Remarks

The assignment of customs duties as own resource to the financing of common expenditure is the logical consequence of the free movement of goods within the Union. This article may comprise levies, premiums, additional or compensatory amounts, additional amounts or factors, Common Customs Tariff duties and other duties established or to be established by the institutions of the European Union in respect of trade with third countries and customs duties on products under the expired Treaty establishing the European Coal and Steel Community.

Figures are net of collection costs.

Remarks

The GNI-based resource is an ‘additional’ resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments, the plastic-based own resource and other revenue in any particular year. By implication, the GNI-based resource ensures that the budget is always balanced *ex ante*.

COMMISSION

CHAPTER 1 4 — OWN RESOURCE BASED ON GROSS NATIONAL INCOME (*cont'd*)**1 4 0** (*cont'd*)

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (plastic-based own resource, VAT-based resource, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States' GNI for financial year 2026 is 0,6930 %.

Remarks

This article is intended to record reductions in the annual GNI contributions of certain Member States and their financing in accordance with Decision (EU, Euratom) 2020/2053.

Legal basis

Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39, ELI: <http://data.europa.eu/eli/reg/2014/609/oj>), and in particular Article 10a(6) thereof.

Council Decision (EU, Euratom) 2020/2053 of 14 December 2020 on the system of own resources of the European Union and repealing Decision 2014/335/EU, Euratom (OJ L 424, 15.12.2020, p. 1, ELI: <http://data.europa.eu/eli/dec/2020/2053/oj>), and in particular Article 2(4) thereof.

Council Regulation (EU, Euratom) 2021/770 of 30 April 2021 on the calculation of the own resource based on plastic packaging waste that is not recycled, on the methods and procedure for making available that own resource, on the measures to meet cash requirements, and on certain aspects of the own resource based on gross national income (OJ L 165, 11.5.2021, p. 15, ELI: <http://data.europa.eu/eli/reg/2021/770/oj>), and in particular Article 4(2) thereof.

Remarks

In accordance with Article 18 of the Financial Regulation, the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 42 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 1(1) of Regulation (EU, Euratom) 2021/768.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 16 05 01 of the statement of expenditure in Section III ‘Commission’.

For the outturn please see the explanatory memorandum of the Draft Amending Budget No 2/2024 (COM(2024) 920 final of 9 April 2024) and for 2025 please see the explanatory memorandum of the Draft Amending Budget No 1/2025 (COM(2025) 350 final of 9 April 2025).

Remarks

Under Article 7(1) of Regulation (EEC, Euratom) No 1553/89, Member States are to send the Commission a statement of the total amount of the VAT resources base for the previous calendar year before 31 July.

Each Member State is debited with an amount calculated on the basis of that statement according to Union rules and credited with the 12 payments actually made during the previous financial year.

Any corrections to those statements resulting from Commission controls in accordance with Article 9 of Regulation (EEC, Euratom) No 1553/89 and any changes to the GNI of previous financial years that have an effect on the capping of the 'VAT' base will lead to adjustments of the 'VAT' balances.

The Commission shall inform the Member States of the amounts resulting from that calculation before 1 February of the year following that in which the data for the adjustments were supplied.

Legal basis

Council Regulation (EEC, Euratom) No 1553/89 of 29 May 1989 on the definitive uniform arrangements for the collection of own resources accruing from value added tax (OJ L 155, 7.6.1989, p. 9, ELI: <http://data.europa.eu/eli/reg/1989/1553/oj>).

Remarks

On the basis of the annual statement providing the calculation of the amount of the own resource based on non-recycled plastic packaging waste, each Member State shall, in the year following that in which that statement was sent, be debited or credited with an amount calculated as the difference between the amounts in the forecast for a given year and the real amounts in the statement for that same year.

After 31 July of the fifth year following a given financial year, changes shall no longer be taken into account, except on points notified within that time limit either by the Commission or by the Member State.

Remarks

Result of the calculation for the netting of adjustments to plastic-based own resource of previous financial years.

This calculation is the product of multiplying the total amounts of adjustments by the percentage that the GNI of the Member State concerned represents of the GNI of all Member States, as applicable on 15 January to the budget in force for the year following that in which the data for the adjustments were supplied (the 'net amount').

The Commission shall inform the Member States of the amounts resulting from that calculation before 1 February of the year following that in which the data for the adjustments were supplied.

Remarks

Article 5 of Protocol No 21 on the position of the United Kingdom and Ireland in respect of the area of freedom, security and justice and Article 3 of Protocol No 22 on the position of Denmark, both annexed to the Treaty on European Union and the Treaty on the Functioning of the European Union, grant full exemption to Ireland and Denmark from supporting the financial consequences of some specific policies in the area of freedom, security and justice, with the exception of the related administrative costs. They can therefore obtain an adjustment to the own resources paid for each year in which they do not participate.

CHAPTER 2 2 — ADJUSTMENT FOR THE NON-PARTICIPATION OF CERTAIN MEMBER STATES IN SPECIFIC POLICIES (*cont'd*)**2 2 0** (*cont'd*)

Each Member State's contribution to the adjustment mechanism is calculated by applying to the budget expenditure resulting from this operation or policy the scale of the aggregate GNI and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Regulation (EU) 2019/516 of 19 March 2019 on the harmonisation of gross national income at market prices (OJ L 91, 29.3.2019, p. 19, ELI: <http://data.europa.eu/eli/reg/2019/516/oj>).

Also in accordance with Article 332 TFEU, and based on Article 91(7) of Council Regulation (EU) 2017/1939 of 12 October 2017 implementing enhanced cooperation on the establishment of the European Public Prosecutor's Office ('the EPPO') (OJ L 283, 31.10.2017, p. 1, ELI: <http://data.europa.eu/eli/reg/2017/1939/oj>), the expenditure of the EPPO shall be borne by the participating Member States.

The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the account referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 on the first working day of December, in accordance with Article 11 of that Regulation.

Legal basis

Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39, ELI: <http://data.europa.eu/eli/reg/2014/609/oj>), and in particular Article 11 thereof.

Protocol No 21 on the position of the United Kingdom and Ireland in respect of the area of freedom, security and justice, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 5 thereof, and Protocol No 22 on the position of Denmark, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 3 thereof.

2026 estimate	2025 estimate	2024 out-turn
p.m.	p.m.	0,—

Remarks

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank in partnership with Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) which manage Union programmes. The amounts paid in by the Union remain on the accounts until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(5) of the Financial Regulation, interest generated by trust accounts used for Union programmes is used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

2026 estimate	2025 estimate	2024 out-turn
5 000 000	5 000 000	364 393 209,24

Remarks

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 gives rise to the payment of interest by the Member State concerned. However, the recovery of amounts of interest below EUR 500 shall be waived.

For the VAT and GNI-based own resources, interest shall be payable only in relation to delays in entering amounts referred to in Article 12(2) of Regulation (EU, Euratom) No 609/2014.

For the own resource based on plastic packaging waste that is not recycled interest shall be payable only in relation to delays in entering the amounts referred to in Article 11(1) of Regulation (EU, Euratom) 2021/770.

CHAPTER 4 1 — DEFAULT INTEREST (cont'd)

4 1 0 (cont'd)

In the case of Member States belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its main refinancing operations on the first day of the month in which the due date fell, or 0 per cent, whichever is higher, increased by 2,5 percentage points. That rate shall be increased by 0,25 of a percentage point for each month of delay.

In the case of Member States not belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, or 0 per cent, whichever is higher, increased by 2,5 percentage points. For the Member States for which the central bank rate is not available, the interest rate shall be equal to the most equivalent rate applied on the first day of the month in question on the Member State's money market, or 0 per cent, whichever is higher, increased by 2,5 percentage points. That rate shall be increased by 0,25 of a percentage point for each month of delay.

The total increase shall not exceed 14 percentage points. The increased rate shall be applied to the entire period of delay.

Legal basis

2026 estimate	2025 estimate	2024 out-turn
p.m.	p.m.	2 069 033 980,28

Remarks

This item is intended to record the external assigned revenue of the Innovation Fund (IF). This revenue results from the auctioning of the allowances and the unspent amounts from the previous NER300 fund in accordance with Article 10 and Article 10a(8) of Directive 2003/87/EC. The external assigned revenue becoming available on this item is intended to cover all expenditure related to the implementation tasks carried out by the Commission.

For financial year 2026, it is provisionally estimated that an amount of EUR 14,4 million will be needed in order to finance the contribution to the expenditure for the European Climate, Infrastructure and Environment Executive Agency's (CINEA) staff and administration, incurred as a result of the Agency's role in the management of the Innovation Fund financed from Item 16 01 02 74.

The appropriation from Article 16 01 02 will cover the administrative and management costs incurred in relation to the Innovation Fund implementation activities and preparatory activities for the implementation of the Social Climate Fund, in particular costs for external personnel in headquarters.

As regards the operational expenditure for financial year 2026 financed from Article 16 03 01, calls for proposals for projects and competitive bidding for fixed premiums of EUR 4 800 million (indicative) as well as EUR 1 200 million (indicative) for a dedicated instrument to support the Clean Industrial Deal policy priority are planned during that year.

This item is intended to record the annual contributions from the European Coal and Steel Community (ECSC) in liquidation to the Union's annual budget for the years 2021 to 2025 that are resulting from the application of the Article 145 of the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community.

Under this item, the Union is liable to the United Kingdom for its share in the net assets of the ECSC in liquidation on 31 December 2020 (EUR 184 373 974) and the related reimbursement shall be made in five equal annual instalments (EUR 36 874 795) from 2021 to 2025.

These contributions from the ECSC in liquidation therefore aim at fully compensating the effects of the corresponding reductions accounted for in the contributions to the Union's annual budget of the United Kingdom, as recorded under Item 6 6 0 2.

COMMISSION
TITLE 01 — RESEARCH AND INNOVATION

CHAPTER 01 01 — SUPPORT ADMINISTRATIVE EXPENDITURE OF THE ‘RESEARCH AND INNOVATION’ CLUSTER (cont’d)

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature (salaries, studies, meetings of experts, information and publications, etc.) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

01 01 01 **Support expenditure for Horizon Europe**

Remarks

Besides the expenditure described in this chapter, this appropriation is also intended to cover expenditure relating to officials, temporary and external staff as well as other administrative expenditure for the management of the specific research and innovation programme — Horizon Europe, in the form of indirect and direct actions, including administrative expenditure incurred by staff posted in Union delegations.

Legal basis

See Chapter 01 02.

Remarks

This appropriation is intended to cover expenditure relating to officials and temporary staff occupying posts on the authorised establishment plan of the Joint Research Centre (JRC) and implementing the specific research and innovation programme — Horizon Europe, and in particular:

- direct action, consisting of research activities, scientific and technical support activities, and exploratory research activities undertaken in the establishments of the JRC and in Union delegations,
- indirect action, consisting of programmes implemented as part of the JRC’s activities conducted on a competitive basis.

Staff costs comprise the basic salary, allowances, miscellaneous indemnities and contributions based on the statutory provisions, including expenses related to the entry into service, change in the place of employment and termination of service.

This appropriation can be supplemented by appropriations that the JRC will receive by participating on a competitive basis in indirect actions and in scientific and technical activities in support of Union policies. The activities of a competitive nature conducted by the JRC shall consist of:

- activities carried out following grant or procurement procedures,
- activities on behalf of third parties,
- activities undertaken under an administrative agreement with other institutions or other Commission departments for the provision of technical-scientific services.

Revenue from competitive activities will be used to cover, inter alia, expenditure incurred on staff and resources in respect of activities in support of the Union’s policies and work for third parties carried out by the JRC.

Remarks

Horizon Europe – the Framework Programme for Research and Innovation aims at delivering scientific, technological, economic and societal impact from the Union's investments in research and innovation so as to strengthen the scientific and technological bases of the Union and foster its competitiveness in all Member States including in its industry, deliver on the Union's strategic priorities, contribute to the realisation of Union objectives and policies, contribute to tackling global challenges, including the Sustainable Development Goals by following the principles of Agenda 2030 and the Paris Agreement, and strengthen the European Research Area. Horizon Europe shall thus maximise Union added value by focusing on objectives and activities that cannot be effectively realised by Member States acting alone, but in cooperation.

COMMISSION
TITLE 01 — RESEARCH AND INNOVATION

CHAPTER 01 02 — HORIZON EUROPE (*cont'd*)

Horizon Europe shall:

- develop, promote and advance scientific excellence, support the creation and diffusion of high-quality new fundamental and applied knowledge, skills, technologies and solutions, training and mobility of researchers, attract talent at all levels and contribute to full engagement of the Union's talent pool in actions supported under Horizon Europe,
- generate knowledge, strengthen the impact of research and innovation in developing, supporting and implementing Union policies and support the access to and uptake of innovative solutions in European industry, notably in SMEs, and in society to address global challenges, including climate change and the Sustainable Development Goals,
- foster all forms of innovation, facilitate technological development, demonstration and knowledge and technology transfer, strengthen deployment and exploitation of innovative solutions,
- optimise Horizon Europe's delivery for strengthening and increasing the impact and attractiveness of the European Research Area, to foster the excellence-based participations from all Member States, including low R&I performing Member States, in Horizon Europe and to facilitate collaborative links in European research and innovation.

Horizon Europe shall ensure the effective promotion of equal opportunities for all and the implementation of gender mainstreaming, including the integration of the gender dimension in R&I content.

Horizon Europe shall be implemented in synergy with other Union programmes while aiming for maximal administrative simplification.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for this programme under this title for a total amount of EUR 5 412 000 000 in commitments. Such amounts had to be legally committed before the end of 2023 with the exception of administrative expenditure for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

Legal basis

Council Regulation (EU) 2020/2094 of 14 December 2020 establishing a European Union Recovery Instrument to support the recovery in the aftermath of the COVID-19 crisis (OJ L 433 I, 22.12.2020, p. 23, ELI: <http://data.europa.eu/eli/reg/2020/2094/oj>).

CHAPTER 01 02 — HORIZON EUROPE (cont'd)

Regulation (EU) 2021/695 of the European Parliament and of the Council of 28 April 2021 establishing Horizon Europe – the Framework Programme for Research and Innovation, laying down its rules for participation and dissemination, and repealing Regulations (EU) No 1290/2013 and (EU) No 1291/2013 (OJ L 170, 12.5.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/695/oj>).

Regulation (EU) 2021/2115 of the European Parliament and of the Council of 2 December 2021 establishing rules on support for strategic plans to be drawn up by Member States under the common agricultural policy (CAP Strategic Plans) and financed by the European Agricultural Guarantee Fund (EAGF) and by the European Agricultural Fund for Rural Development (EAFRD) and repealing Regulations (EU) No 1305/2013 (EU) No 1307/2013 (OJ L 435, 6.12.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/2115/oj>).

01 02 01 **Excellent Science (Pillar I)**

Remarks

This pillar of Horizon Europe aims to promote scientific excellence, attract the best talent to Europe, provide appropriate support to early stage researchers and support the creation and diffusion of scientific excellence, high-quality knowledge, methodologies and skills, technologies and solutions to global social, environmental and economic challenges.

This pillar consists of:

- the European Research Council (ERC),
- Marie Skłodowska-Curie Actions (MSCA),
- research infrastructures.

Remarks

This appropriation is intended to provide attractive and flexible funding to enable talented and creative individual researchers, with an emphasis on early stage researchers, and their teams to pursue the most promising avenues at the frontier of science, regardless of their nationality and country of origin and on the basis of Union-wide competition based solely on the criterion of excellence.

The activities of the European Research Council shall support frontier research, in a bottom-up manner, carried out across all fields by principal investigators and their teams in competition at the European level, including early-stage career researchers.

Remarks

This appropriation is intended to cover the following activities and actions:

Under Horizon Europe, the Marie Skłodowska-Curie Actions (MSCA) continue to support the career development and training of researchers through trans-national, cross-sectoral and interdisciplinary mobility. This will be achieved, inter alia, through the development of excellent and innovative doctoral training programmes, postdoctoral fellowships and collaborative projects, which promote high-quality training, employment and mentoring standards for researchers at all stages of their careers, and cooperation between academic and non-academic organisations in Europe and beyond.

CHAPTER 01 02 — HORIZON EUROPE (*cont'd*)**01 02 01** (*cont'd*)01 02 01 02 (*cont'd*)

The MSCA will contribute to the Commission's political priorities and missions, with specific focus on the European Green Deal, the Digital Agenda and Making Europe Stronger in the World.

The Commission will inform stakeholders and interested parties worldwide about the MSCA and facilitate their participation in Horizon Europe. The Commission will also continue to inform the public about the positive impact of MSCA-funded research projects on their daily lives and to motivate pupils and students to consider a career in science and research. In addition, it will support the MSCA alumni as well as a network of national contact points dedicated to the MSCA.

Remarks

This appropriation is intended to endow Europe with world-class sustainable research infrastructures open and accessible to all researchers in Europe and beyond, which fully exploit their potential for scientific advance and innovation. Key objectives are to reduce the fragmentation of the research and innovation ecosystem, avoiding duplication of effort, and to better coordinate the design, development, accessibility and use of research infrastructures, including those financed from the European Regional Development Fund.

01 02 02 **Global Challenges and European Industrial Competitiveness (Pillar II)**

Remarks

This pillar is intended to support the creation and better diffusion of high-quality new knowledge, technologies and sustainable solutions, reinforce the competitiveness of European industry, strengthen the impact of research and innovation in developing, supporting and implementing Union policies, and support the uptake of innovative solutions in industry, notably in SMEs and start-ups, and in society to address global challenges.

To maximise impact flexibility and synergies, research and innovation activities shall be organised in six clusters, interconnected through pan-European research infrastructures, which individually and together will incentivise interdisciplinary, cross-sectoral, cross-policy, cross border and international cooperation.

This pillar consists of the following six clusters:

- Health,
- Culture, Creativity and Inclusive Society,
- Civil Security for Society,
- Digital, Industry and Space,
- Climate, Energy and Mobility,
- Food, Bioeconomy, Natural Resources, Agriculture and Environment,

and the non-nuclear direct actions of the Joint Research Centre.

Social sciences and humanities shall be fully integrated across all clusters, including specific and dedicated activities. Activities from a broad range of Technology Readiness Levels, including lower Technology Readiness Levels, will be covered in this pillar of Horizon Europe. Each cluster contributes towards several Sustainable Development Goals; and many of those goals are supported by more than one cluster. Gender equality is a crucial factor in order to obtain sustainable economic growth; it is therefore important to integrate a gender perspective in all global challenges.

Remarks

This appropriation is intended to cover activities to improve and protect the health and well-being of citizens at all ages. It is to be used to generate new knowledge, develop innovative solutions, and ensure where relevant the integration of a gender perspective to:

- prevent, diagnose, monitor, treat and cure diseases,
- develop health technologies,
- mitigate health risks,
- protect populations,
- promote good health and well-being, also in the work place,
- make public health systems more cost effective, equitable and sustainable,

Remarks

The Innovative Health Initiative Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster ‘Health’. It will help create a Union-wide health research and innovation ecosystem that facilitates the translation of scientific knowledge into tangible innovations. It will foster the development of safe, effective, people-centred and cost-effective products and services that target key unmet public health needs and drive cross-sectoral health innovation for a globally competitive European health industry. It will cover prevention, diagnostics, treatment and disease management affecting the population of the Union including the Europe’s Beating Cancer Plan. The initiative will contribute to reaching the objectives of the new Industrial Strategy for Europe and the Pharmaceutical Strategy for Europe.

Remarks

This appropriation is intended to respond to the challenges arising from persistent security threats, including cybercrime, as well as natural and man-made disasters. Research and innovation activities under this cluster will have an exclusive focus on civil applications. Coordination with Union-funded defence research will be sought in order to strengthen synergies, recognizing that there are areas of dual-use technology. Due attention will be given to the human understanding and perception of security. Security research responds to the commitment of the Rome Agenda to work towards 'a safe and secure Europe', contributing to a genuine and effective Security Union.

Remarks

The Chips Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster ‘Digital, Industry and Space’ with the aim of supporting:

- large-scale capacity building throughout investment into cross-border and openly accessible research, development and innovation infrastructure set up in the Union to enable the development of cutting-edge and next-generation semiconductor technologies that will reinforce the Union’s advanced design, systems integration, and chips production capabilities, including emphasis on start-ups and scale-ups,
- key digital technologies that encompass electronic components, their design, manufacture and integration in systems and the software that defines how they work. The overarching objective of this partnership is to support the digital transformation of all economic and societal sectors, make the transformation work for Europe and support the European Green Deal.

Remarks

The Smart Networks and Services Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster 'Digital, Industry and Space'. This partnership will support technological sovereignty for smart networks and services in line with the new Industrial Strategy for Europe and the 5G cybersecurity toolbox. It aims to help resolve societal challenges and to enable the digital and green transition. For the COVID-19 crisis, it will support technologies that respond to both the health crisis and the economic recovery. The partnership will enable European players to develop the technology capacities for 6G systems as a basis for future digital services towards 2030.

Remarks

The Single European Sky ATM Research 3 Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster ‘Climate, Energy and Mobility’. The initiative aims to digitally transform air traffic management, to make European airspace the most efficient and environmentally friendly sky to fly in the world and to support the competitiveness and recovery of Europe’s aviation sector following the COVID-19 crisis. Its objectives are: improving connectivity, air-ground integration and automation, increasing flexibility and scalability of airspace management and the safe integration of unmanned aircraft.

The Clean Aviation Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster 'Climate, Energy and Mobility'. It puts aviation on course for climate neutrality, by accelerating the development, integration, and validation of mainly disruptive research and innovation solutions so that they can be deployed as soon as possible. It also aims to develop the next generation of ultra-efficient low-carbon aircraft, with novel power sources, engines, and systems, which will emerge from the research and demonstration phase at a high technology-readiness level.

Remarks

This appropriation is intended to build a knowledge base and deliver solutions to: protect the environment; restore, sustainably manage natural and biological resources from land, inland waters and sea to stop biodiversity erosion; address food and nutrition security for all, support the transition to a low-carbon, resource-efficient and circular economy; and develop a sustainable bioeconomy.

These activities will help to maintain and enhance biodiversity and secure the long-term provision of ecosystem services, such as climate change adaptation and mitigation and carbon sequestration (both on land and sea). They will help reduce greenhouse gas and other emissions, waste and pollution from primary production (both terrestrial and aquatic), the use of hazardous substances, processing, consumption and other human activities. Activities will also foster participatory approaches to research and innovation, including the multi-actor approach and develop knowledge, and innovation systems at local, regional, national and European levels.

The Circular Bio-based Europe Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster 'Food, Bioeconomy, Natural Resources, Agriculture and Environment'. It aims to develop and expand the sustainable sourcing and conversion of biomass into biobased products by focusing on multiscale biorefinery processing, and, by applying circular economy approaches such as utilisation of biological waste from agriculture, industry and municipal sectors. It also aims to support the deployment of bio-based innovation at regional level with the active involvement of local actors and with a view to reviving rural, coastal and peripheral regions.

Remarks

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre (JRC).

High-quality and trusted scientific evidence is essential for good public policies. New initiatives and proposals for Union legislation need transparent, comprehensive and balanced evidence, whereas implementation of policies needs evidence to measure and monitor their impact and progress.

The JRC adds value to Union policies because its science is excellent, multi-disciplinary and independent of national, private and other external interests. Serving all areas of Union policy, it provides the cross-sectoral support that policymakers need to tackle increasingly complex societal challenges. The JRC's independence from special interests combined with its scientific-technical reference role enable it to facilitate consensus building between stakeholders and other actors such as citizens, and policymakers. With its capacity to respond rapidly to policy needs, the JRC's activities are complementary to indirect actions aimed at supporting longer-term policy objectives.

The JRC performs its own research and is a strategic manager of knowledge, information, data and competences to deliver high quality and relevant evidence for smarter policies. To achieve this, the JRC works together with the best organisations worldwide, and with international, national and regional experts and stakeholders. Its research contributes to the general objectives and priorities of Horizon Europe, provides independent scientific knowledge, advice and technical support for Union policies throughout the policy cycle, and is focused on Union policy priorities, supporting a Europe that is safe and secure, prosperous and sustainable, social and stronger on the global scene.

This appropriation covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information and acquisition of consumables. This includes expenditure on scientific infrastructure directly incurred for the projects concerned, as well as expenses of external users accessing JRC physical research infrastructures in order to conduct research, undertake experimental development, or provide education and training.

It also covers expenditure of any type concerning research and scientific support tasks relating to activities under this item entrusted to the JRC within the framework of its participation on a competitive basis in support of Union policies and on behalf of outside bodies.

01 02 03 ***Innovative Europe (Pillar III)****Remarks*

This pillar shall foster all forms of innovation, including non-technological innovation, primarily within SMEs including start-ups, by facilitating technological development, demonstration and knowledge transfer, and strengthen deployment of innovative solutions.

This pillar shall also provide for the activities developed under the European Institute of Innovation and Technology (EIT), in particular through its Knowledge and Innovation Communities (KICs). Systematic synergies shall be ensured between the European Innovation Council (EIC) and the EIT. Innovative companies stemming from an EIT KIC may be channelled to the EIC to create a pipeline of not yet bankable innovations, while high potential innovative companies funded by the EIC that are not already engaged in one of the EIT KICs may be offered access to this additional support.

Whilst the EIC and the EIT KICs may directly support innovations across the Union, the overall environment from which European innovations are nurtured and emerge must be further developed and enhanced: findings in fundamental research lead to market-creating innovations. It must be a common European endeavour to support innovation all across Europe, and in all dimensions and forms, including through complementary Union national and regional policies (including through effective synergies with the European Regional Development Fund and smart specialisation strategies) and resources whenever possible. Hence, this pillar provides also for renewed and reinforced coordination and cooperation mechanisms with Member States and associated countries, but also with private initiatives, in order to support all actors of European innovation ecosystems, including at regional and local level.

Additionally, as a continued effort to enhance risk-finance capacities for research and innovation in Europe, this pillar will closely link with the InvestEU Programme. Building on the successes and the experiences gained under Horizon 2020 InnovFin, as well as under the European Fund for Strategic Investments, the InvestEU Programme will enhance access to risk finance for bankable entities, as well as for investors.

The European Innovation Council (EIC) is intended to focus mainly on breakthrough and disruptive innovation, targeting especially market-creating innovation, while also supporting all types of innovation, including incremental.

The EIC shall:

- identify, develop and deploy high risk innovations of all kinds including incremental, with a strong focus on breakthrough, disruptive and deep-tech innovations that have the potential to become market-creating innovations, and
- support the rapid scale-up of innovative companies mainly SMEs, including start-ups and in exceptional cases small mid-caps at Union and international levels along the pathway from ideas to market.

Where relevant, the EIC shall contribute to the activities supported under other parts of Horizon Europe, in particular in Pillar II.

CHAPTER 01 02 — HORIZON EUROPE (*cont'd*)**01 02 03** (*cont'd*)01 02 03 02 (*cont'd*)*Remarks*

This appropriation is intended to contribute to support all types of innovation, reach out to all innovators across the Union and provide them with adequate support through:

- the development of an effective innovation ecosystem at Union level,
- the encouragement of cooperation and networking, and the exchange of ideas and knowledge,
- the development of open innovation processes in organisations,
- supporting funding and skills among national, regional and local innovation ecosystems.

Activities will include connecting with national and regional innovation actors and supporting the implementation of joint cross-border innovation programmes by Member States, regions and associated countries. This should be implemented in synergy, inter alia, with support from the European Regional Development Fund for innovation ecosystems and interregional partnerships around smart specialisation topics.

01 02 03 (*cont'd*)

01 02 03 03 (*cont'd*)

The overall mission of the EIT is to boost sustainable European economic growth and competitiveness by reinforcing the innovation capacity of the Member States and the Union. In particular, the EIT reinforces the Union's innovation capacity and addresses societal challenges through the integration of the knowledge triangle of higher education, research and innovation. The EIT operates through its KICs: large-scale European partnerships which address specific societal challenges by bringing together education, research and business organisations. The EIT provides grants to the KICs, monitors their activities, supports cross-KIC collaboration and disseminates results and good practices.

01 02 04 **Widening participation and strengthening the European Research Area**

Remarks

The appropriations under this Article will support activities that contribute to attracting talent, fostering brain circulation and preventing brain drain, as well as a more knowledge-based and innovative and gender-equal Europe at the forefront of global competition and fostering transnational cooperation and thereby optimise national strengths and potential across the whole Europe. It will support a well-performing European Research Area, where knowledge and a highly skilled workforce circulate freely in a balanced manner, where the outcomes of R&I are widely disseminated to, as well as understood and trusted by, informed citizens, and where Union policy, notably R&I policy, is based on high quality scientific evidence.

It shall also support activities aimed at:

- improving the quality of proposals from legal entities from low R&I performing Member States, such as professional pre-proposal checks and advice,

CHAPTER 01 02 — HORIZON EUROPE (cont'd)

01 02 04 (cont'd)

- boosting the activities of national contact points to support international networking,
- activities aimed at supporting legal entities from low R&I performing Member States to join already selected collaborative projects.

Remarks

This appropriation is intended to reduce disparities and the existing divide in research and innovation performance by sharing knowledge and expertise across the Union by helping widening countries and the Union's outermost regions to attain a competitive position in the global value chains and the Union to fully benefit from the R&I potential of all Member States. Further action, for example through the promotion of openness and diversity of project consortia, is therefore needed to counter the trend for closed collaborations, which can exclude large number of promising institutions and individuals, including newcomers, and to exploit the potential of the Union's talent pool by maximising and sharing the benefits of research and innovation across the Union.

Remarks

Appropriations under this chapter are intended to cover the Research and Training Programme of the European Atomic Energy Community for the period 2021-2025 (the 'Euratom Programme'). The Euratom Programme supports nuclear research and training activities. The Euratom Programme is aimed at enhancing nuclear safety, security and protection from ionising radiation, including through safe waste management and decommissioning activities. The Programme focuses also on the development of fusion energy, a potentially inexhaustible and climate-friendly energy source. The Euratom Programme provides, through the Joint Research Centre (JRC), important independent scientific advice in support of the implementation of Union policies in the nuclear field. The Euratom Programme also seeks to strengthen the Union's nuclear competences, expertise and knowledge management and pursues improvements in the areas of education, training and access to research infrastructure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries associated with the Euratom Programme for participating in the Euratom Programme, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation aims to foster the development of fusion energy as a potential future energy source for electricity production and contribute to the implementation of the European fusion roadmap. A co-funded European Partnership in fusion research will implement this roadmap towards the goal of fusion electricity production by the second half of this century. The fusion research and development activity contributes also to maintaining and further developing expertise and competence in the field in the Union.

Remarks

This appropriation aims to improve and support nuclear safety, security, safeguards, radiation protection, safe spent fuel and radioactive waste management and decommissioning, including the safe and secure use of nuclear power and of non-power applications of ionising radiation. It also contributes to maintaining and further developing expertise and competence in the field in the Union.

Remarks

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre (JRC) to implement the Euratom Research and Training Programme. That programme shall contribute to the achievement of its specific objectives:

- improve the safe and secure use of nuclear energy and non-power applications of ionising radiation, including nuclear safety, security, safeguards, radiation protection, safe spent fuel and radioactive waste management and decommissioning,
- maintain and further develop expertise and competence in the Community,
- support the policy of the Community on nuclear safety, safeguards and security.

This appropriation also addresses the activities necessary for implementing safeguards pursuant to Chapter 7 of Title II of the Euratom Treaty and the obligations arising from the Treaty on the Non-Proliferation of Nuclear Weapons and implementation of the Commission's programme to support the International Atomic Energy Agency (IAEA).

It covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information and acquisition of consumables. This includes expenditure on scientific infrastructure directly incurred for the projects concerned, as well as expenses linked to the cost of the use of JRC physical research infrastructures by external users accessing them in order to conduct research, undertake experimental development, or provide education and training.

This appropriation also covers expenditure of any type concerning research and scientific support tasks relating to activities under this article entrusted to the JRC within the framework of its participation on a competitive basis in support of Union policies and on behalf of outside bodies.

Remarks

The ITER project aims to demonstrate fusion as a viable and sustainable source of energy by building and operating an experimental fusion reactor as a major step towards the creation of prototype reactors for fusion power stations that are safe, sustainable, environmentally responsible and economically viable. Fusion is expected to play an important role in Europe's future energy landscape as a climate friendly energy source. It is particularly important following the 2015 Paris Agreement on climate change and the Union commitment to lead the way in decarbonising the economy and tackling climate change in a cost effective manner. In this regard, it will contribute to the European Green Deal objective of no net greenhouse gas emissions in 2050 and will foster the mobilisation of European high-tech industries, which are involved in the construction of ITER and provide the Union with a global competitive advantage in this promising sector.

The European Joint Undertaking for ITER and the Development of Fusion for Energy has been established by Decision 2007/198/Euratom. The tasks of the Joint Undertaking are as follows:

- to provide the contribution of Euratom to the ITER International Fusion Energy Organisation,
- to provide the contribution of Euratom to broader approach activities with Japan for the rapid realisation of fusion energy,
- to prepare and coordinate a programme of activities in preparation for the construction of a demonstration fusion reactor and related facilities.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover part of expenses of any kind incurred during the implementation of the high-flux reactor (HFR) supplementary research programme.

The scientific and technical objectives of the HFR supplementary research programme are the following:

- to ensure the safe and reliable operation of the HFR in order to guarantee the availability of the neutron flux for experimental purposes,
- to allow efficient use of HFR by research institutes in a broad range of areas: improvement of safety of nuclear reactors, health (including the development of medical isotopes), nuclear fusion, fundamental research and training and waste management, including the possibility to study the safety issues of nuclear fuels for reactor systems of interest to Europe.

The HFR supplementary research programme also allows the HFR to act as a training facility hosting doctoral and post-doctoral fellows in performing their research activities through national or European programmes.

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature, such as studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

Remarks

Appropriations under this chapter are intended to cover the costs of a Union guarantee provided under the InvestEU Fund for financing and investment operations carried out in support of the Union's internal policies. It also covers the costs for an advisory support mechanism to support the development of investable projects and access to financing and to provide related capacity building (InvestEU Advisory Hub). Finally, it also covers the costs of a database granting visibility to projects for which project promoters seek financing and which provides investors with information about investment opportunities (InvestEU Portal).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for this programme under this title for a total amount of EUR 6 074 000 000 in commitments in current prices. Such amounts had to be legally committed before the end of 2023, with the exception of administrative expenditure for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

Moreover, in accordance with Regulation (EU) 2021/523, resources from the additional allocation provided in accordance with Article 5 of and Annex II to Regulation (EU, Euratom) 2020/2093 give rise to the provision of appropriations for this fund.

CHAPTER 02 02 — INVESTEU FUND (*cont'd*)

Furthermore, any revenues, repayments and recoveries from financial instruments established by programmes referred to in Annex IV to Regulation (EU) 2021/523, may be used for the provisioning of the EU guarantee, taking into account the relevant provisions of Regulation (EU) 2021/1229 of the European Parliament and of the Council of 14 July 2021 on the public sector loan facility under the Just Transition Mechanism (OJ L 274, 30.7.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/1229/oj>) concerning the budget for 2021-2027.

Remarks

Appropriations under this chapter are intended to cover actions focused on the development and modernisation of the trans-European networks in the fields of transport, energy and digital and to facilitate cross-border cooperation in the field of renewable energy, taking into account the long-term decarbonisation commitments and with an emphasis on synergies among sectors.

CHAPTER 02 03 — CONNECTING EUROPE FACILITY (CEF) (cont'd)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Legal basis

Remarks

This appropriation is intended to cover actions to contribute to the development of projects of common interest relating to efficient, interconnected and multimodal networks and infrastructure for smart, interoperable, sustainable, inclusive, accessible, safe and secure mobility. Those projects will be implemented mainly through calls for proposals under multiannual work programmes constituting financing decisions within the meaning of Article 110 of the Financial Regulation.

This appropriation will support actions that take into account the long-term decarbonisation commitments of the Union. The implementation will take the form of studies, works and other accompanying measures necessary for the management and delivery of the CEF, in line with the sector specific guidelines, i.e. the TEN-T Guidelines.

CHAPTER 02 03 — CONNECTING EUROPE FACILITY (CEF) (cont'd)

02 03 01 (cont'd)

Eligible actions will relate to the development of efficient, interconnected and multimodal networks in railways, inland waterways, maritime ports and road infrastructure along the TEN-T core network and for cross-border links, maritime ports and inland ports located on the TEN-T comprehensive network. Moreover, support will be provided to smart, interoperable, sustainable, multimodal, inclusive, accessible, safe and secure mobility, such as Motorways of the Sea, telematics application systems for all transport modes, new technologies and innovation with a specific focus on alternative fuels infrastructures, actions to remove interoperability barriers and actions improving transport infrastructure accessibility and resilience.

Assigned revenue received may give rise to additional appropriations under this budget line in accordance with Article 22(1) of the Financial Regulation.

Remarks

This appropriation is intended to cover the costs of energy infrastructure projects of common interest and projects of mutual interest relating to further integration of an efficient and competitive internal energy market, interoperability of networks across borders and sectors, facilitating decarbonisation of the economy, promoting energy efficiency and ensuring security of supply, and projects aiming to facilitate cross-border cooperation in the area of energy, including renewable energy.

Remarks

This appropriation is intended to cover actions to contribute to the development of projects of common interest relating to the deployment of safe and secure very high-capacity digital networks and 5G systems, to the increased capacity and resilience of digital backbone networks in Union territory, as well to the digitalisation of transport and energy networks.

Actions foreseen under CEF include: the deployment of and access to very high-capacity networks, including 5G systems, capable of providing Gigabit connectivity in areas where socioeconomic drivers are located; the provision of very high-quality local wireless connectivity in local communities that is free of charge and without discriminatory conditions; uninterrupted coverage with 5G systems of all major transport paths, including the trans-European transport networks; the deployment of new or significant upgrades of existing backbone networks including submarine cables, within and between Member States and between the Union and third countries; and supporting operational digital platforms directly associated with transport or energy infrastructures.

This appropriation may also be used for technical and administrative assistance for the implementation of CEF, such as preparatory, monitoring, control, audit and evaluation activities including corporate information technology systems.

Remarks

This appropriation is intended to cover actions to build up and strengthen the Union's high-performance computing and data processing capacities, and ensure their wide use both in areas of public interest such as health, climate, environment, and security, and by industry, notably small and medium-sized enterprises (SMEs). More concretely, the Connecting Europe Facility appropriation should be used to fund part of the activities of the federation of supercomputing services pillar, i.e. the interconnection of the high performance computing, quantum computing and data resources, as well as the interconnection with the Union's common European data spaces and secure cloud infrastructures.

Remarks

Appropriations under this chapter are intended to cover actions focused on reinforcing Europe's capacities in high performance computing, artificial intelligence (AI), cybersecurity and advanced digital skills, development and deployment of cutting-edge and next generation semiconductor and quantum technologies and ensuring their wide use across the economy and society. Fostered simultaneously, these will help create a thriving data economy, promote inclusiveness and equal opportunities for all and ensure value creation. Most importantly, the programme will concentrate on the areas where no single Member State alone can ensure the level required for digital success. Focus will be placed on those areas where public spending has the highest impact, notably on improving efficiency and quality of services in areas of public interest such as health, environment, climate, mobility and public administrations, and helping small and medium-sized enterprises (SMEs) to adapt to digital change.

The Digital Europe Programme will consider the added value of combining digital with other enabling technologies in order to maximise benefits from digitisation.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover the interoperability block of the Digital Europe Programme that is the successor of the ISA² programme that ended in December 2020.

Interoperability of European public services concerns all levels of administration: Union-wide, national, regional and local. The aim of the interoperability block of the Digital Europe Programme is to eliminate fragmentation of European services, and to implement a holistic cross-sector and cross-border approach to interoperability. It will facilitate and support the design, development, update, use and deployment of interoperable solutions and frameworks by European public administrations, businesses and citizens. It will also offer public administrations access to testing and piloting of digital technologies, including their cross-border use.

Remarks

The Chips Joint Undertaking contributes to the implementation of the Digital Europe Programme with the aim of supporting large-scale capacity building throughout investment in cross-border and openly accessible research, development and innovation infrastructure set up in the Union to enable the development of cutting-edge and next-generation semiconductor technologies that will reinforce the EU's advanced design, systems integration, and chips production capabilities, including an emphasis on start-ups and scale-ups.

The Chips Joint Undertaking will pool resources from the Union, Member States and third countries associated with the existing Union programmes, as well as the private sector.

Remarks

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies are set out in Annex 'Staff' to this section.

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1, ELI: http://data.europa.eu/eli/reg_del/2019/715/oj) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

EASA is the Union's agency for aviation safety. Its mission is to ensure the highest common level of safety protection for Union citizens, ensure the highest common level of environmental protection, establish a single regulatory and certification process among Member States, facilitate the internal aviation market and create a level playing field, and work with other international aviation organisations and regulators.

The main activities of EASA include the collection and analysis of safety intelligence and performance data to derive strategic action plans, the certification of aviation products and the approval of organisations in all aviation domains (design, production, maintenance, training, air traffic management, etc.), the preparation of regulatory material setting up common standards for aviation in Europe and the monitoring and inspections of the effective implementation of such standards in the Member States and the Union's neighbouring States that have signed aviation agreements with the Union.

The tasks performed by EASA cover the whole spectrum of the Union's aviation safety rules and have an important international component as EASA is legally mandated to cooperate with international actors in order to achieve the highest safety level for EU citizens globally (e.g. EU safety list, authorisation of third country operators, and implementation of technical assistance programming towards third countries). Established in 2002, EASA is composed of more than 800 aviation experts and administrators, and it has 31 Member States (27 EU Member States + Switzerland, Iceland, Norway and Liechtenstein). It has four international offices in Montreal, Washington, Beijing and Singapore. Typically, its budget consists mainly of fees and charges (64%), a subsidy from the Union (23%), earmarked funds (11%) and third country contributions (2%).

Remarks

EMSA is the Union agency for maritime safety. It sits at the heart of the Union's maritime safety network and fully recognises the importance of effective collaboration with many different interests and between Union and international institutions, Member States' administrations and the maritime industry.

EMSA's activities include: providing technical and scientific assistance to the Member States and the Commission in the proper development and implementation of Union legislation on maritime safety, security, prevention of pollution by ships and maritime transport administrative simplification; monitoring the implementation of Union legislation through visits and inspections; improving cooperation with and between Member States; building capacity of national competent authorities; providing operational assistance, including developing, managing and maintaining integrated maritime services related to ships, ship monitoring and enforcement; carrying out operational preparedness, detection and response tasks with respect to pollution caused by ships and marine pollution by oil and gas installations; and, at the request of the Commission, providing technical and operational assistance to third countries.

Remarks

ERA contributes to the further development and effective functioning of a single European railway area without frontiers, by guaranteeing a high level of railway safety and interoperability, while improving the competitive position of the railway sector. In particular, the ERA contributes, on technical matters, to the implementation of Union legislation by developing a common approach to safety on the Union rail system and by enhancing the level of interoperability on the Union rail system. Further objectives of the ERA are to follow the reduction of national railway rules in order to support the performance of national authorities acting in the fields of railway safety and interoperability, to promote the optimisation of procedures, to monitor national safety authorities and conformity assessment bodies and to manage and keep up-to-date a number of registers, which is vital for the smooth operation of the European railway area.

The entry into force of the technical pillar of the Fourth Railway Package designated ERA as the Union authority responsible for issuing authorisations for placing railway vehicles on the market, single safety certificates for railway undertakings and track-side approvals of the European Rail Traffic Management System.

Remarks

ENISA was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, ENISA will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

ENISA's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

Remarks

The Body of European Regulators for Electronic Communications (BEREC) acts as a specialised and independent expert advisory body assisting the Commission and the national regulatory authorities in the implementation of the Union regulatory framework for electronic communications in order to promote a consistent regulatory approach across the Union. BEREC is neither a Union body nor does it have legal personality.

The Agency for Support for BEREC (BEREC Office) is established as a Union body with legal personality, providing BEREC with professional and administrative support in carrying out the tasks conferred on it by Regulation (EU) 2018/1971.

Remarks

ACER is an independent body and neutral arbiter on regulatory matters that can take binding decisions required for the integration of the European Internal Energy Market, both for electricity and natural gas, and thereby supports the European Green Deal and the construction of a more resilient Europe. ACER is entrusted with supervising wholesale electricity and gas markets in order to prevent, detect and investigate market manipulations.

In close cooperation with national energy regulatory authorities, ACER ensures that market integration and the implementation of Union legislation is achieved according to the Union's energy policy objectives and regulatory framework.

This appropriation is intended to cover the financing of the technical and legal assistance necessary for the evaluation of the safety, environmental, economic and financial aspects of the projects for which financing in the form of a Euratom loan has been requested, including studies undertaken by the European Investment Bank (EIB). The measures are also intended to enable loan contracts to be concluded and carried out.

Appropriation under this item will also be used to cover or temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with Euratom borrowing and lending operations.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3) point (a) of the Financial Regulation.

Legal basis

Remarks

This appropriation is intended to cover support to renewable energy installations from the Union renewable energy financing mechanism with either the aim of helping Member States to fill the gap, in part or entirely, towards the EU 2030 renewables target in relation to their national reference points or contributing to the enabling framework for renewable energy deployment in line with Article 3 of Directive (EU) 2018/2001 of the European Parliament and of the Council of 11 December 2018 on the promotion of the use of energy from renewable sources (OJ L 328, 21.12.2018, p. 82, ELI: <http://data.europa.eu/eli/dir/2018/2001/oj>). The renewable energy generated by these installations would be statistically attributed to the participating Member States, reflecting their relative payments. The mechanism provides the Member States with the opportunity to increase the sectoral share of renewable energy in the electricity, heating, cooling and transport sector to territories facing socio-economic challenges deriving from the transition process towards a climate-neutral economy in the Union by 2050.

Remarks

This appropriation is intended to finance the activities necessary for the analysis, definition, promotion, monitoring, evaluation and implementation of the Union's transport policy, for all transport modes (road, rail, air, sea and inland waterways). The main actions and objectives are intended to support the Union's transport policy, including extension to third countries.

This appropriation covers all transport sectors such as transport safety, internal market of transport, optimisation of the transport network, multimodality, logistics, passengers' rights and protection, the use of alternative fuels, clean vehicles procurement and urban mobility, social and gender aspects as well as the safety and protection of transport users.

This appropriation is intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the rules and measures required to improve the security of inland, air and sea transport, including extension to third countries, technical assistance and specific training.

The main objectives are to develop and apply security rules in the field of transport and in particular:

- measures to prevent malicious acts in the transport sector,
- approximation of legislation, technical standards and administrative monitoring practices relating to transport security,
- definition of common indicators, methods and security objectives for the transport sector and collection of the data necessary for such definition,
- monitoring of measures taken on transport security by the Member States, in all modes,
- international coordination on transport security,
- promoting research in the field of transport security.

Support activities include studies, consultancy, evaluations and impact assessments, development and maintenance of IT tools and databases, meetings of experts, information and communication including communication campaigns, conferences and events.

This appropriation also covers expenditure on the establishment and operation of a corps of inspectors to check compliance with the requirements of Union security legislation of airports, ports and port facilities in the Member States, including extension to third countries, and of ships flying the flag of a Member State. This expenditure includes the subsistence allowances and travel expenses of the Commission inspectors and the expenses of inspectors from the Member States, borne in accordance with the provisions laid down in that legislation. The costs of training inspectors, of preparatory meetings and of the supplies needed for inspections must, in particular, be added to that expenditure.

Remarks

This appropriation is intended to cover expenditure incurred by the Commission to support the energy policy for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, financing, evaluation and implementation of a competitive, safe and sustainable European energy policy, of the internal energy market and its extension to third countries, of all aspects of energy supply security in a European and global perspective as well as the strengthening of the rights and protection of energy users by supplying quality services at transparent and comparable prices.

The principal endorsed objectives are to implement a progressive common European policy in line with the Energy Union strategy (COM(2015) 80 final) ensuring continuous energy supply security, good functioning of the internal energy market and access to transport networks of energy, observation of the energy market, integrated governance and monitoring, analysis of modelling including scenarios on the impact of policies considered and the strengthening of the rights and protection of energy users, based on general and particular knowledge of global and European energy markets for all energy types.

This appropriation is also intended to cover experts' expenditure directly linked to the collection, validation and analysis of necessary information on energy market observation, as well as expenditure on information and communication, digital processing and visualisation of data, conferences and events promoting activities in the energy sector, electronic and paper publications, audiovisual products as well as the development of different web-based and social media activities directly linked to the achievement of the objective of the energy policy. This appropriation will also support an enhanced energy dialogue with the Union's key energy partners and international agencies in the field of energy.

Remarks

This appropriation is intended to cover expenditure on a set of measures designed to:

- develop electronic communications policy, and promote (including outside the Union), monitor and coordinate the implementation of the regulatory framework with a view to completing the internal market, promoting competition, investment and growth and protecting end users over the entire range of issues in the e-communications field: economic analysis, impact assessment, policy development and regulatory compliance,
- develop policy and legislation with a particular focus on issues related to retail and consumer issues notably net neutrality, switching, roaming, demand and use stimulation and universal service,
- promote, monitor and review the implementation of the Union roaming policy as established under Regulation (EU) 2015/2120 of the European Parliament and of the Council of 25 November 2015 laying down measures concerning open internet access and retail charges for regulated intra-EU communications and amending Directive 2002/22/EC and Regulation (EU) No 531/201 (OJ L 310, 26.11.2015, p. 1, ELI: <http://data.europa.eu/eli/reg/2015/2120/oj>),
- develop and implement consistent market-based regulations to be applied by national regulatory authorities and to respond to individual notifications from those authorities, notably regarding relevant markets, competition and appropriate regulatory intervention, in particular for next generation access networks,
- develop policies across the board which will ensure that Member States manage all uses of spectrum, including the different internal market realms such as e-communications, 5G (including broadband internet), and innovation,
- promote and monitor the implementation of the regulatory framework for communication services, including the mechanism provided for in Article 32 of Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code (OJ L 321, 17.12.2018, p. 36, ELI: <http://data.europa.eu/eli/dir/2018/1972/oj>),
- enable third countries to pursue a policy of opening up their markets to the same extent as in the Union,
- promote and monitor the implementation of the radio spectrum policy programme (Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7, ELI: [http://data.europa.eu/eli/dec/2012/243\(2\)/oj](http://data.europa.eu/eli/dec/2012/243(2)/oj)),
- develop policies on copyright at Union level, including on Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases (OJ L 77, 27.3.1996, p. 20, ELI: <http://data.europa.eu/eli/dir/1996/9/oj>),

CHAPTER 02 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS (*cont'd*)**02 20 04** (*cont'd*)02 20 04 03 (*cont'd*)

- develop, implement and monitor policies in the context of the digital single market, on e-commerce in the Union, in particular those related to Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the Internal Market ('Directive on electronic commerce') (OJ L 178, 17.7.2000, p. 1, ELI: <http://data.europa.eu/eli/dir/2000/31/oj>), including the assessment of legal and economic barriers stemming from the internal market framework for electronic commerce or from related measures,
- support the implementation and take-up of policies in the context of eGovernment (in particular the eGovernment Action Plan 2016-2020) and eIDAS (Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC (OJ L 257, 28.8.2014, p. 73, ELI: <http://data.europa.eu/eli/reg/2014/910/oj>) in order to advance the quality and innovation of public administrations and accelerate the large-scale public and private sector use of trusted identification and trust services in the digital single market.

Those measures consist, inter alia, in preparing analyses and progress reports, consulting stakeholders and the public, preparing communications, legislative proposals and monitoring the application of legislation, translations of notifications and consultations under Article 32 of Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code (OJ L 321, 17.12.2018, p. 36, ELI: <http://data.europa.eu/eli/dir/2018/1972/oj>).

This appropriation is also intended to cover, in particular, contracts for analyses and expert reports, specific studies, evaluation reports, coordination activities, grants and the part-financing of certain measures.

