referred to in Article 20 shall be conferred on the Commission for the duration of the Programme.
3. The delegation of power referred to in Article 20 may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.
4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
5. A delegated act adopted pursuant to Article 20 shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

CHAPTER VII

Implementing provisions

Article 22

Implementation of the Programme

1. The Commission shall implement the Programme in accordance with the Financial Regulation.
2. The Commission shall adopt by means of implementing acts an annual work programme concerning the Sub-programmes and the Cross-sectoral Strand. The Commission shall ensure in the annual work programme that the general and specific objectives set out in Articles 3 and 4 as well as the priorities set out in Articles 9 and 12 are implemented annually in a consistent manner, and shall outline the expected results, the method of implementation and the total amount of the financing plan. The annual work programme shall also contain a description of the measures to be financed, an indication of the amount allocated to each measure and an indicative implementation timetable.

For grants, the annual work programme shall include the priorities, the eligibility, selection and award criteria, and the maximum rate of co-financing. The financial contribution from the Programme shall be a maximum of 80 % of the costs of the operations supported.

For the Guarantee Facility, the annual work programme shall include the eligibility and selection criteria for financial intermediaries, the exclusion criteria in respect of the content of projects submitted to the participating financial intermediaries, the annual allocation to the EIF and the eligibility, selection and award criteria for capacity-building providers.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 23(4).

3. The Commission shall adopt the general guidelines for the implementation of the Programme in accordance with the advisory procedure referred to in Article 23(3).

Article 23

Committee procedure

1. The Commission shall be assisted by a committee (the "Creative Europe Committee"). That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.
2. The Creative Europe Committee may meet in specific configurations to deal with concrete issues relating to the Sub-programmes and the Cross-sectoral Strand.
3. Where reference is made to this paragraph, Article 4 of Regulation (EU) No 182/2011 shall apply.
4. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

*Article 24***Financial provisions**

1. The financial envelope for the implementation of the Programme for the period from 1 January 2014 to 31 December 2020 is set at EUR 1 462 724 000 in current prices.

The annual appropriations shall be authorised by the European Parliament and the Council within the limits of the multiannual financial framework.

2. The financial envelope referred to in paragraph 1 shall be allocated as follows:

(a) at least 56 % for the MEDIA Sub-programme;

(b) at least 31 % for the Culture Sub-programme;

(c) a maximum of 13 % for the Cross-sectoral Strand, with at least 4 % being allocated for the transnational cooperation measures listed in Article 15 and for the Creative Europe Desks.

3. The administrative costs in respect of the implementation of the Programme shall form part of the allocation set out in paragraph 2 and the total amount of those costs shall not exceed 7 % of the Programme's budget, of which 5 % shall be allocated to the implementation of the MEDIA Sub-programme and 2 % to the implementation of the Culture Sub-programme.

4. The financial envelope referred to in paragraph 1 may cover expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are directly necessary for the management of the Programme and the achievement of its objectives, in particular studies, meetings of experts, information and communication actions, including institutional communication of the political priorities of the Union in so far as they are related to the general objectives of the Programme, and expenses connected with IT networks focusing on information processing and exchange, together with all other technical and administrative assistance expenses incurred by the Commission in managing the Programme.

5. The financial envelope referred to in paragraph 1 may cover the technical and administrative assistance expenses necessary to ensure the transition between the measures adopted under Decisions No 1718/2006/EC, No 1855/2006/EC and No 1041/2009/EC and this Regulation.

If necessary, appropriations may be entered in the budget beyond 2020 to cover similar expenses, in order to allow for the management of actions not yet completed by 31 December 2020.

6. By way of derogation from Article 130(2) of the Financial Regulation, and in duly justified cases, the Commission may consider costs directly linked to the implementation of the supported actions and activities as eligible even if they are incurred by the beneficiary before the submission of the grant application.

*Article 25***Protection of the financial interests of the Union**

1. The Commission shall take appropriate measures to ensure that, when actions financed under this Regulation are implemented, the financial interests of the Union are protected by the application of preventive measures against fraud, corruption and any other illegal activities, by effective checks and inspections and, if irregularities are detected, by recovery of the amounts unduly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties.

2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on-the-spot checks and inspections, over all grant beneficiaries, contractors and subcontractors who have received Union funds under the Programme.

3. OLAF may carry out investigations, including on-the-spot checks and inspections in accordance with the provisions and procedures laid down in Regulation (Euratom, EC) No 2185/96 and Regulation (EU, Euratom) No 883/2013, with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract funded under the Programme.

4. Without prejudice to paragraphs 1, 2 and 3, cooperation agreements with third countries and international organisations, contracts, grant agreements and grant decisions resulting from the implementation of this Regulation shall contain provisions expressly empowering the Commission, the Court of Auditors and OLAF to conduct audits and investigations, according to their respective competences.

*CHAPTER VIII***Final provisions***Article 26***Repeal and transitional provision**

1. Decisions No 1718/2006/EC, No 1855/2006/EC and No 1041/2009/EC are hereby repealed with effect from 1 January 2014.

2. Activities undertaken by 31 December 2013 on the basis of the Decisions referred to in paragraph 1 shall, until they are terminated, continue to be managed in compliance with those Decisions.

*Article 27***Entry into force**

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

ANNEX I

IMPLEMENTATION ARRANGEMENTS FOR THE CULTURAL AND CREATIVE SECTORS GUARANTEE FACILITY

The financial support provided by the Guarantee Facility shall be earmarked to SMEs and micro, small and medium-sized organisations in the cultural and creative sectors, adapted to the specific needs of the sectors and branded as such.

1. Tasks

The Guarantee Facility shall provide:

- (a) guarantees to participating financial intermediaries from any country participating in the Guarantee Facility;
- (b) participating financial intermediaries with additional expertise to evaluate risks associated with SMEs and micro, small and medium-sized organisations and with their cultural and creative projects.

2. Selection of participating financial intermediaries

The EIF shall select participating financial intermediaries in conformity with best market practice and with the specific objective referred to in point (c) of Article 4. The selection criteria shall include in particular:

- (a) the volume of debt financing made available to SMEs and micro, small and medium-sized organisations;
- (b) the risk management policy for lending operations, in particular in relation to cultural and creative projects;
- (c) the ability to build a diversified loan portfolio and to propose a marketing and promotion plan to SMEs and micro, small and medium-sized organisations across regions and sectors.

3. Duration of the Guarantee Facility

Individual guarantees may have a maturity of up to 10 years.

In accordance with point (i) of Article 21(3) of the Financial Regulation, repayments generated by the guarantees shall be assigned to the Guarantee Facility for a period not exceeding the period of commitment plus 10 years. Repayments generated in accordance with the provisions of relevant delegation agreements by the operations of the MEDIA Production Guarantee Fund set up before 2014 shall be assigned to the Guarantee Facility in the period 2014-2020. The Commission shall inform the Member States of such assignments through the Creative Europe Committee.

4. Capacity-building

Capacity-building under the Guarantee Facility is the provision of expertise to participating financial intermediaries in order to increase their understanding of the cultural and creative sectors (in aspects such as the intangible nature of collateral assets, the size of the market lacking critical mass, and the prototype nature of products and services) and the provision to each participating financial intermediary of additional expertise in building portfolios and evaluating risks associated with cultural and creative projects.

The resources allocated to capacity-building shall be limited to 10 % of the budget for the Guarantee Facility.

The EIF shall select the capacity-building providers on behalf of the Guarantee Facility and under the supervision of the Commission through a public and open procurement procedure, on the basis of criteria such as experience in financing the cultural and creative sectors, expertise, geographical reach, delivery capacity and market knowledge.

5. Budget

The budgetary allocation shall cover the full cost of the Guarantee Facility, including payment obligations towards participating financial intermediaries such as losses from guarantees, management fees for the EIF managing the Union's resources, and any other eligible costs or expenses.

6. Visibility and awareness-raising

The EIF shall contribute to the promotion of the Guarantee Facility vis-à-vis the European banking sector. Additionally, each participating financial intermediary and the EIF shall ensure that an appropriate level of visibility and transparency is given to the support under the Guarantee Facility, by providing information on the financial opportunities to the target SMEs and micro, small and medium-sized organisations.

To that end, the Commission shall, inter alia, provide the network of Creative Europe Desks with the necessary information to enable them to carry out their tasks.

7. Types of loan

Types of loan covered by the Guarantee Facility shall include, in particular:

- (a) investment in tangible or intangible assets;
 - (b) business transfers;
 - (c) working capital (such as interim finance, gap finance, cash flow, credit lines).
-

ANNEX II

LOGO OF THE MEDIA SUB PROGRAMME

The MEDIA Sub programme logo shall be as follows:

**REGULATION (EU) No 1296/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

**on a European Union Programme for Employment and Social Innovation ("EaSI") and amending
Decision No 283/2010/EU establishing a European Progress Microfinance Facility for employment
and social inclusion**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 46(d), Article 149, Article 153(2)(a) and to the third paragraph of Article 175 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure ⁽³⁾,

Whereas:

(1) In line with the Commission Communication of 29 June 2011 entitled 'A budget for Europe 2020', which recommends rationalising and simplifying the Union's funding instruments and sharpening their focus both on Union added value and on impacts and results, this Regulation establishes a European Union Programme for Employment and Social Innovation ('the Programme') to provide for the continuation and development of activities carried out on the basis of Decision No 1672/2006/EC of the European Parliament and of the Council ⁽⁴⁾, Regulation (EU) No 492/2011 of the European Parliament and of the Council ⁽⁵⁾, Commission Implementing Decision 2012/733/EU ⁽⁶⁾ and Decision No 283/2010/EU of the European Parliament and of

the Council that established a European Progress Microfinance Facility for employment and social inclusion ⁽⁷⁾ ('the Facility').

(2) On 17 June 2010, the European Council endorsed the Commission proposal for a Europe 2020 Strategy for jobs and smart, sustainable and inclusive growth ("Europe 2020"), which provides for five headline targets (including those dealing with employment, the fight against poverty and social exclusion, and education, respectively), and seven flagship initiatives, and which constitutes a coherent policy framework for the coming decade. The European Council advocated full mobilisation of the appropriate Union instruments and policies to support the achievement of the common objectives, and invited the Member States to increase their coordinated action.

(3) In accordance with Article 148(4) of the Treaty on the Functioning of the European Union (TFEU), the Council, on 21 October 2010, adopted guidelines for employment policies which, together with the broad guidelines for the economic policies of the Member States and of the Union adopted in accordance with Article 121 TFEU, comprise the Europe 2020 integrated guidelines. The Programme should contribute to achieving the Europe 2020 targets, especially its poverty reduction and employment objectives, as defined in the Employment Guidelines. To that end, the Programme should support the implementation of the flagship initiatives, with special regard to the European Platform against Poverty and Social Exclusion, an Agenda for New Skills and Jobs, and Youth on the Move, as well as the Youth Employment Package.

(4) The Europe 2020 flagship initiatives entitled "European Platform against Poverty and Social Exclusion" and "Innovation Union" identify social innovation as a powerful tool for addressing the social challenges arising from population ageing, poverty, unemployment, new work patterns and life styles, and the expectations of citizens regarding social justice, education and health care. The Programme should support action to increase social innovation, in response to social needs that are not met or that are met insufficiently, in respect of combating poverty and social exclusion, promoting a high level of quality and sustainable employment, guaranteeing adequate and poverty-preventing social protection, improving working conditions and improving access to training for vulnerable people,

⁽¹⁾ OJ C 143, 22.5.2012, p. 88.

⁽²⁾ OJ C 225, 27.7.2012, p. 167.

⁽³⁾ Position of the European Parliament of 21 November 2013. (not yet published in the Official Journal)

⁽⁴⁾ Decision No 1672/2006/EC of the European Parliament and of the Council of 24 October 2006 establishing a Community Programme for Employment and Social Solidarity – PROGRESS (OJ L 315, 15.11.2006, p. 1).

⁽⁵⁾ Regulation (EU) No 492/2011 of the European Parliament and of the Council of 5 April 2011 on freedom of movement for workers within the Union (OJ L 141, 27.5.2011, p. 1).

⁽⁶⁾ Commission Implementing Decision 2012/733/EU of 26 November 2012 implementing Regulation (EU) No 492/2011 of the European Parliament and of the Council as regards the clearance of vacancies and application for employment and the re-establishment of EURES (OJ L 328, 28.11.2012, p. 21).

⁽⁷⁾ Decision No 283/2010/EU of the European Parliament and of the Council of 25 March 2010 establishing a European Progress Microfinance Facility for employment and social inclusion (OJ L 87, 7.4.2010, p. 1).

- taking due account of the role of regional and local authorities. The Programme should also act as a catalyst for transnational partnerships and networking between public, private and third-sector actors, as well as supporting their involvement in designing and implementing new approaches to tackling pressing social needs and challenges.
- (5) In particular, the Programme should help to identify and to analyse innovative solutions, and to scale up their practical implementation, through social policy experimentation, so as to assist, where necessary, Member States to increase the efficiency of their labour markets and to further improve their social protection and inclusion policies. Social policy experimentation is project-based field testing of social innovations. It allows the gathering of evidence on the feasibility of social innovations. It should be possible for successful ideas to be pursued on a wider scale with financial support from the European Social Fund (ESF), as well as from other sources.
- (6) The open method of coordination, which has proved its flexibility and operational effectiveness in employment and social policy areas, should be widely used and should benefit from actions supported by the Programme.
- (7) Progress towards socially and environmentally sustainable development in Europe requires the anticipation and development of new skills and competencies, leading to an improvement in the conditions for job creation, in the quality of employment and in working conditions, through accompanying education, labour market and social policies in connection with the transformation of industries and services. The Programme should, therefore, contribute to promoting the creation of quality and sustainable 'green', 'white' and ICT jobs, as well as to anticipating and developing new skills and competencies for new quality and sustainable jobs, by linking employment and social policies with industrial and structural policies and by supporting a transition towards a resource-efficient and low carbon economy. In particular, the Programme should act as a catalyst for exploring the job creation potential of public sector-led green and social investments and of local and regional employment initiatives.
- (8) The Programme should, where relevant, take account of the territorial dimension of unemployment, poverty and social exclusion, and especially of the increasing inequalities that exist within and between regions, between rural areas and cities and within cities.
- (9) It is necessary to consolidate the social dimensions of the internal market. Given the need to enhance confidence in the internal market, including the free movement of services, through ensuring respect for workers' rights, it is necessary to ensure that the respective rights of workers and entrepreneurs to freedom of movement are accorded equal status throughout the Union.
- (10) In line with Europe 2020, the Programme should pursue a coherent approach to promoting quality and sustainable employment, as well as to combating and preventing social exclusion and poverty, while taking into account the need to respect equality between women and men. The implementation of the Programme should be rationalised and simplified, notably through the establishment of a set of common provisions including, inter alia, general objectives and monitoring and evaluation arrangements. The Programme should focus on projects, irrespective of their size, with clear Union added value. In order to reduce administrative burdens, the Programme should support the creation and development of networks and partnerships. In addition, greater use should be made of simplified cost options (lump-sum and flat-rate financing), in particular for the implementation of mobility schemes, while ensuring transparency of proceedings. The Programme should be a "one-stop shop" for microfinance providers at Union level, providing financing for micro-credits and social entrepreneurship, facilitating access to borrowing and providing technical assistance.
- (11) Taking into account the limited funds available to the Programme and the pre-allocation of these funds to the various axes, funding priority should be given to the development of structures with a clear multiplier effect which will benefit further activities and initiatives. Appropriate measures should also be put in place to avoid any possibility of overlap or double-financing with other funds or programmes, in particular the ESF.
- (12) The Union should equip itself with evidence based on a sound analysis in order to support policy-making in the employment and social area, paying special attention to the impact of financial and economic crises. Such evidence adds value to national action by providing a Union dimension and a comparison for data-gathering and by developing statistical tools and methods and common indicators, for the purpose of composing a full picture of the situation in the fields of employment, social policy and working conditions across the Union and of ensuring high-quality evaluation of the efficiency and effectiveness of programmes and policies with a view, inter alia, to reaching the Europe 2020 targets.

- (13) The Union is uniquely placed to provide a platform for policy exchanges and mutual-learning between countries participating in the Programme in the areas of employment, social protection and social inclusion, as well as social entrepreneurship. Knowledge of policies applied in other countries and of their results, including those achieved through social policy experimentation at local, regional and national level, broadens the range of options available to policy-makers, thereby triggering new policy developments.
- (14) Ensuring that minimum standards are in place and that working conditions improve constantly in the Union is a central feature of Union social policy. The Union has an important role to play in ensuring that the legislative framework is adapted to evolving work patterns and new health and safety risks, taking into account 'decent work' as well as 'Smart Regulation' principles. The Union also has an important role to play in financing measures to improve compliance with labour standards under ratified International Labour Organisation (ILO) conventions and Union rules on the protection of workers' rights. This is particularly the case of measures for raising awareness (e.g. through a social label), for disseminating information and for promoting the debate about the key challenges and policy issues in relation to working conditions, including among the social partners and other stakeholders, as well as for promoting work-life balance measures, for initiating preventive actions and for fostering the prevention culture in the field of health and safety at work.
- (15) Social partners and civil society organisations play a key role in promoting quality employment and combating social exclusion and poverty, as well as in fighting unemployment. Therefore, the social partners and civil society organisations should, where appropriate, be involved in mutual learning and in the development, implementation and dissemination of new policies. The Commission should inform and exchange views with Union social partners and the civil society organisations on the results concerning the implementation of the Programme.
- (16) The Union is committed to strengthening the social dimension of globalisation, and to combating social dumping, by promoting decent work and labour standards, not only in countries participating in the Programme, but also internationally, either directly vis-à-vis third countries or indirectly through cooperation with international organisations. Accordingly, suitable relations need to be developed with third countries not participating in the Programme in order to help achieve its objectives, having regard to any agreements of relevance between such countries and the Union. This may involve the attendance of representatives of those third countries at events of mutual interest (such as conferences, workshops and seminars) that take place in countries participating in the Programme. In addition, cooperation should be developed with the international organisations concerned, in particular the ILO and other relevant United Nations bodies, the Council of Europe and the Organisation for Economic Cooperation and Development (OECD), with a view to implementing the Programme in a way that takes the role of such organisations into account.
- (17) In accordance with Articles 45 and 46 TFEU, Regulation (EU) No 492/2011 lays down provisions intended to achieve freedom of movement for workers on a non-discriminatory basis by ensuring the close cooperation of the central employment services of Member States with one another and with the Commission. EURES, which is the European network of employment services, should promote the better functioning of the labour markets by facilitating the voluntary transnational cross-border geographical mobility of workers, providing greater transparency on the labour market, ensuring the clearance of vacancies and applications for employment and supporting activities in the areas of placement, recruitment, advice and guidance services at national and cross-border level, thereby contributing to the objectives of Europe 2020. Member States should be encouraged to integrate EURES services, making them available in a "one-stop shop", where appropriate.
- (18) The scope of EURES should be broadened to include developing and supporting targeted mobility schemes, after calls for proposals, at Union level with a view to filling vacancies where labour market shortcomings have been identified. In accordance with Article 47 TFEU, those schemes should support facilitating voluntary mobility among young workers in the Union. Targeted mobility schemes, such as those based on the preparatory action 'Your first EURES job', should make it easier for young people to access employment opportunities and to take up a job in another Member State, and should also encourage employers to create job openings for young mobile workers. Nevertheless, mobility schemes should not discourage the Union and Member States from helping young people to find a job in their home country.
- (19) In many border regions EURES cross-border partnerships play an important role in developing a genuine European labour market. EURES cross-border partnerships involve at least two Member States or a Member State and another participating country. Consequently, they are clearly horizontal in nature, and are a source of Union added value. EURES cross-border partnerships should therefore continue to be supported through horizontal Union activities, with the possibility of being complemented by national resources or by the ESF.

- (20) The evaluation of EURES activities should take qualitative and quantitative criteria into account. Since outgoing placements in one Member State result in incoming placements in another and depend on the ever-changing labour market situations and related mobility patterns, the evaluation should focus not only on incoming or outgoing placements in individual Member States but also on aggregated figures at Union level. Furthermore, it should be borne in mind that counselling does not necessarily result in measurable mobility or in job placements.
- (21) Europe 2020, and in particular Guideline 7 provided for in Council Decision 2010/707/EU ⁽¹⁾, identifies self-employment and entrepreneurship as crucial to achieving smart, sustainable and inclusive growth.
- (22) Lack of access to credit, equity or quasi-equity is one of the main obstacles to business creation, especially among people furthest from the labour market. Union and national efforts in this area need to be intensified in order to increase the supply of, and access to, microfinance so as to meet demand from those who need it most, and in particular the unemployed, women and vulnerable people who wish to start up or develop a micro-enterprise, including on a self-employed basis, but who do not have access to credit. In addition, micro-enterprises make up the majority of newly-formed companies in the Union. Therefore, it should be possible for microcredits to provide a means of adding value and achieving concrete results rapidly. As a first step, in 2010 the European Parliament and the Council set up the Facility. Communication activities on microfinance opportunities at Union and Member State level should be improved so as to better reach those in need of micro-financing.
- (23) Microfinancing and support to social entrepreneurship should reach potential beneficiaries and should have long-lasting impact. They should contribute to a high level of quality and sustainable employment and serve as a catalyst for both economic and local development policies. In order to maximise the opportunities for creating viable enterprises, actions involving microfinance and social entrepreneurship should be accompanied by mentoring and training programmes and all relevant information, which should be regularly updated and made available to the public by the finance provider concerned. To this end, it is essential that adequate financing be provided, notably through the ESF.
- (24) Making microfinance more available on the Union's young microfinance market makes it necessary for the institutional capacity of microfinance providers, and in particular of non-bank microfinance institutions, to be increased in line with the Commission Communication of 13 November 2007 entitled 'A European Initiative for the development of micro-credit in support of growth and employment' and the Commission Report of 25 July 2008 entitled 'Promotion of Women Innovators and Entrepreneurship'.
- (25) The social economy and social entrepreneurship constitute an integral part of Europe's pluralist social market economy, and play an important role in ensuring greater social convergence in Europe. They are founded on the principles of solidarity and responsibility and of the primacy of the individual and of social objectives over capital, and on the promotion of social responsibility, social cohesion and social inclusion. Social enterprises can act as drivers of social change by offering innovative solutions, promoting inclusive labour markets and social services accessible to all. They therefore make a valuable contribution to meeting the objectives of Europe 2020. The Programme should improve access by social enterprises to different types of finance by providing suitable instruments to meet their specific financial needs throughout their lifecycle.
- (26) In order to capitalise on the experience of entities such as the European Investment Bank Group, action involving microfinance and social entrepreneurship should be implemented by the Commission indirectly by entrusting budget implementation tasks to such entities in accordance with Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council ⁽²⁾ ("the Financial Regulation"). The use of Union resources concentrates leverage from international financial institutions and other investors, creates synergies between Member State and Union action and unifies approaches. It thus improves the access to finance of particular at-risk groups and young people, as well as the outreach of microfinance to them. Access to finance for micro-enterprises, including the self-employed and social enterprises, is also improved. The Union contribution thus assists in the development of the emerging social business sector and the microfinance market in the Union and encourages cross-border activities. The Union's actions should complement the use by Member States of financial instruments for microfinance and social entrepreneurship. The entities entrusted with the implementation of the actions should ensure that they add Union value and do not duplicate other financing through Union resources.

⁽¹⁾ Council Decision 2010/707/EU of 21 October 2010 on guidelines for the employment policies of the Member States (OJ L 308, 24.11.2010, p. 46).

⁽²⁾ Regulation (EU, EURATOM) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

- (27) In accordance with Europe 2020, the Programme should contribute to tackling the pressing problem of youth unemployment. Young people should, therefore, be given a future and the prospect of playing a key role in developing society and the economy in Europe, which is of particular importance in times of crisis.
- (28) The Programme should also point to the special role and importance of small enterprises regarding training, expertise and traditional know-how, as well as ensure that young people have access to microfinance. The Programme should facilitate the exchange of best practices between the Member States and other countries participating in the Programme in all those areas.
- (29) Actions under the Programme should support the implementation by the Member States and labour market actors of Council Recommendation of 22 April 2013 ⁽¹⁾ concerning the establishment of a Youth Guarantee. That Recommendation states that all young people under the age of 25 should receive a good-quality offer of employment, continued education, an apprenticeship or a traineeship within a period of four months of becoming unemployed or leaving formal education. The Programme should facilitate the exchange of best practice between the Member States and other countries participating in the Programme in this area.
- (30) Pursuant to Article 3(3) of the Treaty on European Union (TEU) and Article 8 TFEU, it is necessary to ensure that the Programme contributes to the promotion of equality between women and men in all its axes and activities, including through gender mainstreaming and, where relevant, through specific action to promote women's employment and social inclusion. Pursuant to Article 10 TFEU, the Programme should ensure that the implementation of its priorities contributes to combating discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation. Monitoring and evaluation should be carried out to assess the way in which anti-discrimination issues are addressed in the Programme's activities.
- (31) The Progress Programme for the period 2007-2013 includes sections entitled 'Antidiscrimination and diversity' and 'Gender equality' that are to be continued and further developed under the Rights, Equality and Citizenship Programme for the period 2014-2020. It is, however, of the utmost importance to maintain a strong focus on equality between women and men and on anti-discrimination issues in all relevant initiatives and actions covered by this Programme, especially in the fields of improving women's labour force participation, working conditions and promoting a better balance between professional and private lives.
- (32) Pursuant to Article 9 TFEU and the objectives of Europe 2020, the Programme should contribute to ensuring a high-level of quality and sustainable employment, to guaranteeing adequate social protection and to combating poverty and social exclusion, and should take into account the requirements linked to a high level of protection of human health.
- (33) The Programme should complement other Union programmes, while acknowledging that each instrument should operate in accordance with its own specific procedures. Thus, the same eligible costs should not result in double funding. With the aim of adding value and achieving substantial impact through Union funding, close synergies should be developed between the Programme, other Union programmes and the Structural Funds, especially the ESF and the Youth Employment Initiative. The Programme should complement other Union programmes and initiatives that focus on combating youth unemployment.
- (34) The Programme should be implemented in a way that makes it easier for the competent authority or authorities of each Member State to contribute to meeting the Programme's objectives.
- (35) To ensure more efficient communication to the public at large and stronger synergies between the communication actions undertaken at the initiative of the Commission, the resources allocated to information and communication activities under this Programme should also contribute to corporate communication of, and to the provision of information on, the political priorities of the Union related to the general objectives of this Programme.
- (36) This Regulation lays down a financial envelope for the entire duration of the Programme which is to constitute the prime reference amount, within the meaning of Point 17 of the Interinstitutional Agreement [of 2 December 2013] between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management ⁽²⁾, for the European Parliament and the Council during the annual budgetary procedure.
- (37) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, wrongly paid or incorrectly used and, where appropriate, penalties in accordance with the Financial Regulation.

⁽¹⁾ Council Recommendation of 22 April 2013 on establishing a Youth Guarantee (OJ C 120, 26.4.2013, p. 1).

⁽²⁾ OJ C 373, 20.12.2013, p. 1.

(38) In order to ensure that the Programme is sufficiently flexible to respond to changing needs and corresponding policy priorities throughout its duration, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of the reallocation of funds between the axes and to the individual thematic sections within the axes of the Programme. The Commission, when preparing and drawing-up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and Council.

(39) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽¹⁾.

(40) Since the objectives of this Regulation cannot be sufficiently achieved by the Member States but can rather, by reason of their scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 TEU. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary to achieve those objectives,

HAVE ADOPTED THIS REGULATION:

TITLE I

COMMON PROVISIONS

Article 1

Subject matter

1. This Regulation establishes a European Union Programme for Employment and Social Innovation ('the Programme') which aims to contribute to the implementation of Europe 2020, including its headline targets, Integrated Guidelines and flagship initiatives, by providing financial support for the Union's objectives in terms of promoting a high level of quality and sustainable employment, guaranteeing adequate and decent social protection, combating social exclusion and poverty and improving working conditions.

2. The Programme shall run from 1 January 2014 to 31 December 2020.

Article 2

Definitions

For the purposes of this Regulation:

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

(1) 'social enterprise' means an undertaking, regardless of its legal form, which:

(a) in accordance with its Articles of Association, Statutes or with any other legal document by which it is established, has as its primary objective the achievement of measurable, positive social impacts rather than generating profit for its owners, members and shareholders, and which:

(i) provides services or goods which generate a social return and/or

(ii) employs a method of production of goods or services that embodies its social objective;

(b) uses its profits first and foremost to achieve its primary objective and has predefined procedures and rules covering any distribution of profits to shareholders and owners that ensure that such distribution does not undermine the primary objective; and

(c) is managed in an entrepreneurial, accountable and transparent way, in particular by involving workers, customers and stakeholders affected by its business activities;

(2) 'microcredit' means a loan of up to EUR 25 000;

(3) 'micro-enterprise' means an enterprise, including a self-employed person, that employs fewer than 10 people and whose annual turnover or annual balance sheet total does not exceed EUR 2 million, in accordance with Commission Recommendation 2003/361/EC ⁽²⁾,

(4) 'microfinance' includes guarantees, microcredit, equity and quasi-equity extended to persons and micro-enterprises that experience difficulties accessing credit;

(5) 'social innovations' are innovations that are social both as to their ends and their means and in particular those which relate to the development and implementation of new ideas (concerning products, services and models), that simultaneously meet social needs and create new social relationships or collaborations, thereby benefiting society and boosting its capacity to act;

⁽²⁾ Commission Recommendation 2003/361/EC of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises (OJ L 124, 20.5.2003, p. 36).

- (6) 'social policy experimentation' means policy interventions that offer an innovative response to social needs, implemented on a small scale and in conditions that enable their impact to be measured, prior to being repeated on a larger scale, if the results prove convincing.

Article 3

Structure of the Programme

1. The Programme shall be made up of the following three complementarity axes:

- (a) The Progress axis, which shall support the development, implementation, monitoring and evaluation of the Union instruments and policies referred to in Article 1 and relevant Union law, and which shall promote evidence-based policy-making, social innovation and social progress, in partnership with the social partners, civil society organisations and public and private bodies;
- (b) The EURES axis, which shall support activities carried out by EURES, namely, the specialist services designated by the EEA states and the Swiss Confederation, together with social partners, other employment service providers and other interested parties, to develop information exchanges and dissemination and other forms of cooperation, such as cross-border partnerships, to promote voluntary geographical mobility for workers on a fair basis and to contribute to a high level of quality and sustainable employment;
- (c) The Microfinance and Social Entrepreneurship axis, which shall increase the access to, and the availability of, financing for legal and physical persons, pursuant to Article 26.

2. The common provisions laid down in this Title shall apply to all three axes set out in points (a), (b) and (c) of paragraph 1, in addition to specific provisions of Title II.

Article 4

General objectives of the Programme

1. The Programme shall seek to achieve the following general objectives:

- (a) strengthen ownership among policy-makers at all levels, and produce concrete, coordinated and innovative actions at both Union and Member State level, in respect of the Union objectives in the fields referred to in Article 1, in close collaboration with the social partners, as well as civil society organisations and public and private bodies;
- (b) support the development of adequate, accessible and efficient social protection systems and labour markets and

facilitate policy reform, in the fields referred to in Article 1, notably by promoting decent work and working conditions, a prevention culture for health and safety at work, a healthier balance between professional and private life and good governance for social objectives, including convergence, as well as mutual learning and social innovation;

- (c) ensure that Union law on matters relating to the fields referred to in Article 1 is effectively applied, and, where necessary, contribute to modernising Union law, in line with decent work principles and taking into account the Smart Regulation principles;

- (d) promote workers' voluntary geographical mobility on a fair basis and boost employment opportunities by developing high-quality and inclusive Union labour markets that are open and accessible to all, while respecting workers' rights throughout the Union, including freedom of movement;

- (e) promote employment and social inclusion by increasing the availability and accessibility of microfinance for vulnerable people who wish to start up a micro-enterprise as well as for existing micro-enterprises, and by increasing access to finance for social enterprises.

2. In pursuing those objectives, the Programme shall, in all its axes and actions, aim to:

- (a) pay particular attention to vulnerable groups, such as young people;
- (b) promote equality between women and men, including through gender mainstreaming and, where appropriate, gender budgeting;
- (c) combat discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation;
- (d) when defining and implementing the Union's policies and activities, promote a high-level of quality and sustainable employment, guarantee adequate and decent social protection, combat long-term unemployment and fight against poverty and social exclusion.

Article 5

Budget

1. The financial envelope for the implementation of the Programme for the period from 1 January 2014 to 31 December 2020 shall amount to EUR 919 469 000, in current prices.

2. The following indicative percentages shall be allocated to the axes set out in Article 3(1):

- (a) 61 % to the Progress axis;

(b) 18 % to the EURES axis;

(c) 21 % to the Microfinance and Social Entrepreneurship axis.

3. The Commission may make use of up to 2 % of the financial envelope referred to in paragraph 1 to finance operational expenditure for the support of the implementation of the Programme.

4. The Commission may make use of the financial envelope referred to in paragraph 1 to finance technical and/or administrative assistance, in particular relating to auditing, outsourcing of translation, meetings of experts, and information and communication activities for the mutual benefit of the Commission and the beneficiaries.

5. Annual appropriations shall be authorised by the European Parliament and the Council within the limits of the multiannual financial framework.

Article 6

Joint action

Actions eligible under the Programme may be implemented jointly with other Union instruments, provided that such actions meet the objectives of both the Programme and the other instruments concerned.

Article 7

Consistency and complementarity

1. The Commission, in cooperation with the Member States, shall ensure that activities carried out under the Programme are consistent with, and complementary to, other Union action, such as the European Structural and Investment Funds (ESIFs), as specified in the Common Strategic Framework laid down in Regulation (EU) No 1303/2013 of the European Parliament and of the Council⁽¹⁾, and in particular under the ESF.

2. The Programme shall complement other Union programmes, without prejudice to the specific procedures of those programmes. The same eligible costs shall not result in double funding, and close synergies shall be developed between the Programme, other Union programmes and ESIFs, in particular the ESF.

3. The activities supported by the Programme shall comply with Union and national law, including state aid rules, and fundamental ILO Conventions.

⁽¹⁾ Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund covered by the Common Strategic Framework and laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund (See page 320 of this Official Journal).

4. Consistency and complementarity shall also be ensured through close involvement by local and regional authorities.

Article 8

Cooperation with relevant bodies

The Commission shall establish the necessary links with the Employment Committee, the Social Protection Committee, the Advisory Committee on Health and Safety at Work, the Group of Directors-General for Industrial Relations and the Advisory Committee on Freedom of Movement of Workers in order to ensure that they are regularly and appropriately informed of progress in implementing the Programme. The Commission shall also inform other committees dealing with policies, instruments and actions of relevance to the Programme.

Article 9

Dissemination of results and communication

1. The Commission shall inform Union stakeholders, including social partners and civil society organisations, of the results of the implementation of the Programme and shall invite an exchange of views in that regard.

2. The results of the actions implemented under the Programme shall be regularly and suitably communicated and disseminated to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions, as well as to the social partners and to the public in order to maximise their impact, sustainability and Union added value.

3. Communication activities shall also contribute to corporate communication of the political priorities of the Union as far as they relate to the general objectives of this Regulation, and shall provide information on those priorities to the public.

Article 10

Financial provisions

1. The Commission shall manage the Programme in accordance with the Financial Regulation.

2. The grant agreement shall specify what part of the Union financial contribution will be based on the reimbursement of actual eligible costs, and what part will be based on flat rates, unit costs or lump-sums.

Article 11

Protection of the financial interests of the Union

1. The Commission shall take appropriate preventive measures to ensure that, when actions financed under this Programme are implemented, the financial interests of the Union are protected against fraud, corruption and any other illegal activities, by effective checks and that, if irregularities are detected, resources are recovered, primarily via offsetting of amounts wrongly paid but, where appropriate, by

imposing effective, proportionate and dissuasive penalties, in accordance with Article 325 TFEU, Council Regulation (EC, Euratom) No 2988/95 ⁽¹⁾ and the Financial Regulation.

2. The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on-the-spot checks, in respect of all grant beneficiaries, contractors and subcontractors who have received Union funds under the Programme.

3. The European Anti-Fraud Office (OLAF) may carry out investigations, including on-the-spot checks and inspections, in accordance with the provisions and procedures laid down in Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council ⁽²⁾ and Council Regulation (Euratom, EC) No 2185/96 ⁽³⁾ with a view to establishing whether fraud, corruption or any other illegal activity has occurred affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract funded under the Programme.

4. Without prejudice to paragraphs 1, 2 and 3, contracts, grant agreements and grant decisions, resulting from the implementation of this Programme shall contain provisions expressly empowering the Commission, the Court of Auditors and OLAF to conduct the audits and investigations referred to in those paragraphs, in accordance with their respective competences.

Article 12

Monitoring

With a view to regular monitoring of the Programme and to making any adjustments needed to its policy and funding priorities, the Commission shall draw up an initial qualitative and quantitative monitoring report covering the first year, followed by three reports covering consecutive two-year periods and shall send those reports to the European Parliament and the Council. The reports shall also be transmitted, for information purposes, to the European Economic and Social Committee and the Committee of the Regions. The reports shall cover the Programme's results and the extent to which the principles of equality between women and men and gender mainstreaming have been applied, as well as how anti-discrimination considerations, including accessibility issues, have been addressed through its activities. The reports shall be made available to the public in order to enhance the transparency of the Programme.

⁽¹⁾ Council Regulation (EC, Euratom) No 2988/95 of 18 December 1995 on the protection of the European Communities' financial interests (OJ L 312, 23.12.1995, p. 1).

⁽²⁾ Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1).

⁽³⁾ Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).

Article 13

Evaluation

1. A mid-term evaluation of the Programme shall be carried out by 1 July 2017 to measure, on a qualitative and quantitative basis, progress made in meeting the Programme's objectives, to address the social environment within the Union and any major changes introduced by Union legislation, to determine whether the resources of the Programme have been used efficiently and to assess its Union added value. The results of that mid-term evaluation shall be presented to the European Parliament and to the Council.

2. If the evaluation referred to in paragraph 1 of this Article, or any evaluation carried out pursuant to Article 19 of Decision No 1672/2006/EC or Article 9 of Decision No 283/2010/EU, reveals that the Programme has major shortcomings, the Commission shall, if appropriate, submit a proposal to the European Parliament and to the Council, including appropriate amendments to the Programme to take account of the results of the evaluation.

3. Before submitting any proposal for a prolongation of the Programme beyond 2020, the Commission shall present to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions an evaluation of the conceptual strengths and weaknesses of the Programme in the period 2014 to 2020.

4. By 31 December 2022, the Commission shall evaluate ex-post the impact and Union added value of the Programme and shall forward a report containing that evaluation to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions. The report shall be made available to the public.

TITLE II

PROVISIONS SPECIFIC TO PROGRAMME AXES

CHAPTER I

Progress Axis

Article 14

Thematic sections and financing

1. The Progress axis shall support actions in one or more of the thematic sections listed in points (a), (b) and (c). Over the entire period of the Programme, the indicative breakdown of the allocation set out in point (a) of Article 5(2) between the different sections shall respect the following minimum percentages:

- (a) employment, in particular to fight youth unemployment: 20 %;
- (b) social protection, social inclusion and the reduction and prevention of poverty: 50 %;
- (c) working conditions: 10 %.

Any remainder shall be allocated to one or more of the thematic sections referred to in points (a), (b) or (c) or to a combination of them.

2. From the overall allocation for the Progress axis, and within its different thematic sections, 15 % to 20 % shall be allocated to the promotion of social experimentation as a method for testing and evaluating innovative solutions with a view to up-scaling them.

Article 15

Specific objectives

In addition to the general objectives set out in Article 4, the specific objectives of the Progress axis shall be to:

- (a) develop and disseminate high-quality comparative analytical knowledge, in order to ensure that Union policies in the fields referred to in Article 1 are based on sound evidence and are relevant to needs, challenges and conditions in the individual Member States and other countries participating in the Programme;
- (b) facilitate effective and inclusive information-sharing, mutual learning and dialogue on Union policies in the fields referred to in Article 1, at Union, national and international level in order to assist the Member States and other countries participating in the Programme in developing their policies and the Member States in implementing Union law;
- (c) provide financial support to test social and labour market policy innovations, and, where necessary, to build up the main actors' capacity to design and implement social policy experimentation, and to make the relevant knowledge and expertise accessible;
- (d) provide Union and national organisations with financial support to increase their capacity to develop, promote and support the implementation of Union instruments and policies as referred to in Article 1 and relevant Union law.

Article 16

Types of actions

The following types of actions may be financed under the Progress axis:

1. Analytical activities:

- (a) gathering of data and statistics, taking account of both qualitative and quantitative criteria, and developing common methodologies, classifications, micro-simulations, indicators and benchmarks, where appropriate broken down by sex and age-group;

- (b) surveys, studies, analyses and reports, including through the funding of networks of experts and development of expertise in thematic sections;

- (c) qualitative and quantitative evaluations and impact assessments carried out by both public and private bodies;

- (d) monitoring and assessment of the transposition and application of Union law;

- (e) preparation and implementation of social policy experimentation as a method for testing and evaluating innovative solutions with a view to up-scaling them;

- (f) dissemination of the results of those analytical activities.

2. Mutual-learning, awareness and dissemination activities:

- (a) exchanges and dissemination of good practice, innovative approaches and experience, peer reviews, benchmarking and mutual learning at European level;

- (b) Council Presidency events, conferences and seminars;

- (c) training of legal and policy practitioners;

- (d) drafting and publication of guides, reports and educational material and measures relating to information, communication and media coverage of initiatives supported by the Programme;

- (e) information and communication activities;

- (f) development and maintenance of information systems in order to exchange and disseminate information on Union policy and legislation and on the labour market.

3. Support with regard to:

- (a) the operating costs of key Union-level networks the activities of which relate to and contribute to the objectives of the Progress axis;

- (b) capacity-building of national administrations and specialist services responsible for promoting geographical mobility designated by the Member States and micro-credit providers;

- (c) organisation of working groups of national officials to monitor the implementation of Union law;

- (d) networking and cooperation among specialist bodies and other relevant stakeholders, national, regional and local authorities and employment services at European level;
- (e) funding of European-level observatories, including on key thematic sections;
- (f) exchange of personnel between national administrations.

Article 17

Union co-financing

Where activities under the Progress axis are financed following a call for proposals, they may receive Union co-financing which shall not exceed, as a general rule, 80 % of the total eligible expenditure. Any financial support in excess of this ceiling shall only be granted in duly justified exceptional circumstances.

Article 18

Participation

1. Participation in the Progress axis shall be open to:
 - (a) Member States;
 - (b) EEA countries, in accordance with the EEA Agreement, and EFTA member states;
 - (c) the candidate countries and potential candidates, in accordance with the general principles and the general terms and conditions laid down in the framework agreements concluded with them on their participation in Union programmes.
2. The Progress axis shall be open to all public and/or private bodies, actors and institutions, and in particular:
 - (a) national, regional and local authorities;
 - (b) employment services;
 - (c) specialist bodies provided for under Union law;
 - (d) the social partners;
 - (e) non-governmental organisations;
 - (f) higher education institutions and research institutes;
 - (g) experts in evaluation and in impact assessment;
 - (h) national statistical offices;
 - (i) the media.

3. The Commission may cooperate with international organisations, and in particular with the Council of Europe, the OECD, the ILO, with other United Nations bodies and with the World Bank.

4. The Commission may cooperate with third countries which are not participating in the Programme. Representatives of such third countries may attend events of mutual interest (such as conferences, workshops and seminars) that take place in countries participating in the Programme, and the cost of their attendance may be covered by the Programme.

CHAPTER II

EURES Axis

Article 19

Thematic sections and financing

The EURES axis shall support actions in one or more of the thematic sections listed in points (a), (b) and (c). Over the entire period of the Programme, the indicative breakdown of the allocation set out in point (b) of Article 5(2) between the different sections shall respect the following minimum percentages:

- (a) transparency of job vacancies, applications and any related information for applicants and employers: 32 %;
- (b) development of services for the recruitment and placing of workers in employment through the clearance of job vacancies and applications at Union level, in particular targeted mobility schemes: 30 %;
- (c) cross-border partnerships: 18 %.

Any remainder shall be allocated to one or more of the thematic sections referred to in points (a), (b), or (c), or to a combination of them.

Article 20

Specific objectives

In addition to the general objectives set out in Article 4, the specific objectives of the EURES axis shall be to:

- (a) ensure that job vacancies and applications and corresponding information and advice, as well as any related information such as that concerning living and working conditions, are made transparent for the potential applicants and the employers, respectively. This shall be achieved through exchange and dissemination at transnational, interregional and cross-border level, through the use of standard interoperability forms for job vacancies and applications and through other suitable means, such as individual counselling and mentoring, especially for the low skilled;

- (b) support the provision of EURES services for the recruitment and placing of workers in quality and sustainable employment through the clearance of job vacancies and applications; support for EURES services shall extend to various phases of placement, ranging from pre-recruitment preparation to post-placement assistance with a view to the applicant's successful integration into the labour market; such support services may include targeted mobility schemes to fill job vacancies in a certain sector, occupation, country or a group of countries or for particular groups of workers, such as young people, with a propensity to be mobile, where a clear economic need has been identified.

Article 21

Types of Actions

The EURES axis may be used to finance actions to promote voluntary mobility of individuals in the Union, on a fair basis, and to remove mobility obstacles, and in particular:

- (a) the development and the activities of EURES cross-border partnerships where requested by services territorially responsible for border regions;
- (b) the provision of information, counselling, placement and recruitment services for cross-border workers;
- (c) the development of the multilingual digital platform for the clearance of job vacancies and applications;
- (d) the development of targeted mobility schemes, following calls for proposals, to fill job vacancies where labour market shortcomings have been identified, and/or to help workers with a propensity to be mobile, where a clear economic need has been identified;
- (e) mutual learning among EURES actors and training of EURES advisors, including EURES cross-border partnership advisors;
- (f) information and communication activities to raise awareness of the benefits of geographical and occupational mobility in general and of the activities and services provided by EURES.

Article 22

Union co-financing

Where activities under the EURES axis are financed following a call for proposals, they may receive Union co-financing which shall not exceed, as a general rule, 95 % of the total eligible expenditure. Any financial support in excess of this ceiling shall only be granted in duly justified exceptional circumstances.

Article 23

Monitoring of Mobility Patterns

In order to detect and prevent negative effects arising in connection with inter-Union geographical mobility, the Commission shall, together with the Member States, in accordance with Article 12 of Regulation (EU) No 492/2011, regularly monitor mobility flows and patterns.

Article 24

Participation

1. Participation in the EURES axis shall be open to:

- (a) Member States;
- (b) EEA countries, in accordance with the EEA Agreement, and the Swiss Confederation, in accordance with the Agreement between the European Community and its Member States, of the one part, and the Swiss Confederation, of the other, on the free movement of persons ⁽¹⁾.

2. The EURES axis shall be open to all bodies, actors and institutions designated by a Member State or by the Commission which fulfil the conditions for participating in EURES, as set out in Commission Implementing Decision 2012/733/EU. Such bodies, actors and institutions shall include in particular:

- (a) national, regional and local authorities;
- (b) employment services;
- (c) social partner organisations and other interested parties.

CHAPTER III

Microfinance and Social Entrepreneurship Axis

Article 25

Thematic sections and financing

The Microfinance and Social Entrepreneurship axis shall support actions in one or more of the thematic sections listed in points (a) and (b). Over the entire period of the Programme, the indicative breakdown of the allocation set out in point (c) of Article 5(2) between the different sections shall respect the following minimum percentages:

- (a) microfinance for vulnerable groups and micro-enterprises: 45 %;
- (b) social entrepreneurship: 45 %.

⁽¹⁾ OJ L 114, 30.4.2002, p. 6.

Any remainder shall be allocated to the thematic sections referred to in points (a) or (b) or to a combination of them.

Article 26

Specific objectives

In addition to the general objectives set out in Article 4, the specific objectives of the Microfinance and Social Entrepreneurship axis shall be to:

- (a) increase access to, and the availability of, microfinance for:
 - (i) vulnerable persons who have lost or are at risk of losing their job, or have difficulty in entering or re-entering the labour market, or are at risk of social exclusion, or are socially excluded, and are in a disadvantaged position with regard to access to the conventional credit market and who wish to start up or develop their own micro-enterprises;
 - (ii) micro-enterprises in both start-up and development phase, especially micro-enterprises which employ persons as referred to in point (i);
- (b) build up the institutional capacity of microcredit providers;
- (c) support the development of the social investment market and facilitate access to finance for social enterprises by making equity, quasi-equity, loan instruments and grants of up to EUR 500 000 available to social enterprises with either an annual turnover not exceeding EUR 30 million, or an annual balance sheet total not exceeding EUR 30 million which are not themselves a collective investment undertaking.

In order to ensure complementarity, the Commission and the Member States shall, in their respective areas of competence, closely coordinate these actions with those undertaken in the framework of cohesion policy and national policies.

Article 27

Types of actions

Support to microfinance and social enterprises, including for institutional capacity building, in particular through the financial instruments provided for under Title VIII of Part one of the Financial Regulation, and grants may be provided under the Microfinance and Social Enterprises axis.

Article 28

Participation

1. Participation under the Microfinance and Social Entrepreneurship axis shall be open to public and private bodies established at national, regional or local level in the countries referred to in Article 18(1) and providing in those countries:

- (a) microfinance for persons and micro-enterprises; and/or
- (b) financing for social enterprises.

2. The Commission shall ensure that the axis is accessible, without discrimination, to all public and private bodies in the Member States.

3. In order to reach out to the final beneficiaries and create competitive, viable micro-enterprises, public and private bodies that carry out activities as referred to in point (a) of paragraph 1 shall cooperate closely with organisations, including civil society organisations, representing the interests of the final beneficiaries of microcredit and with organisations, in particular those supported by the ESF, and shall provide mentoring and training programmes for such final beneficiaries. In this context, a sufficient follow-up of beneficiaries shall be ensured both before and after the creation of the micro-enterprise.

4. Public and private bodies that carry out activities as referred to in point (a) of paragraph 1 shall adhere to high standards concerning governance, management and customer protection in line with the principles of the European Code of Good Conduct for Microcredit Provision and shall seek to prevent persons and undertakings from becoming over-indebted, for example, as a result of the granting of loans to them at high interest rates or on terms likely to result in their insolvency.

Article 29

Financial contribution

Except in the case of joint actions, the financial appropriations allocated to the Microfinance and Social Entrepreneurship axis shall cover the full cost of the actions implemented through financial instruments, including payment obligations towards financial intermediaries, such as losses from guarantees, management fees for the entities managing the Union's contribution and any other eligible costs.

Article 30

Management

1. In order to implement the instruments and grants referred to in Article 27, the Commission may conclude agreements with the entities listed in Article 139(4) of the Financial Regulation, and in particular with the European Investment Bank and the European Investment Fund. Such agreements shall set out detailed provisions on the implementation of the tasks entrusted to those entities, including provisions specifying the need to ensure additionality and coordination with existing Union and national financial instruments and to apportion the resources in a balanced way among the Member States and the other participating countries. Financial instruments under Title VIII of Part One of the Financial Regulation may be delivered through a dedicated investment vehicle, which may be financed by Programme funds, other investors or by both.

2. The dedicated investment vehicle referred to in paragraph 1 may provide, inter alia, loans, equity capital and risk-sharing instruments for intermediaries or direct financing for social enterprises or both. Equity capital can be provided, inter alia, in the form of open equity participations, dormant holdings, shareholder loans and combinations of different types of equity participations issued to the investors.

3. The conditions, such as interest rates, for micro-credits directly or indirectly supported in the framework of this axis shall reflect the benefit of the support and shall be justifiable with regard to underlying risks and the actual cost of funding related to a credit.

4. In accordance with Article 140(6) of the Financial Regulation, annual repayments generated by one financial instrument shall be assigned to that financial instrument until 1 January 2024, while revenues shall be entered in the general budget of the Union after deduction of management costs and fees. For financial instruments already set up in the multiannual financial framework for the period 2007-2013, annual repayments and revenues generated by operations started in the previous period shall be assigned to the financial instrument in the current period.

5. On the expiry of the agreements concluded with the entities referred to in paragraph 1 or after the termination of the investment period of the specialised investment vehicle, the balance due to the Union shall be paid into the general budget of the Union.

6. The entities referred to in paragraph 1 of this Article and, where relevant, the fund managers shall conclude written agreements with the public and private bodies referred to in Article 28. Such agreements shall lay down the obligations of the public and private providers to use the resources made available under the Microfinance and Social Entrepreneurship axis in accordance with the objectives set out in Article 26 and to provide information for drafting the annual implementation reports provided for in Article 31.

Article 31

Implementation reports

1. The entities referred to in Article 30(1), and, where relevant, the fund managers, shall send to the Commission annual implementation reports setting out the activities that have been granted support and covering their financial implementation and the allocation and accessibility of funding and investment by sector, geographical area and type of beneficiary. Those reports shall also set out the applications accepted or rejected with regard to each specific objective, the contracts concluded by the public and private bodies concerned, the actions funded and the results, including in terms of their social impact, employment creation and sustainability of the support granted. The Commission shall send those reports to the European Parliament for information purposes.

2. The information provided in those annual implementation reports shall feed into the biennial monitoring reports provided for in Article 12. Such monitoring reports shall include the

annual reports provided for in Article 8(2) of Decision No 283/2010/EU, detailed information on communication activities and information on complementarity with other Union instruments, notably the ESF.

TITLE III

WORK PROGRAMMES AND FINAL PROVISIONS

Article 32

Work Programmes

The Commission shall adopt implementing acts laying down work programmes covering the three axes. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 36(3).

The work programmes shall, where relevant, be for a three-year rolling period and shall contain a description of the actions to be financed, the procedures for selecting actions to be supported by the Union, the geographic coverage, the target audience and an indicative implementation time frame. The work programmes shall also include an indication of the amount allocated to each specific objective and shall reflect the re-allocation of funds in accordance with Article 33. The work programmes shall reinforce the coherence of the Programme by indicating the links between the three axes.

Article 33

Re-allocation of funds between the axes and to the individual thematic sections within the axes

The Commission shall be empowered to adopt delegated acts, in accordance with Article 34, re-allocating funds between axes and to individual thematic sections within each axis that would exceed the indicative amount set in each case by more than 5 % and up to 10 %, where developments in the socio-economic context or the findings in the mid-term evaluation referred to in Article 13(1) so require. The re-allocation of funds to thematic sections within each axis shall be reflected in the work programmes referred to in Article 32.

Article 34

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 33 shall be conferred on the Commission for a period of seven years from 1 January 2014.

3. The delegation of power referred to in Article 33 may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Article 33 shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 35

Additional implementation measures

Measures necessary for the implementation of the Programme, such as the criteria for evaluating the Programme, including those relating to cost effectiveness and the arrangements for disseminating and transferring results, shall be adopted in accordance with the advisory procedure referred to in Article 36(2).

Article 36

Committee procedure

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.
2. Where reference is made to this paragraph, Article 4 of Regulation (EU) No 182/2011 shall apply.
3. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Article 37

Transitional measures

Actions referred to in Articles 4, 5 and 6 of Decision No 1672/2006/EC, which are initiated before 1 January 2014

shall continue to be governed by that Decision. With regard to those actions, the Commission shall be assisted by the committee referred to in Article 36 of this Regulation.

Article 38

Evaluation

1. The final evaluation provided for in Article 13(4) of this Regulation shall include the final evaluation provided for in Article 9 of Decision No 283/2010/EU.
2. The Commission shall carry out a specific final evaluation of the Microfinance and Social Entrepreneurship axis no later than one year after the expiry of the agreements with the entities.

Article 39

Amendments to Decision No 283/2010/EU

Decision No 283/2010/EU is amended as follows:

- (1) In Article 5, paragraph 4 is replaced by the following:

"4. On the expiry of the Facility, the balance due to the Union shall be made available for microfinance and support for social enterprises in accordance with Regulation (EU) No 1296/2013 of the European Parliament and of the Council of 11 December 2013 on a European Union Programme for Employment and Social Innovation ("EaSI") (*).

(*) OJ L 347, 20.12.2013, p. 238";

- (2) In Article 8, paragraphs 3 and 4 are deleted.

Article 40

Entry into force

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

**REGULATION (EU) No 1297/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013**

amending Council Regulation (EC) No 1083/2006 as regards certain provisions relating to financial management for certain Member States experiencing or threatened with serious difficulties with respect to their financial stability, to the decommitment rules for certain Member States, and to the rules on payments of the final balance

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 177 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

After consulting the Committee of the Regions,

Acting in accordance with the ordinary legislative procedure ⁽²⁾,

Whereas:

(1) The unprecedented enduring global financial crisis and economic downturn have seriously damaged economic growth and financial stability and provoked a strong deterioration in financial, economic and social conditions in the Member States. In particular, certain Member States are experiencing serious difficulties or are threatened with such difficulties, in particular with problems in their economic growth and financial stability and with a deterioration in their deficit and debt position, also as a result of the international economic and financial environment.

(2) Whilst important actions to counterbalance the negative effects of the financial crisis have already been taken, including amendments of the legislative framework, the impact of that crisis on the real economy, the labour market and citizens is being widely felt. Pressure on national financial resources is increasing and further steps should be taken urgently to alleviate that pressure through the maximal and optimal use of the funding from the Structural Funds and the Cohesion Fund ('the Funds'). In view of the persistence of the financial difficulties, it is necessary to extend the application of

the measures adopted by Regulation (EU) No 1311/2011 of the European Parliament and of the Council ⁽³⁾. Those measures were adopted pursuant to Article 122(2) and Articles 136 and 143 of the Treaty on the Functioning of the European Union.

(3) In order to facilitate the management of Union funding, to help accelerate investments in Member States and regions, and to improve the availability of funding to the economy, Council Regulation (EC) No 1083/2006 ⁽⁴⁾ was amended by Regulation (EU) No 1311/2011 of the European Parliament and of the Council to allow the increase of interim payments from the Funds by an amount corresponding to ten percentage points above the actual co-financing rate for each priority axis for Member States which are facing serious difficulties with respect to their financial stability and have requested to benefit from this measure.

(4) Article 77(6) of Regulation (EC) No 1083/2006 allows for the application of an increased co-financing rate up to 31 December 2013. However, since Member States still face serious difficulties with respect to their financial stability, the duration of the application of an increased co-financing rate should not be limited to 31 December 2013.

(5) In line with the European Council conclusions of 7-8 February 2013 and as provided for in Article 22 of Regulation (EU) No 1303/2013 of the European Parliament and of the Council ⁽⁵⁾, the co-financing rate increased by 10 percentage points is to apply with regard to the 2014-2020 programming period until 30 June 2016, when the possibility of the increase is to be reviewed. As the 2007-2013 and 2014-2020 programming periods overlap, it is necessary to ensure

⁽³⁾ Regulation (EU) No 1311/2011 of the European Parliament and of the Council of 13 December 2011 amending Council Regulation (EC) No 1083/2006 as regards certain provisions relating to financial management for certain Member States experiencing or threatened with serious difficulties with respect to their financial stability (OJ L 337, 20.12.2011, p. 5).

⁽⁴⁾ Council Regulation (EC) No 1083/2006 of 11 July 2006 laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund and repealing Regulation (EC) No 1260/1999 (OJ L 210, 31.7.2006, p. 25).

⁽⁵⁾ Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund and repealing Council Regulation (EC) No 1083/2006 (See page 320 of this Official Journal).

⁽¹⁾ Opinion of 19 September 2013 (OJ C 341, 21.11.2013, p. 27).

⁽²⁾ Position of the European Parliament of 20 November 2013 (not yet published in the Official Journal) and decision of the Council of 5 December 2013.

coherent and uniform treatment of Member States receiving financial assistance during the two periods. Therefore, these Member States receiving financial assistance should also benefit from the increase of the co-financing rate until the end of the eligibility period and to claim it in their requests for final balance even if the financial assistance is not anymore provided.

- (6) Regulation (EU) No 1303/2013 aims to contribute to achieving adequate concentration of cohesion funding on the least developed regions and Member States. In order to contribute to the reduction of disparities in average per capita aid intensities, the maximum level of transfer (capping) from the Funds to each individual Member State pursuant to future Regulations is to be fixed at 2,35 % of the GDP of the Member State. The capping is to be applied on an annual basis, and, if applicable, is to proportionally reduce all transfers (except for the more developed regions and the European territorial cooperation goal) to the Member State concerned in order to obtain the maximum level of transfer. For Member States which acceded to the Union before 2013 and whose average real GDP growth in the 2008-2010 period was lower than -1 %, the maximum level of transfer is to be fixed at 2,59 % of their GDP.
- (7) Regulation (EU) No 1303/2013 caps the allocations per Member State at 110 % of their level in real terms for the 2007-2013 period. Member States affected by this capping need to be further protected from the risk of automatic decommitment of allocations in the 2007-2013 period.
- (8) In its conclusions of 8 February 2013, the European Council invited the Commission to explore practical solutions with regard to reducing the risk of automatic decommitment of the Funds from the 2007-2013 national envelope for Romania and Slovakia, including the amendment of Regulation (EC) No 1083/2006.
- (9) The European Council also highlighted the need to ensure a manageable level and profile for the payments in all headings in order to limit the outstanding budgetary commitments in particular by applying rules for automatic decommitment in all headings. Hence, provisions releasing the decommitment rules for Member States affected by the capping set out in Regulation (EU) No 1303/2013 should be balanced in view of its effects on the outstanding budgetary commitments.
- (10) The deadline for the calculation of the automatic decommitment of the annual budget commitments for years 2011 and 2012 should be extended by one year, but the 2012 budget commitment, which will still be open on 31 December 2015, is to be justified by 31 December 2015. That extension should help to improve the

absorption of funding committed for operational programmes in Member States that are affected by the capping of their future cohesion policy allocations at 110 % of their level in real terms for the 2007-2013 period. Such flexibility is necessary in order to address a slower than expected implementation of programmes affecting those Member States in particular.

- (11) Limited adjustments of the maximum amount of assistance from the Funds for each priority axis should be applied when establishing the amount of the final balance to be paid to the operational programmes in order to optimise the absorption of the Funds.
- (12) Given the unprecedented nature of the crisis, swift adoption of support measures is needed and therefore it is appropriate that this Regulation enters into force on the day of its publication in the *Official Journal of the European Union*.
- (13) Regulation (EC) No 1083/2006 should therefore be amended accordingly,

HAVE ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 1083/2006 is amended as follows:

- (1) Article 77 is amended as follows:
- (a) Paragraph 2 is amended as follows:

'2. By way of derogation from Article 53(2), from the second sentence of Article 53(4) and from the ceilings set out in Annex III, interim payments and payments of the final balance shall be increased by an amount corresponding to 10 percentage points above the co-financing rate applicable to each priority axis, but not exceeding 100 %, to be applied to the amount of eligible expenditure newly declared in each certified statement of expenditure submitted until the end of the programming period, where, after 21 December 2013 a Member State meets one of the following conditions:

- (a) financial assistance is made available to it in accordance with Council Regulation (EU) No 407/2010 (*) or financial assistance is made available to it by other euro area Member States before the entry into force of that Regulation;
- (b) medium-term financial assistance is made available to it in accordance with Council Regulation (EC) No 332/2002 (**);
- (c) financial assistance is made available to it in accordance with the Treaty establishing the European Stability Mechanism following its entry into force.

(*) Council Regulation (EU) No 407/2010 of 11 May 2010 establishing a European financial stabilisation mechanism (OJ L 118, 12.5.2010, p. 1).

(**) Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1).;

(b) Paragraph 6 is deleted;

(c) The following paragraph is added:

'12. By way of derogation from paragraph 10, the Union contribution through payments of the final balance for each priority axis shall not exceed, by more than 10 %, the maximum amount of assistance from the Funds for each priority axis as laid down in

the decision of the Commission approving the operational programme. However, the Union contribution through payments of the final balance shall not exceed the public contribution declared and the maximum amount of assistance from each Fund to each operational programme as laid down in the decision of the Commission approving the operational programme.';

(2) Article 93 is amended as follows:

(a) The following paragraph is inserted:

'2b. By way of derogation from the first subparagraph of paragraph 1 and from paragraph 2, for Member States whose cohesion policy allocations in the 2014-2020 programming period are capped at 110 % of their level in real terms for the 2007-2013 period, the deadline referred to in paragraph 1 shall be 31 December of the third year following the year of the annual budget commitment from 2007 to 2012 under their operational programmes.';

(b) In paragraph 3, the following subparagraph is added:

'The first subparagraph is without prejudice to the application of the deadline laid down in paragraph 2b to the 2012 budget commitment for the Member States referred to in that paragraph.'.

Article 2

This Regulation shall enter into force on the date of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

REGULATION (EU) No 1298/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 11 December 2013
amending Council Regulation (EC) No 1083/2006 as regards the financial allocation for certain
Member States from the European Social Fund

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 177 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee,

After consulting the Committee of the Regions,

Acting in accordance with the ordinary legislative procedure ⁽¹⁾,

Whereas:

- (1) In the context of the negotiations of the Multiannual Financial Framework for the years 2014-2020, certain issues stemming from the final outcome of the negotiations should be addressed.
- (2) At its meeting of 27 and 28 June 2013, the European Council considered that a budgetary solution should be found to address those issues for the Member States most affected, namely France, Italy and Spain.
- (3) Having regard to the current economic crisis, in order to strengthen the economic, social and territorial cohesion of the Union, and as a contribution to the special effort needed to address the specific problems of unemployment, in particular youth unemployment, and of poverty and social exclusion in France, Italy and Spain, the European Social Fund (ESF) allocations to those Member States for the year 2013 should be increased.
- (4) In order to establish the amounts to be allocated to the Member States concerned pursuant to Annex I to Council Regulation (EC) No 1083/2006 ⁽²⁾, the

provisions that set the overall resources of the Funds for the three objectives to which they contribute, and Annex II to that Regulation establishing the criteria and methodology that are used for the indicative annual breakdowns of commitment appropriations by Member States, should be adjusted.

- (5) To ensure the effectiveness of the increase of commitment appropriations for the year 2013 and to facilitate the implementation of operational programmes, the absorption capacity of the Member States concerned in respect of the Convergence and the Regional competitiveness and employment objectives of the Funds should be taken into account.
- (6) In order to provide for sufficient time for the operational programmes to benefit from additional ESF allocations, it is also necessary to extend the deadline for the budget commitments in respect of the operational programmes that are to benefit from the new amounts provided for in Annex II to Regulation (EC) No 1083/2006.
- (7) Given that those commitment appropriations relate to the year 2013, this Regulation should enter into force as a matter of urgency.
- (8) Regulation (EC) No 1083/2006 should therefore be amended accordingly,

HAVE ADOPTED THIS REGULATION:

Article 1

Regulation (EC) No 1083/2006 is amended as follows:

(1) Article 18 is amended as follows:

- (a) in paragraph 1, the first subparagraph is replaced by the following:

The resources available for commitment from the Funds for the period 2007 to 2013 shall be EUR 308 542 551 107 at 2004 prices in accordance with the annual breakdown shown in Annex I.;

⁽¹⁾ Position of the European Parliament of 20 November 2013 (not yet published in the Official Journal) and decision of the Council of 5 December 2013.

⁽²⁾ Council Regulation (EC) No 1083/2006 of 11 July 2006 laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund and repealing Regulation (EC) No 1260/1999 (OJ L 210, 31.7.2006, p. 25).

(b) paragraph 3 is replaced by the following:

‘3. The amounts referred to in paragraphs 12 to 30 and 32 of Annex II shall be included in the amounts referred to in Articles 19, 20 and 21 and shall be clearly identified in the programming documents.’;

(2) Articles 19 and 20 are replaced by the following:

‘Article 19

Resources for the Convergence objective

Overall resources for the Convergence objective shall amount to 81,53 % of the resources referred to in Article 18(1) (i.e. a total of EUR 251 543 760 146) and shall be distributed between the different components as follows:

- (a) 70,50 % (i.e. a total of EUR 177 338 880 991) for the financing referred to in Article 5(1), using eligible population, regional prosperity, national prosperity and unemployment rate as the criteria for calculating the indicative breakdowns by Member State;
- (b) 4,98 % (i.e. a total of EUR 12 521 289 405) for the transitional and specific support referred to in Article 8(1), using eligible population, regional prosperity, national prosperity and unemployment rate as the criteria for calculating the indicative breakdowns by Member State;
- (c) 23,23 % (i.e. a total of EUR 58 433 589 750) for the financing referred to in Article 5(2), using population, national prosperity, and surface area as the criteria for calculating the indicative breakdowns by Member State;
- (d) 1,29 % (i.e. a total of EUR 3 250 000 000) for the transitional and specific support referred to in Article 8(3).

(5) Annex I is replaced by the following:

‘ANNEX I

Annual breakdown of commitment appropriations for 2007 to 2013

(referred to in Article 18)

(EUR, 2004 prices)

2007	2008	2009	2010	2011	2012	2013
42 863 000 000	43 318 000 000	43 862 000 000	43 860 000 000	44 073 000 000	44 723 000 000	45 843 551 107’;

(6) In Annex II, the following paragraph is added:

‘32. For the year 2013, an additional envelope of EUR 125 513 290 under the ESF will be allocated as follows: EUR 83 675 527 will be allocated to France,

Article 20

Resources for the Regional competitiveness and employment objective

Overall resources for the Regional competitiveness and employment objective shall amount to 15,96 % of the resources referred to in Article 18(1) (i.e. a total of EUR 49 239 337 841) and shall be distributed between the different components as follows:

- (a) 78,91 % (i.e. a total of EUR 38 854 031 211) for the financing referred to in Article 6, using eligible population, regional prosperity, unemployment rate, employment rate and population density as the criteria for calculating the indicative breakdowns by Member State; and
 - (b) 21,09 % (i.e. a total of EUR 10 385 306 630) for the transitional and specific support referred to in Article 8(2), using eligible population, regional prosperity, national prosperity and unemployment rate as the criteria for calculating the indicative breakdowns by Member State.’;
- (3) In Article 21(1), the introductory sentence is replaced by the following:
- ‘Overall resources for the European territorial cooperation objective shall amount to 2,51 % of the resources referred to in Article 18(1) (i.e. a total of EUR 7 759 453 120) and, excluding the amount referred to in paragraph 22 of Annex II, shall be distributed between the different components as follows’;
- (4) In Article 75, the following paragraph is inserted:
- ‘1b. By way of derogation from paragraph 1, budget commitments for the amounts referred to in paragraph 32 of Annex II shall be made by 30 June 2014.’;

EUR 25 102 658 will be allocated to Italy and EUR 16 735 105 will be allocated to Spain.’.

Article 2

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 11 December 2013.

The President
M. SCHULZ

For the Council
The President
V. LEŠKEVIČIUS

REGULATION (EU) No 1299/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 17 December 2013
on specific provisions for the support from the European Regional Development Fund to the
European territorial cooperation goal

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 178 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) Article 176 of the Treaty on the Functioning of the European Union (TFEU) provides that the European Regional Development Fund (ERDF) is intended to help to redress the main regional imbalances in the Union. Under that Article and the second and third paragraphs of Article 174 TFEU, the ERDF is to contribute to reducing disparities between the levels of development of the various regions and to reducing the backwardness of the least favoured regions, among which particular attention is to be paid to rural areas, areas affected by industrial transition, and regions which suffer from severe and permanent natural or demographic handicaps such as the northernmost regions with very low population density and island, cross-border and mountain regions.
- (2) Regulation (EU) No 1303/2013 of the European Parliament and of the Council ⁽³⁾ sets out provisions common to the ERDF, the European Social Fund (ESF),

the Cohesion Fund, the European Agricultural Fund for Rural Development (EAFRD) and the European Maritime and Fisheries Fund (EMFF). Regulation (EU) No 1301/2013 of the European Parliament and of the Council ⁽⁴⁾ sets out specific provisions concerning the type of activities which can be supported by the ERDF, and defines the goals for those activities. Those Regulations are not fully adapted to the specific needs of the European territorial cooperation goal, where at least two Member States or one Member State and a third country cooperate. It is therefore necessary to lay down provisions specific to the European territorial cooperation goal concerning scope, geographical coverage, financial resources, thematic concentration and investment priorities, programming, monitoring and evaluation, technical assistance, eligibility, management, control and designation, participation of third countries, and financial management.

- (3) In order to increase the added value of the Union's cohesion policy, specific provisions should be aimed at achieving considerable simplification for all those involved: beneficiaries, programme authorities, authorities in participating Member States, at local, regional or national level, as appropriate, and third countries, as well as the Commission.
- (4) In order to support the harmonious development of the Union's territory at different levels, the ERDF should support cross-border, transnational and interregional cooperation under the European territorial cooperation goal.
- (5) Cross-border cooperation should aim to tackle common challenges identified jointly in the border regions, such as: poor accessibility, especially in relation to information and communication technologies (ICT) connectivity and transport infrastructure, declining local industries, an inappropriate business environment, lack of networks among local and regional administrations, low levels of research and innovation and take-up of ICT, environmental pollution, risk prevention, negative attitudes towards neighbouring country citizens and aim to exploit the untapped growth potential in border areas (development of cross-border research and innovation facilities and clusters, cross-border labour market integration, cooperation among education providers, including universities or between health centres), while enhancing the cooperation process for the purpose of the overall harmonious development of the Union.

⁽¹⁾ OJ C 191, 29.6.2012, p. 49.

⁽²⁾ OJ C 277, 13.9.2012, p. 96.

⁽³⁾ Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (See page 320 of this Official Journal).

⁽⁴⁾ Regulation (EU) No 1301/2013 of the European Parliament and of the Council of 17 December 2013 on the European Regional Development Fund and on specific provisions concerning the Investment for growth and jobs goal and repealing Regulation (EC) No 1080/2006 (See page 289 of this Official Journal).

- (6) Transnational cooperation should aim to strengthen cooperation by means of actions conducive to integrated territorial development linked to the Union's cohesion policy priorities, and should also include maritime cross-border cooperation not covered by cross-border cooperation programmes.
- (7) Interregional cooperation should aim to reinforce the effectiveness of cohesion policy by encouraging exchange of experience between regions on thematic objectives and urban development, including urban-rural linkages, to improve implementation of territorial cooperation programmes and actions as well as promoting analysis of development trends in the area of territorial cohesion through studies, data collection and other measures. The exchange of experience on thematic objectives should enhance design and implementation, principally of operational programmes under the Investment for growth and jobs goal, but also, where appropriate, of programmes under the European territorial cooperation goal, including the fostering of mutually beneficial cooperation between innovative research-intensive clusters and exchanges between researchers and research institutions in both developed and less developed regions, taking into consideration the experience of 'Regions of Knowledge' and 'Research potential in Convergence and Outermost regions' under the Seventh Framework Programme for Research.
- (8) Objective criteria for designating eligible regions and areas should be fixed. To this end, the identification of eligible regions and areas at Union level should be based on the common system of classification of the regions established by Regulation (EC) No 1059/2003 of the European Parliament and of the Council⁽¹⁾.
- (9) Cross-border cooperation should support regions located on land or maritime borders. Based on experience from previous programming periods, the Commission should define the list of cross-border areas that are to receive support under cross-border cooperation programmes in a simpler way, by cooperation programme. In drawing up that list, the Commission should take into account adjustments needed to ensure coherence, in particular with regard to land and maritime borders, and continuity of programme areas established for the 2007-2013 programming period. Such adjustments could involve reducing or enlarging existing programme areas or the number of cross-border cooperation programmes, while allowing for the possibility of geographical overlap.
- (10) The Commission should define transnational cooperation areas having regard to actions needed to promote integrated territorial development. In defining those areas, the Commission should take into account the experience obtained in previous programmes and, where appropriate, macro-regional and sea-basin strategies.
- (11) To ensure that all regions in the Union can benefit from the exchange of experience and good practices, inter-regional cooperation programmes should cover the whole Union.
- (12) It is necessary to continue supporting or, as appropriate, to establish cross-border, transnational and interregional cooperation with the Union's neighbouring third countries, as such cooperation is an important regional development policy tool and should benefit the regions of the Member States which border third countries. To that effect, the ERDF should contribute to the cross-border and sea-basin programmes established under the European Neighbourhood Instrument (ENI) pursuant to a future Union legislative act concerning the European Neighbourhood Instrument for the period 2014–2020 (the 'ENI legislative act') and the Instrument for Pre-Accession Assistance (IPA II) pursuant to a future Union legislative act concerning the Pre-Accession Assistance for the period 2014-2020 (the 'IPA II legislative act').
- (13) Apart from interventions on external borders supported by external policy instruments of the Union covering border regions inside and outside the Union, it should be possible for cooperation programmes supported by the ERDF to cover regions both inside and, in certain cases, outside the Union, where the regions outside the Union are not covered by external policy instruments either because they are not defined as a beneficiary country or because such external cooperation programmes cannot be set up. It is necessary, however, to ensure that the support from the ERDF for operations implemented in the territory of third countries should serve primarily for the benefit of the regions of the Union. Within those constraints, the Commission should, when drawing up the lists of cross-border and transnational programme areas, cover regions in third countries as well.
- (14) It is necessary to set out the resources allocated to each of the different components of the European territorial cooperation goal, while maintaining a significant concentration on cross-border cooperation, including each Member State's share of the global amounts for cross-border and transnational cooperation, the potential available to Member States concerning flexibility between those components, and securing sufficient funding levels for outermost regions' cooperation.

⁽¹⁾ Regulation (EC) No 1059/2003 of the European Parliament and of the Council of 26 May 2003 on the establishment of a common classification of territorial units for statistics (NUTS) (OJ L 154, 21.6.2003, p. 1).

- (15) For the benefit of the regions of the Union, a mechanism to organise support from the ERDF to external policy instruments, such as the ENI and the IPA II, should be set up, including where external cooperation programmes cannot be adopted or have to be discontinued. That mechanism should seek to achieve optimal functioning and the maximum possible coordination between those instruments.
- (16) The major part of the ERDF funding for cross-border and transnational cooperation programmes should be concentrated on a limited number of thematic objectives in order to maximise the impact of cohesion policy across the Union. However, the concentration under the interregional cooperation programme on thematic objectives should be reflected in the aim of each operation rather than in a limitation of the number of thematic objectives, in order to get the most out of interregional cooperation for the reinforcement of the effectiveness of cohesion policy principally under the Investment for growth and jobs goal and also, where appropriate, the European territorial cooperation goal. In the case of other interregional cooperation programmes, the thematic concentration should derive from their specific scope.
- (17) In order to deliver on the targets and objectives set out in the Union strategy for smart, sustainable and inclusive growth, the ERDF should contribute under the European territorial cooperation goal to the thematic objectives of developing an economy based on knowledge, research and innovation, including through the fostering of cooperation between businesses, particularly between SMEs, and through the promotion of the establishment of systems for cross-border information exchange in the area of ICT; promoting a greener, more resource-efficient and competitive economy, including through the promotion of sustainable cross-border mobility; fostering high employment that results in social and territorial cohesion, including through activities supporting sustainable tourism, culture and natural heritage as part of a territorial strategy aimed at achieving employment-friendly growth; and developing administrative capacity. However, the list of the investment priorities under the different thematic objectives should be adapted to the specific needs of the European territorial cooperation goal, by providing for additional investment priorities allowing in particular for the continuation under cross-border cooperation of legal and administrative cooperation, cooperation between citizens and institutions, and of cooperation in the fields of employment, training, integration of communities and social inclusion in a cross-border perspective, and by the development and coordination of macro-regional and sea-basin strategies under transnational cooperation. In addition, specific or additional investment priorities should be set out for certain interregional cooperation programmes to reflect their specific activities.
- (18) Within the thematic objective of promoting social inclusion and combating poverty and taking into account its practical importance, it is necessary to ensure that, in the case of the PEACE cross-border programme between Northern Ireland and the border counties of Ireland in support of peace and reconciliation, the ERDF should also contribute to promoting social and economic stability in the regions concerned, in particular through actions to promote cohesion between communities. Given the specificities of that cross-border programme, certain rules on selection of operations in this Regulation should not apply to that cross-border programme.
- (19) It is necessary to adapt the content requirements of cooperation programmes under the European territorial cooperation goal to their specific needs. Those requirements should therefore also cover aspects necessary for effective implementation on the territory of participating Member States, such as those concerning the bodies responsible for audit and control, the procedure for setting up a joint secretariat, and the allocation of liabilities in the case of financial corrections. Where Member States and regions participate in macro-regional and sea-basin strategies, the cooperation programmes concerned should set out how interventions could contribute to such strategies. In addition, due to the horizontal character of interregional cooperation programmes, the content of such cooperation programmes should be adapted, especially as regards the definition of the beneficiary or beneficiaries under the current INTERACT and ESPON programmes.
- (20) In order to strengthen the co-ordination of ERDF support for cooperation programmes, adopted under this Regulation, involving the outermost regions with possible complementary financing from the European Development Fund (EDF), the ENI, the IPA II, and the European Investment Bank (EIB), Member States and third countries or overseas countries or territories (the latter hereinafter referred to as 'territories') participating in such cooperation programmes should set out rules for coordination mechanisms in those programmes.
- (21) It is appropriate to involve third countries or territories in the preparatory process of cooperation programmes, where they have accepted the invitation to participate in such programmes. Special procedures should be established in this Regulation for such involvement. By way of derogation from the standard procedure, where cooperation programmes involve outermost regions and third countries or territories, the participating Member States should consult the respective third countries or territories before submitting the programmes to the Commission. In order to make the involvement of third countries or territories in cooperation programmes more effective and pragmatic, it should also be possible to have the agreements to the contents of the cooperation programmes and the possible contribution of the third countries or territories, expressed in the formally approved minutes of the consultation meetings with such third countries or territories, or of the deliberations of the regional cooperation organisations. Taking into account the principles of shared management and of simplification, the approval procedure for cooperation programmes should be such that the Commission approves only the core elements of the cooperation programmes, while the other elements should be approved by the participating Member State

or Member States. For the sake of legal certainty and transparency, it is necessary to ensure that, in cases where the participating Member State or Member States amend an element of a cooperation programme which is not subject to approval by the Commission, the managing authority for that programme notifies such an amending decision to the Commission within one month of the date of that amending decision.

- (22) In line with the Union strategy for smart, sustainable and inclusive growth, the European Structural and Investment Funds should provide a more integrated and inclusive approach to tackling local problems. In order to strengthen such an approach, support from the ERDF in border regions should be coordinated with support from the EAFRD and the EMFF and should, where appropriate, involve European groupings of territorial cooperation (EGTCs) set up under Regulation (EU) No 1302/2013 of the European Parliament and of the Council⁽¹⁾ where local development is one of their objectives.
- (23) Based on the experience from the 2007-2013 programming period, the conditions for selection of operations should be clarified and strengthened in order to ensure selection of only genuinely joint operations. Due to the particular context and specificities of cooperation programmes between outermost regions and third countries or territories, lightened cooperation conditions in terms of processing operations under those programmes should be established and adapted. The notion of sole beneficiaries should be defined and such beneficiaries should be permitted to carry out cooperation operations by themselves.
- (24) The responsibilities of lead beneficiaries, retaining overall responsibility for the implementation of an operation, should be specified.
- (25) The requirements for implementation reports should be adapted to the cooperation context and reflect the programme implementation cycle. In the interests of

sound management, it should be possible for the annual review to be carried out in writing.

- (26) In accordance with Regulation (EU) No 1303/2013 the managing authority should ensure that evaluations of cooperation programmes are carried out on the basis of the evaluation plan and include evaluations to assess the effectiveness, efficiency and impact of those programmes. At least once during the programming period, an evaluation should assess how the support provided has contributed to the achievement of objectives of the programme. Such evaluations should include information about any proposed adjustments during the programming period.
- (27) A common set of output indicators to facilitate the assessment of the progress of programme implementation, adapted to the specific character of cooperation programmes, should be set out in an Annex to this Regulation. Those indicators should be complemented by programme-specific result indicators and, where relevant, by programme specific output indicators.
- (28) Due to the involvement of more than one Member State, and the resulting higher administrative costs, in particular, in respect of controls and translation, the ceiling for technical assistance expenditure should be higher than that under the Investment for growth and jobs goal. In order to offset the higher administrative costs, Member States should be encouraged wherever possible to reduce the administrative burden with regard to the implementation of joint projects. In addition, cooperation programmes with limited ERDF support should receive a certain minimum amount for technical assistance which could be greater than 6 %, to ensure sufficient funding for effective technical assistance activities.
- (29) Due to the involvement of more than one Member State, the general rule laid down in Regulation (EU) No 1303/2013, whereby each Member State is to adopt national rules on eligibility of expenditure, is not appropriate for the European territorial cooperation goal. Based on experience from the 2007-2013 programming period, a clear hierarchy of rules on eligibility of expenditure should be established with a strong move towards rules on eligibility of expenditure established at Union level or for a cooperation programme as a whole to avoid any possible contradictions or inconsistencies between different Regulations and between Regulations and national rules. In particular, the Commission should, based on experience from the 2007-2013 programming period, adopt rules on eligibility of expenditure for cost categories laid down in this Regulation.

⁽¹⁾ Regulation (EU) No 1302/2013 of the European Parliament and of the Council of 17 December 2013 amending Regulation (EC) No 1082/2006 on a European grouping of territorial cooperation (EGTC) as regards the clarification, simplification and improvement of the establishment and functioning of such groupings (See page 303 of this Official Journal).

