

COMMISSION REGULATION (EC) No 1497/2003
of 18 August 2003
amending Council Regulation (EC) No 338/97 on the protection of species of wild fauna and flora
by regulating trade therein

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 338/97 of 9 December 1996 on the protection of species of wild fauna and flora by regulating trade therein ⁽¹⁾, as last amended by Commission Regulation (EC) No 2476/2001 ⁽²⁾, and in particular Article 19(3), thereof,

Whereas:

(1) At the 12th session of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (hereinafter referred to as the Convention), held in Santiago (Chile) from 3 to 15 November 2002, amendments were made to the Appendices to the Convention by way of the transfer of certain species or certain populations of species to Appendix I from Appendix II and vice versa, the transfer of certain species from Appendix III to Appendix II, the addition of species to Appendices I and II that were not previously listed in any of the Appendices, the deletion of certain species from Appendix II, and the addition, deletion or amendment of certain annotations accompanying the listing of certain species.

(2) Additions and deletions have been made to Appendix III to the Convention subsequent to the 12th session of the Conference of the Parties to the Convention in accordance with the provisions of Article XVI of the Convention.

(3) Member States have not entered a reservation in respect of any of these amendments.

(4) The amendments to Appendices I, II and III to the Convention therefore necessitate amendments to Annexes A, B and C of Regulation (EC) No 338/97 in accordance with Article 3(1)(a), (2)(a) and 3(a) of that Regulation.

(5) It has been established that *Oxyura jamaicensis* and *Chrysemys picta* constitute a threat to wild species of fauna and flora indigenous to the Community and those two species should therefore be included in Annex B of Regulation (EC) No 338/97 in accordance with Article 3(2)(d) of that Regulation.

(6) It has further been established that *Padda fuscata* is subject to levels of international trade that might not be compatible with its survival and that this species should therefore be included in Annex B to Regulation (EC) No 338/97 in accordance with Article 3(2)(c)(i) of that Regulation.

(7) It has been established that a number of species currently included in Annex D to Regulation (EC) No 338/97 are not imported into the Community in such numbers as to warrant monitoring and that these species should be deleted from that Annex in accordance with Article 3(4)(a) of that Regulation.

(8) It has further been established that a number of other species not currently included in any of the Annexes to Regulation (EC) No 338/97 are being imported into the Community in such numbers as to warrant monitoring and that these species should be included in Annex D on the basis of Article 3(4)(a) of that Regulation.

(9) In view of the extent of the amendments it is appropriate to replace the whole of the Annex to Regulation (EC) No 338/97 consisting of the Annexes A, B, C and D and the notes on the interpretation of those Annexes.

(10) The measures provided for in this Regulation are in accordance with the opinion of the Committee on Trade in Wild Fauna and Flora established pursuant to Article 18 of Regulation (EC) No 338/97,

HAS ADOPTED THIS REGULATION:

Article 1

The Annexes to Regulation (EC) No 338/97 and the notes on the interpretation of those Annexes are hereby replaced by the text in the Annex to this Regulation.

Notes on interpretation of Annexes A, B, C and D

1. Species included in these Annexes A, B, C and D are referred to:
 - (a) by the name of the species; or
 - (b) as being all of the species included in a higher taxon or designated part thereof.
2. The abbreviation "spp." is used to denote all species of a higher taxon.
3. Other references to taxa higher than species are for the purposes of information or classification only.
4. Species printed in bold in Annex A are listed there in consistency with their protection as provided for by Council Directive 79/409/EEC ⁽¹⁾ (Birds Directive) or Council Directive 92/43/EEC ⁽²⁾ ("Habitats Directive").
5. The following abbreviations are used for plant taxa below the level of species:
 - (a) "ssp" is used to denote subspecies;
 - (b) "var(s)" is used to denote variety (varieties); and
 - (c) "fa" is used to denote forma.
6. The symbols "(I)", "(II)" and "(III)" placed against the name of a species or higher taxon refer to the Appendices of the Convention in which the species concerned are listed as indicated in notes 7 to 9. Where none of these annotations appears, the species concerned are not listed in the Appendices to the Convention.
7. (I) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix I to the Convention.
8. (II) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix II to the Convention.
9. (III) against the name of a species or higher taxon indicates that it is included in Appendix III to the Convention. In this case the country with respect to which the species or higher taxon is included in Appendix III is also indicated by a two-letter code as follows: BO (Bolivia), BR (Brazil), BW (Botswana), CA (Canada), CO (Colombia), CR (Costa Rica), GH (Ghana), GT (Guatemala), HN (Honduras), IN (India), MY (Malaysia), MU (Mauritius), NP (Nepal), TN (Tunisia), UY (Uruguay) and ZA (South Africa).
10. Hybrids may be specifically included in the Appendices but only if they come from distinct and stable populations in the wild. Hybrid animals that have in their previous four generations of the lineage one or more specimens of species included in Annexes A or B shall be subject to the provisions of this Regulation just as if they were full species, even if the hybrid concerned is not specifically included in the Annexes.
11. The symbol "=" followed by a number placed against the name of a species or higher taxon denotes that the name of that species or taxon shall be interpreted as follows:
