PART ONE

**PRELIMINARY PROVISIONS**

**SECTION I****GENERAL RULES****A. General rules for the interpretation of the Combined Nomenclature**

Classification of goods in the Combined Nomenclature shall be governed by the following principles:

1. The titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions.
2. (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this rule), presented unassembled or disassembled.  
(b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of rule 3.
3. When, by application of rule 2(b) or for any other reason, goods are *prima facie* classifiable under two or more headings, classification shall be effected as follows:
  - (a) the heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods;
  - (b) mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, in so far as this criterion is applicable;
  - (c) when goods cannot be classified by reference to 3(a) or (b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:
  - (a) camera cases, musical instrument cases, gun cases, drawing-instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This rule does not, however, apply to containers which give the whole its essential character;

- (b) subject to the provisions of rule 5(a), packing materials and packing containers<sup>(1)</sup> presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and, *mutatis mutandis*, to the above rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this rule, the relative section and chapter notes also apply, unless the context requires otherwise.

#### B. General rules concerning duties

1. The customs duties applicable to imported goods originating in countries which are Contracting Parties to the General Agreement on Tariffs and Trade or with which the European Union has concluded agreements containing the most-favoured-nation tariff clause shall be the conventional duties shown in column 3 of the schedule of duties. Unless the context requires otherwise, these conventional duties are applicable to goods, other than those referred to above, imported from any third country.

The conventional rates of duty reproduced in column 3 are applicable from 1 January 2015.

When autonomous rates of duty are lower than the conventional rates of duty, the autonomous duties, shown by means of a footnote, are applicable.

2. Paragraph 1 shall not apply where special autonomous customs duties are provided for in respect of goods originating in certain countries or where preferential customs duties are applicable in pursuance of agreements.
3. Paragraphs 1 and 2 shall not preclude the Member States from applying customs duties other than those of the Common Customs Tariff where the application of such other duties is justified by the law of the European Union.
4. The duties expressed as percentage rates are *ad valorem* duties.
5. The symbol 'EA' indicates that the goods concerned are chargeable with an 'agricultural component' fixed in accordance with Annex 1.
6. The symbol 'AD S/Z' or 'AD F/M' in Chapters 17 to 19 indicates that the maximum rate of duty consists of an *ad valorem* duty plus an additional duty for certain forms of sugar or for flour. This additional duty is fixed in accordance with the provisions of Annex 1.
7. In Chapter 22, the symbol '€ /% vol/hl' means that a specific duty, expressed in euro, is to be calculated for each percentage volume of alcohol per hectolitre. Thus, a beverage having an alcohol content by volume of 40 % is to be charged as follows:
- '€ 1/% vol/hl' = € 1 × 40, giving a duty of € 40 per hectolitre, or
  - '€ 1/% vol/hl + € 5/hl' = € 1 × 40 plus € 5, giving a duty of € 45 per hectolitre.

Where, in addition, a minimum (MIN) value is shown, for example '€ 1,6/% vol/hl MIN € 9/hl', it means that the duty, calculated on the basis of the above rule, is to be compared with the minimum duty, for example '€ 9/hl', and the higher of the two is to be applied.

---

<sup>(1)</sup> The terms 'packing materials' and 'packing containers' mean any external or internal containers, holders, wrappings or supports other than transport devices (for example, transport containers), tarpaulins, tackle or ancillary transport equipment. The term 'packing containers' does not cover the containers referred to in general rule 5(a).

### C. General rules applicable both to nomenclature and to duties

1. Unless provided otherwise, the provisions relating to customs value shall be applied to determine, in addition to the value for the assessment of *ad valorem* customs duties, the values by reference to which the scope of certain headings or subheadings is defined.
2. The dutiable weight, in the case of goods chargeable by weight, and the weights by reference to which the scope of certain headings or subheadings is defined, shall be taken to be:
  - (a) in the case of a reference to 'gross weight', the aggregate weight of the goods and of all the packing materials and packing containers;
  - (b) in the case of a reference to 'net weight' or simply to 'weight' without qualification, the weight of the goods themselves without packing materials and packing containers of any kind.
3. The equivalent in national currencies of the euro, for Member States other than participating Member States as defined in Council Regulation (EC) No 974/98<sup>(1)</sup> (hereafter called 'non-participating Member States'), shall be fixed in accordance with Article 18 of Council Regulation (EEC) No 2913/92<sup>(2)</sup>.
4. Goods eligible for favourable tariff treatment by reason of their end-use:

Where the import duty applicable under the end-use arrangements to goods for a specific end-use is not lower than that which would otherwise be applicable to the goods, the said goods shall be classified in the code referring to the end-use and Articles 291 to 300 of Commission Regulation (EEC) No 2454/93 (OJ L 253, 11.10.1993, p. 1) shall not apply.

## SECTION II

- (b) tubes, pipes, cables and their connection pieces, linking these drilling or production platforms to the mainland.

### C. Pharmaceutical products

1. Relief from customs duty is provided for pharmaceutical products of the following categories:

- (1) pharmaceutical substances which are covered by the CAS RN (chemical abstracts service registry numbers) and the international non-proprietary names (INNs) listed in Annex 3;
- (2) salts, esters and hydrates of INNs which are described by combining INNs of Annex 3 with prefixes or suffixes of Annex 4, provided such products are classifiable in the same 6-digit HS-subheadings as the relevant INN;
- (3) salts, esters and hydrates of INNs which are listed in Annex 5 and which are not classifiable in the same 6-digit HS-subheadings as the corresponding INNs;
- (4) pharmaceutical intermediates, i.e. compounds of a kind used in the manufacture of finished pharmaceutical products which are covered by the CAS RN and the chemical names, listed in Annex 6.

2. Special cases:

- (1) INNs cover only those substances described in the lists of recommended and proposed INNs published by the World Health Organisation (WHO). Where the number of substances covered by an INN is less than that covered by the CAS RN, only those substances covered by the INN will be subject to duty-free treatment;
- (2) where a product of Annex 3 or Annex 6 is identified by a CAS RN corresponding to a specific isomer, only that isomer may qualify for duty-free treatment;
- (3) double derivatives (salts, esters and hydrates) of INNs identified by a combination of an INN of Annex 3 with a prefix or suffix of Annex 4 qualify for duty-free treatment, provided they are classifiable in the same 6-digit HS-subheading as the relevant INN:

example: alanine methyl ester, hydrochloride;

- (4) where an INN of Annex 3 is a salt (or an ester), no other salt (or ester) of the acid corresponding to the INN may qualify for duty-free treatment:

example: oxprenoate potassium (INN): duty-free

oxprenoate sodium: not duty-free.

### D. Standard rate of duty

1. Customs duty shall be charged at the flat rate of 2,5 % *ad valorem* on goods:

- contained in consignments sent by one private individual to another, or
- contained in travellers' personal luggage,

provided that such importations are not of a commercial nature.

This flat-rate 2,5 % customs duty shall apply, provided that the intrinsic value of the goods subject to import duty does not exceed € 700 per consignment or per traveller.

Such flat-rate assessment shall not apply to goods for which the rate of duty in the schedule of customs duties is 'free' and to goods of Chapter 24 which are contained in a consignment or in travellers' personal luggage in amounts exceeding those laid down in Article 27 or pursuant to Article 41 of Council Regulation (EC) No 1186/2009 of 16 November 2009 setting up a Community system of reliefs from customs duty (<sup>1</sup>).

2. Importations shall be treated as not being of a commercial nature if:

(a) in the case of goods contained in consignments sent by one private individual to another, such consignments:

- are of an occasional nature,
- contain goods exclusively for the personal use of the consignee or his family, which do not by their nature or quantity reflect any commercial interest,
- are sent to the consignee by the consignor free of payment of any kind;

(b) in the case of goods contained in travellers' personal luggage, they:

- are of an occasional nature, and
- consist exclusively of goods for the personal use of the travellers or their families, or of goods intended as presents; the nature and quantity of such goods must not be such as might indicate that they are being imported for commercial reasons.

3. The flat rate of customs duty shall not apply to goods imported under the conditions set out in paragraphs 1 and 2 if the person entitled has, before the said flat rate is applied to them, requested that they be subject to the customs duties appropriate to them. All the goods making up the consignment shall then be subject to the import duties which are appropriate to them, without prejudice to the duty-free admission provided for pursuant to Articles 25 to 27 and 41 of Regulation (EC) No 1186/2009.

For the purposes of the first subparagraph, import duties shall mean both customs duties and charges having equivalent effect and other import charges provided for under the common agricultural policy or under specific arrangements applicable to certain goods resulting from the processing of agricultural products.

4. Non-participating Member States may round off the amount in national currencies resulting from the conversion of the sum of € 700.

5. Non-participating Member States may maintain unchanged the equivalent in national currency of the sum of € 700 if, at the time of the annual adjustment provided for in Article 18(2) of Regulation (EEC) No 2913/92 the conversion of this amount, before the rounding off provided for in paragraph 4, results in a change of less than 5 % in the equivalent in national currency, or in a reduction thereof.

#### **E. Containers and packing materials**

The following provisions are applicable to the containers and packing materials referred to in general interpretative rule 5(a) and (b) and put into free circulation at the same time as the goods which they contain or with which they are presented.

1. When the containers and packing materials are classified with the goods in accordance with the provisions of general interpretative rule 5, they shall be:
  - (a) chargeable at the same rate of customs duty as the goods:
    - where such goods are subject to an *ad valorem* customs duty, or
    - where they are to be included in the dutiable weight of the goods;
  - (b) admitted free of customs duties:
    - where the goods are free of customs duty, or
    - where the goods are dutiable otherwise than by reference to weight or value, or
    - where the weight of the containers and packing materials is not to be included in the dutiable weight of the goods.
2. Where containers and packing materials covered by the provisions of paragraph 1(a) and (b) contain or are presented with goods of several different tariff descriptions, the weight and value of the containers and packing materials shall, for the purpose of determining their dutiable weight or value, be apportioned among all the goods contained, in proportion to the weight or value of those goods.

#### **F. Favourable tariff treatment by reason of the nature of the goods**

1. Under certain conditions, favourable tariff treatment by reason of the nature of the goods is provided for:
  - goods unfit for consumption,
  - seeds,
  - bolting cloth, not made up,
  - certain types of fresh table grapes, tobacco and nitrate.

These goods are covered by subheadings<sup>(1)</sup> with a footnote reference in the following terms: 'Entry under this subheading is subject to the conditions laid down in section II, paragraph F, of the preliminary provisions.' or 'This favourable tariff treatment is subject to compliance with the formalities and conditions laid down in section II, paragraph F, of the preliminary provisions.'

2. Goods unfit for consumption for which favourable tariff treatment is granted by reason of their nature are listed in Annex 8 by reference to the heading under which they are classified together with the description and the quantities of the denaturants used. Such goods are presumed to be unfit for consumption when the goods to be denatured and the denaturants are homogeneously mixed and their separation is economically not viable.

- for sweetcorn, spelt, hybrid maize, rice and sorghum (Council Directive 66/402/EEC (<sup>1</sup>)),
- for seed potatoes (Council Directive 2002/56/EC of 13 June 2002 (<sup>2</sup>))),
- for oil seeds and oleaginous fruits (Council Directive 2002/57/EC of 13 June 2002 (<sup>3</sup>))).

When hybrid sweetcorn, spelt, hybrid maize, rice, hybrid sorghum or oil seeds and oleaginous fruits are of a kind to which the agricultural provisions do not apply, favourable tariff treatment by reason of their nature shall be granted, provided that it is established that the goods are actually intended for sowing.

4. Bolting cloth, not made up, is granted favourable tariff treatment on the condition that the goods are indelibly marked in a way identifying them as being intended for bolting or similar industrial purposes.
5. Fresh table grapes, tobacco and nitrate are granted favourable tariff treatment on production of a duly endorsed certificate. The particular provisions to be applied and the model of the certificates are set out at Annex 9.

## CHAPTER 2

## MEAT AND EDIBLE MEAT OFFAL

**Note**

1. This chapter does not cover:

- (a) products of the kinds described in headings 0201 to 0208 or 0210, unfit or unsuitable for human consumption;
- (b) guts, bladders or stomachs of animals (heading 0504) or animal blood (heading 0511 or 3002); or
- (c) animal fat, other than products of heading 0209 (Chapter 15).

**Additional notes**

1. A. The following expressions have the meanings hereby assigned to them:

- (a) 'carcasses of bovine animals', for the purposes of subheadings 0201 10 and 0202 10: whole carcasses of the slaughtered animals after having been bled, eviscerated and skinned, imported with or without the heads, with or without the feet and with or without the other offals attached. Where carcasses are imported without the heads, the latter must have been separated from the carcase at the atlanto-occipital joint. When imported without the feet, the latter must have been cut off at the carpo-metacarpal or tarso-metatarsal joints; 'carcase' includes the front part of the carcase comprising all the bones and the scrag, neck and shoulder, having more than 10 pairs of ribs;
- (b) 'half-carcasses of bovine animals', for the purposes of subheadings 0201 10 and 0202 10: the product resulting from the symmetrical division of the whole carcase through the centre of each cervical, dorsal, lumbar and sacral vertebra and through the centre of the sternum and of the ischio-pubic symphysis; 'half-carcase' includes the front part of the half-carcase comprising all the bones and the scrag, neck and shoulder, having more than 10 ribs;
- (c) 'compensated quarters', for the purposes of subheadings 0201 20 20 and 0202 20 10: portions composed of either:
  - forequarters comprising all the bones and the scrag, neck and shoulder, and cut at the tenth rib; and hindquarters comprising all the bones and the thigh and sirloin, and cut at the third rib, or
  - forequarters comprising all the bones and the scrag, neck and shoulder, and cut at the fifth rib, with the whole of the flank and breast attached; and hindquarters comprising all the bones and the thigh and sirloin, and cut at the eighth cut rib.

The forequarters and the hindquarters constituting 'compensated quarters' must be presented to customs at the same time and in equal numbers, and the total weight of the forequarters must be the same as that of the hindquarters; however, a difference between the weights of the two parts of the consignment is allowed, provided that this does not exceed 5 % of the weight of the heavier part (forequarters or hindquarters);

- (d) 'unseparated forequarters', for the purposes of subheadings 0201 20 30 and 0202 20 30: the front part of a carcase, comprising all the bones and the scrag, neck and shoulder, with a minimum of four pairs of ribs and a maximum of 10 pairs of ribs (the first four pairs of ribs must be whole, the others may be cut), with or without the thin flank;
- (e) 'separated forequarters', for the purposes of subheadings 0201 20 30 and 0202 20 30: the front part of a half-carcase, comprising all the bones and the scrag, neck and shoulder, with a minimum of four ribs and a maximum of 10 ribs (the first four ribs must be whole, the others may be cut), with or without the thin flank;
- (f) 'unseparated hindquarters', for the purposes of subheadings 0201 20 50 and 0202 20 50: the rear part of a carcase comprising all the bones and the thigh and sirloin, including the fillet, with a minimum of three pairs of whole or cut ribs, with or without the shank and with or without the thin flank;
- (g) 'separated hindquarters', for the purposes of subheadings 0201 20 50 and 0202 20 50: the rear part of a half-carcase, comprising all the bones and the thigh and sirloin, including the fillet, with a minimum of three whole or cut ribs, with or without the shank and with or without the thin flank;

(h) 1. 'crop' and 'chuck and blade' cuts, for the purposes of subheading 0202 30 50: the dorsal part of the forequarter, including the upper part of the shoulder, obtained from a forequarter with a minimum of four ribs and a maximum of 10 ribs by a cut along a straight line through the point where the first rib joins the first sternal segment to the point of reflection of the diaphragm on the tenth rib;

2. 'brisket' cut, for the purposes of subheading 0202 30 50: the lower part of the forequarter, comprising the brisket navel end and the brisket point end.

B. Products covered by additional notes 1(A)(a) to (g) to this chapter may be presented with or without the vertebral column.

C. In determining the number of whole or cut ribs referred to in additional note 1(A), only those attached to the vertebral column are to be taken into consideration. If the vertebral column has been removed, only the whole or cut ribs which otherwise would have been directly attached to the vertebral column are to be taken into consideration.

2. A. The following expressions have the meanings hereby assigned to them:

(a) 'carcasses or half-carcasses', for the purposes of subheadings 0203 11 10 and 0203 21 10: slaughtered pigs, in the form of carcasses of domestic swine which have been bled and eviscerated and from which the bristles and hooves have been removed. Half-carcasses are derived from whole carcasses by division through each cervical, dorsal, lumbar and sacral vertebra, through or along the sternum and through the ischio-pubic symphysis. These carcasses or half-carcasses may be with or without head, with or without the chaps, feet, flare fat, kidneys, tail or diaphragm. Half-carcasses may be with or without spinal cord, brain or tongue. Carcasses and half-carcasses of sows may be with or without udders (mammary glands);

(b) 'hams' (legs), for the purposes of subheadings 0203 12 11, 0203 22 11, 0210 11 11 and 0210 11 31: the posterior (caudal) part of the half-carcass, including bones, with or without the foot, shank, rind or subcutaneous fat.

The ham (leg) is separated from the rest of the half-carcass, so that it includes, at most, the last lumbar vertebra;

(c) 'fore-ends', for the purposes of subheadings 0203 19 11, 0203 29 11, 0210 19 30 and 0210 19 60: the anterior (cranial) part of the half-carcass without the head, with or without the chaps, including bones, with or without foot, shank, rind or subcutaneous fat.

The fore-end is separated from the rest of the half-carcass, so that it includes, at most, the fifth dorsal vertebra.

The upper (dorsal) part of the fore-end, whether or not containing the blade-bone and attached muscles (neck-end in fresh or collar in salted condition), is considered a cut of the loin, when it is separated from the lower (ventral) part of the fore-end, at most by a cut just below the vertebral column;

(d) 'shoulders', for the purposes of subheadings 0203 12 19, 0203 22 19, 0210 11 19 and 0210 11 39: the lower part of the fore-end whether or not containing the blade-bone and attached muscles, including bones, with or without foot, shank, rind or subcutaneous fat.

The blade-bone and attached muscles, presented separately, remain classified in this subheading as a part of the shoulder;

(e) 'loins', for the purposes of subheadings 0203 19 13, 0203 29 13, 0210 19 40 and 0210 19 70: the upper part of the half-carcass, extending from the first cervical vertebra to the caudal vertebrae, including bones, with or without the tenderloin, blade-bone, subcutaneous fat or rind.

The loin is separated from the lower part of the half-carcass by a cut just below the vertebral column;

(f) 'bellies', for the purposes of subheadings 0203 19 15, 0203 29 15, 0210 12 11 and 0210 12 19: the lower part of the half-carcass situated between the ham (leg) and the shoulder, commonly known as 'streaky', with or without bones, but with the rind and the subcutaneous fat;

(g) 'bacon sides', for the purposes of subheading 0210 19 10: the pig half-carcass without the head, cheek, chap, feet, tail, flare fat, kidney, tenderloin, blade-bone, sternum, vertebral column, pelvic bone and diaphragm;

(h) 'spencers', for the purposes of subheading 0210 19 10: the bacon side without the ham, whether or not boned;

(ij) 'three-quarter sides', for the purposes of subheading 0210 19 20: the bacon side without the fore-end, whether or not boned;

(k) 'middles', for the purposes of subheading 0210 19 20: the bacon side without the ham and the fore-end, whether or not boned.

The subheading also includes cuts of middles containing tissue of loin and belly in natural proportion to the entire middles.

- B. The parts of the cuts defined in paragraph 2(A)(f) fall in the same subheadings, only if they contain rind and subcutaneous fat.

If the cuts falling in subheadings 0210 11 11, 0210 11 19, 0210 11 31, 0210 11 39, 0210 19 30 and 0210 19 60 are derived from a bacon side from which the bones indicated under paragraph 2(A)(g) have already been removed, the lines of cutting must follow those defined under paragraph 2(A)(b), (c) and (d) accordingly; in any case, these cuts or parts thereof must contain bones.

- C. Subheadings 0206 49 00 and 0210 99 49, include, in particular, heads or halves of heads of domestic swine, with or without the brains, cheeks or tongues, and parts thereof.

The head is separated from the rest of the half-carcase as follows:

- by a straight cut parallel to the cranium; or
- by a cut parallel to the cranium up to the level of the eyes and then inclined to the front of the head, thereby causing the chaps to remain attached to the half-carcase.

The cheeks, snouts and ears as well as the meat attached to the head, particularly to the rear part, are considered parts of heads. However, the cuts of boneless meat of the fore-end, presented alone (jowls, chaps, or chaps and jowls together), fall in subheading 0203 19 55, 0203 29 55, 0210 19 50 or 0210 19 81, as the case may be.

- D. For the purposes of subheadings 0209 10 11 and 0209 10 19, 'subcutaneous pig fat' has the meaning of the fatty tissue which accumulates under the rind of the pig and adheres to it, irrespective of the part of the pig from which it comes; in any case, the weight of the fatty tissue must exceed the weight of the rind.

These subheadings also include subcutaneous pig fat from which the rind has been removed.

- E. For the purposes of subheadings 0210 11 31, 0210 11 39, 0210 12 19 and 0210 19 60 to 0210 19 89, products in which the water/protein ratio in the meat (nitrogen content  $\times$  6,25) is 2,8 or less is considered as 'dried or smoked'. The nitrogen content is determined in accordance with ISO method 937-1978.

