Corrected by:

- **C1** Corrigendum, OJ L 298, 19.11.2019, p. 12 (2019/1870)

**COMMISSION REGULATION (EC) No 1881/2006****of 19 December 2006****setting maximum levels for certain contaminants in foodstuffs****(Text with EEA relevance)***Article 1***General rules**

1. The foodstuffs listed in the Annex shall not be placed on the market where they contain a contaminant listed in the Annex at a level exceeding the maximum level set out in the Annex.
2. The maximum levels specified in the Annex shall apply to the edible part of the foodstuffs concerned, unless otherwise specified in the Annex.

*Article 2***Dried, diluted, processed and compound foodstuffs**

1. When applying the maximum levels set out in the Annex to foodstuffs which are dried, diluted, processed or composed of more than one ingredient, the following shall be taken into account:
 - (a) changes of the concentration of the contaminant caused by drying or dilution processes;
 - (b) changes of the concentration of the contaminant caused by processing;
 - (c) the relative proportions of the ingredients in the product;
 - (d) the analytical limit of quantification.
2. The specific concentration or dilution factors for the drying, dilution, processing and/or mixing operations concerned or for the dried, diluted, processed and/or compound foodstuffs concerned shall be provided and justified by the food business operator, when the competent authority carries out an official control.

If the food business operator does not provide the necessary concentration or dilution factor or if the competent authority deems that factor inappropriate in view of the justification given, the authority shall itself define that factor, based on the available information and with the objective of maximum protection of human health.

3. Paragraphs 1 and 2 shall apply in so far as no specific Community maximum levels are fixed for these dried, diluted, processed or compound foodstuffs.

▼B

4. As far as Community legislation does not provide for specific maximum levels for foods for infants and young children, Member States may provide for stricter levels.

*Article 3***Prohibitions on use, mixing and detoxification**

1. Foodstuffs not complying with the maximum levels set out in the Annex shall not be used as food ingredients.
2. Foodstuffs complying with the maximum levels set out in the Annex shall not be mixed with foodstuffs which exceed these maximum levels.
3. Foodstuffs to be subjected to sorting or other physical treatment to reduce contamination levels shall not be mixed with foodstuffs intended for direct human consumption or with foodstuffs intended for use as a food ingredient.
4. Foodstuffs containing contaminants listed in section 2 of the Annex (Mycotoxins) shall not be deliberately detoxified by chemical treatments.

▼M5*Article 4***Specific provisions for groundnut, other oilseeds, tree nuts, dried fruit, rice and maize**

Groundnuts (peanuts), other oilseeds, tree nuts, dried fruit, rice and maize not complying with the appropriate maximum levels of aflatoxins laid down in points 2.1.5, 2.1.6, 2.1.7, 2.1.8, 2.1.10 and 2.1.11 of the Annex can be placed on the market provided that these foodstuffs:

- (a) are not intended for direct human consumption or use as an ingredient in foodstuffs;
- (b) comply with the appropriate maximum levels laid down in points 2.1.1, 2.1.2, 2.1.3, 2.1.4, 2.1.9 and 2.1.12 of the Annex;
- (c) are subjected to a treatment involving sorting or other physical treatment and that after this treatment the maximum levels laid down in points 2.1.5, 2.1.6, 2.1.7, 2.1.8, 2.1.10 and 2.1.11 of the Annex are not exceeded, and this treatment does not result in other harmful residues;
- (d) are labelled clearly showing their use, and bearing the indication 'product shall be subjected to sorting or other physical treatment to reduce aflatoxin contamination before human consumption or use as an ingredient in foodstuffs'. The indication shall be included on the label of each individual bag, box etc. and on the original accompanying document. The consignment/batch identification code shall be indelibly marked on each individual bag, box etc. of the consignment and on the original accompanying document.

▼ M5*Article 5***Specific provisions for groundnuts (peanuts), other oilseeds, derived products thereof and cereals**

A clear indication of the intended use must appear on the label of each individual bag, box, etc. and on the original accompanying document. This accompanying document must have a clear link with the consignment by means of mentioning the consignment identification code, which is on each individual bag, box, etc. of the consignment. In addition the business activity of the consignee of the consignment given on the accompanying document must be compatible with the intended use.

In the absence of a clear indication that their intended use is not for human consumption, the maximum levels laid down in points 2.1.5 and 2.1.11 of the Annex shall apply to all groundnuts (peanuts), other oilseeds and derived products thereof and cereals placed on the market.

As regards the exception of groundnuts (peanuts) and other oilseeds for crushing and the application of the maximum levels laid down in point 2.1.1 of the Annex, the exception only applies to consignments which are clearly labelled showing their use and bearing the indication 'product to be subject to crushing for the production of refined vegetable oil'. The indication shall be included on the label of each individual bag, box etc. and on the accompanying document(s). The final destination must be a crushing plant.

