COMMISSION DIRECTIVE 98/1/EC
of 8 January 1998
amending certain Annexes to Council Directive 77/93/EEC on protective measures against the introduction into the Community of organisms harmful to plants or plant products and against their spread within the Community

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 77/93/EEC of 21 December 1976 on protective measures against the introduction into the Community of organisms harmful to plants or plant products and against their spread within the Community (1), as last amended by Commission Directive 97/14/EC (2), and in particular Article 13, second paragraph, third and fourth indents, thereof,

Whereas improved measures should be taken to protect the Community against the introduction of harmful organisms affecting hybrids of Solanum L., other than those intended for planting, and aquarium plants;

Whereas certain provisions concerning organisms affecting naturally or artificially dwarfed plants for planting, other than seeds, originating in non-European countries should be improved;

Whereas certain provisions concerning organisms affecting isolated bark of Castanea Mill. should be amended and, in particular, adapted to the present distribution of organisms such as non-European Pisodes spp. and Scolytidae spp.;

Whereas certain provisions concerning Monilinia fructicola (Winter) Honey, should be amended because it has been determined that only Prunus fruits from non-European countries should be subjected to phytosanitary control in the high-risk period from 15 February to 30 September;

Whereas since it has been determined that the risk of spreading Xanthomonas campestris pv. pruni by intra-Community trade in P. laurocerasus L. and P. lusitanica L., is minimal, the relevant measures should be modified;

Whereas since it has become apparent that there is no risk of transmitting Bemisia tabaci Genn with seeds, tubers and corms of Begonia L., the relevant measures should be modified;

Whereas certain measures against Clavibacter michiganensis spp. insidiosus Davis et al. should be modified in order to take account of the area of origin of the seeds and the presence of the disease in that area;

Whereas in order to take into account the phytosanitary risk involved with the import of parts of certain plants, other than fruits and seeds, certain measures should be modified;

Whereas these amendments are in accordance with the requests of the Member States concerned;

Whereas, therefore, the relevant Annexes to Directive 77/93/EEC should be amended accordingly;

(2) OJ L 87, 2. 4. 1997, p. 17.
Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee on Plant Health,

HAS ADOPTED THIS DIRECTIVE:

Article 1

Annexes I to V to Directive 77/93/EEC are hereby amended as indicated in the Annex to this Directive.

Article 2

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive with effect from 1 May 1998. They shall forthwith inform the Commission thereof.

When Member States adopt these provisions, these shall contain a reference to this Directive or shall be accompanied by such reference at the time of their official publication. The procedure for such reference shall be adopted by Member States.

2. Member States shall immediately communicate to the Commission the main provisions of domestic law which they adopt in the field covered by this Directive. The Commission shall inform the other Member States thereof.

Article 3

This Regulation shall enter into force on the third day following its publication in the Official Journal of the European Communities.

Article 4

This Directive is addressed to the Member States.

Done at Brussels, 8 January 1998.

For the Commission
Franz FISCHLER

Member of the Commission
ANNEX

1. In Annex I, Part A, Section I(a), the following points are inserted after point 10:

   10.1. *Diabrotica barberi* Smith bLawrence
   10.2. *Diabrotica undecimpunctata howardi* Barber
   10.3. *Diabrotica undecimpunctata undecimpunctata* Mannerheim
   10.4. *Diabrotica virgifera* Le Conte’.

2. In Annex I, Part A, Section I(a), the following point is inserted after point 11:

   11.1. *Hirschmanniella* spp., other than *Hirschmanniella gracilis* (de Man) Luc bGoodey’.

3. In Annex I, Part A, Section II(a), the following points are inserted after point 6:

   6.1. *Meloidogyne chitwoodi* Golden et al. (all populations)

4. In Annex I, Part A, Section II(a), the following point is inserted after point 8:

   8.1. *Rhizoeus hibisci* Kawai bTakagi’.

5. In Annex II, Part A, Section I(a), point 12, the text in the right-hand column is replaced by the following:

6. In Annex II, Part A, Section II(d), point 15, the right-hand column, the following words are added:

   ‘other than seeds’.

7. In Annex II, Part A, Section II(d), the following point is added:

   ‘16. Tomato yellow leaf curl virus Plants of *Lycopersicon lycopersicum* (L.) Karsten ex Farw., intended for planting, other than seeds’.

8. In Annex III, Part A, point 9 is replaced by the following:

9. In Annex III, Part A, point 12, the text in the left-hand column is replaced by the following:

   ‘Tubers of species of *Solanum* L. and their hybrids, other than those specified in points 10 and 11’. 
10. In Annex IV, Part A, Section I, point 16, the text in the left-hand column is replaced by the following:

'From 15 February to 30 September, fruits of Prunus L., originating in non-European countries'.