- (30) Due to the frequent involvement of staff from more than one Member State in the implementation of operations, and given the number of operations for which staff costs is a significant element, a flat-rate for staff costs should be applied based on the other direct costs of cooperation operations, thus avoiding individual accounting for the management of such operations.
- (31) The rules on flexibility concerning the location of operations outside the programme area should be simplified. In addition, it is necessary to support and facilitate, through specific arrangements, effective cross-border, transnational and interregional cooperation with the Union's neighbouring third countries or territories where this is necessary to ensure that regions of the Member States are effectively assisted in their development. Accordingly, it is appropriate to authorise on an exceptional basis and under certain conditions support from the ERDF for operations located outside the Union part of the programme area and on the territory of neighbouring third countries where those operations are for the benefit of the regions of the Union.
- (32) Member States should be encouraged to assign the functions of the managing authority to an EGTC or to make such a grouping responsible for managing the part of a cooperation programme that relates to the territory covered by that EGTC.
- (33) The managing authority should set up a joint secretariat which should, inter alia, provide information to applicants for support, deal with project applications and assist beneficiaries in implementing their operations.
- (34) Managing authorities should be responsible for the functions laid down in Regulation (EU) No 1303/2013, including for management verifications, in order to ensure uniform standards across the whole programme area. However, where an EGTC is designated as managing authority, such verifications should be carried out by or under the responsibility of the managing authority at least for those Member States and third countries or territories from which there are members participating in the EGTC, while controllers should only be used in the remaining Member States and third countries or territories. Even if no EGTC is designated, the managing authority should be authorised by the participating Member States to carry out verifications on the whole programme area.
- (35) Certifying authorities should be responsible for the certifying authority functions laid down in Regulation (EU) No 1303/2013. The Member States should be able to designate the managing authority to also carry out the functions of the certifying authority.
- (36) A single audit authority should be responsible for carrying out the audit authority functions laid down in Regulation (EU) No 1303/2013 in order to ensure uniform standards across the whole programme area. Where that is not possible, a group of auditors should be able to assist the programme audit authority.
- (37) In order to strengthen the Union's economic, social and territorial cohesion and to reinforce the effectiveness of its cohesion policy, third countries should be allowed to participate, through a contribution of IPA II and ENI resources, in transnational and interregional cooperation programmes. Operations co-financed under such programmes should, however, continue to pursue cohesion policy objectives, even if they are implemented, partly or in their entirety, outside the territory of the Union. In this context, the contribution to the objectives of the Union's external action remains merely incidental, as the centre of gravity of cooperation programmes should be determined by the thematic objectives and investment priorities of cohesion policy. In order to ensure effective participation by third countries in cooperation programmes that are managed in accordance with the shared management principle, programme implementation conditions should be set out in the cooperation programmes themselves and also, where necessary, in financing agreements, concluded between the Commission, the governments of each of the third countries and the Member State hosting the managing authority of the relevant cooperation programme. The programme implementation conditions should be consistent with applicable Union law and, where appropriate, with the provisions of national law of participating Member States relating to its application.
- (38) A clear chain of financial liability in respect of recovery for irregularities should be established from beneficiaries to lead beneficiary to the managing authority to the Commission. Provision should be made for liability of Member States where obtaining recovery is not possible.
- (39) Based on the experience from the 2007-2013 programming period, an explicit derogation should be established for the conversion of expenditure incurred in a currency other than the euro, by applying the monthly conversion rate at a date as close to the point in time of the expenditure as possible or in the month in which the expenditure was submitted for verification or in the month during which expenditure was reported to the lead beneficiary. Financing plans, reports and accounts concerning joint cooperation operations should only be submitted in euro to the joint secretariat, the programme authorities and the monitoring committee. The correctness of conversion should be verified.

- (40) In order to set out specific rules on amending common output indicators and on eligibility of expenditure, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of the amendment of the list of common output indicators set out in the Annex to this Regulation and in respect of specific rules on eligibility of expenditure for cooperation programmes. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (41) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission in respect of the lists of cross-border areas, and of transnational areas, of a list of all cooperation programmes and of the global amount from the ERDF support for each cooperation programme, of the nomenclature concerning categories of intervention and of the models for cooperation programmes and implementation reports. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽¹⁾.
- (42) Implementing powers should be conferred on the Commission to adopt decisions approving certain elements of the cooperation programmes and any subsequent amendments to those elements.
- (43) This Regulation should not affect either the continuation or modification of assistance approved by the Commission on the basis of Regulation (EC) No 1080/2006 of the European Parliament and of the Council ⁽²⁾ or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation should consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. Applications to receive assistance made or approved under Regulation (EC) No 1080/2006 should remain valid.
- (44) Since the objective of this Regulation, namely to reinforce economic, social and territorial cohesion by redressing the main regional imbalances in the Union,

cannot be sufficiently achieved by the Member States but can rather, by reason of the extent of the disparities between the levels of development of the various regions and the backwardness of the least favoured regions and the limit on the financial resources of the Member States and regions, be better achieved at Union level, the Union may adopt measures in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.

- (45) In order to allow for the prompt application of the measures provided for in this Regulation, this Regulation should enter into force on the day following that of its publication in the *Official Journal of the European Union*,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

General provisions

Article 1

Subject matter and scope

1. This Regulation establishes the scope of the ERDF with regard to the European territorial cooperation goal and lays down specific provisions concerning that goal.

2. This Regulation defines, for the European territorial cooperation goal, the priority objectives and organisation of the ERDF, the criteria for Member States and regions to be eligible for support from the ERDF, the financial resources available for support from the ERDF, and the criteria for their allocation.

It also lays down the provisions necessary to ensure effective implementation, monitoring, financial management and control of operational programmes under the European territorial cooperation goal ("cooperation programmes"), including when third countries participate in such cooperation programmes.

3. Regulation (EU) No 1303/2013 and Chapter I of Regulation (EU) No 1301/2013 shall apply to the European territorial cooperation goal and to cooperation programmes thereunder, except where specifically provided for under this Regulation or where those provisions can only apply to the Investment for growth and jobs goal.

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control, by Member States, of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

⁽²⁾ Regulation (EC) No 1080/2006 of the European Parliament and of the Council of 5 July 2006 on the European Regional Development Fund and repealing Regulation (EC) No 1783/1999 (OJ L 210, 31.7.2006, p. 1).

*Article 2***Components of the European territorial cooperation goal**

Under the European territorial cooperation goal, the ERDF shall support the following components:

- (1) cross-border cooperation between adjacent regions to promote integrated regional development between neighbouring land and maritime border regions in two or more Member States or between neighbouring border regions in at least one Member State and one third country on external borders of the Union other than those covered by programmes under the external financial instruments of the Union;
- (2) transnational cooperation over larger transnational territories, involving national, regional and local partners and also covering maritime cross-border cooperation in cases not covered by cross-border cooperation, with a view to achieving a higher degree of territorial integration of those territories;
- (3) interregional cooperation to reinforce the effectiveness of cohesion policy by promoting:
 - (a) exchange of experience focusing on thematic objectives among partners throughout the Union, including in relation to the development of regions referred to in Article 174 TFEU on the identification and dissemination of good practices with a view to their transfer principally to operational programmes under the Investment for growth and jobs goal but also, where relevant, to cooperation programmes;
 - (b) exchange of experience concerning the identification, transfer and dissemination of good practices in relation to sustainable urban development, including urban-rural linkages;
 - (c) exchange of experience concerning the identification, transfer and dissemination of good practices and innovative approaches in relation to the implementation of cooperation programmes and actions as well as to the use of EGTCs;
 - (d) analysis of development trends in relation to the aims of territorial cohesion, including territorial aspects of economic and social cohesion, and harmonious development of Union territory through studies, data collection and other measures.

*Article 3***Geographical coverage**

1. For cross-border cooperation, the regions to be supported shall be the NUTS level 3 regions of the Union along all

internal and external land borders other than those covered by programmes under the external financial instruments of the Union, and all NUTS level 3 regions of the Union along maritime borders separated by a maximum of 150 km, without prejudice to potential adjustments needed to ensure the coherence and continuity of cooperation programme areas established for the 2007-2013 programming period.

The Commission shall adopt a decision, by means of implementing acts, setting out the list of cross-border areas to receive support, broken down by cooperation programme. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2) of Regulation (EU) No 1303/2013.

That list shall also specify those NUTS level 3 regions of the Union taken into account for the ERDF allocation for cross-border cooperation at all internal borders, and those external borders covered by the external financial instruments of the Union, such as the ENI pursuant to the ENI legislative act and the IPA II pursuant to the IPA II legislative act.

When submitting draft cross-border cooperation programmes, Member States, in duly justified cases, and, in order to ensure the coherence of cross-border areas, may request that NUTS level 3 regions other than those listed in the decision referred to in the second subparagraph, are added to a given cross-border cooperation area.

At the request of the Member State or Member States concerned, in order to facilitate cross border cooperation on maritime borders for outermost regions, and without prejudice to the provisions of the first subparagraph, the Commission may include, in the decision referred to in the second subparagraph, NUTS level 3 regions in outermost regions along maritime borders separated by more than 150 km as cross-border areas which may receive support from the corresponding allocation of those Member States.

2. Without prejudice to Article 20(2) and (3), cross-border cooperation programmes may cover regions in Norway and Switzerland and also cover Liechtenstein, Andorra, Monaco and San Marino and third countries or territories neighbouring outermost regions, all of which shall be equivalent to NUTS level 3 regions.

3. For transnational cooperation, the Commission shall adopt a decision, by means of implementing acts, setting out the list of transnational areas to receive support, broken down by cooperation programme and covering NUTS level 2 regions, while ensuring the continuity of such cooperation in larger coherent areas based on previous programmes, taking account, where appropriate, of macro-regional and sea-basin strategies. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2) of Regulation (EU) No 1303/2013.

When submitting draft transnational cooperation programmes, Member States may request that additional NUTS level 2 regions located adjacent to the regions listed in the decision referred to in the first subparagraph are added to a given transnational cooperation area. Member States shall give reasons for such a request.

4. Without prejudice to Article 20(2) and (3), transnational cooperation programmes may cover regions in both of the following third countries or territories:

- (a) the third countries or territories listed or referred to in paragraph 2 of this Article;
- (b) the Faroe Islands and Greenland.

Without prejudice to Article 20(2) and (3), transnational cooperation programmes may also cover regions in third countries covered by the external financial instruments of the Union, such as the ENI pursuant to the ENI legislative act, including the relevant regions of the Russian Federation, and the IPA II pursuant to the IPA II legislative act. Annual appropriations corresponding to the support of the ENI and IPA II to those programmes shall be made available, provided that the programmes adequately address the relevant external cooperation objectives.

Such regions shall be equivalent to NUTS level 2 regions.

5. For interregional cooperation, support from the ERDF shall cover the entire territory of the Union.

Without prejudice to Article 20(2) and (3), interregional cooperation programmes may cover the whole or part of the third countries or territories referred to in points (a) and (b) of the first subparagraph of paragraph 4 of this Article.

6. For information purposes, regions of third countries or territories referred to in paragraphs 2 and 4 shall be mentioned in the lists referred to in paragraphs 1 and 3.

7. In duly justified cases, in order to increase the efficiency of programme implementation, the outermost regions may, in a single programme for territorial cooperation, combine the amounts of the ERDF allocated for cross-border and transnational cooperation, including the additional allocation provided for under Article 4(2), while complying with the applicable rules for each of those allocations.

Article 4

Resources for European territorial cooperation goal

1. Resources for the European territorial cooperation goal shall amount to 2,75 % of the global resources available for budgetary commitment from the ERDF, ESF and the Cohesion Fund for the 2014-2020 programming period and set out in Article 91(1) of Regulation (EU) No 1303/2013 (i.e., a total of EUR 8 948 259 330) and shall be allocated as follows:

- (a) 74,05 % (i.e., a total of EUR 6 626 631 760) for cross-border cooperation;
- (b) 20,36 % (i.e., a total of EUR 1 821 627 570) for transnational cooperation;
- (c) 5,59 % (i.e., a total of EUR 500 000 000) for interregional cooperation.

2. For programmes under the European territorial cooperation goal, the outermost regions shall be allocated not less than 150 % of the ERDF support they received in the 2007-2013 programming period for cooperation programmes. In addition, an amount of EUR 50 000 000 from the allocation for interregional cooperation shall be set aside for outermost regions' cooperation. Concerning thematic concentration, Article 6(1) shall apply to that additional allocation.

3. The Commission shall communicate to each Member State its share of the global amounts for cross-border and transnational cooperation as referred to in points (a) and (b) of paragraph 1, broken down by year. Population size in the areas referred to in the second subparagraph of Article 3(1) and the first subparagraph of Article 3(3) shall be used as the criterion for the breakdown by Member State.

Based on the amounts communicated pursuant to the first subparagraph, each Member State shall inform the Commission whether, and how, it has used the transfer option provided for in Article 5 and the resulting distribution of funds among the cross-border and transnational programmes in which the Member State participates. The Commission shall, on the basis of the information provided by Member States, adopt a decision, by means of implementing acts, setting out a list of all cooperation programmes and indicating the global amount of the total ERDF support for each programme. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2) of Regulation (EU) No 1303/2013

4. The contribution from the ERDF to cross-border and sea-basin programmes under the ENI and to the cross-border programmes under the IPA II shall be established by the Commission and the Member States concerned. The ERDF contribution established for each Member State shall not subsequently be reallocated between the Member States concerned.

5. Support from the ERDF to individual cross-border and sea-basin programmes under the ENI and to the cross-border programmes under the IPA II shall be granted provided that at least equivalent amounts are provided by the ENI and the IPA II. That equivalence shall be subject to a maximum amount set out in the ENI legislative act or the IPA II legislative act.

6. The annual appropriations corresponding to the support from the ERDF to cross-border and sea-basin programmes under the ENI and to the cross-border programmes under the IPA II shall be entered in the relevant budget lines of those instruments for the 2014 budgetary exercise.

7. In 2015 and 2016, the annual contribution from the ERDF to the programmes under the ENI and the IPA II, for which no programme has been submitted to the Commission by 30 June under the cross-border and sea-basin programmes under the ENI, and under the cross-border programmes under the IPA II, and which has not been re-allocated to another programme submitted under the same category of external cooperation programmes, shall be allocated to the internal cross-border cooperation programmes under point (a) of paragraph 1 in which the Member State or Member States concerned participates or participate.

If by 30 June 2017, there are still cross-border and sea-basin programmes under the ENI and cross-border programmes under the IPA II which have not been submitted to the Commission, the entire contribution from the ERDF referred to in paragraph 4 to those programmes for the remaining years up to 2020, which has not been re-allocated to another adopted programme under the same category of external cooperation programmes, shall be allocated to the internal cross-border cooperation programmes under point (a) of paragraph 1 in which the Member State or Member States concerned participates or participate.

8. Any cross-border and sea basin programmes, referred to in paragraph 4, adopted by the Commission shall be discontinued, or the allocation to the programmes shall be reduced, in accordance with the applicable rules and procedures, in particular if:

- (a) none of the partner countries covered by the programme have signed the relevant financing agreement by the deadline set out in accordance with the ENI legislative act or the IPA II legislative act; or
- (b) the programme cannot be implemented as planned due to problems in relations between the participating countries.

In such cases, the contribution from the ERDF referred to in paragraph 4 corresponding to annual instalments not yet committed, or annual instalments committed and de-committed totally or partially during the same budgetary year, which have not been re-allocated to another programme of the same category of external cooperation programmes, shall be allocated to the internal cross-border cooperation programmes under point (a) of paragraph 1 in which the Member State or Member States concerned participates or participate, at its or their request.

9. The Commission shall provide an annual summary of the financial implementation of cross-border and sea-basin programmes under the ENI, and of cross-border programmes under the IPA II, to which the ERDF contributes in accordance

with this Article, to the Committee established under Article 150(1) of Regulation (EU) No 1303/2013.

Article 5

Transfer option

Each Member State may transfer up to 15 % of its financial allocation for each of the components referred to in points (a) and (b) of Article 4(1) from one of those components to the other.

CHAPTER II

Thematic concentration and investment priorities

Article 6

Thematic concentration

1. At least 80 % of the ERDF allocation to each cross-border cooperation and transnational programme shall be concentrated on a maximum of four of the thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303/2013.

2. All of the thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303 /2013 may be selected for interregional cooperation referred to in point (3)(a) of Article 2 of this Regulation.

Article 7

Investment priorities

1. The ERDF shall, within its scope as set out in Article 3 of Regulation (EU) No 1301 /2013, contribute to the thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303 /2013 through joint action under cross-border, transnational and interregional cooperation programmes. In addition to the investment priorities set out in Article 5 of Regulation (EU) No 1301 /2013, the ERDF may also support the following investment priorities within the thematic objectives indicated for each European territorial cooperation component:

- (a) under cross-border cooperation:
 - (i) promoting sustainable and quality employment and supporting labour mobility by integrating cross-border labour markets, including cross-border mobility, joint local employment initiatives, information and advisory services and joint training;
 - (ii) promoting social inclusion, combating poverty and any discrimination by promoting gender equality, equal opportunities, and the integration of communities across borders;
 - (iii) investing in education, training and vocational training for skills and lifelong learning by developing and implementing joint education, vocational training and training schemes;

- (iv) enhancing institutional capacity of public authorities and stakeholders and efficient public administration by promoting legal and administrative cooperation and cooperation between citizens and institutions;
- (b) under transnational cooperation: enhancing institutional capacity of public authorities and stakeholders and efficient public administration by developing and coordinating macro-regional and sea-basin strategies;
- (c) under interregional cooperation: enhancing institutional capacity of public authorities and stakeholders and efficient public administration by:
- (i) disseminating good practices and expertise and capitalising on the results of the exchange of experience in relation to sustainable urban development, including urban-rural linkages pursuant to point (3)(b) of Article 2.
 - (ii) promoting the exchange of experience in order to reinforce the effectiveness of territorial cooperation programmes and actions as well as the use of EGTCs pursuant to point (3)(c) of Article 2;
 - (iii) strengthening the evidence base in order to reinforce the effectiveness of cohesion policy and the achievement of the thematic objectives through the analysis of development trends pursuant to point (3)(d) of Article 2;
2. In the case of the PEACE cross-border programme and within the thematic objective of promoting social inclusion, combating poverty and any discrimination, the ERDF shall also contribute to promoting social and economic stability in the regions concerned, in particular through actions to promote cohesion between communities.
- CHAPTER III*
- Programming**
- Article 8*
- Content, adoption and amendment of cooperation programmes**
1. A cooperation programme shall consist of priority axes. Without prejudice to Article 59 of Regulation (EU) No 1303/2013, a priority axis shall correspond to a thematic objective and comprise one or more of the investment priorities of that thematic objective in line with Articles 6 and 7 of this Regulation. Where appropriate, and in order to increase its impact and effectiveness through a thematically coherent integrated approach to pursuing the objectives of the Union strategy for smart, sustainable and inclusive growth, a priority axis may, in duly justified cases, combine one or more complementary investment priorities from different thematic objectives in order to achieve the maximum contribution to that priority axis.
2. A cooperation programme shall contribute to the Union strategy for smart, sustainable and inclusive growth and to the achievement of economic, social and territorial cohesion, and shall set out:
- (a) a justification for the choice of thematic objectives, corresponding investment priorities and financial allocations, having regard to the Common Strategic Framework set out in Annex I to Regulation (EU) No 1303/2013, based on an analysis of the needs within the programme area as a whole and the strategy chosen in response to such needs, addressing where appropriate missing links in cross-border infrastructure, taking into account the results of the ex-ante evaluation carried out in accordance with Article 55 of Regulation (EU) No 1303/2013;
 - (b) for each priority axis other than technical assistance:
 - (i) the investment priorities and corresponding specific objectives;
 - (ii) in order to strengthen the result-orientation of the programming, the expected results for the specific objectives, and the corresponding result indicators, with a baseline value and a target value, where appropriate quantified, in accordance with Article 16;
 - (iii) a description of the type and examples of actions to be supported under each investment priority and their expected contribution to the specific objectives referred to in point (i) including the guiding principles for the selection of operations and where appropriate, the identification of the main target groups, specific territories targeted, types of beneficiaries, the planned use of financial instruments, and major projects;
 - (iv) the common and specific output indicators, including the quantified target value, which are expected to contribute to the results, in accordance with Article 16, for each investment priority;
 - (v) identification of implementation steps and financial and output indicators, and where appropriate, result indicators, to be used as milestones and targets for the performance framework in accordance with Article 21(1) of Regulation (EU) No 1303/2013 and Annex II to that Regulation;
 - (vi) where appropriate, a summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions to enhance the administrative capacity of relevant partners to participate in the implementation of the programmes;

- (vii) the corresponding categories of intervention based on a nomenclature adopted by the Commission and an indicative breakdown of the programmed resources;
- (c) for each priority axis concerning technical assistance:
- (i) specific objectives;
- (ii) the expected results for each specific objective, and, where objectively justified given the content of the actions, the corresponding result indicators, with a baseline value and a target value, in accordance with Article 16;
- (iii) a description of actions to be supported and their expected contribution to the specific objectives referred to in point (i);
- (iv) the output indicators which are expected to contribute to the results;
- (v) the corresponding categories of intervention based on a nomenclature adopted by the Commission and an indicative breakdown of the programmed resources.
- Point (ii) shall not apply where the Union contribution to the priority axis or axes concerning technical assistance in a cooperation programme does not exceed EUR 15 000 000;
- (d) a financing plan containing the following tables (without any division per participating Member State):
- (i) a table specifying for each year, in accordance with the rules on co-financing rates laid down in Articles 60, 120 and 121 of Regulation (EU) No 1303/2013, the amount of the total financial appropriation envisaged for the support from the ERDF;
- (ii) a table specifying, for the whole programming period, for the cooperation programme and for each priority axis, the amount of the total financial appropriation of the support from the ERDF and the national co-financing. For priority axes, which combine investment priorities from different thematic objectives, the table shall specify the amount of total financial appropriation and the national co-financing for each of the corresponding thematic objectives. Where the national co-financing is made up of public and private co-financing, the table shall give the indicative breakdown between the public and the private components. It shall show, for information purposes, any contribution from third countries participating in the programme and the envisaged participation from the EIB;
- (e) a list of major projects for which the implementation is planned during the programming period.

The Commission shall adopt implementing acts concerning the nomenclature referred to in points (b)(vii) and (c)(v) of the first subparagraph. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3) of Regulation (EU) No 1303/2000.

3. Taking into account its content and objectives, a cooperation programme shall describe the integrated approach to territorial development, including in relation to regions and areas referred to in Article 174(3) TFEU, having regard to the Partnership Agreements of the participating Member States, and showing how that cooperation programme contributes to the accomplishment of its objectives and expected results, specifying, where appropriate, the following:

- (a) the approach to the use of community-led local development instruments and the principles for identifying the areas where it will be implemented;
- (b) the principles for identifying the urban areas where integrated actions for sustainable urban development are to be implemented and the indicative allocation of the ERDF support for such actions;
- (c) the approach to the use of the integrated territorial investment instrument referred to in Article 11, other than in cases covered by point (b), and their indicative financial allocation from each priority axis;
- (d) where Member States and regions participate in macro-regional strategies and sea basin strategies, the contribution of the planned interventions under the cooperation programme to those strategies, subject to the needs of the programme area as identified by the relevant Member States and taking into account, where applicable, the strategically important projects identified in those strategies.

4. The cooperation programme shall also identify:

- (a) the implementing provisions which:
- (i) identify the managing authority, the certifying authority, where appropriate, and the audit authority;
- (ii) identify the body or bodies designated to carry out control tasks;
- (iii) identify the body or bodies designated to be responsible for carrying out audit tasks;
- (iv) lay down the procedure for setting up the joint secretariat;
- (v) set out a summary description of the management and control arrangements;

- (vi) set out the apportionment of liabilities among the participating Member States in the event of financial corrections imposed by the managing authority or the Commission.
- (b) the body to which payments are to be made by the Commission;
- (c) the actions taken to involve the partners referred to in Article 5 of Regulation (EU) No 1303/2013 in the preparation of the cooperation programme, and the role of those partners in the preparation and implementation of the cooperation programme, including their involvement in the monitoring committee.
5. The cooperation programme shall also set out the following, having regard to the content of the Partnership Agreements and taking into account the institutional and legal framework of the Member States:
- (a) mechanisms to ensure effective coordination between the ERDF, the ESF, the Cohesion Fund, the EAFRD, the EMFF and other Union and national funding instruments, including the coordination and possible combination with the Connecting Europe Facility pursuant to Regulation (EU) No 1316/2013 of the European Parliament and of the Council⁽¹⁾, the ENI, the EDF, and the IPA II, as well as with the EIB, taking into account the provisions set out in Annex I to Regulation (EU) No 1303/2013 where Member States and third countries or territories participate in cooperation programmes that include the use of ERDF appropriations for outermost regions and resources from the EDF, coordination mechanisms at the appropriate level to facilitate effective coordination in the use of those appropriations and resources;
- (b) a summary of the assessment of the administrative burden on beneficiaries and, where necessary, the actions planned, accompanied by an indicative timeframe, to reduce the administrative burden.
6. Information required under point (a) of the first subparagraph of paragraph 2, point (b)(i) to (vii) of the first subparagraph of paragraph 2, paragraph 3 and point (a) of paragraph 5 shall be adapted to the specific character of cooperation programmes under point (3)(b), (c) and (d) of Article 2. Information required under point (e) of the first subparagraph of paragraph 2 and point (b) of paragraph 5 shall not be included in cooperation programmes under point (3)(c) and (d) of Article 2.
7. Each cooperation programme shall, where appropriate and subject to the relevant Member States' duly justified assessment of their relevance to the content and objectives of the programme, include a description of:
- (a) the specific actions to take into account environmental protection requirements, resource efficiency, climate change mitigation and adaptation, disaster resilience and risk prevention and risk management, in the selection of operations;
- (b) the specific actions to promote equal opportunities and prevent any discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation during the preparation, design and implementation of the cooperation programme and in particular in relation to access to funding, taking account of the needs of the various target groups at risk of such discrimination and in particular the requirements to ensure accessibility for persons with disabilities;
- (c) the contribution of the cooperation programme to the promotion of equality between men and women and, where appropriate, the arrangements to ensure the integration of gender perspective at programme and operation level.
- Points (a) and (b) of the first subparagraph shall not apply to cooperation programmes under point (3)(b), (c) and (d) of Article 2.
8. Cooperation programmes under point (3)(c) and (d) of Article 2 shall define the beneficiary or beneficiaries and may specify the granting procedure.
9. The participating Member States and, where they have accepted the invitation to participate in the cooperation programme, third countries or territories, where applicable, shall confirm, in writing, their agreement to the contents of a cooperation programme prior to its submission to the Commission. This agreement shall also include a commitment of all participating Member States and, where applicable, third countries or territories, to provide the co-financing necessary to implement the cooperation programme and, where applicable, the commitment for the financial contribution of the third countries or territories.
- By way of derogation from the first subparagraph, in the case of cooperation programmes involving outermost regions and third countries or territories, the Member States concerned shall consult the respective third countries or territories before submitting the cooperation programmes to the Commission. In that case, the agreements to the contents of the cooperation programmes and the possible contribution of the third countries or territories may instead be expressed in the formally approved minutes of the consultation meetings with the third countries or territories or of the deliberations of the regional cooperation organisations.

⁽¹⁾ Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129).

10. The participating Member States and, where they have accepted the invitation to participate in the cooperation programme, third countries or territories shall draft the cooperation programmes in accordance with the model adopted by the Commission.

11. The Commission shall adopt the model referred to in paragraph 10 by means of implementing acts. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2) of Regulation (EU) No 1303/2013.

12. The Commission shall adopt a decision, by means of implementing acts, approving all elements, including future amendments, falling under this Article except those falling under point (b)(vii) of paragraph 2, point (c)(v) of paragraph 2, point (e) of paragraph 2, points (a)(i) and (c) of paragraph 4, and paragraphs 5 and 7 of this Article, which remain under the responsibility of the participating Member States.

13. The managing authority shall notify the Commission of any decision amending the elements of the cooperation programme not covered by the Commission decision referred to in paragraph 12, within one month of the date of that amending decision. The amending decision shall specify the date of its entry into force, which shall not be earlier than the date of its adoption.

Article 9

Joint Action Plan

Where a joint action plan referred to in Article 104(1) of Regulation (EU) No 1303/2013 is carried out under the responsibility of an EGTC as beneficiary, staff of the joint secretariat of the cooperation programme and members of the assembly of the EGTC may become members of the steering committee referred to in Article 108(1) of Regulation (EU) No 1303/2013. The members of the assembly of the EGTC shall not form the majority within that steering committee.

Article 10

Community-led local development

Community-led local development under Article 32 of Regulation (EU) No 1303/2013 may be implemented in cross-border cooperation programmes, provided that the local development group is composed of representatives of at least two countries, of which one is a Member State.

Article 11

Integrated territorial investment

For cooperation programmes, the intermediate body for carrying out the management and implementation of an integrated territorial investment as referred to in Article 36(3) of Regulation (EU) No 1303/2013 shall be either a legal body established under the laws of one of the participating countries provided that it is set up by public authorities or bodies from at least two participating countries, or an EGTC.

Article 12

Selection of operations

1. Operations under cooperation programmes shall be selected by a monitoring committee as referred to in Article 47 of Regulation (EU) No 1303/2013. That monitoring committee may set up a steering committee that acts under its responsibility for the selection of operations.

2. Operations selected under cross-border and transnational cooperation shall involve beneficiaries from at least two participating countries, at least one of which shall be from a Member State. An operation may be implemented in a single country, provided that cross-border or transnational impacts and benefits are identified.

Operations under interregional cooperation referred to in point (3)(a) and (b) of Article 2 shall involve beneficiaries from at least three countries, at least two of which shall be Member States.

The conditions set out in the first subparagraph shall not apply to operations under the PEACE cross-border programme, between Northern Ireland and the border counties of Ireland, in support of peace and reconciliation as referred to in Article 7(2).

3. Notwithstanding paragraph 2, an EGTC or other legal body established under the laws of one of the participating countries may be the sole beneficiary of an operation provided that it is set up by public authorities or bodies from at least two participating countries, in the case of cross-border and transnational cooperation, and from at least three participating countries, in the case of interregional cooperation.

A legal body that implements a financial instrument or a fund of funds, as applicable, may be the sole beneficiary of an operation without the application of the requirements for its composition set out in the first subparagraph.

4. Beneficiaries shall cooperate in the development and implementation of operations. In addition, they shall cooperate in the staffing or the financing of operations, or in both.

For operations in programmes set up between outermost regions and third countries or territories, the beneficiaries shall be required to cooperate only in two of the fields mentioned in the first subparagraph.

5. For each operation, the managing authority shall provide to the lead or sole beneficiary a document setting out the conditions for support of the operation, including the specific requirements concerning the products or services to be delivered under the operation, the financing plan, and the time-limit for execution.

*Article 13***Beneficiaries**

1. Where there are two or more beneficiaries of an operation in a cooperation programme, one of them shall be designated by all the beneficiaries as the lead beneficiary.
2. The lead beneficiary shall:
 - (a) lay down the arrangements with other beneficiaries in an agreement comprising provisions that, inter alia, guarantee the sound financial management of the funds allocated to the operation, including the arrangements for recovering amounts unduly paid;
 - (b) assume responsibility for ensuring implementation of the entire operation;
 - (c) ensure that expenditure presented by all beneficiaries has been incurred in implementing the operation and corresponds to the activities agreed between all the beneficiaries, and is in accordance with the document provided by the managing authority pursuant to Article 12(5);
 - (d) ensure that the expenditure presented by other beneficiaries has been verified by a controller or controllers where this verification is not carried out by the managing authority pursuant to Article 23(3).
3. If not otherwise specified in the arrangements laid down in accordance with point (a) of paragraph 2 the lead beneficiary shall ensure that the other beneficiaries receive the total amount of the contribution from the funds as quickly as possible and in full. No amount shall be deducted or withheld and no specific charge or other charge with equivalent effect shall be levied that would reduce that amount for the other beneficiaries.
4. Lead beneficiaries shall be located in a Member State participating in the cooperation programme. However, Member States and third countries or territories participating in a cooperation programme may agree to the lead beneficiary being located in a third country or territory participating in that cooperation programme, provided that the managing authority is satisfied that the lead beneficiary can carry out the tasks set out in paragraphs 2 and 3 and that the requirements for management, verification and audit are fulfilled.
5. Sole beneficiaries shall be registered in a Member State participating in the cooperation programme. However, they may be registered in a Member State not participating in the programme, provided the conditions set out in Article 12(3) are satisfied.

CHAPTER IV

Monitoring and evaluation*Article 14***Implementation reports**

1. By 31 May 2016 and by the same date of each subsequent year until and including 2023, the managing authority shall submit to the Commission an annual implementation report in accordance with Article 50(1) of Regulation (EU) No 1303/2013. The implementation report submitted in 2016 shall cover the financial years 2014 and 2015, as well as the period between the starting date for eligibility of expenditure and 31 December 2013.
 2. For the reports submitted in 2017 and 2019, the deadline referred to in paragraph 1 shall be 30 June.
 3. Annual implementation reports shall set out information on:
 - (a) implementation of the cooperation programme in accordance with Article 50(2) of Regulation (EU) No 1303/2013;
 - (b) where appropriate, progress in preparation and implementation of major projects and joint action plans.
 4. The annual implementation reports submitted in 2017 and 2019 shall set out and assess the information required under Articles 50(4) and (5) of Regulation (EU) No 1303/2013 respectively and the information set out in paragraph 2 of this Article together with the following information:
 - (a) progress in implementation of the evaluation plan and the follow-up given to the findings of evaluations;
 - (b) the results of the information and publicity measures carried out under the communication strategy;
 - (c) the involvement of the partners in the implementation, monitoring and evaluation of the cooperation programme.
- The annual implementation reports submitted in 2017 and 2019 may, subject to the content and objectives of each cooperation programme, set out information on and assess the following:
- (a) progress in the implementation of the integrated approach to territorial development, including sustainable urban development, and community-led local development under the cooperation programme;

- (b) progress in the implementation of actions to reinforce the capacity of authorities and beneficiaries to administer and to use the ERDF;
- (c) where appropriate, the contribution to macro-regional and sea basin strategies;
- (d) the specific actions taken to promote equality between men and women and to promote non-discrimination, in particular accessibility for persons with disabilities, and the arrangements implemented to ensure the integration of gender perspective in the cooperation programme and operations;
- (e) actions taken to promote sustainable development;
- (f) progress in the implementation of actions in the field of social innovation.

5. The annual and final implementation reports shall be drawn up following models adopted by the Commission by means of implementing acts. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2) of Regulation (EU) No 1303/2013.

Article 15

Annual review

The annual review meeting shall be organised in accordance with Article 51 of Regulation (EU) No 1303/2013.

Where an annual review meeting is not organised pursuant to Article 51(3) of Regulation (EU) No 1303/2013, the annual review may be carried out in writing.

Article 16

Indicators for the European territorial cooperation goal

1. Common output indicators, as set out in the Annex to this Regulation, programme-specific result indicators and, where relevant, programme-specific output indicators shall be used in accordance with Article 27(4) of Regulation (EU) No 1303/2013 and with point (b)(ii) and (iv) and point (c)(ii) and (iv) of the first subparagraph of Article 8(2) of this Regulation.

2. For common and programme-specific output indicators, baselines shall be set at zero. Cumulative quantified target values for those indicators shall be set for 2023.

3. For programme-specific result indicators, which relate to investment priorities, baselines shall use the latest available data and targets shall be set for 2023. Targets may be expressed in quantitative or qualitative terms.

4. The Commission shall be empowered to adopt delegated acts in accordance with Article 29 to amend the list of common output indicators set out in the Annex, in order to make adjustments, where justified to ensure effective assessment of progress in programme implementation.

Article 17

Technical assistance

The amount of the ERDF allocated to technical assistance shall be limited to 6 % of the total amount allocated to a cooperation programme. For programmes with a total allocation not exceeding EUR 50 000 000 the amount of the ERDF allocated to technical assistance shall be limited to 7 % of the total amount allocated, but shall not be less than EUR 1 500 000 and not higher than EUR 3 000 000.

CHAPTER V

Eligibility

Article 18

Rules on eligibility of expenditure

1. The Commission shall be empowered to adopt delegated acts in accordance with Article 29 to lay down specific rules on eligibility of expenditure for cooperation programmes with regard to staff costs, office and administrative expenditure, travel and accommodation costs, external expertise and services costs, and equipment expenditure. The Commission shall notify the delegated acts, adopted in accordance with Article 29, simultaneously to the European Parliament and to the Council by 22 April 2014.

2. Without prejudice to the eligibility rules laid down in, or on the basis of, Articles 65 to 71 of Regulation (EU) No 1303/2013, Regulation (EU) No 1301/2013, this Regulation or the delegated act referred to in paragraph 1 of this Article, the participating Member States in the monitoring committee, shall establish additional rules on eligibility of expenditure for the cooperation programme as a whole.

3. For matters not covered by eligibility rules laid down in, or on the basis of, Articles 65 to 71 of Regulation (EU) No 1303/2013, Regulation (EU) No 1301/2013, in the delegated act referred to in paragraph 1 of this Article or in rules established jointly by the participating Member States in accordance with paragraph 2 of this Article, the national rules of the Member State in which the expenditure is incurred shall apply.

Article 19

Staff costs

Staff costs of an operation may be calculated at a flat rate of up to 20 % of the direct costs other than the staff costs of that operation.

*Article 20***Eligibility of operations in cooperation programmes depending on location**

1. Operations under cooperation programmes, subject to the derogations referred to in paragraphs 2 and 3, shall be located in the part of the programme area comprising Union territory (the 'Union part of the programme area').

2. The managing authority may accept that all or part of an operation is implemented outside the Union part of the programme area, provided that all the following conditions are satisfied:

- (a) the operation is for the benefit of the programme area;
 - (b) the total amount allocated under the cooperation programme to operations located outside the Union part of the programme area does not exceed 20 % of the support from the ERDF at programme level, or 30 % in the case of cooperation programmes for which the Union part of the programme area consists of outermost regions;
 - (c) the obligations of the managing and audit authorities in relation to management, control and audit concerning the operation are fulfilled by the cooperation programme authorities, or they enter into agreements with authorities in the Member State or third country or territory in which the operation is implemented.
3. For operations concerning technical assistance or promotional activities and capacity-building, expenditure may be incurred outside the Union part of the programme area provided that the conditions in points (a) and (c) of paragraph 2 are satisfied.

CHAPTER VI

Management, control and designation*Article 21***Designation of authorities**

1. Member States participating in a cooperation programme shall designate, for the purposes of Article 123(1) of Regulation (EU) No 1303/2013, a single managing authority; for the purposes of Article 123(2) of that Regulation, a single certifying authority; and, for the purposes of Article 123(4) of that Regulation, a single audit authority. The managing authority and the audit authority shall be located in the same Member State.

Member States participating in a cooperation programme may designate the managing authority as also being responsible for carrying out the functions of the certifying authority. Such a designation shall be without prejudice to the apportionment of

liabilities in relation to the application of financial corrections among the participating Member States as laid down in the cooperation programme.

2. The certifying authority shall receive the payments made by the Commission and shall, as a general rule, make payments to the lead beneficiary in accordance with Article 132 of Regulation (EU) No 1303/2013.

3. The procedure for the designation of the managing authority and, where appropriate, of the certifying authority, set out in Article 124 of Regulation (EU) No 1303/2013, shall be carried out by the Member State in which the authority is located.

*Article 22***European grouping of territorial cooperation**

Member States participating in a cooperation programme may make use of an EGTC for the purposes of making it responsible for managing that cooperation programme or part thereof, in particular by conferring on it the responsibilities of a managing authority.

*Article 23***Functions of the managing authority**

1. Without prejudice to paragraph 4 of this Article, the managing authority of a cooperation programme shall carry out the functions laid down in Article 125 of Regulation (EU) No 1303/2013.

2. The managing authority, after consultation with the Member States and any third countries participating in a cooperation programme, shall set up a joint secretariat.

The joint secretariat shall assist the managing authority and the monitoring committee in carrying out their respective functions. The joint secretariat shall also provide information to potential beneficiaries about funding opportunities under cooperation programmes and shall assist beneficiaries in the implementation of operations.

3. Where the managing authority is an EGTC, verifications under point (a) of Article 125(4) of Regulation (EU) No 1303/2013 shall be carried out by or under the responsibility of the managing authority at least for those Member States and third countries or territories from which there are members participating in the EGTC.

4. Where the managing authority does not carry out verifications under point (a) of Article 125(4) of Regulation (EU) No 1303/2013 throughout the whole programme area, or where the verifications are not carried out by or under the responsibility of the managing authority for those Member States and third countries or territories from which there are members participating in the EGTC in accordance with paragraph 3, each Member State or, where it has accepted the invitation to participate in the cooperation programme, each third country or territory shall designate the body or person responsible for carrying out such verifications in relation to beneficiaries on its territory (the 'controller(s)').

The controllers referred to in the first subparagraph may be the same bodies responsible for carrying out such verifications for the operational programmes under the Investment for growth and jobs goal or, in the case of third countries, for carrying out comparable verifications under external policy instruments of the Union.

The managing authority shall satisfy itself that the expenditure of each beneficiary participating in an operation has been verified by a designated controller.

Each Member State shall ensure that the expenditure of a beneficiary can be verified within a period of three months of the submission of the documents by the beneficiary concerned.

Each Member State or, where it has accepted the invitation to participate in the cooperation programme, each third country shall be responsible for verifications carried out on its territory.

5. Where the delivery of co-financed products or services can be verified only in respect of an entire operation, the verification shall be performed by the managing authority or by the controller of the Member State where the lead beneficiary is located.

Article 24

Functions of the certifying authority

The certifying authority of a cooperation programme shall carry out the functions laid down in Article 126 of Regulation (EU) No 1303/2013.

Article 25

Functions of the audit authority

1. The Member States and third countries participating in a cooperation programme may authorise the audit authority to carry out directly the functions provided for in Article 127 of Regulation (EU) No 1303/2013 in the whole of the territory covered by a cooperation programme. They shall specify when the audit authority is to be accompanied by an auditor of a Member State or a third country.

2. Where the audit authority does not have the authorisation referred to in paragraph 1, it shall be assisted by a group of auditors composed of a representative from each Member State or third country participating in the cooperation programme and carrying out the functions provided for in Article 127 of Regulation (EU) No 1303/2013. Each Member State or, where it has accepted the invitation to participate in a cooperation programme, each third country shall be responsible for audits carried out on its territory.

Each representative from each Member State or third country participating in the cooperation programme shall be responsible for providing the factual elements relating to expenditure on its territory that are required by the audit authority in order to perform its assessment.

The group of auditors shall be set up within three months of the decision approving the cooperation programme. It shall draw up its own rules of procedure and be chaired by the audit authority for the cooperation programme.

3. The auditors shall be functionally independent of controllers who carry out verifications under Article 23.

CHAPTER VII

Participation of third countries in transnational and interregional cooperation programmes

Article 26

Implementation conditions for the participation of third countries

The applicable programme implementation conditions governing the financial management as well as the programming, monitoring, evaluation and control of the participation of third countries, through a contribution of IPA II or ENI resources to transnational and interregional cooperation programmes, shall be established in the relevant cooperation programme and also, where necessary, in the financing agreement between the Commission, the governments of the third countries concerned and the Member State hosting the managing authority of the relevant cooperation programme. Programme implementation conditions shall be consistent with the Union's cohesion policy rules.

CHAPTER VIII

Financial management

Article 27

Budget commitments, payments and recoveries

1. The ERDF support to cooperation programmes shall be paid into a single account with no national subaccounts.

2. The managing authority shall ensure that any amount paid as a result of an irregularity is recovered from the lead or sole beneficiary. Beneficiaries shall repay to the lead beneficiary any amounts unduly paid.

3. If the lead beneficiary does not succeed in securing repayment from other beneficiaries or if the managing authority does not succeed in securing repayment from the lead or sole beneficiary, the Member State or third country on whose territory the beneficiary concerned is located or, in the case of an EGTC, is registered shall reimburse the managing authority any amounts unduly paid to that beneficiary. The managing authority shall be responsible for reimbursing the amounts concerned to the general budget of the Union, in accordance with the apportionment of liabilities among the participating Member States as laid down in the cooperation programme.

Article 28

Use of the euro

By way of derogation from Article 133 of Regulation (EU) No 1303/2013, expenditure incurred in a currency other than the euro shall be converted into euro by the beneficiaries using the monthly accounting exchange rate of the Commission in the month during which that expenditure was either:

- (a) incurred;
- (b) submitted for verification to the managing authority or the controller in accordance with Article 23 of this Regulation; or
- (c) reported to the lead beneficiary.

The method chosen shall be set out in the cooperation programme and be applicable to all beneficiaries.

The conversion shall be verified by the managing authority or by the controller in the Member State or third country in which the beneficiary is located.

CHAPTER IX

Final provisions

Article 29

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The delegation of power to adopt delegated acts referred to in Articles 16(4) and 18(1) shall be conferred on the Commission from 21 December 2013 until 31 December 2020.
3. The delegation of power referred to in Articles 16(4) and 18(1) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 17 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
R. ŠADŽIUS

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Articles 16(4) and 18(1) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 30

Transitional provisions

1. This Regulation shall not affect either the continuation or modification, including the total or partial cancellation of assistance approved by the Commission on the basis of Regulation (EC) No 1080/2006 or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation shall consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. For the purposes of this paragraph assistance shall cover operational programmes and major projects.

2. Applications to receive assistance made or approved under Regulation (EC) No 1080/2006 before 1 January 2014 shall remain valid.

Article 31

Review

The European Parliament and the Council shall review this Regulation by 31 December 2020, in accordance with Article 178 TFEU.

Article 32

Entry into force

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

Articles 4, 27 and 28 shall apply with effect from 1 January 2014.

ANNEX

COMMON OUTPUT INDICATORS FOR THE EUROPEAN TERRITORIAL COOPERATION GOAL

	UNIT	NAME
Productive investment		
	enterprises	Number of enterprises receiving support
	enterprises	Number of enterprises receiving grants
	enterprises	Number of enterprises receiving financial support other than grants
	enterprises	Number of enterprises receiving non-financial support
	enterprises	Number of new enterprises supported
	enterprises	Number of enterprises participating in cross-border, transnational or interregional research projects
	organisations	Number of research institutions participating in cross-border, transnational or interregional research projects
	EUR	Private investment matching public support to enterprises (grants)
	EUR	Private investment matching public support to enterprises (non-grants)
	full time equivalents	Employment increase in supported enterprises
Sustainable tourism	visits/year	Increase in expected number of visits to supported sites of cultural and natural heritage and attractions
ICT Infrastructure	households	Additional households with broadband access of at least 30 Mbps
Transport		
Railway	kilometres	Total length of new railway lines
		of which: TEN-T
	kilometres	Total length of reconstructed or upgraded railway lines
		of which: TEN-T
Roads	kilometres	Total length of newly built roads
		of which: TEN-T
	kilometres	Total length of reconstructed or upgraded roads
		of which: TEN-T
Urban transport	kilometres	Total length of new or improved tram and metro lines
Inland waterways	kilometres	Total length of new or improved inland waterways
Environment		
Solid waste	tonnes/year	Additional waste recycling capacity

	UNIT	NAME
Water supply	persons	Additional population served by improved water supply
Wastewater treatment	population equivalent	Additional population served by improved wastewater treatment
Risk prevention and management	persons	Population benefiting from flood protection measures
	persons	Population benefiting from forest fire protection measures
Land rehabilitation	hectares	Total surface area of rehabilitated land
Nature and biodiversity	hectares	Surface area of habitats supported in order to attain a better conservation status
Research, Innovation		
	full time equivalents	Number of new researchers in supported entities
	full time equivalents	Number of researchers working in improved research infrastructure facilities
	enterprises	Number of enterprises cooperating with research institutions
	EUR	Private investment matching public support in innovation or R&D projects
	enterprises	Number of enterprises supported to introduce new to the market products
	enterprises	Number of enterprises supported to introduce new to the firm products
Energy and Climate change		
Renewables	MW	Additional capacity of renewable energy production
Energy efficiency	households	Number of households with improved energy consumption classification
	kWh/year	Decrease of annual primary energy consumption of public buildings
	users	Number of additional energy users connected to smart grids
GHG reduction	tonnes of CO ₂ eq	Estimated annual decrease of GHG
Social infrastructure		
Childcare & education	persons	Capacity of supported childcare or education infrastructure
Health	persons	Population covered by improved health services
Urban development specific indicators		
	persons	Population living in areas with integrated urban development strategies
	square metres	Open space created or rehabilitated in urban areas

	UNIT	NAME
	square metres	Public or commercial buildings built or renovated in urban areas
	housing units	Rehabilitated housing in urban areas
Labour Market and Training ⁽¹⁾		
	persons	Number of participants in cross-border mobility initiatives
	persons	Number of participants in joint local employment initiatives and joint training
	persons	Number of participants in projects promoting gender equality, equal opportunities and social inclusion across borders
	persons	Number of participants in joint education and training schemes to support youth employment, educational opportunities and higher and vocational education across borders

⁽¹⁾ Where relevant, the information on participants will be broken down by their labour market status, indicating whether they are "employed", "unemployed", "long-term unemployed", "inactive" or "inactive and not in education or training".

Joint statement of the European Parliament and of the Council concerning the application of Article 6 of the ERDF Regulation, Article 15 of the ETC Regulation and Article 4 of the Cohesion Fund Regulation

The European Parliament and the Council note the assurance provided by the Commission to the EU legislature that the common output indicators for the ERDF Regulation, the ETC Regulation and the Cohesion Fund Regulation to be included in an annex to, respectively, each regulation, are the outcome of a lengthy preparatory process involving the evaluation experts of both the Commission and the Member States and, in principle, are expected to remain stable.

REGULATION (EU) No 1300/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 17 December 2013
on the Cohesion Fund and repealing Council Regulation (EC) No 1084/2006

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular the second paragraph of Article 177 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) The first paragraph of Article 174 of the Treaty on the Functioning of the European Union (TFEU) provides that the Union is to develop and pursue its actions leading to the strengthening of its economic, social and territorial cohesion. The Cohesion Fund which is established by this Regulation should, therefore, provide a financial contribution to projects in the fields of environment and trans-European networks in the area of transport infrastructure.
- (2) Regulation (EU) No 1303/2013 of the European Parliament and of the Council ⁽³⁾ sets out provisions common to the European Regional Development Fund (ERDF), the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development

and the European Maritime and Fisheries Fund. That Regulation constitutes a new framework for the European Structural and Investment Funds including the Cohesion Fund. It is necessary, therefore, to specify the tasks of the Cohesion Fund in relation to that framework and in relation to the purpose assigned to the Cohesion Fund in the TFEU.

- (3) Specific provisions concerning the type of activities which can be supported by the Cohesion Fund, in order to contribute to the investment priorities within the thematic objectives set out in Regulation (EU) No 1303/2013, should be laid down.
- (4) The Union should be able to contribute, through the Cohesion Fund, to actions in pursuit of its environmental objectives, in accordance with Articles 11 and 191 TFEU, namely energy efficiency and renewable energy and, in the transport sector outside the trans-European networks, rail, river and sea transport, intermodal transport systems and their interoperability, management of road, sea and air traffic, clean urban transport and public transport.
- (5) It should be recalled that where measures based on Article 192(1) TFEU involve costs deemed disproportionate for the public authorities of a Member State and financial support from the Cohesion Fund is provided in accordance with Article 192(5) TFEU, the polluter pays principle is nevertheless to apply.
- (6) Trans-European transport network (TEN-T) projects supported by the Cohesion Fund are to comply with the guidelines established in Regulation (EU) No 1315/2013 of the European Parliament and of the Council ⁽⁴⁾. In order to concentrate efforts in that regard, priority should be given to projects of common interest as defined in that Regulation.
- (7) Investment to achieve the reduction of greenhouse gas emissions from activities listed in Annex I to Directive 2003/87/EC of the European Parliament and of the Council ⁽⁵⁾ should not be eligible for support from the Cohesion Fund as it already benefits financially from the

⁽¹⁾ OJ C 191, 29.6.2012, p. 38.

⁽²⁾ OJ C 225, 27.7.2012, p. 143.

⁽³⁾ Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (See page 320 of this Official Journal).

⁽⁴⁾ Regulation (EU) No 1315/2013 of the European Parliament and of the Council of 11 December 2013 on Union guidelines for the development of the trans-European transport network and repealing Decision No 661/2010/EU (OJ L 348, 20.12.2013, p. 1).

⁽⁵⁾ Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a scheme for greenhouse gas emission allowance trading within the Community and amending Council Directive 96/61/EC (OJ L 275, 25.10.2003, p. 32).

application of that Directive. That exclusion should not restrict the possibility of using the Cohesion Fund to support activities that are not listed in Annex I to Directive 2003/87/EC even if those activities are implemented by the same economic operators, and include activities such as energy efficiency investment in the co-generation of heat and power and in district heating networks, smart energy distribution, storage and transmission systems and measures aimed at reducing air pollution, even if one of the indirect effects of such activities is the reduction of greenhouse gas emissions, or if they are listed in the national plan referred to in Directive 2003/87/EC.

- (8) It is not possible for investment in housing, other than that related to the promotion of energy efficiency or renewable energy use, to be eligible for support from the Cohesion Fund as it falls outside the scope of support from the Cohesion Fund as defined in the TFEU.
- (9) In order to accelerate the development of transport infrastructure across the Union, the Cohesion Fund should support transport infrastructure projects of European added value provided for in Regulation (EU) No 1316/2013 of the European Parliament and of the Council⁽¹⁾ for a total amount of EUR 10 000 000 000. The allocation of support from the Cohesion Fund to those projects should comply with the rules established under Article 92(6) of Regulation (EU) No 1303/2013. In accordance with Regulation (EU) No 1316/2013, support should be available only to Member States eligible for funding from the Cohesion Fund, with the co-financing rates applicable to that Fund.
- (10) It is important to ensure that, in promoting risk management investment, specific risks at regional, cross-border and transnational level are taken into account.
- (11) Complementarity and synergies between interventions supported by the Cohesion Fund, the ERDF, the European territorial cooperation goal and the Connecting Europe Facility should be ensured, in order to avoid duplication of efforts and to guarantee the optimal linkage of different types of infrastructure at local, regional and national level, and throughout the Union.
- (12) In order to address the specific needs of the Cohesion Fund, and in line with the Union strategy for smart,

sustainable and inclusive growth, it is necessary to set out within each thematic objective laid down in Regulation (EU) No 1303/2013, the Cohesion Fund-specific actions as 'investment priorities'. Those investment priorities should set out detailed objectives, which are not mutually exclusive, to which the Cohesion Fund is to contribute. Such investment priorities should form the basis for the definition of specific objectives within operational programmes that take into account the needs and characteristics of the programme area. In order to increase flexibility and reduce the administrative burden through joint implementation, the ERDF and the Cohesion Fund investment priorities under the corresponding thematic objectives should be aligned.

- (13) A common set of output indicators to assess the aggregated progress at Union level of the implementation of operational programmes should be set out in an Annex to this Regulation. Those indicators should correspond to the investment priority and type of action supported in accordance with this Regulation and the relevant provisions of Regulation (EU) No 1303/2013. The common output indicators should be complemented by programme-specific result indicators and, where relevant, by programme-specific output indicators.
- (14) In order to amend this Regulation with regard to certain non-essential elements, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of the amendment of the list of common output indicators set out in Annex I to this Regulation. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and the Council.
- (15) Since the objective of this Regulation, namely to strengthen the economic, social and territorial cohesion of the Union in the interests of promoting sustainable development, cannot be sufficiently achieved by the Member States but can rather, by reason of the extent of the disparities between the levels of development of the various regions and the backwardness of the least favoured regions and the limit on the financial resources of the Member States and regions, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.

⁽¹⁾ Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129).

- (16) Since this Regulation replaces Council Regulation (EC) No 1084/2006 ⁽¹⁾, that Regulation should be repealed. However, this Regulation should not affect either the continuation or modification of assistance approved by the Commission on the basis of Regulation (EC) No 1084/2006 or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation should consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. Applications to receive assistance made or approved under Regulation (EC) No 1084/2006 should remain valid.
- (17) In order to allow for the prompt application of the measures provided for in this Regulation, this Regulation should enter into force on the day following that of its publication in the *Official Journal of the European Union*,

HAVE ADOPTED THIS REGULATION:

Article 1

Establishment of the Cohesion Fund and subject matter

1. A Cohesion Fund is hereby established for the purpose of strengthening the economic, social and territorial cohesion of the Union in the interests of promoting sustainable development.
2. This Regulation establishes the tasks of the Cohesion Fund and the scope of its support with regard to the Investment for growth and jobs goal referred to in Article 89 of Regulation (EU) No 1303/2013.

Article 2

Scope of support from the Cohesion Fund

1. The Cohesion Fund shall, while ensuring an appropriate balance and according to the investment and infrastructure needs specific to each Member State, support:
- (a) investment in the environment, including areas related to sustainable development and energy which present environmental benefits;
- (b) TEN-T, in compliance with the guidelines adopted by Regulation (EU) No 1315/2013;
- (c) technical assistance.
2. The Cohesion Fund shall not support:
- (a) the decommissioning or the construction of nuclear power stations;

⁽¹⁾ Council Regulation (EC) No 1084/2006 of 11 July 2006 establishing a Cohesion Fund and repealing Regulation (EC) No 1164/94 (OJ L 210, 31.7.2006, p. 79).

- (b) investment to achieve the reduction of greenhouse gas emissions from activities listed in Annex I to Directive 2003/87/EC;
- (c) investment in housing unless related to the promotion of energy efficiency or renewable energy use;
- (d) the manufacturing, processing and marketing of tobacco and tobacco products;
- (e) undertakings in difficulty, as defined under Union State aid rules;
- (f) investment in airport infrastructure unless related to environmental protection or accompanied by investment necessary to mitigate or reduce its negative environmental impact.

Article 3

Cohesion Fund support for transport infrastructure projects under the Connecting Europe Facility

The Cohesion Fund shall support transport infrastructure projects of European added value provided for in Regulation (EU) No 1316/2013 for an amount of EUR 10 000 000 000 in accordance with Article 92(6) of Regulation (EU) No 1303/2013.

Article 4

Investment priorities

The Cohesion Fund shall support the following investment priorities within the thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303/2013, in accordance with the development needs and growth potential referred to in point (a)(i) of Article 15(1) of that Regulation and set out in the Partnership Agreement:

- (a) supporting the shift towards a low-carbon economy in all sectors by:
- (i) promoting the production and distribution of energy derived from renewable sources;
- (ii) promoting energy efficiency and renewable energy use in enterprises;
- (iii) supporting energy efficiency, smart energy management and renewable energy use in public infrastructure, including in public buildings, and in the housing sector;
- (iv) developing and implementing smart distribution systems that operate at low and medium voltage levels;

- (v) promoting low-carbon strategies for all types of territories, in particular for urban areas, including the promotion of sustainable multimodal urban mobility and mitigation-relevant adaptation measures;
- (vi) promoting the use of high-efficiency co-generation of heat and power based on useful heat demand;
- (b) promoting climate change adaptation, risk prevention and management by:
- (i) supporting investment for adaptation to climate change, including ecosystem-based approaches;
- (ii) promoting investment to address specific risks, ensuring disaster resilience and developing disaster management systems;
- (c) preserving and protecting the environment and promoting resource efficiency by:
- (i) investing in the waste sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States, for investment that goes beyond those requirements;
- (ii) investing in the water sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States, for investment that goes beyond those requirements;
- (iii) protecting and restoring biodiversity and soil and promoting ecosystem services, including through Natura 2000, and green infrastructure;
- (iv) taking action to improve the urban environment, to revitalise cities, regenerate and decontaminate brownfield sites (including conversion areas), reduce air pollution and promote noise-reduction measures;
- (d) promoting sustainable transport and removing bottlenecks in key network infrastructures by:
- (i) supporting a multimodal Single European Transport Area by investing in the TEN-T;
- (ii) developing and improving environmentally-friendly (including low-noise) and low-carbon transport systems, including inland waterways and maritime transport, ports, multimodal links and airport infrastructure, in order to promote sustainable regional and local mobility;
- (iii) developing and rehabilitating comprehensive, high quality and interoperable railway systems, and promoting noise-reduction measures;
- (e) enhancing institutional capacity of public authorities and stakeholders and efficient public administration through actions to strengthen the institutional capacity and the efficiency of public administrations and public services related to the implementation of the Cohesion Fund.

Article 5

Indicators

1. Common output indicators, as set out in Annex I to this Regulation, programme-specific result indicators and, where relevant, programme-specific output indicators shall be used in accordance with Article 27(4) and point (b)(ii) and (iv) and point (c)(ii) and (iv) of Article 96(2) of Regulation (EU) No 1303/2013.
2. For common and programme-specific output indicators, baselines shall be set at zero. Cumulative quantified target values for those indicators shall be set for 2023.
3. For programme-specific result indicators, which relate to investment priorities, baselines shall use the latest available data and targets shall be set for 2023. Targets may be expressed in quantitative or qualitative terms.
4. The Commission shall be empowered to adopt delegated acts in accordance with Article 7 to amend the list of common output indicators set out in Annex I, in order to make adjustments, where justified to ensure effective assessment of progress in operational programme implementation.

Article 6

Transitional provisions

1. This Regulation shall not affect either the continuation or modification, including the total or partial cancellation of assistance approved by the Commission on the basis of Regulation (EC) No 1084/2006 or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation shall consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. For the purposes of this paragraph assistance shall cover operational programmes and major projects.

2. Applications to receive assistance made or approved under Regulation (EC) No 1084/2006 shall remain valid.

Article 7

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 5(4) shall be conferred on the Commission from 21 December 2013 until 31 December 2020.

3. The delegation of power referred to in Article 5(4) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Article 5(4) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the

European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or the Council.

Article 8

Repeal

Without prejudice to Article 6 of this Regulation, Regulation (EC) No 1084/2006 is hereby repealed with effect from 1 January 2014.

References to the repealed Regulation shall be construed as references to this Regulation and shall be read in accordance with the correlation table set out in Annex II.

Article 9

Review

The European Parliament and the Council shall review this Regulation by 31 December 2020, in accordance with Article 177 TFEU.

Article 10

Entry into force

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 17 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
R. ŠADŽIUS

ANNEX I

COMMON OUTPUT INDICATORS FOR THE COHESION FUND

	UNIT	NAME
Environment		
Solid waste	tonnes/year	Additional waste recycling capacity
Water supply	persons	Additional population served by improved water supply
Wastewater treatment	population equivalent	Additional population served by improved wastewater treatment
Risk prevention and management	persons	Population benefiting from flood protection measures
	persons	Population benefiting from forest fire protection measures
Land rehabilitation	hectares	Total surface area of rehabilitated land
Nature and biodiversity	hectares	Surface area of habitats supported in order to attain a better conservation status
Energy and climate change		
Renewables	MW	Additional capacity of renewable energy production
Energy efficiency	households	Number of households with improved energy consumption classification
	kWh/year	Decrease of annual primary energy consumption of public buildings
	users	Number of additional energy users connected to smart grids
GHG reduction	tonnes of CO ₂ eq	Estimated annual decrease of GHG
Transport		
Railway	kilometres	Total length of new railway lines
	kilometres	Total length of reconstructed or upgraded railway lines
Roads	kilometres	Total length of newly built roads
	kilometres	Total length of reconstructed or upgraded roads
Urban transport	kilometres	Total length of new or improved tram and metro lines
Inland waterways	kilometres	Total length of new or improved inland waterways

Joint statement of the European Parliament and of the Council concerning the application of Article 6 of the ERDF Regulation, Article 15 of the ETC Regulation and Article 4 of the Cohesion Fund Regulation

The European Parliament and the Council note the assurance provided by the Commission to the EU legislature that the common output indicators for the ERDF Regulation, the ETC Regulation and the Cohesion Fund Regulation to be included in an annex to, respectively, each regulation, are the outcome of a lengthy preparatory process involving the evaluation experts of both the Commission and the Member States and, in principle, are expected to remain stable.

REGULATION (EU) No 1301/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 17 December 2013

**on the European Regional Development Fund and on specific provisions concerning the Investment
for growth and jobs goal and repealing Regulation (EC) No 1080/2006**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 178 and 349 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

(1) Article 176 of the Treaty on the Functioning of the European Union (TFEU) provides that the European Regional Development Fund (ERDF) is intended to help to redress the main regional imbalances in the Union. Under that Article and the second and third paragraphs of Article 174 TFEU, the ERDF is to contribute to reducing disparities between the levels of development of the various regions and to reducing the backwardness of the least favoured regions, among which particular attention is to be paid to regions which suffer from severe and permanent natural or demographic handicaps such as the northernmost regions with very low population density and island, cross-border and mountain regions.

(2) Regulation (EU) No 1303/2013 of the European Parliament and of the Council ⁽³⁾ sets out the provisions

common to the ERDF, the European Social Fund (ESF), the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund.

(3) Specific provisions concerning the type of activities which can be supported by the ERDF, in order to contribute to the investment priorities within the thematic objectives set out in Regulation (EU) No 1303/2013, should be laid down. At the same time, activities outside the scope of the ERDF should be defined and clarified, including investment to achieve the reduction of greenhouse gas emissions from activities listed in Annex I to Directive 2003/87/EC of the European Parliament and of the Council ⁽⁴⁾. In order to avoid excessive financing, such investment should not be eligible for support from the ERDF as it already benefits financially from the application of Directive 2003/87/EC. That exclusion should not restrict the possibility of using the ERDF to support activities that are not listed in Annex I to Directive 2003/87/EC even if those activities are implemented by the same economic operators, and include activities such as energy efficiency investments in district heating networks, smart energy distribution, storage and transmission systems and measures aimed at reducing air pollution, even if one of the indirect effects of such activities is the reduction of greenhouse gas emissions, or if they are listed in the national plan referred to in Directive 2003/87/EC.

(4) It is necessary to specify what additional activities can be supported by the ERDF under the European territorial cooperation goal.

(5) The ERDF should contribute to the Union strategy for smart, sustainable and inclusive growth, thus ensuring greater concentration of ERDF support on the priorities of the Union. Depending on which category of regions is supported, the support from the ERDF under the Investment for growth and jobs goal should be concentrated on research and innovation, information and communication technologies (ICT), small and medium-sized enterprises (SMEs) and promoting a low-carbon economy. That thematic concentration should be attained at national level while allowing for flexibility at the level of operational programmes and between different categories of regions. The thematic concentration should be adjusted, where appropriate, to take

⁽¹⁾ OJ C 191, 29.6.2012, p. 44.

⁽²⁾ OJ C 225, 27.7.2012, p. 114.

⁽³⁾ Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Regulation (EC) No 1083/2006 (See page 320 of this Official Journal).

⁽⁴⁾ Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a scheme for greenhouse gas emission allowance trading within the Community and amending Council Directive 96/61/EC (OJ L 275, 25.10.2003, p. 32).

into account Cohesion Fund resources allocated to supporting the investment priorities relating to the shift towards a low-carbon economy and referred to in Regulation (EU) No 1300/2013 of the European Parliament and of the Council ⁽¹⁾. The degree of thematic concentration should take into account the level of development of the region, the contribution of Cohesion Fund resources where applicable, as well as the specific needs of regions whose GDP per capita used as an eligibility criterion for the 2007-2013 programming period was less than 75 % of the average GDP of the EU-25 for the reference period, regions designated with phasing-out status in the 2007-2013 programming period and certain NUTS level 2 regions consisting solely of island Member States or of islands.

- (6) It should be possible for support from the ERDF under the investment priority 'community-led local development' to contribute to all of the thematic objectives referred to in this Regulation.
- (7) In order to address the specific needs of the ERDF, and in line with the Union strategy for smart, sustainable and inclusive growth, it is necessary to set out within each thematic objective laid down in Regulation (EU) No 1303/2013, the ERDF-specific actions as 'investment priorities'. Those investment priorities should set out detailed objectives, which are not mutually exclusive, to which the ERDF is to contribute. Such investment priorities should form the basis for the definition of specific objectives within programmes that take into account the needs and characteristics of the programme area.
- (8) It is necessary to promote innovation and the development of SMEs, in emerging fields linked to European and regional challenges such as creative and cultural industries and innovative services, reflecting new societal demands, or to products and services linked to an ageing population, care and health, eco-innovation, the low-carbon economy and resource efficiency.
- (9) In accordance with Regulation (EU) No 1303/2013, in order to optimise the added value from investments funded wholly or in part through the Union budget in the field of research and innovation, synergies will be sought in particular between the operation of the ERDF and Horizon 2020 - the Framework Programme for Research and Innovation whilst respecting their distinct objectives.
- (10) It is important to ensure that, in promoting risk management investments, specific risks at regional, cross-border and transnational level are taken into account.
- (11) In order to maximise their contribution to the objective of supporting employment-friendly growth, activities supporting sustainable tourism, culture and natural heritage should be part of a territorial strategy for specific areas, including the conversion of declining industrial regions. Support for such activities should also contribute to strengthening innovation and the use of ICT, SMEs, environment and resource efficiency or the promotion of social inclusion.
- (12) In order to promote sustainable regional or local mobility or to reduce air and noise pollution, it is necessary to promote healthy, sustainable and safe modes of transport. Investments in airport infrastructure supported by the ERDF should promote environmentally sustainable air transport when, inter alia, enhancing regional mobility by connecting secondary and tertiary nodes to trans-European transport network (TEN-T) infrastructure, including through multimodal nodes.
- (13) In order to promote the achievement of the energy and climate targets set by the Union as part of the Union strategy for smart, sustainable and inclusive growth, the ERDF should support investment to promote energy efficiency and security of supply in Member States through, inter alia, the development of smart energy distribution, storage and transmission systems, including through the integration of distributed generation from renewable sources. In order to meet their security of supply requirements in a manner that is consistent with their targets under the Union strategy for smart, sustainable and inclusive growth, Member States should be able to invest in energy infrastructure that is consistent with their chosen energy mix.
- (14) SMEs, which can include social economy enterprises, should be understood, in accordance with the definition laid down in Regulation (EU) No 1303/2013, as covering micro, small and medium-sized enterprises within the meaning of Commission Recommendation 2003/361/EC ⁽²⁾.
- (15) In order to promote social inclusion and combat poverty, particularly among marginalised communities, it is necessary to improve access to social, cultural and

⁽¹⁾ Regulation (EU) No 1300/2013 of the European Parliament and of the Council of 17 December 2013 on the Cohesion Fund and repealing Council Regulation (EC) No 1084/2006 (See page 281 of this Official Journal).

⁽²⁾ Commission Recommendation 2003/361/EC of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises (OJ L 124, 20.5.2003, p. 36).

- recreational services, through the provision of small-scale infrastructure, taking account of the specific needs of persons with disabilities and the elderly.
- (16) Community-based services should cover all forms of in-home, family-based, residential and other community services which support the right of all persons to live in the community, with an equality of choices, and which seek to prevent isolation or segregation from the community.
- (17) In order to increase flexibility and reduce the administrative burden through joint implementation, the ERDF and the Cohesion Fund investment priorities under the corresponding thematic objectives should be aligned.
- (18) A common set of output indicators to assess the aggregated progress at Union level of the implementation of programmes should be set out in an Annex to this Regulation. Those indicators should correspond to the investment priority and type of action supported in accordance with this Regulation and the relevant provisions of Regulation (EU) No 1303/2013. The common output indicators should be complemented by programme-specific result indicators and, where relevant, by programme-specific output indicators.
- (19) Within the framework of sustainable urban development, it is considered necessary to support integrated actions to tackle the economic, environmental, climate, demographic and social challenges affecting urban areas, including functional urban areas, while taking into account the need to promote urban-rural linkages. The principles for selecting the urban areas where integrated actions for sustainable urban development are to be implemented, and the indicative amounts for those actions, should be set out in the Partnership Agreement with a minimum of 5 % of the ERDF resources allocated at national level for that purpose. The scope of any delegation of tasks to urban authorities should be decided upon by the managing authority in consultation with the urban authority.
- (20) In order to identify or test new solutions which address issues that are related to sustainable urban development and are of relevance at Union level, the ERDF should support innovative actions in the area of sustainable urban development.
- (21) In order to reinforce capacity-building, networking and exchange of experience between programmes and bodies responsible for implementing sustainable urban development strategies and innovative actions in the area of sustainable urban development and to complement existing programmes and bodies, it is necessary to establish an urban development network at Union level.
- (22) The ERDF should address the problems of accessibility to, and remoteness from, large markets, faced by areas with an extremely low population density, as referred to in Protocol No 6 on special provisions for Objective 6 in the framework of the Structural Funds in Finland and Sweden to the 1994 Act of Accession. The ERDF should also address the specific difficulties encountered by certain islands, border regions, mountain regions and sparsely populated areas, the geographical situation of which slows down their development, with a view to supporting their sustainable development.
- (23) Specific attention should be paid to the outermost regions, namely by adopting measures under Article 349 TFEU extending, on an exceptional basis, the scope of support from the ERDF to the financing of operating aid linked to the offsetting of the additional costs resulting from the specific economic and social situation of those regions which is compounded by the handicaps resulting from the factors referred to in Article 349 TFEU, namely remoteness, insularity, small size, difficult topography and climate, economic dependence on a few products, the permanence and combination of which severely restrain their development. Operating aid granted by Member States in that context is exempt from the notification obligation laid down in Article 108(3) TFEU, if, at the time it is granted, it fulfils the conditions laid down by a Regulation declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 TFEU, and adopted pursuant to Council Regulation (EC) No 994/98 ⁽¹⁾.
- (24) In line with the conclusions of the European Council of 7-8 February 2013, and taking into account the special objectives laid down in the TFEU concerning the outermost regions referred to in Article 349 TFEU, the status of Mayotte was changed as a result of European Council Decision 2012/419/EU ⁽²⁾ to become a new outermost region from 1 January 2014. In order to facilitate and to promote focused and rapid infrastructural development of Mayotte, it should be possible on an exceptional basis that at least 50 % of the ERDF part of Mayotte's envelope be allocated to five of the thematic objectives laid down in Regulation (EU) No 1303/2013.

⁽¹⁾ Council Regulation (EC) No 994/98 of 7 May 1998 on the application of Articles 92 and 93 of the Treaty establishing the European Community to certain categories of horizontal State aid (OJ L 142, 14.5.1998, p. 1).

⁽²⁾ European Council Decision 2012/419/EU of 11 July 2012 amending the status of Mayotte with regard to the European Union (OJ L 204, 31.7.2012, p. 131).

- (25) In order to supplement this Regulation with certain non-essential elements, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of detailed rules for the criteria for the selection and management of innovative actions. Such power should also be delegated to the Commission in respect of amendments to Annex I to this Regulation where justified to ensure the effective assessment of progress in implementation of operational programmes. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (26) Since the objective of this Regulation, namely to reinforce economic, social and territorial cohesion by redressing the main regional imbalances in the Union, cannot be sufficiently achieved by the Member States but can rather, by reason of the extent of the disparities between the levels of development of the various regions and the backwardness of the least favoured regions and the limit on the financial resources of the Member States and regions, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.
- (27) This Regulation replaces Regulation (EC) No 1080/2006 of the European Parliament and the Council⁽¹⁾. In the interests of clarity, Regulation (EC) No 1080/2006 should therefore be repealed. However, this Regulation should not affect either the continuation or modification of assistance approved by the Commission on the basis of Regulation (EC) No 1080/2006 or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation should consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. Applications to receive assistance made or approved under Regulation (EC) No 1080/2006 should remain valid.
- (28) In order to allow for the prompt application of the measures provided for in this Regulation, this Regulation should enter into force on the day following that of its publication in the *Official Journal of the European Union*,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

Common provisions

Article 1

Subject matter

This Regulation establishes the tasks of the European Regional Development Fund (ERDF), the scope of its support with regard to the Investment for growth and jobs goal and the European territorial cooperation goal and specific provisions concerning ERDF support for the Investment for growth and jobs goal.

Article 2

Tasks of the ERDF

The ERDF shall contribute to the financing of support which aims to reinforce economic, social and territorial cohesion by redressing the main regional imbalances in the Union through the sustainable development and structural adjustment of regional economies, including the conversion of declining industrial regions and regions whose development is lagging behind.

Article 3

Scope of support from the ERDF

1. The ERDF shall support the following activities in order to contribute to the investment priorities set out in Article 5:
 - (a) productive investment which contributes to creating and safeguarding sustainable jobs, through direct aid for investment in SMEs;
 - (b) productive investment, irrespective of the size of the enterprise concerned, which contributes to the investment priorities set out in points (1) and (4) of Article 5, and, where that investment involves cooperation between large enterprises and SMEs, in point (2) of Article 5;
 - (c) investment in infrastructure providing basic services to citizens in the areas of energy, environment, transport and ICT;
 - (d) investment in social, health, research, innovation, business and educational infrastructure;
 - (e) investment in the development of endogenous potential through fixed investment in equipment and small-scale infrastructure, including small-scale cultural and sustainable tourism infrastructure, services to enterprises, support to research and innovation bodies and investment in technology and applied research in enterprises;

⁽¹⁾ Regulation (EC) No 1080/2006 of the European Parliament and the Council of 5 July 2006 on the European Regional Development Fund and repealing Regulation (EC) No 1783/1999 (OJ L 210, 31.7.2006, p. 1).

(f) networking, cooperation and exchange of experience between competent regional, local, urban and other public authorities, economic and social partners and relevant bodies representing civil society, referred to in Article 5(1) of Regulation (EU) No 1303/2013, studies, preparatory actions and capacity-building.

2. Under the European territorial cooperation goal, the ERDF may also support the sharing of facilities and human resources, and all types of infrastructure across borders in all regions.

3. The ERDF shall not support:

- (a) the decommissioning or the construction of nuclear power stations;
- (b) investment to achieve the reduction of greenhouse gas emissions from activities listed in Annex I to Directive 2003/87/EC;
- (c) the manufacturing, processing and marketing of tobacco and tobacco products;
- (d) undertakings in difficulty, as defined under Union State aid rules;
- (e) investment in airport infrastructure unless related to environmental protection or accompanied by investment necessary to mitigate or reduce its negative environmental impact.

Article 4

Thematic concentration

1. The thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303/2013 and the corresponding investment priorities set out in Article 5 of this Regulation to which the ERDF may contribute under the Investment for growth and jobs goal, shall be concentrated as follows:

- (a) in more developed regions:
 - (i) at least 80 % of the total ERDF resources at national level shall be allocated to two or more of the thematic objectives set out in points 1, 2, 3 and 4 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013; and
 - (ii) at least 20 % of the total ERDF resources at national level shall be allocated to the thematic objective set out in point 4 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013;
- (b) in transition regions:
 - (i) at least 60 % of the total ERDF resources at national level shall be allocated to two or more of the thematic objectives set out in points 1, 2, 3 and 4 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013; and

- (ii) at least 15 % of the total ERDF resources at national level shall be allocated to the thematic objective set out in point 4 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013;

(c) in less developed regions:

- (i) at least 50 % of the total ERDF resources at national level shall be allocated to two or more of the thematic objectives set out in points 1, 2, 3 and 4 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013; and
- (ii) at least 12 % of the total ERDF resources at national level shall be allocated to the thematic objective set out in point 4 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013.

For the purpose of this Article, regions whose GDP per capita used as an eligibility criterion for the 2007-2013 programming period was less than 75 % of the average GDP of the EU-25 for the reference period, and regions designated with phasing-out status in the 2007-2013 programming period, but which are eligible under the category of more developed regions as referred to in point (c) of the first subparagraph of Article 90(2) of Regulation (EU) No 1303/2013 in the 2014-2020 programming period, shall be considered as transition regions.

For the purpose of this Article, all NUTS level 2 regions consisting solely of island Member States or of islands which form part of Member States which receive support from the Cohesion Fund, and all outermost regions, shall be considered as less developed regions.

2. By way of derogation from paragraph 1 of this Article, the minimum ERDF share allocated to a category of region may be lower than that set out in that paragraph, provided that such a decrease is compensated by an increase in the share allocated to other categories of regions. The resulting sum at national level of the amounts for all categories of region respectively for the thematic objectives set out in points 1, 2, 3 and 4 of the first paragraph of Article 9 of Regulation (EU) No 1300/2013 and those set out in point 4 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013 shall accordingly not be less than the sum at national level resulting from applying the minimum ERDF shares set out in paragraph 1 of this Article.

3. By way of derogation from paragraph 1 of this Article, Cohesion Fund resources allocated to supporting the investment priorities set out in point (a) of Article 4 of Regulation (EU) No 1300/2013 may be counted towards achieving the minimum shares set out in points (a)(ii), (b)(ii) and (c)(ii) of the first subparagraph of paragraph 1 of this Article. In such a case, the share referred to in point (c)(ii) of the first subparagraph of paragraph 1 of this Article shall be increased to 15 %. Where applicable, those resources shall be allocated pro rata to the different categories of region based on their relative shares of the total population of the Member State concerned.

Article 5

Investment priorities

The ERDF shall support the following investment priorities within the thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303/2013, in accordance with the development needs and growth potential referred to in point (a)(i) of Article 15(1) of that Regulation and set out in the Partnership Agreement:

- (1) strengthening research, technological development and innovation by:
 - (a) enhancing research and innovation (R&I) infrastructure and capacities to develop R&I excellence, and promoting centres of competence, in particular those of European interest;
 - (b) promoting business investment in R&I, developing links and synergies between enterprises, research and development centres and the higher education sector, in particular promoting investment in product and service development, technology transfer, social innovation, eco-innovation, public service applications, demand stimulation, networking, clusters and open innovation through smart specialisation, and supporting technological and applied research, pilot lines, early product validation actions, advanced manufacturing capabilities and first production, in particular in key enabling technologies and diffusion of general purpose technologies;
- (2) enhancing access to, and use and quality of, ICT by:
 - (a) extending broadband deployment and the roll-out of high-speed networks and supporting the adoption of emerging technologies and networks for the digital economy;
 - (b) developing ICT products and services, e-commerce, and enhancing demand for ICT;
 - (c) strengthening ICT applications for e-government, e-learning, e-inclusion, e-culture and e-health;
- (3) enhancing the competitiveness of SMEs by:
 - (a) promoting entrepreneurship, in particular by facilitating the economic exploitation of new ideas and fostering the creation of new firms, including through business incubators;
 - (b) developing and implementing new business models for SMEs, in particular with regard to internationalisation;
 - (c) supporting the creation and the extension of advanced capacities for product and service development;
 - (d) supporting the capacity of SMEs to grow in regional, national and international markets, and to engage in innovation processes;
- (4) supporting the shift towards a low-carbon economy in all sectors by:
 - (a) promoting the production and distribution of energy derived from renewable sources;
 - (b) promoting energy efficiency and renewable energy use in enterprises;
 - (c) supporting energy efficiency, smart energy management and renewable energy use in public infrastructure, including in public buildings, and in the housing sector;
 - (d) developing and implementing smart distribution systems that operate at low and medium voltage levels;
 - (e) promoting low-carbon strategies for all types of territories, in particular for urban areas, including the promotion of sustainable multimodal urban mobility and mitigation-relevant adaptation measures;
 - (f) promoting research and innovation in, and adoption of, low-carbon technologies;
 - (g) promoting the use of high-efficiency co-generation of heat and power based on useful heat demand;
- (5) promoting climate change adaptation, risk prevention and management by:
 - (a) supporting investment for adaptation to climate change, including ecosystem-based approaches;
 - (b) promoting investment to address specific risks, ensuring disaster resilience and developing disaster management systems;
- (6) preserving and protecting the environment and promoting resource efficiency by:
 - (a) promoting the production and distribution of energy derived from renewable sources;
 - (b) promoting energy efficiency and renewable energy use in enterprises;
 - (c) supporting energy efficiency, smart energy management and renewable energy use in public infrastructure, including in public buildings, and in the housing sector;
 - (d) developing and implementing smart distribution systems that operate at low and medium voltage levels;
 - (e) promoting low-carbon strategies for all types of territories, in particular for urban areas, including the promotion of sustainable multimodal urban mobility and mitigation-relevant adaptation measures;
 - (f) promoting research and innovation in, and adoption of, low-carbon technologies;
 - (g) promoting the use of high-efficiency co-generation of heat and power based on useful heat demand;

- (a) investing in the waste sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States, for investment that goes beyond those requirements;
 - (b) investing in the water sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States, for investment that goes beyond those requirements;
 - (c) conserving, protecting, promoting and developing natural and cultural heritage;
 - (d) protecting and restoring biodiversity and soil and promoting ecosystem services, including through Natura 2000, and green infrastructure;
 - (e) taking action to improve the urban environment, to revitalise cities, regenerate and decontaminate brownfield sites (including conversion areas), reduce air pollution and promote noise-reduction measures;
 - (f) promoting innovative technologies to improve environmental protection and resource efficiency in the waste sector, water sector and with regard to soil, or to reduce air pollution;
 - (g) supporting industrial transition towards a resource-efficient economy, promoting green growth, eco-innovation and environmental performance management in the public and private sectors;
- (7) promoting sustainable transport and removing bottlenecks in key network infrastructures by:
- (a) supporting a multimodal Single European Transport Area by investing in the TEN-T;
 - (b) enhancing regional mobility by connecting secondary and tertiary nodes to TEN-T infrastructure, including multimodal nodes;
 - (c) developing and improving environmentally-friendly (including low-noise) and low-carbon transport systems, including inland waterways and maritime transport, ports, multimodal links and airport infrastructure, in order to promote sustainable regional and local mobility;
 - (d) developing and rehabilitating comprehensive, high quality and interoperable railway systems, and promoting noise-reduction measures;
 - (e) improving energy efficiency and security of supply through the development of smart energy distribution, storage and transmission systems and through the integration of distributed generation from renewable sources;
- (8) promoting sustainable and quality employment and supporting labour mobility by:
- (a) supporting the development of business incubators and investment support for self-employment, micro-enterprises and business creation;
 - (b) supporting employment-friendly growth through the development of endogenous potential as part of a territorial strategy for specific areas, including the conversion of declining industrial regions and enhancement of accessibility to, and development of, specific natural and cultural resources;
 - (c) supporting local development initiatives and aid for structures providing neighbourhood services to create jobs, where such actions are outside the scope of Regulation (EU) No 1304/2013 of the European Parliament and of the Council ⁽¹⁾;
 - (d) investing in infrastructure for employment services;
- (9) promoting social inclusion, combating poverty and any discrimination, by:
- (a) investing in health and social infrastructure which contributes to national, regional and local development, reducing inequalities in terms of health status, promoting social inclusion through improved access to social, cultural and recreational services and the transition from institutional to community-based services;
 - (b) providing support for physical, economic and social regeneration of deprived communities in urban and rural areas;
 - (c) providing support for social enterprises;
 - (d) undertaking investment in the context of community-led local development strategies;
- (10) investing in education, training and vocational training for skills and lifelong learning by developing education and training infrastructure;

⁽¹⁾ Regulation (EU) No 1304/2013 of the European Parliament and of the Council of 17 December 2013 on the European Social Fund and repealing Council Regulation (EC) No 1081/2006 (See page 470 of this Official Journal).