▼ B*Article 6***Specific provisions for lettuce**

Unless lettuce grown under cover (protected lettuce) is labelled as such, maximum levels set in the Annex for lettuce grown in the open air (open-grown lettuce) shall apply.

*Article 7***▼ M9****Derogations****▼ M8**
_____**▼ M9**

4. By way of derogation from Article 1, Finland, Sweden and Latvia may authorise the placing on their market of wild caught salmon (*Salmo salar*) and products thereof originating in the Baltic region and intended for consumption in their territory with levels of dioxins and/or dioxin-like PCBs and/or non-dioxin-like PCBs higher than those set out in point 5.3 of the Annex, provided that a system is in place to ensure that consumers are fully informed of the dietary recommendations with regard to the restrictions on the consumption of wild caught salmon from the Baltic region and products thereof by identified vulnerable sections of the population in order to avoid potential health risks.

▼ M9

Finland, Sweden and Latvia shall continue to apply the necessary measures to ensure that wild caught salmon and products thereof not complying with point 5.3 of the Annex are not marketed in other Member States.

Finland, Sweden and Latvia will report yearly to the Commission the measures they have taken to effectively inform the identified vulnerable sections of the population of the dietary recommendations and to ensure that wild caught salmon and products thereof not compliant with the maximum levels is not marketed in other Member States. They shall furthermore provide evidence of the effectiveness of these measures.

5. By way of derogation from Article 1, Finland and Sweden may authorise the placing on their market of wild caught herring larger than 17 cm (*Clupea harengus*), wild caught char (*Salvelinus* spp.), wild caught river lamprey (*Lampetra fluviatilis*) and wild caught trout (*Salmo trutta*) and products thereof originating in the Baltic region and intended for consumption in their territory with levels of dioxins and/or dioxin-like PCBs and/or non dioxin-like PCBs higher than those set out in point 5.3 of the Annex, provided that a system is in place to ensure that consumers are fully informed of the dietary recommendations with regard to the restrictions on the consumption of wild caught herring larger than 17 cm, wild caught char, wild caught river lamprey and wild caught trout from the Baltic region and products thereof by identified vulnerable sections of the population in order to avoid potential health risks.

Finland and Sweden shall continue to apply the necessary measures to ensure that wild caught herring larger than 17 cm, wild caught char, wild caught river lamprey and wild caught trout and products thereof not complying with point 5.3 of the Annex are not marketed in other Member States.

Finland and Sweden will report yearly to the Commission the measures they have taken to effectively inform the identified vulnerable sections of the population of the dietary recommendations and to ensure that fish and products thereof not compliant with the maximum levels is not marketed in other Member States. They shall furthermore provide evidence of the effectiveness of these measures.

▼ M32

6. By way of derogation from Article 1, the following Member States may authorise the placing on their market of the following traditionally smoked meat and smoked meat products, smoked in their territory and intended for consumption in their territory with levels of PAHs higher than those set out in point 6.1.4 of the Annex, provided that those products comply with the maximum levels applicable before 1 September 2014, i.e. 5,0 µg/kg for benzo(a)pyrene and 30,0 µg/kg for the sum of benzo(a)pyrene, benz(a)anthracene, benzo(b)fluoranthene and chrysene:

- Ireland, Croatia, Cyprus, Spain, Poland and Portugal: traditionally smoked meat and meat products,
- Latvia: traditionally smoked pork, hot smoked chicken meat, hot smoked sausages and hot smoked game meat,;

▼ M32

- Slovak Republic: salted traditionally smoked meat, traditionally smoked bacon, traditionally smoked sausage (*klobása*), where ‘traditionally smoked’ means developing smoke by burning woods (wood logs, wood sawdust, wood chips) in a smokehouse,
- Finland: traditionally hot smoked meat and meat products,
- Sweden: meat and meat products smoked over glowing wood or other plant materials.

Those Member States and concerned food business operators shall continue to monitor the presence of PAHs in traditionally smoked meat and smoked meat products referred to in the first subparagraph of this paragraph and shall ensure that good smoking practices are implemented where possible, without losing typical organoleptic characteristics of those products.

7. By way of derogation from Article 1, the following Member States may authorise the placing on their market of the following traditionally smoked fish and smoked fishery products, smoked in their territory and intended for consumption in their territory with levels of PAHs higher than those set out in point 6.1.5 of the Annex, provided that those smoked products comply with the maximum levels applicable before 1 September 2014, i.e. 5,0 µg/kg for benzo(a)pyrene and 30,0 µg/kg for the sum of benzo(a)pyrene, benz(a)anthracene, benzo(b)fluoranthene and chrysene:

- Latvia: traditionally hot smoked fish,
- Finland: traditionally hot smoked small fish and fishery products made from small fish,
- Sweden: fish and fishery products smoked over glowing wood or other plant materials.

Those Member States and concerned food business operators shall continue to monitor the presence of PAHs in traditionally smoked fish and smoked fishery products referred to in the first subparagraph of this paragraph and shall ensure that good smoking practices are implemented where possible, without losing typical organoleptic characteristics of those products.