3. A. For the purposes of heading 0204, the following expressions have the meanings hereby assigned to them:

- (a) 'carcasses', for the purposes of subheadings 0204 10, 0204 21, 0204 30, 0204 41, 0204 50 11 and 0204 50 51: whole carcases of the slaughtered animals after having been bled, eviscerated and skinned, imported with or without the heads, with or without the feet and with or without the other offals attached. Where carcasses are imported without the heads, the latter must have been separated from the carcase at the atlanto-occipital joint. When imported without the feet, the latter must have been cut off at the carpo-metacarpal or tarsometatarsal joints;
- (b) 'half-carcasses', for the purposes of subheadings 0204 10, 0204 21, 0204 30, 0204 41, 0204 50 11 and 0204 50 51: the product resulting from the symmetrical division of the whole carcase through the centre of each cervical, dorsal, lumbar and sacral vertebra and through the centre of the sternum and of the ischio-pubic symphysis;
- (c) 'short-forequarters', for the purposes of subheadings 0204 22 10, 0204 42 10, 0204 50 13 and 0204 50 53: the anterior part of the carcase, with or without the breast, including all the bones and the shoulders, scrag and middle neck, cut at right angles to the backbone, with a minimum of five and a maximum of seven pairs of whole or cut ribs;
- (d) 'short-forequarters', for the purposes of subheadings 0204 22 10, 0204 42 10, 0204 50 13 and 0204 50 53: the anterior part of the half-carcase, with or without the breast, including all the bones and the shoulder, scrag and middle neck, cut at right angles to the backbone, with a minimum of five and a maximum of seven whole or cut ribs;
- (e) 'chines and/or best ends', for the purposes of subheadings 0204 22 30, 0204 42 30, 0204 50 15 and 0204 50 55: the remaining part of the carcase after the legs and short-forequarters have been removed, with or without the kidneys; the chines, when separated from the best ends, must include a minimum of five lumbar vertebrae; the best ends, when separated from the chines, must include a minimum of five pairs of whole or cut ribs;
- (f) 'chine and/or best end', for the purposes of subheadings 0204 22 30, 0204 42 30, 0204 50 15 and 0204 50 55: the remaining part of the half-carcase after the legs and short-forequarters have been removed, with or without the kidney; the chine, when separated from the best end, must include a minimum of five lumbar vertebrae; the best end, when separated from the chine, must include a minimum of five whole or cut ribs;

(g) 'legs', for the purposes of subheadings 0204 22 50, 0204 42 50, 0204 50 19 and 0204 50 59: the rear part of the carcase, comprising all the bones and the legs and cut at right angles to the backbone at the sixth lumbar vertebra just under the ilium or at the fourth sacral vertebra through the ilium anterior to the ischio-pubic symphysis;

(h) 'legs', for the purposes of subheadings 0204 22 50, 0204 42 50, 0204 50 19 and 0204 50 59: the rear part of the half-carcase comprising all the bones and the leg cut at right angles to the backbone at the sixth lumbar vertebra just under the ilium or at the fourth sacral vertebra through the ilium anterior to the ischio-pubic symphysis.

B. In determining the number of whole or cut ribs referred to in paragraph 3 A, only those attached to the backbone are to be taken into consideration.

4. The following expressions have the meanings hereby assigned to them:

(a) 'poultry cuts, with bone in', for the purposes of subheadings 0207 13 20 to 0207 13 60, 0207 14 20 to 0207 14 60, 0207 26 20 to 0207 26 70, 0207 27 20 to 0207 27 70, 0207 44 21 to 0207 44 61, 0207 45 21 to 0207 45 61, 0207 54 21 to 0207 54 61, 0207 55 21 to 0207 55 61 and 0207 60 21 to 0207 60 61: the cuts specified therein, including all bones.

## CHAPTER 3

## FISH AND CRUSTACEANS, MOLLUSCS AND OTHER AQUATIC INVERTEBRATES

## Notes

1. This chapter does not cover:
  - (a) mammals of heading 0106;
  - (b) meat of mammals of heading 0106 (heading 0208 or 0210);
  - (c) fish (including livers and roes thereof) or crustaceans, molluscs or other aquatic invertebrates, dead and unfit or unsuitable for human consumption by reason of either their species or their condition (Chapter 5); flours, meals or pellets of fish or of crustaceans, molluscs or other aquatic invertebrates, unfit for human consumption (heading 2301); or
  - (d) caviar or caviar substitutes prepared from fish eggs (heading 1604).
2. In this chapter, the term 'pellets' means products which have been agglomerated either directly by compression or by the addition of a small quantity of binder.

## Additional notes

1. For the purposes of subheadings 0305 32 11 and 0305 32 19, cod fillets (*Gadus morhua*, *Gadus ogac*, *Gadus macrocephalus*) having a total salt content by weight of 12 % or more which are fit for human consumption without further industrial processing, are considered to be salted fish.

However, frozen cod fillets which have a total salt content by weight of less than 12 % are to be classified under subheadings 0304 71 10 and 0304 71 90, in so far as the actual and lasting preservation depends essentially upon freezing.

2. For the purposes of the subheadings referred to in the third paragraph, the term 'fillets' includes 'loins', i.e. the strips of meat constituting the upper or lower, right or left, side of a fish insofar as the head, guts, fins (dorsal, anal, caudal, ventral, pectoral) and bones (spinal column or main backbone, ventral or costal bones, branchial bone or stapes, etc.) have been removed.

The classification of such products as fillets is unaffected by cutting them into pieces, provided that these pieces can be identified as having been obtained from fillets.

The provisions of the first two paragraphs apply to the following fish:

- (a) tuna, of the genus *Thunnus*, of subheadings 0304 49 90 and 0304 87 00;
- (b) swordfish (*Xiphias gladius*) of subheadings 0304 45 00 and 0304 84 00;
- (c) marlin, sailfish and spearfish, of the family *Istiophoridae*, of subheadings 0304 49 90 and 0304 89 90;
- (d) oceanic sharks (*Hexanchus griseus*, *Cetorhinus maximus*, *Rhincodon typus*, or of the families *Alopiidae*, *Carcharhinidae*, *Sphyrnidae* and *Isuridae*) of subheadings 0304 49 90 and 0304 89 59.

**CHAPTER 4****DAIRY PRODUCE; BIRDS' EGGS; NATURAL HONEY; EDIBLE PRODUCTS OF ANIMAL ORIGIN, NOT ELSEWHERE SPECIFIED OR INCLUDED****Notes**

1. The expression 'milk' means full-cream milk or partially or completely skimmed milk.
2. For the purposes of heading 0405:
  - (a) the term 'butter' means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80 % or more but not more than 95 % by weight, a maximum milk solids-not-fat content of 2 % by weight and a maximum water content of 16 % by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colours, neutralising salts and cultures of harmless lactic-acid-producing bacteria;
  - (b) the expression 'dairy spreads' means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39 % or more but less than 80 % by weight.
3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 0406 provided that they have the three following characteristics:
  - (a) a milkfat content, by weight of the dry matter, of 5 % or more;
  - (b) a dry matter content, by weight, of at least 70 % but not exceeding 85 %; and
  - (c) they are moulded or capable of being moulded.
4. This chapter does not cover:
  - (a) products obtained from whey, containing by weight more than 95 % lactose, expressed as anhydrous lactose calculated on the dry matter (heading 1702); or
  - (b) albumins (including concentrates of two or more whey proteins, containing by weight more than 80 % whey proteins, calculated on the dry matter) (heading 3502) or globulins (heading 3504).

**Subheading notes**

1. For the purposes of subheading 0404 10, the expression 'modified whey' means products consisting of whey constituents, that is, whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.
2. For the purposes of subheading 0405 10, the term 'butter' does not include dehydrated butter or ghee (subheading 0405 90).

**Additional notes**

1. The duty rate applicable to mixtures falling in headings 0401 to 0406 shall be as follows:
  - (a) in mixtures where one of the components represents at least 90 % by weight, the rate applicable to that component applies;
  - (b) in other mixtures, the rate applicable shall be that of the component which results in the highest amount of import duty.

## CHAPTER 8

## EDIBLE FRUIT AND NUTS; PEEL OF CITRUS FRUIT OR MELONS

## Notes

1. This chapter does not cover inedible nuts or fruits.
2. Chilled fruits and nuts are to be classified in the same headings as the corresponding fresh fruits and nuts.
3. Dried fruit or dried nuts of this chapter may be partially rehydrated, or treated for the following purposes:
  - (a) for additional preservation or stabilisation (for example, by moderate heat treatment, sulphuring, the addition of sorbic acid or potassium sorbate),
  - (b) to improve or maintain their appearance (for example, by the addition of vegetable oil or small quantities of glucose syrup), provided that they retain the character of dried fruit or dried nuts.

## Additional notes

1. The content of various sugars expressed as sucrose (sugar content) of the products classified in this chapter corresponds to the figure indicated by a refractometer (used in accordance with the method prescribed in the Annex to Commission Implementing Regulation (EU) No 974/2014 (\*)) at a temperature of 20 °C and multiplied by the factor 0,95.
2. For the purposes of subheadings 0811 90 11, 0811 90 31 and 0811 90 85, 'tropical fruit' means guavas, mangoes, mangosteens, papaws (papayas), tamarinds, cashew apples, lychees, jackfruit, sapodilla plums, passion fruit, carambola and pitahaya.
3. For the purposes of subheadings 0811 90 11, 0811 90 31, 0811 90 85, 0812 90 70 and 0813 50 31, 'tropical nuts' means coconuts, cashew nuts, Brazil nuts, areca (or betel), cola and macadamia nuts.

## CHAPTER 9

## COFFEE, TEA, MATÉ AND SPICES

## Notes

1. Mixtures of the products of headings 0904 to 0910 are to be classified as follows:
  - (a) mixtures of two or more of the products of the same heading are to be classified in that heading;
  - (b) mixtures of two or more of the products of different headings are to be classified in heading 0910.

The addition of other substances to the products of headings 0904 to 0910 (or to the mixtures referred to in paragraph (a) or (b) above) shall not affect their classification, provided that the resulting mixtures retain the essential character of the goods of those headings. Otherwise, such mixtures are not classified in this chapter; those constituting mixed condiments or mixed seasonings are classified in heading 2103.

2. This chapter does not cover cubeb pepper (*Piper cubeba*) or other products of heading 1211.

## Additional note

1. *The rate of duty applicable to mixtures referred to in note 1(a) shall be the one applicable to the component having the highest duty rate.*

**CHAPTER 10****CEREALS****Notes**

1. (A) The products specified in the headings of this chapter are to be classified in those headings only if grains are present, whether or not in the ear or on the stalk.
- (B) The chapter does not cover grains which have been hulled or otherwise worked. However, rice, husked, milled, polished, glazed, parboiled or broken, remains classified in heading 1006.
2. Heading 1005 does not cover sweetcorn (Chapter 7).

**Subheading note**

1. The term 'durum wheat' means wheat of the species *Triticum durum* and the hybrids derived from the inter-specific crossing of *Triticum durum* which have the same number (28) of chromosomes as that species.

**Additional notes**

1. The following terms have the meanings hereunder assigned to them:
  - (a) 'round grain rice' (subheadings 1006 10 21, 1006 10 92, 1006 20 11, 1006 20 92, 1006 30 21, 1006 30 42, 1006 30 61 and 1006 30 92): rice, the grains of which are of a length not exceeding 5,2 mm and of a length/width ratio of less than 2;
  - (b) 'medium grain rice' (subheadings 1006 10 23, 1006 10 94, 1006 20 13, 1006 20 94, 1006 30 23, 1006 30 44, 1006 30 63 and 1006 30 94): rice, the grains of which are of a length exceeding 5,2 mm but not exceeding 6,0 mm and of a length/width ratio of less than 3;
  - (c) 'long grain rice' (subheadings 1006 10 25, 1006 10 27, 1006 10 96, 1006 10 98, 1006 20 15, 1006 20 17, 1006 20 96, 1006 20 98, 1006 30 25, 1006 30 27, 1006 30 46, 1006 30 48, 1006 30 65, 1006 30 67, 1006 30 96 and 1006 30 98): rice, the grains of which are of a length exceeding 6,0 mm;
  - (d) 'paddy rice' (subheadings 1006 10 21, 1006 10 23, 1006 10 25, 1006 10 27, 1006 10 92, 1006 10 94, 1006 10 96 and 1006 10 98): rice which has retained its husk after threshing;
  - (e) 'husked rice' (subheadings 1006 20 11, 1006 20 13, 1006 20 15, 1006 20 17, 1006 20 92, 1006 20 94, 1006 20 96 and 1006 20 98): rice from which only the husk has been removed.   - (h) 'broken rice' (subheading 1006 40): grain fragments, the length of which does not exceed three-quarters of the average length of the whole grain.
2. The duty-rate applicable to mixtures of this chapter is as follows:
  - (a) in mixtures where one of the components represents at least 90 % by weight, the rate applicable to that component applies;
  - (b) in other mixtures, the rate applicable is that of the component which results in the highest amount of import duty.

## CHAPTER 11

**PRODUCTS OF THE MILLING INDUSTRY; MALT; STARCHES; INULIN; WHEAT GLUTEN****Notes**

1. This chapter does not cover:
    - (a) roasted malt put up as coffee substitutes (heading 0901 or 2101);
    - (b) prepared flours, groats, meals or starches of heading 1901;
    - (c) corn flakes and other products of heading 1904;
    - (d) vegetables, prepared or preserved, of heading 2001, 2004 or 2005;
    - (e) pharmaceutical products (Chapter 30); or
    - (f) starches having the character of perfumery, cosmetic or toilet preparations (Chapter 33).
  2. (A) Products from the milling of the cereals listed in the table below fall in this chapter if they have, by weight on the dry product:
    - (a) a starch content (determined by the modified Ewers polarimetric method) exceeding that indicated in column 2; and
    - (b) an ash content (after deduction of any added minerals) not exceeding that indicated in column 3.

Otherwise, they fall in heading 2302. However, germ of cereals, whole, rolled, flaked or ground, is always classified in heading 1104.
  - (B) Products falling in this chapter under the above provisions shall be classified in heading 1101 or 1102 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in column 4 or 5 is not less, by weight, than that shown against the cereal concerned.
- Otherwise, they fall in heading 1103 or 1104.

Cereal (1)	Starch content (2)	Ash content (3)	Rate of passage through a sieve with an aperture of	
			315 micrometres (microns) (4)	500 micrometres (microns) (5)
Wheat and rye	45 %	2,5 %	80 %	—
Barley	45 %	3 %	80 %	—
Oats	45 %	5 %	80 %	—
Maize (corn) and grain sorghum	45 %	2 %	—	90 %
Rice	45 %	1,6 %	80 %	—
Buckwheat	45 %	4 %	80 %	—
Other cereals	45 %	2 %	50 %	—

3. For the purposes of heading 1103, the terms 'groats' and 'meal' mean products obtained by the fragmentation of cereal grains, of which:
  - (a) in the case of maize (corn) products, at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 2 mm;
  - (b) in the case of other cereal products, at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 1,25 mm.

## Additional notes

1. The duty-rate applicable to mixtures of this chapter shall be as follows:
  - (a) in mixtures where one of the components represents at least 90 % by weight, the rate applicable to that component applies;
  - (b) in other mixtures, the rate applicable shall be that of the component which results in the highest amount of import duty.
2. For the purposes of heading 1106, the terms 'flour', 'meal' and 'powder' mean products (other than shredded desiccated coconut), obtained by milling or some other fragmentation process from dried leguminous vegetables of heading 0713, from sago or roots or tubers of heading 0714 or from products of Chapter 8, of which:
  - (a) in the case of dried leguminous vegetables, sago, roots, tubers and products of Chapter 8 (excluding nuts of headings 0801 and 0802), at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 2 mm;
  - (b) in the case of nuts of headings 0801 and 0802, at least 50 % by weight passes through a woven metal wire cloth sieve with an aperture of 2,5 mm.

  - (a) *fixed vegetable oils, fluid or solid, obtained by pressure, are to be considered as 'crude' if they have undergone no other processing than:*
    - decantation within the normal time limits,
    - centrifugation or filtration, provided that, in order to separate the oils from their solid constituents, only mechanical force, such as gravity, pressure or centrifugal force, has been employed (excluding any adsorption filtering process or any other physical or chemical process);
  - (b) *fixed vegetable oils, fluid or solid, obtained by extraction are to continue to be considered as 'crude' when they cannot be distinguished, by their colour, odour or taste, nor by recognised special analytical properties, from vegetable oils and fats obtained by pressure;*
  - (c) *the expression 'crude oils' is to be taken to extend to degummed soya-bean oil and to cotton-seed oil from which the gossypol has been removed.*

2. A. Headings 1509 and 1510 cover only oils derived solely from the treatment of olives, the analytical characteristics of whose fatty acid content — determined using the methods set out in Annexes V, X-A and X-B to Commission Regulation (EEC) No 2568/91 — and sterol content are as follows:

## SECTION IV

### PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

#### Note

1. In this section, the term 'pellets' means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 % by weight.

## CHAPTER 16

### PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES

#### Notes

1. This chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or heading 0504.
2. Food preparations fall in this chapter provided that they contain more than 20 % by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading 1902 or to the preparations of heading 2103 or 2104.

*For preparations containing liver, the provisions of the second sentence shall not apply in determining the subheadings within heading 1601 or 1602.*

#### Subheading notes

1. For the purposes of subheading 1602 10, the expression 'homogenised preparations' means preparations of meat, meat offal or blood, finely homogenised, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition, no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading 1602.
2. The fish, crustaceans, molluscs and other aquatic invertebrates specified in the subheadings of heading 1604 or 1605 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

#### Additional notes

1. For the purposes of subheadings 1602 31 11, 1602 32 11, 1602 39 21, 1602 50 10 and 1602 90 61, the term 'uncooked' is to apply to products which have not been subjected to any heat treatment or which have been subjected to a heat treatment insufficient to ensure the coagulation of meat proteins in the whole of the product and which, therefore, in the case of subheadings 1602 50 10 and 1602 90 61, show traces of a pinkish liquid on the cut surface when the product is cut along a line passing through its thickest part.
2. For the purposes of subheadings 1602 41 10, 1602 42 10 and 1602 49 11 to 1602 49 15, the expression 'cuts thereof' applies only to prepared or preserved meat which, due to the size and the characteristics of the coherent muscle tissue, is identifiable as having been obtained from hams, shoulders, loins, or collars of domestic swine, as the case may be.

(<sup>2</sup>) Entry under this subheading is subject to the conditions laid down in the relevant provisions of the European Union (see Articles 291 to 300 of Commission Regulation (EEC) No 2454/93 (OJ L 253, 11.10.1993, p. 1)).

**CHAPTER 17****SUGARS AND SUGAR CONFECTIONERY****Note**

1. This chapter does not cover:
  - (a) sugar confectionery containing cocoa (heading 1806);
  - (b) chemically pure sugars (other than sucrose, lactose, maltose, glucose and fructose) or other products of heading 2940; or
  - (c) medicaments or other products of Chapter 30.

**Subheading notes**

1. For the purposes of subheadings 1701 12, 1701 13 and 1701 14, 'raw sugar' means sugar whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of less than 99,5°.
2. Subheading 1701 13 covers only cane sugar obtained without centrifugation, whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of 69° or more but less than 93°. The product contains only natural anhedral microcrystals, of irregular shape, not visible to the naked eye, which are surrounded by residues of molasses and other constituents of sugar cane.

**Additional notes**

1. For the purposes of subheadings 1701 12 10, 1701 12 90, 1701 13 10, 1701 13 90, 1701 14 10 and 1701 14 90, 'raw sugar' means sugar, not flavoured or coloured or containing any other added substances, containing, in the dry state, less than 99,5 % by weight of sucrose determined by the polarimetric method.
2. The duty applicable to raw sugar of subheadings 1701 12 10, 1701 13 10 and 1701 14 10 whose yield established according to part B(III) of Annex III to Regulation (EU) No 1308/2013 of the European Parliament and of the Council (OJ L 347, 20.12.2013, p. 671) differs from 92 % is fixed in the following manner:  
the relevant rate is multiplied by a correcting coefficient obtained by dividing the percentage yield established according to the above provisions by 92.
3. For the purposes of subheading 1701 99 10, 'white sugar' means sugar, not flavoured or coloured or containing any other added substances, containing, in the dry state, 99,5 % or more by weight of sucrose, determined by the polarimetric method.
4. For the purposes of establishing the duty applicable to products of subheadings 1702 20 10, 1702 60 80, 1702 60 95, 1702 90 71, 1702 90 80 and 1702 90 95, the sucrose content, including other sugars expressed as sucrose, is determined by the methods laid down in Article 42(2) and (4) of Commission Regulation (EC) No 951/2006.
5. For the purposes of subheadings 1702 30 10, 1702 40 10, 1702 60 10 and 1702 90 30, 'isoglucose' means the product obtained from glucose or its polymers with a content by weight in the dry state of at least 10 % fructose.

For the purposes of establishing the duty applicable to products of the subheadings referred to in the preceding paragraph, the dry matter content is determined according to Article 42(3) of Commission Regulation (EC) No 951/2006.

6. 'Inulin syrup' means:
  - (a) for the purposes of subheading 1702 60 80, the immediate product obtained by hydrolysis of inulin or oligofructoses, containing in the dry state more than 50 % fructose in free form or as sucrose;
  - (b) for the purposes of subheading 1702 90 80, the immediate product obtained by hydrolysis of inulin or oligofructoses, containing in the dry state at least 10 % but not more than 50 % of fructose in free form or as sucrose.
7. When imported in the form of an assortment, goods of subheading 1704 90 are subject to an agricultural component (EA) fixed according to the average content in milkfats, milk proteins, sucrose, isoglucose, glucose and starch of the assortment as a whole.
8. Throughout the nomenclature, mixtures of sugar with small amounts of other substances are classified in Chapter 17, unless they have the character of a preparation classified elsewhere.

**Additional notes**

1. For the purposes of heading 2001, vegetables, fruit, nuts and other edible parts of plants prepared or preserved by vinegar or acetic acid must have a content of free, volatile acid of 0,5 % by weight or more, expressed as acetic acid. In addition, mushrooms of subheading 2001 90 50 should not have a salt content exceeding 2,5 % by weight.
2. (a) The content of various sugars expressed as sucrose (sugar content) of the products classified in this chapter corresponds to the figure indicated by a refractometer (used in accordance with the method prescribed in the Annex to Implementing Regulation (EU) No 974/2014) at a temperature of 20 °C and multiplied by one of the following factors:
  - 0,93 in respect of products of subheadings 2008 20 to 2008 80, 2008 93, 2008 97 and 2008 99,
  - 0,95 in respect of products of the other headings.