(11) enhancing institutional capacity of public authorities and stakeholders and efficient public administration through actions to strengthen the institutional capacity and the efficiency of public administrations and public services related to the implementation of the ERDF, and in support of actions under the ESF to strengthen the institutional capacity and the efficiency of public administration.

Article 6

Indicators for the Investment for growth and jobs goal

1. Common output indicators, as set out in Annex I to this Regulation, programme-specific result indicators and, where relevant, programme-specific output indicators shall be used in accordance with Article 27(4) and point (b)(ii) and (iv) and point (c)(ii) and (iv) of Article 96(2) of Regulation (EU) No 1303/2013.

2. For common and programme-specific output indicators, baselines shall be set at zero. Cumulative quantified target values for those indicators shall be set for 2023.

3. For programme-specific result indicators, which relate to investment priorities, baselines shall use the latest available data and targets shall be set for 2023. Targets may be expressed in quantitative or qualitative terms.

4. The Commission shall be empowered to adopt delegated acts in accordance with Article 14 to amend the list of common output indicators set out in Annex I, in order to make adjustments, where justified to ensure effective assessment of progress in the implementation of operational programmes.

CHAPTER II

Specific provisions on the treatment of particular territorial features

Article 7

Sustainable urban development

1. The ERDF shall support, within operational programmes, sustainable urban development through strategies that set out integrated actions to tackle the economic, environmental, climate, demographic and social challenges affecting urban areas, while taking into account the need to promote urban-rural linkages.

2. Sustainable urban development shall be undertaken through Integrated territorial investment as referred to in Article 36 of Regulation (EU) No 1303/2013, or through a specific operational programme, or through a specific priority

axis in accordance with point (c) of the first subparagraph of Article 96(1) of Regulation (EU) No 1303 /2013.

3. Taking into account its specific territorial situation, each Member State shall establish in its Partnership Agreement the principles for the selection of urban areas where integrated actions for sustainable urban development are to be implemented and an indicative allocation for those actions at national level.

4. At least 5 % of the ERDF resources allocated at national level under the Investment for growth and jobs goal shall be allocated to integrated actions for sustainable urban development where cities, sub-regional or local bodies responsible for implementing sustainable urban strategies ("urban authorities") shall be responsible for tasks relating, at least, to the selection of operations in accordance with Article 123(6) of Regulation (EU) No 1303/2013, or, where appropriate, in accordance with Article 123(7) of that Regulation. The indicative amount to be dedicated for the purposes of paragraph 2 of this Article shall be set out in the operational programme or programmes concerned.

5. The managing authority shall determine, in consultation with the urban authority, the scope of tasks, to be undertaken by urban authorities, concerning the management of integrated actions for sustainable urban development. The managing authority shall formally record its decision in writing. The managing authority may retain the right to undertake a final verification of eligibility of operations before approval.

Article 8

Innovative actions in the area of sustainable urban development

1. At the initiative of the Commission, the ERDF may support innovative actions in the area of sustainable urban development in accordance with Article 92(8) of Regulation (EU) No 1303/2013. Such actions shall include studies and pilot projects to identify or test new solutions which address issues that are related to sustainable urban development and are of relevance at Union level. The Commission shall encourage the involvement of relevant partners referred to in Article 5(1) of Regulation (EU) No 1303/2013 in the preparation and implementation of innovative actions.

2. By way of derogation from Article 4 of this Regulation, innovative actions may support all activities necessary to achieve the thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303/2013 and the corresponding investment priorities set out in Article 5 of this Regulation.

3. The Commission shall be empowered to adopt delegated acts in accordance with Article 14 laying down detailed rules concerning the principles for the selection and management of innovative actions to be supported by the ERDF in accordance with this Regulation.

*Article 9***Urban development network**

1. The Commission shall establish, in accordance with Article 58 of Regulation (EU) No 1303/2013 an urban development network to promote capacity-building, networking and exchange of experience at Union level between urban authorities responsible for implementing sustainable urban development strategies in accordance with Article 7(4) and (5) of this Regulation and authorities responsible for innovative actions in the area of sustainable urban development in accordance with Article 8 of this Regulation.

2. The activities of the urban development network shall be complementary to those undertaken under interregional cooperation pursuant to point (3)(b) of Article 2 of Regulation (EU) No 1299/2013 of the European Parliament and of the Council ⁽¹⁾.

*Article 10***Areas with natural or demographic handicaps**

In operational programmes co-financed by the ERDF, covering areas with severe and permanent natural or demographic handicaps as referred to in point 4 of Article 121 of Regulation (EU) No 1303/2013, particular attention shall be paid to addressing the specific difficulties of those areas.

*Article 11***Northernmost regions with very low population density**

Article 4 shall not apply to the specific additional allocation for the northernmost regions with very low population density. That allocation shall be allocated to the thematic objectives set out in points 1, 2, 3, 4 and 7 of the first paragraph of Article 9 of Regulation (EU) No 1303/2013.

*Article 12***Outermost regions**

1. Article 4 shall not apply to the specific additional allocation for the outermost regions. That allocation shall be used to offset the additional costs, linked to the special characteristics and constraints referred to in Article 349 TFEU, incurred in the outermost regions in supporting:

- (a) the thematic objectives set out in the first paragraph of Article 9 of Regulation (EU) No 1303/2013;
- (b) freight transport services and start-up aid for transport services;

⁽¹⁾ Regulation (EU) No 1299/2013 of the European Parliament and of the Council of 17 December 2013 on specific provisions for the support from the European Regional Development Fund to the European territorial cooperation goal (See page 259 of this Official Journal).

(c) operations linked to storage constraints, the excessive size and maintenance of production tools, and the lack of human capital in the local market.

2. The specific additional allocation referred to in paragraph 1 may also be used to help finance operating aid and expenditure covering public service obligations and contracts in the outermost regions.

3. The amount to which the rate of co-financing applies shall be proportionate to the additional costs, referred to in paragraph 1, incurred by the beneficiary, only in the case of operating aid and expenditure covering public service obligations and contracts, but may cover the total eligible costs in the case of expenditure for investment.

4. The specific additional allocation referred to in paragraph 1 of this Article shall not be used to support:

- (a) operations involving products listed in Annex I to the TFEU;
- (b) aid for the transport of persons authorised under point (a) of Article 107(2) TFEU;
- (c) tax exemptions and exemption of social charges.

5. By way of derogation from points (a) and (b) of Article 3(1), the ERDF may support productive investment in enterprises in the outermost regions, irrespective of the size of those enterprises.

6. Article 4 shall not apply to the ERDF part of the envelope allocated to Mayotte as an outermost region within the meaning of Article 349 TFEU, and at least 50 % of that ERDF part shall be allocated to the thematic objectives set out in points 1, 2, 3, 4 and 6 of the first paragraph of Article 9 of Regulation (EU) No 1303 /2013.

*CHAPTER III***Final provisions***Article 13***Transitional provisions**

1. This Regulation shall not affect either the continuation or modification, including the total or partial cancellation of assistance approved by the Commission on the basis of Regulation (EC) No 1080/2006 or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation shall consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. For the purposes of this paragraph assistance shall cover operational programmes and major projects.

2. Applications to receive assistance made or approved under Regulation (EC) No 1080/2006 shall remain valid.

*Article 14***Exercise of the delegation**

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The power to adopt delegated acts referred to in Articles 6(4) and 8(3) shall be conferred on the Commission from 21 December 2013 until 31 December 2020.
3. The delegation of power referred to in Articles 6(4) and 8(3) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.
4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
5. A delegated act adopted pursuant to Articles 6(4) and 8(3) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry

of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or the Council.

*Article 15***Repeal**

Without prejudice to Article 13 of this Regulation, Regulation (EC) No 1080/2006 is hereby repealed with effect from 1 January 2014.

References to the repealed Regulation shall be construed as references to this Regulation and shall be read in accordance with the correlation table set out in Annex II.

*Article 16***Review**

The European Parliament and the Council shall review this Regulation by 31 December 2020, in accordance with Article 177 TFEU.

*Article 17***Entry into force**

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

Article 12(6) shall apply with effect from 1 January 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 17 December 2013.

The President
M. SCHULZ

For the Council
The President
R. ŠADŽIUS

ANNEX I

COMMON OUTPUT INDICATORS FOR ERDF SUPPORT UNDER THE INVESTMENT FOR GROWTH AND JOBS GOAL (ARTICLE 6)

	UNIT	NAME
Productive investment		
	enterprises	Number of enterprises receiving support
	enterprises	Number of enterprises receiving grants
	enterprises	Number of enterprises receiving financial support other than grants
	enterprises	Number of enterprises receiving non-financial support
	enterprises	Number of new enterprises supported
	EUR	Private investment matching public support to enterprises (grants)
	EUR	Private investment matching public support to enterprises (non-grants)
	full time equivalents	Employment increase in supported enterprises
Sustainable tourism	visits/year	Increase in expected number of visits to supported sites of cultural and natural heritage and attractions
ICT Infrastructure	households	Additional households with broadband access of at least 30 Mbps
Transport		
Railway	kilometres	Total length of new railway lines of which: TEN-T
	kilometres	Total length of reconstructed or upgraded railway lines of which: TEN-T
Roads	kilometres	Total length of newly built roads of which: TEN-T
	kilometres	Total length of reconstructed or upgraded roads of which: TEN-T
Urban transport	kilometres	Total length of new or improved tram and metro lines
Inland waterways	kilometres	Total length of new or improved inland waterways
Environment		
Solid waste	tonnes/year	Additional waste recycling capacity
Water supply	persons	Additional population served by improved water supply
Wastewater treatment	population equivalent	Additional population served by improved wastewater treatment
Risk prevention and management	persons	Population benefiting from flood protection measures
	persons	Population benefiting from forest fire protection measures

	UNIT	NAME
Land rehabilitation	hectares	Total surface area of rehabilitated land
Nature and biodiversity	hectares	Surface area of habitats supported in order to attain a better conservation status
Research, Innovation		
	full-time equivalents	Number of new researchers in supported entities
	full-time equivalents	Number of researchers working in improved research infrastructure facilities
	enterprises	Number of enterprises cooperating with research institutions
	EUR	Private investment matching public support in innovation or R&D projects
	enterprises	Number of enterprises supported to introduce new to the market products
	enterprises	Number of enterprises supported to introduce new to the firm products
Energy and Climate change		
Renewables	MW	Additional capacity of renewable energy production
Energy efficiency	households	Number of households with improved energy consumption classification
	kWh/year	Decrease of annual primary energy consumption of public buildings
	users	Number of additional energy users connected to smart grids
GHG reduction	tonnes of CO ₂ eq	Estimated annual decrease of GHG
Social infrastructure		
Childcare & education	persons	Capacity of supported childcare or education infrastructure
Health	persons	Population covered by improved health services
Urban Development specific indicators		
	persons	Population living in areas with integrated urban development strategies
	square metres	Open space created or rehabilitated in urban areas
	square metres	Public or commercial buildings built or renovated in urban areas
	housing units	Rehabilitated housing in urban areas

Joint statement of the European Parliament and of the Council concerning the application of Article 6 of the ERDF Regulation, Article 15 of the ETC Regulation and Article 4 of the Cohesion Fund Regulation

The European Parliament and the Council note the assurance provided by the Commission to the EU legislature that the common output indicators for the ERDF Regulation, the ETC Regulation and the Cohesion Fund Regulation to be included in an annex to, respectively, each regulation, are the outcome of a lengthy preparatory process involving the evaluation experts of both the Commission and the Member States and, in principle, are expected to remain stable.

**REGULATION (EU) No 1302/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 17 December 2013**

**amending Regulation (EC) No 1082/2006 on a European grouping of territorial cooperation (EGTC)
as regards the clarification, simplification and improvement of the establishment and functioning of
such groupings**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular the third paragraph of Article 175 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) In accordance with Regulation (EC) No 1082/2006 of the European Parliament and of the Council ⁽³⁾, the Commission adopted on 29 July 2011 a report for the European Parliament and the Council on the application of that Regulation. In that report, the Commission announced its intention to propose a limited number of modifications to Regulation (EC) No 1082/2006 to facilitate the establishment and operation of EGTCs, as well as to propose clarification of certain existing provisions. Obstacles to establishing new EGTCs should be removed while maintaining continuity in, and facilitating the operation of, existing ones, thus allowing more extensive use of EGTCs to contribute to better policy coherence and cooperation between public bodies without creating an additional burden on national or Union administrations.
- (2) The establishment of an EGTC is a matter to be decided by its members and their national authorities, and is not automatically linked with any legal or financial advantages at Union level.
- (3) The Treaty of Lisbon added a territorial dimension to Cohesion Policy and 'Community' was replaced by 'Union'. The new terminology should therefore be introduced into Regulation (EC) No 1082/2006.

(4) EGTCs can have the potential to enhance the promotion and achievement of the harmonious development of the Union as a whole and the economic, social and territorial cohesion of its regions, in particular, and to contribute to meeting the objectives of the Europe 2020 strategy for smart, sustainable and inclusive growth ('Europe 2020 strategy'). EGTCs can also contribute positively to reducing barriers to territorial cooperation between regions which suffer from severe and permanent natural or demographic handicaps, including the specific situation of outermost regions, and can be instrumental in strengthening the cooperation between third countries, overseas countries and territories ('OCTs') and Union border regions, including through the use of Union external cooperation programmes.

(5) Experience with EGTCs established so far shows that, as a legal instrument, EGTCs are also being used for cooperation in the context of Union policies other than Cohesion Policy, including by implementing programmes or parts of programmes with Union financial support other than that under Cohesion Policy. The efficiency and effectiveness of EGTCs should be enhanced by broadening the nature of EGTCs, removing persistent barriers and facilitating the establishment and operation of EGTCs while maintaining the Member States' ability to limit the actions that EGTCs are able to carry out without Union financial support. Under Regulation (EC) No 1082/2006 EGTCs have in each Member State the most extensive legal capacity accorded to legal persons under that Member State's national law, including the possibility of concluding agreements with other EGTCs, or other legal entities, for the purposes of carrying out joint cooperation projects to, inter alia, provide for more efficient operation of macro-regional strategies.

(6) By definition, EGTCs operate in more than one Member State. Consequently, Regulation (EC) No 1082/2006 provides for the possibility for the EGTC's convention and statutes to state the applicable law on certain issues. The cases in which such statements are to give priority, within the hierarchy of applicable law laid down in that Regulation, to the national law of the Member State where the EGTC has its registered office should be clarified. At the same time, the provisions of Regulation (EC) No 1082/2006 on applicable law should be extended to the acts and activities of an EGTC that are subject to legal scrutiny by Member States in each individual case.

⁽¹⁾ OJ C 191, 29.6.2012, p. 53.

⁽²⁾ OJ C 113, 18.4.2012, p. 22.

⁽³⁾ Regulation (EC) No 1082/2006 of the European Parliament and of the Council of 5 July 2006 on a European grouping of territorial cooperation (EGTC) (OJ L 210, 31.7.2006, p. 19).

(7) As a result of the differing status of local and regional bodies in Member States, competences that are regional on one side of a border can be national on the other,

especially in smaller or centralised Member States. Consequently, national authorities should be able to become members of an EGTC alongside the Member State.

- (8) While Regulation (EC) No 1082/2006 allows for bodies established under private law to become members of an EGTC provided that they are considered as being bodies governed by public law as defined in Directive 2004/18/EC of the European Parliament and of the Council ⁽¹⁾, it should be possible to use EGTCs in the future to jointly manage public services with a particular focus on services of general economic interest or on infrastructure. Other private or public law actors should also be able, therefore, to become members of an EGTC. Consequently, 'public undertakings' as defined in Directive 2004/17/EC of the European Parliament and of the Council ⁽²⁾, and undertakings entrusted with the operation of services of general economic interest, in fields such as education and training, medical care, social needs in relation to health care and longterm care, childcare, access to, and reintegration into, the labour market, social housing and the care and social inclusion of vulnerable groups, should be covered as well.
- (9) Regulation (EC) No 1082/2006 does not contain detailed rules concerning the participation of entities from third countries in an EGTC formed in accordance with that Regulation, i.e. between members from at least two Member States. Given the further alignment of the rules governing the cooperation between one or more Member States and one or more third countries, predominantly in the context of cross-border cooperation under the European Neighbourhood Instrument (ENI) and the Instrument for Pre-accession Assistance (IPA II), but also in the context of complementary financing from the European Development Fund, and of transnational cooperation under the European territorial cooperation goal, where allocations from the ENI and the IPA II are to be transferred in order to pool such allocations with allocations from the European Regional Development Fund (ERDF) under joint cooperation programmes, the participation of members from third countries neighbouring a Member State, including its outermost regions, in EGTCs established between at least two Member States should be explicitly provided for. This should be possible where the legislation of a third country, or agreements between at least one participating Member State and a third country, so allows.

- (10) In order to strengthen the Union's economic, social and territorial cohesion and therefore to reinforce, in particular, the effectiveness of territorial cooperation, including one or more of the cross-border, transnational and interregional strands of cooperation, between members of an EGTC, the participation of third countries neighbouring a Member State, including its outermost regions, should be allowed in an EGTC. Operations under European territorial cooperation programmes, where co-financed by the Union, should therefore continue to pursue Union Cohesion Policy objectives, even if they are implemented, partly or in their entirety, outside the territory of the Union, and, as a consequence, the activities of an EGTC are also carried out at least to some extent outside the territory of the Union. In this context, and where relevant, the contribution by the activities of an EGTC that also has members from third countries neighbouring at least one Member State, including its outermost regions, to the objectives of Union external action policies, such as development cooperation or economic, financial and technical cooperation objectives, remains merely incidental, as the centre of gravity of the cooperation programmes concerned and consequently the activities of that EGTC should focus primarily on Union Cohesion Policy objectives. Consequently any development cooperation or economic, financial and technical cooperation objectives between only one Member State, including its outermost regions, and one or more third countries are only ancillary to the cohesion policy-based territorial cooperation objectives between Member States, including their outermost regions. Therefore, the third paragraph of Article 175 of the Treaty on the Functioning of the European Union (TFEU) is a sufficient legal basis for the adoption of this Regulation.

- (11) Following the authorisation for participation of national, regional, sub-regional and local authorities and organisations, as well as, where appropriate, other public bodies or institutions, including public service providers, from an OCT in an EGTC, based on Council Decision 2013/755/EU ⁽³⁾ and taking into account that, in the case of the 2014-2020 programming period, a special additional financial allocation under the multiannual financial framework is to reinforce the cooperation of the outermost regions of the Union with neighbouring third countries and some of the OCTs listed in Annex II to the TFEU and neighbouring those outermost regions, EGTCs, as a legal instrument, should also be opened up to members from OCTs. For the sake of legal certainty and transparency special approval procedures for the accession of members from an OCT to an EGTC should be established including in this regard, where necessary, special rules on the law applicable to the relevant EGTC with members from an OCT.

⁽¹⁾ Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (OJ L 134, 30.4.2004, p. 114).

⁽²⁾ Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors (OJ L 134, 30.4.2004, p. 1).

⁽³⁾ Council Decision 2013/755/EU of 25 November 2013 on the association of the overseas countries and territories with the Union ('Overseas Association Decision') (OJ L 344 19.12.2013, p. 1).

- (12) Regulation (EC) No 1082/2006 distinguishes between the convention laying down the constitutive elements of the future EGTC and the statutes setting out the implementation elements. However, under that Regulation the statutes currently have to contain all the provisions of the convention. Although both the convention and the statutes are to be sent to Member States, they are distinct documents, and the approval procedure should be limited to the convention. In addition, some elements presently covered by the statutes should be covered by the convention instead.
- (13) Experience gained from establishing EGTCs shows that the three-month period for the Member States' approval procedure has rarely been respected. That period should therefore be extended to six months. On the other hand, in order to ensure legal certainty after that period, the convention should be deemed to be approved by tacit agreement, where applicable, in accordance with the national law of the Member States concerned, including their respective constitutional requirements. However, the Member State where the proposed registered office of the EGTC is to be located should have to formally approve the convention. While Member States should be able to apply national rules on the procedure for approval of a prospective member's participation in the EGTC or to create specific rules in the framework of the national rules implementing Regulation (EC) No 1082/2006, derogations to the provision concerning tacit agreement after the six-month period should be precluded, except as provided for in this Regulation.
- (14) The grounds for a Member State not approving a prospective member's participation or the convention should be set out. However, any national law requiring other rules and procedures than those provided for in Regulation (EC) No 1082/2006 should not be taken into account when deciding on that approval.
- (15) As Regulation (EC) No 1082/2006 cannot apply in third countries, the Member State where the proposed registered office of the EGTC is to be located should, when approving the participation of prospective members from third countries, established under the law of those third countries, satisfy itself, in consultation with those Member States under whose laws other prospective members of the EGTC have been established, that the third countries have applied equivalent conditions and procedures to those laid down in Regulation (EC) No 1082/2006 or acted in accordance with international bilateral or multilateral agreements concluded between Member States of the Council of Europe, whether or not they are also Member States of the Union, based on the European Outline Convention on Transfrontier Co-operation between Territorial Communities or Authorities, signed in Madrid on 21 May 1980, and the additional Protocols adopted pursuant thereto. In the case of the involvement of several Member States of the Union and one or more third countries, it should be sufficient that such an agreement has been concluded between the respective third country and one participating Member State of the Union.
- (16) In order to encourage the accession of new members to an existing EGTC, the procedure to amend conventions in such cases should be simplified. Consequently, such amendments should, in the case of a new member from a Member State that has already approved the convention, not be notified to all participating Member States, but only to the Member State under whose laws the new prospective member is established and the Member State where the EGTC has its registered office. Any subsequent amendment of the convention should be notified to all Member States concerned. However, such simplification of the amending procedure should not apply in the case of a new prospective member from a Member State that has not already approved the convention, a third country, or an OCT, because it is necessary to enable all participating Member States to check whether such accession is in line with its public interest or public policy.
- (17) Given the links between Member States and OCTs, the procedures for approval of participation of prospective members from OCTs should involve those Member States. In accordance with the specific governance relationship between the Member State and the OCT, the Member State should either approve the participation of the prospective member from the OCT or provide written confirmation to the Member State, where the proposed registered office of the EGTC is to be located, that the competent authorities in the OCT have approved the prospective member's participation in accordance with equivalent conditions and procedures to those laid down in Regulation (EC) No 1082/2006. The same procedure should apply in the case of a prospective member from an OCT that wishes to join an existing EGTC.
- (18) As the statutes are no longer to contain all the provisions of the convention, both the convention and statutes should be registered or published, or both. In addition, for reasons of transparency, a notice concerning the decision establishing an EGTC should be published in the C series of the *Official Journal of the European Union*. In the interests of consistency, that notice should contain the details set out in the Annex to Regulation (EC) No 1082/2006 as amended by this Regulation.
- (19) The purpose of an EGTC should be extended to cover the facilitation and promotion of territorial cooperation in general, including strategic planning and the management of regional and local concerns in line with Cohesion Policy and other Union policies, thus contributing to the Europe 2020 strategy or to the implementation of macro-regional strategies. An EGTC should therefore be able to implement operations with financial support other than that provided by Union Cohesion Policy. In addition, every member in each of the Member States or third countries represented should be required to have each competence needed for the efficient functioning of an EGTC unless the Member State or third country approves the participation of

- a member established under its national law even where that member is not competent for all the tasks specified in the convention.
- (20) As a legal instrument, EGTCs are not intended to circumvent the framework provided by the Council of Europe *acquis* offering different opportunities and frameworks within which regional and local authorities can cooperate across borders including the recent Euroregional Co-operation Groupings ⁽¹⁾, or to provide a set of specific common rules which would uniformly govern all such arrangements throughout the Union.
- (21) Both the specific tasks of an EGTC and the possibility for Member States to limit the actions that EGTCs can carry out without financial support from the Union should be aligned with the provisions governing the ERDF, the European Social Fund and the Cohesion Fund during the 2014-2020 programming period.
- (22) While it is laid down in Regulation (EC) No 1082/2006 that the tasks of an EGTC do not concern, among others, 'regulatory powers', which can have different legal consequences in different Member States, nevertheless an EGTC's assembly should be able to define, if the convention specifically so provides, and, in compliance with Union and national law, the terms and conditions of the use of an item of infrastructure the EGTC is managing, or the terms and conditions subject to which a service of general economic interest can be provided, including the tariffs and fees to be paid by the users.
- (23) As a consequence of the opening up of EGTCs to members from third countries or OCTs, the convention should specify the arrangements for their involvement.
- (24) The convention should, in addition to including a reference to the applicable law in general as laid down in Article 2 of Regulation (EC) No 1082/2006, also list the Union and national law applicable to the EGTC. In addition, it should be possible for that national law to be the law of the Member State where the organs of the EGTC exercise their powers, in particular in the case of staff that work under the responsibility of the director and are located in a Member State other than the Member State where the EGTCs has its registered office. The convention should also list the applicable Union and national law directly relevant to the EGTC's activities carried out under the tasks specified in the convention, including where the EGTC is managing public services of general interest or infrastructure.
- (25) This Regulation should not cover problems linked to cross-border procurement encountered by EGTCs.
- (26) Given the importance of the rules applicable to staff of EGTCs and of the principles governing the arrangements concerning personnel management and recruitment procedures, the convention, not the statutes, should specify those rules and principles. It should be possible for different options as to the choice of rules applicable to staff of EGTCs to be laid down in the convention. The specific arrangements concerning personnel management and recruitment procedures should be addressed in the statutes.
- (27) Member States should further make use of the possibilities provided for under Regulation (EC) No 883/2004 of the European Parliament and of the Council ⁽²⁾ to allow by common agreement for exceptions with regard to the determination of the legislation applicable under that Regulation, in the interests of certain persons or categories of persons, and to consider the staff of EGTCs as being such a category of persons.
- (28) Given the importance of the arrangements relating to members' liability, the convention, not the statutes, should specify those arrangements.
- (29) Where an EGTC has as its exclusive objective the management of a cooperation programme, or part thereof, supported by the ERDF, or where an EGTC concerns interregional cooperation or networks, information concerning the territory in which the EGTC is able to execute its task should not be required. In the former case, the extent of the territory should be defined and, where appropriate, changed in the relevant cooperation programme. In the latter case, while primarily concerning immaterial activities, the requirement for such information would jeopardise the accession of new members to interregional cooperation or networks.
- (30) The different arrangements relating to the control of management of public funds on the one hand and of the audit of the EGTC's accounts on the other hand should be clarified.
- (31) EGTCs whose members have limited liability should be more clearly distinguished from those whose members have unlimited liability. In addition, in order to enable EGTCs whose members have limited liability to implement activities which could potentially generate debts, Member States should be allowed to require that such EGTCs take out appropriate insurance or that such EGTCs be subject to an appropriate financial guarantee to cover the risks specific to the activities thereof.

⁽¹⁾ Protocol No. 3 to the European Outline Convention on Trans-frontier Co-operation between Territorial Communities or Authorities concerning Euroregional Co-operation Groupings (ECGs), opened for signature on 16 November 2009.

⁽²⁾ Regulation (EC) No 883/2004 of the European Parliament and of the Council of 29 April 2004 on the coordination of social security systems (OJ L 166, 30.4.2004, p. 1).

(32) Member States should submit to the Commission any provisions, as well as any amendments thereto, adopted to implement Regulation (EC) No 1082/2006. In order to improve the exchange of information and coordination between the Member States, the Commission and the Committee of the Regions, the Commission should transmit such provisions to the Member States and to the Committee of the Regions. The Committee of the Regions has set up an EGTC platform enabling all stakeholders to exchange their experiences and good practices and to improve communication on EGTC opportunities and challenges by facilitating the exchange of experience on the establishment of EGTCs at territorial level and sharing knowledge of best practices with regard to territorial cooperation.

(33) A new deadline for the report on the application of Regulation (EC) No 1082/2006 should be fixed. In accordance with the Commission's move towards more evidence-based policy-making, that report should address the main evaluation questions including effectiveness, efficiency, relevance, European added value, scope for simplification and sustainability. Effectiveness should be understood as relating, inter alia, to the nature of the attempts inside the different Commission services and between the Commission and other bodies such as the European External Action Service to disseminate knowledge about the EGTC instrument. The Commission should forward that report to the European Parliament, the Council and, pursuant to the first paragraph of Article 307 TFEU, to the Committee of the Regions. That report should be forwarded by 1 August 2018.

(34) In order to lay down a list of indicators for use in the evaluation and preparation of the report on the application of Regulation (EC) No 1082/2006, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.

(35) Existing EGTCs should not be obliged to align their convention and statutes to amendments to Regulation (EC) No 1082/2006 introduced by this Regulation.

(36) It is necessary to specify under which set of rules an EGTC, for which an approval procedure was started before the date of application of this Regulation, should be approved.

(37) In order to adapt existing national rules to implement this Regulation before programmes under the European territorial cooperation goal have to be submitted to the

Commission, this Regulation should start to apply six months after the date of its entry into force. When adapting their existing national rules Member States should ensure that competent authorities responsible for approval of EGTCs are designated and that, in accordance with their legal and administrative arrangements, those authorities should be the same bodies responsible for receipt of notifications in accordance with Article 4 of Regulation (EC) No 1082/2006.

(38) Since the objective of this Regulation, namely the improvement of the EGTC legal instrument, cannot be sufficiently achieved by the Member States but can rather be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective, recourse to an EGTC being optional, in accordance with the constitutional system of each Member State.

(39) Regulation (EC) No 1082/2006 should therefore be amended accordingly,

HAVE ADOPTED THIS REGULATION:

Article 1

Amendments to Regulation (EC) No 1082/2006

Regulation (EC) No 1082/2006 is amended as follows:

(1) Article 1 is amended as follows:

(a) paragraphs 1 and 2 are replaced by the following:

'1. A European grouping of territorial cooperation ("EGTC") may be established on Union territory under the conditions and subject to the arrangements provided for by this Regulation.

2. The objective of an EGTC shall be to facilitate and promote, in particular, territorial cooperation, including one or more of the cross-border, transnational and interregional strands of cooperation, between its members as set out in Article 3(1), with the aim of strengthening Union economic, social and territorial cohesion.'

(b) the following paragraph is added:

'5. The registered office of an EGTC shall be located in a Member State under whose law at least one of the EGTC's members is established.'

(2) Article 2 is amended as follows:

(a) paragraph 1 is replaced by the following:

'1. The acts of the organs of an EGTC shall be governed by the following:

- (a) this Regulation;
- (b) the convention referred to in Article 8, where it is expressly authorised under this Regulation to do so; and
- (c) in the case of matters not, or only partly, regulated under this Regulation, the national law of the Member State where the EGTC has its registered office.

Where it is necessary to determine the applicable law under Union law or private international law, an EGTC shall be considered to be an entity of the Member State where it has its registered office.;

(b) the following paragraph is inserted:

'1a. The activities of an EGTC relating to carrying out tasks, referred to in Article 7(2) and (3), inside the Union shall be governed by applicable Union law and national law as specified in the convention referred to in Article 8.

The activities of an EGTC that are co-financed from the Union budget shall comply with the requirements set out in applicable Union law and the national law relating to the application of that Union law.;

(3) Article 3 is amended as follows:

(a) the first subparagraph of paragraph 1 is replaced by the following:

'1. The following entities may become members of an EGTC:

- (a) Member States or authorities at national level;
- (b) regional authorities;
- (c) local authorities;
- (d) public undertakings within the meaning of point (b) of Article 2(1) of Directive 2004/17/EC of the European Parliament and of the Council (*) or bodies governed by public law within the meaning of the second subparagraph of Article 1(9) of Directive 2004/18/EC of the European Parliament and of the Council (**);
- (e) undertakings entrusted with operations of services of general economic interest in compliance with applicable Union and national law;

(f) national, regional or local authorities, or bodies or public undertakings, equivalent to those referred to under point (d), from third countries, subject to the conditions laid down in Article 3a.

(*) Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors (OJ L 134, 30.4.2004, p. 1).

(**) Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (OJ L 134, 30.4.2004, p. 114).;

(b) paragraph 2 is replaced by the following:

'2. An EGTC shall be made up of members located on the territory of at least two Member States, except as provided for in Article 3a(2) and (5).;

(4) the following Article is inserted:

'Article 3a

Accession of members from third countries or overseas countries or territories (OCTs)

1. In accordance with Article 4(3a), an EGTC may be made up of members located on the territory of at least two Member States and of one or more third countries neighbouring at least one of those Member States, including its outermost regions, where those Member States and third countries jointly carry out territorial cooperation actions or implement programmes supported by the Union.

For the purposes of this Regulation, a third country or an OCT shall be considered to be neighbouring a Member State, including its outermost regions, where the third country or the OCT and that Member State share a common land border or where both the third country or OCT and the Member State are eligible under a joint maritime cross-border or transnational programme under the European territorial cooperation goal, or are eligible under another cross-border, sea-crossing or sea-basin cooperation programme, including where they are separated by international waters.

2. An EGTC may be made up of members located on the territory of only one Member State and of one or more third countries neighbouring that Member State, including its outermost regions, where the Member State concerned considers that EGTC to be consistent with the scope of its territorial cooperation in the context of cross-border or transnational cooperation or bilateral relations with the third countries concerned.

3. For the purposes of paragraphs 1 and 2, third countries neighbouring a Member State, including its outermost regions, include maritime borders between the countries concerned.

4. In accordance with Article 4a and subject to the conditions set out in paragraph 1 of this Article, an EGTC may also be made up of members located on the territory of at least two Member States, including its outermost regions, and of one or more OCTs, with or without members from one or more third countries.

5. In accordance with Article 4a and subject to the conditions set out in paragraph 2 of this Article, an EGTC may also be made up of members located on the territory of only one Member State, including its outermost regions, and of one or more OCTs, with or without members from one or more third countries.

6. An EGTC shall not be set up only between members from a Member State and one or more OCTs linked to that same Member State.;

(5) Article 4 is amended as follows:

(a) paragraph 3 is replaced by the following:

'3. Following notification under paragraph 2 by a prospective member, the Member State which has received that notification shall, taking into account its constitutional structure, approve the prospective member's participation in the EGTC and the convention, unless that Member State considers that:

(a) such participation or the convention is not in conformity with any of the following:

(i) this Regulation;

(ii) other Union law concerning the acts and activities of the EGTC;

(iii) national law relating to the powers and competences of the prospective member;

(b) such participation is not justified for reasons of public interest or of public policy of that Member State; or

(c) the statutes are inconsistent with the convention.

In the event of non-approval, the Member State shall state its reasons for withholding approval and shall, where appropriate, suggest the necessary amendments to the convention.

The Member State shall reach its decision, with regard to approval, within a period of six months from the date of receipt of a notification in accordance with paragraph 2. If the Member State which has received the notification, does not raise an objection within that period, the participation of the prospective member and the convention shall be deemed to be approved. However, the Member State where the proposed registered office of the EGTC is to be located shall formally approve the convention in order to allow the EGTC to be established.

Any request for additional information from the Member State to a prospective member shall interrupt the deadline referred to in the third subparagraph. The period of interruption shall start from the day following the date on which the Member State has sent its observations to the prospective member and shall last until the prospective member has responded to the observations.

However, an interruption of the deadline referred to in the third subparagraph shall not occur if the prospective member submits a reply to the observations by the Member State within ten working days of the start of the period of interruption.

In deciding on a prospective member's participation in an EGTC, Member States may apply their national rules.;

(b) the following paragraph is inserted:

'3a. In the case of an EGTC with prospective members from one or more third countries the Member State where the proposed registered office of the EGTC is to be located shall, in consultation with the other Member States concerned, satisfy itself that the conditions laid down in Article 3a are fulfilled and that each third country has approved the prospective members' participation in accordance with either:

(a) equivalent conditions and procedures to those laid down in this Regulation; or

(b) an agreement concluded between at least one Member State under whose law a prospective member is established and that third country.;

(c) paragraphs 5 and 6 are replaced by the following:

'5. The members shall agree on the convention referred to in Article 8 while ensuring consistency with the approval in accordance with paragraph 3 of this Article.

6. Any amendment to the convention or to the statutes shall be notified by the EGTC to the Member States under whose law the EGTC's members are established. Any amendment to the convention, except solely in the event of accession of

a new member under point (a) of paragraph 6a, shall be approved by those Member States in accordance with the procedure set out in this Article.;

(d) the following paragraph is added:

'6a. The following provisions shall apply in the event of accession of new members to an existing EGTC:

- (a) in the event of accession of a new member from a Member State that has already approved the convention, such accession shall be approved only by the Member State under whose laws the new member is established in accordance with the procedure set out in paragraph 3 and notified to the Member State where the EGTC has its registered office;
- (b) in the event of accession of a new member from a Member State that has not already approved the convention, the procedure set out in paragraph 6 shall apply;
- (c) in the event of accession of a new member from a third country to an existing EGTC, such accession shall be subject to examination by the Member State where the EGTC has its registered office in accordance with the procedure set out in paragraph 3a.;

(6) the following Article is inserted:

'Article 4a

Participation of members from an OCT

In the case of an EGTC with a prospective member from an OCT, the Member State to which the OCT is linked shall satisfy itself that the conditions of Article 3a are fulfilled and, taking into account its relationship with the OCT, either:

- (a) approve the prospective member's participation in accordance with Article 4(3); or
- (b) confirm in writing to the Member State where the proposed registered office of the EGTC is to be located that the competent authorities in the OCT have approved the prospective member's participation in accordance with equivalent conditions and procedures to those laid down in this Regulation.;

(7) Article 5 is replaced by the following:

'Article 5

Acquisition of legal personality and publication in the Official Journal

1. The convention and the statutes and any subsequent amendments thereto shall be registered or published, or

both, in the Member State where the EGTC concerned has its registered office, in accordance with the applicable national law of that Member State. The EGTC shall acquire legal personality on the date of registration or publication of the convention and the statutes, whichever occurs first. The members shall inform the Member States concerned and the Committee of the Regions of the registration or publication of the convention and the statutes.

2. The EGTC shall ensure that, within ten working days of the registration or publication of the convention and the statutes, a request is sent to the Committee of the Regions following the template set out in the Annex to this Regulation. The Committee of the Regions shall then transfer that request to the Publications Office of the European Union for publication of a notice, in the C series of the *Official Journal of the European Union*, announcing the establishment of the EGTC, along with the details set out in the Annex to this Regulation.;

(8) In Article 6, paragraph 4 is replaced by the following:

'4. Notwithstanding paragraphs 1, 2 and 3 of this Article, where the tasks of an EGTC as referred to in Article 7(3) cover actions which are co-financed by the Union, the relevant legislation concerning the control of funds provided by the Union shall apply.;

(9) Article 7 is amended as follows:

(a) paragraphs 2 and 3 are replaced by the following:

'2. An EGTC shall act within the confines of the tasks given to it, namely the facilitation and promotion of territorial cooperation to strengthen Union economic, social and territorial cohesion, and the overcoming of internal market barriers. Each task shall be determined by its members as falling within the competence of every member, unless the Member State or third country approves the participation of a member established under its national law even where that member is not competent for all the tasks specified in the convention.

3. An EGTC may carry out specific actions of territorial cooperation between its members in pursuit of the objective referred to in Article 1(2), with or without financial support from the Union.

Primarily, the tasks of an EGTC may concern the implementation of cooperation programmes, or parts thereof, or the implementation of operations supported by the Union through the European Regional Development Fund, the European Social Fund and/or the Cohesion Fund.

Member States may limit the tasks that EGTCs may carry out without financial support from the Union. However, without prejudice to Article 13, Member States shall not exclude tasks concerning the investment priorities referred to in Article 7 of Regulation (EU) No 1299/2013 (*) of the European Parliament and of the Council.

(*) Regulation (EU) No 1299/2013 of the European Parliament and of the Council of 17 December 2013 on specific provisions for the support from the European Regional Development Fund to the European territorial cooperation goal (OJ L 347, 20.12.2013, p. 259).';

(b) in paragraph 4, the following subparagraph is added:

'However, in compliance with applicable Union and national law, the assembly of an EGTC, referred to in point (a) of Article 10(1), may define the terms and conditions of the use of an item of infrastructure the EGTC is managing, or the terms and conditions subject to which a service of general economic interest is provided, including the tariffs and fees to be paid by the users.';

(10) in Article 8, paragraph 2 is replaced by the following:

'2. The convention shall specify:

- (a) the name of the EGTC and its registered office;
- (b) the extent of the territory in which the EGTC may execute its tasks;
- (c) the objective and the tasks of the EGTC;
- (d) the duration of the EGTC and the conditions for its dissolution;
- (e) the list of the EGTC's members;
- (f) the list of the EGTC's organs and their respective competences;
- (g) the applicable Union law and national law of the Member State where the EGTC has its registered office for the purposes of the interpretation and enforcement of the convention;
- (h) the applicable Union law and national law of the Member State where the EGTC's organs act;
- (i) the arrangements for the involvement of members from third countries or from OCTs if appropriate including the identification of applicable law where the EGTC carries out tasks in third countries or in OCTs;

- (j) the applicable Union and national law directly relevant to the EGTC's activities carried out under the tasks specified in the convention;
- (k) the rules applicable to the EGTC's staff, as well as the principles governing the arrangements concerning personnel management and recruitment procedures;
- (l) the arrangements for liability of the EGTC and its members in accordance with Article 12;
- (m) the appropriate arrangements for mutual recognition, including for financial control of the management of public funds; and
- (n) the procedures for adoption of the statutes and amendment of the convention, which shall comply with the obligations set out in Articles 4 and 5.

3. Where the tasks of an EGTC concern only the management of a cooperation programme, or part thereof, under Regulation (EU) No 1299/2013, or where an EGTC concerns interregional cooperation or networks, information under point (b) of paragraph 2 shall not be required.';

(11) Article 9 is replaced by the following:

'Article 9

Statutes

1. The statutes of an EGTC shall be adopted on the basis of, and in accordance with, its convention, by its members acting unanimously.
2. The statutes of an EGTC shall specify, as a minimum, the following:
 - (a) the operating provisions of its organs and those organs' competences, as well as the number of representatives of the members in the relevant organs;
 - (b) its decision-making procedures;
 - (c) its working language or languages;
 - (d) the arrangements for its functioning;
 - (e) its procedures concerning personnel management and recruitment;
 - (f) the arrangements for its members' financial contributions;
 - (g) the applicable accounting and budgetary rules for its members;
 - (h) the designation of the independent external auditor of its accounts; and

- (i) the procedures for amending its statutes, which shall comply with the obligations set out in Articles 4 and 5.;

(12) in Article 11, paragraph 2 is replaced by the following:

'2. The preparation of its accounts including, where required, the accompanying annual report, and the auditing and publication of those accounts, shall be governed by the national law of the Member State where the EGTC has its registered office.;

(13) Article 12 is amended as follows:

- (a) in paragraph 1 the following subparagraph is added:

'An EGTC shall be liable for all its debts.;

- (b) paragraph 2 is replaced by the following:

'2. Without prejudice to paragraph 3, to the extent that the assets of an EGTC are insufficient to meet its liabilities, its members shall be liable for its debts irrespective of the nature of those debts, each member's share being fixed in proportion to its financial contribution. The arrangements for financial contributions shall be fixed in the statutes.

The EGTC's members may provide in the statutes that they are to be liable, after they have ceased to be members of an EGTC, for obligations arising out of activities of the EGTC during their membership.

2a. If the liability of at least one member of an EGTC from a Member State is limited as a result of the national law under which it is established, the other members may also limit their liability in the convention where national law implementing this Regulation enables them to do so.

The name of an EGTC whose members have limited liability shall include the word 'limited'.

The requirements for the publication of the convention, statutes and accounts of an EGTC whose members have limited liability shall be at least equal to those required for other legal entities with limited liability under the laws of the Member State where that EGTC has its registered office.

In the case of an EGTC whose members have limited liability, any Member State concerned may require that the EGTC take out appropriate insurance or that it be subject to a guarantee provided by a bank or other financial institution established in a Member State or

that it be covered by a facility provided as a guarantee by a public entity or by a Member State to cover the risks specific to the activities of the EGTC.;

(14) in Article 15(2), the first subparagraph is replaced by the following:

'2. Except where otherwise provided for in this Regulation, Union law on jurisdiction shall apply to disputes involving an EGTC. In any case which is not provided for in such Union law, the competent courts for the resolution of disputes shall be the courts of the Member State where the EGTC has its registered office.;

(15) Article 16 is amended as follows:

- (a) paragraph 1 is replaced by the following:

'1. Member States shall adopt provisions to ensure the effective application of this Regulation, including with regard to the determination of the competent authorities responsible for the approval procedure, in accordance with their legal and administrative arrangements.

Where required under the terms of a Member State's national law, that Member State may establish a comprehensive list of the tasks which the members of an EGTC within the meaning of Article 3(1) established under its laws already have, as far as territorial cooperation within that Member State is concerned.

The Member State shall submit to the Commission any provisions adopted under this Article, as well as any amendments thereof. The Commission shall transmit those provisions to the other Member States and the Committee of the Regions.;

- (b) the following paragraph is inserted:

'1a. The provisions referred to in paragraph 1 insofar as they concern a Member State to which an OCT is linked shall, taking into account the relationship of the Member State with that OCT, also ensure the effective application of this Regulation with regard to that OCT, neighbouring other Member States or outermost regions of those Member States.;

(16) Article 17 is replaced by the following:

'Article 17

Report

By 1 August 2018 the Commission shall forward to the European Parliament, the Council and the Committee of the Regions a report on the application of this Regulation, evaluating, based on indicators, its effectiveness, efficiency, relevance, European added value and scope for simplification.

The Commission shall be empowered to adopt delegated acts, in accordance with Article 17a, laying down the list of indicators referred to in the first paragraph.;

(17) the following Article is inserted:

'Article 17a

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in the second paragraph of Article 17 shall be conferred on the Commission for a period of five years from 21 December 2013.

3. The delegation of power referred to in the second paragraph of Article 17 may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to the second paragraph of Article 17 shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of three months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by three months at the initiative of the European Parliament or of the Council.'

Article 2

Transitional provisions

1. EGTCs established before 21 December 2013 shall not be obliged to align their convention and statutes with the provisions of Regulation (EC) No 1082/2006 as amended by this Regulation.

2. In the case of EGTCs, for which a procedure under Article 4 of Regulation (EC) No 1082/2006 was started before 22 June 2014 and for which only the registration or publication under Article 5 of Regulation (EC) No 1082/2006 is outstanding, the convention and the statutes shall be registered or published, or both, in accordance with the provisions of Regulation (EC) No 1082/2006 before its amendment by this Regulation.

3. EGTCs for which a procedure under Article 4 of Regulation (EC) No 1082/2006 was started more than six months before 22 June 2014 shall be approved in accordance with the provisions of Regulation (EC) No 1082/2006 before its amendment by this Regulation.

4. EGTCs other than those under paragraphs 2 and 3 of this Article for which a procedure under Article 4 of Regulation (EC) No 1082/2006 was started before 22 June 2014 shall be approved in accordance with the provisions of Regulation (EC) No 1082/2006 as amended by this Regulation.

5. Member States shall submit to the Commission the necessary amendments to the national provisions adopted in accordance with Article 16(1) of Regulation (EC) No 1082/2006 as amended by this Regulation no later than 22 June 2014

Article 3

Entry into force

This Regulation shall enter into force on the day following its publication in the *Official Journal of the European Union*.

It shall apply from 22 June 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 17 December 2013.

Joint statement of the European Parliament, the Council and the Commission relating to awareness raising and Article 4 and 4a of the EGTC Regulation

The European Parliament, the Council and the Commission agree to undertake better coordinated efforts for awareness raising among and inside the institutions and Member States in order to improve the visibility of the possibilities to use EGTCs as an optional instrument available for territorial cooperation in all EU policy areas.

In this context, the European Parliament, the Council and the Commission invite Member States in particular to undertake appropriate actions of coordination and communication among national authorities and between authorities of different Member States in order to ensure clear, efficient and transparent procedures of authorisation of new EGTCs within the time limits fixed.

**Joint statement of the European Parliament, the Council and the Commission relating to Article 1(9)
of the EGTC regulation**

The European Parliament, the Council and the Commission agree that when applying Article 9(2)(i) of Regulation (EU) No 1082/2006 as amended, the Member States will endeavour, when assessing the rules to be applicable to the EGTC staff members as proposed in the draft convention, to consider the different available employment regime options to be chosen by the EGTC, be it under private or public law.

Where employment contracts for EGTC staff members are governed by private law, Member States will also take into account relevant EU law, such as Regulation (EC) No 593/2008 of the EP and the Council of 17 June 2008 on the law applicable to contractual obligations (Rome I), as well as the related legal practice of the other Member States represented in the EGTC.

The European Parliament, the Council and the Commission further understand that where employment contracts for EGTC staff members are governed by public law, national public law rules will be those of the Member State where the respective EGTC organ is located. However, national public law rules of the Member State where the EGTC is registered may apply as regards EGTC staff members already subject to these rules prior to becoming an EGTC staff member.

Joint statement of the European Parliament, the Council and the Commission relating to the role of the Committee of the Regions in the framework of the EGTC platform

The European Parliament, the Council and the Commission take note of the valuable work carried out by the Committee of the Regions in the framework of the EGTC Platform overseen by it and encourage the Committee of the Regions to further track the activities of existing EGTCs and those in the process of being set up, organise an exchange of best practice and identify common issues.

**REGULATION (EU) No 1303/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 17 December 2013**

laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 177 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinions of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinions of the Committee of the Regions ⁽²⁾,

Having regard to the opinions of the Court of Auditors ⁽³⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

(1) Article 174 of the Treaty on the Functioning of the European Union (TFEU) provides that, in order to strengthen its economic, social and territorial cohesion, the Union is to aim at reducing disparities between the levels of development of the various regions and the backwardness of the least favoured regions or islands, and that particular attention is to be paid to rural areas, areas affected by industrial transition, and regions which suffer from severe and permanent natural or demographic handicaps. Article 175 TFEU requires that the Union is to support the achievement of these objectives by the action it takes through the European Agricultural Guidance and Guarantee Fund, Guidance Section, the European Social Fund, the European Regional Development Fund, the European Investment Bank and other instruments.

(2) In order to improve coordination and harmonise implementation of the Funds providing support under

cohesion policy, namely the European Regional Development Fund (ERDF), the European Social Fund (ESF) and the Cohesion Fund, with the Fund for rural development, namely the European Agricultural Fund for Rural Development (EAFRD), and for the maritime and fisheries sector, namely measures financed under shared management in the European Maritime and Fisheries Fund (EMFF), common provisions should be established for all these Funds (the 'European Structural and Investment Funds' - 'ESI Funds'). In addition this Regulation contains general provisions which apply to the ERDF, the ESF and the Cohesion Fund, but do not apply to the EAFRD and the EMFF as well as general provisions applicable to the ERDF, the ESF, the Cohesion Fund and the EMFF, but do not apply to the EAFRD. Due to the particularities that exist for each ESI Fund, specific rules applicable to each ESI Fund and to the European territorial cooperation goal under the ERDF should be specified in separate Regulations.

(3) In line with the conclusions of the European Council of 17 June 2010, whereby the Union strategy for smart, sustainable and inclusive growth was adopted, the Union and Member States should implement the delivery of smart, sustainable and inclusive growth, while promoting harmonious development of the Union and reducing regional disparities. The ESI Funds should play a significant role in the achievement of the objectives of the Union strategy for smart, sustainable and inclusive growth.

(4) As regards the Common Agricultural Policy (CAP), significant synergies have already been obtained by harmonising and aligning management and control rules for the first pillar (European Agricultural Guarantee Fund - EAGF) and the second pillar (EAFRD) of the CAP. The strong link between the EAGF and the EAFRD should therefore be maintained and the structures already in place in the Member States preserved.

(5) The outermost regions should benefit from specific measures and from additional funding to offset their structural social and economic situation together with the handicaps resulting from the factors referred to in Article 349 TFEU.

(6) The northern sparsely populated regions should benefit from specific measures and additional funding to offset the severe and natural or demographic handicaps referred to in Article 2 of Protocol No 6 to the 1994 Act of Accession.

⁽¹⁾ OJ C 191, 29.6.2012, p. 30, OJ C 44, 15.2.2013, p. 76 and OJ C 271, 19.9.2013, p. 101.

⁽²⁾ OJ C 225, 27.7.2012, p. 58 and OJ C 17, 19.1.2013, p. 56.

⁽³⁾ OJ C 47, 17.2.2011, p. 1, OJ C 13, 16.1.2013, p. 1 and OJ C 267, 17.9.2013, p. 1.

- (7) To ensure the correct and consistent interpretation of provisions and to contribute to legal certainty for Member States and beneficiaries, it is necessary to define certain terms that are used in this Regulation.
- (8) Where a time limit is set for the Commission to adopt or amend a decision, in accordance with this Regulation, the time limit for the adoption or amendment of such a decision should not include the period starting on the date on which the Commission has sent its observations to the Member State and lasting until the Member State has responded to those observations.
- (9) This Regulation consists of five parts, of which the first sets out the subject-matter and definitions, the second contains rules applicable to all ESI Funds, the third includes provisions applicable only to the ERDF, the ESF and the Cohesion Fund (the 'Funds'), the fourth includes provisions applicable only to the Funds and to the EMFF and the fifth includes the final provisions. In order to ensure consistency in the interpretation of the different parts of this Regulation and between this Regulation and the Fund-specific Regulations, it is important to set out clearly the relationships between them. In addition, specific rules established in the Fund-specific rules can be complementary but should derogate from the corresponding provisions in this Regulation only where such derogation is specifically provided for in this Regulation.
- (10) Under Article 317 TFEU, and in the context of shared management, the conditions allowing the Commission to exercise its responsibilities for implementation of the budget of the Union should be specified and the responsibilities of cooperation with the Member States clarified. Those conditions should enable the Commission to obtain assurance that Member States are using the ESI Funds in a legal and regular manner and in accordance with the principle of sound financial management within the meaning of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council⁽¹⁾ (the 'Financial Regulation'). Member States at the appropriate territorial level, in accordance with their institutional, legal and financial framework and the bodies designated by them for that purpose should be responsible for preparing and implementing programmes. Those conditions should also ensure that attention is drawn to the need to ensure complementarity and consistency of relevant Union intervention, to respect the principle of proportionality and take into account the overall aim of reducing administrative burden.
- (11) For the Partnership Agreement and each programme respectively, each Member State should organise a partnership with the representatives of competent regional, local, urban and other public authorities, economic and social partners and other relevant bodies representing civil society, including environmental partners, non-governmental organisations and bodies responsible for promoting social inclusion, gender equality and non-discrimination, including, where appropriate, the umbrella organisations of such authorities and bodies. The purpose of such a partnership is to ensure respect for the principles of multi-level governance, and also of subsidiarity and proportionality and the specificities of the Member States' different institutional and legal frameworks as well as to ensure the ownership of planned interventions by stakeholders and build on the experience and the know-how of relevant actors. The Member States should identify the most representative relevant partners. Those partners should include institutions, organisations and groups which are capable of influencing the preparation or could be affected by the preparation and implementation of the programmes. In this context it should also be possible for Member States to identify, where appropriate, as relevant partners, umbrella organisations which are the associations, federations or confederations of relevant regional, local and urban authorities or other bodies in accordance with applicable national law and practices.
- The Commission should be empowered to adopt a delegated act providing for a European code of conduct on partnership in order to support and facilitate Member States in the organisation of partnership with regard to ensuring the involvement of relevant partners in the preparation, implementation, monitoring and evaluation of Partnership Agreements and programmes in a consistent manner. That adopted delegated act should have under no circumstances and in no way of its interpretation retroactive effect or be the basis for establishing irregularities leading to financial corrections. The adopted delegated act should not specify a date of application that is earlier than the date of its adoption. The adopted delegated act should allow Member States to decide on the most appropriate detailed arrangements for implementing the partnership in accordance with their institutional and legal framework as well as their national and regional competences, provided that its objectives, as laid down in this Regulation, are achieved.
- (12) The activities of the ESI Funds and the operations which they support should comply with applicable Union and the related national law which directly or indirectly implements this Regulation and the Fund-specific rules.
- (13) In the context of its effort to increase economic, territorial and social cohesion, the Union should, at all stages of implementation of the ESI Funds, aim at eliminating

⁽¹⁾ Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

inequalities and at promoting equality between men and women and integrating the gender perspective, as well as at combating discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation as set out in Article 2 of the Treaty on the European Union (TEU), Article 10 TFEU and Article 21 of the Charter of Fundamental Rights of the European Union, taking into account in particular accessibility for persons with disabilities, as well as Article 5(2) of the Charter of Fundamental Rights stating that no one is to be required to perform forced or compulsory labour.

- (14) The objectives of the ESI Funds should be pursued in the framework of sustainable development and the Union's promotion of the aim of preserving, protecting and improving the quality of the environment as set out in Articles 11 and 191(1) TFEU, taking into account the polluter pays principle. To this end, the Member States should provide information on the support for climate change objectives, in line with the ambition to devote at least 20 % of the budget of the Union to those objectives, using a methodology based on the categories of intervention, focus areas or measures adopted by the Commission by means of an implementing act reflecting the principle of proportionality.
- (15) In order to contribute to the Union strategy for smart, sustainable and inclusive growth and to the Fund-specific missions pursuant to their Treaty-based objectives, including economic, social and territorial cohesion, the ESI Funds should focus their support on a limited number of common thematic objectives. The precise scope of each of the ESI Funds should be set out in Fund-specific rules. It should be possible to limit that scope to only some of the thematic objectives defined in this Regulation.
- (16) In order to maximise the contribution of the ESI Funds and to establish strategic guiding principles to facilitate the programming process at the level of Member States and the regions, a Common Strategic Framework ('CSF') should be established. The CSF should facilitate the sectoral and territorial coordination of Union intervention under the ESI Funds and with other relevant Union policies and instruments, in line with the targets and objectives of the Union strategy for smart, sustainable and inclusive growth, taking into account the key territorial challenges of the various types of territories.
- (17) The CSF should set out how the ESI Funds are to contribute to the Union strategy for smart, sustainable and inclusive growth, the arrangements to promote an integrated use of the ESI Funds, the arrangements for coordination between the ESI Funds and other relevant Union policies and instruments, horizontal principles and cross-cutting policy objectives for the implementation of the ESI Funds, the arrangements to address key territorial challenges and priority areas for cooperation activities under the ESI Funds.
- (18) Member States and regions increasingly face challenges that relate to the impact of globalisation, environmental and energy concerns, population ageing and demographic shifts, technological transformation and innovation demands, and social inequality. Due to the complex and interrelated nature of such challenges, the solutions supported by the ESI Funds should be of an integrated nature, multi-sectoral and multi-dimensional. In this context, and in order to increase the effectiveness and efficiency of the policies, it should be possible for the ESI Funds to be combined into integrated packages which are tailor-made to fit the specific territorial needs.
- (19) The combination of a shrinking working population and an increasing proportion of retired people in the general population as well as the problems associated with population dispersion, are expected to continue to place strains, inter alia, on Member States' education and social support structures and thus on the Union's economic competitiveness. Adapting to such demographic changes constitutes one of the core challenges that Member States and regions are to face in the years to come, and as such should be given a particularly high level of consideration for the regions most affected by demographic change.
- (20) On the basis of the CSF, each Member State should prepare, in cooperation with its partners, and in dialogue with the Commission, a Partnership Agreement. The Partnership Agreement should translate the elements set out in the CSF into the national context and set out firm commitments to the achievement of Union objectives through the programming of the ESI Funds. The Partnership Agreement should set out arrangements to ensure alignment with the Union strategy for smart, sustainable and inclusive growth as well as with the Fund-specific missions pursuant to their Treaty-based objectives, arrangements to ensure effective and efficient implementation of the ESI Funds and arrangements for the partnership principle and an integrated approach to territorial development. A distinction should be made between the essential elements of the Partnership Agreement which are subject to a Commission decision and other elements which are not subject to the Commission decision and can be amended by the Member State. It is necessary to envisage specific arrangements for the submission and adoption of the Partnership Agreement and the programmes should the entry into force of one or more Fund-specific Regulations be delayed or be expected to be delayed. This entails establishing provisions which allow for the submission and adoption of the Partnership Agreement even in the absence of certain elements in relation to the ESI Fund or Funds affected by the delay, and the later submission of a revised Partnership Agreement after the entry into force of the delayed Fund-specific Regulation or Regulations.

Since the programmes co-financed by the ESI Fund affected by the delay should in this case be submitted and adopted only after the entry into force of the Fund-specific Regulation concerned, appropriate deadlines for the submission of the affected programmes should also be laid down.

- (21) Member States should concentrate support to ensure a significant contribution to the achievement of Union objectives in line with their specific national and regional development needs. Ex ante conditionalities, as well as a concise and exhaustive set of objective criteria for their assessment, should be defined to ensure that the necessary prerequisites for the effective and efficient use of Union support are in place. To this end, an ex ante conditionality should apply to a priority of a given programme only when it has a direct and genuine link to, and a direct impact on, the effective and efficient achievement of a specific objective for an investment priority or a Union priority, given that not every specific objective is necessarily linked to an ex ante conditionality laid down in the Fund-specific rules. The assessment of applicability of an ex ante conditionality should take account of the principle of proportionality having regard to the level of support allocated, where appropriate. The fulfilment of the applicable ex ante conditionalities should be assessed by the Member State in the framework of its preparation of the programmes and, where appropriate, the Partnership Agreement. The Commission should assess the consistency and adequacy of the information provided by the Member State. In cases where there is a failure to fulfil an applicable ex ante conditionality within the deadline laid down, the Commission should have the power to suspend interim payments to the relevant priorities of the programme under precisely defined conditions.
- (22) The Commission should undertake a performance review based on a performance framework and in cooperation with the Member States, in 2019. The performance framework should be defined for each programme with a view to monitoring progress towards the objectives and targets set for each priority over the course of the 2014 - 2020 programming period (the 'programming period'). In order to ensure that the budget of the Union is not used in a wasteful or inefficient way, where there is evidence that a priority has seriously failed to achieve the milestones that relate only to financial indicators, output indicators and key implementation steps, set out in the performance framework, due to clearly identified implementation weaknesses previously communicated by the Commission, and the Member State has failed to take the necessary corrective action, the Commission should be able to suspend payments to the programme or, at the end of the programming period, to apply financial corrections. The application of financial corrections should take into account, with due respect for the principle of proportionality, the absorption level and external factors contributing to the failure. Financial corrections should not be applied where targets are not achieved because of the impact of socio-economic or environmental factors, significant changes in the economic or environmental conditions in a Member State or because of reasons of force majeure seriously affecting the implementation of the priorities concerned. Result indicators should not be taken into account for the purposes of suspensions or financial corrections.
- (23) In order to facilitate the focus on performance and attainment of the objectives of the Union strategy for smart, sustainable and inclusive growth, a performance reserve consisting of 6 % of the total allocation for the Investment for growth and jobs goal, as well as for the EARDF and for measures financed under shared management in accordance with a future Union legal act establishing the conditions for the financial support for maritime and fisheries policy for the 2014-2020 programming period (the 'EMFF Regulation'), should be established for each Member State. Due to their diversity and multi-country character, there should be no performance reserve for programmes under the European territorial cooperation goal. The resources allocated to the Youth Employment Initiative (YEI) as defined in the operational programme in accordance with Regulation (EU) No 1304/2013 of the European Parliament and of the Council⁽¹⁾ (the 'ESF Regulation'); to technical assistance at the initiative of the Commission; transfers from the first pillar of the CAP to the EAFRD under Regulation (EU) No 1307/2013 of the European Parliament and of the Council⁽²⁾; transfers to the EAFRD pursuant to the provisions on voluntary adjustment of direct payments in 2013 and on transfers to the EAFRD, laid down in Council Regulation (EC) No 73/2009⁽³⁾ in respect of calendar years 2013 and 2014; transfers to the Connecting Europe Facility from the Cohesion Fund; transfers to the Fund for European Aid for the Most Deprived, as defined in a future Union legal act; and innovative actions for sustainable urban development should be excluded for the purpose of calculating the performance reserve.
- (24) A closer link between cohesion policy and the economic governance of the Union is needed in order to ensure that the effectiveness of expenditure under the ESI Funds is underpinned by sound economic policies and that the ESI Funds can, if necessary, be redirected to addressing

⁽¹⁾ Regulation (EU) No 1304/2013 of the European Parliament and of the Council of 17 December 2013 on the European Social Fund and repealing Regulation (EC) No 1081/2006 (See page 470 of this Official Journal).

⁽²⁾ Regulation (EU) No 1307/2013 of the European Parliament and of the Council of 17 December 2013 establishing rules for direct payments to farmers under support schemes within the framework of the common agricultural policy and repealing Council Regulation (EC) No 637/2008 and Council Regulation (EC) No 73/2009 (See page 608 of this Official Journal).

⁽³⁾ Council Regulation (EC) No 73/2009 of 19 January 2009 establishing common rules for direct support schemes for farmers under the common agricultural policy and establishing certain support schemes for farmers, amending Regulations (EC) No 1290/2005, (EC) No 247/2006, (EC) No 378/2007 and repealing Regulation (EC) No 1782/2003 (OJ L 30, 31.1.2009, p. 16).

the economic problems a Member State is facing. Under the first strand of measures linking effectiveness of ESI Funds to sound economic governance, the Commission should be able to request amendments to the Partnership Agreement and to the programmes in order to support the implementation of relevant Council recommendations or to maximise the growth and competitiveness impact of the available ESI Funds where Member States are receiving relevant financial assistance. Reprogramming should be used only in cases where it could indeed have a direct impact on the correction of the challenges identified in the relevant Council recommendations under the economic governance mechanisms in order to avoid frequent reprogramming which would disrupt fund management predictability. Under the second strand of measures linking effectiveness of ESI Funds to sound economic governance, where a Member State fails to take effective action in the context of the economic governance process, the Commission should make a proposal to the Council to suspend part or all of the commitments or payments for the programmes of that Member State. It is necessary to establish different procedures for the suspension of commitments and payments. Nevertheless, in both cases, when making a proposal for a suspension, the Commission should take into account all relevant information and give due consideration to any elements arising from, and opinions expressed through, the structured dialogue with the European Parliament.

The scope and level of a suspension should be proportionate and effective, and respect equality of treatment between Member States. Furthermore, a suspension should take into account the economic and social circumstances of the Member State concerned as well as the possible overall economic impact on a Member State resulting from the different steps of the excessive deficit procedure (EDP) and excessive imbalances procedure (EIP).

- (25) By virtue of Protocol No 15 on certain provisions relating to the United Kingdom of Great Britain and Northern Ireland, annexed to the TEU and to the TFEU, certain provisions on the excessive deficit and related procedures are not to apply to the United Kingdom. Provisions on suspension of all or part of payments and commitments should therefore not apply to the United Kingdom.
- (26) Due to the paramount importance of the principle of co-financing for the implementation of the ESI Funds, in order to ensure the ownership of the policies on the ground, and in line with the proportional application of suspensions, any decisions on suspensions triggered under the second strand of measures linking effectiveness of ESI Funds to sound economic governance should be made taking into account the specific requirements applicable to the Member State concerned to provide co-financing for the programmes financed from the ESI Funds. The suspensions should be lifted and the funds made available again to the Member State concerned as soon as the Member State takes the necessary action.
- (27) The ESI Funds should be implemented through programmes covering the programming period in accordance with the Partnership Agreement. Programmes should be drawn up by Member States based on procedures that are transparent, in accordance with their institutional and legal framework. Member States and the Commission should cooperate to ensure coordination and consistency of programming arrangements for the ESI Funds. As the content of programmes is closely interlinked with that of the Partnership Agreement, the programmes should be submitted within three months of the submission of the Partnership Agreement. A deadline of nine months from the date of entry into force of this Regulation should be provided for in relation to the submission of programmes under the European territorial cooperation goal in order to take into account the multi-country character of those programmes. In particular, a distinction should be made between the core elements of the Partnership Agreement and programmes which should be subject to a Commission decision and other elements which are not covered by the Commission decision and can be amended under the responsibility of the Member State. Programming should ensure consistency with the CSF and Partnership Agreement, coordination between the ESI Funds and with the other existing funding instruments and the input of the European Investment Bank if relevant.
- (28) With a view to ensuring consistency between programmes supported under different ESI Funds, particularly in the context of ensuring a contribution to the Union strategy for smart, sustainable and inclusive growth, it is necessary to set out common minimum requirements as regards the content of the programmes, which may be complemented by Fund-specific rules to take into account the specific nature of each ESI Fund.
- (29) It is necessary to lay down clear procedures for the assessment, adoption and amendment of programmes by the Commission. In order to ensure consistency between the Partnership Agreement and programmes, it should be specified that programmes, with the exception of programmes under the European territorial cooperation goal, cannot be approved before the adoption by the Commission of a decision approving the Partnership Agreement. To reduce the administrative burden on Member States, any approval of an amendment of certain parts of a programme by the Commission should result automatically in an amendment of the relevant parts of the Partnership Agreement. Furthermore, the immediate mobilisation of the resources allocated to the YEI should also be ensured by establishing special rules for the submission and the approval procedure of the dedicated operational programmes for the YEI referred to in the ESF Regulation.

- (30) In order to optimise the added value from investments funded wholly or in part through the budget of the Union in the field of research and innovation, synergies should be sought in particular between the operation of the ESI Funds and Horizon 2020, as set up in Regulation (EU) No 1291/2013 of the European Parliament and of the Council⁽¹⁾, whilst respecting their distinct objectives. Key mechanisms for achieving those synergies should be the recognition of flat rates for eligible costs from Horizon 2020 for a similar operation and beneficiary and the possibility of combining funding from different Union instruments, including ESI Funds and Horizon 2020, in the same operation while avoiding double financing. In order to strengthen the research and innovation capacities of national and regional actors and to achieve the goal of building a "Stairway to excellence" in less developed regions and low-performing Research, Development and Innovation (RDI) Member States and regions, close synergies should be developed between the ESI Funds and Horizon 2020 in all relevant programme priorities.
- (31) Territorial cohesion has been added to the goals of economic and social cohesion by the TFEU, and it is necessary to address the role of cities, functional geographies and sub-regional areas facing specific geographical or demographic problems. To this end, and to better mobilise potential at a local level, it is necessary to strengthen and facilitate community-led local development by laying down common rules and ensuring close coordination for all relevant ESI Funds. Community-led local development should take into account local needs and potential, as well as relevant socio-cultural characteristics. Responsibility for the design and implementation of community-led local development strategies should be given to local action groups representing the interests of the community, as an essential principle. The detailed arrangements concerning the definition of the area and population covered by the community-led local development strategies should be set out in the relevant programmes in accordance with the Fund-specific rules.
- (32) In order to facilitate a manageable approach to its integration into the programming process, the community-led local development can be carried out under a single thematic objective, either to promote social inclusion and combat poverty, or to promote employment and labour mobility, notwithstanding that actions financed as part of community-led local development could contribute to all other thematic objectives.
- (33) Where an urban or territorial development strategy requires an integrated approach because it involves investments under more than one priority axis of one or more operational programmes, it should be possible for action supported by the Funds, that can be complemented with financial support from the EAFRD or the EMFF, to be carried out as an integrated territorial investment within an operational programme or programmes.
- (34) Financial instruments are increasingly important due to their leverage effect on the ESI Funds, their capacity to combine different forms of public and private resources to support public policy objectives, and because revolving forms of finance make such support more sustainable over the longer term.
- (35) Financial instruments supported by the ESI Funds should be used to address specific market needs in a cost effective way, in accordance with the objectives of the programmes, and should not crowd out private financing. The decision to finance support measures through financial instruments should be determined therefore on the basis of an ex ante assessment which has established evidence of market failures or sub-optimal investment situations and the estimated level and scope of public investment needs. The essential elements of the ex ante assessments should be clearly defined in this Regulation. Given the detailed nature of the ex ante assessment, provisions should be made allowing for the performance of the ex ante assessment in stages and also for reviewing and updating the ex ante assessment during implementation.
- (36) Financial instruments should be designed and implemented so as to promote substantial participation by private sector investors and financial institutions on an appropriate risk-sharing basis. To be sufficiently attractive to the private sector, it is essential that financial instruments are designed and implemented in a flexible manner. Managing authorities should therefore decide on the most appropriate forms for implementing financial instruments in order to address the specific needs of the target regions, in accordance with the objectives of the relevant programme, the results of the ex ante assessment and applicable State aid rules. Where applicable, such flexibility should also include the possibility to reuse part of the resources paid back during the eligibility period in order to provide for the preferential remuneration of private investors or public investors operating under the market economy principle. Such preferential remuneration should take into account market standards and ensure that any State aid complies with applicable Union and national law and is limited to the minimum amount necessary to compensate for the lack of private capital available, taking into account market failures or suboptimal investment situations.

⁽¹⁾ Regulation (EU) No 1291/2013 of the European Parliament and of the Council of 11 December 2013 establishing Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020) and repealing Decision No 1982/2006/EC (See page 104 of this Official Journal).

- (37) In order to take account of the repayable character of support provided through financial instruments and to align with market practices, support from the ESI Funds provided to final recipients in the form of equity or quasi-equity investments, loans or guarantees, or other risk-sharing instruments should be able to cover the entirety of the investments made by final recipients, without distinction of VAT related costs. Accordingly it should only be in cases where financial instruments are combined with grants that the way in which VAT is taken into account at the level of the final recipient should be relevant for the purposes of determining eligibility of expenditure related to the grant.
- (38) It could be justified where certain parts of an investment do not generate sufficient direct financial returns, to combine financial instruments with grant support, to the extent allowed under the applicable State aid rules, in order for the projects to be economically sustainable. Specific conditions preventing double financing in such a case should be set out.
- (39) In order to ensure that resources allocated to financial instruments in favour of SMEs achieve an effective and efficient critical mass of new SME debt finance, it should be possible to use those resources in the entire territory of the Member State concerned regardless of the categories of region therein. However, it should also be possible for negotiation of the funding agreement between the Member State and the EIB to allow for a pro-rata return to a region or group of regions within the same Member State, as part of a single dedicated national programme per financial contribution by the ERDF and EAFRD.
- (40) The contributions by Member States to joint uncapped guarantee and securitisation financial instruments in favour of SMEs should be phased over the years 2014, 2015 and 2016 and the amounts to be paid by the Member States to the EIB should be scheduled accordingly in the funding agreement, in line with standard banking practice and with a view to spreading the effects on payment appropriations in any individual year.
- (41) In the case of securitisation transactions it should be ensured at programme closure that at least the amount corresponding to the Union contribution has been used for the objective of supporting SMEs, in line with the principles relating to financial instruments set out in the Financial Regulation.
- (42) Managing authorities should have the flexibility to contribute resources from programmes to financial instruments set up at Union level and managed directly or indirectly by the Commission, or to instruments set up at national, regional, transnational or cross-border level and managed by or under the responsibility of the managing authority. Managing authorities should also have the possibility of implementing financial instruments directly, through existing or newly created funds or through funds of funds.
- (43) In the interests of ensuring proportionate control arrangements and of safeguarding the added value of financial instruments, intended final recipients should not be deterred by there being an excessive administrative burden. The bodies responsible for the audits of programmes should in the first instance carry out audits at the level of managing authorities and the bodies implementing financial instruments including funds of funds. However, there may be specific circumstances where the necessary documents to complete such audits are not available at the level of the managing authorities or at the level of the bodies implementing financial instruments or where such documents do not represent a true and accurate record of support provided. In such specific cases, it is necessary to lay down certain provisions to also allow for audits at the level of final recipients.
- (44) The amount of the resources paid at any time from the ESI Funds to financial instruments should correspond to the amount necessary to implement planned investments and payments to final recipients, including management costs and fees. Accordingly, applications for interim payments should be phased. The amount to be paid as an interim payment should be subject to a maximum ceiling of 25 % of the total amount of programme contributions committed to the financial instrument under the relevant funding agreement, with subsequent interim payments conditional on a minimum percentage of the actual amounts included in previous applications having been spent as eligible expenditure.
- (45) It is necessary to lay down specific rules regarding the amounts to be accepted as eligible expenditure at closure of a programme, to ensure that the amounts, including the management costs and fees, paid from the ESI Funds to financial instruments are effectively used for investments in final recipients. The rules should be sufficiently flexible to make it possible to support equity-based instruments for the benefit of targeted enterprises and should, therefore, take into account certain characteristics specific to equity-based instruments for enterprises, such as market practices in relation to the provision of follow-on finance in the field of venture capital funds. Subject to the conditions laid down in this Regulation, targeted enterprises should be able to benefit from continued support from the ESI Funds to such instruments after the end of the eligibility period.

- (46) It is also necessary to lay down specific rules regarding the reuse of resources attributable to support from the ESI Funds until the end of the eligibility period and to lay down further rules regarding the use of resources after the end of the eligibility period.
- (47) As a general rule, support from the ESI Funds should not be used to finance investments which have already been physically completed or fully implemented at the date of the investment decision. However, in respect of infrastructure investments with the objective of supporting urban development or urban regeneration or similar infrastructure investments with the objective of diversifying non-agricultural activities in rural areas, a certain amount of support could be necessary for the re-organisation of a debt portfolio regarding infrastructure forming part of a new investment. In such cases it should be possible to use the support from the ESI Funds to reorganise a debt portfolio up to a maximum of 20 % of the total amount of programme support from the financial instrument to the investment.
- (48) Member States should monitor programmes in order to review implementation and progress towards achieving the programme's objectives. To this end, monitoring committees should be set up by the Member State, in accordance with its institutional, legal and financial framework and their composition and functions defined for the ESI Funds. Given the special nature of programmes under the European territorial cooperation goal, specific rules should be laid down for monitoring committees for those programmes. Joint monitoring committees could be set up to facilitate coordination between the ESI Funds. In order to ensure effectiveness, a monitoring committee should be able to make observations to managing authorities regarding implementation and evaluation of the programme, including actions related to the reduction of the administrative burden on beneficiaries and should monitor actions taken as a result of its observations.
- (49) Alignment of the monitoring and reporting arrangements of the ESI Funds is necessary to simplify management arrangements at all levels. It is important to ensure proportionate reporting requirements but also the availability of comprehensive information on progress made at key review points. Therefore it is necessary that reporting requirements reflect information needs in given years and are aligned with the timing of the performance review.
- (50) With a view to monitoring progress of programmes, an annual review meeting should take place between each Member State and the Commission. The Member State and the Commission should however be able to agree not to organise the meeting in years other than 2017 and 2019 in order to avoid an unnecessary administrative burden.
- (51) In order for the Commission to monitor progress made towards achieving Union objectives as well as Fund-specific missions pursuant to their Treaty-based objectives, Member States should submit progress reports on the implementation of their Partnership Agreements. On the basis of such reports, the Commission should prepare a strategic report on progress in 2017 and 2019. In order to provide for a regular strategic policy debate on the contribution of the ESI Funds to the achievement of the Union strategy on smart sustainable and inclusive growth, and to improve the quality of spending and the effectiveness of the policy in line with the European Semester, the strategic reports should be debated in the Council. On the basis of that debate the Council should be able to provide input to the assessment made at the spring meeting of the European Council on the role of all Union policies and instruments in delivering sustainable job-creating growth across the Union.
- (52) It is necessary to evaluate the effectiveness, efficiency and impact of assistance from the ESI Funds in order to improve the quality of design and implementation of programmes, and to determine the impact of programmes in relation to the targets under the Union strategy for smart, sustainable and inclusive growth and, having regard to the size of the programme, in relation to gross domestic product (GDP) and unemployment in the programme area concerned, where appropriate. The responsibilities of Member States and the Commission in this regard should be specified.
- (53) In order to improve the quality of the design of each programme, and verify whether its objectives and targets can be reached, an ex ante evaluation of each programme should be carried out.
- (54) An evaluation plan should be drawn up by the managing authority or Member State. It should be possible for that evaluation plan to cover more than one programme. During the programming period managing authorities should ensure that evaluations are carried out to assess the effectiveness, efficiency and impact of a programme. The monitoring committee and the Commission should be informed about the results of evaluations to facilitate management decisions.
- (55) Ex post evaluations should be carried out in order to assess the effectiveness and efficiency of the ESI Funds and their impact on the overall goals of the ESI Funds and the Union strategy for smart, sustainable and inclusive growth, taking account of the targets established for that Union strategy. For each of the ESI Funds, the Commission should prepare a synthesis report outlining the main conclusions of the ex-post evaluations.

- (56) The types of action that can be undertaken at the initiative of the Commission and of the Member States as technical assistance with support from the ESI Funds should be specified.
- (57) In order to ensure an effective use of Union resources, and avoid the over-financing of operations generating net revenue after completion, different methods should be used to determine the net revenue generated by such operations, including a simplified approach based on flat rates for sectors or subsectors. The flat rates should be based on historical data available to the Commission, the potential for cost recovery and the polluter-pays principle, where applicable. There should also be provision to extend flat rates to new sectors, introduce subsectors or review the rates for future operations when new data becomes available, by means of a delegated act. The use of flat rates could be particularly suitable for operations in the fields of information and communication technologies (ICT), RDI and energy efficiency. In addition, to ensure the application of the principle of proportionality and to take account of other regulatory and contractual provisions that could apply, it is necessary to set out the exemptions from those rules.
- (58) It is important to ensure a proportionate approach and avoid a duplication of the verification of financing needs in the case of operations which generate net revenue after completion which are also subject to State aid rules, given that such rules also establish limits on support which can be granted. Consequently, where there is *de minimis* aid, compatible State aid to SMEs with an aid intensity or an aid amount limit applied, or compatible State aid to large enterprises where an individual verification of financing needs in accordance with applicable State aid rules has been carried out, the provisions requiring the calculation of net revenue should not apply. Nevertheless, it should be open to a Member State to apply the methods for calculating net revenue where this is provided for in national rules.
- (59) Public Private Partnerships ("PPPs") can be an effective means of delivering operations which ensure the achievement of public policy objectives by bringing together different forms of public and private resources. In order to facilitate the use of ESI Funds to support operations structured as PPPs this Regulation should take account of certain characteristics specific to PPPs by adapting some of the common provisions on the ESI Funds.
- (60) The starting and closing dates for the eligibility of expenditure should be defined so as to provide for a uniform and equitable rule applying to the implementation of the ESI Funds across the Union. In order to facilitate the execution of programmes, it is appropriate to specify that the starting date for the eligibility of expenditure can be prior to 1 January 2014 if the Member State concerned submits a programme before that date. Taking into account the urgent need to mobilise the resources allocated to the YEI to support its immediate implementation, exceptionally the starting date for the eligibility of expenditure should be 1 September 2013. With a view to ensuring an effective use of ESI Funds and reducing the risk to the budget of the Union, it is necessary to put in place restrictions on support for completed operations.
- (61) In accordance with the principle of subsidiarity and subject to exceptions provided for in Regulation (EU) No 1301/2013 of the European Parliament and of the Council⁽¹⁾, the ESF Regulation, Regulation (EU) No 1300/2013 of the European Parliament and of the Council⁽²⁾, Regulation (EU) No 1299/2013 of the European Parliament and of the Council⁽³⁾, Regulation (EU) No 1305/2013 of the European Parliament and of the Council⁽⁴⁾ and in the EMFF Regulation, Member States should adopt national rules on the eligibility of expenditure.
- (62) With a view to simplifying the use of the ESI Funds and reducing the risk of error, while providing for differentiation where needed to reflect the specificities of policy, it is appropriate to define the forms of support, harmonised conditions for the reimbursement of grants and repayable assistance, flat rate financing, specific eligibility rules for grants and repayable assistance and specific conditions on the eligibility of operations depending on location.
- (63) It should be possible to provide support from the ESI Funds in the form of grants, prizes, repayable assistance or financial instruments, or a combination thereof, in order to provide the bodies responsible with a choice of the most appropriate form of support to address identified needs.
-
- ⁽¹⁾ Regulation (EU) No 1301/2013 of the European Parliament and of the Council of 17 December 2013 on the European Regional Development Fund and on specific provisions concerning the Investment for growth and jobs goal and repealing Regulation (EC) No 1080/2006 (See page 289 of this Official Journal).
- ⁽²⁾ Regulation (EU) No 1300/2013 of the European Parliament and of the Council of 17 December 2013 on the Cohesion Fund and repealing Council Regulation (EC) No 1084/2006 (See page 281 of this Official Journal).
- ⁽³⁾ Regulation (EU) No 1299/2013 of the European Parliament and of the Council of 17 December 2013 on specific provisions for the support from the European Regional Development Fund to the European territorial cooperation goal (See page 259 of this Official Journal).
- ⁽⁴⁾ Regulation (EU) No 1305/2013 of the European Parliament and of the Council of 17 December 2013 on support for rural development by the European Agricultural Fund for Rural Development and repealing Regulation (EC) No 1698/2005 (See page 487 of this Official Journal).

