▼B**COMMISSION IMPLEMENTING DECISION (EU) 2019/570****of 8 April 2019**

laying down rules for the implementation of Decision No 1313/2013/EU of the European Parliament and of the Council as regards rescEU capacities and amending Commission Implementing Decision 2014/762/EU

(notified under document C(2019) 2644)

(Text with EEA relevance)

*Article 1***Subject matter**

This Decision lays down rules for the implementation of Decision No 1313/2013/EU as regards:

(a) the initial composition of rescEU in terms of capacities and its quality requirements;

▼M1

(b) the financing of capacities during the transitional period referred to in Article 35 of Decision No 1313/2013/EU;

(c) total estimated costs of medical aerial evacuation rescEU capacities;

(d) total estimated costs of emergency medical team type 3 rescEU capacities.

*Article 1a***Definitions**

For the purposes of this Decision, the following definitions shall apply:

(1) ‘medical aerial evacuation capacity (“Medevac”)’ means a response capacity that can be used for aerial evacuation of patients with highly infectious diseases as well as non-infectious diseases, such as patients in need of intensive care, patients who need to be immobilized during transport on stretchers and lightly injured patients;

(2) ‘EMT type 3’ means a deployable emergency team of medical and other key personnel trained and equipped to treat patients affected by a disaster and which provides complex inpatient referral surgical care, including intensive care capacity.

▼B*Article 2***The initial composition of rescEU****▼M1**

1. rescEU shall consist of the following capacities:

- aerial forest firefighting capacities,
- medical aerial evacuation capacities,
- emergency medical team capacities.

▼M1

2. The capacities referred to in paragraph 1 shall include:
- (a) aerial forest firefighting capacities using airplanes;
 - (b) aerial forest firefighting capacities using helicopters;
 - (c) medical aerial evacuation capacities for highly infectious disease patients;
 - (d) medical aerial evacuation capacities for disaster victims;
 - (e) emergency medical team type 3 capacities: Inpatient Referral Care.

▼B

3. The quality requirements for the capacities referred to in paragraph 2 are set out in the Annex.

*Article 3***Financial arrangements for the rescEU capacities referred to in Article 35 of Decision No 1313/2013/EU**

1. The Commission shall define in the annual work programme the criteria for awarding direct grants to cover the costs referred to in Article 35 of Decision No 1313/2013/EU which are necessary to ensure rapid access to capacities corresponding to those referred to in Article 2.
2. The costs referred to in Article 35 of Decision No 1313/2013/EU shall include stand-by costs, including if applicable, costs related to maintenance, costs related to staff, costs related to training, including the training of crew and technical staff, costs related to warehousing, costs related to insurance, as well as other costs necessary to ensure the effective availability of such capacities.

▼M1*Article 3a***Total estimated costs of rescEU medical aerial evacuation capacities**

1. All cost categories referred to in Annex IA of Decision No 1313/2013/EU shall be taken into account when calculating the total estimated cost of rescEU medical aerial evacuation capacities.
2. The category referred to in point 1 of Annex IA to Decision No 1313/2013/EU of the total estimated cost for medical aerial capacities evacuation for highly infectious disease patients and medical aerial evacuation capacities for disaster victims shall be calculated based on market prices at the time when the capacities are acquired, rented or leased in accordance with Article 12(3) of Decision No 1313/2013/EU. Where Member States acquire, rent or lease rescEU capacities, they shall provide the Commission with documentary evidence of the actual market prices or, where there are no market prices for certain components of those capacities, with equivalent evidence.

▼M1

3. The categories referred to in points 2 to 8 of Annex IA to Decision No 1313/2013/EU of the total estimated cost for medical aerial evacuation capacities for highly infectious disease patients and medical aerial evacuation capacities for disaster victims shall be calculated at least once during the period of each multiannual financial framework, taking into account information available to the Commission, including inflation. This cost shall be used by the Commission for the purpose of providing annual financial assistance.