- (b) The expression 'Brix value', mentioned in the subheadings of heading 2009, corresponds to the figure indicated by a refractometer (used in accordance with the method prescribed in the Annex to Implementing Regulation (EU) No 974/2014) at a temperature of 20 °C.
3. The products of subheadings 2008 20 to 2008 80, 2008 93, 2008 97 and 2008 99 are to be considered as containing added sugar when the 'sugar content' thereof exceeds by weight the percentages given hereunder, according to the kind of fruit or edible part of plant concerned:
- pineapples and grapes: 13 %,
  - other fruits, including mixtures of fruit, and other edible parts of plants: 9 %.
4. For the purposes of subheadings 2008 30 11 to 2008 30 39, 2008 40 11 to 2008 40 39, 2008 50 11 to 2008 50 59, 2008 60 11 to 2008 60 39, 2008 70 11 to 2008 70 59, 2008 80 11 to 2008 80 39, 2008 93 11 to 2008 93 29, 2008 97 12 to 2008 97 38 and 2008 99 11 to 2008 99 40, the following expressions have the meanings hereby assigned to them:
- 'actual alcoholic strength by mass': the number of kilograms of pure alcohol contained in 100 kg of the product,
  - '% mas': the symbol for alcoholic strength by mass.
5. The following is to be applied to the products as they are presented:
- (a) the added sugar content of products of heading 2009 corresponds to the 'sugar content' less the figures given hereunder, according to the kind of juice concerned:
- lemon or tomato juice: 3,
  - grape juice: 15,
  - other fruit or vegetable juices, including mixtures of juices: 13.
- (b) the fruit juices with added sugar, of a Brix value not exceeding 67 and containing less than 50 % by weight of fruit juice lose their original character of fruit juices of heading 2009.
- Item (b) does not apply to concentrated natural fruit juices. Consequently, concentrated natural fruit juices are not excluded from heading 2009.
6. For the purposes of subheadings 2009 69 51 and 2009 69 71, 'concentrated grape juice (including grape must)' means grape juice (including grape must) for which the figure indicated by a refractometer (used in accordance with the method prescribed in the Annex to Implementing Regulation (EU) No 974/2014) at a temperature of 20 °C is not less than 50,9 %.
7. For the purposes of subheadings 2001 90 92, 2006 00 35, 2006 00 91, 2007 10 91, 2007 99 93, 2008 97 03, 2008 97 05, 2008 97 12, 2008 97 16, 2008 97 32, 2008 97 36, 2008 97 51, 2008 97 72, 2008 97 76, 2008 97 92, 2008 97 94, 2008 97 97, 2008 99 24, 2008 99 31, 2008 99 36, 2008 99 38, 2008 99 48, 2008 99 63, 2009 89 34, 2009 89 36, 2009 89 73, 2009 89 85, 2009 89 88, 2009 89 97, 2009 90 92, 2009 90 95 and 2009 90 97, 'tropical fruit' means guavas, mangoes, mangosteens, papaws (papayas), tamarinds, cashew apples, lychees, jackfruit, sapodillo plums, passion fruit, carambola and pitahaya.

## CHAPTER 21

## MISCELLANEOUS EDIBLE PREPARATIONS

## Notes

1. This chapter does not cover:
  - (a) mixed vegetables of heading 0712;
  - (b) roasted coffee substitutes containing coffee in any proportion (heading 0901);
  - (c) flavoured tea (heading 0902);
  - (d) spices or other products of headings 0904 to 0910;
  - (e) food preparations, other than the products described in heading 2103 or 2104, containing more than 20 % by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof (Chapter 16);
  - (f) yeast put up as a medicament or other products of heading 3003 or 3004; or
  - (g) prepared enzymes of heading 3507.
2. Extracts of the substitutes referred to in note 1(b) are to be classified in heading 2101.
3. For the purposes of heading 2104, the expression 'homogenised composite food preparations' means preparations consisting of a finely homogenised mixture of two or more basic ingredients such as meat, fish, vegetables, fruit or nuts, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition, no account is to be taken of small quantities of any ingredients which may be added to the mixture for seasoning, preservation or other purposes. Such preparations may contain a small quantity of visible pieces of ingredients.

## Additional notes

1. For the purposes of subheadings 2106 10 20 and 2106 90 92, the term 'starch' also covers starch breakdown products.
2. For the purposes of subheading 2106 90 20, 'compound alcoholic preparations, other than those based on odiferous substances, of a kind used for the manufacture of beverages' means those preparations having an alcoholic strength by volume of more than 0,5 % vol.
3. For the purposes of subheading 2106 90 30, 'isoglucose' means the product obtained from glucose or its polymers with a content by weight in the dry state of at least 10 % fructose.

For the purposes of establishing the duty applicable to products of subheading 2106 90 30, the dry matter content is determined according to Article 42(3) of Regulation (EC) No 951/2006.

4. For the purposes of establishing the duty applicable to products of subheading 2106 90 59, the sucrose content, including other sugars expressed as sucrose, is determined by the method laid down in Article 42(2) of Regulation (EC) No 951/2006.
5. Other food preparations presented in measured doses, such as capsules, tablets, pastilles and pills, and which are intended for use as food supplements are to be classified under heading 2106, unless elsewhere specified or included.
6. Preparations with a basis of coffee, tea or maté or extracts, essences or concentrates thereof, with a sugar content of 97 % or more by weight, calculated on the dry matter, are excluded from classification under heading 2101 and are, in principle, to be classified in Chapter 17. The character of such products is no longer deemed to be determined by the coffee, tea or maté or extracts, essences or concentrates thereof.

## CHAPTER 22

## BEVERAGES, SPIRITS AND VINEGAR

**Notes**

1. This chapter does not cover:
  - (a) products of this chapter (other than those of heading 2209) prepared for culinary purposes and thereby rendered unsuitable for consumption as beverages (generally, heading 2103);
  - (b) sea water (heading 2501);
  - (c) distilled or conductivity water or water of similar purity (heading 2853);
  - (d) acetic acid of a concentration exceeding 10 % by weight of acetic acid (heading 2915);
  - (e) medicaments of heading 3003 or 3004; or
  - (f) perfumery or toilet preparations (Chapter 33).
2. For the purposes of this chapter and of Chapters 20 and 21, the alcoholic strength by volume shall be determined at a temperature of 20 °C.
3. For the purposes of heading 2202, the term ‘non-alcoholic beverages’ means beverages of an alcoholic strength by volume not exceeding 0,5 % vol. Alcoholic beverages are classified in headings 2203 to 2206 or heading 2208 as appropriate.

**Subheading note**

1. For the purposes of subheading 2204 10, the expression ‘sparkling wine’ means wine which, when kept at a temperature of 20 °C in closed containers, has an excess pressure of not less than 3 bar.

**Additional notes**

1. Subheading 2202 10 00 covers waters, including mineral waters and aerated waters, containing added sugar or other sweetening matter or flavoured, providing they are for direct consumption as a beverage.
2. For the purposes of headings 2204 and 2205 and subheading 2206 00 10:
  - (a) ‘actual alcoholic strength by volume’ means the number of volumes of pure alcohol contained at a temperature of 20 °C in 100 volumes of the product at that temperature;
  - (b) ‘potential alcoholic strength by volume’ means the number of volumes of pure alcohol at a temperature of 20 °C capable of being produced by total fermentation of the sugars contained in 100 volumes of the product at that temperature;
  - (c) ‘total alcoholic strength by volume’ means the sum of the actual and potential alcoholic strengths;
  - (d) ‘natural alcoholic strength by volume’ means the total alcoholic strength by volume of a product before any enrichment;
  - (e) ‘% vol’ is the symbol for alcoholic strength by volume.
3. For the purposes of subheading 2204 30 10, ‘grape must in fermentation’ means the product derived from the fermentation of grape must, having an actual alcoholic strength by volume of more than 1 % vol and less than three-fifths of its total alcoholic strength by volume.
4. For the purposes of subheadings 2204 21 and 2204 29:
  - A. ‘total dry extract’ means the content in grams per litre of all the substances in a product which, under given physical conditions, do not volatilise. The total dry extract must be determined with the densimeter at 20 °C;
  - B. (a) the presence in the products of subheadings 2204 21 11 to 2204 21 98 and 2204 29 11 to 2204 29 98 of the quantities of total dry extract per litre indicated in 1, 2, 3 and 4 below does not affect their classification:
    1. products of an actual alcoholic strength by volume of not more than 13 % vol: 90 g or less of total extract per litre;
    2. products of an actual alcoholic strength by volume of more than 13 % vol but not more than 15 % vol: 130 g or less of total dry extract per litre;

3. products of an actual alcoholic strength by volume of more than 15 % vol but not more than 18 % vol: 130 g or less of total dry extract per litre;
4. products of an actual alcoholic strength by volume of more than 18 % vol but not more than 22 % vol: 330 g or less of total dry extract per litre.

Products with a total dry extract exceeding the maximum quantity shown above in each category are to be classified in the next following category, except that if the total dry extract exceeds 330 g/l the products are to be classified in subheadings 2204 21 98 and 2204 29 98;

(b) the above rules do not apply to products of subheadings 2204 21 23 and 2204 29 11.

5. Subheadings 2204 21 11 to 2204 21 98 and 2204 29 11 to 2204 29 98 shall be taken to include:

- (a) grape must with fermentation arrested by the addition of alcohol, that is to say, a product:
  - having an actual alcoholic strength by volume of not less than 12 % vol but less than 15 % vol, and
  - obtained by the addition to unfermented grape must having a natural alcoholic strength by volume of not less than 8,5 % vol of a product derived from the distillation of wine;
- (b) wine fortified for distillation, that is to say, a product:
  - having an actual alcoholic strength by volume of not less than 18 % vol but not more than 24 % vol,
  - obtained exclusively by the addition to wine containing no residual sugar of an unrectified product derived from the distillation of wine and having a maximum actual alcoholic strength by volume of 86 % vol, and
  - having a maximum volatile acidity of 1,5 g/l, expressed as acetic acid;
- (c) liqueur wine, that is to say, a product:
  - having a total alcoholic strength by volume of not less than 17,5 % vol and an actual alcoholic strength by volume of not less than 15 % vol but not more than 22 % vol, and
  - obtained from grape must or wine, which must come from vine varieties approved in the third country of origin for the production of liqueur wine and have a minimum natural alcoholic strength by volume of 12 % vol,
    - by freezing, or
    - by the addition during or after fermentation:
      - of a product derived from the distillation of wine, or
      - of concentrated grape must or, in the case of certain liqueur wines with a designation of origin or with a geographical indication appearing on the list set out in Regulation (EC) No 607/2009 (OJ L 193, 24.7.2009, p. 60) and for which such practice is traditional, of grape must concentrated by direct heat, which, apart from this operation, corresponds to the definition of concentrated grape must, or
      - of a mixture of these products.

However, certain liqueur wines with a designation of origin or with a geographical indication appearing on the list set out in Regulation (EC) No 607/2009 (OJ L 193, 24.7.2009, p. 60) may be obtained from unfermented fresh grape must which does not need to have a minimum natural alcoholic strength by volume of 12 % vol.

6. For the purposes of subheadings 2204 10, 2204 21 and 2204 29:

- (a) 'wines with a protected designation of origin (PDO)' and 'wines with a protected geographical indication (PGI)' are wines which comply with the provisions of Articles 93 to 108 of Regulation (EU) No 1308/2013 of the European Parliament and of the Council (OJ L 347, 20.12.2013, p. 671) and the provisions adopted in implementation of the aforesaid Regulation and defined in national regulations;
  - (b) 'varietal wines' are wines which comply with the provisions of Article 120 of Regulation (EU) No 1308/2013 of the European Parliament and of the Council (OJ L 347, 20.12.2013, p. 671) and the provisions adopted in implementation of the aforesaid Regulation and defined in national regulations;
  - (c) 'wines produced in the European Union' are wines which comply with the provisions of Regulation (EU) No 1308/2013 of the European Parliament and of the Council (OJ L 347, 20.12.2013, p. 671) and Article 55 of Commission Regulation (EC) No 607/2009 (OJ L 193, 24.7.2009, p. 60).
7. For the purposes of subheadings 2204 30 92 and 2204 30 96, 'concentrated grape must' means grape must for which the figure indicated by a refractometer (used in accordance with the method prescribed in the 'Compendium of International Methods of Analysis of Wines and Musts' of the International Organisation of Vine and Wine, as published in the 'C' series of the Official Journal) at a temperature of 20 °C is not less than 50,9 %.

8. Only vermouth and other wine of fresh grapes flavoured with plants or aromatic substances having an actual alcoholic strength by volume of not less than 7 % vol shall be regarded as products of heading 2205.
9. For the purposes of subheading 2206 00 10, the expression 'piquette' means the product obtained by the fermentation of untreated grape marc macerated in water or by the extraction of fermented grape marc with water.
10. For the purposes of subheadings 2206 00 31 and 2206 00 39, the following are regarded as 'sparkling':
- fermented beverages in bottles with 'mushroom' stoppers held in place by ties or fastenings,
  - fermented beverages otherwise put up, with an excess pressure of not less than 1,5 bar, measured at a temperature of 20 °C.
11. For the purposes of subheadings 2209 00 11 and 2209 00 19, the expression 'wine vinegar' means vinegar obtained exclusively by acetous fermentation of wine and having a total acidity of not less than 60 g/l, expressed as acetic acid.
12. Subheading 2207 20 covers mixtures of ethyl alcohol used as raw material to produce fuels for motor vehicles, of an alcoholic strength by volume of 50 % or higher and denatured with one or more of the following substances:
- (a) automotive petrol (conforming to EN 228);
  - (b) tert-butyl ethyl ether (ethyl tert-butylether, ETBE);
  - (c) methyl tert-butylether (MTBE);
  - (d) 2-methylpropan-2-ol (tert-butyl alcohol, tertiary butyl alcohol, TBA);
  - (e) 2-methylpropan-1-ol (2-methyl-1-propanol, isobutanol);
  - (f) propan-2-ol (isopropyl alcohol, 2-propanol, isopropanol).

The denaturants referred to in points (e) and (f) of the first paragraph must be used in combination with at least one of the denaturants listed in points (a) to (d) of the first paragraph.

**CHAPTER 23****RESIDUES AND WASTE FROM THE FOOD INDUSTRIES; PREPARED ANIMAL FODDER****Note**

1. Heading 2309 includes products of a kind used in animal feeding, not elsewhere specified or included, obtained by processing vegetable or animal materials to such an extent that they have lost the essential characteristics of the original material, other than vegetable waste, vegetable residues and by-products of such processing.

**Subheading note**

1. For the purposes of subheading 2306 41, the expression 'low erucic acid rape or colza seeds' means seeds as defined in subheading note 1 to Chapter 12.

**Additional notes**

1. Subheadings 2303 10 11 and 2303 10 19 include only residues from the manufacture of starch from maize and do not cover blends of such residues with products derived from other plants or products derived from maize otherwise than in the course of the production of starch by the wet process.

Their starch content may not exceed 28 % by weight on the dry product, in accordance with the method contained in Annex III, part L, to Commission Regulation (EC) No 152/2009, and their fat content cannot exceed 4,5 % by weight on the dry product, determined in accordance with the method contained in Annex III, part H, to Commission Regulation (EC) No 152/2009.

2. Subheading 2306 90 05 includes only residues from the extraction of oil of germs of maize and containing the following ingredients in the quantities specified, calculated by weight on the dry product:

(a) products of an oil content of less than 3 %:

- starch content: less than 45 %,
- protein content (nitrogen content  $\times$  6,25): not less than 11,5 %;

(b) products of an oil content of not less than 3 % and not more than 8 %:

- starch content: less than 45 %,
- protein content (nitrogen content  $\times$  6,25): not less than 13 %.

Moreover, such residues shall not contain ingredients which are not obtained from maize grains.

For the determination of the starch and protein content, the methods set out in Commission Regulation (EC) No 152/2009, Annex III, parts L and C, are to be applied.

For the determination of the oil and moisture content, the methods set out in Commission Regulation (EC) No 152/2009, Annex III, parts H and A, respectively, are to be applied.

Products containing components from parts of maize grains which have been added after processing and have not been subjected to the oil extraction process are excluded.

3. For the purposes of subheadings 2307 00 11, 2307 00 19, 2308 00 11 and 2308 00 19, the following expressions shall have the meanings hereby assigned to them:

- 'actual alcoholic strength by mass': the number of kilograms of pure alcohol contained in 100 kg of the product,
- 'potential alcoholic strength by mass': the number of kilograms of pure alcohol capable of being produced by total fermentation of the sugars contained in 100 kg of the product,
- 'total alcoholic strength by mass': the sum of the actual and potential alcoholic strengths by mass,
- '% mas': the symbol for alcoholic strength by mass.

4. For the purposes of subheadings 2309 10 11 to 2309 10 70 and 2309 90 31 to 2309 90 70, the expression 'milk products' means the products of headings 0401, 0402, 0404, 0405 and 0406 and of subheadings 0403 10 11 to 0403 10 39, 0403 90 11 to 0403 90 69, 1702 11 00, 1702 19 00 and 2106 90 51.

5. Subheading 2309 90 20 includes only residues from the manufacture of starch from maize, and does not cover blends of such residues with products derived from other plants or products derived from maize otherwise than in the course of the production of starch by the wet process, containing:

- screenings from maize used in the wet process in a proportion not exceeding 15 % by weight, and/or
- residues of maize steep-water, from the wet process, including residues of steep-water used for the manufacture of alcohol or of other starch derived products.

These products may also contain residues from the extraction of maize germ oil by the wet milling process.

Their starch content may not exceed 28 % by weight on the dry product in accordance with the method contained in Annex III, part L, to Commission Regulation (EC) No 152/2009, their fat content may not exceed 4,5 % by weight on the dry product determined in accordance with the method contained in Annex III, part H, to Commission Regulation (EC) No 152/2009, and their protein content may not exceed 40 % on the dry product determined in accordance with the method contained in Annex III, part C, to Commission Regulation (EC) No 152/2009.

Except where their context or note 4 to this chapter otherwise requires, the headings of this chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallisation), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading.

The products of this chapter may contain an added anti-dusting agent, provided that such addition does not render the product particularly suitable for specific use rather than for general use.

2. This chapter does not cover:
- (a) sublimed sulphur, precipitated sulphur or colloidal sulphur (heading 2802);
  - (b) earth colours containing 70 % or more by weight of combined iron evaluated as  $\text{Fe}_2\text{O}_3$  (heading 2821);
  - (c) medicaments or other products of Chapter 30;
  - (d) perfumery, cosmetic or toilet preparations (Chapter 33);
  - (e) setts, curbstones or flagstones (heading 6801); mosaic cubes or the like (heading 6802); roofing, facing or damp-course slates (heading 6803);
  - (f) precious or semi-precious stones (heading 7102 or 7103);
  - (g) cultured crystals (other than optical elements) weighing not less than 2,5 g each, of sodium chloride or of magnesium oxide, of heading 3824; optical elements of sodium chloride or of magnesium oxide (heading 9001);
  - (h) billiard chalks (heading 9504); or
  - (ij) writing or drawing chalks or tailors' chalks (heading 9609).
3. Any products classifiable in heading 2517 and any other heading of the chapter are to be classified in heading 2517.
4. Heading 2530 applies, inter alia, to: vermiculite, perlite and chlorites, unexpanded; earth colours, whether or not calcined or mixed together; natural micaceous iron oxides; meerschaum (whether or not in polished pieces); amber; agglomerated meerschaum and agglomerated amber, in plates, rods, sticks or similar forms, not worked after moulding; jet; strontianite (whether or not calcined), other than strontium oxide; broken pieces of pottery, brick or concrete.

**CHAPTER 27****MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES****Notes**

1. This chapter does not cover:
  - (a) separate chemically defined organic compounds, other than pure methane and propane which are to be classified in heading 2711;
  - (b) medicaments of heading 3003 or 3004; or
  - (c) mixed unsaturated hydrocarbons of heading 3301, 3302 or 3805.
2. References in heading 2710 to 'petroleum oils and oils obtained from bituminous minerals' include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents.  
However, the references do not include liquid synthetic polyolefins of which less than 60 % by volume distils at 300 °C, after conversion to 1 013 mbar when a reduced-pressure distillation method is used (Chapter 39).
3. For the purposes of heading 2710, 'waste oils' means waste containing mainly petroleum oils and oils obtained from bituminous minerals (as described in note 2 to this chapter), whether or not mixed with water. These include:
  - (a) such oils no longer fit for use as primary products (for example, used lubricating oils, used hydraulic oils and used transformer oils);
  - (b) sludge oils from the storage tanks of petroleum oils, mainly containing such oils and a high concentration of additives (for example, chemicals) used in the manufacture of the primary products; and
  - (c) such oils in the form of emulsions in water or mixtures with water, such as those resulting from oil spills, storage tank washings, or from the use of cutting oils for machining operations.

**Subheading notes**

1. For the purposes of subheading 2701 11, 'anthracite' means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14 %.
2. For the purposes of subheading 2701 12, 'bituminous coal' means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14 % and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5 833 kcal/kg.
3. For the purposes of subheadings 2707 10, 2707 20, 2707 30 and 2707 40, the terms 'benzol (benzene)', 'toluol (toluene)', 'xylol (xylenes)' and 'naphthalene' apply to products which contain more than 50 % by weight of benzene, toluene, xylenes or naphthalene, respectively.
4. For the purposes of subheading 2710 12, 'light oils and preparations' are those of which 90 % or more by volume (including losses) distil at 210 °C (ASTM D 86 method).
5. For the purposes of the subheadings of heading 2710, the term 'biodiesel' means mono-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used.

**Additional notes (¹)**

1. For the purposes of subheading 2707 99 80, the term 'phenols' applies to products which contain more than 50 % by weight of phenols.
2. For the purposes of heading 2710:
  - (a) 'special spirits' (subheadings 2710 12 21 and 2710 12 25) mean light oils as defined in subheading note 4 to this chapter, not containing any anti-knock preparations, and with a difference of not more than 60 °C between the temperatures at which 5 % and 90 % by volume (including losses) distil;

(¹) Unless otherwise stated, the term 'method' means the latest version of the determination methods laid down by the Comité européen de normalisation (CEN), the International Standardisation Organisation (ISO), or the American Society for Testing and Materials (ASTM).