In addition, it is also intended to cover expenditure on meetings of experts, communication events, membership fees, information and publications directly linked to the achievement of the objectives of the policy or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature (such as studies, meetings of experts, and information and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

CHAPTER 03 02 — SINGLE MARKET PROGRAMME (cont'd)

Remarks

Appropriations under this chapter are intended to contribute to the good functioning of the single market for goods and services, including financial services, anti-money laundering and the free movement of capital, and to provide high quality European statistics on all Union policies, as per the purpose of the Programme for the single market, competitiveness of enterprises, including small and medium-sized enterprises, and European statistics ('Single Market Programme'). In particular, the programme will support the design, implementation and enforcement of the Union legislation underpinning the proper functioning of the single market for goods and services, including financial services, anti-money laundering and the free movement of capital, as well as capacity building, coordination of joint actions between Member States and the Commission, and the international dimension of the internal market. It will also support women's participation and contribute to the empowerment of all actors of the single market: businesses, citizens including consumers, civil society and public authorities. The Single Market Programme brings together six preceding programmes from different policy areas, notably the grants and contracts part of the Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME), programmes on consumer protection, enhancing the participation of consumers and other end users in financial services policymaking, the development of international financial, auditing and corporate reporting standards, measures to contribute to a high level of health for humans, animals and plants along the food chain and in related areas, and European statistics. In addition, the programme includes several other budgetary lines concerning, in particular market surveillance, company law, contract and extra-contractual law, standardisation and support for competition policy, customs and taxation. The impact assessment showed that one single programme will create synergies contributing to more agile and efficient budgetary spending.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover expenditure arising from the management and development of the internal market governance tools (Your Europe, Single Digital Gateway, Digital Product Passport, Your Europe Advice, SOLVIT, the Internal Market Information (IMI) system and the Single Market Scoreboard). These tools are providing a seamless range of services for citizens, business and public authorities, that aim to ensure a better functioning of the internal market in practice. The Your Europe online portal provides citizens and businesses with information on their Union rights in 23 languages of the Union. Since December 2020, Your Europe serves as the entry point for Single Digital Gateway, adding information on national and regional rights and procedures in English and the relevant national languages. Single Digital Gateway is also working towards digitalising the most important administrative procedures for citizens and businesses, including their accessibility cross-border, and establishing a system for the automated cross-border exchange of evidence needed for those procedures. The Digital Product Passport offers a single point of entry for accessing product specific information essential for sustainability and circularity to consumers, businesses and public authorities, promoting transparency and harmonized application of EU rules in the internal market. It supports cooperation between public authorities in the Member States, including customs and market surveillance authorities. Your Europe Advice offers citizens and businesses free of charge tailored advice on their rights in the internal market. SOLVIT is an informal problem-solving network, efficiently dealing with cross-border problems faced by citizens or businesses that result from an incorrect application or transposition of Union legislation by a Member State. SOLVIT also identifies wider issues and reports on such issues as detected in the SOLVIT-IMI database. IMI is a multilingual online application for administrative cooperation between Member States within the internal market, making it easy for authorities to exchange information and work together, on the basis of simple and unified procedures in their own language. The Single Market Scoreboard, showing Member States' performance in the most relevant policy areas and for internal market governance tools, is being developed to provide an even more complete vision of the internal market.

Remarks

This appropriation is intended to cover measures which aim to make the internal market more effective, inter alia in light of the digital transformation, by:

- supporting the development of the Union regulatory framework in the areas of company law and corporate governance, and contract and extra-contractual law, with a view to making businesses, especially SMEs, more efficient and competitive, while providing protection for stakeholders affected by company operations, and with a view to reacting to emerging policy challenges;
- supporting the appropriate evaluation, implementation and enforcement of the relevant acquis, informing and assisting stakeholders and promoting information exchange in the area;
- supporting the Commission's initiatives in support of a clear and well-adapted legal framework for the data economy and innovation.

Remarks

This appropriation is intended to cover expenditure contributing to the effective enforcement, implementation, development, modernisation and communication of Union competition policy. It is intended to tackle the implications for competition and the functioning of the internal market resulting from the ongoing globalisation and transformation of the economy and business environment, in particular, the exponential growth and use of data, the increase of artificial intelligence and other digital tools and expertise. It should support networks and cooperation with national authorities and courts, as well as outreach activities to stakeholders.

03 02 01 06 (cont'd)

The appropriation shall cover expenditure arising from the Commission's monitoring of financial markets and financial stability, the assessment of the implementation of Union legislation by Member States, the evaluation of whether existing legislation is fit for purpose and the identification of potential areas of action where new risks or opportunities emerge. This shall include the international dimension of Union policies. It may also cover expenditure to facilitate the involvement of stakeholders throughout the policy cycle. Such activities rely on the production of analyses, studies, training materials, surveys, conformity assessments, evaluations and statistics. The appropriation shall also, where necessary, cover the procurement of data and the cost of access to external databases; the development and maintenance of IT systems, including licences and internal charge-backs, and IT support to internal and external users of these systems; information and communication activities and tools; participation in meetings including of international organisations and associations; the costs of membership of bodies, organisations and associations; consultations and meetings; and any other assistance required to ensure the required operation, strengthening, improvement and development of the internal market.

The appropriation shall also cover expenditure for promoting the correct and full implementation and application by the Member States of the Union legal framework for anti-money laundering and countering the financing of terrorism and the development of future policies to address new challenges in those fields, as well as supporting relevant activities of international organisations of European interest.

Remarks

Within the internal market, the free movement of goods is the most developed of all four fundamental freedoms. However, the increasing number of illegal and non-compliant products on the market distorts competition and puts consumers at risk. Many businesses disregard the rules either through a lack of knowledge or intentionally to gain a competitive advantage.

CHAPTER 03 02 — SINGLE MARKET PROGRAMME (cont'd)

Market surveillance ensures that non-food products on the Union market do not endanger European consumers and workers. It also ensures the protection of other public interests such as the environment, security and fairness in trade.

Under the Single Market Programme, support to market surveillance measures in the Union seeks to strengthen product compliance by providing the right incentives to entrepreneurs, intensifying compliance checks and controls of products at the external borders, and promoting closer cross-border cooperation between market surveillance enforcement authorities.

The Single Market Programme also contributes to the consolidation of the existing framework for market surveillance activities, to encourage joint actions of authorities from different Member States, to improve the exchange of information and to promote convergence and closer integration of activities.

Remarks

This appropriation is intended to support the competitiveness of enterprises, in particular that of SMEs, and to support their growth.

The implemented measures will include:

- networks and clusters bringing together a variety of stakeholders and support to strategically connect ecosystems,
- various forms of support for SMEs, including for social economy enterprises to foster access to markets and global value chains, entrepreneurship, the modernisation of industry and the competitiveness of sectors,
- various forms of support for SMEs, including for social economy enterprises, to empower their investments in green and social sustainability that benefits the local and regional economic ecosystem,

- information sharing, dissemination, awareness raising and advisory services to increase SMEs' competitiveness and help them participate in the single market and beyond.

Projects will seek to improve conditions for SMEs and contribute to a favourable business environment, including through capacity building, support to SME internationalisation, industrial transformation, skill development, and value chain collaboration, and help them increase their competitiveness and sustainability. They will rely on the services provided by clusters, entrepreneurship and business support networks.

In addition, projects will be put in place to support the implementation of the SME Relief Package, the SME Strategy for a sustainable and digital Europe and the New Industrial Strategy for Europe; as well as current Commission priorities, including the European Green Deal and Better Regulation. Appropriations also covers actions related to the implementation of the Single Digital Gateway and the Digital Product Passport which are key components supporting competitiveness and sustainability as well as the transition to a digital Europe.

Support actions directly linked to the achievement of the programme-specific objectives are also considered for funding: meetings (including workshops), studies, information and publications and participation in study groups.

Key activities that have proven expertise and success in reaching and supporting SMEs will continue to be central.

The Enterprise Europe Network (EEN) will be further strengthened and supported, and will use its expertise to enable SMEs to improve their competitiveness and develop their business in the single market and beyond. EEN services will be further adapted and widened to suit SME needs in respect of new policy priorities such as digitalisation, internationalisation, the circular economy and skills. EEN will help SMEs and scale-ups understand sustainability issues, and put in place strategies and business plans to adapt and compete successfully.

Joint Cluster Initiatives will be used as a strategic tool for supporting the competitiveness, scaling up of SMEs, supported by the European Cluster Collaboration Platform and its European Resource Efficiency Knowledge Centre (EREK). By connecting specialised ecosystems, clusters create new business opportunities for SMEs and integrate them better in European and global strategic value chains. Support will be provided for the development of transnational partnership strategies and the implementation of joint activities, including for channelling direct support to SMEs for encouraging the uptake of advanced technologies, low-carbon solutions, and skills upgrading.

The 'Erasmus for Young Entrepreneurs' mobility scheme enables new or aspiring entrepreneurs to gain business experience by matching with an experienced entrepreneur from another country and thus allow the strengthening of entrepreneurial talents. It helps tackle unemployment and enables existing SMEs to create jobs and increase their turnover by expanding and internationalising their business.

The High-Level Construction Forum is an active platform to bring together key stakeholders in the construction sector. The Forum monitors the green, digital and resilient transition pathways for the EU construction industry ecosystem.

Sustainable tourism will receive a special focus through sectorial support actions. The Union will support, inter alia:

- actions related to the implementation of Regulation (EU) 2024/1735 of the European Parliament and of the Council of 13 June 2024 on establishing a framework of measures for strengthening Europe's net-zero technology manufacturing ecosystem and amending Regulation (EU) 2018/1724 (OJ L, 2024/1735, 28.6.2024, ELI: <http://data.europa.eu/eli/reg/2024/1735/oj>), in particular in relation to skills,
- actions to build capacity of tourism businesses, in particular SMEs, in areas such as sustainability, digitalisation and innovation,
- actions to promote cross-border cooperation and peer learning among tourism stakeholders and public authorities responsible for tourism,
- foresight and socio-economic analysis regarding, inter alia, the long-term competitiveness of the tourism sector and promotion of Union tourism businesses.

The Programme is intended to ensure the effective promotion of equal opportunities for all, and the implementation of gender mainstreaming in its actions.

Remarks

European standardisation activities are governed by Regulation (EU) No 1025/2012 of the European Parliament and of the Council of 25 October 2012 on European standardisation and implemented through a long-standing public-private partnership which is fundamental to achieve the objectives set in that Regulation as well as in general and sectorial Union standardisation policies.

This appropriation is intended to cover the financing of European standardisation and stakeholder participation in setting up European standards. In particular, the appropriation will financially support the actions and the entities specified in Articles 15 and 16 of Regulation (EU) No 1025/2012.

European standards play an important role in the internal market. They are of vital interest for the competitiveness of undertakings, and especially SMEs. They are also a crucial tool to support Union legislation and policies in a number of key areas such as energy, climate change, information and communication technology, sustainable use of resources, innovation, product safety, consumer protection, workers' safety and working conditions and ageing population, thus positively contributing to society as a whole.

Remarks

This appropriation is intended to cover expenditure in pursuit of the specific objective of supporting the development of high-quality financial and non-financial reporting and auditing standards globally and across the Union, facilitating their integration into Union legislation and promoting the innovation and development of best practices in corporate reporting. Union funding for these activities is vital to support the development of International Financial Reporting Standards (IFRS) which take account of Union interests and which are consistent with the legal framework of the internal market, to promote best practices in wider corporate reporting and to support public oversight for the transparent development of International Standards on Auditing (ISA). Union funding is also vital to support the development and implementation of European sustainability reporting standards that build on and contribute to the development of such standards at the global level.

The appropriations may be used for actions supporting the development, application, assessment and monitoring of corporate reporting and auditing standards, thereby contributing to the transparency of Union capital markets and enhancing investor protection, financial stability and sustainable finance.

Remarks

This appropriation is intended to cover expenditure in pursuit of the specific objective of promoting the interests of consumers and ensuring a high level of consumer protection and product safety by:

- empowering, assisting and educating consumers, businesses and civil society in particular with regard to consumer's rights under Union law,
- ensuring a high level of consumer protection, sustainable consumption and product safety for, in particular, the most vulnerable consumers in order to enhance fairness, transparency and trust in the single market,
- ensuring that the interests of consumers in the digital world are duly taken into consideration,
- supporting competent enforcement authorities and consumer representative organisations and actions enhancing the cooperation between competent authorities with particular emphasis on issues raised by existing and emerging technologies,
- contributing to improving the quality and availability of standards across the Union,
- efficiently addressing unfair commercial practices,
- ensuring that all consumers have access to efficient redress mechanisms and are provided with adequate information on markets and consumers rights, and
- promoting sustainable consumption, namely through raising awareness about specific characteristics and the environmental impact of goods and services.

Remarks

This appropriation is intended to cover expenditure in pursuit of the specific objective of enhancing the participation of consumers, other financial service end users and representatives of civil society in financial services policymaking, promoting a better understanding of the financial sector and of the different categories of commercialised financial products and ensuring that the interests of consumers in the area of retail financial services are protected.

The appropriation may be used to support: the identification of issues relevant for Union policymaking for the protection of consumer interests in the area of financial services; awareness raising, dissemination, education and training for consumers, other financial service end users and non-experts; reinforcing the interactions between members of organisations representing the interests of consumers and other financial service end users; advocacy and policy advice; fostering the public and general interest in financial and Union regulation. The appropriation will provide the possibility to co-finance such activities, including in relation to sustainable finance, the transition to a low-carbon economy and climate change, undertaken by two non-profit organisations (Finance Watch and Better Finance) or by other potential beneficiaries, should they emerge.

CHAPTER 03 02 — SINGLE MARKET PROGRAMME (*cont'd*)**03 02 05** (*cont'd*)*Remarks*

This appropriation is intended to cover:

- statistical data collection and surveys, studies and the development of indicators and benchmarks,
- quality studies, knowledge transfer, capability building and activities designed to improve the quality of statistics,
- the processing, dissemination, promotion and marketing of the statistical information,
- the development, maintenance and reengineering of IT systems and infrastructure linked to putting into place and monitoring measures coming under this article,
- risk-based control work at the sites of entities involved in the production of statistical information in Member States, especially to support the economic governance of the Union,
- support to collaborative networks and support to organisations having as their primary objectives and activities the promotion and support for the implementation of the European Statistics Code of Practice and the implementation of new methods of production of European statistics,
- services rendered by external experts,
- statistical training courses for statisticians,
- the cost of purchasing documentation,
- subsidies and subscriptions to international statistical associations,
- gathering of the information necessary to draw up an annual summary report on the economic and social state of the Union on the basis of economic data and structural indicators and benchmarks,
- costs incurred in connection with the training of national statisticians and the policy of cooperation in the field of statistics with third countries; expenditure relating to exchanges of officials, the costs of information meetings, and expenditure on payment for services rendered in connection with the adjustment of the remuneration of officials and other staff,
- cooperating with the programme labelled European Master in Official Statistics to develop research in official statistics, encourage joint teaching projects and practical training in the European Statistical System,
- expenditure on the purchase of data and access for Commission departments to external databases,
- development of new, modular techniques,

Remarks

This appropriation is intended to support measures aiming to contribute to a high level of health for humans, animals and plants along the food chain and in related areas such as actions in the areas of animal welfare, sustainable food production and consumption, food fraud, coordinated control programmes, digitalisation, antimicrobial resistance and food waste prevention.

The animal welfare actions will aim at supporting innovative projects that replace, reduce or refine current practices that are detrimental to the welfare of animals as well as activities of data collection and training. Moreover, there will be initiatives to improve the sustainable use of food packaging materials and tableware as a way to reach the target of the circular economy and contribute to the zero pollution strategy.

Remarks

Appropriations under this chapter are intended to cover expenditure to support the customs union and customs authorities to protect the financial and economic interests of the Union and its Member States, to ensure security and safety within the Union and to protect the Union from unfair and illegal trade, while facilitating legitimate business activity.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

CHAPTER 03 10 — DECENTRALISED AGENCIES (*cont'd*)

The establishment plans of the agencies are set out in Annex 'Staff' to this section.

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1, ELI: http://data.europa.eu/eli/reg_del/2019/715/oj) and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

New article

Having regard to the TFEU, and in particular Article 114 thereof, as well as to Regulation (EU) No 952/2013, the European Customs Authority will contribute to a more effective and efficient operational management of the customs union. It will develop and manage the EU Custom Data Hub and perform EU level risk management, crisis management and performance measurement activities. It will provide operational coordination and support to national customs authorities to ensure a more harmonized application of customs controls and a uniform application of customs legislation. It will not only make the customs union stronger to better target illicit and non-compliant goods and 'bad' supply chains in close cooperation with other authorities and agencies, it will also make customs simpler by drastically simplifying customs processes for trade through the Data Hub.

Reference acts

Remarks

This appropriation is intended to cover:

- the completion of the deployment phase of the Global Navigation Satellite System (GNSS) components, consisting of the construction, establishment, protection of the space and ground infrastructure,
- the exploitation phase of the GNSS components, consisting of the management, maintenance, continuous improvement, evolution and protection of the space and ground infrastructure, the development of future generations of the system and the evolution of the services provided by the system, certification and standardisation operations, provision and marketing of the services provided by the system and all other activities needed to ensure that the programme runs smoothly.

Remarks

This appropriation is intended to cover the operations of Copernicus services, tailored to the needs of users, contributing to ensure access to data of the observation infrastructure necessary to operate Copernicus services and creating opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

This appropriation is also intended to cover the remaining development activities of the current Sentinels as well as the initiation of new missions' development.

CHAPTER 04 02 — UNION SPACE PROGRAMME (cont'd)

04 02 02 (cont'd)

This appropriation may also fund cross-cutting activities among the services or their articulation and coordination, as well as for the in situ coordination, user uptake and training and communication.

In addition, in support of competitiveness and growth, this appropriation may also fund data dissemination and the incubation of new businesses by supporting more robust and innovative IT structures in Europe.

Copernicus services will facilitate access to key data required in policy formulation at Union, national, regional and local level in fields such as agriculture, forest monitoring, water management, transport, urban planning, climate change and many others. This appropriation covers mainly the implementation of delegation agreements for the Copernicus programme, pursuant to Article 58 of the Financial Regulation.

Remarks

This appropriation is intended to cover all activities related to the set-up of Govsatcom and Space Situational Awareness (SSA) (covering Space Surveillance and Tracking (SST), space weather and near-Earth objects (NEO) components of the Union Space Programme).

Under the GOVSATCOM component, satellite communication capacities and services shall be combined into a common Union pool of satellite communication capacities and services, with appropriate security requirements. This component comprises:

- (a) the development, construction, and operations of the ground segment infrastructure;
- (b) the procurement of governmental and commercial satellite communication capacities, services, and user equipment necessary for the provision of GOVSATCOM services;
- (c) measures necessary to further interoperability and standardisation of GOVSATCOM user equipment.

CHAPTER 04 02 — UNION SPACE PROGRAMME (*cont'd*)**04 02 03** (*cont'd*)

Under the SSA component, a space surveillance and tracking system aiming to improve, operate and provide data, information and services related to the surveillance and tracking of space objects that orbit the Earth ('SST' sub-component) shall be complemented by observational parameters related to space weather events ('SWE' sub-component) and the risk monitoring of near-Earth objects approaching the Earth ('NEO sub-component').

The SST function shall support the following activities:

- (a) the establishment, development and operation of a network of ground-based and space-based SST sensors of the Member States, including sensors developed through the European Space Agency and nationally operated Union sensors, to survey and track objects and to produce a European catalogue of space objects;
- (b) the processing and analysis of SST data at national level in order to produce SST information and SST services referred to in Article 55 of Regulation (EU) 2021/696;
- (c) the provision of the SST services referred to in Article 55 to the SST users referred to in Article 56 of Regulation (EU) 2021/696;
- (d) monitoring and seeking synergies with initiatives promoting development and deployment of technologies for spacecraft disposal at the end of operational lifetime, of technological systems for the prevention and elimination of space debris as well as with the international initiatives in the area of the space traffic management;
- (e) technical and administrative support to ensure the transition to the Union Space Programme from the SST support framework established by Decision No 541/2014/EU of the European Parliament and of the Council of 16 April 2014 establishing a Framework for Space Surveillance and Tracking Support (OJ L 158, 27.5.2014, p. 227, ELI: [http://data.europa.eu/eli/dec/2014/541\(1\)/oj](http://data.europa.eu/eli/dec/2014/541(1)/oj)).

The space weather function may support the following activities:

- (a) the assessment and identification of the needs of the users in the sectors of transport, GNSSs, electric power grids and communications with the aim of setting out the space weather services to be provided;
- (b) the provision of space weather services to the space weather users, according to the identified users' needs and technical requirements.

The NEO function may support the following activities:

- (a) the mapping of Member States' capacities for detecting and monitoring near-Earth objects;
- (b) the promotion of the networking of Member States' facilities and research centres;
- (c) the development of the service referred to in the subsequent paragraph;
- (d) the development of a routine rapid response service able to characterise newly discovered near-Earth objects;
- (e) the creation of a European catalogue of near-Earth objects.

Remarks

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies are set out in Annex 'Staff' to this section.

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1, ELI: http://data.europa.eu/eli/reg_del/2019/715/oj) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

ERDF support under the Investment for jobs and growth goal and for the European territorial cooperation goal (Interreg) in the 2021-2027 and preceding programming periods.

It will cover the following three categories of regions:

- less developed regions, with a GDP per capita less than 75 % of the average GDP of the Union,
- transition regions, with a GDP per capita between 75 % and 100 % of the average GDP of the Union,

COMMISSION
TITLE 05 — REGIONAL DEVELOPMENT AND COHESION

CHAPTER 05 02 — EUROPEAN REGIONAL DEVELOPMENT FUND (ERDF) (*cont'd*)

- more developed regions, with a GDP per capita above 100 % of the average GDP of the Union.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for programmes financed under the REACT-EU under Titles 05 and 07 for a total amount of EUR 50 620 000 000 in commitments. Such amounts had to be legally committed before the end of 2023 with the exception of administrative expenditure for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

Remarks

CF support under the Investment for jobs and growth goal in the 2021-2027 and preceding programming periods. The CF will support Member States whose gross national income (GNI) per capita, measured in Purchasing Power Standards (PPS) and calculated on the basis of Union figures for the period 2014-2016, is less than 90 % of the average GNI per capita of the EU-27 for the same reference period. The appropriation, while ensuring an appropriate balance and according to the investment and infrastructure needs specific to each Member State, is intended to support:

- investments in the environment, including areas related to sustainable development and energy which present environmental benefits,
- the Connecting Europe Facility (CEF).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover CF support under the Investment for jobs and growth goal in the 2021-2027 programming period. The CF will support Member States whose GNI per capita, measured in Purchasing Power Standards (PPS) and calculated on the basis of Union figures for the period 2014-2016, is less than 90 % of the average GNI per capita of the EU-27 for the same reference period. The appropriation, while ensuring an appropriate balance and according to the investment and infrastructure needs specific to each Member State, is intended to support:

- investments in the environment, including areas related to sustainable development and energy which present environmental benefits,
- the Connecting Europe Facility (CEF).

05 03 02 (cont'd)

Remarks

This appropriation is intended to cover the CF-funded technical assistance provided for in Article 35 of Regulation (EU) 2021/1060.

Technical assistance may support preparatory, monitoring, control, audit, evaluation, communication including corporate communication on the political priorities of the Union, visibility and all administrative and technical assistance actions necessary for the implementation of the legislation on Union funds and, where appropriate with third countries.

It may, in particular, be used to cover:

- IT-related expenditure, including corporate IT,
- communication expenditure, including corporate communication,
- expenditure related to studies and evaluations.

Remarks

An amount transferred from the CF shall be spent exclusively in Member States eligible for funding from the CF.

The objective will be mainly implemented through calls for proposals under multiannual work programmes, which will constitute financing decisions in the meaning of Article 110 of the Financial Regulation.

It will support actions that take into account the long-term decarbonisation commitments of the Union. The implementation will take the form of studies, works and any other accompanying measures necessary for the management and delivery of the programme, in line with the sector-specific guidelines, i.e. the TEN-T Guidelines.

Eligible actions will mainly relate to the development of efficient, interconnected and multimodal networks in railways, inland waterways, maritime ports and road infrastructure along the TEN-T core network and for cross-border links, maritime ports and inland ports located on the TEN-T comprehensive network.

CHAPTER 05 03 — COHESION FUND (CF) (*cont'd*)**05 03 03** (*cont'd*)

In accordance with Article 4, point (4), of Regulation (EU) 2021/1153, up to 1 % of the overall CEF financial envelope will cover expenses pertaining to programme support actions and any other accompanying measures to support the preparation of projects and provide advisory to project promoters.

In accordance with Article 27 of Regulation (EU) 2021/1153, financial resources allocated to the CEF are also to contribute to the corporate communication of the political priorities of the Union, to actions taken pursuant to the CEF and to the results obtained.

Remarks

This appropriation is intended to cover the continuation of aid under Regulation (EC) No 389/2006 to facilitate the reunification of Cyprus by encouraging the economic development of the Turkish Cypriot community with particular emphasis on economic integration of the island, on improving contacts between the two communities and with the Union and on preparation for the application of the Union *acquis*. Assistance is delivered in the areas specified in that Regulation, and includes notably the promotion of social and economic development, the development and restructuring of infrastructure, reconciliation, confidence building measures and support to civil society, bringing the Turkish Cypriot community closer to the Union, including scholarships for Turkish Cypriot students. Also, the TAIEX instrument is used for the preparation of legal texts for the purpose of these being applicable upon the entry into force of a comprehensive settlement of the Cyprus problem, as well as for the preparation of the Union *acquis* immediately following a political settlement for reunification.

CHAPTER 05 04 — SUPPORT TO THE TURKISH CYPRIOT COMMUNITY (cont'd)

05 04 01 (cont'd)

This appropriation will, in particular, allow for the continuation of Union financial support to facilitate the intensification of the work of the Committee on Missing Persons in order to meet the goals of its strategic plan on the faster identification of missing persons, as well as the implementation of the decisions of the bi-communal Technical Committee on Cultural Heritage in order to preserve common cultural heritage of Cyprus.

This appropriation is to be implemented in direct and indirect management and be used, inter alia, to sustain the outcome of works, services, supplies and grants being funded under earlier allocations. In addition, grant schemes addressed to a large variety of economic and civil society beneficiaries (non-governmental organisations, students and teachers, schools, farmers, small villages, and the private sector) may continue. These activities aim at socio-economic development and are driven by the prospect of reunification. Priority should be given, where possible, to reconciliation projects that create bridges between the two communities and build confidence. These measures underline the strong desire and commitment of the Union to the Cyprus problem settlement and reunification.

COMMISSION
TITLE 06 — RECOVERY AND RESILIENCE

CHAPTER 06 01 — SUPPORT ADMINISTRATIVE EXPENDITURE OF THE ‘RECOVERY AND RESILIENCE’ CLUSTER (cont’d)

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature (such as studies, meetings of experts, information and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Besides the expenditure described in this chapter, this appropriation is also intended to cover expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are required for the management of the Technical Support Instrument and the achievement of its objectives, in particular studies, meetings of experts, information and communication actions, including corporate communication of the political priorities of the Union, insofar as they are related to the objectives of Regulation (EU) 2021/240, expenses linked to IT networks focusing on information processing and exchange, including corporate information technology tools, and all other technical and administrative assistance expenses incurred by the Commission for the management of the Technical Support Instrument. Expenses may also cover, under the Technical Support Instrument, the costs of other supporting activities, such as the quality control and monitoring of technical support projects on the ground and the costs of peer counselling and experts for the assessment and implementation of structural reforms. This appropriation may also be used to cover the type of expenditure mentioned above in this item relating to the management of actions and activities initiated under Regulation (EU) 2017/825 of the European Parliament and of the Council of 17 May 2017 on the establishment of the Structural Reform Support Programme for the period 2017 to 2020 and amending Regulations (EU) No 1303/2013 and (EU) No 1305/2013 (OJ L 129, 19.5.2017, p. 1, ELI: <http://data.europa.eu/eli/reg/2017/825/oj>), which were not completed by 31 December 2020.

Besides the expenditure described in this chapter, this appropriation is also intended to cover technical and administrative assistance for the implementation of borrowing and debt management activities in capital markets undertaken by the European Union under Article 224 of Regulation (EU, Euratom) 2024/2509 ('Financial Regulation'). Such expenditure is mainly directed at supporting borrowing and debt management activities to implement the European Union Recovery Instrument. In addition, expenditure may be used for the purpose of supporting borrowing and debt management activities to implement other current and future programmes of financial assistance falling within Article 224 of the Financial Regulation. In accordance with Article 223(4), point (e) of the Financial Regulation, in the case of loan support, the relevant cost pre-financed by this Article is recovered from the relevant beneficiary starting from the year that follows the loan disbursement pursuant to Implementing Decision (EU, Euratom) 2024/1974. Costs recovered from loan beneficiaries are used for the purpose of future borrowing and debt management operations expenditure undertaken from this budget line.

Expenditure may include preparatory, monitoring, audit, staff and evaluation activities including corporate information technology systems, licenses, platforms and account management.

Remarks

Appropriations under this chapter are intended to cover expenditure relevant to Regulation (EU) 2021/240 establishing a Technical Support Instrument and Regulation (EU) 2021/241 establishing the Recovery and Resilience Facility.

The Recovery and Resilience Facility is intended to promote the Union's economic, social and territorial cohesion by improving the resilience, crisis preparedness, adjustment capacity and growth potential of the Member States, by mitigating the social and economic impact of the COVID-19 crisis, and supporting the green and digital transitions, thereby contributing to restoring the growth potential of the economies of the Union, fostering employment creation in the aftermath of the COVID-19 crisis, and promoting sustainable growth. It is to provide Member States with financial support with a view to achieving the milestones and targets of reforms and investments as set out in their recovery and resilience plans.

COMMISSION
TITLE 06 — RECOVERY AND RESILIENCE

CHAPTER 06 02 — RECOVERY AND RESILIENCE FACILITY AND TECHNICAL SUPPORT INSTRUMENT (*cont'd*)

In accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue gives rise to the provision of appropriations for this programme under this title for a total amount of EUR 337 969 000 000 in commitments. Moreover, a total amount of EUR 20 000 000 000 is made available under that Regulation as additional non-repayable financial support to finance key investments and reforms that will help increasing the resilience of the Union's energy system through a decrease of dependence on fossil fuels and diversification of energy supplies at Union level (REPowerEU). That amount also constitutes external assigned revenue in accordance with Article 21(5) of the Financial Regulation. Such amounts had to be legally committed before the end of 2023 with the exception of administrative expenditure for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

The Technical Support Instrument is intended to promote the Union's economic, social and territorial cohesion by supporting Member States' efforts to implement reforms. This is necessary to encourage investment, to increase competitiveness and to achieve sustainable economic and social convergence, resilience and recovery. The Technical Support Instrument's objective is to support Member States' efforts to design, develop and implement reforms and prepare, develop, amend and implement recovery and resilience plans pursuant to Regulation (EU) 2021/241. This includes strengthening their institutional and administrative capacity, in order to properly quantify costing, milestones and targets, including at regional and local levels, to facilitate socially inclusive, green and digital transitions, to effectively address the challenges identified in the country-specific recommendations and to implement Union law.

Remarks

This appropriation is intended to cover expenses for the implementation of the Recovery and Resilience Facility in order to provide Member States with financial support with a view to achieving the milestones and targets of reforms and investments set out in their recovery and resilience plans. That specific objective shall be pursued in close and transparent cooperation with the Member States concerned.

This support will aim, in particular, to provide financial contributions to structural reforms and investments aimed at addressing challenges identified in the context of the European Semester of economic policy coordination.

Remarks

Appropriations under this chapter are intended to cover expenditure to support the actions under the Union Civil Protection Mechanism.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue gives rise to the provision of appropriations for programmes financed under the Union Civil Protection Mechanism under Title 06 for a total amount of EUR 2 056 480 000 in commitments. Such amounts had to be legally committed before the end of 2023 with the exception of administrative expenditure for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

Remarks

The Union Civil Protection Mechanism (UCPM) intervenes in all phases of the disaster management cycle: prevention, preparedness and response, and its geographical scope is both within and outside the Union.

As regards prevention, the mechanism aims in particular at fostering a shared culture of prevention with activities supporting and promoting Member States' risk assessment and risk reduction efforts, such as the sharing of good practice, the compilation and dissemination of information from Member States on risk management activities including through cross-border projects, peer reviews, and advisory missions. The mechanism also provides funding to scale-up Member States' and UCPM Participating States' disaster risk management strategies and to support the development of projects leveraging disaster risk management investments.

Preparedness efforts are supported, in particular, through the pooling of civil protection capacities in the form of the European Civil Protection Pool (ECPP), as well as the development of additional capacities at Union level to complement national efforts (the rescEU reserve and the rescEU transition phase). Preparedness is also improved through the development of Union-wide disaster resilience goals, training, exercises, the exchange of best practices and experts, all under the umbrella of the Union Civil Protection Knowledge Network. The mechanism also supports the study and development of disaster detection and early warning systems, and promotes scientific analysis and expert support.

Concerning the international dimension, the mechanism facilitates cooperation with the enlargement countries and countries under the European Neighbourhood Policy in the area of disaster management, through the funding of projects, training and policy dialogues.

In relation to response, the mechanism coordinates and finances or co-finances through the Emergency Response Coordination Centre (ERCC) the rapid and efficient deployment of national capacities, of ECPP modules and/or of rescEU, as well as of trained experts and Union civil protection teams for operations in Member States, UCPM Participating States, and in any third country. The mechanism support is financial, operational and facilitates coordination.

CHAPTER 06 06 — EU4HEALTH PROGRAMME (*cont'd*)**06 06 01** (*cont'd*)*Remarks*

This appropriation is intended to cover the operational expenditure under the EU4Health Programme. Its objective is to protect people in the Union from serious cross-border threats to health; to improve the availability, accessibility and affordability, in the Union, of medicines, medical devices and crisis-relevant products, and to support innovation regarding such products; to strengthen health systems and the healthcare workforce, including by digital transformation and by increased integrated and coordinated work among the Member States, sustained implementation of best practice and data sharing; and to increase the general level of public health.

The EU4Health Programme is to cater for a solid legal and financial framework for health crisis prevention, preparedness and response in the Union. This programme is to reinforce national and Union capacity for contingency planning and enable Member States to jointly cope with common health threats, in particular cross-border threats, where Union intervention can add tangible value. The programme complements health policies of the Member States and supports a 'One Health' approach, where applicable, in improving health outcomes through resilient, resource-efficient and inclusive health systems across the Member States, through better disease prevention and surveillance, health promotion, access, diagnosis and treatment, including the fight against cancer as well as cross-border collaboration in health. This programme is to also address non-communicable diseases, which have been shown to be a strong determinant of mortality from COVID-19.

Remarks

Appropriations under this chapter are intended to cover expenditure to support the actions under the emergency support within the Union. In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue, give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover the financing of emergency support operations to respond to the urgent and exceptional needs in Member States as a result of a natural or man-made disaster, in the event of activation by the Council under Regulation (EU) 2016/369.

COMMISSION
TITLE 06 — RECOVERY AND RESILIENCE

CHAPTER 06 07 — EMERGENCY SUPPORT WITHIN THE UNION *(cont'd)*

06 07 01 *(cont'd)*

Emergency support shall provide a needs-based emergency response, complementing the response of the affected Member States, aimed at preserving life, preventing and alleviating human suffering and maintaining human dignity. Emergency response may encompass assistance, relief and, where necessary, protection operations to save and preserve life in disasters or their immediate aftermath.

Following the activation through Regulation (EU) 2020/521 of the emergency support to tackle the COVID-19 outbreak in April 2020, this appropriation is intended to ensure a proper Union response in addressing the related health crisis.

The emergency support is intended to equip the Union with a broad toolbox commensurate with the large scale of the COVID-19 pandemic. The needs-based emergency support allows the Union to deploy targeted measures strategically, addressing the needs related to the COVID-19 crisis where the scale, speed or cross-border nature of the solutions needed are best addressed through coordinated Union intervention. Such emergency support complements Member States' efforts and assistance provided through other Union instruments.

Coordinated action at Union level enables the current crisis to be addressed through, inter alia:

- funding of Advance Purchase Agreements with COVID-19 vaccine developers/manufacturers,
- procurement and distribution to Member States of essential health-related products, including protective gear for hospital staff, testing supplies, therapeutics, diagnostics and training,
- transportation of essential medical cargo (including life-saving personal protective, testing and medical equipment, ventilators, masks, medicines, etc.),
- cross-border cooperation to alleviate the pressure on health systems in the most affected Union regions, including through the transportation of patients in need to cross-border hospitals which can offer free capacity, as well as providing support for the transport of medical teams and personnel including operating costs,
- funding clinical trials for generating clinical evidence to repurpose existing treatments to treat COVID-19 patients, as well the collection of COVID-19 convalescent plasma to increase its availability as a direct treatment for COVID-19 patients,
- increasing testing facilities and capacity in Member States and training additional staff to perform sampling and analysis,
- reinforcement of medical capacities and deployment of temporary healthcare facilities and temporary extension of existing healthcare facilities to relieve pressure on existing structures and increase overall healthcare capacity,
- procurement and donation of ultraviolet (UV) disinfecting robots to hospitals throughout the Union,
- contributing to strengthening cross-border contact tracing through an EU digital platform connecting national contact tracing and warning apps, as well as an EU exchange platform connecting national Passenger Locator Form systems,
- support issuing and verifying of interoperable certificates of vaccination, test results and recovery from COVID-19 to facilitate free movement,

CHAPTER 06 07 — EMERGENCY SUPPORT WITHIN THE UNION *(cont'd)***06 07 01** *(cont'd)*

- contributing to strengthening contact tracing through the establishment of an EU wastewater monitoring system.

This appropriation may cover any of the humanitarian aid actions eligible for Union financing, and may consequently encompass assistance, relief and, where necessary, protection operations to save and preserve life in disasters or in their immediate aftermath.

This appropriation may also be used to finance other expenditure directly related to the implementation of emergency support in accordance with Regulation (EU) 2020/521.

Remarks

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies are set out in Annex 'Staff' to this section.

CHAPTER 06 10 — DECENTRALISED AGENCIES (cont'd)

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1, ELI: http://data.europa.eu/eli/reg_del/2019/715/oj) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Article 3 of Regulation (EC) No 851/2004 provides that the mission of the European Centre for Disease Prevention and Control is the following:

- In order to enhance the capacity of the Union and the Member States to protect human health through the prevention and control of communicable diseases in humans and related special health issues, the mission of the Centre is to identify and assess current and emerging threats to human health from communicable diseases and related special health issues, to report thereon and, where appropriate, to ensure that information thereon is presented in an easily accessible way. The Centre acts in collaboration with competent bodies of the Member States or on its own initiative, through a dedicated network. The mission of the Centre is also to provide science-based recommendations and support in coordinating the response at Union and national levels, as well as at cross-border interregional and regional level, to such threats, where appropriate. In providing such recommendations, the Centre, where necessary, cooperates with Member States and takes into account existing national crisis management plans and the respective circumstances of each Member State.
- In the event of other outbreaks of diseases of unknown origin that may spread within or to the Union, the Centre acts on its own initiative until the source of the outbreak is known. In the case of an outbreak that is clearly not of a communicable disease, the Centre acts only in cooperation with the coordinating competent bodies and upon their request, and provides a risk assessment.

Remarks

European Food Safety Authority (EFSA) is the cornerstone of the Union system of risk assessment for food and feed safety. Its scientific advice on existing and emerging risks underpins the policies and decisions of risk managers in the Union institutions and Member States with the objective of protecting consumer health. The Authority's most critical commitment is to provide objective, transparent and independent advice and clear communication grounded in the most up-to-date scientific methodologies, information and data available. The Authority is committed to the core standards of scientific excellence, openness, transparency, independence and responsiveness.

The establishment plan of the Authority, as the outgoing Chair of the EU Agencies Network, includes one post to create a position for the Head of the Shared Support Office in Brussels. This is with the aim of promoting efficiency gains and synergies across agencies and with the institutions, so that individual agencies can focus their resources on core tasks. The financing of the post for the Head of the Shared Support Office will be shared between the agencies, which means that no additional funding for the Authority is required in this respect.

In order to promote the protection of human and animal health and of consumers of medicinal products throughout the Union, and in order to promote the completion of the internal market through the adoption of uniform regulatory decisions based on scientific criteria concerning the placing on the market and the use of medicinal products, the objective of the European Medicines Agency (EMA) is to provide the Member States and the institutions of the Union with the best possible scientific advice on any question relating to the evaluation of the quality, safety, and efficacy of medicinal products for human and veterinary use, in accordance with the provisions of the Union legislation relating to medicinal products.

Regulation (EU) 2022/123 strengthened the role of the EMA in crisis preparedness and the management of medicinal products and medical devices, allowing the EMA to closely monitor and mitigate shortages of medicines and facilitate the faster approval of medicines that could treat or prevent a disease causing a public health crisis. After an initial transition period, the EMA will also coordinate responses of the Member States on shortages of critical medical devices in the event of a crisis.

Remarks

Regulation (EC) No 141/2000 lays down a Union procedure for the designation of medicinal products as orphan medicinal products and provides incentives for the research, development and placing on the market of designated orphan medicinal products.

This appropriation is intended to cover the special contribution provided for in Article 7 of Regulation (EC) No 141/2000, as opposed to the one provided for in Article 67 of Regulation (EC) No 726/2004. It is used by the European Medicines Agency exclusively to compensate for the total or partial non-recovery of payments due for an orphan medicinal product.

Remarks

This appropriation is intended to cover the cost of carrying out the Joint Harmonised EU Programme of Business and Consumer Surveys in the Member States and candidate countries. The programme was initiated by a Commission Decision in November 1961 and was modified through subsequent Council and Commission decisions. It was last approved by Commission Decision C(97) 2241 of 15 July 1997 and last presented in the Commission Communication C(2016) 6634 of 20 October 2016.

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases, software, equipment and the part-financing and support of measures relating to:

- fiscal policy surveillance including the monitoring of fiscal positions,
- the assessment of transposition and application by the Member States of the Union fiscal governance framework supporting the functioning of the economic and monetary union (EMU),
- economic monitoring and analysis of economic policies,
- the external aspects of the EMU,
- economic developments in the euro area,
- monitoring structural reforms and improving the operation of markets in the EMU and in the Union,

CHAPTER 06 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS (*cont'd*)**06 20 04** (*cont'd*)06 20 04 01 (*cont'd*)

- coordination with financial institutions and analysis and development of financial markets, and borrowing and lending operations involving Member States,
- the facility providing financial assistance for Member States' balance of payments,
- cooperation with economic operators and decision-makers in the fields mentioned in the preceding indents,
- deepening and expanding the EMU,
- the purchase of equipment, software development, maintenance and related training for the protection of the euro against counterfeiting.

This appropriation is also intended to cover the funding of priority information measures on Union policies on all aspects of the rules and functioning of the EMU, as well as on the benefits of closer policy coordination and structural reforms, and to address information needs of key stakeholders and citizens, in relation to the EMU.

This measure is designed to be an effective channel of communication and dialogue between the citizens of the Union and the Union institutions, and to take account of specific national and regional characteristics, where appropriate in cooperation with the Member State authorities. Emphasis will also be placed on preparing citizens for the introduction of the euro in Member States planning for its introduction.

It includes:

- the development of communication activities at central level (brochures, leaflets, newsletters, website design, development and maintenance, social media, exhibitions, stands, conferences, seminars, audio-visual products, opinion polls, surveys, studies, promotional material, coin design competitions, twinning programmes, training etc.), and similar activities at national and regional levels implemented in cooperation with the Commission's Representations,
- partnership agreements with Member States that wish to provide information about the euro or the EMU,
- cooperation and networking with Member States in the appropriate forums,
- communication initiatives in third countries, in particular to point out the international role of the euro and the value of financial integration.

The implementation of the Commission's communication strategy takes place in close coordination with the Member States and the European Parliament.

The Commission adopts a strategy and an annual work plan drawing on the orientations set out in its Communication of 11 August 2004 (COM(2004) 552) and it reports regularly to the relevant committee of the European Parliament on the implementation of the strategy and on planning for the coming year.

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover expenditure to support Member States to achieve high employment levels, fair social protection and a skilled and resilient workforce ready for the future world of work, as well as expenditure to support, complement and add value to the policies of the Member States to ensure equal opportunities, access to the labour market, fair working conditions, social protection and inclusion.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue gives rise to the provision of appropriations for programmes financed under REACT-EU under Titles 05 and 07 for a total amount of EUR 50 620 000 000 in commitments. Such amounts had to be legally committed before the end of 2023, with the exception of administrative expenditure, for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

Remarks

This appropriation is intended to cover expenditure aiming to reduce the economic, social and territorial disparities, which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring, clean energy transition, digitalisation of the workplace, growing skills and labour shortages and the implications and impact of demographic change, including population ageing, in order to create a more social Europe. This is to be done in line with the principles of the European Pillar of Social Rights.

It will cover the following three categories of regions:

- less developed regions, with a GDP per capita less than 75 % of the average GDP of the Union,
- transition regions, with a GDP per capita between 75 % and 100 % of the average GDP of the Union,
- more developed regions, with a GDP per capita above 100 % of the average GDP of the Union.

Promotion of equality between women and men horizontally and through specific actions should be part of the support provided by the ESF+ in order to increase the participation of women in employment as well as conciliation between working and personal life and combat the feminisation of poverty and gender discrimination in the labour market and in education and training.

CHAPTER 07 02 — EUROPEAN SOCIAL FUND PLUS (ESF+) (cont'd)

07 02 04 (cont'd)

Remarks

This appropriation is intended to finance the implementation of the EaSI strand of the ESF+ programme. The general objective of the EaSI strand is to promote employment, equal access to the labour market, education and training, and social inclusion by providing financial support for the Union's objectives.

To achieve the general objectives of promoting a high level of employment, guaranteeing adequate social protection, combating social exclusion and poverty, improving working conditions and protecting workers' safety and health, the EaSI strand is in particular to:

- develop and disseminate high-quality comparative analytical knowledge in order to ensure that related policies are based on sound evidence and are relevant to needs, challenges and local conditions,
- facilitate effective and inclusive information sharing, mutual learning, peer reviews and dialogue on related policies at national, Union and international levels in order to assist the design of appropriate policy measures,
- support social experimentation in the related areas and build up the stakeholders' capacity at national and local levels to prepare, design and implement, transfer or upscale tested social policy innovations, in particular with regard to the scaling up of projects developed by local stakeholders in the field of the socio-economic integration of third-country nationals,
- facilitate the voluntary geographic mobility of workers and increase employment opportunities through developing and providing specific support services to employers and jobseekers with a view to the development of integrated European labour markets, ranging from pre-recruitment preparation to post-placement assistance in order to fill vacancies in certain sectors, professions, countries or border regions, or for particular groups, such as people in vulnerable situations,
- support the development of the market ecosystem around the provision of microfinance to microenterprises in start-up and development phases, in particular those that are created by or employ people in vulnerable situations,
- support networking at Union level and dialogue with and among relevant stakeholders in the related policy areas and contribute to build up the institutional capacity of involved stakeholders, including the public employment services, public social security and health insurance institutions, civil society, microfinance institutions and institutions providing finance to social enterprises and social economy,
- support the development of social enterprises and the emergence of a social investment market, facilitating public and private interactions and the participation of foundations and philanthropic actors in that market,
- provide guidance for the development of social infrastructure needed for the implementation of the European Pillar of Social Rights,
- support transnational cooperation in order to accelerate the transfer, and facilitate the scaling up, of innovative solutions, in particular for the related policy areas,
- support the implementation of relevant international social and labour standards in the context of harnessing globalisation and the external dimension of Union policies in the related policy areas.

Remarks

Appropriations under this chapter are intended to cover Erasmus+: the Union programme for education and training, youth and sport. Its objective is to support the educational, professional and personal development of people in the fields of education and training, youth and sport, in Europe and beyond, thereby contributing to sustainable growth, quality jobs and social cohesion and to strengthening European identity and active citizenship. As such, the Erasmus+ programme is to be a key instrument for building a European education area, supporting the implementation of the European strategic cooperation in the field of education and training, including its underlying sectoral agendas, advancing youth policy cooperation under the 2019-2027 Union Youth Strategy and developing the European dimension in sport. The Erasmus+ programme will build on the achievements and contribute to the long-lasting legacy of the 2022 European Year of Youth.

The Erasmus+ programme has the following specific objectives:

- to promote the learning mobility of individuals and groups, and cooperation, inclusion and equity, excellence, creativity and innovation at the level of organisations and policies in the field of education and training,
- to promote non-formal and informal learning mobility and active participation among young people, and cooperation, inclusion, creativity and innovation at the level of organisations and policies in the field of youth,
- to promote the learning mobility of sport staff, and cooperation, quality, inclusion, creativity and innovation at the level of sport organisations and sport policies.

The objectives of the Erasmus+ programme are to be pursued through the following three key actions:

- learning mobility (key action 1),
- cooperation among organisations and institutions (key action 2),
- support to policy development and cooperation (key action 3).

The objectives shall also be pursued through Jean Monnet actions.

CHAPTER 07 03 — ERASMUS+ (cont'd)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover European Solidarity Corps activities.

The general objective of the European Solidarity Corps is to enhance the engagement of young people and organisations in accessible and high-quality solidarity activities, primarily volunteering, as a means of strengthening cohesion, solidarity, European identity and active citizenship in the Union and beyond, addressing societal and humanitarian challenges on the ground, with particular focus on the promotion of sustainable development, social inclusion and equal opportunities.

The specific objective of the European Solidarity Corps is to provide young people, including those with fewer opportunities, with easily accessible opportunities for engagement in solidarity activities that induce positive societal changes in the Union and beyond, while improving and properly validating their competences as well as facilitating their continuous engagement as active citizens. The European Solidarity Corps will build on the achievements and contribute to the long-lasting legacy of the 2022 European Year of Youth.

The objectives of the European Solidarity Corps are to be implemented under the following strands of actions: (a) participation of young people in solidarity activities addressing societal challenges; and (b) participation of young people in humanitarian aid-related solidarity activities (the European Voluntary Humanitarian Aid Corps).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this Chapter.

Remarks

This appropriation is intended to cover (1) the participation of young people in solidarity activities addressing societal challenges and (2) their participation in humanitarian aid-related solidarity activities. It shall support the following actions:

1. Solidarity activities addressing societal challenges.

Those actions are in particular to contribute to strengthening cohesion, solidarity, active citizenship and democracy within and outside the Union, while also responding to societal challenges with a particular focus on the promotion of social inclusion and equal opportunities. They take the form of (a) volunteering; (b) solidarity projects; (c) networking activities; and (d) quality and support measures.

2. Humanitarian aid-related solidarity activities.

Those actions are in particular to contribute to providing needs-based humanitarian aid aimed at preserving life, preventing and alleviating human suffering and maintaining human dignity and to strengthening the capacity and resilience of vulnerable or disaster-affected communities. They take the form of (a) volunteering; (b) networking activities; and (c) quality and support measures with particular focus on measures to ensure the safety and security of participants.

Remarks

Appropriations under this chapter are intended to cover the Creative Europe programme.

The Creative Europe programme aims to safeguard, develop and promote European cultural and linguistic diversity and heritage, and to increase the competitiveness and the economic potential of the cultural and creative sectors, in particular the audiovisual sector.

The Creative Europe programme has the following specific objectives:

- enhancing artistic and cultural cooperation at the European level in order to support the creation of European works and strengthen the economic, social and external dimension of and innovation and mobility in Europe's cultural and creative sectors,
- promoting competitiveness, scalability, operation, innovation and sustainability, including through mobility, in the European audiovisual industry,
- promoting policy cooperation and innovative actions supporting all strands of the Creative Europe programme and promoting a diverse, independent and pluralistic media environment, and media literacy, thereby fostering freedom of artistic expression, intercultural dialogue and social inclusion.