- (64) To ensure the effectiveness, fairness and sustainable impact of the intervention of the ESI Funds, provisions guaranteeing that investments in businesses and infrastructures are long-lasting and prevent the ESI Funds from being used to undue advantage should be in place. Experience has shown that a period of five years is an appropriate minimum period to be applied, except where State aid rules provide for a different period. Nevertheless, and in line with the principle of proportionality, it is possible that a more limited period of three years would be justified where the investment concerns the maintenance of investments or jobs created by SMEs. In the case of an operation comprising investment in infrastructure or productive investment, and where the beneficiary is not an SME, such an operation should repay the contribution from the ESI Funds if, within 10 years of the final payment to the beneficiary, the productive activity is subject to relocation outside the Union. It is appropriate to exclude actions supported by the ESF and those not entailing productive investment or investment in infrastructure from the general requirement of durability, unless such requirements are derived from applicable State aid rules, and to exclude contributions to or from financial instruments. Sums unduly paid should be recovered and be subject to procedures applicable to irregularities.
- (65) Member States should adopt adequate measures to guarantee the proper set up and functioning of their management and control systems to give assurance on the legal and regular use of the ESI Funds. The obligations of Member States as regards the management and control systems of programmes, and in relation to the prevention, detection and correction of irregularities and infringements of Union law should therefore be specified.
- (66) In accordance with the principles of shared management, Member States and the Commission should be responsible for the management and control of programmes. Member States should have the primary responsibility, through their management and control systems, for the implementation and control of the operations in programmes. In order to strengthen the effectiveness of the control over the selection and implementation of operations and the functioning of the management and control system, the functions of the managing authority should be specified.
- (67) Member States should fulfil the management, control and audit obligations and assume the responsibilities as laid down in the rules on shared management set out in this Regulation, the Financial Regulation and in the Fund-specific rules. Member States should ensure that, in accordance with the conditions set out in this Regulation, effective arrangements for the examination of complaints in relation to the ESI Funds are in place. In accordance with the principle of subsidiarity, Member States should, upon request of the Commission, examine complaints submitted to the Commission falling within the scope of their arrangements and should inform the Commission of the results of examinations upon request.
- (68) The powers and responsibilities of the Commission with regard to verifying the effective functioning of the management and control systems, and to require Member State action, should be laid down. The Commission should also have the power to carry out on-the-spot audits and checks focused on issues relating to sound financial management in order to be able to draw conclusions concerning the performance of the ESI Funds.
- (69) Budget commitments of the Union should be effected annually. In order to ensure effective programme management, it is necessary to lay down common rules for pre-financing, interim requests for payment and the final balance, without prejudice to specific rules that are required for each of the ESI Funds.
- (70) The pre-financing payment at the start of programmes ensures that a Member State has the means to provide support to beneficiaries from the start of the implementation of the programme, so that those beneficiaries receive advances where necessary to make the planned investments and are reimbursed quickly following the submission of payment claims. Therefore, provisions should be made for initial pre-financing amounts from the ESI Funds. Initial pre-financing should be totally cleared at closure of the programme.
- (71) In order to safeguard the Union's financial interests, measures should be provided for that are limited in time and that allow the authorising officer by delegation to interrupt payments where there is clear evidence to suggest a significant deficiency in the functioning of the management and control system, evidence of irregularities linked to a request for payment, or a failure to submit documents for the purpose of examination and acceptance of accounts. The duration of the interruption period should be for a period of up to six months, with a possible extension of that period up to nine months with the agreement of the Member State, to allow sufficient time to resolve the causes of the interruption thereby avoiding the application of suspensions.
- (72) In order to safeguard the budget of the Union, it is possible that it would be necessary for the Commission to make financial corrections. To ensure legal certainty for the Member States, it is important to define the circumstances under which breaches of applicable Union law, or national law related to its application, can lead to financial corrections by the Commission. In order to ensure that any financial corrections which the Commission imposes on Member States are related to the protection of the Union's financial interests, such

corrections should be confined to cases where the breach of applicable Union law or national law related to applying relevant Union law concerns the eligibility, regularity, management or control of operations and the corresponding expenditure declared to the Commission. To ensure proportionality it is important that the Commission consider the nature and the gravity of the breach and the related financial implications for the budget of the Union when deciding on a financial correction.

- (73) In order to encourage financial discipline, it is appropriate to define the arrangements for decommitment of any part of the budgetary commitment in a programme, in particular where an amount can be excluded from decommitment, in particular where delays in implementation result from circumstances which are independent of the party concerned, abnormal or unforeseeable and the consequences of which cannot be avoided despite the diligence shown, as well as in a situation in which a request for payment has been made but for which the payment deadline has been interrupted or the payment suspended.
- (74) The decommitment procedure is also a necessary part of the mechanism for the allocation of the performance reserve and in such cases it should be possible to reconstitute the appropriations for their subsequent commitment to other programmes and priorities. In addition, in the implementation of certain specific financial instruments in favour of SMEs where decommitments result from the discontinuance of participation by a Member State in such financial instruments, the subsequent reconstitution of the appropriations for commitment in other programmes should be provided for. Given that the introduction of additional provisions in the Financial Regulation will be necessary in order to allow for such reconstitution of appropriations, such procedures should only apply with effect from the date of entry into force of the corresponding amendment to the Financial Regulation.
- (75) Additional general provisions are necessary in relation to the specific functioning of the Funds. In particular, in order to increase their added value, and to enhance their contribution to the priorities of the Union strategy for smart, sustainable and inclusive growth and the Fund-specific missions pursuant to their Treaty-based objectives, the functioning of the Funds should be simplified and concentrated on the Investment for growth and jobs goal and European territorial cooperation goal.
- (76) Additional provisions for the specific functioning of the EAFRD and the EMFF are set out in the relevant sector-specific legislation.
- (77) In order to promote the TFEU objectives of economic, social and territorial cohesion, the Investment for growth

and jobs goal should support all regions. To provide balanced and gradual support and reflect the level of economic and social development, resources under that goal should be allocated from the ERDF and the ESF among the less developed regions, the transition regions and the more developed regions according to their GDP per capita in relation to the EU-27 average. In order to ensure the long-term sustainability of investment from the Structural Funds, to consolidate the development achieved and to encourage the economic growth and social cohesion of the Union's regions, regions whose GDP per capita for the 2007-2013 programming period was less than 75 % of the average of the EU-25 for the reference period but whose GDP per capita has grown to more than 75 % of the EU-27 average should receive at least 60 % of their indicative average annual 2007-2013 allocation. The total allocation from the ERDF, the ESF and the Cohesion Fund for a Member State should be at least 55 % of its individual 2007-2013 total allocation. Member States whose per capita gross national income (GNI) is less than 90 % of that of the Union average should benefit under the Investment for growth and jobs goal from the Cohesion Fund.

- (78) Objective criteria should be fixed for designating eligible regions and areas for support from the Funds. To this end, the identification of the regions and areas at Union level should be based on the common system of classification of the regions established by Regulation (EC) No 1059/2003 of the European Parliament and the Council ⁽¹⁾, amended by Commission Regulation (EC) No 105/2007 ⁽²⁾.
- (79) In order to set out an appropriate financial framework for the Funds, the Commission should establish, by means of implementing acts, the annual breakdown of available commitment appropriations using an objective and transparent method with a view to targeting the regions whose development is lagging behind, including those receiving transitional support. In order to take account of the particularly difficult situation of Member States suffering from the crisis, and in accordance with Council Regulation (EU, Euratom) No 1311/2013 ⁽³⁾, the Commission should review the total allocations of all Member States in 2016 on the basis of the then available most recent statistics and, where there is a cumulative divergence of more than +/- 5 %, adjust those allocations. The required adjustment should be spread in equal proportions over the years 2017-2020.

⁽¹⁾ Regulation (EC) No 1059/2003 of the European Parliament and of the Council of 26 May 2003 on the establishment of a common classification of territorial units for statistics (NUTS) (OJ L 154, 21.6.2003, p. 1).

⁽²⁾ Commission Regulation (EC) No 105/2007 of 1 February 2007 amending the annexes to Regulation (EC) No 1059/2003 of the European Parliament and of the Council on the establishment of a common classification of territorial units for statistics (NUTS) (OJ L 39, 10.2.2007, p. 1).

⁽³⁾ Regulation (EU, Euratom) No 1311/2013 of the Council of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 (See page 884 of this Official Journal).

- (80) In order to encourage the necessary acceleration of development of infrastructure in transport and energy as well as ICT across the Union, a Connecting Europe Facility (CEF) is created, in accordance with Regulation (EU) 1316/2013 of the European Parliament and of the Council⁽¹⁾. Support should be provided from the Cohesion Fund to projects implementing core networks or for projects and horizontal activities identified in Part I of the Annex to that Regulation.
- (81) The allocation of the annual appropriations from the Funds to a Member State should be limited to a ceiling that would be fixed taking into account the GDP of that particular Member State.
- (82) It is necessary to fix the limits of resources for the Investment for growth and jobs goal and to adopt objective criteria for their allocation to regions and Member States. Member States should concentrate support to ensure sufficient investment is targeted at youth employment, labour mobility, knowledge, social inclusion and combating poverty, thus ensuring that the share of the ESF as a percentage of total combined resources for the Structural Funds and the Cohesion Fund at Union level, excluding the support from the Cohesion Fund for transport infrastructure under the CEF and support from the Structural Funds for aid for the most deprived, in Member States is not less than 23,1 %.
- (83) Given the urgent priority of addressing youth unemployment in the Union's most affected regions, as well as in the Union as a whole, a YEI is created and funded from a specific allocation and from targeted investment from the ESF to add to and reinforce the considerable support already provided through the ESI Funds. The YEI should aim to support young people, in particular those not in employment, education or training residing in the eligible regions. The YEI should be implemented as a part of the Investment for growth and jobs goal.
- (84) In addition, in line with the headline target on poverty reduction, it is necessary to reorient the Fund for European Aid for the Most Deprived to promote social inclusion. A mechanism should be envisaged which transfers resources to this instrument from the Structural Funds' allocations of each Member State.
- (85) Taking into account the present economic circumstances, the maximum level of transfer (capping) from the Funds to each individual Member State should not result in allocations per Member State higher than 110 % of their level in real terms for the 2007–2013 programming period.
- (86) With a view to ensuring an appropriate allocation to each category of regions, resources from the Funds should not be transferred between less developed, transition and more developed regions except in duly justified circumstances linked to the delivery of one or more thematic objectives. Such transfers should involve no more than 3 % of the total appropriation for that category of region.
- (87) In order to ensure a genuine economic impact, support from the Funds should not replace public or equivalent structural expenditure by Member States under the terms of this Regulation. In addition, so that the support from the Funds takes into account a broader economic context, the level of public expenditure should be determined with reference to the general macroeconomic conditions in which the financing takes place based on the indicators provided in the stability and convergence programmes submitted annually by Member States in accordance with Council Regulation (EC) No 1466/1997⁽²⁾. Verification by the Commission of the principle of additionality should concentrate on the Member States in which less developed regions cover at least 15 % of the population because of the scale of the financial resources allocated to them.
- (88) It is necessary to lay down additional provisions concerning the programming, management, monitoring and control of operational programmes supported by the Funds in order to strengthen the focus on results. In particular, it is necessary to set out detailed requirements for the content of the operational programmes. This should facilitate the presentation of a consistent intervention logic to tackle the development needs identified, to set out the framework for performance assessment and to underpin the effective and efficient implementation of the Funds. As a general principle a priority axis should cover one thematic objective, one Fund and one category of region. Where appropriate and in order to increase the effectiveness in a thematically coherent integrated approach, it should be possible for a priority axis to relate to more than one category of region and combine one or more complementary investment priorities from the ERDF, ESF and the Cohesion Fund under one or more thematic objectives.
- (89) In circumstances where a Member State prepares a maximum of one operational programme for each Fund, so that both the programmes and the Partnership Agreement are prepared at national level, specific arrangements should be set out to ensure the complementarity of such documents.

⁽¹⁾ Regulation 1316/2013 of the European Parliament and of the Council of 11 december 2013, establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129).

⁽²⁾ Council Regulation (EC) No 1466/97 of 7 July 1997 on the strengthening of the surveillance of budgetary positions and the surveillance and coordination of economic policies (OJ L 209, 2.8.1997, p. 1).

- (90) In order to reconcile the need for concise operational programmes setting out clear commitments by the Member States and the need to allow for flexibility for adjustment to changing circumstances, a distinction should be made between the essential elements of the operational programme which are subject to a Commission decision and other elements which are not subject to a Commission decision and can be amended by a Member State. Consequently provision should be made for procedures that allow for the amendment of those non-essential elements at national level without a decision by the Commission.
- (91) With a view to improving complementarities and simplifying implementation, it should be possible to combine support from the Cohesion Fund and the ERDF with support from the ESF in joint operational programmes under the Investment for growth and jobs goal.
- (92) Major projects represent a substantial share of Union spending and are frequently of strategic importance with respect to the achievement of the Union strategy for smart, sustainable and inclusive growth. Therefore it is justified that operations above certain thresholds continue to be subject to specific approval procedures under this Regulation. The threshold should be established in relation to total eligible cost after taking account of expected net revenues with a higher threshold for transport projects due to the typically larger size of investments in that sector. To ensure clarity, it is appropriate to define the content of a major project application for this purpose. The application should contain the necessary information to provide assurance that the financial contribution from the Funds does not result in a substantial loss of jobs in existing locations within the Union.
- (93) In order to promote the preparation and implementation of major projects on a sound, economic and technical basis and to encourage the use of expert advice at an early stage, where independent experts supported by technical assistance of the Commission or, in agreement with the Commission, other independent experts, are able to provide clear statements on a major project's feasibility and economic viability, the Commission approval procedure should be streamlined. The Commission should be able to refuse approval of the financial contribution only where it establishes a significant weakness in the independent quality review.
- (94) In cases where an independent quality review of a major project has not been undertaken, the Member State should submit all required information and the Commission should appraise the major project to determine whether the requested financial contribution is justified.
- (95) For the sake of continuity of implementation, in order to avoid an unnecessary administrative burden as well as for the purposes of alignment with the Commission Decision on guidelines on closure of the 2007-2013 programming period, phasing provisions are established for major projects approved under Council Regulation (EC) No 1083/2006 ⁽¹⁾ whose implementation period is expected to extend over the programming period covered by this Regulation. Subject to certain conditions, there should be a fast track procedure for the notification and approval of a second or subsequent phase of a major project for which the preceding phase or phases were approved by the Commission under the 2007-2013 programming period. Each individual phase of the phased operation, which serves the same overall objective, should be implemented in accordance with the rules of the relevant programming period.
- (96) In order to give Member States the option of implementing part of an operational programme using a result-based approach, it is useful to provide for a joint action plan comprising a project or group of projects to be carried out by a beneficiary to contribute to the objectives of the operational programme. In order to simplify and reinforce the result orientation of the Funds, the management of the joint action plan should be exclusively based on jointly agreed milestones, outputs and results as defined in the Commission decision adopting the joint action plan. Control and audit of a joint action plan should also be limited to whether it achieves its milestones, outputs and results. Consequently, it is necessary to lay down rules on its preparation, content, adoption, financial management and control of joint action plans.
- (97) It is necessary to adopt specific rules in relation to the functions of the monitoring committee and the annual reports on implementation of operational programmes supported by the Funds. Additional provisions for the specific functioning of the EAFRD are set out in the relevant sector specific legislation.
- (98) To ensure the availability of essential and up to date information on programme implementation, it is necessary that Member States provide the Commission with the key data on a regular basis. In order to avoid an additional burden on Member States, this should be limited to data collected continuously, and the transmission should be performed by way of electronic data exchange.
-
- ⁽¹⁾ Council Regulation (EC) No 1083/2006 of 11 July 2006 laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund and repealing Regulation (EC) No 1260/1999 (OJ L 210, 31.7.2006, p. 25).

- (99) In order to reinforce the monitoring of the progress with regard to the implementation of the Funds and to facilitate financial management, it is necessary to ensure the availability of basic financial data on the progress of implementation in a timely manner.
- (100) In accordance with Article 175 TFEU, the Commission is to submit Cohesion Reports to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions every three years on the progress made towards achieving the Union's economic, social and territorial cohesion. It is necessary to lay down provisions concerning the content of this report.
- (101) It is important to bring the achievements of the Funds to the attention of the general public and to raise awareness of the objectives of cohesion policy. Citizens should have the right to know how the Union's financial resources are invested. The responsibility to ensure that the appropriate information is communicated to the public should lie with both the managing authorities and the beneficiaries as well as with Union institutions and advisory bodies. To ensure more efficiency in communication to the public at large and stronger synergies between the communication activities undertaken at the initiative of the Commission, the resources allocated to communication actions under this Regulation should also contribute to covering the corporate communication of the political priorities of the Union in so far as they are related to the general objectives of this Regulation.
- (102) With a view to strengthening accessibility and transparency of information about funding opportunities and project beneficiaries, in each Member State a single website or website portal providing information on all the operational programmes, including the lists of operations supported under each operational programme, should be made available.
- (103) For the purpose of ensuring wide dissemination of information about the achievements of the Funds and the role of the Union therein and to inform potential beneficiaries about funding opportunities, detailed rules taking account of the size of the operational programmes in accordance with the principle of proportionality about information and communication measures, as well as certain technical characteristics of such measures, should be defined in this Regulation.
- (104) In order to ensure that the allocation for each Fund is concentrated on the Union strategy for smart, sustainable and inclusive growth and the Fund-specific missions pursuant to their Treaty-based objectives, it is necessary to establish ceilings for the allocation to technical assistance of the Member State. It is also necessary to ensure that the legal framework for the programming of technical assistance facilitates the creation of streamlined delivery arrangements in a context where Member States implement multiple Funds in parallel and it should be possible for that framework to comprise several categories of regions.
- (105) It is necessary to determine the elements for modulating the co-financing rate from the Funds to priority axes, in particular, to increase the multiplier effect of Union resources. It is also necessary to establish the maximum rates of co-financing by category of region in order to ensure that the principle of co-financing is respected through an appropriate level of public or private national support.
- (106) It is necessary for Member States to designate a managing authority, a certifying authority and a functionally independent auditing authority for each operational programme. To provide flexibility for Member States in setting up control systems, it is appropriate to provide for the option for the functions of the certifying authority to be carried out by the managing authority. Member States should also be allowed to designate intermediate bodies to carry out certain tasks of the managing authority or the certifying authority. Member States should in that case lay down clearly their respective responsibilities and functions.
- (107) In order to take account of the specific organisation of the management and control systems for the Funds and the EMFF and the need to ensure a proportionate approach, specific provisions should be laid down in relation to the designation of the managing authority and the certifying authority. In order to avoid an unnecessary administrative burden, the ex ante verification of compliance with the designation criteria indicated in this Regulation should be limited to the managing and certifying authority, and, in accordance with the conditions laid down in this Regulation, no additional audit work should be required when the system is essentially the same as in the 2007-2013 programming period. There should be no requirement to approve the designation by the Commission. However, in order to increase legal certainty, Member States should have the option to submit the documents concerning the designation to the Commission subject to certain conditions laid down in this Regulation. The monitoring of compliance with the designation criteria carried out on the basis of audit and control arrangements should, where results show non-compliance with the criteria, give rise to remedial actions, and possibly to the ending of the designation.
- (108) The managing authority bears the main responsibility for the effective and efficient implementation of the Funds and the EMFF and thus fulfils a substantial number of functions related to programme management and monitoring, financial management and controls as well as project selection. Accordingly, the managing authority's responsibilities and functions should be set out.

- (109) The certifying authority should draw up and submit to the Commission payment applications. It should draw up the accounts, certifying their completeness, accuracy and veracity and that the expenditure entered in them complies with applicable Union and national rules. The certifying authority's responsibilities and functions should be set out.
- (110) The audit authority should ensure that audits are carried out on the management and control systems, on an appropriate sample of operations and on the accounts. The audit authority's responsibilities and functions should be set out. Audits of declared expenditure should be carried out on a representative sample of operations in order to enable the results to be extrapolated. As a general rule, a statistical sampling method should be used in order to provide a reliable representative sample. Nevertheless, audit authorities should be able to use in duly justified circumstances a non-statistical sampling method provided that the conditions laid down in this Regulation are complied with.
- (111) Without prejudice to the Commission's powers as regards financial control, cooperation between the Member States and the Commission in this field should be increased and criteria should be established which allow the Commission to determine, in the context of its strategy of control of national systems, the level of assurance it should obtain from national audit bodies.
- (112) In addition to common rules on financial management for the ESI Funds, additional provisions for the Funds and the EMFF should be laid down. In particular, with a view to ensuring reasonable assurance for the Commission prior to the acceptance of accounts, applications for interim payments should be reimbursed, at a rate of 90 % of the amount resulting from applying the co-financing rate for each priority, laid down in the decision adopting the operational programme, to the eligible expenditure for the priority. The outstanding amounts due should be paid to the Member States upon acceptance of accounts, provided that the Commission is able to conclude that the accounts are complete, accurate and true.
- (113) Beneficiaries should receive the support in full no later than 90 days from the date of submission of the payment claim by the beneficiary, subject to the availability of funding from initial and annual pre-financing and interim payments. The managing authority should be able to interrupt the deadline where supporting documents are incomplete or there is evidence of irregularity requiring further investigation. Initial and annual pre-financing should be provided for to ensure that Member States have sufficient means to implement programmes under such arrangements. Annual pre-financing should be cleared each year with the acceptance of accounts.
- (114) To reduce the risk of irregular expenditure being declared, it should be possible for a certifying authority, without any need for additional justification, to include the amounts which require further verification in an interim payment application after the accounting year in which they were entered into its accounting system.
- (115) To ensure the appropriate application of the general rules on decommitment, the rules established for the Funds and the EMFF should detail how the deadlines for decommitment are established.
- (116) In order to apply the requirements of the Financial Regulation to the financial management of the Funds and the EMFF, it is necessary to set out procedures for the preparation, examination and acceptance of accounts which should ensure a clear basis and legal certainty for these arrangements. In addition, in order to allow a Member State properly to fulfil its responsibilities, it should be possible for the Member State to exclude amounts which are the subject of an ongoing assessment of legality and regularity.
- (117) In order to reduce the administrative burden on beneficiaries, specific time limits should be set out during which the managing authorities are obliged to ensure the availability of documents for operations following submission of expenditure or completion of an operation. In accordance with the principle of proportionality, the period for keeping the documents should be differentiated depending on the total eligible expenditure of an operation.
- (118) As accounts are verified and accepted every year, a significant simplification of the closure procedure should be introduced. The final closure of the programme should therefore be based only on the documents relating to the final accounting year and the final implementation report or the last annual implementation report, without any need to provide any additional documents.
- (119) In order to safeguard the Union's financial interests and provide the means to ensure effective programme implementation, provisions should be laid down allowing for the suspension by the Commission of payments at the level of priorities or operational programmes.
- (120) In order to provide legal certainty for Member States, it is appropriate to lay down the specific arrangements and procedures for financial corrections by Member States and by the Commission in respect of the Funds and the EMFF respecting the principle of proportionality.

- (121) It is necessary to establish a legal framework which provides robust management and control systems at national and regional level and an appropriate division of roles and responsibilities in the context of shared management. The role of the Commission should therefore be specified and clarified and proportionate rules set out for the application of financial corrections by the Commission.
- (122) The frequency of audits on operations should be proportionate to the extent of the Union's support from the Funds and the EMFF. In particular, the number of audits carried out should be reduced where the total eligible expenditure for an operation does not exceed EUR 200 000 for the ERDF and the Cohesion Fund, and EUR 150 000 for the ESF, and EUR 100 000 for the EMFF. Nevertheless, it should be possible to carry out audits at any time where there is evidence of an irregularity or fraud, or, following closure of a completed operation, as part of an audit sample. The Commission should be able to review the audit trail of the audit authority or take part in on-the-spot audits of the audit authority. Where the Commission does not obtain the necessary assurance as to the effective functioning of the audit authority by those means, the Commission should be able to carry out a re-performance of the audit activity where this is in accordance with internationally accepted audit standards. In order that the level of auditing by the Commission is proportionate to the risk, the Commission should be able to reduce its audit work in relation to operational programmes where there are no significant deficiencies or where the audit authority can be relied on. In order to reduce the administrative burden on beneficiaries, specific rules should be introduced to reduce the risk of overlap between audits of the same operations by various institutions, namely the European Court of Auditors, the Commission and the audit authority.
- (123) In order to supplement and amend certain non-essential elements of this Regulation, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of a European code of conduct on partnership, supplements and amendments of Sections 4 and 7 of the CSF, criteria for determining the level of financial correction to be applied, specific rules on the purchase of land and combination of technical support with financial instruments, the role, liabilities and responsibility of bodies implementing financial instruments, the management and control of financial instruments, the withdrawal of payments to financial instruments and the consequent adjustments in respect of applications for payments, the establishment of a system of capitalisation of annual instalments for financial instruments, the specific rules setting out the criteria for determining management costs and fees on the basis of performance and the applicable thresholds as well as rules for the reimbursement of capitalised management costs and fees for equity-based instruments and micro-credit, the adjustment of the flat rate for net revenue generating operations in specific sectors, as well as the establishment of a flat rate for certain sectors or subsectors within the fields of ICT, research, development and innovation and energy efficiency and adding sectors or subsectors, the methodology for the calculation of the discounted net revenue for net revenue-generating operations, additional rules on the replacement of a beneficiary under PPP operations, minimum requirements to be included in PPP agreements which are necessary for the application of a derogation concerning eligibility of expenditure, the definition of the flat rate applied to indirect costs for grants based on existing methods and corresponding rates applicable in Union policies, the methodology to be used in carrying out the quality review of a major project, the criteria for determining the cases of irregularity to be reported, the data to be provided and the conditions and procedures to be applied to determine whether amounts which are irrecoverable shall be reimbursed by the responsibilities of Member States, the data to be recorded and stored in computerised form within monitoring systems established by managing authorities, the minimum requirements for audit trails, the scope and content of audits and the methodology for sampling, the use of data collected during audits, and the criteria for determining serious deficiencies in the effective functioning of management and control systems, for establishing the level of financial correction to be applied and for applying flat rates or extrapolated financial corrections. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (124) The Commission should be empowered to adopt, by means of implementing acts, as regards all the ESI Funds, decisions approving the elements of Partnership Agreements and their amendments, decisions approving elements of the revised Partnership Agreement, decisions on the programmes and priorities which have achieved their milestones and can benefit from the allocation of the performance reserve, decisions on the amendment of programmes as consequence of corrective actions concerning the transfer of financial allocations to other programmes, decisions on annual plans of actions to be financed from technical assistance at the initiative of the Commission, and, in the case of decommitment, decisions to amend decisions adopting programmes; and as regards the ERDF, the ESF and the Cohesion Fund, decisions identifying the regions and Member States fulfilling the Investment for growth and jobs criteria, decisions setting out the annual breakdown of commitment appropriations to the Member States, decisions setting out the amount to be transferred from

each Member State's Cohesion Fund allocation to the CEF, decisions setting out the amount to be transferred from each Member State's Structural Funds allocation to aid for the most deprived, decisions accepting transfers of parts of appropriations for the European territorial cooperation goal to the Investment for growth and jobs goal, decisions whether or not to carry out a financial correction in the case of

non-compliance with additionality, decisions adopting and amending operational programmes, decisions refusing the financial contribution to a major project, decisions on the approval of a financial contribution to a selected major project and the extension of the period for the realisation of the condition related to the approval of major projects and decisions on joint action plans; and as regards the ERDF, the ESF, the Cohesion Fund and the EMFF, decisions on non-acceptance of the accounts and the amount chargeable if the accounts were not accepted, decisions suspending interim payments and decisions on financial corrections.

- (125) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission in respect of the model to be used when submitting the progress report, the model of operational programme for the Funds, methodology to be used in carrying out the cost-benefit analysis on major projects, the format for information on major projects, the model for the joint action plan, the model of the annual and final implementation reports, the frequency of the reporting of irregularities and the reporting format to be used, the model for the management declaration, and the models for the audit strategy, opinion and annual control report. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council⁽¹⁾.
- (126) In order to ensure the necessary input and better involvement of Member States when the Commission exercises its implementing powers with regard to this Regulation in certain particularly sensitive policy areas relating to the ESI Funds and in order to strengthen the Member States' role in adopting uniform conditions in such areas or other executive measures with substantial implications or with a potentially significant impact on either the national economy, the national budget or on the proper functioning of the public administration of the Member States, the implementing

acts relating to the methodology for providing information on the support for climate change objectives, the detailed arrangements to ensure a consistent approach for determining in the performance framework the milestones and targets for each priority and for assessing the achievement of the milestones and targets, standard terms and conditions for monitoring of financial instruments, the detailed arrangements for the transfer and management of programme contributions managed by the bodies implementing financial instruments, a model of the funding agreement concerning the joint uncapped guarantee and securitisation financial instruments in favour of SMEs, the models to be used when submitting additional information concerning financial instruments with the applications for payments to the Commission and when reporting on financial instruments to the Commission, the terms and conditions for the electronic data exchange system for management and control, the nomenclature, based on which the categories of intervention are to be defined concerning

the priority axis in operational programmes, the format for notification of the selected major project, the technical characteristics of information and communication measures for the operation and instructions for creating the emblem and the definition of its standard colours, the model to be used when submitting financial data to the Commission for monitoring purposes, detailed rules on the exchange of information between beneficiaries and managing authorities, certifying authorities, audit authorities and intermediate bodies, the model for the report and the opinion of the independent audit body and the description of the functions and procedures in place for the managing authorities and, where appropriate, of the certifying authorities, the technical specifications of the management and control system, the model for payment applications and the model for the accounts should be adopted in accordance with the examination procedure as established in Article 5 of Regulation (EU) No 182/2011.

- (127) For certain implementing acts to be adopted in accordance with the examination procedure laid down in Article 5 of Regulation (EU) No 182/2011 the potential impact and implications are of such high significance to Member States that an exception from the general rule is justified. Accordingly, where no opinion is delivered by the committee, the Commission should not adopt the draft implementing act. Those implementing acts relate to setting out the methodology for providing information on the support for climate change objectives; determining the methodology for milestones and targets with regard to the performance framework; establishing the standard terms and conditions in relation to financial instruments; laying down the detailed arrangements for the transfer and management of programme contributions with regard

⁽¹⁾ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

to certain financial instruments; adopting a model of the funding agreement concerning the joint uncapped guarantee and securitisation financial instruments in favour of SMEs; establishing the model to be used when reporting on financial instruments to the Commission; determining the nomenclature, based on which the categories of intervention can be defined concerning the priority axis in operational programmes; concerning the technical characteristics of information and communication measures for the operation and instructions for creating the emblem and a definition of the standard colours; laying down the technical specifications of recording and data-storing in relation to the management and control system. The third subparagraph of Article 5(4) of Regulation (EU) No 182/2011 should therefore apply to those implementing acts.

(128) Since this Regulation replaces Regulation (EC) No 1083/2006, that Regulation should therefore be repealed. Nevertheless, this Regulation should not affect either the continuation or modification of assistance approved by the Commission on the basis of Regulation (EC) No 1083/2006 or any other legislation applying to that assistance on 31 December 2013. Applications made or approved under Regulation (EC) No 1083/2006 should therefore remain valid. Special transitional rules should be also laid down by way of derogation from point (b) of Article 59(1) of Regulation (EC) No 1083/2006 as to when a managing authority can carry out the functions of the certifying authority for operational programmes, implemented under the previous legislative framework, for the purposes of the Commission assessment in accordance with Article 73(3) of the Regulation (EC) No 1083/2006 when applying Article 123(5) of this Regulation and concerning the approval procedure of major projects under point (a) of Article 102(1) of this Regulation.

(129) Since the objective of this Regulation, namely to strengthen economic, social and territorial cohesion cannot be sufficiently achieved by the Member States by reason of the extent of the disparities between the levels of development of the various regions and the backwardness of the least favoured regions and the limit on the financial resources of the Member States and regions, but can rather be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 TEU. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.

(130) In order to allow for the prompt application of the measures provided for in this Regulation, this Regulation should enter into force on the day following that of its publication in the *Official Journal of the European Union*,

HAVE ADOPTED THIS REGULATION:

PART ONE

SUBJECT-MATTER AND DEFINITIONS

Article 1

Subject-matter

This Regulation lays down the common rules applicable to the European Regional Development Fund (ERDF), the European Social Fund (ESF), the Cohesion Fund, the European Agricultural Fund for Rural Development (EAFRD) and the European Maritime and Fisheries Fund (EMFF), which operate under a common framework (the 'European Structural and Investment' - 'ESI Funds'). It also lays down the provisions necessary to ensure the effectiveness of the ESI Funds and their coordination with one another and with other Union instruments. The common rules applying to the ESI Funds are set out in Part Two.

Part Three lays down the general rules governing the ERDF, the ESF (together referred to as the 'Structural Funds') and the Cohesion Fund concerning the tasks, priority objectives and organisation of the Structural Funds and the Cohesion Fund (the 'Funds'), the criteria that Member States and regions are required to fulfil in order to be eligible for support from the Funds, the financial resources available and the criteria for their allocation.

Part Four lays down general rules applicable to the Funds and the EMFF on management and control, financial management, accounts and financial corrections.

The rules set out in this Regulation shall apply without prejudice to the provisions laid down in Regulation (EU) No 1306/2013 of the European Parliament and of the Council⁽¹⁾ and to the specific provisions laid down in the following Regulations (the 'Fund-specific Regulations') in accordance with the fifth paragraph of this Article:

- (1) Regulation (EU) No 1301/2013 (the 'ERDF Regulation');
 - (2) Regulation (EU) No 1304/2013 (the 'ESF Regulation');
 - (3) Regulation (EU) No 1300/2013 (the 'CF Regulation');
 - (4) Regulation (EU) No 1299/2013 (the 'ETC Regulation');
 - (5) Regulation (EU) No 1305/2013 (the 'EAFRD Regulation');
- and

⁽¹⁾ Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agriculture policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008 (See page 549 of this Official Journal).

(6) a future Union legal act establishing the conditions for the financial support for maritime and fisheries policy for the programming period 2014 - 2020 (the 'EMFF Regulation').

Part Two of this Regulation shall apply to all the ESI Funds except when it explicitly allows for derogations. Parts Three and Four of this Regulation shall establish complementary rules to Part Two that apply respectively to the Funds and to the Funds and the EMFF and may explicitly allow for derogations in the Fund-specific Regulations concerned. The Fund-specific Regulations may establish complementary rules to Part Two of this Regulation for the Funds and to Part Three of this Regulation for the Funds and to Part Four of this Regulation for the Funds and the EMFF. The complementary rules in the Fund-specific Regulations shall not be in contradiction with Parts Two, Three or Four of this Regulation. In case of doubt about the application between provisions, Part Two of this Regulation shall prevail over the Fund-specific rules, and Parts Two, Three and Four of this Regulation shall prevail over the Fund-specific Regulations.

Article 2

Definitions

For the purposes of this Regulation, the following definitions apply:

- (1) 'Union strategy for smart, sustainable and inclusive growth' means the targets and shared objectives guiding the action of Member States and the Union set out in the Conclusions adopted by the European Council of 17 June 2010 as Annex I (New European Strategy for Jobs and Growth, EU Headline Targets), Council Recommendation of 13 July 2010⁽¹⁾ and in Council Decision 2010/707/EU⁽²⁾, and any revision of such targets and shared objectives;
- (2) 'a strategic policy framework' means a document or a set of documents established at national or regional level, which sets out a limited number of coherent priorities established on the basis of evidence and a timeframe for the implementation of those priorities and which may include a monitoring mechanism;
- (3) 'smart specialisation strategy' means the national or regional innovation strategies which set priorities in order to build competitive advantage by developing and matching research and innovation own strengths to business needs in order to address emerging opportunities and market developments in a coherent manner, while avoiding duplication and fragmentation of efforts; a smart specialisation strategy may take the form of, or be included in, a national or regional research and innovation (R&I) strategic policy framework;
- (4) 'Fund-specific rules' means the provisions laid down in, or established on the basis of, Part Three or Part Four of this Regulation or a Regulation governing one or more of the ESI Funds listed in the fourth paragraph of Article 1;
- (5) 'programming' means the process of organisation, decision-making and allocation of financial resources in several stages, with the involvement of partners in accordance with Article 5, intended to implement, on a multi-annual basis, joint action by the Union and the Member States to achieve the objectives of the Union strategy for smart, sustainable and inclusive growth;
- (6) 'programme' means an 'operational programme' as referred to in Part Three or Part Four of this Regulation and in the EMFF Regulation, and 'rural development programme' as referred to in the EAFRD Regulation;
- (7) 'programme area' means a geographical area covered by a specific programme or, in the case of a programme covering more than one category of region, the geographical area corresponding to each separate category of region;
- (8) 'priority' in Parts Two and Four of this Regulation means the 'priority axis' referred to in Part Three of this Regulation for ERDF, ESF and the Cohesion Fund and the 'Union priority' referred to in the EMFF Regulation and in the EAFRD Regulation;
- (9) 'operation' means a project, contract, action or group of projects selected by the managing authorities of the programmes concerned, or under their responsibility, that contributes to the objectives of a priority or priorities; in the context of financial instruments, an operation is constituted by the financial contributions from a programme to financial instruments and the subsequent financial support provided by those financial instruments;
- (10) 'beneficiary' means a public or private body and, for the purposes of the EAFRD Regulation and of the EMFF Regulation only, a natural person, responsible for initiating or both initiating and implementing operations; and in the context of State aid schemes, as defined in point 13 of this Article, the body which receives the aid; and in the context of financial instruments under Title IV of Part Two of this Regulation, it means the body that implements the financial instrument or the fund of funds as appropriate;
- (11) 'financial instruments' means financial instruments as defined in the Financial Regulation, save where otherwise provided in this Regulation;

⁽¹⁾ Council Recommendation of 13 July 2010 on broad guidelines for the economic policies of the Member States and of the Union (OJ L 191, 23.7.2010, p. 28).

⁽²⁾ Council Decision 2010/707/EU of 21 October 2010 on guidelines for the employment policies of the Member States (OJ L 308, 24.11.2010, p. 46).

- (12) 'final recipient' means a legal or natural person receiving financial support from a financial instrument;
- (13) 'State aid' means aid falling under Article 107(1) TFEU which shall be deemed for the purposes of this Regulation also to include de minimis aid within the meaning of Commission Regulation (EC) No 1998/2006 ⁽¹⁾, Commission Regulation (EC) No 1535/2007 ⁽²⁾ and Commission Regulation (EC) No 875/2007 ⁽³⁾;
- (14) 'completed operation' means an operation that has been physically completed or fully implemented and in respect of which all related payments have been made by beneficiaries and the corresponding public contribution has been paid to the beneficiaries;
- (15) 'public expenditure' means any public contribution to the financing of operations the source of which is the budget of national, regional or local public authorities, the budget of the Union related to the ESI Funds, the budget of public law bodies or the budget of associations of public authorities or of public law bodies and, for the purpose of determining the co-financing rate for ESF programmes or priorities, may include any financial resources collectively contributed by employers and workers;
- (16) 'public law body' means any body governed by public law within the meaning of point 9 of Article 1 of Directive 2004/18/EC of the European Parliament and of the Council ⁽⁴⁾ and any European grouping of territorial cooperation (EGTC) established in accordance with Regulation (EC) No 1082/2006 of the European Parliament and of the Council ⁽⁵⁾, regardless of whether the EGTC is considered to be a public law body or a private law body under the relevant national implementing provisions;
- (17) 'document' means a paper or an electronic medium bearing information of relevance in the context of this Regulation;
- (18) 'intermediate body' means any public or private body which acts under the responsibility of a managing or certifying authority, or which carries out duties on behalf of such an authority, in relation to beneficiaries implementing operations;
- (19) 'community-led local development strategy' means a coherent set of operations the purpose of which is to meet local objectives and needs, and which contributes to achieving the Union strategy for smart, sustainable and inclusive growth, and which is designed and implemented by a local action group;
- (20) 'Partnership Agreement' means a document prepared by a Member State with the involvement of partners in line with the multi-level governance approach, which sets out that Member State's strategy, priorities and arrangements for using the ESI Funds in an effective and efficient way so as to pursue the Union strategy for smart, sustainable and inclusive growth, and which is approved by the Commission following assessment and dialogue with the Member State concerned;
- (21) 'category of regions' means the categorisation of regions as 'less developed regions', 'transition regions' or 'more developed regions' in accordance with Article 90(2);
- (22) 'request for payment' means a payment application or declaration of expenditure submitted by the Member State to the Commission;
- (23) 'EIB' means the European Investment Bank, the European Investment Fund or any subsidiary of the European Investment Bank;
- (24) 'Public private partnerships' (PPPs) means forms of cooperation between public bodies and the private sector, which aim to improve the delivery of investments in infrastructure projects or other types of operations, delivering public services through risk sharing, pooling of private sector expertise or additional sources of capital;
- (25) 'PPP operation' means an operation which is implemented or intended to be implemented under a public-private-partnership structure;
- (26) 'escrow account' means a bank account covered by a written agreement between a managing authority or an intermediate body and the body implementing a financial instrument, or, in the case of a PPP operation, a written agreement between a public body beneficiary and the private partner approved by the managing authority or an intermediate body, set up specifically to hold funds to be paid out after the eligibility period, exclusively for the purposes provided for in point (c) of Article 42(1), Article 42(2), Article 42(3) and Article 64, or a bank account set up on terms providing equivalent guarantees on the payments out of the funds;
-
- ⁽¹⁾ Commission Regulation (EC) No 1998/2006 of 15 December 2006 on the application of Articles 87 and 88 of the Treaty to de minimis aid (OJ L 379, 28.12.2006, p. 5).
- ⁽²⁾ Commission Regulation (EC) No 1535/2007 of 20 December 2007 on the application of Articles 87 and 88 of the EC Treaty to de minimis aid in the sector of agricultural production (OJ L 337, 21.12.2007, p. 35).
- ⁽³⁾ Commission Regulation (EC) No 875/2007 of 24 July 2007 on the application of Articles 87 and 88 of the EC Treaty to de minimis aid in the fisheries sector and amending Regulation (EC) No 1860/2004 (OJ L 193, 25.7.2007, p. 6).
- ⁽⁴⁾ Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (OJ L 134, 30.4.2004, p. 114).
- ⁽⁵⁾ Regulation (EC) No 1082/2006 of the European Parliament and of the Council of 5 July 2006 on a European grouping of territorial cooperation (EGTC) (OJ L 210, 31.7.2006, p. 19).

- (27) 'fund of funds' means a fund set up with the objective of contributing support from a programme or programmes to several financial instruments. Where financial instruments are implemented through a fund of funds, the body implementing the fund of funds shall be considered to be the only beneficiary within the meaning of point 10 of this Article;
- (28) 'SME' means a micro, small or medium sized enterprise as defined in Commission Recommendation 2003/361/EC ⁽¹⁾;
- (29) 'accounting year', means, for the purposes of Part Three and Part Four, the period from 1 July to 30 June, except for the first accounting year of the programming period, in respect of which it means the period from the start date for eligibility of expenditure until 30 June 2015. The final accounting year shall be from 1 July 2023 to 30 June 2024;
- (30) 'financial year', means, for the purposes of Part Three and Part Four, the period from 1 January to 31 December;
- (31) 'macroregional strategy' means an integrated framework endorsed by the European Council, which may be supported by the ESI Funds among others, to address common challenges faced by a defined geographical area relating to Member States and third countries located in the same geographical area which thereby benefit from strengthened cooperation contributing to achievement of economic, social and territorial cohesion;
- (32) 'sea basin strategy' means a structured framework of cooperation in relation to a given geographical area, developed by Union institutions, Member States, their regions and where appropriate third countries sharing a sea basin; a sea basin strategy takes into account the geographic, climatic, economic and political specificities of the sea basin;
- (33) 'applicable ex ante conditionality' means a concrete and precisely pre-defined critical factor, which is a prerequisite for and has a direct and genuine link to, and direct impact on, the effective and efficient achievement of a specific objective for an investment priority or a Union priority;
- (34) 'specific objective' means the result to which an investment priority or Union priority contributes in a specific national or regional context through actions or measures undertaken within such a priority;
- (35) 'relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU' and 'relevant Council recommendations adopted in accordance with Article 148(4) TFEU' mean recommendations relating to structural challenges which it is appropriate to address through multiannual investments that fall directly within the scope of the ESI Funds as set out in the Fund-specific Regulations;
- (36) 'irregularity' means any breach of Union law, or of national law relating to its application, resulting from an act or omission by an economic operator involved in the implementation of the ESI Funds, which has, or would have, the effect of prejudicing the budget of the Union by charging an unjustified item of expenditure to the budget of the Union.
- (37) 'economic operator' means any natural or legal person or other entity taking part in the implementation of assistance from the ESI Funds, with the exception of a Member State exercising its prerogatives as a public authority;
- (38) 'systemic irregularity' means any irregularity, which may be of a recurring nature, with a high probability of occurrence in similar types of operations, which results from a serious deficiency in the effective functioning of a management and control system, including a failure to establish appropriate procedures in accordance with this Regulation and the Fund-specific rules;
- (39) 'serious deficiency in the effective functioning of a management and control system' means, for the purposes of implementation of the Funds and the EMFF under Part Four, a deficiency for which substantial improvements in the system are required, which exposes the Funds and the EMFF to a significant risk of irregularities, and the existence of which is incompatible with an unqualified audit opinion on the functioning of the management and control system.

Article 3

Calculation of time limits for Commission decisions

Where, pursuant to Articles 16(2) and (3), 29(3), 30 (2) and (3), 102(2), 107(2), and 108(3), a time limit is set for the Commission to adopt or amend a decision, by means of an implementing act, that time limit shall not include the period which starts on the date following the date on which the Commission sends its observations to the Member State and lasts until the Member State responds to the observations.

⁽¹⁾ Commission Recommendation of 6 May 2003 concerning the definition of micro, small and medium-sized enterprises (OJ L 124, 20.5.2003, p. 36).

PART TWO**COMMON PROVISIONS APPLICABLE TO THE ESI FUNDS**

TITLE I

PRINCIPLES OF UNION SUPPORT FOR THE ESI FUNDS*Article 4***General principles**

1. The ESI Funds shall provide support, through multi-annual programmes, which complements national, regional and local intervention, to deliver the Union strategy for smart, sustainable and inclusive growth, as well as the Fund-specific missions pursuant to their Treaty-based objectives, including economic, social and territorial cohesion taking account of the relevant Europe 2020 Integrated Guidelines and the relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU, and of the relevant Council recommendations adopted in accordance with Article 148(4) TFEU and where appropriate at national level, the National Reform Programme.

2. The Commission and the Member States shall ensure, taking account of the specific context of each Member State, that support from the ESI Funds is consistent with the relevant policies, horizontal principles referred to in Articles 5, 7 and 8 and priorities of the Union, and that it is complementary to other instruments of the Union.

3. Support from the ESI Funds shall be implemented in close cooperation between the Commission and the Member States in accordance with the principle of subsidiarity.

4. Member States, at the appropriate territorial level, in accordance with their institutional, legal and financial framework, and the bodies designated by them for that purpose shall be responsible for preparing and implementing programmes and carrying out their tasks, in partnership with the relevant partners referred to in Article 5, in compliance with this Regulation and the Fund-specific rules.

5. Arrangements for the implementation and use of the ESI Funds, and in particular the financial and administrative resources required for the preparation and implementation of programmes, in relation to monitoring, reporting, evaluation, management and control, shall respect the principle of proportionality having regard to the level of support allocated and shall take into account the overall aim of reducing the administrative burden on bodies involved in the management and control of the programmes.

6. In accordance with their respective responsibilities, the Commission and the Member States shall ensure coordination between the ESI Funds and between the ESI Funds and other relevant Union policies, strategies and instruments, including those in the framework of the Union's external action.

7. The part of the budget of the Union allocated to the ESI Funds shall be implemented within the framework of shared management between the Member States and the Commission, in accordance with Article 59 of the Financial Regulation, with the exception of the amount of support from the Cohesion Fund transferred to the CEF referred to in Article 92(6) of this Regulation, innovative actions at the initiative of the Commission under Article 8 of the ERDF Regulation, technical assistance at the initiative of the Commission and the support for direct management under the EMFF Regulation.

8. The Commission and the Member States shall respect the principle of sound financial management in accordance with Article 30 of the Financial Regulation.

9. The Commission and the Member States shall ensure the effectiveness of the ESI Funds during preparation and implementation, in relation to monitoring, reporting and evaluation.

10. The Commission and the Member States shall carry out their respective roles in relation to the ESI Funds with the aim of reducing the administrative burden on beneficiaries.

*Article 5***Partnership and multi-level governance**

1. For the Partnership Agreement and each programme, each Member State shall in accordance with its institutional and legal framework organise a partnership with the competent regional and local authorities. The partnership shall also include the following partners:

(a) competent urban and other public authorities;

(b) economic and social partners; and

(c) relevant bodies representing civil society, including environmental partners, non-governmental organisations, and bodies responsible for promoting social inclusion, gender equality and non-discrimination.

2. In accordance with the multi-level governance approach, the partners referred to in paragraph 1 shall be involved by Member States in the preparation of Partnership Agreements and progress reports and throughout the preparation and implementation of programmes, including through participation in the monitoring committees for programmes in accordance with Article 48.

3. The Commission shall be empowered to adopt a delegated act in accordance with Article 149 to provide for a European code of conduct on partnership (the 'code of conduct') in order to support and facilitate Member States in the organisation of

partnership in accordance with paragraphs 1 and 2 of this Article. The code of conduct shall set out the framework within which the Member States, in accordance with their institutional and legal framework as well as their national and regional competences, shall pursue the implementation of partnership. The code of conduct, while fully respecting the principles of subsidiarity and proportionality, shall lay down the following elements:

- (a) the main principles concerning transparent procedures to be followed for the identification of the relevant partners including, where appropriate, their umbrella organisations in order to facilitate Member States in designating the most representative relevant partners, in accordance with their institutional and legal framework;
- (b) the main principles and good practices concerning the involvement of the different categories of relevant partners set out in paragraph 1 in the preparation of the Partnership Agreement and programmes, the information to be provided concerning their involvement, and at the various stages of implementation;
- (c) the good practices concerning the formulation of the rules of membership and internal procedures of monitoring committees to be decided, as appropriate, by the Member States or the monitoring committees of programmes in accordance with the relevant provisions of this Regulation and the Fund-specific rules;
- (d) the main objectives and good practices in cases where the managing authority involves the relevant partners in the preparation of calls for proposals and in particular good practices for avoiding potential conflicts of interest in cases where there is a possibility of relevant partners also being potential beneficiaries, and for the involvement of the relevant partners in the preparation of progress reports and in relation to monitoring and evaluation of programmes in accordance with the relevant provisions of this Regulation and the Fund-specific rules;
- (e) the indicative areas, themes and good practices concerning how the competent authorities of the Member States may use the ESI Funds including technical assistance to strengthen the institutional capacity of relevant partners in accordance with the relevant provisions of this Regulation and the Fund-specific rules;
- (f) the role of the Commission in the dissemination of good practices;
- (g) the main principles and good practices that are apt to facilitate the Member States' assessment of the implementation of partnership and its added value.

The provisions of the code of conduct shall not in any way contradict the relevant provisions of this Regulation or the Fund-specific rules.

4. The Commission shall notify the delegated act, referred to in paragraph 3 of this Article, on the European code of conduct on partnership, simultaneously to the European Parliament and to the Council by 18 April 2014. That delegated act shall not specify a date of application that is earlier than the date of its adoption.

5. An infringement of any obligation imposed on Member States either by this Article or by the delegated act adopted pursuant to paragraph 3 of this Article, shall not constitute an irregularity leading to a financial correction pursuant to Article 85.

6. At least once a year, for each ESI Fund, the Commission shall consult the organisations which represent the partners at Union level on the implementation of support from that ESI Fund and shall report to the European Parliament and the Council on the outcome.

Article 6

Compliance with Union and national law

Operations supported by the ESI Funds shall comply with applicable Union law and the national law relating to its application ('applicable law').

Article 7

Promotion of equality between men and women and non-discrimination

The Member States and the Commission shall ensure that equality between men and women and the integration of gender perspective are taken into account and promoted throughout the preparation and implementation of programmes, including in relation to monitoring, reporting and evaluation.

The Member States and the Commission shall take appropriate steps to prevent any discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation during the preparation and implementation of programmes. In particular, accessibility for persons with disabilities shall be taken into account throughout the preparation and implementation of programmes.

Article 8

Sustainable development

The objectives of the ESI Funds shall be pursued in line with the principle of sustainable development and with the Union's promotion of the aim of preserving, protecting and improving the quality of the environment, as set out in Article 11 and Article 191(1) TFEU, taking into account the polluter pays principle.

The Member States and the Commission shall ensure that environmental protection requirements, resource efficiency, climate change mitigation and adaptation, biodiversity, disaster resilience, and risk prevention and management are promoted in the preparation and implementation of Partnership Agreements and programmes. Member States shall provide information on the support for climate change objectives using a methodology based on the categories of intervention, focus areas or measures, as appropriate, for each of the ESI Funds. That methodology shall consist of assigning a specific weighting to the support provided under the ESI Funds at a level which reflects the extent to which such support makes a contribution to climate change mitigation and adaptation goals. The specific weighting assigned shall be differentiated on the basis of whether the support makes a significant or a moderate contribution towards climate change objectives. Where the support does not contribute towards those objectives or the contribution is insignificant, a weighting of zero shall be assigned. In the case of the ERDF, the ESF and the Cohesion Fund weightings shall be attached to categories of intervention established within the nomenclature adopted by the Commission. In the case of the EAFRD weightings shall be attached to focus areas set out in the EAFRD Regulation and in the case of the EMFF to measures set out in the EMFF Regulation.

The Commission shall set out uniform conditions for each of the ESI Funds for the application of the methodology referred to in the second paragraph by means of an implementing act. That implementing act shall be adopted in accordance with the examination procedure referred to in Article 150(3).

TITLE II

STRATEGIC APPROACH

CHAPTER I

Thematic objectives for the ESI Funds and Common Strategic Framework

Article 9

Thematic objectives

In order to contribute to the Union strategy for smart, sustainable and inclusive growth as well as the Fund-specific missions pursuant to their Treaty-based objectives, including economic, social and territorial cohesion, each ESI Fund shall support the following thematic objectives:

- (1) strengthening research, technological development and innovation;
- (2) enhancing access to, and use and quality of, ICT;
- (3) enhancing the competitiveness of SMEs, of the agricultural sector (for the EAFRD) and of the fishery and aquaculture sector (for the EMFF);
- (4) supporting the shift towards a low-carbon economy in all sectors;
- (5) promoting climate change adaptation, risk prevention and management;
- (6) preserving and protecting the environment and promoting resource efficiency;
- (7) promoting sustainable transport and removing bottlenecks in key network infrastructures;
- (8) promoting sustainable and quality employment and supporting labour mobility;
- (9) promoting social inclusion, combating poverty and any discrimination;
- (10) investing in education, training and vocational training for skills and lifelong learning;
- (11) enhancing institutional capacity of public authorities and stakeholders and efficient public administration.

Thematic objectives shall be translated into priorities that are specific to each of the ESI Funds and are set out in the Fund-specific rules.

Article 10

Common Strategic Framework

1. In order to promote the harmonious, balanced and sustainable development of the Union, a Common Strategic Framework ('CSF') is hereby established, as set out in Annex I. The CSF establishes strategic guiding principles to facilitate the programming process and the sectoral and territorial coordination of Union intervention under the ESI Funds and with other relevant Union policies and instruments, in line with the targets and objectives of the Union strategy for smart, sustainable and inclusive growth, taking into account the key territorial challenges of the various types of territories.

2. The strategic guiding principles as set out in the CSF shall be established in line with the purpose and within the scope of the support provided by each ESI Fund, and in line with the rules governing the operation of each ESI Fund, as defined in this Regulation and the Fund-specific rules. The CSF shall not impose additional obligations upon Member States beyond those set out within the framework of the relevant sectoral Union policies.

3. The CSF shall facilitate the preparation of the Partnership Agreement and programmes in accordance with the principles of proportionality and subsidiarity and taking into account national and regional competences, in order for the specific and appropriate policy and coordination measures to be decided.

*Article 11***Content**

The CSF shall establish:

- (a) mechanisms for ensuring the contribution of the ESI Funds to the Union strategy for smart, sustainable and inclusive growth, and the coherence and consistency of the programming of the ESI Funds in relation to the relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU, the relevant Council recommendations adopted in accordance with 148(4) TFEU, and where appropriate at national level, to the National Reform Programme;
- (b) arrangements to promote an integrated use of the ESI Funds;
- (c) arrangements for coordination between the ESI Funds and other relevant Union policies and instruments, including external instruments for cooperation;
- (d) horizontal principles referred to in Articles 5, 7 and 8 and cross-cutting policy objectives for the implementation of the ESI Funds;
- (e) arrangements to address the key territorial challenges for urban, rural, coastal and fisheries areas, the demographic challenges of regions or specific needs of geographical areas which suffer from severe and permanent natural or demographic handicaps as referred to in Article 174 TFEU, and the specific challenges of outermost regions within the meaning of Article 349 TFEU;
- (f) priority areas for cooperation activities under the ESI Funds, where appropriate, taking account of macro-regional and sea basin strategies.

*Article 12***Review**

Where there are major changes in the social and economic situation in the Union, or changes are made to the Union strategy for smart, sustainable and inclusive growth, the Commission may submit a proposal to review the CSF, or the European Parliament or the Council, acting in accordance with Articles 225 or 241 TFEU respectively, may request the Commission to submit such a proposal.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 in order to supplement or amend Sections 4 and 7 of Annex I where it is necessary to take account of changes in the Union policies or instruments referred to in Section 4 or changes in the cooperation activities referred to in Section 7 or to take account of the introduction of new Union policies, instruments or cooperation activities.

*Article 13***Guidance for beneficiaries**

1. The Commission shall prepare guidance on how to effectively access and use the ESI Funds, and on how to exploit complementarities with other instruments of relevant Union policies.
2. The guidance shall be drawn up by 30 June 2014 and shall provide, for each thematic objective, an overview of the available relevant instruments at Union level with detailed sources of information, examples of good practices for combining available funding instruments within and across policy areas, a description of relevant authorities and bodies involved in the management of each instrument, a checklist for potential beneficiaries to help them to identify the most appropriate funding sources.
3. The guidance shall be made public on the websites of the relevant Directorate Generals of the Commission. The Commission and managing authorities, acting in accordance with the Fund-specific rules, and in cooperation with the Committee of the Regions, shall ensure dissemination of the guidance to potential beneficiaries.

*CHAPTER II***Partnership Agreement***Article 14***Preparation of the Partnership Agreement**

1. Each Member State shall prepare a Partnership Agreement for the period from 1 January 2014 to 31 December 2020.
2. The Partnership Agreement shall be drawn up by Member States in cooperation with the partners referred to in Article 5. The Partnership Agreement shall be prepared in dialogue with the Commission. The Member States shall draw up the Partnership Agreement based on procedures that are transparent for the public, and in accordance with their institutional and legal framework.
3. The Partnership Agreement shall cover all support from the ESI Funds in the Member State concerned.
4. Each Member State shall submit its Partnership Agreement to the Commission by 22 April 2014.
5. Where one or more of the Fund-specific Regulations does not enter into force or is not expected to enter into force by 22 February 2014, the Partnership Agreement submitted by a Member State as referred to in paragraph 4 shall not be required to contain the elements referred to in points (a)(ii), (iii), (iv) and (vi) of Article 15(1) for the ESI Fund affected by such a delay or expected delay in the entry into force of the Fund-specific Regulation.

Article 15

Content of the Partnership Agreement

1. The Partnership Agreement shall set out:

(a) arrangements to ensure alignment with the Union strategy for smart, sustainable and inclusive growth as well as the Fund-specific missions pursuant to their Treaty-based objectives, including economic, social and territorial cohesion, including:

(i) an analysis of disparities, development needs and growth potential with reference to the thematic objectives and the territorial challenges, and taking account of the National Reform Programme, where appropriate, and relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU and relevant Council recommendations adopted in accordance with Article 148(4) TFEU;

(ii) a summary of the ex ante evaluations of the programmes, or key findings of the ex ante evaluation of the Partnership Agreement, where the latter evaluation is undertaken by the Member State at its own initiative;

(iii) selected thematic objectives, and for each of the selected thematic objectives a summary of the main results expected for each of the ESI Funds;

(iv) the indicative allocation of support by the Union by thematic objective at national level for each of the ESI Funds, as well as the total indicative amount of support envisaged for climate change objectives;

(v) the application of the horizontal principles referred to in Articles 5, 7 and 8 and policy objectives for the implementation of the ESI Funds;

(vi) the list of the programmes under the ERDF, the ESF and the Cohesion Fund, except those under the European territorial cooperation goal, and of the programmes of the EAFRD and the EMFF, with the respective indicative allocations by ESI Fund and by year;

(vii) information on the allocation related to the performance reserve, broken down by ESI Fund and, where appropriate, by category of region, and on the amounts excluded for the purpose of calculating the performance reserve in accordance with Article 20;

(b) arrangements to ensure effective implementation of the ESI Funds, including:

(i) arrangements, in line with the institutional framework of the Member States, that ensure coordination between the ESI Funds and other Union and national funding instruments and with the EIB;

(ii) the information required for ex ante verification of compliance with the rules on additionality as they are defined in Part Three;

(iii) a summary of the assessment of the fulfilment of applicable ex ante conditionalities in accordance with Article 19 and Annex XI at national level and, in the event that the applicable ex ante conditionalities are not fulfilled, of the actions to be taken, the bodies responsible and the timetable for implementation of those actions;

(iv) the methodology and mechanisms to ensure consistency in the functioning of the performance framework in accordance with Article 21;

(v) an assessment of whether there is a need to reinforce the administrative capacity of the authorities involved in the management and control of the programmes and, where appropriate, of beneficiaries as well as, where necessary, a summary of actions to be taken for that purpose;

(vi) a summary of the actions planned in the programmes, including an indicative timetable for achievement of a reduction in the administrative burden on beneficiaries;

(c) arrangements for the partnership principle as referred in Article 5;

(d) an indicative list of the partners referred to in Article 5 and a summary of the actions taken to involve them in accordance with Article 5 and of their role in the preparation of the Partnership Agreement and the progress report as referred to in Article 52.

2. The Partnership Agreement shall also indicate:

(a) an integrated approach to territorial development supported by the ESI Funds or a summary of the integrated approaches to territorial development based on the content of the programmes, setting out:

(i) the arrangements to ensure an integrated approach to the use of the ESI Funds for the territorial development of specific subregional areas, in particular the implementation arrangements for Articles 32, 33 and 36 accompanied by the principles for identifying the urban areas where integrated actions for sustainable urban development are to be implemented;

- (ii) the main priority areas for cooperation under the ESI Funds, taking account, where appropriate, of macro-regional strategies and sea basin strategies;
 - (iii) where appropriate, an integrated approach to addressing the specific needs of geographical areas most affected by poverty or of target groups at highest risk of discrimination or social exclusion, with special regard to marginalised communities, persons with disabilities, the long term unemployed and young people not in employment, education or training;
 - (iv) where appropriate, an integrated approach to address the demographic challenges of regions or specific needs of geographical areas which suffer from severe and permanent natural or demographic handicaps as referred to in Article 174 TFEU;
- (b) arrangements to ensure efficient implementation of the ESI Funds, including an assessment of the existing systems for electronic data exchange, and a summary of the actions planned to gradually permit all exchanges of information between beneficiaries, and authorities responsible for management and control of programmes, to be carried out by electronic data exchange.

Article 16

Adoption and amendment of the Partnership Agreement

1. The Commission shall assess the consistency of the Partnership Agreement with this Regulation taking account of the National Reform Programme, where appropriate, and the relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU and relevant Council recommendations adopted in accordance with Article 148 (4) TFEU, as well as of the ex ante evaluations of the programmes, and shall make observations within three months of the date of submission by the Member State of its Partnership Agreement. The Member State concerned shall provide all necessary additional information and, where appropriate, shall revise the Partnership Agreement.
2. The Commission shall adopt a decision, by means of implementing acts, approving the elements of the Partnership Agreement falling under Article 15(1) and those falling under Article 15(2) in the event that a Member State has made use of the provisions of Article 96(8), for the elements requiring a Commission decision under Article 96(10), no later than four months after the date of submission by the Member State of its Partnership Agreement, provided that any observations made by the Commission have been adequately taken into account. The Partnership Agreement shall not enter into force before 1 January 2014.
3. The Commission shall prepare a report on the outcome of the negotiations concerning the Partnership Agreements and the

programmes, including an overview of the key issues, for each Member State, by 31 December 2015. That report shall be submitted to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions simultaneously.

4. Where a Member State proposes an amendment to the elements of the Partnership Agreement covered by the Commission decision as referred to in paragraph 2, the Commission shall carry out an assessment in accordance with paragraph 1 and, where appropriate, shall adopt a decision, by means of implementing acts, approving the amendment within three months of the date of submission of the proposal for amendment by the Member State.

5. Where a Member State amends elements of the Partnership Agreement not covered by the Commission decision as referred to in paragraph 2, it shall notify the Commission thereof within one month of the date of the decision to make the amendment.

Article 17

Adoption of the revised Partnership Agreement in the event of delay in the entry into force of a Fund-specific Regulation

1. Where Article 14(5) applies, each Member State shall submit to the Commission a revised Partnership Agreement that includes the elements missing from the Partnership Agreement for the ESI Fund concerned, within two months of the date of entry into force of the Fund-specific Regulation that was subject to the delay.
2. The Commission shall assess the consistency of the revised Partnership Agreement with this Regulation in accordance with Article 16(1) and shall adopt a decision, by means of implementing acts, approving the revised Partnership Agreement in accordance with Article 16(2).

CHAPTER III

Thematic concentration, ex ante conditionalities and performance review

Article 18

Thematic concentration

Member States shall concentrate support, in accordance with the Fund-specific rules, on interventions that bring the greatest added value in relation to the Union strategy for smart, sustainable and inclusive growth taking into account the key territorial challenges of the various types of territories in line with the CSF, the challenges identified in the National Reform Programmes, where appropriate, and relevant country-specific recommendations under Article 121(2) TFEU and the relevant Council recommendations adopted under Article 148(4) TFEU. Provisions on thematic concentration under the Fund-specific rules shall not apply to technical assistance.

*Article 19***Ex ante conditionalities**

1. Member States shall assess in accordance with their institutional and legal framework and in the context of the preparation of the programmes and, where appropriate, the Partnership Agreement, whether the ex ante conditionalities laid down in the respective Fund-specific rules and the general ex ante conditionalities set out in Part II of Annex XI are applicable to the specific objectives pursued within the priorities of their programmes and whether the applicable ex ante conditionalities are fulfilled.

Ex ante conditionalities shall apply only to the extent and provided that they comply with the definition laid down in point (33) of Article 2 regarding the specific objectives pursued within the priorities of the programme. The assessment of applicability shall, without prejudice to the definition laid down in point (33) of Article 2, take account of the principle of proportionality in accordance with Article 4(5) having regard to the level of support allocated, where appropriate. The assessment of fulfilment shall be limited to the criteria laid down in the Fund-specific rules and in Part II of Annex XI.

2. The Partnership Agreement shall set out a summary of the assessment of the fulfilment of applicable ex ante conditionalities at national level and for those which, pursuant to the assessment referred to in paragraph 1, are not fulfilled at the date of submission of the Partnership Agreement, the actions to be taken, the bodies responsible and the timetable for the implementation of those actions. Each programme shall identify which of the ex ante conditionalities laid down in the relevant Fund-specific rules and the general ex ante conditionalities set out in Part II of Annex XI are applicable to it and, which of them, pursuant to the assessment referred to in paragraph 1, are fulfilled at the date of submission of the Partnership Agreement and programmes. Where the applicable ex ante conditionalities are not fulfilled, the programme shall contain a description of the actions to be taken, the bodies responsible and the timetable for their implementation. Member States shall fulfil those ex ante conditionalities not later than 31 December 2016 and report on their fulfilment not later than in the annual implementation report in 2017 in accordance with Article 50(4) or the progress report in 2017 in accordance with point (c) of Article 52(2).

3. The Commission shall assess the consistency and the adequacy of the information provided by the Member State on the applicability of ex ante conditionalities and on the fulfilment of applicable ex ante conditionalities in the framework of its assessment of the programmes and, where appropriate, of the Partnership Agreement.

That assessment of applicability by the Commission shall, in accordance with Article 4(5), take account of the principle of proportionality having regard to the level of support allocated, where appropriate. The assessment of fulfilment by the Commission shall be limited to the criteria laid down in the Fund-specific rules and in Part II of Annex XI, and shall respect national and regional competences to decide on the specific and adequate policy measures including the content of strategies.

4. In the event of disagreement between the Commission and a Member State on the applicability of an ex ante conditionality to the specific objective of the priorities of a programme or its fulfilment, both the applicability in accordance with the definition in point (33) of Article 2 and the non-fulfilment shall be proven by the Commission.

5. The Commission may decide, when adopting a programme, to suspend all or part of interim payments to the relevant priority of that programme pending the completion of actions referred to in paragraph 2 where necessary to avoid significant prejudice to the effectiveness and efficiency of the achievement of the specific objectives of the priority concerned. The failure to complete actions to fulfil an applicable ex ante conditionality which has not been fulfilled at the date of submission of the Partnership Agreement and the respective programmes, by the deadline set out in paragraph 2, shall constitute a ground for suspending interim payments by the Commission to the priorities of the programme concerned that are affected. In both cases, the scope of suspension shall be proportionate, taking into account the actions to be taken and the funds at risk.

6. Paragraph 5 shall not apply in the event of agreement between the Commission and the Member State on the non-applicability of an ex ante conditionality or on the fact that an applicable ex ante conditionality has been fulfilled, as indicated by the approval of the programme and the Partnership Agreement, or in the absence of Commission observations within 60 days of the submission of the relevant report referred to in paragraph 2.

7. The Commission shall without delay lift the suspension of interim payments for a priority where a Member State has completed actions relating to the fulfilment of ex ante conditionalities applicable to the programme concerned and which had not been fulfilled at the time of the decision of the Commission on the suspension. It shall also without delay lift the suspension where, following amendment of the programme related to the priority concerned, the ex ante conditionality concerned is no longer applicable.

8. Paragraphs 1 to 7 shall not apply to programmes under the European territorial cooperation goal.

*Article 20***Performance reserve**

6 % of the resources allocated to the ERDF, ESF and the Cohesion Fund under the Investment for Growth and Jobs goal referred to in point (a) of Article 89(2) of this Regulation, as well as to the EAFRD and to measures financed under shared management in accordance with the EMFF Regulation shall constitute a performance reserve which shall be established in the Partnership Agreement and programmes and allocated to specific priorities in accordance with Article 22 of this Regulation.

The following resources are excluded for the purpose of calculating the performance reserve:

- (a) resources allocated to the YEI as defined in the operational programme in accordance with Article 18 of the ESF Regulation;
- (b) resources allocated to technical assistance at the initiative of the Commission;
- (c) resources transferred from the first pillar of the CAP to the EAFRD under Articles 7(2) and 14(1) of Regulation (EU) No 1307/2013;
- (d) transfers to the EAFRD in application of Articles 10b, 136 and 136b of Council Regulation (EC) No 73/2009 in respect of calendar years 2013 and 2014 respectively;
- (e) resources transferred to the CEF from the Cohesion Fund in accordance with Article 92(6) of this Regulation;
- (f) resources transferred to the Fund for European Aid for the Most Deprived in accordance with Article 92(7) of this Regulation;
- (g) resources allocated for innovative actions for sustainable urban development in accordance with Article 92(8) of this Regulation.

Article 21

Performance review

1. The Commission, in cooperation with the Member States, shall undertake a review of the performance of the programmes in each Member State in 2019 (the 'performance review'), with reference to the performance framework set out in the respective programmes. The method for establishing the performance framework is set out in Annex II.
2. The performance review shall examine the achievement of the milestones of the programmes at the level of priorities, on the basis of the information and the assessments presented in the annual implementation report submitted by the Member States in the year 2019.

Article 22

Application of the performance framework

1. The performance reserve shall constitute between 5 and 7 % of the allocation to each priority within a programme, with the exception of priorities dedicated to technical assistance and programmes dedicated to financial instruments in accordance with Article 39. The total amount of the performance reserve allocated by ESI Fund and category of region shall be 6 %. The amounts corresponding to the performance reserve shall be set

out in the programmes broken down by priority and, where appropriate, by ESI Fund and by category of region.

2. On the basis of the performance review, the Commission shall within two months of the receipt of the respective annual implementation reports in the year 2019 adopt a decision, by means of implementing acts, to determine for each ESI Fund and Member State, the programmes and priorities which have achieved their milestones, setting out that information by ESI Fund and by category of region, where a priority covers more than one ESI Fund or category of region.

3. The performance reserve shall be allocated only to programmes and priorities which have achieved their milestones. Where priorities have achieved their milestones the amount of the performance reserve established for the priority shall be considered to be definitively allocated on the basis of the Commission decision referred to in paragraph 2.

4. Where priorities have not achieved their milestones, the Member State shall propose the reallocation of the corresponding amount of the performance reserve to priorities set out in the Commission decision referred to in paragraph 2, and other amendments to the programme which result from the reallocation of the performance reserve, no later than three months after the adoption of the decision referred to in paragraph 2.

The Commission shall approve, in accordance with Article 30(3) and (4), the amendment of the programmes concerned. Where a Member State fails to submit the information in accordance with Article 50(5) and (6), the performance reserve for the programmes or the priorities concerned shall not be allocated to the programmes or the priorities concerned.

5. The Member State's proposal to reallocate the performance reserve shall be consistent with thematic concentration requirements and minimum allocations set out in this Regulation and the Fund-specific rules. By way of derogation, where one or more of the priorities linked to thematic concentration requirements or minimum allocations have not achieved their milestones, the Member State may propose a reallocation of the reserve, which does not comply with the aforementioned requirements and minimum allocations.

6. Where there is evidence, resulting from the performance review for a priority, that there has been a serious failure in achieving that priority's milestones relating only to the financial and output indicators and key implementation steps set out in the performance framework and that that failure is due to clearly identified implementation weaknesses, which the Commission had previously communicated pursuant to Article 50(8) following close consultations with the Member State concerned, and that Member State has failed to take the necessary corrective action to address such weaknesses, the Commission may, not earlier than five months after such communication, suspend all or part of an interim payment of a priority of a programme in accordance with the procedure laid down in the Fund-specific rules.

The Commission shall without delay lift the suspension of interim payments when the Member State has taken the necessary corrective action. Where the corrective action concerns the transfer of financial allocations to other programmes or priorities, which have achieved their milestones, the Commission shall approve, by means of an implementing act, the necessary amendment of the programmes concerned in accordance with Article 30(2). By way of derogation from Article 30(2), in such case the Commission shall decide on the amendment no later than two months after the submission of the Member State request for amendment.

7. Where the Commission, based on the examination of the final implementation report of the programme, establishes a serious failure to achieve the targets relating only to financial indicators, output indicators and key implementation steps set out in the performance framework due to clearly identified implementation weaknesses, which the Commission had previously communicated pursuant to Article 50(8) following close consultations with the Member State concerned, and the Member State has failed to take the necessary corrective action to address such weaknesses, the Commission may notwithstanding Article 85 apply financial corrections in respect of the priorities concerned in accordance with the Fund-specific rules.

When applying financial corrections, the Commission shall take into account, with due regard to the principle of proportionality, the absorption level and external factors contributing to the failure.

Financial corrections shall not be applied where the failure to achieve targets is due to the impact of socio-economic or environmental factors, significant changes in the economic or environmental conditions in the Member State concerned or because of reasons of force majeure seriously affecting implementation of the priorities concerned.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 to establish detailed rules on criteria for determining the level of financial correction to be applied.

The Commission shall adopt implementing acts, laying down the detailed arrangements to ensure a consistent approach for determining the milestones and targets in the performance framework for each priority and for assessing the achievement of the milestones and targets. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

CHAPTER IV

Measures linked to sound economic governance

Article 23

Measures linking effectiveness of ESI Funds to sound economic governance

1. The Commission may request a Member State to review and propose amendments to its Partnership Agreement and

relevant programmes, where this is necessary to support the implementation of relevant Council Recommendations or to maximise the growth and competitiveness impact of the ESI Funds in Member States receiving financial assistance.

Such a request may be made for the following purposes:

- (a) to support the implementation of a relevant country-specific recommendation adopted in accordance with Article 121(2) TFEU and of a relevant Council recommendation adopted in accordance with Article 148(4) TFEU, addressed to the Member State concerned;
- (b) to support the implementation of relevant Council Recommendations addressed to the Member State concerned and adopted in accordance with Articles 7(2) or 8(2) of Regulation (EU) No 1176/2011⁽¹⁾ of the European Parliament and of the Council provided that these amendments are deemed necessary to help correct the macro-economic imbalances; or
- (c) to maximise the growth and competitiveness impact of the available ESI Funds, if a Member State meets one of the following conditions:
 - (i) Union financial assistance is made available to it under Council Regulation (EU) No 407/2010⁽²⁾;
 - (ii) financial assistance is made available to it in accordance with Council Regulation (EC) No 332/2002⁽³⁾;
 - (iii) financial assistance is made available to it that triggers a macroeconomic adjustment programme in accordance with Regulation (EU) No 472/2013 of the European Parliament and of the Council⁽⁴⁾ or that triggers a decision of the Council in accordance with Article 136(1) TFEU.

For the purposes of point (b) of the second subparagraph, each of those conditions shall be deemed to be satisfied where such assistance has been made available to the Member State before or after 21 December 2013 and remains available to it.

⁽¹⁾ Regulation (EU) No 1176/2011 of the European Parliament and of the Council of 16 November 2011 on the prevention and correction of macroeconomic imbalances (OJ L 306, 23.11.2011, p. 25).

⁽²⁾ Council Regulation (EU) No 407/2010 of 11 May 2010 establishing a European financial stabilisation mechanism (OJ L 118, 12.5.2010, p. 1).

⁽³⁾ Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1).

⁽⁴⁾ Regulation (EU) No 472/2013 of the European Parliament and of the Council of 21 May 2013 on the strengthening of economic and budgetary surveillance of Member States in the euro area experiencing or threatened with serious difficulties with respect to their financial stability (OJ L 140, 27.05.2013, p. 1).

2. A request by the Commission to a Member State in accordance with paragraph 1 shall be justified, with reference to the need to support the implementation of the relevant recommendations or to maximise the growth and competitiveness impact of the ESI Funds as appropriate, and shall indicate the programmes or priorities which it considers are concerned and the nature of the amendments expected. Such a request shall not be made before 2015 or after 2019, nor in relation to the same programmes in two consecutive years.

3. The Member State shall submit its response to the request referred to in paragraph 1 within two months of its receipt, setting out the amendments it considers necessary in the Partnership Agreement and programmes, the reasons for such amendments, identifying the programmes concerned and outlining the nature of the amendments proposed and their expected effects on the implementation of recommendations and on the implementation of the ESI Funds. If necessary, the Commission shall make observations within one month of the receipt of that response.

4. The Member State shall submit a proposal to amend the Partnership Agreement and the relevant programmes within two months of the date of submission of the response referred to in paragraph 3.

5. Where the Commission has not submitted observations or where the Commission is satisfied that any observations submitted have been duly taken into account, the Commission shall adopt a decision approving the amendments to the Partnership Agreement and the relevant programmes without undue delay and in any event not later than three months after their submission by the Member State in accordance with paragraph 3.

6. Where the Member State fails to take effective action in response to a request made in accordance with paragraph 1, within the deadlines set out in paragraphs 3 and 4, the Commission may, within three months following its observations under paragraph 3 or following the submission of the proposal of the Member State under paragraph 4, propose to the Council that it suspend part or all of the payments for the programmes or priorities concerned. In its proposal, the Commission shall set out the grounds for concluding that the Member State has failed to take effective action. In making its proposal, the Commission shall take account of all relevant information, and shall give due consideration to any elements arising from and opinions expressed through the structured dialogue under paragraph 15.

The Council shall decide on that proposal, by means of an implementing act. That implementing act shall only apply with respect to requests for payment submitted after the date of the adoption of that implementing act.

7. The scope and level of the suspension of payments imposed in accordance with paragraph 6, shall be proportionate and effective, and respect equality of treatment between Member

States, in particular with regard to the impact of the suspension on the economy of the Member State concerned. The programmes to be suspended shall be determined on the basis of the needs identified in the request referred to in paragraphs 1 and 2.

The suspension of payments shall not exceed 50 % of the payments of each of the programmes concerned. The decision may provide for an increase in the level of the suspension up to 100 % of payments if the Member State fails to take effective action in response to a request made in accordance with paragraph 1, within three months of the decision to suspend payments referred to in paragraph 6.

8. Where the Member State has proposed amendments to the Partnership Agreement and the relevant programmes as requested by the Commission, the Council acting on a proposal from the Commission shall decide on the lifting of the suspension of payments.

9. The Commission shall make a proposal to the Council to suspend part or all of the commitments or payments for the programmes of a Member State in the following cases:

- (a) where the Council decides in accordance with Article 126(8) or Article 126(11) TFEU that a Member State has not taken effective action to correct its excessive deficit;
- (b) where the Council adopts two successive recommendations in the same imbalance procedure, in accordance with Article 8(3) of Regulation (EU) No 1176/2011 on the grounds that a Member State has submitted an insufficient corrective action plan;
- (c) where the Council adopts two successive decisions in the same imbalance procedure in accordance with Article 10(4) of Regulation (EU) No 1176/2011 establishing non-compliance by a Member State on the grounds that it has not taken the recommended corrective action;
- (d) where the Commission concludes that a Member State has not taken measures to implement the adjustment programme referred to in Regulation (EU) No 407/2010 or Regulation (EC) No 332/2002 and as a consequence decides not to authorise the disbursement of the financial assistance granted to that Member State;
- (e) where the Council decides that a Member State does not comply with the macro-economic adjustment programme referred to in Article 7 of Regulation (EU) No 472/2013, or with the measures requested by a Council decision adopted in accordance with Article 136(1) TFEU.

In making its proposal, the Commission shall respect the provisions of paragraph 11 and shall take account of all relevant information in that regard, and it shall give due consideration to any elements arising from and opinions expressed through the structured dialogue under paragraph 15.

Priority shall be given to the suspension of commitments: payments shall be suspended only when immediate action is sought and in the case of significant non-compliance. The suspension of payments shall apply to requests for payment submitted for the programmes concerned after the date of the decision to suspend.

10. A proposal by the Commission referred to in paragraph 9 in relation to the suspension of commitments shall be deemed adopted by the Council unless the Council decides, by means of an implementing act, to reject such a proposal by qualified majority within one month of the submission of the Commission proposal. The suspension of commitments shall apply to the commitments from the ESI Funds for the Member State concerned from 1 January of the year following the decision to suspend.

The Council shall adopt a decision, by means of an implementing act, on a proposal by the Commission referred to in paragraph 9 in relation to the suspension of payments.

11. The scope and level of the suspension of commitments or payments to be imposed on the basis of paragraph 10, shall be proportionate, respect the equality of treatment between Member States and take into account the economic and social circumstances of the Member State concerned, in particular the level of unemployment of the Member State concerned in relation to the Union average and the impact of the suspension on the economy of the Member State concerned. The impact of suspensions on programmes of critical importance to address adverse economic or social conditions shall be a specific factor to be taken into account.

Detailed provisions for determining the scope and level of suspensions are set out in Annex III.

The suspension of commitments shall be subject to the lower of the following ceilings:

- (a) A maximum of 50 % of the commitments relating to the next financial year for the ESI Funds in the first case of non-compliance with an excessive deficit procedure as referred to in point (a) of the first subparagraph of paragraph 9 and a maximum 25 % of the commitments relating to the next financial year for the ESI Funds in the first case of non-compliance relating to a corrective action plan under an excessive imbalances procedure as referred to in point (b) of the first subparagraph of paragraph 9 or non-compliance with the recommended corrective action pursuant to an excessive imbalances procedure as referred to in point (c) of the first subparagraph of paragraph 9.

The level of the suspension shall increase gradually up to a maximum of 100 % of the commitments relating to the next financial year for the ESI Funds in the case of an excessive deficit procedure and up to 50 % of the commitments relating to the next financial year for the

ESI Funds in the case of an excessive imbalance procedure, in line with the seriousness of the non-compliance;

- (b) a maximum of 0,5 % of nominal GDP applying in the first case of non-compliance with an excessive deficit procedure as referred to in point (a) of the first subparagraph of paragraph 9 and a maximum of 0,25 % of nominal GDP applying in the first case of non-compliance relating to a corrective action plan under an excessive imbalances procedure as referred to in point (b) of the first subparagraph of paragraph 9 or non-compliance with recommended corrective action under an excessive imbalances procedure as referred to in point (c) of the first subparagraph of paragraph 9.

If non-compliance relating to corrective actions referred to in points (a), (b) and (c) of the first subparagraph of paragraph 9 persists, the percentage of that GDP cap shall be gradually increased up to:

- a maximum of 1 % of nominal GDP applying in the event of persistent non-compliance with an excessive deficit procedure in accordance with point (a) of the first subparagraph of paragraph 9; and
- a maximum of 0,5 % of nominal GDP applying in the event of persistent non-compliance with an excessive imbalance procedure in accordance with point (b) or (c) of the first subparagraph of paragraph 9, in line with the seriousness of the non-compliance;

- (c) a maximum of 50 % of the commitments relating to the next financial year for the ESI Funds or a maximum of 0,5 % of nominal GDP in the first case of non-compliance as referred to in points (d) and (e) of the first subparagraph of paragraph 9.

In determining the level of the suspension and whether to suspend commitments or payments, the stage of the programme cycle shall be taken into account having regard in particular to the period remaining for using the funds following the re-budgeting of suspended commitments.

12. Without prejudice to de-commitment rules set out in Articles 86 to 88 the Commission shall lift the suspension of commitments, without delay, in the following cases:

- (a) where the excessive deficit procedure is held in abeyance in accordance with Article 9 of Council Regulation (EC) No 1467/97⁽¹⁾ or the Council has decided in accordance with Article 126(12) TFEU to abrogate the decision on the existence of an excessive deficit;

⁽¹⁾ Council Regulation (EC) No 1467/97 of 7 July 1997 on speeding up and clarifying the implementation of the excessive deficit procedure (OJ L 209, 2.8.1997, p. 6).

- (b) where the Council has endorsed the corrective action plan submitted by the Member State concerned in accordance with Article 8(2) of Regulation (EU) No 1176/2011 or the excessive imbalance procedure is placed in a position of abeyance in accordance with Article 10(5) of that Regulation or the Council has closed the excessive imbalance procedure in accordance with Article 11 of that Regulation;
- (c) where the Commission has concluded that the Member State concerned has taken adequate measures to implement the adjustment programme referred to in Article 7 of Regulation (EU) No 472/2013 or the measures requested by a decision of the Council in accordance with Article 136(1) TFEU.

When lifting the suspension of commitments, the Commission shall re-budget the suspended commitments in accordance with Article 8 of Council Regulation (EU, Euratom) No 1311/2013.

A decision concerning the lifting of the suspension of payments shall be taken by the Council on a proposal from the Commission where the applicable conditions set out in points (a), (b) and (c) of the first subparagraph are fulfilled.