4. The total estimated cost referred to in paragraphs 2 and 3 shall be calculated where at least one Member State expresses interest to acquire, rent or lease such a rescEU capacity.

*Article 3b***Total estimated costs of rescEU emergency medical team type 3 capacities**

1. All cost categories referred to in Annex IA of Decision No 1313/2013/EU shall be taken into account when calculating the total estimated cost of emergency medical team type 3: Inpatient Referral Care.

2. The category referred to in point 1 of Annex IA to Decision No 1313/2013/EU of the total estimated cost for emergency medical team type 3: Inpatient Referral Care shall be calculated based on market prices at the time when the capacities are acquired, rented or leased in accordance with Article 12(3) of Decision No 1313/2013/EU. Where Member States acquire, rent or lease rescEU capacities, they shall provide the Commission with documentary evidence of the actual market prices or, where there are no market prices for certain components of those capacities, with equivalent evidence.

3. The categories referred to in points 2 to 8 of Annex IA to Decision No 1313/2013/EU of the total estimated cost for emergency medical team type 3: Inpatient Referral Care shall be calculated at least once during the period of each multiannual financial framework, taking into account information available to the Commission, including inflation. This cost shall be used by the Commission for the purpose of providing annual financial assistance.

4. The total estimated cost referred to in paragraph 2 and paragraph 3 shall be calculated where at least one Member State expresses interest to acquire, rent or lease such a rescEU capacity.

▼B*Article 4***Amendment to Implementing Decision 2014/762/EU**

Chapter 7 of Implementing Decision 2014/762/EU is deleted.

*Article 5***Addressees**

This Decision is addressed to the Member States.

ANNEX

QUALITY REQUIREMENTS FOR RESCEU CAPACITIES

1. Aerial forest firefighting capacities using airplanes

Tasks	— Contribute to the extinction of large forest and vegetal fires by performing aerial firefighting.
Capacities	— 2 airplanes with a minimum capacity of 3 000 litres each or 1 airplane with a minimum capacity of 8 000 litres ⁽¹⁾ . — Ability to perform continuous operations.
Main components	— Airplane. — Minimum of two crews. — Technical staff. — Field maintenance kit. — Communication equipment allowing air-to-air and air-to-ground communication.
Self-sufficiency	— Equipment storage and maintenance of the equipment of the module; — Equipment for the communication with the relevant partners, notably those in charge of the coordination on site.
Deployment	— Availability for departure maximum 3 hours after the acceptance of the offer in the case of a rapid intervention response ⁽²⁾ . — Ability to be deployed in a range of 2 000 km within maximum 24 hours.

⁽¹⁾ Such requirements may be subject to review based on possible developments on the market of aerial forest firefighting capacities, including in relation to the availability of spare parts.

⁽²⁾ Rapid intervention response is a response operation lasting maximum one day including the flight to and from the site where the rescEU capacity is positioned.

2. Aerial forest firefighting capacities using helicopters

Tasks	— ► C1 Contribute to the extinction of large forest and vegetal fires by performing aerial firefighting ◄.
Capacities	— 1 helicopter with a minimum capacity of 3 000 litres ⁽¹⁾ . — Ability to perform continuous operations.
Main components	— Helicopter with minimum two crews. — Technical staff. — Water bucket or releasing kit. — 1 maintenance set. — 1 spare parts set. — Rescue hoists. — Communication equipment allowing air-to-air and air-to-ground communication.

▼ B

Self-sufficiency	<ul style="list-style-type: none"> — Equipment storage and maintenance of the equipment of the module; — Equipment for the communication with the relevant partners, notably those in charge of the coordination on site.
Deployment	<ul style="list-style-type: none"> — Availability for departure maximum 3 hours after the acceptance of the offer in the case of a rapid intervention response ⁽²⁾. — Ability to be deployed in a range of 2 000 km within maximum 24 hours.

⁽¹⁾ For the purposes of implementing Article 35 of Decision No 1313/2013/EU and when justified based on assessment of regional vulnerability, aerial forest firefighting capacities using helicopters may be composed of maximum 3 helicopters with a total minimum capacity of 3 000 litres.