CHAPTER 07 05 — CREATIVE EUROPE (cont'd)

The Creative Europe programme is to cover the following strands:

- the Culture strand, which covers cultural and creative sectors with the exception of the audiovisual sector,
- the Media strand, which covers the audiovisual sector,
- the Cross-sectoral strand, which covers actions across all cultural and creative sectors.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

Remarks

This appropriation is intended to cover the cultural and creative sectors with the exception of the audiovisual sector (the Culture strand) within the Creative Europe programme. In line with the objectives of the Creative Europe programme, the Culture strand is to have the following priorities: (a) to strengthen transnational cooperation and the cross-border dimension of the creation, circulation and visibility of European works and the mobility of operators in the cultural and creative sectors; (b) to increase access to and participation in culture and to increase audience engagement and improve audience development across Europe; (c) to promote societal resilience and to enhance social inclusion and intercultural dialogue through culture and cultural heritage; (d) to enhance the capacity of the European cultural and creative sectors, including the capacity of individuals working in those sectors, to nurture talent, to innovate, to prosper and to generate jobs and growth; (e) to strengthen European identity and values through cultural awareness, arts education and culture-based creativity in education; (f) to promote capacity building within the European cultural and creative sectors, including grassroots organisations and micro-organisations, so that they are able to be active at the international level; and (g) to contribute to the Union's global strategy for international relations through culture.

Remarks

This appropriation is intended to cover the audiovisual sector (the Media strand) within the Creative Europe programme. In line with the objectives of the Creative Europe programme, the Media strand is to have the following priorities: (a) to nurture talent, competence and skills and to stimulate cross-border cooperation, mobility, and innovation in the creation and production of European audiovisual works, thereby encouraging collaboration across Member States with different audiovisual capacities; (b) to enhance the circulation, promotion, online distribution and theatrical distribution of European audiovisual works within the Union and internationally in the new digital environment, including through innovative business models; and (c) to promote European audiovisual works, including heritage works, and to support the engagement and development of audiences of all ages, in particular young audiences, across Europe and beyond.

Those priorities are to be addressed through support for the development, production, promotion, dissemination and access to European works with the objective of reaching diverse audiences within Europe and beyond, thereby adapting to new market developments and accompanying the implementation of Directive 2010/13/EU of the European Parliament and of the Council of 10 March 2010 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the provision of audiovisual media services (Audiovisual Media Services Directive) (OJ L 95, 15.4.2010, p. 1, ELI: <http://data.europa.eu/eli/dir/2010/13/oj>).

The priorities of the Media strand are to take into account the differences across countries regarding audiovisual content production, distribution and access as well as the size and specificities of the respective markets.

Remarks

Appropriations under this chapter are intended to contribute to protecting and promoting rights and values as enshrined in the Treaties, the Charter of Fundamental Rights of the European Union and the applicable international human rights conventions, in particular by supporting civil society organisations and other stakeholders active at local, regional, national and transnational level, and by encouraging civic and democratic participation, in order to sustain and further develop open, rights-based, democratic, equal and inclusive societies based on the rule of law.

Within the general objective, the Citizens, Equality, Rights and Values programme has the following specific objectives, which correspond to four strands: to protect and promote Union values (Union values strand); to promote rights, non-discrimination and equality, including gender equality, and to advance gender and non-discrimination mainstreaming (equality, rights and gender equality strand); to promote citizens' engagement and participation in the democratic life of the Union and exchanges between citizens of different Member States, and to raise awareness of their common European history (citizens' engagement and participation strand); and to fight violence, including gender-based violence (Daphne strand).

CHAPTER 07 06 — CITIZENS, EQUALITY, RIGHTS AND VALUES (cont'd)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to focus on promoting equality and preventing and combating inequalities and discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation, and respecting the principle of non-discrimination on the grounds provided for in Article 21 of the Charter of Fundamental Rights of the European Union; supporting, advancing and implementing comprehensive policies relating to women's rights, gender equality, racism and all forms of intolerance, the rights of the child and the rights of persons with disabilities; protecting and promoting Union citizenship rights and the right to the protection of personal data.

Those objectives will be pursued in particular through support to the following activities: awareness raising, mutual learning, analytical and monitoring activities, training, and ICT tools development and maintenance.

This appropriation will also support the European Network of Equality Bodies (Equinet).

Remarks

This appropriation is intended to focus on:

- supporting projects aimed at remembering defining events in modern European history, such as the coming to power of authoritarian and totalitarian regimes, including the causes and consequences thereof, and projects aimed at raising awareness among European citizens of their common history, culture, cultural heritage and values, thereby enhancing their understanding of the Union, of its origins, purpose, diversity and achievements and of the importance of mutual understanding and tolerance,
- promoting citizens and representative associations' participation in and contribution to the democratic and civic life of the Union by making known and publicly exchanging their views in all areas of Union action,
- promoting exchanges between citizens of different countries, in particular through town twinning and networks of towns, so as to afford them practical experience of the richness and diversity of the common heritage of the Union and to make them aware that such richness and diversity constitute the foundation for a common future.

The above specific objectives will be pursued in particular through support to the following activities: town-twinning activities, network of towns and remembrance projects, awareness raising, mutual learning, analytical and monitoring activities, training, ICT tools development and maintenance, and support to civil society organisations.

This appropriation will also contribute to the technical and organisational support of European citizens' initiatives.

Remarks

This appropriation is intended to focus on:

- preventing and combating at all levels all forms of gender-based violence against women and girls and domestic violence, including by promoting the standards laid down in the Council of Europe Convention on preventing and combating violence against women and domestic violence (the Istanbul Convention),
- preventing and combating all forms of violence against children, young people and other groups at risk, such as LGBTIQ persons and persons with disabilities,
- supporting and protecting all direct and indirect victims of such forms of violence, such as the victims of domestic violence perpetrated within the family or violence in intimate relationships, including children orphaned as a result of domestic crimes, and supporting and ensuring the same level of protection throughout the Union for victims of gender-based violence.

Those specific objectives will be pursued in particular through support to the following activities: awareness raising, mutual learning, analytical and monitoring activities, training, and ICT tools development and maintenance.

Remarks

This appropriation is intended to focus on protecting, promoting and raising awareness on rights by providing financial support to civil society organisations which are active at local, regional, national and transnational level in promoting and cultivating those rights, thereby also strengthening the protection and promotion of Union values and the respect for the rule of law and contributing to the construction of a more democratic Union, democratic dialogue, transparency and good governance.

The above specific objective will be pursued in particular through supporting civil society organisations and non-profit stakeholders active in the areas of the Citizens, Equality, Rights and Values programme to increase their capacity to react, to carry out advocacy activities to promote rights and to ensure adequate access for all citizens to their services, counselling and support activities.

Remarks

Appropriations under this chapter are intended to cover the staff of the decentralised agencies and of the European Public Prosecutor's Office (EPPO) and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies and the EPPO are set out in Annex 'Staff' to this section.

The agencies and the EPPO must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

CHAPTER 07 10 — DECENTRALISED AGENCIES AND EUROPEAN PUBLIC PROSECUTOR'S OFFICE (*cont'd*)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1, ELI: http://data.europa.eu/eli/reg_del/2019/715/oj) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

The European Foundation for the improvement of living and working conditions (Eurofound) delivers and disseminates important knowledge on work-related and social matters to contribute to sound and evidence-based policies in those fields. Its core activity relates to research in the areas of employment, working conditions, industrial relations and quality of life. The activities of Eurofound contribute to the following priorities: increasing labour market participation and combating unemployment by creating jobs, improving labour market functioning and promoting integration and gender equality, improving working conditions and making work sustainable throughout the life course, developing industrial relations to ensure equitable and productive solutions in a changing policy context, and improving standards of living and promoting social cohesion in the face of economic disparities and social inequalities such as the gender employment gap and the gender pay gap.

Part of this appropriation is intended for studies on working conditions and industrial relations in support of policies ensuring more and better jobs, making work more sustainable and strengthening social dialogue in Europe.

Another part of this appropriation is intended for studies and forward-looking research on labour markets, specifically the monitoring and anticipation of structural change, its impact on employment and the management of the consequences.

This appropriation will also cover research and gathering of knowledge on living conditions and quality of life with a particular focus on social policies and the role of public services in improving quality of life. Research into reconciliation of professional and private life and precarious employment, including breaking down by gender, is also covered by this appropriation.

Remarks

The European Agency for Safety and Health at Work (EU-OSHA) is committed to making Europe a safer, healthier and more productive place to work. EU-OSHA identifies and assesses new and emerging risks at work, and mainstreams occupational safety and health into other policy areas, such as education, public health and research. EU-OSHA raises awareness and disseminates information on the importance of workers' health and safety to governments, employers' and employees' organisations, Union institutions, bodies and networks, and private companies.

EU-OSHA's objective is to provide the Union institutions and bodies, Member States and interested parties with technical, scientific and economic information and qualified expertise in the area of health and safety at work. Special attention will be paid to gender aspects in the area of health and safety at work.

This appropriation is intended to cover the measures necessary to accomplish EU-OSHA's tasks as defined in Regulation (EU) 2019/126, and in particular:

- awareness-building and risk anticipation measures, with special emphasis on small and medium-sized enterprises,

CHAPTER 07 10 — DECENTRALISED AGENCIES AND EUROPEAN PUBLIC PROSECUTOR’S OFFICE (cont’d)

07 10 02 (cont’d)

- operation of the European Risk Observatory based on examples of good practice collected from firms or specific branches of activity,
- preparation and provision of relevant tools for smaller enterprises to manage health and safety at work,
- operation of the network comprising the main component elements of the national information networks, including the national employers’ and employees’ organisations, in accordance with national law or practice, as well as the national focal points,
- organising exchanges of experience, information and good practices, including in collaboration with the International Labour Organization and other international organisations,
- integrating candidate countries into these information networks and devising working tools which are geared to their specific situation,
- organising and running the European Campaign on Healthy Workplaces as well as the European Week on Health and Safety, focusing on specific risks and needs of users and final beneficiaries.

The European Public Prosecutor’s Office (EPPO) is responsible for investigating, prosecuting and bringing to judgment the perpetrators of, and accomplices to, criminal offences affecting the financial interests of the Union which are provided for in Directive (EU) 2017/1371 of the European Parliament and of the Council of 5 July 2017 on the fight against fraud to the Union’s financial interests by means of criminal law (OJ L 198, 28.7.2017, p. 29, ELI: <http://data.europa.eu/eli/dir/2017/1371/oj>) and determined by Regulation (EU) 2017/1939. In that respect, the EPPO undertakes investigations, carries out acts of prosecution and exercises the functions of prosecutor in the competent courts of the Member States, until the case has been finally disposed of.

This appropriation is intended to cover the EPPO’s recruitment and staff-related expenditure, buildings (including building security), infrastructure and administrative information technology-related expenditures (Titles 1 and 2). It includes operational expenditure related to the costs related to the EPPO’s investigations in accordance with Article 91(5) and (6) of Regulation (EU) 2017/1939, the EPPO case management system, the IT exchange platform between the EPPO Central Office, the European Delegated Prosecutors and other judicial and law enforcement authorities in the Member States, which is a key element for the good functioning of the EPPO, and provisions for close protection services for senior EPPO staff, payment of the European Delegated Prosecutors and substantial translation costs for the operational needs of the EPPO (Title 3).

Remarks

The objective of the European Labour Authority (ELA) is to contribute to ensuring fair labour mobility across the Union and assist Member States and the Commission in the coordination of social security systems within the Union. To this end, ELA is to facilitate access to information on rights and obligations regarding labour mobility across the Union as well as to relevant services; facilitate and enhance cooperation between Member States in the enforcement of relevant Union law across the Union, including facilitating concerted and joint inspections; mediate and facilitate a solution in cases of cross-border disputes between Member States; and support cooperation between Member States in tackling undeclared work.

This appropriation is intended to cover the measures necessary to accomplish ELA’s tasks, in particular:

- facilitate access to information and coordinate the European network of employment services (EURES),
- facilitate cooperation and the exchange of information between Member States with a view to the consistent, efficient and effective application and enforcement of relevant Union law,
- coordinate and support concerted and joint inspections,
- carry out analyses and risk assessments on issues of cross-border labour mobility,

Remarks

The objective of this activity is to promote fair geographic and professional mobility (including the coordination of social security schemes) of workers in Europe in order to overcome the obstacles to free movement of workers and to contribute to the establishment of a real labour market at European level.

This appropriation is intended to cover actions supporting the monitoring of Union law through financing of a network of experts on labour mobility, including free movement and posting of workers and social security, reporting regularly on the implementation of Union legal acts in the Member States and at Union level and analysing and evaluating the major trends in Member State legislation with regard to free movement of workers and coordination of social security systems. This appropriation is also intended to cover actions supporting governance of Union legal acts through meetings of committees, actions for awareness raising and implementation and other specific technical support, and the development of relevant digital tools, such as the Electronic Exchange of Social Security Information (EESSI) system or the European Social Security Pass (ESSPASS), and their implementation.

This appropriation is intended to cover in particular:

- studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance, including the production of statistical reports, not involving public authority tasks outsourced by the Commission under ad hoc service contracts,
- the analysis and evaluation of the major trends in Member State legislation with regard to free movement of workers and coordination of social security systems, as well as the financing of networks of experts in those fields,
- the analysis and research on new policy developments in the domain of free movement of workers linked, for example, to the end of transitional periods and modernisation of social security coordination provisions,

CHAPTER 07 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS (*cont'd*)**07 20 03** (*cont'd*)07 20 03 01 (*cont'd*)

- support for the work of the Administrative Commission for the Coordination of Social Security Systems and its sub-groups and for the follow-up of the decisions taken, as well as support for the work of the Technical and Advisory Committees on free movement of workers,
- support for actions preparing for the application of the new regulations on social security, including transnational exchanges of experience and information and training initiatives developed at national level,
- actions aimed at providing better service and raising public awareness, including measures aimed at identifying migrant workers' social security and employment problems, and measures speeding up and simplifying administrative procedures, gender-sensitive analysis of the barriers to free movement of workers and lack of coordination of social security systems and their impact on people with disabilities, including adaptation of administrative procedures to new information-processing techniques, in order to improve the system for acquiring rights and the calculation and payment of benefits pursuant to Regulations (EEC) No 1408/71, (EEC) No 574/72, (EC) No 859/2003, (EC) No 883/2004, (EC) No 987/2009, and (EU) No 1231/2010 and their future revisions,
- the development of information and actions to make members of the public aware of their rights with respect to free movement of workers and the coordination of social security schemes, including support structures set up by social partners providing targeted assistance to mobile workers,
- the support to relevant digital tools, such as the electronic exchange of social security information among Member States, with a view to facilitating the implementation of Regulation (EC) No 883/2004 and its implementing Regulation (EC) No 987/2009, including the maintenance of the central node of the EESSI system, testing system components, helpdesk activities, support for further development of the system and training.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, shall be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2), points (b), (e) and (f), of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

This appropriation is intended to increase the availability of general information given to citizens on topics concerning Europe and the Union so as to allow citizens to make full use of their right to be informed about and involved in European policies and to increase the visibility of the work of the Union institutions, the decisions taken and the stages in the building of the Union. It concerns essentially the funding or co-funding of the production or dissemination of multimedia (radio, TV, internet, etc.) information products, including by pan-European media and networks made up of local and national media delivering news on European affairs, as well as the tools necessary to develop a policy in this respect.

This appropriation also covers support expenditure, such as on studies, meetings, *ex post* controls, expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, evaluation and audit of current or future activities, feasibility studies, publications, and the repayment of travel and related expenses of experts.

Where appropriate, the procurement and grant procedures may include the conclusion of framework partnerships with a view to promoting a stable financing framework for the pan-European media funded under this appropriation.

Remarks

The Commission's executive communication services are provided to the President and the College of Commissioners in support of the communication activities of the President, College, Spokesperson's Service and Commission senior management by ensuring political and economic intelligence and media advice, and by feeding high-quality country-specific information and analysis from a variety of sources into the Commission's decision-making process. This leads, ultimately, to better informed Union policy making for citizens.

Corporate communication products and services are provided to the external communication service of the Commission and reflect its domain leader role, ensuring coherence in the Commission's messaging by aligning all Commission communication services to contribute to coherent and effective corporate communication on the political priorities of the Commission. This leads, step by step, to the definition of clearer corporate messages and narratives, to distinctive visual branding and eventually brand recognition, and to economies of scale, thus contributing to achieving a better image for the Commission and the Union.

This appropriation is intended to cover expenditure on corporate communication actions, which includes costs for the production of content, provision of corporate technical services, dissemination of information through integrated communication actions, organisation of and participation in events, studies or evaluations, and professionalisation activities where relevant.

This appropriation is intended to cover expenditure incurred within the Union for online multimedia and written information and other communication tools concerning the Union, for the purpose of providing all citizens with general information on the work of the Union institutions, the decisions taken and the stages in the building of the Union. This is a public service task. Online and other communication tools make it possible to gather citizens' questions or reactions on European topics. Those tools are made accessible to people with disabilities, in accordance with Web Accessibility Initiative guidelines.

The main tools concerned are:

- the Europa website (which constitutes the main point of access putting at the disposal of citizens information they might need in their daily lives and which therefore must be clearly structured) made ever more user-friendly and optimised for mobile devices,
- online press releases, databases and other online communication information systems.

CHAPTER 07 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS (*cont'd*)**07 20 04** (*cont'd*)07 20 04 02 (*cont'd*)

This appropriation is also intended to fund:

- the improvement of the Europa website to optimise it for mobile devices, to focus it on user needs and to professionalise the use of other online channels like social media, blogs and web 2.0, including all types of training, coaching and consultancy services for various groups of stakeholders,
- the expenditure relating to hosting and licence costs associated with the Europa website,
- the costs of operation and maintenance of the Commission's social media presence including technical assistance and the purchase of licences for the necessary equipment and material,
- the exchange of best practices, knowledge transfer and professionalisation by financing visits of digital and other communication experts and practitioners,
- IT expenditure for development and maintenance of relevant information and management systems,
- the cost of subscriptions and access to online information sources such as press agencies, online news, information providers and external databases,
- the training and support required for accessing that information,
- evaluation and professionalisation expenditure.

This appropriation is intended to cover Eurobarometer and data analytics. This includes, *inter alia*, the analysis of trends in public opinion, mainly by means of opinion polls (e.g. general-public 'Eurobarometer' surveys, and 'flash' surveys, by telephone, of specific populations on particular subjects, at regional, national or European level, or qualitative surveys), together with quality control of such surveys.

This appropriation also covers measures to improve the Commission's data analytics capacity, with a view to fighting against disinformation and against the spreading of fake news.

This appropriation is intended to cover the costs of operating the Commission's television and radio studios and other audiovisual and multimedia information and communication facilities in the Commission premises in all Member States: staff and the purchase, hire, maintenance and repair of the necessary equipment and material (news coverage, audio-visual production, audio-visual media library, virtual reality etc.).

This appropriation also covers satellite rental to provide information on the Union's activities to television channels. It is to be managed in compliance with the principles of interinstitutional cooperation in order to ensure the dissemination of all information concerning the Union.

This appropriation covers equally qualitative media monitoring and analysis (including monitoring or analysis of social media activities), including the related subscriptions and licences.

This appropriation is also intended to cover general information for citizens on Union activities to increase the visibility of the work of the Union institutions, the decisions taken and the stages in the building of the Union, focusing mainly on the media. The tools developed for better understanding and reporting of topical issues in particular related support to communication for the political priorities of the Commission cover mainly:

- multimedia (photo, video, etc.) information material for the media and other platforms, including their publication or broadcasting and central deposit for long-term preservation or dissemination,
- graphic design,
- IT expenditure for development and maintenance of relevant information and management systems,
- seminars and support for journalists.

This appropriation also covers horizontal expenditure on, *inter alia*, internal communication, studies, meetings, *ex post* controls, expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, evaluation on horizontal or cross-cutting activities and professionalisation activities, and the repayment of travel and related expenses for persons invited to follow the work of the Commission.

Remarks

The Commission's communication products and services are directly addressed to citizens in all Member States, providing information for and engagement with citizens to ensure that communication services for citizens are made available through simple, clear and understandable messages tailored to their needs, either via a mix of channels and media (traditional and new) or by directly communicating with citizens and stimulating exchange and engagement face-to-face. Together, this helps citizens to access up-to-date and user-friendly information on Union policies and values. It contributes to citizens' increased awareness and understanding of European affairs and, in turn, stimulates citizens' interest in engaging directly with 'the faces of the Commission', be it locally, nationally or Europe-wide.

CHAPTER 07 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS (*cont'd*)**07 20 04** (*cont'd*)07 20 04 03 (*cont'd*)

This appropriation is intended to cover expenditure on corporate communication actions, which includes costs for the production of content, provision of corporate technical services, dissemination of information through integrated communication actions, organisation of and participation in events, studies or evaluations, and professionalisation activities where relevant.

This appropriation is intended to fund general information and communication or engagement activities addressed at citizens and stakeholders in all Member States, mainly provided by the Commission Representations in the Member States, and covers:

- communication actions linked to specific annual or multiannual political priorities of the Commission, as formulated in the State of the Union Address of the Commission President, the Commission's Work Programme and the Joint Declaration (in the context of implementing the Interinstitutional Agreement of 13 April 2016 between the European Parliament, the Council of the European Union and the European Commission on Better Law-Making (OJ L 123, 12.5.2016, p. 1, ELI: http://data.europa.eu/eli/agree_interinstit/2016/512/oj)), and ad hoc communication actions on a regional, national or international scale that fit in with the political priorities; those communication actions can be organised in partnership with the European Parliament, the European Economic and Social Committee, the Committee of the Regions or the Member States (national, regional and local levels) in order to create synergies between the partners and to coordinate their information and communication activities on the Union,
- open door events for citizens,
- dialogues and panels with citizens in the Member States, including in virtual and hybrid formats, to promote a new generation of engagement with citizens, both as an exercise in participative democracy and as a way to improve policy making,
- seminars and conferences as well as workshops with more specific target groups, such as young people, applying participatory methods and using modern communication technologies,
- organisation of or participation in European events, exhibitions and public relations activities, organisation of individual visits, etc.,
- direct communication actions targeting the general public (e.g., citizens' advice services),
- communication activities to fight disinformation,
- direct communication measures targeting stakeholders and opinion multipliers, in particular stepped-up measures involving the regional and national media, which is a major information outlet for a large number of Union citizens,
- management and operation of information centres and multimedia spaces and installations for the general public,

- social media outreach in the Member States, including data analytics,
- local support activities for the Europe Direct and other networks supported by the Commission, such as training, coordination, assistance and promotion, which also includes production, storage and distribution of information material and communication products by those outlets as well as for them,
- expenditure on studies, logistical services, technical assistance, in particular for IT including web maintenance, meetings of experts and expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts as well as the repayment of travel and related expenses of persons invited to follow the work of the Commission,
- IT expenditure for development and maintenance of relevant information and management systems,
- the exchange of best practices, knowledge transfer and professionalisation by financing visits of digital communication experts and practitioners,
- information, seminars and support for journalists,
- evaluation and professionalisation expenditure.

Online tools make it possible not only to inform citizens but also to gather their questions or reactions on European issues and have become an important tool to engage with citizens. The information covers all of the Union's institutions. The tools are to be made accessible to people with disabilities, in accordance with Web Accessibility Initiative guidelines.

The main types of tools concerned are:

- the websites, multimedia and written products of the Commission Representations in the Member States,
- online press releases, databases and other online communication information systems,
- complementary online channels in Commission Representations, such as local social media, blogs and other web 2.0 technologies,
- related data analytics.

This appropriation also covers the expenditure relating to the production for various target groups of (paper or digital) publications concerning the Union's activities that are often distributed through a decentralised network, mainly:

- the publications of the Commission Representations,

Remarks

The Commission's products and services are directly addressed to citizens, providing information for and engagement with citizens, and ensure that communication services for citizens across the Union are made available through simple, clear and understandable messages, either via a mix of channels and media (traditional and new) or by directly communicating with citizens and stimulating exchange and engagement face-to-face. Together, this helps citizens to access up-to-date and user-friendly information on Union policies and values. It contributes to citizens' increased awareness and understanding of European affairs, and in turn, stimulates citizens' interest in engaging directly with 'the faces of the Commission', be it locally, nationally or Europe-wide.

This appropriation is intended to cover expenditure for corporate communication actions, which includes costs for the production of content, provision of corporate technical services, dissemination of information through integrated communication actions, organisation of and participation in events, studies or evaluations, and professionalisation activities where relevant.

This appropriation is intended to fund general information to citizens and covers:

- the financing of the Europe Direct network throughout the Union (Europe Direct centres, European documentation centres, Team Europe speakers); that network supplements the work of the Commission Representations and the European Parliament liaison offices in the Member States,

Remarks

This appropriation is intended to cover expenditure to promote European social dialogue in Member States and candidate countries, as well as the cost of preliminary consultation meetings with trade union representatives.

Regarding the promotion of European social dialogue, strong and representative social partners are needed in order to improve the process of enhancing the functioning of social dialogue and to enhance competitiveness, resilience and quality jobs in the social market economy. Measures should help employees' and employers' organisations to address the overarching challenges facing European employment and social policy, as laid down in the Political Guidelines 2024-2029, in particular in the Action Plan to implement the European Pillar of Social Rights, and to enhance social dialogue in line with Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions of 25 January 2023 entitled 'Strengthening social dialogue in the European Union: harnessing its full potential for managing fair transitions' (COM(2023) 40 final), Council Recommendation of 12 June 2023 on strengthening social dialogue in the European Union (OJ C, C/2023/1389, 6.12.2023, ELI: <http://data.europa.eu/eli/C/2023/1389/oj>), the Tripartite Declaration for a thriving European Social Dialogue, signed at the Val Duchesse Social Partners Summit on 31 January 2024, the Pact for European Social Dialogue, signed by the Commission and the European cross-industry social partners on 5 March 2025, and to support the digital and green transitions.

Regarding actions on preliminary consultation meetings between European trade union representatives, the appropriation is intended to cover costs with a view to helping European trade union representatives form their opinions and harmonise their positions regarding the development of Union policies. Costs are intended to cover in particular studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to economic monitoring, analysis of the combination of measures and coordination of economic policies.

This appropriation is intended to cover expenditure related to the promotion of European social dialogue and related measures, in the Member States and the candidate countries, in particular for the following activities:

- studies, consultations, meetings of European cross-industry and sectoral social dialogue committees, meetings of experts, negotiations, publications and other actions directly linked to the achievement of the objectives of the budget heading, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,

CHAPTER 07 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS (*cont'd*)**07 20 04** (*cont'd*)07 20 04 06 (*cont'd*)

- actions undertaken by social partners to promote social dialogue (including capacity building of social partners in Member States and candidate countries) at cross-industry, sector and company levels, including actions undertaken to promote equal participation of women and men in the decision-making bodies of both trade unions and employers' organisations,
- actions to improve knowledge and expertise on industrial relations across the Union and to exchange and disseminate relevant information,
- actions to improve the degree and quality of involvement of employees' and employers' representatives in Union policy- and law-making,
- actions on preliminary consultation meetings between European trade union representatives, notably to cover costs with a view to help them form their opinions and harmonise their positions regarding the development of Union policies.

The appropriation is also intended to cover costs related to the promotion of information, consultation and participation of representatives of enterprises, in the Member States and the candidate countries, in particular for the following activities:

- measures aimed at developing employee involvement in enterprises, meaning any mechanism, including information, consultation and participation, through which employees' representatives may exercise an influence on decisions to be taken within the enterprise, in particular by raising awareness and contributing to the application of Union law and policies in this area and the take-up and development of European Works Councils,
- initiatives to strengthen transnational cooperation between employees' and employers' representatives in respect of information, consultation and participation of employees within enterprises operating in more than one Member State and short training actions for negotiators and representatives in transnational information, consultation and participation bodies which may also involve social partners from candidate countries,
- measures to enable social partners to exercise their rights and duties as regards employee involvement, especially within the framework of European Works Councils, to familiarise them with transnational enterprise agreements and strengthen their cooperation in respect of Union law on employee involvement,
- projects and innovative actions supporting employee involvement, with a view to identifying, anticipating and addressing challenges driven by industry transitions and their social and economic consequences or changes in the world of work, e.g., restructuring and redundancies, outsourcing and subcontracting, digitalisation, automation and artificial intelligence, and new forms of work, or the need for a shift towards an inclusive, sustainable and low-carbon economy.

CHAPTER 07 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS (*cont'd*)**07 20 04** (*cont'd*)07 20 04 08 (*cont'd*)

Actions on analyses of and studies on the social situation, demographic change, including demographic ageing and longevity, and family aim to promote better policy responses in the Union and the Member States to demographic, employment and social challenges, including to the challenges of the digital and green transitions increasing longevity and changing family structures and the need to ensure just transitions and promote inclusive growth. The appropriation is intended to cover costs for producing and disseminating high-quality analyses and comparative information in the context of the Commission's political guidelines and the Union's strategic objectives. This will support the identification of future priorities for employment and social policies, including gender-specific measures and the development of analytical, data and research capacities for assessing, evaluating and monitoring the socio-economic impacts of transitions to a digital, climate-neutral Europe and a longevity society, in particular through the following activities:

- actions promoting the development of comparative analysis and evidence base and the exchange of views and experience at all relevant levels (regional, national, Union and international) regarding the employment, social and demographic situation and the socio-economic trends in the Union, as well as the gender pay gap and discrimination against women in the workplace,
- actions promoting the forward-looking identification of evidence gaps and socio-economic research and innovation needs,
- actions supporting an observatory of the social situation, cooperation with regard to relevant activities by the Member States and international organisations, and the management of a technical support group for the European Alliance for Families,
- studies, meetings of experts, dissemination of knowledge, information and publications directly linked to the achievement of the objectives of the strategy or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation is intended to cover in particular expenditure on the reporting referred to in the TFEU, including annual Commission reports on employment and social developments in Europe, biennial reports on demographic change and its implications, (inputs to) reporting on socio-economic impacts of the transition to climate neutrality and to a digital Europe, and Commission reports on problems concerning the social situation.

This appropriation is also intended to cover expenditure on analysis for the reporting referred to in the TFEU, as well as for the dissemination of knowledge on major employment, social and demographic challenges, and in particular challenges of the digital and green transitions and demographic ageing, and the ways of tackling them.

Remarks

This appropriation is intended to cover expenditure on information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from Union action in the framework of the implementation of the Union social dimension. Those measures should help workers' organisations to address the overarching challenges facing European employment and social policy as laid down in the Political Guidelines 2024-2029, in the Action Plan to implement the European Pillar of Social Rights, and to enhance social dialogue in line with the Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions of 25 January 2023 entitled 'Strengthening social dialogue in the European Union: harnessing its full potential for managing fair transitions' (COM(2023) 40 final), the Council Recommendation of 12 June 2023 on strengthening social dialogue in the European Union (OJ C, C/2023/1389, 6.12.2023, ELI: <http://data.europa.eu/eli/C/2023/1389/oj>), the Tripartite Declaration for a thriving European Social Dialogue, signed at the Val Duchesse Social Partners Summit on 31 January 2024, and the Pact for European Social Dialogue, signed by the Commission and the European cross-industry social partners on 5 March 2025, and to support the digital and green transitions.

This appropriation is intended to cover in particular the following activities:

- support for the work programmes of the two specific trade union institutes, the European Trade Union Institute and the European Centre for Workers' Questions, which have been established to facilitate capacity building of workers' organisations through training and research at European level, as well as to improve the degree of involvement of workers' representatives in European policy and lawmaking,
- information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from the implementation of Union action in the framework of the implementation of the Union social dimension,
- measures involving representatives of the social partners in the candidate countries with the specific purpose of promoting social dialogue at Union level.

This appropriation is also intended to promote equal participation of women and men in the decision-making bodies of workers' organisations.

Strong and competent social partners are needed to improve the process of enhancing the functioning of social dialogue in order to enhance competitiveness and quality jobs in the social market economy.

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature (such as studies, meetings of experts, information and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

CHAPTER 08 01 — SUPPORT ADMINISTRATIVE EXPENDITURE OF THE ‘AGRICULTURE AND MARITIME POLICY’ CLUSTER (cont’d)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover market-related expenditure, direct payments and certain actions under direct management by the Commission, all financed from the European Agricultural Guarantee Fund (EAGF).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover the financing of the CAP Strategic Plans interventions funded by the European Agricultural Fund for Rural Development (EAFRD) under the programming period 2023-2027, as well as 2014-2020 programmes in accordance with Regulation (EU) No 1305/2013 that are extended to 2021 and 2022 under transitional rules set out by Regulation (EU) 2020/2220. Those appropriations may also be used for covering any outstanding payments for EAFRD measures prior to 2014 and for financing technical assistance at the initiative of the Commission within the limit of 0,25 % of the EAFRD envelope.

The EAFRD delivers specific climate and environmental public goods, improves the competitiveness of the agriculture and forestry sectors, and promotes the diversification of economic activity and quality of life and work in rural areas including areas with specific constraints.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the NextGenerationEU / European Union Recovery Instrument entered in the statement of revenue gave rise to the provision of appropriations for this programme under this chapter for a total amount of EUR 8 070 486 840 in commitments in 2021 and 2022.

Remarks

Appropriations under this chapter are intended to cover expenditure related to the implementation of the common fisheries and maritime policy with a view to:

- fostering sustainable fisheries and the restoration and conservation of aquatic biological resources,
- fostering sustainable aquaculture activities, and processing and marketing of fisheries and aquaculture products, thus contributing to food security in the Union,
- enabling a sustainable blue economy in coastal, island and inland areas, and fostering the development of fishing and aquaculture communities,
- strengthening international ocean governance and enabling safe, secure, clean and sustainably managed seas and oceans.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover expenditure related to the implementation of the Sustainable Fisheries Partnership Agreements and Protocols thereto concluded between the Union and third countries as well as the membership of regional fisheries management organisations.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover the expenditure on staff and administration of decentralised agencies (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies are set out in Annex ‘Staff’ to this section.

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1, ELI: http://data.europa.eu/eli/reg_del/2019/715/oj) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover the expenditure on staff, administration and operation of the European Fisheries Control Agency. The Agency's mission is to promote the highest common standards for control, inspection and surveillance under the Common Fisheries Policy (CFP). Its primary role is to organise coordination and cooperation between national control and inspection activities so that the rules of the CFP are respected and applied effectively. The Agency also plays a role in the European cooperation on coast guard functions.

CHAPTER 09 01 — SUPPORT ADMINISTRATIVE EXPENDITURE OF THE ‘ENVIRONMENT AND CLIMATE ACTION’ CLUSTER (cont’d)

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature (such as studies, meetings of experts and information and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on administrative technical assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover actions contributing to the shift towards a clean, circular, energy-efficient, low-carbon and climate-resilient economy, including through the transition to clean energy, to the protection and improvement of the quality of the environment and to halting and reversing biodiversity loss, thereby contributing to sustainable development.

The LIFE programme may provide funding in any of the forms laid down in the Financial Regulation, in particular grants, prizes and procurement. It may also provide financing in the form of financial instruments within blending operations, which shall be implemented in accordance with Regulation (EU) 2021/523.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

Remarks

This appropriation is intended to cover the expenditure related to the implementation of the specific sub-programme for nature and biodiversity of the LIFE programme.

It will provide support for the implementation of the EU Biodiversity Strategy and of Directive 2009/147/EC of the European Parliament and of the Council of 30 November 2009 on the conservation of wild birds (OJ L 20, 26.1.2010, p. 7, ELI: <http://data.europa.eu/eli/dir/2009/147/oj>) and Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7, ELI: <http://data.europa.eu/eli/dir/1992/43/oj>). Actions will cover both the terrestrial and the marine environment.

CHAPTER 09 02 — PROGRAMME FOR THE ENVIRONMENT AND CLIMATE ACTION (LIFE) (cont'd)

09 02 01 (cont'd)

It includes:

- the financing of innovative techniques, methods and approaches for reaching the objectives of the Union legislation and policy on nature and biodiversity, and for contributing to the knowledge base and to the application of best practice, including through the support of the Natura 2000 network,
- the development, implementation, monitoring, reporting and enforcement of the relevant Union legislation and policy on nature and biodiversity objectives and tracking the Union's biodiversity-related expenditure, as well as related support. It also includes improving governance at all levels through enhancing capacities of public and private actors and the involvement of civil society in nature and biodiversity-related policy development,
- the support of actions intended to catalyse the large-scale deployment of successful solutions/approaches for implementing the relevant Union legislation and policy on nature and biodiversity, by replicating results, integrating related objectives into other policies and into public and private sector practices, mobilising investment and improving access to finance.

Costs of technical assistance for selecting, monitoring, evaluating and auditing projects and of support for communication, IT actions, organising workshops, conferences and meetings, as well as other governance activities (including support to non-governmental organisations via operating grants), may also be financed by this appropriation.

CHAPTER 09 02 — PROGRAMME FOR THE ENVIRONMENT AND CLIMATE ACTION (LIFE) (cont'd)

09 02 02 (cont'd)

This sub-programme aims to facilitate the transition towards a sustainable, circular, energy-efficient and climate-resilient economy and to protect, restore and improve the quality of the environment.

It supports projects focusing on delivering the European Green Deal. These will be actions related to the shift towards a resource-efficient economy, the management of natural resources, such as air, water and land, towards achieving the zero-pollution ambition, strengthening the implementation of environmental legislation, as well as the promotion of good environmental governance.

It includes:

- the financing of innovative techniques, methods and approaches for reaching the objectives of the Union legislation and policy on the environment and to contribute to the knowledge base and to the application of best practice,
- the development, implementation, monitoring and enforcement of the relevant Union legislation and policy on the environment, including by improving governance at all levels, in particular through enhancing capacities of public and private actors and the involvement of civil society,
- the support of actions intended to catalyse the large-scale deployment of successful technical and policy-related solutions for implementing the relevant Union legislation and policy on the environment, by replicating results, integrating related environmental objectives into other policies and into public and private sector practices, mobilising sustainable investments, and improving access to finance.

Costs of technical assistance for selecting, monitoring, evaluating and auditing projects and of support for communication, IT actions, organising workshops, conferences and meetings, as well as other governance activities (including non-governmental organisations supported via operating grants) may also be financed by this appropriation.

CHAPTER 09 02 — PROGRAMME FOR THE ENVIRONMENT AND CLIMATE ACTION (LIFE) *(cont'd)*

09 02 03 *(cont'd)*

Remarks

This appropriation is intended to cover the specific sub-programme for climate change mitigation and adaptation of the LIFE programme.

It supports activities focusing on delivering the European Green Deal, especially in the fields of climate change mitigation (reducing greenhouse gas emissions), climate change adaptation (strengthening efforts on climate-proofing, resilience building, prevention and preparedness), as well as the promotion of good climate governance.

It includes:

- the development, implementation, monitoring and enforcement of the relevant Union legislation and policy on climate action, including by improving governance at all levels, in particular through enhancing capacities of public and private actors and the involvement of civil society,
- the financing of innovative techniques, methods and approaches for reaching the objectives of the Union legislation and policy on climate action, contributing to the knowledge base and to the application of best practices,
- the support of any actions intended to catalyse the large-scale deployment of successful technical and policy-related solutions for implementing the relevant Union legislation and policy on climate action, by replicating results, integrating related objectives into other policies and into public and private sector practices, mobilising sustainable investments, and improving access to finance.

Costs of technical assistance for selecting, monitoring, evaluating and auditing projects and of support for communication, IT actions, organising workshops, conferences and meetings and other governance activities (including non-governmental organisations supported via operating grants) may also be financed by this appropriation.

Remarks

This appropriation is intended to cover the specific sub-programme for clean energy transition of the LIFE programme.

It supports the financing of activities with the following specific objectives:

- to develop, demonstrate and promote innovative techniques and approaches for reaching the objectives of the Union legislation and policy on the clean, sustainable and just energy transition, upscaling renewable energy solutions and increasing energy efficiency, and to contribute to the knowledge base and to the application of best practice,
- to support the development, implementation, monitoring and enforcement of the relevant Union legislation and policy on the clean, sustainable and just energy transition, upscaling renewable energy solutions and increasing energy efficiency, including by improving governance through enhancing capacities of public and private actors and the involvement of civil society,
- to catalyse the large-scale deployment of successful technical and policy-related solutions for implementing the relevant Union legislation and policy on the clean, sustainable and just energy transition, upscaling renewable energy solutions and increasing energy efficiency by replicating results, integrating related objectives into other policies and into public and private sector practices, mobilising investment and improving access to finance.

Costs of technical assistance for selecting, monitoring, evaluating and auditing projects and of support for communication, IT actions, organising workshops, conferences and meetings and other governance activities (including non-governmental organisations supported via operating grants) may also be financed by this appropriation.

Remarks

Appropriations under this chapter are intended to cover support from the Just Transition Fund (JTF) to territories facing serious socio-economic challenges deriving from the transition process towards a climate-neutral economy of the Union by 2050.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from the proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for programmes financed under the Just Transition Fund under Title 09 for a total amount of EUR 10 868 467 855 in commitments. Such amounts had to be legally committed before the end of 2023, with the exception of administrative expenditure for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

Remarks

Appropriations under this chapter are intended to cover support from the public sector loan facility, the third pillar of the Just Transition Mechanism (JTM). It will support public investments, through preferential lending conditions. These investments will benefit the territories most negatively affected by the climate transition as identified in the territorial just transition plans for the purposes of the Just Transition Fund (JTF).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2021/1229, it is envisaged to finance the total amount of the grant component mainly with assigned revenue and partly with appropriations programmed under the Multiannual Financial Framework (MFF) 2021-2027. The assigned revenue envisaged would stem from the estimated surpluses of the provisioning of the European Fund for Strategic Investments (EFSI) after its constitution phase, ending in 2022. Lastly, the public sector loan facility will be financed by assigned revenue from the repayments from financial instruments established by the programmes indicated in Annex I to Regulation (EU) 2021/1229.

Remarks

This appropriation is intended to cover the costs of the implementation of the carbon border adjustment mechanism ('CBAM').

The CBAM is intended to address greenhouse gas emissions embedded in the goods covered by Regulation (EU) 2023/956 of the European Parliament and of the Council, upon their importation into the customs territory of the Union, in order to prevent the risk of carbon leakage. The CBAM will complement the system established for greenhouse gas emission allowance trading within the Union by Directive 2003/87/EC by applying an equivalent set of rules to imports into the customs territory of the Union of goods covered by Regulation (EU) 2023/956.

Remarks

This appropriation is intended to cover actions contributing to the efficient management of migration flows in accordance with the relevant Union *acquis* and in compliance with the Union's commitments on fundamental rights.

In particular, the AMIF is intended to contribute to strengthening and developing all aspects of the Common European Asylum System, including its external dimension; to strengthening and developing legal migration to the Member States including to the integration of third-country nationals; and to countering irregular migration and ensuring effective, safe and dignified return to and readmission in third countries. In this context, this appropriation can cover mission expenditure for experts of the Commission participating in the monitoring of the asylum and reception systems of the Member States, in accordance with the Article 47(5) of Regulation (EU) 2021/2303.

The AMIF promotes common measures in the area of asylum, including Member States' efforts in receiving persons in need of international protection through resettlement and transfers between Member States of applicants for or beneficiaries of international protection, supports integration strategies, and develops and strengthens a more effective legal migration policy, so as to ensure the Union's long-term competitiveness and the future of its social model and reduce incentives for irregular migration through a sustainable return and readmission policy. The AMIF supports the strengthening of cooperation with third countries to reinforce the management of flows of persons applying for asylum or other forms of international protection and avenues of legal migration and to counter irregular migration and ensure sustainability of return to and effective readmission in third countries.

The European Union Agency for Asylum (EUAA), which replaced and succeeded the European Asylum Support Office (EASO) as of 19 January 2022, is a centre of expertise on asylum and contributes to the development of the Common European Asylum System by facilitating, coordinating and strengthening practical cooperation among Member States on many aspects of asylum. EUAA also helps Member States fulfil their European and international obligations to give protection to people in need, and it provides operational support to Member States with specific needs and to Member States whose asylum and reception systems are under particular pressure. Furthermore, EUAA provides evidence-based input to Union policymaking and legislation in all areas having a direct or indirect impact on asylum.

Remarks

This appropriation is intended to ensure strong and effective European integrated border management at the external borders while safeguarding the free movement of persons within them, in full compliance with the Union's commitments on fundamental rights, thereby contributing to guaranteeing a high level of security within the Union.

More specifically, the Instrument for Financial Support for Border Management and Visa Policy (BMVI) is to contribute to supporting effective European integrated border management at the external borders, implemented by the European Border and Coast Guard as a shared responsibility of the European Border and Coast Guard Agency and the national authorities responsible for border management, to facilitate legitimate border crossings, to prevent and detect illegal immigration and cross-border crime and to effectively manage migratory flows, as well as to supporting the common visa policy in order to facilitate legitimate travel and prevent migratory and security risks.

The BMVI promotes the implementation of European integrated border management defined by its components in accordance with Article 3 of Regulation (EU) 2019/1896: border control, search and rescue during border surveillance, risk analysis and cooperation between Member States (supported and coordinated by the European Border and Coast Guard Agency). The BMVI also promotes inter-agency cooperation, cooperation with third countries, technical and operational measures within the Schengen area related to border control and designed to address illegal immigration and to counter cross-border crime better, use of state-of-the-art technology, and quality control and solidarity mechanisms. Furthermore, the BMVI contributes to the improvement of the efficiency of visa processing in terms of detecting and assessing security and irregular migration risks as well as facilitating visa procedures for *bona fide* travellers. The BMVI supports digitalisation of visa processing with the objective of providing fast, secure and client-friendly visa procedures for the benefit of both visa applicants and consulates.

Remarks

Appropriations under this chapter are intended to cover the financial support for customs control equipment to support the customs union and customs authorities to protect the financial and economic interests of the Union and its Member States, to ensure security and safety within the Union and to protect the Union from unfair and illegal trade while facilitating legitimate business activity. The Instrument for financial support for customs control equipment contributes to adequate and equivalent customs controls through the purchase, maintenance and upgrade of relevant and reliable state-of-the-art customs control equipment.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

CHAPTER 11 03 — INTEGRATED BORDER MANAGEMENT FUND (IBMF) — INSTRUMENT FOR FINANCIAL SUPPORT FOR CUSTOMS CONTROL EQUIPMENT (*cont'd*)**11 03 01** (*cont'd*)*Remarks*

This appropriation is intended to support the purchase, maintenance and upgrade of customs controls equipment that has one or more of the following customs control purposes:

- non-intrusive inspection;
- indication of hidden objects on humans;
- radiation detection and nuclide identification;
- analysis of samples in laboratories;
- sampling and field analysis of samples;
- handheld search.

In addition, the Instrument for financial support for customs control equipment (the 'Instrument') may also cover the purchase, maintenance and upgrade of customs controls equipment for testing new pieces of equipment or new functionalities in operational conditions. The Instrument may also cover expenses for preparation, monitoring, control, audit, evaluation and other activities for managing the Instrument and evaluating the achievement of its objectives.

The Instrument may, moreover, cover expenses related to studies, meetings of experts, information and communication actions that are related to the objectives of the Instrument, as well as expenses linked to information technology networks focusing on information processing and exchange, including corporate information technology tools and other technical and administrative assistance needed in connection with the management of the Instrument.

Remarks

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the decentralised agencies are set out in Annex 'Staff' to this section.

The decentralised agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

The European Border and Coast Guard Agency (Frontex) promotes, coordinates and develops European border management in respect of the Charter of Fundamental Rights of the European Union and in line with the concept of integrated border management. Frontex's main tasks are to coordinate cooperation between Member States in management of the external border, assist Member States in training of national border guards, carry out risk analyses and follow research relevant for the control and surveillance of external borders. Furthermore, Frontex helps Member States that require technical and operational assistance at external borders and provides Member States with the necessary support in organising joint return operations.

Remarks

This appropriation is intended to contribute to ensuring a high level of security in the Union, in particular by tackling terrorism and radicalisation, serious and organised crime and cybercrime and by assisting and protecting victims of crime.

In particular, the Internal Security Fund (ISF) aims to increase the exchange of information among and within the Union law enforcement and other competent authorities and other relevant Union bodies as well as with third countries and international organisations; to intensify cross-border joint operations among and within the Union law enforcement and other competent authorities in relation to serious and organised crime with a cross-border dimension; and to support effort to strengthen the capabilities in relation to combatting and preventing crime including terrorism, in particular through increased cooperation between public authorities, civil society and private partners across the Member States.

The ISF should in particular support police and judicial cooperation and prevention in the fields of serious and organised crime, illicit arms trafficking, corruption, money laundering, drug trafficking, environmental crime, exchange of and access to information, terrorism, trafficking in human beings, exploitation of illegal immigration, child sexual exploitation, distribution of child abuse images and child pornography, and cybercrime. The ISF should also support the protection of people, public spaces and critical infrastructure against security-related incidents and the effective management of security-related risks and crises, including through the development of common policies (strategies, policy cycles, programmes and action plans), legislation and practical cooperation.

Remarks

Appropriations under this chapter are intended to cover the provision of funding for assisting Lithuania with the decommissioning of the Ignalina nuclear power plant, with specific emphasis on managing the radiological safety challenges, whilst ensuring broad dissemination to all Member States of knowledge thereby generated on nuclear decommissioning.

The appropriations should in particular cover the dismantling and decontamination of the Ignalina equipment and reactor shafts in accordance with the decommissioning plan, while ensuring the safe management of the decommissioning and legacy waste and disseminating the generated knowledge among Union stakeholders.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to support the financing of the decommissioning of the Ignalina (Lithuania) nuclear power plant.

The financial allocation for the Ignalina programme may also cover expenses related to the technical and administrative assistance for the implementation of the programme, such as preparatory, monitoring, control, audit and evaluation activities including corporate information technology systems, studies, expert meetings, information and communication actions (including corporate communication of the political priorities of the Union as far as they are related to the general objectives of Regulation (EU) 2021/101).

The financial allocation for the Ignalina programme may also cover the expenses of technical and administrative assistance necessary to ensure the transition between that programme and the measures adopted under Council Regulation (EC) No 1990/2006 of 21 December 2006 on the implementation of Protocol No 4 on the Ignalina nuclear power plant in Lithuania to the Act of Accession of the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia 'Ignalina Programme' (OJ L 411, 30.12.2006, p. 10, ELI: <http://data.europa.eu/eli/reg/2006/1990/oj>) and Council Regulation (EU) No 1369/2013 of 13 December 2013 on Union support for the nuclear decommissioning assistance programme in Lithuania, and repealing Regulation (EC) No 1990/2006 (OJ L 346, 20.12.2013, p. 7, ELI: <http://data.europa.eu/eli/reg/2013/1369/oj>).

At the end of each year, the Commission shall elaborate a progress report on the implementation of the work carried out in the previous years and present it to the European Parliament and to the Council.

12 03 99 Completion of previous programmes and activities*Remarks*

Appropriations under this article are intended to cover payments in respect of commitments remaining to be settled from previous years.

Remarks

Appropriations under this chapter are intended to cover the provision of funding for decommissioning of nuclear facilities and management of radioactive waste, in line with the identified needs. For the period of 2021-2027, the appropriations should in particular cover:

- the assistance to Bulgaria and Slovakia in implementing the Kozloduy programme and the Bohunice programme, including management and storage of radioactive waste in line with the identified needs of the respective decommissioning plan, with specific emphasis on managing the safety challenges thereof,

CHAPTER 12 04 — NUCLEAR SAFETY AND DECOMMISSIONING, INCLUDING FOR BULGARIA AND SLOVAKIA *(cont'd)*

- and the support to the decommissioning and radioactive waste management programme of the Joint Research Centre.

The programme established by Regulation (Euratom) 2021/100 will create knowledge in the nuclear decommissioning process and in the radioactive waste management resulting from the decommissioning activities.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Legal basis

Remarks

This appropriation is intended to cover the activities carried out by the Joint Research Centre (JRC) to implement its Decommissioning and Waste Management Programme (2021-2027). Actions under this programme shall have the following specific objectives:

- to support the decommissioning plan and to carry out the activities in accordance with the national law of the host Member State for the dismantling and decontamination of the Commission's own nuclear installations at the JRC sites,
- safe management of associated radioactive waste,
- when appropriate, to prepare the optional transfer of the related nuclear liabilities from the JRC to the host Member States; such transfer shall not be imposed to any host Member State and shall be subject to mutual bilateral agreement between the Commission and the host Member States; this mutual bilateral agreement shall provide that all costs of the decommissioning of the Commission's own nuclear installations at the JRC sites and storage of the associated radioactive waste are paid by the Union and shall fully comply with Council Directive 2011/70/Euratom of 19 July 2011 establishing a Community framework for the responsible and safe management of spent fuel and radioactive waste (OJ L 199, 2.8.2011, p. 48, ELI: <http://data.europa.eu/eli/dir/2011/70/oj>),
- to develop ties and exchanges among Union stakeholders on nuclear decommissioning, with a view to ensure dissemination of knowledge and return of experience in all relevant areas such as research and innovation, regulation, training and to develop potential Union synergies.

It covers specific expenditure related to the activities of the JRC Decommissioning and Waste Management Programme, including the purchase of technical equipment, subcontracting of scientific and technical services, access to information and acquisition of consumables. This includes expenditure on technical infrastructure directly incurred for the activities concerned, as well as expenses for workshops and meetings in order to gather and disseminate knowledge and experience.

Remarks

The European Union Agency for Law Enforcement Training (CEPOL) is an agency of the Union dedicated to develop, implement and coordinate training for law enforcement officials. CEPOL contributes to a safer Europe by facilitating cooperation and knowledge sharing among law enforcement officials of the Member States, and to some extent from third countries, on issues stemming from Union priorities in the field of security; in particular, from the EU Policy Cycle on serious and organised crime. CEPOL brings together a network of training institutes for law enforcement officials in Member States and supports them in providing frontline training on security priorities, law enforcement cooperation and information exchange. CEPOL also works with Union bodies, international organisations and third countries to ensure that the most serious security threats are tackled with a collective response.

Remarks

European Union Drugs Agency (EUDA) provides the Union and Member States with a factual overview of European drug problems and a solid evidence base to support the drugs debate. It offers policymakers the data they need for drawing up informed drug laws and strategies. It also helps professionals and practitioners working in the field pinpoint best practice and new areas of research. While the EUDA is primarily European in focus, it also works with partners in other world regions, exchanging information and expertise. Collaboration with European and international organisations in the drugs field is also central to its work as a means of enhancing understanding of the global drugs phenomenon.

Remarks

This appropriation is intended to cover:

- expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of Euratom policy and legislation on nuclear safety and radiation protection,
- expenditure on measures and actions relating to monitoring and protection against the effects of ionising radiation and aimed at ensuring the health protection of the population and the protection of the environment against the dangers of ionising radiation; these actions relate to specific tasks provided for under the Euratom Treaty,
- expenditure related to verifying the operation and efficiency of systems to monitor the level of radioactivity in the air, water and soil and to ensure compliance with the basic standards in the Member States (Article 35 of the Euratom Treaty); this expenditure includes, in addition to subsistence allowances and travel (mission) expenses, costs for training, for preparatory meetings and for purchases of equipment to be used for inspections, including the expenses linked to the specific medical control of the inspectors,
- expenditure linked to the implementation of the Commission's tasks referred to in the European peer-reviews on nuclear safety issues, e.g. Topical Peer Reviews and EU Stress Tests follow-up,
- expenditure including grants to nuclear safety regulators or their designated technical support organisations, related to the implementation of nuclear safety requirements (stemming from the provisions of Chapter 3 of Title II of the Euratom Treaty and derived secondary legislation) in nuclear installations facing new technical or geopolitical circumstances.

This appropriation may also cover expenditure on information and publications directly linked to the achievement of the objectives coming under this item.

Remarks

Appropriations under this chapter are intended to cover expenditure of an administrative nature (such as studies, meetings of experts, development and maintenance of IT systems and purchase of IT equipment and communication activities and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover expenditure of an operational nature, such as cooperative projects, directly linked to the achievement of the objectives of the European Defence Fund (EDF) and its predecessor, the European Defence Industrial Development Programme (EDIDP).

In particular, appropriations under this chapter will support the development of actions – understood as the development phase of new products and technologies or the upgrading of existing ones – in the field of defence. The goal of both the EDF and EDIDP is to foster the competitiveness and innovativeness of the European defence technological and industrial base and reach a greater interoperability between Member States' capabilities, thereby contributing to the Union's strategic autonomy.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover the funding envisaged under the EDF for collaborative development projects of defence products and technologies consistent with defence capability priorities commonly agreed by Member States within the framework of the Common Foreign and Security Policy, thus contributing to greater efficiency of defence spending within the Union, achieving greater economies of scale, reducing the risk of unnecessary duplication and thereby reducing the fragmentation of defence products and technologies throughout the Union.

The EDF provides support for actions covering both new and upgrades of existing products and technologies where the use of pre-existing information needed to perform the upgrade is not subject, directly or indirectly to a restriction by non-associated third countries or non-associated third-country entities. Eligible actions shall relate to one or more of the following activities:

- activities aiming to create, underpin and improve knowledge, products and technologies, including disruptive technologies, which can achieve significant effects in the area of defence,
- activities aiming to increase interoperability and resilience, including secured production and exchange of data, to master critical defence technologies, to strengthen the security of supply or to enable the effective exploitation of results for defence products and technologies,
- studies, such as feasibility studies to explore the feasibility of new or improved technologies, products, processes, services and solutions,
- the design of a defence product, tangible or intangible component or technology as well as the definition of the technical specifications based on which such design has been developed which may include partial tests for risk reduction in an industrial or representative environment,
- the development of a model of a defence product, tangible or intangible component or technology, which can demonstrate the element's performance in an operational environment (system prototype),
- the testing of a defence product, tangible or intangible component or technology,

CHAPTER 13 02 — EUROPEAN DEFENCE FUND (EDF) — NON-RESEARCH (cont'd)

13 02 01 (cont'd)

- the qualification of a defence product, tangible or intangible component or technology,
- the certification of a defence product, tangible or intangible component or technology,
- the development of technologies or assets increasing efficiency across the life cycle of defence products and technologies.

This appropriation may also cover the expenditure linked to the work of independent experts appointed by the Commission to assist in the evaluation of proposals and to advise on or assist with the monitoring of the implementation of actions carried out. Furthermore, this appropriation may be used to fund the organisation of dissemination activities, matchmaking events and awareness-raising activities, in particular with a view to opening up supply chains to foster the cross-border participation of SMEs.

Remarks

Appropriations under this chapter are intended to cover expenditure of an operational nature, such as collaborative research projects, research activities in disruptive defence technologies and support actions in the defence research sector.

The objective of the European Defence Fund (EDF) for the research window is to support collaborative research that could significantly boost the performance of future defence capabilities throughout the Union, aiming at maximising innovation and introducing new defence products and technologies, including disruptive ones, and the most efficient use of defence research spending in Europe.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

CHAPTER 13 04 — MILITARY MOBILITY (*cont'd*)**13 04 01** (*cont'd*)*Remarks*

This appropriation is intended to cover actions to contribute to improving the transport infrastructure for the military mobility across the Union by taking advantage of the opportunity to increase synergies between civilian and defence needs and the TEN-T core and comprehensive networks as defined by Regulation (EU) No 1315/2013.

This objective will be mainly implemented through calls for proposals under multiannual work programmes, constituting financing decisions within the meaning of Article 110 of the Financial Regulation. Funding will be made available for sections or nodes identified by Member States in the Annexes to the 'Military Requirements for Military Mobility within and beyond the EU' as adopted by the Council on 15 July 2019 or any subsequent document adopted thereafter in so far as those sections or nodes are also part of the core and comprehensive TEN-T, and to any further indicative list of priority projects that may be identified by Member States.

Remarks

The instrument for the reinforcement of European defence industry through common procurement (EDIRPA) has the following objectives:

- to foster the competitiveness and efficiency of the European Defence Technological and Industrial Base (EDTIB), including SMEs and mid-caps, for a more resilient and secure Union, in particular by speeding up, in a collaborative manner, the adjustment of industry to structural changes, including the creation and ramp-up of its manufacturing capacities, and the opening of the supply chains for cross-border cooperation throughout the Union, thereby allowing the EDTIB to provide the defence products needed by Member States,
- to foster cooperation in the defence procurement processes between participating Member States in order to contribute to solidarity, prevent crowding-out effects, increase the effectiveness of public spending and reduce excessive fragmentation, ultimately leading to an increase in the standardisation of defence systems and greater interoperability between Member States' capabilities, while preserving the competitiveness and diversity of products available to Member States and in the supply chain.

The objectives shall be pursued with an emphasis on strengthening and developing the EDTIB throughout the Union to allow it to address, in particular, the most urgent and critical defence product needs, especially those revealed or exacerbated by the response to the Russian war of aggression against Ukraine, such as the shipment of defence products to Ukraine, taking into account the objectives of the Strategic Compass for Security and Defence and considering the work of the Defence Joint Procurement Task Force.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover actions of an operational nature directly linked to the achievement of the objectives of the instrument for the reinforcement of European defence industry through common procurement (EDIRPA).

In particular, the Union financial support and actions brought through EDIRPA stimulate common procurement (defined as procurement jointly conducted by at least three Member States) by Member States and associated third countries and benefit the EDTIB, while ensuring the ability of Member States' armed forces to act, security of supply and increased interoperability.

Remarks

The instrument financially supporting industrial reinforcement for the production of relevant defence products in the Union, including through the supply of their components, established by Regulation (EU) 2023/1525, aims at urgently strengthening the responsiveness and ability of the European Defence Technological and Industrial Base (EDTIB) to ensure the timely availability and supply of ground-to-ground and artillery ammunition as well as missiles ('relevant defence products') in the Union. Its main objective is to support the industrial reinforcement, the competitiveness and resilience of EDTIB notably through investments in manufacturing capacities for relevant defence products, cross-border industrial partnerships and collaboration of relevant companies in a joint industry effort.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, in case of agreement on their participation, contributions received from EFTA States for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Legal basis

Regulation (EU) 2023/1525 of the European Parliament and of the Council of 20 July 2023 on supporting ammunition production (ASAP) (OJ L 185, 24.7.2023, p. 7, ELI: <http://data.europa.eu/eli/reg/2023/1525/oj>).

13 07 01 (*cont'd*)

Remarks

This appropriation is intended to cover actions of an operational nature, more specifically, directly linked to the achievement of the objectives of the instrument established by Regulation (EU) 2023/1525.

In particular, the Union financial support and actions brought through this instrument will ramp-up the production capacities of the European Defence Technological and Industrial Base (EDTIB) and facilitate investment throughout the supply chain. It will contribute to reducing lead time for the production of the relevant defence products while facilitating investment to allow EDTIB to produce more and faster. It will also encourage the EDTIB's resilience through cross-border industrial partnerships and collaboration of relevant companies in a joint industry effort.

Remarks

The Regulation establishing the European Defence Industry Programme and a framework of measures to ensure the timely availability and supply of defence products ('EDIP Regulation') provides for the establishment of the European Defence Industrial Programme that aims at supporting defence industry readiness of the Union and its Member States through the strengthening of the competitiveness, responsiveness and ability of the European Defence Technological and Industrial Base to ensure the timely availability and supply of defence products as set out in the European Defence Industrial Strategy.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, in case of agreement on their participation, contributions received from EFTA States for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

Remarks

This appropriation is intended to cover actions of an operational nature, more specifically, directly linked to the achievement of the objectives of the European Defence Industry Programme. In particular, the programme aims at increasing the defence industrial readiness of the European Defence Technological and Industrial Base in particular through:

- (a) initiating and speeding up the adjustment of industry to structural changes, including through the creation and ramp-up of its manufacturing capacities and the opening of the supply chains for cross-border cooperation and effective availability and supply throughout the Union, involving in particular, to a significant extent, SMEs, small mid-caps and other mid-caps;
- (b) incentivising cooperation in defence procurement in order to contribute to solidarity, prevent crowding-out effects, increase the effectiveness of public spending and reduce excessive fragmentation, ultimately leading to an increase in the standardisation of defence systems and greater interoperability.

14 01 01 *Support expenditure for the Neighbourhood, Development and International Cooperation Instrument — Global Europe (NDICI — Global Europe)*

Remarks

Besides the expenditure described in this chapter, this appropriation is also and more specifically intended to cover support expenditure for the implementation of the Instrument and for the achievement of its objectives, including administrative support associated with the preparation, follow-up, monitoring, control, audit and evaluation activities necessary for such implementation, as well as expenditure at headquarters and Union delegations for the administrative and coordination support needed for the programme, and to manage operations financed under this Regulation, including information and communication actions, and corporate information technology systems.

When support expenditure is not included in the NDICI — Global Europe action plans or measures, where applicable, support measures may cover:

- studies, meetings, information systems, awareness-raising, training, preparation and exchange of lessons learnt and best practices, publication activities and any other administrative or technical assistance expenditure necessary for the programming and management of actions, including remunerated external experts,
- research and innovation activities and studies on relevant issues and the dissemination thereof,
- expenditure related to the provision of information and communication actions, including the development of communication strategies.

Remarks

Appropriations under this chapter are intended to cover operational expenditure related to actions carried out under a Regulation of the European Parliament and of the Council establishing the Neighbourhood, Development and International Cooperation Instrument – Global Europe (NDICI — Global Europe) whose general objective is to uphold and promote the Union's values and interests worldwide in order to pursue the objectives and principles of the Union's external action, as laid down in Article 3(5) and Articles 8 and 21 TEU.

In accordance with that general objective, the specific objectives of the NDICI — Global Europe are the following:

(a) to support and foster dialogue and cooperation with third countries and regions in the Neighbourhood, in Sub-Saharan Africa, in Asia and the Pacific, and in the Americas and the Caribbean;

(b) at global level, to protect, promote and advance democracy, rule of law and human rights, including gender equality, support civil society organisations, further stability and peace and address other global challenges including migration and mobility;

CHAPTER 14 02 — NEIGHBOURHOOD, DEVELOPMENT AND INTERNATIONAL COOPERATION INSTRUMENT — GLOBAL EUROPE (NDICI — GLOBAL EUROPE) (cont'd)

(c) to respond rapidly to situations of crisis, instability and conflict; resilience challenges and linking of humanitarian aid and development action; and foreign policy needs and priorities.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Legal basis

Regulation (EU) 2021/947 of the European Parliament and of the Council of 9 June 2021 establishing the Neighbourhood, Development and International Cooperation Instrument – Global Europe, amending and repealing Decision No 466/2014/EU of the European Parliament and of the Council and repealing Regulation (EU) 2017/1601 of the European Parliament and of the Council and Council Regulation (EC, Euratom) No 480/2009 (OJ L 209, 14.6.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/947/oj>).

14 02 01 *Geographic programmes**Remarks*

Geographic programmes may cover all third countries, except for candidates and potential candidates as defined in Regulation (EU) 2021/1529 of the European Parliament and of the Council of 15 September 2021 establishing the Instrument for Pre-accession Assistance (IPA III) (OJ L 330, 20.9.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/1529/oj>) and overseas countries and territories as defined in Council Decision (EU) 2021/1764 of 5 October 2021 on the association of the Overseas Countries and Territories with the European Union including relations between the European Union on the one hand, and Greenland and the Kingdom of Denmark on the other (OJ L 355, 7.10.2021, p. 6, ELI: <http://data.europa.eu/eli/dec/2021/1764/oj>). Geographic programmes in the Neighbourhood area may cover any country specified in Annex II to Regulation (EU) 2021/947 of the European Parliament and of the Council of 9 June 2021 establishing the Neighbourhood, Development and International Cooperation Instrument — Global Europe, amending and repealing Decision No 466/2014/EU of the European Parliament and of the Council and repealing Regulation (EU) 2017/1601 of the European Parliament and of the Council and Council Regulation (EC, Euratom) No 480/2009 (OJ L 209, 14.6.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/947/oj>). In order to achieve the objectives laid down in that Regulation, geographic programmes shall be implemented through country, multi-country, regional, continental and trans-regional projects, based on the following areas of cooperation:

- good governance, democracy, rule of law and human rights, including gender equality,
- eradicating poverty, fighting against inequalities and discrimination, and promoting human development,
- migration, forced displacement and mobility,
- environment and climate change,

Remarks

This appropriation is intended to provide support to the Southern Neighbourhood partner countries (Algeria, Egypt, Israel, Jordan, Lebanon, Libya, Morocco, occupied Palestinian territories, Syria, Tunisia) and covers actions implemented in the areas of cooperation specified in the NDICI — Global Europe, including through multi-country, regional, and trans-regional programmes. Priority areas for Union financing are selected mainly from those included in the association, partnership and cooperation agreements, jointly agreed partnership priorities or other relevant, existing and future, jointly agreed documents between the Union and the partner countries in bilateral and multilateral formats.

In addition, this appropriation contributes to the specific objectives of Union support for the Neighbourhood, which are:

- to promote enhanced political cooperation and strengthen and consolidate deep and sustainable democracy, stability, good governance, the rule of law and the respect for human rights;
- to support the implementation of association agreements or other existing and future agreements, and jointly agreed association agendas and partnership priorities or equivalent documents, including through institutional cooperation and capacity building;
- to promote a strengthened partnership with societies between the Union and the partner countries, and among the partner countries, including through people-to-people contacts and a wide range of activities with a specific focus on youth;
- to enhance regional and cross-border cooperation, in particular in the framework of the Union for the Mediterranean, European Neighbourhood-wide collaboration, including in the areas of energy and security;

Remarks

Appropriations under this chapter are intended to cover operational expenditure concerning humanitarian aid, disaster prevention, disaster risk reduction, and preparedness in third countries.

The aid is granted to victims without discrimination or adverse distinction on the grounds of race, ethnic origin, religion, disability, sex, age, nationality or political affiliation. That aid is provided in accordance with international humanitarian law and should not be subject to restrictions imposed by other partner donors, as long as it is necessary to meet the humanitarian needs to which such situations give rise.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

CHAPTER 14 03 — HUMANITARIAN AID (cont'd)

14 03 01 (cont'd)

Remarks

This appropriation is intended to cover the financing of humanitarian and food assistance operations of a humanitarian nature to help people in third countries who are the victims of conflicts or disasters, both natural and human-made (wars, outbreaks of fighting, etc.), or comparable emergencies, for as long as is necessary to meet the humanitarian needs that such situations give rise to.

This appropriation is also intended to cover the purchase and delivery of any product or equipment needed for the implementation of humanitarian aid operations, including the building of homes or shelters for affected groups of people, short-term rehabilitation and reconstruction work, particularly of infrastructure and facilities, the costs associated with external, expatriate or local staff, storage, international or national shipment, logistic support and distribution of relief and any other action aimed at facilitating freedom of access to the recipients of the aid.

This appropriation may also cover any other costs directly linked to the implementation of humanitarian aid operations, such as technical assistance within the requisite timescale and in a way which meets the needs of the recipients, satisfies the requirement to achieve the greatest possible degree of cost-effectiveness and provides greater transparency.

Remarks

This appropriation is intended to cover the financing of operations at country, regional and global levels to prepare the response for and mitigate the impact of disasters caused by rapid and slow onset natural hazards (such as floods, cyclones, earthquakes, drought, sea level rise) or comparable emergencies caused by other threats (such as violence, conflict, industrial hazards, health related hazards, including epidemics). This appropriation is meant to ensure the development of relevant preparedness measures, such as early warning systems, purchase and transport of equipment (if required), contingency plans, and capacity building of national and local stakeholders.

CHAPTER 14 03 — HUMANITARIAN AID (*cont'd*)**14 03 02** (*cont'd*)

This appropriation may also cover any other costs directly linked to the implementation of preparedness operations, such as:

- the financing of scientific studies generating data and knowledge supporting better preparedness,
- the constitution of emergency stocks of goods and equipment for use in connection with humanitarian aid operations,
- the technical assistance necessary for the preparation and implementation of disaster preparedness projects, in particular expenditure incurred covering the cost of contracts of individual experts in the field and the infrastructure and logistics costs, covered by imprest accounts and expenditure authorisations, of the Directorate-General for Humanitarian Aid and Civil Protection units deployed throughout the world.

This appropriation is also intended to provide funds for comprehensive Union actions to limit and manage impacts of climate change on vulnerable populations in developing countries, including displaced persons in the context of disasters and climate change.

Remarks

This appropriation is intended to cover the financing of any unforeseen measures under Article 14 04 01, decided on in the course of the financial year, which have to be implemented urgently.

This item is also intended as an element of flexibility in the CFSP budget, as described in the Interinstitutional Agreement of 16 December 2020 between the European Parliament, the Council of the European Union and the European Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources (OJ L 433 I, 22.12.2020, p. 28, ELI: http://data.europa.eu/eli/agree_interinst/2020/1222/oj).

Remarks

In accordance with Article 58(2), point (c), of the Financial Regulation, this appropriation is intended to finance expenditure related to preparatory measures in the field of Title V TEU to establish the conditions for Union actions in the field of the CFSP and the adoption of the necessary legal instruments. It may cover evaluation and analysis measures (*ex ante* evaluation of means, specific studies, organisation of meetings, fact-finding on the ground). In the field of Union crisis management operations and for EUSRs, in particular, preparatory measures may, inter alia, serve to assess the operational requirements for an envisaged action, to provide for a rapid initial deployment of personnel and resources (e.g. mission expenses, purchase of equipment, pre-financing of running and insurance costs in the start-up phase), or to take the necessary measures on the ground to prepare for the launching of the operation. It may also cover experts supporting Union crisis management operations on specific technical issues (e.g. identification and assessment of procurement needs) or security training for staff to be deployed to a CFSP mission / EUSR team.

Remarks

This appropriation is intended to cover all the expenditure connected with the appointment of European Union Special Representatives (EUSRs) in accordance with Article 33 TEU.

EUSRs should be appointed with due regard for gender equality and gender mainstreaming policies, and the appointment of women EUSRs should therefore be promoted.

This appropriation covers expenditure on the salaries of EUSRs and on setting up their teams and/or support structures, including travel costs and staff costs other than those relating to staff seconded by Member States or Union institutions. It also covers the costs of any projects implemented under the direct responsibility of an EUSR.

Remarks

This appropriation is intended to finance measures which contribute to the non-proliferation of weapons of mass destruction (nuclear, chemical and biological), primarily in the framework of the Union Strategy against the Proliferation of Weapons of Mass Destruction of December 2003. This includes support for measures implemented by international organisations in this field.

CHAPTER 14 04 — COMMON FOREIGN AND SECURITY POLICY (*cont'd*)**14 04 03** (*cont'd*)

This appropriation is intended to finance measures which contribute to the non-proliferation of conventional weapons and operations to combat the destabilising accumulation and trafficking of small arms and light weapons. This includes support for measures implemented by international organisations in this field.

Remarks

Appropriations under this chapter are intended to cover operational expenditure related to actions carried out under Decision (EU) 2021/1764. Its general objective is to promote the economic and social development of the OCTs and to establish close economic relations between them and the Union as a whole. The association shall pursue this general objective by enhancing the OCTs' competitiveness, strengthening the OCTs' resilience, reducing their economic and environmental vulnerability and promoting cooperation between them and other partners.

In accordance with Article 3(5) and Article 21 TEU, the specific objectives of the association are the following:

- to foster and support cooperation with OCTs,
- to support and to cooperate with Greenland in addressing its major challenges as the raising of education level and to contribute to the capacity of the administration of Greenland to formulate and implement national policies.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover operational expenditure related to actions carried out under the instrument for providing support to Ukraine for 2023 (macro-financial assistance +). The general objective of that instrument is to provide short-term financial relief in a predictable, continuous, orderly and timely manner, financing of rehabilitation and initial support towards post-war reconstruction, where appropriate, with a view to supporting Ukraine on its path towards European integration.

To reach the general objective, the main specific objectives shall in particular be to support:

- macro-financial stability, and to ease Ukraine's external and internal financing constraints,
- a reform agenda gearing towards the early preparatory phase of the pre-accession process, as appropriate, including strengthening Ukraine's institutions, reforming and reinforcing the effectiveness of public administration as well as transparency, structural reforms and good governance at all levels,
- rehabilitation of critical functions and infrastructure and relief for people in need.

In accordance with Articles 21 and 22 of the Financial Regulation, any assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this article are intended to finance actions and activities not included elsewhere in this title but for which a basic act has been adopted.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

14 20 03 01 Macro-financial assistance (MFA) grants

Remarks

Macro-financial assistance (MFA) is a form of financial aid extended by the Union to partner countries experiencing a balance of payments crisis. MFA is designed for countries geographically, economically and politically close to the Union. These include candidate and potential candidate countries, countries covered by the European Neighbourhood Policy and, in certain circumstances, other third countries. In principle, MFA is only available to countries benefiting from an International Monetary Fund programme.

MFA is exceptional in nature and is mobilised on a case-by-case basis to help countries dealing with serious balance-of-payments difficulties. Its objective is to restore a sustainable external financial situation, while encouraging economic adjustments and structural reforms.

While MFA can take the form of medium- or long-term loans or grants, or a combination of these, this item only covers the grant element of MFA operations.

Appropriations under this item will also be used to cover costs incurred in relation to MFA operations, in particular: (i) costs incurred to conduct operational assessments in the beneficiary countries to obtain reasonable assurances on the functioning of administrative procedures and financial circuits; (ii) costs related to the implementation of the 'Better Regulation' guidelines, in particular for *ex post* evaluations of MFA operations; and (iii) costs to cover comitology requirements.

The Commission will inform the European Parliament and the Council regularly of the macro-financial situation of the beneficiary countries and will report extensively on the implementation of MFA on a yearly basis.

Remarks

In accordance with Article 245 of the Financial Regulation, this appropriation is intended to cover the Union's obligatory and voluntary contributions or membership fees to a number of international conventions, protocols and agreements to which the Union is party and preparatory work for future international agreements involving the Union.

In some cases, contributions to subsequent protocols are included in contributions to their basic convention.

Those international conventions, protocols and agreements include, inter alia:

- contributions of the Union to the World Customs Organisation (WCO),
- contributions of the Union to the International Tax Dialogue (ITD),
- contribution to the International Union for the Protection of New Varieties of Plants (UPOV), established by the International Convention for the Protection of New Varieties of Plants as last amended on 19 March 1991, which provides for an exclusive property right for breeders of new plant varieties,
- contribution to both the World Health Organisation Framework Convention on Tobacco Control (FCTC) and the FCTC Protocol to Eliminate Illicit Trade in Tobacco Products, which the Community ratified and to which the Union is a party,
- contribution due by the Union to cover the administrative budget arising out of its membership in the FAO, as well as to the International Treaty on Plant Genetic Resources for Food and Agriculture, following its ratification,
- contribution to multilateral and international environment agreements,
- contribution of the Union to the Energy Community,
- contribution of the Union to the Transport Community.

Annual membership fees which the Union must pay for its participation to the following international agreements on the grounds of its exclusive competence in the field:

- International Coffee Organisation,
- International Cocoa Organisation,
- International Cotton Advisory Committee when approved,

Remarks

This appropriation finances communication, information and outreach measures, systems and networks designed to project a strong, united voice for Europe in the world. The actions under this appropriation will strengthen the Union's capacity to promote its values and interests globally, enhance awareness of the Union's global role and, in that context, draw attention to the scale, ambition and impact of its common foreign and security policy, external relations, international cooperation and partnerships, neighbourhood, enlargement, conflict prevention and humanitarian policies and programmes. They will be based on a coordinated approach, linking the internal and external aspects of Union policies.

The communication, information and outreach measures concerned may address the general public or specific target audiences or stakeholder groups in the Member States or in third countries. They may be implemented directly by the Union centrally or at decentralised level in its delegations and offices in third countries, or in collaboration with public and private sector partners, service providers, international organisations and other stakeholders.

The communication, information and outreach measures financed by this appropriation include the design and implementation of:

- public diplomacy actions,
- strategic communication, including measures to counter global disinformation through the systematic tracking and exposing of disinformation spread by state and other actors,
- (integrated) campaigns, events and other communication, information and outreach actions,
- the EU Visitors programme managed jointly by the Commission and the European Parliament and other visitors' and networks and exchange programmes for media professionals and other stakeholders,

- information actions on Union citizens' rights following the United Kingdom's withdrawal from the Union.

Activities carried out in realising these measures include the (co-)production, procurement, distribution, organisation and management of:

- briefings and information packs, study visits, press trips, for media professionals and other stakeholders,
- printed, audio-visual and electronic content,
- traditional, online and social media publications,
- media monitoring,
- events, seminars, workshops, conferences and training courses,
- communication and information systems and networks,
- competitions and prizes for traditional and online journalism and reporting,
- opinion polling.

This appropriation may also cover IT-related expenditure, including corporate information technology.

Remarks

This appropriation covers the financing of strategic evaluation, external monitoring and audit needs in the areas of international cooperation and development, neighbourhood and enlargement.

The financing can also cover meta-studies, approaches, systems and methodologies for evaluation, monitoring and auditing, as well as training and knowledge-sharing systems and other horizontal actions to support the dissemination of expertise and knowledge in this area (such as studies, meetings of experts, information systems and publications).

This appropriation may also cover IT-related expenditure, including corporate information technology.

Remarks

This appropriation is intended to cover coordination measures under the Union’s development cooperation and humanitarian aid per the specific powers conferred to the Commission in Article 210 and Article 214(6) TFEU.

Pursuant to Article 210 TFEU, the Union and the Member States are to coordinate their policies on development cooperation at Union and international level and shall consult each other on their aid programmes, including in international organisations and during international conferences. They may undertake joint action. Member States shall contribute if necessary to the implementation of Union aid programmes. The Commission is allowed to take any useful initiative to promote this coordination.

Pursuant to Article 214(6) TFEU, the Commission is allowed to take any useful initiative to promote coordination between actions of the Union and those of the Member States, in order to enhance the efficiency and complementarity of Union and national humanitarian aid measures.

The measures covered by this appropriation are intended to provide the Commission with the means of support it needs to prepare, formulate and follow up coordination activities under its development policy and humanitarian aid at Union and international level.

The actions covered by this item will be implemented in coordination with Member States in a Team Europe approach and will include:

- effectiveness, efficiency, relevance, impact and viability studies in the area of coordination,
- analyses, technical assistance, methodological support, monitoring and coordination activities in the priority areas of development policy, aid and development effectiveness, including joint programming, joint implementation, Team Europe Initiatives (TEIs or flagships and transparency), financing for development and sustainable finance, humanitarian aid, bilateral and multilateral partnerships,
- meetings of experts, organisation of events, dialogues and exchanges between the Commission, Member States (including their agencies and development financing institutions), international organisations (UN, international financial institutions, etc.) and other international actors, including preparation of and participation to international fora such as the Global Partnership for Effective Development Cooperation or those under the policy stream financing for development and humanitarian aid, means of implementation, Agenda 2030 and new Consensus on Development and Humanitarian Aid,

Remarks

In accordance with Article 2, point (64), and Article 47(4), point (d), of the Financial Regulation, appropriations under this Chapter are intended to cover expenditure on external personnel and technical assistance directly linked to the implementation of programmes under this Title. Technical assistance includes support and capacity building activities necessary for the implementation of a programme or an action, in particular preparation, management, monitoring, evaluation, audit and control activities.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this Chapter. The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this Chapter are intended to cover operational expenditure and provide financial support to the beneficiaries of the Reform and Growth Facility for the Western Balkans ('Facility'). The Facility will provide assistance to the Western Balkans for the delivery of socio-economic reforms and investments to implement their respective Reform Agendas in view to accelerate socio-economic convergence with the Union.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this Chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to be used, at the initiative of the Commission, subject to a ceiling of 0,5 % of the annual maximum amount of the European Globalisation Adjustment Fund for Displaced Workers (EGF). The appropriation may be used to finance preparation, monitoring, evaluation, data-gathering activities and the creation of a knowledge base relevant to the implementation of the EGF. It may also be used to finance administrative and technical support, information and communication activities and those enhancing the EGF's visibility and other administrative and technical assistance measures, as well as meetings with Member States' representatives and seminars with stakeholders, audit, control and evaluation activities necessary to implement the operations of the EGF.

Remarks

This article is intended to enter appropriations resulting from the mobilisation of the European Globalisation Adjustment Fund for Displaced Workers (EGF) in accordance with Regulation (EU) 2021/691.

The objective of the EGF is to demonstrate solidarity and promote decent and sustainable employment in the Union by offering assistance to workers dismissed because of major restructuring events. Those events can result in particular from globalisation-related challenges, such as changes in world trade patterns, trade disputes, significant changes in the trade relations of the Union or the composition of the internal market and financial or economic crises, the transition to a low-carbon economy, digitisation or automation. The EGF thereby supports displaced workers in returning to decent and sustainable employment as soon as possible. Particular emphasis is placed on measures that help the most disadvantaged groups.

As such, the EGF contributes to the implementation of the principles defined under the European Pillar of Social Rights and the enhancement of social and economic cohesion among regions and Member States.

CHAPTER 16 02 — MOBILISATION OF SOLIDARITY MECHANISMS (SPECIAL INSTRUMENTS) (cont'd)

16 02 02 (cont'd)

The actions undertaken by the EGF should be complementary to those of the European Social Fund Plus (ESF+) and there must be no double funding from those instruments. EGF-supported actions or measures should aim to ensure that the largest possible number of beneficiaries participating in those actions find sustainable employment as soon as possible.

Remarks

This appropriation is intended to cover all operational expenditure needed for the implementation of the Innovation Fund by the Commission in accordance with Article 4 of Delegated Regulation (EU) 2019/856, including other support expenditure, such as costs of project evaluation, project reviews and checks, fees to third parties, as well as IT and communication costs, etc.

The Innovation Fund support to projects may take the following forms:

- grants (projects, fixed premiums, contracts for difference, carbon contracts for difference, etc),
- contributions to blending operations under the Union investment support instrument,
- where necessary to achieve the objectives of Directive 2003/87/EC, funding in any of the other form laid down in the Financial Regulation, in particular prizes, procurement and indirect management.

The necessary appropriations would be generated by the revenue arising from the auctioning of emission allowances allocated to the Innovation Fund and unspent amounts from its predecessor, the NER300 fund, in accordance with Article 10 and Article 10a(8) and (8a) of Directive 2003/87/EC. For budget year 2026, calls for proposals for projects or competitive bidding totalling EUR 4 800 000 000 (indicative) are planned as well as EUR 1 200 000 000 (indicative) for a dedicated instrument to support the Clean Industrial Deal policy priority.

CHAPTER 16 04 — EUROPEAN UNION GUARANTEE FOR BORROWING-AND-LENDING OPERATIONS (cont'd)

Remarks

The budget lines included in this chapter mainly constitute the structure for the various guarantees provided by the Union in the framework of financial assistance instruments or mechanisms to Member States. They will enable the Commission to service the debt should one of them default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 14 of Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39, ELI: <http://data.europa.eu/eli/reg/2014/609/oj>) applies.

A specific annex in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

Remarks

In accordance with Article 143 TFEU, the Union offers assistance to Member States outside the euro area that are experiencing or threatened by difficulties regarding their balance of payments. That assistance takes the form of medium-term loans that are conditional on the implementation of policies designed to address underlying economic problems. Typically, balance-of-payments assistance from the Union is offered in cooperation with the International Monetary Fund (IMF) and other international institutions or countries.

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

Legal basis

Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1, ELI: <http://data.europa.eu/eli/reg/2002/332/oj>).

Remarks

In accordance with the Euratom Treaty, the Commission is empowered to borrow on behalf of Euratom to finance investment projects related to nuclear power generation and the nuclear fuel cycle in Member States and to help finance safety improvements or the decommissioning of nuclear installations in certain neighbouring countries.

The total amount of borrowing for those activities is limited to EUR 4 000 000 000.

Legal basis

p.m.	p.m.	0,—

Remarks

In accordance with Article 122(2) TFEU, the European Financial Stabilisation Mechanism (EFSM) was created for the Commission to provide financial assistance to Member States experiencing or threatened by severe financial difficulties caused by exceptional occurrences beyond its control, using bonds issued on behalf of the Union on the capital markets or borrowings from financial institutions. The EFSM was set up by and for euro area Member States.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under this stabilisation mechanism is to be limited to the margin available under the Union's own resources for payment appropriations.

Legal basis

Council Regulation (EU) No 407/2010 of 11 May 2010 establishing a European financial stabilisation mechanism (OJ L 118, 12.5.2010, p. 1, ELI: <http://data.europa.eu/eli/reg/2010/407/oj>).

16 04 03 (cont'd)

16 04 03 02 (cont'd)

Remarks

This item is intended to cover the assignment to the European Stability Mechanism (ESM) of fines collected in application of Articles 6 and 8 of Regulation (EU) No 1173/2011 in accordance with Article 10 thereof. As such, any revenue from fines entered in Article 4 2 3 of the statement of revenue may give rise to the provision of appropriations.

The system of sanctions provided for in Regulation (EU) No 1173/2011 enhances the enforcement of the preventive and corrective parts of the Stability and Growth Pact in the euro area.

Legal basis

Regulation (EU) No 1173/2011 of the European Parliament and of the Council of 16 November 2011 on the effective enforcement of budgetary surveillance in the euro area (OJ L 306, 23.11.2011, p. 1, ELI: <http://data.europa.eu/eli/reg/2011/1173/oj>).

Remarks

In accordance with Article 122 TFEU, the temporary support to mitigate unemployment risks in an emergency (SURE) is available to Member States that need to mobilise significant financial means to fight the negative economic and social consequences of the COVID-19 outbreak on their territory. It provides financial assistance to Member States to address sudden increases in public expenditure for the preservation of employment. Specifically, SURE is to act as a second line of defence, supporting short-time work schemes and similar measures, to help Member States protect jobs, and thus employees and self-employed persons, against the risk of unemployment and loss of income.

SURE allows for a financial assistance up to EUR 100 000 000 000 in the form of loans from the Union to affected Member States.

Remarks

The European Union Recovery Instrument (EURI) provides funding for the different policies covered by the EU Recovery Plan. In particular, it mobilises new funding on behalf of Member States and provides support in the form of grants and loans to implement Member State recovery and resilience plans under the Recovery and Resilience Facility, provides new investment support under proposed budgetary guarantees (InvestEU Fund) and enhanced support to key economic sectors hit by the crisis through emergency cohesion policy. This item is to enable the Commission, if necessary, to service the debt should a debtor default on a loan granted under this guarantee.

Legal basis

Council Regulation (EU) 2020/2094 of 14 December 2020 establishing a European Union Recovery Instrument to support the recovery in the aftermath of the COVID-19 crisis (OJ L 433 I, 22.12.2020, p. 23, ELI: <http://data.europa.eu/eli/reg/2020/2094/oj>).

Remarks

The Ukraine Facility is to provide assistance to Ukraine in the form of non-repayable financial support and loans. The loans under the Facility are to constitute financial assistance within the meaning of Article 223(1) of the Financial Regulation and to be covered by the European Union budget guarantee over and above the ceilings of the Multiannual Financial Framework. Consequently, no provisioning for the loans under the Facility is to be constituted and, by way of derogation from Article 214(1) of the Financial Regulation, no provisioning rate should be set. This article is intended to enable the Commission, if necessary, to service the debt should Ukraine default.

Equally, this article aims to enable the Commission to cover the credit losses of defaulted operations covered by the Ukraine Guarantee in the circumstance that the constituted provisioning is not sufficient.

Remarks

Appropriations under this chapter are intended to provide predictable financial support to Ukraine over the 2024-2027 period. The Ukraine Facility will support Ukraine's efforts to sustain macro-financial stability, promote recovery as well as modernise the country whilst implementing key reforms on its process of accession to the Union. The Facility is designed as a flexible instrument adapted to the unprecedented challenges of supporting a country at war and ensuring predictability, transparency, and accountability of the funds.

The maximum resources for the implementation of the Facility are EUR 50 000 000 000 (in current prices) for 2024-2027, of which up to EUR 33 000 000 000 in the form of loans and up to EUR 17 000 000 000 in the form of support other than in the form of loans, which is relevant for expenditure under this chapter. The available support other than in the form of loans in a given year shall not exceed EUR 5 000 000 000, in accordance with the relevant provision of the Regulation (EU, Euratom) 2020/2093. Member States, third countries, international organisations, international financial institutions or other sources may provide additional financial contributions to the Facility. In accordance with Articles 21, 22 and 24 of the Financial Regulation, any assigned revenue entered in the statement of revenue gives rise to the provision of corresponding appropriations and to implementation under this chapter.

Remarks

This appropriation is intended to cover the financial support to Ukraine under the framework of the Ukraine Plan. While such support can take the form of loans or grants, or a combination of these, this article only covers the grant element of the financial assistance under the Pillar I of the Ukraine Facility. Funds will be provided based on the implementation of the Ukraine Plan, which will be underpinned by a set of conditions and a timeline for disbursements agreed with the Union. This Plan will encompass Ukraine's vision for the recovery, reconstruction and modernisation of the country and for the reforms and investments it intends to undertake as part of its process of accession to the Union. Significant emphasis will be placed on public administration reform, good governance, the rule of law, and sound financial management, including fostering efficient and effective management and control systems and a strong focus on anti-corruption and anti-fraud or any other illegal activity affecting the Union's financial interests, but also other reforms and approximation to the Union *acquis* that would underpin the accession process and modernisation of the economy. Funds will be disbursed based on the fulfilment of those conditions.

CHAPTER 16 06 — UKRAINE FACILITY (*cont'd*)

16 06 02 Pillar II: Ukraine Investment Framework

Remarks

Under the Ukraine Investment Framework, the Commission is to provide the Union support to Ukraine in the form of budgetary guarantee, financial instruments or blending operations, including technical assistance. That Framework aims to attract and mobilise private and public investments in Ukraine's recovery and reconstruction, addressing priorities identified in the Ukraine Plan, and supporting its objectives and implementation. It will complement all existing instruments supporting Ukraine, such as budgetary guarantees and blending operations, with the possibility of scaling them up, when conditions allow for it.

16 06 03 Pillar III: Union accession assistance and support measures

Remarks

This appropriation provides technical assistance and other supporting measures, including mobilisation of expertise on reforms, support to municipalities, civil society and other forms of bilateral support to design and implement reforms related to Ukraine's accession to the Union and to foster Ukraine's administrative capacity, supporting the objectives of the Plan. It may also support other measures aimed at addressing the consequences of the war, for example relating to enforcing international justice. This article will also cover the functioning costs of the Audit Board of the Ukraine Facility (including the remuneration of special advisers, their mission expenses and the institution's insurance contributions) as well as the interest rate subsidies for the loans provided to Ukraine under Pillar I and under Decision (EU) 2022/1201 of the European Parliament and of the Council of 12 July 2022 providing exceptional macro-financial assistance to Ukraine (OJ L 186, 13.7.2022, p. 1, ELI: <http://data.europa.eu/eli/dec/2022/1201/oj>) and Decision (EU) 2022/1628 of the European Parliament and of the Council of 20 September 2022 providing exceptional macro-financial assistance to Ukraine, reinforcing the Common Provisioning Fund by guarantees by Member States and by specific provisioning for some financial liabilities related to Ukraine guaranteed under Decision No 466/2014/EU, and amending Decision (EU) 2022/1201 (OJ L 245, 22.9.2022, p. 1, ELI: <http://data.europa.eu/eli/dec/2022/1628/oj>) and the provisioning of certain specified liabilities related to Union support to Ukraine decided before the establishment of the Ukraine Facility.

Remarks

This appropriation is intended to support Ukraine's progressive alignment to Union *acquis* with a view to future Union membership, thereby contributing to mutual stability, security, peace and prosperity. Such support is intended to include strengthening of the rule of law, including the independence of judiciary, democracy, respect of human rights and fundamental freedoms, fight against corruption, reinforcing of the effectiveness of public administration, institutional capacities, decentralisation, and supporting transparency, structural reforms, sectoral policies and good governance at all levels. Such support should also contribute to the implementation of the Ukraine Plan. This item will also cover support for social partners, civil society and local and regional organisations in Ukraine and other measures that are complementary to Union action, such as accountability mechanisms for Russia's war of aggression against Ukraine and the functioning of the Audit Board of the Ukraine Facility.

- expenditure on limited measures of social nature concerning the purchasing power of some staff, at the lowest grades, working in Luxembourg,
- expenditure on recognition events for officials, and in particular the cost of medals for 20 years' service and retirement gifts,
- specific payments to persons in receipt of Union pensions and those entitled under them and to any surviving dependents who are in particularly difficult circumstances,
- financing preventative projects to meet the specific needs of former staff in the various Member States and contributions to associations of former staff.

In respect of the policy to assist persons with disabilities in the following categories:

- officials and other staff in active employment,
- spouses of officials and temporary staff in active employment,
- all dependent children within the meaning of the Staff Regulations,

within the limits of the amount entered in the budget and after any national entitlements granted in the country of residence or origin have been claimed, this appropriation covers any duly substantiated non-medical expenditure which is acknowledged to be necessary and arises from their disability.

This appropriation is intended to cover some of the expenditure on schooling children who for unavoidable educational reasons are not or are no longer admitted to European Schools, or cannot attend a European School because of the place of work of either parent (external offices).

Appropriations to cover the equivalent expenditure in respect of research are entered under various items of the titles concerned.

Remarks

This appropriation is intended to cover purchase of tickets (one-way ticket and business pass), free access to public transport routes to facilitate mobility between Commission buildings or between Commission buildings and public buildings (for example airport), service bicycles and any other means encouraging the use of public transporting and Commission staff mobility, with the exception of service vehicles.

The creation of a specific appropriation for reimbursing public transport season tickets is a modest but crucial measure to confirm the commitment of the institutions of the Union to reducing their CO₂ emissions in line with their eco-management and audit scheme (EMAS) policy and the agreed climate change objectives.

Remarks

In order to ensure that the rules on competition concerning agreements, decisions by associations of undertakings and concerted practices (Article 101 TFEU), abuses of a dominant position (Article 102 TFEU), aids granted by States (Articles 107 and 108 TFEU) and concentrations between undertakings (Regulation (EC) No 139/2004) are enforced, the Commission is empowered to take decisions, to conduct investigations and to impose penalties or order recovery.

The Commission's decisions are subject to review by the Court of Justice of the European Union in accordance with the TFEU.

As a prudential measure, it is appropriate to take into account the possibility of budgetary implications stemming from rulings of the Court of Justice of the European Union.

This appropriation is intended to cover any expenditure arising from damages awarded by the Court of Justice of the European Union to claimants and resulting from legal proceedings against the Commission's decisions in the field of competition.

Since a reasonable estimate of the financial impact on the general budget cannot be established beforehand, a token entry ('p.m.') appears in this item. If necessary, the Commission will propose to make available the appropriations related to actual needs by means of transfers or through a draft amending budget.

This appropriation is intended to cover the costs borne by the Publications Office as official provider of publishing services to all institutions, bodies and agencies established by or under the Treaties. As such, the Publications Office constitutes the central point of access to Union law, and also to publications, open data, research results, procurement notices and other official information.

Its mission is to support Union policies as a centre of excellence for information, data and knowledge management, and to ensure that this broad range of information is made available to the public as accessible and reusable data to facilitate transparency, economic activity, and the diffusion of knowledge.

Remarks

The amount entered corresponds to the appropriations for the Office for the Administration and Payment of Individual Entitlements (PMO) set out in detail in the specific annex to this section.

In accordance with Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1, ELI: <http://data.europa.eu/eli/reg/2013/883/oj>), the appropriations for, and staff of, the Supervisory Committee of the European Anti-Fraud Office and its secretariat are entered in the budget and establishment plan of the PMO.

For the sake of transparency, the resources made available to the secretariat of Supervisory Committee of the European Anti-Fraud Office in the PMO's budget can be identified. Based on a secretariat of seven permanent posts and an allocation for one member of contract staff, the appropriations for the operation of the secretariat of Supervisory Committee of the European Anti-Fraud Office would amount to approximately EUR 1 000 000. This amount covers expenditure on staff costs, training, missions, internal meetings, buildings and IT.

The expenditure resulting from the mandate of the members of the Supervisory Committee of the European Anti-Fraud Office is covered by appropriations of EUR 200 000 in Article 20 03 18.

Remarks

This appropriation is intended to cover all expenditure resulting from the mandate of the members of the Supervisory Committee of the European Anti-Fraud Office (OLAF), namely:

- allowances granted to the members of the Supervisory Committee for the time dedicated to the fulfilment of their functions, as well as their travel expenses and ancillary costs,
- costs incurred by members of the Supervisory Committee officially representing the Supervisory Committee,
- all operating expenditure, such as the cost of purchase of equipment, stationery and office supplies and expenditure arising from communications and telecommunications (postal charges, telephone, fax and telegraph charges), documentation and library expenditure, the purchase of books and subscriptions to information media,
- travel, subsistence and incidental expenses of experts, invited by the members of the Supervisory Committee to participate in study groups and working parties, and the cost of organising such meetings where they are not covered by the existing infrastructure (in the headquarters of the institutions or external offices),
- expenditure on specialised studies and consultations contracted out to highly qualified experts (individuals or firms) where the members of the Supervisory Committee are unable to entrust such studies to suitable staff of OLAF.

Moreover, for the sake of transparency, the resources made available to the secretariat of the Supervisory Committee in the PMO's budget (Item 20 03 16 01) can be identified. Based on a secretariat of seven permanent posts and an allocation for one member of contract staff, the appropriations for the operation of the secretariat of the Supervisory Committee would come to around EUR 1 000 000. This amount covers expenditure on staff costs, training, missions, internal meetings, buildings and IT.

Remarks

This appropriation is intended to cover costs related to information systems (i.e. applications) in the Commission. Its scope includes the cost of business software and the costs to develop, manage and run applications for the Commission. It covers in particular:

- information systems development: resources involved with the analysis, design, development, code, test and release packaging services associated with application development projects,
- information systems support and maintenance: the operations, support, fix and minor enhancements associated with existing applications,
- business software acquisition: software expenditures including licensing, maintenance and support related to off-the-shelf software purchases,
- information systems management: costs in relation to the management, administration and planning of IT, including expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance, and vendor management.

This appropriation covers expenditure incurred within the Union territory, excluding Joint Research Centre sites, for which expenditure is entered in the titles concerned. Similar expenditure incurred outside the Union is entered in the titles concerned.

Remarks

This appropriation is intended to cover costs related to Data Centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- Data Centre facilities: purpose-built data centre facilities that house and protect critical IT equipment including the space, power, environment controls, racks, cabling and 'smart hand' support, this includes other facilities as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings,
- compute on-premises and cloud-based, including:
 - servers: physical and virtual servers running on different operating systems, including hardware, software and support services,
 - converged infrastructure: purpose-built appliances that provide compute, storage and network capabilities in one box,
 - mainframe: traditional mainframe computers and operations running legacy operating systems,
- storage on-premises and cloud-based: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse, including:
 - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office working areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
 - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,
 - transport: data network circuits and associated access facilities and services, including dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing and voice network circuits and associated access facilities and services, and usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (for example satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems, including database management software and tools, and outside services,

 - program, product and project management: resources involved with managing and supporting IT-related projects and/or continuous product development across business and IT-driven initiatives,
 - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate IT products, services and status of IT projects,
 - operations centre: centralised IT operations centre resources, including monitoring and intervention, such as network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs to define, establish, enforce, and measure security, compliance, and disaster recovery readiness, including:
 - security: IT security and cybersecurity resources setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,
 - compliance: IT compliance resources setting policy, establishing controls and measuring compliance to relevant legal and compliance requirements,
 - disaster recovery: IT disaster recovery resources setting disaster recovery policy, establishing process and means, dedicated failover facilities, performing disaster recovery testing,
- IT management infrastructure (including logistics): costs in relation to the management, administration and planning of IT infrastructure, including expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance, and vendor management.

