COMMISSION REGULATION (EC) No 772/2004
of 27 April 2004
on the application of Article 81(3) of the Treaty to categories of technology transfer agreements
(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation No 19/65/EEC of 2 March 1965 on application of Article 85(3) of the Treaty to certain categories of agreements and concerted practices (1), and in particular Article 1 thereof,

Having published a draft of this Regulation (2),

After consulting the Advisory Committee on Restrictive Practices and Dominant Positions,

Whereas:

(1) Regulation No 19/65/EEC empowers the Commission to apply Article 81(3) of the Treaty by Regulation to certain categories of technology transfer agreements and corresponding concerted practices (3), and in particular Article 1 thereof,

(2) Pursuant to Regulation No 19/65/EEC, the Commission has, in particular, adopted Regulation (EC) No 240/96 of 31 January 1996 on the application of Article 85(3) of the Treaty to certain categories of technology transfer agreements (3).

(3) On 20 December 2001 the Commission published an evaluation report on the transfer of technology block exemption Regulation (EC) No 240/96 (4). This generated a public debate on the application of Regulation (EC) No 240/96 and on the application in general of Article 81(1) and (3) of the Treaty to technology transfer agreements. The response to the evaluation report from Member States and third parties has been generally in favour of reform of Community competition policy on technology transfer agreements. It is therefore appropriate to repeal Regulation (EC) No 240/96.

(4) This Regulation should meet the two requirements of ensuring effective competition and providing adequate legal security for undertakings. The pursuit of these objectives should take account of the need to simplify the regulatory framework and its application. It is appropriate to move away from the approach of listing exempted clauses and to place greater emphasis on defining the categories of agreements which are exempted up to a certain level of market power and on specifying the restrictions or clauses which are not to be contained in such agreements. This is consistent with an economics-based approach which assesses the impact of agreements on the relevant market. It is also consistent with such an approach to make a distinction between agreements between competitors and agreements between non-competitors.

(5) Technology transfer agreements concern the licensing of technology. Such agreements will usually improve economic efficiency and be pro-competitive as they can reduce duplication of research and development, strengthen the incentive for the initial research and development, spur incremental innovation, facilitate diffusion and generate product market competition.

(6) The likelihood that such efficiency-enhancing and pro-competitive effects will outweigh any anti-competitive effects due to restrictions contained in technology transfer agreements depends on the degree of market power of the undertakings concerned and, therefore, on the extent to which those undertakings face competition from undertakings owning substitute technologies or undertakings producing substitute products.

(7) This Regulation should only deal with agreements where the licensor permits the licensee to exploit the licensed technology, possibly after further research and development by the licensee, for the production of goods or services. It should not deal with licensing agreements for the purpose of subcontracting research and development. It should also not deal with licensing agreements to set up technology pools, that is to say, agreements for the pooling of technologies with the purpose of licensing the created package of intellectual property rights to third parties.

(2) OJ C 235, 1.10.2003, p. 10.
For the application of Article 81(3) by regulation, it is not necessary to define those technology transfer agreements that are capable of falling within Article 81(1). In the individual assessment of agreements pursuant to Article 81(1), account has to be taken of several factors, and in particular the structure and the dynamics of the relevant technology and product markets.

The benefit of the block exemption established by this Regulation should be limited to those agreements which can be assumed with sufficient certainty to satisfy the conditions of Article 81(3). In order to attain the benefits and objectives of technology transfer, the benefit of this Regulation should also apply to provisions contained in technology transfer agreements that do not constitute the primary object of such agreements, but are directly related to the application of the licensed technology.

For technology transfer agreements between competitors it can be presumed that, where the combined share of the relevant markets accounted for by the parties does not exceed 20 % and the agreements do not contain certain severely anti-competitive restraints, they generally lead to an improvement in production or distribution and allow consumers a fair share of the resulting benefits.

For technology transfer agreements between non-competitors it can be presumed that, where the individual share of the relevant markets accounted for by each of the parties does not exceed 30 % and the agreements do not contain certain severely anti-competitive restraints, they generally lead to an improvement in production or distribution and allow consumers a fair share of the resulting benefits.