▼ B*Article 8***Sampling and analysis**

The sampling and the analysis for the official control of the maximum levels specified in the Annex shall be performed in accordance with Commission Regulations (EC) No 1882/2006 ⁽¹⁾, No 401/2006 ⁽²⁾, No 1883/2006 ⁽³⁾ and Commission Directives 2001/22/EC ⁽⁴⁾, 2004/16/EC ⁽⁵⁾ and 2005/10/EC ⁽⁶⁾.

⁽¹⁾ See page 25 of this Official Journal.

⁽²⁾ OJ L 70, 9.3.2006, p. 12.

⁽³⁾ See page 32 of this Official Journal.

⁽⁴⁾ OJ L 77, 16.3.2001, p. 14. Directive as amended by Directive 2005/4/EC (OJ L 19, 21.1.2005, p. 50).

⁽⁵⁾ OJ L 42, 13.2.2004, p. 16.

⁽⁶⁾ OJ L 34, 8.2.2005, p. 15.

▼ M25*Article 9***Monitoring and reporting**

1. Member States shall monitor nitrate levels in vegetables which may contain significant levels, in particular green leafy vegetables, and communicate the results to EFSA on a regular basis.
2. Member States shall communicate to the Commission a summary of the findings on aflatoxins obtained in accordance with Commission Implementing Regulation (EU) No 884/2014 ⁽¹⁾ and the individual occurrence data shall be reported to EFSA by the Member States.
3. Member States and professional stakeholder organisations shall communicate each year to the Commission the results of investigations undertaken and the progress with regard to the application of prevention measures to avoid contamination by deoxynivalenol, zearalenone, fumonisin B₁ and B₂, T-2 and HT-2 toxin. The Commission shall make the results available to the Member States. The related occurrence data shall be reported to EFSA.

▼ M37

4. Member States and interested parties shall communicate by 1 January 2023 to the Commission the results of investigations undertaken and the progress with regard to the application of prevention measures to avoid contamination by ergot sclerotia and ergot alkaloids in rye and rye milling products and ergot alkaloids in milling products of barley, wheat, spelt and oats grains.

Member States and interested parties shall report on a regular basis to the EFSA database the occurrence data on ergot sclerotia and ergot alkaloids in rye and rye milling products and on ergot alkaloids in milling products of barley, wheat, spelt and oats grains.

▼ M25

5. Occurrence data on other contaminants than those referred to in paragraphs 1 to 4 collected by Member States and professional stakeholder organisations may be reported to EFSA.
6. Occurrence data shall be provided to EFSA in the EFSA data submission format in accordance with the requirements of EFSA's Guidance on Standard Sample Description (SSD) for Food and Feed ⁽²⁾ and the additional EFSA's specific reporting requirements for specific contaminants. The occurrence data from professional stakeholder organisations may be provided to EFSA, if appropriate, in a simplified data submission format, defined by EFSA.

▼ B*Article 10***Repeal**

Regulation (EC) No 466/2001 is repealed.

⁽¹⁾ Commission Implementing Regulation (EU) No 884/2014 of 13 August 2014 imposing special conditions governing the import of certain feed and food from certain third countries due to contamination risk by aflatoxins and repealing Regulation (EC) No 1152/2009 (OJ L 242, 14.8.2014, p. 4).

⁽²⁾ <http://www.efsa.europa.eu/en/datex/datexsubmitdata.htm>

▼B

References to the repealed Regulation shall be construed as references to this Regulation.

*Article 11***Transitional measures****▼M11**

This Regulation shall not apply to products that were placed on the market before the dates referred to in points (a) to (f) in conformity with the provisions applicable at the respective date:

(a) 1 July 2006 as regards the maximum levels for deoxynivalenol and zearalenone laid down in points 2.4.1, 2.4.2, 2.4.4, 2.4.5, 2.4.6, 2.4.7, 2.5.1, 2.5.3, 2.5.5 and 2.5.7 of the Annex;

▼M1

(b) 1 October 2007 as regards the maximum levels for deoxynivalenol and zearalenone laid down in points 2.4.3, 2.4.8, 2.4.9, 2.5.2, 2.5.4, 2.5.6, 2.5.8, 2.5.9 and 2.5.10 of the Annex;

▼B

(c) 1 October 2007 as regards the maximum levels for fumonisins B₁ and B₂ laid down in point 2.6 of the Annex;

(d) 4 November 2006 as regards the maximum levels for the sum of dioxins and dioxin-like PCBs laid down in section 5 of the Annex ;

▼M11

(e) 01 January 2012 as regards the maximum levels for non dioxin-like PCBs laid down in section 5 of the Annex;

(f) 01 January 2015 as regards the maximum level for Ochratoxin A in *Capsicum* spp. laid down in point 2.2.11. of the Annex.

