Remarks

The GNI-based resource is an ‘additional’ resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments, the plastic-based own resource and other revenue in any particular year. By implication, the GNI-based resource ensures that the budget is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (plastic-based own resource, VAT-based resource, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States’ GNI for financial year 2024 is 0,4777 %.

Remarks

In accordance with Article 18 of the Financial Regulation, the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 39 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 1(1) of Regulation (EU, Euratom) 2021/768.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 16 05 01 of the statement of expenditure in Section III ‘Commission’.