Remarks

This appropriation is intended to cover costs related to the Cybersecurity Service for the Union institutions, bodies, offices and agencies (CERT-EU) whose mission is to contribute to the security of the ICT infrastructure of all constituents by helping to prevent, detect, mitigate and respond to cyber-attacks and by acting as the cyber-security information exchange and incident response coordination hub. CERT-EU is attached as a task force to the Commission IT department. This appropriation covers in particular:

- prevention: the costs of collecting, assessing and distributing information about potential vulnerabilities in internet-facing web services, issuing warnings about potential security issues, providing actionable advice and documentation on security controls, conducting maturity assessments and reviewing capabilities,
- digital forensics and incident response and social media assurance: the costs of providing incident support, digital forensics, artefact analysis and access to analytical tools,
- cyber threat intelligence and vulnerability information: the costs of maintaining a threat intelligence fusion centre and issue threat alerts and reports, disseminating indicators of compromising and detection rules to networks of intrusion detection sensors and log management and correlation systems, and tracking top threat actors targeting the Union institutions, bodies, offices and agencies,
- monitoring: the costs of deploying, maintaining and monitoring log analysis systems, intrusion detection sensors, and social media assurance tools,

Remarks

The aim of this reserve is to cover the European Globalisation Adjustment Fund for Displaced Workers (EGF) so as to enable the Union to demonstrate solidarity towards, and to provide support to people losing their jobs as a result of major structural changes caused by globalisation-related challenges.

The objective of the EGF is to demonstrate solidarity and promote decent and sustainable employment in the Union by offering assistance to workers who have been dismissed because of major restructuring events. Those events can result in particular from globalisation-related challenges, such as changes in world trade patterns, trade disputes, significant changes in the trade relations of the Union or the composition of the internal market and financial or economic crises, the transition to a low-carbon economy, digitisation or automation. The EGF thereby supports displaced workers in returning to decent and sustainable employment as soon as possible. Emphasis is placed on measures that help the most disadvantaged groups.

The maximum annual amount for the EGF is set in the MFF 2021-2027. The methods for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 9 of the Interinstitutional Agreement of 16 December 2020 between the European Parliament, the Council of the European Union and the European Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources.

Remarks

The aim of this reserve is to cover the Brexit Adjustment Reserve (BAR) that may be used to counter unforeseen and adverse consequences in Member States and sectors that are worst affected by the withdrawal of the United Kingdom from the Union.

Legal basis

Regulation (EU) 2021/1755 of the European Parliament and of the Council of 6 October 2021 establishing the Brexit Adjustment Reserve (OJ L 357, 8.10.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/1755/oj>).

Remarks

This appropriation is intended to cover end-user computing devices and support for end users. Its scope includes costs of purchasing, building, managing and running end-user computing devices, and deliver centralised support to end users in the Office. It covers in particular:

- personal computing infrastructure: client physical desktops, portable laptops, thin client machines, peripherals (including monitors, pointer devices and attached personal printers) used by individuals to perform work,
- mobile devices: client tablets, smartphones and apps used by individuals to perform work,
- end-user software: client-related software used to author, create, collaborate and share documents and other content, such as email, communications, messaging, word processing, spreadsheets, presentations, desktop publishing and graphics,
- network printers: network-connected personal printers, inkjet printers, laser printers, departmental or copy-room printers, etc.,
- IT helpdesk: centralised Tier 1 helpdesk resources that handle user requests, answer questions and resolve issues,
- desk-side support: local support resources that provide on-site support for moves, adds, changes and hands-on issue resolution.

Remarks

This appropriation is intended to cover costs related to data centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- data centre facilities: purpose-built data centre facilities that house and protect critical IT equipment, including the space, power, environment controls, racks, cabling and 'smart hand' support; this includes other facilities such as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings,
- on-premises and cloud-based computing, this includes:
 - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
 - converged infrastructure: purpose-built appliances that provide computer, storage and network capabilities in one box,
 - mainframe: traditional mainframe computers and operations running legacy operating systems,
- on-premises and cloud-based storage: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse; this includes:
 - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
 - voice: voice resources which enable or distribute voice services through on-premises equipment including PBX, VoIP and voicemail,

- transport: data network circuits and associated access facilities and services; this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing; and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed databases and middleware systems, this includes database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations, this includes:
 - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
 - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
 - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
 - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g., network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs of defining, establishing, enforcing, and measuring security, compliance, and disaster recovery readiness, this includes:
 - security: IT security and cybersecurity resources, setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,
 - compliance: IT compliance resources, setting policy, establishing controls and measuring compliance with relevant legal and compliance requirements,
 - disaster recovery: IT disaster recovery resources, setting disaster recovery policy, establishing process and means, dedicated failover facilities, performing disaster recovery testing,
- IT management infrastructure (including logistics): costs in relation to the management, administration and planning of IT infrastructure; this includes expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance and vendor management.

Remarks

This appropriation is intended to cover costs related to data centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- data centre facilities: purpose-built data centre facilities that house and protect critical IT equipment, including the space, power, environment controls, racks, cabling and "smart hand" support; this includes other facilities such as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings,
- on-premises and cloud-based computing; this includes:
 - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
 - converged infrastructure: purpose-built appliances that provide computer, storage and network capabilities in one box,
 - mainframe: traditional mainframe computers and operations running legacy operating systems,
- on-premises and cloud-based storage: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse, this includes:
 - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
 - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,

CHAPTER 02 01 — ADMINISTRATIVE EXPENDITURE (*cont'd*)02 01 09 (*cont'd*)02 01 09 03 (*cont'd*)

- transport: data network circuits and associated access facilities and services, this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing, and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems, this includes database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations, this includes:
 - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
 - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
 - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
 - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g., network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs of defining, establishing, enforcing, and measuring security, compliance, and disaster recovery readiness, this includes:
 - security: IT security and cybersecurity resources, setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,
 - compliance: IT compliance resources, setting policy, establishing controls and measuring compliance with relevant legal and compliance requirements,
 - disaster recovery: IT disaster recovery resources, setting disaster recovery policy, establishing process and means, dedicated failover facilities, performing disaster recovery testing,
- IT management infrastructure (including logistics): costs in relation to the management, administration and planning of IT infrastructure; this includes expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance, and vendor management.

Remarks

This appropriation is intended to cover costs related to data centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- data centre facilities: purpose-built data centre facilities that house and protect critical IT equipment, including the space, power, environment controls, racks, cabling and "smart hand" support; this includes other facilities such as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings,
- on-premises and cloud-based computing; this includes:
 - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
 - converged infrastructure: purpose-built appliances that provide computer, storage and network capabilities in one box,
 - mainframe: traditional mainframe computers and operations running legacy operating systems,
- on-premises and cloud-based storage: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),

CHAPTER 03 01 — ADMINISTRATIVE EXPENDITURE (*cont'd*)03 01 09 (*cont'd*)03 01 09 03 (*cont'd*)

- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse; this includes:
 - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks; and wide area network equipment and support services directly connecting data centres, offices and third parties,
 - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,
 - transport: data network circuits and associated access facilities and services; this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems. Costs include database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations; this includes:
 - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
 - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
 - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
 - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g., network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs of defining, establishing, enforcing, and measuring security, compliance, and disaster recovery readiness; this includes:
 - security: IT security and cybersecurity resources, setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,

- on-premises and cloud-based computing; this includes:
 - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
 - converged infrastructure: purpose-built appliances that provide computer, storage and network capabilities in one box,
 - mainframe: traditional mainframe computers and operations running legacy operating systems,
- on-premises and cloud-based storage: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse, this includes:
 - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
 - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,
 - transport: data network circuits and associated access facilities and services; this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing, and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems; this includes database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations; this includes:
 - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
 - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,

This appropriation is intended to cover end-user computing devices and support for end users. Its scope includes costs of purchasing, building, managing and running end-user computing devices, and deliver centralised support to end users in the Office. It covers in particular:

- personal computing infrastructure: client physical desktops, portable laptops, thin client machines, peripherals (including monitors, pointer devices and attached personal printers) used by individuals to perform work,
- mobile devices: client tablets, smartphones and apps used by individuals to perform work,
- end-user software: client-related software used to author, create, collaborate and share documents and other content, such as email, communications, messaging, word processing, spreadsheets, presentations, desktop publishing and graphics,
- network printers: network-connected personal printers, inkjet printers, laser printers, departmental or copy-room printers, etc.,
- conferencing and audio/video: audio and video conferencing equipment typically used in conference rooms and dedicated telepresence rooms to enable workforce communications,
- IT helpdesk: centralised Tier 1 helpdesk resources that handle user requests, answer questions and resolve issues,
- desk-side support: local support resources that provide on-site support for moves, adds, changes and hands-on issue resolution.

- on-premises and cloud-based computing; this includes:
 - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
 - converged infrastructure: purpose-built appliances that provide computer, storage and network capabilities in one box,
 - mainframe: traditional mainframe computers and operations running legacy operating systems,
- on-premises and cloud-based storage: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed computer infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse; this includes:
 - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
 - voice: voice resources which enable or distribute voice services through on premise equipment, including PBX, VoIP, voicemail and handsets,
 - transport: data network circuits and associated access facilities and services; includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing, and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems; this includes database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations; this includes:
 - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
 - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,

Remarks

This appropriation is intended to cover all expenditure on measures to combat fraud which does not come under the Office's administrative operations.

It is intended, in particular, for:

- searching for, gathering, examining, utilising and passing on to national investigation departments all information which is useful for the detection and pursuit of fraud (e.g., via databases),
- supporting efforts by Member States, in particular in the case of international fraud, when action has to be taken at Union level,
- financing measures to increase the effectiveness of preventive measures, inspections and investigations,
- strengthening cooperation with national administrations, in particular to combat cigarette smuggling,
- organising and participating in monitoring and on-the-spot inspections,
- financing travel expenses and subsistence allowances for inspectors and national magistrates working abroad in connection with control visits, on-the-spot inspections, coordination meetings and for the purposes of an inspection in general,
- covering travel expenses, subsistence allowances and ancillary costs of experts employed by the Office in the course of its investigations to give a professional opinion on a specific matter,
- covering the costs of conferences, congresses and meetings that the Office organises in its anti-fraud work.

CHAPTER O6 02 — SPECIFIC ACTIVITIES (cont'd)

O6 02 02 (cont'd)

The Office's external information and communication strategy is central to its work. The Office was set up as an independent investigative body and must therefore have its own communications strategy. The Office's work is often too technical to be immediately comprehensible to the general public. The Office has to inform its interlocutors and the public as a whole of its role and tasks. Public perception of the Office's work is of paramount importance.

As a Commission service, the Office also needs to take account of the democratic deficit existing between the Union institutions and the citizens of Europe. The Commission has recognised this deficit and drawn up an action plan to address it.

The communications strategy that the Office has developed and continues to implement must demonstrate the Office's independence.

The aim of this pilot project is to:

- study and establish procedures for monitoring, preparing and controlling the consequences of drought on soil productivity, measures for natural restoration and water resilience and the mitigation of these effects;
- compare existing experiences, experimentally apply different methods in at least three different case studies and develop a best practice guide to be made available to Member States.

Remarks

This pilot project aims to develop a system, which integrates existing European datasets and services and allows for near real-time prediction and monitoring of harmful algal blooms (HABs) in aquatic environments.

A data management module and a distributed computing network allow for efficient data processing, ensuring automatic integration of relevant data from existing databases, e.g. EEA, EMODnet, and services, e.g. CMEMS, C3S. Furthermore, the system will allow for assimilation of in-situ measurements.

Data analysis, a prediction module and anomaly detection algorithms coupled with machine learning solutions enable near real-time detection of the occurrence of HABs and rapid prediction of their spatial and temporal evolution.

CHAPTER PP 01 — RESEARCH AND INNOVATION *(cont'd)*

PP 01 25 *(cont'd)*

PP 01 25 02 *(cont'd)*

Additional R&D efforts could target innovative HAB data collection and monitoring solutions. AI-based tools enable identification of regions with high predictions uncertainty, which should be prioritised for monitoring. Incorporation of unmanned vehicles and sensors within the system supports the prediction process and validation by providing high-resolution imagery and high frequency in situ measurements, respectively.

An expected Technology Readiness Level 4 (TRL 4) of the system will be assessed by demonstrating the predictive and analytic capabilities of the system in retrospective mode. Afterwards, the system's performance will be tested during a 6-month period in relevant environment in selected regions within Members State, aiming for TRL 6.

Additionally to what was done in the HAB-Hub Stage 1, HAB-Hub Stage 2 will add new functionalities and eventually expanding to include further monitored areas, particularly those with other characteristics. The aim of the pilot project is to test new concepts and verify them in the pilot instance. In particular, the following tasks should be carried out as part of the pilot project:

- the prediction and simulation of changes and developing the implementation of AI algorithms.
- extensive analysis, including statistical analysis with the aim of identifying areas potentially at risk and indicating areas for obtaining additional data (measurements).
- the putting in place of an alert system for the early warning of hazards.
- the putting in place of a system of early identification of potential threats in areas of increased risk, involving the special monitoring of such areas, implementation of both automatic and manual solutions for additional ones, including "on-demand", and data acquisition (e.g. using drones, robots).
- the monitoring and analysis of small waters (rivers, lakes)
- the preparation of data supply mechanisms by all interested parties, including volunteers (citizen science)
- building an archive available to all interested institutions and citizens.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Hyperloop is currently the only potential transport mode under development allowing the transport of passengers and goods with low energy usage and without any pollution (i.e. GHG emissions and noise). In order for the trans-European transport network to keep up with innovative technological developments and deployments, sustainable emerging technologies that enhance and ease the transport and mobility of passengers and freight should be encouraged. At various test sites the technical feasibility has been largely demonstrated. The next step is to show that the technology is suitable to guarantee a high level of safety and comfort for passengers, which is crucial to ensure public acceptance and to address future transportation needs.

The Union has already made substantial investments in hyperloop R&D, but now we enter the next phase of developing safety standards for which there is no specific mandate or experience. This could be the final hurdle before actual deployment becomes possible. Therefore, the specific objective of this pilot project is to demonstrate that passengers can be safely transported and evacuated in the event of incidents through further research and testing, which in turn can contribute to the development of Union safety standards. In this way lessons can be learned, which could contribute to the development of concrete Union safety standards. In turn, this has the potential to create the basis for a new European transport mode.

p.m.	275 000	750 000	187 500	

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

There exists no comprehensive, digitised and dynamic timetable for rail journeys across the Union. This pilot project should conduct a feasibility study to assess whether and how such a system could be established and made public. Cross-border rail travel in particular is at times difficult to navigate, with problems surrounding ticketing and information besides others, such as scheduling coordination.

Currently, individual infrastructure managers define timetables including cross-border routes and this information is available to the public, but is generally not provided in an interoperable and standardised way or compiled. There is no centralised online availability of such aggregated information, which limits the rail sector integration. Overcoming past reluctance to share data, thereby gradually moving towards a permanent dynamic system in terms of, inter alia, timetables and real-time train running and train forecast information, ticket fares, would be a practical way to enable the culmination of the Single European Railway Area, to the benefit of all the stakeholders and most importantly of passengers. In order to ensure the integration of data at Union level from National Access Points (NAPs) established by Member States under Commission Delegated Regulation (EU) 2017/1926 (MMTIS Regulation) and ensure its quality for cross-border services in particular, this Pilot Project should look at synergies with existing projects and should allow for the re-use of information from existing systems established at sector level. To that end, there should be a transition from fee-based sector databases to a publicly available database.

Hence, in order to create a tool for passengers and operators alike, such a system should be established by the Commission, with appropriate support from the European Union Agency for Railways (ERA) . Ultimately, it would also help with digital platforms aiming to provide prospective travellers with information on the most direct routes, timing and so on. Eventually, pricing could be also added by these operators and platforms, as well as further elements within the logic of multimodal digital mobility services, once this common digital dynamic timetable is put in place.

Having such real-time information on train running and train forecast in a comprehensive and integrated manner with planned timetable information is therefore an enabler of all these services of high added value for passengers, as well as operators and infrastructure managers themselves, hence helping with efforts to promote multimodal travel in line with the Commission's Sustainable and Smart Mobility Strategy.

The Pilot Project should build on the efficient implementation of already existing legal obligations under MMTIS Regulation and the TSIs for telematics applications under the Rail Interoperability Directive (EU) 2016/797. Furthermore, it should provide for an appropriate mechanism for future maintenance ensuring a robust and resilient system.

PP 02 25 03 Pilot project — Empowering Truck Drivers - Revolutionising European Logistics

Commitments	Payments	Commitments	Payments	
p.m.	450 000	600 000	150 000	

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Context/Problem:

There are three million truck drivers in Europe, moving 75 % Europe's total freight volume carried by land. Despite multiple European regulations to improve industry standards and working conditions, including remuneration, the sector is not able to attract more professionals and it faces a critical shortage of workers. With 380 000-425 000 unfilled positions in 2021 and an aging workforce, this shortage is projected to reach 745 000 by 2028. The shortage is attributed to difficult working conditions, long periods spent away from home, long waiting times at loading and unloading points, poor quality parking areas, lack of resting facilities, no access to or low quality of sanitary facilities on the road and at loading and /unloading sites, and a negative image of the industry. In addition, the lack of professional recognition and of respect for professional drivers combined with the weak career development opportunities and lack of support discourages young people (making up only 7 % of truck drivers) and women (making up only 3,2 % of truck drivers) from entering the sector. Current regulatory and soft measures to improve working conditions and address the shortage have proven insufficient, necessitating an innovative approach. Truck drivers can themselves contribute to improving their working conditions and job attractiveness if they are empowered to do so and are provided with the right tools.

Solution:

The pilot project aims to provide such tool to truck drivers, in the form of a mobile app in which drivers would rate important points on their route, places where they do work other than driving, where they use various services or take a rest. The aim of such an app is to improve the working conditions and public perception of the trucking profession by leveraging driver feedback to rate and rank points of interest along trucking routes. To achieve this, the app should be designed to incentivise positive change within the industry.

The rating could cover at least the following categories: (i) waiting time, (ii) accessibility and cleanliness of toilets for truck drivers, (iii) availability and cleanliness of showers for truck drivers, (iv) availability of parking for trucks, (v) staff friendliness, (vi) facilities for female truckdrivers.

The app targets three user groups:

- professional drivers - the primary users who register, provide ratings, and access detailed information of various points of interest (Pols);

CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS *(cont'd)*

PP 02 25 *(cont'd)*

PP 02 25 03 *(cont'd)*

- administrators of PoIs – those who manage PoI profiles, update information, e.g., opening hours, type of facilities, site maps, internal rules, and address negative feedback to improve their ranking;
- other users, such as warehouse workers, dispatchers, and other industry stakeholders who can access general information and comment on ratings.

The app should have a user-friendly interface, including simple design, large icons, and multi-language support to cater to a diverse driver population. Rating system should be based on clear criteria with visual aids, e.g., sliders, icons, to facilitate quick and intuitive assessments. The app should integrate geolocation based on GPS data to suggest and verify PoI locations, simplifying the rating process. The app should also allow drivers to provide detailed feedback by adding written comments and uploading photos to illustrate their ratings. The app should enable future integration with telematics providers to optimise routes and enhance communication between drivers and PoI administrators. PoI profiles should be visible to drivers and industry stakeholders, displaying ratings and driver-generated content. High-ranked PoIs should benefit from increased visibility and potential economic advantages, creating a powerful motivation for businesses to improve their practices and attract more drivers.

Justification for funding:

The pilot project requires an estimated EUR 600 000 for development, maintenance and promotion offering significant return on investment by addressing a critical industry challenge. The basic version of the app could be developed, tested and deployed within 12 months.

The pilot project presents a timely, impactful, and cost-effective solution. By empowering drivers and promoting transparency, this pilot project has the potential to transform the road transport sector and ensure its sustainability.

The objectives of this pilot action are to:

- define criteria for a voluntary ‘European Trusted Drone’ label, which would contribute to the secure use of drones and promote the Union drone industry.
- assess the options to set up a labelling scheme in the Union.

The definition of the criteria and the establishment of the scheme would need to be done in close collaboration with the relevant industry and authority stakeholders. The criteria should meet cybersecurity expectations of authorities, be achievable for drone manufactures and the drones reasonably affordable for the buyers. The scheme should be voluntary and not introduce unnecessary costs for the industry or public authorities.

Depending on the outcome of the pilot project, a follow up action could be considered to support the setting up of such labelling scheme.

OBJECTIVE:

To identify and assess governance gaps in waters surrounding the Union, through a comprehensive Union legal analysis taking into account the United Nations Convention on the Law of the Sea (UNCLOS) and other relevant legal frameworks, guidance, jurisprudence, and best practices concerning rights and obligations, including potential limitations for Member States as coastal states or port states in relation to flag states. The outcome will include a legal brief and recommendations.

BACKGROUND AND RATIONALE:

Maritime transport and traffic **are** critical for the Union, both as an independent mode of transport and for trade: over 80 % of Union imports and exports of goods are carried by sea. It plays an increasingly strategic role in environmental sustainability, military mobility, and the security and resilience of supply chains.

CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS (*cont'd*)PP 02 26 (*cont'd*)PP 02 26 01 (*cont'd*)

Given its international nature, maritime transport is primarily governed by international law. However, the current geopolitical context in various regions of the world has revealed potential governance gaps, particularly regarding the balance of legal rights and obligations incumbent on flag, port and coastal States under UNCLOS. These gaps question the effectiveness of existing enforcement mechanisms in addressing significant risks such as unlawful maritime or trade activities (e.g. the circumvention of sanctions), abuse of the principle of innocent passage and broader geopolitical tensions.

A key emerging threat is the growing presence of the so-called 'dark' or 'shadow' fleet, which heightens maritime safety risks. Acts of sabotage against critical infrastructure further underscore the need for stronger governance frameworks and enforcement capacity. This initiative aims to assess and recommend legal measures to strengthen maritime safety, security and Union strategic interest, by improving monitoring, surveillance, compliance, enforcement and information-sharing at national, Union and international levels.

This **pilot project** supports DG MOVE's mandate to enhance maritime safety, security, sustainability and situational awareness at sea. It focuses on identifying legal and operational gaps that affect the Union's capacity to monitor, assess, enforce and respond to maritime threats, particularly in international waters surrounding the Union. While building on existing tools such as Directive 2002/59/EC on vessel traffic monitoring and information systems (VTMIS Directive), the pilot project will examine how broader regulatory, information-sharing and cooperation mechanisms could be adapted or expanded to enable more effective maritime oversight, enforcement, and coordinated Union responses to evolving geopolitical and security challenges.

SCOPE OF THE PILOT PROJECT:

1. Mapping Governance Gaps:

- the identification of key legal, institutional, and operational gaps in the governance of waters surrounding the Union, focusing on UNCLOS, alongside existing Union law and instruments as well as relevant international conventions;
- the analysis of the relevant provisions of UNCLOS and other applicable frameworks to determine the Union and Member State legal rights and obligations as coastal or port states within different maritime zones, particularly in relation to non-compliant or bad-faith flag states;
- an examination of legal possibilities and constraints for the Union and its Member States to take enforcement action, including against non-compliant actors operating beyond Union jurisdiction.

2. Development of a Union Legal Action Plan:

- to assess the above-mentioned governance gaps and propose legal options and recommendations to address them, ensuring consistency with UNCLOS and other relevant international and Union legal frameworks, and considering best practices from Member States and international bodies.
- to identify mechanisms to strengthen the legal framework supporting Union-level coordination and enforcement in international waters, including enhanced maritime surveillance, information-sharing, transparency measures and mechanisms for coordinated Union-response.

PP 02 26 02 Pilot project — Elimination of the language barrier for seamless cross-border rail operations

Remarks

Despite progress in establishing the Single European Railway Area, bureaucratic hurdles persist at various levels, hindering the full potential and efficiency of rail transport. These obstacles make cross-border train operations more complex for both freight and passenger services than in other transport modes.

A major challenge continues to be the requirement for train drivers to demonstrate at least a B1-level proficiency in the languages of the countries in which they are operating. This complicates seamless cross-border operations and often results in additional stops at borders to switch train drivers.

For this reason, this pilot project aims to support the development and testing of pan-European language tools - particularly AI-based technologies - to break down language barriers. The purpose of this tool is to facilitate operating communication between train drivers and signallers, thereby enhancing efficiency in cross-border rail operations.

In addition, this pilot project will propose requirements for digital solutions supporting the driver-signaller communication. This pilot project may also support digital solutions for communication between operators (IM-IM, IM-RU, RU-RU) in accordance with the Technical Specifications for Interoperability for Telematics Applications (TAP and TAF TSI), which will eventually be replaced by the Telematics TSI.

The proposed scope of this pilot project is the entire Union, focusing on cross-border rail connecting countries with different language requirements. This project will support the development and implementation of cross-border TEN-T railway infrastructure projects, such as the flagship project of the Brenner Base Tunnel, scheduled to open in 2032, connecting Austria and Italy.

This pilot project will begin with a comprehensive assessment of the needs, demands, and challenges faced by all relevant stakeholders for both passenger and freight rail services and establish a detailed list of issues, which will then be examined to identify and develop effective solutions addressing the language barrier and the lack of a TSI-compatible interpretation system of operating communication. This common framework will be used to test new digital communication solutions in real cross-border rail operations, possibly on the route between Munich and Verona via the Brenner. To help improve rail operations across Europe, the method and test results will be clearly documented. Crucially, the pilot project will consider the results of Rail Net Europe's language programme and other activities related to digital communication in railway operations.

CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS *(cont'd)*

PP 02 26 *(cont'd)*

PP 02 26 02 *(cont'd)*

The overarching goal of this pilot project is to contribute to a truly borderless Single European Railway Area. This pilot project should serve as a model for improving interoperability in rail transport by addressing one of the most persistent challenges: the language barrier in cross-border operations. Its aim is to enable broader Union-wide implementation of digital operating communication and foster a more integrated rail network.

Remarks

Communication cables connect several Member States to one another, link islands to the Union mainland, and connect the Union to the rest of the world, carrying 99 % of inter-continental internet traffic. Subsea electricity cables facilitate the integration of Member States' electricity markets, strengthen their security of supply, and deliver offshore renewable energy to the mainland.

There are increasing concerns among European governments over the incidents affecting submarine cables. Europe is currently on high alert after a series of outages to cables and pipelines. In February 2025, President von der Leyen introduced the Joint Communication to strengthen the security and resilience of submarine cables. The main message is that the security of the Union's submarine cable infrastructure must be significantly enhanced. The Joint communication presents strong actions in a whole resilience cycle approach: prevent, detect, respond and repair, and deter.

Today in the Union there is no capacity to effectively monitor all the dimensions of the threats surrounding submarine cables and create a single and integrated situational picture at sea basin level. When an incident occurs, the Union must increase its capacity to respond in a coordinated way and in solidarity with the Member State most affected. To be able to issue early alerts, it is essential to make several systems work together, fusing data available at Union and national level.

This pilot project would assess the feasibility of setting up a platform for communication and early warning mechanism among the Member States to coordinate through the whole resilience cycle. It would also explore and test concepts such as coordination models, detection approaches, or response mechanisms through a range of preparatory and exploratory activities with an aim for Member States to enhance the security of undersea cables.

The pilot project of Regional Cable hubs should include the following elements: meaningfully map existing capacities, identify technology or cooperation needs, outline possible governance models, or explore cost and procurement modalities, including in areas such as surveillance tools, incident-reporting mechanisms, partnerships with private or defence actors, or coordination platforms.

Given the fact that the cyber-attacks, including on the critical undersea infrastructure will continue into the future, it is important to explore a more coordinated response. At this initial stage, the pilot project would fund testing of concepts such as coordination models, detection approaches, or response mechanisms through a range of preparatory and exploratory activities focused on setting up a structured communication and response platform for Regional Cable hubs - one per sea basin.

In order to operationalise the power of the Digital Services Act (DSA), a single interface, in the form of a chatbot, will give users the power to understand their rights and obligations, as well the best methodology to communicate with and, where necessary, report intermediaries, as well as to retrieve information from the various transparency databases created by the DSA. It would also serve as a valuable tool for collecting data, to allow disinformation campaigns to be identified and neutralised more quickly.

Like many other parts of the Union Acquis, the DSA provides comprehensive rights to users, such as individuals and businesses. The DSA accords these rights in relation to online intermediaries in general, with additional obligations for very large online platforms and search engines (VLOPs and VLOSEs). These rights include the right to report third-party content, to receive a statement of reasons when restrictions are imposed on their own content, as well as a right to be protected from systemic risks caused by VLOPs and VLOSEs.

The fight against disinformation, where the content is usually not usually illegal, is particularly challenging. Recipients of the service need support in understanding what should be reported and how. Policy-makers and regulators need data quickly on trends, such as voter suppression during election periods or failures of content moderation in particular languages.

An AI-powered chatbot would help users to:

- assess if the content they are reporting is a breach of the intermediary's rules or of Union law;
- formulate a complaint about breaches of the law or terms of service in a way that is most understandable for the intermediary;
- escalate their complaint if the intermediary's response is not satisfactory.

For NGOs in the anti-disinformation community and regulators, data would be generated on:

- how many complaints were made;
- how quickly they were actioned;
- patterns that could help identify foreign or coordinated campaigns;
- particular types of campaigns, such as voter suppression.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Natural hydrogen, also known as white or geological hydrogen is a valuable clean energy resource naturally occurring in underground reservoirs. Unlike any other category of hydrogen currently on the market, natural hydrogen require very limited energy to be produced and could be sustainably extracted from the ground.

It is produced 24/7, requires no storage and it has a production cost in the range of EUR 0,5-1 which would make it the most competitive hydrogen in the market. It has the lowest footprint of any source of hydrogen and no fresh water is required. Natural hydrogen can revolutionise the clean energy transition. There are over 1 million tonnes of recoverable volume just in one single structure found in Aragón, Northern Spain that would satisfy 10% of Spain's current usage for more than 20 years.

In terms of regulatory framework, only France, since 2022, and Poland, since October 2023 have legislation in place for natural hydrogen in the Union with Spain currently working on it. Mali, Australia and the USA are leading the development of natural hydrogen projects worldwide with a milestone, USD 91m invested by Bill Gates in the company Koloma to drill for carbon-free hydrogen that is continuously generated underground.

Most energy agencies worldwide now recognised the importance of natural hydrogen and its potential role in the future energy mix. The International Energy Agency (IEA) is currently working on a TID (Task In Definition) in natural hydrogen to accelerate its development. The IAE's latest report related to hydrogen production published in 2023 (Global Hydrogen Review, September 2023) included natural hydrogen for the first time. It acknowledges two projects in Europe.

In the USA, the Advanced Research Projects Agency–Energy (ARPA-E) has provided financing of USD 20 million to two initiatives focused on Low-Cost, Low-Greenhouse Gas Emissions Hydrogen Production.

COMMISSION
PILOT PROJECTSCHAPTER PP 03 — SINGLE MARKET *(cont'd)*PP 03 25 *(cont'd)*PP 03 25 02 *(cont'd)*

The natural hydrogen economy is opening new sustainable commercial opportunities for the traditional oil and gas companies aiming to decarbonise their portfolio of projects and shift to new sustainable projects. Natural hydrogen should be part of the energy mix, replicating and scaling up successful business models and methodology in the Union, accelerating the development of interregional investments, and reinforcing cohesion.

Natural hydrogen will contribute to innovation in rural and remote areas where the reservoirs of natural hydrogen are placed, building and putting new industrial and economic ecosystems in the Union that are non-existent at the moment and reinforcing repopulation with high skills professionals.

Natural hydrogen can revolutionise the transition to clean energy. The earth continuously generates hydrogen and can form significant subsurface accumulations as a natural process without consuming fresh water. Consequently, natural hydrogen has the lowest carbon footprint, with 50 times lower CO₂ than grey hydrogen, which currently provides over 95% of the world's natural hydrogen and can complement the low-carbon industrial production of hydrogen and contribute to securing the energy supply and avoiding the supply's intermittency.

Its potential is already scientifically demonstrated with limited commercial demonstrations existing in Mali, and Australia. European public support is needed to define an appropriate regulatory framework in the Union, identified resources and implement pilots in European countries where substantial resources occur. There is a need to determine how natural hydrogen existing in the Union could contribute to the European Hydrogen Strategy and European energy mix.

Furthermore, developing a natural hydrogen economy will empower a new generation of high skilled professionals wholly aligned with the Commission's Green Skills Programme (European Climate Pact), where climate action is already providing the jobs and opportunities of the future. A natural hydrogen-based economy in Europe will contribute to the generation of highly skilled employment and the transformation of the oil and gas industry workforce to a new generation of Green Deal workforce.

Europe is considered a promising continent for discovering natural hydrogen deposits. Natural hydrogen reservoirs have been identified in Spain, France, Poland, Hungary, Germany, Ukraine and Albania. A recent research targeting various countries worldwide suggests the presence of multiple viable plays and cost-effective exploitable production sites available within several Member States.

The development and utilisation of natural hydrogen reserves present a unique opportunity to accelerate the energy transition and hydrogen supply supporting Europe's sovereignty and security.

By capitalising on the estimated abundance of natural hydrogen within Europe's geological formations, the Union could enhance its energy security, reduce emissions, and pave the way for a cleaner and more sustainable future for European citizens and industry.

For regions with natural hydrogen locations, the accessibility of competitive hydrogen will accelerate the attraction of new industrial investment with greenfield projects. Therefore, proper identification, mapping and production at a commercial scale will be an excellent opportunity to develop an innovative European ecosystem involving multiple regions where natural hydrogen is located and where the gas industry and research are relevant.

Remarks

This pilot project will offer financial support to public authorities, primarily local authorities, introducing AI-based systems, or exceptionally systems based on other digital technologies, to manage the new requirements for streamlined permitting under the Net-Zero Industry Act. The support will consist of both direct financial support and mutual learning by involved authorities to manage the back-end work needed for permitting. There will be a particular focus on Net-Zero Acceleration Valleys in coal regions in transition and environmental aspects of permits.

As a second phase to this project, the appropriations allocated under the 2026 budget will be used to top-up projects selected under the first phase launched under the 2025 budget. This top-up will primarily be used, where necessary and appropriate, to further involve regional and national authorities in the pilot project to ensure that all authorities involved in permitting within the Valleys align their digital infrastructure and increase interoperability. A secondary use of the top-up may be to make a larger budget available for the development and acquisition of the AI-based systems where the original budget appears to have been too low. A small part of the top-up may be used to facilitate interaction and sharing good practices between participating projects and promoting the results to other countries.

Remarks

This pilot project aims to establish a European Award for Sustainable Tourism Management, recognising destinations that have successfully implemented innovative governance models and management practices based on evidence-based decision-making. The award highlights excellence in addressing the environmental, economic, and social dimensions of sustainability, specifically emphasising effective responses to overtourism, seasonality, climate change, and shifting tourism trends.

COMMISSION
PILOT PROJECTSCHAPTER PP 03 — SINGLE MARKET *(cont'd)*PP 03 26 *(cont'd)*PP 03 26 01 *(cont'd)*

The pilot project involves creating clear, evidence-centric evaluation criteria, carrying out a comprehensive communication campaign, and establishing an expert jury for assessing nominated destinations. This pilot project is aligned with the European Capital and Green Pioneer of Smart Tourism (ECOSTA) annual awards but offers a novel element in highlighting the importance of governance. A single European winner is going to be selected among the participants to the ECOSTA initiative, and a special prize will be awarded by the Parliament to a destination showing outstanding achievements in adopting governance models (strategic planning, measuring and monitoring sustainability, use of indicators and standards, evidence based governance, involvement of local communities, innovative procedures, organisational and institutional framework), beyond tourism management. This award would serve as an incentive for destinations to strengthen their governance practices and would spotlight those demonstrating exceptional achievements in this area. The award will be given to sustainable destinations at the local or regional level, thereby encouraging and promoting balanced regional development. The winners will be celebrated in an award ceremony hosted by the Parliament, promoting the Parliament's active role in sustainable tourism. The Commission is encouraged to ensure the pilot project's sustainability beyond initial funding and implement it to foster implementation of Transition Pathway for Tourism and promote policies.

The special prize will be awarded in parallel with the ECOSTA awards and announced according to the same timeline. The pilot will run for two years, starting in 2026, covering the selection of the 2028 and 2029 winners. This coordination will allow for shared processes and optimised dissemination opportunities.

Eligibility Criteria:

1. Evidence Based Destination Management:

— Use of Data:

The destination must demonstrate how it uses collected and analysed data for decision-making, which may include developing strategies to reduce CO₂ emissions, improve waste management, support the local economy, preserve cultural heritage, etc.

— Collaborative Governance Model:

The destination must demonstrate how it includes various stakeholders in the process of data collection, usage, and decision-making - such as local communities, tourism organisations, research institutions, and other relevant actors.

2. Environmental Criteria:

— CO₂ Emission Reduction:

The destination must show concrete measures for reducing carbon dioxide emissions, including the use of renewable energy sources and implementation of energy-efficient technologies.

— Preservation of Natural Resources:

The destination must have programs for conserving water, soil, and biodiversity, including the protection of natural habitats and ecosystems.

— Waste Management:

The destination must have systems in place for recycling and waste reduction, including programs for reducing plastic and other measures that contribute to lowering tourism's ecological footprint.

CHAPTER PP 03 — SINGLE MARKET (*cont'd*)PP 03 26 (*cont'd*)PP 03 26 01 (*cont'd*)

3. Economic Criteria:

— Support for the Local Economy:

The destination must demonstrate how it supports local entrepreneurs and the economy, including the use of local products and services.

— Sustainable Development:

The destination must have sustainable development strategies that include long-term plans for economic growth without harming the environment and society.

4. Social Criteria:

— Culture and Tradition:

The destination must preserve and promote local culture and tradition, including support for cultural events and preservation of cultural heritage.

— Support for Local Population:

The destination must demonstrate that tourism does not negatively impact the lives of local residents, including satisfaction with tourism development in the area.

The budget involved in designing this award will cover:

- defining the brand for the special prize;
- defining the exact selection and award criteria;
- contracting the independent experts to evaluate applications and offer a shortlist to the European Jury;
- designing and producing the trophy for the 2028 and 2029 winners;
- supporting the winners as part of the prize (winners are offered 12 months of public relations and communication support by a specialised international public relations agency to increase the visibility of their destination and of the award);
- covering all reimbursable expenses for the winners related to travelling, participating to trade fairs, international events, workshops, award ceremony, press trips as part of the award.

Note: The budget of this pilot project will not be used to cover the organisation of the award ceremony hosted by Parliament.

Remarks

The aim of the pilot project is to assess the viability of a novel programme to fund initiatives that specifically empower citizens to improve their capacity to make sound judgments on investment (to be ‘investment-savvy’). This aligns with the Commission’s communication on Savings and Investments Union Strategy of 19th March 2025 (SIU Communication). It seeks to explore novel approaches to address a critical gap that cannot currently be addressed by existing Union programmes. The objective of this pilot project is to develop innovative approaches that extend beyond the scope of the current Single Market Programme, Erasmus+, and the European Social Fund+, and to test the feasibility and usefulness of such approaches which could be further developed through an extension or revision of these programmes under the next MFF.

The pilot project would fill a gap by targeting the improvement of the investment capabilities of Union citizens, thereby focusing on enhancing the investment ‘savviness’ of the general population and increasing retail participation in capital markets. No existing Union programmes specifically focus on increasing the participation of Union citizens in capital markets and ensuring that those who wish to participate are empowered to make sound and informed decisions.

- Erasmus+ focuses on improving education and cooperation in educational matters, including lifelong learning and youth engagement. Although Erasmus+ supports educational initiatives, it does not target financial literacy related to investment skills. Its broad educational agenda lacks a specialised focus on equipping citizens with the knowledge and skills required to navigate and invest in capital markets confidently.
- The European Social Fund+ aims to promote social inclusion and supports vulnerable groups such as low-income and unemployed individuals. While ESF+ addresses social and economic inclusion, it does not provide for targeted initiatives for developing investment savviness among the general population. Its focus on social support and employment does not extend to fostering an understanding of investment products or the benefits of participating in capital markets.
- Finally, the SMP primarily addresses consumer education, ensuring that citizens are informed about their rights and responsibilities as consumers of financial services. While the SMP fosters consumer awareness, it does not aim to enhance citizens’ capabilities to actively participate in capital markets as investors.

This pilot project is uniquely positioned to fill the gap by offering targeted awareness-raising and guidance on investment literacy. Unlike existing programmes, it focuses on enhancing citizens’ understanding of investment opportunities, risks, and benefits, promoting active participation in capital markets. It would focus on issues such as the costs and performance of financial products, guidance and the role of intermediaries.

The pilot project would also test innovative ways to explain the risks and rewards of investing (including financial risks, scams and fraud, etc) and thereby encourage consumers to invest responsibly and participate in capital markets taking into consideration the complexity and increased digitalisation of financial markets and products (e.g. crypto assets, non-fungible tokens, etc).

CHAPTER PP 03 — SINGLE MARKET (cont'd)

PP 03 26 (cont'd)

PP 03 26 02 (cont'd)

The pilot project would target specific national contexts, and therefore not mandate transnational cooperation, thereby going beyond the scope of other Commission programmes such as ESF + and Erasmus + (including its social innovation track 'EASI').

In addition to directly supporting the improvement of investment financial literacy, the pilot project could also test ways to increase the impact of organisations working towards the protection of retail investors, including consumer organisations, investors or shareholder associations, or financial authorities.

The innovative approach could be ensured by the following initiatives:

- 1. Investment awareness-raising and guidance:
 - developing tailored educational programmes, initiatives and websites focusing on investment knowledge, including basic financial products, the role of intermediaries, and understanding risks and rewards associated with investments;
 - emphasising digital financial products like crypto assets and non-fungible tokens to adapt to the increasingly digital landscape of financial markets.
- 2. Investment literacy ambassadors:
 - establishing and maintaining a network of well-qualified 'investment literacy ambassadors' across all 27 Member States; these public figures would advocate for investment literacy, and engage with the public through various channels, including mainstream media (TV, radio, newspapers, etc.);
 - supporting ambassadors with resources to cover their pro bono work, including communication and awareness-raising activities, such the preparation of thematic materials on investment literacy and awareness used in their advocacy work.
- 3. Community engagement
 - encouraging collaboration with and support for Member State authorities, municipalities consumer organisations, as well as employer and worker representatives to ensure tailored investment literacy and awareness programmes and investment guidance; this would exclude transnational requirements to focus on localised impact and relevance.

Geospatial and location information are crucial for informed social, economic, and environmental decision-making. There is a set of core reference geospatial data from official sources which are primary datasets. These cannot be derived from other datasets and are important because they support information across all themes and domains. The European Strategy for Data and the Common European Data Spaces are forming an interconnected single market for data, and all the sectorial data spaces being developed, (e.g. health, environment, agriculture, energy, transport, security, emergency services, the SDGs), need to be underpinned by core geospatial data.

Member States, through their national mapping, cadastral and land registry authorities, are mandated to collect and maintain trusted and accurate national core reference geospatial information. This is crucial for developing tools and services to support public policies, common data spaces and the digital transition in Europe. Coordinating relevant policies is key to delivering core geospatial data at European level. Seamless, harmonised, compatible and interoperable datasets are an effective use and reuse of public sector information for the benefit of the Union and its citizens.

COMMISSION
PILOT PROJECTS

CHAPTER PP 04 — SPACE (cont'd)

PP 04 25 (cont'd)

PP 04 25 01 (cont'd)

Although geospatial and location information are crucial for a wide range of policies, including the EU's Digital Decade and Green Deal, the management of geospatial, especially core reference geospatial data, is fragmented and scattered across various directives, rules and regulations. These include INSPIRE, Open Data and PSI Directive, Green Deal package, and the new GreenData4All initiative. As well as across various Directorates-General and Agencies, such as DG-Environment, DG-Connect, EEA, and Eurostat.

This fragmentation and lack of a single body within the Commission responsible for geospatial policy and data, causes challenges and obstacles, preventing the Union and its citizens from maximising the benefits from geospatial data collected from official sources.

To address these issues, this project proposes a study that would analyse and recommend how the Commission can ensure an effective and harmonised policy for core reference geospatial information from official sources across the Union.

The main objectives of this study are to:

- research the existing (and planned) policy frameworks, directives, rules and regulations which impact/include core reference geospatial data from official sources;
- conduct a study amongst the well-established community of national (public sector) producers of core reference geospatial data, to understand the gaps in existing European legislation that currently fails to effectively address core geospatial data from official sources;
- highlight the challenges, barriers and obstacles in current policies that are blocking effective and harmonised management of geospatial information from official sources across the Union;
- clearly demonstrate the benefits of a harmonised geospatial policy framework for core reference geospatial information, and how this links with the Europe's digital future;
- develop a road map towards developing comprehensive governance for core geospatial data from official sources.

CHAPTER PP 04 — SPACE (*cont'd*)PP 04 25 (*cont'd*)PP 04 25 02 (*cont'd*)

Fisheries control operations are implemented by Member States with the support of DG-MARE and EFCA (European Fisheries Control Agency). DG-DEFIS together with EUSPA (the European Union Agency for the Space Programme) is analysing the use cases where EU Space Data can contribute to fisheries control activities, under the umbrella of a memorandum of understanding with EFCA.

Two main use cases have been identified:

- the use of Galileo and Copernicus services for fishing vessels monitoring. Positions reported by vessels will be authenticated with data provided by Galileo data. Copernicus images will be used to verify the data in the area and time of coverage;
- the use of Galileo and Copernicus services for patrolling Unmanned Aerial Systems (UAS or drones).

Images taken by drones will be stamped with time and position authenticated using Galileo data. Copernicus and Galileo services will be used to support the safety case for the drones operations.

The pilot project will be focused on:

- attendance at existing working groups addressing solutions for fishing vessels and drones, including different public/private platforms and interviewing key industrial stakeholders, such as drone operators, fishing vessels associations, and relevant Maritime and Aviation authorities for search and rescue;
- the consolidation of the user requirements and definition of equipment for fishing vessels and patrolling drones;
- the consolidation of concept of operations and positioning performance and authentication needs for fisheries control;
- the identification of the main challenges to be overcome to ensure safe operation and resilient positioning;
- the identification and analysis of the technical and regulatory barriers (e.g. lack of standards and regulation), industry value chain and new business models that could emerge;
- the identification of the possible actions at Member State, regional and local level to boost business development, and support SMEs to deliver EU Space based solutions to provide solutions for the Union's fishing fleet;
- the prototyping of onboard equipment that uses Galileo signals to address the main needs not covered so far by existing equipment, with focus on the use of Galileo authentication services;
- the implementation of several demonstrations for fishing vessels and patrolling drones, involving different Member States. The aim is to demonstrate feasibility and added value for the sector, validating the operational concept with the participation of Aviation and Maritime users and competent authorities from different countries. The drones and vessels in the demonstration will use Galileo authentication service and the specific messages encoded;
- contributing to draft new standards defining minimum operational requirements for GNSS and VMS position information in fishing vessels and the necessary tests required to verify the performance compliance in support of future regulatory initiatives in Europe.

Figures (Differentiated appropriations)

Remarks

The European Union Search and Rescue (SAR)/Galileo service, a major contributor to the worldwide public SAR service Cospas-Sarsat, has a long track record of success in detecting and locating people in distress. However, the rise of private companies who offer or may offer private emergency alerting notifications poses both challenges and opportunities for SAR/Galileo and the Cospas-Sarsat system.

The current geopolitical context and the management structure of Cospas-Sarsat (USA, CAN, RUS, FR) highlight the need to explore new approaches and broaden the perspective on SAR/Galileo services. Private companies are increasingly interfacing with Rescue Coordination Centres (RCCs), which are often public entities or non-profit organizations, to provide alerting services. However, this multiplication of inputs generates hurdles for RCCs in managing these alerts, underscoring the necessity of a more coordinated approach. Moreover, private actors may not offer long-term stability, as they can be shut down for economic or political reasons, which could compromise the continuity or quality/efficiency of SAR services.

In response to these evolution trends, the Commission should propose an evolutive approach to SAR services. Firstly, it will maintain its commitment to Cospas-Sarsat at the current level, ensuring legacy support while introducing new features like Remote Beacon Activation (RBA), Two Way Communication (TWC), etc. in a complementary (to Cospas-Sarsat) set-up. This approach would enable the Union to continue supporting the existing Cospas-Sarsat system while avoiding significant investments needed to promote and standardise evolutions within the Cospas-Sarsat system.

In parallel, the Commission should explore new concepts for a truly European Search and Rescue service, in collaboration with the Member States (and states associated to the Galileo program). This service would be global in scope and could incorporate new features, such as enhanced multilateral (many to many) communication channels, improved distress detection and localization, and expanded user segments.

By developing a comprehensive EU SAR ecosystem, building on existing Union initiatives and programs such as SAR/Galileo and SafeSeaNet, the Union can facilitate the seamless integration of diverse emergency notification services, striking a balance between cooperation with private actors and the exploration of innovative solutions. This endeavour aims to benefit Union citizens and SAR responders, ultimately saving lives and reducing the impact of crises.

The Union should also foster a culture of collaboration by sharing its new SAR services with reliable, like-minded international partners, to ensure a coordinated and effective global SAR response.

Remarks

Radio Frequency Interference (RFI) affecting Global Navigation Satellite Systems (GNSS), such as Galileo, is a growing concern that impacts daily operations in critical infrastructures and services, including civil aviation. The increasing reliance on GNSS for positioning, navigation, and timing (PNT) applications has created a need for effective RFI monitoring and mitigation strategies. An EU GNSS Radio Frequency Interference Monitoring Service has been called by the Internal Security Strategy (ISS) and the Preparedness Union Strategy (PUS).

The primary objective of this pilot project is to design and develop a prototype that integrates and analyses Radio Frequency Interference (RFI)-related metrics from a diverse range of data sources, including both open-source and commercial datasets. This comprehensive approach will provide a unified view of Global Navigation Satellite Systems (GNSS) interferences across Europe, leveraging data from various sources.

A crucial component of the prototype will be the application of advanced big-data analytics and machine-learning algorithms to fuse and analyse the diverse data streams from multiple sources.

By harnessing the power of big-data and machine-learning, the prototype will provide a robust and scalable framework for RFI monitoring, enabling the development of predictive models and proactive mitigation strategies.

The pilot project will pave the way for the establishment of a comprehensive, Europe-wide RFI monitoring system, enhancing the reliability of critical infrastructures and services that rely on GNSS and, ultimately, contributing to a safer, more secure, and more resilient Union.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

In December 2023, the Commission submitted a revised proposal for a Regulation on Facilitating Cross-border Solutions (COM(2023) 790 final; 2018/0198 (COD)). Negotiations on this proposal are ongoing. The proposal sets out a procedure to facilitate the resolution of cross-border obstacles hampering the establishment or functioning of infrastructure necessary for private or public activities, or any cross-border public service provided that it contributes to economic, social and territorial cohesion in the cross-border territory.

Pursuant to the text of the proposal for a Regulation, Member States may establish one or more cross-border coordination points at national or regional level, or jointly with a neighbouring country or countries. This pilot project proposes to make available a sufficient amount of funds from the Union budget to allow willing Member States to establish cross-border coordination points at national or regional level, or jointly with one or more neighbouring Member States. Depending on the outcome or on the status of negotiations on the proposal for a Regulation, the pilot project could also be used by Member States to finance the creation or maintaining of other coordination structures facilitating cross-border solutions to administrative or legal barriers, in synergy with existing initiatives at Union or national level, such as ‘b-solutions’.

By channelling resources from the Union budget to Member States willing to establish cross-border coordination points or other structures, a fourfold objective could be achieved:

- regardless of the outcome of negotiations on the proposal for a Regulation, the pilot project could support Member States in setting up cross-border coordination points or other coordination structures, with a view to bolster the provision of this new type of joint service to initiators and to foster better cooperation governance. In turn, this would facilitate cross border understanding and enhance cooperation to resolve cross border obstacles;
- in the event of final adoption of the abovementioned proposal for a Regulation, the pilot project would ensure the inflow of funds to Member States willingly deciding to implement parts of the proposal for a Regulation pending its entry into force, or pending the entry into force of some of its provisions;
- in light of the previous indent, this pilot project could provide a reliable estimation of the amount of financing needed for the correct implementation of the proposal for a Regulation, and possibly guide the Commission and the co-legislators on the earmarking of sufficient funds when outlining and negotiating the new Multiannual Financial Framework.