13. Paragraphs 6 to 12 shall not apply to the United Kingdom in so far as the suspension of commitments or of payments relate to matters covered by points (a), (b) and (c)(iii) of the second subparagraph of paragraph 1 or points (a), (b) or (c) of the first subparagraph of paragraph 9.

14. This Article shall not apply to programmes under the European territorial cooperation goal.

15. The Commission shall keep the European Parliament informed of the implementation of this Article. In particular the Commission shall, when one of the conditions set out in paragraph 6 or points (a) to (e) of the first subparagraph of paragraph 9 is fulfilled for a Member State, immediately inform the European Parliament and provide details of the ESI Funds and programmes which could be subject to a suspension of commitments or payments.

The European Parliament may invite the Commission for a structured dialogue on the application of this Article, having regard in particular to the transmission of the information referred to in the first sub-paragraph.

The Commission shall transmit the proposal for suspension of commitments or payments or the proposal to lift such a suspension to the European Parliament and the Council immediately after its adoption. The European Parliament may invite the Commission to explain the reasons for its proposal.

16. In 2017, the Commission shall carry out a review of the application of this Article. To this end, the Commission shall prepare a report which it shall transmit to the European Parliament and the Council, accompanied where necessary by a legislative proposal.

17. Where there are major changes in the social and economic situation in the Union, the Commission may submit a proposal to review the application of this Article, or the European Parliament or the Council, acting in accordance with Articles 225 or 241 TFEU respectively, may request the Commission to submit such a proposal.

Article 24

Increase in payments for Member State with temporary budgetary difficulties

1. On the request of a Member State, interim payments may be increased by 10 percentage points above the co-financing rate applicable to each priority for the ERDF, ESF and the Cohesion Fund or to each measure for the EAFRD and the EMFF. If a Member State meets one of the following conditions after 21 December 2013, the increased rate, which may not exceed 100 %, shall apply to its requests for payments for the period until 30 June 2016:

- (a) where the Member State concerned receives a loan from the Union under Council Regulation (EU) No 407/2010;
- (b) where the Member State concerned receives medium-term financial assistance in accordance with Regulation (EC) No 332/2002 conditional on the implementation of a macro-economic adjustment programme;
- (c) where financial assistance is made available to the Member State concerned conditional on the implementation of a macroeconomic adjustment programme as specified in Regulation (EU) No 472/2013.

This paragraph shall not apply to programmes under the ETC Regulation.

2. Notwithstanding paragraph 1, Union support through interim payments and payments of the final balance shall not be higher than the public support or the maximum amount of support from the ESI Funds for each priority for the ERDF, ESF and the Cohesion Fund, or for each measure for the EAFRD and the EMFF, as laid down in the decision of the Commission approving the programme.

3. The Commission shall examine the application of paragraphs 1 and 2 and shall submit to the European Parliament and the Council a report with its assessment and, if necessary, a legislative proposal before 30 June 2016.

*Article 25***Management of technical assistance for Member States with temporary budgetary difficulties**

1. On the request of a Member State with temporary budgetary difficulties which meets the conditions set out in Article 24(1), a part of the resources provided for under Article 59 and programmed in accordance with Fund-specific rules may, in agreement with the Commission, be transferred to technical assistance at the initiative of the Commission for implementation of measures in relation to the Member State concerned in accordance with point (k) of the third subparagraph of Article 58(1) through direct or indirect management.

2. The resources referred to in paragraph 1 shall be additional to the amounts established in accordance with the ceilings set out in the Fund-specific rules for technical assistance at the initiative of the Commission. Where a ceiling on technical assistance at the initiative of the Member State is set out in the Fund-specific rules, the amount to be transferred shall be included for the purposes of the calculation of compliance with that ceiling.

3. A Member State shall request the transfer referred to in paragraph 2 for a calendar year in which it meets the conditions set out in Article 24(1) by 31 January of the year in which a transfer is to be made. The request shall be accompanied by a proposal to amend the programme or programmes from which the transfer will be made. Corresponding amendments shall be made to the Partnership Agreement in accordance with Article 30 (2) which shall set out the total amount transferred each year to the Commission.

Where a Member States meets the conditions set out in Article 24(1) on 1 January 2014, it may transmit the request for that year at the same time as the submission of its Partnership Agreement, which shall set out the amount to be transferred to technical assistance at the initiative of the Commission.

TITLE III

PROGRAMMING

CHAPTER I

General provisions on the ESI Funds*Article 26***Preparation of programmes**

1. The ESI Funds shall be implemented through programmes in accordance with the Partnership Agreement. Each programme shall cover the period from 1 January 2014 to 31 December 2020.

2. Programmes shall be drawn up by Member States or any authority designated by them, in cooperation with the partners referred to in Article 5. Member States shall draw up the programmes based on procedures that are transparent for the public, in accordance with their institutional and legal framework.

3. The Member States and the Commission shall cooperate to ensure effective coordination in the preparation and implementation of programmes for the ESI Funds, including, where appropriate, multi-fund programmes for the Funds, taking account of the proportionality principle.

4. Programmes shall be submitted by the Member States to the Commission within three months of the submission of the Partnership Agreement. European territorial cooperation programmes shall be submitted by 22 September 2014. All programmes shall be accompanied by the ex ante evaluation as set out in Article 55.

5. Where one or more of the Fund-specific Regulations for the ESI Funds enters into force between 22 February 2014 and 22 June 2014, the programme or programmes supported by the ESI Fund affected by the delay in the entry into force of the Fund-specific Regulation shall be submitted within three months of the submission of the revised Partnership Agreement referred to in Article 17(1).

6. Where one or more of the Fund-specific Regulations for the ESI Funds enters into force later than on 22 June 2014, the programme or programmes supported by the ESI Fund affected by the delay in the entry into force of the Fund-specific Regulation shall be submitted within three months of the date of entry into force of the Fund-specific Regulation that was subject to the delay.

*Article 27***Content of programmes**

1. Each programme shall set out a strategy for the programme's contribution to the Union strategy for smart, sustainable and inclusive growth consistent with this Regulation, the Fund-specific rules, and with the content of the Partnership Agreement.

Each programme shall include arrangements to ensure effective, efficient and coordinated implementation of the ESI Funds and actions to achieve a reduction of the administrative burden on beneficiaries.

2. Each programme shall define priorities setting out specific objectives, financial appropriations of support from the ESI Funds and corresponding national co-financing, including amounts related to the performance reserve, which may be public or private in accordance with the Fund-specific rules.

3. Where Member States and regions participate in macro-regional strategies or sea basin strategies, the relevant programme, in accordance with the needs of the programme area as identified by the Member State, shall set out the contribution of the planned interventions to those strategies.

4. Each priority shall set out indicators and corresponding targets expressed in qualitative or quantitative terms, in accordance with the Fund-specific rules, in order to assess

progress in programme implementation aimed at achievement of objectives as the basis for monitoring, evaluation and review of performance. Those indicators shall include:

- (a) financial indicators relating to expenditure allocated;
- (b) output indicators relating to the operations supported;
- (c) result indicators relating to the priority concerned.

For each ESI Fund, the Fund-specific rules shall set out common indicators and may set out provisions related to programme-specific indicators.

5. Each programme, except those which cover exclusively technical assistance, shall include a description, in accordance with the Fund-specific rules, of the actions to take into account the principles set out in Articles 5, 7 and 8.

6. Each programme, except those where technical assistance is undertaken under a specific programme, shall set out the indicative amount of support to be used for climate change objectives, based on the methodology referred to in Article 8.

7. Member States shall draft the programme in accordance with the Fund-specific rules.

Article 28

Specific provisions on the content of programmes dedicated to joint instruments for uncapped guarantees and securitisation providing capital relief implemented by the EIB

1. By way of derogation from Article 27, the dedicated programmes referred to in point (b) of the first subparagraph of Article 39(4) shall include:

- (a) the elements set out under the first subparagraph of Article 27(1), and under paragraphs 2, 3 and 4 of that Article as regards the principles set out under Article 5;
- (b) an identification of the bodies referred to under Articles 125, 126 and 127 of this Regulation and Article 65(2) of the EAFRD Regulation as relevant for the Fund concerned;
- (c) for each ex ante conditionality, established in accordance with Article 19 and Annex XI, which is applicable to the programme, an assessment of whether the ex ante conditionality is fulfilled at the date of submission of the Partnership Agreement and programme, and where ex ante

conditionalities are not fulfilled, a description of the actions to fulfil the ex ante conditionality, the bodies responsible and a timetable for such actions in accordance with the summary submitted in the Partnership Agreement.

2. By way of derogation from Article 55, the ex ante assessment referred to in point (a) of the first subparagraph of Article 39(4) shall be considered as the ex ante evaluation of such programmes.

3. For the purposes of programmes referred to in point (b) of the first subparagraph of Article 39(4) of this Regulation, Article 6(2) and Article 59(5) and (6) of the EAFRD Regulation shall not apply. In addition to the elements referred to in paragraph 1 of this Article, only the provisions set out in points (c)(i), (f), (h), (i) and (m)(i) to (iii) of Article 8(1) of the EAFRD Regulation shall apply for programmes under the EAFRD.

Article 29

Procedure for the adoption of programmes

1. The Commission shall assess the consistency of programmes with this Regulation and with the Fund-specific rules, their effective contribution to the selected thematic objectives and to the Union priorities specific to each ESI Fund, and also the consistency with the Partnership Agreement, taking account of the relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU and relevant Council recommendations adopted in accordance with Article 148(4) TFEU as well as of the ex ante evaluation. The assessment shall address, in particular, the adequacy of the programme strategy, the corresponding objectives, indicators, targets and the allocation of budgetary resources.

2. By way of derogation from paragraph 1, the Commission shall not need to assess the consistency of the dedicated operational programmes for the YEI referred to in point (a) of the second paragraph of Article 18 of the ESF Regulation and dedicated programmes referred to in point (b) of the first subparagraph of Article 39(4) of this Regulation with the Partnership Agreement in the absence of the submission by the Member State of its Partnership Agreement at the date of submission of such dedicated programmes.

3. The Commission shall make observations within three months of the date of submission of the programme. The Member State shall provide to the Commission all necessary additional information and, where appropriate, revise the proposed programme.

4. In accordance with the Fund-specific rules, the Commission shall approve each programme no later than six months following its submission by the Member State concerned, provided that any observations made by the Commission have been adequately taken into account, but not before 1 January 2014 or before adoption by the Commission of a decision approving the Partnership Agreement.

By way of derogation from the requirement referred to in the first subparagraph, programmes under the European territorial cooperation goal may be approved by the Commission before the adoption of the decision approving the Partnership Agreement and dedicated operational programmes for the YEI referred to in point (a) of the second paragraph of Article 18 of the ESF Regulation and dedicated programmes referred to in point (b) of the first subparagraph of Article 39(4) of this Regulation may be approved by the Commission before the submission of the Partnership Agreement.

Article 30

Amendment of programmes

1. Requests for amendment of programmes submitted by a Member State shall be duly justified and shall in particular set out the expected impact of the changes to the programme on achieving the Union strategy for smart, sustainable and inclusive growth and the specific objectives defined in the programme, taking account of this Regulation and the Fund-specific rules, the horizontal principles referred to in Articles 5, 7 and 8, as well as of the Partnership Agreement. They shall be accompanied by the revised programme.

2. The Commission shall assess the information provided in accordance with paragraph 1, taking account of the justification provided by the Member State. The Commission may make observations within one month of the submission of the revised programme and the Member State shall provide to the Commission all necessary additional information. In accordance with the Fund-specific rules, the Commission shall approve requests for amendment of a programme as soon as possible but no later than three months after their submission by the Member State provided that any observations made by the Commission have been adequately taken into account.

Where the amendment of a programme affects the information provided in the Partnership Agreement in accordance with points (a)(iii), (iv) and (vi) of Article 15(1)), the approval of the amendment of the programme by the Commission shall at the same time constitute an approval for the consequential revision of the information in the Partnership Agreement.

3. By way of derogation from paragraph 2, where the request for amendment is submitted to the Commission in order to reallocate the performance reserve following the performance review, the Commission shall make observations only where it considers that the allocation proposed is not in compliance with applicable rules, is not consistent with the development needs of the Member State or the region, or entails a significant risk that the objectives and targets included in the proposal cannot be achieved. The Commission shall approve the request for amendment of a programme as soon as possible and no later than two months after the submission of the request by the Member State provided that any observations made by the Commission have been adequately taken into account. The approval of the amendment of the programme by the Commission shall at the same time constitute an approval for the consequential revision of the information in the Partnership Agreement.

4. By way of derogation from paragraph 2, specific procedures for the amendment of operational programmes may be established in the EMFF Regulation.

Article 31

Participation of the EIB

1. The EIB may, at the request of Member States, participate in the preparation of the Partnership Agreement, as well as in activities relating to the preparation of operations, in particular major projects, financial instruments and PPPs.

2. The Commission may consult the EIB before the adoption of the Partnership Agreement or the programmes.

3. The Commission may request the EIB to examine the technical quality, economic and financial sustainability, and the viability of major projects and to assist it as regards the financial instruments to be implemented or developed.

4. The Commission, in implementing the provisions of this Regulation, may award grants or service contracts to the EIB covering initiatives implemented on a multi-annual basis. The commitment of the contributions of the budget of the Union in respect of such grants or service contracts shall be effected annually.

CHAPTER II

Community-led local development

Article 32

Community-led local development

1. Community-led local development shall be supported by the EAFRD, which shall be designated as LEADER local development and may be supported by the ERDF, ESF or EMFF. For the purposes of this Chapter, those Funds are hereinafter referred to as the "ESI Funds concerned".

2. Community-led local development shall be:

- (a) focused on specific subregional areas;
- (b) led by local action groups composed of representatives of public and private local socio-economic interests, in which, at the decision-making level neither public authorities, as defined in accordance with national rules, nor any single interest group represents more than 49 % of the voting rights;
- (c) carried out through integrated and multi-sectoral area-based local development strategies;
- (d) designed taking into consideration local needs and potential, and shall include innovative features in the local context, networking and, where appropriate, cooperation.

3. Support from the ESI Funds concerned to community-led local development shall be consistent and coordinated between the ESI Funds concerned. This shall be ensured inter alia through coordinated capacity-building, selection, approval and funding of community-led local development strategies and local action groups.

4. Where the selection committee for the community-led local development strategies set up under Article 33(3) determines that the implementation of the community-led local development strategy selected requires support from more than one Fund, it may designate in accordance with national rules and procedures, a lead Fund to support all running and animation costs under points (d) and (e) of Article 35(1) for the community-led local development strategy.

5. Community-led local development supported by the ESI Funds concerned shall be carried out under one or more priorities of the relevant programme or programmes in accordance with Fund-specific rules of the ESI Funds concerned.

Article 33

Community-led local development strategies

1. A community-led local development strategy shall contain at least the following elements:

- (a) the definition of the area and population covered by the strategy;
- (b) an analysis of the development needs and potential of the area, including an analysis of strengths, weaknesses, opportunities and threats;
- (c) a description of the strategy and its objectives, a description of the integrated and innovative features of the strategy and a hierarchy of objectives, including measurable targets for outputs or results. In relation to results, targets may be expressed in quantitative or qualitative terms. The strategy shall be consistent with the relevant programmes of all the ESI Funds concerned that are involved;
- (d) a description of the community involvement process in the development of the strategy;
- (e) an action plan demonstrating how objectives are translated into actions;
- (f) a description of the management and monitoring arrangements of the strategy, demonstrating the capacity of the local action group to implement the strategy and a description of specific arrangements for evaluation;
- (g) the financial plan for the strategy, including the planned allocation from each of the ESI Funds concerned.

2. Member States shall define criteria for the selection of community-led local development strategies.

3. Community-led local development strategies shall be selected by a committee set up for that purpose by the

managing authority or authorities responsible and approved by the managing authority or authorities responsible.

4. The first round of selection of community-led local development strategies shall be completed within two years of the date of the approval of the Partnership Agreement. Member States may select additional community-led local development strategies after that date but no later than 31 December 2017.

5. The decision approving a community-led local development strategy shall set out the allocations of each of the ESI Funds concerned. The decision shall also set out the responsibilities for the management and control tasks under the programme or programmes in relation to the community-led local development strategy.

6. The population of the area referred to in point (a) of paragraph 1 shall be not less than 10 000 and not more than 150 000 inhabitants. However, in duly justified cases and on the basis of a proposal by a Member State the Commission may adopt or amend those population limits in its decision under Article 15(2) or (3) to approve or amend respectively the Partnership Agreement in the case of that Member State, in order to take account of sparsely or densely populated areas or in order to ensure the territorial coherence of areas covered by the community-led local development strategies.

Article 34

Local action groups

1. Local action groups shall design and implement the community-led local development strategies.

Member States shall define the respective roles of the local action group and the authorities responsible for the implementation of the relevant programmes, concerning all implementation tasks relating to the community-led local development strategy.

2. The managing authority or authorities responsible shall ensure that the local action groups either select one partner within the group as a lead partner in administrative and financial matters, or come together in a legally constituted common structure.

3. The tasks of local action groups shall include the following:

- (a) building the capacity of local actors to develop and implement operations including fostering their project management capabilities;
- (b) drawing up a non-discriminatory and transparent selection procedure and objective criteria for the selection of operations, which avoid conflicts of interest, ensure that at least 50 % of the votes in selection decisions are cast by partners which are not public authorities, and allow selection by written procedure;

- (c) ensuring coherence with the community-led local development strategy when selecting operations, by prioritising those operations according to their contribution to meeting that strategy's objectives and targets;
- (d) preparing and publishing calls for proposals or an ongoing project submission procedure, including defining selection criteria;
- (e) receiving and assessing applications for support;
- (f) selecting operations and fixing the amount of support and, where relevant, presenting the proposals to the body responsible for final verification of eligibility before approval;
- (g) monitoring the implementation of the community-led local development strategy and the operations supported and carrying out specific evaluation activities linked to that strategy.

4. Without prejudice to point (b) of paragraph 3, the local action group may be a beneficiary and implement operations in accordance with the community-led local development strategy.

5. In the case of cooperation activities of local action groups as referred to in point (c) of Article 35(1), the tasks set out in point (f) of paragraph 3 of this Article may be carried out by the managing authority responsible.

Article 35

Support from the ESI Funds for community-led local development

1. Support from the ESI Funds concerned for community-led local development shall cover:

- (a) the costs of preparatory support consisting of capacity-building, training and networking with a view to preparing and implementing a community-led local development strategy.

Such costs may include one or more of the following elements:

- (i) training actions for local stakeholders;
- (ii) studies of the area concerned;
- (iii) costs related to the design of the community-led local development strategy, including consultancy costs and costs for actions related to consultations of stakeholders for the purposes of preparing the strategy;

- (iv) administrative costs (operating and personnel costs) of an organisation that applies for preparatory support during the preparation phase;

- (v) support for small pilot projects.

Such preparatory support shall be eligible regardless of whether the community-led local development strategy designed by the local action group benefitting from the support is selected for funding by the selection committee set up under Article 33(3).

- (b) implementation of operations under the community-led local development strategy;
- (c) preparation and implementation of the local action group's cooperation activities;
- (d) running costs linked to the management of the implementation of the community-led local development strategy consisting of operating costs, personnel costs, training cost, costs linked to public relations, financial costs as well as the costs linked to monitoring and evaluation of that strategy as referred to in point (g) of Article 34(3);
- (e) animation of the community-led local development strategy in order to facilitate exchange between stakeholders to provide information and to promote the strategy and to support potential beneficiaries with a view to developing operations and preparing applications.

2. Support for running costs and animation as referred to in points (d) and (e) of paragraph 1 shall not exceed 25 % of the total public expenditure incurred within the community-led local development strategy.

CHAPTER III

Territorial development

Article 36

Integrated territorial investment

1. Where an urban development strategy or other territorial strategy, or a territorial pact referred to in Article 12(1) of the ESF Regulation, requires an integrated approach involving investments from the ESF, ERDF or Cohesion Fund under more than one priority axis of one or more operational programmes, actions may be carried out as an integrated territorial investment (an 'ITI').

Actions carried out as an ITI may be complemented with financial support from the EAFRD or the EMFF.

2. Where an ITI is supported by ESF, ERDF or Cohesion Fund, the relevant operational programme or programmes shall describe the approach to the use of the ITI instrument and the indicative financial allocation from each priority axis in accordance with the Fund-specific rules.

Where an ITI is complemented with financial support from the EAFRD or the EMFF, the indicative financial allocation and the measures covered shall be set out in the relevant programme or programmes in accordance with the Fund-specific rules.

3. The Member State or the managing authority may designate one or more intermediate bodies, including local authorities, regional development bodies or non-governmental organisations, to carry out the management and implementation of an ITI in accordance with the Fund-specific rules.

4. The Member State or the relevant managing authorities shall ensure that the monitoring system for the programme or programmes provides for the identification of operations and outputs of a priority contributing to an ITI.

TITLE IV

FINANCIAL INSTRUMENTS

Article 37

Financial instruments

1. The ESI Funds may be used to support financial instruments under one or more programmes, including when organised through funds of funds, in order to contribute to the achievement of specific objectives set out under a priority.

Financial instruments shall be implemented to support investments which are expected to be financially viable and do not give rise to sufficient funding from market sources. When applying this Title, the managing authorities, the bodies implementing funds of funds, and the bodies implementing financial instruments shall comply with applicable law, in particular on State aid and public procurement.

2. Support of financial instruments shall be based on an ex ante assessment which has established evidence of market failures or suboptimal investment situations, and the estimated level and scope of public investment needs, including types of financial instruments to be supported. Such ex ante assessment shall include:

- (a) an analysis of market failures, suboptimal investment situations, and investment needs for policy areas and thematic objectives or investment priorities to be addressed with a view to contributing to the achievement of specific objectives set out under a priority and to be supported through financial instruments. That analysis shall be based on available good practices methodology;
- (b) an assessment of the added value of the financial instruments that are being considered for support from the ESI Funds, consistency with other forms of public intervention addressing the same market, possible State aid implications, the proportionality of the envisaged intervention and measures to minimise market distortion;

- (c) an estimate of additional public and private resources to be potentially raised by the financial instrument down to the level of the final recipient (expected leverage effect), including as appropriate an assessment of the need for, and level of, preferential remuneration to attract counterpart resources from private investors and/or a description of the mechanisms which will be used to establish the need for, and extent of, such preferential remuneration, such as a competitive or appropriately independent assessment process;

- (d) an assessment of lessons learnt from similar instruments and ex ante assessments carried out by the Member State in the past, and how such lessons will be applied in the future;

- (e) the proposed investment strategy, including an examination of options for implementation arrangements within the meaning of Article 38, financial products to be offered, final recipients targeted and envisaged combination with grant support as appropriate;

- (f) a specification of the expected results and how the financial instrument concerned is expected to contribute to the achievement of the specific objectives set out under the relevant priority including indicators for that contribution;

- (g) provisions allowing for the ex ante assessment to be reviewed and updated as required during the implementation of any financial instrument which has been implemented based upon such assessment, where during the implementation phase, the managing authority considers that the ex ante assessment may no longer accurately represent the market conditions existing at the time of implementation.

3. The ex ante assessment referred to in paragraph 2 may be performed in stages. It shall, in any event, be completed before the managing authority decides to make programme contributions to a financial instrument.

The summary findings and conclusions of ex ante assessments in relation to financial instruments shall be published within three months of their date of finalisation.

The ex ante assessment shall be submitted to the monitoring committee for information purposes in accordance with the Fund-specific rules.

4. Where financial instruments support financing to enterprises, including SMEs, such support shall target the establishment of new enterprises, early stage-capital, i.e. seed capital and start-up capital, expansion capital, capital for the strengthening of the general activities of an enterprise, or the

realisation of new projects, penetration of new markets or new developments by existing enterprises, without prejudice to applicable Union State aid rules, and in accordance with the Fund-specific rules. Such support may include investment in both tangible and intangible assets as well as working capital within the limits of applicable Union State aid rules and with a view to stimulating the private sector as a supplier of funding to enterprises. It may also include the costs of transfer of proprietary rights in enterprises provided that such transfers take place between independent investors.

5. Investments that are to be supported through financial instruments shall not be physically completed or fully implemented at the date of the investment decision.

6. Where financial instruments provide support to final recipients in respect of infrastructure investments with the objective of supporting urban development or urban regeneration or similar infrastructure investments with the objectives of diversifying non-agricultural activities in rural areas, such support may include the amount necessary for the reorganisation of a debt portfolio regarding infrastructure forming part of the new investment, up to a maximum of 20 % of the total amount of programme support from the financial instrument to the investment.

7. Financial instruments may be combined with grants, interest rate subsidies and guarantee fee subsidies. Where support from ESI Funds is provided by means of financial instruments and combined in a single operation, with other forms of support directly related to financial instruments targeting the same final recipients, including technical support, interest rate subsidies and guarantee fee subsidies, the provisions applicable to financial instruments shall apply to all forms of support within that operation. In such cases, applicable Union State aid rules shall be respected and separate records shall be maintained for each form of support.

8. Final recipients supported by an ESI Fund financial instrument may also receive assistance from another ESI Funds priority or programme or from another instrument supported by the budget of the Union in accordance with applicable Union State aid rules. In that case, separate records shall be maintained for each source of assistance and the ESI Funds financial instrument support shall be part of an operation with eligible expenditure distinct from the other sources of assistance.

9. The combination of support provided through grants and financial instruments as referred to in paragraphs 7 and 8 may, subject to applicable Union State aid rules, cover the same expenditure item provided that the sum of all forms of support combined does not exceed the total amount of the expenditure item concerned. Grants shall not be used to reimburse support received from financial instruments. Financial instruments shall not be used to pre-finance grants.

10. Contributions in kind shall not constitute eligible expenditure in respect of financial instruments, except for contributions of land or real estate in respect of investments with the objective of supporting rural development, urban development or urban regeneration, where the land or real estate forms part of the investment. Such contributions of land or real estate shall be eligible provided that the conditions laid down in Article 69(1) are met.

11. VAT shall not constitute eligible expenditure of an operation, except in the case of VAT which is non-recoverable under national VAT legislation. The treatment of VAT at the level of investments made by final recipients shall not be taken into account for the purposes of determining the eligibility of expenditure under the financial instrument. However, where financial instruments are combined with grants under paragraphs 7 and 8 of this Article, the provisions of Article 69(3) shall apply to the grant.

12. For the purposes of the application of this Article, the applicable Union State aid rules shall be those in force at the time when the managing authority or the body that implements the fund of funds contractually commits programme contributions to a financial instrument, or when the financial instrument contractually commits programme contributions to final recipients, as applicable.

13. The Commission shall be empowered to adopt delegated acts in accordance with Article 149 laying down additional specific rules on the purchase of land and on combining technical support with financial instruments.

Article 38

Implementation of financial instruments

1. In implementing Article 37, managing authorities may provide a financial contribution to the following financial instruments:

- (a) financial instruments set up at Union level, managed directly or indirectly by the Commission;
- (b) financial instruments set up at national, regional, transnational or cross-border level, managed by or under the responsibility of the managing authority.

2. Contributions from the ESI Funds to financial instruments under point (a) of paragraph 1 shall be placed in separate accounts and used, in accordance with the objectives of the respective ESI Funds, to support actions and final recipients consistent with the programme or programmes from which such contributions are made.

Contributions to the financial instruments referred to in the first subparagraph shall be subject to this Regulation unless exceptions are expressly provided for.

The second subparagraph is without prejudice to the rules governing the set up and functioning of the financial instruments under the Financial Regulation, unless those rules conflict with the rules of this Regulation, in which case this Regulation prevails.

3. For financial instruments under point (b) of paragraph 1, the managing authority may provide a financial contribution to the following financial instruments:

- (a) financial instruments complying with the standard terms and conditions laid down by the Commission, in accordance with the second subparagraph of this paragraph;
- (b) already existing or newly created financial instruments which are specifically designed to achieve the specific objectives set out under the relevant priority.

The Commission shall adopt implementing acts concerning the standard terms and conditions with which the financial instruments under point (a) of the first subparagraph shall comply. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

4. When supporting financial instruments referred to in point (b) of paragraph 1 the managing authority may:

- (a) invest in the capital of existing or newly created legal entities, including those financed from other ESI Funds, dedicated to implementing financial instruments consistent with the objectives of the respective ESI Funds, which will undertake implementation tasks; the support to such entities shall be limited to the amounts necessary to implement new investments in accordance with Article 37 and in a manner that is consistent with the objectives of this Regulation;
- (b) entrust implementation tasks to:
 - (i) the EIB;
 - (ii) international financial institutions in which a Member State is a shareholder, or financial institutions established in a Member State aiming at the achievement of public interest under the control of a public authority;
 - (iii) a body governed by public or private law; or
- (c) undertake implementation tasks directly, in the case of financial instruments consisting solely of loans or

guarantees. In that case the managing authority shall be considered to be the beneficiary as defined in point (10) of Article 2.

When implementing the financial instrument, the bodies referred to in points (a),(b) and (c) of the first subparagraph shall ensure compliance with applicable law, including rules covering the ESI Funds, State aid, public procurement and relevant standards and applicable legislation on the prevention of money laundering, the fight against terrorism and tax fraud. Those bodies shall not be established and shall not maintain business relations with entities incorporated in territories, whose jurisdictions do not cooperate with the Union in relation to the application of the internationally agreed tax standards and shall transpose such requirements in their contracts with the selected financial intermediaries.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 laying down additional specific rules on the role, liabilities and responsibility of bodies implementing financial instruments, related selection criteria and products that may be delivered through financial instruments in accordance with Article 37. The Commission shall notify those delegated acts simultaneously to the European Parliament and the Council by 22 april 2014.

5. The bodies referred to in points (a) and (b) of the first subparagraph of paragraph 4, when implementing funds of funds may further entrust part of the implementation to financial intermediaries provided that such entities ensure under their responsibility that the financial intermediaries satisfy the criteria laid down in Article 140(1),(2) and (4) of the Financial Regulation. Financial intermediaries shall be selected on the basis of open, transparent, proportionate and non-discriminatory procedures, avoiding conflicts of interest.

6. The bodies referred to in point (b) of the first subparagraph of paragraph 4 to which implementation tasks have been entrusted shall open fiduciary accounts in their name and on behalf of the managing authority, or set up the financial instrument as a separate block of finance within the financial institution. In the case of a separate block of finance, an accounting distinction shall be made between programme resources invested in the financial instrument and the other resources available in the financial institution. The assets held on fiduciary accounts and such separate blocks of finance shall be managed in accordance with the principle of sound financial management following appropriate prudential rules and shall have appropriate liquidity.

7. Where a financial instrument is implemented under points (a) and (b) of the first subparagraph of paragraph 4, subject to the implementation structure of the financial instrument, the terms and conditions for contributions from programmes to financial instruments shall be set out in funding agreements in accordance with Annex III at the following levels:

- (a) where applicable, between the duly mandated representatives of the managing authority and the body that implements the fund of funds; and

(b) between the duly mandated representatives of the managing authority, or where applicable, the body that implements the fund of funds, and the body that implements the financial instrument.

8. For financial instruments implemented under point (c) of the first subparagraph of paragraph 4, the terms and conditions for contributions from programmes to financial instruments shall be set out in a strategy document in accordance with Annex IV to be examined by the monitoring committee.

9. National public and private contributions, including where relevant contributions in kind as referred to in Article 37(10), may be provided at the level of the fund of funds, at the level of the financial instrument or at the level of final recipients, in accordance with the Fund-specific rules.

10. The Commission shall adopt implementing acts laying down uniform conditions regarding the detailed arrangements for the transfer and management of programme contributions managed by the bodies referred to in the first subparagraph of paragraph 4. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

Article 39

Contribution of ERDF and EAFRD to joint uncapped guarantee and securitisation financial instruments in favour of SMEs, implemented by the EIB

1. For the purposes of this Article, 'debt finance' means loans, leasing or guarantees.

2. Member States may use the ERDF and EAFRD to provide a financial contribution to financial instruments referred to in point (a) of Article 38(1) of this Regulation, managed indirectly by the Commission with implementation tasks entrusted to the EIB pursuant to point (c)(iii) of Article 58(1) and Article 139(4) of the Financial Regulation, in respect of the following activities:

(a) uncapped guarantees providing capital relief to financial intermediaries for new portfolios of debt finance to eligible SMEs in accordance with Article 37(4) of this Regulation;

(b) securitisation, as defined in point (61) of Article 4 (1) of Regulation (EU) 575/2013 of the European Parliament and of the Council⁽¹⁾, of any of the following:

(i) existing portfolios of debt finance to SMEs and other enterprises with less than 500 employees;

(ii) new portfolios of debt finance to SMEs.

The financial contribution referred to in points (a) and (b) of the first subparagraph of this paragraph shall contribute to junior and/or mezzanine tranches of portfolios mentioned therein provided that the relevant financial intermediary retains a sufficient part of the risk of the portfolios at least equal to the risk retention requirement set out in Directive 2013/36/EU of the European Parliament and of the Council⁽²⁾ and in Regulation (EU) No 575/2013 to ensure adequate alignment of interest. In the case of securitisation under point (b) of the first subparagraph of this paragraph, the financial intermediary is obliged to originate new debt finance to eligible SMEs in accordance with Article 37(4) of this Regulation.

Each Member State intending to participate in such financial instruments shall contribute an amount which is in line with SMEs' debt financing needs in that Member State and the estimated demand for such SME debt finance, taking into account the ex ante assessment referred to in point (a) of the first subparagraph of paragraph 4 and in any case which is not higher than 7 % of the allocation from the ERDF and EAFRD to the Member State. The aggregate ERDF and EAFRD contribution by all participating Member States shall be subject to a global ceiling of EUR 8 500 000 000 (in 2011 prices).

Where it is considered by the Commission in consultation with the EIB that the aggregate minimum contribution to the instrument representing the sum of the contributions of all participating Member States is insufficient taking due account of the minimum critical mass defined in the ex ante assessment referred to in point (a) of the first subparagraph of paragraph 4, implementation of the financial instrument shall be discontinued and the contributions returned to the Member States.

Where the Member State and the EIB are not able to agree the conditions of the funding agreement referred to in point (c) of the first subparagraph of paragraph 4 the Member State shall submit a request for amendment of the programme referred to in point (b) of the first subparagraph of paragraph 4 and reallocate the contribution to other programmes and priorities in accordance with requirements for thematic concentration.

Where the conditions for the termination of the Member State's contribution to the instrument established in the funding agreement between the Member State concerned and the EIB referred to in point (c) of the first subparagraph of paragraph 4 have been satisfied, the Member State shall submit a request for amendment of the programme referred to in point (b) of the

⁽¹⁾ Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012 (OJ L 176, 27.6.2013, p. 1).

⁽²⁾ Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC (OJ L 176, 27.6.2013, p. 338).

first subparagraph of paragraph 4 and reallocate the remaining contribution to other programmes and priorities in accordance with requirements for thematic concentration.

Where the participation of a Member State is discontinued, that Member State shall submit a request for amendment of the programme. Where unused appropriations are decommitted, the decommitted appropriations shall be made available again to the Member State concerned, in order to be re-programmed for other programmes and priorities in accordance with the requirements for thematic concentration.

3. The SMEs which receive new debt finance, as a result of the new portfolio built up by the financial intermediary in the context of the financial instrument referred to in paragraph 2 shall be considered the final recipients of the contribution of the ERDF and EAFRD to the financial instrument concerned.

4. The financial contribution referred to in paragraph 2 shall comply with the following conditions:

(a) by way of derogation from Article 37(2), it shall be based on one ex ante assessment at Union level carried out by the EIB and the Commission.

On the basis of available data sources on bank debt finance and SMEs, the ex ante assessment shall cover, inter alia, an analysis of the SME financing needs at Union level, SME financing conditions and needs as well as an indication of the SME financing gap in each Member State, a profile of the economic and financial situation of the SME sector at Member State level, minimum critical mass of aggregate contributions, a range of estimated total loan volume generated by such contributions, and the added value;

(b) it shall be provided by each participating Member State as part of a single dedicated national programme per financial contribution by ERDF and EAFRD supporting the thematic objective set out in point (3) of the first paragraph of Article 9;

(c) it shall be subject to the conditions set out in a funding agreement concluded between each participating Member State and the EIB including, inter alia:

(i) tasks and obligations of the EIB including remuneration;

(ii) minimum leverage to be achieved at clearly defined milestones within the eligibility period indicated in Article 65(2);

(iii) conditions for the new debt finance;

(iv) provisions relating to non-eligible activities and exclusion criteria;

(v) schedule of payments;

(vi) penalties in the event of non-performance by financial intermediaries;

(vii) selection of financial intermediaries;

(viii) monitoring, reporting and auditing;

(ix) visibility;

(x) the conditions for termination of the agreement.

For the purposes of implementation of the instrument, the EIB will enter into contractual arrangements with selected financial intermediaries;

(d) in the event that the funding agreement referred to in point (c) is not concluded within six months of the adoption of the programme referred to in point (b), the Member State shall have the right to reallocate such contribution to other programmes and priorities in accordance with requirements for thematic concentration.

The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt an implementing act laying down the model of the funding agreement referred to in point (c) of the first subparagraph. That implementing act shall be adopted in accordance with the examination procedure referred to in Article 150(3).

5. A minimum leverage shall be achieved in each participating Member State at the milestones set out in the funding agreement referred to in point (c) of the first subparagraph of paragraph 4, calculated as the ratio between the new debt finance to eligible SMEs to be originated by the financial intermediaries and the corresponding contribution of the ERDF and EAFRD from the relevant Member State to the financial instruments. Such minimum leverage may vary between participating Member States.

In the event that the financial intermediary does not achieve the minimum leverage set out in the funding agreement referred to in point (c) of the first subparagraph of paragraph 4 it shall be contractually bound to pay penalties for the benefit of the participating Member State, in accordance with the terms and conditions set out in the funding agreement.

Neither the guarantees issued nor the relevant securitisation transactions shall be affected by a failure by the financial intermediary to reach the minimum leverage set out in the funding agreement.

6. By way of derogation from the first subparagraph of Article 38(2), financial contributions referred to in paragraph 2 of this Article may be placed in separate accounts per Member State or, if two or more participating Member States give their consent, in a single account covering all such Member States and used in accordance with the specific objectives of the programmes from which the contributions are made.

7. By way of derogation from Article 41(1) and (2) as regards the financial contributions referred to in paragraph 2 of this Article, the Member State's request for payment to the Commission shall be made on the basis of 100 % of the amounts to be paid by the Member State to the EIB in accordance with the schedule defined in the funding agreement referred to in point (c) of the first subparagraph of paragraph 4 of this Article. Such requests for payment shall be based on the amounts requested by the EIB deemed necessary to cover commitments for guarantee contracts or securitisation transactions to be finalised within the three following months. Payments from Member States to the EIB shall be made without delay and in any case before commitments are entered into by the EIB.

8. At closure of the programme, the eligible expenditure shall be the total amount of programme contributions paid to the financial instrument, corresponding:

(a) for the activities referred to in point (a) of the first subparagraph of paragraph 2 of this Article, to the resources referred to in point (b) of the first subparagraph of Article 42(3);

(b) for the activities referred to in point (b) of the first subparagraph of paragraph 2 of this Article, to the aggregate amount of new debt finance resulting from the securitisation transactions, paid to or to the benefit of eligible SMEs within the eligibility period indicated in Article 65(2).

9. For the purpose of Articles 44 and 45, the uncalled guarantees and the amounts recovered in relation to, respectively, the uncapped guarantees and the securitisation transactions, shall be deemed to be resources paid back to the financial instruments. At the winding up of the financial instruments, the net liquidation proceeds, after deduction of costs, fees and payment of amounts due to creditors ranking senior to those contributed by the ERDF and EAFRD, shall be returned to the relevant Member States pro rata to their contributions to the financial instrument.

10. The report referred to in Article 46(1) shall include the following additional elements:

(a) the total amount of ERDF and EAFRD support paid to the financial instrument in relation to uncapped guarantees or securitisation transactions, by programme and priority or measure;

(b) progress in creating the new debt finance in accordance with Article 37(4), for eligible SMEs.

11. Notwithstanding Article 93(1), the resources allocated to instruments under paragraph 2 of this Article may be used for the purpose of giving rise to new SME debt finance in the entire territory of the Member State without regard to the categories

of region, unless otherwise provided for in the funding agreement referred to in point (c) of the first subparagraph of paragraph 4.

12. Article 70 shall not apply to programmes set up to implement financial instruments under this Article.

Article 40

Management and control of financial instruments

1. Bodies designated in accordance with Article 124 of this Regulation for ERDF, Cohesion Fund, ESF, EMFF and with Article 65 of the EAFRD Regulation for the EAFRD shall not carry out on-the spot verifications of operations comprising financial instruments implemented under point (a) of Article 38(1). Those designated bodies shall receive regular control reports from the bodies entrusted with the implementation of those financial instruments.

2. The bodies responsible for the audit of programmes shall not carry out audits of operations comprising financial instruments implemented under point (a) of Article 38(1) and of management and control systems relating to those financial instruments. They shall receive regular control reports from the auditors designated in the agreements setting up those financial instruments.

3. The bodies responsible for the audit of programmes may conduct audits at the level of final recipients only when one or more of the following situations occur:

(a) supporting documents, providing evidence of the support from the financial instrument to final recipients and of its use for the intended purposes in line with applicable law, are not available at the level of the managing authority or at the level of the bodies that implement financial instruments;

(b) there is evidence that the documents available at the level of the managing authority or at the level of the bodies that implement financial instruments do not represent a true and accurate record of the support provided.

4. The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, concerning the management and control of financial instruments referred to in point (b) of Article 38(1), including controls to be performed by managing and audit authorities, arrangements for keeping supporting documents, elements to be evidenced by supporting documents, and management and control and audit arrangements. The Commission shall notify those delegated acts simultaneously to the European Parliament and the Council by 22 April 2014.

5. The bodies implementing financial instruments shall be responsible for ensuring that supporting documents are available and shall not impose on final recipients record-keeping requirements that go beyond what is necessary to enable them to fulfil that responsibility.

*Article 41***Requests for payment including expenditure for financial instruments**

1. As regards financial instruments referred to in point (a) of Article 38(1) and financial instruments referred to in point (b) of Article 38(1) implemented in accordance with points (a) and (b) of Article 38(4), phased applications for interim payments shall be made for programme contributions paid to the financial instrument during the eligibility period laid down in Article 65(2) (the 'eligibility period') in accordance with the following conditions:

- (a) the amount of the programme contribution paid to the financial instrument included in each application for interim payment submitted during the eligibility period shall not exceed 25 % of the total amount of programme contributions committed to the financial instrument under the relevant funding agreement, corresponding to expenditure within the meaning of points (a), (b) and (d) of Article 42(1) expected to be paid during the eligibility period. Applications for interim payment submitted after the eligibility period shall include the total amount of eligible expenditure within the meaning of Article 42;
- (b) each application for interim payment referred to in point (a) of this paragraph may include up to 25 % of the total amount of the national co-financing as referred to in Article 38(9) expected to be paid to the financial instrument, or at the level of final recipients for expenditure in the meaning of points (a), (b) and (d) of Article 42(1), within the eligibility period;
- (c) subsequent applications for interim payment submitted during the eligibility period shall only be made:
 - (i) for the second application for interim payment, when at least 60 % of the amount included in the first application for interim payments has been spent as eligible expenditure within the meaning of points (a), (b) and (d) of Article 42(1);
 - (ii) for the third and subsequent applications for interim payment, when at least 85 % of the amounts included in the previous applications for interim payments have been spent as eligible expenditure within the meaning of points (a), (b) and (d) of Article 42(1);
- (d) each application for interim payment, which includes expenditure related to financial instruments, shall separately disclose the total amount of programme contributions paid to the financial instrument and the amounts paid as eligible expenditure within the meaning of points (a), (b) and (d) of Article 42(1).

At closure of a programme, the application for payment of the final balance shall include the total amount of eligible expenditure as referred to in Article 42.

2. As regards financial instruments referred to in point (b) of Article 38(1) implemented in accordance with point (c) of Article 38(4), the applications for interim payments and for payment of the final balance shall include the total amount of the payments effected by the managing authority for investments in final recipients as referred to in points (a) and (b) of Article 42(1).

3. The Commission shall be empowered to adopt delegated acts in accordance with Article 149, laying down the rules for withdrawal of payments to financial instruments and consequent adjustments in respect of applications for payments.

4. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts laying down the models to be used when submitting additional information concerning financial instruments with the applications for payments to the Commission. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

*Article 42***Eligible expenditure at closure**

1. At closure of a programme, the eligible expenditure of the financial instrument shall be the total amount of programme contributions effectively paid or, in the case of guarantees, committed by the financial instrument within the eligibility period, corresponding to:

- (a) payments to final recipients, and in the cases referred to in Article 37(7) payments to the benefit of final recipients;
- (b) resources committed for guarantee contracts, whether outstanding or already come to maturity, in order to honour possible guarantee calls for losses, calculated on the basis of a prudent ex ante risk assessment, covering a multiple amount of underlying new loans or other risk-bearing instruments for new investments in final recipients;
- (c) capitalised interest rate subsidies or guarantee fee subsidies, due to be paid for a period not exceeding 10 years after the eligibility period, used in combination with financial instruments, paid into an escrow account specifically set up for that purpose, for effective disbursement after the eligibility period, but in respect of loans or other risk-bearing instruments disbursed for investments in final recipients within the eligibility period;
- (d) reimbursement of management costs incurred or payment of management fees of the financial instrument.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 laying down the specific rules concerning the establishment of a system of capitalisation of annual instalments for interest rate subsidies and guarantee fee subsidies referred to in point (c) of the first subparagraph.

2. In the case of equity-based instruments and micro-credit, capitalised management costs or fees due to be paid for a period not exceeding six years after the eligibility period, in respect of investments in final recipients which occurred within the eligibility period, which cannot be covered by Articles 44 or 45, may be considered as eligible expenditure when paid into an escrow account specifically set up for that purpose.

3. In the case of equity-based instruments targeting enterprises referred to in Article 37(4) for which the funding agreement referred to in point (b) of Article 38(7) was signed before 31 December 2017, which by the end of the eligibility period invested at least 55 % of the programme resources committed in the relevant funding agreement, a limited amount of payments for investments in final recipients to be made for a period not exceeding four years after the end of eligibility period may be considered as eligible expenditure, when paid into an escrow account specifically set up for that purpose, provided that State aid rules are complied with and that all of the conditions set out below are fulfilled.

The amount paid into the escrow account:

- (a) shall be used solely for follow-on investments in final recipients having received initial equity investments from the financial instrument within the eligibility period, which are still wholly or partially outstanding;
- (b) shall be used solely for follow-on investments to be made in accordance with market standards and market standard contractual arrangements and limited to the minimum necessary to stimulate private sector co-investment, while ensuring continuity of financing for the target enterprises so that both public and private investors can benefit from investments;
- (c) shall not exceed 20 % of the eligible expenditure of the equity-based instrument referred to in point (a) of the first subparagraph of paragraph 1 from which ceiling capital resources and gains returned to that equity-based instrument during the eligibility period shall be deducted.

Any amounts paid into the escrow account which are not used for investments in final recipients paid in the period referred to in the first subparagraph shall be used in accordance with Article 45.

4. The eligible expenditure disclosed in accordance with paragraphs 1 and 2 shall not exceed the sum of the:

- (a) total amount of the support from the ESI Funds paid for the purposes of paragraphs 1 and 2; and
- (b) corresponding national co-financing.

5. Management cost and fees as referred to in point (d) of the first subparagraph of paragraph 1 and in paragraph 2 of this Article may be charged by the body implementing the fund of funds or bodies implementing financial instruments pursuant to points (a) and (b) of Article 38(4) and shall not exceed the thresholds defined in the delegated act referred to in paragraph 6 of this Article. Whereas management costs shall comprise direct or indirect cost items reimbursed against evidence of expenditure, management fees shall refer to an agreed price for services rendered established via a competitive market process, where applicable. Management costs and fees shall be based on a performance based calculation methodology.

Management costs and fees may comprise arrangement fees. Where arrangement fees, or any part thereof, are charged to final recipients, they shall not be declared as eligible expenditure.

Management costs and fees, including those incurred for preparatory work in relation to the financial instrument before the signature of the relevant funding agreement, shall be eligible as from the date of signature of the relevant funding agreement.

6. The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, laying down the specific rules setting out the criteria for determining management costs and fees on the basis of performance and the applicable thresholds as well as rules for the reimbursement of capitalised management costs and fees for equity-based instruments and micro-credit.

Article 43

Interest and other gains generated by support from the ESI Funds to financial instruments

1. Support from the ESI Funds paid to financial instruments shall be placed in accounts domiciled within financial institutions in Member States and shall be invested on a temporary basis in accordance with the principles of sound financial management.

2. Interest and other gains attributable to support from the ESI Funds paid to financial instruments shall be used for the same purposes, including the reimbursement of management costs incurred or payment of management fees of the financial instrument in accordance with point (d) of the first subparagraph of Article 42(1), and expenditure paid in accordance with Article 42(2), as the initial support from the ESI Funds either within the same financial instrument, or following the winding up of the financial instrument, in other financial instruments or forms of support in accordance with the specific objectives set out under a priority, until the end of the eligibility period.

3. The managing authority shall ensure that adequate records of the use of interest and other gains are maintained.

Article 44

Re-use of resources attributable to the support from the ESI Funds until the end of the eligibility period

1. Resources paid back to financial instruments from investments or from the release of resources committed for guarantee contracts, including capital repayments and gains and other earnings or yields, such as interest, guarantee fees, dividends, capital gains or any other income generated by investments, which are attributable to the support from the ESI Funds, shall be re-used for the following purposes, up to the amounts necessary and in the order agreed in the relevant funding agreements:

- (a) further investments through the same or other financial instruments, in accordance with the specific objectives set out under a priority;
- (b) where applicable, preferential remuneration of private investors, or public investors operating under the market economy principle, who provide counterpart resources to the support from the ESI Funds to the financial instrument or who co-invest at the level of final recipients;
- (c) where applicable, reimbursement of management costs incurred and payment of management fees of the financial instrument.

The need and the level for preferential remuneration pursuant to point (b) of the first subparagraph shall be established in the ex-ante assessment. The preferential remuneration shall not exceed what is necessary to create the incentives for attracting private counterpart resources and shall not over-compensate private investors, or public investors operating under the market economy principle. The alignment of interest shall be ensured through an appropriate sharing of risk and profit and shall be carried out on a normal commercial basis and be compatible with Union State aid rules.

2. The managing authority shall ensure that adequate records of the use of the resources referred to in paragraph 1 are maintained.

Article 45

Use of resources after the end of the eligibility period

Member States shall adopt the necessary measures to ensure that resources paid back to financial instruments, including capital repayments and gains and other earnings or yields generated during a period of at least eight years after the end of the eligibility period, which are attributable to the support from the ESI Funds to financial instruments pursuant to

Article 37, are used in accordance with the aims of the programme or programmes, either within the same financial instrument or, following the exit of those resources from the financial instrument, in other financial instruments provided that, in both cases, an assessment of market conditions demonstrates a continuing need for such investment, or in other forms of support.

Article 46

Report on implementation of financial instruments

1. The managing authority shall send to the Commission a specific report covering the operations comprising financial instruments as an annex to the annual implementation report.

2. The specific report referred to in paragraph 1 shall include, for each financial instrument, the following information:

- (a) identification of the programme and of the priority or measure from which support from the ESI Funds is provided;
- (b) description of the financial instrument and implementation arrangements;
- (c) identification of the bodies implementing financial instruments, and the bodies implementing funds of funds where applicable, as referred to under point (a) of Article 38(1), points (a), (b) and (c) of Article 38(4), and the financial intermediaries referred to under Article 38(6);
- (d) total amount of programme contributions by priority or measure paid to the financial instrument;
- (e) total amount of support paid to the final recipients or to the benefit of final recipients, or committed in guarantee contracts by the financial instrument for investments in final recipients, as well as management costs incurred or management fees paid, by programme and priority or measure;
- (f) the performance of the financial instrument including progress in its set-up and in selection of bodies implementing the financial instrument, including the body implementing a fund of funds;
- (g) interest and other gains generated by support from the ESI Funds to the financial instrument and programme resources paid back to financial instruments from investments as referred to in Articles 43 and 44;
- (h) progress in achieving the expected leverage effect of investments made by the financial instrument and value of investments and participations;

- (i) the value of equity investments, with respect to previous years;
- (j) contribution of the financial instrument to the achievement of the indicators of the priority or measure concerned.

The information in points (h) and (j) of the first subparagraph may be included only in the annex to the annual implementation reports submitted in 2017 and 2019 as well as in the final implementation report. The reporting obligations set out in points (a) to (j) of the first subparagraph shall not be applied at the level of final recipients.

3. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts establishing the models to be used when reporting on financial instruments to the Commission. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

4. Each year, starting in 2016, the Commission shall, within six months of the deadline for the submission of the annual implementation reports referred to in Article 111(1) for the ERDF, ESF and the Cohesion Fund, Article 75 of the EAFRD Regulation for the EAFRD, and the relevant provisions of Funds-specific rules for the EMFF, provide summaries of the data on the progress made in financing and implementing the financial instruments, sent by the managing authorities in accordance with this Article. Those summaries shall be transmitted to the European Parliament and the Council and shall be made public.

TITLE V

MONITORING AND EVALUATION

CHAPTER I

Monitoring

Section I

Monitoring of programmes

Article 47

Monitoring committee

1. Within three months of the date of notification to the Member State of the Commission decision adopting a programme, the Member State shall set up a committee, in accordance with its institutional, legal and financial framework, to monitor implementation of the programme, in agreement with the managing authority (the "monitoring committee").

A Member State may set up a single monitoring committee to cover more than one programme co-financed by the ESI Funds.

2. Each monitoring committee shall draw up and adopt its rules of procedure in accordance with the institutional, legal and financial framework of the Member State concerned.

3. The monitoring committee of a programme under the European territorial cooperation goal shall be set up by the

Member States participating in the cooperation programme and by third countries, in the event that they have accepted the invitation to participate in the cooperation programme, in agreement with the managing authority within three months of the date of notification of the decision adopting the cooperation programme to the Member States. That monitoring committee shall draw up and adopt its rules of procedure.

Article 48

Composition of the monitoring committee

1. The composition of the monitoring committee shall be decided by the Member State, provided that the monitoring committee is composed of representatives of the relevant Member State authorities and intermediate bodies and of representatives of the partners referred to in Article 5. Representatives of the partners shall be delegated to be part of the monitoring committee by the respective partners through transparent processes. Each member of the monitoring committee may have a voting right.

The composition of the monitoring committee of a programme under the European territorial goal shall be agreed by the Member States participating in the programme and by third countries in the event that they have accepted the invitation to participate in the cooperation programme. The monitoring committee shall include relevant representatives of those Member States and third countries. The monitoring committee may include representatives of the EGTC carrying out activities related to the programme within the programme area.

2. The list of the members of the monitoring committee shall be published.

3. The Commission shall participate in the work of the monitoring committee in an advisory capacity.

4. If the EIB contributes to a programme, it may participate in the work of the monitoring committee in an advisory capacity.

5. The monitoring committee shall be chaired by a representative of the Member State or of the managing authority.

Article 49

Functions of the monitoring committee

1. The monitoring committee shall meet at least once a year and shall review implementation of the programme and progress made towards achieving its objectives. In doing so, it shall have regard to the financial data, common and programme-specific indicators, including changes in the value of result indicators and progress towards quantified target values, and the milestones defined in the performance framework referred to in Article 21(1), and, where relevant, the results of qualitative analyses.

2. The monitoring committee shall examine all issues that affect the performance of the programme, including the conclusions of the performance reviews.

3. The monitoring committee shall be consulted and shall, if it considers it to be appropriate, give an opinion on any amendment of the programme proposed by the managing authority.

4. The monitoring committee may make observations to the managing authority regarding implementation and evaluation of the programme including actions related to the reduction of the administrative burden on beneficiaries. The monitoring committee shall monitor actions taken as a result of its observations.

Article 50

Implementation reports

1. From 2016 until and including 2023, each Member State shall submit to the Commission an annual report on implementation of the programme in the previous financial year. Each Member State shall submit to the Commission a final report on implementation of the programme for the ERDF, the ESF and the Cohesion Fund and an annual implementation report for the EAFRD and the EMFF by the deadline established in the Fund-specific rules.

2. Annual implementation reports shall set out key information on implementation of the programme and its priorities by reference to the financial data, common and programme-specific indicators and quantified target values, including changes in the value of result indicators where appropriate, and, beginning from the annual implementation report to be submitted in 2017, the milestones defined in the performance framework. The data transmitted shall relate to values for indicators for fully implemented operations and also, where possible, having regard to the stage of implementation, for selected operations. They shall also set out a synthesis of the findings of all evaluations of the programme that have become available during the previous financial year, any issues which affect the performance of the programme, and the measures taken. The annual implementation report to be submitted in 2016 may also set out, where relevant, actions taken to fulfil ex ante conditionalities.

3. By way of derogation from paragraph 2, specific rules on the data to be transmitted for the ESF may be established in the ESF Regulation.

4. The annual implementation report to be submitted in 2017 shall set out and assess the information referred to in paragraph 2 and progress made towards achieving the objectives of the programme, including the contribution of the ESI Funds to changes in the value of result indicators, when evidence is available from relevant evaluations. That annual implementation report shall set out the actions taken to fulfil the ex-ante conditionalities not fulfilled at the time of adoption of the programmes. It shall also assess the implementation of actions to take into account the principles set out in Articles 7 and 8, the role of the partners referred to in Article 5 in the implementation of the programme and report on support used for climate change objectives.

5. The annual implementation report to be submitted in 2019 and the final implementation report for the ESI Funds shall, in addition to the information and assessment referred to

in paragraphs 2 and 3, include information on, and assess progress towards, achieving the objectives of the programme and its contribution to achieving the Union strategy for smart, sustainable and inclusive growth.

6. In order to be deemed admissible, the annual implementation reports referred to in paragraphs 1 to 5 shall contain all the information required in those paragraphs and in the Fund-specific rules.

The Commission shall inform the Member State within 15 working days of the date of receipt of the annual implementation report if it is not admissible, failing which it shall be deemed admissible.

7. The Commission shall examine the annual and final implementation report and inform the Member State of its observations within two months of the date of receipt of the annual implementation report and within five months of the date of receipt of the final implementation report. Where the Commission does not provide observations within those deadlines, the reports shall be deemed to be accepted.

8. The Commission may make observations to the managing authority concerning issues which significantly affect the implementation of the programme. Where such observations are made, the managing authority shall provide all necessary information with regard to those observations and, where appropriate, inform the Commission, within three months, of measures taken.

9. The annual and final implementation reports, as well as a summary for citizens of their content, shall be made available to the public.

Article 51

Annual review meeting

1. An annual review meeting shall be organised every year from 2016 until and including 2023 between the Commission and each Member State to examine the performance of each programme, taking account of the annual implementation report and the Commission's observations where applicable.

2. The annual review meeting may cover more than one programme. In 2017 and 2019, the annual review meeting shall cover all programmes in the Member State and shall also take account of the progress reports submitted by the Member State, in accordance with Article 52, in those years.

3. By way of derogation from paragraph 1, the Member State and the Commission may agree not to organise an annual review meeting for a programme in years other than 2017 and 2019.

4. The annual review meeting shall be chaired by the Commission or, if the Member State so requests, co-chaired by the Member State and the Commission.

5. The Member State shall ensure that appropriate follow-up is given to comments of the Commission following the annual review meeting concerning issues which significantly affect the implementation of the programme and, where appropriate, inform the Commission, within three months, of the measures taken.

Section II

Strategic progress

Article 52

Progress report

1. By 31 August 2017 and by 31 August 2019, the Member State shall submit to the Commission a progress report on implementation of the Partnership Agreement as at 31 December 2016 and 31 December 2018 respectively.

2. The progress report shall set out information on and assess:

- (a) changes in the development needs in the Member State since the adoption of the Partnership Agreement;
- (b) progress made towards achievement of the Union strategy for smart, sustainable and inclusive growth, as well as of the Fund-specific missions referred to in Article 4(1), through the contribution of the ESI Funds to the thematic objectives selected, and in particular with regard to the milestones set out in the performance framework for each programme, and to the support used for climate change objectives;
- (c) whether the actions taken to fulfil the applicable ex ante conditionalities set out in the Partnership Agreement not fulfilled at the date of adoption of the Partnership Agreement have been implemented in accordance with the timetable established. This point shall only apply to the progress report to be submitted in 2017;
- (d) implementation of mechanisms to ensure coordination between the ESI Funds and other Union and national funding instruments and with the EIB;
- (e) implementation of the integrated approach to territorial development, or a summary of the implementation of the integrated approaches that are based on the programmes, including progress towards achievement of priority areas established for cooperation;
- (f) where appropriate, actions taken to reinforce the capacity of the Member State authorities and beneficiaries to administer and use the ESI Funds;
- (g) actions taken, and progress made, with regard to reducing the administrative burden on beneficiaries;

(h) the role of the partners referred to in Article 5 in the implementation of the Partnership Agreement;

(i) a summary of the actions taken in relation to the application of the horizontal principles referred to in Articles 5, 7 and 8 and policy objectives for the implementation of the ESI Funds.

3. Where the Commission determines, within two months of the date of submission of the progress report, that the information submitted is incomplete or unclear in a manner which significantly affects the quality and reliability of the assessment concerned, it may request additional information from the Member State, on condition that that request does not cause unjustified delays and that the Commission provides reasons to substantiate the alleged lack of quality and reliability. The Member State shall provide to the Commission the information requested within three months and, where appropriate, shall revise the progress report accordingly.

4. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts establishing the model to be used when submitting the progress report. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

Article 53

Reporting by the Commission and debate on the ESI Funds

1. The Commission shall transmit each year from 2016 to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions, a summary report in relation to ESI Fund programmes based on the annual implementation reports of the Member States submitted under Article 50 as well as a synthesis of the findings of the available evaluations of programmes. In 2017 and 2019 the summary report shall form a part of the strategic report referred to in paragraph 2.

2. In 2017 and 2019, the Commission shall prepare a strategic report summarising the progress reports of the Member States, which by 31 December 2017 and 31 December 2019, respectively, it shall submit to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions and those institutions shall be invited to hold a debate on it.

3. The Council shall debate the strategic report in particular with regard to the contribution of the ESI Funds to the achievement of the Union strategy for smart, sustainable and inclusive growth and shall be invited to provide input to the spring meeting of the European Council.

4. Every two years from 2018, the Commission shall include in its Annual Progress Report to the spring meeting of the European Council a section summarising the most recent of the reports referred to in paragraphs 1 and 2, in particular with regard to the contribution of the ESI Funds to progress made towards the Union strategy for smart, sustainable and inclusive growth.

CHAPTER II

Evaluation

Article 54

General Provisions

1. Evaluations shall be carried out to improve the quality of the design and implementation of programmes, as well as to assess their effectiveness, efficiency and impact. The impact of programmes shall be evaluated, in the light of the mission of each ESI Fund, in relation to the targets under the Union strategy for smart, sustainable and inclusive growth and, having regard to the size of the programme, in relation to GDP and unemployment in the programme area concerned, where appropriate.

2. Member States shall provide the resources necessary for carrying out evaluations, and shall ensure that procedures are in place to produce and collect the data necessary for evaluations, including data related to common and where appropriate programme-specific indicators.

3. Evaluations shall be carried out by internal or external experts that are functionally independent of the authorities responsible for programme implementation. The Commission shall provide guidance on how to carry out evaluations, immediately following the entry into force of this Regulation.

4. All evaluations shall be made available to the public.

Article 55

Ex ante evaluation

1. Member States shall carry out ex ante evaluations to improve the quality of the design of each programme.

2. Ex ante evaluations shall be carried out under the responsibility of the authority responsible for the preparation of the programmes. They shall be submitted to the Commission at the same time as the programme, together with an executive summary. The Fund-specific rules may establish thresholds below which the ex ante evaluation may be combined with the evaluation for another programme.

3. Ex ante evaluations shall appraise:

- (a) the contribution to the Union strategy for smart, sustainable and inclusive growth, having regard to the selected thematic objectives and priorities, taking into account national and regional needs and potential for development as well as lessons drawn from previous programming periods;
- (b) the internal coherence of the proposed programme or activity and its relationship with other relevant instruments;
- (c) the consistency of the allocation of budgetary resources with the objectives of the programme;
- (d) the consistency of the selected thematic objectives, the priorities and corresponding objectives of the programmes

with the CSF, the Partnership Agreement and the relevant country specific recommendations adopted in accordance with Article 121(2) TFEU and where appropriate at national level, the National Reform Programme;

- (e) the relevance and clarity of the proposed programme indicators;
 - (f) how the expected outputs will contribute to results;
 - (g) whether the quantified target values for indicators are realistic, having regard to the support envisaged from the ESI Funds;
 - (h) the rationale for the form of support proposed;
 - (i) the adequacy of human resources and administrative capacity for management of the programme;
 - (j) the suitability of the procedures for monitoring the programme and for collecting the data necessary to carry out evaluations;
 - (k) the suitability of the milestones selected for the performance framework;
 - (l) the adequacy of planned measures to promote equal opportunities between men and women and to prevent any discrimination, in particular as regards accessibility for persons with disabilities;
 - (m) the adequacy of planned measures to promote sustainable development;
 - (n) measures planned to reduce the administrative burden on beneficiaries.
4. Ex ante evaluations shall incorporate, where appropriate, the requirements for strategic environmental assessment set out in Directive 2001/42/EC of the European Parliament and of the Council ⁽¹⁾ taking into account climate change mitigation needs.

Article 56

Evaluation during the programming period

1. An evaluation plan shall be drawn up by the managing authority or Member State and may cover more than one programme. It shall be submitted in accordance with the Fund-specific rules.

2. Member States shall ensure that appropriate evaluation capacity is available.

⁽¹⁾ Directive 2001/42/EC of the European Parliament and of the Council of 27 June 2001 on the assessment of the effects of certain plans and programmes on the environment (OJ L 197, 21.7.2001, p. 30).

3. During the programming period, the managing authority shall ensure that evaluations, including evaluations to assess effectiveness, efficiency and impact, are carried out for each programme on the basis of the evaluation plan and that each evaluation is subject to appropriate follow-up in accordance with the Fund-specific rules. At least once during the programming period, an evaluation shall assess how support from the ESI Funds has contributed to the objectives for each priority. All evaluations shall be examined by the monitoring committee and sent to the Commission.

4. The Commission may carry out, at its own initiative, evaluations of programmes. It shall inform the managing authority and the results shall be sent to the managing authority and provided to the monitoring committee concerned.

5. Paragraphs 1, 2 and 3 of this Article shall not apply to the dedicated programmes referred to in point (b) of the first subparagraph of Article 39(4).

Article 57

Ex post evaluation

1. The ex post evaluations shall be carried out by the Commission, or by the Member States in close cooperation with the Commission. Ex post evaluations shall examine the effectiveness and efficiency of the ESI Funds and their contribution to the Union strategy for smart, sustainable and inclusive growth taking account of the targets established in that Union strategy and in accordance with specific requirements established in the Fund-specific rules.

2. Ex post evaluations shall be completed by 31 December 2024.

3. The ex-post evaluation of the dedicated programmes referred to in point (b) of the first subparagraph of Article 39(4) shall be carried out by the Commission and completed by 31 December 2019.

4. For each of the ESI Funds, the Commission shall prepare, by 31 December 2025, a synthesis report outlining the main conclusions of ex-post evaluations.

TITLE VI

TECHNICAL ASSISTANCE

Article 58

Technical assistance at the initiative of the Commission

1. At the initiative of the Commission, the ESI Funds may support the preparatory, monitoring, administrative and technical assistance, evaluation, audit and control measures necessary for implementing this Regulation.

The measures referred to in the first subparagraph may be implemented either directly by the Commission or indirectly, by entities and persons other than Member States in accordance with Article 60 of the Financial Regulation.

The measures referred to in the first subparagraph may include in particular:

- (a) assistance for project preparation and appraisal, including with the EIB;
- (b) support for institutional strengthening and administrative capacity-building for the effective management of the ESI Funds;
- (c) studies linked to the Commission's reporting on the ESI Funds and the cohesion report;
- (d) measures related to the analysis, management, monitoring, information exchange and implementation of the ESI Funds, as well as measures relating to the implementation of control systems and technical and administrative assistance;
- (e) evaluations, expert reports, statistics and studies, including those of a general nature, concerning the current and future operation of the ESI Funds, which may be carried out where appropriate by the EIB;
- (f) actions to disseminate information, support networking, carry out communication activities, raise awareness and promote cooperation and exchange of experience, including with third countries;
- (g) the installation, operation and interconnection of computerised systems for management, monitoring, audit, control and evaluation;
- (h) actions to improve evaluation methods and the exchange of information on evaluation practices;
- (i) actions related to auditing;
- (j) the strengthening of national and regional capacity regarding investment planning, needs assessment, preparation, design and implementation of financial instruments, joint action plans and major projects, including joint initiatives with the EIB;
- (k) the dissemination of good practices in order to assist Member States to strengthen the capacity of the relevant partners referred to in Article 5 and their umbrella organisations;
- (l) measures to identify, prioritize and implement structural and administrative reforms in response to economic and social challenges in Member States which meet the conditions set out in Article 24(1).

To bring about greater efficiency in communication to the public at large and stronger synergies between the communication activities undertaken at the initiative of the Commission, the resources allocated to communication actions under this Regulation shall also contribute to the corporate communication of the political priorities of the Union as far as they are related to the general objectives of this Regulation.

2. The Commission shall set out each year its plans on the type of actions related to the measures listed in paragraph 1, when a contribution from the ESI Funds is envisaged, by means of implementing acts.

Article 59

Technical assistance at the initiative of the Member States

1. At the initiative of a Member State, the ESI Funds may support actions for preparation, management, monitoring, evaluation, information and communication, networking, complaint resolution, and control and audit. The ESI Funds may be used by the Member State to support actions for the reduction of the administrative burden on beneficiaries, including electronic data exchange systems, and actions to reinforce the capacity of Member State authorities and beneficiaries to administer and use those Funds. The ESI Funds may also be used to support actions to reinforce the capacity of relevant partners in line with point (e) of Article 5(3) and to support exchange of good practices between such partners. The actions referred to in this paragraph may concern previous and subsequent programming periods.

2. The Fund-specific rules may add or exclude actions which may be financed by the technical assistance of each ESI Fund.

TITLE VII

FINANCIAL SUPPORT FROM THE ESI FUNDS

CHAPTER I

Support from the ESI Funds

Article 60

Determination of co-financing rates

1. The Commission decision adopting a programme shall fix the co-financing rate or rates and the maximum amount of support from the ESI Funds in accordance with the Fund-specific rules.

2. Technical assistance measures implemented at the initiative of, or on behalf of, the Commission may be financed at the rate of 100 %.

Article 61

Operations generating net revenue after completion

1. This Article shall apply to operations which generate net revenue after their completion. For the purposes of this Article 'net revenue' means cash in-flows directly paid by users for the goods or services provided by the operation, such as charges borne directly by users for the use of infrastructure, sale or rent of land or buildings, or payments for services less any operating costs and replacement costs of short-life equipment incurred during the corresponding period. Operating cost-savings generated by the operation shall be treated as net revenue unless they are offset by an equal reduction in operating subsidies.

Where not all the investment cost is eligible for co-financing, the net revenue shall be allocated pro rata to the eligible and non-eligible parts of the investment cost.

2. The eligible expenditure of the operation to be co-financed from the ESI Funds shall be reduced in advance taking into account the potential of the operation to generate net revenue over a specific reference period that covers both implementation of the operation and the period after its completion.

3. The potential net revenue of the operation shall be determined in advance by one of the following methods chosen by the managing authority for a sector, subsector or type of operation:

- (a) application of a flat rate net revenue percentage for the sector or subsector applicable to the operation as defined in Annex V or in any of the delegated acts referred to in the second, third and fourth subparagraphs;
- (b) calculation of the discounted net revenue of the operation, taking into account the reference period appropriate to the sector or subsector applicable to the operation, the profitability normally expected of the category of investment concerned, the application of the polluter-pays principle and, if appropriate, considerations of equity linked to the relative prosperity of the Member State or region concerned.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 in duly justified cases to amend Annex V by adjusting the flat rates established therein taking into account historical data, the potential for cost recovery and the polluter-pays principle where applicable.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 establishing flat rates for sectors or subsectors within the fields of ICT, RDI and energy efficiency. The Commission shall notify the delegated acts to the European Parliament and the Council not later than 30 June 2015.

In addition, the Commission shall be empowered to adopt delegated acts in accordance with Article 149 in duly justified cases with regard to adding sectors or subsectors, including subsectors for sectors in Annex V, falling under the thematic objectives defined in the first paragraph of Article 9 and supported by the ESI Funds.

Where the method referred to in point (a) of the first subparagraph is applied, all the net revenue generated during implementation and after completion of the operation shall be considered to be taken into account by the application of the flat rate and shall therefore not be deducted subsequently from the eligible expenditure of the operation.

When a flat rate for a new sector or subsector has been established by the adoption of a delegated act in accordance with the third and fourth subparagraphs, a managing authority may choose to apply the method set out in point (a) of the first subparagraph for new operations in relation to the sector or subsector concerned.

The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, laying down the method referred to in point (b) of the first subparagraph. Where that method is applied, the net revenue generated during implementation of the operation, resulting from sources of revenue not taken into account in determining the potential net revenue of the operation, shall be deducted from the eligible expenditure of the operation, no later than in the final payment claim submitted by the beneficiary.

4. The method by which the net revenue is deducted from the expenditure of the operation included in the request for payment submitted to the Commission shall be determined in accordance with national rules.

5. As an alternative to the application of the methods laid down in paragraph 3, the maximum co-financing rate referred to in Article 60(1) may, at the request of a Member State, be decreased at the moment of adoption of a programme for a priority or measure under which all operations supported under that priority or measure could apply a uniform flat rate in accordance with point (a) of the first subparagraph of paragraph 3. The decrease shall be not less than the amount calculated by multiplying the maximum Union co-financing rate applicable under the Fund-specific rules by the relevant flat rate referred to in point (a) of the first subparagraph of paragraph 3.

Where the method referred to in the first subparagraph is applied, all net revenue generated during implementation, and after completion, of the operation shall be considered to be taken into account by application of the decreased co-financing rate and shall therefore not be deducted subsequently from the eligible expenditure of the operations.

6. Where it is objectively not possible to determine the revenue in advance based on any of the methods set out in paragraphs 3 or 5, the net revenue generated within three years of the completion of an operation, or by the deadline for the submission of documents for programme closure fixed in the Fund-specific rules, whichever is the earlier, shall be deducted from the expenditure declared to the Commission.

7. Paragraphs 1 to 6 shall not apply to:

- (a) operations or parts of operations supported solely by the ESF;
- (b) operations whose total eligible cost before application of paragraphs 1 to 6 does not exceed EUR 1 000 000;

- (c) repayable assistance subject to an obligation for full repayment and prizes;
- (d) technical assistance;
- (e) support to or from financial instruments;
- (f) operations for which public support takes the form of lump sums or standard scale unit costs;
- (g) operations implemented under a joint action plan;
- (h) operations for which amounts or rates of support are defined in Annex II to the EAFRD Regulation.

Notwithstanding point (b) of the first subparagraph of this paragraph, where a Member State applies paragraph 5, it may include in the relevant priority or measure operations whose total eligible cost before application of paragraphs 1 to 6 does not exceed EUR 1 000 000.

8. In addition, paragraphs 1 to 6 shall not apply to operations for which support under the programme constitutes:

- (a) de minimis aid;
- (b) compatible State aid to SMEs, where an aid intensity or an aid amount limit is applied in relation to State aid;
- (c) compatible State aid, where an individual verification of financing needs in accordance with the applicable State aid rules has been carried out.

Notwithstanding the first subparagraph, a managing authority may apply the paragraphs 1 to 6 to operations which fall under points (a) to (c) of the first subparagraph of this paragraph where this is provided for in national rules.

CHAPTER II

Special rules on support from the ESI Funds to PPPs

Article 62

PPPs

The ESI Funds may be used to support PPP operations. Such PPP operations shall comply with applicable law, in particular concerning State aid and public procurement.

Article 63

Beneficiary under PPP operations

1. In relation to a PPP operation, and by way of derogation from point (10) of Article 2, a beneficiary may be either:

- (a) the public law body initiating the operation; or

(b) a body governed by private law of a Member State (the "private partner") selected or to be selected for the implementation of the operation.

2. The public law body initiating the PPP operation may propose that the private partner, to be selected after approval of the operation, be the beneficiary for the purposes of support from the ESI Funds. In that event, the approval decision shall be conditional on the managing authority satisfying itself that the selected private partner fulfils and assumes all the corresponding obligations of a beneficiary under this Regulation.

3. The private partner selected to implement the operation may be replaced as beneficiary during implementation where this is required under the terms and conditions of the PPP or the financing agreement between the private partner and the financial institution co-financing the operation. In that event the replacement private partner or public law body shall become the beneficiary provided that the managing authority satisfies itself that the replacement partner fulfils and assumes all the corresponding obligations of a beneficiary under this Regulation.

4. The Commission shall be empowered to adopt delegated acts in accordance with Article 149 laying down additional rules on the replacement of a beneficiary and on the related responsibilities.

5. The replacement of a beneficiary shall not be considered a change in ownership within the meaning of point (b) of Article 71(1) if that replacement satisfies the applicable conditions set out in paragraph 3 of this Article and in a delegated act adopted pursuant to paragraph 4 of this Article.

Article 64

Support for PPP operations

1. In the case of a PPP operation where the beneficiary is a public law body, expenditure under a PPP operation which has been incurred and paid by the private partner may, by way of derogation from Article 65(2), be considered as incurred and paid by a beneficiary and included in a request for payment to the Commission provided that the following conditions are met:

- (a) the beneficiary has entered into a PPP agreement with a private partner;
- (b) the managing authority has verified that the expenditure declared by the beneficiary has been paid by the private partner and that the operation complies with applicable Union and national law, the programme and the conditions for support of the operation.

2. Payments to beneficiaries made in respect of expenditure included in a request for payment in accordance with paragraph 1 shall be paid into an escrow account set up for that purpose in the name of the beneficiary.

3. The funds paid into the escrow account referred to in paragraph 2 shall be used for payments in accordance with

the PPP agreement, including any payments to be made in the event of termination of the PPP agreement.

4. The Commission shall be empowered to adopt delegated acts in accordance with Article 149 laying down the minimum requirements to be included in PPP agreements which are necessary for the application of the derogation laid down in paragraph 1 of this Article, including provisions related to termination of the PPP agreement and for the purpose of ensuring an adequate audit trail.

CHAPTER III

Eligibility of expenditure and durability

Article 65

Eligibility

1. The eligibility of expenditure shall be determined on the basis of national rules, except where specific rules are laid down in, or on the basis of, this Regulation or the Fund-specific rules.

2. Expenditure shall be eligible for a contribution from the ESI Funds if it has been incurred by a beneficiary and paid between the date of submission of the programme to the Commission or from 1 January 2014, whichever is earlier, and 31 December 2023. In addition, expenditure shall only be eligible for a contribution from the EAFRD if the relevant aid is actually paid by the paying agency between 1 January 2014 and 31 December 2023.

3. By way of derogation from paragraph 2, expenditure under the YEI shall be eligible as of 1 September 2013.

4. In the case of costs reimbursed pursuant to points (b) and (c) of the first subparagraph of Article 67(1), the actions constituting the basis for reimbursement shall be carried out between 1 January 2014 and 31 December 2023.

5. By way of derogation from paragraph 4, the starting date in relation to costs reimbursed on the basis of (b) and (c) of the first subparagraph of Article 67(1) for actions under the YEI shall be 1 September 2013.

6. Operations shall not be selected for support by the ESI Funds where they have been physically completed or fully implemented before the application for funding under the programme is submitted by the beneficiary to the managing authority, irrespective of whether all related payments have been made by the beneficiary.

7. This Article shall be without prejudice to the rules on eligibility of technical assistance at the initiative of the Commission set out in Article 58.

8. This paragraph shall apply to operations which generate net revenue during their implementation and to which paragraphs 1 to 6 of Article 61 do not apply.

The eligible expenditure of the operation to be co-financed from the ESI Funds shall be reduced by the net revenue not taken into account at the time of approval of the operation directly generated only during its implementation, not later than at the final payment claim submitted by the beneficiary. Where not all the costs are eligible for co-financing, the net revenue shall be allocated pro rata to the eligible and non-eligible parts of the cost.

This paragraph shall not apply to:

- (a) technical assistance;
- (b) financial instruments;
- (c) repayable assistance subject to an obligation for full repayment;
- (d) prizes;
- (e) operations subject to the State aid rules;
- (f) operations for which public support takes the form of lump sums or standard scale unit costs provided that the net revenue has been taken into account ex ante;
- (g) operations implemented under a joint action plan provided that the net revenue has been taken into account ex ante;
- (h) operations for which amounts or rates of support are defined in Annex II to the EAFRD Regulation; or
- (i) operations for which the total eligible cost does not exceed EUR 50 000.

For the purposes of this Article and Article 61, any payment received by the beneficiary arising from contractual penalties as a result of a breach of contract between the beneficiary and a third party or third parties or that has occurred as a result of the withdrawal of an offer by a third party chosen under public procurement rules (the 'deposit') shall not be considered as revenue and shall not be deducted from the eligible expenditure of the operation.

9. Expenditure that becomes eligible as a result of an amendment to a programme shall only be eligible from the date of submission to the Commission of the request for amendment or, in the event of application of Article 96(11), from the date of entry into force of the decision amending the programme.

The Fund-specific rules for the EMFF may derogate from the first subparagraph.

10. By way of derogation from paragraph 9, specific provisions on the starting date of eligibility may be established in the EAFRD Regulation.

11. An operation may receive support from one or more ESI Funds or from one or more programmes and from other Union instruments, provided that the expenditure item included in a request for payment for reimbursement by one of the ESI Funds does not receive support from another Fund or Union instrument, or support from the same Fund under another programme.

Article 66

Forms of support

The ESI Funds shall be used to provide support in the form of grants, prizes, repayable assistance and financial instruments, or a combination thereof.

In the case of repayable assistance, the support repaid to the body that provided it, or to another competent authority of the Member State, shall be kept in a separate account or separated with accounting codes and reused for the same purpose or in accordance with the objectives of the programme.

Article 67

Forms of grants and repayable assistance

1. Grants and repayable assistance may take any of the following forms:

- (a) reimbursement of eligible costs actually incurred and paid, together with, where applicable, contributions in kind and depreciation;
- (b) standard scales of unit costs;
- (c) lump sums not exceeding EUR 100 000 of public contribution;
- (d) flat-rate financing, determined by the application of a percentage to one or more defined categories of costs.

Fund-specific rules may limit the forms of grants or repayable assistance applicable to certain operations.

2. By way of derogation from paragraph 1, additional forms of grants and methods of calculation may be established in the EMFF Regulation.

3. The options referred to in paragraph 1 may be combined only where each option covers different categories of costs or where they are used for different projects forming a part of an operation or for successive phases of an operation.

4. Where an operation or a project forming a part of an operation is implemented exclusively through the public procurement of works, goods or services, only point (a) of the first subparagraph of paragraph 1 shall apply. Where the public procurement within an operation or project forming part of an operation is limited to certain categories of costs, all the options referred to in paragraph 1 may be applied.

5. The amounts referred to in points (b), (c) and (d) of the first subparagraph of paragraph 1 shall be established in one of the following ways:

- (a) a fair, equitable and verifiable calculation method based on:
 - (i) statistical data or other objective information;
 - (ii) the verified historical data of individual beneficiaries; or
 - (iii) the application of the usual cost accounting practices of individual beneficiaries;
- (b) in accordance with the rules for application of corresponding scales of unit costs, lump sums and flat rates applicable in Union policies for a similar type of operation and beneficiary;
- (c) in accordance with the rules for application of corresponding scales of unit costs, lump sums and flat rates applied under schemes for grants funded entirely by the Member State for a similar type of operation and beneficiary;
- (d) rates established by this Regulation or the Fund-specific rules;
- (e) specific methods for determining amounts established in accordance with the Fund-specific rules.

6. The document setting out the conditions for support for each operation shall set out the method to be applied for determining the costs of the operation and the conditions for payment of the grant.

Article 68

Flat rate financing for indirect costs and staff costs concerning grants and repayable assistance

1. Where the implementation of an operation gives rise to indirect costs, they may be calculated at a flat rate in one of the following ways:

- (a) a flat rate of up to 25 % of eligible direct costs, provided that the rate is calculated on the basis of a fair, equitable and verifiable calculation method or a method applied under schemes for grants funded entirely by the Member State for a similar type of operation and beneficiary;

- (b) a flat rate of up to 15 % of eligible direct staff costs without there being a requirement for the Member State to perform a calculation to determine the applicable rate;

- (c) a flat rate applied to eligible direct costs based on existing methods and corresponding rates, applicable in Union policies for a similar type of operation and beneficiary.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 concerning the definition of the flat rate and the related methods referred to in point (c) of the first subparagraph of this paragraph.

2. For the purposes of determining staff costs relating to the implementation of an operation, the hourly rate applicable may be calculated by dividing the latest documented annual gross employment costs by 1 720 hours.

Article 69

Specific eligibility rules for grants and repayable assistance

1. Contributions in kind in the form of provision of works, goods, services, land and real estate for which no cash payment supported by invoices, or documents of equivalent probative value, has been made, may be eligible on condition that the eligibility rules of the ESI Funds and the programme so provide and that all the following criteria are fulfilled:

- (a) the public support paid to the operation which includes contributions in kind does not exceed the total eligible expenditure, excluding contributions in kind, at the end of the operation;
- (b) the value attributed to contributions in kind does not exceed the costs generally accepted on the market in question;
- (c) the value and the delivery of the contribution can be independently assessed and verified;
- (d) in the case of provision of land or real estate, a cash payment, for the purposes of a lease agreement of a nominal amount per annum not exceeding a single unit of the currency of the Member State, may be made;
- (e) in the case of contributions in kind in the form of unpaid work, the value of that work is determined by taking into account the verified time spent and the rate of remuneration for equivalent work.