There can be no presumption that above these market-share thresholds technology transfer agreements do fall within the scope of Article 81(1). For instance, an exclusive licensing agreement between non-competing undertakings does often not fall within the scope of Article 81(1). There can also be no presumption that, above these market-share thresholds, technology transfer agreements falling within the scope of Article 81(1) will not satisfy the conditions for exemption. However, it can also not be presumed that they will usually give rise to objective advantages of such a character and size as to compensate for the disadvantages which they create for competition.

This Regulation should not exempt technology transfer agreements containing restrictions which are not indispensable to the improvement of production or distribution. In particular, technology transfer agreements containing certain severely anti-competitive restraints such as the fixing of prices charged to third parties should be excluded from the benefit of the block exemption established by this Regulation irrespective of the market shares of the undertakings concerned. In the case of such hardcore restrictions the whole agreement should be excluded from the benefit of the block exemption.

In order to protect incentives to innovate and the appropriate application of intellectual property rights, certain restrictions should be excluded from the block exemption. In particular exclusive grant back obligations for severable improvements should be excluded. Where such a restriction is included in a licence agreement only the restriction in question should be excluded from the benefit of the block exemption.

The market-share thresholds, the non-exemption of technology transfer agreements containing severely anti-competitive restraints and the excluded restrictions provided for in this Regulation will normally ensure that the agreements to which the block exemption applies do not enable the participating undertakings to eliminate competition in respect of a substantial part of the products in question.

In particular cases in which the agreements falling under this Regulation nevertheless have effects incompatible with Article 81(3), the Commission should be able to withdraw the benefit of the block exemption. This may occur in particular where the incentives to innovate are reduced or where access to markets is hindered.

Council Regulation (EC) No 1/2003 of 16 December 2002 on the implementation of the rules on competition laid down in Articles 81 and 82 of the Treaty (1) empowers the competent authorities of Member States to withdraw the benefit of the block exemption in respect of technology transfer agreements having effects incompatible with Article 81(3), where such effects are felt in their respective territory, or in a part thereof, and where such territory has the characteristics of a distinct geographic market. Member States must ensure that the exercise of this power of withdrawal does not prejudice the uniform application throughout the common market of the Community competition rules or the full effect of the measures adopted in implementation of those rules.

In order to strengthen supervision of parallel networks of technology transfer agreements which have similar restrictive effects and which cover more than 50 % of a given market, the Commission should be able to declare this Regulation inapplicable to technology transfer agreements containing specific restraints relating to the market concerned, thereby restoring the full application of Article 81 to such agreements.

This Regulation should cover only technology transfer agreements between a licensor and a licensee. It should cover such agreements even if conditions are stipulated for more than one level of trade, by, for instance, requiring the licensee to set up a particular distribution system and specifying the obligations the licensee must or may impose on resellers of the products produced under the licence. However, such conditions and obligations should comply with the competition rules applicable to supply and distribution agreements. Supply and distribution agreements concluded between a licensee and its buyers should not be exempted by this Regulation.

This Regulation is without prejudice to the application of Article 82 of the Treaty.

HAS ADOPTED THIS REGULATION:

Article 1

Definitions

1. For the purposes of this Regulation, the following definitions shall apply:

(a) ‘agreement’ means an agreement, a decision of an association of undertakings or a concerted practice;

(b) ‘technology transfer agreement’ means a patent licensing agreement, a know-how licensing agreement, a software copyright licensing agreement or a mixed patent, know-how or software copyright licensing agreement, including any such agreement containing provisions which relate to the sale and purchase of products or which relate to the licensing of other intellectual property rights or the assignment of intellectual property rights, provided that those provisions do not constitute the primary object of the agreement and are directly related to the production of the contract products; assignments of patents, know-how, software copyright or a combination thereof where part of the risk associated with the exploitation of the technology remains with the assignor, in particular where the sum payable in consideration of the assignment is dependent on the turnover obtained by the assignee in respect of products produced with the assigned technology, the quantity of such products produced or the number of operations carried out employing the technology, shall also be deemed to be technology transfer agreements;