CHAPTER PP 05 — REGIONAL DEVELOPMENT AND COHESION (cont'd)

PP 05 25 (cont'd)

PP 05 25 01 (cont'd)

- should the proposal for a Regulation be adopted and enter into force, this pilot project would decrease administrative burden for public authorities at regional or Member State level, in particular as regards the establishment of cross-border coordination points, or the obligation for Member States and the Commission to store all cross-border files received in a public register.

The tasks of the cross-border coordination points established on a voluntary basis by Member States wishing to draw resources from this pilot project would fall within the meaning of Article 5, paragraphs 1, 2, and 4, of the proposal for a Regulation. In addition, the Member States involved could agree to empower the cross-border coordination point or points to use jointly the cross-border facilitation tool, and namely to start a consultation with competent authorities in the Member States involved when a cross-border obstacle is notified, or to explore the resort of other Union initiatives such as ‘b-solutions’.

Expected Outcome:

Is democracy sustainable in the age of distrust and polarisation sustainable? The rise of hate speech, misinformation and filter bubbles are sowing the seed of discontent and social exclusion. The dynamics seems very much an avalanche impossible to stop, with small but vocal fringe groups injecting extreme views in the public discourse. For that reason, a better prevention and monitoring of extreme online political discourse should be welcomed, while preserving the freedom of speech. This can be done by mapping the current public opinion discourse on social media around salient political issues. By checking the language elected representatives use, we could map the political discourse landscape and see what the most polarising terms and issues are. Using sentiment analysis, we could test whether the language used by elected representatives provokes or attacks other representatives and monitor the extent of smearing campaign in the EP and selected national parliaments. Drawing from that, several EU language versions can be drafted and adapted, so to cover a sample of Member States, perhaps those with larger recorded polarisation.

Scope:

1. Create the machine learning model. APOLLO: Analysis of Political Opinion Language by Learning Online;
2. Train the model in languages different from English (up to 5);
3. Plan a thorough web scrape of main social media (YT comments, X, Instagram, Facebook, TikTok, etc), paying for the scraping when necessary;
4. Run an online survey to collect respondents and identify their political preferences and whether they follow some politicians or public figures on social media, and find those who engage on social media the most. Potentially, field the survey on relevant subReddits dealing with European politics. Reddit could give an interesting insight on fringe communities too, identifying 'superspreaders' of misinformation;

PP 07 25 02 Pilot project — Preparatory work for counselling structures to support mobile migrant labour

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Mobile migrant labour has become a structural segment of the national labour markets in all Member States. It is expected that this phenomenon will continue to grow. Against the background of skills and labour shortages and targeted recruitment policies, there is evidence that the mobility of third-country nationals working temporarily in the Union will also increase. Often active in essential sectors, mobile migrant workers are key to the proper functioning of the internal market. At the same time, however, workers who are posted or take up employment for a short period represent a very vulnerable group of workers and their situation is often precarious. In view of the complexity of transnational labour situations and due to a lack of language skills and knowledge of applicable rules, it is not easy for these workers to enjoy and defend their rights on their own. Precarious working conditions and structural labour exploitation prevent integration into the labour market, undermine future recruitment efforts and fair competition. The European Labour Authority has launched a variety of measures and campaigns to draw attention to particularly affected sectors and employment groups, such as seasonal workers, professional drivers and the growing group of posted third-country nationals. However, the European Labour Authority cannot offer individualised support for those target groups. Trade union-related transnational counselling and support structures targeting mobile migrant labour can therefore make an important contribution to the promotion of fair labour mobility and migration as enshrined in the Union's social acquis and confirmed in the 2024 interinstitutional La Hulp Declaration on the future of the European Pillar of Social Rights. Transnational counselling services not only give individual help to workers, but also provide important insights into the situation of mobile migrant labour in risk sectors, developments in the European labour market and new forms of employment and mobility patterns. Moreover, individual information and counselling of workers are important complements to enforcement activities, such as labour inspections.

CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (cont'd)

PP 07 25 (cont'd)

PP 07 25 02 (cont'd)

The subject of the pilot project is scientific research on the situation of mobile migrant labour and the impact of assisting counselling structures on these target groups. Special focus should be placed on risk sectors such as international road transport, seasonal work in horeca and agriculture, the construction sector and the increasing group of posted third-country nationals. A key element of the study should be the monitoring and evaluation of existing counselling structures in countries of origin and countries of destination. In order to ensure the representativeness of the monitoring and allow for the evaluation to formulate operational recommendations, a significant part of the pilot project will be to run a trade union-related transnational counselling network (at least seven countries in the first year, to be gradually expanded). The network should also include 1-3 candidate countries or other third countries within Europe such as Bosnia-Herzegovina, Albania or Kosovo. Main target groups of the counselling are short-term mobile migrant workers. The counselling centres should be supported in their development, counselling work and transnational networking through coordination. The establishment of new counselling centres is to be supported by targeted capacity building measures.

The scientific study should include country-specific research and interviews with experts at national and Union level on the situation of mobile migrant labour in risk sectors and of posted third-country nationals. As part of the research existing counselling services for the target groups should be identified and (sector-specific) needs for counselling and support determined. Regular exchange with the ELA and representatives of the affected sectors will take place throughout the duration of the pilot project.

The outcome of the pilot project will provide an analysis of the situation and challenges experienced by mobile migrant labour in risk sectors and posted third-country nationals in the European labour market, to be concretely addressed in parallel through the practical implementation and expansion of a transnational counselling network. In addition, an evaluation of the existing counselling services for the target groups and a mapping of the (sector-specific) needs for counselling services will be developed. Based on the findings of the study, recommendations will be formulated for the preparation of a dedicated initiative for the long-term funding and establishment of a European counselling network for mobile migrant labour. The results of the pilot project will be presented and discussed at a final conference at Union level. In order to continuously benefit from the results of the pilot project, interim results will be presented and discussed at a mid-project conference.

COMMISSION
PILOT PROJECTSCHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (*cont'd*)PP 07 25 (*cont'd*)PP 07 25 03 (*cont'd*)

Objective: The pilot project seeks to analyse the potential impact of AI on European labour markets and compare the implications of exposure to AI for different labour market groups. It also seeks to develop a new measure of occupational exposure to AI that takes into account whether occupations are likely to be replaced (automated) or complemented by AI. This measure will be used to compare the implications of AI for different regions, sectors and Member States. Furthermore, it will also be used to study the potential impact of AI on job quality, wages and productivity.

The pilot project will contribute to existing knowledge by developing a novel taxonomy for analysing the potential impacts of AI on labour markets and economies as a whole. Currently, most of the analyses on the impact of AI focus on the United States or subsets of selected countries while comparative EU research is currently missing. Therefore, the pilot project will seek to fill this gap by developing indicators for comparing the impacts of AI across the Member States. Special emphasis will be placed on reproducibility and transferability of the methodology to other potential areas of interest such as greening of occupations. As AI is a rapidly growing technology, the pilot project will also seek to ensure that the indicators can be easily reproduced and updated when new data are released. This would provide a valuable resource for policymakers both at the national and supranational levels.

The rise of AI is one of the most important developments of recent decades with the current policy and academic literature predicting that AI will trigger profound changes in working lives. Therefore, having up-to-date evidence on the labour market impacts of AI technologies is of core importance for effective policy making. The analysis will also feed into European and national policy debates maximising potential gains stemming from the AI revolution while also limiting potential negative impacts for workers and economies.

Scope/Research questions:

Which regions, sectors and Member States are more likely to be exposed to AI?

What are the impacts of AI on the employment opportunities of different labour market subgroups? Which occupations will be automated, and which will be complemented by AI?

What are the potential impacts of AI on working conditions?

What are the potential effects of AI on wages and wage inequality in the Union?

How does exposure to AI affect labour market transitions?

What is the expected impact of AI on labour productivity?

What policies are necessary to address the impacts of AI in terms of inequalities, skills and job quality?

Overall policy relevance

More broadly, AI and especially large language models (LLMs) are fast evolving technologies and will impact large swathes of the European labour markets. Currently, more than 70% of Union employment is in the service sector, which is the sector most likely to be impacted by the advent of LLMs. Therefore, understanding both the individual and the structural implications of these new technologies is of key importance for ensuring a fair and inclusive European economy.

CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (*cont'd*)PP 07 25 (*cont'd*)PP 07 25 03 (*cont'd*)

Added value for wider research community

The pilot project will deliver a novel comparable methodology and taxonomy of exposure to AI that will be made available to the broader policy and academic community. It will also provide new evidence on the potential impact of AI which will inform current and future debates. Aggregate quantitative indicators on exposure to AI based on national and supranational data sources will be made available to the broader research community. Data from the qualitative and experimental analyses will also be made available through case studies and methodological reports.

Project results are expected to contribute to the following outcomes:

- developing a novel taxonomy of AI exposure that is adapted to the Union labour market and allows for comparisons across regions; sectors and Member States;
- providing an updated analysis of AI on occupations including an analysis of different labour market subgroups;
- updating existing methodologies that analyse the impacts of AI and publish reproducible analyses and source code;
- providing an analysis of the expected impacts of AI in terms of inequality and productivity;

Expected impact:

The pilot project will generate novel high-quality knowledge which will be used to inform ongoing policy debates on the impact of AI on European societies. It will also foster the diffusion of knowledge by developing new methodologies, using new techniques for studying AI and publishing open-source code.

Methodology:

The pilot project will rely on a mixed method approach that will leverage information from European datasets (EU-LFS, EWCS, AMECO) as well as national sources. The latter could allow for a finer grained (firm-level) analysis of potential impacts of AI. The starting point of the empirical analysis will be to develop a new taxonomy for occupations that can be impacted by AI using (O*NET data) in conjunction with novel approaches that distinguish between jobs at risk of being automated or complemented by AI. The measure of exposure to AI will combine current approaches in the literature that use the O*NET database to measure the correspondence between AI and human skills with information on the social content of and skills required in occupations. This will contribute to a more fine-grained understanding of the potential impact of AI on the labour market. In addition, the analysis will be complemented by case studies focusing on the impact of selected AI technologies on job quality and productivity. The pilot project will also use online experiments to isolate the potential productivity effects brought about by the use of different AI technologies.

Outline of timeline:

The total project duration will be 3 years and will be divided into three work packages. The first will focus on developing the exposure measure and on the comparison between different groups of interest. Given the importance of this aspect of the pilot project, it is expected that the analysis will be updated on a regular basis throughout the lifetime of the pilot project.

The second work package will consist of fieldwork done at company level, which will commence six months into the project. Given the difficulty of securing company case studies and running the fieldwork, this part of the pilot project is expected to last 1,5 years.

Finally, the third work package will focus on gathering evidence on the impacts of AI on productivity through experimental approaches. This work package is expected to commence at the end of the first year and have a total duration of 1 year.

PP 07 26 01 Pilot project — Safeguarding Europe's Born-digital Heritage

Figures (Differentiated appropriations)

2026 appropriations		2025 appropriations	2024 out-turn
Commitments	Payments		
2 000 000	500 000		

Remarks

Protection of and access to Europe's cultural heritage has been reaffirmed as a Union priority by Commissioner Micallef and will be part of the wider Culture Compass promised by the Commission. Born-digital heritage is part of Europe's Cultural Heritage, representing a vibrant and growing part of the wider historical record, not least given the opportunities it offers for new and diverse voices to emerge and be heard.

For the purpose of this pilot project, born-digital heritage are materials originally created in digital formats and which do not have a physical equivalent. These can take the form of texts, images and/or sounds. Key examples of born-digital heritage include eBooks, electronic journals, online media, blogs, websites, video games and more, all of which can have significant value for future researchers. Also, for the purpose of this pilot project, heritage institutions are archives, libraries, museums and other educational, cultural and research organizations.

There has been extensive focus – in all of law, funding and cooperation – to provide stronger access to digitised copies of physical cultural heritage. The Digital Single Market (DSM) Directive (2019/790) includes provisions on digitisation and on access to out of commerce works, the Recommendation on a common European data space for cultural heritage ((EU) 2021/1970) and the related work of the Europeana Initiative in general aim to encourage digitisation and digital preservation and facilitate the free flow of cultural heritage data. Moreover, the Cultural Heritage Cloud will develop specific digital collaborative tools for the cultural heritage sector. However, this is less the case when it comes to safeguarding born-digital materials. Typically, these are not available on servers of heritage institutions but are rather accessed remotely, and so do not fall under current preservation provisions. Many works are extremely vulnerable to simply disappearing. The concern is that only a very small share of the cultural, research, news and other materials that are shaping our world today will even survive to make it into the public domain.

CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (cont'd)

PP 07 26 (cont'd)

PP 07 26 01 (cont'd)

Current provisions in Union law do not provide clarity for Europe's heritage institutions about the possibilities of making preservation copies of material that can be licenced or otherwise legally accessed, but not acquired. For example, Article 6 of the DSM Directive only allows for the preservation of works in an institution's permanent collection, which excludes those only accessed on a temporary basis. Progress towards adapting legal deposit laws for the digital age or enabling web harvesting is uneven, although there is experimentation underway, e.g. the work of the International Internet Preservation Coalition.

The need for a comprehensive approach to preservation is clear. Accidents, bankruptcies, format obsolescence and simply the deletion of materials that may have important historical value but no economic worth to the holder all have an impact. Recent history shows that unless digital content is safeguarded independently, it can all too easily disappear due to political pressures unless appropriate measures are taken. Concern about the loss of our born-digital heritage has already long given rise to talk of a 21st century black hole or a digital dark age.

This pilot project would work with experts in the data space for cultural heritage and take advantage of available data and frameworks like Europeana, as well as relevant technical and legal knowledge of relevant stakeholders, inter alia libraries and archives. In the context of wider work around the Culture Compass, and ahead of the discussions on preservation and access of born-digital materials, this pilot project could contribute to understanding the state of play and possible way forward in line with the following considerations:

- assessing the share of Europe's born-digital cultural heritage that is being preserved today and how this compares with what (in the eyes of professionals) needs to be preserved;
- mapping the state of law around the preservation of born-digital (licenced) content today, and access to this taking into account existing frameworks and ongoing initiatives dealing with preservation of and access to cultural heritage, also taking account of existing frameworks and initiatives as above outlined;
- mapping other (non-legislative) factors that may be influencing practices around the preservation of born-digital heritage and access to this;
- establishing suggestions for legislative and non-legislative measures which could allow for optimal practices across Europe.

PILOT PROJECTSCHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (*cont'd*)PP 07 26 (*cont'd*)PP 07 26 02 (*cont'd*)*Remarks*

This pilot project aims to explore the viability and social adoption of actions designed to integrate social economy principles into tourism while simultaneously promoting local communities, European values and traditions, and sustainable businesses, and reducing the gap between urban and rural areas. The pilot project will take place in various regions across Europe, including sites of exceptional cultural and natural heritage, also aiming to increase the capacity of territorial communities at European level, while using the experience of existing long-distance tourist trails. More specifically, the pilot project looks in a systemic and forward-looking way to use the tourism potential of regions by promoting sustainable tourism and social economy principles in alignment with societal needs, technological advancements and Union strategies.

While long-distance trails already exist within the Union, their principles and capacity have not been systematically integrated into Union policy frameworks and funds, nor tailored to smart social economy models in a structured and replicable way. European long-distance tourist trails exist in different countries across the Union, including Spain (Camino de Santiago), Portugal (Rota Vicentina), Italy (Via Francigena), Greece (Menalon Trail), Romania (Via Transilvanica) and Slovenia (Juliana Trail). Within this context, this pilot project aims to explore and test the economic and social potential of various long-distance trail models across different Union regions.

This pilot project aims to develop the pan-European dimension of the social economy through an integrated, bottom-up approach, based on real-life, measurable community experiences of long-distance tourist trails. The pilot project centres on value chains that retain economic benefits within rural communities, fostering inclusive growth. By aligning rural hospitality providers with sustainable practices, the pilot project strengthens value chains to ensure transparency, social impact, and long-term community resilience. Designed as a pan-European blueprint, the model integrates Union frameworks and facilitates transnational knowledge exchange to replicate success across Europe.

To achieve its objectives, the pilot project will develop digital solutions to assess the feasibility of a future pan-European platform and mobile application designed to serve all European regions connected by long-distance tourist trails. These solutions will leverage real-life experiences of the social economy model by fostering collaboration among local communities, social enterprises and sustainable tourism actors. In addition, the pilot project will identify and leverage successful grassroots initiatives, knowledge, and social economy networks already in place within specific regions. These will be scaled and replicated in other areas through a structured process of knowledge exchange, peer learning, and capacity-building.

The pilot project will provide relevant users with comprehensive trail information, real-time updates, community-driven content, trainings, Union competitions, investments opportunities, events and tools to support the development of a pan-European smart social economic model.

Lessons learned from this pilot project will support the platform's expansion to other European long-distance trails and regions, ensuring a scalable, bottom-up approach rooted in local development. To strengthen this capacity at the European level, the platform will provide local-trail capacity-building trainings, and trial a Union Award for the best long-distance tourist trails, activities, and projects. The pilot project will thus support rural social entrepreneurs through training, peer-to-peer learning, and mentoring initiatives. By combining training, local pilot actions, knowledge transfer, and digital innovation, the pilot project empowers communities to design inclusive tourism services, strengthen social enterprises, and drive sustainable local economic growth.

CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (cont'd)

PP 07 26 (cont'd)

PP 07 26 02 (cont'd)

To achieve the mentioned objectives, the pilot project will conduct qualitative and quantitative research, launch and implement a pilot across the different Union regions, create a European digital platform and mobile application, trial a Union Award for the best long-distance tourist trail, activities and projects.

- Phase 1: Research. During this phase, qualitative and quantitative research will be conducted to assess the needs of European long-distance tourist trails, but also strengths and weaknesses from a smart social economy perspective. This will be complemented by a collection of storytelling pieces from local citizens and stakeholders, and an analysis of already existing social economy practices among them.
- Phase 2: Launch and implement pilot actions across Union regions, using the available local capacity. This phase will test local approaches to community engagement, social enterprise support, and tourism services in a real-world setting.
- Phase 3: Digital Platform & App Development. This phase will develop digital pilot tools to test the feasibility and relevance of a future pan-European platform and mobile application designed to serve all European regions connected by long-distance tourist trails, including local-trail capacity-building trainings.
- Phase 4: Promotion & Community Engagement. A Union Award will be trialled for the best long-distance tourist trails, activities, and projects to promote the platform's expansion to other European long-distance trails and regions.

What sets this pilot project apart is its unique focus on the use and development of long-distance tourist trails as catalysts for sustainable and inclusive development of tourism and improving the quality of life in communities, social innovation, and cultural exchange. By integrating these trails into a broader European digital and community-driven framework, the pilot project taps into their untapped potential to connect remote regions, stimulate local economies, and promote environmentally responsible and sustainable tourism.

Social media play a dominant role in our society. Big Tech platforms such as Meta, X, and TikTok determine what appears in our news feeds, namely content that is attention-grabbing and keeps you glued to your screen in order to serve ads, making it more profitable for them. As a result, our timelines are flooded with hate, malice, agitation, false body images, social polarization, and disinformation. Taking into account that social media is the number one news source for many young people, and ever-growing for the population at large, a few monopoly platforms are threatening our democracies. In order to respond to those threats the Commission is working on a European Democracy Shield to safeguard democratic processes and institutions from external threats in an increasingly complex information environment. At the same time, this dependence on Big Tech platforms is harmful for Europe's security and competitiveness.

COMMISSION
PILOT PROJECTSCHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (*cont'd*)PP 07 26 (*cont'd*)PP 07 26 03 (*cont'd*)

Young people are disproportionately affected by the harms of these mainstream social media platforms as a result of design choices such as the use of addictive techniques and algorithmic manipulation. In its comprehensive approach to mental health, the Union emphasises that young people are particularly vulnerable to negative digital influences. Recent studies show that young people on average spend seven hours a day online and one in three young people experience mental health problems, such as anxiety and depression, caused or exacerbated by algorithmic pressure, online bullying and lack of privacy. Neurodivergent young people, in particular, are more likely to experience Problematic Internet Use, putting them more at risk of online harms. Yet young people often lack any real agency or input into how these platforms are designed. By actively involving young people in the design of alternative social media, their user needs can be better understood and these challenges can therefore be addressed, contribute to shaping safer online spaces, and lay the groundwork for digital platforms that genuinely prioritise mental health and democratic values.

In recent years, the groundwork has been laid for the provision of essential digital services where public values and strategic autonomy can be safeguarded. European regulation adopted in recent years seeks to curb Big Tech's power and open the market for new entrants. However, this alone is not enough. The call from the public for alternatives to mainstream social media has been growing in recent years and months. Deploying such alternatives can further boost this demand and support a more widespread understanding that Europe's dependence on Big Tech is not inevitable and that technological sovereignty is achievable. This can create fertile soil for the development of European mid-tech alternatives that can boost Europe's competitiveness.

Over the last 15 years, alternatives like the Fediverse and AT protocol have emerged: decentralised platforms that use open standards and protocols. In the Fediverse, no single party sets the rules; each organisation or community running its own server (node) is a co-owner of the ecosystem. These decentralised platforms promise a less extractive, more community-driven experience and potentially safer, healthier social media spaces. There are clear opportunities, but challenges prevail to promote widespread adoption. Through the 'fediversity' grants under Next Generation Internet, the Commission has been actively supporting the development of the Fediverse. This support so far was focused on the underlying infrastructure. This pilot project is intended to contribute to overcoming the various obstacles and support the development of a user-faced application.

Objective:

The pilot project aims to create and test a proof of concept for a Fediverse-based/AT Protocol-based social media platform that:

1. centres mental health, designed to minimise negative psychological effects and foster positive interactions;
2. ensures digital autonomy by building on top of ethical and human-centred technology;
3. deepens understanding of user needs through cocreation by young people from diverse backgrounds;
4. encourages the development of alternative Fediverse-based/AT Protocol-based social media in compliance with Union regulation by showcasing the feasibility of developing alternatives.

CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (*cont'd*)PP 07 26 (*cont'd*)PP 07 26 03 (*cont'd*)*Approach:*

1. participatory design will be led by young people, with students from diverse educational institutions and levels invited to contribute their experience and their expertise in design, architecture, privacy, and cybersecurity. Relevant civil society organizations will provide guidance and support;
2. the platform will adopt open protocols like ActivityPub or AT Protocol to ensure compatibility with existing Fediverse infrastructure to enable scalability;
3. young people will develop prototypes in co-creation sessions, guided by experts from the fields of technology, media literacy, design, and societal innovation with a focus on features that support well-being and mental health is central to this phase. neurologists, psychologists and other relevant healthcare professionals will be consulted;
4. the Proof of Concept will be tested by young people across various Member States, with a focus on safety, user-friendliness, and mental health, feedback will be continuously integrated, refining the platform's design;
5. all findings and methodologies are shared publicly, allowing others to replicate or build upon the pilot project's outcomes.

Expected Outcomes :

1. proof of Concept for a Fediverse-based/AT Protocol-based social media platform that upholds long-term user satisfaction, well-being and societal benefits;
2. better understanding of the user needs of young people in safe and inclusive social media;
3. youth Empowerment through hands-on digital innovation and active participation in media platform design;
4. policy Recommendations for shaping social media spaces, the development of an interoperable and competitive social media landscape, supporting mental health, and safeguarding democratic values.

The objective of the Observatory is to support the monitoring of large-scale land deals, or 'land grabbing', in the Union. It should aim to:

- quantify the transfer of farms and arable land to large economic groups and investment funds;
- characterise the distribution of property in the Union;
- study the access to arable land for young farmers, and examine the impact of ownership by third parties in the land tenure system of each member state;
- study the protection measures for small and medium agriculture and land tenure systems in Member States.

Remarks

As stated in the ‘Vision for Agriculture and Food’ presented by Commissioner Hansen, ‘Consumers’ relationship with food has evolved. Food is more processed, eating habits are changing and supply chains have gotten longer and more complex. At the same time, food affordability remains a major concern, especially for low-income households. While the link between farming, food and territory has weakened, changing societal expectations with regard to food hold opportunities for the sector. Therefore, going back to the “roots” and re-establishing the link between food, territory, seasonality, cultures and local traditions is very important.”

To rise up to this challenge, the pilot project identifies ‘knowledge’ and ‘capacity’ gaps as regards the possibility for consumers (‘eaters’) to access food and to engage in their food environments. Such gaps are an issue when it comes to improving farmers’ incomes in the agri-food value chain by giving access to products sold at a fair price to a wider section of the population. This pilot project thus proposes a comprehensive approach with complementing actions: an inventory of food accessibility across the Union, the creation of a Food Policy Councils network and the development of an exchange Platform for the network.

A. Inventory of Food Accessibility and Food Environments in the Union

While the Common Agricultural Policy and other Union schemes contribute to the availability and affordability of food in the Union, some citizens still struggle to access nutritious and healthy food. This is not due to a lack of production, which is sufficient at Union level, but either for affordability reasons, or for questions related to physical access and food environments.

Currently, there is no harmonised Union-level data on the physical accessibility of food, and existing statistics mainly cover affordability at Member State level. This makes it difficult to identify regional disparities or to design targeted policies to improve access to healthy diets.

Since an ongoing study is already being carried out by DG AGRI focusing on food affordability, this Project will help fill the knowledge gap on food accessibility beyond affordability, by:

1. mapping regional disparities in food accessibility, including physical access to food;

COMMISSION
PILOT PROJECTS

CHAPTER PP 08 — AGRICULTURE AND MARITIME POLICY *(cont'd)*

PP 08 26 *(cont'd)*

PP 08 26 01 *(cont'd)*

- 2. developing standardised tools and indicators to assess food environments and their impact on access, complementing existing Union data on availability and affordability;
- 3. highlighting policy gaps and propose recommendations for a stronger Union-wide approach to food accessibility, particularly for vulnerable groups, without duplicating the ongoing DG AGRI study on affordability.

B. Establishment of an Union-Wide Network of Local 'Food Policy Councils'

Improving food access requires local engagement and collective governance of food systems. This pilot project recognises the important role customers have to play in the transition, by harnessing at local level the transformative power of dialogue between all actors along the food chain, from producers to consumers ('eaters'). Food democracy initiatives have started to emerge across Europe, either publicly funded, such as those created in the wake of the Milan Urban Food Policy Pact, or grassroots, such as local funds experimenting with Food Social Security.

The pilot project will foster local engagement in food system governance, ensuring that citizens can better understand and influence their food environments, by:

- 1. identifying and mapping existing 'Food Policy Councils' and similar initiatives, assessing their governance models and impact on food environments;
- 2. providing financial and technical support for the creation of new local councils where none exists, ensuring that these councils include diverse stakeholders, particularly 'eaters' from food-insecure households, alongside farmers and small retailers;
- 3. developing a Union-level digital platform to facilitate collaboration between Food Policy Councils/local food democracy initiatives, and policymakers, enabling knowledge sharing and dissemination of best practices across different Member States.

Pilot project PP 01 24 'Europe-wide solutions for free and open source software use by public services in the Union (FOSSEPS)' not only significantly advanced the idea of Europe-wide cooperation on open source, but has done so via three concrete actions, (i) building a first Europe-wide Open Source Solutions Catalogue for public administrations (ii) identifying critical software used by European public services, and (iii) forming a European public services user group on open source.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 01 — RESEARCH AND INNOVATION** (*cont'd*)PA 01 24 (*cont'd*)PA 01 24 01 (*cont'd*)

Our Europe-wide capacity to strategically use and operationally deploy free and open source software (FOSS) is a cornerstone of strategies to achieve digital sovereignty, increased competitiveness of digital markets, innovation, and cybersecurity. The initial pilot project has been a resounding success. There is unfinished work and further interest in each of the three project pillars. The three actions listed below build on earlier achievements and propose key actions that the preparatory action would take to centrally and simultaneously meet the demand from European public services.

(i) European Applications Catalogue

Already proven benefits of savings in time and costs caused by re-using open source applications listed in national catalogues point to massive savings from having a fully functioning European Open Source Solutions Catalogue. The initial European Applications Catalogue minimal viable product created by the pilot project will need to be greatly expanded by the preparatory action to allow for more Member States' data to be ingested, whilst still being reflected in their own national catalogues (a federated data-collection approach). In fact, many Member States do not yet have catalogues of open source software solutions, and those who do have technical difficulties federating their work. More work is needed to accommodate different data standards used by Member States, also to help Member States to create more mature entries to their national catalogues, and in turn the European Applications Catalogue. This preparatory action will aim to get open source solution information from at least 14 Member States (50 %) via standards work, canvassing, better communication, and by demonstrating the massive savings to be achieved. Data content for each listed application needs harmonisation so that user searches return meaningful results and provide useful comparative content. In addition, the initial minimal viable product created under the pilot project also needs ongoing maintenance funds to meet the evolving European Applications Catalogue. In addition to the improvement of the catalogue resulting from the pilot project, we need to allocate part of the funding to improve national catalogues and their compatibility with the European one.

(ii) Critical Software Inventory

Aside from gaining praise for tackling this pressing issue (e.g. the recent Log4J issue), the pilot project illustrated the huge lack of awareness of critical software within European public services. The pilot project provided that awareness, but awareness is not sufficient as European Public Services lack the tools to identify critical software. It is clear therefore that European public services cannot handle this issue alone. At the very least they need tools to create a Software Bill of Materials (SBOM) for every software they use. That is why for the Union institutions and European public services should pool their resources to a project that would keep identifying and fixing critical software. There is a need for engagement and cooperation with other industry actors in order to sustain that effort. The scope of the inventory should be extended to fit the increased use of FOSS in public administrations, as well as by vendors providing software solutions to the public sector. As part of the development of the inventory, the FOSSEPS team should develop a Union-wide maintenance strategy for the identified software in collaboration with the FOSS actors that are currently maintaining them. This mitigation strategy and its financing will be elaborated on in collaboration with the Member States. The goal of this preparatory action is ultimately that Member States increase collaboratively and autonomously their capacity to identify critical software and mitigate any potential cybersecurity risks. Special attention should be given to identifying a mechanism for the sustainability of solutions for critical software. This will strengthen and extend the current activities of public service open source expertise centres in Member States and the Commission, using funding from the preparatory action.

CHAPTER PA 01 — RESEARCH AND INNOVATION (*cont'd*)

PA 01 24 (*cont'd*)

PA 01 24 01 (*cont'd*)

(iii) European cooperation on open source

The preparatory action will build on the nascent work started by the pilot project to encourage European public services to form an open source network or user group. The preparatory action will actively involve European public services across the Member States to strengthen the expertise in this network, allowing it to expand, and bring in new members. One of the possible practical outcomes of this increased capacity, to be prepared in the preparatory action, is to find ways for public service open source expertise centres in the Member States to pool their resources to allow them to collectively improve the sustainability and governance of essential open source components. This initiative will allow European public services to manage their own open source issues and collectively provide solutions, thus enabling them to become digitally sovereign in this area, while nurturing the European open source ecosystem of small open source actors.

(iv) Open source cybersecurity and sustainability

There is a need to conduct security and sustainability analyses on commonly used open source software within European public services. The preparatory action will conduct a series of bug bounties and hackathons to identify and fix criticalities and help to make critical software more sustainable by enhancing or strengthening the base software. Such activities will also help to promote the use of open source within the Union.

(v) Defining strategies to promote the re-use of software developed by or for public services

In particular, this preparatory action will promote software re-use by using a series of incentives (awards) via competitions, to provide, apart from financial prizes, practical support (e.g., consultancy, development, testing support) and help these public services to address software issues that prevent their solutions from being used by other public administrations in other Member States (e.g., internationalisation and localisation, integration and customisation).

PREPARATORY ACTIONS**CHAPTER PA 01 — RESEARCH AND INNOVATION** (*cont'd*)PA 01 24 (*cont'd*)PA 01 24 02 (*cont'd*)

While some progress has been made towards achieving the Sustainable Development Goals (SDGs), many challenges remain in monitoring and implementing them effectively in Europe, as disparities are evident both among Member States and Union regions.

This is of particular importance when taking into account the need to localise the SDGs at different sub-national levels in order to ensure their implementation in light of local challenges and objectives.

One of the key challenges in monitoring and implementing the SDGs is the design and development of integrated and coherent policies that take into account the interlinkages among the SDGs and their targets. Other challenges include inadequate financing, insufficient data and monitoring mechanisms, and differing institutional capacities in European regions.

This preparatory action aims to inform the Union, national and regional policy-making with concrete recommendations on aspects related to SDG monitoring and implementation at the regional level, building on the outcome of the pilot project PP 01 22 06 'Monitoring the Sustainable Development Goals in the Union - Filling the data gaps' including the co-developed set of indicators and data.

The preparatory action aims at establishing a mechanism for the regular regional monitoring of the progress towards the achievement of the SDGs. The mechanism will work on the data collection, analysis and interpretation of indicators produced at regional level (NUTS2).

This preparatory action is to be implemented over two years.

The steps to take for the implementation of the preparatory action are:

- expanding the regional indicator set to address all SDG targets (from 55 to 169) created under PP 01 22 06;
- validating the regional indicator set via a large scale survey targeting European regions;
- establishing and disseminating the European regional indicator set for monitoring the SDGs with most updated data;
- cooperating with national statistical systems on the systematic collection and dissemination of regional SDG data;
- inferring associations in the form of complementary and trade-off interlinkages for policy actions addressing the SDGs at subnational level;
- testing the complementarity of a series of current European policies (European Green Deal, cohesion policy, the common agricultural policy) in relation to the achievement of certain SDGs at regional level;
- developing policy recommendations for the Commission on how European regions monitor the SDGs, and what SDG interlinkages imply for policy-making actions.

1. Partnerships for Regional Innovation: policy relevance and next steps

Innovation is an essential enabler for achieving the Union's policy objectives, in particular the green transition and digital transformation and achieving open strategic autonomy, as well as the Sustainable Development Goals. Innovation is also essential to drive Europe's competitiveness and to build resilience in strategic areas and reduce the dependencies and vulnerabilities that recent crises have brought to the surface.

The deep transformations of production and consumption systems brought about by the transition to a new green energy system, by the pervasive role of digital technologies, and by the challenges that the COVID-19 crisis and the consequences of Russia's war of aggression against Ukraine demand for ambitious investments in innovation. However, truly transformative outcomes are unlikely to be generated by more funds in a business-as-usual approach.

New innovation policies must address two important prerequisites: meaningful involvement of local and regional stakeholders including citizens, enterprises, knowledge institutions and local authorities; and transformative, system-level innovation influencing and inspiring industrial, climate, employment and social policies, among others. They also have to take into account recent Joint Research Centre (JRC) modelling work on regional economic diversification achieved by introducing new technologies that concludes that related diversification has a greater potential for more peripheral and less developed regions than for the more developed regions that should rather pursue more path-breaking ways to innovate.

In 2022, the Commission and the European Committee of the Regions launched the Partnerships for Regional Innovation (PRI). The PRI approach was endorsed by the Commission in its communication of 5 July 2020 entitled 'New European Innovation Agenda'.

PRI come as a response to the urgent call of the European Green Deal to address the unprecedented challenge posed by climate change, to the pressing need to achieve open strategic autonomy and to ensure that Europe thrives in the green and digital economy of the future, while strengthening social and territorial cohesion in an era of global polycrisis.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 01 — RESEARCH AND INNOVATION** (*cont'd*)PA 01 24 (*cont'd*)PA 01 24 03 (*cont'd*)

PRI have been developed at the JRC. They build on positive experiences with smart specialisation strategies and seek to address the fragmentation of funding instruments and policies in territories, and misalignments between regional, national and Union initiatives, while exploring novel approaches designed to join up efforts across governments and stakeholders, develop partnerships and amplify impact.

A first PRI Playbook has been developed and offered to the territories participating in the pilot, with a view to guiding the implementation of the pilot project.

The year-long PRI pilot project started on the 17 May 2022, it involves 74 territories and has two main objectives. The first is to thoroughly test and further develop the PRI Playbook, and through it the whole PRI concept. The second key objective is to start giving further visibility to, and co-develop, opportunities for pilot territories to connect and initiate interregional collaboration on topics in support of future regional innovation valleys under the New European Innovation Agenda, the joint local articulation of Union missions, inter-regional cooperation in new sustainable value chains, collaborative skills development, or further areas that matter most to the territories.

2. Preparatory action on PRI: objectives, scope, and activities

Based on the above, this preparatory action would:

- open the experimentation of the PRI to a larger set of territories than the one involved in the initial action,
- test the PRI as a bridge between local smart specialisation strategies and the deployment of the Union climate adaptation mission in regions and communities,
- support the participation of the territories in new Union value chains linked to the deployment of the twin green and digital transitions,
- test PRI long-term viability,
- foster its policy traction,
- support the deployment and implementation of the PRI concept in support of Union industrial, cohesion and research and innovation policies,
- link the PRI to the New European Bauhaus approach where appropriate,

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action has the following objectives:

- analysis of case studies of startup villages;
- formulation of a final report with policy recommendations to be launched in a public event.

There is no legal basis for an in-depth collection of indicators and metrics concerning innovation deployment and specifically innovative entrepreneurship in rural areas, and there is little availability of appropriate data and statistics, as well as scarce evidence of how startups can emerge and successfully grow in rural areas. Therefore, the knowledge base needs to be enhanced and broadened in order to underpin policy action with scientific support.

Moreover, there is no specific action matching innovation, startups and entrepreneurship in the current broad framework of Union policy programmes targeting rural areas. The different policies that impact on rural areas (rural development policies, regional policy, research and innovation policy) deploy a number of relevant actions, but a synthesis is missing and there is therefore a need to join the dots and extract relevant recommendations to fill this gap in future action.

As the 2030 Agenda deadline approaches, the imperative to move beyond monitoring to transformative action has never been greater. This preparatory action (PA) will focus on the systematic mapping and analysis of the policies, governance mechanisms, and strategies implemented to achieve the Sustainable Development Goals (SDGs) at the subnational level in Europe. It will delve into a wealth of textual data from Voluntary Local Reviews (VLRs), local and regional policy documents, and other relevant sources to identify, analyse, and classify the concrete actions and the underlying policy and governance frameworks that local and regional governments in Europe are using to implement the SDGs. By mapping these actions and the associated policy approaches, and extracting insights, the PA aims to provide policymakers at the Union, national and subnational level with a comprehensive analysis of the distinctive features, interlinkages and caveats related to SDG implementation and policy design at the subnational level.

At the core of this new PA is the development of an online platform to showcase, analyse and disseminate the diversity of SDG implementation efforts across Europe. This platform will provide:

- a curated repository of actionable practices and policy measures, categorised by goals, regions, and thematic clusters.
- analytical tools to explore interlinkages between actions and policies, revealing how the expected impact of individual actions could be further reinforced through integrated approaches to policy design and implementation.
- ad hoc policy briefs and evidence-based analytical insights to support the work of European and subnational policymakers.

The PA will count on the participation of local and regional governments across Member States, engaging with stakeholders at multiple SDG governance levels, with a view to ensure the scalability and transferability of the pilot project findings.

The steps to take for the implementation of the PA are:

1. collecting and analysing reported SDG actions and related policy measures and governance arrangements from Voluntary Local Reviews (VLRs), regional strategies and policy documents.
2. developing a framework for categorising and classifying actions and policies by SDG goals, targets, and regions.
3. analysing actions and governance mechanisms to identify trends, innovative practices, and interlinkages across regions and SDGs.

- 4. performing a gap analysis to highlight areas requiring additional efforts and policy support instruments.
- 5. expanding current online data dissemination, analysis and visualisation platforms to arrive at a comprehensive repository of subnational SDG actions and policies with advanced analytical and visualization tools.
- 6. validating findings through consultations with academic experts as well as local and regional governments.
- 7. producing and disseminating an evidence-based policy insight to local, regional, national, and Union (Parliament, the Commission, and the Committee of the Regions) stakeholders.
- 8. proposing a roadmap for scaling and integrating the findings of the PA into robust and coherent sustainability policy frameworks across the Union, including recommendations for future legislative or funding initiatives to support local implementation efforts.

PA 01 26 02 Preparatory action — New Methodologies for Assessing Inequalities

Figures (Differentiated appropriations)

Remarks

In a fast-changing world, the Union requires new, comprehensive, and systematic approaches to assess economic and social inequalities across Member States. While there are existing data sources on wealth distribution, cohesion and social capital, they remain fragmented, often outdated and insufficient for understanding the full scope of inequality and evaluating the impact of certain policies and effectiveness of measures to tackle it.

The ‘New Methodologies for Assessing Inequalities’ preparatory action would bridge this gap by complementing existing data sets and scoreboards with novel ‘out of the box’ research methods and data to assess inequalities. These include ‘Big Data’ approaches, using alternatives data sources (e.g. text data, administrative data) and techniques such as: advanced modelling with heterogeneous agents, Natural Language Processing (NLP), non-linear econometric techniques (e.g. Bayesian Neural Networks) or Transformer Models to provide robust, consistent, and real-time insights on the various dimensions of inequality. This evidence-based approach using state-of-the-art analytical frameworks would empower the Union and its Member States to develop more targeted and effective policies and anticipate the need for new ones, addressing economic and social inequalities in a holistic manner.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 01 — RESEARCH AND INNOVATION** (*cont'd*)PA 01 26 (*cont'd*)PA 01 26 02 (*cont'd*)

The preparatory action (PA) would also play a pivotal role in enhancing social cohesion. By testing approaches capable to uncover both visible and hidden dimensions of inequality it would contribute to better identification of groups most at risk of being left behind, and thus enable proactive interventions, to ensure that no one is excluded from the benefits of Union policies.

Additionally, it would establish a statistical foundation for measuring social capital, by combining various data with novel analytical techniques, leading to more precise assessments of social cohesion throughout Europe. In doing so, it would contribute to a more equitable distribution of opportunities and outcomes, fostering greater unity and reducing the potential for social fragmentation.

Finally, the PA would facilitate cross-border cooperation and novel 'out-of-the box' use of data using Machine Learning techniques and Artificial Intelligence, offering a platform for Member States, research institutions, and civil society to share cutting-edge knowledge, best practices, and new successful policy models. This collaborative effort would help align national and Union policies, ensuring that inequalities are tackled comprehensively, with coordinated responses across regions and sectors.

In the long term, having the right instruments to address inequality is critical for the sustainability of the Union social model. Social instability driven by inequality can erode public trust, fuel polarization, and undermine democratic values. The PA would help mitigate these risks as well, using novel data and techniques to identify new forms of inequality at local level arising from e.g. different exposure to environmental hazards and climate change, depopulation and the impact of digitalisation. This will support policymakers to implement timely, effective solutions, ensuring a more inclusive and resilient Union for the future.

In conclusion, the establishment of this PA is essential for advancing social and economic cohesion across the Union. It would provide the evidence base necessary for informed policymaking, foster greater cooperation among Member States, and ensure that the Union remains a pioneer and global leader in addressing inequality. By making inequality a central focus of Union policy, the PA would contribute to building a more inclusive, just, and sustainable future for all Europeans.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The Commission has implemented the pilot project PP 02 20 02 'Eco labelling for aviation / Demonstration project for the introduction of a voluntary Green Label system in aviation'. That pilot project also became part of the Commission's communication of 5 December 2020 entitled 'Sustainable and Smart Mobility Strategy - putting European transport on track for the future' (COM(2020) 789 final) under Flagship 5 'Pricing Carbon and provide better incentives for users'. The work performed under the pilot project clearly demonstrated the technical and operational feasibility of the labelling system for aviation.

The main objective of the environmental labelling system for aviation is to reduce aviation's environmental footprint by facilitating more sustainable choices for consumers based on trusted, harmonised and accessible information. A holistic approach is being considered by looking at the key components of the aviation system, such as flight performance and complementary information on aircraft technology. Such an approach would incentivise the aviation industry to reduce its environmental impact by considering both readily available solutions and future technologies.

The pilot project developed the methodologies and the relevant digital distribution frameworks identifying the technical criteria to assess airline operations and the aircraft technology used, and did so in line with the applicable policies, initiatives and methodologies developed by the Commission.

In addition, the pilot project includes broad stakeholder participation with key players from the aviation industry (25+ airlines, engine and aircraft manufacturers, airports) and travel industry (Amadeus, Google, Skyscanner, Travalyst), Member States as well as NGOs (UECNA, BEUC, T+E).

Based on the positive outcomes of the pilot project a follow-up preparatory action would allow the further development of the pilot project for the direct benefit of Union citizens by providing a potential legal basis. In this regard, further work is anticipated to explore the inclusion of non-CO₂ climate impacts from aviation into the label assessment method. Such work might include lifecycle assessment work that will enable mode of transport comparison, as well as scientific work needed to align methodological discrepancies. Considering that the label aims to provide a total assessment of the environmental impact of aviation a thorough assessment should be made with regards to developing additional use cases covering environmental transparency methods for air navigation service providers (ANSP), airlines and aircraft manufacturers.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The Preparatory Action (PA 02 24 02) aiming to establish a book and claim system for the aviation sector in the Union should continue. Bearing in mind various business initiatives, it should carefully examine, whether IT architecture of book and claim should be based on a generic solution, extendable to cover additional sectors, with due regard to interoperability, in order to set up an internally secured, on time and reliable corporate tool at the disposal of the Commission and other business actors and to avoid possible market fragmentation or red tape.

In addition, the ongoing Preparatory Action on book and claim system should also cover the Union maritime sector in order to increase the share and to facilitate the cost-effective distribution of renewable and low-carbon fuels in the fuel mix of the Union maritime transport by separating the purchase of such fuels from their physical delivery and use. There are important differences between the maritime and aviation sectors, which needs to be well reflected within the Preparatory Action. It should be carried out in the following phases:

- analysing the existing legislative framework, including the relevant provisions under RED, EU ETS, AFIR and FuelEU maritime as well as any other relevant legislation in the Union, at IMO and in 3rd countries with main global bunkering hubs and those situated in green shipping corridors;
- developing a sound framework for book and claim mechanisms, including for:
 - sustainable fuel certification/credentials – to transfer sustainability certification/characteristics without actual transfer/use of molecules;
 - OPS green credentials – to trade green energy when using onshore power supply;
 - the design of IT architecture of the book and claim system, with due regard to the existing Union Database, the solution designed for aviation (ongoing preparatory action) and possibly other sectoral solutions (including provision of green electricity in ports through book and claim by energy companies in the future), as well as its interoperability with other relevant databases and IT systems;

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Operations in the higher airspace, i.e. above 20km altitude, are already taking place and trigger critical challenges. The Commission has delivered a 'Roadmap on Higher Airspace Operations (HAO)' exploring the regulatory issues around the development of these operations in the Union and recommending a number of follow-up actions. These actions aim at better understanding these future higher airspace operations and the associated challenges in order to prepare an adequate Union regulatory framework, and consist of:

- studies and research;
- safety, environmental and cyber-security assessments;
- development of the 'regulatory sandbox' concept to accelerate industry tests and demonstrations.

The overall objective in this field would be to enable a safe, secure, efficient and sustainable implementation of higher airspace operations in Europe and to contribute building a global approach through the International Civil Aviation Organization (ICAO) by establishing a strong European position.

This preparatory action should allow building enhanced knowledge of these future operations and their environment, to prepare for future regulatory initiatives and build a useful ecosystem supporting industrial developments. Thanks to its recognised experience and excellence in aviation and space domains, Europe could have a leading role in this future industry. It will also be important to ensure that security and defence aspects are duly taken into account to protect sovereignty in the European airspace.

The key objectives of this preparatory action would be to support the following lines of action:

- launching scientific studies on the conditions at high altitude affecting the flights and the persons on board (weather, medical requirements, spectrum, surveillance, communications, propulsion, etc.);
- supporting industrial development, for instance through special certification conditions and regulatory sandboxes;
- performing legal and regulatory assessments (including safety and environmental impact assessments), as well as gap analysis;
- exploiting synergies with other Union policies (space, defence, security, connectivity, etc.);
- ensuring regional and global interoperability, mainly through ICAO;
- building European know-how and raise awareness.

The implementation of this preparatory action will continue in 2024-2025. The results from its actions as well as from the first tests and demonstrations in Europe are aimed to support the development of a regulatory framework as of 2026.

The Commission has implemented the pilot project PP 02 22 02 ‘Comprehensive handbook for building local Urban Air Mobility (UAM) ecosystem in Europe’.

That pilot project is flagship action 7 under the Commission's communication of 29 November 2022 entitled ‘A Drone Strategy 2.0 for a Smart and Sustainable Unmanned Aircraft Eco-System in Europe’ (COM(2022) 652 final). The implementation started in the same month with the objective to provide a first version of the platform by end of 2023 for testing.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 24 (*cont'd*)PA 02 24 04 (*cont'd*)

The overall objective is to enable a safe, secure, efficient and sustainable IAM implementation in Europe as foreseen in the Drones Strategy 2.0 by providing an interactive online platform ('IAM Hub') for IAM ecosystems.

In particular, the pilot project is currently:

- capturing the user needs from the IAM ecosystem,
- defining the functional and technical requirements,
- defining the data structure,
- defining the initial content of the system as regards safety, privacy, noise and sustainability.

In addition, the pilot project includes a comprehensive stakeholder governance ('IAM Hub Task Force') with key players from the IAM ecosystem (operators, manufacturers, airports, vertiport operators, NAAs and municipalities).

Based on the positive outcomes of the implementation of the pilot project and initial feedback from the Stakeholder Task Force a follow-up preparatory action would allow to further develop the pilot project for the direct benefit of Union citizens and the emerging IAM industry. The Union has a leading role in this future industry. The IAM Hub can help to maintain this lead by allowing for smooth implementation across all levels of the ecosystem.

The key objectives of the preparatory action would be:

- widening the accessibility and functionalities of the system to further municipalities and other uses;
- increasing the synergies between the European Authority for Aviation Safety (EASA) and National Aviation Authorities;
- increasing the synergies with other Union initiatives e.g. CIVITAS (City-Vitality-Sustainability, i.e. City Network-Urban Mobility Transport Programme by the Commission within the Union and beyond), SESAR projects;
- defining the legal hook of the IAM Hub as a means for collaboration in the ecosystem facilitating compliance with the Drones/eVTOL regulations as well as safety, environmental, cyber and noise issues.

The preparatory action should benefit from high visibility events, e.g. the 2026 Milan Winter Olympics, and integrate the learnings into the system.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Green digital twin transition has been identified as priority policy area to reach the objectives of both the European Green Deal and the European Digital Strategy as expressed in Commission communication of 19 February 2020 entitled 'the Shaping Europe's digital future' (COM(2020) 67 final), the European Declaration on Digital Rights and Principles for the Digital Decade (COM(2022) 28 final) and in Decision (EU) 2022/2481 of the European Parliament and of the Council of 14 December 2022 establishing the Digital Decade Policy Programme 2030 (OJ L 323, 19.12.2022, p. 4, ELI: <http://data.europa.eu/eli/dec/2022/2481/oj>).

The potential of digital solutions is to reduce global emissions of greenhouse gases by 20 %, if properly designed, used and governed. Steps needed to realise this potential include:

(i) metrics to quantify the net digitalisation impact and guidelines to maximise the digital enablement, that is, science-based metrics to measure the environmental impact of digitalisation. Such metrics are essential to further develop guidelines for consistent development, implementation and governance of 'green digital solutions' that maximise the sustainability benefits and minimise negative (rebound) effects;

(ii) adoption and use of these metrics and guidelines by all sectors of Union economy. Major sectors of our economy in their digitalisation efforts will be supported by the tailored guidelines to their sector on how to deploy green digital solutions. The metrics will be used to quantify the benefits (e.g. avoided emissions) so that these sectors can be supported in their intended net zero trajectories and report progress accordingly. Dedicated Union-wide programmes such as Digital Decade Policy Programme (DDPP) will also help to deploy at scale sustainable digital solutions and infrastructures in Member States and support these efforts with proper upskilling of the workforce;

(iii) based on the large scale evidence of such benefits, to support financial sector and public procurers need to develop clear and consistent key performance indicators (KPIs) and metrics for sustainable financing of such green digital solutions as well a criteria for green public procurements, respectively. Major Union programmes and initiatives such as the NextGenerationEU and Digital Decade Policy Programme will also benefit from these metrics.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 24 (*cont'd*)PA 02 24 05 (*cont'd*)

To address point (i), Parliament took the initiative in 2021, following Council conclusions of 17 December 2020 entitled 'Digitalisation for the benefits of the environment', to request a pilot project. The Commission accepted that proposal and launched a two-year pilot project 'European Green Digital Coalition (EGDC)' that started in mid-December 2021. The goal of that pilot project was to support the Members of the European Green Digital Coalition that was launched by Commissioner Breton in March 2021. Namely, to develop science-based assessment methodologies (metrics, KPIs) to quantify the net environmental impact of digital solutions, and to develop guidelines for stakeholders in major economic sectors to use these methods consistently. The methodology will be based on international and European standards, and the guidelines were expected to be developed by the end of 2023 or early 2024. The membership of the EGDC comprises 37 large ICT companies, 45 SMEs and numerous supporting partners.

