THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2016/429 of the European Parliament and of the Council of 9 March 2016 on transmissible animal diseases and amending and repealing certain acts in the area of animal health ('Animal Health Law') ⁽¹⁾, and in particular Article 259(1), thereof,

Whereas:

- (1) Sheep pox and goat pox is an infectious viral disease affecting caprine and ovine animals and it can have a severe impact on the concerned animal population and the profitability of farming causing disturbance to movements of consignments of those animals and products thereof within the Union and exports to third countries.
- (2) In the event of an outbreak of sheep pox and goat pox in caprine or ovine animals, there is a serious risk of the spread of that disease to other establishments of caprine or ovine animals.
- (3) Commission Delegated Regulation 2020/687 ⁽²⁾ supplements the rules for the control of the listed diseases referred to in Article 9(1), points (a), (b) and (c), of Regulation (EU) 2016/429, and defined as category A, B and C diseases in Commission Implementing Regulation (EU) 2018/1882 ⁽³⁾. In particular, Articles 21 and 22 of Delegated Regulation (EU) 2020/687 provide for the establishment of a restricted zone in the event of an outbreak of a category A disease, including sheep pox and goat pox, and for certain measures to be applied therein. In addition, Article 21(1) of that Delegated Regulation provides that the restricted zone is to comprise a protection zone, a surveillance zone, and, if necessary, further restricted zones around or adjacent to the protection and surveillance zones.
- (4) Commission Implementing Decision (EU) 2024/2207 ⁽⁴⁾ was adopted on the basis of Regulation (EU) 2016/429 and it lays down certain emergency measures relating to sheep pox and goat pox in Greece. More particularly, Implementing Decision (EU) 2024/2207 provides that the protection, surveillance and further restricted zones to be established by that Member State, in accordance with Delegated Regulation (EU) 2020/687, following outbreaks of that disease are to comprise at least the areas listed in the Annex to that Implementing Decision.
- (5) After the adoption of Implementing Decision (EU) 2024/2207, Greece notified the Commission of additional outbreaks of sheep pox and goat pox in establishments where ovine and caprine animals were kept. As a result, the Annex to that Implementing Decision was duly amended several times to take account of those additional outbreaks.

⁽¹⁾ OJ L 84, 31.3.2016, p. 1, ELI: <http://data.europa.eu/eli/reg/2016/429/oj>.

⁽²⁾ Commission Delegated Regulation (EU) 2020/687 of 17 December 2019 supplementing Regulation (EU) 2016/429 of the European Parliament and the Council, as regards rules for the prevention and control of certain listed diseases (OJ L 174, 3.6.2020, p. 64, ELI: http://data.europa.eu/eli/reg_del/2020/687/oj).

⁽³⁾ Commission Implementing Regulation (EU) 2018/1882 of 3 December 2018 on the application of certain disease prevention and control rules to categories of listed diseases and establishing a list of species and groups of species posing a considerable risk for the spread of those listed diseases (OJ L 308, 4.12.2018, p. 21, ELI: http://data.europa.eu/eli/reg_impl/2018/1882/oj).

⁽⁴⁾ Commission Implementing Decision (EU) 2024/2207 of 29 August 2024 concerning certain emergency measures relating to sheep pox and goat pox in Greece (OJ L 2024/2207, 30.8.2024, ELI: http://data.europa.eu/eli/dec_impl/2024/2207/oj).

