Corrigendum to Commission Implementing Decision (EU) 2019/235 of 24 January 2019 on amending Decision 2008/411/EC as regards an update of relevant technical conditions applicable to the 3 400-3 800 MHz frequency band

(Official Journal of the European Union L 37 of 8 February 2019)

On page 138, in the Annex, section A ‘Definitions’, the fifth paragraph:

for: \[ TRP = \frac{1}{4\pi} \int_0^{2\pi} \int_0^{\pi} P(\theta, \phi) \sin(\theta) \, d\theta \, d\phi \]

where \( P(\theta, \phi) \) is the power radiated by an antenna array system in direction \((\theta, \phi)\) given by the formula:

\[ P(\theta, \phi) = P_{\text{Tx}} g(\theta, \phi) \]

where \( P_{\text{Tx}} \) denotes the conducted power (measured in Watts), which is input to the array system, and \( g(\theta, \phi) \) denotes the array systems directional gain along the \((\theta, \phi)\) direction.

read: \[ TRP = \frac{1}{4\pi} \int_0^{2\pi} \int_0^{\pi} P(\theta, \phi) \sin(\theta) \, d\theta \, d\phi \]

where \( P(\theta, \phi) \) is the power radiated by an antenna array system in direction \((\theta, \phi)\) given by the formula:

\[ P(\theta, \phi) = P_{\text{Tx}} g(\theta, \phi) \]

where \( P_{\text{Tx}} \) denotes the conducted power (measured in Watts), which is input to the array system, and \( g(\theta, \phi) \) denotes the array systems directional gain along the \((\theta, \phi)\) direction.

On page 139, the fourth paragraph:

for: ‘In Tables 3, 4, and 7 the power limits are determined relative to a fixed upper limit by means of the formula \( \min(P_{\text{Max}} - A, B) \), which sets the lower (or stricter) of two values: (1) \( (P_{\text{Max}} - A) \) expressing the maximum carrier power \( P_{\text{Max}} \) minus a relative offset \( A \), and (2) the fixed upper limit \( B \).’

read: ‘In Tables 3, 4, and 7 the power limits are determined relative to a fixed upper limit by means of the formula \( \min(P_{\text{Max}} - A, B) \), which sets the lower (or stricter) of two values: (1) \( (P_{\text{Max}} - A) \) expressing the maximum carrier power \( P_{\text{Max}} \) minus a relative offset \( A \), and (2) the fixed upper limit \( B \).’