(c) ‘reciprocal agreement’ means a technology transfer agreement where two undertakings grant each other, in the same or separate contracts, a patent licence, a know-how licence, a software copyright licence or a mixed patent, know-how or software copyright licence and where these licences concern competing technologies or can be used for the production of competing products;

(d) ‘non-reciprocal agreement’ means a technology transfer agreement where one undertaking grants another undertaking a patent licence, a know-how licence, a software copyright licence or a mixed patent, know-how or software copyright licence, or where two undertakings grant each other such a licence but where these licences do not concern competing technologies and cannot be used for the production of competing products;

(e) ‘product’ means a good or a service, including both intermediary goods and services and final goods and services;

(f) ‘contract products’ means products produced with the licensed technology;

(g) ‘intellectual property rights’ includes industrial property rights, know-how, copyright and neighbouring rights;

(h) ‘patents’ means patents, patent applications, utility models, applications for registration of utility models, designs, topographies of semiconductor products, supplementary protection certificates for medicinal products or other products for which such supplementary protection certificates may be obtained and plant breeder’s certificates;

(i) ‘know-how’ means a package of non-patented practical information, resulting from experience and testing, which is:

(i) secret, that is to say, not generally known or easily accessible,

(ii) substantial, that is to say, significant and useful for the production of the contract products, and

(iii) identified, that is to say, described in a sufficiently comprehensive manner so as to make it possible to verify that it fulfils the criteria of secrecy and substantiability;

(j) ‘competing undertakings’ means undertakings which compete on the relevant technology market and/or the relevant product market, that is to say:

(i) competing undertakings on the relevant technology market, being undertakings which license out competing technologies without infringing each others’ intellectual property rights (actual competitors on the technology market); the relevant technology market includes technologies which are regarded by the licensees as interchangeable with or substitutable for the licensed technology, by reason of the technologies’ characteristics, their royalties and their intended use,
(ii) competing undertakings on the relevant product market, being undertakings which, in the absence of the technology transfer agreement, are both active on the relevant product and geographic market(s) on which the contract products are sold without infringing each others’ intellectual property rights (actual competitors on the product market) or would, on realistic grounds, undertake the necessary additional investments or other necessary switching costs so that they could timely enter, without infringing each others’ intellectual property rights, the(se) relevant product and geographic market(s) in response to a small and permanent increase in relative prices (potential competitors on the product market); the relevant product market comprises products which are regarded by the buyers as interchangeable with or substitutable for the contract products, by reason of the products’ characteristics, their prices and their intended use;

(d) undertakings in which a party to the agreement together with one or more of the undertakings referred to in (a), (b) or (c), or in which two or more of the latter undertakings, jointly have the rights or powers listed in (a);

(e) undertakings in which the rights or the powers listed in (a) are jointly held by:
   (i) parties to the agreement or their respective connected undertakings referred to in (a) to (d), or
   (ii) one or more of the parties to the agreement or one or more of their connected undertakings referred to in (a) to (d) and one or more third parties.

Article 2

Exemption

Pursuant to Article 81(3) of the Treaty and subject to the provisions of this Regulation, it is hereby declared that Article 81(1) of the Treaty shall not apply to technology transfer agreements entered into between two undertakings permitting the production of contract products.

This exemption shall apply to the extent that such agreements contain restrictions of competition falling within the scope of Article 81(1). The exemption shall apply for as long as the intellectual property right in the licensed technology has not expired, lapsed or been declared invalid or, in the case of know-how, for as long as the know-how remains secret, except in the event where the know-how becomes publicly known as a result of action by the licensee, in which case the exemption shall apply for the duration of the agreement.

Article 3

Market-share thresholds

1. Where the undertakings party to the agreement are competing undertakings, the exemption provided for in Article 2 shall apply on condition that the combined market share of the parties does not exceed 20% on the affected relevant technology and product market.

2. Where the undertakings party to the agreement are not competing undertakings, the exemption provided for in Article 2 shall apply on condition that the market share of each of the parties does not exceed 30% on the affected relevant technology and product market.