- (6) Since the last amendment of Implementing Decision (EU) 2024/2207, Greece has notified the Commission of sixty-two new outbreaks of sheep pox and goat pox in establishments where ovine and caprine animals were kept, in the regional units of Xanthi, Rhodopi, Evros, Kavala, Larisa, Aetolia-Acarnania, Andros, Lemnos, Magnesia, Euboea, Pieria, Corinthia and Thasos. Three of those new outbreaks are located outside the restricted zones that were already established as a result of previous outbreaks, namely in the regional units of Andros, Euboea and Thasos where the disease had not been previously reported.
- (7) Therefore, the areas listed as protection, surveillance and further restricted zones for Greece in the Annex to Implementing Decision (EU) 2024/2207 should be further adjusted in order to prevent the further spread of the disease in Greece and to the rest of the Union or to third countries, and the duration of the measures to be applied therein should be adjusted. Accordingly, it is necessary to amend the list of restricted zones and the duration of the measures to be applied therein set out in the Annex to that Implementing Decision and also delimitate additional protection, surveillance and further restricted zones in relation to the outbreaks in the regional units of Xanthi, Rhodopi, Evros, Kavala, Larisa, Aetolia-Acarnania, Andros, Lemnos, Magnesia, Euboea, Pieria, Corinthia and Thasos.
- (8) The size of the protection, surveillance and further restricted zones and the duration of the measures to apply therein is based on the criteria laid down in Article 64(1) of Regulation (EU) 2016/429 and the rules laid down in Delegated Regulation (EU) 2020/687, including the epidemiological situation as regards sheep pox and goat pox in the areas affected by that disease and the overall epidemiological situation of sheep pox and goat pox in the Member State concerned by that disease as well as the level of risk for the further spread of the disease. The duration of the measures also takes into account the international standards of the Terrestrial Animal Health Code of the World Organisation for Animal Health (WOAH). In the current situation, there is a very high risk of further spread of the disease, in particular due to the fact that, according to the information provided by the competent authority, in less than three weeks a total number of sixty-two new outbreaks of sheep pox and goat pox have occurred in Greece, while outbreaks have occurred for the first time in the regional units of Andros and Thasos, as well as a previously unaffected area of the regional unit of Euboea, suggesting that the disease continues to persist and spread over long distances, in spite of the measures already in place.
- (9) In addition, in view of the occurrence of numerous new outbreaks of sheep pox and goat pox in Greece during the past four weeks, over long distances, and the lack of sufficiently effective measures tackling this increased spread, it is necessary to adopt additional emergency measures in order to avoid the spread of the disease to the rest of the Union and to third countries, as well as unjustified trade barriers. It is therefore necessary to introduce additional restrictions in relation to movements of sheep and goats from the protection and surveillance zones to destinations located outside the external perimeter of the immediately surrounding further restricted zones and from further restricted zones to a destination located outside the external perimeter of these further restricted zones, including destinations located in different further restricted zones, as set out in Part B of the Annex. Additional restrictions are also necessary for movements of sheep and goats from protection and surveillance zones to destinations located within the external perimeter of the immediately surrounding further restricted zones and from a further restricted zone to a destination located within the external perimeter of this further restricted zone except for immediate slaughter as well as movements of sheep and goats from those parts of the territory of Greece that are not listed in the Annex, to destinations located within the restricted zones listed in the Annex.
- (10) In view of the occurrence of numerous new outbreaks of sheep pox and goat pox in Greece during the past weeks, over long distances, it is also necessary to prolong the prohibition on the movement of sheep and goats from the entire territory of Greece, to a destination located outside Greece, at least until 15 January 2025 in order to avoid the spread of the disease to the rest of the Union and to third countries, as well as unjustified trade barriers.
- (11) Taking into account the current epidemiological situation in the Union as regards sheep pox and goat pox, the period of application of Implementing Decision (EU) 2024/2207 should be extended until 31 May 2025.
- (12) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

Article 1

Amendments to Implementing Decision (EU) 2024/2207

Implementing Decision (EU) 2024/2207 is amended as follows:

(1) Article 3 is replaced by the following:

'Article 3

Measures in the restricted zone and additional emergency measures

Greece shall ensure that:

- (a) movements of sheep and goats from protection and surveillance zones to a destination located outside the external perimeter of the immediately surrounding further restricted zone and from a further restricted zone to a destination located outside the external perimeter of this further restricted zone, including destinations located in a different further restricted zone as set out in Part B of the Annex, are prohibited until the dates listed for each such protection, surveillance and further restricted zone in the Annex;
 - (b) movements of sheep and goats from protection and surveillance zones to a destination located within the external perimeter of the immediately surrounding further restricted zone and from a further restricted zone to a destination located within the external perimeter of this further restricted zone, shall only be permitted if they are authorised by the competent authority and the animals are moved directly to a slaughterhouse located within the external perimeter of the same further restricted zone as the establishment of origin, for the purpose of immediate slaughter, until the dates listed for each such protection, surveillance and further restricted zone in the Annex;
 - (c) movements of sheep and goats from those parts of the territory of Greece that are not listed in the Annex, to a destination located within the restricted zones listed in the Annex shall only be permitted if they are authorised by the competent authority and they are moved directly to a slaughterhouse, for the purpose of immediate slaughter, until the dates listed for each such restricted zone in the Annex;
 - (d) the means of transport used for the movements of sheep and goats referred to in points (b) and (c) must:
 - (i) comply with the requirements for the means of transport laid down in Article 24 of Delegated Regulation (EU) 2020/687;
 - (ii) be cleaned and disinfected before any transport of animals under the control or supervision of the competent authority;
 - (iii) only include sheep and goats of the same health status kept in the same establishment;
 - (iv) be sealed by the competent authority at the establishment of origin after the loading of the animals and unsealed by the competent authority at the place of destination;
 - (e) movements of sheep and goats from the territory of Greece to a destination located outside Greece are prohibited until 15 January 2025.;
- (2) in Article 4, the date '28 February 2025' is replaced by '31 May 2025';
- (3) the Annex is replaced by the text set out in the Annex to this Decision.
