

PROTOCOL**concerning sanitary, phytosanitary and animal welfare measures in relation to trade**

THE EUROPEAN COMMUNITY (hereinafter referred to as 'the Community')

of the one part, and

THE CZECH REPUBLIC

of the other part,

REAFFIRMING that one of the objectives of the Europe Agreement establishing an association between the European Communities and their Member States, of the one part, and the Czech Republic, of the other part, of 4 October 1993 (hereinafter referred to as 'the Europe Agreement') is to establish progressively, between the Community and the Czech Republic (hereinafter referred to as 'the Parties'), a free trade area and in this context, a Protocol on sanitary, phytosanitary and animal welfare measures applicable to trade can contribute to the acceleration of the process by further developing trade between the Parties;

CONSCIOUS that gradual harmonisation of sanitary, phytosanitary and animal welfare measures can contribute to the final objective that the Czech Republic becomes a Member of the Community and that pending the completion of this process it is appropriate to conclude a Protocol between the two Parties on sanitary, phytosanitary and animal welfare measures in order to facilitate trade;

DESIRING to facilitate trade and movement between the Community and the Czech Republic in live animals and animal products while safeguarding public and animal health and animal welfare and meeting consumer expectations in relation to the wholesomeness of food products, and in plants, plant products and other objects while safeguarding plant health;

RESOLVED to take the fullest account of the risk of introduction or spread of disease and pests and the measures put in place to control and/or eradicate such diseases and pests, and in particular to avoid disruption to trade;

ACCEPTING that their sanitary and phytosanitary measures are intended to provide comparable safeguards against health risks;

WHEREAS given the importance of animal welfare in trade and given its connection with veterinary matters, it is appropriate to include this issue in this Protocol;

CONSIDERING that the recognition of equivalency may be progressive and that technical and financial assistance, as provided for by the Europe Agreement, may be provided, in particular, for issues dealt with in this Protocol, as necessary;

CONSIDERING also that the recognition of equivalency shall take place in accordance with the internal procedures and legislative processes of the Parties and that these procedures are in no way affected by the measures and objectives of the present Protocol;

DESIRING also to give expression to the World Trade Organisation Agreement on the Application of Sanitary and Phytosanitary measures, in particular on recognition of the equivalence of specified sanitary or phytosanitary measures;

HAVE DECIDED to conclude this Protocol and to this end have designated as their plenipotentiaries:

THE EUROPEAN COMMUNITY

THE CZECH REPUBLIC

WHO HAVE AGREED AS FOLLOWS:

PROVISIONS FOR TRADE

*Article 3***Diseases or pests**

1. (a) Trade between the territory of the Czech Republic and the territory of Member States of live animals and products of animal origin is permitted on the condition that none of the diseases listed at Annex III.A occurs subject to the relevant conditions of Article 7.

The limitations referred to above only concern animals susceptible to a given disease or products representing a risk from such animals ⁽¹⁾.

However where a disease listed at Annex III.A occurs on the territory of the Czech Republic or the Member States then the provisions of Article 4 and Annexes V or VI shall apply.

- (b) Where one of the Parties considers that it has a special status in total or in parts thereof with respect to a specific disease, it may request recognition of this status. The Party concerned may also request additional or specific guarantees in respect of imports of live animals and animal products appropriate to the agreed status. These guarantees for specific diseases shall be specified in Annex V.A or VI.A.
2. (a) For the purposes of trade between the Parties in plants, plant products and other objects, the Parties shall certify that such trade is considered to be free from the pests as set out in Annex III.B subject to the relevant conditions of Article 7.

*Article 4***Regionalisation**

1. Notwithstanding Article 3, exports of live animals and products of animal origin shall be authorised from a 'free' area. Such free areas may be recognised for the diseases listed in Annex III.A, taking account of the recommendations made by the bodies referred to in Article 16, in accordance with the criteria listed in Annex IV and established under the respective legislative process of the Parties. Under the same procedure outlined above countries or areas of low prevalence of disease, as defined by the International Office of Epizootics (OIE) or other international standards, may be recognised.

2. Trade in plants, plant products and other objects shall also take account of pest-free areas or protected zones. Such pest-free areas and protected zones may be recognised, taking account of the recommendations made by the bodies referred to in Article 16, in accordance with the criteria listed in Annex IV and established under the respective legislative process of the Parties.

*Article 5***Equivalence**

1. The Parties shall recognise as equivalent those measures, whether or not identical, that provide the same level of health protection and animal welfare in trade. Equivalence shall be applied in relation to legislation, sanitary or phytosanitary measures for sectors, or parts of sectors, systems of inspection, survey, control, testing, and certification, parts of these systems, or in relation to specific legislation, inspection and/or hygiene requirements.

2. Recognition of equivalence requires an assessment and acceptance of:

⁽¹⁾ With respect to fish more detailed rules will be laid down as appropriate at a later date.

- the documented structure of the relevant responsible authority(ies), the command chain, their powers, their *modus operandi* and the resources available to them,
- the legislation and powers, standards, certification and procedures as well as the programmes in place to allow control and to ensure domestic and importing countries' requirements are met,
- the performance of the relevant responsible authority in relation to the control programme and assurances.

In this assessment, account shall be taken of experience already acquired.

Article 6

Implementation of equivalence

1. The equivalence of the respective sanitary, phytosanitary or welfare measures for the sectors, or parts of sectors listed in Annex V, is recognised. The Parties shall take the necessary legislative/administrative actions, within their responsibilities, to implement this equivalence three months after entry into force of this Protocol.