11. In Annex IV, Part A, Section I, point 25.4, right-hand column, the following is added:

'and

(cc) either, the tubers originate in areas in which Meloidogyne chitwoodi Golden et al. (all populations) and Meloidogyne fallax Karssen are known not to occur; or

(dd) in areas where Meloidogyne chitwoodi Golden et al. (all populations) and Meloidogyne fallax Karssen are known to occur,

— either the tubers originate from a place of production which has been found free from Meloidogyne chitwoodi Golden et al. (all populations) and Meloidogyne fallax Karssen based on an annual survey of host crops by visual inspection of host plants at appropriate times and by visual inspection both externally and by cutting of tubers after harvest from potato crops grown at the place of production, or

— the tubers after harvest have been randomly sampled and, either checked for the presence of symptoms after an appropriate method to induce symptoms, or laboratory tested, as well as inspected visually both externally and by cutting the tubers, at appropriate times and in all cases at the time of closing of the packages or containers before marketing according to the provisions on closing in Council Directive 66/403/EEC (1), and no symptoms of Meloidogyne chitwoodi Golden et al. (all populations) and Meloidogyne fallax Karssen have been found.

(1) OJ 125, 11. 7. 1966, p. 2320/66.'

12. In Annex IV, Part A, Section I, point 43 is replaced by the following:

'43. Naturally or artificially dwarfed plants intended for planting other than seeds, originating in non-European countries

Without prejudice to the provisions applicable to the plants listed in Annex III (A) (1), (2), (3), (9), (13), (15), (16), (17), (18), Annex III (B) (1), and Annex IV (A) (8.1), (8.2), (9.1), (9.2), (10), (11.1), (11.2), (12), (13.1), (13.2), (14), (15), (17), (18), (19.1), (19.2), (20), (22.1), (22.2), (23.1), (23.2), (24), (25.5), (25.6), (26), (27.1), (27.2), (28), (32.1), (32.2), (33), (34), (36), (37), (38.1), (38.2), (39), (40), (42), where appropriate, official statement that:

(a) the plants, including those collected directly from natural habitats, shall have been grown, held and trained for at least two consecutive years prior to dispatch in officially registered nurseries, which are subject to an officially supervised control regime,

(b) the plants on the nurseries referred to in (a) shall:

(aa) at least during the period referred to in (a):

— be potted, in pots which are placed on shelves at least 50 cm above ground,

— have been subjected to appropriate treatments to ensure freedom from non-European rusts; the active ingredient, concentration and date of application of these treatments shall be mentioned on the phytosanitary certificate provided for in Article 7 of this Directive under the rubric "disinfestation and/or disinfection treatment",
— have been officially inspected at least six times a year at appropriate intervals for the presence of harmful organisms of concern, which are those in the Annexes to the Directive. These inspections, which shall also be carried out on plants in the immediate vicinity of the nurseries referred to in (a), shall be carried out at least by visual examination of each row in the field or nursery and by visual examination of all parts of the plant above the growing medium, using a random sample of at least 300 plants from a given genus where the number of plants of that genus is not more than 3 000 plants, or 10 % of the plants if there are more than 3 000 plants from that genus,

— have been found free, in these inspections, from the relevant harmful organisms of concern as specified in the previous indent. Infested plants shall be removed. The remaining plants, where appropriate, shall be effectively treated, and in addition shall be held for an appropriate period and inspected to ensure freedom from such harmful organisms of concern,

— have been planted in either an unused artificial growing medium or in a natural growing medium, which has been treated by fumigation or by appropriate heat treatment and has been examined afterwards and found free of any harmful organisms,

— have been kept under conditions which ensure that the growing medium has been maintained free from harmful organisms and within two weeks prior to dispatch, have been:

— shaken and washed with clean water to remove the original growing medium and kept bare rooted, or

— shaken and washed with clean water to remove the original growing medium and replanted in growing medium which meets the conditions laid down in (aa) fifth indent, or

— subjected to appropriate treatments to ensure that the growing medium is free from harmful organisms; the active ingredient, concentration and date of application of these treatments shall be mentioned on the phytosanitary certificate provided for in Article 7 of this Directive under the rubric "disestation and/or disinfection treatment",
(bb) be packed in closed containers which have been officially sealed and bear the registration number of the registered nursery; this number shall also be indicated under the rubric “additional declaration” on the phytosanitary certificate, provided for in Article 7 of this Directive, enabling the consignments to be identified;