- (b) 'white spirit' (subheading 2710 12 21) means special spirits as defined in paragraph (a) above with a flash-point higher than 21 °C by the EN ISO 13736 method;
- (c) 'medium oils' (subheadings 2710 19 11 to 2710 19 29) mean oils and preparations of which less than 90 % by volume (including losses) distils at 210 °C and 65 % or more by volume (including losses) distils at 250 °C by the ISO 3405 method (equivalent to the ASTM D 86 method);
- (d) 'heavy oils' (subheadings 2710 19 31 to 2710 19 99 and 2710 20 11 to 2710 20 90) mean oils and preparations of which less than 65 % by volume (including losses) distils at 250 °C by the ISO 3405 method (equivalent to the ASTM D 86 method) or of which the distillation percentage at 250 °C cannot be determined by that method;
- (e) 'gas oils' (subheadings 2710 19 31 to 2710 19 48 and 2710 20 11 to 2710 20 19) mean heavy oils as defined in paragraph (d) above of which 85 % or more by volume (including losses) distils at 350 °C by the ISO 3405 method (equivalent to the ASTM D 86 method);
- (f) 'fuel oils' (subheadings 2710 19 51 to 2710 19 68 and 2710 20 31 to 2710 20 39) mean heavy oils as defined in paragraph (d) above (other than gas oils as defined in paragraph (e)) which, for a corresponding diluted colour C, have a viscosity V:
  - not exceeding that shown in line I of the following table when the sulphated ashes content is less than 1 % by the ISO 3987 method and the saponification number is less than 4<sup>(1)</sup> by the ISO 6293-1 or 6293-2 method,
  - exceeding that shown in line II when the pour point is not less than 10 °C by the ISO 3016 method,
  - exceeding that shown in line I but not exceeding that shown in line II when 25 % or more by volume distils at 300 °C by the ISO 3405 method (equivalent to the ASTM D 86 method) or, if less than 25 % by volume distils at 300 °C, when the pour point is higher than 10 °C below zero by the ISO 3016 method. These provisions apply only to oils having a diluted colour C of less than 2.

#### Diluted colour C/Viscosity V concordance table

	II	7	7	7	7	9	15,1	25,3	42,4	71,1	119	200	335	562	943	1 580	2 650

The term 'viscosity V' means the kinematic viscosity at 50 °C expressed in  $10^{-6} \text{ m}^2 \text{ s}^{-1}$  by the EN ISO 3104 method.

The term 'diluted colour C' means the colour of a product, as determined by the ISO 2049 method (equivalent to the ASTM D 1500 method), after one part of such product has been mixed with 100 parts by volume of xylene, toluene or another suitable solvent. The colour must be determined immediately after dilution.

Subheadings 2710 19 51 to 2710 19 68 and 2710 20 31 to 2710 20 39 cover only fuel oils of natural colour.

These subheadings do not cover heavy oils defined in paragraph (d) above for which it is not possible to determine:

- the distillation percentage (zero shall be deemed to be a percentage) at 250 °C by the ISO 3405 method (equivalent to the ASTM D 86 method),
- the kinematic viscosity at 50 °C by the EN ISO 3104 method,
- or the diluted colour C by the ISO 2049 method (equivalent to the ASTM D 1500 method).

Such products fall in subheadings 2710 19 71 to 2710 19 99 or 2710 20 90;

- (g) 'containing biodiesel' means that the products of subheading 2710 20 have a minimum content of biodiesel, i.e. mono-alkyl esters of fatty acids (FAME) of a kind used as a fuel, of 0,5 % by volume (determination by the EN 14078 method).
- 3. For the purposes of heading 2712, the expression 'crude petroleum jelly' (subheading 2712 10 10) is to be taken to apply to petroleum jelly of a natural colour higher than 4,5 by the ISO 2049 method (equivalent to the ASTM D 1500 method).

<sup>(1)</sup> This does not apply to fuel oils, of subheadings 2710 20 31 to 2710 20 39, which contain fatty-acid mono-alkyl esters (FAME) and which have a saponification index exceeding 4.

4. For the purposes of subheadings 2712 90 31 to 2712 90 39, the term 'crude' is to be taken to apply to products:

- (a) with an oil content of 3,5 or higher by the ISO 2908 method (withdrawn in 2006, with no corresponding EN/ISO method in existence), if their viscosity at 100 °C is lower than  $9 \times 10^{-6} \text{ m}^2 \text{ s}^{-1}$  by the EN ISO 3104 method; or
- (b) of a natural colour higher than 3 by the ISO 2049 method (equivalent to the ASTM D 1500 method), if their viscosity at 100 °C is  $9 \times 10^{-6} \text{ m}^2 \text{ s}^{-1}$  or higher by the EN ISO 3104 method.

5. For the purposes of headings 2710, 2711 and 2712, the term 'specific process' is to be taken to apply to the following operations:

- (a) vacuum distillation;
- (b) redistillation by a very thorough fractionation process;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (ij) isomerisation;
- (k) (in respect of products of subheadings 2710 19 31 to 2710 19 99 only) desulphurisation with hydrogen resulting in a reduction of at least 85 % of the sulphur content of the products processed (EN ISO 20846, EN ISO 20884 or EN ISO 14596 or EN ISO 24260, EN ISO 20847 and EN ISO 8754 methods);
- (l) (in respect of products of heading 2710 only) deparaffining by a process other than filtering;
- (m) (in respect of products of subheadings 2710 19 31 to 2710 19 99 only) treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of subheadings 2710 19 71 to 2710 19 99 (for example, hydrofinishing or decolorisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (n) (in respect of products of subheadings 2710 19 51 to 2710 19 68 only) atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C by the ISO 3405 method (equivalent to the ASTM D 86 method). If 30 % or more by volume, including losses, of such products distils at 300 °C by the ISO 3405 method (equivalent to the ASTM D 86 method), the quantities of products which may be obtained during the atmospheric distillation and which fall in subheadings 2710 12 11 to 2710 12 90 or 2710 19 11 to 2710 19 29 shall be dutiable at the same rates as those provided for under subheadings 2710 19 62 to 2710 19 68 according to the kind and value of the products used and on the net weight of the products obtained. This rule shall not apply to products so obtained which, within a period of six months and subject to such other conditions as may be determined by the competent authorities, are to undergo a specific process or chemical transformation by a process not being a specific process;
- (o) (in respect of products of subheadings 2710 19 71 to 2710 19 99 only) treatment by means of a high-frequency electrical brush-discharge;
- (p) solely for products of subheading 2712 90 31: de-oiling by fractional crystallisation.

Should any preparatory treatment prior to the above treatments be necessary by reason of technical requirements, the customs exemption is to apply only to the quantities of the products intended for and actually subjected to such of the above treatments; any waste products arising during preparatory treatment are also to be exempt from customs duty.

6. The quantities of products which may be obtained during chemical transformation, or during preparatory treatment which may be necessary by reason of technical requirements, and which fall in headings or subheadings 2707 10 00, 2707 20 00, 2707 30 00, 2707 50 00, 2710, 2711, 2712 10, 2712 20, 2712 90 31 to 2712 90 99 and 2713 90 are to be dutiable at the same rates as those provided for in respect of products 'for other purposes', according to the kind and value of the products used and on the net weight of the products obtained. This rule is not to apply to such products of headings 2710 to 2712 which, within a period of six months and subject to such other conditions as may be determined by the competent authorities, are to undergo a specific process or further chemical transformation.

## SECTION VI

## PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES

## Notes

1. (A) Goods (other than radioactive ores) answering to a description in heading 2844 or 2845 are to be classified in those headings and in no other heading of the nomenclature.
- (B) Subject to paragraph (A) above, goods answering to a description in heading 2843, 2846 or 2852 are to be classified in those headings and in no other heading of this section.
2. Subject to note 1 above, goods classifiable in heading 3004, 3005, 3006, 3212, 3303, 3304, 3305, 3306, 3307, 3506, 3707 or 3808 by reason of being put up in measured doses or for retail sale are to be classified in those headings and in no other heading of the nomenclature.
3. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
  - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
  - (b) presented together; and
  - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

## CHAPTER 28

## INORGANIC CHEMICALS; ORGANIC OR INORGANIC COMPOUNDS OF PRECIOUS METALS, OF RARE-EARTH METALS, OF RADIOACTIVE ELEMENTS OR OF ISOTOPES

## Notes

1. Except where the context otherwise requires, the headings of this chapter apply only to:
  - (a) separate chemical elements and separate chemically defined compounds, whether or not containing impurities;
  - (b) the products mentioned in (a) above dissolved in water;
  - (c) the products mentioned in (a) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
  - (d) the products mentioned in (a), (b) or (c) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
  - (e) the products mentioned in (a), (b), (c) or (d) above with an added anti-dusting agent or a colouring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.
2. In addition to dithionites and sulphoxylates, stabilised with organic substances (heading 2831), carbonates and peroxocarbonates of inorganic bases (heading 2836), cyanides, cyanide oxides and complex cyanides of inorganic bases (heading 2837), fulminates, cyanates and thiocyanates, of inorganic bases (heading 2842), organic products included in headings 2843 to 2846 and 2852 and carbides (heading 2849), only the following compounds of carbon are to be classified in this chapter:
  - (a) oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanic and other simple or complex cyanogen acids (heading 2811);
  - (b) halide oxides of carbon (heading 2812);
  - (c) carbon disulphide (heading 2813);
  - (d) thiocarbonates, selenocarbonates, tellurocarbonates, selenocyanates, tellurocyanates, tetrathiocyanatodiamminochromates (reineckates) and other complex cyanates, of inorganic bases (heading 2842);

- (e) hydrogen peroxide, solidified with urea (heading 2847), carbon oxysulphide, thiocarbonyl halides, cyanogen, cyanogen halides and cyanamide and its metal derivatives (heading 2853) other than calcium cyanamide, whether or not pure (Chapter 31).
3. Subject to the provisions of note 1 to Section VI, this chapter does not cover:
- sodium chloride or magnesium oxide, whether or not pure, or other products of Section V;
  - organo-inorganic compounds other than those mentioned in note 2 above;
  - products mentioned in note 2, 3, 4 or 5 to Chapter 31;
  - inorganic products of a kind used as luminophores, of heading 3206; glass frit and other glass in the form of powder, granules or flakes, of heading 3207;
  - artificial graphite (heading 3801); products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 3813; ink removers put up in packings for retail sale, of heading 3824; cultured crystals (other than optical elements) weighing not less than 2,5 g each, of the halides of the alkali or alkaline-earth metals, of heading 3824;
  - precious or semi-precious stones (natural, synthetic or reconstructed) or dust or powder of such stones (headings 7102 to 7105), or precious metals or precious-metal alloys of Chapter 71;
  - the metals, whether or not pure, metal alloys or cermets, including sintered metal carbides (metal carbides sintered with a metal), of Section XV; or
  - optical elements, for example, of the halides of the alkali or alkaline-earth metals (heading 9001).
4. Chemically defined complex acids consisting of a non-metal acid of sub-chapter II and a metal acid of sub-chapter IV are to be classified in heading 2811.
5. Headings 2826 to 2842 apply only to metal or ammonium salts or peroxy salts.
- Except where the context otherwise requires, double or complex salts are to be classified in heading 2842.
6. Heading 2844 applies only to:
- technetium (atomic No 43), promethium (atomic No 61), polonium (atomic No 84) and all elements with an atomic number greater than 84;
  - natural or artificial radioactive isotopes (including those of the precious metals or of the base metals of Sections XIV and XV), whether or not mixed together;
  - compounds, inorganic or organic, of these elements or isotopes, whether or not chemically defined, whether or not mixed together;
  - alloys, dispersions (including cermets), ceramic products and mixtures containing these elements or isotopes or inorganic or organic compounds thereof and having a specific radioactivity exceeding 74 Bq/g (0,002 µCi/g);
  - spent (irradiated) fuel elements (cartridges) of nuclear reactors;
  - radioactive residues whether or not usable.
- The term 'isotopes', for the purposes of this note and of the wording of headings 2844 and 2845, refers to:
- individual nuclides, excluding, however, those existing in nature in the monoisotopic state,
  - mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.
7. Heading 2848 includes copper phosphide (phosphor copper) containing more than 15 % by weight of phosphorus.
8. Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified in this chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut in the form of discs, wafers or similar forms, they fall in heading 3818.

**Subheading note**

1. For the purposes of subheading 2852 10, the expression 'chemically defined' means all organic or inorganic compounds of mercury meeting the requirements of paragraphs (a) to (e) of note 1 to Chapter 28 or paragraphs (a) to (h) of note 1 to Chapter 29.

**Additional note**

1. Unless provided otherwise, the salts specified in subheadings include acid salts and basic salts.

**CHAPTER 29****ORGANIC CHEMICALS****Notes**

1. Except where the context otherwise requires, the headings of this chapter apply only to:
  - (a) separate chemically defined organic compounds, whether or not containing impurities;
  - (b) mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);
  - (c) the products of headings 2936 to 2939 or the sugar ethers, sugar acetals and sugar esters, and their salts, of heading 2940, or the products of heading 2941, whether or not chemically defined;
  - (d) the products mentioned in (a), (b) or (c) above dissolved in water;
  - (e) the products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for a specific use rather than for general use;
  - (f) the products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
  - (g) the products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for a specific use rather than for general use;
  - (h) the following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotizable amines and their salts.
2. This chapter does not cover:
  - (a) goods of heading 1504 or crude glycerol of heading 1520;
  - (b) ethyl alcohol (heading 2207 or 2208);
  - (c) methane or propane (heading 2711);
  - (d) the compounds of carbon mentioned in note 2 to Chapter 28;
  - (e) immunological products of heading 3002;
  - (f) urea (heading 3102 or 3105);
  - (g) colouring matter of vegetable or animal origin (heading 3203), synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading 3204) or dyes or other colouring matter put up in forms or packings for retail sale (heading 3212);
  - (h) enzymes (heading 3507);
  - (ij) metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300 cm<sup>3</sup> (heading 3606);
  - (k) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 3813; ink removers put up in packings for retail sale, of heading 3824; or
  - (l) optical elements, for example, of ethylenediamine tartrate (heading 9001).
3. Goods which could be included in two or more of the headings of this chapter are to be classified in that one of those headings which occurs last in numerical order.
4. In headings 2904 to 2906, 2908 to 2911 and 2913 to 2920, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.

Nitro or nitroso groups are not to be taken as 'nitrogen-functions' for the purposes of heading 2929.

For the purposes of headings 2911, 2912, 2914, 2918 and 2922, 'oxygen-function' is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings 2905 to 2920.

5. (A) The esters of acid-function organic compounds of sub-chapters I to VII with organic compounds of these sub-chapters are to be classified with that compound which is classified in the heading which occurs last in numerical order in these sub-chapters.
- (B) Esters of ethyl alcohol with acid-function organic compounds of sub-chapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.
- (C) Subject to note 1 to Section VI and note 2 to Chapter 28:
  - (1) inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of sub-chapters I to X or heading 2942, are to be classified in the heading appropriate to the organic compound;
  - (2) salts formed between organic compounds of sub-chapters I to X or heading 2942 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the chapter; and
  - (3) coordination compounds, other than products classifiable in sub-chapter XI or heading 2941, are to be classified in the heading which occurs last in numerical order in Chapter 29, among those appropriate to the fragments formed by 'cleaving' of all metal bonds, other than metal-carbon bonds.
- (D) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading 2905).
- (E) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.

6. The compounds of headings 2930 and 2931 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic or lead) directly linked to carbon atoms.

Heading 2930 (organo-sulphur compounds) and heading 2931 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).

7. Headings 2932, 2933 and 2934 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.

These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclising function or functions here listed.

8. For the purposes of heading 2937:
  - (a) the term 'hormones' includes hormone-releasing or hormone-stimulating factors, hormone inhibitors and hormone antagonists (anti-hormones);
  - (b) the expression 'used primarily as hormones' applies not only to hormone derivatives and structural analogues used primarily for their hormonal effect, but also to those derivatives and structural analogues used primarily as intermediates in the synthesis of products of this heading.

**Subheading notes**

- Within any one heading of this chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds), provided that they are not more specifically covered by any other subheading and that there is no residual subheading named 'Other' in the series of subheadings concerned.
- Note 3 to Chapter 29 does not apply to the subheadings of this chapter.

1. This chapter does not cover:
  - (a) separate chemically defined elements or compounds (except those of heading 3203 or 3204, inorganic products of a kind used as luminophores (heading 3206), glass obtained from fused quartz or other fused silica in the forms provided for in heading 3207, and also dyes and other colouring matter put up in forms or packings for retail sale of heading 3212);
  - (b) tannates or other tannin derivatives of products of headings 2936 to 2939, 2941 or 3501 to 3504; or
  - (c) mastics of asphalt or other bituminous mastics (heading 2715).
2. Heading 3204 includes mixtures of stabilised diazonium salts and couplers for the production of azo dyes.
3. Headings 3203, 3204, 3205 and 3206 apply also to preparations based on colouring matter (including, in the case of heading 3206, colouring pigments of heading 2530 or Chapter 28, metal flakes and metal powders), of a kind used for colouring any material or used as ingredients in the manufacture of colouring preparations. The headings do not apply, however, to pigments dispersed in non-aqueous media, in liquid or paste form, of a kind used in the manufacture of paints, including enamels (heading 3212), or to other preparations of headings 3207, 3208, 3209, 3210, 3212, 3213 or 3215.
4. Heading 3208 includes solutions (other than collodions) consisting of any of the products specified in headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeds 50 % of the weight of the solution.
5. The expression 'colouring matter' in this chapter does not include products of a kind used as extenders in oil paints, whether or not they are also suitable for colouring distempers.
6. The expression 'stamping foils' in heading 3212 applies only to thin sheets of a kind used for printing, for example, book covers or hat bands, and consisting of:
  - (a) metallic powder (including powder of precious metal) or pigment, agglomerated with glue, gelatin or other binder; or
  - (b) metal (including precious metal) or pigment, deposited on a supporting sheet of any material.

In other forms, they are to be classified in heading 3405 as 'scouring powders and similar preparations'.
  3. For the purposes of heading 3402, 'organic surface-active agents' are products which, when mixed with water at a concentration of 0,5 % at 20 °C and left to stand for one hour at the same temperature:
    - (a) give a transparent or translucent liquid or stable emulsion without separation of insoluble matter; and
    - (b) reduce the surface tension of water to  $4,5 \times 10^{-2}$  N/m (45 dyn/cm) or less.
  4. In heading 3403, the expression 'petroleum oils and oils obtained from bituminous minerals' applies to the products defined in note 2 to Chapter 27.
  5. In heading 3404, subject to the exclusions provided below, the expression 'artificial waxes and prepared waxes' applies only to:

    - (b) products obtained by mixing different waxes;
    - (c) products of a waxy character with a basis of one or more waxes and containing fats, resins, mineral substances or other materials.
- The heading does not apply to:
- (a) products of heading 1516, 3402 or 3823, even if having a waxy character;
  - (b) unmixed animal waxes or unmixed vegetable waxes, whether or not refined or coloured, of heading 1521;
  - (c) mineral waxes or similar products of heading 2712, whether or not intermixed or merely coloured; or
  - (d) waxes mixed with, dispersed in or dissolved in a liquid medium (headings 3405, 3809, etc.).

## CHAPTER 37

## PHOTOGRAPHIC OR CINEMATOGRAPHIC GOODS

## Notes

1. This chapter does not cover waste or scrap.
2. In this chapter, the word 'photographic' relates to the process by which visible images are formed, directly or indirectly, by the action of light or other forms of radiation on photosensitive surfaces.

## Additional notes

1. *In the case of sound films imported in two bands (the band bearing only the images and the band used for recording the sound), each band is to be classified in its appropriate heading.*
2. *The expression 'newsreels' (subheading 3706 90 52) is to be taken to apply to films of length of less than 330 m, and depicting current events of a political, sporting, military, scientific, literary, folkloric, touristic, society, etc., nature.*

**CHAPTER 38****MISCELLANEOUS CHEMICAL PRODUCTS****Notes**

1. This chapter does not cover:
  - (a) separate chemically defined elements or compounds with the exception of the following:
    - (1) artificial graphite (heading 3801);
    - (2) insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulators, disinfectants and similar products, put up as described in heading 3808;
    - (3) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (heading 3813);
    - (4) certified reference materials specified in note 2 below;
    - (5) products specified in note 3(a) or 3(c) below;
  - (b) mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the preparation of human foodstuffs (generally, heading 2106);
  - (c) slag, ash and residues (including sludges, other than sewage sludge), containing metals, arsenic or their mixtures and meeting the requirements of note 3(a) or 3(b) to Chapter 26 (heading 2620);
  - (d) medicaments (heading 3003 or 3004); or
  - (e) spent catalysts of a kind used for the extraction of base metals or for the manufacture of chemical compounds of base metals (heading 2620), spent catalysts of a kind used principally for the recovery of precious metal (heading 7112) or catalysts consisting of metals or metal alloys in the form of, for example, finely divided powder or woven gauze (Section XIV or XV).
2. (A) For the purpose of heading 3822, the expression 'certified reference materials' means reference materials which are accompanied by a certificate which indicates the values of the certified properties, the methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.
  - (B) With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, heading 3822 shall take precedence over any other heading in the nomenclature.
3. Heading 3824 includes the following goods which are not to be classified in any other heading of the nomenclature:
  - (a) cultured crystals (other than optical elements) weighing not less than 2,5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;
  - (b) fusel oil; Dippel's oil;
  - (c) ink removers put up in packings for retail sale;
  - (d) stencil correctors, other correcting fluids and correction tapes (other than those of heading 9612), put up in packings for retail sale; and
  - (e) ceramic firing testers, fusible (for example, Seger cones).
4. Throughout the nomenclature, 'municipal waste' means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood, paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded articles. The term 'municipal waste', however, does not cover:
  - (a) individual materials or articles segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate headings of the nomenclature;
  - (b) industrial waste;

- (c) waste pharmaceuticals, as defined in note 4(k) to Chapter 30; or
- (d) clinical waste, as defined in note 6(a) below.
5. For the purposes of heading 3825, 'sewage sludge' means sludge arising from urban effluent treatment plant and includes pre-treatment waste, scourings and unstabilised sludge. Stabilised sludge when suitable for use as fertiliser is excluded (Chapter 31).
6. For the purposes of heading 3825, the expression 'other wastes' applies to:
- (a) clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);
  - (b) waste organic solvents;
  - (c) wastes of metal pickling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and
  - (d) other wastes from chemical or allied industries.
- The expression 'other wastes' does not, however, cover wastes which contain mainly petroleum oils or oils obtained from bituminous minerals (heading 2710).
7. For the purposes of heading 3826, the term 'biodiesel' means mono-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used.

