COMMISSION REGULATION (EEC) No 1210/77

of 7 June 1977

amending for the eighth time Regulation (EEC) No 2005/70 on the classification of vine varieties

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 816/70 of 28 April 1970 laying down additional provisions for the common organization of the market in wine [1], as last amended by Regulation (EEC) No 528/77 [2], and in particular Article 16 (4) thereof,

Whereas the classification of vine varieties approved for cultivation in the Community as originally constituted was laid down in Commission Regulation (EEC) No 2005/70 of 6 October 1970 [3], as last amended by Regulation (EEC) No 2400/76 [4];

Whereas, since then, experience has shown that several vine varieties classified as authorized varieties for certain French administrative units or parts thereof, yield wine that may normally be considered as of good quality; whereas, therefore, they should be classified as recommended varieties for the same administrative units or parts thereof in accordance with Article 10 (2) (a) and (5) of Council Regulation (EEC) No 1388/70 of 13 July 1970 on general rules for the classification of vine varieties [5], as last amended by Regulation (EEC) No 418/74 [6];

Whereas there are two vine varieties which should be added as recommended varieties one for two French administrative units and one for a German administrative unit; whereas those varieties have for five years been included in the classification for an adjoining administrative unit and therefore meet the requirement for inclusion laid down in Article 10 (1) (a) of Regulation (EEC) No 1388/70;

Whereas the development of the situation as regards several vine varieties classified for certain Italian administrative units both as wine grape varieties and as table grape varieties has given rise to changes in the uses to which the grapes obtained therefrom are normally put; whereas, therefore, their classification in the two categories is no longer justified; whereas they should consequently be classified according to the use to which they are at present normally put in accordance with Article 2 (2) (a) and (b) of Regulation (EEC) No 1388/70;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Wine,

HAS ADOPTED THIS REGULATION:
