

II

(Non-legislative acts)

REGULATIONS

COMMISSION REGULATION (EU) 2016/1015

of 17 June 2016

amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for 1-naphthylacetamide, 1-naphthylacetic acid, chloridazon, fluazifop-P, fuberidazole, mepiquat and tralkoxydim in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1)(a) and Article 49(2) thereof,

Whereas:

- (1) For 1-naphthylacetamide, 1-naphthylacetic acid, chloridazon, fluazifop-P, fuberidazole, mepiquat and tralkoxydim maximum residue levels (MRLs) were set in Part A of Annex III to Regulation (EC) No 396/2005.
- (2) For 1-naphthylacetamide and 1-naphthylacetic acid, the European Food Safety Authority, hereinafter 'the Authority', submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽²⁾. It proposed to change the residue definition and concluded that concerning the MRLs for apples, pears, tomatoes and aubergines some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority concluded that concerning the MRLs for oranges, lemons, mandarins, cherries, peaches, plums, grapes, strawberries, raspberries, table olives, kiwi, potatoes, peppers, cucumbers, courgettes, melons, watermelons, spinach, beans (fresh, with pods), beans (fresh, without pods), peas (fresh, with pods), peas (fresh, without pods), asparagus, celery, globe artichoke, beans (dry), chicory roots no information was available and that further consideration by risk managers was required. The MRLs for these products should be set at the specific limit of determination.
- (3) For chloridazon, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽³⁾. It proposed to change the residue definition. It

⁽¹⁾ OJ L 70, 16.3.2005, p. 1.

⁽²⁾ European Food Safety Authority; Review of the existing maximum residue levels (MRLs) for 1-naphthylacetamide and 1-naphthylacetic acid according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2015;13(8):4213.

⁽³⁾ European Food Safety Authority; Review of the existing maximum residue levels (MRLs) for chloridazon according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2015;13(9):4226.

recommended lowering the MRL for sugar beet root. For other products it recommended keeping the existing MRL. It concluded that concerning the MRLs for lamb's lettuce, lettuce, scarole, cress, land cress, rocket, red mustard, purslane, asparagus, cardoons, celery, fennel, globe artichokes, leek, rhubarb, herbal infusions (dried, flowers), herbal infusions (dried, leaves), spices (bark), spices (buds) and spices (flower stigma) no information was available and that further consideration by risk managers was required. The authority indicated that a potential for accumulation of chloridazon residues in certain crops grown in rotation is expected and calculated MRLs for the products concerned which take into account that potential for accumulation after different plant back intervals and left it to risk managers to choose the required option. For the products concerned, for which the active substance is not to be used, residues inevitably result from soils where the active substance was previously used for other crops. As there is no risk for consumers, MRLs should be set for the products concerned in Annex II to Regulation (EC) No 396/2005 at the level identified by the Authority. The authority concluded that concerning the MRLs for beetroot, horseradish, garlic, onions, shallots, leaves and sprouts of brassica, spinach, beet leaves (chard), herbs, swine muscle, fat, liver and kidney, bovine muscle, fat, liver and kidney, sheep muscle, fat, liver and kidney, goat muscle, fat, liver and kidney, cattle, sheep and goat milk some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for these products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.