3. For the purposes of paragraphs 1 and 2, the market share of a party on the relevant technology market(s) is defined in terms of the presence of the licensed technology on the relevant product market(s). A licensor’s market share on the relevant technology market shall be the combined market share on the relevant product market of the contract products produced by the licensor and its licensees.
Article 4

Hardcore restrictions

1. Where the undertakings party to the agreement are competing undertakings, the exemption provided for in Article 2 shall not apply to agreements which, directly or indirectly, in isolation or in combination with other factors under the control of the parties, have as their object:

(a) the restriction of a party's ability to determine its prices when selling products to third parties;

(b) the limitation of output, except limitations on the output of contract products imposed on the licensee in a non-reciprocal agreement or imposed on only one of the licensees in a reciprocal agreement;

(c) the allocation of markets or customers except:

(i) the obligation on the licensee(s) to produce with the licensed technology only within one or more technical fields of use or one or more product markets,

(ii) the obligation on the licensor and/or the licensee, in a non-reciprocal agreement, not to produce with the licensed technology within one or more technical fields of use or one or more product markets or one or more exclusive territories reserved for the other party,

(iii) the obligation on the licensor not to license the technology to another licensee in a particular territory,

(iv) the restriction, in a non-reciprocal agreement, of active and/or passive sales by the licensee and/or the licensor into the exclusive territory or to the exclusive customer group reserved for the other party,

(v) the restriction, in a non-reciprocal agreement, of active sales by the licensee into the exclusive territory or to the exclusive customer group allocated by the licensor to another licensee provided the latter was not a competing undertaking of the licensor at the time of the conclusion of its own licence,

(vi) the obligation on the licensee to produce the contract products only for its own use provided that the licensee is not restricted in selling the contract products actively and passively as spare parts for its own products,

(vii) the obligation on the licensee, in a non-reciprocal agreement, to produce the contract products only for a particular customer, where the licence was granted in order to create an alternative source of supply for that customer;

(d) the restriction of the licensee's ability to exploit its own technology or the restriction of the ability of any of the parties to the agreement to carry out research and development, unless such latter restriction is indispensable to prevent the disclosure of the licensed know-how to third parties.

2. Where the undertakings party to the agreement are not competing undertakings, the exemption provided for in Article 2 shall not apply to agreements which, directly or indirectly, in isolation or in combination with other factors under the control of the parties, have as their object:

(a) the restriction of a party's ability to determine its prices when selling products to third parties, without prejudice to the possibility of imposing a maximum sale price or recommending a sale price, provided that it does not amount to a fixed or minimum sale price as a result of pressure from, or incentives offered by, any of the parties;

(b) the restriction of the territory into which, or of the customers to whom, the licensee may passively sell the contract products, except:

(i) the restriction of passive sales into an exclusive territory or to an exclusive customer group reserved for the licensor,

(ii) the restriction of passive sales into an exclusive territory or to an exclusive customer group allocated by the licensor to another licensee during the first two years that this other licensee is selling the contract products in that territory or to that customer group,

(iii) the obligation to produce the contract products only for its own use provided that the licensee is not restricted in selling the contract products actively and passively as spare parts for its own products,

(iv) the obligation to produce the contract products only for a particular customer, where the licence was granted in order to create an alternative source of supply for that customer,

(v) the restriction of sales to end-users by a licensee operating at the wholesale level of trade,

(vi) the restriction of sales to unauthorised distributors by the members of a selective distribution system;

(c) the restriction of active or passive sales to end-users by a licensee which is a member of a selective distribution system and which operates at the retail level, without prejudice to the possibility of prohibiting a member of the system from operating out of an unauthorised place of establishment.