2. For the sectors, or parts of sectors listed in Annex VI.A.1 or B.1, differences in sanitary, phytosanitary or welfare measures preclude the immediate recognition of equivalence. The actions set out in this Annex shall be taken to enable the assessment of recognition of equivalence by the dates to be determined in accordance with the procedure referred to in Article 16. The Parties shall undertake the necessary legislative/administrative actions, within their responsibilities, to implement this equivalence within three months of the date of recognition.

3. Further consultations shall take place to identify the actions needed to enable the demonstration and recognition of equivalence of the sanitary, phytosanitary or welfare measures for the sectors, or parts of sectors listed in Annex VI.A.2 or B.2.

The Parties will take the necessary measures, within their responsibilities, to implement in particular the frequency of these physical checks three months after entry into force of this Protocol.

4. The Parties may amend the frequencies, within their responsibilities, as appropriate as a result of progress made in accordance with Annex VI, or as a result of other measures or consultations provided for in this Protocol.

5. The Parties may address the issue of special import check conditions applicable to local trade within the vicinity of the borders between the two Parties, in accordance with the principles of this Protocol.

Article 9

ANNEX IV

CRITERIA FOR REGIONALISATION

1. The criteria for the definition of an area or zone should take into account appropriate international standards and include:
 - the geographical conditions,
 - the epidemiological situation,
 - patterns of trade,
 - the meteorological conditions,
 - the distribution of vectors and alternative or secondary hosts,
 - administrative boundaries,
 - effective control of movement across the boundaries of the area,
 - effective control ⁽¹⁾ and surveillance measures within the non-free area, zone and free area as appropriate,
 - the ecosystem including the agronomy and the environment.

2. A protected zone, as defined in Council Directive 77/93/EEC, Article 2(1)(h) ⁽²⁾ shall be considered as a zone where there is effective control on plants, plant products and other objects moving into or within the zone and effective surveillance measures as detailed in Commission Directive 92/70/EEC ⁽³⁾, within the zone
 - in which one or more pests, which are established in one or more parts, are not endemic or established, despite favourable conditions for them to become established therein,
 - in which there is a danger that certain pests will establish themselves, given propitious ecological conditions, for particular crops, despite the fact that these pests are not endemic or established.

⁽¹⁾ With respect to plant health, control means here suppression, containment or eradication of a pest population.

ANNEX VII

IMPORT AND TRANSIT PROCEDURES

A. *SANITARY PART*

The Parties recognise the distinction between documentary, identity and physical checks carried out on imports of live animals and animal products.

I. IMPORT CHECKS

(i) **Live animals**1. *Documentary checks*

Documentary checks will be carried out on 100 % of consignments. It means that veterinary certificates or veterinary documents required by the legislation have to be controlled to confirm that the form and the content are fulfilling the legal requirements.

2. *Identity checks*

Identity checks will be carried out on all consignments to confirm the correspondence between the documents referred to in paragraph 1 and the consignment itself.

3. *Physical checks*

The aim of the physical checks is to ensure that the animals meet the guarantees mentioned on the documents referred to in paragraph 1 and that they are clinically healthy. The guarantee of origin certified by the third country must accordingly be verified as well as the transport and the animal welfare conditions. In principle every animal of a consignment should be physically checked. This physical check may include sampling and testing procedures.

In principle the physical check must include, in particular, a clinical examination of all the animals.

By way of derogation to the clinical examination the following shall apply:

- (a) animals for fattening, 10 % of animals in a consignment with a minimum of 10 animals;
- (b) animals for direct slaughtering: visual examination;
- (c) poultry, birds, aquaculture animals including fish, rodents including lagomorphs, bees and other insects, reptiles, other invertebrates, dangerous zoo animals: examination of the general health status and behaviour or of a representative number of animals;
- (d) pathogen-free animals: physical examination should take place only in where risk of an irregularity is present.

Notwithstanding the agreed checks and the reduced frequencies laid down in this Protocol, additional checks may be carried out in cases of suspicion.

4. *Transits*

Similar checks as laid down above shall apply for the transit of live animals.

(ii) **Products of animal origin**1. *Documentary checks*

Documentary checks will be carried out on 100 % of consignments. Veterinary certificates, veterinary documents or other documents required by the legislation have to be controlled to confirm that the form and the content are fulfilling the legal requirements.

2. *Identity checks*

Identity checks will be carried out on all consignments to confirm the correspondence between the documents referred to in paragraph 1 and the consignment itself.

3. *Physical checks*

The aim of the physical check is to ensure that the products still meet the purpose mentioned on the documents referred to in paragraph 1. The guarantees of origin certified by the third country must accordingly be verified while ensuring that the subsequent transport of the products has not altered their original conditions. In the light of the inspections and controls undertaken by the exporting country and the experience gained, the

following factors will be applied to the rates of checking frequencies set out in Annex I to Commission Decision 94/360/EC, it being understood that the resulting rates are to be considered as maximum rates. This physical check may include sampling and testing procedures.

Groups of products and the frequencies of checks to be applied by the contracting parties for products where equivalent trade conditions have been agreed and lists of 'approved' establishments (animal health and public health) have been laid down where necessary, are listed in Annex VII.A.2.

Notwithstanding the agreed checks and the reduced frequencies laid down in this Protocol, additional checks may be carried out in cases of suspicion.

4. *Transits*

The checks as laid down in paragraph 1 above shall apply. Identity and/or physical checks may be carried out in cases of suspicion.