▼B

The burden of proving when the products were placed on the market shall be borne by the food business operator.

*Article 12***Entry into force and application**

This Regulation shall enter into force on the 20th day following its publication in the *Official Journal of the European Union*.

It shall apply from 1 March 2007.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

▼ **B**► **M30** ————— ◀

► **M17** (**) The maximum level refers to the level of erucic acid, calculated on the total level of fatty acids in the fat component in food. ◀

► **M25** (***) The sampling shall be performed in accordance with point B of Annex I to Commission Regulation (EC) No 401/2006 (OJ L 70, 9.3.2006, p. 12).

The analysis shall be performed by microscopic examination.

(****) Sum of 12 ergot alkaloids: ergocristine/ergocristinine; ergotamine/ergotaminine; ergocryptine/ergocryptinine; ergometrine/ergometrinine; ergosine/ergosinine; ergocornine/ergocorninine.

(*****) Appropriate and achievable maximum levels, providing a high level of human health protection, shall be considered for these relevant food categories before 1 July 2017. ◀

► **M26** (*****) The tropane alkaloids referred to are atropine and scopolamine. Atropine is the racemic mixture of (-)-hyoscyamine and (+)-hyoscyamine of which only the (-)-hyoscyamine enantiomer exhibits anticholinergic activity. As for analytical reasons it is not always possible to distinguish between the enantiomers of hyoscyamine, the maximum levels are established for atropine and scopolamine. ◀

► **M24** (*****) Botanical preparations are preparations obtained from botanicals (e.g. whole, plant parts, fragmented or cut plants) by various processes (e.g. pressing, squeezing, extraction, fractionation, distillation, concentration, drying up and fermentation). This definition includes comminuted or powdered plants, plant parts, algae, fungi, lichen, tinctures, extracts, essential oils (other than the vegetable oils referred to in point 6.1.1), expressed juices and processed exudates.

(*****) The maximum level does not apply to food supplements containing vegetable oils. Vegetable oils used as an ingredient in food supplements should comply with the maximum level established in point 6.1.1. ◀

► **M33** (*****) As defined in Part VIII of Annex VII to Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products and repealing Council Regulations (EEC) No 922/72, (EEC) No 234/79, (EC) No 1037/2001 and (EC) No 1234/2007 (OJ L 347, 20.12.2013, p. 671).

(*****) 'Young-child formula' refers to milk-based drinks and similar protein-based products intended for young children. These products are outside the scope of Regulation (EU) No 609/2013 (Report from the Commission to the European Parliament and the Council on young-child formulae (COM(2016) 169 final) <https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:52016DC0169&qid=1559628885154&from=EN>).

(*****) For fish oil and oils from other marine organisms and young-child formula, the maximum levels shall apply from 1 January 2021.

(*****) The maximum levels shall apply from 1 January 2021.

(*****) The oils and fats used as ingredient for the mixture shall comply with the maximum level established for the oil and fat. Therefore, the level of the sum of 3-monochloropropanediol (3-MCPD) and 3-MCPD fatty acid esters, expressed as 3-MCPD in the mixture, shall not exceed the level calculated in accordance with Article 2(1)(c) of Regulation (EC) No 1881/2006. In case the quantitative composition is not known for the competent authority and the food business operator, not producing the mixture, the level of the sum of 3-MCPD and 3-MCPD fatty acid esters, expressed as 3-MCPD in the mixture shall in any case not exceed 2 500 µg/kg.

▼ B

(*****¹) When the product is a mixture of different oils or fats of the same or of different botanical origins, the maximum level applies for the mixture. The oils and fats used as ingredient for the mixture shall comply with the maximum level established for the oil and fat in point 4.3.1.

(*****²) Maximum level to be reviewed in view of lowering within 2 years from the date of application. ◀

► **M37** ⁽¹⁾ As regards fruits, vegetables and cereals, reference is made to the foodstuffs listed in the relevant category as defined in Annex I to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC (OJ L 70, 16.3.2005, p. 1). This means, inter alia, that buckwheat (*Fagopyrum* sp) is included in 'cereals' and buckwheat products are included in 'cereal products'. Tree nuts are not covered by the maximum level for fruit. ◀

⁽²⁾ The maximum levels do not apply for fresh spinach to be subjected to processing and which is directly transported in bulk from field to processing plant.

► **M20** ⁽³⁾ Foodstuffs listed in this category as defined in Regulation (EU) No 609/2013 of the European Parliament and of the Council of 12 June 2013 on food intended for infants and young children, food for special medical purposes, and total diet replacement for weight control and repealing Council Directive 92/52/EEC, Commission Directives 96/8/EC, 1999/21/EC, 2006/125/EC and 2006/141/EC, Directive 2009/39/EC of the European Parliament and of the Council and Commission Regulations (EC) No 41/2009 and (EC) No 953/2009 (OJ L 181, 29.6.2013, p. 35). ◀

⁽⁴⁾ The maximum level refers to the products ready to use (marketed as such or after reconstitution as instructed by the manufacturer).