The value of the land or real estate referred to in point (d) of the first subparagraph of this paragraph shall be certified by an independent qualified expert or duly authorised official body and shall not exceed the limit laid down in point (b) of paragraph 3.

2. Depreciation costs may be considered as eligible where the following conditions are fulfilled:

- (a) the eligibility rules of the programme allow for it;
- (b) the amount of the expenditure is duly justified by supporting documents having equivalent probative value to invoices for eligible costs where reimbursed in the form referred to in point (a) of the first subparagraph of Article 67(1);
- (c) the costs relate exclusively to the period of support for the operation;
- (d) public grants have not contributed towards the acquisition of the depreciated assets.

3. The following costs shall not be eligible for a contribution from the ESI Funds and from the amount of support transferred from the Cohesion Fund to the CEF as referred to in Article 92(6):

- (a) interest on debt, except in relation to grants given in the form of an interest rate subsidy or guarantee fee subsidy;
- (b) the purchase of land not built on and land built on in the amount exceeding 10 % of the total eligible expenditure for the operation concerned. For derelict sites and for those formerly in industrial use which comprise buildings, that limit shall be increased to 15 %. In exceptional and duly justified cases, the limit may be raised above the respective aforementioned percentages for operations concerning environmental conservation;
- (c) value added tax except where it is non-recoverable under national VAT legislation.

Article 70

Eligibility of operations depending on location

1. Operations supported by the ESI Funds, subject to the derogations referred to in paragraphs 2 and 3, and the Fund-specific rules, shall be located in the programme area.

2. The managing authority may accept that an operation is implemented outside the programme area but within the Union, provided that all the following conditions are satisfied:

- (a) the operation is for the benefit of the programme area;
- (b) the total amount allocated under the programme to operations located outside the programme area does not exceed 15 % of the support from the ERDF, Cohesion Fund and EMFF at the level of the priority, or 5 % of the support from the EAFRD at the level of the programme;

(c) the monitoring committee has given its agreement to the operation or types of operations concerned;

(d) the obligations of the authorities for the programme in relation to management, control and audit concerning the operation are fulfilled by the authorities responsible for the programme under which that operation is supported or they enter into agreements with authorities in the area in which the operation is implemented.

3. For operations concerning technical assistance or promotional activities, expenditure may be incurred outside the Union provided that the conditions set out in point (a) of paragraph 2 and the obligations in relation to management, control and audit concerning the operation are fulfilled.

4. Paragraphs 1 to 3 shall not apply to programmes under the European territorial cooperation goal and paragraphs 2 and 3 shall not apply to operations supported by the ESF.

Article 71

Durability of operations

1. An operation comprising investment in infrastructure or productive investment shall repay the contribution from the ESI Funds if within five years of the final payment to the beneficiary or within the period of time set out in State aid rules, where applicable, it is subject to any of the following:

- (a) a cessation or relocation of a productive activity outside the programme area;
- (b) a change in ownership of an item of infrastructure which gives to a firm or a public body an undue advantage;
- (c) a substantial change affecting its nature, objectives or implementation conditions which would result in undermining its original objectives.

Sums unduly paid in respect of the operation shall be recovered by the Member State in proportion to the period for which the requirements have not been fulfilled.

Member States may reduce the time limit set out in the first subparagraph to three years in cases concerning the maintenance of investments or jobs created by SMEs.

2. An operation comprising investment in infrastructure or productive investment shall repay the contribution from the ESI Funds if within 10 years of the final payment to the beneficiary the productive activity is subject to relocation outside the Union, except where the beneficiary is an SME. Where the contribution from the ESI Funds takes the form of State aid, the period of 10 years shall be replaced by the deadline applicable under State aid rules.

3. Operations supported by the ESF and operations supported by the other ESI Funds that are not investments in infrastructure or productive investments shall repay the contribution from the Fund only where they are subject to an obligation for maintenance of investment under the applicable State aid rules and where they undergo a cessation or relocation of a productive activity within the period laid down in those rules.

4. Paragraphs 1, 2 and 3 shall not apply to contributions to or by financial instruments or to any operation which undergoes cessation of a productive activity due to a non-fraudulent bankruptcy.

5. Paragraphs 1, 2 and 3 shall not apply to natural persons who are beneficiaries of investment support and, after the completion of the investment operation, become eligible for and receive support under Regulation (EU) No 1309/2013 of the European Parliament and of the Council where the investment concerned is directly linked to the type of activity identified as eligible for support from the European Globalisation Adjustment Fund.

TITLE VIII

MANAGEMENT AND CONTROL

CHAPTER I

Management and control systems

Article 72

General principles of management and control systems

Management and control systems shall, in accordance with Article 4(8), provide for:

- (a) a description of the functions of each body involved in management and control, and the allocation of functions within each body;
- (b) compliance with the principle of separation of functions between and within such bodies;
- (c) procedures for ensuring the correctness and regularity of expenditure declared;
- (d) computerised systems for accounting, for the storage and transmission of financial data and data on indicators, for monitoring and for reporting;
- (e) systems for reporting and monitoring where the body responsible entrusts execution of tasks to another body;
- (f) arrangements for auditing the functioning of the management and control systems;
- (g) systems and procedures to ensure an adequate audit trail;

- (h) the prevention, detection and correction of irregularities, including fraud, and the recovery of amounts unduly paid, together with any interest on late payments.

Article 73

Responsibilities under shared management

In accordance with the principle of shared management, Member States and the Commission shall be responsible for the management and control of programmes in accordance with their respective responsibilities laid down in this Regulation and in the Fund-specific rules.

Article 74

Responsibilities of Member States

1. Member States shall fulfil the management, control and audit obligations, and assume the resulting responsibilities, which are laid down in the rules on shared management set out in the Financial Regulation and the Fund-specific rules.

2. Member States shall ensure that their management and control systems for programmes are set up in accordance with the Fund-specific rules and that those systems function effectively.

3. Member States shall ensure that effective arrangements for the examination of complaints concerning the ESI Funds are in place. The scope, rules and procedures concerning such arrangements shall be the responsibility of Member States in accordance with their institutional and legal framework. Member States shall, upon request by the Commission, examine complaints submitted to the Commission falling within the scope of their arrangements. Member States shall inform the Commission, upon request, of the results of those examinations.

4. All official exchanges of information between the Member State and the Commission shall be carried out using an electronic data exchange system. The Commission shall adopt implementing acts establishing the terms and conditions with which that electronic data exchange system is to comply. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

CHAPTER II

Commission powers and responsibilities

Article 75

Commission powers and responsibilities

1. The Commission shall satisfy itself, on the basis of available information, including information on the designation of bodies responsible for the management and control, the documents provided each year, in accordance with Article 59(5) of the Financial Regulation, by those designated bodies, control reports, annual implementation reports and audits carried out by national and Union bodies, that the Member States have set up management and control systems that comply with this Regulation and the Fund-specific rules and that those systems function effectively during the implementation of programmes.

2. Commission officials or authorised Commission representatives may carry out on-the-spot audits or checks subject to giving at least 12 working days notice to the competent national authority, except in urgent cases. The Commission shall respect the principle of proportionality by taking into account the need to avoid unjustified duplication of audits or checks carried out by Member States, the level of risk to the budget of the Union and the need to minimise the administrative burden on beneficiaries in accordance with the Fund-specific rules. The scope of such audits or checks may include, in particular, verification of the effective functioning of management and control systems in a programme or a part thereof, in operations and assessment of the sound financial management of operations or programmes. Officials or authorised representatives of the Member State may take part in such audits or checks.

Commission officials or authorised Commission representatives, duly empowered to carry out on-the-spot audits or checks, shall have access to all necessary records, documents and metadata, irrespective of the medium in which they are stored, relating to operations supported by the ESI Funds or to management and control systems. Member States shall provide copies of such records, documents and metadata to the Commission upon request.

The powers set out in this paragraph shall not affect the application of national provisions which reserve certain acts for agents specifically designated by national legislation. Commission officials and authorised representatives shall not take part, inter alia, in home visits or the formal questioning of persons within the framework of national legislation. However, such officials and representatives shall have access to the information thus obtained without prejudice to the competences of national courts and in full respect of the fundamental rights of the legal subjects concerned.

3. The Commission may require a Member State to take the actions necessary to ensure the effective functioning of their management and control systems or the correctness of expenditure in accordance with the Fund-specific rules.

TITLE IX

FINANCIAL MANAGEMENT, EXAMINATION AND ACCEPTANCE OF ACCOUNTS AND FINANCIAL CORRECTIONS, DECOMMITMENT

CHAPTER I

Financial management

Article 76

Budget commitments

The budget commitments of the Union in respect of each programme shall be made in annual instalments for each Fund during the period between 1 January 2014 and 31 December 2020. The budget commitments relating to the performance reserve in each programme shall be made separately from the remaining allocation to the programme.

The decision of the Commission adopting a programme shall constitute a financing decision within the meaning of Article 84 of the Financial Regulation and once notified to the Member State concerned, a legal commitment within the meaning of that Regulation.

For each programme, the budget commitments for the first instalment shall follow the adoption of the programme by the Commission.

The budget commitments for subsequent instalments shall be made by the Commission before 1 May of each year, on the basis of the decision referred to in the second paragraph of this Article, except where Article 16 of the Financial Regulation applies.

Following application of the performance framework in accordance with Article 22, where priorities have not achieved their milestones, the Commission shall where necessary decommit the corresponding appropriations committed to the programmes concerned as part of the performance reserve and shall make them available again for the programmes for which the allocation is increased as a result of an amendment approved by the Commission in accordance with Article 22(5).

Article 77

Common rules for payments

1. Payments by the Commission of the contribution from the ESI Funds to each programme shall be made in accordance with budget appropriations and subject to available funding. Each payment shall be posted to the earliest open budget commitment of the Fund concerned.

2. Payments related to the commitments of the performance reserve shall not be made prior to the definitive allocation of the performance reserve, in accordance with Article 22(3) and (4).

3. Payments shall take the form of pre-financing, interim payments and payment of the final balance.

4. For forms of support under points (b), (c) and (d) of the first subparagraph of Article 67(1) and under Articles 68 and 69, costs calculated on the applicable basis shall be regarded as eligible expenditure.

Article 78

Common rules for calculating interim payments, and payment of the final balance

The Fund-specific rules shall lay down rules for the calculation of the amount reimbursed as interim payments, and of the final balance. That amount shall be a function of the specific co-financing rate applicable to the eligible expenditure.

Article 79

Requests for payment

1. The specific procedure and information to be submitted for requests for payment in relation to each ESI Fund shall be laid down in the Fund-specific rules.

2. The request for payment to be submitted to the Commission shall provide all the information necessary for the Commission to produce accounts in accordance with Article 68(3) of the Financial Regulation.

Article 80

Use of the euro

Amounts set out in programmes submitted by Member States, forecasts of expenditure, statements of expenditure, requests for payment, accounts and expenditure mentioned in the annual and final implementation reports shall be denominated in euro.

Article 81

Payment of initial pre-financing

1. Following the Commission decision adopting the programme, an initial pre-financing amount for the whole programming period shall be paid by the Commission. The initial pre-financing amount shall be paid in instalments according to budgetary needs. The level of the instalments shall be defined in the Fund-specific rules.

2. Initial pre-financing shall be used only for payments to beneficiaries in the implementation of the programme. It shall be made available without delay to the body responsible for that purpose.

Article 82

Clearance of initial pre-financing

The amount paid as initial pre-financing shall be totally cleared from the Commission accounts not later than when the programme is closed.

Article 83

Interruption of the payment deadline

1. The payment deadline for an interim payment claim may be interrupted by the authorising officer by delegation within the meaning of the Financial Regulation for a maximum period of six months if:

- (a) following information provided by a national or Union audit body, there is clear evidence to suggest a significant deficiency in the functioning of the management and control system;
- (b) the authorising officer by delegation has to carry out additional verifications following information that has come to that officer's attention alerting him or her that expenditure in a request for payment is linked to an irregularity having serious financial consequences;
- (c) there is a failure to submit one of the documents required under Article 59(5) of the Financial Regulation.

The Member State may agree to an extension of the interruption period for another three months.

The Fund-specific rules for the EMFF may lay down specific bases for interruption of payments linked to non-compliance with rules applicable under the Common Fisheries Policy, which shall be proportionate, having regard to the nature, gravity, duration and recurrence of the non-compliance.

2. The authorising officer by delegation shall limit the interruption to the part of the expenditure covered by the payment claim affected by the elements referred to in the first subparagraph of paragraph 1, unless it is not possible to identify the part of the expenditure affected. The authorising officer by delegation shall inform the Member State and the managing authority in writing immediately of the reason for interruption and shall ask them to remedy the situation. The interruption shall be ended by the authorising officer by delegation as soon as the necessary measures have been taken.

CHAPTER II

Examination and acceptance of accounts

Article 84

Deadline for the examination and acceptance of accounts by the Commission

By 31 May of the year following the end of the accounting period, the Commission shall, in accordance with Article 59(6) of the Financial Regulation, apply procedures for the examination and acceptance of the accounts and inform the Member State as to whether it accepts that the accounts are complete, accurate and true in accordance with Fund-specific rules.

CHAPTER III

Financial corrections

Article 85

Financial corrections by the Commission

1. The Commission shall make financial corrections by cancelling all or part of the Union contribution to a programme and effecting recovery from the Member State, in order to exclude from Union financing expenditure which is in breach of applicable law.

2. A breach of applicable law shall lead to a financial correction only in relation to expenditure which has been declared to the Commission and where one of the following conditions is met:

- (a) the breach has affected the selection of an operation by the body responsible for support from the ESI Funds or in cases where, due to the nature of the breach, it is not possible to establish that impact but there is a substantiated risk that the breach has had such an effect;
- (b) the breach has affected the amount of expenditure declared for reimbursement by the budget of the Union or in cases where, due to the nature of the breach, it is not possible to quantify its financial impact but there is a substantiated risk that the breach has had such an effect.

3. When deciding on a financial correction under paragraph 1, the Commission shall respect the principle of proportionality by taking account of the nature and gravity of the breach of applicable law and its financial implications for the budget of the Union. The Commission shall keep the European Parliament informed of decisions taken to apply financial corrections.

4. The criteria and the procedures for applying financial corrections shall be laid down in the Fund-specific rules.

CHAPTER IV

Decommitment

Article 86

Principles

1. All programmes shall be submitted to a decommitment procedure established on the basis that amounts linked to a commitment which are not covered by pre-financing or by a request for payment within a defined period, including any request for payment for which all or part is subject to an interruption of the payment deadline or a suspension of payments, shall be decommitted.

2. The commitment related to the last year of the period shall be decommitted in accordance with the rules to be followed for the closure of the programmes.

3. The Fund-specific rules shall specify the precise application of the decommitment rule for each ESI Fund.

4. The part of commitments still open shall be decommitted if any of the documents required for the closure have not been submitted to the Commission by the deadlines established in the Fund-specific rules.

5. The budgetary commitments in respect of the performance reserve shall be subject only to the decommitment procedure set out in paragraph 4.

Article 87

Exception to the decommitment

1. The amount concerned by decommitment shall be reduced by the amounts equivalent to that part of the budget commitment for which:

- (a) the operations are suspended by a legal proceeding or by an administrative appeal having suspensory effect; or
- (b) it has not been possible to make a request for payment for reasons of force majeure seriously affecting implementation of all or part of the programme.

The national authorities claiming force majeure under point (b) of the first subparagraph shall demonstrate the direct consequences of the force majeure on the implementation of all or part of the programme.

For the purpose of points (a) and (b) of the first subparagraph, the reduction may be requested once, if the suspension or force

majeure lasted no longer than one year, or a number of times that corresponds to the duration of the force majeure or the number of years between the date of the legal or administrative decision suspending the implementation of the operation and the date of the final legal or administrative decision.

2. By 31 January, the Member State shall send to the Commission information on the exceptions referred to in points (a) and (b) of the first subparagraph of paragraph 1 for the amount to be declared by the end of the preceding year.

Article 88

Procedure

1. The Commission shall inform the Member State and the managing authority in good time whenever there is a risk of application of the decommitment rule under Article 86.

2. On the basis of the information it has received as of 31 January, the Commission shall inform the Member State and the managing authority of the amount of the decommitment resulting from that information.

3. The Member State shall have two months to agree to the amount to be decommitted or to submit its observations.

4. By 30 June, the Member State shall submit to the Commission a revised financing plan reflecting, for the financial year concerned, the reduced amount of support over one or more priorities of the programme taking into account the allocation by Fund and by category of region, where appropriate. Failing such submission, the Commission shall revise the financing plan by reducing the contribution from the ESI Funds for the financial year concerned. That reduction shall be allocated to each priority proportionately.

5. The Commission shall amend the decision adopting the programme, by means of implementing acts, not later than 30 September.

PART THREE

GENERAL PROVISIONS APPLICABLE TO THE ERDF, THE ESF AND THE COHESION FUND

TITLE I

OBJECTIVES AND FINANCIAL FRAMEWORK

CHAPTER I

Mission, goals and geographical coverage of support

Article 89

Mission and goals

1. The Funds shall contribute to developing and pursuing the actions of the Union leading to strengthening of its economic, social and territorial cohesion in accordance with Article 174 TFEU.

The actions supported by the Funds shall also contribute to the delivery of the Union strategy for smart, sustainable and inclusive growth.

2. For the purpose of the mission referred to in paragraph 1, the following goals shall be pursued:

- (a) Investment for growth and jobs in Member States and regions, to be supported by the Funds; and
- (b) European territorial cooperation, to be supported by the ERDF.

Article 90

Investment for growth and jobs goal

1. The Structural Funds shall support the Investment for growth and jobs goal in all regions corresponding to level 2 of the common classification of territorial units for statistics ('NUTS level 2 regions') established by Regulation (EC) No 1059/2003 amended by Regulation (EC) No 105/2007.

2. Resources for the Investment for growth and jobs goal shall be allocated among the following three categories of NUTS level 2 regions:

- (a) less developed regions, whose GDP per capita is less than 75 % of the average GDP of the EU-27;
- (b) transition regions, whose GDP per capita is between 75 % and 90 % of the average GDP of the EU-27;
- (c) more developed regions, whose GDP per capita is above 90 % of the average GDP of the EU-27.

The classification of regions under one of the three categories of regions shall be determined on the basis of how the GDP per capita of each region, measured in purchasing power parities (PPS) and calculated on the basis of Union figures for the period 2007 - 2009, relates to the average GDP of the EU-27 for the same reference period.

3. The Cohesion Fund shall support those Member States whose GNI per capita, measured in PPS and calculated on the basis of Union figures for the period 2008 - 2010, is less than 90 % of the average GNI per capita of the EU-27 for the same reference period.

The Member States eligible for funding from the Cohesion Fund in 2013, but whose nominal GNI per capita exceeds 90 % of the average GNI per capita of the EU-27 as calculated under the first subparagraph shall receive support from the Cohesion Fund on a transitional and specific basis.

4. Immediately following the entry into force of this Regulation, the Commission shall adopt a decision, by means of an implementing act, setting out the list of regions fulfilling the criteria of the three categories of regions referred to in

paragraph 2 and of Member States fulfilling the criteria of paragraph 3. That list shall be valid from 1 January 2014 to 31 December 2020.

5. In 2016, the Commission shall review the eligibility of Member States for support from the Cohesion Fund on the basis of Union GNI figures for the period 2012 - 2014 for the EU-27. Those Member States whose nominal GNI per capita falls below 90 % of the average GNI per capita of the EU-27 shall become newly eligible for support from the Cohesion Fund and those Member States which were eligible for the Cohesion Fund and whose nominal GNI per capita exceeds 90 %, shall lose their eligibility and shall receive support from the Cohesion Fund on a transitional and specific basis.

CHAPTER II

Financial framework

Article 91

Resources for economic, social and territorial cohesion

1. The resources for economic, social and territorial cohesion available for budgetary commitment for the period 2014 - 2020 shall be EUR 325 145 694 739 in 2011 prices, in accordance with the annual breakdown set out in Annex VI, of which EUR 322 145 694 739 represents the global resources allocated to the ERDF, the ESF and the Cohesion Fund and EUR 3 000 000 000 represents a specific allocation for the YEI. For the purposes of programming and subsequent inclusion in the budget of the Union, the amount of resources for economic, social and territorial cohesion shall be indexed at 2 % per year.

2. The Commission shall adopt a decision, by means of implementing acts, setting out the annual breakdown of the global resources per Member State under the Investment for growth and jobs goal and the European territorial cooperation goal, and the annual breakdown of the resources from the specific allocation for the YEI per Member State together with the list of eligible regions in accordance with the criteria and methodology set out in Annexes VII and VIII respectively, without prejudice to paragraph 3 of this Article or to Article 92(8).

3. 0,35 % of the global resources after the deduction of the support to the CEF referred to in Article 92(6), and to the aid for the most deprived referred to in Article 92(7) shall be allocated to technical assistance at the initiative of the Commission.

Article 92

Resources for the Investment for growth and jobs goal and for the European territorial cooperation goal

1. Resources for the Investment for growth and jobs goal shall amount to 96,33 % of the global resources (i.e., a total of EUR 313 197 435 409) and shall be allocated as follows:

- (a) 52,45 % (i.e., a total of EUR 164 279 015 916) for less developed regions;

- (b) 10,24 % (i.e., a total of EUR 32 084 931 311) for transition regions;
- (c) 15,67 % (i.e., a total of EUR 49 084 308 755) for more developed regions;
- (d) 21,19 % (i.e., a total of EUR 66 362 384 703) for Member States supported by the Cohesion Fund;
- (e) 0,44 % (i.e., a total of EUR 1 386 794 724) as additional funding for the outermost regions identified in Article 349 TFEU and the NUTS level 2 regions fulfilling the criteria laid down in Article 2 of Protocol No 6 to the 1994 Act of Accession.

2. In addition to the amounts set out in Article 91 and paragraph 1 of this Article, for the years 2014 and 2015, a further amount of EUR 94 200 000 and of EUR 92 400 000 respectively shall be made available as set out in the "Additional adjustments" under Annex VII. Those amounts shall be identified in the decision of the Commission referred to in Article 91(2).

3. In 2016, the Commission shall, in its technical adjustment for the year 2017 in accordance with Articles 4 and 5 of Regulation (EU, Euratom) No 1311/2013, review the total allocations under the Investment for growth and jobs goal of each Member State for 2017-2020, applying the allocation method set out in paragraphs 1 to 16 of Annex VII on the basis of the most recent statistics available and of the comparison, for the capped Member States, between the cumulated national GDP observed for the years 2014-2015 and the cumulated national GDP for the same period estimated in 2012 in accordance with paragraph 10 of Annex VII. Where there is a cumulative divergence of more than +/-5 % between the revised allocations and the total allocations, the total allocations shall be adjusted correspondingly. In accordance with Article 5 of Regulation (EU, Euratom) No 1311/2013, adjustments shall be spread in equal proportions over the years 2017-2020 and the corresponding ceilings of the financial framework shall be modified accordingly. The total net effect of the adjustments, whether positive or negative, shall not exceed EUR 4 000 000 000. Following the technical adjustment, the Commission shall adopt a decision, by means of implementing acts, setting out a revised annual breakdown of the global resources for each Member State.

4. In order to ensure that sufficient investment is targeted at youth employment, labour mobility, knowledge, social inclusion and combating poverty, the share of Structural Funds resources available for programming for operational programmes, under the Investment for growth and jobs goal allocated to the ESF in each Member State, shall not be lower than the corresponding ESF share for that Member State laid down in the operational programmes for the Convergence and Regional competitiveness and employment objectives for the 2007-2013 programming period. To that share shall be added an additional amount for each Member State determined in accordance with the method set out in Annex IX in order to ensure that the share of the ESF as a percentage of total combined resources for the Funds at

Union level, excluding the support from the Cohesion Fund for transport infrastructure under the CEF referred to in paragraph 6 and support from the Structural Funds for aid for the most deprived referred to in paragraph 7, in Member States is not less than 23,1 %. For the purposes of this paragraph, investment provided from the ESF to the YEI shall be considered to be part of the share of Structural Funds allocated to the ESF.

5. Resources for the YEI shall amount to EUR 3 000 000 000 from the specific allocation for the YEI and at least EUR 3 000 000 000 from ESF targeted investment.

6. The amount of support from the Cohesion Fund to be transferred to the CEF shall be EUR 10 000 000 000. It shall be spent for transport infrastructure projects in line with Regulation (EU) No 1316/2013 exclusively in Member States eligible for funding from the Cohesion Fund.

The Commission shall adopt a decision, by means of an implementing act, setting out the amount to be transferred from each Member State's Cohesion Fund allocation to the CEF, which amount shall be determined on a pro rata basis for the whole period. The Cohesion Fund allocation of each Member State shall be reduced accordingly.

The annual appropriations corresponding to the support from the Cohesion Fund referred to in the first subparagraph shall be entered in the relevant budget lines of the CEF as of the 2014 budgetary exercise.

The amount transferred from the Cohesion Fund to the CEF, referred to in the first subparagraph, shall be implemented by launching specific calls for projects implementing the core networks or for projects and horizontal activities identified in Part I of Annex I to Regulation (EU) No 1316/2013.

Rules applicable for the transport sector under Regulation (EU) No 1316/2013 shall apply to the specific calls referred to in the fourth subparagraph. Until 31 December 2016, the selection of projects eligible for financing shall respect the national allocations under the Cohesion Fund. As of 1 January 2017, resources transferred to the CEF which have not been committed to a transport infrastructure project shall be made available to all Member States eligible for funding from the Cohesion Fund to finance transport infrastructure projects in accordance with Regulation (EU) No 1316/2013.

In order to support Member States eligible for funding from the Cohesion Fund, which may experience difficulties in designing projects that are of a sufficient maturity, quality, or both, and which have sufficient added value for the Union, particular attention shall be given to programme support actions aimed at strengthening institutional capacity and the efficiency of public administrations and public services in relation to the development and implementation of projects listed in Part I of Annex I to the Regulation (EU) No 1316/2013. To ensure the highest possible absorption of the transferred funds in all

Member States eligible for funding from the Cohesion fund, the Commission may organise additional calls.

7. The support from the Structural Funds for aid for the most deprived under the Investment for Growth and Jobs goal shall be not less than EUR 2 500 000 000 and may be increased by up to EUR 1 000 000 000 by additional support decided on a voluntary basis by Member States.

The Commission shall adopt a decision, by means of an implementing act, setting out the amount to be transferred from each Member State's Structural Funds allocation to aid for the most deprived for the whole period. The Structural Funds allocation of each Member State shall be reduced accordingly, on the basis of a pro-rata reduction by category of region.

The annual appropriations corresponding to the support from the Structural Funds referred to in the first subparagraph shall be entered in the relevant budget lines of the aid for the most deprived instrument with the 2014 budgetary exercise.

8. EUR 330 000 000 of the Structural Funds resources for the Investment for growth and jobs goal shall be allocated to innovative actions under direct or indirect management by the Commission in the area of sustainable urban development.

9. Resources for the European territorial cooperation goal shall amount to 2,75 % of the global resources available for budgetary commitment from the Funds for the period 2014-2020 (i.e., a total of EUR 8 948 259 330).

10. For the purposes of this Article, Articles 18, 91, 93, 95, 99, 120, Annex I and Annex X of this Regulation, Article 4 of the ERDF Regulation, Article 4 and Articles 16 to 23 of the ESF Regulation, Article 3(3) of the ETC Regulation, the outermost region of Mayotte shall be considered to be a NUTS level 2 region falling into the category of less developed regions. For the purposes of Article 3(1) and (2) of the ETC Regulation, the regions of Mayotte and Saint Martin shall be considered to be NUTS level 3 regions.

Article 93

Non-transferability of resources between categories of regions

1. The total appropriations allocated to each Member State in respect of less developed regions, transition regions and more developed regions shall not be transferable between those categories of regions.

2. By way of derogation from paragraph 1, the Commission may accept, in duly justified circumstances which are linked to the implementation of one or more thematic objectives, a proposal by a Member State in its first submission of the Partnership Agreement or, in duly justified circumstances, at the time of allocation of the performance reserve, or in a major

revision of the Partnership Agreement, to transfer up to 3 % of the total appropriation for a category of regions to other categories of regions.

Article 94

Non-transferability of resources between goals

1. The total appropriations allocated to each Member State in respect of the Investment for growth and jobs goal and the European territorial cooperation goal shall not be transferable between those goals.

2. By way of derogation from paragraph 1, the Commission may in order to uphold the effective contribution of the Funds to the missions referred to in Article 89(1), in duly justified circumstances, and subject to the condition laid down in paragraph 3, accept by means of an implementing act a proposal by a Member State in its first submission of the Partnership Agreement to transfer a part of its appropriations for the European territorial cooperation goal to the Investment for growth and jobs goal.

3. The share of the European territorial cooperation goal in the Member State making the proposal referred to in paragraph 2 shall be not less than 35 % of the total allocated to that Member State in respect of the Investment for growth and jobs goal and the European territorial cooperation goal, and after transfer shall be not less than 25 % of that total.

Article 95

Additionality

1. For the purposes of this Article and Annex X, the following definitions apply:

(1) 'gross fixed capital formation' means all the resident producers' acquisitions, less disposals, of fixed assets during a given period and certain additions to the value of non-produced assets realised by the productive activity of producer or institutional units, as defined in Council Regulation (EC) No 2223/96 ⁽¹⁾;

(2) 'fixed assets' means all tangible or intangible assets produced as outputs from processes of production that are themselves used repeatedly, or continuously, in processes of production for more than one year;

(3) 'general government' means the totality of institutional units which, in addition to fulfilling their political responsibilities and their role of economic regulation, produce principally non-market services (possibly goods) for individual or collective consumption and redistribute income and wealth;

(4) 'public or equivalent structural expenditure' means the gross fixed capital formation of the general government.

⁽¹⁾ Council Regulation (EC) No 2223/96 of 25 June 1996 on the European system of national and regional accounts in the Community (OJ L 310, 30.11.1996, p. 1).

2. Support from the Funds for the Investment for growth and jobs goal shall not replace public or equivalent structural expenditure by a Member State.

3. Member States shall maintain for the period 2014-2020 a level of public or equivalent structural expenditure on average per year at least equal to the reference level set in the Partnership Agreement.

In setting the reference level referred to in the first subparagraph, the Commission and the Member States shall take into account the general macroeconomic conditions and specific or exceptional circumstances, such as privatisations, an exceptional level of public or equivalent structural expenditure by a Member State in the 2007-2013 programming period and the evolution of other public investment indicators. They shall also take into account changes in the national allocations from the Funds as compared to the years 2007-2013.

4. Verification of whether the level of public or equivalent structural expenditure under the Investment for growth and jobs goal has been maintained for the period shall only take place in those Member States in which less developed regions cover at least 15 % of the total population.

In those Member States in which less developed regions cover at least 65 % of the total population, the verification shall take place at national level.

In those Member States in which less developed regions cover more than 15 % and less than 65 % of the total population, the verification shall take place at regional level. For that purpose, those Member States shall provide to the Commission information about the expenditure in the less developed regions at each stage of the verification process.

5. The verification of whether the level of public or equivalent structural expenditure under the Investment for growth and jobs goal has been maintained shall take place at the time of submission of the Partnership Agreement (the "ex ante verification"), in 2018 (the "mid-term verification"), and in 2022 (the "ex post verification").

The detailed rules relating to the verification of additionality are set out in point 2 of Annex X.

6. If it is established by the Commission in the ex post verification that a Member State has not maintained the reference level of public or equivalent structural expenditure under the Investment for growth and jobs goal set out in the Partnership Agreement and as set out in Annex X, the Commission may, in relation to the degree of non-compliance, carry out a financial correction by adoption of a decision by means of implementing act. In determining whether to carry out a financial correction the Commission shall take into account whether the economic situation of the Member State

has significantly changed since the mid-term verification. The detailed rules relating to financial correction rates are set out in point 3 of Annex X.

7. Paragraphs 1 to 6 shall not apply to programmes under the European territorial cooperation goal.

TITLE II

PROGRAMMING

CHAPTER I

General provisions on the Funds

Article 96

Content, adoption and amendment of operational programmes under the Investment for growth and jobs goal

1. An operational programme shall consist of priority axes. A priority axis shall concern one Fund and one category of region, except in the case of the Cohesion Fund, and shall correspond, without prejudice to Article 59, to a thematic objective and comprise one or more of the investment priorities of that thematic objective, in accordance with the Fund-specific rules. Where appropriate and in order to increase its impact and effectiveness through a thematically coherent integrated approach, a priority axis may:

- (a) concern more than one category of region;
- (b) combine one or more complementary investment priorities from the ERDF, the Cohesion Fund and the ESF under one thematic objective;
- (c) in duly justified cases combine one or more complementary investment priorities from different thematic objectives in order to achieve the maximum contribution to that priority axis;
- (d) for the ESF, combine investment priorities from different thematic objectives set out in points (8), (9), (10) and (11) of the first paragraph of Article 9 in order to facilitate their contribution to other priority axes and in order to implement social innovation and transnational cooperation.

Member States may combine two or more of the options in points (a) to (d).

2. An operational programme shall contribute to the Union strategy for smart, sustainable and inclusive growth and to the achievement of economic, social and territorial cohesion and shall set out:

- (a) a justification for the choice of thematic objectives, corresponding investment priorities and financial allocations having regard to the Partnership Agreement, based on an identification of regional and, where appropriate, national needs including the need to address the challenges identified

in relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU and the relevant Council recommendations adopted in accordance with Article 148(4) TFEU, taking into account the ex ante evaluation in accordance with Article 55;

(b) for each priority axis other than technical assistance:

- (i) the investment priorities and corresponding specific objectives;
- (ii) in order to strengthen the result-orientation of the programming, the expected results for the specific objectives, and the corresponding result indicators, with a baseline value and a target value, where appropriate quantified in accordance with the Fund-specific rules;
- (iii) a description of the type and examples of actions to be supported under each investment priority and their expected contribution to the specific objectives referred to in point (i) including the guiding principles for the selection of operations and where appropriate, the identification of main target groups, specific territories targeted, types of beneficiaries, the planned use of financial instruments and major projects;
- (iv) the output indicators, including the quantified target value, which are expected to contribute to the results, in accordance with the Fund-specific rules, for each investment priority;
- (v) identification of implementation steps and financial and output indicators, and where appropriate, result indicators, to be used as milestones and targets for the performance framework in accordance with Article 21(1) and Annex II;
- (vi) the corresponding categories of intervention based on a nomenclature adopted by the Commission, and an indicative breakdown of the programmed resources;
- (vii) where appropriate, a summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries;

(c) for each priority axis concerning technical assistance:

- (i) specific objectives;
- (ii) the expected results for each specific objective, and, where objectively justified given the content of the actions, the corresponding result indicators, with a baseline value and a target value, in accordance with the Fund-specific rules;

(iii) a description of actions to be supported and their expected contribution to the specific objectives referred to in point (i);

(iv) the output indicators which are expected to contribute to the results;

(v) the corresponding categories of intervention based on a nomenclature adopted by the Commission, and an indicative breakdown of the programmed resources.

Point (ii) shall not apply where the Union contribution to the priority axis or axes concerning technical assistance in an operational programme does not exceed EUR 15 000 000.

(d) a financing plan containing the following tables:

- (i) tables specifying for each year, in accordance with Articles 60, 120 and 121, the amount of the total financial appropriation envisaged for the support from each of the Funds, identifying the amounts related to the performance reserve;
- (ii) tables specifying, for the whole programming period, for the operational programme and for each priority axis, the amount of the total financial appropriation of the support from each of the Funds and the national co-financing, identifying the amounts related to the performance reserve. For priority axes, which concern several categories of region, the tables shall specify the amount of total financial appropriation from the Funds and the national co-financing for each category of region.

For priority axes, which combine investment priorities from different thematic objectives, the table shall specify the amount of total financial appropriation from each of the Funds and the national co-financing for each of the corresponding thematic objectives.

Where the national co-financing is made up of public and private co-financing, the table shall give the indicative breakdown between the public and the private components. It shall show, for information purposes, the envisaged participation from the EIB;

(e) a list of major projects for which the implementation is planned during the programming period.

The Commission shall adopt implementing acts concerning the nomenclature referred to in points (b)(vi) and (c)(v) of the first subparagraph. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

3. Taking into account its content and objectives, an operational programme shall describe the integrated approach to territorial development, having regard to the Partnership Agreement, and showing how that operational programme contributes to the accomplishment of its objectives and expected results, specifying, where appropriate, the following:

- (a) the approach to the use of community-led local development instruments and the principles for identifying the areas where it will be implemented;
- (b) the indicative amount of the ERDF support for integrated actions for sustainable urban development, to be implemented in accordance with Article 7(3) of the ERDF Regulation and the indicative allocation of ESF support for integrated actions;
- (c) the approach to the use of the ITI instrument other than in cases covered by point (b), and their indicative financial allocation from each priority axis;
- (d) the arrangements for interregional and transnational actions, within the operational programmes, with beneficiaries located in at least one other Member State;
- (e) where Member States and regions participate in macro-regional strategies and sea-basin strategies, subject to the needs of the programme area as identified by the Member State, the contribution of the planned interventions under the programme to such strategies.

4. In addition, the operational programme shall specify the following:

- (a) where appropriate, the identification of whether and how it addresses the specific needs of geographical areas most affected by poverty or social exclusion, with special regard to marginalised communities, and persons with disabilities, and where relevant the contribution to the integrated approach set out in the Partnership Agreement;
- (b) where appropriate, the identification of whether and how it addresses the demographic challenges of regions or specific needs of areas which suffer from severe and permanent natural or demographic handicaps, as referred to in Article 174 TFEU and the contribution to the integrated approach set out in the Partnership Agreement to this end.

5. The operational programme shall identify:

- (a) the managing authority, the certifying authority, where applicable, and the audit authority;
- (b) the body to which payments are to be made by the Commission;

(c) the actions taken to involve the relevant partners referred to in Article 5 in the preparation of the operational programme, and the role of those partners in the implementation, monitoring and evaluation of the operational programme.

6. The operational programme shall also set out the following, having regard to the content of the Partnership Agreement and taking into account the institutional and legal framework of the Member States:

- (a) mechanisms to ensure coordination between the Funds, the EAFRD, the EMFF and other Union and national funding instruments, and with the EIB taking into account the relevant provisions laid down in the CSF;
- (b) for each ex ante conditionality, established in accordance with Article 19 and Annex XI, which is applicable to the operational programme, an assessment of whether the ex ante conditionality is fulfilled at the date of submission of the Partnership Agreement and operational programme, and where ex ante conditionalities are not fulfilled, a description of the actions to fulfil the ex ante conditionality, the bodies responsible and a timetable for such actions in accordance with the summary submitted in the Partnership Agreement;
- (c) a summary of the assessment of the administrative burden on beneficiaries and, where necessary, the actions planned, accompanied by an indicative timeframe, to reduce the administrative burden.

7. Each operational programme, except those where technical assistance is undertaken under a specific operational programme, shall, subject to the Member State's duly justified assessment of their relevance to the content and objectives of the operational programmes, include a description of:

- (a) the specific actions to take into account environmental protection requirements, resource efficiency, climate change mitigation and adaptation, disaster resilience and risk prevention and management, in the selection of operations;
- (b) the specific actions to promote equal opportunities and prevent discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation during the preparation, design and implementation of the operational programme and in particular in relation to access to funding, taking account of the needs of the various target groups at risk of such discrimination and in particular the requirements to ensure accessibility for persons with disabilities;
- (c) the contribution of the operational programme to the promotion of equality between men and women and, where appropriate, the arrangements to ensure the integration of gender perspective at operational programme and operation level.

Member States may submit an opinion from the national equality bodies on the measures set out in points (b) and (c) of the first subparagraph with the proposal for an operational programme under the Investment for growth and jobs goal.

8. When a Member State prepares a maximum of one operational programme for each Fund, the elements of the operational programme falling under point (a) of the first subparagraph of paragraph 2, points (a), (c) and (d) of paragraph 3, paragraph 4 and paragraph 6 may be incorporated solely under the relevant provisions of the Partnership Agreement.

9. The operational programme shall be prepared in accordance with a model. The Commission shall, in order to ensure uniform conditions for the implementation of this Article adopt an implementing act laying down that model. That implementing act shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

10. The Commission shall adopt a decision, by means of implementing acts, approving all the elements, including any of its future amendments, of the operational programme falling under this Article, except those falling under points (b)(vi), (c)(v) and (e) of the first subparagraph of paragraph 2, paragraphs 4 and 5, points (a) and (c) of paragraph 6 and paragraph 7, which remain under the responsibility of the Member States.

11. The managing authority shall notify the Commission of any decision amending the elements of the operational programme not covered by the Commission decision, referred to in paragraph 10, within one month of the date of that amending decision. The amending decision shall specify the date of its entry into force, which shall not be earlier than the date of its adoption.

Article 97

Specific provisions on the programming of support for the joint instruments for uncapped guarantees and securitisation under the Investment for growth and jobs goal

In accordance with Article 28, operational programmes referred to in point (b) of the first subparagraph of Article 39(4) shall include only the elements referred to in point (b)(i), (ii) and (iv) and point (d) of the first subparagraph of Article 96(2), Article 96(5) and point (b) of Article 96(6).

Article 98

Joint support from the Funds under the Investment for growth and jobs goal

1. The Funds may jointly provide support for operational programmes under the Investment for growth and jobs goal.

2. The ERDF and the ESF may finance, in a complementary manner and subject to a limit of 10 % of Union funding for

each priority axis of an operational programme, a part of an operation for which the costs are eligible for support from the other Fund on the basis of eligibility rules applied to that Fund, provided that such costs are necessary for the satisfactory implementation of the operation and are directly linked to it.

3. Paragraphs 1 and 2 shall not apply to programmes under the European territorial cooperation goal.

Article 99

Geographical scope of operational programmes under the Investment for growth and jobs goal

Unless otherwise agreed between the Commission and the Member State, operational programmes for the ERDF and the ESF shall be drawn up at the appropriate geographical level and at least at NUTS level 2, in accordance with the institutional and legal framework of the Member State.

Operational programmes with support from the Cohesion Fund shall be drawn up at national level.

CHAPTER II

Major projects

Article 100

Content

As part of an operational programme or operational programmes, which have been subject to a Commission decision under Article 96(10) of this Regulation or under Article 8(12) of the ETC Regulation, the ERDF and the Cohesion Fund may support an operation comprising a series of works, activities or services intended in itself to accomplish an indivisible task of a precise economic or technical nature which has clearly identified goals and for which the total eligible cost exceeds EUR 50 000 000 and in the case of operations contributing to the thematic objective under point (7) of the first paragraph of Article 9 where the total eligible cost exceeds EUR 75 000 000 (the 'major project'). Financial instruments shall not be considered to be major projects.

Article 101

Information necessary for the approval of a major project

Before a major project is approved, the managing authority shall ensure that the following information is available:

- (a) details concerning the body to be responsible for implementation of the major project, and its capacity;
- (b) a description of the investment and its location;
- (c) the total cost and total eligible cost, taking account of the requirements set out in Article 61;
- (d) feasibility studies carried out, including the options analysis, and the results;

- (e) a cost-benefit analysis, including an economic and a financial analysis, and a risk assessment;
- (f) an analysis of the environmental impact, taking into account climate change adaptation and mitigation needs, and disaster resilience;
- (g) an explanation as to how the major project is consistent with the relevant priority axes of the operational programme or operational programmes concerned, and its expected contribution to achieving the specific objectives of those priority axes and the expected contribution to socio-economic development;
- (h) the financing plan showing the total planned financial resources and the planned support from the Funds, the EIB, and all other sources of financing, together with physical and financial indicators for monitoring progress, taking account of the identified risks;
- (i) the timetable for implementing the major project and, where the implementation period is expected to be longer than the programming period, the phases for which support from the Funds is requested during the programming period.
- (a) the document referred to in point (c) of Article 125(3) setting out:
- (i) the body to be responsible for implementation of the major project;
- (ii) a description of the investment, its location, timetable and expected contribution of the major project to the specific objectives of the relevant priority axis or axes;
- (iii) the total cost and total eligible cost, taking account of the requirements set out in Article 61;
- (iv) the financing plan, and the physical and financial indicators for monitoring progress, taking account of the identified risks;
- (b) the quality review of the independent experts, providing clear statements on the investment's feasibility and the economic viability of the major project.

The Commission shall adopt implementing acts establishing the methodology to be used based on recognised best practices, in carrying out the cost-benefit analysis referred to in point (e) of the first paragraph. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

At the initiative of a Member State, the information in points (a) to (i) of the first paragraph may be assessed by independent experts supported by technical assistance of the Commission or, in agreement with the Commission, by other independent experts ("quality review"). In other cases, the Member State shall submit to the Commission the information set out in points (a) to (i) of the first paragraph as soon as it is available.

The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, laying down the methodology to be used in carrying out the quality review of a major project.

The Commission shall adopt implementing acts establishing the format for submission of the information set out in points (a) to (i) of the first paragraph. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

Article 102

Decision on a major project

1. Where a major project has been appraised positively by a quality review by independent experts, on the basis of their assessment of the information referred to in the first paragraph of Article 101, the managing authority may proceed with the selection of the major project in accordance with Article 125(3). The managing authority shall notify the Commission of the selected major project. That notification shall consist of the following elements:

The financial contribution to the major project selected by the Member State shall be deemed to be approved by the Commission in the absence of a decision, by means of an implementing act, refusing the financial contribution within three months of the date of the notification referred to in the first subparagraph. The Commission shall refuse the financial contribution only on the grounds that it has established a significant weakness in the independent quality review.

The Commission shall adopt implementing acts establishing the format for the notification referred to in the first subparagraph. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

2. In cases other than those referred to in paragraph 1 of this Article, the Commission shall appraise the major project on the basis of the information referred to in Article 101 in order to determine whether the requested financial contribution for the major project selected by the managing authority in accordance with Article 125(3) is justified. The Commission shall adopt a decision on the approval of the financial contribution to the selected major project, by means of an implementing act, no later than three months after the date of submission of the information referred to in Article 101.

3. The approval by the Commission under the second subparagraph of paragraph 1 and paragraph 2 shall be conditional on the first works contract being concluded, or, in the case of operations implemented under PPP structures, on the signing of the PPP agreement between the public body and the private sector body, within three years of the date of the approval. At the duly motivated request of the Member State, in particular in the case of delays resulting from administrative and legal proceedings related to the implementation of major projects, and made within the three year period, the Commission may adopt a decision, by means of an implementing act, on the extension of the period by not more than two years.

4. Where the Commission does not approve the financial contribution to the selected major project, it shall give in its decision the reasons for its refusal.

5. Major projects notified to the Commission under paragraph 1 or submitted for approval under paragraph 2 shall be contained in the list of major projects in an operational programme.

6. Expenditure relating to a major project may be included in a request for payment after the notification referred to in paragraph 1 or after the submission for approval referred to in paragraph 2. Where the Commission does not approve the major project selected by the managing authority, the declaration of expenditure following the adoption of the Commission decision shall be rectified accordingly.

Article 103

Decision on a major project subject to phased implementation

1. By way of derogation from the third paragraph of Article 101 and Article 102(1) and (2), the procedures set out in paragraphs 2, 3 and 4 of this Article shall apply to an operation which satisfies the following conditions:

- (a) the operation consists of the second or subsequent phase of a major project under the previous programming period for which the preceding phase or phases are approved by the Commission not later than 31 December 2015 pursuant to Regulation (EC) No 1083/2006; or in the case of Member States which acceded to the Union after 1 January 2013, no later than 31 December 2016;
- (b) the sum of the total eligible costs of all phases of the major project exceeds the respective levels set out in Article 100;
- (c) the major project application and assessment by the Commission under the previous programming period covered all the planned phases;
- (d) there are no substantial changes in the information referred to in the first paragraph of Article 101 of this Regulation for the major project compared to the information provided for the major project application submitted under Regulation (EC) No 1083/2006, in particular as regards the total eligible cost;
- (e) the phase of the major project to be implemented under the previous programming period is or will be ready to be used for its intended purpose as specified in the Commission decision by the deadline of the submission of the closure documents for the relevant operational programme or programmes.

2. The managing authority may proceed with the selection of the major project in accordance with Article 125(3) and submit the notification containing all the elements set out in point (a)

of the first subparagraph of Article 102(1) together with its confirmation that the condition under point (d) of paragraph 1 of this Article is fulfilled. No quality review of the information by independent experts shall be required.

3. The financial contribution to the major project selected by the managing authority shall be deemed to be approved by the Commission in the absence of a decision, by means of an implementing act, refusing the financial contribution to the major project within three months of the date of the notification referred to in paragraph 2. The Commission shall refuse the financial contribution only on the grounds that there have been substantial changes in the information referred to in point (d) of paragraph 1 or that the major project is not consistent with the relevant priority axis of the operational programme or programmes concerned.

4. Article 102(3) to (6) shall apply to decisions on a major project subject to phased implementation.

CHAPTER III

Joint action plan

Article 104

Scope

1. A joint action plan is an operation the scope of which is defined and which is managed in relation to the outputs and results to be achieved. It comprises a project or a group of projects, not consisting of the provision of infrastructure, carried out under the responsibility of the beneficiary, as part of an operational programme or programmes. The outputs and results of a joint action plan shall be agreed between a Member State and the Commission and shall contribute to specific objectives of the operational programmes and form the basis of support from the Funds. Results shall refer to direct effects of the joint action plan. The beneficiary of a joint action plan shall be a public law body. Joint action plans shall not be considered to be major projects.

2. The public expenditure allocated to a joint action plan shall be a minimum of EUR 10 000 000 or 20 % of the public support of the operational programme or programmes, whichever is lower. For the purpose of undertaking a pilot project, the minimum public expenditure allocated to one joint action plan for each operational programme may be reduced to EUR 5 000 000.

3. Paragraph 2 shall not apply to operations supported under the YEI.

Article 105

Preparation of joint action plans

1. The Member State, the managing authority or any designated public law body may submit a proposal for a joint action plan at the same time as or subsequent to the submission of the operational programmes concerned. That proposal shall contain all the information referred to in Article 106.

2. A joint action plan shall cover part of the period between 1 January 2014 and 31 December 2023. The outputs and results of a joint action plan shall give rise to reimbursement only if attained after the date of the decision of approval of the joint action plan referred to in Article 107 and before the end of the implementation period defined in that decision.

Article 106

Content of joint action plans

A joint action plan shall contain:

- (1) an analysis of the development needs and objectives justifying it, taking into account the objectives of the operational programmes and, where applicable, the relevant country-specific recommendations and the broad guidelines of the economic policies of the Member States and of the Union under Article 121(2) TFEU and the relevant Council recommendations which the Member States are to take into account in their employment policies under Article 148(4) TFEU;
- (2) the framework describing the relationship between the general and specific objectives of the joint action plan, the milestones and the targets for outputs and results, and the projects or types of projects envisaged;
- (3) the common and specific indicators used to monitor outputs and results, where relevant, by priority axis;
- (4) information on its geographic coverage and target groups;
- (5) its expected implementation period;
- (6) an analysis of its effects on the promotion of equality between men and women and the prevention of discrimination;
- (7) an analysis of its effects on the promotion of sustainable development, where appropriate;
- (8) its implementing provisions, including the following:
 - (a) the designation of the beneficiary responsible for the implementation of the joint action plan, providing guarantees of its competence in the domain concerned as well as its administrative and financial management capacity;

- (b) the arrangements for steering the joint action plan, in accordance with Article 108;
- (c) the arrangements for monitoring and evaluating the joint action plan including arrangements ensuring the quality, collection and storage of data on the achievement of milestones, outputs and results;
- (d) the arrangements ensuring the dissemination of information and communication in relation to the joint action plan and to the Funds;

(9) its financial arrangements, including the following:

- (a) the costs of achieving milestones, outputs and result targets with reference to point (2), based on the methods set out in Article 67(5) of this Regulation and in Article 14 of the ESF Regulation;
- (b) an indicative schedule of payments to the beneficiary linked to the milestones and targets;
- (c) the financing plan by operational programme and priority axis, including the total eligible amount and the amount of public expenditure.

The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts laying down the format of the model for the joint action plan. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

Article 107

Decision on the joint action plan

1. The Commission shall appraise the joint action plan on the basis of the information referred to in Article 106 in order to determine whether support from the Funds is justified.

Where the Commission, within two months following the submission of a joint action plan proposal, considers that it does not meet the appraisal requirements referred to in Article 104, it shall make observations to the Member State. The Member State shall provide to the Commission all necessary additional information requested and, where appropriate, revise the joint action plan accordingly.

2. Provided that any observations have been adequately taken into account, the Commission shall adopt a decision, by means of an implementing act, approving the joint action plan no later than four months after its submission by the Member State but not before the adoption of the operational programmes concerned.

3. The decision referred to in paragraph 2 shall indicate the beneficiary and the general and specific objectives of the joint action plan, the milestones and targets for outputs and results, the costs of achieving those milestones, outputs and result targets, and the financing plan by operational programme and priority axis, including the total eligible amount and the amount of public expenditure, the implementation period of the joint action plan and, where relevant, the geographical coverage and target groups of the joint action plan.

4. Where the Commission refuses, by means of an implementing act, to allow support from the Funds to be allocated to a joint action plan, it shall notify the Member State of its reasons within the period laid down in paragraph 2.

Article 108

Steering committee and amendment of the joint action plan

1. The Member State or the managing authority shall set up a steering committee for the joint action plan, distinct from the monitoring committee of the relevant operational programmes. The steering committee shall meet at least twice a year and shall report to the managing authority. The managing authority shall inform the relevant monitoring committee of the results of the work carried out by the steering committee and the progress of the implementation of the joint action plan in accordance with point (e) of Article 110(1) and point (a) of Article 125(2).

The composition of the steering committee shall be decided by the Member State in agreement with the relevant managing authority, respecting the principle of partnership.

The Commission may participate in the work of the steering committee in an advisory capacity.

2. The steering committee shall carry out the following activities:

- (a) review progress towards achieving the milestones, outputs and results of the joint action plan;
- (b) consider and approve any proposal to amend the joint action plan in order to take account of any issues affecting its performance.

3. Requests for amendment of joint action plans submitted by a Member State to the Commission shall be duly substantiated. The Commission shall assess whether the request for amendment is justified, taking account of the information provided by the Member State. The Commission may make observations and the Member State shall provide to the Commission all necessary additional information. The Commission shall adopt a decision, by means of an implementing act, on a request for amendment no later than three months after its submission by the Member State, provided that any observations made by the Commission have been

satisfactorily taken into account. The amendment shall enter into force from the date of the decision, unless otherwise set out in the decision.

Article 109

Financial management and control of the joint action plan

1. Payments to the beneficiary of a joint action plan shall be treated as lump sums or standard scales of unit costs. The ceiling for lump sums set out in point (c) of the first subparagraph of Article 67(1) shall not apply.

2. The financial management, control and audit of the joint action plan shall be aimed exclusively at verifying that the conditions for payments defined in the decision approving the joint action plan have been fulfilled.

3. The beneficiary of a joint action plan and the bodies acting under its responsibility may apply their accounting practices for the costs of implementing operations. Those accounting practices and the costs actually incurred by the beneficiary shall not be subject to audit by the audit authority or the Commission.

TITLE III

MONITORING, EVALUATION, INFORMATION AND COMMUNICATION

CHAPTER I

Monitoring and evaluation

Article 110

Functions of the monitoring committee

1. The monitoring committee shall examine in particular:
- (a) any issues that affect the performance of the operational programme;
 - (b) progress made in implementation of the evaluation plan and the follow-up given to findings of evaluations;
 - (c) implementation of the communication strategy;
 - (d) implementation of major projects;
 - (e) implementation of joint action plans;
 - (f) actions to promote equality between men and women, equal opportunities, and non-discrimination, including accessibility for persons with disabilities;
 - (g) actions to promote sustainable development;
 - (h) where applicable ex ante conditionalities are not fulfilled at the date of the submission of the Partnership Agreement and operational programme, progress on actions to fulfil the applicable ex ante conditionalities;
 - (i) financial instruments.

2. By way of derogation from Article 49(3), the monitoring committee shall examine and approve:

- (a) the methodology and criteria used for selection of operations;
- (b) the annual and final implementation reports;
- (c) the evaluation plan for the operational programme and any amendment of the evaluation plan, including where either is part of a common evaluation plan pursuant to Article 114(1);
- (d) the communication strategy for the operational programme and any amendment of the strategy;
- (e) any proposal by the managing authority for any amendment to the operational programme.

Article 111

Implementation reports for the Investment for growth and jobs goal

1. By 31 May 2016 and by the same date of each subsequent year until and including 2023 the Member State shall submit to the Commission an annual implementation report in accordance with Article 50(1). The report submitted in 2016 shall cover the financial years 2014 and 2015, as well as the period between the starting date for eligibility of expenditure and 31 December 2013.

2. For the reports submitted in 2017 and 2019, the deadline referred to in paragraph 1 shall be 30 June.

3. Annual implementation reports shall set out information on:

- (a) implementation of the operational programme in accordance with Article 50(2);
- (b) progress in preparation and implementation of major projects and joint action plans.

4. The annual implementation reports submitted in 2017 and 2019 shall set out and assess the information required under Article 50(4) and (5) respectively and the information set out in paragraph 3 of this Article together with the following information:

- (a) progress in the implementation of the evaluation plan and the follow-up given to the findings of evaluations;
- (b) the results of the information and publicity measures of the Funds carried out under the communication strategy;
- (c) the involvement of the partners in the implementation, monitoring and evaluation of the operational programme.

The annual implementation reports submitted in 2017 and 2019 may, depending on the content and objectives of operational programmes, set out information and assess the following:

- (a) progress in the implementation of the integrated approach to territorial development, including development of regions facing demographic challenges and permanent or natural handicaps, sustainable urban development, and community-led local development under the operational programme;
- (b) progress in the implementation of actions to reinforce the capacity of Member State authorities and beneficiaries to administer and use the Funds;
- (c) progress in the implementation of any interregional and transnational actions;
- (d) where appropriate, the contribution to macro-regional and sea basin strategies;
- (e) the specific actions taken to promote equality between men and women and to prevent discrimination, in particular accessibility for persons with disabilities, and the arrangements implemented to ensure the integration of the gender perspective in the operational programme and operations;
- (f) actions taken to promote sustainable development in accordance with Article 8;
- (g) progress in the implementation of actions in the field of social innovation, where appropriate;
- (h) progress in the implementation of measures to address the specific needs of geographical areas most affected by poverty or of target groups at highest risk of poverty, discrimination or social exclusion, with special regard to marginalised communities and persons with disabilities, long term unemployed and young people not in employment, including, where appropriate, the financial resources used.

By way of derogation from the first and second subparagraphs, and in order to ensure consistency between the Partnership Agreement and the progress report, Member States with no more than one operational programme per Fund may include the information relating to ex ante conditionalities referred to in Article 50(3), the information required by Article 50(4) and the information referred to in points (a), (b), (c) and (h) of the second subparagraph of this paragraph in the progress report instead of the annual implementation reports submitted in 2017 and 2019 respectively and the final implementation report, without prejudice to point (b) of Article 110(2).

5. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts establishing the models for the annual and final implementation reports. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

Article 112

Transmission of financial data

1. By 31 January, 31 July and 31 October, the Member State shall transmit electronically to the Commission for monitoring purposes, for each operational programme and by priority axis:

- (a) the total and public eligible cost of the operations and the number of operations selected for support;
- (b) the total eligible expenditure declared by beneficiaries to the managing authority.

2. In addition, the transmission made by 31 January shall contain the above data broken down by category of intervention. That transmission shall be considered to fulfil the requirement for the submission of financial data referred to in Article 50(2).

3. A forecast of the amount for which Member States expect to submit payment applications for the current financial year and the subsequent financial year shall accompany the transmissions to be made by 31 January and 31 July.

4. The cut-off date for the data submitted under this Article shall be the end of the month preceding the month of submission.

5. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts establishing the model to be used when submitting the financial data to the Commission for monitoring purposes. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

Article 113

Cohesion Report

The report of the Commission referred to in Article 175 TFEU shall include:

- (a) a record of progress made towards achieving economic, social and territorial cohesion, including the socio-economic situation and development of the regions, as well as the integration of the Union's priorities;
- (b) a record of the role of the Funds, EIB funding and the other instruments in, as well as the effect of other Union and national policies on, the progress made;

- (c) where appropriate an indication of future Union measures and policies necessary to strengthen economic, social and territorial cohesion, as well as to deliver the Union's priorities.

Article 114

Evaluation

1. An evaluation plan shall be drawn up by the managing authority or Member State for one or more operational programmes. The evaluation plan shall be submitted to the monitoring committee no later than one year after the adoption of the operational programme.

2. By 31 December 2022, managing authorities shall submit to the Commission, for each operational programme, a report summarising the findings of evaluations carried out during the programming period and the main outputs and results of the operational programme, providing comments on the reported information.

3. The Commission shall carry out ex post evaluations in close cooperation with the Member States and managing authorities.

4. Paragraphs 1 and 2 of this Article shall not apply to the dedicated programmes referred to in point (b) of the first subparagraph of Article 39(4).

CHAPTER II

Information and communication

Article 115

Information and communication

1. Member States and managing authorities shall be responsible for:

- (a) drawing up communication strategies;
- (b) ensuring the establishment of a single website or a single website portal providing information on, and access to, all operational programmes in that Member State, including information about the timing of implementation of programming and any related public consultation processes;
- (c) informing potential beneficiaries about funding opportunities under operational programmes;
- (d) publicising to Union citizens the role and achievements of cohesion policy and of the Funds through information and communication actions on the results and impact of Partnership Agreements, operational programmes and operations.

2. Member States or managing authorities shall, in order to ensure transparency concerning support from the Funds, maintain a list of operations by operational programme and by Fund in a spreadsheet data format, which allows data to be sorted, searched, extracted, compared and easily published on the internet, for instance in CSV or XML format. The list of operations shall be accessible through the single website or the single website portal providing a list and summary of all operational programmes in that Member State.

In order to encourage the use of the list of operations subsequently by the private sector, civil society or national public administration, the website may clearly indicate the applicable licensing rules under which data are published.

The list of operations shall be updated at least every six months.

The minimum information to be set out in the list of operations is laid down in Annex XII.

3. Detailed rules concerning the information and communication measures for the public and information measures for applicants and for beneficiaries are laid down in Annex XII.

4. The Commission shall adopt implementing acts concerning the technical characteristics of information and communication measures for the operation and instructions for creating the emblem and a definition of the standard colours. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

Article 116

Communication strategy

1. The Member State or the managing authorities shall draw up a communication strategy for each operational programme. A common communication strategy may be drawn up for several operational programmes. The communication strategy shall take into account the size of the operational programme or programmes concerned, in accordance with the principle of proportionality.

The communication strategy shall include the elements set out in Annex XII.

2. The communication strategy shall be submitted to the monitoring committee for approval in accordance with point (d) of Article 110(2) no later than six months after the adoption of the operational programme or programmes concerned.

Where a common communication strategy is drawn up for several operational programmes and concerns several monitoring committees, the Member State may designate one monitoring committee to be responsible, in consultation with the other relevant monitoring committees, for the approval of the

common communication strategy and for the approval of any subsequent amendments of that strategy.

Where necessary, the Member State or managing authorities may amend the communication strategy during the programming period. The amended communication strategy shall be submitted by the managing authority to the monitoring committee for approval in accordance with point (d) of Article 110(2).

3. By way of derogation from the third subparagraph of paragraph 2, the managing authority shall inform the monitoring committee or committees responsible at least once a year on the progress in the implementation of the communication strategy as referred to in point (c) of Article 110(1) and on its analysis of the results as well as on the planned information and communication activities to be carried out in the following year. The monitoring committee shall, if it considers it to be appropriate, give an opinion on the planned activities for the following year.

Article 117

Information and communication officers and their networks

1. Each Member State shall designate an information and communication officer to coordinate information and communication actions in relation to one or more Funds, including relevant programmes under the European territorial cooperation goal, and shall inform the Commission accordingly.

2. The information and communication officer shall be responsible for the coordination of the national network of Fund communicators, where such a network exists, the creation and maintenance of the website or website portal referred to in Annex XII and the provision of an overview of communication measures undertaken at Member State level.

3. Each managing authority shall designate one person to be responsible for information and communication at operational programme level and shall inform the Commission of those designated. Where appropriate, one person may be designated for several operational programmes.

4. Union networks comprising the members designated by the Member States shall be set up by the Commission to ensure exchange of information on the results of the implementation of the communication strategies, the exchange of experience in implementing the information and communication measures, and the exchange of good practices.

TITLE IV

TECHNICAL ASSISTANCE

Article 118

Technical assistance at the initiative of the Commission

The Funds, taking into account the deductions made in accordance with Article 91(3), may support technical assistance up to a ceiling of 0,35 % of their respective annual allocation.

Article 119

Technical assistance of the Member States

1. The amount of the Funds allocated to technical assistance shall be limited to 4 % of the total amount of the Funds allocated to operational programmes in a Member State under each category of region, where applicable, of the Investment for growth and jobs goal.

The specific allocation for YEI may be taken into account by a Member State in the calculation of the limit to the total amount of the Funds allocated to the technical assistance of the Member State.

2. Each Fund may support technical assistance operations eligible under any of the other Funds. Without prejudice to paragraph 1, the allocation for technical assistance from a Fund shall not exceed 10 % of the total allocation of that Fund to operational programmes in a Member State under each category of region, where applicable, of the Investment for growth and jobs goal.

3. By way of derogation from Article 70(1) and (2), technical assistance operations may be implemented outside the programme area, but within the Union, provided that the operations are for the benefit of the operational programme, or, in the case of a technical assistance operational programme, for the other programmes concerned.

4. In the case of the Structural Funds, where the allocations referred to in paragraph 1 are used to support technical assistance operations relating to more than one category of region, the expenditure relating to the operations may be implemented under a priority axis combining different categories of region and attributed on a pro rata basis taking into account the allocation under each category of region as a share of the total allocation to the Member State.

5. By way of derogation from paragraph 1, where the total amount of the Funds allocated to a Member State under the Investment for growth and jobs goal does not exceed EUR 1 000 000 000 the amount allocated to technical assistance may increase up to 6 % of that total amount or EUR 50 000 000, whichever is the lower.

6. Technical assistance shall take the form of a mono-fund priority axis within an operational programme or of a specific operational programme, or both.

TITLE V

FINANCIAL SUPPORT FROM THE FUNDS

Article 120

Determination of co-financing rates

1. The Commission decision adopting an operational programme shall fix the co-financing rate and the maximum

amount of support from Funds for each priority axis. Where a priority axis concerns more than one category of regions or more than one Fund, the Commission decision shall, where necessary, fix the co-financing rate by category of region and Fund.

2. For each priority axis, the Commission decision shall set out whether the co-financing rate for the priority axis is to be applied to:

(a) total eligible expenditure, including public and private expenditure; or

(b) eligible public expenditure.

3. The co-financing rate at the level of each priority axis and, where relevant, by category of region and Fund, of operational programmes under the Investment for growth and jobs goal shall be no higher than:

(a) 85 % for the Cohesion Fund;

(b) 85 % for the less developed regions of Member States whose average GDP per capita for the period 2007 - 2009 was below 85 % of the EU-27 average during the same period and for the outermost regions including the additional allocation for outermost regions in accordance with point (e) of Article 92(1) and Article 4(2) of the ETC Regulation;

(c) 80 % for the less developed regions of Member States other than those referred to in point (b), and for all regions whose GDP per capita used as an eligibility criterion for the 2007-2013 programming period was less than 75 % of the average of the EU-25 but whose GDP per capita is above 75 % of the GDP average of the EU-27, as well as for regions defined in Article 8(1) of Regulation (EU) 1083/2006 receiving transitional support for the 2007-2013 programming period;

(d) 60 % for the transition regions other than those referred to in point (c);

(e) 50 % for the more developed regions other than those referred to in point (c).

For the period from 1 January 2014 to 30 June 2017 the co-financing rate at the level of each priority axis for all operational programmes in Cyprus shall be not higher than 85 %.

The Commission shall carry out a review to assess the justification for maintaining the co-financing rate, referred to in the second subparagraph, after 30 June 2017 and shall if necessary make a legislative proposal before 30 June 2016.

The co-financing rate at the level of each priority axis of operational programmes under the European territorial cooperation goal shall be no higher than 85 %.

The maximum co-financing rate under points (b), (c), (d) and (e) of the first subparagraph shall be increased for each priority axis implementing the YEI and where a priority axis is dedicated to social innovation or to transnational cooperation, or a combination of both. That increase shall be determined in accordance with the Fund-specific rules.

4. The co-financing rate of the additional allocation in accordance with point (e) of Article 92(1) shall be no higher than 50 % for NUTS level 2 regions fulfilling the criteria laid down in Protocol No 6 to the 1994 Act of Accession.

5. The maximum co-financing rate under paragraph 3 at the level of a priority axis shall be increased by ten percentage points, where the whole of a priority axis is delivered through financial instruments, or through community-led local development.

6. The contribution from the Funds for each priority axis shall not be less than 20 % of the eligible public expenditure.

7. A separate priority axis with a co-financing rate of up to 100 % may be established within an operational programme to support operations implemented through financial instruments set up at Union level and managed directly or indirectly by the Commission. Where a separate priority axis is established for this purpose, the support under this axis may not be implemented by any other means.

Article 121

Modulation of the co-financing rates

The co-financing rate from the Funds to a priority axis may be modulated to take account of:

- (1) the importance of the priority axis for the delivery of the Union strategy for smart, sustainable and inclusive growth, having regard to the specific gaps to be addressed;
- (2) the protection and improvement of the environment, principally through the application of the precautionary principle, the principle of preventive action and the polluter pays principle;
- (3) the rate of mobilisation of private financing;
- (4) the coverage of areas with severe and permanent natural or demographic handicaps defined as follows:
 - (a) island Member States eligible under the Cohesion Fund, and other islands except those on which the capital of a Member State is situated or which have a fixed link to the mainland;
 - (b) mountainous areas as defined by the national legislation of the Member State;
 - (c) sparsely (i.e. less than 50 inhabitants per square kilometre) and very sparsely (less than 8 inhabitants per square kilometre) populated areas;

- (d) the inclusion of the outermost regions as referred to in Article 349 TFEU.

PART FOUR

GENERAL PROVISIONS APPLICABLE TO THE FUNDS AND THE EMFF

TITLE I

MANAGEMENT AND CONTROL

CHAPTER I

Management and control systems

Article 122

Responsibilities of Member States

1. Member States shall ensure that management and control systems for operational programmes are set up in accordance with Articles 72, 73 and 74.
2. Member States shall prevent, detect and correct irregularities and shall recover amounts unduly paid, together with any interest on late payments. They shall notify the Commission of irregularities that exceed EUR 10 000 in contribution from the Funds and shall keep it informed of significant progress in related administrative and legal proceedings.

The Member States shall not notify the Commission of irregularities in relation to the following:

- (a) cases where the irregularity consists solely of the failure to execute, in whole or in part, an operation included in the co-financed operational programme owing to the bankruptcy of the beneficiary;
- (b) cases brought to the attention of the managing authority or certifying authority by the beneficiary voluntarily and before detection by either authority, whether before or after the payment of the public contribution;
- (c) cases which are detected and corrected by the managing authority or certifying authority before inclusion of the expenditure concerned in a statement of expenditure submitted to the Commission.

In all other cases, in particular those preceding a bankruptcy or in cases of suspected fraud, the detected irregularities and the associated preventive and corrective measures shall be reported to the Commission.

When amounts unduly paid to a beneficiary cannot be recovered and this is as a result of fault or negligence on the part of a Member State, the Member State shall be responsible for reimbursing the amounts concerned to the budget of the Union. Member States may decide not to recover an amount unduly paid if the amount to be recovered from the beneficiary, not including interest, does not exceed EUR 250 in contribution from the Funds.

The Commission shall be empowered to adopt delegated acts in accordance with Article 149 laying down additional detailed rules on the criteria for determining the cases of irregularity to be reported, the data to be provided and on the conditions and procedures to be applied to determine whether amounts which are irrecoverable shall be reimbursed by Member States.

The Commission shall adopt implementing acts setting out the frequency of the reporting of irregularities and the reporting format to be used. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

3. Member States shall ensure that no later than 31 December 2015, all exchanges of information between beneficiaries and a managing authority, a certifying authority, an audit authority and intermediate bodies can be carried out by means of electronic data exchange systems.

The systems referred to in the first subparagraph shall facilitate interoperability with national and Union frameworks and allow for the beneficiaries to submit all information referred to in the first subparagraph only once.

The Commission shall adopt implementing acts laying down detailed rules concerning the exchanges of information under this paragraph. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

4. Paragraph 3 shall not apply to the EMFF.

CHAPTER II

Management and control authorities

Article 123

Designation of authorities

1. Each Member State shall designate, for each operational programme, a national, regional or local public authority or body or a private body as managing authority. The same managing authority may be designated for more than one operational programme.

2. The Member State shall designate, for each operational programme, a national, regional or local public authority or body as a certifying authority, without prejudice to paragraph 3. The same certifying authority may be designated for more than one operational programme.

3. The Member State may designate for an operational programme a managing authority, which is a public authority or body, to carry out, in addition, the functions of the certifying authority.

4. The Member State shall designate, for each operational programme, a national, regional or local public authority or body, functionally independent from the managing authority and the certifying authority, as audit authority. The same audit authority may be designated for more than one operational programme.

5. In the case of the Funds relating to the Investment for growth and jobs goal and in the case of the EMFF, provided that the principle of separation of functions is respected, the managing authority, the certifying authority, where applicable, and the audit authority may be part of the same public authority or body.

Where the total amount of support from the Funds to an operational programme exceeds EUR 250 000 000 or from the EMFF exceeds EUR 100 000 000, the audit authority may be part of the same public authority or body as the managing authority either if, pursuant to the applicable provisions for the previous programming period, the Commission has informed the Member State prior to the date of adoption of the operational programme concerned of its conclusion that it can rely principally on its audit opinion, or if the Commission is satisfied on the basis of the experience of the previous programming period that the institutional organisation and accountability of the audit authority provide adequate guarantees of its functional independence and reliability.

6. The Member State may designate one or more intermediate bodies to carry out certain tasks of the managing or the certifying authority under the responsibility of that authority. The relevant arrangements between the managing authority or certifying authority and the intermediate bodies shall be formally recorded in writing.

7. The Member State or the managing authority may entrust the management of part of an operational programme to an intermediate body by way of an agreement in writing between the intermediate body and the Member State or managing authority (a 'global grant'). The intermediate body shall provide guarantees of its solvency and competence in the domain concerned, as well as of its administrative and financial management capacity.

8. The Member State may, at its own initiative, designate a coordinating body whose responsibility shall be to liaise with and provide information to the Commission, to coordinate activities of the other relevant designated bodies and to promote the harmonised application of applicable law.

9. The Member State shall lay down in writing rules governing its relationship with the managing authorities, certifying authorities and audit authorities, the relations between such authorities, and the relationship of such authorities with the Commission.

Article 124

Procedure for the designation of the managing authority and the certifying authority

1. The Member State shall notify the Commission of the date and form of the designations, which shall be carried out at an appropriate level, of the managing authority and, where appropriate, of the certifying authority prior to the submission of the first application for interim payment to the Commission.

2. The designations referred to in paragraph 1 shall be based on a report and an opinion of an independent audit body that assesses the fulfilment by the authorities of the criteria relating to the internal control environment, risk management, management and control activities, and monitoring set out in Annex XIII. The independent audit body shall be the audit authority, or another public or private law body with the necessary audit capacity, which is independent of the managing authority and, where applicable, of the certifying authority, and which shall carry out its work taking account of internationally accepted audit standards. Where the independent audit body concludes that the part of the management and control system, concerning the managing authority or the certifying authority, is essentially the same as for the previous programming period, and that there is evidence, on the basis of audit work done in accordance with the relevant provisions of Regulation (EC) No 1083/2006 and Council Regulation (EC) No 1198/2006⁽¹⁾, of their effective functioning during that period, it may conclude that the relevant criteria are fulfilled without carrying out additional audit work.

3. Where the total amount of support from the Funds to an operational programme exceeds EUR 250 000 000 or from the EMFF exceeds EUR 100 000 000, the Commission may request, within one month of notification of the designations referred to in paragraph 1, the report and the opinion of the independent audit body referred to in paragraph 2 and the description of the functions and procedures in place for the managing authority or, where appropriate, the certifying authority. The Commission shall decide whether to request those documents on the basis of its risk assessment, taking into account information on significant changes in the functions and procedures of the managing authority or, where appropriate, the certifying authority compared to those in place for the previous programming period, and relevant evidence of their effective functioning.

The Commission may make observations within two months of receipt of the documents referred to in the first subparagraph. Without prejudice to Article 83, the examination of those documents shall not interrupt the treatment of applications for interim payments.

4. Where the total amount of support from the Funds to an operational programme exceeds EUR 250 000 000 or from the EMFF exceeds EUR 100 000 000 and there are significant changes in the functions and procedures of the managing authority or, where appropriate, of the certifying authority compared to those in place for the previous programming period, the Member State may, at its own initiative, submit to the Commission, within two months of the notification of the designations referred to in paragraph 1, the documents referred to in paragraph 3. The Commission shall make observations on those documents within three months of their receipt.

5. Where existing audit and control results show that the designated authority no longer fulfils the criteria referred to in

paragraph 2, the Member State shall, at an appropriate level, fix, according to the severity of the problem, a period of probation, during which the necessary remedial action shall be taken.

Where the designated authority fails to implement the required remedial action within the period of probation determined by the Member State, the Member State, at an appropriate level, shall end its designation.

The Member State shall notify the Commission without delay when a designated authority is put under probation, providing information on the respective period of probation, when, following implementation of remedial actions, the probation is ended, as well as when the designation of an authority is ended. The notification that a designated body is put on probation by the Member State, without prejudice to the application of Article 83, shall not interrupt the treatment of applications for interim payments.

6. Where the designation of a managing authority or a certifying authority is ended, Member States shall designate, in accordance with the procedure provided for in paragraph 2, a new body, to take over the functions of the managing authority or of the certifying authority, and shall notify the Commission thereof.

7. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts concerning the model for the report and opinion of the independent audit body and the description of the functions and procedures in place for the managing authority and, where appropriate, the certifying authority. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

Article 125

Functions of the managing authority

1. The managing authority shall be responsible for managing the operational programme in accordance with the principle of sound financial management.

2. As regards the management of the operational programme, the managing authority shall:

(a) support the work of the monitoring committee referred to in Article 47 and provide it with the information it requires to carry out its tasks, in particular data relating to the progress of the operational programme in achieving its objectives, financial data and data relating to indicators and milestones;

(b) draw up and, after approval by the monitoring committee, submit to the Commission annual and final implementation reports referred to in Article 50;

⁽¹⁾ Council Regulation (EC) No 1198/2006 of 27 July 2006 on the European Fisheries Fund (OJ L 223, 15.8.2006, p. 1).

- (c) make available to intermediate bodies and beneficiaries information that is relevant to the execution of their tasks and the implementation of operations respectively;
- (d) establish a system to record and store in computerised form data on each operation necessary for monitoring, evaluation, financial management, verification and audit, including data on individual participants in operations, where applicable;
- (e) ensure that the data referred to in point (d) is collected, entered and stored in the system referred to in point (d), and that data on indicators is broken down by gender where required by Annexes I and II of the ESF Regulation.
3. As regards the selection of operations, the managing authority shall:
- (a) draw up and, once approved, apply appropriate selection procedures and criteria that:
- (i) ensure the contribution of operations to the achievement of the specific objectives and results of the relevant priority;
- (ii) are non-discriminatory and transparent;
- (iii) take into account the general principles set out in Articles 7 and 8;
- (b) ensure that a selected operation falls within the scope of the Fund or Funds concerned and can be attributed to a category of intervention or, in the case of the EMFF, a measure identified in the priority or priorities of the operational programme;
- (c) ensure that the beneficiary is provided with a document setting out the conditions for support for each operation including the specific requirements concerning the products or services to be delivered under the operation, the financing plan, and the time-limit for execution;
- (d) satisfy itself that the beneficiary has the administrative, financial and operational capacity to fulfil the conditions referred to in point (c) before approval of the operation;
- (e) satisfy itself that, where the operation has started before the submission of an application for funding to the managing authority, applicable law relevant for the operation has been complied with;
- (f) ensure that operations selected for support from the Funds or the EMFF do not include activities which were part of an operation which has been or should have been subject to a procedure of recovery in accordance with Article 71 following the relocation of a productive activity outside the programme area;
- (g) determine the categories of intervention or, in the case of the EMFF, the measures to which the expenditure of an operation shall be attributed.
4. As regards the financial management and control of the operational programme, the managing authority shall:
- (a) verify that the co-financed products and services have been delivered and that expenditure declared by the beneficiaries has been paid and that it complies with applicable law, the operational programme and the conditions for support of the operation;
- (b) ensure that beneficiaries involved in the implementation of operations reimbursed on the basis of eligible costs actually incurred maintain either a separate accounting system or an adequate accounting code for all transactions relating to an operation;
- (c) put in place effective and proportionate anti-fraud measures taking into account the risks identified;
- (d) set up procedures to ensure that all documents regarding expenditure and audits required to ensure an adequate audit trail are held in accordance with the requirements of point (g) of Article 72;
- (e) draw up the management declaration and annual summary referred to in points (a) and (b) of Article 59(5) of the Financial Regulation.
- By way of derogation from point (a) of the first subparagraph, the ETC Regulation may establish specific rules on verification applicable to cooperation programmes.
5. Verifications pursuant to point (a) of the first subparagraph of paragraph 4 shall include the following procedures:
- (a) administrative verifications in respect of each application for reimbursement by beneficiaries;
- (b) on-the-spot verifications of operations.
- The frequency and coverage of the on-the-spot verifications shall be proportionate to the amount of public support to an operation and to the level of risk identified by such verifications and audits by the audit authority for the management and control system as a whole.
6. On-the-spot verifications of individual operations pursuant to point (b) of the first subparagraph of paragraph 5 may be carried out on a sample basis.
7. Where the managing authority is also a beneficiary under the operational programme, arrangements for the verifications referred to in point (a) of the first subparagraph of paragraph 4 shall ensure adequate separation of functions.

8. The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, laying down rules specifying the information in relation to the data to be recorded and stored in computerised form within the monitoring system established under point (d) of paragraph 2 of this Article.

The Commission shall adopt implementing acts laying down the technical specifications of the system established under point (d) of paragraph 2 of this Article. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

9. The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, laying down the detailed minimum requirements for the audit trail referred to in point (d) of the first subparagraph of paragraph 4 of this Article in respect of the accounting records to be maintained and the supporting documents to be held at the level of the certifying authority, managing authority, intermediate bodies and beneficiaries.

10. The Commission shall, in order to ensure uniform conditions on the implementation of this Article, adopt implementing acts concerning the model for the management declaration referred to in point (e) of the first subparagraph of paragraph 4 of this Article. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

Article 126

Functions of the certifying authority

The certifying authority of an operational programme shall be responsible in particular for:

- (a) drawing up and submitting payment applications to the Commission, and certifying that they result from reliable accounting systems, are based on verifiable supporting documents and have been subject to verifications by the managing authority;
- (b) drawing up the accounts referred to in point (a) of Article 59(5) of the Financial Regulation;
- (c) certifying the completeness, accuracy and veracity of the accounts and that the expenditure entered in the accounts complies with applicable law and has been incurred in respect of operations selected for funding in accordance with the criteria applicable to the operational programme and complying with applicable law;
- (d) ensuring that there is a system which records and stores, in computerised form, accounting records for each operation, and which supports all the data required for drawing up payment applications and accounts, including records of amounts recoverable, amounts recovered and amounts withdrawn following cancellation of all or part of the contribution for an operation or operational programme;
- (e) ensuring, for the purposes of drawing up and submitting payment applications, that it has received adequate information from the managing authority on the procedures and verifications carried out in relation to expenditure;
- (f) taking account when drawing up and submitting payment applications of the results of all audits carried out by, or under the responsibility of, the audit authority;
- (g) maintaining, in a computerised form, accounting records of expenditure declared to the Commission and of the corresponding public contribution paid to beneficiaries;
- (h) keeping an account of amounts recoverable and of amounts withdrawn following cancellation of all or part of the contribution for an operation. Amounts recovered shall be repaid to the budget of the Union prior to the closure of the operational programme by deducting them from the subsequent statement of expenditure.

Article 127

Functions of the audit authority

1. The audit authority shall ensure that audits are carried out on the proper functioning of the management and control system of the operational programme and on an appropriate sample of operations on the basis of the declared expenditure. The declared expenditure shall be audited based on a representative sample and, as a general rule, on statistical sampling methods.

A non- statistical sampling method may be used on the professional judgement of the audit authority, in duly justified cases, in accordance with internationally accepted audit standards and in any case where the number of operations for an accounting year is insufficient to allow the use of a statistical method.

In such cases, the size of the sample shall be sufficient to enable the audit authority to draw up a valid audit opinion in accordance with the second subparagraph of Article 59(5) of the Financial Regulation.

The non-statistical sample method shall cover a minimum of 5 % of operations for which expenditure has been declared to the Commission during an accounting year and 10 % of the expenditure which has been declared to the Commission during an accounting year.

2. Where audits are carried out by a body other than the audit authority, the audit authority shall ensure that any such body has the necessary functional independence.

3. The audit authority shall ensure that audit work takes account of internationally accepted audit standards.

4. The audit authority shall, within eight months of adoption of an operational programme, prepare an audit strategy for performance of audits. The audit strategy shall set out the audit methodology, the sampling method for audits on operations and the planning of audits in relation to the current accounting year and the two subsequent accounting years. The audit strategy shall be updated annually from 2016 until and including 2024. Where a common management and control system applies to more than one operational programme, a single audit strategy may be prepared for the operational programmes concerned. The audit authority shall submit the audit strategy to the Commission upon request.

5. The audit authority shall draw up:

- (a) an audit opinion in accordance with the second subparagraph of Article 59(5) of the Financial Regulation;
- (b) a control report setting out the main findings of the audits carried out in accordance with paragraph 1, including findings with regard to deficiencies found in the management and control systems, and the proposed and implemented corrective actions.