#### Subheading notes

## SECTION VII

**PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF****Notes**

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
  - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
  - (b) presented together; and
  - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
2. Except for the goods of heading 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

## CHAPTER 39

**PLASTICS AND ARTICLES THEREOF****Notes**

1. Throughout the nomenclature, the expression 'plastics' means those materials of headings 3901 to 3914 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout the nomenclature, any reference to 'plastics' also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

2. This chapter does not cover:
  - (a) lubricating preparations of heading 2710 or 3403;
  - (b) waxes of heading 2712 or 3404;
  - (c) separate chemically defined organic compounds (Chapter 29);
  - (d) heparin or its salts (heading 3001);
  - (e) solutions (other than collodions) consisting of any of the products specified in headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeds 50 % of the weight of the solution (heading 3208); stamping foils of heading 3212;
  - (f) organic surface-active agents or preparations of heading 3402;
  - (g) run gums or ester gums (heading 3806);
  - (h) prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils (heading 3811);
  - (ij) prepared hydraulic fluids based on polyglycols, silicones or other polymers of Chapter 39 (heading 3819);
  - (k) diagnostic or laboratory reagents on a backing of plastics (heading 3822);
  - (l) synthetic rubber, as defined for the purposes of Chapter 40, or articles thereof;
  - (m) saddlery or harness (heading 4201) or trunks, suitcases, handbags or other containers of heading 4202;
  - (n) plaits, wickerwork or other articles of Chapter 46;
  - (o) wallcoverings of heading 4814;
  - (p) goods of Section XI (textiles and textile articles);
  - (q) articles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking sticks, whips, riding-crops or parts thereof);

- (r) imitation jewellery of heading 7117;
- (s) articles of Section XVI (machines and mechanical or electrical appliances);
- (t) parts of aircraft or vehicles of Section XVII;
- (u) articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);
- (v) articles of Chapter 91 (for example, clock or watch cases);
- (w) articles of Chapter 92 (for example, musical instruments or parts thereof);
- (x) articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);
- (y) articles of Chapter 95 (for example, toys, games, sports requisites); or
- (z) articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).

3. Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:

- (a) liquid synthetic polyolefins of which less than 60 % by volume distils at 300 °C, after conversion to 1 013 mbar when a reduced-pressure distillation method is used (headings 3901 and 3902);
- (b) resins, not highly polymerised, of the coumarone-indene type (heading 3911);
- (c) other synthetic polymers with an average of at least five monomer units;
- (d) silicones (heading 3910);
- (e) resols (heading 3909) and other prepolymers.

4. The expression 'copolymers' covers all polymers in which no single monomer unit contributes 95 % or more by weight to the total polymer content.

For the purposes of this chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this note, constituent comonomer units of polymers falling in the same heading shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

- 5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
- 6. In headings 3901 to 3914, the expression 'primary forms' applies only to the following forms:

- (a) liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
- (b) blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

- 7. Heading 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 3901 to 3914).
- 8. For the purposes of heading 3917, the expression 'tubes, pipes and hoses' means hollow products, whether semi-manufactured or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed one-and-a-half times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
- 9. For the purposes of heading 3918, the expression 'wall or ceiling coverings of plastics' applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.

10. In headings 3920 and 3921, the expression 'plates, sheets, film, foil and strip' applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
11. Heading 3925 applies only to the following articles, not being products covered by any of the earlier headings of sub-chapter II:
  - (a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 litres;
  - (b) structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
  - (c) gutters and fittings therefor;
  - (d) doors, windows and their frames and thresholds for doors;
  - (e) balconies, balustrades, fencing, gates and similar barriers;
  - (f) shutters, blinds (including venetian blinds) and similar articles and parts and fittings thereof;
  - (g) large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
  - (h) ornamental architectural features, for example, flutings, cupolas, dovecotes; and
  - (ij) fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

#### **Subheading notes**

1. Within any one heading of this chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:
  - (a) where there is a subheading named 'Other' in the same series:
    - (1) the designation in a subheading of a polymer by the prefix 'poly' (for example, polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95 % or more by weight of the total polymer content;
    - (2) the copolymers named in subheadings 3901 30, 3903 20, 3903 30 and 3904 30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95 % or more by weight of the total polymer content;
    - (3) chemically modified polymers are to be classified in the subheading named 'Other', provided that the chemically modified polymers are not more specifically covered by another subheading;
    - (4) polymers not meeting (1), (2) or (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared;
  - (b) where there is no subheading named 'Other' in the same series:
    - (1) polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared;
    - (2) chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.
2. Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.
2. For the purposes of subheading 3920 43, the term 'plasticisers' includes secondary plasticisers.

**Additional note**

1. Where the woven, knitted or crocheted fabrics, felt or nonwovens are present merely for reinforcing purposes, gloves, mittens or mitts impregnated, coated or covered with cellular plastics belong to Chapter 39, even if they are:
- made up from woven, knitted or crocheted fabrics (other than those of heading 5903), felt or nonwovens impregnated, coated or covered with cellular plastics, or
  - made up from unimpregnated, uncoated or uncovered woven, knitted or crocheted fabrics, felt or nonwovens and subsequently impregnated, coated or covered with cellular plastics.

**CHAPTER 40****RUBBER AND ARTICLES THEREOF****Notes**

1. Except where the context otherwise requires, throughout the nomenclature the expression 'rubber' means the following products, whether or not vulcanised or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This chapter does not cover:
  - (a) goods of Section XI (textiles and textile articles);
  - (b) footwear or parts thereof of Chapter 64;
  - (c) headgear or parts thereof (including bathing caps) of Chapter 65;
  - (d) mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;
  - (e) articles of Chapter 90, 92, 94 or 96; or
  - (f) articles of Chapter 95 (other than sports gloves, mittens and mitts and articles of headings 4011 to 4013).
3. In headings 4001 to 4003 and 4005, the expression 'primary forms' applies only to the following forms:
  - (a) liquids and pastes (including latex, whether or not pre-vulcanised, and other dispersions and solutions);
  - (b) blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In note 1 to this chapter and in heading 4002, the expression 'synthetic rubber' applies to:
  - (a) unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18 and 29 °C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one-and-a-half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by note 5(B)(2) and (3) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted;
  - (b) thioplasts (TM); and
  - (c) natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the abovementioned products comply with the requirements concerning vulcanisation, elongation and recovery in (a) above.
5. (A) Headings 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
  - (1) vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex);
  - (2) pigments or other colouring matter, other than those added solely for the purpose of identification;
  - (3) plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (B).
- (B) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 4001 or 4002, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
  - (1) emulsifiers or anti-tack agents;
  - (2) small amounts of breakdown products of emulsifiers;

- (3) very small amounts of the following: heat-sensitive agents (generally, for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally, for obtaining electropositive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.
6. For the purposes of heading 4004, the expression 'waste, parings and scrap' means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly of vulcanised rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading 4008.
8. Heading 4010 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
9. In headings 4001, 4002, 4003, 4005 and 4008, the expressions 'plates', 'sheets' and 'strip' apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.

In heading 4008, the expressions 'rods' and 'profile shapes' apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

#### Additional note

1. Where the woven, knitted or crocheted fabrics, felt or nonwovens are present merely for reinforcing purposes, gloves, mittens or mitts impregnated, coated or covered with cellular rubber belong to Chapter 40, even if they are:
- made up from woven, knitted or crocheted fabrics (other than those of heading 5906), felt or nonwovens impregnated, coated or covered with cellular rubber, or
  - made up from unimpregnated, uncoated or uncovered woven, knitted or crocheted fabrics, felt or nonwovens and subsequently impregnated, coated or covered with cellular rubber.

## SECTION VIII

**RAW HIDES AND SKINS, LEATHER, FURSKINS AND ARTICLES THEREOF; SADDLERY AND HARNESS; TRAVEL GOODS, HANDBAGS AND SIMILAR CONTAINERS; ARTICLES OF ANIMAL GUT (OTHER THAN SILKWORM GUT)**

## CHAPTER 41

**RAW HIDES AND SKINS (OTHER THAN FURSKINS) AND LEATHER****Notes**

1. This chapter does not cover:
  - (a) parings or similar waste, of raw hides or skins (heading 0511);
  - (b) birdskins or parts of birdskins, with their feathers or down, of heading 0505 or 6701; or
  - (c) hides or skins, with the hair or wool on, raw, tanned or dressed (Chapter 43); the following are, however, to be classified in Chapter 41, namely, raw hides and skins with the hair or wool on, of bovine animals (including buffalo), of equine animals, of sheep or lambs (except Astrakhan, Broadtail, Caracul, Persian or similar lambs, Indian, Chinese, Mongolian or Tibetan lambs), of goats or kids (except Yemen, Mongolian or Tibetan goats and kids), of swine (including peccary), of chamois, of gazelle, of camels (including dromedaries), of reindeer, of elk, of deer, of roebucks or of dogs.
2. (A) Headings 4104 to 4106 do not cover hides and skins which have undergone a tanning (including pre-tanning) process which is reversible (headings 4101 to 4103, as the case may be).
  - (B) For the purposes of headings 4104 to 4106, the term 'crust' includes hides and skins that have been retanned, coloured or fat-liquored (stuffed) prior to drying.
3. Throughout the nomenclature, the expression 'composition leather' means only substances of the kind referred to in heading 4115.

3. Subject to the provisions of note 7, headings 4801 to 4805 include paper and paperboard which have been subjected to calendering, supercalendering, glazing or similar finishing, false watermarking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibres, coloured or marbled throughout the mass by any method. Except where heading 4803 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibres which have been otherwise processed.
4. In this chapter, the expression 'newsprint' means uncoated paper of a kind used for the printing of newspapers, of which not less than 50 % by weight of the total fibre content consists of wood fibres obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2,5 micrometres (microns), weighing not less than 40 g/m<sup>2</sup> and not more than 65 g/m<sup>2</sup>.
5. For the purposes of heading 4802, the expressions 'paper and paperboard, of a kind used for writing, printing or other graphic purposes' and 'non-perforated punchcards and punch-tape paper' mean paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical or chemi-mechanical process and satisfying any of the following criteria:

  - (c) having a brightness of less than 60 %, a caliper of 254 micrometres (microns) or less and an ash content of more than 8 %.

Heading 4802 does not, however, cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard.

6. In this chapter, 'kraft paper and paperboard' means paper and paperboard of which not less than 80 % by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes.
7. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering to a description in two or more of the headings 4801 to 4811 are to be classified under that one of such headings which occurs last in numerical order in the nomenclature.
8. Headings 4801 and 4803 to 4809 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibres:
  - (a) in strips or rolls of a width exceeding 36 cm; or
  - (b) in rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.
9. For the purposes of heading 4814, the expression 'wallpaper and similar wallcoverings' applies only to:
  - (a) paper in rolls, of a width of not less than 45 cm and not more than 160 cm, suitable for wall or ceiling decoration:

- Products on a base of paper or paperboard, suitable for use both as floor coverings and as wallcoverings, are to be classified in heading 4823.
10. Heading 4820 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.
11. Heading 4823 applies, inter alia, to perforated paper or paperboard cards for jacquard or similar machines and paper lace.
12. Except for the goods of heading 4814 or 4821, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods fall in Chapter 49.

1. This chapter does not cover:
  - (a) photographic negatives or positives on transparent bases (Chapter 37);
  - (b) maps, plans or globes, in relief, whether or not printed (heading 9023);
  - (c) playing cards or other goods of Chapter 95; or
  - (d) original engravings, prints or lithographs (heading 9702), postage or revenue stamps, stamp-postmarks, first-day covers, postal stationery or the like of heading 9704, antiques of an age exceeding 100 years or other articles of Chapter 97.
2. For the purposes of Chapter 49, the term 'printed' also means reproduced by means of a duplicating machine, produced under the control of an automatic data-processing machine, embossed, photographed, photocopied, thermocopied or typewritten.
3. Newspapers, journals and periodicals which are bound otherwise than in paper, and sets of newspapers, journals or periodicals comprising more than one number under a single cover are to be classified in heading 4901, whether or not containing advertising material.
4. Heading 4901 also covers:
  - (a) a collection of printed reproductions of, for example, works of art or drawings, with a relative text, put up with numbered pages in a form suitable for binding into one or more volumes;
  - (b) a pictorial supplement accompanying, and subsidiary to, a bound volume; and
  - (c) printed parts of books or booklets, in the form of assembled or separate sheets or signatures, constituting the whole or a part of a complete work and designed for binding.

However, printed pictures or illustrations not bearing a text, whether in the form of signatures or separate sheets, fall in heading 4911.
5. Subject to note 3 to this chapter, heading 4901 does not cover publications which are essentially devoted to advertising (for example, brochures, pamphlets, leaflets, trade catalogues, yearbooks published by trade associations, tourist propaganda). Such publications are to be classified in heading 4911.
6. For the purposes of heading 4903, the expression 'children's picture books' means books for children in which the pictures form the principal interest and the text is subsidiary.

When no one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration.

- (B) For the purposes of the above rule:
- (a) gimped horsehair yarn (heading 5110) and metallised yarn (heading 5605) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;

5. For the purposes of headings 5204, 5401 and 5508, the expression 'sewing thread' means multiple (folded) or cabled yarn:

- (a) put up on supports (for example, reels, tubes) of a weight (including support) not exceeding 1 000 grams;

6. For the purposes of this section, the expression 'high-tenacity yarn' means yarn having a tenacity, expressed in cN/tex (centinewtons per tex), greater than the following:

— single yarn of nylon or other polyamides, or of polyesters:	60 cN/tex,
— multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters:	53 cN/tex,

7. For the purposes of this section, the expression 'made up' means:

- (a) cut otherwise than into squares or rectangles;
- (b) produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, tablecloths, scarf squares, blankets);
- (c) cut to size and with at least one heat-sealed edge with a visibly tapered or compressed border and the other edges treated as described in any other subparagraph of this note, but excluding fabrics the cut edges of which have been prevented from unravelling by hot cutting or by other simple means;
- (d) hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unravelling by whipping or by other simple means;
- (e) cut to size and having undergone a process of drawn thread work;

- (f) assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded);
  - (g) knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.
8. For the purposes of Chapters 50 to 60:
- (a) Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59 do not apply to goods made up within the meaning of note 7 above; and
  - (b) Chapters 50 to 55 and 60 do not apply to goods of Chapters 56 to 59.
9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.
10. Elastic products consisting of textile materials combined with rubber threads are classified in this section.
11. For the purposes of this section, the expression 'impregnated' includes 'dipped'.
12. For the purposes of this section, the expression 'polyamides' includes 'aramids'.
13. For the purposes of this section and, where applicable, throughout the nomenclature, the expression 'elastomeric yarn' means filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.
14. Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings, even if put up in sets for retail sale. For the purposes of this note, the expression 'textile garments' means garments of headings 6101 to 6114 and headings 6201 to 6211.

### **Subheading notes**

1. In this section and, where applicable, throughout the nomenclature, the following expressions have the meanings hereby assigned to them:
- (a) 'Unbleached yarn':  
Yarn which:
    - (1) has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or
    - (2) is of indeterminate colour (grey yarn), manufactured from garnetted stock.
 Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibres, treated in the mass with delustering agents (for example, titanium dioxide).
  - (b) 'Bleached yarn':  
Yarn which:
    - (1) has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;
    - (2) consists of a mixture of unbleached and bleached fibres; or
    - (3) is multiple (folded) or cabled and consists of unbleached and bleached yarns.
  - (c) 'Coloured (dyed or printed) yarn':  
Yarn which:
    - (1) is dyed (whether or not in the mass) other than white or in a fugitive colour, or printed, or made from dyed or printed fibres;
    - (2) consists of a mixture of dyed fibres of different colours or of a mixture of unbleached or bleached fibres with coloured fibres (marl or mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;
    - (3) is obtained from slivers or rovings which have been printed; or
    - (4) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

The above definitions also apply, *mutatis mutandis*, to monofilament and to strip or the like of Chapter 54.

## (d) 'Unbleached woven fabric':

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

## (e) 'Bleached woven fabric':

Woven fabric which:

- (1) has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;
- (2) consists of bleached yarn; or
- (3) consists of unbleached and bleached yarn.

## (f) 'Dyed woven fabric':

Woven fabric which:

- (1) is dyed a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white (unless the context otherwise requires), in the piece; or
- (2) consists of coloured yarn of a single uniform colour.

## (g) 'Woven fabric of yarns of different colours':

Woven fabric (other than printed woven fabric) which:

- (1) consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibres);
- (2) consists of unbleached or bleached yarn and coloured yarn; or
- (3) consists of marl or mixture yarns.

(In all cases, the yarn used in selvedges and piece ends is not taken into consideration.)

## (h) 'Printed woven fabric':

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The process of mercerisation does not affect the classification of yarns or fabrics within the above categories.

The definitions at (d) to (h) above apply, *mutatis mutandis*, to knitted or crocheted fabrics.

## (ij) 'Plain weave':

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2. (A) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under note 2 to this section for the classification of a product of Chapters 50 to 55 or of heading 5809 consisting of the same textile materials.
- (B) For the application of this rule:
- (a) where appropriate, only the part which determines the classification under interpretative rule 3 shall be taken into account;
  - (b) in the case of textile products consisting of a ground fabric and a pile or looped surface, no account shall be taken of the ground fabric;
  - (c) in the case of embroidery of heading 5810 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

## COTTON

## Subheading note

1. For the purposes of subheadings 5209 42 and 5211 42, the expression 'denim' means fabrics of yarns of different colours, of 3-thread or 4-thread twill, including broken twill, warp faced, the warp yarns of which are of one and the same colour and the weft yarns of which are unbleached, bleached, dyed grey or coloured a lighter shade of the colour of the warp yarns.

**Additional note**

1. (A) For the purposes of subheadings 5306 10 90, 5306 20 90 and 5308 20 90, the expression 'put up for retail sale' in relation to yarn (single, multiple or cabled) means, subject to the exceptions in paragraph (B) below, yarn put up:
- (a) in balls or on cards, reels, tubes or similar supports, of a weight (including support) not exceeding 200 grams;
  - (b) in hanks or skeins of a weight not exceeding 125 grams;
  - (c) in hanks or skeins comprising several smaller hanks or skeins separated by dividing threads which render them independent one of the other, each of uniform weight not exceeding 125 grams.
- (B) Exceptions:
- (a) multiple or cabled yarn, unbleached, in hanks or skeins;
  - (b) multiple or cabled yarn, put up:
    - (1) in cross-reeled hanks or skeins; or

## CHAPTER 54

## MAN-MADE FILAMENTS; STRIP AND THE LIKE OF MAN-MADE TEXTILE MATERIALS

## Notes

1. Throughout the nomenclature, the term 'man-made fibres' means staple fibres and filaments of organic polymers produced by manufacturing processes, either:

- (a) by polymerisation of organic monomers to produce polymers such as polyamides, polyesters, polyolefins or polyurethanes, or by chemical modification of polymers produced by this process (for example, poly(vinyl alcohol) prepared by the hydrolysis of poly(vinyl acetate)); or
- (b) by dissolution or chemical treatment of natural organic polymers (for example, cellulose) to produce polymers such as cuprammonium rayon (cupro) or viscose rayon, or by chemical modification of natural organic polymers (for example, cellulose, casein and other proteins, or alginic acid), to produce polymers such as cellulose acetate or alginates.

The terms 'synthetic' and 'artificial', used in relation to fibres, mean: synthetic: fibres as defined at (a); artificial: fibres as defined at (b). Strip and the like of heading 5404 or 5405 are not considered to be man-made fibres.

The terms 'man-made', 'synthetic' and 'artificial' shall have the same meanings when used in relation to 'textile materials'.

2. Headings 5402 and 5403 do not apply to synthetic or artificial filament tow of Chapter 55.

## CHAPTER 55

## MAN-MADE STAPLE FIBRES

**Note**

1. Headings 5501 and 5502 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:
  - (a) length of tow exceeding 2 m;
  - (b) twist less than five turns per metre;
  - (c) measuring per filament less than 67 decitex;
  - (d) synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100 % of its length;
  - (e) total measurement of tow more than 20 000 decitex.

Tow of a length not exceeding 2 m is to be classified in heading 5503 or 5504.

## CHAPTER 56

**WADDING, FELT AND NONWOVENS; SPECIAL YARNS; TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF****Notes**

1. This chapter does not cover:
  - (a) wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading 3401, polishes, creams or similar preparations of heading 3405, fabric softeners of heading 3809), where the textile material is present merely as a carrying medium;
  - (b) textile products of heading 5811;
  - (c) natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading 6805);
  - (d) agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading 6814);
  - (e) metal foil on a backing of felt or nonwovens (generally, Section XIV or XV); or
  - (f) sanitary towels (pads) and tampons, napkins and napkin liners for babies, and similar articles, of heading 9619.
2. The term 'felt' includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.
3. Headings 5602 and 5603 cover, respectively, felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber, whatever the nature of these materials (compact or cellular).

Heading 5603 also includes nonwovens in which plastics or rubber forms the bonding substance.