⁽⁵⁾ ► **M5** The maximum levels refer to the edible part of groundnuts (peanuts) and tree nuts. If groundnuts (peanuts) and tree nuts 'in shell' are analysed, it is assumed when calculating the aflatoxin content all the contamination is on the edible part, except in the case of Brazil nuts. ◀

⁽⁶⁾ Foodstuffs listed in this category as defined in Regulation (EC) No 853/2004 of the European Parliament and of the Council of 29 April 2004 laying down specific hygiene rules for food of animal origin (OJ L 226, 25.6.2004, p. 22).

⁽⁷⁾ The maximum level refers to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.

► **M20** ————— ◀

⁽¹⁰⁾ The maximum level refers in the case of milk and milk products, to the products ready to use (marketed as such or reconstituted as instructed by the manufacturer) and in the case of products other than milk and milk products, to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.

► **M20** ⁽¹¹⁾ Wine and sparkling wines as defined in Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products and repealing Council Regulations (EEC) No 922/72, (EEC) No 234/79, (EC) No 1037/2001 and (EC) No 1234/2007 (OJ L 347, 20.12.2013, p. 671). ◀

⁽¹²⁾ The maximum level applies to products produced from the 2005 harvest onwards.

► **M20** ⁽¹³⁾ Foodstuffs listed in this category as defined in Regulation (EU) No 251/2014 of the European Parliament and of the Council of 26 February 2014 on the definition, description, presentation, labelling and the protection of geographical indications of aromatised wine products and repealing Council Regulation (EEC) No 1601/91 (OJ L 84, 20.3.2014, p. 14).

The maximum level for OTA applicable to these beverages is function of the proportion of wine and/or grape must present in the finished product. ◀

⁽¹⁴⁾ Foodstuffs listed in this category as defined in Council Directive 2001/112/EC of 20 December 2001 relating to fruit juices and certain similar products intended for human consumption (OJ L 10, 12.1.2002, p. 58).

⁽¹⁵⁾ Foodstuffs listed in this category as defined in Council Regulation (EEC) No 1576/89 of 29 May 1989 laying down general rules on the definition, description and presentation of spirit drinks (OJ L 160, 12.6.1989, p. 1), as last amended by the Protocol concerning the conditions and arrangements for admission of the Republic of Bulgaria and Romania to the European Union.

▼ B

► **M20** ⁽¹⁶⁾ Infants and young children as defined in Regulation (EU) No 609/2013 of the European Parliament and of the Council of 12 June 2013 on food intended for infants and young children, food for special medical purposes, and total diet replacement for weight control and repealing Council Directive 92/52/EEC, Commission Directives 96/8/EC, 1999/21/EC, 2006/125/EC and 2006/141/EC, Directive 2009/39/EC of the European Parliament and of the Council and Commission Regulations (EC) No 41/2009 and (EC) No 953/2009 (OJ L 181, 29.6.2013, p. 35). ◀

⁽¹⁷⁾ For the purpose of the application of maximum levels for deoxynivalenol, zearalenone, T-2 and HT-2 toxin established in points 2.4, 2.5 and 2.7 rice is not included in 'cereals' and rice products are not included in 'cereal products'.

► **M37** ⁽¹⁸⁾ The maximum level applies to unprocessed cereals placed on the market before first-stage processing. In integrated production and processing systems the maximum level applies in the production chain at the stage before first-stage processing. Integrated production and processing systems means systems where all incoming lots are cleaned, sorted and processed in the same establishment.

Drying and cleaning, including sorting (colour sorting where applicable) and scouring, are not considered to be 'first-stage processing' insofar as the whole grain remains intact.

Scouring is cleaning cereals by brushing or scrubbing it vigorously, combined with dust removal (e.g. aspiration).

In case scouring is applied in the presence of ergot sclerotia the cereals need to firstly undergo a cleaning step before scouring. ◀

⁽¹⁹⁾ The maximum level applies to cereals harvested and taken over, as from the 2005/06 marketing year, in accordance with Commission Regulation (EC) No 824/2000 of 19 April 2000 establishing procedures for the taking-over of cereals by intervention agencies and laying down methods of analysis for determining the quality of cereals (OJ L 100, 20.4.2000, p. 31), as last amended by Regulation (EC) No 1068/2005 (OJ L 174, 7.7.2005, p. 65).

► **M1** ⁽²⁰⁾ Maximum level shall apply from 1 October 2007. ◀

► **M1** ————— ◀

⁽²²⁾ Pasta (dry) means pasta with a water content of approximately 12 %.

⁽²³⁾ Maximum level shall apply from 1 October 2007.

