KOMMISSIONENS AFGØRELSE

af 23. februar 1999

om oprettelse af en liste over aromastoffer, som anvendes eller er bestemt til anvendelse i eller på levnedsmidler, i medfør af Europa-Parlamentets og Rådets forordning (EF) nr. 2232/96

(meddelt under nummer K(1999) 399)

(EØS-relevant tekst)

(1999/217/EF)

(EFT L 084 af 27.3.1999, s. 1)

KOMMISSIONEN FOR DE EUROPÆISKE FÆLLESSKABER HAR —

under henvisning til traktaten om oprettelse af Det Europæiske Fællesskab,

under henvisning til Europa-Parlamentets og Rådets forordning (EF) nr. 2232/96 af 28. oktober 1996 om fastlæggelse af en fællesskabsprocedure for aromastoffer, som anvendes eller er bestemt til anvendelse i eller på levnedsmidler⁽¹⁾, særlig artikel 3, stk. 2, og

ud fra følgende betragtninger:

I medfør af artikel 3, stk. 1, i forordning (EF) nr. 2232/96 sender hver enkelt medlemsstat inden et år efter, at forordningen er trådt i kraft, Kommissionen en liste over de aromastoffer, den accepterer anvendt i eller på levnedsmidler, der markedsføres på dens område;

i medfør af artikel 3, stk. 2, i forordningen optages anmeldte aromastoffer, hvis lovlige brug i en medlemsstat skal anerkendes i de øvrige medlemsstater, på en liste, som godkendes efter fremgangsmåden i artikel 7 i forordningen;

det tages til efterretning, at nogle medlemsstater har begrænset eller forbudt brugen af nogle aromastoffer;

det tages til efterretning, at sådanne begrænsninger og forbud, der er gældende på tidspunktet for vedtagelsen af nærværende afgørelse, fortsat kan anvendes, indtil der er foretaget en fuldstændig evaluering af det pågældende stof;

hvis en medlemsstat konstaterer, at et aromastof på listen kan bringe folkesundheden i fare, kan den fortsat bringe beskyttelsesproceduren i artikel 3, stk. 3, i forordning (EF) nr. 2232/96 i anvendelse;

listen danner grundlag for det evalueringsprogram, som er omhandlet i artikel 4 i førnævnte forordning, og som skal fastlægges senest ti måneder efter godkendelsen af listen;

foranstaltningerne i denne afgørelse er i overensstemmelse med udtalelse fra Den Stående Levnedsmiddelkomité —

TRUFFET FØLGENDE AFGØRELSE:

Artikel 1

Listen over aromastoffer i bilaget vedtages hermed.

Artikel 2

Denne afgørelse er rettet til medlemsstaterne.

⁽¹⁾ EFT L 299 af 23.11.1996, s. 1.

▼ **M2**

Liste over aromastoffer, som medlemsstaterne har givet meddelelse om i henhold til artikel 3, stk. 1, i forordning (EF) nr. 2232/96 om fastlæggelse af en fællesskabsprocedure for aromastoffer, som anvendes eller er bestemt til anvendelse i eller på levnedsmidler

Listen over kemisk definerede aromastoffer er opdelt i to adskilte dele. Del A omfatter stofferne opstillet efter FL-nummer. Del B omfatter de stoffer, som medlemsstaterne har anmodet om fortrolig behandling af af hensyn til beskyttelse af producenterens intellektuelle ejendomsret.

I del A er CAS ⁽¹⁾-, EINECS ⁽²⁾-, CoE ⁽³⁾- og FEMA ⁽⁴⁾-numre anført, når de findes.

Et nummer i kolonnen »Bemærkninger« henviser til følgende bemærkninger:

- 1) Stof, der benyttes på eller i levnedsmidler ikke blot af hensyn til sin aroma, men også til andre formål, og det kan derfor være omfattet af andre lovbestemmelser.
- 2) Stof, hvis brug i nogle medlemsstater er begrænset eller forbudt.
- 3) Stof, der skal prioriteres højt i evalueringsprogrammet, jf. forordning (EF) nr. 1565/2000.
- 4) Stof, som der skal forelægges supplerende oplysninger om.
- 5) Der kan forekomme inkonsekvens i forbindelse med navne, synonymer, systematiske navne samt CAS-, EINECS-, CoE- eller FEMA-numre.

▼ **M3**

- 6) Stof, der ikke må anvendes i eller på levnedsmidler, medmindre det markedsføres lovligt i den/de pågældende medlemsstater.

▼ **M2**

Der er specifikt opstået tvivl om, hvordan salte og andre derivater af et »generisk« stof skal behandles. Nogle stoffer er anmeldt med stor præcision. For andre stoffer mangler sådanne detaljerede oplysninger. For mange syrer og baser findes der ingen specifikke retningslinjer for, hvilke salte der er omfattet. Det antages foreløbig, men kun i forbindelse med denne liste, at ammonium-, natrium-, kalium- og calciumsalte samt chlorider, carbonater og sulfater er omfattet af det »generiske« stof, forudsat at disse forbindelser har aromaegenskaber. Den endelige accept afhænger imidlertid af resultaterne af evalueringen, hvor det i sådanne tilfælde nøje bør kontrolleres, at en sådan sammenlægning er korrekt.