Where a common management and control system applies to more than one operational programme, the information required under point (b) of the first subparagraph may be grouped in a single report.

6. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts laying down models for the audit strategy, the audit opinion and the control report. Those implementing acts shall be adopted in accordance with the advisory procedure referred to in Article 150(2).

7. The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, to set out the scope and content of audits of operations and audits of the accounts and the methodology for the selection of the sample of operations referred to in paragraph 1 of this Article.

8. The Commission shall be empowered to adopt delegated acts, in accordance with Article 149, laying down detailed rules on the use of data collected during audits carried out by Commission officials or authorised Commission representatives.

CHAPTER III

Cooperation with audit authorities

Article 128

Cooperation with audit authorities

1. The Commission shall cooperate with audit authorities to coordinate their audit plans and methods and shall immediately exchange with those authorities the results of audits carried out on management and control systems.

2. To facilitate this cooperation in cases where a Member State designates more than one audit authority, the Member State may designate a coordination body.

3. The Commission, the audit authorities and any coordination body shall meet on a regular basis and, as a general rule, at least once a year, unless otherwise agreed, to examine the annual control report, the audit opinion and the audit strategy, and to exchange views on issues relating to improvement of the management and control systems.

TITLE II

FINANCIAL MANAGEMENT, PREPARATION, EXAMINATION, ACCEPTANCE AND CLOSURE OF ACCOUNTS AND FINANCIAL CORRECTIONS

CHAPTER I

Financial management

Article 129

Common rules for payments

The Member State shall ensure that by the closure of the operational programme, the amount of public expenditure paid to beneficiaries is at least equal to the contribution from the Funds paid by the Commission to the Member State.

Article 130

Common rules for calculating interim payments and payment of the final balance

1. The Commission shall reimburse as interim payments 90 % of the amount resulting from applying the co-financing rate for each priority, laid down in the decision adopting the operational programme, to the eligible expenditure for the priority included in the payment application. The Commission shall determine the remaining amounts to be reimbursed as interim payments or to be recovered in accordance with Article 139.

2. The contribution from the Funds or the EMFF to a priority through the interim payments and payment of the final balance shall not be higher than:

- (a) the eligible public expenditure indicated in the payment application for the priority; or
- (b) the contribution from the Funds or the EMFF for the priority laid down in the decision of the Commission approving the operational programme.

Article 131

Payment applications

1. Payment applications shall include, for each priority:

- (a) the total amount of eligible expenditure incurred by beneficiaries and paid in implementing operations, as entered in the accounting system of the certifying authority;

(b) the total amount of public expenditure incurred in implementing operations, as entered in the accounting system of the certifying authority.

2. Eligible expenditure included in a payment application shall be supported by receipted invoices or accounting documents of equivalent probative value, except for forms of support under points (b), (c) and (d) of the first subparagraph of Article 67(1), under Article 68, Article 69(1) and Article 109 of this Regulation and under Article 14 of the ESF Regulation. For those forms of support, the amounts included in a payment application shall be the costs calculated on the applicable basis.

3. In the case of aid schemes under Article 107 TFEU, the public contribution corresponding to the expenditure included in a payment application shall have been paid to the beneficiaries by the body granting the aid.

4. By way of derogation from paragraph 1, in the case of State aid, the payment application may include advances paid to the beneficiary by the body granting the aid under the following cumulative conditions:

(a) those advances are subject to a guarantee provided by a bank or other financial institution established in the Member State or be covered by a facility provided as a guarantee by a public entity or by the Member State;

(b) those advances do not exceed 40 % of the total amount of the aid to be granted to a beneficiary for a given operation;

(c) those advances are covered by expenditure paid by beneficiaries in implementing the operation and supported by receipted invoices or accounting documents of equivalent probative value at the latest within three years following the year of the payment of the advance or on 31 December 2023, whichever is earlier, failing which the next payment application shall be corrected accordingly.

5. Each payment application which includes advances of the type referred to in paragraph 4 shall separately disclose the total amount paid from the operational programme as advances, the amount which has been covered by expenditure paid by beneficiaries within three years of the payment of the advance in accordance with point (c) of paragraph 4, and the amount which has not been covered by expenditure paid by beneficiaries and for which the three year period has not yet elapsed.

6. The Commission shall, in order to ensure uniform conditions for the implementation of this Article, adopt implementing acts laying down the model for payment applications. These implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

Article 132

Payment to beneficiaries

1. Subject to the availability of funding from initial and annual pre-financing and interim payments, the managing authority shall ensure that a beneficiary receives the total amount of eligible public expenditure due in full and no later than 90 days from the date of submission of the payment claim by the beneficiary.

No amount shall be deducted or withheld and no specific charge or other charge with equivalent effect shall be levied that would reduce amounts due to beneficiaries.

2. The payment deadline referred to in paragraph 1 may be interrupted by the managing authority in either of the following duly justified cases:

(a) the amount of the payment claim is not due or the appropriate supporting documents, including the documents necessary for management verifications under point (a) of the first subparagraph of Article 125(4), have not been provided;

(b) an investigation has been initiated in relation to a possible irregularity affecting the expenditure concerned.

The beneficiary concerned shall be informed in writing of the interruption and the reasons for it.

Article 133

Use of the euro

1. Member States which have not adopted the euro as their currency on the date of an application for payment shall convert the amounts of expenditure incurred in national currency into euro. Those amounts shall be converted into euro using the monthly accounting exchange rate of the Commission in the month during which the expenditure was registered in the accounts of the certifying authority of the operational programme concerned. The exchange rate shall be published electronically by the Commission each month.

2. By way of derogation from paragraph 1, the ETC Regulation may establish specific rules on the timing for conversion into euro.

3. When the euro becomes the currency of a Member State, the conversion procedure set out in paragraph 1 shall continue to apply to all expenditure recorded in the accounts by the certifying authority before the date of entry into force of the fixed conversion rate between the national currency and the euro.

*Article 134***Payment of pre-financing**

1. The initial pre-financing amount shall be paid in instalments as follows:

- (a) in 2014: 1 % of the amount of support from the Funds and the EMFF for the entire programming period to the operational programme or 1,5 % of the amount of support from the Funds and the EMFF for the entire programming period to the operational programme when a Member State has been receiving financial assistance since 2010, in accordance with Articles 122 and 143 TFEU, or from the European Financial Stability Facility (EFSF), or is receiving financial assistance on 31 December 2013 in accordance with Articles 136 and 143 TFEU;
- (b) in 2015: 1 % of the amount of support from the Funds and the EMFF for the entire programming period to the operational programme or 1,5 % of the amount of support from the Funds and the EMFF for the entire programming period to the operational programme when a Member State has been receiving financial assistance since 2010, in accordance with Articles 122 and 143 TFEU, or from the EFSF, or is receiving financial assistance on 31 December 2014 in accordance with Articles 136 and 143 TFEU;
- (c) in 2016: 1 % of the amount of support from the Funds and the EMFF for the entire programming period to the operational programme.

If an operational programme is adopted in 2015 or later, the earlier instalments shall be paid in the year of adoption.

2. An annual pre-financing amount shall be paid before 1 July in the years 2016 to 2023. It shall be a percentage of the amount of the support from the Funds and the EMFF for the whole programming period to the operational programme as follows:

- 2016: 2 %
- 2017: 2,625 %
- 2018: 2,75 %
- 2019: 2,875 %
- 2020 to 2023: 3 %.

3. When calculating the amount of initial pre-financing referred to in paragraph 1, the amount of support for the entire programming period shall exclude the amounts from the performance reserve which were initially allocated to the operational programme.

When calculating the amount of annual pre-financing referred to in paragraph 2 up to and including 2020, the amount of support for the entire programming period shall exclude the amounts from the performance reserve which were initially allocated to the operational programme.

*Article 135***Deadlines for presentation of interim payment applications and for their payment**

1. The certifying authority shall submit on a regular basis an application for interim payment in accordance with Article 131(1) covering amounts entered in its accounting system in the accounting year. However, the certifying authority, where it considers it to be necessary, may include such amounts in payment applications submitted in subsequent accounting years.

2. The certifying authority shall submit the final application for an interim payment by 31 July following the end of the previous accounting year and, in any event, before the first application for interim payment for the next accounting year.

3. The first application for interim payment shall not be made before the notification to the Commission of the designation of the managing authorities and certifying authorities in accordance with Article 124.

4. Interim payments shall not be made for an operational programme unless the annual implementation report has been sent to the Commission in accordance with the Fund-specific rules.

5. Subject to available funding, the Commission shall make the interim payment no later than 60 days after the date on which a payment application is registered with the Commission.

*Article 136***Decommitment**

1. The Commission shall decommit any part of the amount in an operational programme that has not been used for payment of the initial and annual pre-financing and interim payments by 31 December of the third financial year following the year of budget commitment under the operational programme or for which a payment application drawn up in accordance with Article 131 has not been submitted in accordance with Article 135.

2. That part of commitments still open on 31 December 2023 shall be decommitted if any of the documents required under Article 141(1) has not been submitted to the Commission by the deadline set out in Article 141(1).

CHAPTER II

Preparation, examination and acceptance of accounts and closure of operational programmes and suspension of payments

Section I

Preparation, examination and acceptance of accounts*Article 137***Preparation of the accounts**

1. The accounts referred to in point (a) of Article 59(5) of the Financial Regulation shall be submitted to the Commission for each operational programme. The accounts shall cover the accounting year and shall include at the level of each priority and, where applicable, fund and category of regions:

- (a) the total amount of eligible expenditure entered into the accounting systems of the certifying authority which has been included in payment applications submitted to the Commission in accordance with Article 131 and Article 135(2) by 31 July following the end of the accounting year, the total amount of the corresponding public expenditure incurred in implementing operations, and the total amount of corresponding payments made to beneficiaries under Article 132(1);
- (b) the amounts withdrawn and recovered during the accounting year, the amounts to be recovered as at the end of the accounting year, the recoveries effected pursuant to Article 71, and the irrecoverable amounts;
- (c) the amounts of programme contributions paid to financial instruments under Article 41(1) and advances of State aid under Article 131(4);
- (d) for each priority, a reconciliation between the expenditure stated pursuant to point (a) and the expenditure declared in respect of the same accounting year in payment applications, accompanied by an explanation of any differences.

2. Where expenditure previously included in an application for interim payment for the accounting year is excluded by a Member State from its accounts due to an ongoing assessment of that expenditure's legality and regularity, any or all of that expenditure subsequently found to be legal and regular may be included in an application for interim payment relating to subsequent accounting years.

3. The Commission shall, in order to lay down uniform conditions for the implementation of this Article, adopt implementing acts setting out the model for the accounts referred to in this Article. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 150(3).

*Article 138***Submission of information**

For each year from 2016 until and including 2025, Member States shall submit, by the deadline set out in Article 59(5) of the Financial Regulation, the documents referred to in that Article namely:

- (a) the accounts, referred to in Article 137(1) of this Regulation, for the preceding accounting year;
- (b) the management declaration and the annual summary referred to in point (e) of the first subparagraph of Article 125(4) of this Regulation, for the preceding accounting year;
- (c) the audit opinion and the control report referred to in points (a) and (b) of the first subparagraph of Article 127(5) of this Regulation, for the preceding accounting year.

*Article 139***Examination and acceptance of accounts**

1. The Commission shall carry out an examination of the documents submitted by the Member State under Article 138. Upon request by the Commission, the Member State shall provide all necessary additional information to enable the Commission to determine whether the accounts are complete, accurate and true, by the deadline set out in Article 84.

2. The Commission shall accept the accounts where it is able to conclude that the accounts are complete, accurate and true. The Commission shall reach such a conclusion where the audit authority has provided an unqualified audit opinion regarding the completeness, accuracy and veracity of the accounts unless the Commission has specific evidence that the audit opinion on the accounts is unreliable.

3. The Commission shall inform the Member State by the deadline set out in Article 84 as to whether it is able to accept the accounts.

4. If, for reasons attributable to Member State, the Commission is unable to accept the accounts by the deadline set out in Article 84, the Commission shall notify the Member States specifying the reasons in accordance with paragraph 2 of this Article and the actions which are required to be undertaken and the time period for their completion. At the end of the time period for the completion of those actions the Commission shall inform the Member State as to whether it is able to accept the accounts.

5. Issues related to legality and regularity of the underlying transactions concerning expenditure entered in the accounts shall not be taken into account for the purposes of acceptance of the accounts by the Commission. The procedure for examination and acceptance of the accounts shall not interrupt the treatment of applications for interim payments and shall not lead to suspension of payments, without prejudice to Articles 83 and 142.

6. On the basis of the accepted accounts, the Commission shall calculate the amount chargeable to the Funds and to the EMFF for the accounting year and the consequent adjustments in relation to the payments to the Member State. The Commission shall take into account:

- (a) the amounts in the accounts referred to in point (a) of Article 137(1) and to which the co-financing rate for each priority is to be applied;
- (b) the total amount of payments made by the Commission during that accounting year, consisting of:
 - (i) the amount of interim payments paid by the Commission in accordance with Article 130(1) and Article 24; and
 - (ii) the amount of the annual pre-financing paid under Article 134(2).

7. After the calculation carried out under paragraph 6, the Commission shall clear the respective annual pre-financing and pay any additional amount due within 30 days of the acceptance of the accounts. Where there is an amount recoverable from the Member State, it shall be subject to a recovery order issued by the Commission which shall be executed, where possible, by offsetting against amounts due to the Member State under subsequent payments to the same operational programme. Such recovery shall not constitute a financial correction and shall not reduce support from the Funds to the operational programme. The amount recovered shall constitute assigned revenue in accordance with Article 177(3) of the Financial Regulation.

8. Where, after applying the procedure set out in paragraph 4, the Commission is unable to accept the accounts, the Commission shall determine, on the basis of the available information and in accordance with paragraph 6, the amount chargeable to the Funds for the accounting year, and shall inform the Member State. Where the Member State notifies the Commission of its agreement within two months of the transmission by the Commission of the information, paragraph 7 shall apply. In the absence of such agreement, the Commission shall adopt a decision, by means of implementing acts, setting out the amount chargeable to the Funds for the accounting year. Such decision shall not constitute a financial correction and shall not reduce support from the Funds to the operational programme. On the basis of the decision, the Commission shall apply the adjustments to the payments to the Member State in accordance with paragraph 7.

9. The acceptance of the accounts by the Commission, or a decision by the Commission under paragraph 8 of this Article, shall be without prejudice to the application of corrections under Articles 144 and 145.

10. Member States may replace irregular amounts which are detected after the submission of the accounts by making the

corresponding adjustments in the accounts for the accounting year in which the irregularity is detected, without prejudice to Articles 144 and 145.

Article 140

Availability of documents

1. Without prejudice to the rules governing State aid, the managing authority shall ensure that all supporting documents regarding expenditure supported by the Funds on operations for which the total eligible expenditure is less than EUR 1 000 000, are made available to the Commission and the European Court of Auditors upon request for a period of three years from 31 December following the submission of the accounts in which the expenditure of the operation is included.

In the case of operations other than those referred to in the first subparagraph, all supporting documents shall be made available for a two year period from 31 December following the submission of the accounts in which the final expenditure of the completed operation is included.

A managing authority may decide to apply to operations for which the total eligible expenditure is less than EUR 1 000 000 the rule referred to in the second subparagraph.

The time period referred to in the first subparagraph shall be interrupted either in the case of legal proceedings or by a duly justified request of the Commission.

2. The managing authority shall inform beneficiaries of the start date of the period referred to in paragraph 1.

3. The documents shall be kept either in the form of the originals, or certified true copies of the originals, or on commonly accepted data carriers including electronic versions of original documents or documents existing in electronic version only.

4. The documents shall be kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the data were collected or for which they are further processed.

5. The procedure for certification of conformity of documents held on commonly accepted data carriers with the original document shall be laid down by the national authorities and shall ensure that the versions held comply with national legal requirements and can be relied on for audit purposes.

6. Where documents exist in electronic form only, the computer systems used shall meet accepted security standards that ensure that the documents held comply with national legal requirements and can be relied on for audit purposes.

Section II

Closure of operational programmes*Article 141***Submission of closure documents and payment of the final balance**

1. In addition to the documents referred to in Article 138, for the final accounting year from 1 July 2023 to 30 June 2024, Member States shall submit a final implementation report for the operational programme or the last annual implementation report for the operational programme supported by the EMFF.

2. The final balance shall be paid no later than three months after the date of acceptance of accounts of the final accounting year or one month after the date of acceptance of the final implementation report, whichever date is later.

Section III

Suspension of payments*Article 142***Suspension of payments**

1. All or part of the interim payments at the level of priorities or operational programmes may be suspended by the Commission if one or more of the following conditions are met:

- (a) there is a serious deficiency in the effective functioning of the management and control system of the operational programme, which has put at risk the Union contribution to the operational programme and for which corrective measures have not been taken;
- (b) expenditure in a statement of expenditure is linked to an irregularity having serious financial consequences which has not been corrected;
- (c) the Member State has failed to take the necessary action to remedy the situation giving rise to an interruption under Article 83;
- (d) there is a serious deficiency in the quality and reliability of the monitoring system or of the data on common and specific indicators;
- (e) there is a failure to complete actions to fulfil an ex ante conditionality subject to the conditions set out in Article 19;
- (f) there is evidence resulting from the performance review for a priority that there has been a serious failure in achieving that priority's milestones relating to financial and output indicators and key implementation steps set out in the performance framework subject to the conditions set out in Article 22.

The Fund-specific rules for the EMFF may lay down specific bases for suspension of payments linked to non-compliance with rules applicable under the Common Fisheries Policy, which shall be proportionate, having regard to the nature, gravity, duration and recurrence of the non-compliance.

2. The Commission may decide, by means of implementing acts, to suspend all or part of interim payments, after having given the Member State the opportunity to present its observations.

3. The Commission shall end suspension of all or part of interim payments where the Member State has taken the necessary measures to enable the suspension to be lifted.

CHAPTER III

Financial corrections

Section I

Financial corrections by Member States*Article 143***Financial corrections by Member States**

1. The Member States shall in the first instance be responsible for investigating irregularities and for making the financial corrections required and pursuing recoveries. In the case of a systemic irregularity, the Member State shall extend its investigation to cover all operations potentially affected.

2. Member States shall make the financial corrections required in connection with individual or systemic irregularities detected in operations or operational programmes. Financial corrections shall consist of cancelling all or part of the public contribution to an operation or operational programme. The Member States shall take into account the nature and gravity of the irregularities and the financial loss to the Funds or the EMFF and shall apply a proportionate correction. Financial corrections shall be recorded in the accounts by the managing authority for the accounting year in which the cancellation is decided.

3. The contribution from the Funds or the EMFF cancelled in accordance with paragraph 2 may be reused by the Member State within the operational programme concerned, subject to paragraph 4.

4. The contribution cancelled in accordance with paragraph 2 may not be reused for any operation that was the subject of the correction or, where a financial correction is made for a systemic irregularity, for any operation affected by the systemic irregularity.

5. The Fund-specific rules for the EMFF may lay down specific bases for financial corrections by the Member States linked to non-compliance with rules applicable under the Common Fisheries Policy, which shall be proportionate, having regard to the nature, gravity, duration and recurrence of the non-compliance.

Section II

Financial corrections by the Commission*Article 144***Criteria for financial corrections**

1. The Commission shall make financial corrections, by means of implementing acts, by cancelling all or part of the Union contribution to an operational programme in accordance with Article 85, where, after carrying out the necessary examination, it concludes that:

- (a) there is a serious deficiency in the effective functioning of the management and control system of the operational programme which has put at risk the Union contribution already paid to the operational programme;
- (b) the Member State has not complied with its obligations under Article 143 prior to the opening of the correction procedure under this paragraph;
- (c) expenditure contained in a payment application is irregular and has not been corrected by the Member State prior to the opening of the correction procedure under this paragraph.

The Commission shall base its financial corrections on individual cases of identified irregularity and shall take account of whether an irregularity is systemic. Where it is not possible to quantify precisely the amount of irregular expenditure charged to the Funds or the EMFF, the Commission shall apply a flat rate or extrapolated financial correction.

2. The Commission shall, when deciding on a correction under paragraph 1, respect the principle of proportionality by taking account of the nature and gravity of the irregularity and the extent and financial implications of the deficiencies in management and control systems found in the operational programme.

3. Where the Commission bases its position on reports of auditors other than those of its own services, it shall draw its own conclusions regarding the financial consequences after examining the measures taken by the Member State concerned under Article 143(2), the notifications sent under Article 122(2), and any replies from the Member State.

4. In accordance with Article 22(7), where the Commission, based on the examination of the final implementation report of the operational programme for the Funds or the last annual implementation report for the EMFF, establishes a serious failure to achieve the targets set out in the performance framework, it may apply financial corrections in respect of the priorities concerned, by means of implementing acts.

5. When a Member State does not comply with its obligations under Article 95, the Commission may, in relation to the degree of non-compliance with those obligations, make a financial correction by cancelling all or part of the Structural Funds contribution to the Member State concerned.

6. The Commission shall be empowered to adopt delegated acts in accordance with Article 149, laying down detailed rules

concerning the criteria for determining serious deficiencies in the effective functioning of management and control systems, including the main types of such deficiencies, the criteria for establishing the level of financial correction to be applied and the criteria for applying flat rates or extrapolated financial corrections.

7. The Fund-specific rules for the EMFF may lay down specific bases for financial corrections by the Commission linked to non-compliance with rules applicable under the Common Fisheries Policy which shall be proportionate having regard to the nature, gravity, duration and recurrence of the non-compliance.

*Article 145***Procedure**

1. Before taking a decision on a financial correction, the Commission shall launch the procedure by informing the Member State of the provisional conclusions of its examination and requesting the Member State to submit its comments within two months.

2. Where the Commission proposes a financial correction on the basis of extrapolation or a flat rate, the Member State shall be given the opportunity to demonstrate, through an examination of the documentation concerned, that the actual extent of irregularity is less than the Commission's assessment. In agreement with the Commission, the Member State may limit the scope of this examination to an appropriate proportion or sample of the documentation concerned. Except in duly justified cases, the time allowed for that examination shall not exceed a further period of two months after the two-month period referred to in paragraph 1.

3. The Commission shall take account of any evidence provided by the Member State within the time limits set out in paragraphs 1 and 2.

4. Where the Member State does not accept the provisional conclusions of the Commission, the Member State shall be invited to a hearing by the Commission, in order to ensure that all relevant information and observations are available as a basis for conclusions by the Commission on the application of the financial correction.

5. In the event of an agreement, and without prejudice to paragraph 6 of this Article, the Member State may reuse the Funds concerned in accordance with Article 143(3).

6. In order to apply financial corrections the Commission shall take a decision, by means of implementing acts, within six months of the date of the hearing, or of the date of receipt of additional information where the Member State agrees to submit such additional information following the hearing. The Commission shall take account of all information and observations submitted during the course of the procedure. If no hearing takes place, the six month period shall begin to run two months after the date of the letter of invitation to the hearing sent by the Commission.

7. Where the Commission in carrying out its responsibilities under Article 75, or the European Court of Auditors, detects irregularities demonstrating a serious deficiency in the effective functioning of the management and control systems, the resulting financial correction shall reduce support from the Funds to the operational programme.

The first subparagraph shall not apply in the case of a serious deficiency in the effective functioning of a management and control system which, prior to the date of detection by the Commission or the European Court of Auditors:

- (a) had been identified in the management declaration, annual control report or the audit opinion submitted to the Commission in accordance with Article 59(5) of the Financial Regulation, or in other audit reports of the audit authority submitted to the Commission and appropriate measures taken; or
- (b) had been the subject of appropriate remedial measures by the Member State.

The assessment of serious deficiencies in the effective functioning of management and control systems shall be based on the applicable law when the relevant management declarations, annual control reports and audit opinions were submitted.

When deciding on a financial correction the Commission shall:

- (a) respect the principle of proportionality by taking account of the nature and gravity of the serious deficiency in the effective functioning of a management and control system and its financial implications for the budget of the Union;
- (b) for the purpose of applying a flat rate or extrapolated correction, exclude irregular expenditure previously detected by the Member State which has been the subject of an adjustment in the accounts in accordance with Article 139(10), and expenditure subject to an ongoing assessment of its legality and regularity under Article 137(2);
- (c) take into account flat rate or extrapolated corrections applied to the expenditure by the Member State for other serious deficiencies detected by the Member State when determining the residual risk for the budget of the Union.

8. The Fund-specific rules for the EMFF may lay down additional rules of procedure for financial corrections referred to in Article 144(7).

Article 146

Obligations of Member States

A financial correction by the Commission shall not prejudice the Member State's obligation to pursue recoveries under

Article 143(2) of this Regulation and to recover State aid within the meaning of Article 107(1) TFEU and under Article 14 of Council Regulation (EC) No 659/1999 ⁽¹⁾.

Article 147

Repayment

1. Any repayment due to be made to the budget of the Union shall be effected before the due date indicated in the order for recovery drawn up in accordance with Article 73 of the Financial Regulation. The due date shall be the last day of the second month following the issuing of the order.

2. Any delay in effecting repayment shall give rise to interest on account of late payment, starting on the due date and ending on the date of actual payment. The rate of such interest shall be one-and-a-half percentage points above the rate applied by the European Central Bank in its main refinancing operations on the first working day of the month in which the due date falls.

TITLE III

PROPORTIONAL CONTROL OF OPERATIONAL PROGRAMMES

Article 148

Proportional control of operational programmes

1. Operations for which the total eligible expenditure does not exceed EUR 200 000 for the ERDF and the Cohesion Fund, EUR 150 000 for the ESF or EUR 100 000 for the EMFF shall not be subject to more than one audit by either the audit authority or the Commission prior to the submission of the accounts for the accounting year in which the operation is completed. Other operations shall not be subject to more than one audit per accounting year by either the audit authority or the Commission prior to the submission of the accounts for the accounting year in which the operation is completed. Operations shall not be subject to an audit by the Commission or the audit authority in any year if there has already been an audit in that year by the European Court of Auditors, provided that the results of the audit work performed by the European Court of Auditors for such operations can be used by the audit authority or the Commission for the purpose of fulfilling their respective tasks.

2. For operational programmes for which the most recent audit opinion indicates that there are no significant deficiencies, the Commission may agree with the audit authority in the subsequent meeting referred to in Article 128(3) that the level of audit work required may be reduced so that it is proportionate to the risk established. In such cases, the Commission shall not carry out its own on-the-spot audits unless there is evidence suggesting deficiencies in the management and control system affecting expenditure declared to the Commission in an accounting year for which the accounts have been accepted by the Commission.

⁽¹⁾ Council Regulation (EC) No 659/1999 of 22 March 1999 laying down detailed rules for the application of Article 93 of the EC Treaty (OJ L 83, 27.3.1999, p. 1).

3. For operational programmes for which the Commission concludes that the opinion of the audit authority is reliable, it may agree with the audit authority to limit the Commission's own on-the-spot audits to audit the work of the audit authority unless there is evidence of deficiencies in the work of the audit authority for an accounting year for which the accounts have been accepted by the Commission.

4. Notwithstanding paragraph 1, the audit authority and the Commission may carry out audits of operations in the event that a risk assessment or an audit by the European Court of Auditors establishes a specific risk of irregularity or fraud, in the case of evidence of serious deficiencies in the effective functioning of the management and control system of the operational programme concerned, and, during the period referred to in Article 140(1). The Commission may, for the purpose of assessing the work of an audit authority, review the audit trail of the audit authority or take part in the on-the-spot audits of the audit authority and, where, in accordance with internationally accepted audit standards, it is necessary for the purpose of obtaining assurance as to the effective functioning of the audit authority, the Commission may carry out audits of operations.

PART FIVE

DELEGATIONS OF POWER, IMPLEMENTING, TRANSITIONAL AND FINAL PROVISIONS

CHAPTER I

Delegations of power and implementing provisions

Article 149

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2. The power to adopt delegated acts referred to in Article 5(3), the second paragraph of Article 12, the fourth subparagraph of Article 22(7), Article 37(13), the third subparagraph of Article 38(4), Article 40(4), Article 41(3), the second subparagraph of Article 42(1), Article 42(6), the second, third, fourth and seventh subparagraphs of Article 61 (3), Articles 63(4) and 64(4), the second subparagraph of Article 68(1), the fourth paragraph of Article 101, the fifth subparagraph of Article 122(2), the first subparagraph of Article 125(8), Article 125(9), Article 127(7) and (8) and Article 144(6) shall be conferred on the Commission from 21 December 2013 until 31 December 2020.

3. The delegation of power referred to in Article 5(3), the second paragraph of Article 12, the fourth subparagraph of Article 22(7), Article 37(13), the third subparagraph of Article 38(4), Article 40(4), Article 41(3), the second subparagraph of Article 42(1), Article 42(6), the second, third, fourth and seventh subparagraphs of Article 61 (3), Articles 63(4) and 64(4), the second subparagraph of Article 68(1), the fourth paragraph of Article 101, the fifth subparagraph of Article 122(2), the first subparagraph of Article 125(8), Article 125(9), Article 127(7) and (8) and Article 144(6) may

be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

5. A delegated act adopted pursuant to Article 5(3), the second paragraph of Article 12, the fourth subparagraph of Article 22(7), Article 37(13), the third subparagraph of Article 38(4), Article 40(4), Article 41(3), the second subparagraph of Article 42(1), Article 42(6), the second, third, fourth and seventh subparagraphs of Article 61 (3), Articles 63(4) and 64(4), the second subparagraph of Article 68(1), the fourth paragraph of Article 101, the fifth subparagraph of Article 122(2), the first subparagraph of Article 125(8), Article 125(9), Article 127(7) and (8) and Article 144(6) shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 150

Committee Procedure

1. In the application of this Regulation, the ERDF Regulation, the ETC Regulation, the ESF Regulation and the CF Regulation, the Commission shall be assisted by a Coordination Committee for the European Structural and Investment Funds. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

2. Where reference is made to this paragraph, Article 4 of Regulation (EU) No 182/2011 shall apply.

3. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Where the committee delivers no opinion, the Commission shall not adopt the draft implementing act in respect of the implementing powers referred to in the third paragraph of Article 8, the fifth subparagraph of Article 22(7), the second subparagraph of Article 38(3), Article 38(10), the second subparagraph of Article 39(4), Article 46(3), the second subparagraph of Article 96(2), Article 115(4) and the second subparagraph of Article 125(8), and the third subparagraph of Article 5(4) of Regulation (EU) No 182/2011 shall apply.

CHAPTER II

Transitional and final provisions

Article 151

Review

The European Parliament and the Council shall review this Regulation by 31 December 2020 in accordance with Article 177 TFEU.

Article 152

Transitional provisions

1. This Regulation shall not affect either the continuation or modification, including the total or partial cancellation of assistance approved by the Commission on the basis of Regulation (EC) No 1083/2006 or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation shall consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. For the purposes of this paragraph assistance shall cover operational programmes and major projects.

2. Applications to receive assistance made or approved under Regulation (EC) No 1083/2006 shall remain valid.

3. Where a Member State makes use of the option set out in Article 123(3), it may submit a request to the Commission for the managing authority by way of derogation from point (b) of Article 59(1) of Regulation (EC) No 1083/2006 for the corresponding operational programmes implemented on the basis of Regulation (EC) No 1083/2006. The request shall be accompanied by an assessment made by the audit authority.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 17 December 2013.

For the European Parliament
The President
M. SCHULZ

For the Council
The President
R. ŠADŽIUS

Where the Commission is satisfied on the basis of information made available from the audit authority and from its own audits that the management and control systems of those operational programmes function effectively and that their functioning will not be prejudiced by the managing authority carrying out the functions of the certifying authority, it shall inform the Member State of its agreement within two months of the date of receipt of the request.

Article 153

Repeal

1. Without prejudice to the provisions laid down in Article 152, Regulation (EC) No 1083/2006 is hereby repealed with effect from 1 January 2014.

2. References to the repealed Regulation shall be construed as references to this Regulation and shall be read in accordance with the correlation table set out in Annex XIV.

Article 154

Entry into force

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

Articles 20 to 24, Article 29(3), point (a) of Article 38(1), Articles 58, 60, 76 to 92, 118, 120, 121 and Articles 129 to 147 shall apply with effect from 1 January 2014.

The second sentence of the seventh subparagraph of Article 39(2) and the fifth paragraph of Article 76 shall apply with effect from the date on which the amendment to the Financial Regulation relating to the decommitment of appropriations has entered into force.

ANNEX I

COMMON STRATEGIC FRAMEWORK

1. INTRODUCTION

In order to promote the harmonious, balanced and sustainable development of the Union and to maximise the contribution of the ESI Funds to the Union strategy for smart, sustainable and inclusive growth as well as the Fund-specific missions of the ESI Funds, including economic, social and territorial cohesion, it is necessary to ensure that policy commitments made in the context of the Union strategy for smart, sustainable and inclusive growth are underpinned by investment through the ESI Funds and other Union instruments. The Common Strategic Framework (CSF) shall therefore, in accordance with Article 10, and in compliance with the priorities and objectives laid down in the Fund-specific Regulations, provide strategic guiding principles in order to achieve an integrated development approach using the ESI Funds coordinated with other Union instruments and policies, in line with the policy objectives and headline targets of the Union strategy for smart, sustainable and inclusive growth and, where appropriate, the flagship initiatives, while taking into account the key territorial challenges and specific national, regional and local contexts.

2. CONTRIBUTION OF ESI FUNDS TO THE UNION STRATEGY FOR SMART, SUSTAINABLE AND INCLUSIVE GROWTH AND COHERENCE WITH THE UNION'S ECONOMIC GOVERNANCE

1. To support effective targeting of smart, sustainable and inclusive growth in the Partnership Agreements and programmes this Regulation identifies eleven thematic objectives, set out in the first paragraph of Article 9, corresponding to the priorities of the Union strategy for smart, sustainable and inclusive growth which shall receive support from the ESI Funds.

2. In line with the thematic objectives set out in the first paragraph of Article 9, Member States shall, in order to ensure critical mass necessary to deliver growth and jobs, concentrate support in accordance with Article 18 of this Regulation and with the Fund-specific rules on thematic concentration, and shall ensure the effectiveness of spending. Member States shall give particular attention to prioritising growth-friendly expenditure, including spending on education, research, innovation and energy efficiency and expenditure to facilitate the access of SMEs to finance, and to ensure environmental sustainability, and the management of natural resources and climate action as well as to modernise public administration. They shall also take account of maintaining or reinforcing the coverage and effectiveness of employment services and active labour market policies in order to combat unemployment, with a focus on youth and tackle the social consequences of the crisis, and promote social inclusion.

3. To ensure consistency with priorities established in the context of the European Semester, in preparing their Partnership Agreements, Member States shall plan the use of the ESI Funds taking into account the National Reform Programmes, where appropriate, and the most recent relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU and relevant Council recommendations adopted in accordance with Article 148(4) TFEU in accordance with their respective roles and obligations. Member States, where necessary, shall also take into account relevant Council recommendations based on the Stability and Growth Pact and the economic adjustment programmes.

4. In order to determine the way in which the ESI Funds can most effectively contribute to the Union strategy for smart, sustainable and inclusive growth, and to take account of the Treaty objectives, including economic, social and territorial cohesion, Member States shall select the thematic objectives for the planned use of the ESI Funds within the appropriate national, regional and local contexts.

3. INTEGRATED APPROACH TO AND ARRANGEMENTS FOR THE USE OF THE ESI FUNDS

3.1 Introduction

1. In accordance with point (a) of Article 15(2) the Partnership Agreement shall indicate an integrated approach to territorial development. Member States shall ensure that the selection of thematic objectives and investment and Union priorities addresses development needs and territorial challenges in an integrated manner in line with the analysis set out in section 6.4. Member States shall seek to make maximum use of the possibilities for ensuring coordinated and integrated delivery of the ESI funds.

2. Member States and, where appropriate in accordance with Article 4(4), regions shall ensure that the interventions supported through the ESI Funds are complementary and are implemented in a coordinated manner with a view to creating synergies, in order to reduce the administrative cost and burden for managing bodies and beneficiaries in accordance with Articles 4, 15 and 27.

3.2 Coordination and complementarity

1. Member States and managing authorities responsible for the implementation of the ESI Funds shall work closely together in the preparation, implementation, monitoring and evaluation of the Partnership Agreement and programmes. In particular, they shall ensure that the following actions are carried out:
 - (a) identify areas of intervention where the ESI Funds can be combined in a complementary manner to achieve the thematic objectives set out in this Regulation;
 - (b) ensure in accordance with Article 4(6), the existence of arrangements for the effective coordination of the ESI Funds in order to increase the impact and effectiveness of the Funds including, where appropriate, through the use of multi-fund programmes for the Funds;
 - (c) promote the involvement of managing authorities responsible for other ESI Funds and relevant ministries in the development of support schemes to ensure coordination and synergies and to avoid overlaps;
 - (d) establish, where appropriate, joint monitoring committees for programmes implementing the ESI Funds, and the development of other joint management and control arrangements to facilitate coordination between authorities responsible for the implementation of the ESI Funds;
 - (e) make use of available joint eGovernance solutions, which may assist applicants and beneficiaries, and make the widest possible use of "one-stop shops", including for advice on the opportunities of support available through each of the ESI Funds;
 - (f) establish mechanisms to coordinate cooperation activities financed by the ERDF and the ESF with investments supported by the programmes under the Investment for growth and jobs goal;
 - (g) promote common approaches between ESI Funds with regard to guidance for the development of operations, calls for proposals and selection processes or other mechanisms to facilitate access to Funds for integrated projects;
 - (h) encourage cooperation between managing authorities of different ESI Funds in the areas of monitoring, evaluation, management and control, and audit.

3.3 Encouraging integrated approaches

1. Member States shall, where appropriate, combine the ESI Funds into integrated packages at local, regional or national level, which are tailor-made to address specific territorial challenges in order to support the achievement of the objectives set out in the Partnership Agreement and programmes. This can be done using ITIs, Integrated operations, Joint Action Plans and community-led local development.
2. In accordance with Article 36 to achieve integrated use of thematic objectives, funding from different priority axes or operational programmes supported by the ESF, ERDF and Cohesion Fund may be combined under an ITI. Actions carried out under an ITI may be complemented with financial support from the programmes under the EAFRD or the EMFF respectively.
3. In accordance with the relevant provisions of the Fund-specific rules, to increase impact and effectiveness in a thematically coherent integrated approach a priority axis may concern more than one category of region, combine one or more complementary investment priorities from the ERDF, Cohesion Fund and ESF under one thematic objective and, in duly justified cases combine one or more complementary investment priorities from different thematic objectives in order to achieve the maximum contribution to that priority axis.
4. Member States shall promote, in accordance with their institutional and legal framework and with Article 32 the development of local and sub-regional approaches. Community-led local development shall be implemented in the context of a strategic approach to ensure that the 'bottom-up' definition of local needs takes account of priorities set at a higher level. Member States shall therefore define the approach to community-led local development in the EAFRD and, where appropriate, in the ERDF, the ESF or the EMFF in accordance with Article 15(2) and shall indicate in the Partnership Agreement the main challenges to be tackled in this way, the main objectives and priorities for community-led local development, the types of territories to be covered, the specific role to be attributed to local action groups in the delivery of strategies and the role envisaged for the EAFRD and where appropriate for the ERDF, the ESF or the EMFF in implementing community-led local development strategies in different types of territories such as rural, urban and coastal areas and the corresponding co-ordination mechanisms.

4. COORDINATION AND SYNERGIES BETWEEN ESI FUNDS AND OTHER UNION POLICIES AND INSTRUMENTS

Coordination by Member States as envisaged under this section shall apply in so far as a Member State intends to make use of support from the ESI Funds and other Union instruments in the relevant policy area. The Union programmes set out in this section do not constitute an exhaustive list.

4.1 Introduction

1. Member States and the Commission shall, in accordance with their respective responsibilities, take into consideration the impact of Union policies at national and regional level, and on social, economic and territorial cohesion with a view to fostering synergies and effective coordination and to identifying and promoting the most suitable means of using Union funds to support local, regional and national investment. Member States shall also ensure complementarity between Union policies and instruments and national, regional and local interventions.

2. Member States and the Commission shall, in accordance with Article 4(6) and with their respective responsibilities, ensure coordination between the ESI Funds and other relevant Union instruments at Union and Member State level. They shall take appropriate steps to ensure consistency, at programming and implementation stages, between interventions supported by the ESI Funds and the objectives of other Union policies. To this end, they shall seek to take into account the following aspects:

(a) enhancing complementarities and synergies between different Union instruments at Union, national and regional level, both in the planning phase and during implementation;

(b) optimise existing structures and where necessary, establish new structures that facilitate the strategic identification of priorities for the different instruments and structures for coordination at Union and national level that avoid duplication of effort and identify areas where additional financial support is needed;

(c) make use of the potential to combine support from different instruments to support individual operations and work closely with those responsible for implementation at Union and national level to deliver coherent and streamlined funding opportunities for beneficiaries.

4.2 Coordination with the Common Agricultural Policy and the Common Fisheries Policy

1. The EAFRD is an integral part of the Common Agricultural Policy and complements the measures under the European Agricultural Guarantee Fund which provide direct support to farmers and support market measures. Member States shall therefore manage those interventions together so as to maximise synergies and the added value of Union support.

2. The EMFF aims to achieve the objectives of the reformed Common Fisheries Policy and of the Integrated Maritime Policy. Member States shall therefore make use of the EMFF to support efforts to improve data collection and strengthen control, and ensure that synergies are also sought in support of the priorities of Integrated Maritime Policy, such as marine knowledge, maritime spatial planning, integrated coastal zone management, integrated maritime surveillance, the protection of the marine environment and of biodiversity, and the adaptation to the adverse effects of climate change on coastal areas.

4.3 Horizon 2020 and other centrally managed Union programmes in the areas of research and innovation

1. Member States and the Commission shall have due regard to strengthening coordination, synergies and complementarities between the ESI Funds and Horizon 2020, the Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME) in accordance with Regulation (EU) No 1287/2013 of the European Parliament and of the Council⁽¹⁾, and other relevant centrally managed Union funding programmes while also establishing a clear division of areas of intervention between them.

2. Member States shall develop national and/or regional 'smart specialisation' strategies in line with the National Reform Programme, where appropriate. Such strategies may take the form of or be included in a national or a regional research and innovation strategic policy framework for 'smart specialisation'. Smart specialisation strategies shall be developed through involving national or regional managing authorities and stakeholders such as universities and other higher education institutions, industry and social partners in an entrepreneurial discovery process. The authorities directly concerned by Horizon 2020 shall be closely associated with that process. Smart specialisation strategies shall include:

⁽¹⁾ Regulation (EU) No 1287/2013 of the European Parliament and of the Council of 11 December 2013 establishing a Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME) (2014 - 2020) and repealing Decision No 1639/2006/EC (See page 33 of this Official Journal).

- (a) "Upstream actions" to prepare regional R&I players to participate in Horizon 2020 ("stairways to excellence") to be developed, where necessary, through capacity- building. Communication and cooperation between Horizon 2020 national contact points and managing authorities of the ESI Funds shall be strengthened.
- (b) "Downstream actions" to provide the means to exploit and diffuse R&I results, stemming from Horizon 2020 and preceding programmes, into the market with particular emphasis on creating an innovation-friendly environment for business and industry, including SMEs and in line with the priorities identified for the territories in the relevant smart specialisation strategy.
3. Member States shall encourage the use of the provisions in this Regulation that allow the ESI Funds to be combined with resources under Horizon 2020 in the relevant programmes used to implement parts of the strategies referred to in point 2. Joint support shall be provided to national and regional authorities for the design and implementation of such strategies, to identify opportunities for joint financing of R&I infrastructures of European interest, the promotion of international collaboration, methodological support through peer reviews, exchange of good practice, and training throughout regions.
4. Member States and, where appropriate under Article 4(4), regions, shall consider additional measures aimed at unlocking their potential for excellence in R&I, in a manner that is complementary to and creates synergies with Horizon 2020, in particular through joint funding. Those measures shall consist of:
- (a) linking excellent research institutions and less developed regions as well as low- performing Research, Development and Innovation (RDI) Member States and regions to create new or upgrade existing centres of excellence in less developed regions as well as in low-performing RDI Member States and regions;
- (b) building links in less developed regions as well as in low-performing RDI Member States and regions between innovative clusters of recognised excellence;
- (c) establishing "ERA Chairs" to attract outstanding academics, in particular to less developed regions and low-performing RDI Member States and regions;
- (d) supporting access to international networks for researchers and innovators who lack sufficient involvement in the European Research Area (ERA) or are from less developed regions or low-performing RDI Member States and regions;
- (e) contributing as appropriate to the European Innovation Partnerships;
- (f) preparing national institutions and/or clusters of excellence for participation in the Knowledge and Innovation Communities (KICs) of the European Institute of Innovation and Technology (EIT); and
- (g) hosting high-quality international researcher mobility programmes with co-funding from the "Marie Skłodowska-Curie Actions".

Member States shall endeavour to use where appropriate, and in accordance with Article 70, the flexibility to support operations outside the programme area, with a level of investment sufficient to attain a critical mass, in order to implement the measures referred to in the first subparagraph as effectively as possible.

4.4 New Entrants Reserve (NER) 300 demonstration funding ⁽¹⁾

Member States shall ensure that financing from the ESI Funds is coordinated with support from the NER 300 Programme, which uses the revenues from auctioning 300 million allowances reserved under the new entrants reserve of the European Emissions Trading Scheme.

⁽¹⁾ Commission Decision 2010/670/EU of 3 November 2010 laying down criteria and measures for the financing of commercial demonstration projects that aim at the environmentally safe capture and geological storage of CO₂ as well as demonstration projects of innovative renewable energy technologies under the scheme for greenhouse gas emission allowance trading within the Community established by Directive 2003/87/EC of the European Parliament and of the Council (OJ L 290, 6.11.2010, p. 39).

4.5 Programme for the Environment and Climate Action (LIFE) ⁽¹⁾ and the environmental acquis

1. Member States and the Commission shall, through a stronger thematic focus in programmes and the application of the principle of sustainable development in accordance with Article 8, seek to exploit synergies with Union policy instruments (both funding and non-funding instruments) serving climate change mitigation and adaptation, environmental protection and resource efficiency.
2. Member States shall promote and, where appropriate and in accordance with Article 4, ensure complementarity and coordination with LIFE, in particular with integrated projects in the areas of nature, biodiversity, water, waste, air, climate change mitigation and adaptation. Such coordination shall be achieved through measures such as promoting the funding of activities through the ESI Funds that complement integrated projects under LIFE as well as by promoting the use of solutions, methods and approaches validated under LIFE, inter alia, including investments in green infrastructure, energy efficiency, eco-innovation, ecosystem-based solutions, and the adoption of related innovative technologies.
3. The relevant sectoral plans, programmes or strategies (including the Prioritised Action Framework, the River Basin Management Plan, the Waste Management Plan, the mitigation plan or adaptation strategy) may serve as the coordination framework, where support is envisaged for the areas concerned.

4.6 ERASMUS + ⁽²⁾

1. Member States shall seek to use ESI Funds to mainstream tools and methods developed and tested successfully under "Erasmus +" in order to maximise the social and economic impact of investment in people and, inter alia give impetus to youth initiatives and citizens actions.
2. Member States shall promote and ensure in accordance with Article 4, effective coordination between ESI Funds and 'Erasmus +' at national level through a clear distinction in the types of investment and target groups supported. Member States shall seek complementarity with regard to the funding of mobility actions.
3. Coordination shall be achieved by putting in place appropriate cooperation mechanisms between managing authorities and the national agencies established under the 'Erasmus +' programme, which can foster transparent and accessible communication towards citizens at Union, national and regional level.

4.7 European Union Programme for Employment and Social Innovation (EaSI) ⁽³⁾

1. Member States shall promote and ensure in accordance with Article 4(6) effective coordination between the European Union Programme for Employment and Social Innovation (EaSI) and the support provided by the ESI Funds under the employment and social inclusion thematic objectives. That effective coordination includes coordination of support provided under the EURES axis of the EaSI with actions to enhance transnational labour mobility supported by the ESF in order to promote workers' geographical mobility and boost employment opportunities, as well as coordination between the ESI Funds' support for self-employment, entrepreneurship, business creation and social enterprises and the EaSI support under the microfinance and social entrepreneurship axis.
2. Member States shall seek to scale-up the most successful measures developed under the Progress axis of the EaSI, notably on social innovation and social policy experimentation with the support of the ESF.

4.8 Connecting Europe Facility (CEF) ⁽⁴⁾

1. To maximise European added value in the fields of transport, telecommunication and energy, Member States and the Commission shall ensure that ERDF and Cohesion Fund interventions are planned in close cooperation with the support provided from the CEF, so as to ensure complementarity, avoid duplication of efforts and ensure the optimal linkage of different types of infrastructure at local, regional and national levels, and across the Union.

⁽¹⁾ Regulation (EU) No 1293/2013 of the European Parliament and of the Council of 11 December 2013 on the establishment of a Programme for the Environment and Climate Action (LIFE) and repealing Regulation (EC) No 614/2007 (See page 185 of this Official Journal).

⁽²⁾ Regulation (EU) No 1288/2013 of the European Parliament and of the Council of 11 December 2013 establishing "Erasmus+": the Union programme for education, training, youth and sport and repealing Decisions Nos 1719/2006/EC, 1720/2006/EC and 1298/2008/EC (See page 50 of this Official Journal).

⁽³⁾ Regulation (EU) No 1296/2013 of the European Parliament and of the Council of 11 December 2013 on a European Union Programme for Employment and Social Innovation ("EaSI") and amending Decision No 283/2010/EU establishing a European Progress Microfinance Facility for employment and social inclusion (See page 238 of this Official Journal).

⁽⁴⁾ Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013, establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129).

Maximum leverage of the different funding instruments shall be ensured for projects with a Union and Internal Market dimension, which deliver the highest European added-value, and promote social economic and territorial cohesion, in particular those projects implementing the priority transport, energy and digital infrastructure networks as identified in the respective trans-European network policy frameworks, in order to build new infrastructure and substantially upgrade existing infrastructure.

2. In the field of transport, investment planning shall be based on real and projected transport demand and identify missing links and bottlenecks, taking into account, in a coherent approach, the development of Union cross border links, and developing links across regions within a Member State. Investments in regional connectivity to the comprehensive trans-European transport network (TEN-T) and to the core TEN-T network shall ensure that urban and rural areas benefit from the opportunities created by major networks.
 3. Prioritisation of investments which have an impact beyond a certain Member State, particularly those which are part of the core TEN-T network corridors, shall be coordinated with TEN-T planning and core network corridors implementation plans, so that investments by the ERDF and the Cohesion Fund in transport infrastructure are fully in line with the TEN-T Guidelines.
 4. Member States shall focus on sustainable forms of transport and sustainable urban mobility and on investing in areas that offer the greatest European added value, taking into account the need to improve the quality, accessibility and reliability of transport services to promote public transport. Once identified, investments shall be prioritised according to their contribution to mobility, sustainability, to reducing greenhouse gas emissions, and to the Single European Transport Area, in accordance with the vision set out in the White Paper entitled "Roadmap to a Single European Transport Area – Towards a competitive and resource efficient transport system", highlighting that a significant reduction in greenhouse gases is required in the transport sector. The contribution of projects to sustainable European freight transport networks through the development of inland waterways should be promoted on the basis of a prior assessment of their environmental impact.
 5. The ESI Funds shall deliver the local and regional infrastructures and their linkages to the priority Union networks in the energy and telecommunication areas.
 6. Member States and the Commission shall put in place appropriate coordination and technical support mechanisms to ensure the complementarity and effective planning of ICT measures to make full use of the different Union instruments (ESI Funds, CEF, Trans-European networks, Horizon 2020) for the financing of broadband networks and the digital service infrastructures. The selection of the most appropriate financing instrument shall take into account the revenue generating potential of the operation and its level of risk in order to make the most effective use of public funds. In the context of their evaluation of applications for support from the ESI Funds, Member States should have regard to the evaluations of operations relating to those that have been submitted for CEF but not selected, without prejudice to the final selection decision by the managing authority.
- 4.9 Instrument for Pre-accession Assistance, European Neighbourhood Instrument and European Development Fund
1. Member States and the Commission shall, in accordance with their respective responsibilities, seek to increase coordination between external instruments and the ESI Funds to improve effectiveness in achieving multiple Union policy objectives. Coordination and complementarities with the European Development Fund, the Pre Accession Instrument and the European Neighbourhood Instrument is particularly important.
 2. To support deeper territorial integration, Member States shall seek to capitalise on synergies between territorial cooperation activities under cohesion policy and the European Neighbourhood Instruments, in particular with regard to cross border cooperation activities, taking account of the potential offered by EGTCs.
5. HORIZONTAL PRINCIPLES REFERRED TO IN ARTICLES 5, 7 AND 8 AND CROSS-CUTTING POLICY OBJECTIVES
- 5.1 Partnership and multi-level governance
1. In accordance with Article 5, the principle of partnership and multi-level governance shall be respected by Member States in order to facilitate achieving social, economic and territorial cohesion and delivery of the Union's priorities of smart, sustainable and inclusive growth. In order to respect those principles coordinated action is required, in particular between the different levels of governance, carried out in accordance with the principles of subsidiarity and proportionality, including by means of operational and institutional cooperation, with regard to the preparation and implementation of the Partnership Agreement and programmes.

- 2 Member States shall examine the need for strengthening the institutional capacity of partners in order to develop their potential in contributing to the effectiveness of the partnership.

5.2 Sustainable development

1. Member States and managing authorities shall, in all phases of implementation, ensure the full mainstreaming of sustainable development into the ESI Funds, respecting the principle of sustainable development as laid down in Article 3(3) TEU, as well as complying with the obligation to integrate environmental protection requirements pursuant to Article 11 TFEU and the polluter pays principle as set out in Article 191(2) TFEU.

Managing authorities shall undertake actions throughout the programme lifecycle, to avoid or reduce environmentally harmful effects of interventions and ensure results in net social, environmental and climate benefits. Actions to be undertaken may include the following:

- (a) directing investments towards the most resource-efficient and sustainable options;
 - (b) avoiding investments that may have a significant negative environmental or climate impact, and supporting actions to mitigate any remaining impacts;
 - (c) taking a long-term perspective when 'life-cycle' costs of alternative options for investment are compared;
 - (d) increasing the use of green public procurement.
2. Member States shall take into consideration the climate change mitigation and adaptation potential of investments made with the support of the ESI Funds, in accordance with Article 8, and ensure that they are resilient to the impact of climate change and natural disasters such as increased risks of flooding, droughts, heat waves, forest fires and extreme weather events.
 3. Investments shall be consistent with the water management hierarchy, in line with Directive 2000/60/EC of the European Parliament and of the Council ⁽¹⁾, with a focus on demand management options. Alternative supply options shall only be considered when the potential for water savings and efficiency has been exhausted. Public intervention in the waste management sector shall complement efforts by the private sector, in particular in relation to producer responsibility. Investments shall encourage innovative approaches that promote high levels of recycling. Investments shall be consistent with the waste hierarchy established under Directive 2008/98/EC of the European Parliament and of the Council ⁽²⁾. Expenditure related to biodiversity and the protection of natural resources shall be consistent with Council Directive 92/43/EEC ⁽³⁾.

5.3 Promotion of equality between men and women and non-discrimination

1. In accordance with Article 7, Member States and the Commission shall pursue the objective of equality between men and women and shall take appropriate steps to prevent any discrimination during the preparation, implementation, monitoring and evaluation of operations in the programmes co-financed by the ESI Funds. When pursuing the objectives of Article 7, Member States shall describe actions to be taken, in particular with regard to selection of operations, setting of objectives for interventions, and arrangements for monitoring and reporting. Member States shall also carry out gender analyses where appropriate. In particular, specific targeted actions shall be supported through the ESF.
2. Member States shall ensure, in accordance with Articles 5 and 7, the participation of the relevant bodies responsible for promoting gender equality and non-discrimination in the partnership, and ensure adequate structures in accordance with national practices to advise on gender equality, non-discrimination and accessibility in order to provide the necessary expertise in the preparation, monitoring and evaluation of the ESI Funds.
3. Managing authorities shall undertake evaluations or self-assessment exercises, in coordination with the monitoring committees, focusing on the application of the gender mainstreaming principle.

⁽¹⁾ Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

⁽²⁾ Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives (OJ L 312, 22.11.2008, p. 3).

⁽³⁾ Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7).

4. Member States shall address, in an appropriate manner, the needs of disadvantaged groups in order to allow them to better integrate into the labour market, and thereby facilitate their full participation in society.

5.4 Accessibility

1. Member States and the Commission shall, in accordance with Article 7, take appropriate steps to prevent any discrimination based on disability. Managing authorities shall ensure by means of action throughout programme lifecycles that all products, goods, services and infrastructures that are open or provided to the public and are co-financed by the ESI Funds are accessible to all citizens including those with disabilities in accordance with applicable law, thereby contributing to a barrier-free environment for persons with disabilities and the elderly. In particular, accessibility to the physical environment, transport, ICT in order to promote inclusion of disadvantaged groups, including persons with disabilities, shall be ensured. Actions to be undertaken may include directing investments towards accessibility in existing buildings and established services.

5.5 Addressing demographic change

1. The challenges resulting from demographic change, including in particular those related to a shrinking working population, an increasing proportion of retired people in the overall population and to depopulation, shall be taken into account at all levels. Member States shall make use of the ESI Funds, in line with relevant national or regional strategies, where such strategies are in place, to tackle demographic problems and to create growth linked to an ageing society.
2. Member States shall use the ESI Funds, in line with relevant national or regional strategies to facilitate inclusion of all age groups, including through improved access to education and social support structures with a view to enhancing job opportunities for the elderly and young people and with a focus on regions with high rates of youth unemployment in comparison to the Union average rate. Investments in health infrastructures shall be aimed at ensuring a long and healthy working life for all of the Union's citizens.
3. To address challenges in the regions most affected by demographic change, Member States shall in particular identify measures to:
 - (a) support demographic renewal through better conditions for families and an improved balance between working and family life;
 - (b) boost employment, raise productivity and economic performance through investing in education, ICT and research and innovation;
 - (c) focus on the adequacy and quality of education, training and social support structures as well as where appropriate, on the efficiency of social protection systems;
 - (d) promote cost-effective provision of health care and long-term care including investment in e-health, e-care and infrastructure.

5.6 Climate change mitigation and adaptation

In accordance with Article 8, climate change mitigation and adaptation, and risk prevention shall be integrated in the preparation and implementation of Partnership Agreements and programmes.

6. ARRANGEMENTS FOR ADDRESSING KEY TERRITORIAL CHALLENGES

- 6.1 Member States shall take account of geographic or demographic features and take steps to address the specific territorial challenges of each region to unlock their specific development potential, thereby also helping them to achieve smart, sustainable and inclusive growth in the most efficient way.
- 6.2 The choice and combination of thematic objectives, as well as the selection of corresponding investment and Union priorities and the specific objectives set shall reflect the needs and potential for smart, sustainable and inclusive growth of each Member State and region.

- 6.3 When preparing Partnership Agreements and programmes Member States shall therefore take into consideration that the major societal challenges faced by the Union today – globalisation, demographic change, environmental degradation, migration, climate change, energy use, the economic and social consequences of the crisis – may have different impacts in different regions.
- 6.4 With a view to an integrated territorial approach to addressing territorial challenges Member States shall ensure that programmes under the ESI Funds reflect the diversity of European regions, in terms of employment and labour market characteristics, interdependencies between different sectors, commuting patterns, population ageing and demographic shifts, cultural, landscape and heritage features, climate change vulnerabilities and impacts, land use and resource constraints, potential for more sustainable use of natural resources including renewables, institutional and governance arrangements, connectivity and accessibility, and linkages between rural and urban areas. In accordance with point (a) of Article 15(1), Member States and regions shall therefore undertake the following steps for the purpose of preparation of their Partnership Agreements and programmes:
- (a) An analysis of the Member State's or region's characteristics, development potential and capacity, particularly in relation to the key challenges identified in the Union strategy for smart, sustainable and inclusive growth, the National Reform Programmes, where appropriate, relevant country-specific recommendations adopted in accordance with Article 121(2) TFEU and in relevant Council recommendations adopted in accordance with Article 148(4) TFEU;
 - (b) An assessment of the major challenges to be addressed by the region or Member State, the identification of the bottlenecks and missing links, innovation gaps, including the lack of planning and implementation capacity that inhibit the long-term potential for growth and jobs. This shall form the basis for the identification of the possible fields and activities for policy prioritisation, intervention and concentration;
 - (c) An assessment of the cross-sectoral, cross-jurisdictional or cross-border coordination challenges, particularly in the context of macro-regional and sea-basin strategies;
 - (d) Identification of steps to achieve improved coordination across different territorial levels, taking account of the appropriate territorial scale and context for policy design as well as Member States' institutional and legal framework, and sources of funding to deliver an integrated approach linking the Union strategy for smart, sustainable and inclusive growth with regional and local actors.
- 6.5 In order to take into account the objective of territorial cohesion, the Member States and regions shall, in particular, ensure that the overall approach to promoting smart, sustainable and inclusive growth in the areas concerned:
- (a) reflects the role of cities, urban and rural areas, fisheries and coastal areas, and areas facing specific geographical or demographic handicaps;
 - (b) takes account of the specific challenges of the outermost regions, the northernmost regions with a very low population density and of island, cross-border or mountain regions;
 - (c) addresses urban-rural linkages, in terms of access to affordable, high quality infrastructure and services, and problems in regions with a high concentration of socially marginalised communities.

7. COOPERATION ACTIVITIES

7.1 Coordination and complementarity

1. Member States shall seek complementarity between cooperation activities and other actions supported by the ESI Funds.
2. Member States shall ensure that cooperation activities make an effective contribution to the objectives of the Union strategy for smart, sustainable and inclusive growth and that cooperation is organised in support of wider policy goals. To achieve this Member States and the Commission shall, in accordance with their respective responsibilities, ensure complementarity and coordination with other Union-funded programmes or instruments.

3. To reinforce the effectiveness of cohesion policy Member States shall seek coordination and complementarity between programmes under the European territorial cooperation goal and the Investment for growth and jobs goal, in particular to ensure coherent planning and facilitate the implementation of large-scale investment.
4. Member States shall, where appropriate, ensure that the objectives of macro-regional and sea-basin strategies form part of the overall strategic planning, in Partnership Agreements, in accordance with Article 15(2) of this Regulation, and in programmes in the regions and Member States concerned in accordance with the relevant provisions of the Fund-specific rules. Member States shall seek also to ensure that where macro-regional and sea basin strategies have been put in place, the ESI Funds support their implementation in accordance with Article 15(2) of this Regulation and the relevant provisions of the Fund-specific rules and in line with the needs of the programme area identified by the Member States. To ensure efficient implementation there shall also be coordination with other Union-funded instruments and other relevant instruments.
5. Member States shall, where appropriate, make use of the possibility of carrying out interregional and transnational actions with beneficiaries located in at least one other Member State within the framework of the operational programmes under the Investment for growth and jobs goal, including on the implementation of relevant research and innovation measures emanating from their 'smart specialisation' strategies.
6. Member States and regions shall make the best use of territorial cooperation programmes in overcoming barriers to cooperation beyond administrative borders, while contributing to the Union strategy for smart, sustainable and inclusive growth as well as strengthening economic, social and territorial cohesion. In this context, particular attention shall be paid to the regions covered by Article 349 TFEU.

7.2 Cross-border, transnational and interregional cooperation under the ERDF

1. Member States and regions shall seek to make use of cooperation to achieve critical mass, inter alia, in the field of ICT and research and innovation, and also to promote the development of joint smart specialisation approaches and partnerships among educational institutions. Interregional cooperation shall, where appropriate, include fostering cooperation between innovative research-intensive clusters and exchanges between research institutions taking into consideration the experience of "Regions of Knowledge" and "Research Potential in Convergence and Outermost Regions" under the Seventh Framework Programme for Research.
2. Member States and regions shall, in the areas concerned, seek to draw on cross-border and transnational cooperation to:
 - (a) ensure that areas that share major geographical features (islands, lakes, rivers, sea basins or mountain ranges) support the joint management and promotion of their natural resources;
 - (b) exploit the economies of scale that can be achieved, in particular with regard to investment related to the shared use of common public services;
 - (c) promote coherent planning and development of cross-border network infrastructure, in particular missing cross-border links, and environmentally friendly and interoperable transport modes in larger geographical areas;
 - (d) achieve critical mass, particularly in the field of research and innovation and ICT, education and in relation to measures improving the competitiveness of SMEs;
 - (e) strengthen cross-border labour market services to foster the mobility of workers across borders;
 - (f) improve cross-border governance.
3. Member States and regions shall seek to make use of interregional cooperation to reinforce the effectiveness of Cohesion Policy by encouraging exchange of experience between regions and cities to enhance design and implementation of programmes under the Investment for growth and jobs goal and the European territorial cooperation goal.

7.3 Contribution of mainstream programmes to macro-regional and sea-basin strategies

1. In accordance with point (a)(ii) of Article 15(2) of this Regulation and the relevant provisions of the Fund-specific rules Member States shall seek to ensure successful mobilisation of Union funding for macro-regional and sea-basin strategies in line with the needs of the programme area identified by the Member States. Ensuring successful mobilisation may be done, among other actions, by prioritising operations deriving from macro-regional and sea-basin strategies by organising specific calls for them or giving priority to these operations in the selection process through identification of operations which can be jointly financed from different programmes.
2. Member States shall consider making use of relevant transnational programmes as frameworks to support the range of policies and funds needed to implement macro-regional and sea-basin strategies.
3. Member States shall promote, where appropriate, the use of ESI Funds in the context of macro-regional strategies, for the creation of European transport corridors, including supporting modernisation of customs, the prevention, preparedness and response to natural disasters, water management at river basin level, green infrastructure, integrated maritime cooperation across borders and sectors, R&I and ICT networks and management of shared marine resources in the sea basin and protection of marine biodiversity.

7.4 Transnational cooperation under the ESF

1. Member States shall seek to address policy areas identified in the relevant Council recommendations in order to maximise mutual learning.
 2. Member States shall, where appropriate, select the themes for transnational activities and establish appropriate implementation mechanisms in accordance with their specific needs.
-

ANNEX II

METHOD FOR ESTABLISHING THE PERFORMANCE FRAMEWORK

1. The performance framework shall consist of milestones established for each priority, with the exception of priorities dedicated to technical assistance and programmes dedicated to financial instruments in accordance with Article 39, for the year 2018 and targets established for 2023. The milestones and targets shall be presented in accordance with the format set out in table 1.

Table 1: Standard format for the performance framework

Priority	Indicator and measurement unit, where appropriate		Milestone for 2018	Target for 2023

2. Milestones are intermediate targets, directly linked to the achievement of the specific objective of a priority, where appropriate, expressing the intended progress towards the targets set for the end of the period. Milestones established for 2018 shall include financial indicators, output indicators and, where appropriate result indicators, which are closely linked to the supported policy interventions. Result indicators shall not be taken into account for the purposes of Article 22(6) and (7). Milestones may also be established for key implementation steps.
3. Milestones and targets shall be:
- realistic, achievable, relevant, capturing essential information on the progress of a priority;
 - consistent with the nature and character of the specific objectives of the priority;
 - transparent, with objectively verifiable targets and the source data identified and, where possible, publicly available;
 - verifiable, without imposing a disproportionate administrative burden;
 - consistent across programmes, where appropriate.
4. The targets for 2023 for a given priority shall be established taking into account the amount of performance reserve related to the priority.
5. In duly justified cases, such as a significant change in the economic, environmental and labour market conditions in a Member State or region, and in addition to amendments resulting from changes in allocations for a given priority, that Member State may propose the revision of milestones and targets in accordance with Article 30.

ANNEX III

PROVISIONS FOR DETERMINING THE SCOPE AND THE LEVEL OF SUSPENSION OF COMMITMENTS OR PAYMENTS REFERRED TO IN ARTICLE 23(11)

1. DETERMINING THE LEVEL OF SUSPENSION OF COMMITMENTS

The maximum level of suspension applied to a Member State shall in the first instance be determined taking into account the ceilings set out in points (a) to (c) of the third subparagraph of Article 23(11). That level shall be reduced if one or more of the following apply:

- (a) where the unemployment rate in the Member State for the year preceding the trigger event referred to in Article 23(9) exceeds the average rate for the Union by more than two percentage points, the maximum level of suspension shall be reduced by 15 %;
- (b) where the unemployment rate in the Member State for the year preceding the trigger event referred to in Article 23(9) exceeds the average rate for the Union by more than five percentage points, the maximum level of suspension shall be reduced by 25 %;
- (c) where the unemployment rate in the Member State for the year preceding the trigger event referred to in Article 23(9) exceeds the average rate for the Union by more than eight percentage points, the maximum level of suspension shall be reduced by 50 %;
- (d) where the proportion of people at risk of poverty or social exclusion in the Member State exceeds the average for the Union by more than 10 percentage points for the year preceding the trigger event referred to in Article 23(9), the maximum level of suspension shall be reduced by 20 %;
- (e) where the Member State experiences a contraction of real GDP for two or more consecutive years preceding the trigger event referred to in Article 23(9), the maximum level of suspension shall be reduced by 20 %;
- (f) where the suspension concerns commitments for the years 2018, 2019 or 2020, a reduction shall be applied to the level resulting from the application of Article 23(11) as follows:
 - (i) for the year 2018, the level of suspension shall be reduced by 15 %;
 - (ii) for the year 2019, the level of suspension shall be reduced by 25 %;
 - (iii) for the year 2020, the level of suspension shall be reduced by 50 %.

The reduction in the level of suspension resulting from the application of points (a) to (f) shall not exceed in total 50 %.

In the event that the situation described in point (b) or (c) occurs simultaneously with both points (d) and (e), the effect of the suspension shall be postponed by one year.

2. DETERMINING THE SCOPE OF SUSPENSION OF COMMITMENTS ACROSS PROGRAMMES AND PRIORITIES

A suspension of commitments applied to a Member State shall in the first instance proportionally affect all programmes and priorities.

However, the following programmes and priorities shall be excluded from the scope of the suspension:

- (i) programmes or priorities which are already subject to a suspension decision adopted in accordance with Article 23(6);
- (ii) programmes or priorities whose resources are to be increased as a result of a reprogramming request addressed by the Commission in accordance with Article 23(1) in the year of the trigger event referred to in Article 23(9);
- (iii) programmes or priorities whose resources have been increased within the two years preceding the trigger event referred to in Article 23(9) as a result of a decision adopted in accordance with Article 23(5);

(iv) programmes or priorities which are of critical importance to addressing adverse economic or social conditions. Such programmes or priorities shall cover programmes or priorities supporting investments of particular importance to the Union related to the YEL. Programmes or priorities may be considered of such critical importance when they support investments related to the implementation of recommendations addressed to the Member State concerned in the framework of the European Semester and aimed at structural reforms, or related to priorities supporting poverty reduction or to financial instruments for the competitiveness of SMEs.

3. DETERMINING THE FINAL LEVEL OF SUSPENSION OF COMMITMENTS FOR THE PROGRAMMES FALLING WITHIN THE SCOPE OF THE SUSPENSION

The exclusion of a priority within a programme shall be carried out by reducing the commitment of the programme pro rata to the allocation to the priority.

The level of suspension to be applied to the commitments of the programmes shall be that which is necessary to reach the aggregate level of suspension determined under point 1.

4. DETERMINING THE SCOPE AND THE LEVEL OF SUSPENSION OF PAYMENTS

The programmes and priorities referred to under point 2(i) to (iv) shall also be excluded from the scope of suspension of payments.

The level of suspension to be applied shall not exceed 50 % of the payments of programmes and priorities.

—

ANNEX IV

IMPLEMENTATION OF FINANCIAL INSTRUMENTS: FUNDING AGREEMENTS

1. Where a financial instrument is implemented under points (a) and (b) of Article 38(4), the funding agreement shall include the terms and conditions for making contributions from the programme to the financial instrument and shall include at least the following elements:
 - (a) the investment strategy or policy including implementation arrangements, financial products to be offered, final recipients targeted, and envisaged combination with grant support (as appropriate);
 - (b) a business plan or equivalent documents for the financial instrument to be implemented, including the expected leverage effect referred to in Article 37(2);
 - (c) the target results that the financial instrument concerned is expected to achieve to contribute to the specific objectives and results of the relevant priority;
 - (d) provisions for monitoring of the implementation of investments and of deal flows including reporting by the financial instrument to the fund of funds and/or the managing authority to ensure compliance with Article 46;
 - (e) audit requirements, such as minimum requirements for documentation to be kept at the level of the financial instrument (and at the level of the fund of funds where appropriate), and requirements in relation to the maintenance of separate records for the different forms of support in compliance with Article 37(7) and (8) (where applicable), including provisions and requirements regarding access to documents by audit authorities of Member States, Commission auditors and the European Court of Auditors in order to ensure a clear audit trail, in accordance with Article 40;
 - (f) requirements and procedures for managing the phased contribution provided by the programme in accordance with Article 41 and for the forecast of deal flows, including requirements for fiduciary/separate accounting as set out in Article 38(6);
 - (g) requirements and procedures for managing interest and other gains generated as referred to in Article 43, including acceptable treasury operations/investments, and the responsibilities and liabilities of the parties concerned;
 - (h) provisions regarding the calculation and payment of management costs incurred or of the management fees of the financial instrument;
 - (i) provisions regarding the re-utilisation of resources attributable to the support from the ESI Funds until the end of the eligibility period in compliance with Article 44;
 - (j) provisions regarding the use of resources attributable to the support of the ESI Funds after the end of the eligibility period in compliance with Article 45 and an exit policy for the contribution from the ESI Funds out of the financial instrument;
 - (k) conditions for a possible total or partial withdrawal of programme contributions from programmes to financial instruments, including the fund of funds where applicable;
 - (l) provisions to ensure that bodies implementing financial instruments manage financial instruments with independence and in accordance with the relevant professional standards, and act in the exclusive interest of the parties providing contributions to the financial instrument;
 - (m) provisions for the winding-up of the financial instrument.

In addition, where financial instruments are organised through a fund of funds, the funding agreement between the managing authority and the body that implements the fund of funds must also provide for the appraisal and selection of bodies implementing the financial instruments, including calls for expression of interest or public procurement procedures.

2. Strategy documents referred to under Article 38(8) for financial instruments implemented under point (c) of Article 38(4) shall include at least the following elements:
 - (a) the investment strategy or policy of the financial instrument, general terms and conditions of envisaged debt products, target recipients and actions to be supported;

- (b) a business plan or equivalent documents for the financial instrument to be implemented, including the expected leverage effect referred to in Article 37(2);
 - (c) the use and re-use of resources attributable to the support of the ESI Funds in accordance with Articles 43, 44 and 45;
 - (d) monitoring and reporting of the implementation of the financial instrument to ensure compliance with Article 46.
-

ANNEX V

DEFINITION OF FLAT-RATES FOR NET-REVENUE GENERATING PROJECTS

	Sector	Flat rates
1	ROAD	30 %
2	RAIL	20 %
3	URBAN TRANSPORT	20 %
4	WATER	25 %
5	SOLID WASTE	20 %

ANNEX VI

ANNUAL BREAKDOWN OF COMMITMENT APPROPRIATIONS FOR 2014 TO 2020

Adjusted annual profile (including YEI top-up)

	2014	2015	2016	2017	2018	2019	2020	Total
EUR, 2011 prices	44 677 333 745	45 403 321 660	46 044 910 729	46 544 721 007	47 037 288 589	47 513 211 563	47 924 907 446	325 145 694 739

ANNEX VII

ALLOCATION METHODOLOGY

Allocation method for the less developed regions eligible under the Investment for growth and jobs goal, referred to in point (a) of the first subparagraph of Article 90(2)

1. Each Member State's allocation shall be the sum of the allocations for its individual eligible NUTS level 2 regions, calculated in accordance with the following steps:
 - (a) determination of an absolute amount (in EUR) obtained by multiplying the population of the region concerned by the difference between that region's GDP per capita, measured in PPS, and the EU-27 average GDP per capita (in PPS);
 - (b) application of a percentage to the above absolute amount in order to determine that region's financial envelope; this percentage shall be graduated to reflect the relative prosperity, measured in PPS, as compared to the EU-27 average, of the Member State in which the eligible region is situated, i.e.:
 - (i) for regions in Member States whose level of GNI per capita is below 82 % of the EU-27 average: 3,15 %;
 - (ii) for regions in Member States whose level of GNI per capita is between 82 % and 99 % of the EU-27 average: 2,70 %;
 - (iii) for regions in Member States whose level of GNI per capita is over 99 % of the EU-27 average: 1,65 %;
 - (c) to the amount obtained in accordance with point (b) is added, if applicable, an amount resulting from the allocation of a premium of EUR 1 300 per unemployed person per year, applied to the number of persons unemployed in that region exceeding the number that would be unemployed if the average unemployment rate of all the EU less developed regions applied.

Allocation method for transition regions eligible under the Investment for growth and jobs goal, referred to in point (b) of the first subparagraph of Article 90(2)

2. Each Member State's allocation shall be the sum of the allocations for its individual eligible NUTS level 2 regions, calculated in accordance with the following steps:
 - (a) determination of the minimum and maximum theoretical aid intensity for each eligible transition region. The minimum level of support is determined by the average per capita aid intensity per Member State before the application of the regional safety net, allocated to the more developed regions of that Member State. If the Member State has no more developed regions, the minimum level of support will correspond to the initial average per capita aid intensity of all more developed regions, i.e. EUR 19,80 per head and per year. The maximum level of support refers to a theoretical region with a GDP per head of 75 % of the EU-27 average and is calculated using the method defined in points (a) and (b) of paragraph 1. Of the amount obtained by this method, 40 % is taken into account;
 - (b) calculation of initial regional allocations, taking into account regional GDP per capita (in PPS) through a linear interpolation of the region's relative GDP per capita compared to EU-27;
 - (c) to the amount obtained in accordance with point (b) is added, if applicable, an amount resulting from the allocation of a premium of EUR 1 100 per unemployed person per year, applied to the number of persons unemployed in that region exceeding the number that would be unemployed if the average unemployment rate of all the less developed regions applied.

Allocation method for the more developed regions eligible under the Investment for growth and jobs goal, referred to in point (c) of the first subparagraph of Article 90(2)

3. The total initial theoretical financial envelope shall be obtained by multiplying an aid intensity per head and per year of EUR 19,80 by the eligible population.
4. The share of each Member State concerned shall be the sum of the shares of its eligible NUTS level 2 regions, which are determined on the basis of the following criteria, weighted as indicated:
 - (a) total regional population (weighting 25 %);

- (b) number of unemployed people in NUTS level 2 regions with an unemployment rate above the average of all more developed regions (weighting 20 %);
- (c) employment to be added to reach the Union strategy for smart, sustainable and inclusive growth target for regional employment rate (ages 20 to 64) of 75 % (weighting 20 %);
- (d) number of persons aged 30 to 34 with tertiary educational attainment to be added to reach the Union strategy for smart, sustainable and inclusive growth target of 40 % (weighting 12,5 %);
- (e) number of early leavers from education and training (aged 18 to 24) to be subtracted to reach the Union strategy for smart, sustainable and inclusive growth target of 10 % (weighting 12,5 %);
- (f) difference between the observed GDP of the region (measured in PPS), and the theoretical regional GDP if the region were to have the same GDP per head as the most prosperous NUTS level 2 region (weighting 7,5 %);
- (g) population of NUTS level 3 regions with a population density below 12,5 inhabitants/km² (weighting 2,5 %).

Allocation method for the Member States eligible for the Cohesion Fund under Article 90(3)

5. The total theoretical financial envelope shall be obtained by multiplying the average aid intensity per head and per year of EUR 48 by the eligible population. Each eligible Member State's a priori allocation of this theoretical financial envelope corresponds to a percentage based on its population, surface area and national prosperity, and shall be obtained by applying the following steps:
 - (a) calculation of the arithmetical average of that Member State's population and surface area shares of the total population and surface area of all the eligible Member States. If, however, a Member State's share of total population exceeds its share of total surface area by a factor of five or more, reflecting an extremely high population density, only the share of total population will be used for this step;
 - (b) adjustment of the percentage figures so obtained by a coefficient representing one third of the percentage by which that Member State's GNI per capita (measured in purchasing power parities) for the period 2008-2010 exceeds or falls below the average GNI per capita of all the eligible Member States (average expressed as 100 %).
6. In order to reflect the significant needs of Member States, which acceded to the Union on or after 1 May 2004, in terms of transport and environment, their share of the Cohesion Fund will be set at a minimum of one third of their total final financial allocation after capping as defined in paragraphs 10 to 13 received on average over the period.
7. The allocation from the Cohesion Fund for the Member States defined in the second subparagraph of Article 90(3) shall be digressive over seven years. This transitional support will be of EUR 48 per capita in 2014, applied to the total population of the Member State. The amounts in the following years will be expressed as a percentage of the amount defined for 2014, the percentages being 71 % in 2015, 42 % in 2016, 21 % in 2017, 17 % in 2018, 13 % in 2019 and 8 % in 2020.

Allocation method for the European territorial cooperation goal referred to in Article 4 of the ETC Regulation

8. The allocation of resources by Member State, covering cross-border and transnational cooperation, and including the contribution from the ERDF to the European Neighbourhood Instrument and the Instrument for Pre-Accession Assistance, is determined as the weighted sum of the share of the population of border regions and of the share of the total population of each Member State. The weight is determined by the respective shares of the cross-border and transnational strands. The shares of the cross border and transnational cooperation components are 77,9 % and 22,1 %.

Allocation method of the additional funding for regions referred to in point (e) of Article 92(1)

9. An additional special allocation corresponding to an aid intensity of EUR 30 per inhabitant per year will be allocated to the outermost NUTS level 2 regions and the northern sparsely populated NUTS level 2 regions. That allocation will be distributed per region and Member State in a manner proportional to the total population of those regions.

Maximum level of transfers from funds supporting cohesion

10. In order to contribute to achieving adequate concentration of cohesion funding on the least developed regions and Member States and to the reduction of disparities in average per capita aid intensities, the maximum level of transfer (capping) from the Funds to each individual Member State will be 2,35 % of the GDP of the Member State. The capping will be applied on an annual basis, subject to adjustments necessary to accommodate the frontloading of the YEI, and will - if applicable - proportionally reduce all transfers (except for the more developed regions and European territorial cooperation goal) to the Member State concerned in order to obtain the maximum level of transfer. For Member States which acceded to the Union before 2013 and whose average real GDP growth 2008-2010 was lower than -1 %, the maximum level of transfer will be 2,59 %.
11. The ceilings referred to in paragraph 10 above include the contributions from the ERDF to the financing of the cross-border strand of the European Neighbourhood Instrument and of the Instrument for Pre-Accession Assistance. Those ceilings do not include the specific allocation of EUR 3 000 000 000 for the YEI.
12. Calculations of GDP by the Commission will be based on the statistics available in May 2012. Individual national growth rates of GDP for 2014 to 2020, as projected by the Commission in May 2012, will be applied for each Member State separately.
13. The rules described in paragraph 10 shall not result in allocations per Member State higher than 110 % of their level in real terms for the 2007-2013 programming period.

Additional provisions

14. For all regions whose GDP per capita (in PPS) was used as an eligibility criterion for the 2007-2013 programming period and was less than 75 % of the EU-25 average, but whose GDP per capita is above 75 % of the EU-27 average, the minimum level of support in 2014-2020 under the Investment for growth and jobs goal will correspond every year to 60 % of their former indicative average annual allocation under the Convergence allocation, calculated by the Commission within the multiannual financial framework 2007-2013.
15. No transition region shall receive less than what it would have received if it had been a more developed region. In order to determine the level of this minimum allocation, the allocation distribution method for more developed regions will be applied to all regions having a GDP per capita of at least 75 % of the EU-27 average.
16. The minimum total allocation from the Funds for a Member State shall correspond to 55 % of its individual 2007-2013 total allocation. The adjustments needed to fulfil this requirement shall be applied proportionally to the allocations from the Funds, excluding the allocations under the European territorial cooperation goal.
17. To address the effects of the economic crisis on Member States within the euro area on their level of prosperity, and in order to boost growth and job creation in these Member States, the Structural Funds will provide the following additional allocations:
 - (a) EUR 1 375 000 000 for the more developed regions of Greece;
 - (b) EUR 1 000 000 000 for Portugal, distributed as follows: EUR 450 000 000 for more developed regions, of which EUR 150 000 000 for Madeira, EUR 75 000 000 for the transition region and EUR 475 000 000 for the less developed regions;
 - (c) EUR 100 000 000 for the Border, Midland and Western region of Ireland;
 - (d) EUR 1 824 000 000 for Spain, of which EUR 500 000 000 for Extremadura, EUR 1 051 000 000 for the transition regions and EUR 273 000 000 for the more developed regions;
 - (e) EUR 1 500 000 000 for the less developed regions of Italy, out of which EUR 500 000 000 for non-urban areas.
18. In order to recognise the challenges posed by the situation of island Member States and the remoteness of certain parts of the Union, Malta and Cyprus shall receive, after applying the method of calculation referred to in paragraph 16, an additional envelope of EUR 200 000 000 and EUR 150 000 000 respectively under the Investment for growth and jobs goal and distributed as follows: one third for the Cohesion Fund and two thirds for the Structural Funds.

The Spanish regions of Ceuta and Melilla shall be allocated an additional total envelope of EUR 50 000 000 under the Structural Funds.

The outermost region of Mayotte shall be allocated a total envelope of EUR 200 000 000 under the Structural Funds.

19. To facilitate the adjustment of certain regions either to changes in their eligibility status or to the long-lasting effects of recent developments in their economy the following additional allocations are made:
- (a) for Belgium EUR 133 000 000, out of which EUR 66 500 000 for Limburg and EUR 66 500 000 for the transition regions of the Region of Wallonia;
 - (b) for Germany EUR 710 000 000, out of which EUR 510 000 000 for the former Convergence regions in the transition regions' category and EUR 200 000 000 for the Leipzig region;
 - (c) notwithstanding paragraph 10, the less developed regions of Hungary will be allocated an additional envelope of EUR 1 560 000 000, the less developed regions of the Czech Republic an additional envelope of EUR 900 000 000 and the less developed region of Slovenia an additional envelope of EUR 75 000 000, under the Structural Funds.
20. A total of EUR 150 000 000 will be allocated for the PEACE programme, of which EUR 106 500 000 for the United Kingdom and EUR 43 500 000 for Ireland. That programme will be implemented as a cross-border cooperation programme involving Northern Ireland and Ireland.