⁽²⁴⁾ Fish listed in this category as defined in category (a), with the exclusion of fish liver falling under code CN 0302 70 00, of the list in Article 1 of Council Regulation (EC) No 104/2000 (OJ L 17, 21.1.2000, p. 22) as last amended by the Act concerning the conditions of accession of the Czech Republic, the Republic of Estonia, the Republic of Cyprus, the Republic of Latvia, the Republic of Lithuania, the Republic of Hungary, the Republic of Malta, the Republic of Poland, the Republic of Slovenia and the Slovak Republic and the adjustments to the Treaties on which the European Union is founded (OJ L 236, 23.9.2003, p. 33). In case of dried, diluted, processed and/or compound foodstuffs Article 2(1) and 2(2) apply.

⁽²⁵⁾ Where fish are intended to be eaten whole, the maximum level shall apply to the whole fish.

► **M22** ⁽²⁶⁾ Foodstuffs falling within categories (c) and (i) of the list in Annex I of Regulation (EU) No 1379/2013 of the European Parliament and of the Council of 11 December 2013 on the common organisation of the markets in fishery and aquaculture products, amending Council Regulation (EC) No 1184/2006 and (EC) No 1224/2009 and repealing Council Regulation (EC) No 104/2000 (OJ L 354, 28.12.2013, p. 1), as appropriate (species as listed in the relevant entry). In case of dried, diluted, processed and/or compound foodstuffs Article 2(1) and 2(2) apply. In case of *Pecten maximus*, the maximum level applies to the adductor muscle and gonad only. ◀

⁽²⁷⁾ The maximum level applies after washing of the fruit or vegetables and separating the edible part.

► **M20** ————— ◀

⁽²⁹⁾ The maximum level refers to the product as sold.

⁽³⁰⁾ The maximum level is given for the liquid product containing 40 % dry matter, corresponding to a maximum level of 50 µg/kg in the dry matter. The level needs to be adjusted proportionally according to the dry matter content of the products.

▼ **B**

(³¹) ► **M9** Dioxins (sum of polychlorinated dibenzo-para-dioxins (PCDDs) and polychlorinated dibenzofurans (PCDFs), expressed as World Health Organisation (WHO) toxic equivalent using the WHO-toxic equivalency factors (WHO-TEFs)) and sum of dioxins and dioxin-like PCBs (sum of PCDDs, PCDFs and polychlorinated biphenyls (PCBs), expressed as WHO toxic equivalent using the WHO-TEFs). WHO-TEFs for human risk assessment based on the conclusions of the World Health Organization (WHO) – International Programme on Chemical Safety (IPCS) expert meeting which was held in Geneva in June 2005 (Martin van den Berg et al., The 2005 World Health Organization Re-evaluation of Human and Mammalian Toxic Equivalency Factors for Dioxins and Dioxin-like Compounds. Toxicological Sciences 93(2), 223–241 (2006))

Congener	TEF value	Congener	TEF value
Dibenzo-p-dioxins ('PCDDs')		'Dioxin-like' PCBs Non-ortho PCBs + Mono-ortho PCBs

Abbreviations used: 'T' = tetra; 'Pe' = penta; 'Hx' = hexa; 'Hp' = hepta; 'O' = octa; 'CDD' = chlorodibenzodioxin; 'CDF' = chlorodibenzofuran; 'CB' = chlorobiphenyl. ◀

(³²) Upperbound concentrations: Upperbound concentrations are calculated on the assumption that all the values of the different congeners below the limit of quantification are equal to the limit of quantification.

(³³) ► **M9** The maximum level expressed on fat is not applicable for foods containing < 2 % fat. For foods containing less than 2 % fat, the maximum level applicable is the level on product basis corresponding to the level on product basis for the food containing 2 % fat, calculated from the maximum level established on fat basis, making use of following formula:

Maximum level expressed on product basis for foods containing less than 2 % fat = maximum level expressed on fat for that food x 0,02. ◀

► **M2** (³⁴) Foodstuffs listed in this category as defined in categories (a), (b), (c), (e) and (f) of the list in Article 1 of Regulation (EC) No 104/2000, with the exclusion of fish liver referred to in point 5.11. ◀

► **M7** ————— ◀

► **M22** (³⁶) Foodstuffs listed in this category as defined in categories (b), (c) and (i) of the list in Annex 1 of Regulation (EU) No 1379/2013. ◀

