THE EUROPEAN COMMISSION,

If the user chooses the option to enter the data required in a less structured way in 'AddressFree' all available address details shall be presented as one string of bytes, blank or "/" (slash) or carriage return- line feed used as a delimiter between parts of the address. PLEASE NOTE that the address country code is outside both of these elements. The use of the fixed form is recommended as a rule to allow easy matching. However, the use of the free form is recommended if the sending state cannot reliably identify and distinguish the different parts of the address. The user may want to use both formats e.g. if besides separating the logical parts of the address he also wants to indicate a suitable breakdown into print-lines by delimiters in the free text form. This element is mandatory for Reporting Platform Operator and must not be provided for an Entity Seller.

By way of an example, Platform Z is operated by two Platform Operators: Platform Operator 1 (resident in jurisdiction 1) and Platform Operator 2 (resident in jurisdiction 2). Platform Operator 1 will not provide ReportableSeller element.