Additional adjustments in accordance with Article 92(2)

21. In addition to the amounts set out in Articles 91 and 92, Cyprus shall benefit from an additional allocation of EUR 94 200 000 in 2014 and EUR 92 400 000 in 2015 to be added to its Structural Funds allocation.
-

ANNEX VIII

METHODOLOGY CONCERNING THE SPECIFIC ALLOCATION FOR THE YEI REFERRED TO IN ARTICLE 91

- I. The breakdown of the specific allocation for the YEI shall be determined in accordance with the following steps:
 1. The number of young unemployed persons between the ages of 15-24 shall be identified in the eligible NUTS level 2 regions as defined in Article 16 of the ESF Regulation, namely NUTS level 2 regions that have youth unemployment rates for young persons aged 15 to 24 of more than 25 % in 2012 and, for Member States where the youth unemployment rate has increased by more than 30 % in 2012, regions that have youth unemployment rates of more than 20 % in 2012 (the 'eligible regions').
 2. The allocation corresponding to each eligible region shall be calculated on the basis of the ratio between the number of young unemployed persons in the eligible region and the total number of young unemployed persons referred to in point 1 in all eligible regions.
 3. The allocation for each Member State shall be the sum of the allocations for each of its eligible regions.
 - II. The specific allocation for the YEI shall not be taken into account for the purpose of applying the capping rules set out in Annex VII in relation to the allocation of the global resources.
 - III. For the determination of the specific allocation from the YEI to Mayotte, the youth unemployment rate and number of young unemployed persons shall be determined on the basis of the latest available data at national level as long as Eurostat data at NUTS level 2 are not available.
 - IV. The resources for the YEI may be revised upwards for the years 2016 to 2020 in the framework of the budgetary procedure in accordance with Article 14 of Regulation (UE, Euratom) No 1311/2013. The breakdown by Member State of the additional resources shall follow the same steps as applied for the initial allocation but shall refer to the latest available annual data.
-

ANNEX IX

METHODOLOGY FOR DETERMINING MINIMUM SHARE OF THE ESF

The additional percentage share to be added to the share of Structural Funds resources referred to in Article 92(4) allocated in a Member State to the ESF which corresponds to the share of that Member State for the 2007-2013 programming period shall be determined as follows, based on employment rates (for persons between the ages of 20-64) of reference year 2012:

- where the employment rate is 65 % or less the share shall be increased by 1,7 percentage points;
- where the employment rate is above 65 % but not higher than 70 % the share shall be increased by 1,2 percentage points;
- where the employment rate is above 70 % but not higher than 75 % the share shall be increased by 0,7 percentage points;
- where the employment rate is above 75 %, no increase shall be required.

The total percentage share of a Member State after the addition shall not exceed 52 % of Structural Funds resources referred to in Article 92(4).

For Croatia the share of Structural Funds resources, excluding the European Territorial Cooperation goal, allocated to the ESF for the 2007-2013 programming period shall be the average share of convergence regions of those Member States which acceded to the Union on or after 1 January 2004.

ANNEX X

ADDITIONALITY

1. PUBLIC OR EQUIVALENT STRUCTURAL EXPENDITURE

In Member States in which less developed regions cover at least 65 % of the population, the figure on gross fixed capital formation reported in the Stability and Convergence Programmes, prepared by Member States in accordance with Regulation (EC) No 1466/97 to present their medium term budgetary strategy, will be used to determine public or equivalent structural expenditure. The figure to be used shall be that reported in the context of the general government balance and debt and related to general government budgetary prospects and shall be presented as a percentage of GDP.

In those Member States in which less developed regions cover more than 15 % and less than 65 % of the population, the total figure on gross fixed capital formation in the less developed regions will be used to determine public or equivalent structural expenditure. It shall be reported in the same format as laid down in the first subparagraph.

2. VERIFICATION

Verifications of additionality in accordance with Article 95(5) are subject to the following rules:

2.1 Ex ante verification

- (a) When a Member State submits a Partnership Agreement, it shall provide information on the planned profile of expenditure in the format of Table 1.

Table 1

Expenditure of the General Government as a share of GDP	2014	2015	2016	2017	2018	2019	2020
P51	X	X	X	X	X	X	X

- (b) Member States, in which less developed regions cover more than 15 % and less than 65 % of the population, shall also provide information on the planned profile of expenditure in those less developed regions in the format of Table 2.

Table 2

	2014	2015	2016	2017	2018	2019	2020
Gross Fixed Capital Formation of the General Government in the less developed regions as a share of GDP	X	X	X	X	X	X	X

- (c) Member States shall provide to the Commission information on the main macroeconomic indicators and forecasts underlying the level of public or equivalent structural expenditure.
- (d) Member States, in which less developed regions cover more than 15 % and less than 65 % of the population, shall also provide to the Commission information on the method used to estimate gross fixed capital formation in those regions. For this purpose, Member States shall use regional level public investment data where available. In the event that such data is not available, or in other duly justified cases, including where a Member State for the period 2014-2020 has significantly changed the regional breakdown as defined in Regulation (EC) No 1059/2003, gross fixed capital formation can be estimated by applying regional public expenditure indicators or regional population to national level public investment data.
- (e) Once there is agreement by the Commission and the Member State, Table 1 and, where applicable, Table 2 will be included in the Partnership Agreement of the Member State concerned as the reference level of the public or equivalent structural expenditure to be maintained in the years 2014-2020.

2.2 Mid-term verification

- (a) At the time of the mid-term verification, a Member State shall be deemed to have maintained the level of public or equivalent structural expenditure if the annual average of expenditure in the years 2014-2017 is equal to or higher than the reference level of expenditure set in the Partnership Agreement.
- (b) Following the mid-term verification, the Commission may revise, in consultation with a Member State, the reference level of public or equivalent structural expenditure in the Partnership Agreement if the economic situation of the Member State has significantly changed from that estimated at the time of adoption of the Partnership Agreement.

2.3 Ex post verification

At the time of the ex post verification, a Member State shall be deemed to have maintained the level of public or equivalent structural expenditure if the annual average of expenditure in the years 2014-2020 is equal to or higher than the reference level of expenditure set in the Partnership Agreement.

3. FINANCIAL CORRECTION RATES FOLLOWING EX POST VERIFICATION

Where the Commission decides to carry out a financial correction in accordance with Article 95(6), the rate of financial correction shall be obtained by subtracting 3 % from the difference between the reference level in the Partnership Agreement and the level achieved, expressed as a percentage of the reference level, and then dividing the result by 10. The financial correction shall be determined by applying that rate of financial correction to the Funds' contribution to the Member State concerned for the less developed regions for the full programming period.

If the difference between the reference level in the Partnership Agreement and the level achieved, expressed as a percentage of the reference level in the Partnership Agreement, is 3 % or less, no financial correction shall be made.

The financial correction shall not exceed 5 % of the Funds' allocation to the Member State concerned for the less developed regions for the full programming period.

ANNEX XI

Ex ante conditionalities

PART I: Thematic ex ante conditionalities

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
<p>1. Strengthening research, technological development and innovation</p> <p>(R&D target)</p> <p>(referred to in point (1) of the first paragraph of Article 9)</p>	<p>ERDF:</p> <ul style="list-style-type: none"> — All investment priorities under thematic objective no. 1. 	<p>1.1. Research and innovation: The existence of a national or regional smart specialisation strategy in line with the National Reform Program, to leverage private research and innovation expenditure, which complies with the features of well-performing national or regional R&I systems.</p>	<ul style="list-style-type: none"> — A national or regional smart specialisation strategy is in place that: <ul style="list-style-type: none"> — is based on a SWOT or similar analysis to concentrate resources on a limited set of research and innovation priorities; — outlines measures to stimulate private RTD investment; — contains a monitoring mechanism. — A framework outlining available budgetary resources for research and innovation has been adopted.
	<p>ERDF:</p> <ul style="list-style-type: none"> — Enhancing research and innovation (R&I) infrastructure and capacities to develop R&I excellence, and promoting centres of competence, in particular those of European interest. 	<p>1.2 Research and Innovation infrastructure. The existence of a multi-annual plan for budgeting and prioritisation of investments.</p>	<ul style="list-style-type: none"> — An indicative multi-annual plan for budgeting and prioritisation of investments linked to Union priorities, and, where appropriate, the European Strategy Forum on Research Infrastructures (ESFRI) has been adopted.
<p>2. Enhancing access to, and use and quality of, information and communication technologies (ICT) (Broadband target)</p> <p>(referred to in point (2) of the first paragraph of Article 9)</p>	<p>ERDF:</p> <ul style="list-style-type: none"> — Developing ICT products and services, e-commerce, and enhancing demand for ICT. — Strengthening ICT applications for e-government, e-learning, e-inclusion, e-culture and e-health. 	<p>2.1. Digital growth: A strategic policy framework for digital growth to stimulate affordable, good quality and interoperable ICT-enabled private and public services and increase uptake by citizens, including vulnerable groups, businesses and public administrations including cross border initiatives.</p>	<ul style="list-style-type: none"> — A strategic policy framework for digital growth, for instance, within the national or regional smart specialisation strategy is in place that contains: <ul style="list-style-type: none"> — budgeting and prioritisation of actions through a SWOT or similar analysis consistent with the Scoreboard of the Digital Agenda for Europe; — an analysis of balancing support for demand and supply of ICT should have been conducted;

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
			<ul style="list-style-type: none"> — indicators to measure progress of interventions in areas such as digital literacy, e-inclusion, e-accessibility, and progress of e-health within the limits of Article 168 TFEU which are aligned, where appropriate, with existing relevant sectoral Union, national or regional strategies; — assessment of needs to reinforce ICT capacity-building.
	<p>ERDF:</p> <ul style="list-style-type: none"> — Extending broadband deployment and the roll-out of high-speed networks and supporting the adoption of emerging technologies and networks for the digital economy. 	<p>2.2. Next Generation Network (NGN) Infrastructure: The existence of national or regional NGN Plans which take account of regional actions in order to reach the Union high-speed Internet access targets, focusing on areas where the market fails to provide an open infrastructure at an affordable cost and of a quality in line with the Union competition and State aid rules, and to provide accessible services to vulnerable groups.</p>	<ul style="list-style-type: none"> — A national or regional NGN Plan is in place that contains: <ul style="list-style-type: none"> — a plan of infrastructure investments based on an economic analysis taking account of existing private and public infrastructures and planned investments; — sustainable investment models that enhance competition and provide access to open, affordable, quality and future-proof infrastructure and services; — measures to stimulate private investment.
<p>3. Enhancing the competitiveness of small and medium-sized enterprises (SMEs)</p> <p>(referred to in point (3) of the first paragraph of Article 9)</p>	<p>ERDF:</p> <ul style="list-style-type: none"> — Promoting entrepreneurship, in particular by facilitating the economic exploitation of new ideas and fostering the creation of new firms, including through business incubators. — Supporting the capacity of SMEs to grow in regional, national and international market, and to engage in innovation processes. 	<p>3.1. Specific actions have been carried out to underpin the promotion of entrepreneurship taking into account the Small Business Act (SBA).</p>	<ul style="list-style-type: none"> — The specific actions are: <ul style="list-style-type: none"> — measures have been put in place with the objective of reducing the time and cost involved in setting-up a business taking account of the targets of the SBA; — measures have been put in place with the objective of reducing the time needed to get licenses and permits to take up and perform the specific activity of an enterprise taking account of the targets of the SBA;

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
			<ul style="list-style-type: none"> — a mechanism is in place to monitor the implementation of the measures of the SBA which have been put in place and assess the impact on SMEs.
<p>4. Supporting the shift towards a low-carbon economy in all sectors</p> <p>(referred to in point (4) of the first paragraph of Article 9)</p>	<p>ERDF + Cohesion Fund:</p> <ul style="list-style-type: none"> — Supporting energy efficiency, smart energy management and renewable energy use in public infrastructure, including in public buildings, and in the housing sector. 	<p>4.1. Actions have been carried out to promote cost-effective improvements of energy end use efficiency and cost-effective investment in energy efficiency when constructing or renovating buildings.</p>	<ul style="list-style-type: none"> — The actions are: <ul style="list-style-type: none"> — measures to ensure minimum requirements are in place related to the energy performance of buildings consistent with Article 3, Article 4 and Article 5 of Directive 2010/31/EU of the European Parliament and of the Council ⁽¹⁾; — measures necessary to establish a system of certification of the energy performance of buildings consistent with Article 11 of Directive 2010/31/EU; — measures to ensure strategic planning on energy efficiency, consistent with Article 3 of Directive 2012/27/EU of the European Parliament and of the Council ⁽²⁾; — measures consistent with Article 13 of Directive 2006/32/EC of the European Parliament and of the Council ⁽³⁾ on energy end-use efficiency and energy services to ensure the provision to final customers of individual meters in so far as it is technically possible, financially reasonable and proportionate in relation to the potential energy savings.
	<p>ERDF + Cohesion Fund:</p> <ul style="list-style-type: none"> — Promoting the use of high-efficiency co-generation of heat and power based on useful demand. 	<p>4.2. Actions have been carried out to promote high-efficiency co-generation of heat and power.</p>	<ul style="list-style-type: none"> — The actions are: <ul style="list-style-type: none"> — Support for co-generation is based on useful heat demand and primary energy savings consistent with Article 7(1) and points (a) and (b) of Article 9(1) of Directive 2004/8/EC, Member States or their competent bodies have evaluated the existing legislative and regulatory framework with regard to authorisation procedures or other procedures in order to:

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
			<p>(a) encourage the design of co-generation units to match economically justifiable demands for useful heat output and avoid production of more heat than useful heat; and</p> <p>(b) reduce the regulatory and non-regulatory barriers to an increase in co-generation.</p>
	<p>ERDF + Cohesion Fund:</p> <p>— Promoting the production and distribution of energy derived from renewable sources.</p>	<p>4.3. Actions have been carried out to promote the production and distribution of renewable energy sources ⁽⁴⁾.</p>	<p>— Transparent support schemes, priority in grid access or guaranteed access and priority in dispatching, as well as standard rules relating to the bearing and sharing of costs of technical adaptations which have been made public are in place consistent with Article 14(1), Article 16(2) and 16(3) of Directive 2009/28/EC of the European Parliament and of the Council ⁽⁴⁾.</p> <p>— A Member State has adopted a national renewable energy action plan consistent with Article 4 of Directive 2009/28/EC.</p>
<p>5. Promoting climate change adaptation, risk prevention and management</p> <p>(Climate change target) (referred to in point (5) of the first paragraph of Article 9)</p>	<p>ERDF + Cohesion Fund:</p> <p>— Promoting investment to address specific risks, ensuring disaster resilience and developing disaster management systems.</p>	<p>5.1. Risk prevention and risk management: the existence of national or regional risk assessments for disaster management, taking into account climate change adaptation</p>	<p>— A national or regional risk assessment with the following elements shall be in place:</p> <p>— a description of the process, methodology, methods, and non-sensitive data used for risk assessment as well as of the risk-based criteria for the prioritisation of investment;</p> <p>— a description of single-risk and multi-risk scenarios;</p> <p>— taking into account, where appropriate, national climate change adaptation strategies.</p>

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
<p>6. Preserving and protecting the environment and promoting resource efficiency</p> <p>(referred to in point (6) of the first paragraph of Article 9)</p>	<p>ERDF + Cohesion Fund:</p> <p>— Investing in the water sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States for investment that goes beyond those requirements.</p>	<p>6.1. Water sector: The existence of a) a water pricing policy which provides adequate incentives for users to use water resources efficiently and b) an adequate contribution of the different water uses to the recovery of the costs of water services at a rate determined in the approved river basin management plan for investment supported by the programmes.</p>	<p>— In sectors supported by the ERDF and the Cohesion Fund, a Member State has ensured a contribution of the different water uses to the recovery of the costs of water services by sector consistent with the first indent of Article 9(1) of Directive 2000/60/EC having regard, where appropriate, to the social, environmental and economic effects of the recovery as well as the geographic and climatic conditions of the region or regions affected.</p> <p>— The adoption of a river basin management plan for the river basin district consistent with Article 13 of Directive 2000/60/EC</p>
	<p>ERDF + Cohesion Fund:</p> <p>— Investing in the waste sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States, for investment that goes beyond those requirements.</p>	<p>6.2. Waste sector: Promoting economically and environmentally sustainable investments in the waste sector particularly through the development of waste management plans consistent with Directive 2008/98/EC, and with the waste hierarchy.</p>	<p>— An implementation report as requested by Article 11(5) of Directive 2008/98/EC has been submitted to the Commission on progress towards meeting the targets set out in Article 11 of Directive 2008/98/EC.</p> <p>— The existence of one or more waste management plans as required under Article 28 of Directive 2008/98/EC;</p> <p>— The existence of waste prevention programmes, as required under Article 29 of Directive 2008/98/EC;</p> <p>— Necessary measures to achieve the targets on preparation for re-use and recycling by 2020 consistent with Article 11(2) of Directive 2008/98/EC have been adopted.</p>

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
<p>7. Promoting sustainable transport and removing bottlenecks in key network infrastructures</p> <p>(referred to in point (7) of the first paragraph of Article 9)</p>	<p>ERDF + Cohesion Fund:</p> <ul style="list-style-type: none"> — Supporting a multimodal Single European Transport Area by investing in the TEN-T. — Developing and rehabilitating comprehensive, high quality and interoperable railway systems, and promoting noise-reduction measures. — Developing and improving environmentally-friendly (including low-noise) and low-carbon transport systems, including inland waterways and maritime transport, ports, multimodal links and airport infrastructure, in order to promote sustainable regional and local mobility. <p>ERDF:</p> <ul style="list-style-type: none"> — Enhancing regional mobility by connecting secondary and tertiary nodes to TEN-T infrastructure, including multimodal nodes. 	<p>7.1. Transport: The existence of a comprehensive plan or plans or framework or frameworks for transport investment in accordance with the Member States' institutional set-up (including public transport at regional and local level) which supports infrastructure development and improves connectivity to the TEN-T comprehensive and core networks.</p>	<ul style="list-style-type: none"> — The existence of a comprehensive transport plan or plans or framework or frameworks for transport investment which complies with legal requirements for strategic environmental assessment and sets out: <ul style="list-style-type: none"> — the contribution to the single European Transport Area consistent with Article 10 of Regulation (EU) No 1315/2013 of the European Parliament and of the Council⁽³⁾, including priorities for investments in: <ul style="list-style-type: none"> — the core TEN-T network and the comprehensive network where investment from the ERDF and the Cohesion Fund is envisaged; and — secondary connectivity; — a realistic and mature pipeline for projects for which support from the ERDF and the Cohesion Fund is envisaged; — Measures to ensure the capacity of intermediary bodies and beneficiaries to deliver the project pipeline.
	<p>ERDF + Cohesion Fund:</p> <ul style="list-style-type: none"> — Supporting a multimodal Single European Transport Area by investing in the TEN-T. — Developing and rehabilitating comprehensive, high quality and interoperable railway systems, and promoting noise-reduction measures. 	<p>7.2. Railway: The existence within the comprehensive transport plan or plans or framework or frameworks of a specific section on railway development in accordance with the Member States' institutional set-up (including concerning public transport at regional and local level) which supports infrastructure development and improves connectivity to the TEN-T comprehensive and core networks. The investments cover mobile assets, interoperability and capacity- building.</p>	<ul style="list-style-type: none"> — The existence of a section on railway development within the transport plan or plans or framework or frameworks as set out above which complies with legal requirements for strategic environmental assessment (SEA) and sets out a realistic and mature project pipeline (including a timetable and budgetary framework); — Measures to ensure the capacity of intermediary bodies and beneficiaries to deliver the project pipeline.

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
	<ul style="list-style-type: none"> — Developing and improving environmentally-friendly (including low-noise) and low-carbon transport systems, including inland waterways and maritime transport, ports, multimodal links and airport infrastructure, in order to promote sustainable regional and local mobility. <p>ERDF:</p> <ul style="list-style-type: none"> — Enhancing regional mobility by connecting secondary and tertiary nodes to TEN-T infrastructure, including multimodal nodes. 		
	<p>ERDF + Cohesion Fund:</p> <ul style="list-style-type: none"> — Supporting a multimodal Single European Transport Area by investing in the TEN-T. — Developing and rehabilitating comprehensive, high quality and interoperable railway systems, and promoting noise-reduction measures. — Developing and improving environmentally-friendly (including low-noise) and low-carbon transport systems, including inland waterways and maritime transport, ports, multimodal links and airport infrastructure, in order to promote sustainable regional and local mobility. <p>ERDF:</p> <ul style="list-style-type: none"> — Enhancing regional mobility through connecting secondary and tertiary nodes to TEN-T infrastructure, including multimodal nodes. 	<p>7.3. Other modes of transport, including inland-waterways and maritime transport, ports, multimodal links and airport infrastructure: the existence within the comprehensive transport plan or plans or framework or frameworks of a specific section on inland-waterways and maritime transport, ports, multimodal links and airport infrastructure, which contribute to improving connectivity to the TEN-T comprehensive and core networks and to promoting sustainable regional and local mobility.</p>	<ul style="list-style-type: none"> — The existence of a section on inland-waterways and maritime transport, ports, multimodal links and airport infrastructure within the transport plan or plans or framework or frameworks which: <ul style="list-style-type: none"> — complies with legal requirements for strategic environmental assessment; — sets out a realistic and mature project pipeline (including a timetable and budgetary framework); — Measures to ensure the capacity of intermediary bodies and beneficiaries to deliver the project pipeline.
	<p>ERDF:</p> <ul style="list-style-type: none"> — Improving energy efficiency and security of supply through the development of smart energy distribution, storage and transmission systems and through the integration of distributed generation from renewable sources. 	<p>7.4 Development of smart energy distribution, storage and transmission systems.</p> <p>The existence of comprehensive plans for investments in smart energy infrastructure, and of regulatory measures, which contribute to improving energy efficiency and security of supply</p>	<ul style="list-style-type: none"> — Comprehensive plans describing the national energy infrastructure priorities are in place that are: <ul style="list-style-type: none"> — in accordance with Article 22 of Directive 2009/72/EC and of Directive 2009/73/EC, where applicable, and

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
			<ul style="list-style-type: none"> — consistent with the relevant regional investment plans under Article 12 and with the Union-wide ten-year network development plan in accordance with point (b) of Article 8(3) of Regulation (EC) No 714/2009 of the European Parliament and of the Council ⁽⁶⁾ and with Regulation (EC) No 715/2009 of the European Parliament and of the Council ⁽⁷⁾, and — compatible with Article 3(4) of Regulation (EU) No 347/2013 of the European Parliament and of the Council ⁽⁸⁾; — Those plans shall contain: <ul style="list-style-type: none"> — a realistic and mature project pipeline for projects for which support from the ERDF is envisaged; — measures to achieve the objectives of social and economic cohesion and environmental protection, in line with Article 3(10) of Directive 2009/72/EC and Article 3(7) of Directive 2009/73/EC; — measures to optimise the use of energy and promote energy efficiency, in line with Article 3(11) of Directive 2009/72/EC and Article 3(8) of Directive 2009/73/EC.
<p>8. Promoting sustainable and quality employment and supporting labour mobility</p> <p>(Employment target)</p> <p>(referred to in point (8) of the first paragraph of Article 9)</p>	<p>ESF:</p> <ul style="list-style-type: none"> — Access to employment for job-seekers and inactive people, including the long-term unemployed and people far from the labour market, also through local employment initiatives and support for labour mobility. 	<p>8.1. Active labour market policies are designed and delivered in the light of the Employment guidelines.</p>	<ul style="list-style-type: none"> — Employment services have the capacity to, and do, deliver: <ul style="list-style-type: none"> — personalised services and active and preventive labour market measures at an early stage, which are open to all jobseekers while focusing on people at highest risk of social exclusion, including people from marginalised communities;

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
			<ul style="list-style-type: none"> — comprehensive and transparent information on new job vacancies and employment opportunities taking into account the changing needs of the labour market. — Employment services have set up formal or informal cooperation arrangements with relevant stakeholders.
	<p>ESF:</p> <ul style="list-style-type: none"> — Self employment, entrepreneurship and business creation including innovative micro, small and medium-sized enterprises. <p>ERDF:</p> <ul style="list-style-type: none"> — Supporting the development of business incubators and investment support for self-employment, micro-enterprises and business creation. 	<p>8.2. Self-employment, entrepreneurship and business creation: the existence of a strategic policy framework for inclusive start-up.</p>	<ul style="list-style-type: none"> — A strategic policy framework for inclusive start-up support is in place with the following elements: <ul style="list-style-type: none"> — measures have been put in place with the objective of reducing the time and cost involved in setting up a business, taking account of the targets of the SBA; — measures have been put in place with the objective of reducing the time needed to get licenses and permits to take up and perform the specific activity of an enterprise, taking account of the targets of the SBA; — actions linking suitable business development services and financial services (access to capital), including reaching out to disadvantaged groups, areas, or both, where needed.
	<p>ESF:</p> <ul style="list-style-type: none"> — Modernisation of labour market institutions, such as public and private employment services, and improving the matching of labour market needs, including through actions that enhance transnational labour mobility as well as through mobility schemes and better cooperation between institutions and relevant stakeholders. <p>ERDF:</p> <ul style="list-style-type: none"> — Investing in infrastructure for employment services. 	<p>8.3. Labour market institutions are modernised and strengthened in the light of the Employment Guidelines;</p> <p>Reforms of labour market institutions will be preceded by a clear strategic policy framework and ex ante assessment including with regard to the gender dimension</p>	<ul style="list-style-type: none"> — Actions to reform employment services, aiming at providing them with the capacity to deliver: <ul style="list-style-type: none"> — personalised services and active and preventive labour market measures at an early stage, which are open to all jobseekers while focusing on people at highest risk of social exclusion, including people from marginalised communities; — comprehensive and transparent information on new job vacancies and employment opportunities taking into account the changing needs of the labour market.

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
			<ul style="list-style-type: none"> — Reform of employment services will include the creation of formal or informal cooperation networks with relevant stakeholders.
	<p>ESF:</p> <ul style="list-style-type: none"> — Active and healthy ageing. 	<p>8.4. Active and healthy ageing: Active ageing policies are designed in the light of the Employment Guidelines</p>	<ul style="list-style-type: none"> — Relevant stakeholders are involved in the design and follow-up of active ageing policies with a view to retaining elderly workers on the labour market and promoting their employment; — A Member State has measures in place to promote active ageing.
	<p>ESF:</p> <ul style="list-style-type: none"> — Adaptation of workers, enterprises and entrepreneurs to change. 	<p>8.5. Adaptation of workers, enterprises and entrepreneurs to change: The existence of policies aimed at favouring anticipation and good management of change and restructuring.</p>	<ul style="list-style-type: none"> — Instruments are in place to support social partners and public authorities to develop and monitor proactive approaches towards change and restructuring which include measures: <ul style="list-style-type: none"> — to promote anticipation of change; — to promote the preparation and management of the restructuring process.
	<p>ESF:</p> <ul style="list-style-type: none"> — Sustainable integration into the labour market of young people, in particular those not in employment, education or training, including young people at risk of social exclusion and young people from marginalised communities, including through the implementation of the Youth Guarantee. 	<p>8.6. The existence of a strategic policy framework for promoting youth employment including through the implementation of the Youth Guarantee.</p> <p>This ex ante conditionality applies only for implementation of the YEI</p>	<ul style="list-style-type: none"> — A strategic policy framework for promoting youth employment is in place that: <ul style="list-style-type: none"> — is based on evidence that measures the results for young people not in employment, education or training and that represents a base to develop targeted policies and monitor developments; — identifies the relevant public authority in charge of managing youth employment measures and coordinating partnerships across all levels and sectors; — involves stakeholders that are relevant for addressing youth unemployment; — allows early intervention and activation;

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
			<ul style="list-style-type: none"> — comprises supportive measures for access to employment, enhancing skills, labour mobility and sustainable integration of young people not in employment, education or training into the labour market.
<p>9. Promoting social inclusion, combating poverty and any discrimination</p> <p>(poverty target)</p> <p>(referred to in point (9) of the first paragraph of Article 9)</p>	<p>ESF:</p> <ul style="list-style-type: none"> — Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability. <p>ERDF:</p> <ul style="list-style-type: none"> — Investing in health and social infrastructure which contributes to national, regional and local development, reducing inequalities in terms of health status, promoting social inclusion through improved access to social, cultural and recreational services and the transition from institutional to community-based services. — Providing support for physical, economic and social regeneration of deprived communities in urban and rural areas. 	<p>9.1. The existence and the implementation of a national strategic policy framework for poverty reduction aiming at the active inclusion of people excluded from the labour market in the light of the Employment guidelines.</p>	<ul style="list-style-type: none"> — A national strategic policy framework for poverty reduction, aiming at active inclusion, is in place that: — provides a sufficient evidence base to develop policies for poverty reduction and monitor developments; — contains measures supporting the achievement of the national poverty and social exclusion target (as defined in the National Reform Programme), which includes the promotion of sustainable and quality employment opportunities for people at the highest risk of social exclusion, including people from marginalised communities; — involves relevant stakeholders in combating poverty; — depending on the identified needs, includes measures for the shift from institutional to community based care; — Upon request and where justified, relevant stakeholders will be provided with support for submitting project applications and for implementing and managing the selected projects.

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
	<p>ESF:</p> <ul style="list-style-type: none"> — Socio-economic integration of marginalised communities such as the Roma. <p>ERDF:</p> <ul style="list-style-type: none"> — Investing in health and social infrastructure which contributes to national, regional and local development, reducing inequalities in terms of health status, promoting social inclusion through improved access to social, cultural and recreational services and the transition from institutional to community-based services. — Providing support for physical, economic and social regeneration of deprived communities in urban and rural areas. — Investing in education, training and vocational training for skills and lifelong learning by developing education and training infrastructure. 	<p>9.2. A national Roma inclusion strategic policy framework is in place</p>	<ul style="list-style-type: none"> — A national Roma inclusion strategic policy framework is in place that: <ul style="list-style-type: none"> — sets achievable national goals for Roma integration to bridge the gap with the general population. These targets should address the four EU Roma integration goals relating to access to education, employment, healthcare and housing; — identifies where relevant those disadvantaged micro-regions or segregated neighbourhoods, where communities are most deprived, using already available socio-economic and territorial indicators (i.e. very low educational level, long-term unemployment, etc); — includes strong monitoring methods to evaluate the impact of Roma integration actions and a review mechanism for the adaptation of the strategy; — is designed, implemented and monitored in close cooperation and continuous dialogue with Roma civil society, regional and local authorities. — Upon request and where justified, relevant stakeholders will be provided with support for submitting project applications and for implementing and managing the selected projects.
	<p>ESF:</p> <ul style="list-style-type: none"> — Enhancing access to affordable, sustainable and high-quality services, including health care and social services of general interest. 	<p>9.3. Health: The existence of a national or regional strategic policy framework for health within the limits of Article 168 TFEU ensuring economic sustainability.</p>	<ul style="list-style-type: none"> — A national or regional strategic policy framework for health is in place that contains: <ul style="list-style-type: none"> — coordinated measures to improve access to health services;

Thematic objectives	Investment priorities	Ex ante conditionality	Criteria for fulfilment
	<p>ERDF:</p> <ul style="list-style-type: none"> — Investing in health and social infrastructure which contributes to national, regional and local development, reducing inequalities in terms of health status, promoting social inclusion through improved access to social, cultural and recreational services and the transition from institutional to community-based services. 		<ul style="list-style-type: none"> — measures to stimulate efficiency in the health sector, through deployment of service delivery models and infrastructure; — a monitoring and review system. — A Member State or region has adopted a framework outlining available budgetary resources on an indicative basis and a cost-effective concentration of resources on prioritised needs for health care.

PART II: General ex ante conditionalities

Area	Ex ante conditionality	Criteria for fulfilment
1. Anti-discrimination	The existence of administrative capacity for the implementation and application of Union anti-discrimination law and policy in the field of ESI Funds	— Arrangements in accordance with the institutional and legal framework of Member States for the involvement of bodies responsible for the promotion of equal treatment of all persons throughout the preparation and implementation of programmes, including the provision of advice on equality in ESI fund-related activities; — Arrangements for training for staff of the authorities involved in the management and control of the ESI Funds in the fields of Union anti-discrimination law and policy.
2. Gender	The existence of administrative capacity for the implementation and application of Union gender equality law and policy in the field of ESI Funds	— Arrangements in accordance with the institutional and legal framework of Member States for the involvement of bodies responsible for gender equality throughout the preparation and implementation of programmes, including the provision of advice on gender equality in ESI Fund-related activities; — Arrangements for training for staff of the authorities involved in the management and control of the ESI Funds in the fields of Union gender equality law and policy as well as on gender mainstreaming.

Area	Ex ante conditionality	Criteria for fulfilment
3. Disability	The existence of administrative capacity for the implementation and application of the United Nations Convention on the rights of persons with disabilities (UNCRPD) in the field of ESI Funds in accordance with Council Decision 2010/48/EC ⁽¹⁾	<ul style="list-style-type: none"> — Arrangements in accordance with the institutional and legal framework of Member States for the consultation and involvement of bodies in charge of protection of rights of persons with disabilities or representative organisations of persons with disabilities and other relevant stakeholders throughout the preparation and implementation of programmes; — Arrangements for training for staff of the authorities involved in the management and control of the ESI Funds in the fields of applicable Union and national disability law and policy, including accessibility and the practical application of the UNCRPD as reflected in Union and national legislation, as appropriate; — Arrangements to ensure monitoring of the implementation of Article 9 of the UNCRPD in relation to the ESI Funds throughout the preparation and the implementation of the programmes.
4. Public procurement	The existence of arrangements for the effective application of Union public procurement law in the field of the ESI Funds.	<ul style="list-style-type: none"> — Arrangements for the effective application of Union public procurement rules through appropriate mechanisms; — Arrangements which ensure transparent contract award procedures; — Arrangements for training and dissemination of information for staff involved in the implementation of the ESI funds; — Arrangements to ensure administrative capacity for implementation and application of Union public procurement rules.
5. State aid	The existence of arrangements for the effective application of Union State aid rules in the field of the ESI Funds.	<ul style="list-style-type: none"> — Arrangements for the effective application of Union State aid rules; — Arrangements for training and dissemination of information for staff involved in the implementation of the ESI funds; — Arrangements to ensure administrative capacity for implementation and application of Union State aid rules.
6. Environmental legislation relating to Environmental Impact Assessment (EIA) and Strategic Environmental Assessment (SEA)	The existence of arrangements for the effective application of Union environmental legislation related to EIA and SEA.	<ul style="list-style-type: none"> — Arrangements for the effective application of Directive 2011/92/EU of the European Parliament and of the Council ⁽²⁾ (EIA) and of Directive 2001/42/EC of the European Parliament and of the Council ⁽³⁾ (SEA); — Arrangements for training and dissemination of information for staff involved in the implementation of the EIA and SEA Directives; — Arrangements to ensure sufficient administrative capacity.

Area	Ex ante conditionality	Criteria for fulfilment
7. Statistical systems and result indicators	<p>The existence of a statistical basis necessary to undertake evaluations to assess the effectiveness and impact of the programmes.</p> <p>The existence of a system of result indicators necessary to select actions, which most effectively contribute to desired results, to monitor progress towards results and to undertake impact evaluation.</p>	<ul style="list-style-type: none"> — Arrangements for timely collection and aggregation of statistical data with the following elements are in place: <ul style="list-style-type: none"> — the identification of sources and mechanisms to ensure statistical validation; — arrangements for publication and public availability of aggregated data; — An effective system of result indicators including: <ul style="list-style-type: none"> — the selection of result indicators for each programme providing information on what motivates the selection of policy actions financed by the programme; — the establishment of targets for these indicators; — the consistency of each indicator with the following requisites: robustness and statistical validation, clarity of normative interpretation, responsiveness to policy, timely collection of data; — Procedures in place to ensure that all operations financed by the programme adopt an effective system of indicators.

(¹) Council Decision of 26 November 2009 concerning the conclusion, by the European Community, of the United Nations Convention on the Rights of Persons with Disabilities, (OJ L 23, 27.1.2010, p. 35)

(²) Directive 2011/92/EU of the European Parliament and of the Council of 13 December 2011 on the assessment of the effects of certain public and private projects on the environment (OJ L 26, 28.1.2012, p. 1).

(³) Directive 2001/42/EC of the European Parliament and of the Council of 27 June 2001 on the assessment of the effects of certain plans and programmes on the environment (OJ L 197, 21.7.2001, p. 30).

ANNEX XII

INFORMATION AND COMMUNICATION ON SUPPORT FROM THE FUNDS

1. LIST OF OPERATIONS

The list of operations referred to in Article 115(2) shall contain, in at least one of the official languages of the Member State, the following data fields:

- beneficiary name (only of legal entities; no natural persons shall be named);
- operation name;
- operation summary;
- operation start date;
- operation end date (expected date for physical completion or full implementation of the operation);
- total eligible expenditure allocated to the operation;
- Union co-financing rate, as per priority axis;
- operation postcode; or other appropriate location indicator;
- country;
- name of category of intervention for the operation in accordance with point (b) (vi) of the first subparagraph of Article 96(2);
- date of last update of the list of operations.

The headings of the data fields shall be also provided in at least one other official language of the Union.

2. INFORMATION AND COMMUNICATION MEASURES FOR THE PUBLIC

The Member State, the managing authority and the beneficiaries shall take the steps necessary to provide information to, and communicate with, the public on operations supported by an operational programme in accordance with this Regulation.

2.1. Responsibilities of the Member State and the managing authority

1. The Member State and the managing authority shall ensure that the information and communication measures are implemented in accordance with the communication strategy and that those measures aim for the widest possible media coverage using various forms and methods of communication at the appropriate level.
2. The Member State or the managing authority shall be responsible for at least the following information and communication measures:
 - (a) organising a major information activity publicising the launch of the operational programme or programmes, even prior to the approval of the relevant communication strategies;
 - (b) organising one major information activity a year which promotes the funding opportunities and the strategies pursued and presents the achievements of the operational programme or programmes, including, where relevant, major projects, joint action plans and other project examples;
 - (c) displaying the Union emblem at the premises of each managing authority;

- (d) publishing electronically the list of operations in accordance with Section 1 of this Annex;
 - (e) giving examples of operations, by operational programme, on the single website or on the operational programme's website that is accessible through the single website portal; the examples should be in a widely spoken official language of the Union other than the official language or languages of the Member State concerned;
 - (f) updating information about the operational programme's implementation, including, when appropriate, its main achievements, on the single website or on the operational programme's website that is accessible through the single website portal.
3. The managing authority shall involve in information and communication measures, in accordance with national laws and practices, the following bodies where appropriate:
- (a) the partners referred to in Article 5;
 - (b) information centres on Europe, as well as Commission representation offices, and information offices of the European Parliament in the Member States;
 - (c) educational and research institutions.

These bodies shall widely disseminate the information described in Article 115(1).

2.2. Responsibilities of the beneficiaries

1. All information and communication measures provided by the beneficiary shall acknowledge support from the Funds to the operation by displaying:
- (a) the Union emblem in accordance with the technical characteristics laid down in the implementing act adopted by the Commission under Article 115(4), together with a reference to the Union;
 - (b) a reference to the Fund or Funds supporting the operation.
- Where an information or communication measure relates to an operation or to several operations co-financed by more than one Fund, the reference provided for in point (b) may be replaced by a reference to the ESI Funds.
2. During implementation of an operation, the beneficiary shall inform the public about the support obtained from the Funds by:
- (a) providing on the beneficiary's website, where such a website exists, a short description of the operation, proportionate to the level of support, including its aims and results, and highlighting the financial support from the Union;
 - (b) placing, for operations not falling under points 4 and 5, at least one poster with information about the project (minimum size A3), including the financial support from the Union, at a location readily visible to the public, such as the entrance area of a building.
3. For operations supported by the ESF, and in appropriate cases for operations supported by the ERDF or Cohesion Fund, the beneficiary shall ensure that those taking part in an operation have been informed of this funding.

Any document, relating to the implementation of an operation which is used for the public or for participants, including any attendance or other certificate, shall include a statement to the effect that the operational programme was supported by the Fund or Funds.

4. During implementation of an ERDF or Cohesion Fund operation, the beneficiary shall put up, at a location readily visible to the public, a temporary billboard of a significant size for each operation consisting of the financing of infrastructure or construction operations for which the total public support to the operation exceeds EUR 500 000.

5. No later than three months after completion of an operation, the beneficiary shall put up a permanent plaque or billboard of significant size at a location readily visible to the public for each operation that fulfils the following criteria:

- (a) the total public support to the operation exceeds EUR 500 000;
- (b) the operation consists of the purchase of a physical object or of the financing of infrastructure or of construction operations.

The plaque or billboard shall state the name and the main objective of the operation. It shall be prepared in accordance with the technical characteristics adopted by the Commission in accordance with Article 115(4).

3. INFORMATION MEASURES FOR POTENTIAL BENEFICIARIES AND BENEFICIARIES

3.1. Information measures for potential beneficiaries

1. The managing authority shall ensure, in accordance with the communication strategy, that the operational programme's strategy and objectives, and the funding opportunities offered through joint support from the Union and the Member State, are disseminated widely to potential beneficiaries and all interested parties, with details of the financial support from the Funds concerned.
2. The managing authority shall ensure that potential beneficiaries have access to the relevant information, including updated information where necessary, and taking into account the accessibility of electronic or other communication services for certain potential beneficiaries, on at least the following:
 - (a) the funding opportunities and the launching of application calls;
 - (b) the eligibility of expenditure conditions to be met in order to qualify for support under an operational programme;
 - (c) a description of the procedures for examining applications for funding and of the time periods involved;
 - (d) the criteria for selecting the operations to be supported;
 - (e) the contacts at national, regional or local level that are able to provide information on the operational programmes;
 - (f) the responsibility of potential beneficiaries to inform the public about the aim of the operation and the support from the Funds to the operation in accordance with point 2.2. The managing authority may request potential beneficiaries to propose indicative communication activities, proportional to the size of the operation, in the applications.

3.2. Information measures for beneficiaries

1. The managing authority shall inform beneficiaries that acceptance of funding constitutes an acceptance of their inclusion in the list of operations published in accordance with Article 115(2).
2. The managing authority shall provide information and communication tools, including templates in electronic format, to help beneficiaries to meet their obligations set out in point 2.2, where appropriate.

4. ELEMENTS OF THE COMMUNICATION STRATEGY

The communication strategy drawn up by the managing authority and, where appropriate, by the Member State shall include the following elements:

- (a) a description of the approach taken, including the main information and communication measures to be taken by the Member State or the managing authority and aimed at potential beneficiaries, beneficiaries, multipliers and the wider public, having regard to the aims described in Article 115;
- (b) a description of materials that will be made available in formats accessible for people with disabilities;
- (c) a description of how beneficiaries will be supported in their communication activities;
- (d) the indicative budget for implementation of the strategy;

- (e) a description of the administrative bodies, including the staff resources, responsible for implementing the information and communication measures;
 - (f) the arrangements for the information and communication measures referred to in point 2, including the website or website portal at which such data may be found;
 - (g) an indication of how the information and communication measures shall be assessed in terms of visibility and awareness of policy, operational programmes and operations, and of the role played by the Funds and the Union;
 - (h) where appropriate, a description of the use of the main results of the previous operational programme;
 - (i) an annual update setting out the information and communication activities to be carried out in the following year.
-

ANNEX XIII

DESIGNATION CRITERIA FOR THE MANAGING AUTHORITY AND THE CERTIFYING AUTHORITY

1. INTERNAL CONTROL ENVIRONMENT

- (i) Existence of an organisational structure covering the functions of managing and certifying authorities and the allocation of functions within each of those authorities, ensuring that the principle of separation of functions, where appropriate, is respected.
- (ii) Framework for ensuring, in the event of delegation of tasks to intermediate bodies, the definition of their respective responsibilities and obligations, the verification of their capacities to carry out delegated tasks and the existence of reporting procedures.
- (iii) Reporting and monitoring procedures for irregularities and for the recovery of amounts unduly paid.
- (iv) Plan for allocation of appropriate human resources with necessary technical skills, at different levels and for different functions in the organisation.

2. RISK MANAGEMENT

Taking into account the principle of proportionality, a framework for ensuring that an appropriate risk management exercise is conducted when necessary, and in particular, in the event of major modifications to the activities.

3. MANAGEMENT AND CONTROL ACTIVITIES

A. Managing authority

- (i) Procedures regarding grant applications, appraisal of applications, selection for funding, including instructions and guidance ensuring the contribution of operations, in accordance with point (a)(i) of Article 125(3), to achieving the specific objectives and results of the relevant priority.
- (ii) Procedures for management verifications including administrative verifications in respect of each application for reimbursement by beneficiaries and the on-the-spot verifications of operations.
- (iii) Procedures for treatment of applications for reimbursement by beneficiaries and authorisation of payments.
- (iv) Procedures for a system to collect, record and store in computerised form data on each operation, including, where appropriate, data on individual participants and a breakdown of data on indicators by gender where required, and to ensure that systems security is in line with internationally accepted standards.
- (v) Procedures established by the managing authority to ensure that beneficiaries maintain either a separate accounting system or an adequate accounting code for all transactions relating to an operation.
- (vi) Procedures for putting in place effective and proportionate anti-fraud measures.
- (vii) Procedures to ensure an adequate audit trail and archiving system.
- (viii) Procedures to draw up the management declaration of assurance, report on the controls carried out and weaknesses identified, and the annual summary of final audits and controls.
- (ix) Procedures to ensure the provision to the beneficiary of a document setting out the conditions for support for each operation.

B. Certifying authority

- (i) Procedures for certifying interim payment applications to the Commission.
- (ii) Procedures for drawing up the accounts and certifying that they are true, complete and accurate and that the expenditure complies with applicable law taking into account the results of all audits.
- (iii) Procedures for ensuring an adequate audit trail by maintaining accounting records including amounts recoverable, recovered and withdrawn for each operation, in computerised form.
- (iv) Procedures, where appropriate, to ensure that the certifying authority receives adequate information from the managing authority on the verifications carried out, and the results of the audits carried out by or under the responsibility of the audit authority.

4. MONITORING

A. Managing authority

- (i) Procedures to support the work of the monitoring committee.
- (ii) Procedures to draw up and submit to the Commission annual and final implementation reports.

B. Certifying authority

Procedures on the fulfilment of the responsibilities of the certifying authority for monitoring the results of the management verifications and the results of the audits carried out by or under the responsibility of the audit authority before submitting payment applications to the Commission.

Joint Statement by the Council and the Commission on Article 67

The Council and the Commission agree that Article 67 (4) which excludes the application of simplified costs set out in Article 67 (1) (b)-(d) in cases where an operation or a project forming part of an operation is implemented exclusively through public procurement procedures does not preclude the implementation of an operation through public procurement procedures which result in payments by the beneficiary to the contractor based on pre-defined unit costs. The Council and the Commission agree that the costs determined and paid by the beneficiary based on these unit costs established through public procurement procedures shall constitute real costs actually incurred and paid by the beneficiary under Article 67 (1) (a).

Joint Statement by the European Parliament, the Council and the Commission on the revision of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council linked with the reconstitution of appropriations

The European Parliament, the Council and the Commission agree to include in the revision of the Financial Regulation, aligning Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council to the Multiannual Financial Framework 2014-20, provisions necessary for the application of the arrangements for the allocation of the performance reserve and in relation to the implementation of financial instruments under Article 39 (SME initiative) under the Regulation laying down common provisions for the European Structural and Investment Funds concerning the reconstitution of:

- i. appropriations which had been committed to programmes in relation to the performance reserve and which had to be decommitted as a result of priorities under these programmes not having attained their milestones and;
 - ii. appropriations which had been committed in relation to dedicated programmes referred to under Article 39(4)b and which had to be de-committed because the participation of a Member State in the financial instrument had to be discontinued.
-

Joint Statement by the European Parliament, the Council and the Commission on Article 1

If further justified derogations to the common rules are needed to take into account specificities of the EMFF and of the EAFRD, the European Parliament, the Council and the European Commission commit to allow for these derogations by proceeding with due diligence to the necessary modifications to Regulation laying down common provisions for the European Structural and Investment Funds.

Joint Statement by the European Parliament and the Council on the exclusion of any retroactivity with regard to the application of article 5(3)

The European Parliament and the Council agree that:

- concerning the application of Articles 14(2), 15(1)(c), and 26 (2) of Regulation laying down common provisions for the European Structural and Investment Funds, the actions taken by the Member States to involve the partners referred to in Article 5(1) in the preparation of the Partnership Agreement and the programmes referred to in Article 5 (2) include all actions taken on a practical level by the Member States irrespective of their timing as well as actions taken by them before the entry into force of that and before the day of the entry into force of the delegated act for a European code of conduct adopted in accordance with Article 5(3) of the same Regulation, during the preparatory phases of a Member State programming procedure, provided that the objectives of the partnership principle, laid down in that Regulation, are achieved. In this context, Member States, in accordance with their national and regional competences, will decide on the content of both, the proposed Partnership Agreement and proposed draft programmes, in accordance with the relevant provisions of that Regulation and the fund specific rules;
 - the delegated act laying down a European code of conduct, adopted in accordance with Article 5(3), will under no circumstances and neither directly nor indirectly have any retroactive effect, especially concerning the approval procedure of the Partnership Agreement and the programmes, since it is not the intention of the EU legislature to confer any powers on the Commission to the effect that it could reject the approval of the Partnership Agreement and programmes solely and exclusively based on any kind of non-compliance with the European code of conduct, adopted in accordance with Article 5(3);
 - the European Parliament and the Council invite the Commission to make available for them the draft text of the delegated act to be adopted under article 5(3) as early as possible, but not later than the date when the political agreement on the Regulation laying down common provisions for the European Structural and Investment Funds is adopted by the Council or the date when the draft report on that Regulation is voted at the plenary of the European Parliament, whichever date is the earliest.
-

REGULATION (EU) No 1304/2013 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 17 December 2013
on the European Social Fund and repealing Council Regulation (EC) No 1081/2006

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 164 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinions of the European Economic and Social Committee ⁽¹⁾,

Having regard to the opinion of the Committee of the Regions ⁽²⁾,

Acting in accordance with the ordinary legislative procedure,

Whereas:

(1) Regulation (EU) No 1303/2013 of the European Parliament and of the Council ⁽³⁾ establishes the framework for action by the European Social Fund (ESF), the European Regional Development Fund (ERDF), the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and lays down, in particular, the thematic objectives, the principles and the rules concerning programming, monitoring and evaluation, management and control. It is therefore necessary to specify the mission and scope of the ESF, together with the related investment priorities addressing the thematic objectives, and to lay down specific provisions concerning the type of activities that may be financed by the ESF.

(2) The ESF should improve employment opportunities, strengthen social inclusion, fight poverty, promote

education, skills and life-long learning and develop active, comprehensive and sustainable inclusion policies in accordance with the tasks entrusted to the ESF by Article 162 of the Treaty on the Functioning of the European Union (TFEU), and thereby contribute to economic, social and territorial cohesion in accordance with Article 174 TFEU. In accordance with Article 9 TFEU, the ESF should take into account requirements linked to the promotion of a high level of employment, the guarantee of adequate social protection, the fight against social exclusion, and a high level of education, training and protection of human health.

(3) The European Council of 17 June 2010 called for all common policies, including cohesion policy, to support the Europe 2020 Strategy for smart, sustainable and inclusive growth (the 'Europe 2020 strategy'). In order to ensure the full alignment of the ESF with the objectives of this strategy, particularly as regards employment, education, training and the fight against social exclusion, poverty and discrimination, the ESF should support Member States, taking account of the relevant Integrated Guidelines and relevant country-specific recommendations adopted in accordance with Article 121(2) and Article 148(4) TFEU and, where appropriate, at national level, the national reform programmes underpinned by national employment strategies, national social reports, national Roma integration strategies and national disability strategies. The ESF should also contribute to relevant aspects of the implementation of the flagship initiatives, in particular the "Agenda for New Skills and Jobs", the "Youth on the Move", and the "European Platform against Poverty and Social Exclusion". It should also support relevant activities in the initiatives on the "Digital Agenda" and "Innovation Union".

(4) The Union is confronted with structural challenges arising from economic globalisation, technological change and an increasingly ageing workforce and growing skills and labour shortages in some sectors and regions. They have been compounded by the recent economic and financial crisis, which has resulted in increased levels of unemployment, hitting in particular young people and other disadvantaged people, such as migrants and minorities.

(5) The ESF should aim to promote employment, improve access to the labour market, paying particular attention to those who are furthest from the labour market and support voluntary labour mobility. The ESF should also support active and healthy ageing, including through innovative forms of work organisation, promoting

⁽¹⁾ OJ C 143, 22.5.2012, p. 82 and OJ C 271, 19.9.2013, p. 101.

⁽²⁾ OJ C 225, 27.7.2012, p. 127.

⁽³⁾ Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (See page 320 of this Official Journal).

- health and safety at work and increasing employability. In promoting the better functioning of labour markets by enhancing the transnational geographical mobility of workers, the ESF should, in particular, support EURES activities (activities of the European network of employment services) in relation to recruitment and related information, advice and guidance services at national and cross-border level. Operations financed by the ESF should comply with Article 5(2) of the Charter of Fundamental Rights of the European Union which provides that no one shall be required to perform forced or compulsory labour.
- (6) The ESF should also promote social inclusion and prevent and combat poverty with a view to breaking the cycle of disadvantage across generations which implies mobilising a range of policies targeting the most disadvantaged people regardless of their age including children, the working poor and older women. Attention should be paid to the participation of those seeking asylum and refugees. The ESF may be used to enhance access to affordable, sustainable and high quality services of general interest, in particular in the fields of health care, employment and training services, services for the homeless, out of school care, childcare and long-term care services. Services supported can be public, private and/or community-based, and delivered by different types of providers, namely public administrations, private companies, social enterprises, non-governmental organisations.
- (7) The ESF should undertake to tackle early school leaving, promote equal access to good quality education, invest in vocational education and training, improve the labour market relevance of education and training systems and enhance life-long learning, including formal, non-formal and informal learning pathways.
- (8) In addition to these priorities, in the less developed regions and Member States, and with a view to increasing economic growth and employment opportunities, the efficiency of public administration at national and regional level, as well as the ability of a public administration to act in a participative manner, should be improved. The institutional capacity of stakeholders, including non-governmental organisations, delivering employment, education, training and social policies, including in the field of anti-discrimination, should be strengthened.
- (9) Support under the investment priority "community-led local development" may contribute to all thematic objectives as set out in this Regulation. Community-led local development strategies supported by the ESF should be inclusive with regard to disadvantaged people present on the territory, both in terms of governance of local action groups and in terms of content of the strategy.
- (10) At the same time, it is crucial to support the development and competitiveness of micro, small and medium-sized enterprises of the Union and to ensure that people can adapt, through acquiring appropriate skills and through lifelong learning opportunities, to new challenges such as the shift to a knowledge-based economy, the digital agenda, and the transition to a low-carbon and more energy-efficient economy. By pursuing its primary thematic objectives, the ESF should contribute to addressing these challenges. In this context, the ESF should support the labour force transition from education to employment, towards greener skills and jobs, and should address skills shortages, including those in the energy-efficiency, renewable energy and sustainable transport sectors. The ESF should also contribute to cultural and creative skills. Socio-cultural, creative and cultural sectors are important in indirectly addressing the aims of the ESF; their potential should therefore be better integrated into ESF projects and programming.
- (11) In light of the persistent need to make an effort to address youth unemployment in the Union as a whole, a Youth Employment Initiative (YEI) should be created for the most affected regions. The YEI should support, in such regions, young persons not in employment, education or training (NEET), who are unemployed or inactive, thereby reinforcing and accelerating the delivery of activities supported by ESF funding. Additional funds should be specifically attributed to the YEI and should be matched with funding from the ESF in the most affected regions. By targeting individual persons rather than structures, the YEI should aim to complement other ESF-funded operations and national actions targeting NEET, including through the implementation of the Youth Guarantee in line with the Council's Recommendation of 22 April 2013 on Establishing a Youth Guarantee⁽¹⁾, which provides that young persons should receive a good-quality offer of either employment, continued education, an apprenticeship or a traineeship within a period of four months of becoming unemployed or of leaving formal education. The YEI may also support actions to combat early school leaving. Access to welfare benefits for the young person and his/her family or dependants should not be conditional upon the young person's participation in the YEI.

⁽¹⁾ OJ C 120, 26.4.2013, p. 1.

- (12) The YEI should be fully integrated into ESF programming but, where appropriate, specific provisions related to YEI should be envisaged with a view to achieving its objectives. It is necessary to simplify and facilitate implementation of the YEI, in particular with regard to financial management provisions and thematic concentration arrangements. In order to ensure that the results of the YEI are clearly demonstrated and communicated, specific monitoring and evaluation, as well as information and publicity arrangements should be envisaged. Youth organisations should be involved in the monitoring committees' discussions on the preparation and implementation, including evaluation, of the YEI.
- (13) The ESF should contribute to the Europe 2020 strategy, ensuring a greater concentration of support on the priorities of the Union. A minimum share of cohesion policy funding for the ESF is established in accordance with Article 92(4) of Regulation (EU) No 1303/2013. The ESF should in particular increase its support for the fight against social exclusion and poverty, through a minimum ring-fenced allocation of 20 % of the total ESF resources of each Member State. The choice and number of investment priorities for ESF support should also be limited, in accordance with the level of development of the supported regions.
- (14) In order to ensure closer monitoring and improved assessment of the results achieved at the Union level by actions supported by the ESF, a common set of output and result indicators should be established in this Regulation. Such indicators should correspond to the investment priority and type of action supported in accordance with this Regulation as well as the relevant provisions of Regulation (EU) No 1303/2013. The indicators should be complemented where necessary by programme-specific result and/or output indicators.
- (15) Member States are encouraged to report on the effect of ESF investments on equal opportunities, equal access and integration of marginalised groups in all operational programmes.
- (16) Taking into account data protection requirements linked to collecting and storing sensitive data on participants, the Member States and the Commission should regularly evaluate the effectiveness, efficiency and impact of ESF support in promoting social inclusion and combating poverty, in particular with regard to disadvantaged people such as the Roma. Member States are encouraged to report on ESF-funded initiatives in the national social reports annexed to their national reform programmes, in particular as regards marginalised communities, such as the Roma and migrants.
- (17) Efficient and effective implementation of actions supported by the ESF depends on good governance and partnership between all relevant territorial and socio-economic actors, taking into account the actors at regional and local levels, in particular the umbrella associations representing local and regional authorities, organised civil society, economic and, in particular, social partners and non-governmental organisations. Member States should therefore ensure the participation of social partners and non-governmental organisations in the strategic governance of the ESF, from shaping priorities for operational programmes to implementing and evaluating ESF results.
- (18) The Member States and the Commission should ensure that the implementation of the priorities financed by the ESF contributes to the promotion of equality between women and men in accordance with Article 8 TFEU. Evaluations have shown the importance of taking the gender equality objectives aspect into account in all dimensions and in all stages of the preparation, monitoring, implementation and evaluation of operational programmes, in a timely and consistent manner while ensuring that specific actions are taken to promote gender equality, the economic independence of women, education and skills upgrading and the reintegration of female victims of violence into the labour market and into society.
- (19) In accordance with Article 10 TFEU, the implementation of the priorities financed by the ESF should contribute to combating discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation by paying particular attention to those facing multiple discrimination. Discrimination on the ground of sex should be interpreted in a broad sense so as to cover other gender-related aspects in line with the case law of the Court of Justice of the European Union. The implementation of the priorities financed by the ESF should also contribute to promoting equal opportunities. The ESF should support the fulfilment of the Union's obligation under the UN Convention on the Rights of Persons with Disabilities with regard inter alia to education, work, employment and accessibility. The ESF should also promote the transition from institutional to community-based care. The ESF should not support any action that contributes to segregation or to social exclusion.
- (20) Support for social innovation contributes to making policies more responsive to social change. The ESF should encourage and support innovative social enterprises and entrepreneurs as well as innovative projects taken on by non-governmental organisations and other actors within the social economy. In particular, testing and evaluating innovative solutions before scaling them

- up is instrumental in improving the efficiency of policies and thus justifies specific support from the ESF. Innovative solutions could include, provided they prove to be effective, the development of social metrics such as, for example, social labelling.
- (21) Transnational cooperation has significant added value and should therefore be supported by all Member States with the exception of duly justified cases taking account of the principle of proportionality. It is also necessary to reinforce the Commission's role in facilitating exchanges of experience and coordinating implementation of relevant initiatives.
- (22) With a view to fostering an integrated and holistic approach in terms of employment and social inclusion, the ESF should support cross-sectoral and territorial-based partnerships.
- (23) The mobilisation of regional and local stakeholders should help to deliver the Europe 2020 strategy and its headline targets. Territorial pacts, local initiatives for employment and social inclusion, sustainable and inclusive community-led local development strategies in urban and rural areas and sustainable urban development strategies may be used and supported to involve more actively regional and local authorities, cities, social partners and non-governmental organisations throughout the preparation and implementation of operational programmes.
- (24) Regulation (EU) No 1303/2013 provides that rules on eligibility of expenditure are to be established at the national level, with certain exceptions for which it is necessary to lay down specific provisions with regard to the ESF.
- (25) With a view to simplifying the use of the ESF and reducing the risk of error, and with regard to the specificities of the operations supported by the ESF, it is appropriate to lay down provisions which complement Regulation (EU) No 1303/2013 as regards eligibility of expenditure.
- (26) The use of standard scales of unit costs, lump sums and flat-rate financing should lead to simplification for the beneficiary and should lower the administrative burden for all ESF project partners.
- (27) It is important to ensure the sound financial management of each operational programme and its implementation in the most effective and user-friendly manner possible. Member States should refrain from adding rules that complicate the use of funds for the beneficiary.
- (28) The Member States and the regions should be encouraged to leverage the ESF through financial instruments in order to support, for example, students, job creation, the mobility of workers, social inclusion and social entrepreneurship.
- (29) The ESF should complement other Union programmes and close synergies should be developed between the ESF and other Union financial instruments.
- (30) Investment in human capital is the main force on which the Union can rely to ensure its international competitiveness and the sustainable recovery of its economy. No type of investment can produce structural reforms unless it is accompanied by a coherent, growth-oriented human capital development strategy. It is therefore necessary to ensure that in the 2014-2020 programming period the resources intended to improve skills and raise employment levels allow action to be taken on an adequate scale.
- (31) The power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission for establishing the definition of standard scales of unit costs and lump sums and their maximum amounts according to different types of operations. It is of particular importance that the Commission carries out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure the simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (32) The Commission should be assisted in the administration of the ESF by the Committee provided for in Article 163 TFEU.
- (33) Since this Regulation replaces Regulation (EC) No 1081/2006 of the European Parliament and of the Council⁽¹⁾, that Regulation should be repealed. Nevertheless, this Regulation should not affect either the continuation or modification of assistance approved by the Commission on the basis of Regulation (EC) No 1081/2006 or any other legislation applying to that assistance on 31 December 2013. That Regulation or such other applicable legislation should consequently continue to apply after 31 December 2013 to that assistance or the operations concerned until their closure. Applications to receive assistance made or approved under Regulation (EC) No 1081/2006 should remain valid,
- ⁽¹⁾ Regulation (EC) No 1081/2006 of the European Parliament and of the Council of 5 July 2006 on the European Social Fund and repealing Regulation (EC) No 1784/1999 (OJ L 210, 31.7.2006, p. 12).

HAVE ADOPTED THIS REGULATION:

CHAPTER I

GENERAL PROVISIONS

Article 1

Subject matter

This Regulation establishes the missions of the European Social Fund (ESF), including the Youth Employment Initiative (YEI), the scope of its support, specific provisions and the types of expenditure eligible for assistance.

Article 2

Missions

1. The ESF shall promote high levels of employment and job quality, improve access to the labour market, support the geographical and occupational mobility of workers and facilitate their adaptation to industrial change and to changes in production systems needed for sustainable developments, encourage a high level of education and training for all and support the transition between education and employment for young people, combat poverty, enhance social inclusion, and promote gender equality, non-discrimination and equal opportunities, thereby contributing to the priorities of the Union as regards strengthening economic, social and territorial cohesion.

2. The ESF shall fulfil the missions set out in paragraph 1 by supporting Member States in pursuing the priorities and headline targets of the Union strategy for smart, sustainable and inclusive growth (the 'Europe 2020 strategy') and by allowing Member States to address their specific challenges with regard to achieving the Europe 2020 strategy objectives. The ESF shall support the design and implementation of policies and actions in connection with its missions, taking account of the relevant Integrated Guidelines and relevant country-specific recommendations adopted in accordance with Article 121(2) and Article 148(4) TFEU and, where appropriate, at national level, the national reform programmes as well as other relevant national strategies and reports.

3. The ESF shall benefit people, including disadvantaged people such as the long-term unemployed, people with disabilities, migrants, ethnic minorities, marginalised communities and people of all ages facing poverty and social exclusion. The ESF shall also provide support to workers, enterprises, including actors in the social economy, and entrepreneurs, as well as to systems and structures with a view to facilitating their adaptation to new challenges including reducing skill mismatches and promoting good governance, social progress, and the implementation of reforms, in particular in the fields of employment, education, training and social policies.

Article 3

Scope of support

1. Under the thematic objectives set out in points (8), (9), (10) and (11) of the first paragraph of Article 9 of Regulation

(EU) No 1303/2013, which correspond to points (a), (b), (c) and (d) of this paragraph, and in accordance with its missions, the ESF shall support the following investment priorities:

(a) For the thematic objective 'promoting sustainable and quality employment and supporting labour mobility':

(i) Access to employment for job-seekers and inactive people, including the long-term unemployed and people far from the labour market, also through local employment initiatives and support for labour mobility;

(ii) Sustainable integration into the labour market of young people, in particular those not in employment, education or training, including young people at risk of social exclusion and young people from marginalised communities, including through the implementation of the Youth Guarantee;

(iii) Self-employment, entrepreneurship and business creation including innovative micro, small and medium sized enterprises;

(iv) Equality between men and women in all areas, including in access to employment, career progression, reconciliation of work and private life and promotion of equal pay for equal work;

(v) Adaptation of workers, enterprises and entrepreneurs to change;

(vi) Active and healthy ageing;

(vii) Modernisation of labour market institutions, such as public and private employment services, and improving the matching of labour market needs, including through actions that enhance transnational labour mobility as well as through mobility schemes and better cooperation between institutions and relevant stakeholders;

(b) For the thematic objective 'promoting social inclusion, combating poverty and any discrimination':

(i) Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability;

- (ii) Socio-economic integration of marginalised communities such as the Roma;
- (iii) Combating all forms of discrimination and promoting equal opportunities;
- (iv) Enhancing access to affordable, sustainable and high-quality services, including health care and social services of general interest;
- (v) Promoting social entrepreneurship and vocational integration in social enterprises and the social and solidarity economy in order to facilitate access to employment;
- (vi) Community-led local development strategies;
- (c) For the thematic objective 'investing in education, training and vocational training for skills and life-long learning':
- (i) Reducing and preventing early school-leaving and promoting equal access to good quality early-childhood, primary and secondary education including formal, non-formal and informal learning pathways for reintegrating into education and training;
- (ii) Improving the quality and efficiency of, and access to, tertiary and equivalent education with a view to increasing participation and attainment levels, especially for disadvantaged groups;
- (iii) Enhancing equal access to lifelong learning for all age groups in formal, non-formal and informal settings, upgrading the knowledge, skills and competences of the workforce, and promoting flexible learning pathways including through career guidance and validation of acquired competences;
- (iv) Improving the labour market relevance of education and training systems, facilitating the transition from education to work, and strengthening vocational education and training systems and their quality, including through mechanisms for skills anticipation, adaptation of curricula and the establishment and development of work-based learning systems, including dual learning systems and apprenticeship schemes;
- (d) For the thematic objective 'enhancing institutional capacity of public authorities and stakeholders and efficient public administration':
- (i) Investment in institutional capacity and in the efficiency of public administrations and public services at the national, regional and local levels with a view to reforms, better regulation and good governance;
- This investment priority is applicable only in Member States eligible for support from the Cohesion Fund, or in Member States that have one or more NUTS level 2 regions referred to in Article 90(2)(a) of Regulation (EU) No 1303/2013.
- (ii) Capacity building for all stakeholders delivering education, lifelong learning, training and employment and social policies, including through sectoral and territorial pacts to mobilise for reform at the national, regional and local levels.
2. Through the investment priorities listed in paragraph 1, the ESF shall also contribute to the other thematic objectives listed in the first paragraph of Article 9 of Regulation (EU) No 1303/2013, primarily by:
- (a) Supporting the shift towards a low-carbon, climate-resilient, resource-efficient and environmentally sustainable economy, through the improvement of education and training systems necessary for the adaptation of skills and qualifications, the up-skilling of the labour force, and the creation of new jobs in sectors related to the environment and energy;
- (b) Enhancing the accessibility of, and use and quality of, information and communication technologies through the development of digital literacy and e-learning, and investment in e-inclusion, e-skills and related entrepreneurial skills;
- (c) Strengthening research, technological development and innovation through the development of post-graduate studies and entrepreneurial skills, the training of researchers, networking activities and partnerships between higher education institutions, research and technological centres and enterprises;
- (d) Enhancing the competitiveness and long-term sustainability of small and medium-sized enterprises, through promoting the adaptability of enterprises, managers and workers, increased investment in human capital, and support for bodies providing practice-oriented vocational education and training.

Article 4

Consistency and thematic concentration

1. Member States shall ensure that the strategy and actions set out in their operational programmes are consistent with, and respond to, the challenges identified in their national reform programmes, as well as, where relevant, in their other national strategies that aim to fight unemployment, poverty and social exclusion, and also in the relevant Council recommendations adopted in accordance with Article 148(4) TFEU, in order to contribute to achieving the headline targets of the Europe 2020 strategy on employment, education and poverty reduction.

2. At least 20 % of the total ESF resources in each Member State shall be allocated to the thematic objective "promoting social inclusion, combating poverty and any discrimination" set out in point (9) of the first paragraph of Article 9 of Regulation (EU) No 1303/2013.

3. Member States shall pursue thematic concentration according to the following modalities:

(a) For more developed regions, Member States shall concentrate at least 80 % of the ESF allocation to each operational programme on up to five of the investment priorities set out in Article 3(1).

(b) For transition regions, Member States shall concentrate at least 70 % of the ESF allocation to each operational programme on up to five of the investment priorities set out in Article 3(1).

(c) For less developed regions, Member States shall concentrate at least 60 % of the ESF allocation to each operational programme on up to five of the investment priorities set out in Article 3(1).

4. The priority axes referred to in Article 11(1) shall be excluded from the calculation of the percentages specified in paragraphs 2 and 3 of this Article.

Article 5

Indicators

1. Common output and result indicators, as set out in Annex I to this Regulation, and, where relevant, programme-specific indicators shall be used in accordance with Article 27(4) and Article 96(2)(b)(ii) and (iv) of Regulation (EU) No 1303/2013. All common output and result indicators shall be reported for all investment priorities. The result indicators set out in Annex II to this Regulation shall be reported in accordance with paragraph 2 of this Article. Where applicable, data shall be broken down by gender.

For common and programme-specific output indicators, baselines shall be set at zero. Where relevant to the nature of the operations supported, cumulative quantified target values for those indicators shall be set for 2023. Output indicators shall be expressed in absolute numbers.

For those common and programme-specific result indicators for which a cumulative quantified target value for 2023 has been set, baselines shall be fixed using the latest available data or other relevant sources of information. Programme-specific result indicators and related targets may be expressed in quantitative or qualitative terms.

2. In addition to paragraph 1, result indicators set out in Annex II to this Regulation shall be used for all operations supported under the investment priority referred to in Article 3(1)(a)(ii) for the implementation of the YEI. All indicators set out in Annex II to this Regulation shall be linked with a quantified cumulative target value for 2023 and a baseline.

3. Together with annual implementation reports, each managing authority shall transmit electronically structured data for each priority axis broken down by investment priority. The data shall be submitted for the categories of intervention referred to in Article 96(2)(b)(vi) of Regulation (EU) No 1303/2013 and the output and result indicators. By way of derogation from Article 50(2) of Regulation (EU) No 1303/2013, data transmitted for output and result indicators shall relate to values for partially or fully implemented operations.

CHAPTER II

SPECIFIC PROVISIONS FOR PROGRAMMING AND IMPLEMENTATION

Article 6

Involvement of partners

1. The participation of the partners referred to in Article 5 of Regulation (EU) No 1303/2013 in the implementation of the operational programmes may take the form of global grants as defined in Article 123(7) of Regulation (EU) No 1303/2013. In such cases, the operational programme shall identify the part of the operational programme concerned by the global grant, including an indicative financial allocation from each priority axis to it.

2. To encourage adequate participation of the social partners in actions supported by the ESF, the managing authorities of an operational programme in a region defined in Article 90(2)(a) or (b) of Regulation (EU) No 1303/2013 or in a Member State eligible for support from the Cohesion Fund shall ensure that, according to the needs, an appropriate amount of ESF resources is allocated to capacity building activities, in the form of training, networking measures, and strengthening of the social dialogue, and to activities jointly undertaken by the social partners.

3. To encourage the adequate participation of, and access by, non-governmental organisations in and to actions supported by the ESF, in particular in the fields of social inclusion, gender equality and equal opportunities, the managing authorities of an operational programme in a region defined in Article 90(2)(a) or (b) of Regulation (EU) No 1303/2013 or in a Member State eligible for support from the Cohesion Fund shall ensure that an appropriate amount of ESF resources is allocated to capacity building for non-governmental organisations.

Article 7

Promotion of equality between men and women

The Member States and the Commission shall promote equality between men and women through mainstreaming as referred to in Article 7 of Regulation (EU) No 1303/2013 throughout the preparation, implementation, monitoring and evaluation of the operational programmes. Through the ESF, the Member States and the Commission shall also support specific targeted actions within any of the investment priorities referred to in Article 3, and in particular Article 3(1)(a)(iv) of this Regulation, with the aim of increasing the sustainable participation and progress of women in employment, thus combating the feminisation of poverty, reducing gender-based segregation, combating gender stereotypes in the labour market and in education and training, and promoting the reconciliation of work and personal life for all as well as the equal sharing of care responsibilities between men and women.

Article 8

Promotion of equal opportunities and non-discrimination

The Member States and the Commission shall promote equal opportunities for all, without discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation through mainstreaming the principle of non-discrimination, as referred to in Article 7 of Regulation (EU) No 1303/2013. Through the ESF, the Member States and the Commission shall also support specific actions within any of the investment priorities referred to in Article 3, and in particular Article 3(1)(b)(iii) of this Regulation. Such actions shall aim to combat all forms of discrimination as well as to improve accessibility for persons with disabilities, with a view to improving integration into employment, education and training, thereby enhancing social inclusion, reducing inequalities in terms of educational attainment and health status, and facilitating the transition from institutional to community-based care, in particular for those who face multiple discrimination.

Article 9

Social innovation

1. The ESF shall promote social innovation within all areas falling under its scope, as defined in Article 3 of this Regulation, in particular with the aim of testing, evaluating and scaling up innovative solutions, including at the local or regional level, in order to address social needs in partnership with the relevant partners and, in particular, social partners.

2. Member States shall identify, either in their operational programmes or at a later stage during implementation, fields for social innovation that correspond to the Member States' specific needs.

3. The Commission shall facilitate capacity building for social innovation, in particular through supporting mutual learning, establishing networks, and disseminating and promoting good practices and methodologies.

Article 10

Transnational cooperation

1. Member States shall support transnational cooperation with the aim of promoting mutual learning, thereby increasing the effectiveness of policies supported by the ESF. Transnational cooperation shall involve partners from at least two Member States.

2. By way of derogation from paragraph 1, Member States with a single operational programme supported by the ESF or a single multi-fund operational programme may exceptionally choose not to support transnational cooperation actions, in duly justified cases and taking account of the principle of proportionality.

3. Member States, in partnership with the relevant partners, may select themes for transnational cooperation from a list of common themes proposed by the Commission and endorsed by the Committee referred to in Article 25 or select any other themes corresponding to their specific needs.

4. The Commission shall facilitate transnational cooperation on the common themes of the list referred to in paragraph 3 and, where appropriate, other themes selected by Member States, through mutual learning and coordinated or joint action. In particular, the Commission shall operate an EU-level platform to facilitate the setting up of transnational partnerships, the exchange of experiences, capacity building and networking, and the capitalisation on and the dissemination of the relevant outcomes. In addition, the Commission shall develop a coordinated implementation framework, including common eligibility criteria, types and timing of actions, and common methodological approaches for monitoring and evaluation, with a view to facilitating transnational cooperation.

Article 11

Fund-specific provisions for operational programmes

1. By way of derogation from Article 96(1) of Regulation (EU) No 1303/2013, operational programmes may set out priority axes for the implementation of social innovation and transnational cooperation as referred to in Articles 9 and 10 of this Regulation.

2. By way of derogation from Article 120(3) of Regulation (EU) No 1303/2013, the maximum co-financing rate for a priority axis shall be increased by ten percentage points, but shall not exceed 100 % where the whole of a priority axis is dedicated to social innovation or to transnational cooperation, or a combination of both.

3. In addition to the provision made in Article 96(3) of Regulation (EU) No 1303/2013, operational programmes shall also set out the contribution of planned ESF-supported actions to:

- (a) the thematic objectives listed under points (1) to (7) of the first paragraph of Article 9 of Regulation (EU) No 1303/2013 by priority axis, as appropriate;
- (b) social innovation and transnational cooperation, as referred to in Articles 9 and 10 of this Regulation, where they are not covered by a dedicated priority axis.

Article 12

Specific provisions on the treatment of particular territorial features

1. The ESF may support community-led local development strategies in urban and rural areas, as referred to in Articles 32, 33 and 34 of Regulation (EU) No 1303/2013, territorial pacts and local initiatives for employment, including youth employment, education and social inclusion, as well as Integrated territorial investments (ITI) as referred to in Article 36 of Regulation (EU) No 1303/2013.

2. As a complement to ERDF interventions as referred to in Article 7 of Regulation (EU) No 1301/2013 of the European Parliament and of the Council⁽¹⁾, the ESF may support sustainable urban development through strategies setting out integrated actions to tackle the economic, environmental and social challenges affecting the urban areas identified by the Member States on the basis of the principles laid down in their respective Partnership Agreements.

CHAPTER III

SPECIFIC PROVISIONS FOR FINANCIAL MANAGEMENT

Article 13

Eligibility of expenditure

1. The ESF shall provide support for eligible expenditure which, as referred to in Article 120(2)(b) of Regulation (EU) No 1303/2013, may include any financial resources collectively contributed by employers and workers.

⁽¹⁾ Regulation (EU) No 1301/2013 of the European Parliament and of the Council of 17 December 2013 on the European Regional Development Fund and the Investment for growth and jobs goal and repealing Regulation (EC) No 1080/2006 (See page 289 of this Official Journal).

2. The ESF may provide support for expenditure incurred for operations which take place outside the programme area, but within the Union, provided that the following two conditions are satisfied:

- (a) the operation is for the benefit of the programme area;
- (b) the obligations of the authorities for the operational programme in relation to management, control and audit concerning the operation are fulfilled by the authorities responsible for the operational programme under which that operation is supported or they enter into agreements with authorities in the Member State in which the operation is implemented provided that in that Member State the obligations in relation to management, control and audit concerning the operation are met.

3. Up to a limit of 3 % of the budget of an ESF operational programme or the ESF part of a multi-fund operational programme, expenditure incurred outside the Union shall be eligible for a contribution from the ESF provided that it concerns the thematic objectives under Article 3(1)(a) or Article 3(1)(c) and provided that the relevant monitoring committee has given its agreement to the operation or types of operations concerned.

4. In addition to the expenditure referred to in Article 69(3) of Regulation (EU) No 1303/2013, the purchase of infrastructure, land and real estate shall also not be eligible for a contribution from the ESF.

5. Contributions in kind in the form of allowances or salaries disbursed by a third party for the benefit of the participants in an operation may be eligible for a contribution from the ESF provided that the contributions in kind are incurred in accordance with national rules, including accountancy rules, and do not exceed the cost borne by the third party.

Article 14

Simplified cost options

1. In addition to the options referred to in Article 67 of Regulation (EU) No 1303/2013, the Commission may reimburse expenditure paid by Member States on the basis of standard scales of unit costs and lump sums defined by the Commission. The amounts calculated on this basis shall be regarded as public support paid to beneficiaries and as eligible expenditure for the purpose of applying Regulation (EU) No 1303/2013.

For the purpose of the first subparagraph, the Commission shall be empowered to adopt delegated acts in accordance with Article 24 concerning the type of operations covered, the definitions of the standard scales of unit costs and lump sums and their maximum amounts, which may be adjusted according to the applicable commonly agreed methods, taking due account of experience gained during the previous programming period.

Financial audit shall exclusively aim at verifying that the conditions for reimbursement by the Commission on the basis of standard scales of unit costs and lump sums have been fulfilled.

Where funding on the basis of standard scales of unit costs and lump sums, in accordance with the first subparagraph, is used, the Member State may apply its accounting practices to support operations. For the purpose of this Regulation and Regulation (EU) No 1303/2013, such accounting practices and the resulting amounts shall not be subject to audit by the audit authority or by the Commission.

2. In accordance with Article 67(1)(d) and (5)(d) of Regulation (EU) No 1303/2013, a flat rate of up to 40 % of the eligible direct staff costs may be used in order to cover the remaining eligible costs of an operation without a requirement for the Member State to execute any calculation to determine the applicable rate.

3. In addition to the methods stipulated in Article 67(5) of Regulation (EU) No 1303/2013, where the public support for grants and repayable assistance does not exceed EUR 100 000, the amounts referred to in Article 67(1)(b), (c) and (d) of Regulation (EU) No 1303/2013 may be established on a case-by-case basis by reference to a draft budget agreed ex ante by the managing authority.

4. Without prejudice to Article 67 (4) of Regulation (EU) No (1303/2013), grants and repayable assistance for which the public support does not exceed EUR 50 000 shall take the form of standard scales of unit costs or lump sums in accordance with paragraph 1 of this Article or with Article 67 of Regulation (EU) No (1303/2013) or flat rates in accordance with Article 67 of Regulation (EU) No (1303/2013), except for operations receiving support within the framework of a State aid scheme. Where flat-rate financing is used, the categories of costs which are used to calculate the rate may be reimbursed in accordance with Article 67(1)(a) of Regulation (EU) No (1303/2013).

Article 15

Financial instruments

Pursuant to Article 37 of Regulation (EU) No 1303/2013, the ESF may support actions and policies falling within its scope through financial instruments, including micro-credits and guarantee funds.

CHAPTER IV

YOUTH EMPLOYMENT INITIATIVE

Article 16

Youth Employment Initiative

The YEI shall support the fight against youth unemployment in eligible regions of the Union through providing support to actions under Article 3(1)(a)(ii) of this Regulation. It shall

target all young persons under the age of 25 not in employment, education or training, residing in eligible regions, who are inactive or unemployed including the long-term unemployed, and whether or not registered as seeking work. On a voluntary basis, Member States may decide to extend the target group to include young persons under the age of 30.

For the purpose of the YEI for 2014-2015, "eligible regions" are those NUTS level 2 regions that have youth unemployment rates for young persons aged 15 to 24 of more than 25 % in 2012 and, for Member States where the youth unemployment rate has increased by more than 30 % in 2012, NUTS level 2 regions that have youth unemployment rates of more than 20 % in 2012.

The resources for the YEI may be revised upwards for the years 2016 to 2020 in the framework of the budgetary procedure in accordance with Article 14 of Regulation (EU) 1311/2013. For the determination of the regions eligible for the YEI for the period 2016-2020, the reference to 2012 data in the second subparagraph shall be construed as a reference to the latest available annual data. The breakdown by Member State of the additional resources shall follow the same steps as the initial allocation in accordance with Annex VIII of Regulation (EU) No 1303/2013.

In agreement with the Commission, Member States may decide to allocate a limited amount not exceeding 10 % of the funds under the YEI to young persons residing in sub-regions which experience high youth unemployment levels and which are outside the eligible NUTS level 2 regions.

Article 17

Thematic concentration

The specific allocation for YEI shall not be taken into account for the purpose of calculating the thematic concentration referred to in Article 4.

Article 18

Programming

The YEI is integrated into the programming of the ESF under Article 96 of Regulation (EU) No 1303/2013. Where appropriate, Member States shall set out the programming arrangements for the YEI in their Partnership Agreements and in their operational programmes.

The programming arrangements may take one or more of the following forms:

- (a) a dedicated operational programme;
- (b) a dedicated priority axis within an operational programme;
- (c) a part of one or more priority axes.

Article 9 and 10 of this Regulation shall also apply to the YEI.

*Article 19***Monitoring and evaluation**

1. In addition to the functions of the monitoring committee set out in Article 110 of Regulation (EU) No 1303/2013, at least once per year, the monitoring committee shall examine the implementation of the YEI in the context of the operational programme and the progress made towards achieving its objectives.

2. The annual implementation reports and the final report as referred to in Article 50(1) and (2) of Regulation (EU) No 1303/2013 shall include additional information on the implementation of the YEI. The Commission shall transmit to the European Parliament a summary of those reports as referred to in Article 53(1) of Regulation (EU) No 1303/2013.

The Commission shall attend the European Parliament's annual debate on those reports.

3. As from April 2015 and for subsequent years, and at the same time as the annual implementation reports referred to in Article 50(1) and (2) of Regulation (EU) No 1303/2013, the managing authority shall transmit electronically to the Commission structured data for each priority axis or any part thereof supporting the YEI. Indicator data transmitted shall relate to values for the indicators set out in Annexes I and II to this Regulation and, where applicable, to programme specific indicators. They shall relate to partially or fully implemented operations.