⁽²⁾ Rapid intervention response is a response operation lasting maximum one day including the flight to and from the site where the rescEU capacity is positioned.

▼ M1**3. Medical aerial evacuation capacities for highly infectious disease patients**

Tasks	<ul style="list-style-type: none"> — Aerial transport, including in-flight treatment of highly infectious disease (HID) patients to specialised health facilities in the Union.
Capacities	<ul style="list-style-type: none"> — Aircraft with a capacity to transport one or more HID patient per flight; — Ability to fly day and night.
Main components	<ul style="list-style-type: none"> — System for safe in-flight medical treatment of HID patients, including intensive care ⁽¹⁾: <ul style="list-style-type: none"> — Appropriately trained medical personnel to provide care for one or more HID patient; — Dedicated on-board technical and medical equipment to provide care to HID patients during the flight; — Appropriate procedures ensuring isolation and treatment of HID patients during the aerial transport. — Support: <ul style="list-style-type: none"> — Aircrew adapted to the number of HID patients and the timeframe of the flight; — Appropriate procedures ensuring the handling of equipment and waste as well as decontamination according to established international standards, including, where applicable, relevant Union legislation.
Self-sufficiency	<ul style="list-style-type: none"> — Equipment storage and maintenance of the equipment of the module; — Equipment for communication with the relevant partners, notably those in charge of the coordination on site.

▼ **M1**

Deployment	<ul style="list-style-type: none"> — Availability for departure maximum 24 hours after the acceptance of the offer; — For intercontinental evacuations, ability to perform a 12-hour flight without refuelling.
------------	---

(¹) Such system may include the containerised approach.

4. Medical aerial evacuation capacities for disaster victims

Tasks	<ul style="list-style-type: none"> — Aerial transport of disaster victims to health facilities in the Union.
Capacities	<ul style="list-style-type: none"> — Aircraft with an overall capacity to transport at least six patients in need of intensive care and with a capacity to transport patients on stretchers or sitting patients, or both; — Ability to fly day and night.
Main components	<ul style="list-style-type: none"> — In-flight medical treatment, including intensive care: <ul style="list-style-type: none"> — Appropriately trained medical personnel capable of providing on-board medical treatment for the different types of patients; — Dedicated on-board technical and medical equipment to provide continuous appropriate care for the different types of patients during the flight; — Appropriate procedures ensuring transport and in-flight treatment of patients. — Support: <ul style="list-style-type: none"> — Aircrew and medical personnel adapted to the number and types of patients and the timeframe of the flight.
Self-sufficiency	<ul style="list-style-type: none"> — Equipment storage and maintenance of the equipment of the module; — Equipment for communication with relevant partners, notably those in charge of the coordination on site.
Deployment	<ul style="list-style-type: none"> — Availability for departure maximum 24 hours after the acceptance of the offer; — For airplanes, an ability to perform a 6-hour flight without refuelling.

5. Emergency medical team type 3 capacities: Inpatient Referral Care

Tasks	<ul style="list-style-type: none"> — Provide inpatient referral care and complex surgery as described by the WHO global EMT initiative.
-------	--

▼ **M1**

Capacities	<ul style="list-style-type: none"> — Minimum treatment capability in accordance with the standards of the WHO global EMT initiative; — Day and night services (covering 24/7 if necessary).
Main components	<ul style="list-style-type: none"> — In accordance with the standards of the WHO global EMT initiative.
Self-sufficiency	<ul style="list-style-type: none"> — The team should ensure self-sufficiency during the entire deployment time. Article 12 of Implementing Decision 2014/762/EU applies and, in addition, the standards of the WHO global EMT initiative.
Deployment	<ul style="list-style-type: none"> — Availability for departure in maximum 48-72 hours after the acceptance of the offer, and ability to be operational on site within 5-7 days. — Ability to be operational for at least 8 weeks outside the Union and for at least 14 days inside the Union.