▼ **B**

- **M1** ⁽³⁷⁾ The exemption applies only for maize for which it is evident e.g. through labelling, destination, that it is intended for use in a wet milling process only (starch production). ◀
- **M2** ⁽³⁸⁾ In the case of canned fish liver, the maximum level applies to the whole edible content of the can. ◀
- **M3** ⁽³⁹⁾ The maximum level applies to the food supplements as sold. ◀
- **M5** ⁽⁴⁰⁾ Oilseeds falling under codes CN 1201, 1202, 1203, 1204, 1205, 1206, 1207 and derived products CN 1208; melon seeds fall under code ex 1207 99.
- ⁽⁴¹⁾ In case derived/processed products thereof are derived/processed solely or almost solely from the tree nuts concerned, the maximum levels as established for the corresponding tree nuts apply also to the derived/processed products. In other cases, Article 2(1) and 2(2) apply for the derived/processed products. ◀
- **M4** ⁽⁴²⁾ The maximum level applies to the pure and undiluted extract, obtained whereby 1 kg of extract is obtained from 3 to 4 kg liquorice root. ◀
- **M6** ⁽⁴³⁾ The maximum level for leaf vegetables does not apply to fresh herbs (falling under Code number 0256000 in Annex I to Regulation (EC) No 396/2005). ◀
- **M20** ⁽⁴⁴⁾ Muscle meat from appendages and abdomen. This definition excludes the cephalothorax of crustaceans. In case of crabs and crab-like crustaceans (*Brachyura* and *Anomura*): muscle meat from appendages. ◀
- **M7** ⁽⁴⁵⁾ Lower bound concentrations are calculated on the assumption that all the values of the four substances below the limit of quantification are zero.
- ⁽⁴⁶⁾ Meat and meat products that have undergone a heat treatment potentially resulting in formation of PAH, i.e. only grilling and barbecuing.
- ⁽⁴⁷⁾ For the canned product the analysis shall be carried out on the whole content of the can. As regards the maximum level for the whole composite product Art. 2(1)(c) and 2(2) shall apply. ◀
- **M11** ⁽⁴⁸⁾ The maximum level does not apply to food for which it can be proven that the level of melamine higher than 2,5 mg/kg is the consequence of authorized use of cyromazine as insecticide. The melamine level shall not exceed the level of cyromazine. ◀
- **M16** ⁽⁴⁹⁾ For the specific cocoa and chocolate products the definitions set out in points A, 2, 3 and 4 of Annex I to Directive 2000/36/EC of the European Parliament and of the Council of 23 June 2000 relating to cocoa and chocolate products intended for human consumption (OJ L 197, 3.8.2000, p. 19) apply. ◀
- **M21** ⁽⁵⁰⁾ Sum of As(III) and As(V).
- ⁽⁵¹⁾ Rice, husked rice, milled rice and parboiled rice as defined in Codex Standard 198-1995. ◀
- **M20** ⁽⁵²⁾ The maximum level applies to the animal as sold without viscera.
- ⁽⁵³⁾ For potatoes, the maximum level applies to peeled potatoes. ◀
- **M27** ⁽⁵⁴⁾ 'Unprocessed products' as defined in Regulation (EC) No 852/2004 of the European Parliament and of the Council of 29 April 2004 on the hygiene of foodstuffs (OJ L 139, 30.4.2004, p. 1).
- ⁽⁵⁵⁾ 'Placing on the market' and 'final consumer' as defined in Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety (OJ L 31, 1.2.2002, p. 1). ◀
- **M29** ⁽⁵⁶⁾ ► **C1** With acceptance from the competent authority, the maximum level does not apply to mustard oil locally produced and consumed. ◀ ◀
- ⁽⁵⁷⁾ young child formula are milk-based drinks and similar protein-based products intended for young children. These products are outside the scope of Regulation (EU) No 609/2013 (Report from the Commission to the European Parliament and the Council on young child formulae (COM/2016/0169 final) (<https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:52016DC0169&qid=1559628885154&from=EN>).
- ⁽⁵⁸⁾ the preparation of beverages refers to the use of powders that are finely ground and are to be stirred into drinks.

▼B

⁽⁵⁹⁾ As defined in Part II of Annex VII to Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products and repealing Council Regulations (EEC) No 922/72, (EEC) No 234/79, (EC) No 1037/2001 and (EC) No 1234/2007 (OJ L 347, 20.12.2013, p. 671).

⁽⁶⁰⁾ The maximum levels do not apply to tree nuts or oilseeds for crushing and oil refining, provided that the remaining pressed tree nuts or oilseeds are not placed on the market as food. In case the remaining pressed tree nuts or oilseeds are placed on the market as food, the maximum levels apply, taking into account Articles 2(1) and 2(2) of this Regulation.

⁽⁶¹⁾ The maximum levels do not apply to cereals used for malt for beer or distillates production, provided that the remaining malt is not placed on the market as food. In case the remaining malt is placed on the market as food, the maximum levels apply, taking into account Articles 2(1) and 2(2) of this Regulation.

⁽⁶²⁾ The tropane alkaloids referred to are atropine and scopolamine.

⁽⁶³⁾ The maximum level for ergot alkaloids refers to the lowerbound sum of the following 12 ergot alkaloids: ergocornine/ergocorninine; ergocristine/ergocristinine; ergocryptine/ergocryptinine (α - and β -form); ergometrine/ergometrinine; ergosine/ergosinine; ergotamine/ergotaminine. In the lowerbound sum, the contribution of each non-quantified epimer is set at zero.