This preparatory action addresses points (ii) and (iii) by extending the European Green Digital Coalition to include sectoral players from energy, transport, construction, agriculture, and other major sectors that will deploy digital solutions with the guidance developed in the EGDC and monitor the benefits with the standardised methods developed by the EGDC.

In particular, this preparatory action will:

1. engage with at least 30 major sectoral players such as major economic actors in the Union in the abovementioned sectors to deploy proven digital solutions at scale with the support of the specific sectoral guidelines and consistently monitor the net environmental impact of such digitalisation. As a goal this preparatory action will set to achieve at least 1 Gigaton of digitally enabled CO₂ reductions, ideally by the end of this preparatory action;

2. engage with at least financial institutions and international, national, regional and local level to adopt simple KPIs that will allow sustainable finance of digitalisation that proves to have a positive impact on environment and climate;

3. develop clear and simple technical criteria and verification methods as a proposal for the Union taxonomy when Commission Delegated Regulation (EU) 2021/2139 of 4 June 2021 supplementing Regulation (EU) 2020/852 of the European Parliament and of the Council by establishing the technical screening criteria for determining the conditions under which an economic activity qualifies as contributing substantially to climate change mitigation or climate change adaptation and for determining whether that economic activity causes no significant harm to any of the other environmental objectives (OJ L 442, 9.12.2021, p. 1, ELI: http://data.europa.eu/eli/reg_del/2021/2139/oj) will be subject to revision, and to support the development of Union-wide green public procurement criteria;

4. engage with similar and complementary initiatives such as Digital with Purpose and CODES to ensure future continuation, sustainability and global impact of this preparatory action;

5. engage with local communities and authorities for them to implement the metrics and methodology at a local level.

CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS *(cont'd)*PA 02 24 *(cont'd)*PA 02 24 05 *(cont'd)*

This preparatory action will comprise not only of ICT and vertical industry stakeholders, but also SMEs, policymakers from local and regional representatives, professional organisations and environmental NGOs. A trusted cooperative environment will be built to assess and monitor the commitments and their implementation, to share good practices and to be able to scale to other sectors and other regions of the world. Building upon the pilot project, the appropriations for the preparatory action will finance a secretariat dedicated to its implementation. Continuity with the current Secretariat would be ideal, especially if the contract of the call for tender can be extended to cover the period of the preparatory action.

High-level events will be organised under the preparatory action under the auspices of the European Parliament and the Commission, in cooperation with local partners. These can take place in different Member States, focusing on key policy areas linking the European Green Deal and the new Union's digital and industrial strategies. The events should be web-streamed to ensure a broad public coverage and accessibility to as many Union citizens as possible. The outcomes of the events would contribute to policy development and evaluation at Union level and beyond.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The REPowerEU Plan aims to produce 10 million tonnes of renewable hydrogen within the Union and to import 10 million tonnes of renewable hydrogen from third countries. The Union is the first region that has established a regulatory framework to support a fully-fledged ecosystem for the development and uptake of renewable hydrogen to decarbonise our economy. This includes clear rules governing the hydrogen market in the Union, access to infrastructure, and allowing hydrogen imports to count towards Member State targets.

Renewable hydrogen is more expensive than fossil fuel-based hydrogen. The targeted use of public resources can leverage private sector investments by de-risking renewable hydrogen production.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 25 (*cont'd*)PA 02 25 01 (*cont'd*)

The European Hydrogen Bank (EHB) will play an important role in facilitating early market creation for hydrogen. The Commission has set up auctions at the level of the Union for renewable hydrogen production under the Innovation Fund to support market development, and has also proposed to set up an international auction for imports. Both Union production and imports are important to meet the potentially large future demand from industrial sectors such as steel and chemicals.

The establishment of an international auction for imports will require additional financing. Currently, there is no dedicated funding available for the international leg of the EHB to support imports of renewable hydrogen.

On the other hand, under the domestic leg of the EHB, a pilot auction for renewable hydrogen production in the Union awarded in September 2024 EUR 700 million to six successful bidders. Following this experience and the lessons learned, the Commission launched a second auction for renewable hydrogen production in the Union on 3 December 2024 with a total budget of EUR 1,2 billion.

The EU ETS Innovation Fund finances the domestic auction, but can only be used within the Union and the European Economic Area, and not to support production in third countries. Therefore, in the EHB Communication, the Commission has proposed a Team Europe approach to bring together Member State resources and provide de-risking for third country projects. In addition, the Commission will explore options to secure dedicated funding for the international leg of the EHB from the next MFF.

In order to design a scheme for renewable hydrogen imports from third countries into the Union, substantial analytical and preparatory work is required in the immediate term. Such preparatory work could include analysing the hydrogen market landscape globally, identifying the specific risks associated with the import of hydrogen and the associated financing challenges, and the advantages and disadvantages of different auction design elements, and building on existing experience, such as the international auctions organised by the H2Global Foundation.

This preparatory action will be beneficial for all Member States that are interested in hydrogen imports into the Union, and will also be valuable for Member States that are developing hydrogen corridors connected to Union borders. Despite the lack of a dedicated budget, there is momentum for an international import auction. A number of Member States have expressed an interest in participating in such an auction. Moreover, there is keen interest from international producers and third countries to produce renewable hydrogen and export it to the Union.

A budget of EUR 1,5 million would be required for this preparatory action, with implementation to start in 2025.

Objective:

To further develop and finally validate the concept of a self-standing EU Hub for Sustainable Aviation Fuels (SAF) Production to provide a single, independent European capability supporting SAF entry into market compliant with sustainability and safety rules and standards and removing technical barriers to increased SAF use, with a particular focus on supporting European SMEs.

The EU Hub for SAF Production should act as a flanking measure that can technically support the fulfilment of the ambitious ReFuelEU Aviation mandate without relying on external, non-EU factors and players. It will ensure innovation and key competitiveness for SME's, technology developers, fuel producers ensuring innovation and key competitiveness.

Background and Rationale:

Sustainable Aviation Fuels are important to reducing the aviation sector's carbon footprint. However, the complex development process and technical barriers limit the large-scale adoption of SAF. Currently, fuel producers must navigate diverse and fragmented procedures and sustainability and safety requirements, creating inefficiencies and delays in bringing European SAF to market.

At present, the primary SAF research and standardisation programs for new fuels entry into market are conducted in the United States. This arrangement poses significant challenges for European stakeholders, especially SMEs, due to the complexity, cost, and geographic barriers associated with accessing these processes. European SMEs face particular difficulty in meeting the intricate technical and regulatory requirements without localised support.

Scope of the preparatory action:

1. define the operational framework, governance structure, and scope for financially self-sufficient EU Hub for SAF Production. Identify and analyse best practices from existing processes and international standards; map existing Union research programmes and technical resources to support the Hub's development; assess the specific needs and challenges faced by European SMEs in navigating processes for entry of new types of fuels to the market.
2. Design a pilot framework to validate the self-sufficient Hub model through real-world case studies with SAF producers; engage with industry stakeholders, including fuel producers, research and certification bodies, and regulatory agencies, to validate financial, technical and operational requirements, ensure particular emphasis on providing accessible SAF pathways and technical guidance for SMEs.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 26 (*cont'd*)PA 02 26 01 (*cont'd*)

3. Create technical guidelines and toolkits for SAF producers to streamline compliance with safety and sustainability standards and rules for entry of new types of fuels to the market; develop a comprehensive knowledge base on SAF qualification pathways, technical specifications, and regulatory frameworks; provide dedicated resources and tailored guidance to assist SMEs in meeting requirements.

4. Deliverables will include:

- operational framework and governance model for a financially self-sufficient EU Hub for SAF production;
- report on barriers and proposed solutions linked to bringing new types of SAF to the market, with a focus on SME-specific challenges;
- comprehensive toolkit and guidelines for SAF producers, including tailored support for SMEs;

5. In addition to the above, a successful completion of the preparatory action will yield:

- enhanced fuel diversity: with additional SAF production pathways qualified, the European SAF industry would benefit from a more diverse range of feedstocks and technologies, ensuring resilience against disruptions;
- enhanced fuel production yields: additional research activities would assist fuel producers to optimize their production yields for targeted use of SAF in aviation; this will lead to a long-term benefit of reduced fuel costs for operators;
- boosted R&D Capabilities: fortified European fuel R&D infrastructure would lead to increased innovation, potentially positioning Europe as a global leader in SAF research and technology;
- New Made-in-EU SAF pathways: internationally recognised new SAF technologies designed and produced in the Union, which paves the way for European autonomy through a vibrant ecosystem of SAF technology developers and producers. This includes successful bench scale testing of at least one new Made-in-EU SAF pathway.

CHAPTER PA 03 — SINGLE MARKET (cont'd)

PA 03 24 (cont'd)

PA 03 24 01 (cont'd)

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action proposes the creation of a European Capital of Small Retail (ECSR), based on the model of the European Capital of Smart Tourism. The idea was put forward by a petition to the European Parliament and is supported by unanimity of the Committee on Petitions.

The aim of the preparatory action is to promote the value and appreciation of small retail and to contribute to a collective awareness of its economic importance for local communities, notably in terms of employment, as well as its key role as part of the social fabric of urban and rural areas. It aims also to highlight the role of small retail in preserving the European way of life and the model, form and essence of cities and rural communities in the Union, and to demonstrate how small retail is an important part of the European identity.

The focus of this preparatory action is to go beyond awareness-raising and take actions that would have a lasting impact. The preparatory action should encourage small retail to digitalise and allow it to embrace digital tools for their own operations, in their business-to-business relationships and in their relationships with customers. The action should also support the green transition of small retail. With regard to all of these aspects, the creation of a ECSR should complement the Commission's #RevitaliseRetail initiative. On a larger scale, ECSR addresses the growing need to accelerate the green and digital transition of the Union's economy, increase its resilience and support its competitiveness.

The title of a European Capital of Small Retail would be awarded periodically to one European city or more. The modalities of the selection process will be further elaborated.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 03 — SINGLE MARKET** (*cont'd*)PA 03 24 (*cont'd*)PA 03 24 02 (*cont'd*)

Fire fatalities represent about 2 % of accidental deaths in the Union (Commission study to evaluate the need to regulate within the framework of Regulation (EU) 305/2011 on the toxicity of smoke produced by construction products in fires). An important data gap on fire safety and fire casualties in buildings, and a lack of Union data collection methodology, were identified by that Commission's study. A fair and safe built environment is one of the building blocks of the Transition pathway for Construction presented by the Commission on 15 March 2023. The pathway acknowledges new types of fire risks brought by new materials, products, and technologies used for the green and digital transition. Fire safety is also an important consideration for the renovation wave and has been addressed by Directive 2018/844/EU of the European Parliament and of the Council of 30 May 2018 amending Directive 2010/31/EU on the energy performance of buildings and Directive 2012/27/EU on energy efficiency (OJ L 156, 19.6.2018, p. 75, ELI: <http://data.europa.eu/eli/dir/2018/844/oj>). The lack of data is an obstacle for successful policies and a first big milestone to address this issue has been achieved by pilot project PP 03 19 03 'Closing data gaps and paving the way for pan-European fire safety efforts' (EU FireStat), concluded in 2022. This preparatory action is a follow-up of the successful 'EU FireStat' pilot project to implement a Union harmonised approach for fire statistics.

The implementation of the EU FireStat made it possible to achieve all the assumed and strongly desired goals:

- mapping the terminology used and the data collected by the Member States regarding fire events;
- proposing a common terminology and method to collect the necessary data in each Member State with a view to obtain meaningful datasets (based on standardised terms and definitions).

The developed proposal of a Union harmonised approach for collecting fire statistics is supported by all fire professionals in the Union and relevant authorities from at least 19 Member States who have expressed interest in its implementation.

This preparatory action aims to support these authorities in testing the practical implementation and do the groundwork for the complete roll-out of the method and effective data collection at Union level. It will allow to identify the best measures and policies to improve the fire safety of Union citizens in relation with the different Union and national policies (still approximately 5 000 deaths and a multitude of injuries are recorded each year in the Member States in building fires).

The preparatory action will also enable support of the work of the Fire Information Exchange Platform (FIEP) run by the Commission, by sharing experiences, knowledge and best practices with regard to improving safety of the built environment all over Europe, and of the Union Civil Protection Knowledge Network run by the Commission to share knowledge between all Member States and third countries involved in the Union Civil Protection Mechanism.

CHAPTER PA 03 — SINGLE MARKET *(cont'd)*

PA 03 24 *(cont'd)*

PA 03 24 02 *(cont'd)*

The preparatory action will fund the technical support to a set of Member States piloting the implementation of the EU FireStat methodology, the analysis of learnings and possible improvements to the methods, and the development of tools for data collection and consolidation. It will conclude with recommendations for:

- the final Union harmonised methodology,
- the roll out of the methodology in all Member States,
- the consolidation and management of data at Union level.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The report on establishing an EU strategy for sustainable tourism adopted in March 2021 by the European Parliament asked for the implementation of an EU tourism data space, also mentioned in the Tourism Transition Pathways delivered by the Commission.

By 2025, 90 % of people who are without formal education should be regular internet users. Nowadays, 67,8 % of people with low or no education use the internet less than once a week. Simultaneously, Members States and companies across Europe should have completed retraining of 20 % of the workforce, leaving only 32 % of workers in need of reskilling. Currently, an estimated 52 % of workers need some form of reskilling. Workers in a range of sectors, especially in tourism have seen their jobs radically change in the past few years, and this was accelerated during the pandemic.

This new proposal intends to be a continuation of preparatory action PA 03 24 03 'Upskilling and reskilling the Tourism Ecosystem' tabled during the last budget exercise by the Tourism Task Force. Several results were achieved. The EU competence centre for data management D3Hub supports tourism destinations and their ecosystem (with special focus on SMEs) in their data-driven green and digital transition in order to increase collaboration and knowledge transfer between tourism stakeholders. Existing tools should be taken into account (such as the EU competence centre for data management D3Hub and for support of DMOs, the European Digital Innovation Hubs Network with its newly founded working group on tourism for the support of SMEs, and actions under the call setting up the tourism data space under the Digital Europe Programme) to ensure synergies and avoid overlaps. This project also takes into consideration the Skills Partnership for the Tourism Ecosystem.

- Connect DMOs, SMEs and other tourism stakeholders in order to strengthen existing networks and contact points and to ensure synergies.

Parliament also sees this objective as the first phase for the future implementation of a European Agency for Tourism.

CHAPTER PA 04 — SPACE (*cont'd*)PA 04 24 (*cont'd*)PA 04 24 01 (*cont'd*)

This action intends to support the fast development of game-changing innovations that have the potential to revolutionise the future of access to space and improve the competitiveness of the European space industry. Access to space is an indispensable element of the space ecosystem, without which there is no EU space policy, which supports many political priorities.

The preparatory action is expected to focus on the following objectives:

- enabling the development of game-changing innovations for European launch solutions while adopting an innovative implementation method, by supporting the different development cycles of technology and showing willingness to concretely use those technologies on future launchers;
- facilitating industry's initiative to propose disruptive technologies. The industry should propose innovative solutions for the next generation of cheaper, more sustainable, agile and resilient access to space. They should do so by focusing on ambitious innovations which are not yet available, and go beyond the state of the art in the international pipelines for access to space.

The preparatory action should be implemented through a progressive approach for competitive calls starting with a proof-of-concept phase started in 2024 and continued with a development phase in the period 2025–2027.

In the first phase, the Commission launched a contest to award prizes to up to five of the most disruptive and game-changing innovations. As a follow-up, a subsequent preparatory action could be considered in 2025, to select the best three innovations identified in the previous phase, and attribute grants for their initial technology development. This will prepare the ground for a dedicated potential access to space component as part of the future Space programme in the next MFF, where final development and qualification could be supported.

Currently, there is no dedicated Union programme existing or in the pipeline for access to space. Some access to space activities supporting Research & Innovation (R&I) are implemented through the Horizon European R&I Programme. However, those actions do not support the full technology development cycle for access to space.

Putting in competition several technologies would have an added value as it would accompany the development and maturation of the most disruptive technologies all along the development cycle up to flight model delivery. This is not possible through current Horizon Europe / Space Programmes. This would ultimately prepare the ground for a possible future dedicated access to space programme or a dedicated component in the frame of the future EU Space Programme, identifying access to space as a key EU priority, benefiting to both Union institutional and commercial users.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This action is intended to enable timely adoption of the space secure connectivity services provided by IRIS² and GOVSATCOM, filling the gap in Union industrial capability to develop high-performance, cheap and secure satellite user terminals.

The Union is currently implementing measures to provide governments and citizens with secure connectivity via satellite, through the Union secure connectivity programme (IRIS²) and the GOVSATCOM component of the Union Space Programme. These services will be based on a new generation of state-of-the-art satellites, using orbits, frequencies and signal characteristics that have not been used yet by European industry players. The effective utilisation of such services relies therefore on the prompt availability of user terminals and receivers that are compatible with such characteristics. Such terminals and receivers are particularly important for emerging SatCom Service, seamlessly combining terrestrial and SatCom capabilities, for example in the automotive sector.

The objective of this preparatory action is therefore to set the condition for a competitive industry to develop terminals that can be commercialised with minimal additional effort, enabling production and market penetration with the utilisation of open standards.

In particular, the action will support companies in reaching maturity and having a solid business plan to provide high-performance, cheap and secure satellite user terminals. Such terminals would be able to:

- integrate multiple systems and orbits, including non-geostationary satellites in LEO and possibly MEO;
- use the IRIS² frequencies (including Ka-gov);
- suit both commercial and governmental services provided by IRIS²;
- integrate terrestrial networks, 5G standards and possibly IoT applications;
- provide for end-to-end solutions;
- adopt all IRIS² secure features.

CHAPTER PA 04 — SPACE (cont'd)

PA 04 24 (cont'd)

PA 04 24 02 (cont'd)

If successful in the first year, the preparatory action should be implemented through an incremental approach for competitive calls in three phases:

- 2024: EUR 5 million on the proof-of-concept and business case development phase;
- 2025: EUR 25 million on technology development for the prototype & qualification phase;
- 2026: EUR 30 million on industrialisation and commercial prototyping.

The beneficiaries of the action would notably be the Union downstream industry, including New Space players like SMEs and start-ups.

The Union's critical dependencies in these technologies — essential for securing communications of European armed forces and governmental institutions — justify the amount allocated to this preparatory action. The three-phase calls ensure a coherent and effective investment journey to deliver on the action's objectives.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Space systems and services in the Union provide essential services for societal functions and economic activities. In the current geopolitical context, the resilience of space systems and infrastructures is getting critical, as identified by the EU Space Strategy for Security and Defence. The space domain includes all elements relevant for the functioning of space systems and the delivery of space-based services, including the physical space environment, different orbits and spacecraft, their ground and launch infrastructure, radio frequency links, user terminals, information related to and delivered from these space assets, the relating cyber environment and the underlying industrial space sector. Thus, they need to be increasingly resilient and protected.

PA 04 25 *(cont'd)*

PA 04 25 01 *(cont'd)*

SMEs and start-ups in the field of space provide new technologies, services and capacities, including more and more in support of security-related missions. To ensure their reliability, those companies need to establish appropriate level of protection and cyber-resilience. For this reason, it would be appropriate to launch preparatory work to address particular security needs and propose some supportive measures for SMEs and start-ups by offsetting part of their relevant compliance costs and thus, facilitate the development of European solutions. Resilience measures for the space sector should include better coordination and cooperation between public and private space actors, including information exchange on threats and incidents. It could also be envisaged the development and uptake of relevant security standards and a framework for the exchange of best practices among commercial and governmental players on resilience measures.

In this context, the preparatory action could consist of the following actions:

- the mapping of existing innovative solutions and services (including costs and availability) that would enable SMEs and start-ups to increase their level of cyber-resilience;
- the identification of new potential innovative solutions and services that would enable SMEs and start-ups to increase their level of cyber-resilience;
- the identification of technologies and facilities that would need to be developed in the Union such as testing facilities and digital twins, and related roadmaps;
- the identification of potential supportive measures at Union and national level that would enable SMEs and start-ups to offset part of the costs related to the enhancement of their level of resilience.

CHAPTER PA 04 — SPACE (cont'd)

PA 04 26 (cont'd)

PA 04 26 01 (cont'd)

Remarks

The Union recognises the strategic importance of autonomous access to space. It is a prerequisite for the strategic autonomy of the Union and an indispensable element of the Union space policy. Beyond launchers, ground segment and particularly spaceports are critical components for the Union, considering that part of the Union flagships (Galileo, IRIS²) must be launched from the territory of the Union. At the same time, the diversification of launchers, with new solutions arising, poses the question of spaceport access in the Union.

A preparatory action should provide comprehensive assessment of new Union instruments needed and their potential contribution to spaceport development in the Union, develop concepts for an extended Union spaceport range, including technical and design studies, stakeholder consultations, and analysis of best practices, and provide targeted financial support to open access to Union spaceports, monitor progress, and evaluate the effectiveness of Union action and thus consider greater Union intervention in this domain in the future.

Figures (Differentiated appropriations)

Remarks

The exponential increase in active satellites, including mega-constellations, amplifies the risk of orbital collisions and necessitates stronger coordination mechanisms. This preparatory action proposes the development of an EU Platform for Space Traffic Coordination, aiming to structure, secure, and expand coordination between satellite operators, public entities, and commercial SSA providers. It will build on existing services developed under the EU Space Surveillance and Tracking (EUSST) framework.

Objectives

The EU Platform for Space Traffic Coordination will:

- extend coordination beyond EUSST members by enabling the collection and processing of key information, including contact details and manoeuvre data, from non-registered or international actors;
- facilitate secure, real-time information exchange, ensuring interoperability between different levels of automation, from manual coordination to automated collision avoidance;

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 04 — SPACE** (*cont'd*)PA 04 26 (*cont'd*)PA 04 26 02 (*cont'd*)

- reinforce training and capacity building for national authorities and operators, supporting operational readiness and harmonisation of practices across Member States;
- support certification mechanisms for commercial SSA services, to ensure reliability, trust, and accountability in a mixed public-private environment;
- prevent data pollution, through the implementation of technical measures that check ingested data and detect inconsistencies;
- contribute to dual-use coherence, in alignment with Avenue 1 of the STM Communication, which is expected to define civil-military requirements for STM;
- test rules of the road: check the potential implementation of the draft rules of the road developed through the CEN standardisation process.

Scope and Implementation

The preparatory action will establish a coordination platform potentially hosted within the existing EU SST service provision architecture and the link with Users through the front desk (EUSPA). It will prioritise seamless integration and avoid duplication with existing systems.

Use cases include:

- coordination between EUSST registered users and unregistered satellite operators (public, commercial and potentially military);
- ingestion of data from non-EUSST entities;
- verification and validation of data integrity prior to use;
- set-up exercises to prepare satellites operators and Operational Centres to use the coordination mechanisms, including real-time exercises at the later stage;
- exchange with military stakeholders to test the outcomes of the civil-military requirements developed in the sub-group one of the STM Communication;
- implement a sandbox to assess the draft rules of the road currently in development within the CEN project.

Implementation Phases

- engagement & Awareness-Raising: Identify needs and expectations of Member States, commercial operators, and SSA providers (public and private), including military stakeholders;
- design, develop and test the Platform: develop the system to ensure information exchange incl. user interfaces, and coordination mechanisms and required interoperability with other systems;

CHAPTER PA 04 — SPACE (*cont'd*)

PA 04 26 (*cont'd*)

PA 04 26 02 (*cont'd*)

- training & Capacity Building: Develop training programmes and practical tools to support authorities and operators in implementing STM coordination practices;
- data integrity measures and certification framework: Detect inconsistencies and analyse the different systems used by the stakeholders, promoting the development of an Union-level certification process for SSA, especially for commercial providers;
- development of test cases: apply the rules of the road to concrete cases and analyse the outcomes.

Expected Outcomes and Long-Term Vision

- a secure and scalable Union platform for space traffic coordination, operationally connected to EU SST infrastructure;
- increased safety and transparency in orbital operations, including for non-Union and commercial actors. Greater European resilience and autonomy in space operations, consistent with EU strategic goals;
- reinforced trust and accountability through certification and data integrity mechanisms;
- a stepping stone towards the implementation of a future Union Space Act.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

New technologies are changing the opinion-making dynamics and the media landscape dramatically and constantly. They allow easy distribution of information of public interest to wider audiences, thus fostering plurality. That said, the way information is created, searched and distributed online, may also accentuate polarisation as people are exposed to news, sources and ideas that adhere to their expressed preferences. This, in combination with the profit driven platforms, which share data for purely commercial reasons, can significantly undermine the potential to encounter and debate opposing viewpoints, and, as such, may pose a risk for ethical journalism, media pluralism and European democracy itself.

At the same time, in the Union, journalists and other media actors can face violence, severe threats, harassment or public shaming because of their investigative activities which seek to protect the public interest from the misuse of power, corruption, human rights violations or criminal activities. According to the Council of Europe Platform for the Protection of Journalism and Safety of Journalists, state actors commit more than half of the cases of abuses against media professionals.

We are witnessing a tidal wave of disinformation and propaganda rapidly disseminated through the internet and other media. Given the social and political consequences, it is more crucial than ever that our citizens be critical users of both media and social media and acknowledge the importance of journalism as a cornerstone of democracy. It is necessary to invest adequate financial resources in media and digital literacy and in developing common Union strategies, with journalists, academics, international and civil society organisations. This should be done in order to empower citizens and online users to recognise and be aware of dubious sources of information and to spot and expose deliberately false content and propaganda.

PA 07 24 *(cont'd)*

PA 07 24 01 *(cont'd)*

The 'European Festival of Journalism and Media Freedom' (the 'Festival') aims to reinforce dialogue, cooperation and partnership in the Union, especially among journalists, media outlets, civil society organisations and media literacy professionals, focusing on the crucial questions of our time. The 'Festival' should become a powerful tool to facilitate exchanges between media professionals from across Europe, and an occasion to raise awareness on the valuable but ever more difficult work of journalists and press freedom violations in the Union. The Festival should dedicate special focus to the role and work of journalists and it should represent an opportunity to reflect on the conditions under which journalists carry out their daily work, with a focus on psychological and physical aspects, as well as regulatory conditions.

Stronger Union support is pivotal at this time, especially in light of the recently agreed European Media Freedom Act, to promote media pluralism and support the sector of news media in its challenging transition in the digital environment.

By the time the Festival will have taken place, the European Media Freedom Act should enter into force, therefore the Festival would be the first occasion to discuss the effects of this specific piece of legislation, together with a broad representation of different actors affected by the regulatory system in place. In light of the above, stable financial support to this preparatory action would allow it to reach its full potential and achieve the expected results for the benefit of the media sector, in particular journalists.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Disinformation, distrust and polarisation are growing political and security challenges for the Union and this is set to worsen with new AI tools becoming readily available to a larger audience. The availability and quality of information is crucial for the effective functioning of society, especially in a time of crisis. A lot of false information is currently being spread in society, especially via social media. One of the main strategies for fighting fake news is debunking, which consists of confronting it with facts and accepted theories. Unfortunately, existing debunking strategies have proven very ineffective, especially because they do not work with individuals that have strong belief in false information.

CHAPTER PA 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (*cont'd*)PA 07 24 (*cont'd*)PA 07 24 02 (*cont'd*)

Research shows that Twitter, YouTube, Facebook and other influential social media provide a crucial boost for the international network of disinformation (Smith and Graham 2019). Feeding on fear and chaos, spreading fake news and misinterpreting the data, these agents are stronger than ever (Fernández-Luque and Bau 2015). However, social media provide not only a new set of tools for spreading disinformation but also a great weapon against it.

Recent research demonstrates the important role of narratives in framing facts and information in a package that can be easily transmitted across society and how studying narratives can be the key to better understanding how ideas spread across social media and why certain ideas take hold over others. As demonstrated by pilot project PP 07 21 02 'European Narrative Observatory to fight disinformation post-COVID-19', the use of this methodology in understanding the flow of information and how narratives gain traction and spread, represents a valid scientific-based approach. This approach is to be integrated when elaborating policy actions around highly polarised matters and communications activity to inform society and therefore keep disinformation and misinformation at bay. Of particular note is the correlation between increased polarisation in a narrative community and the speed at which disinformation spreads within that community.

The preparatory action will support the European Narratives Observatory (the 'Observatory') to monitor and analyse how new narratives are created and spread within European public discourse, decipher the emotional values that guide successful narratives, map sources and key actors active in the spreading of these narratives and develop recommendations for effective communication and policy.

The use of narrative understanding and analysis is nothing new – having been used very successfully by, for instance, Nelson Mandela in bridging the gap and creating understanding in apartheid South Africa – and the Observatory makes these analyses and understanding more broadly available by providing a value-free map of existing narrative communities and a key to better understanding why certain beliefs are held within certain communities. This makes it easier to communicate effectively and more difficult to spread disinformation.

The preparatory action will build on the networks of stakeholders and actors already established under the pilot project such as journalists, AI experts and the main fact-checker communities, such as the European Digital Media Observatory (EDMO), policy makers and policy actors in working sessions to identify ongoing narratives and develop new ones to combat fake news and disinformation, and so to expand areas of the research infrastructure. It will also keep building on the tools for policy-makers and key stakeholders on how insights from the Observatory can help reframe issues in a way that depolarises conversation and makes the narrative communities less receptive to disinformation.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PA 07 24 (*cont'd*)PA 07 24 02 (*cont'd*)

Building on the work developed by the pilot project, the Observatory will strengthen the existing methodology to expand on the areas and languages analysed and be able to build stronger tools to support key stakeholders - including journalists, fact-checkers, policy-makers – in deploying the insights from the observatory in combatting disinformation and polarisation in public discourse. The current methodology first identifies the dominant narratives by combining natural language processing and more traditional methods of qualitative narratology. By using complex systems science, the Observatory then maps the dynamics of how narratives spread and develop and how the narrative communities interact. This illustrates in real time how narrative communities expand, which narratives grow and take root and how disinformation is deployed in this more complex environment. The third element of the methodology allows the assessment of the deeper correlations and patterns that can be observed with a view to understanding them in more detail.

Tools foreseen to be made fully available during the pilot project phase include: a rapid alert system, manuals to combat disinformation and polarisation and trainings for journalists, fact-checkers and stakeholders on how to better make use of insights from the narrative observatory. The preparatory action would expand on these tools and explore the possibilities offered by AI to further improve the suite of tools and analysis. Like the European Media Monitor, the Observatory provides daily analysis of how narratives and narratives communities spread and develop by monitoring hundreds of thousands of users and narratives across different languages, themes and platforms. It is intended to be a tool which bridges the misunderstandings between polarised communities and reduces the spread of disinformation. This might prove particularly relevant in a world where AI is rapidly expanding and threatening the health of our media ecosystem even more.

For instance, the work developed so far by the Observatory during its ongoing pilot project phase shows the impact of the global pandemic and Russia's war of aggression against Ukraine on climate narratives. By working closely with a broad community of stakeholders, including journalists, fact-checkers and organisations working on climate change the Observatory seeks to provide a number of tools and services to combat the spreading of disinformation on climate change by working with narratives. The Observatory is an additional very useful tool in the European toolbox to combat disinformation and polarisation.

Remembering the words of Ludwig Wittgenstein: 'the world we see is defined and given meaning by the words we choose. In short, the world is what we make of it.'

Building on the work already developed during the pilot project phase – including the existing issue-specific areas of the observatory (including climate change, COVID-19 and migration), the tested methodology, the network of stakeholders, journalists and fact-checkers, and the suite of tools made available, the preparatory action would continue to coordinate with other existing European projects and infrastructures including the EDMO and SoBigData ++ to ensure that there is no duplication of effort and that resources are devoted to supporting the investigative and research work and that the infrastructures and technical support available are used. The preparatory action will support action at national and multi-national level focused on detecting and analysing disinformation campaigns. The results of the preparatory action would be made available to other European and national projects and ensure sharing of best practices and recommendations for effective communication. The preparatory action will also continue to make available interactive databases where research findings on narratives and recommendations can be accessed by users and relevant stakeholders.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The Preparatory Action will create a truly social media public sphere specifically for younger European generations, by portraying the sense of togetherness reflected in a common culture, similar lifestyle, and shared values in a target group-appropriate way. Such a sense of European identity is undermined by the continuously increasing intensity of disinformation aiming to create divisions among young Europeans. This preparatory action focuses on social media platforms, which is an environment where disinformation is particularly prevalent, yet which stands for the vast majority of the media diet of younger generations.

Support for social media spaces specifically addressing – and, more importantly, actually reaching – young Europeans with engaging and constructive narratives related to the European project to counter divisive disinformation campaigns remains limited, despite its importance for the future of European democracy and identification. During the last European elections for example, widespread dissemination of disinformation challenged the information young people received on social media platforms. To address this issue, an audience-centric approach, highly connected and engaged with the target audience is needed that both addresses deceptive and misleading narratives head-on and fosters societal resilience of young audiences against spurious information sources in the mid- to long-term through media literacy. Efficient tools to foster resilience for this are prebunking methods, which help the target audience to recognise misleading narratives and understanding bias. Low-threshold, tailored content can also support young Europeans to identify credible sources and avoid misleading or fraudulent information. Another component is the examination of the opportunities and risks associated with AI and algorithm feeds, including their impact on digital interactions and mental health on the target audience illustrated by current trends. Attempts to manipulate the public debate through disinformation narratives and information manipulation could be tackled by media and information literacy initiatives e.g. with schools or universities.

Young people spend a disproportionate share of their media time on social media whose feeds are powered by algorithms and AI models focusing entirely on commercial logic. This has consequences for current affairs content, which has an increasingly more difficult time achieving any organic reach. To create impact, such content must smartly adapt to this new form of attention economy to contribute, in a technologically healthy way, to networks and platforms where young Europeans gather and engage.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PA 07 25 (*cont'd*)PA 07 25 01 (*cont'd*)

Moreover, social media use shifts from social interaction in large groups and communities to pure video consumption. The Preparatory Action aims at increasing relevant content formats, and narratives for a variety of social media platforms that provoke social interaction among young Europeans to foster togetherness and cross-border exchange. Next to fighting illegal content and societal harms online, it is crucial to simultaneously counter it with credible and trustworthy narratives on the Union and Europe, where Europeans drive the actual 'story-telling'.

These narratives will be made available in all EU languages, or in as many as possible, to achieve comprehensive reach across Member States. Additional non-EU languages widely spoken on the territory of Member States are considered an asset.

In order to attract younger Europeans to European ideas and values, and in order to truly empower European citizens through digital platforms, the preparatory action will support curated online spaces on social media to create, collect and adapt narratives that deal creatively with topics that are of proven interest to young Europeans, and which will contextualise them in order to make them compelling and appealing to the target group. According to several recent multi-country studies, concerns voiced by young Europeans converge on a number of common themes. For instance, the cluster around issues such as the cost-of-living crisis, jobs, and social security is influenced by the experience of inflation and the reversal in interest rates since the second half of 2021. Similarly, young people's intense longing for peace and mental wellbeing was certainly heightened by the experience of long Covid-19 lockdowns and related civil strife, and ultimately by Russia's war of aggression against Ukraine as well as other recent international conflicts.

The wish for wholesale stability and security across all areas of life is perhaps the most important motivation across the board: From physical and mental health to international relations, and from living conditions to the labour market. On a secondary level come issues such as the climate crisis, environmental degradation, as well as social and economic inequality, exclusion, discrimination, and an ever more divisive public sphere. Young people feel increasingly cowed by the current poly-crisis.

The European added-value is created by comparing and contrasting regional experiences and points of view on matters of pan-European importance. The aim is to address relevant Union-level topics, and at the same time give a forum to local as well as community perspectives, allowing young users to identify strongly with the content. The preparatory action will pay particular attention to addressing non-cosmopolitan audiences and young Europeans with fewer opportunities in their mother tongue.

This ambitious pan-European and multilingual initiative will stimulate offline and online, open, true, deep, and constructive debates about current and future life in Europe among young Europeans. By using innovative formats on digital platforms, with the ultimate goal of creating greater awareness about European visions, events and realities and greater engagement of Europeans towards European values and ideas, the action subsequently contributes to a more active and resilient civil society.

Following the expected results of the first cycle, the next phase should be dedicated to the development and deployment of a first demonstrator. Based on the defined objectives of the pilot project, this should include Artificial Intelligence tools as an underlying technology that goes beyond the mere translation and subtitling of content. The first demonstrator should already explore the possibility of using AI to curate content, e.g. by generating trailers and thumbnails of available content where possible. Technological developments, including generative AI, should form a main element of the Portal's search engine and recommendation system, among others. As this could be realised in many ways, the first demonstrator should explore and apply those potential avenues. Key elements are: a non-discriminatory search function, the development of algorithms that place public value at the centre, and a high level of transparency in translation systems, which is necessary to ensure trust in content. It is not only the speed at which developments are taking place in this area - but also the fact that there are no algorithms that are non-discriminatory and in line with European values - that make it necessary to develop these independently.

It is the first project of its kind, aiming at a structured and lasting advocacy and knowledge platform fostering synergies between cultural heritage stakeholders, including cities and regions and programmes from different disciplines and levels of governance in the Union and beyond. In the third year, the first year as a preparatory action - the project would capitalise and build on the results achieved over the pilot project phase to include more stakeholders in the activities of the Hub, through strengthening and sustaining its outcomes, further strengthen a structured dialogue with all Union Institutions, especially Parliament and the Commission, and consolidate its wide geographical coverage, with a special focus on regions and cities in countries with a clear Union integration perspective, e.g. Ukraine, Moldova, the Caucasus and the Western Balkans.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Russia’s war of aggression against Ukraine, accompanied by an information war for minds and hearts, including in Ukraine, other candidate countries, the Union, and in Russia and Belarus, coupled with the elimination of independent media inside Russia and Belarus, presents a responsibility for the Union to take leadership for safeguarding media plurality and independence in the wider regional context.

With freedom of expression as one of the Union’s fundamental values, the Union has now become a major hub for those in Russia and Belarus striving for freedom of expression and democracy. This preparatory action builds on the pilot project of the same name and, by closing the gap in existing Union financing programs, aims to provide continuous support for independent media in exile as long as it takes for democracy to prevail. The preparatory action answers the multiple calls from the European Parliament, the Council and the Commission to support independent media.

CHAPTER PA 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES (*cont'd*)PA 07 25 (*cont'd*)PA 07 25 04 (*cont'd*)

Despite external and internal challenges in the area of press freedom, the Union remains the world's safest place for media and journalists to do their work. Independent journalists and entire editorial newsrooms from Russia and Belarus have already fled and reallocated to the Union. They are continuing their work in the fight for democracy in their home countries, but from a safe area within the Union, where they are not at risk of brutal repressions, reprisals, and imminent imprisonment for telling the truth. The grip of power in Russia and Belarus has become stronger in these past two war years. The situation is deteriorating, and information space is shrinking. Many journalists, civil society, and opposition leaders have been silenced, some forever. At the same time, support is needed also for Ukrainian media and their staff who have come to the Union together with war refugees from Ukraine.

Media organisations face an immediate lack of resources to continue their activities, challenges of establishing viable business models in the face of increasing closure and constraints in the Russian-Belarusian information and physical space, as well as a general decline in people's purchasing power as a result of the war. Unlike emergency solutions, where like-minded partners played a major role in solving acute financial and resource problems of media relocating to the Union in a matter of first months, this preparatory action aims to offer a predictable support mechanism that provides core support, opportunities for innovation and development in the longer term. It will improve and expand support provided by the pilot project.

The goal of the preparatory action is to promote the preservation of a pluralistic media environment of the affected countries, even while journalists and media are working from exile. The broader long-term aim is to make Europe a safe place by helping the people of Russia and Belarus in their democratic aspirations, where independent media play an indispensable role.

The preparatory action aims to build on the precise support needs identified by the pilot project and subsequently to provide appropriate support for independent media and journalists from Ukraine, Russia, and Belarus who have relocated and are working from Member States by:

- continuously assessing and re-evaluating the needs and challenges of independent newsrooms and professional journalists who have relocated their operations. This becomes particularly crucial given the deteriorating security situation in their respective home countries, which introduces additional layer of complexity, including the imperative to keep themselves, their sources and audience secure;
- establishing, empowering, and extending support networks across multiple Member States to offer tailored assistance to the exile newsrooms and journalists. Overall, the support aims to cultivate conditions for exile media to sustain their work. This includes, but not limited to, aiding the exploration and introduction of viable business models, introducing innovative technical and content format solutions to reach audiences (including those with possibly limited access to the internet and other resources), as well as seeking synergies and promoting sharing of best practices, promoting networking (in particularly among exile media), all while ensuring media independence and fostering plurality.

Building on the previous succesful pilot project, the aim of this preparatory action is to continue sport emergency programmes in the context of humanitarian crisis such as war in order to facilitate overcoming traumas, adapting to new environments and creating bonds with the temporary hosting communities.

Through sport activities and interventions, this preparatory action will focus on encouraging community integration of children and youth. By improving their mental well-being by attending sport sessions, these individuals will eventually become ready to adjust to their new environment. Sport with its power of bringing people together will help with interaction with the host community, easier integration into the education system or entering the labour market.

To achieve the best results those programmes should be organised at the local, grassroots level. Activities, games and sports must be designed in order to meet specific social and psychosocial goals. They need to be age appropriate, culturally appropriate and be considered in respect to the gender roles in the community. Building on the existing physical capacities of participants, experienced coaches will help them to feel comfortable by encouraging them to perform skills that they already know.

Therefore, cooperation between sport organisations and social/psychological centres would be required.

The main focus group consisted of children and young people affected by humanitarian crises and mass migration processes in the context of war. This pilot project would also generate inclusion in the public space and promote the exchange of cultures and traditions of different ethnic groups.

In order to reach the highest effectiveness possible, those programs should be implemented at the local level, involving only one member State, which is not possible under the current Erasmus+ Sport actions.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The objective of this preparatory action is to support the development and deployment of a coordination centre for an EU Biodiversity Observation Network.

Biodiversity is fundamental to human well-being and a healthy planet yet it is declining faster than at any time in human history. The biosphere is being altered to an unparalleled degree, eroding the health of ecosystems and flow of ecosystem services, on which our very existence depends. The drivers behind this decline are anthropogenic, namely land and sea use, direct exploitation of organisms, climate change, pollution and invasion of alien species. Swift actions are needed to mitigate them and put biodiversity back on the path of recovery.

To bend the curve on global biodiversity loss, nearly 200 countries agreed in December 2022 on new biodiversity goals and targets, in the so-called Kunming-Montreal Global Biodiversity Framework (GBF). The Union is firmly committed to leading by example. The global framework is well aligned with the EU Biodiversity Strategy for 2030, and other key flagship initiatives of the European Green Deal.

The implementation of the biodiversity policy frameworks has to be well monitored, in order to ensure effective tracking of the progress towards the goals and targets. The robust policy monitoring will depend on the regular and frequent provision of high-quality data and information, underpinned by a systematic field observation of biodiversity over a long time frame. This is not currently the case in the Union. Biodiversity data of good quality which is available at an adequate spatial and temporal scale is scarce, leading to significant knowledge gaps. While it clearly demonstrates the dire state of biodiversity in the Union, the existing data is insufficient to generate actionable knowledge – knowledge that enables development and deployment of well targeted actions to tackle the drivers of biodiversity loss, in a cost-effective manner and at different spatial scales.

Furthermore, biodiversity data collection is dispersed among a wide range of non-governmental organisations, public authorities, research networks and the private sector mainly for environmental impact assessments. Most biodiversity observation programmes do not have the necessary spatial and temporal resolution to assess the state and the trends of species and habitats and their dependence on the pressures exerted upon them. Moreover, there is no common objective or mandate across all the actors involved in the data collection, curation, modelling and use. The challenge is therefore also to harness scientific advances and bring together Member States, stakeholders, various institutions, and other organisations or initiatives to strengthen current efforts and devise a structured and cost-effective Union-level approach to biodiversity observation.

CHAPTER PA 09 — ENVIRONMENT AND CLIMATE ACTION (*cont'd*)PA 09 24 (*cont'd*)PA 09 24 01 (*cont'd*)

The EU Biodiversity Strategy put in place the Knowledge Centre for Biodiversity (KCBd), with an aim to organise and mobilise existing knowledge in systematic monitoring of the policy implementation. However, no dedicated mechanism or instrument exists at Union level to coordinate and foster the generation and use of high-quality data that underpins that biodiversity knowledge base and to provide guidance and trainings on the metrics to be used. This is a major bottleneck for an effective implementation of the EU Biodiversity Strategy for 2030 and Union commitments to the GBF, in particular for its mainstreaming goals.

More than ever, the Union needs to step up the efforts in raising the capacity for biodiversity observation. First steps have been taken through the Horizon 2020 project EuropaBON. This preparatory action proposes a design for a European Biodiversity Observation Network to monitor the status and trends of European biodiversity and ecosystems. It has identified (i) the key users' needs, (ii) the major monitoring initiatives in place, (iii) the minimum list of essential biodiversity variables to be monitored, and (iv) the gaps and bottlenecks still hampering a fluid and functional biodiversity data collection and analysis flow in Europe. Besides data gaps, another major bottleneck is the use of existing data, which is not maximised. Integration of current biodiversity data flows across all variables and realms is insufficient. Relevant institutions often miss advanced statistical and modelling technical skills to coordinate such integration. Only half of the monitoring programmes evaluated by the EuropaBON project have partial automatised and harmonised data streams and, again, only half of them have sufficient data available to derive essential biodiversity variables. The EuropaBON project is also developing a blueprint for a so-called Union-level coordination centre that would help to address the identified shortcomings and underpin the implementation of the observation network.

The EuropaBON work is a welcome development in addressing deficiencies in securing high quality biodiversity data in the Union. However, no clear follow-up steps have been planned by the Commission to operationalise it by testing and piloting its outputs jointly with Member States, and to address options for a coordination centre or a virtual platform. The action is scheduled to finish in 2023, and it is essential to secure timely and ambitious follow-up in 2024 through this preparatory action, in order to put concrete solutions in place and secure adequate data for the assessment of implementation of the EU Biodiversity Strategy.

The preparatory action will address the urgent need for coordination, integration, harmonisation and strengthening of biodiversity data collection and analysis, in order to inform policymaking at local, national, European and international level. The preparatory action will focus on the operationalisation of a set of biodiversity variables with a direct application in policy and decision-making. This will include capacity building, including professional taxonomic expertise and citizen science.

The preparatory action will contribute to development of the entire data-to-knowledge chain based on direct observations and transparent scientific approaches, and it will prove the added value of investing in clear access and coordination of biodiversity data. It will serve a more robust implementation and impact assessment of public policies, and the elimination of certain barriers for investors and firms to identify nature positive capital flows.

COMMISSION
PREPARATORY ACTIONS**CHAPTER PA 09 — ENVIRONMENT AND CLIMATE ACTION** (*cont'd*)PA 09 24 (*cont'd*)PA 09 24 01 (*cont'd*)

The aim is to exploit the full potential of biodiversity-related data in Europe by (a) bringing together, augmenting, empowering and coordinating existing observation schemes, (b) assimilating and harmonising Union, national and local data, and (c) helping design new (standardised) observation schemes to fill data gaps.

Specifically, the preparatory action will support the following activities:

- piloting and testing a Union biodiversity observation service, featuring key functions and services as proposed under the EuropaBON project, by building on, connecting and reinforcing existing institutions, and thereby contributing to the development of the Global Knowledge Support Service for Biodiversity (GKSSB) adopted at the Convention on Biological Diversity COP15;
- implementing workflows that deliver harmonised Union-wide biodiversity data necessary to build policy-relevant indicators (see EU dashboard and global monitoring framework for the Kunming-Montreal Global Biodiversity Framework);
- providing technical assistance to Member States regarding the implementation of the biodiversity observation network proposed by the EuropaBON project and contributing to the GKSSB;
- building capacity for biodiversity observation by providing trainings for taxonomic experts and strengthening citizen science networks (to be shared with the GKSSB).

Besides EuropaBON, this preparatory action will also build on and contribute to other relevant Horizon Europe projects as well as the pilot project 'Assessing Butterflies in Europe' and preparatory action PA 09 20 01 'EU pollinator monitoring and indicators'. It will be implemented in close collaboration with the KCBD and the European Environment Agency.

EUROPEAN ECONOMIC AREA

EUROPEAN ECONOMIC AREA

Under the Agreement establishing the European Economic Area, the EEA EFTA States take part in a wide range of Union policies covered by heading 1, 2, 3, 5, 6 and 7 of the multiannual financial framework in exchange for a financial contribution to operating appropriations calculated by applying a 'proportionality factor'. This proportionality factor is equal to the sum of the ratios obtained by dividing the gross domestic product at market prices of each EEA EFTA State by the gross domestic product at market prices of all the Member States plus that of the EEA EFTA State concerned.

For 2026 the proportionality factor is estimated at 2,64 % (on the basis of 2024 figures), i.e. 2,43 % for Norway, 0,17 % for Iceland and 0,04 % for Liechtenstein. For budget lines that only cover payments on commitments of the previous programming period, the factor is estimated at 2,23 % (on the basis of 2024 figures), i.e. 2,05 % for Norway, 0,14 % for Iceland and 0,04 % for Liechtenstein.

These financial contributions will not be formally entered into the budget; each budget heading relating to activities in which the EEA EFTA States take part will refer to the EFTA contribution as a memorandum item. A summary table, listing the budget headings concerned and the amounts of the EFTA contribution for each budget heading, is published as an annex to the general budget of the Union. The total EEA EFTA contribution for the operational part for 2026 is estimated at about EUR 631 570 983 in commitment appropriations. The EEA EFTA States will also share in the administrative expenditure directly linked to the implementation of these policies.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET (BY WAY OF INDICATION)

A. INTRODUCTION

This Annex is drawn up in accordance with Article 52(1) and the reporting requirements laid down in Article 52(1), point (d)(iii), of the Financial Regulation.

This Annex covers capital operations and debt management in 2024. In that context, it provides a comprehensive overview of borrowing and lending operations. The overview provides inter alia detailed information on maturities, schedule of payments, interest due on aggregate level, the investor base on the primary market, and, where applicable, the dimension and costs of the common liquidity pool underpinning the diversified funding strategy, as well as the borrowing plan. In terms of the impact to the Union budget these operations give rise to lending (loans), financial liabilities (borrowings) and contingent liabilities.

Budgetary guarantees, i.e. guarantees provided to different implementing partners under the European Fund for Strategic Investments (EFSI), European Fund for Sustainable Development Plus (EFSD+) and external lending mandates, are not presented in this Annex. Additional information on these instruments, their operations and effects on the Union budget are provided in the corresponding working document attached to the draft budget pursuant to Article 41(5) of the Financial Regulation. Additionally, an overarching overview and headroom assessment is provided in the specific annual report pursuant to Article 256 of the Financial Regulation.

In addition, financial liabilities borne by the Union budget as a result of borrowing operations financing non-repayable support under the Recovery and Resilience Facility (RRF) as well as the use of borrowing proceeds for the financing of other Union programmes under NextGenerationEU are covered in detail in this Annex.

This Annex provides in particular an overview of the amount and composition of borrowing activities and associated disbursements of loans as of 31 December 2024.

