COMMISSION REGULATION (EU) 2026/742

of 30 March 2026

amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for cyflufenamid, fenazaquin and nicotine in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1), point (a), thereof,

Whereas:

- (1) For the active substances cyflufenamid and fenazaquin, maximum residue levels ('MRLs') were set in Annex II to Regulation (EC) No 396/2005. For the active substance nicotine, temporary MRLs were set in Part A of Annex III to that Regulation.
- (2) As regards cyflufenamid, an application requesting a modification of the existing MRLs was submitted for parsley, blackberries, raspberries (red and yellow) and 'other small fruits and berries' pursuant to Article 6(1) of Regulation (EC) No 396/2005. As regards fenazaquin, such an application was submitted for sweet/bell peppers, tomatoes and aubergines.
- (3) In accordance with Articles 8 and 9 of Regulation (EC) No 396/2005, all those applications were evaluated by the Member States concerned and the evaluation reports were forwarded to the Commission. The Commission forwarded the applications, the evaluation reports and the supporting dossiers to the European Food Safety Authority ('the Authority').
- (4) The Authority assessed the applications and the evaluation reports, examining in particular the risks to consumers and, where relevant, to animals, and gave reasoned opinions on the proposed MRLs ⁽²⁾. It forwarded those opinions to the applicants, the Commission and Member States and made them available to the public.
- (5) As regards all those applications, the Authority concluded that the data were appropriate to derive or confirm the MRL proposals for the commodities under assessment. It is therefore appropriate to set the requested MRLs for cyflufenamid in parsley, blackberries, raspberries (red and yellow) and 'other small fruits and berries'; and for fenazaquin in sweet/bell peppers, tomatoes and aubergines at the levels recommended by the Authority. For the sake of clarity, the footnote indicating a lack of information concerning residue trials for fenazaquin on tomatoes should be deleted from Annex II to Regulation (EC) No 396/2005.

- (6) As regards nicotine in tea, a temporary MRL of 0,5 mg/kg was set by Commission Regulation (EU) 2025/115 ⁽³⁾ with a deadline for review by February 2026. After this date, the MRL would automatically be lowered to 0,4 mg/kg unless it is modified before, in the light of new data provided by 30 June 2025. Monitoring data submitted within the set deadline by food business operators indicate that a level of 0,4 mg/kg is not widely achievable. The presence of nicotine residues in food is often due to factors such as environmental and/or manufacture contamination or endogenous production rather than to its use as pesticide. Since the Authority concluded that a level of 0,5 mg/kg of nicotine in tea is safe for consumers ⁽⁴⁾, it is appropriate to maintain the current temporary MRL of 0,5 mg/kg for nicotine in tea to take into account residues resulting from potential sources other than pesticide use and to extend the validity of that temporary MRL until 22 February 2030.
- (7) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (8) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Cyflufenamid (sum of cyflufenamid (Z-isomer) and its E-isomer, expressed as cyflufenamid) (R) (A)

(R) The residue definition differs for the following combinations pesticide-code number: Cyflufenamid - code 1000000 except 1040000: sum of cyflufenamid (Z-isomer), its E-isomer and metabolite 149-F1, expressed as cyflufenamid

(A) The EU reference laboratories identified the reference standard for the E-isomer and for metabolite 149-F1 as commercially not available. When reviewing the MRLs, the Commission will take into account the commercial availability of the reference standard referred to it in the first sentence by 17 September 2020, or, if that reference standard is not commercially available by that date, the unavailability of it.