Headings 5602 and 5603 do not, however, cover:

- (a) felt impregnated, coated, covered or laminated with plastics or rubber, containing 50 % or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);
  - (b) nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or
  - (c) plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).
4. Heading 5604 does not cover textile yarn, or strip or the like of heading 5404 or 5405, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

## CHAPTER 57

## CARPETS AND OTHER TEXTILE FLOOR COVERINGS

## Notes

1. For the purposes of this chapter, the term 'carpets and other textile floor coverings' means floor coverings in which textile materials serve as the exposed surface of the article when in use and includes articles having the characteristics of textile floor coverings but intended for use for other purposes.
2. This chapter does not cover floor-covering underlays.

## Additional note

1. For the purposes of applying the maximum rate of duty provided for in respect of carpets, carpeting and rugs of subheading 5701 10 90, the dutiable surface shall not include the heading, the selvedges and the fringes.

## CHAPTER 58

**SPECIAL WOVEN FABRICS; TUFTED TEXTILE FABRICS; LACE; TAPESTRIES; TRIMMINGS; EMBROIDERY****Notes**

1. This chapter does not apply to textile fabrics referred to in note 1 to Chapter 59, impregnated, coated, covered or laminated, or to other goods of Chapter 59.
2. Heading 5801 also includes woven weft pile fabrics which have not yet had the floats cut, at which stage they have no pile standing up.
3. For the purposes of heading 5803, 'gauze' means a fabric with a warp composed wholly or in part of standing or ground threads and crossing or doup threads which cross the standing or ground threads making a half turn, a complete turn or more to form loops through which weft threads pass.
4. Heading 5804 does not apply to knotted net fabrics of twine, cordage or rope, of heading 5608.
5. For the purposes of heading 5806, the expression 'narrow woven fabrics' means:
  - (a) woven fabrics of a width not exceeding 30 cm, whether woven as such or cut from wider pieces, provided with selvedges (woven, gummed or otherwise made) on both edges;
  - (b) tubular woven fabrics of a flattened width not exceeding 30 cm; and
  - (c) bias binding with folded edges, of a width when unfolded not exceeding 30 cm.

Narrow woven fabrics with woven fringes are to be classified in heading 5808.

6. In heading 5810, the expression 'embroidery' means, inter alia, embroidery with metal or glass thread on a visible ground of textile fabric, and sewn appliquéd work of sequins, beads or ornamental motifs of textile or other materials. The heading does not apply to needlework tapestry (heading 5805).
7. In addition to the products of heading 5809, this chapter also includes articles made of metal thread and of a kind used in apparel, as furnishing fabrics or for similar purposes.

## CHAPTER 59

### **IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE**

#### **Notes**

1. Except where the context otherwise requires, for the purposes of this chapter, the expression 'textile fabrics' applies only to the woven fabrics of Chapters 50 to 55 and headings 5803 and 5806, the braids and ornamental trimmings in the piece of heading 5808 and the knitted or crocheted fabrics of headings 6002 to 6006.
2. Heading 5903 applies to:
  - (a) textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square metre and whatever the nature of the plastic material (compact or cellular), other than:
    - (1) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually, Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
    - (2) products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15 and 30 °C (usually, Chapter 39);
    - (3) products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);
    - (4) fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually, Chapters 50 to 55, 58 or 60);
    - (5) plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or
    - (6) textile products of heading 5811;
  - (b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading 5604.

3. For the purposes of heading 5905, the expression 'textile wallcoverings' applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

This heading does not, however, apply to wallcoverings consisting of textile flock or dust fixed directly on a backing of paper (heading 4814) or on a textile backing (generally, heading 5907).

4. For the purposes of heading 5906, the expression 'rubberised textile fabrics' means:
  - (a) textile fabrics impregnated, coated, covered or laminated with rubber:
    - weighing not more than 1 500 g/m<sup>2</sup>, or
    - weighing more than 1 500 g/m<sup>2</sup> and containing more than 50 % by weight of textile material;
  - (b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading 5604; and
  - (c) fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre.
- This heading does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 40), or textile products of heading 5811.
5. Heading 5907 does not apply to:
  - (a) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
  - (b) fabrics painted with designs (other than painted canvas being theatrical scenery, studio backcloths or the like);
  - (c) fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments. However, imitation pile fabrics remain classified in this heading;

- (d) fabrics finished with normal dressings having a basis of amylaceous or similar substances;
- (e) wood veneered on a backing of textile fabrics (heading 4408);
- (f) natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading 6805);
- (g) agglomerated or reconstituted mica, on a backing of textile fabrics (heading 6814); or
- (h) metal foil on a backing of textile fabrics (generally Section XIV or XV).

6. Heading 5910 does not apply to:

- (a) transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or
- (b) transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading 4010).

7. Heading 5911 applies to the following goods, which do not fall in any other heading of Section XI:

- (a) textile products in the piece, cut to length or simply cut to rectangular (including square) shape (other than those having the character of the products of headings 5908 to 5910), the following only:
  - textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams),
  - bolting cloth,
  - straining cloth of a kind used in oil-presses or the like, of textile material or of human hair,
  - flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes,
  - textile fabrics reinforced with metal, of a kind used for technical purposes,
  - cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;
- (b) textile articles (other than those of headings 5908 to 5910) of a kind used for technical purposes (for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in papermaking or similar machines (for example, for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts).

## CHAPTER 60

## KNITTED OR CROCHETED FABRICS

## Notes

1. This chapter does not cover:
  - (a) crochet lace of heading 5804;
  - (b) labels, badges and similar articles, knitted or crocheted, of heading 5807; or
  - (c) knitted or crocheted fabrics, impregnated, coated, covered or laminated of Chapter 59. However, knitted or crocheted pile fabrics, impregnated, coated, covered or laminated, remain classified in heading 6001.
2. This chapter also includes fabrics made of metal thread and of a kind used in apparel, as furnishing fabrics or for similar purposes.
3. Throughout the nomenclature, any reference to 'knitted goods' includes a reference to stitch-bonded goods in which the chain stitches are formed of textile yarn.

**CHAPTER 61****ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED****Notes**

1. This chapter applies only to made-up knitted or crocheted articles.
2. This chapter does not cover:
  - (a) goods of heading 6212;
  - (b) worn clothing or other worn articles of heading 6309; or
  - (c) orthopaedic appliances, surgical belts, trusses or the like (heading 9021).
3. For the purposes of headings 6103 and 6104:
  - (a) The term 'suit' means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:
    - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket, and
    - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a 'suit' must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term 'suit' includes the following sets of garments, whether or not they fulfil all the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers,
  - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind,
  - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt-front), but has shiny silk or imitation silk lapels.
- (b) The term 'ensemble' means a set of garments (other than suits and articles of heading 6107, 6108 or 6109), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

- one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and
- one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term 'ensemble' does not apply to tracksuits or ski suits, of heading 6112.

4. Headings 6105 and 6106 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm × 10 cm. Heading 6105 does not cover sleeveless garments.
5. Heading 6109 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.
6. For the purposes of heading 6111:
  - (a) the expression 'babies' garments and clothing accessories' means articles for young children of a body height not exceeding 86 cm;
  - (b) articles which are *prima facie* classifiable both in heading 6111 and in other headings of this chapter are to be classified in heading 6111.
7. For the purposes of heading 6112, 'ski suits' means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist of either:
  - (a) a 'ski overall', that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar, the ski overall may have pockets or footstraps; or
  - (b) a 'ski ensemble', that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
    - one garment such as an anorak, windcheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
    - one pair of trousers, whether or not extending above waist level, one pair of breeches or one bib and brace overall.

The 'ski ensemble' may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a 'ski ensemble' must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

8. Garments which are *prima facie* classifiable both in heading 6113 and in other headings of this chapter, excluding heading 6111, are to be classified in heading 6113.
9. Garments of this chapter designed for left-over-right closure at the front shall be regarded as men's or boys' garments, and those designed for right-over-left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

10. Articles of this chapter may be made of metal thread.

#### **Additional notes**

1. For the application of note 3(b) to this chapter, the components of an ensemble must be made up entirely in a single identical fabric, subject to compliance with the other conditions laid down in the said note.

For this purpose:

- the fabric used can be unbleached, bleached, dyed, of yarns of different colours or printed,
- a pullover or waistcoat with ribbing is to be considered as a component of an ensemble, even if there is no ribbing on the component intended to cover the lower part of the body, provided that the ribbing is not sewn on but produced directly by the knitting process.

Sets of garments are not regarded as ensembles when their components are made up in different fabrics, even if the difference is due only to their respective colours.

All the components of an ensemble must be presented together for retail sale as a single unit. Individual wrapping or separate labelling of each component of such a single unit does not influence its classification as an ensemble.

2. For the purposes of heading 6109, the terms 'singlets' and 'other vests' include garments, even if of a fancy design, worn next to the body, without collar, with or without sleeves, including those with shoulder straps.

These garments, which are intended to cover the upper part of the body, often possess many characteristics in common with those of T-shirts or with more traditional kinds of singlets and other vests of heading 6109.

3. Heading 6111 and subheadings 6116 10 20 and 6116 10 80 cover gloves, mittens and mitts, impregnated, coated or covered with plastics or rubber, even if they are:

- made up from knitted or crocheted textile fabrics impregnated, coated or covered with plastics or rubber of heading 5903 or 5906, or
- made up from unimpregnated, uncoated or uncovered knitted or crocheted textile fabrics and subsequently impregnated, coated or covered with plastics or rubber.

Where knitted or crocheted textile fabrics serve only as reinforcement, gloves, mittens or mitts impregnated, coated or covered with cellular plastics or cellular rubber belong in Chapter 39 or 40, even if they are made up from unimpregnated, uncoated or uncovered knitted or crocheted textile fabrics and subsequently impregnated, coated or covered with cellular plastics or cellular rubber (note 2(a)(5) and note 4, last paragraph, to Chapter 59).

## CHAPTER 62

**ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED****Notes**

1. This chapter applies only to made-up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of heading 6212).
2. This chapter does not cover:
  - (a) worn clothing or other worn articles of heading 6309; or
  - (b) orthopaedic appliances, surgical belts, trusses or the like (heading 9021).
3. For the purposes of headings 6203 and 6204:
  - (a) The term 'suit' means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:
    - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket, and
    - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a 'suit' must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term 'suit' includes the following sets of garments, whether or not they fulfil all the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers,
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind,
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

- (b) The term 'ensemble' means a set of garments (other than suits and articles of heading 6207 or 6208) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

- one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and
- one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term 'ensemble' does not apply to tracksuits or ski suits, of heading 6211.

4. For the purposes of heading 6209:

- (a) the expression 'babies' garments and clothing accessories' means articles for young children of a body height not exceeding 86 cm;

- (b) articles which are *prima facie* classifiable both in heading 6209 and in other headings of this chapter are to be classified in heading 6209.
5. Garments which are *prima facie* classifiable both in heading 6210 and in other headings of this chapter, excluding heading 6209, are to be classified in heading 6210.
6. For the purposes of heading 6211, 'ski suits' means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist of either:
- a 'ski overall', that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar, the ski overall may have pockets or footstraps; or
  - a 'ski ensemble', that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
    - one garment, such as an anorak, windcheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
    - one pair of trousers, whether or not extending above waist level, one pair of breeches or one bib and brace overall.

The 'ski ensemble' may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a 'ski ensemble' must be made up in a fabric of the same texture, style and composition, whether or not of the same colour; they also must be of corresponding or compatible size.

7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 cm, are to be classified as handkerchiefs (heading 6213). Handkerchiefs of which any side exceeds 60 cm are to be classified in heading 6214.
8. Garments of this chapter designed for left-over-right closure at the front shall be regarded as men's or boys' garments, and those designed for right-over-left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

9. Articles of this chapter may be made of metal thread.

#### **Additional notes**

1. For the application of note 3(b) to this chapter, the components of an ensemble must be made up entirely in a single identical fabric, subject to compliance with the other conditions laid down in the said note.

For this purpose, the fabric used can be unbleached, bleached, dyed, of yarns of different colours or printed.

Sets of garments are not regarded as ensembles when their components are made up in different fabrics, even if the difference is due only to their respective colours.

All the components of an ensemble must be presented together for retail sale as a single unit. Individual wrapping or separate labelling of each component of such a single unit does not influence its classification as an ensemble.

2. Headings 6209 and 6216 cover gloves, mittens and mitts, impregnated, coated or covered with plastics or rubber, even if they are:
- made up from textile fabrics (other than knitted or crocheted) impregnated, coated or covered with plastics or rubber of heading 5903 or 5906, or
  - made up from unimpregnated, uncoated or uncovered textile fabrics (other than knitted or crocheted) and subsequently impregnated, coated or covered with plastics or rubber.

Where textile fabrics (other than knitted or crocheted) serve only as reinforcement, gloves, mittens or mitts impregnated, coated or covered with cellular plastics or cellular rubber belong in Chapter 39 or 40, even if they are made up from unimpregnated, uncoated or uncovered textile fabrics (other than knitted or crocheted) and subsequently impregnated, coated or covered with cellular plastics or cellular rubber (note 2(a)(5) and note 4, last paragraph, to Chapter 59).

## SECTION XII

### FOOTWEAR, HEADGEAR, UMBRELLAS, SUN UMBRELLAS, WALKING STICKS, SEAT-STICKS, WHIPS, RIDING-CROPS AND PARTS THEREOF; PREPARED FEATHERS AND ARTICLES MADE THEREWITH; ARTIFICIAL FLOWERS; ARTICLES OF HUMAN HAIR

#### CHAPTER 64

##### FOOTWEAR, GAITERS AND THE LIKE; PARTS OF SUCH ARTICLES

###### Notes

1. This chapter does not cover:
  - (a) disposable foot or shoe coverings of flimsy material (for example, paper, sheeting of plastics) without applied soles. These products are classified according to their constituent material;
  - (b) footwear of textile material, without an outer sole glued, sewn or otherwise affixed or applied to the upper (Section XI);
  - (c) worn footwear of heading 6309;
  - (d) articles of asbestos (heading 6812);
  - (e) orthopaedic footwear or other orthopaedic appliances, or parts thereof (heading 9021); or
  - (f) toy footwear or skating boots with ice or roller skates attached; shin-guards or similar protective sportswear (Chapter 95).
2. For the purposes of heading 6406, the term 'parts' does not include pegs, protectors, eyelets, hooks, buckles, ornaments, braid, laces, pompons or other trimmings (which are to be classified in their appropriate headings) or buttons or other goods of heading 9606.
3. For the purposes of this chapter:
  - (a) the terms 'rubber' and 'plastics' include woven fabrics or other textile products with an external layer of rubber or plastics being visible to the naked eye; for the purpose of this provision, no account should be taken of any resulting change of colour; and
  - (b) the term 'leather' refers to the goods of headings 4107 and 4112 to 4114.
4. Subject to note 3 to this chapter:
  - (a) the material of the upper shall be taken to be the constituent material having the greatest external surface area, no account being taken of accessories or reinforcements such as ankle patches, edging, ornamentation, buckles, tabs, eyelet stays or similar attachments;
  - (b) the constituent material of the outer sole shall be taken to be the material having the greatest surface area in contact with the ground, no account being taken of accessories or reinforcements such as spikes, bars, nails, protectors or similar attachments.

###### Subheading note

1. For the purposes of subheadings 6402 12, 6402 19, 6403 12, 6403 19 and 6404 11, the expression 'sports footwear' applies only to:
  - (a) footwear which is designed for a sporting activity and has, or has provision for the attachment of, spikes, sprigs, stops, clips, bars or the like;
  - (b) skating boots, ski-boots and cross-country ski footwear, snowboard boots, wrestling boots, boxing boots and cycling shoes.

## Additional notes

- Within the meaning of note 4(a), 'reinforcements' is taken to mean all pieces of material (for example, plastics or leather) attached to the external surface of the upper to give additional strength, whether or not also attached to the sole. After the removal of reinforcements, the visible material must have the characteristics of an upper and not lining, supporting the foot sufficiently to enable the wearer, with the original fastening systems in place, to walk in the footwear.

Account is to be taken of sections covered by accessories or reinforcements when deciding on the composition of the upper.

- Within the meaning of note 4(b), one or more layers of textile material which do not possess the characteristics usually required for normal use of an outer sole (for example, durability, strength, etc.) are not to be taken into consideration for classification purposes.

## CHAPTER 70

## GLASS AND GLASSWARE

## Notes

1. This chapter does not cover:
  - (a) goods of heading 3207 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
  - (b) articles of Chapter 71 (for example, imitation jewellery);
  - (c) optical fibre cables of heading 8544, electrical insulators (heading 8546) or fittings of insulating material of heading 8547;
  - (d) optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of Chapter 90;
  - (e) lamps or lighting fittings, illuminated signs, illuminated nameplates or the like, having a permanently fixed light source, or parts thereof of heading 9405;
  - (f) toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or
  - (g) buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.
2. For the purposes of headings 7003, 7004 and 7005:
  - (a) glass is not regarded as 'worked' by reason of any process it has undergone before annealing;
  - (b) cutting to shape does not affect the classification of glass in sheets;
  - (c) the expression 'absorbent, reflecting or non-reflecting layer' means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.
3. The products referred to in heading 7006 remain classified in that heading, whether or not they have the character of articles.
4. For the purposes of heading 7019, the expression 'glass wool' means:
  - (a) mineral wools with a silica ( $\text{SiO}_2$ ) content not less than 60 % by weight;
  - (b) mineral wools with a silica ( $\text{SiO}_2$ ) content less than 60 % but with an alkaline oxide ( $\text{K}_2\text{O}$  or  $\text{Na}_2\text{O}$ ) content exceeding 5 % by weight or a boric oxide ( $\text{B}_2\text{O}_3$ ) content exceeding 2 % by weight.

Mineral wools which do not comply with the above specifications fall in heading 6806.
5. Throughout the nomenclature, the expression 'glass' includes fused quartz and other fused silica.

## Subheading note

1. For the purposes of subheadings 7013 22, 7013 33, 7013 41 and 7013 91, the expression 'lead crystal' means only glass having a minimum lead monoxide ( $\text{PbO}$ ) content by weight of 24 %.

## SECTION XIV

### NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMI-PRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL, AND ARTICLES THEREOF; IMITATION JEWELLERY; COIN

#### CHAPTER 71

### NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMI-PRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL, AND ARTICLES THEREOF; IMITATION JEWELLERY; COIN

#### Notes

1. Subject to note 1(A) to Section VI and except as provided below, all articles consisting wholly or partly:
  - (a) of natural or cultured pearls or of precious or semi-precious stones (natural, synthetic or reconstructed), or
  - (b) of precious metal or of metal clad with precious metal,are to be classified in this chapter.
2. (A) Headings 7113, 7114 and 7115 do not cover articles in which precious metal or metal clad with precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and paragraph (b) of the foregoing note does not apply to such articles.  
(B) Heading 7116 does not cover articles containing precious metal or metal clad with precious metal (other than as minor constituents).
3. This chapter does not cover:
  - (a) amalgams of precious metal, or colloidal precious metal (heading 2843);
  - (b) sterile surgical suture materials, dental fillings or other goods of Chapter 30;
  - (c) goods of Chapter 32 (for example, lustres);
  - (d) supported catalysts (heading 3815);
  - (e) articles of heading 4202 or 4203 referred to in note 3(B) to Chapter 42;
  - (f) articles of heading 4303 or 4304;
  - (g) goods of Section XI (textiles and textile articles);
  - (h) footwear, headgear or other articles of Chapter 64 or 65;
  - (ij) umbrellas, walking sticks or other articles of Chapter 66;
  - (k) abrasive goods of heading 6804 or 6805 or Chapter 82, containing dust or powder of precious or semi-precious stones (natural or synthetic); articles of Chapter 82 with a working part of precious or semi-precious stones (natural, synthetic or reconstructed); machinery, mechanical appliances or electrical goods, or parts thereof, of Section XVI. However, articles and parts thereof, wholly of precious or semi-precious stones (natural, synthetic or reconstructed) remain classified in this chapter, except unmounted worked sapphires and diamonds for styluses (heading 8522);
  - (l) articles of Chapter 90, 91 or 92 (scientific instruments, clocks and watches, musical instruments);
  - (m) arms or parts thereof (Chapter 93);
  - (n) articles covered by note 2 to Chapter 95;
  - (o) articles classified in Chapter 96 by virtue of note 4 to that chapter; or
  - (p) original sculptures or statuary (heading 9703), collectors' pieces (heading 9705) or antiques of an age exceeding 100 years (heading 9706), other than natural or cultured pearls or precious or semi-precious stones.
4. (A) The expression 'precious metal' means silver, gold and platinum.  
(B) The expression 'platinum' means platinum, iridium, osmium, palladium, rhodium and ruthenium.  
(C) The expression 'precious or semi-precious stones' does not include any of the substances specified in note 2(b) to Chapter 96.