There are two main types of loans (lending) financed through borrowing-and-lending operations:

- **loans to provide financial assistance to third countries** (i.e. in 2024 outstanding loans related to: macro-financial assistance programme (MFA) loans, policy-based loans and Euratom loans to third countries); and
- **loans to provide financial assistance to Member States** (i.e. in 2024 outstanding loans related to: Balance of Payments (BoP) loans, European Financial Stabilisation Mechanism (EFSM) loans, Euratom loans, SURE loans, RRF loans).

To finance these programmes the Commission uses as of January 2023, a unified funding approach implemented through a diversified funding strategy, which delinks the disbursement of loans to a beneficiary from the issuance of the EU bonds. The diversified funding strategy was established for NextGenerationEU in 2021, but in December 2022 and in accordance with Regulation (EU, Euratom) 2022/2434 of the European Parliament and of the Council of 6 December 2022 amending Regulation (EU, Euratom) 2018/1046 as regards the establishment of a diversified funding strategy as a general borrowing method (OJ L 319, 13.12.2022, p. 1, ELI: <http://data.europa.eu/eli/reg/2022/2434/oj>), it was extended to also cover programmes of financial assistance for which the basic acts entered into force on or after 9 November 2022, thereby creating a unified funding approach to finance these programmes. Back-to-back lending – which is the approach that the Commission used before, in which each loan is funded with a corresponding EU bond that fully matches the Union loan in terms of its maturity, interest rate and repayment schedule – remains still possible in duly justified cases. The MFA+ instrument for Ukraine, which came into force on 14 December 2022, was the first programme to which this diversified funding strategy was extended.

The repayments by the beneficiaries are used to service the debt of the Union, giving rise to contingent liabilities. Whether or not these contingent liabilities result in actual losses, and the size of any such losses, will depend on future events which are difficult to predict. Due to the delinking of the loan disbursements from the issuance of the EU bonds, operations under the diversified funding strategy also give rise to financial liabilities in the Union budget.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET (BY WAY OF INDICATION)

For loans granted, the total outstanding nominal amount on 31 December 2024 was EUR 296 390 940 273, of which a total of EUR 249 241 418 845 referred to operations inside the Union and EUR 47 149 521 428 outside the Union. Consequently, the gross carrying amounts of outstanding operations covered by the Union budget totalled EUR 299 109 921 601,97 (nominal amounts including accrued interest and amortised costs) of which a total of EUR 251 457 409 081,41 referred to operations inside the Union and EUR 47 652 512 520,56 outside the Union. For those loans granted outside the Union, the expected credit loss recognised in the Union's financial statements on 31 December 2024 amounts to EUR 15 996 212 108,53. The expected credit loss is not reflected in the gross carrying amount of the loans.

For borrowing operations, the total outstanding nominal amount on 31 December 2024 was EUR 601 303 000 000 of which a total of EUR 155 593 000 000 was financed under back-to-back operations and EUR 445 710 000 000 was financed under the unified funding approach used to finance loans and non-repayable support under NextGenerationEU, MFA+ for Ukraine and MFA for Egypt and Ukraine Facility. Consequently, the outstanding operations covered by the Union budget totalled EUR 594 027 710 227 in gross carrying amount (nominal amount including accrued interest and amortised costs). Since the implementation of the unified funding approach in 2023, it is not possible to make a distinction between funding of operations inside and outside the Union as the bond proceeds are allocated to a central funding pool before being allocated to relevant programmes.

In 2024 issuances of EU bonds were executed via auctions and syndications in line with pre-announced planning, taking into account expected disbursement needs. By the end of 2024, EU bonds issued via syndications had in total attracted more than 1 900 different investors from over 70 different countries. Over 65 % of investment in EU bond syndications has come from investors located in the Union, and almost 20 % has come from international investors operating from the UK. The remainder has come from international investors in Asia or other non-EU European countries like Norway and Switzerland. Over 65 % of the EU bonds issued have been obtained by buy-and-hold investors (i.e. fund managers, insurance companies, pension funds and central banks / official institutions). There is also a good representation of investors wanting different maturities. Central banks / official institutions and bank treasuries (which usually prefer to invest in bonds with maturities of up to 10 years) account for about 47 % of purchases of EU bonds in the primary markets in syndicated transactions, while pension funds and insurance companies (which prefer maturities of above 10 years) account for over 20%.

The annual average cash holdings in the central funding pool for 2024 stood at EUR 40 617 730 700 reflecting slower than initially planned cash outflows. Liquidity holdings generated a net income of EUR 140 000 000 from January to December 2024, which was shared proportionately between the Union budget and loan beneficiaries (RRF and Ukraine under MFA+).

In line with the methodology for calculating the interest costs incurred by beneficiaries of funding under the diversified funding strategy as set out by Commission Decision (EU) 2024/1974 ⁽¹⁾, the cost of funding for loans under the time compartment corresponding to the period January to July 2024 was 3,2 % and for the time compartment corresponding to the period July to December 2024 was 3,0 %.

In relation to the borrowing plan for operations after the end of 2024, in 2025 the Annual Borrowing Decision allows the Commission to issue up to a maximum amount of EUR 170 000 000 000 in long-term funding. The Commission intends to issue EUR 90 000 000 000 of long-term EU bonds between January and June 2025, and EUR 70 000 000 000 between July and December 2025. These amounts were almost entirely raised by December 2025.

⁽¹⁾ The cost allocation methodology distinguishes three different cost categories: (i) cost of funding to finance grant and loan disbursements calculated for six-monthly time compartments, (ii) cost of holding and managing liquidity, and (iii) administrative costs. The interest costs related to NextGenerationEU-funded non-repayable support, such as RRF grants and top-ups to other programmes, are charged to the budget. Conversely, interest costs related to loans funded under the unified funding approach are charged to individual beneficiaries or guarantors per instalment.

1.1. Typology and liability for instruments in 2024

The following table provides an overview of the main instruments, their liabilities and their impact on the Union budget.

1.1.1. Loans for financial assistance to third countries

Instrument	Typology of the instrument	Beneficiary	Third party involved	System of protection under Union budget
MFA+ to Ukraine (2023)	Financial assistance to third country	Third country (Ukraine)		The interest payments and redemptions for debt related to loans under MFA+ to Ukraine will in principle be covered by the loan beneficiary (Ukraine). However, Ukraine may request an interest rate subsidy and the coverage of related administrative costs each year. This request must be made by end of February of the preceding year. If the request is made, the interest rate subsidy will be covered by contributions from Member States through external assigned revenues, and the administrative costs will be covered by the Union budget. In the event that Ukraine does not meet its scheduled payment obligations, the payments for the Union's debt securities related to MFA+ will be covered by the available headroom under the permanent own resources ceiling of the Union budget ⁽¹⁾ .
Exceptional MFA to Ukraine (2022)	Financial assistance to third country	Third country (Ukraine)		The interest payments and redemptions for debt related to the loans under the exceptional MFA to Ukraine will in principle be covered by the loan beneficiary (Ukraine). However, Ukraine may request that the Union provide an interest rate subsidy and cover any related administrative costs by the end of March of each year. In this case, these costs are paid by the Union budget. In the event that Ukraine does not meet its scheduled payment obligations, the payments for the Union's debt securities related to the exceptional MFA to Ukraine will be covered by the common provisioning fund (up to 9 %) ⁽²⁾ and by guarantees from the Member States (up to 61 %) ⁽³⁾ .
Ukraine Facility (2024)	Financial assistance to third country	Third country (Ukraine)		The interest payments and redemptions for debt related to loans under the Facility will in principle be covered by the loan beneficiary (Ukraine). However, Ukraine may request an interest rate subsidy and the coverage of related administrative costs each year. If the request is made, the interest rate subsidy will be covered through the resources available under the Facility. In the event that Ukraine does not meet its scheduled payment obligations, the payments for the Union's debt securities related to Facility loans will be covered by the available headroom under the permanent own resources ceiling of the Union budget ⁽¹⁾ .
MFA for Mediterranean third countries	Financial assistance to third country	Third countries (Jordan and Tunisia)		The interest payments and redemptions for Union debt related to loans under MFA are covered by the loan beneficiaries. In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET (BY WAY OF INDICATION)

Instrument	Typology of the instrument	Beneficiary	Third party involved	System of protection under Union budget
MFA of third countries in central and eastern Europe	Financial assistance to third country	Third countries (Georgia and Ukraine)		The interest payments and redemptions for Union debt related to loans under MFA are covered by the loan beneficiaries. In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.
MFA to the countries of the Commonwealth of Independent States and Mongolia	Financial assistance to third country	Third countries (Armenia, Kyrgyz Republic, Moldova)		The interest payments and redemptions for Union debt related to loans under MFA are covered by the loan beneficiaries. In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.
MFA for the countries of the Western Balkans	Financial assistance to third country	Third countries (Former Yugoslav Republic of Macedonia, Bosnia and Herzegovina, Federal Republic of Yugoslavia, Albania, Montenegro)		The interest payments and redemptions for Union debt related to loans under MFA are covered by the loan beneficiaries. In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.
Euratom loans to improve the degree of efficiency and safety of nuclear power stations in the countries of central and eastern Europe and the Commonwealth of Independent States	Financial assistance to third country	Third countries (Ukraine)	Public operators of third countries	The interest payments and redemptions for Union debt related to loans under Euratom are covered by the loan beneficiaries. In the event of defaults by loan beneficiaries, the payments for Union debt related to Euratom are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %. For Euratom loans, the third country also counter-guarantees the loan given to the public operator.
(¹) The own resources ceiling is the maximum amount of resources that the Commission can ask Member States to contribute in a given year. Currently, this ceiling stands at 1,4 % of EU gross national income (GNI). The available headroom under the own resources ceiling is the difference between this ceiling and the funds that the Union actually needs to cover the expenses foreseen by the Union budget in a given year. (²) The common provisioning fund holds safety buffers for several funding programmes, such as the MFA to third countries. The fund is financed from the Union budget, within the expenditure ceiling of the MFF. As a general rule, for any lending to a third country, the Union budget contributes 9 % of the amount lent to the common provisioning fund. This contribution serves as coverage. Further guarantees may be added on top of this contribution in case additional protection is needed. (³) To ensure the Union's ability to repay the funds borrowed on capital markets or from financial institutions, Member States may provide guarantees for loans to Member States and to third countries with an increased credit risk. Such additional layers of protection are provided for in the basic acts by which the legislator authorises Union's financial assistance programmes.

1.1.2. Loans and related borrowings to provide financial assistance to Member States

Instrument	Typology of the instrument	Beneficiary	Third party involved	System of protection under Union budget
Single Facility Providing medium-term financial assistance for member states' balances of payment (BoP)	Financial assistance	Member States		The interest payments and redemptions for debt related to loans under BoP are covered by the loan beneficiaries. In the highly unlikely event that a Member State does not meet its scheduled payment obligations, the payments for the Union's debt securities related to BoP are covered by the available headroom under the permanent own resources ceiling.
European Financial Stabilisation Mechanism (EFSM)	Budget guarantee / Financial assistance	Member States		The interest payments and redemptions for debt related to loans under EFSM are covered by the loan beneficiaries. In the highly unlikely event that a Member State does not meet its scheduled payment obligations, the payments for the Union's debt securities related to EFSM are covered by the available headroom under the permanent own resources ceiling.
European instrument for temporary support to mitigate unemployment risks in an emergency (SURE)	Financial assistance to Member States	Member States		Member States benefiting from SURE loans cover the interest payments and redemptions for Union debt related to their respective SURE loans. In the highly unlikely event that Member States default, the payments for Union debt related to SURE are covered by the available headroom under the permanent own resources ceiling of the Union budget, as well as a 25 % guarantee provided by all Member States. The 25 % guarantee is equivalent to a further EUR 25 000 000 000.
Euratom loans to improve the degree of efficiency and safety of nuclear power stations in the countries of central and eastern Europe and the Commonwealth of Independent States	Financial assistance to Member States	Member States (Romania and Bulgaria)		The interest payments and redemptions for Union debt related to loans under Euratom are covered by the loan beneficiaries. In the highly unlikely event that a Member State does not meet its scheduled payment obligations, the payments for the Union's debt securities related to Euratom loans are covered by the available headroom under the permanent own resources ceiling.
NextGenerationEU	Financial assistance to Member States	Member States		The interest payments and redemptions for Union debt related to grants provided to Member States under NextGenerationEU are paid from the Union budget. The interest payments and redemptions for Union debt related to loans provided to Member States under NextGenerationEU are covered by the Member States who benefit from these loans. In the highly unlikely event that a Member State does not meet a scheduled payment obligation, the Union could draw on the available headroom under the temporary own resources ceiling of the Union budget to satisfy its payment obligations ⁽¹⁾ .
⁽¹⁾ Decision (EU, Euratom) 2020/2053 provides for a temporary increase of the own resources ceiling by 0,6 percentage points of EU GNI. Those 0,6 percentage points of the Union's GNI are available for a limited time, and will only be used in the context of the recovery from the COVID-19 pandemic. This increase in the own resources ceiling will expire when all funds have been repaid and all liabilities associated with NextGenerationEU have ceased to exist.

2.3. Technical notes on tables

Exchange rate: the amounts in column 2 'Equivalent at date of disbursement' are converted at the rate applicable on the date of signature. As regards refinancing operations, Table 1 shows both the initial operation (e.g. in 1979) and the replacement operation (e.g. in 1986), the amount for the latter being converted at the rate of the initial operation. The resulting duplication affects the annual figures but is eliminated in the total.

All other amounts are converted at the rate applicable on 31 December 2024.

Column 3 'Initial amount paid up to 31 December 2024': with reference to 1986, for example, this column shows the cumulative total of all amounts received up to 31 December 2024 under loans signed in 1986 (Table 1), including refinancing (which produces some duplication).

Column 4 'Amount outstanding on 31 December 2024': these are net figures, with no duplication as a result of refinancing operations. They are obtained by subtracting from the column 3 figure the cumulative total of repayments made up to 31 December 2024, including repayments in respect of refinancing operations (total not given in the tables).

Column 15 = column 4 – column 5.

Column 16 = column 4 – column 5 – column 6.

MFA 2011: following the loan agreement signed by Montenegro on 9 February 2010 pursuant to Council Decision 2008/784/EC of 2 October 2008 establishing a separate liability of Montenegro, and reducing proportionally the liability of Serbia with regard to the long-term loans granted by the Community to the State Union of Serbia and Montenegro (formerly the Federal Republic of Yugoslavia) pursuant to Decisions 2001/549/EC and 2002/882/EC (OJ L 269, 10.10.2008, p. 8, ELI: <http://data.europa.eu/eli/dec/2008/784/oj>), the loans initially granted to Serbia and Montenegro in 2001, 2003 and 2005 have been re-initiated with a virtual starting date in 2011 in order to implement the splitting of the countries.

The first tranche of EUR 100 000 000 was disbursed in October 2017 and the second and last tranche of EUR 100 000 000 was disbursed in July 2019.

On 15 January 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Jordan in the form of loans for a maximum amount of EUR 500 000 000 in two instalments with principal amounts of EUR 250 000 000 and EUR 250 000 000 respectively. On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Jordan for a maximum total amount of EUR 200 000 000 in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. A first tranche of EUR 250 000 000 was disbursed in November 2020 and a second tranche of EUR 250 000 000 was disbursed in July 2021.

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Jordan and Tunisia in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance was provided in the form of loans for a maximum total amount of EUR 600 000 000 (two loan instalments of EUR 300 000 000). A first instalment of EUR 300 000 000 was disbursed in June 2021 and the remaining second instalment of EUR 300 000 000 was disbursed in May 2022.

On 12 April 2024, the Council decided to provide EUR 1 000 000 000 in macro-financial assistance to Egypt to cover part of its financing needs for the fiscal year 2024/2025 and ensure macroeconomic stability, while supporting its home-grown reform agenda in conjunction with the ongoing International Monetary Fund (IMF) programme. This support was disbursed to Egypt in December 2024 in the form of one loan instalment following the fulfilment of the policy conditions agreed with the Union under the programme.

3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1, ELI: <http://data.europa.eu/eli/reg/1994/2728/oj>), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10, ELI: <http://data.europa.eu/eli/reg/2009/480/oj>) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1, ELI: <http://data.europa.eu/eli/reg/2018/409/oj>), any defaults are covered by that fund within the limit of the amount available. Pursuant to Article 32(9) of Regulation (EU) 2021/947 of the European Parliament and of the Council of 9 June 2021 establishing the Neighbourhood, Development and International Cooperation Instrument – Global Europe, amending and repealing Decision No 466/2014/EU of the European Parliament and of the Council and repealing Regulation (EU) 2017/1601 of the European Parliament and of the Council and Council Regulation (EC, Euratom) No 480/2009 (OJ L 209, 14.6.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/947/oj>), the net assets on 31 July 2021 of the Guarantee fund for external actions were to be transferred into the common provisioning fund. That transfer took place on 1 August 2021.

The effect on the budget is thus limited to one annual payment to or, exceptionally, from the Guarantee Fund to maintain its target amount of 9 % of the guaranteed operations.

In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.

2. Description

On 17 November 1997, the Council decided to grant a European Union guarantee for an exceptional borrowing-and-lending operation for Georgia of a maximum amount of EUR 142 000 000 with a maximum duration of 15 years.

The first tranche of EUR 110 000 000 was paid to Georgia on 24 July 1998. The second tranche is no longer to be made.

On 12 July 2002, the Council decided to make available to Ukraine a long-term loan facility of a maximum principal amount of EUR 110 000 000 with a maximum maturity of 15 years, with a view to ensuring a sustainable balance-of-payments situation, strengthening the country's reserve position and facilitating the implementation of the necessary structural reforms. The total amount of the facility was disbursed in 2014.

On 7 July 2010, the European Parliament and the Council decided to make available to Ukraine a long-term loan facility of a maximum principal amount of EUR 500 000 000 with a maximum maturity of 15 years, with a view to ensuring a sustainable balance-of-payments situation. The facility was fully disbursed in two equal tranches in 2014 and 2015.

On 12 August 2013, the European Parliament and the Council decided to make macro-financial assistance available to Georgia of a maximum amount of EUR 46 000 000 (up to EUR 23 000 000 in the form of grants and up to EUR 23 000 000 in the form of loans) for a maximum maturity of 15 years. The first tranche of EUR 10 000 000 was disbursed in April 2015 and the second tranche of EUR 13 000 000 was disbursed in May 2017.

On 14 April 2014, the Council decided to make macro-financial assistance available to Ukraine in the form of loans for a maximum amount of EUR 1 000 000 000 and with a maximum maturity of 15 years, to cover Ukraine's urgent balance of payments needs as identified in the IMF programme. The total amount of EUR 1 000 000 000 was disbursed in 2014.

On 15 April 2015, the Council decided to make macro-financial assistance available to Ukraine of a maximum amount of EUR 1 800 000 000 and with a maximum maturity of 15 years, with a view to supporting Ukraine's economic stabilisation and a substantive reform agenda. The assistance is to contribute to covering Ukraine's balance of payments needs as identified in the IMF programme. The first tranche of EUR 600 000 000 was disbursed in July 2015 and the second tranche of EUR 600 000 000 was disbursed in March 2017.

On 18 April 2018, the Council decided to make macro-financial assistance available to Georgia of a maximum amount of EUR 45 000 000, with a view to supporting Georgia's economic stabilisation and a substantive reform agenda. Of that maximum amount, up to EUR 35 000 000 are to be provided in the form of loans and up to EUR 10 000 000 in the form of grants. The release of the Union's macro-financial assistance is subject to the approval of the Union budget for the relevant year by the European Parliament and the Council. The assistance is to contribute to covering Georgia's balance of payments needs as identified in the IMF programme. The first tranche of EUR 15 000 000 was disbursed in December 2018 and the remaining tranche of EUR 20 000 000 was disbursed in November 2020 (together with the first tranche of EUR 75 000 000 for Georgia under the special MFA COVID-19 programme).

On 4 July 2018, the Council decided to make macro-financial assistance available to Ukraine of a maximum amount of EUR 1 000 000 000, with a view to supporting Ukraine's economic stabilisation and substantive reform agenda. That assistance is to contribute to covering Ukraine's balance of payments needs as identified in the IMF programme. The first tranche of EUR 500 000 000 was disbursed in December 2018 and the second tranche of EUR 500 000 000 was disbursed in June 2020.

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Georgia and Ukraine in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance was provided in the form of loans for a maximum total amount of EUR 150 000 000 for Georgia (two loan instalments of EUR 75 000 000) and EUR 1 200 000 000 for Ukraine (two loan instalments of EUR 600 000 000). The first tranche of EUR 75 000 000 for Georgia was disbursed in November 2020. For Ukraine, the first tranche of EUR 600 000 000 was disbursed in December 2020 and the second tranche of EUR 600 000 000 in October 2021.

On 24 February 2022, the European Parliament and the Council decided to provide further macro-financial assistance to Ukraine of a maximum amount of EUR 1 200 000 000, with a view to supporting Ukraine's economic stabilisation and substantive reform agenda. The assistance is to contribute to covering Ukraine's balance-of-payments needs as identified in the IMF programme. The first instalment of EUR 600 000 000 was divided in two tranches of EUR 300 000 000 which were disbursed in March 2022. The second instalment of EUR 600 000 000 was disbursed in May 2022.

On 6 April 2022, the European Parliament and Council decided to provide further macro-financial assistance to Moldova of EUR 150 000 000 (EUR 120 000 000 in medium-term loans on concessional terms and EUR 30 000 000 in grants). The MFA entered into force on 18 July for two and a half years to be disbursed in three tranches of EUR 50 000 000 each. The first tranche of EUR 50 000 000 was disbursed on 1 August 2022.

On 12 July 2022, the European Parliament and the Council decided to provide further macro-financial assistance to Ukraine of a maximum amount of EUR 1 000 000 000 with a view to supporting Ukraine's macro-financial stability. The amount was divided in two instalments and both of them were disbursed in August 2022.

On 20 September 2022, the European Parliament and the Council decided to provide further macro-financial assistance to Ukraine of a maximum amount of EUR 5 000 000 000 with a view to supporting Ukraine's macro-financial stability. The first instalment of EUR 2 500 000 000 was disbursed in October 2022, the second instalment of EUR 2 000 000 000 was disbursed in November 2022 and the third instalment of EUR 500 000 000 was disbursed in December 2022.

On 14 December 2022, the European Parliament and the Council decided to provide EUR 18 000 000 000 of support in the form of loans to Ukraine for 2023 through a macro-financial assistance + (MFA +) instrument. The general objective of that instrument is to provide short-term financial relief to Ukraine in a predictable, continuous, orderly and timely manner, financing of rehabilitation and initial support towards post-war reconstruction, where appropriate, with a view to supporting Ukraine on its path towards European integration. This comes in the form of highly concessional loans, which are disbursed in regular instalments as of 2023.

On 29 February 2024, the European Parliament and the Council decided to provide EUR 50 000 000 000 in financial support between 2024 and 2027, of which EUR 33 000 000 000 in the form of loans. On 20 March 2024, the Commission disbursed the first EUR 4 500 000 000 of bridge financing to Ukraine under the Ukraine Facility. From August 2024, regular disbursements under the Ukraine Facility started, bringing the total outstanding amount to EUR 13 111 521 428 at 31 December 2024.

3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1, ELI: <http://data.europa.eu/eli/reg/1994/2728/oj>), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10, ELI: <http://data.europa.eu/eli/reg/2009/480/oj>) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1, ELI: <http://data.europa.eu/eli/reg/2018/409/oj>), any defaults are covered by that fund within the limit of the amount available. Pursuant to Article 32(9) of Regulation (EU) 2021/947 of the European Parliament and of the Council of 9 June 2021 establishing the Neighbourhood, Development and International Cooperation Instrument – Global Europe, amending and repealing Decision No 466/2014/EU of the European Parliament and of the Council and repealing Regulation (EU) 2017/1601 of the European Parliament and of the Council and Council Regulation (EC, Euratom) No 480/2009 (OJ L 209, 14.6.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/947/oj>), the net assets on 31 July 2021 of the Guarantee fund for external actions were to be transferred into the common provisioning fund. That transfer took place on 1 August 2021.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET (BY WAY OF INDICATION)

Pursuant to Article 215(1) of the Financial Regulation the provisions made to cover the financial liabilities arising from financial instruments, budgetary guarantees or financial assistance are to be held in a common provisioning fund.

The effect on the budget is thus limited to one annual payment to or, exceptionally, from each relevant compartment of the common provisioning fund to maintain its target amount.

In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.

The macro-financial assistance of up to EUR 1 000 000 000 under Decision (EU) 2022/1201 and of up to 5 000 000 000 under Decision (EU) 2022/1628 constitutes a financial liability for the Union within the overall volume of the External Action Guarantee under Regulation (EU) 2021/947.

The total amount of up to EUR 6 000 000 000 of Union's exceptional macro-financial assistance loans to Ukraine under Decisions (EU) 2022/1201 and (EU) 2022/1628 benefits from 9 % of paid-in provisioning available for macro-financial assistance loans under the External Action Guarantee and from guarantees from Member States (up to 61 %). The amount of provisioning is to be financed from the financial envelope programmed for macro-financial assistance under Regulation (EU) 2021/947 for a total amount of EUR 540 000 000. That amount is to be committed and paid into the common provisioning fund under the multiannual financial framework 2021–2027, laid down in Council Regulation (EU, Euratom) 2020/2093 of 17 December 2020 laying down the multiannual financial framework for the years 2021 to 2027 (OJ L 433 I, 22.12.2020, p. 11, ELI: <http://data.europa.eu/eli/reg/2020/2093/oj>). In addition, during the period from 2021 to 2027, following request by Ukraine, the interest rate subsidy for the loans under those Decisions is to be borne by the financial envelope referred to in Article 6(2), point (a), first indent, of Regulation (EU) 2021/947.

As regards the coverage of the financial liability arising from the EUR 18 000 000 000 of support in the form of loans to Ukraine for 2023 through the MFA + instrument and the EUR 33 000 000 000 in the form of loans under the Ukraine Facility, Regulation (EU, Euratom) 2020/2093 has been amended to allow, as a guarantee, the mobilisation of budgetary resources over and above the multiannual financial framework ceilings and up to the limits of the ceilings referred to in Article 3(1) and (2) of Council Decision (EU, Euratom) 2020/2053 of 14 December 2020 on the system of own resources of the European Union and repealing Decision 2014/335/EU, Euratom (OJ L 424, 15.12.2020, p. 1, ELI: <http://data.europa.eu/eli/dec/2020/2053/oj>). In addition, for the period from 1 January 2023 to 31 December 2027, Regulation (EU) 2024/792 provides for an interest rate subsidy by the Union for the loans under that Regulation. Member States may provide contributions to the interest rate subsidy. These contributions will constitute external assigned revenue in accordance with Article 21(2), point (a), of the Financial Regulation. In addition, for the period from 1 January 2024 to 31 December 2027, Regulation (EU) 2024/792 provides for a borrowing costs subsidy by the Union for the loans under that Regulation.

2. Description

On 17 November 1997, the Council decided to grant a European Union guarantee for an exceptional borrowing-and-lending operation for Armenia for a maximum amount of EUR 28 000 000 with a maximum duration of 15 years.

On 30 November 2009, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for Armenia in the form of a long-term loan for a maximum amount of EUR 65 000 000 in principal for a maximum duration of 15 years. The first tranche of EUR 26 000 000 was disbursed in 2011, the second and final one in 2012.

On 22 October 2013, the European Parliament and the Council decided to make macro-financial assistance available to the Kyrgyz Republic of a maximum amount of EUR 30 000 000 (up to EUR 15 000 000 in the form of grants and up to EUR 15 000 000 in the form of loans) for a maximum maturity of 15 years. The first tranche of EUR 5 000 000 was disbursed in 2015 and the second tranche in April 2016.

On 13 September 2017, the European Parliament and the Council decided to make macro-financial assistance available to Moldova of a maximum amount of EUR 100 000 000 (up to EUR 40 000 000 in the form of grants and up to EUR 60 000 000 in the form of loans with a maximum maturity of 15 years), with a view to supporting Moldova's economic stabilisation and a substantive reform agenda. The first tranche of EUR 20 000 000 was disbursed in October 2019.

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Moldova in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance was provided in the form of loans for a maximum total amount of EUR 100 000 000 (two loan instalments of EUR 50 000 000). The first tranche of EUR 50 000 000 was disbursed in November 2020 and the second tranche of EUR 50 000 000 in October 2021.

On 6 April 2022, the European Parliament and the Council decided to provide further macro-financial assistance to Moldova of a maximum amount of EUR 150 000 000, with a view to supporting Moldova's economic stabilisation and substantive reform agenda. Of that maximum amount, up to EUR 120 000 000 are to be provided in the form of loans and up to EUR 30 000 000 in the form of grants. The assistance is to contribute to covering Moldova's balance-of-payments needs as identified in the IMF programme. The first tranche of EUR 35 000 000 was disbursed in August 2022.

The two tranches of EUR 50 000 000 were each paid in 2013.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET (BY WAY OF INDICATION)

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Albania, Bosnia and Herzegovina, Kosovo, Montenegro and North Macedonia in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance was provided in the form of loans for a maximum total amount of EUR 180 000 000 for Albania (two loan instalments of EUR 90 000 000), EUR 250 000 000 for Bosnia and Herzegovina (two loan instalments of EUR 125 000 000), EUR 100 000 000 Kosovo (two loan instalments of EUR 50 000 000), EUR 60 000 000 for Montenegro (two loan instalments of EUR 30 000 000), and EUR 160 000 000 for North Macedonia (two loan instalments of EUR 80 000 000).

For Albania, the first tranche of EUR 90 000 000 was disbursed in March 2021 and the second tranche of EUR 90 000 000 in November 2021.

For Kosovo, Montenegro and North Macedonia the first tranches were disbursed in November 2020 and the second tranches in June 2021.

For Bosnia and Herzegovina, the first tranche of EUR 125 000 000 was disbursed in October 2021.

On 14 May 2024, the European Parliament and the Council decided to provide EUR 4 000 000 000 for the period from 1 January 2024 to 31 December 2027 to Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia and Serbia under the Reform and Growth Facility for the Western Balkans.

3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1, ELI: <http://data.europa.eu/eli/reg/1994/2728/oj>), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10, ELI: <http://data.europa.eu/eli/reg/2009/480/oj>) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1, ELI: <http://data.europa.eu/eli/reg/2018/409/oj>), any defaults are covered by that fund within the limit of the amount available. Pursuant to Article 32(9) of Regulation (EU) 2021/947 of the European Parliament and of the Council of 9 June 2021 establishing the Neighbourhood, Development and International Cooperation Instrument – Global Europe, amending and repealing Decision No 466/2014/EU of the European Parliament and of the Council and repealing Regulation (EU) 2017/1601 of the European Parliament and of the Council and Council Regulation (EC, Euratom) No 480/2009 (OJ L 209, 14.6.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/947/oj>), the net assets on 31 July 2021 of the Guarantee fund for external actions were to be transferred into the common provisioning fund. That transfer took place on 1 August 2021.

The effect on the budget is thus limited to one annual payment to or, exceptionally, from the Guarantee Fund to maintain its target amount of 9 % of the guaranteed operations.

In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.

Pursuant to Decision 94/179/Euratom (OJ L 84, 29.3.1994, p. 41, ELI: <http://data.europa.eu/eli/dec/1994/179/oj>), the European Union extends the scope of Euratom borrowings under Decision 77/270/Euratom to the improvement of the degree of efficiency and safety of nuclear power stations in the countries of central and eastern Europe and the Commonwealth of Independent States.

The maximum amount of Euratom borrowings for the Member States and third countries remains fixed at EUR 4 000 000 000.

In 2000, the Commission decided on a loan for Kozloduy in Bulgaria (EUR 212 500 000) and the last instalment was in 2006. In 2000, the Commission granted a loan to K2R4 in Ukraine but reduced the loan amount to the EUR equivalent of USD 83 000 000 in 2004. K2R4 was granted a loan of EUR 39 000 000 (first tranche) in 2007, USD 22 000 000 in 2008, and USD 10 335 000 in 2009 under the 2004 Commission Decision. In 2004, the Commission decided on a loan for Cernavodă in Romania (EUR 223 500 000). A first instalment of EUR 100 000 000 and a second one of EUR 90 000 000 were disbursed in 2005 and the last one of EUR 33 500 000 in 2006.

In 2013, the Commission decided to grant a loan to Energoatom, Ukraine, of EUR 300 000 000 for safety upgrades of nuclear power plants. The loan will be provided in cooperation with the EBRD, which provides another EUR 300 000 000 loan in parallel. The conditions precedent to the initial availability of the loan have been assessed as fully met in 2015 and the loan was declared effective.

On 27 May 2015, the Commission authorised disbursements under the Euratom loan to Energoatom in the amount of up to EUR 100 000 000, subject to Energoatom having drawn the loan amount granted by the EBRD in an amount not less than EUR 50 000 000. These loans benefit from State guarantees which cover 100% of the amounts outstanding at year end. The first tranche of EUR 50 000 000 was disbursed in May 2017 and the second tranche of EUR 50 000 000 was disbursed in July 2018. A third tranche of EUR 100 000 000 was disbursed in July 2020 and a final tranche of EUR 100 000 000 was disbursed in December 2021.

3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1, ELI: <http://data.europa.eu/eli/reg/1994/2728/oj>), subsequently replaced by Council Regulation (EC, Euratom) No 480/2009 of 25 May 2009 establishing a Guarantee Fund for external actions (OJ L 145, 10.6.2009, p. 10, ELI: <http://data.europa.eu/eli/reg/2009/480/oj>), amended by Regulation of the European Parliament and of the Council (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1, ELI: <http://data.europa.eu/eli/reg/2018/409/oj>), any defaults are covered by that fund within the limit of the amount available. Pursuant to Article 32(9) of Regulation (EU) 2021/947 of the European Parliament and of the Council of 9 June 2021 establishing the Neighbourhood, Development and International Cooperation Instrument – Global Europe, amending and repealing Decision No 466/2014/EU of the European Parliament and of the Council and Council Regulation (EU) 2017/1601 of the European Parliament and of the Council and Council Regulation (EC, Euratom) No 480/2009 (OJ L 209, 14.6.2021, p. 1, ELI: <http://data.europa.eu/eli/reg/2021/947/oj>) which replaced Regulation (EC, Euratom) No 480/2009, the net assets on 31 July 2021 of the Guarantee fund for external actions were to be transferred into the common provisioning fund. That transfer took place on 1 August 2021.

The effect on the budget is thus limited to one annual payment to or, exceptionally, from the Guarantee Fund to maintain its target amount of 9 % of the guaranteed operations.

In the event of defaults by loan beneficiaries, the payments for Union debt related to MFA are covered up to a level of 9 % of the total amount due by the common provisioning fund. In the event that the common provisioning fund is fully used up, the Union budget must replenish the provisioning fund to the minimum provisioning rate of 9 %.

From 1 January 2007, loans with Bulgaria and Romania cease to be external actions (see Article 1, third paragraph, of Regulation (EC, Euratom) No 2728/94) and are therefore covered directly by the Union budget and no longer by the Guarantee Fund.

LOANS AND RELATED BORROWINGS TO PROVIDE FINANCIAL ASSISTANCE TO MEMBER STATES

VI. SINGLE FACILITY PROVIDING MEDIUM-TERM FINANCIAL ASSISTANCE FOR MEMBER STATES' BALANCES OF PAYMENTS

1. Legal basis

Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1, ELI: <http://data.europa.eu/eli/reg/2002/332/oj>).

Council Decision 2009/290/EC of 20 January 2009 providing Community medium-term financial assistance for Latvia (OJ L 79, 25.3.2009, p. 39, ELI: [http://data.europa.eu/eli/dec/2009/290\(1\)/oj](http://data.europa.eu/eli/dec/2009/290(1)/oj)).

Council Decision 2009/459/EC of 6 May 2009 providing Community medium-term financial assistance for Romania (OJ L 150, 13.6.2009, p. 8, ELI: <http://data.europa.eu/eli/dec/2009/459/oj>).

2. Description

In accordance with Regulation (EC) No 332/2002, the Union may grant loans to Member States which are experiencing, or are seriously threatened with, difficulties in their balance of current payments or capital movements. Only Member States which have not adopted the euro may benefit from this facility. The outstanding amount of loans was limited to EUR 12 000 000 000 in principal.

On 2 December 2008, the Council decided to extend the facility to EUR 25 000 000 000.

On 20 January 2009, the Council decided to provide Community medium-term financial assistance for Latvia in the form of a medium-term loan of a principal of up to EUR 3 100 000 000 for a maximum average maturity of 7 years.

On 6 May 2009, the Council decided to provide Community medium-term financial assistance for Romania in the form of a medium-term loan of a principal of up to EUR 5 000 000 000 for a maximum average maturity of 5 years.

On 18 May 2009, the Council decided to extend the facility to EUR 50 000 000 000.

3. Effect on the budget

Since both parts of these borrowing-and-lending operations are carried out on identical terms, they affect the Union budget only in the highly unlikely event that a Member State does not meet its scheduled payment obligations, whereby the payments for the Union's debt securities related to BoP will be covered by the available headroom under the permanent own resources ceiling. As of 31 December 2022, the outstanding capital amount under this instrument is EUR 200 000 000.

VII. EUROPEAN UNION GUARANTEE FOR UNION BORROWINGS FOR FINANCIAL ASSISTANCE UNDER THE EUROPEAN FINANCIAL STABILISATION MECHANISM

1. Legal basis

Council Regulation (EU) No 407/2010 of 11 May 2010 establishing a European financial stabilisation mechanism (OJ L 118, 12.5.2010, p. 1, ELI: <http://data.europa.eu/eli/reg/2010/407/oj>).

Council Implementing Decision 2011/344/EU of 30 May 2011 on granting Union financial assistance to Portugal (OJ L 159, 17.6.2011, p. 88, ELI: http://data.europa.eu/eli/dec_impl/2011/344/oj).

2. Description

Article 122(2) TFEU provides for the possibility of the Union granting financial assistance to a Member State which is in difficulties or is seriously threatened with severe difficulties caused, inter alia, by exceptional occurrences beyond its control.

The guarantee provided by the Union is for borrowings raised on the capital markets or from financial institutions.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under the European financial stabilisation mechanism is to be limited to the margin available under the Union's own resources ceiling for payment appropriations.

This item constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1, ELI: <http://data.europa.eu/eli/reg/2000/1150/oj>) applies.

On 7 December 2010, the Union decided to make available to Ireland a loan amounting to a maximum of EUR 22 500 000 000, with a maximum average maturity of 7,5 years (OJ L 30, 4.2.2011, p. 34, ELI: http://data.europa.eu/eli/dec_impl/2011/77/oj).

On 30 May 2011, the Union decided to make available to Portugal a loan amounting to a maximum of EUR 26 000 000 000 (OJ L 159, 17.6.2011, p. 88, ELI: http://data.europa.eu/eli/dec_impl/2011/344/oj).

On 11 October 2011, the Council decided to amend Implementing Decisions 2011/77/EU and 2011/344/EU by extending the maturities and applying the reduction of the interest rate margin to all the tranches that have already been disbursed (Implementing Decisions 2011/682/EU and 2011/683/EU).

On 21 June 2013, the Council decided to amend Implementing Decision 2011/77/EU by extending the average loan maturity and providing the possibility to extend instalment maturities at the request of Ireland (Implementing Decision 2013/313/EU).

On 21 June 2013, the Council decided to amend Implementing Decision 2011/77/EU by extending the average loan maturity and providing the possibility to extend instalment maturities at the request of Portugal. In addition, measures to be adopted by the country in line with specification in the Memorandum of Understanding were specified (Implementing Decision 2013/323/EU).

On 22 October 2013, the Council decided to amend Implementing Decision 2011/77/EU by extending the availability of the financial assistance granted to Ireland (Implementing Decision 2013/525/EU).

3. Effect on the budget

Since both parts of these borrowing-and-lending operations are carried out on identical terms, they affect the budget only in the highly unlikely event that a Member State does not meet its scheduled payment obligations, whereby the payments for the Union's debt securities related to EFSM will be covered by the available headroom under the permanent own resources ceiling. On 31 December 2022, the outstanding capital amount under this instrument is EUR 46 300 000 000.

2. Description

Article 122(1) TFEU allows the Council to decide, on a proposal from the Commission and in a spirit of solidarity between Member States, upon the measures appropriate to respond to the socio-economic situation following the COVID-19 outbreak.

Article 122(2) TFEU enables the Council to grant Union financial assistance to a Member State that is in difficulties or is seriously threatened with severe difficulties caused by exceptional occurrences beyond its control.

The creation of a European instrument for temporary support to mitigate unemployment risks in an emergency (SURE) following the COVID-19 outbreak should enable the Union to respond to the crisis in the labour market in a coordinated, rapid and effective manner and in a spirit of solidarity among Member States, thereby alleviating the impact on employment for individuals and the most affected economic sectors and mitigating the direct effects of this exceptional situation on public expenditure by the Member States.

Article 220(1) of the Financial Regulation states that financial assistance by the Union to Member States can take the form of a loan. Such loans should be granted to Member States where the COVID-19 outbreak has led to a sudden and severe increase, as from 1 February 2020, in actual and possibly also planned public expenditure due to national measures. That date ensures equal treatment for all Member States and allows for coverage of their actual and possibly also planned increases in spending relating to the effects on the labour markets of the Member States, irrespective of when the COVID-19 outbreak occurred in each specific Member State. The national measures, which are understood to be in line with the relevant fundamental rights principles, should be directly related to the creation or extension of short-time work schemes and to similar measures, including measures for self-employed persons, or to some health-related measures. Short-time work schemes are public programmes that in certain circumstances allow businesses experiencing economic difficulties to temporarily reduce the hours worked by their employees, who are provided with public income support for the hours not worked.

Article 5 of Regulation (EU) 2020/672 states that the maximum amount of financial assistance shall not exceed EUR 100 000 000 000 for all Member States.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET (BY WAY OF INDICATION)

3. Effect on the budget

The COVID-19 outbreak has had a massive and disruptive impact on the economic system of each Member State. It therefore calls for collective contributions by Member States in the form of guarantees supporting the loans from the Union budget. Such guarantees are necessary to enable the Union to grant loans of a sufficient order of magnitude to Member States in order to support labour market policies which are under the greatest strain. To ensure that the contingent liability arising from such loans is compatible with the applicable multiannual financial framework and own-resources ceilings, the guarantees provided by the Member States are irrevocable, unconditional and on demand, while additional safeguards should enhance the robustness of the system. In line with the complementary role of such guarantees, and without prejudice to their irrevocable, unconditional and on-demand nature, the Commission is expected, before calling on the guarantees provided by Member States, to draw on the margin available under the own-resources ceiling for payment appropriations to the extent that it is deemed sustainable by the Commission, having regard, inter alia, to the total contingent liabilities of the Union, including under the balance of payments facility established by Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1, ELI: <http://data.europa.eu/eli/reg/2002/332/oj>). In the relevant call on guarantees, the Commission should inform the Member States about the extent to which the available margin has been drawn. The need for guarantees provided by Member States may be reviewed if an agreement on a revised own-resources ceiling is reached.

Since both parts of these borrowing-and-lending operations are carried out on identical terms, they affect the budget only in the highly unlikely event that Member States default, whereby the payments for Union debt related to SURE will be covered by the available headroom under the permanent own resources ceiling of the Union budget, as well as the 25 % guarantee provided by all Member States. As of 31 December 2022, the outstanding capital amount under this instrument is EUR 98 355 000 000.

2. Description

The COVID-19 pandemic constitutes a widespread and severe public health crisis. It severely affects citizens, societies and economies worldwide. The extent of the health crisis and the policy responses taken to control it are unprecedented.

A comprehensive plan for European recovery has called for massive public and private investment at European level to set the Union firmly on the path to a sustainable and resilient recovery, creating high-quality jobs and repairing the immediate damage brought by the COVID-19 pandemic whilst supporting the Union's green and digital priorities. To provide the financing for Regulation (EU) 2020/2094, the Commission proposed an amendment to Decision (EU, Euratom) 2020/2053 which has authorised the Union to borrow temporarily and exceptionally an amount of EUR 750 billion in 2018 prices, to increase the own resources ceiling to accommodate the liabilities and contingent liabilities for loans to the Member States. Regulation (EU) 2020/2094 determines the allocation of funds to different Union programmes in line with the strategy set out in the European Union Recovery Plan.

Up to EUR 384,4 billion in 2018 prices may be used for non-repayable support and repayable support through financial instruments.

Up to EUR 360 billion in 2018 prices may be used to provide loans to Member States ⁽¹⁾. The Union will bear contingent liability in the form of a guarantee for those loans until they are repaid.

Up to EUR 5,6 billion in 2018 prices may be used for provisioning for budgetary guarantees and related expenditure.

The European Union Recovery Instrument provides funding for measures and actions to be carried out as outlined in the European Union Recovery Plan. The resources raised through the issuance are to finance the following measures: (a) measures to restore employment and job creation; (b) measures in the form of reforms and investments to reinvigorate the potential for sustainable growth and employment in order to strengthen cohesion among Member States and increase their resilience; (c) measures for businesses affected by the economic impact of the COVID-19 crisis, in particular measures that benefit small and medium-sized enterprises as well as support for investment in activities that are essential for strengthening sustainable growth in the Union, including direct financial investment in enterprises; (d) measures for research and innovation in response to the COVID-19 crisis; (e) measures for increasing the level of the Union's crisis preparedness and enabling a quick and effective Union response in the event of major emergencies, including measures such as stockpiling of essential supplies and medical equipment and acquiring the necessary infrastructures for rapid crisis response; (f) measures to ensure that a just transition to a climate-neutral economy will not be undermined by the COVID-19 crisis; (g) measures to address the impact of the COVID-19 crisis on agriculture and rural development.

⁽¹⁾ 13 Member States have requested a loan ahead of the legal deadline of 31 August 2023. If these additional loan requests are positively assessed by the Commission and approved by the Council, around EUR 292,6 billion in current prices of loan support would be committed under the RRF, which is about 76 % of the EUR 385,8 billion in loan support that is available under the RRF. For more information, see Overview of Member States' loan requests under the RRF (europa.eu).

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET (BY WAY OF INDICATION)

With respect to the allocation of the funds, up to EUR 384 400 million in 2018 prices in the form of non-repayable support and repayable support through financial instruments are to be allocated as follows: (i) up to EUR 47 500 million in 2018 prices for structural and cohesion programmes of the multiannual financial framework 2014-2020 as reinforced until 2022, including support through financial instruments; (ii) up to EUR 312 500 million in 2018 prices for a programme financing recovery and economic and social resilience via support to reforms and investments; (iii) up to EUR 1 900 million in 2018 prices for programmes related to civil protection; (iv) up to EUR 5 000 million in 2018 prices for programmes related to research and innovation, including support through financial instruments; (v) up to EUR 10 000 million in 2018 prices for programmes supporting territories in their transition towards a climate-neutral economy; (vi) up to EUR 7 500 million in 2018 prices for development in rural areas.

In addition, up to EUR 360 000 million in 2018 prices are to be allocated in loans to Member States for a programme financing recovery and economic and social resilience via support to reforms and investments and up to EUR 5 600 million in 2018 prices are to be allocated for provisioning for budgetary guarantees and related expenditure for programmes aiming at supporting investment operations in the field of Union internal policies.

The actions and measures will be carried out in accordance with the conditions laid down in the basic acts establishing the policy instruments. This is why the Commission presented in parallel the necessary legislative proposals ensuring that those policy instruments can receive external assigned revenues resulting from the implementation of Regulation (EU) 2020/2094.

3. Effect on the budget

Regulation (EU) 2020/2094 provides financial support from external assigned revenue from the Union's borrowing authorised under Article 5 of Decision (EU, Euratom) 2020/2053 for non-repayable support, repayable support through financial instruments and for provisioning for budgetary guarantees and related expenditure. This entails the need to foresee commitment and payment appropriations to cover amounts falling due for the borrowing (for coupon payments and redemptions at maturity). No new net borrowing will take place after 2026. The repayment of the funds has been scheduled in accordance with the principle of sound financial management, so as to ensure the steady and predictable reduction of liabilities. All liabilities are scheduled to be fully repaid at the latest by 31 December 2058. The necessary appropriations foreseen in the MFF financial programming to cover potential coupon payments over the period 2021-2027 are compatible with the Multiannual Financial Framework, and in particular Heading 2 'Cohesion, Resilience and Values' (excluding 'Economic, Social and Territorial Cohesion'). Future Multiannual Financial Frameworks will need to provide the necessary appropriations to cover coupon payments and redemptions at maturity. Loans will be repaid by the beneficiary Member States and the Union will bear only contingent liability compatible with the specific own resources ceiling.

For the borrowing, the Union counts on its high credit rating to get favourable financial terms. To protect this rating, the Union has used the Union budget headroom as a guarantee, in accordance with Article 6 of Decision (EU, Euratom) 2020/2053. The headroom is the difference between the maximum amount of revenue that the Union can raise for the Union budget and the actual spending from the Union budget. It therefore guarantees that the Union can always deliver on its commitments, no matter the circumstances. To guarantee the borrowing under NextGenerationEU, the Union has a headroom that is 0,6 percentage points higher than the standard one, for the period until 2058.

Introduction to the nomenclature

The nomenclature for the Multiannual Financial Framework (MFF) 2021-2027, as decided following the adoption of the 2021 Union budget, allows for clearer, more informative and better aligned links between the MFF headings and programmes.

Since the 2021 Union budget and in line with the political agreement on the MFF 2021-2027, the budget nomenclature is structured by programme cluster (policy area) corresponding to the 'purpose' within the meaning of Article 47 of the Financial Regulation.

The first 15 titles correspond to the programme clusters within MFF headings 1 to 6 as presented in the MFF 2021-2027 proposals of May 2018 and 2020. Title 16 includes expenditure outside the annual ceilings set out in the MFF, mainly special instruments.

Within these first 16 titles, the structure in chapters has been harmonised as follows:

- Chapter 01 groups the support expenditure financed from the envelopes of the programmes included in the title as requested by the Financial Regulation.

The support expenditure of each programme is classified in articles (and further broken down to item level where necessary) following the sequence of the operational chapters.

The operating subsidies of executive agencies charged to the envelopes of the programmes delegated to them are presented under standardised items allowing them to be easily identified across the whole nomenclature: XX 01 XX 7X.

- Chapters 02 to 07 (number varying from one title to another) group the operational expenditure of the programmes included in the title, broken down in articles (and items) that correspond to the specific objectives defined in the sectoral legal bases;
- Chapter 10 groups the Union contributions to the decentralised agencies included in the title;
- Chapter 20 groups the following types of expenditure:
- Article 01 includes the total expenditure of the pilot projects of the title;
- Article 02 includes the total expenditure of the preparatory actions of the title;
- Article 03 includes expenditure that is not part of a programme but for which a basic act exists;
- Article 04 includes the expenditure relating to actions financed under the prerogatives of the Commission and specific powers conferred on the Commission.

Title 20 includes the administrative expenditure of the Commission and Title 21 the pensions (of former staff and members of all Union institutions) and the contributions to the European Schools. These two titles include the expenditure falling under the MFF heading 7 'European Public Administration'.

Finally, Title 30 constitutes the 'provisions' title foreseen in Article 49 of the Financial Regulation.

Two complementary nomenclatures

The main nomenclature of the Commission is complemented by two nomenclatures under Annexes 1 and 2 of this section:

- in accordance with Article 65 of the Financial Regulation, Annex 1 sets out in further detail the expenditure of the six offices (O1 to O6). That annex follows a structure by office similar to Title 20 of the main nomenclature where the total expenditure of each office is entered into specific budget lines (under Chapter 3);
- Annex 2 presents each individual ongoing pilot project and preparatory action with the following standardised structure:
- a separate title is provided for the pilot projects 'PP' and for the preparatory actions 'PA';

- within each of these two titles, chapters corresponding to the programme cluster from which pilot projects and preparatory actions are financed. The total expenditure by chapter in Annex 2 corresponds to the amounts of expenditure presented under Articles XX 20 01 and XX 20 02 of the main nomenclature for pilot projects and preparatory actions, respectively;
- within each chapter, articles correspond to the budgetary year in which the pilot projects and preparatory actions were adopted.