⁽⁶⁴⁾ The maximum level refers to the lowerbound sum of the following 21 pyrrolizidine alkaloids:

- intermedine/lycopsamine, intermedine-N-oxide/lycopsamine-N-oxide,
- senecionine/senecivernine, senecionine-N-oxide/senecivernine-N-oxide,
- seneciophylline, seneciophylline-N-oxide,
- retrorsine, retrorsine-N-oxide,
- echimidine, echimidine-N-oxide,
- lasiocarpine, lasiocarpine-N-oxide,
- senkirkine,
- europine, europine-N-oxide,
- heliotrine and heliotrine-N-oxide

and the following additional 14 pyrrolizidine alkaloids known to co-elute with one or more of the above identified 21 pyrrolizidine alkaloids, making use of certain currently used analytical methods:

- indicine, echinatine, rinderine (possible co-elution with lycopsamine/intermedine)
- indicine-N-oxide, echinatine-N-oxide, rinderine-N-oxide (possible co-elution with lycopsamine-N-oxide/intermedine-N-oxide)
- integerrimine (possible co-elution with senecivernine/senecionine)
- integerrimine-N-oxide (possible co-elution with senecivernine-N-oxide/senecionine-N-oxide)
- heliosupine (possible co-elution with echimidine)
- heliosupine-N-oxide (possible co-elution with echimidine-N-oxide)
- spartioidine (possible co-elution with seneciophylline)
- spartioidine-N-oxide (possible co-elution with seneciophylline-N-oxide)
- usaramine (possible co-elution with retrorsine)
- usaramine N-oxide (possible co-elution with retrorsine N-oxide)

Pyrrolizidine alkaloids, which can be individually and separately identified with the used method of analysis, shall be quantified and included in the sum.

⁽⁶⁵⁾ Without prejudice to more restrictive national rules in certain Member States on the placing of the market of pyrrolizidine alkaloid containing plants.

⁽⁶⁶⁾ The terms "herbal infusions (dried product)" and "tea (*Camellia sinensis*) (dried product)" refer to:

- herbal infusions (dried product) from flowers, leaves and herbs, roots, and any other parts of the plant (in sachets or in bulk)/tea (*Camellia sinensis*) (dried product) from dried leaves, stalks and flowers (in sachets or in bulk) used for the preparation of herbal infusion (liquid product)/tea (liquid product)
- instant herbal teas/teas. In the case of powdered tea extracts, a concentration factor of 4 has to be applied.

⁽⁶⁷⁾ Flavoured tea is tea with flavourings and certain food ingredients with flavouring properties, as defined in Regulation (EC) No 1334/2008 of the European Parliament and of the Council of 16 December 2008 on flavourings and certain food ingredients with flavouring properties for use in and on foods (OJ L 354, 31.12.2008, p. 34).

For teas with fruits and other herbs, Article 2 of Regulation (EC) No 1881/2006 applies.

⁽⁶⁸⁾ The maximum level refers to the sum of morphine and codeine, for which a factor of 0,2 is applied to the level of codeine. Therefore, the maximum level refers to the sum of morphine + 0,2 codeine.

⁽⁶⁹⁾ Bakery products include also flour-based ready-to-eat savouries and snacks.

⁽⁷⁰⁾ The food business operator supplying the poppy seeds to the food business operator manufacturing the bakery products shall provide the necessary information to enable the manufacturer of the bakery products to place products on the market that comply with the maximum level. This information shall include analytical data, where appropriate.

▼B

- (⁷¹) The maximum level does not apply to unprocessed whole, ground, milled, cracked, chopped linseed and unprocessed whole, ground, milled, cracked, chopped bitter almonds placed on the market for the final consumer in small quantities where the warning 'Only to be used for cooking and baking. Do not consume raw!' appears in the principal field of vision of the label (using the font size specified in Article 13(2) of Regulation (EU) No 1169/2011 of the European Parliament and of the Council of 25 October 2011 on the provision of food information to consumers (OJ L 304 22.11.2011, p. 18)). The unprocessed whole, ground, milled, cracked, chopped linseed with the warning message has to comply with the maximum level provided for in 8.3.1.
- (⁷²) the maximum level refers to the sum of delta-9-tetrahydrocannabinol (Δ^9 -THC) and delta-9-tetrahydrocannabinolic acid (Δ^9 -THCA), expressed as Δ^9 -THC. A factor of 0,877 is applied to the level of Δ^9 -THCA and the maximum level refers to the sum of Δ^9 -THC + 0,877 x Δ^9 -THCA (in case of a separate determination and quantification of Δ^9 -THC and Δ^9 -THCA).
- (⁷³) hemp seed derived/processed products are products derived/processed exclusively from hemp seeds.
- (⁷⁴) The maximum level applies to the sum of linear and branched stereoisomers, whether they are chromatographically separated or not.
- (⁷⁵) For the sum of PFOS, PFOA, PFNA and PFHxS, lower bound concentrations are calculated on the assumption that all the values below the limit of quantification are zero.
-