5. For the purposes of this chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2 %, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:
  - (a) An alloy containing 2 % or more, by weight, of platinum is to be treated as an alloy of platinum.
  - (b) An alloy containing 2 % or more, by weight, of gold but no platinum, or less than 2 %, by weight, of platinum, is to be treated as an alloy of gold.
  - (c) Other alloys containing 2 % or more, by weight, of silver are to be treated as alloys of silver.
6. Except where the context otherwise requires, any reference in the nomenclature to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.
7. Throughout the nomenclature, the expression 'metal clad with precious metal' means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal.
8. Subject to note 1(A) to Section VI, goods answering to a description in heading 7112 are to be classified in that heading and in no other heading of the nomenclature.
9. For the purposes of heading 7113, the expression 'articles of jewellery' means:
  - (a) any small objects of personal adornment (for example, rings, bracelets, necklaces, brooches, earrings, watch-chains, fobs, pendants, tiepins, cuff links, dress-studs, religious or other medals and insignia); and
  - (b) articles of personal use of a kind normally carried in the pocket, in the handbag or on the person (for example, cigar or cigarette cases, snuff boxes, cachou or pill boxes, powder boxes, chain purses or prayer beads).These articles may be combined or set, for example, with natural or cultured pearls, precious or semi-precious stones, synthetic or reconstructed precious or semi-precious stones, tortoise shell, mother-of-pearl, ivory, natural or reconstituted amber, jet or coral.
10. For the purposes of heading 7114, the expression 'articles of goldsmiths' or 'silversmiths' wares' includes such articles as ornaments, tableware, toilet-ware, smokers' requisites and other articles of household, office or religious use.
11. For the purposes of heading 7117, the expression 'imitation jewellery' means articles of jewellery within the meaning of paragraph (a) of note 9 (but not including buttons or other articles of heading 9606, or dress-combs, hairslides or the like, or hairpins, of heading 9615), not incorporating natural or cultured pearls, precious or semi-precious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

#### Subheading notes

1. For the purposes of subheadings 7106 10, 7108 11, 7110 11, 7110 21, 7110 31 and 7110 41, the expressions 'powder' and 'in powder form' mean products of which 90 % or more by weight passes through a sieve having a mesh aperture of 0,5 mm.
2. Notwithstanding the provisions of chapter note 4(B), for the purposes of subheadings 7110 11 and 7110 19, the expression 'platinum' does not include iridium, osmium, palladium, rhodium or ruthenium.
3. For the classification of alloys in the subheadings of heading 7110, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium which predominates by weight over each other of these metals.

  - (n) articles of Chapter 97 (for example, works of art).
2. Throughout the nomenclature, the expression 'parts of general use' means:
  - (a) articles of heading 7307, 7312, 7315, 7317 or 7318 and similar articles of other base metal;
  - (b) springs and leaves for springs, of base metal, other than clock or watch springs (heading 9114); and
  - (c) articles of headings 8301, 8302, 8308, 8310 and frames and mirrors, of base metal, of heading 8306.In Chapters 73 to 76 and 78 to 82 (but not in heading 7315), references to parts of goods do not include references to parts of general use as defined above.
- Subject to the preceding paragraph and to note 1 to Chapter 83, the articles of Chapter 82 or 83 are excluded from Chapters 72 to 76 and 78 to 81.
3. Throughout the nomenclature, the expression 'base metals' means: iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.
4. Throughout the nomenclature, the term 'cermets' means products containing a microscopic heterogeneous combination of a metallic component and a ceramic component. The term 'cermets' includes sintered metal carbides (metal carbides sintered with a metal).
5. Classification of alloys (other than ferro-alloys and master alloys as defined in Chapters 72 and 74):
  - (a) An alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals.
  - (b) An alloy composed of base metals of this section and of elements not falling within this section is to be treated as an alloy of base metals of this section if the total weight of such metals equals or exceeds the total weight of the other elements present.
  - (c) In this section, the term 'alloys' includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.
6. Unless the context otherwise requires, any reference in the nomenclature to a base metal includes a reference to alloys which, by virtue of note 5 above, are to be classified as alloys of that metal.

7. Classification of composite articles:

Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the interpretative rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals.

For this purpose:

- (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal.
- (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of note 5, it is classified.
- (c) A cermet of heading 8113 is regarded as a single base metal.

8. In this section, the following expressions have the meanings hereby assigned to them:

- (a) Waste and scrap

Metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.

- (b) Powders

Products of which 90 % or more by weight passes through a sieve having a mesh aperture of 1 mm.

## CHAPTER 72

### IRON AND STEEL

#### Notes

1. In this chapter and, in the case of notes (d), (e) and (f) throughout the nomenclature, the following expressions have the meanings hereby assigned to them:

- (a) Pig iron

Iron-carbon alloys not usefully malleable, containing more than 2 % by weight of carbon and which may contain by weight one or more other elements within the following limits:

- not more than 10 % of chromium,
- not more than 6 % of manganese,
- not more than 3 % of phosphorus,
- not more than 8 % of silicon,
- a total of not more than 10 % of other elements.

- (b) Spiegeleisen

Iron-carbon alloys containing by weight more than 6 % but not more than 30 % of manganese and otherwise conforming to the specification at (a) above.

- (c) Ferro-alloys

Alloys in pigs, blocks, lumps or similar primary forms, in forms obtained by continuous casting and also in granular or powder forms, whether or not agglomerated, commonly used as an additive in the manufacture of other alloys or as de-oxidants, desulphurising agents or for similar uses in ferrous metallurgy and generally not usefully malleable, containing by weight 4 % or more of the element iron and one or more of the following:

- more than 10 % of chromium,
- more than 30 % of manganese,
- more than 3 % of phosphorus,
- more than 8 % of silicon,
- a total of more than 10 % of other elements, excluding carbon, subject to a maximum content of 10 % in the case of copper.

## (d) Steel

Ferrous materials other than those of heading 7203 which (with the exception of certain types produced in the form of castings) are usefully malleable and which contain by weight 2 % or less of carbon. However, chromium steels may contain higher proportions of carbon.

## (e) Stainless steel

Alloy steels containing, by weight, 1,2 % or less of carbon and 10,5 % or more of chromium, with or without other elements.

## (f) Other alloy steel

- 0,1 % or more of other elements (except sulphur, phosphorus, carbon and nitrogen), taken separately.

## (g) Remelting scrap ingots of iron or steel

Products roughly cast in the form of ingots without feeder-heads or hot tops, or of pigs, having obvious surface faults and not complying with the chemical composition of pig iron, spiegeleisen or ferro-alloys.

## (h) Granules

Products of which less than 90 % by weight passes through a sieve with a mesh aperture of 1 mm and of which 90 % or more by weight passes through a sieve with a mesh aperture of 5 mm.

## (ij) Semi-finished products

Continuous cast products of solid section, whether or not subjected to primary hot-rolling; and other products of solid section, which have not been further worked than subjected to primary hot-rolling or roughly shaped by forging, including blanks for angles, shapes or sections.

These products are not presented in coils.

## (k) Flat-rolled products

Rolled products of solid rectangular (other than square) cross-section, which do not conform to the definition at (ij) above in the form of:

- coils of successively superimposed layers, or
- straight lengths, which if of a thickness less than 4,75 mm are of a width measuring at least 10 times the thickness or if of a thickness of 4,75 mm or more are of a width which exceeds 150 mm and measures at least twice the thickness.

Flat-rolled products include those with patterns in relief derived directly from rolling (for example, grooves, ribs, chequers, tears, buttons, lozenges) and those which have been perforated, corrugated or polished, provided that they do not thereby assume the character of articles or products of other headings.

Flat-rolled products of a shape other than rectangular or square, of any size, are to be classified as products of a width of 600 mm or more, provided that they do not assume the character of articles or products of other headings.

(l) Bars and rods, hot-rolled, in irregularly wound coils

Hot-rolled products in irregularly wound coils, which have a solid cross-section in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods).

(m) Other bars and rods

Products which do not conform to any of the definitions at (ij), (k) or (l) above or to the definition of wire, which have a uniform solid cross-section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel).

These products may:

- have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods),
- be twisted after rolling.

(n) Angles, shapes and sections

Products having a uniform solid cross-section along their whole length which do not conform to any of the definitions at (ij), (k), (l) or (m) above or to the definition of wire.

Chapter 72 does not include products of heading 7301 or 7302.

(o) Wire

Cold-formed products in coils, of any uniform solid cross-section along their whole length, which do not conform to the definition of flat-rolled products.

(p) Hollow drill bars and rods

Hollow bars and rods of any cross-section, suitable for drills, of which the greatest external dimension of the cross-section exceeds 15 mm but does not exceed 52 mm, and of which the greatest internal dimension does not exceed one half of the greatest external dimension. Hollow bars and rods of iron or steel not conforming to this definition are to be classified in heading 7304.

2. Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by weight.
3. Iron or steel products obtained by electrolytic deposition, by pressure casting or by sintering are to be classified, according to their form, their composition and their appearance, in the headings of this chapter appropriate to similar hot-rolled products.

#### **Subheading notes**

1. In this chapter, the following expressions have the meanings hereby assigned to them:

(a) Alloy pig iron

Pig iron containing, by weight, one or more of the following elements in the specified proportions:

- more than 0,2 % of chromium,
- more than 0,3 % of copper,
- more than 0,3 % of nickel,
- more than 0,1 % of any of the following elements: aluminium, molybdenum, titanium, tungsten (wolfram), vanadium.

(b) Non-alloy free-cutting steel

- more than 0,05 % of bismuth.

(c) Silicon-electrical steel

Alloy steels containing by weight at least 0,6 % but not more than 6 % of silicon and not more than 0,08 % of carbon. They may also contain by weight not more than 1 % of aluminium but no other element in a proportion that would give the steel the characteristics of another alloy steel.

(d) High-speed steel

Alloy steels containing, with or without other elements, at least two of the three elements molybdenum, tungsten and vanadium with a combined content by weight of 7 % or more, 0,6 % or more of carbon and 3 to 6 % of chromium.

(e) Silico-manganese steel

Alloy steels containing by weight:

- not more than 0,7 % of carbon,
- 0,5 % or more but not more than 1,9 % of manganese, and
- 0,6 % or more but not more than 2,3 % of silicon, but no other element in a proportion that would give the steel the characteristics of another alloy steel.

2. For the classification of ferro-alloys in the subheadings of heading 7202, the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in note 1(c) to this chapter; by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule, the unspecified ‘other elements’ referred to in note 1(c) to this chapter must each exceed 10 % by weight.

## CHAPTER 73

## ARTICLES OF IRON OR STEEL

## Notes

- In this chapter, the expression 'cast iron' applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in note 1(d) to Chapter 72.
- In this chapter, the word 'wire' means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

**CHAPTER 74****COPPER AND ARTICLES THEREOF****Note**

1. In this chapter, the following expressions have the meanings hereby assigned to them:

- (a) Refined copper:

Metal containing at least 99,85 % by weight of copper; or

Metal containing at least 97,5 % by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

**Other elements**

Element	Limiting content % by weight
Ag	0,25
As	0,5
Cd	1,3
Cr	1,4
Mg	0,8
Pb	1,5
S	0,7
Sn	0,8
Te	0,8
Zn	1
Zr	0,3
Other elements <sup>(1)</sup> , each	0,3

(<sup>1</sup>) Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

- (b) Copper alloys:

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

- (1) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or
- (2) the total content by weight of such other elements exceeds 2,5 %.

- (c) Master alloys:

Alloys containing with other elements more than 10 % by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15 % by weight of phosphorus falls in heading 2848.

## (d) Bars and rods:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading 7403.

## (e) Profiles:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

## (f) Wire:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width.

## (g) Plates, sheets, strip and foil:

Flat-surfaced products (other than the unwrought products of heading 7403), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including 'modified rectangles' of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7409 and 7410 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

## (h) Tubes and pipes:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

**Subheading note**

1. In this chapter, the following expressions have the meanings hereby assigned to them:

(a) Copper-zinc base alloys (brasses):

Alloys of copper and zinc, with or without other elements. When other elements are present:

- zinc predominates by weight over each of such other elements,
- any nickel content by weight is less than 5 % (see copper-nickel-zinc alloys (nickel silvers)), and
- any tin content by weight is less than 3 % (see copper-tin alloys (bronzes)).

(b) Copper-tin base alloys (bronzes):

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3 % or more the zinc content by weight may exceed that of tin but must be less than 10 %.

(c) Copper-nickel-zinc base alloys (nickel silvers):

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 % or more by weight (see copper-zinc alloys (brasses)).

(d) Copper-nickel base alloys:

Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1 % of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

**CHAPTER 75****NICKEL AND ARTICLES THEREOF****Note**

1. In this chapter, the following expressions have the meanings hereby assigned to them:

(a) Bars and rods:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil:

Flat-surfaced products (other than the unwrought products of heading 7502), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including 'modified rectangles' of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7506 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

**Subheading notes**

1. In this chapter, the following expressions have the meanings hereby assigned to them:

(a) Nickel, not alloyed:

(1) the cobalt content by weight does not exceed 1,5 %, and

(2) the content by weight of any other element does not exceed the limit specified in the following table:

**Other elements**

Element	Limiting content % by weight
Fe Iron	0,5
O Oxygen	0,4
Other elements, each	0,3

(b) Nickel alloys:

Metallic substances in which nickel predominates by weight over each of the other elements provided that:

(1) the content by weight of cobalt exceeds 1,5 %,

(2) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or

(3) the total content by weight of elements other than nickel plus cobalt exceeds 1 %.

2. Notwithstanding the provisions of chapter note 1(c), for the purposes of subheading 7508 10 the term 'wire' applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

Other elements <sup>(1)</sup> , each	0,1 <sup>(2)</sup>
<sup>(1)</sup> Other elements are, for example, Cr, Cu, Mg, Mn, Ni, Zn.	
<sup>(2)</sup> Copper is permitted in a proportion greater than 0,1 % but not more than 0,2 %, provided that neither the chromium nor manganese content exceeds 0,05 %.	

(b) Aluminium alloys:

Metallic substances in which aluminium predominates by weight over each of the other elements, provided that:

- (1) the content by weight of at least one of the other elements or of iron plus silicon taken together is greater than the limit specified in the foregoing table; or
- (2) the total content by weight of such other elements exceeds 1 %.

2. Notwithstanding the provisions of chapter note 1(c), for the purposes of subheading 7616 91 the term 'wire' applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

### Additional note

1. For the purposes of subheading 7601 20 20, the following terms shall have the meanings hereby assigned to them:

- 'slabs': unwrought products which have a uniform solid cross-section along their whole length in the shape of a rectangle or other polygon, of a width exceeding 800 mm, of a thickness exceeding 280 mm and of a length always superior to the width and to the thickness. These products are intended for being rolled;
- 'billets': unwrought products which have a uniform solid cross-section along their whole length in the shape of a circle (including a flattened circle), of a diameter exceeding 125 mm. These products are intended for being extruded.

**CHAPTER 78****LEAD AND ARTICLES THEREOF****Note**

1. In this chapter, the following expressions have the meanings hereby assigned to them:

(a) Bars and rods:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil:

Flat-surfaced products (other than the unwrought products of heading 7801), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including 'modified rectangles' of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7804 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

**Subheading note**

## CHAPTER 82

**TOOLS, IMPLEMENTS, CUTLERY, SPOONS AND FORKS, OF BASE METAL; PARTS THEREOF OF BASE METAL****Notes**

1. Apart from blowlamps, portable forges, grinding wheels with frameworks, manicure and pedicure sets, and goods of heading 8209, this chapter covers only articles with a blade, working edge, working surface or other working part of:
  - (a) base metal;
  - (b) metal carbides or cermets;
  - (c) precious or semi-precious stones (natural, synthetic or reconstructed) on a support of base metal, metal carbide or cermet; or
  - (d) abrasive materials on a support of base metal, provided that the articles have cutting teeth, flutes, grooves, or the like, of base metal, which retain their identity and function after the application of the abrasive.
2. Parts of base metal of the articles of this chapter are to be classified with the articles of which they are parts, except parts separately specified as such and tool-holders for hand tools (heading 8466). However, parts of general use as defined in note 2 to Section XV are in all cases excluded from this chapter.
- Heads, blades and cutting plates for electric shavers or electric hair clippers are to be classified in heading 8510.
3. Sets consisting of one or more knives of heading 8211 and at least an equal number of articles of heading 8215 are to be classified in heading 8215.

  - (b) articles of leather or of composition leather (heading 4205) or of furskin (heading 4303), of a kind used in machinery or mechanical appliances or for other technical uses;
  - (c) bobbins, spools, cops, cones, cores, reels or similar supports, of any material (for example, Chapter 39, 40, 44 or 48 or Section XV);
  - (d) perforated cards for jacquard or similar machines (for example, Chapter 39 or 48 or Section XV);
  - (e) transmission or conveyor belts or belting, of textile material (heading 5910) or other articles of textile material for technical uses (heading 5911);
  - (f) precious or semi-precious stones (natural, synthetic or reconstructed) of headings 7102 to 7104, or articles wholly of such stones of heading 7116, except unmounted worked sapphires and diamonds for styli (heading 8522);
  - (g) parts of general use, as defined in note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39);
  - (h) drill pipe (heading 7304);
  - (ij) endless belts of metal wire or strip (Section XV);
  - (k) articles of Chapter 82 or 83;
  - (l) articles of Section XVII;
  - (m) articles of Chapter 90;
  - (n) clocks, watches or other articles of Chapter 91;
  - (o) interchangeable tools of heading 8207 or brushes of a kind used as parts of machines (heading 9603); similar interchangeable tools are to be classified according to the constituent material of their working part (for example, in Chapter 40, 42, 43, 45 or 59 or heading 6804 or 6909);
  - (p) articles of Chapter 95; or
  - (q) typewriter or similar ribbons, whether or not on spools or in cartridges (classified according to their constituent material, or in heading 9612 if inked or otherwise prepared for giving impressions).
2. Subject to note 1 to this section, note 1 to Chapter 84 and note 1 to Chapter 85, parts of machines (not being parts of the articles of heading 8484, 8544, 8545, 8546 or 8547) are to be classified according to the following rules:
  - (a) Parts which are goods included in any of the headings of Chapter 84 or 85 (other than headings 8409, 8431, 8448, 8466, 8473, 8487, 8503, 8522, 8529, 8538 and 8548) are in all cases to be classified in their respective headings.
  - (b) Other parts, if suitable for use solely or principally with a particular kind of machine, or with a number of machines of the same heading (including a machine of heading 8479 or 8543) are to be classified with the machines of that kind or in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate. However, parts which are equally suitable for use principally with the goods of headings 8517 and 8525 to 8528 are to be classified in heading 8517.
  - (c) All other parts are to be classified in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate or, failing that, in heading 8487 or 8548.
3. Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.

4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in Chapter 84 or 85, then the whole falls to be classified in the heading appropriate to that function.
5. For the purposes of these notes, the expression 'machine' means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of Chapter 84 or 85.

#### Additional notes

1. Tools necessary for the assembly or maintenance of machines are to be classified with those machines if imported with them. Interchangeable tools imported with machines are also to be classified therewith if they form part of the normal equipment of the machines and are normally sold with them.
2. Should the customs so require, the declarant shall produce, in support of his declaration, an illustrated document (for example, instructions, prospectus, a page from a catalogue, a photograph) giving the normal description of the machine, its uses and essential characteristics and, in respect of an unassembled or disassembled machine, an assembly plan and a list of the contents of the various packages.
3. The provisions of general rule 2(a) are also applicable, at the request of the declarant and subject to conditions stipulated by the competent authorities, to machines imported in split consignments.

- (b) office machinery of heading 8472.

Heading 8424 does not cover:

- (a) ink-jet printing machines (heading 8443); or
- (b) water-jet cutting machines (heading 8456).

3. A machine tool for working any material which answers to a description in heading 8456 and at the same time to a description in heading 8457, 8458, 8459, 8460, 8461, 8464 or 8465 is to be classified in heading 8456.

4. Heading 8457 applies only to machine tools for working metal, other than lathes (including turning centres), which can carry out different types of machining operations either:

- (a) by automatic tool change from a magazine or the like in conformity with a machining programme (machining centres);
- (b) by the automatic use, simultaneously or sequentially, of different unit heads working on a fixed position workpiece (unit construction machines, single station); or
- (c) by the automatic transfer of the workpiece to different unit heads (multi-station transfer machines).

5. (A) For the purposes of heading 8471, the expression 'automatic data-processing machines' means machines, capable of

- (1) storing the processing program or programs and at least the data immediately necessary for the execution of the program;
- (2) being freely programmed in accordance with the requirements of the user;
- (3) performing arithmetical computations specified by the user; and
- (4) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run.

(B) Automatic data-processing machines may be in the form of systems consisting of a variable number of separate units.

(C) Subject to paragraph (D) and (E) below, a unit is to be regarded as being a part of an automatic data-processing system if it meets all of the following conditions:

- (1) it is of a kind solely or principally used in an automatic data-processing system;
- (2) it is connectable to the central processing unit either directly or through one or more other units; and
- (3) it is able to accept or deliver data in a form (codes or signals) which can be used by the system.

Separately presented units of an automatic data-processing machine are to be classified in heading 8471.

However keyboards, X-Y coordinate input devices and disk storage units which satisfy the conditions of paragraphs (C)(2) and (C)(3) above, are in all cases to be classified as units of heading 8471.

(D) Heading 8471 does not cover the following when presented separately, even if they meet all of the conditions set forth in note 5 (C) above:

- (1) printers, copying machines, facsimile machines, whether or not combined;
- (2) apparatus for the transmission or reception of voice, images or other data, including apparatus for communication in a wired or wireless network (such as a local or wide area network);
- (3) loudspeakers and microphones;
- (4) television cameras, digital cameras and video camera recorders;
- (5) monitors and projectors, not incorporating television reception apparatus.

(E) Machines incorporating or working in conjunction with an automatic data-processing machine and performing a specific function other than data processing are to be classified in the headings appropriate to their respective functions or, failing that, in residual headings.

6. Heading 8482 applies, inter alia, to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1 % or by more than 0,05 mm, whichever is less.

Other steel balls are to be classified in heading 7326.

7. A machine which is used for more than one purpose is, for the purposes of classification, to be treated as if its principal purpose were its sole purpose.

Subject to note 2 to this chapter and note 3 to Section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires, to be classified in heading 8479. Heading 8479 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.

8. For the purposes of heading 8470, the term 'pocket-size' applies only to machines the dimensions of which do not exceed 170 mm × 100 mm × 45 mm.
9. (A) Notes 8(a) and 8(b) to Chapter 85 also apply with respect to the expressions 'semiconductor devices' and 'electronic integrated circuits', respectively, as used in this note and in heading 8486. However, for the purposes of this note and of heading 8486, the expression 'semiconductor devices' also covers photosensitive semiconductor devices and light emitting diodes.
- (B) For the purposes of this note and of heading 8486, the expression 'manufacture of flat panel displays' covers the fabrication of substrates into a flat panel. It does not cover the manufacture of glass or the assembly of printed circuit boards or other electronic components onto the flat panel. The expression 'flat panel display' does not cover cathode-ray tube technology.
- (C) Heading 8486 also includes machines and apparatus solely or principally of a kind used for:
- (1) the manufacture or repair of masks and reticles;
  - (2) assembling semiconductor devices or electronic integrated circuits;
  - (3) lifting, handling, loading or unloading of boules, wafers, semiconductor devices, electronic integrated circuits and flat panel displays.
- (D) Subject to note 1 to Section XVI and note 1 to Chapter 84, machines and apparatus answering to the description in heading 8486 are to be classified in that heading and in no other heading of the nomenclature.