- (4) For fluazifop-P, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽¹⁾. It proposed to change the residue definition. It recommended lowering the MRLs for grapefruit, oranges, lemons, limes, mandarins, almonds, brazil nuts, cashew nuts, chestnuts, hazelnuts, macadamia, pecans, pine nuts, pistachios, walnuts, apples, pears, quinces, apricots, cherries, peaches, plums, table and wine grapes, cane fruit, other small fruits and berries, figs, table olives, kumquats, kiwi, bananas, pineapples, yams, garlic, shallots, cucumbers, gherkins, lettuce and other salad plants, spinach, purslane, beet leaves, witloof, herbs, asparagus, celery, fennel, dry peas, sunflower seed, rape seed, mustard seed, borage, gold of pleasure, olives for oil production, and chicory roots. For other products it recommended raising or keeping the existing MRLs. It identified concerning the MRLs for tomatoes, peppers, head cabbage and fresh beans without pods a risk for consumers. It is therefore appropriate to lower these MRLs. It concluded that concerning the MRLs for strawberries, carrots, herbal infusions (dried flowers, leaves and roots), hops, spices (seeds, fruits and berries and roots and rhizome), swine muscle, fat, liver and kidney, bovine muscle, fat, liver and kidney, sheep muscle, fat, liver and kidney, goat muscle, fat, liver and kidney, poultry muscle, fat and liver, cattle, sheep and goat milk and birds' eggs some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for these products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority concluded that concerning the MRLs for spring onions, leek and cotton seed no information was available, and that further consideration by risk managers was required. The MRLs for these products should be set at the specific limit of determination.
- (5) For fuberidazole, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽²⁾. It recommended lowering the MRLs for barley, oats, rye and wheat.
- (6) For mepiquat, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽³⁾. It proposed to change the residue definition and recommended raising or keeping the existing MRLs for several products. It concluded that concerning the MRL for rape seed some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRL for this product should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority

⁽¹⁾ European Food Safety Authority; Review of the existing maximum residue levels (MRLs) for fluazifop-P according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2015;13(9):4228.

⁽²⁾ European Food Safety Authority; Review of the existing maximum residue levels (MRLs) for fuberidazole according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2015;13(9):4220.

⁽³⁾ European Food Safety Authority; Review of the existing maximum residue levels (MRLs) for mepiquat according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2015;13(8):4214.

concluded that concerning the MRLs for linseed and sunflower seed no information was available and that further consideration by risk managers was required. The MRLs for these products should be set at the specific limit of determination.

- (7) For tralkoxydim, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽¹⁾. It proposed to change the residue definition and concluded that concerning the MRLs for barley grain and wheat grain some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.
- (8) As regards products on which the use of the plant protection product concerned is not authorised, and for which no import tolerances or Codex maximum residue limits (CXLs) exist, MRLs should be set at the specific limit of determination or the default MRL should apply, as provided for in Article 18(1)(b) of Regulation (EC) No 396/2005.
- (9) The Commission consulted the European Union reference laboratories for residues of pesticides as regards the need to adapt certain limits of determination. As regards several substances, those laboratories concluded that for certain commodities technical development requires the setting of specific limits of determination.
- (10) Based on the reasoned opinions of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (11) Through the World Trade Organisation, the trading partners of the Union were consulted on the new MRLs and their comments have been taken into account.
- (12) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (13) In order to allow for the normal marketing, processing and consumption of products, this Regulation should provide for a transitional arrangement for products which have been produced before the modification of the MRLs and for which information shows that a high level of consumer protection is maintained. Because a risk to consumers cannot be excluded at the current MRL, the value for fluazifop-P of 0,01 mg/kg for peppers should apply to all products from the date of application of this Regulation.
- (14) A reasonable period should be allowed to elapse before the modified MRLs become applicable in order to permit Member States, third countries and food business operators to prepare themselves to meet the new requirements which will result from the modification of the MRLs.
- (15) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes II and III to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

⁽¹⁾ European Food Safety Authority; Review of the existing maximum residue levels (MRLs) for tralkoxydim according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2015;13(9):4227.

Article 2

As regards the active substances 1-naphthylacetamide, 1-naphthylacetic acid, chloridazon, fuberidazole, mepiquat and tralkoxydim in and on all products, Regulation (EC) No 396/2005 as it stood before being amended by this Regulation shall continue to apply to products which were produced before 19 January 2017.

As regards the active substance fluazifop-P in and on all products except peppers, Regulation (EC) No 396/2005 as it stood before being amended by this Regulation shall continue to apply to products which were produced before 19 January 2017.

Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 19 January 2017.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 17 June 2016.

For the Commission
The President
Jean-Claude JUNCKER

ANNEX

Annexes II and III to Regulation (EC) No 396/2005 are amended as follows:

- (1) In Annex II, the following columns for 1-naphthylacetamide and 1-naphthylacetic acid, chloridazon, fluazifop-P, fuberidazole, mepiquat and tralkoxydim are added:

'Pesticide residues and maximum residue levels (mg/kg)

Code number	Groups and examples of individual products to which the MRLs apply ^(*)	1-Naphthylacetamide and 1-naphthylacetic acid (sum of 1-naphthylacetamide and 1-naphthylacetic acid and its salts, expressed as 1-naphthylacetic acid)	Chloridazon (R) (sum of chloridazon and chloridazon-desphenyl, expressed as chloridazon)	Fluazifop-P (sum of all the constituent isomers of fluazifop, its esters and its conjugates, expressed as fluazifop)	Fuberidazole	Mepiquat (sum of mepiquat and its salts, expressed as mepiquat chloride)	Tralkoxydim (sum of the constituent isomers of tralkoxydim)

(*) Indicates lower limit of analytical determination

(**) Pesticide-code combination for which the MRL as set in Annex III Part B applies.

(^e) For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

1-Naphthylacetamide and 1-naphthylacetic acid (sum of 1-naphthylacetamide and 1-naphthylacetic acid and its salts, expressed as 1-naphthylacetic acid)

(+) The European Food Safety Authority identified some information on analytical methods and residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0130010 Apples

0130020 Pears

(+) The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0231010 Tomatoes

0231030 Aubergines/eggplants

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish

Chloridazon (R) (sum of chloridazon and chloridazon-desphenyl, expressed as chloridazon)

(R) = The residue definition differs for the following combinations pesticide-code number:

Chloridazon — code 1000000 except 1040000: Chloridazon (chloridazon-desphenyl, expressed as chloridazon)

(+) The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0213010 Beetroots

0213040 Horseradishes

0220010 Garlic

0220020 Onions

0220030 Shallots

(+) The European Food Safety Authority identified some information on residues for rotational crops as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0251080 Baby leaf crops (including brassica species)

0252010 Spinaches

(+) The European Food Safety Authority identified some information on residue trials and residues for rotational crops as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0252030 Chards/beet leaves

- (+) The European Food Safety Authority identified some information on residues for rotational crops as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0256000 (f) herbs and edible flowers

0256010 Chervil

0256020 Chives

0256030 Celery leaves

0256040 Parsley

0256050 Sage

0256060 Rosemary

0256070 Thyme

0256080 Basil and edible flowers

0256090 Laurel/bay leave

0256100 Tarragon

0256990 Others

- (+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish

- (+) The European Food Safety Authority identified some information on feeding studies as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

Fuberidazole

- (+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish**Mepiquat (sum of mepiquat and its salts, expressed as mepiquat chloride)**

- (+) Temporary MRL valid until 31 December 2018 as monitoring data show that cross-contamination of untreated cultivated fungi may occur with straw lawfully treated with mepiquat. This cross-contamination may not be fully avoidable in all cases. After this date the MRL will be 0,02* mg/kg unless further modified by a Regulation in light of new information provided by 30 April 2018 at the latest.

0280010 Cultivated fungi

- (+) The European Food Safety Authority identified some information on residue trials, as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0401060 Rapeseeds/canola seeds

- (+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish**Tralkoxydim (sum of the constituent isomers of tralkoxydim)**

- (+) The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 June 2018, or, if that information is not submitted by that date, the lack of it.

0500010 Barley**0500090 Wheat**

- (+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish'

(2) In Annex III in Part B, the columns for 1-naphthylacetamide, 1-naphthylacetic acid, chloridazon, fluazifop-P, fuberidazole, mepiquat and tralkoxydim are deleted.
