COMMISSION IMPLEMENTING DECISION (EU) 2024/3111

of 6 December 2024

amending Implementing Decision (EU) 2024/2918 concerning certain emergency measures relating to sheep pox and goat pox in Bulgaria

(notified under document C(2024) 8774)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2016/429 of the European Parliament and of the Council of 9 March 2016 on transmissible animal diseases and amending and repealing certain acts in the area of animal health ('Animal Health Law') ⁽¹⁾, and in particular Article 259(1) thereof,

Whereas:

- (1) Sheep pox and goat pox is an infectious viral disease affecting caprine and ovine animals and can have a severe impact on the concerned animal population and the profitability of farming causing disturbance to movements of consignments of those animals and products thereof within the Union and exports to third countries.
- (2) In the event of an outbreak of sheep pox and goat pox in caprine or ovine animals, there is a serious risk of the spread of that disease to other establishments of caprine or ovine animals.
- (3) Commission Delegated Regulation (EU) 2020/687 ⁽²⁾ supplements the rules for the control of the listed diseases referred to in Article 9(1), points (a), (b) and (c), of Regulation (EU) 2016/429, and defined as category A, B and C diseases in Commission Implementing Regulation (EU) 2018/1882 ⁽³⁾. In particular, Articles 21 and 22 of Delegated Regulation (EU) 2020/687 provide for the establishment of a restricted zone in the event of an outbreak of a category A disease, including sheep pox and goat pox, and for certain measures to be applied therein. In addition, Article 21(1) of that Delegated Regulation provides that the restricted zone is to comprise a protection zone, a surveillance zone, and, if necessary, further restricted zone around or adjacent to the protection and surveillance zones.
- (4) Commission Implementing Decision (EU) 2024/2778 ⁽⁴⁾ was adopted within the framework of Regulation (EU) 2016/429, and it laid down certain interim emergency measures relating to infection with sheep pox and goat pox in Bulgaria.

⁽¹⁾ OJ L 84, 31.3.2016, p. 1, ELI: <http://data.europa.eu/eli/reg/2016/429/oj>.

⁽²⁾ Commission Delegated Regulation (EU) 2020/687 of 17 December 2019 supplementing Regulation (EU) 2016/429 of the European Parliament and the Council, as regards rules for the prevention and control of certain listed diseases (OJ L 174, 3.6.2020, p. 64, ELI: http://data.europa.eu/eli/reg_del/2020/687/oj).

⁽³⁾ Commission Implementing Regulation (EU) 2018/1882 of 3 December 2018 on the application of certain disease prevention and control rules to categories of listed diseases and establishing a list of species and groups of species posing a considerable risk for the spread of those listed diseases (OJ L 308, 4.12.2018, p. 21, ELI: http://data.europa.eu/eli/reg_impl/2018/1882/oj).

⁽⁴⁾ Commission Implementing Decision (EU) 2024/2778 of 24 October 2024 concerning certain interim emergency measures relating to sheep pox and goat pox in Bulgaria (OJ L, 2024/2778, 29.10.2024, ELI: http://data.europa.eu/eli/dec_impl/2024/2778/oj).

- (5) After the adoption of Implementing Decision (EU) 2024/2778, Bulgaria notified the Commission of an additional outbreak of sheep pox and goat pox in an establishment where ovine and caprine animals were kept. As a result, Commission Implementing Decision (EU) 2024/2918⁽⁵⁾ repealed and replaced Implementing Decision (EU) 2024/2778. More particularly, Implementing Decision (EU) 2024/2918 provides that the protection, surveillance and further restricted zones to be established by Bulgaria, in accordance with Delegated Regulation (EU) 2020/687, are to comprise at least the areas listed in the Annex to that Implementing Decision.
- (6) Since the date of adoption of Implementing Decision (EU) 2024/2918, Bulgaria has notified the Commission of two further outbreaks of infection with sheep pox and goat pox in establishments where ovine animals were kept, located in the regional unit of Haskovo. The new outbreaks are located within the perimeter of the further restricted zones that were already established as a result of previous outbreaks in the same areas.
- (7) Therefore, the areas listed as protection, surveillance and further restricted zones for Bulgaria in the Annex to Implementing Decision (EU) 2024/2918 should be adjusted, spatially and temporally, in order to prevent the further spread of the disease in Bulgaria and to the rest of the Union, and the duration of the measures to be applied therein should be adjusted.
- (8) The size of the zones and duration of the measures to apply in the protection, surveillance and further restricted zones should be based on the criteria set out in Article 64(1) of Regulation (EU) 2016/429 and the rules laid down in Delegated Regulation (EU) 2020/687, including the epidemiological situation as regards sheep pox and goat pox in the areas affected by that disease and the overall epidemiological situation of sheep pox and goat pox in Bulgaria as well as the level of risk for the further spread of the disease. The duration of the measures should also take into account the international standards of the Terrestrial Animal Health Code of the World Organisation for Animal Health (WOAH⁽⁶⁾).
- (9) The Annex to Implementing Decision (EU) 2024/2918 should therefore be amended accordingly.
- (10) Taking into account the current epidemiological situation in the Union as regards sheep pox and goat pox, the period of application of Implementing Decision (EU) 2024/2918 should be prolonged until 28 February 2025. The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

Article 1