13. In Annex IV, Part A, Section I, the following point is inserted after point 45:

<table>
<thead>
<tr>
<th>'45.1 Plants of <em>Lycopersicon lycopersicum</em> (L.) Karsten ex Farw. intended for planting, other than seeds, originating in countries where Tomato yellow leaf curl virus is known to occur</th>
</tr>
</thead>
<tbody>
<tr>
<td>Without prejudice to the requirements applicable to plants listed in Annex III (A) (13) and Annex IV (A) (I) (25.5), (25.6) and (25.7) where appropriate</td>
</tr>
<tr>
<td>(a) Where <em>Bemisia tabaci</em> Genn. is not known to occur</td>
</tr>
<tr>
<td>Official statement that no symptoms of Tomato yellow leaf curl virus have been observed on the plants</td>
</tr>
<tr>
<td>(b) Where <em>Bemisia tabaci</em> Genn. is known to occur</td>
</tr>
<tr>
<td>Official statement that:</td>
</tr>
<tr>
<td>(a) no symptoms of Tomato yellow leaf curl virus have been observed on the plants, and</td>
</tr>
<tr>
<td>(aa) the plants originate in areas known to be free from <em>Bemisia tabaci</em> Genn.; or</td>
</tr>
<tr>
<td>(bb) the place of production has been found free from <em>Bemisia tabaci</em> Genn. on official inspections carried out at least monthly during the three months prior to export; or</td>
</tr>
<tr>
<td>(b) no symptoms of Tomato yellow leaf curl virus have been observed on the place of production and the place of production has been subjected to an appropriate treatment and monitoring regime to ensure freedom from <em>Bemisia tabaci</em> Genn.</td>
</tr>
</tbody>
</table>

14. In Annex IV, Part A, Section I, point 46, right-hand column ‘and (45.1)’ is inserted after ‘(45)’.

15. In Annex IV, Part A, Section II, point 19.1, right-hand column, the following is added:

‘and

(e) either, the tubers originate in areas in which *Meloidogyne chitwoodi* Golden et al. (all populations) and *Meloidogyne fallax* Karssen are known not to occur; or in areas where *Meloidogyne chitwoodi* Golden et al. (all populations) and *Meloidogyne fallax* Karssen are known to occur,

— either the tubers originate from a place of production which has been found free from *Meloidogyne chitwoodi* Golden et al. (all populations) and *Meloidogyne fallax* Karssen based on an annual survey of host crops by visual inspection of host plants at appropriate times and by visual inspection both externally and by cutting of tubers after harvest from potato crops grown at the place of production, or
— the tubers after harvest have been randomly sampled and, either checked for the presence of symptoms after an appropriate method to induce symptoms or laboratory tested, as well as inspected visually both externally and by cutting the tubers, at appropriate times and in all cases at the time of closing of the packages or containers before marketing according to the provisions on closing in Council Directive 66/403/EEC, and no symptoms of Meloidogyne chitwoodi Golden et al. (all populations) and Meloidogyne fallax Karssen have been found.

16. In Annex IV, Part A, Section II, the following point is inserted after point 27:

| Plants of *Lycopersicon lycopersicum* (L.) Karsten ex Farw., intended for planting, other than seeds | Without prejudice to the requirements applicable to the plants, where appropriate, listed in Annex IV (A) (II)(19.6) and (24), official statement that:
| (a) the plants originate in areas known to be free from Tomato yellow leaf curl virus, or (b) no symptoms of Tomato yellow leaf curl virus have been observed on the plants, and (aa) the plants originate in areas known to be free from *Bemisia tabaci* Genn.; or (bb) the place of production has been found free from *Bemisia tabaci* Genn. on official inspections carried out at least monthly during the three months prior to export; or (c) no symptoms of Tomato yellow leaf curl virus have been observed on the place of production and the place of production has been subjected to an appropriate treatment and monitoring regime to ensure freedom from *Bemisia tabaci* Genn. |

17. In Annex IV, Part A, Section II, point 29.2, right-hand column, the word 'or' is inserted between (a) and (b).

18. In Annex IV, Part B, point 24, the text in the left-hand column is replaced by the following:

‘Plants of *Begonia* L., intended for planting other than seeds, tubers and corms, and plants of *Euphorbia pulcherrima* Willd., intended for planting, other than seeds, other than those for which there shall be evidence by their packaging or their flower (or bract) development or by other means that they are intended for sale to final consumers not involved in professional plant production.’

19. In Annex V, Part A(I), point 1.1, the word ‘*Prunus* L.’ is replaced by ‘*Prunus* L., other than *Prunus laurocerasus* L. and *Prunus lusitanica* L.’.

20. In Annex V, Part A(I), point 2.1, the words ‘*Prunus laurocerasus* L., *Prunus lusitanica* L.’ are inserted between ‘*Populus* L.’ and ‘*Pseudotsuga* Carr.’.

21. In Annex V, Part A(II), point 2.1 is replaced by the following:

‘Plants of *Begonia* L., intended for planting other than seeds, tubers and corms, and plants of *Euphorbia pulcherrima* Willd., intended for planting, other than seeds’.

22. In Annex V, Part B(I), point 1, the words ‘or aquarium plants’ are deleted.

23. In Annex V, Part B(I), point 1, the words ‘*Allium ascalonicum* L.’ are inserted after ‘*Zea mais* L.’.
24. In Annex V, Part B(I), point 2 is replaced by the following:

'2. Parts of plants, other than fruits and seeds, of

— conifers (Coniferales),
— *Acer saccharum* Marsh., originating in North American countries,
— *Prunus* L., originating in non-European countries.'

25. In Annex V, Part B(I), point 5, second indent, the words ‘*Castanea* Mill.’ are deleted.
