In the two years up to May 2025, his wealth increased very considerably, which contrasts with his assertions that he is no longer involved in business.</p> <p>Dmitry Pumpyansky is former Chairman of the board of directors of TMK PAO and former President and a board member of Group Sinara. In those capacities, he supported and benefitted from cooperation with authorities of the Russian Federation and state-owned enterprises, including Russian railways, Gazprom and Rosneft. Irrespective of the purported sale of TMK and Group Sinara, he still has ongoing links with those companies and has seen his financial worth increase considerably in the last two years.</p> <p>Despite the purported sale of TMK, Dmitry Pumpyansky remains the owner of TMK Steel Holding Limited, the Cypriot holding company for the TMK Group. Cypriot authorities have refused to allow the transfer of ownership of this entity.</p> <p>These elements show that Dmitry Pumpyansky is a leading businessperson operating in Russia and a businessperson involved in economic sectors providing a substantial source of revenue to the Government of Russia, which is responsible for annexation of Crimea and destabilisation of Ukraine.</p>	9.3.2022

Murmansk-17, 1) Date of registration: 6.12.2002 Registration number: 5192110268 (Tax Identification Number) Principal place of business: Russian Federation IMO number: 1451236	Atomflot is a Russian company that maintains Russia's icebreaker fleet. The icebreaker fleet managed by Atomflot is designed specifically to meet Russia's maritime transportation objectives along the Northern Sea Route – the Arctic shortcut between Europe and Asia. The Northern Sea Route has emerged as a new strategic opportunity for unlocking and monetising Russia's vast oil and gas reserves in the Arctic, thereby providing a substantial source of revenue to the government of the Russian Federation. With oil and gas exports shifting from Europe to Asia as a result of Russia's war of aggression against Ukraine and subsequent Western sanctions, Russia's icebreaker fleet is key to the country's Arctic hydrocarbon strategy. In order to escort oil and gas tankers on the much longer and more challenging voyage from the Yamal and Gydan peninsulas to Asia, rather than the much shorter and less ice-infested route to Europe, Russia relies on Atomflot's fleet of nuclear icebreakers. Therefore, Atomflot is an entity supporting materially or financially, or benefitting from the Government of the Russian Federation, which is responsible for the annexation of Crimea and the destabilisation of Ukraine. Moreover, Atomflot is an entity involved in economic sectors providing a substantial source of revenue to the Government of the Russian Federation, which is responsible for the annexation of Crimea and the destabilisation of Ukraine.	25.2.2023
