ROZHODNUTÍ KOMISE

ze dne 23. února 1999,

kterým se přijímá seznam látek určených k aromatizaci používaných v potravinách nebo na jejich povrchu, vypracovaný podle nařízení Evropského parlamentu a Rady (ES) č. 2232/96

(oznámeno pod číslem K(1999) 399)

(Text s významem pro EHP)

(1999/217/ES)

(Úř. věst. L 84, 27.3.1999, s. 1)

▼B**ROZHODNUTÍ KOMISE**

ze dne 23. února 1999,

kterým se přijímá seznam látek určených k aromatizaci používaných v potravinách nebo na jejich povrchu, vypracovaný podle nařízení Evropského parlamentu a Rady (ES) č. 2232/96

(oznámeno pod číslem K(1999) 399)

(Text s významem pro EHP)

(1999/217/ES)

KOMISE EVROPSKÝCH SPOLEČENSTVÍ,

s ohledem na Smlouvu o založení Evropského společenství,

s ohledem na nařízení Evropského parlamentu a Rady (ES) č. 2232/96 ze dne 28. října 1996, kterým se stanoví postup Společenství pro látky určené k aromatizaci používané nebo určené k použití v potravinách nebo na jejich povrchu ⁽¹⁾, a zejména na čl. 3 odst. 2 uvedeného nařízení,

vzhledem k tomu, že podle čl. 3 odst. 1 nařízení (ES) č. 2232/96 oznámí členské státy do jednoho roku od vstupu výše uvedeného nařízení v platnost Komisi seznam látek určených k aromatizaci povolených pro použití v potravinách nebo na jejich povrchu, které jsou uváděny na trh na jejich území;

vzhledem k tomu, že podle čl. 3 odst. 2 uvedeného nařízení se oznámené látky určené k aromatizaci, jejichž zákonné použití v jednom členském státě musí být uznáno ostatními členskými státy, zapíší do seznamu přijatého postupem podle článku 7 uvedeného nařízení;

vzhledem k tomu, že v určitých členských státech v současnosti podléhají některé látky určené k aromatizaci omezujícím opatřením nebo zákazu;

vzhledem k tomu, že tato omezující opatření nebo zákazy, které jsou platné ke dni přijetí tohoto rozhodnutí, mohou být nadále používány až do dokončení hodnocení dané látky;

vzhledem k tomu, že pokud má členský stát přesto za to, že látka určená k aromatizaci zapsaná v seznamu může představovat nebezpečí pro veřejné zdraví, může se zahájit ochranný postup podle čl. 3 odst. 3 nařízení (ES) č. 2232/96;

vzhledem k tomu, že tento seznam je základem pro program hodnocení podle článku 4 uvedeného nařízení, který musí být uzavřen do deseti měsíců od přijetí seznamu;

vzhledem k tomu, že opatření tohoto rozhodnutí jsou v souladu se stanoviskem Stálého výboru pro potraviny,

PŘIJALA TOTO ROZHODNUTÍ:

Článek 1

Přijímá se seznam látek určených k aromatizaci uvedený v příloze tohoto rozhodnutí.

Článek 2

Toto rozhodnutí je určeno členskými státem.

⁽¹⁾ Úř. věst. L 299, 23.11.1996, s. 1.

▼ M2

Seznam látek určených k aromatizaci oznámených členskými státy podle čl. 3 odst. 1 nařízení Evropského parlamentu a Rady (ES) č. 2232/96 ze dne 28. října 1996, kterým se stanoví postup Společenství pro látky určené k aromatizaci, používané nebo určené k použití v potravinách nebo na jejich povrchu

▼ M7**▼ M2**

V části A jsou uvedena čísla CAS ⁽¹⁾, EINECS ⁽²⁾, CoE ⁽³⁾ a FEMA ⁽⁴⁾, pokud jsou látkám přidělena.

Číslo uvedené ve sloupci „Poznámky“ se vztahuje k těmto poznámkám:

1. Látka, která je kromě svého aromatu používána v potravinách nebo na jejich povrchu pro jiné účely, a může tedy podléhat dalším právním předpisům.
2. Látka, jejíž použití v určitých členských státech podléhá omezujícím opatřením nebo zákazům.
3. Látka, které má být v programu hodnocení dána přednost podle nařízení (ES) č. 1565/2000.
4. Látka, pro niž musejí být předloženy dodatečné informace.
5. V názvu, synonymech, systematickém názvu a v číslech CAS, EINECS, CoE nebo FEMA se mohou vyskytovat nesrovnalosti.

▼ M3

6. Látka, která nesmí být použita v potravinách nebo na jejich povrchu, pokud není právoplatně uvedena na trh v dotčeném členském státě (dotčených členských státech).

▼ M2

Zvláštním problémem je zpracování solí a ostatních sloučenin odvozených od základní látky. Některé látky byly oznámeny velmi přesně. Jiné látky tuto podrobnou identifikaci postrádají. U řady kyselin nebo zásad není uvedeno, zda daná specifikace zahrnuje i jejich soli. Dočasně se pouze pro účely tohoto seznamu předpokládá, že amonné, sodné, draselné a vápenaté soli, stejně jako chloridy, uhličitany a sirany, jsou zahrnuty pod základní látkou za předpokladu, že mají aroma. Konečně přijetí bude však záviset na výsledcích hodnocení, které by mělo v těchto případech pečlivě ověřit správnost takového zařazení.