#### Subheading notes

1. For the purposes of subheading 8471 49, the term 'systems' means automatic data-processing machines whose units satisfy the conditions laid down in note 5(C) to Chapter 84 and which comprise at least a central processing unit, one input unit (for example, a keyboard or a scanner), and one output unit (for example, a visual display unit or a printer).
2. Subheading 8482 40 applies only to bearings with cylindrical rollers of a uniform diameter not exceeding 5 mm and having a length which is at least three times the diameter. The ends of the rollers may be rounded.

#### Additional notes

1. For the purposes of subheadings 8407 10 and 8409 10, the expression 'aircraft engines' shall apply only to engines designed for fitting with an airscrew or rotor.
2. Subheading 8471 70 30 shall also apply to CD-ROM drives, being storage units for automatic data-processing machines, which consist of drive units designed for retrieving the signals from CD-ROMs, audio CDs and photo CDs and equipped with a jack for earphones, a volume-control button or a start/stop button.

**CHAPTER 85****ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES****Notes**

1. This chapter does not cover:
  - (a) electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;
  - (b) articles of glass of heading 7011;
  - (c) machines and apparatus of heading 8486;
  - (d) vacuum apparatus of a kind used in medical, surgical, dental or veterinary science (heading 9018); or
  - (e) electrically heated furniture of Chapter 94.
2. Headings 8501 to 8504 do not apply to goods described in heading 8511, 8512, 8540, 8541 or 8542.  
However, metal tank mercury arc rectifiers remain classified in heading 8504.
3. Heading 8509 covers only the following electromechanical machines of the kind commonly used for domestic purposes:
  - (a) floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;
  - (b) other machines provided the weight of such machines does not exceed 20 kg. The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 8414), centrifugal clothes-dryers (heading 8421), dishwashing machines (heading 8422), household washing machines (heading 8450), roller or other ironing machines (heading 8420 or 8451), sewing machines (heading 8452), electric scissors (heading 8467) or to electrothermic appliances (heading 8516).
4. For the purposes of heading 8523:
  - (a) 'solid-state non-volatile storage devices' (for example, 'flash memory cards' or 'flash electronic storage cards') are storage devices with a connecting socket, comprising in the same housing one or more flash memories (for example, 'Flash E<sup>2</sup>PROM') in the form of integrated circuits mounted on a printed circuit board. They may include a controller in the form of an integrated circuit and discrete passive components, such as capacitors and resistors;
  - (b) the term 'smart cards' means cards which have embedded in them one or more electronic integrated circuits (a microprocessor, random access memory (RAM) or read-only memory (ROM)) in the form of chips. These cards may contain contacts, a magnetic stripe or an embedded antenna but do not contain any other active or passive circuit elements.
5. For the purposes of heading 8534, 'printed circuits' are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the 'film circuit' technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).  
The expression 'printed circuits' does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.  
Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 8542.
6. For the purpose of heading 8536, 'connectors for optical fibres, optical-fibre bundles or cables' means connectors that simply mechanically align optical fibres end to end in a digital line system. They perform no other function, such as the amplification, regeneration or modification of a signal.
7. Heading 8537 does not include cordless infrared devices for the remote control of television receivers or other electrical equipment (heading 8543).

8. For the purposes of headings 8541 and 8542:

- (a) 'Diodes, transistors and similar semiconductor devices' are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field.
- (b) 'Electronic integrated circuits' are:
  - (1) monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, inductances, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (for example, doped silicon, gallium arsenide, silicon germanium, indium phosphide) and are inseparably associated;
  - (2) hybrid integrated circuits in which passive elements (resistors, capacitors, inductances, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, by interconnections or interconnecting cables, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;
  - (3) multichip integrated circuits consisting of two or more interconnected monolithic integrated circuits combined to all intents and purposes indivisibly, whether or not on one or more insulating substrates, with or without leadframes, but with no other active or passive circuit elements.

For the classification of the articles defined in this note, headings 8541 and 8542 shall take precedence over any other heading in the nomenclature, except in the case of heading 8523, which might cover them by reference to, in particular, their function.

9. For the purposes of heading 8548, 'spent primary cells, spent primary batteries and spent electric accumulators' are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

#### **Subheading note**

1. Subheading 8527 12 covers only cassette-players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm × 100 mm × 45 mm.

#### **Additional notes**

1. Subheadings 8519 20 10, 8519 30 00 and 8519 89 11 are to be taken not to apply to sound reproducing apparatus with laser reading system.
2. Subheading note 1 is applicable, mutatis mutandis, to subheadings 8519 81 15 and 8519 81 65.
3. For the purposes of subheadings 8528 71 15 and 8528 71 91 only, the term 'modem' covers devices or equipment that modulate and demodulate incoming and outgoing signals, such as V.90-modems or cable modems, and other devices that use like technologies for gaining access to the Internet, such as WLAN, ISDN and Ethernet. The extent of access to the Internet may be limited by the service provider.

Apparatus of these subheadings must enable a two-way communication process or the two-way flow of information for the purposes of providing interactive information exchange.

**SECTION XVII****VEHICLES, AIRCRAFT, VESSELS AND ASSOCIATED TRANSPORT EQUIPMENT****Notes**

1. This section does not cover articles of heading 9503 or 9508, or bobsleighs, toboggans or the like of heading 9506.
2. The expressions 'parts' and 'parts and accessories' do not apply to the following articles, whether or not they are identifiable as for the goods of this section:
  - (a) joints, washers and the like of any material (classified according to their constituent material or in heading 8484) or other articles of vulcanised rubber other than hard rubber (heading 4016);
  - (b) parts of general use, as defined in note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39);
  - (c) articles of Chapter 82 (tools);
  - (d) articles of heading 8306;
  - (e) machines or apparatus of headings 8401 to 8479, or parts thereof; articles of heading 8481 or 8482 or, provided they constitute integral parts of engines or motors, articles of heading 8483;
  - (f) electrical machinery or equipment (Chapter 85);
  - (g) articles of Chapter 90;
  - (h) articles of Chapter 91;
  - (ij) arms (Chapter 93);
  - (k) lamps or lighting fittings of heading 9405;
  - (l) brushes of a kind used as parts of vehicles (heading 9603).
3. References in Chapters 86 to 88 to 'parts' or 'accessories' do not apply to parts or accessories which are not suitable for use solely or principally with the articles of those chapters. A part or accessory which answers to a description in two or more of the headings of those chapters is to be classified under that heading which corresponds to the principal use of that part or accessory.
4. For the purposes of this section:
  - (a) vehicles specially constructed to travel on both road and rail are classified under the appropriate heading of Chapter 87;
  - (b) amphibious motor vehicles are classified under the appropriate heading of Chapter 87;
  - (c) aircraft specially constructed so that they can also be used as road vehicles are classified under the appropriate heading of Chapter 88.
5. Air-cushion vehicles are to be classified in this section with the vehicles to which they are most akin as follows:
  - (a) in Chapter 86 if designed to travel on a guide-track (hovertrains);
  - (b) in Chapter 87 if designed to travel over land or over both land and water;
  - (c) in Chapter 89 if designed to travel over water, whether or not able to land on beaches or landing stages or also able to travel over ice.

Parts and accessories of air-cushion vehicles are to be classified in the same way as those of vehicles of the heading in which the air-cushion vehicles are classified under the above provisions.

Hovertrain track fixtures and fittings are to be classified as railway track fixtures and fittings, and signalling, safety or traffic control equipment for hovertrain transport systems as signalling, safety or traffic control equipment for railways.

## Additional notes

1. Subject to the provisions of additional note 3 to Chapter 89, tools and articles necessary for the maintenance or repair of vehicles, aircraft or vessels are to be classified with those vehicles, aircraft or vessels if presented with them. Other accessories presented with vehicles, aircraft or vessels are also to be classified therewith, if they form part of the normal equipment of the vehicles, aircraft or vessels and are normally sold with them.
2. The provisions of general rule 2(a) are also applicable, at the request of the declarant and subject to conditions stipulated by the competent authorities, to goods of headings 8608, 8805, 8905 and 8907 imported in split consignments.

## CHAPTER 87

## VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING STOCK, AND PARTS AND ACCESSORIES THEREOF

## Notes

1. This chapter does not cover railway or tramway rolling stock designed solely for running on rails.
2. For the purposes of this chapter, 'tractors' means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilisers or other goods.

Machines and working tools designed for fitting to tractors of heading 8701 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.

3. Motor chassis fitted with cabs fall in headings 8702 to 8704, and not in heading 8706.
4. Heading 8712 includes all children's bicycles. Other children's cycles fall in heading 9503.

## CHAPTER 89

## SHIPS, BOATS AND FLOATING STRUCTURES

**Note**

1. A hull, an unfinished or incomplete vessel, assembled, unassembled or disassembled, or a complete vessel unassembled or disassembled, is to be classified in heading 8906 if it does not have the essential character of a vessel of a particular kind.

**Additional notes**

1. Subheadings 8901 10 10, 8901 20 10, 8901 30 10, 8901 90 10, 8902 00 10, 8903 91 10, 8903 92 10, 8904 00 91 and 8906 90 10 are to be taken to apply only to vessels, designed as seagoing, having a hull of an overall length (excluding any projecting parts) of not less than 12 m. However, fishing boats and lifeboats, designed as seagoing, shall be considered as seagoing vessels regardless of their length.
2. Subheadings 8905 10 10 and 8905 90 10 are to be taken to apply only to vessels and floating docks, designed as seagoing.
3. For the purpose of heading 8908, the expression ‘vessels and other floating structures for breaking up’ includes the following articles when presented for breaking up, on condition that they have formed part of their normal equipment:
- spare parts (such as propellers), whether or not in a new condition,
  - movable articles (furniture, kitchen equipment, tableware, etc.) showing clear evidence of use.

## SECTION XVIII

### OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; CLOCKS AND WATCHES; MUSICAL INSTRUMENTS; PARTS AND ACCESSORIES THEREOF

#### CHAPTER 90

### OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; PARTS AND ACCESSORIES THEREOF

#### Notes

1. This chapter does not cover:
  - (a) articles of a kind used in machines, appliances or for other technical uses, of vulcanised rubber other than hard rubber (heading 4016), of leather or of composition leather (heading 4205) or of textile material (heading 5911);
  - (b) supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (Section XI);
  - (c) refractory goods of heading 6903; ceramic wares for laboratory, chemical or other technical uses, of heading 6909;
  - (d) glass mirrors, not optically worked, of heading 7009, or mirrors of base metal or of precious metal, not being optical elements (heading 8306 or Chapter 71);
  - (e) goods of heading 7007, 7008, 7011, 7014, 7015 or 7017;
  - (f) parts of general use, as defined in note 2 to Section XV, of base metal (Section XV) or similar goods of plastics (Chapter 39);
  - (g) pumps incorporating measuring devices, of heading 8413; weight-operated counting and checking machinery, or separately presented weights for balances (heading 8423); lifting or handling machinery (headings 8425 to 8428); paper or paperboard cutting machines of all kinds (heading 8441); fittings for adjusting work or tools on machine tools, of heading 8466, including fittings with optical devices for reading the scale (for example, optical dividing heads) but not those which are in themselves essentially optical instruments (for example, alignment telescopes); calculating machines (heading 8470); valves and other appliances of heading 8481; machines and apparatus (including apparatus for the projection or drawing of circuit patterns on sensitised semiconductor materials) of heading 8486;
  - (h) searchlights or spotlights of a kind used for cycles or motor vehicles (heading 8512); portable electric lamps of heading 8513; cinematographic sound recording, reproducing or re-recording apparatus (heading 8519); sound-heads (heading 8522); television cameras, digital cameras and video camera recorders (heading 8525); radar apparatus, radio navigational aid apparatus or radio remote control apparatus (heading 8526); connectors for optical fibres, optical fibre bundles or cables (heading 8536); numerical control apparatus of heading 8537; sealed beam lamp units of heading 8539; optical fibre cables of heading 8544;
  - (ij) searchlights or spotlights of heading 9405;
  - (k) articles of Chapter 95;
  - (l) capacity measures, which are to be classified according to their constituent material; or
  - (m) spools, reels or similar supports (which are to be classified according to their constituent material, for example, in heading 3923 or Section XV).
2. Subject to note 1 above, parts and accessories for machines, apparatus, instruments or articles of this chapter are to be classified according to the following rules:
  - (a) Parts and accessories which are goods included in any of the headings of this chapter or of Chapter 84, 85 or 91 (other than heading 8487, 8548 or 9033) are in all cases to be classified in their respective headings.

- (b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading 9010, 9013 or 9031) are to be classified with the machines, instruments or apparatus of that kind.
- (c) All other parts and accessories are to be classified in heading 9033.
3. The provisions of notes 3 and 4 to Section XVI apply also to this chapter.
4. Heading 9005 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this chapter or Section XVI; such telescopic sights and telescopes are to be classified in heading 9013.
5. Measuring or checking optical instruments, appliances or machines which, but for this note, could be classified both in heading 9013 and in heading 9031 are to be classified in heading 9031.
6. For the purposes of heading 9021, the expression 'orthopaedic appliances' means appliances for:
- preventing or correcting bodily deformities; or
  - supporting or holding parts of the body following an illness, operation or injury.

Orthopaedic appliances include footwear and special insoles designed to correct orthopaedic conditions, provided that they are either (1) made to measure or (2) mass-produced, presented singly and not in pairs and designed to fit either foot equally.

7. Heading 9032 applies only to:

- (a) instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically measuring its actual value; and
- (b) automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically measuring its actual value.

#### Additional note

1. For the purposes of subheadings 9015 10 10, 9015 20 10, 9015 30 10, 9015 40 10, 9015 80 11, 9015 80 19, 9024 10 11, 9024 10 13, 9024 10 19, 9024 80 11, 9024 80 19, 9025 19 20, 9025 80 40, 9026 10 21, 9026 10 29, 9026 20 20, 9026 80 20, 9027 10 10, 9027 80 11, 9027 80 13, 9027 80 17, 9030 20 91, 9030 33 10, 9030 89 30, 9031 80 32, 9031 80 34, 9031 80 38 and 9032 10 20, the expression 'electronic' means instruments and apparatus which incorporate one or more articles of heading 8540, 8541 or 8542 but for the purposes of the foregoing, no account shall be taken of articles of heading 8540, 8541 or 8542 which have solely the function of rectifying current or which are included in the power pack of instruments or apparatus.

## CHAPTER 91

## CLOCKS AND WATCHES AND PARTS THEREOF

## Notes

1. This chapter does not cover:
  - (a) clock or watch glasses or weights (classified according to their constituent material);
  - (b) watch chains (heading 7113 or 7117, as the case may be);
  - (c) parts of general use defined in note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading 7115); clock or watch springs are, however, to be classified as clock or watch parts (heading 9114);
  - (d) bearing balls (heading 7326 or 8482, as the case may be);
  - (e) articles of heading 8412 constructed to work without an escapement;
  - (f) ball bearings (heading 8482); or
  - (g) articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).
2. Heading 9101 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of headings 7101 to 7104. Watches with case of base metal inlaid with precious metal fall in heading 9102.
3. For the purposes of this chapter, the expression 'watch movements' means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.
4. Except as provided in note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this chapter.

## SECTION XXI

**WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES**

## CHAPTER 97

**WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES****Notes**

1. This chapter does not cover:
  - (a) unused postage or revenue stamps, postal stationery (stamped paper) or the like, of heading 4907;
  - (b) theatrical scenery, studio backcloths or the like, of painted canvas (heading 5907) except if they may be classified in heading 9706; or
  - (c) pearls, natural or cultured, or precious or semi-precious stones (headings 7101 to 7103).
2. For the purposes of heading 9702, the expression 'original engravings, prints and lithographs' means impressions produced directly, in black and white or in colour, of one or of several plates wholly executed by hand by the artist, irrespective of the process or of the material employed by him, but not including any mechanical or photomechanical process.
3. Heading 9703 does not apply to mass-produced reproductions or works of conventional craftsmanship of a commercial character, even if these articles are designed or created by artists.
4. (A) Subject to notes 1 to 3 above, articles of this chapter are to be classified in this chapter and not in any other chapter of the nomenclature.  
 (B) Heading 9706 does not apply to articles of the preceding headings of this chapter.
5. Frames around paintings, drawings, pastels, collages or similar decorative plaques, engravings, prints or lithographs are to be classified with those articles, provided they are of a kind and of a value normal to those articles.

Frames which are not of a kind or of a value normal to the articles referred to in this note are to be classified separately.

**Additional note**

1. Heading 9705 includes collectors' motor vehicles of historical or ethnographic interest which are:

- (a) in their original state, without substantial changes to the chassis, body, steering, braking, transmission or suspension system and engine. Repairing and restoring is allowed, and broken or worn-out parts, accessories and units can have been replaced, provided that the vehicle is preserved and maintained in the historically correct condition. Modernised or modified vehicles are excluded;
- (b) at least thirty years old;
- (c) of a model or type which is no longer in production.

The requisite characteristics for inclusion in a collection — being relatively rare, not being normally used for its original purpose, being the subject of special transactions outside of the normal trade in similar utility articles, and being of greater value — are presumed to be fulfilled for vehicles which comply with the above three criteria.

This heading also includes, as collectors' vehicles:

- motor vehicles, irrespective of their date of manufacture, which can be proved to have been used in the course of an historic event,
- motor racing vehicles which can be proved to have been designed, built and used solely for competition and which have achieved significant sporting success at prestigious national or international events.

Parts and accessories for vehicles are classified in this heading, provided that they are original parts or accessories for collectors' vehicles, that they are at least thirty years old, and that they are no longer in production.

Replicas and reproductions are excluded, unless they fulfil the above three criteria.

Commission Regulations (EU) No 113/2010<sup>(1)</sup> of 9 February 2010 and (EC) No 1982/2004<sup>(2)</sup> of 18 November 2004 allow the Member States to use a simplified declaration procedure for recording exports and arrivals or dispatches of complete industrial plant in the external and intra-EU trade statistics of the Union. National instructions define the criteria and procedures for this simplification, in the case where the Member State applies the simplification possibility (see the list of competent departments, below).

**SPECIAL COMBINED NOMENCLATURE CODES****Sub-chapter I****Combined-Nomenclature codes for certain specific movements of goods  
(Import or export)****Additional notes**

1. The provisions of this sub-chapter apply only to the movement of goods to which it refers.

Such goods are to be declared in the relevant subheading, if the conditions and requirements thereof and of any applicable regulations are met. The description of such goods must be sufficiently precise, to enable them to be identified.

Member States may, however, choose not to apply the provisions of this sub-chapter, in so far as import duties or other charges are at stake.

2. The provisions of this sub-chapter do not apply to the trading of goods between Member States.

3. Imported and exported goods as provided for in Regulation (EC) No 1186/2009 that have been refused the benefit of the relief of import or export duties are excluded from this sub-chapter.

Movements containing goods which are subject to any prohibition or restriction are also excluded from this sub-chapter.

SECTION I

**AGRICULTURAL ANNEXES**

## ANNEX 1

### **AGRICULTURAL COMPONENTS (EA), ADDITIONAL DUTIES FOR SUGAR (AD S/Z) AND ADDITIONAL DUTIES FOR FLOUR (AD F/M)**

Where reference is made to this Annex, the agricultural component (EA) as well as, where appropriate, the additional duty on sugar ('AD S/Z') or the additional duty on flour ('AD F/M'), is to be determined on the basis of the content of:

- milkfat,
- milk protein,
- sucrose/invert sugar/isoglucose,
- starch/glucose on the product concerned.

A corresponding additional code for these goods can be obtained from Table 1, below.

The agricultural component (in euro per 100 kilograms net) to be applied to the goods is set out in column 2 of Table 2. The additional duty on sugar ('AD S/Z') (in euro per 100 kilograms net) given in column 3 of Table 2 shall not apply in full, unless the tariff schedule makes reference to Annex 1 by means of the symbol 'AD S/Z'; the additional duty on flour ('AD F/M') (in euro per 100 kilograms net) shall not apply in full, unless the tariff schedule makes reference to Annex 1 by means of the symbol 'AD F/M'.

<sup>(1)</sup> Milk proteins

Caseins and/or caseinates forming part of goods shall not be regarded as milk proteins if the goods do not have any other constituent of lactic origin.

Milkfat contained in the goods at less than 1 %, and lactose at less than 1 %, by weight, are not considered as other constituents of lactic origin.

When customs formalities are completed, the person concerned must include in the appropriate declaration: 'only milk ingredient: casein/caseinate', if such is the case.

<sup>(2)</sup> Starch/glucose

The content of the goods (as presented) in starch, its degradation products, i.e. all the polymers of glucose, and the glucose, determined as glucose and expressed as starch (on a dry matter basis, 100 % purity; factor for conversion of glucose to starch: 0,9).

However, where a mixture of glucose and fructose is declared (in whatever form) and/or is found to be present in the goods, the amount of glucose to be included in the above calculation is that which is in excess of the fructose content of the goods.

<sup>(3)</sup> Sucrose/invert sugar/isoglucose

The content of the goods (as presented), in sucrose, together with the sucrose which results from expressing as sucrose any mixture of glucose and fructose (the arithmetical sum of the amounts of these two sugars multiplied by 0,95), which is declared (in whatever form) and/or found to be present in the goods.

However, where the fructose content of the goods is less than the glucose content, the amount of glucose to be included in the above calculation shall be an amount equal, by weight, to that of fructose.

Note:

In all cases, where a hydrolysis product of lactose is declared, and/or galactose is found to be present among the sugars, then the amount of glucose equal to that of galactose is deducted from the total glucose content before any other calculations are carried out.