3. Where the undertakings party to the agreement are not competing undertakings at the time of the conclusion of the agreement but become competing undertakings afterwards, paragraph 2 and not paragraph 1 shall apply for the full life of the agreement unless the agreement is subsequently amended in any material respect.
Article 5

Excluded restrictions

1. The exemption provided for in Article 2 shall not apply to any of the following obligations contained in technology transfer agreements:

(a) any direct or indirect obligation on the licensee to grant an exclusive licence to the licensor or to a third party designated by the licensor in respect of its own severable improvements to or its own new applications of the licensed technology;

(b) any direct or indirect obligation on the licensee to assign, in whole or in part, to the licensor or to a third party designated by the licensor, rights to its own severable improvements to or its own new applications of the licensed technology;

(c) any direct or indirect obligation on the licensee not to challenge the validity of intellectual property rights which the licensor holds in the common market, without prejudice to the possibility of providing for termination of the technology transfer agreement in the event that the licensee challenges the validity of one or more of the licensed intellectual property rights.

2. Where the undertakings party to the agreement are not competing undertakings, the exemption provided for in Article 2 shall not apply to any direct or indirect obligation limiting the licensee's ability to exploit its own technology or limiting the ability of any of the parties to the agreement to carry out research and development, unless such latter restriction is indispensable to prevent the disclosure of the licensed know-how to third parties.

Article 6

Withdrawal in individual cases

1. The Commission may withdraw the benefit of this Regulation, pursuant to Article 29(1) of Regulation (EC) No 1/2003, where it finds in any particular case that a technology transfer agreement to which the exemption provided for in Article 2 applies nevertheless has effects which are incompatible with Article 81(3) of the Treaty, and in particular where:

(a) access of third parties' technologies to the market is restricted, for instance by the cumulative effect of parallel networks of similar restrictive agreements prohibiting licensees from using third parties' technologies;

(b) access of potential licensees to the market is restricted, for instance by the cumulative effect of parallel networks of similar restrictive agreements prohibiting licensors from licensing to other licensees;

(c) without any objectively valid reason, the parties do not exploit the licensed technology.

2. Where, in any particular case, a technology transfer agreement to which the exemption provided for in Article 2 applies has effects which are incompatible with Article 81(3) of the Treaty in the territory of a Member State, or in a part thereof, which has all the characteristics of a distinct geographic market, the competition authority of that Member State may withdraw the benefit of this Regulation, pursuant to Article 29(2) of Regulation (EC) No 1/2003, in respect of that territory, under the same circumstances as those set out in paragraph 1 of this Article.

Article 7

Non-application of this Regulation

1. Pursuant to Article 1a of Regulation No 19/65/EEC, the Commission may by regulation declare that, where parallel networks of similar technology transfer agreements cover more than 50 % of a relevant market, this Regulation is not to apply to technology transfer agreements containing specific restraints relating to that market.

2. A regulation pursuant to paragraph 1 shall not become applicable earlier than six months following its adoption.

Article 8

Application of the market-share thresholds

1. For the purposes of applying the market-share thresholds provided for in Article 3 the rules set out in this paragraph shall apply.

The market share shall be calculated on the basis of market sales value data. If market sales value data are not available, estimates based on other reliable market information, including market sales volumes, may be used to establish the market share of the undertaking concerned.

The market share shall be calculated on the basis of data relating to the preceding calendar year.

The market share held by the undertakings referred to in point (e) of the second subparagraph of Article 1(2) shall be apportioned equally to each undertaking having the rights or the powers listed in point (a) of the second subparagraph of Article 1(2).

2. If the market share referred to in Article 3(1) or (2) is initially not more than 20 % respectively 30 % but subsequently rises above those levels, the exemption provided for in Article 2 shall continue to apply for a period of two consecutive calendar years following the year in which the 20 % threshold or 30 % threshold was first exceeded.

Article 9

Repeal

Regulation (EC) No 240/96 is repealed.

References to the repealed Regulation shall be construed as references to this Regulation.
Article 10
Transitional period
The prohibition laid down in Article 81(1) of the Treaty shall not apply during the period from 1 May 2004 to 31 March 2006 in respect of agreements already in force on 30 April 2004 which do not satisfy the conditions for exemption provided for in this Regulation but which, on 30 April 2004, satisfied the conditions for exemption provided for in Regulation (EC) No 240/96.

Article 11
Period of validity
This Regulation shall enter into force on 1 May 2004.
It shall expire on 30 April 2014.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 27 April 2004.

For the Commission
Mario MONTI
Member of the Commission
