COMMISSION REGULATION (EC) No 1828/2006
of 8 December 2006

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 1083/2006 of 11 July 2006 laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund and repealing Regulation (EC) No 1260/1999 (1), and in particular Article 37(1)(d), the third paragraph of Article 44, Articles 59(6), 60(b) and 66(3), Article 67(2)(c), Articles 69(1), 70(3), 71(5), 72(2), 74(2) and 76(4) and the second subparagraph of Article 99(5) thereof,

Having regard to Regulation (EC) No 1080/2006 of the European Parliament and of the Council of 5 July 2006 on the European Regional Development Fund and repealing Regulation (EC) No 1783/1999 (2), and in particular the second subparagraph of Article 7(2) and the second paragraph of Article 13 thereof,

Whereas:

Experience has shown that citizens of the European Union are insufficiently aware of the role played by the Community in funding programmes aimed at reinforcing economic competitiveness, creating jobs and strengthening internal cohesion. It is therefore appropriate to provide for the preparation of a communication plan which identifies in detail the information and publicity measures necessary to bridge this communication and information gap. For the same purpose, it is also necessary to identify the responsibilities and the roles that should be played by each of the actors involved.

In order to guarantee that information on possible funding opportunities is disseminated widely to all interested parties and for the sake of transparency, the minimum content of the information measures needed to inform potential beneficiaries about the financing opportunities offered jointly by the Community and the Member States through the Funds should be set out, including an obligation to publicise the steps that a potential beneficiary should take to submit an application for funding and the selection criteria that will be used.

In order to enhance transparency regarding use of the Funds, the list of beneficiaries, the names of the operations and the amount of public funding allocated to operations should be published, electronically or otherwise.

In order to ensure a better implementation of the information measures and to allow a better exchange of information between the Member States and the Commission on the information and publicity strategies and results, contact persons responsible for the information and publicity measures should be designated and should participate in appropriate Community networks.

For the purposes of Articles 37 and 67 of Regulation (EC) No 1083/2006, it is necessary to lay down detailed rules and categories to allow the Member States to submit to the Commission uniform information on the programmed use of the Funds, as well as information on the cumulative allocation of the Funds by categories throughout the life of a programme, and to enable the Commission to inform the other Institutions and the citizens of the European Union in an appropriate manner about the use of the Funds, including the achievement of the targets set out in Article 9(3) of Regulation (EC) No 1083/2006.

With regard to Article 60 of Regulation (EC) No 1083/2006 and in the light of the experience gained, it is necessary to lay down the obligations which the managing authorities should have with regard to beneficiaries in the phase leading to the selection and approval of the operations to be funded, with regard to the aspects which the verifications of the expenditure declared by the beneficiary should cover, including administrative verifications of the applications for reimbursement, and on-the-spot verifications of individual operations and with regard to the conditions to be observed when on-the-spot verifications are carried out on a sample basis.
It is also necessary to set out in detail the information which should be included in the accounting records of operations and the information to be kept as data on implementation which the managing authorities should record, store and send to the Commission upon request.

In order to ensure that expenditure under operational programmes can be properly audited, it is necessary to set out the criteria with which an audit trail should comply so as to be considered adequate.

The audit of operations is carried out under the responsibility of the audit authority. To ensure that the scope and effectiveness of those audits are adequate and that they are carried out according to the same standards in all Member States, it is necessary to set out the conditions which those audits should fulfil.

Experience has shown that it is necessary to set out in detail the basis for the sampling of operations to be audited, which the audit authority should observe in establishing or approving the sampling method, including certain technical criteria to be used for a random statistical sample and factors to be taken into account for a complementary sample.

In order to simplify and harmonise standards for the preparation and presentation of the audit strategy, the annual control report and the closure declarations for which the audit authority is responsible pursuant to Article 62 of Regulation (EC) No 1083/2006, it is necessary to make detailed provision about their content and specify the nature and quality of the information on which they rely.

In order to ensure the most effective application of Article 90 of Regulation (EC) No 1083/2006 with regard to the availability of documents and the right of the Court of Auditors and the Commission to have access to all supporting documents regarding expenditure and audits, managing authorities should ensure that information on the identity and location of the bodies holding the supporting documents is readily available and those documents should be readily supplied to a minimum list of persons and bodies. For the same purpose, it is necessary to set out which data carriers can be considered as commonly accepted for the purpose of keeping such documents. To this end, the national authorities should lay down the procedures necessary to ensure that the documents kept are in conformity with the originals, when this is relevant, and can be relied on for audit purposes.

In order to harmonise standards for the certification of expenditure and for the preparation of applications for payments, the content of such certificates and applications should be laid down and the nature and quality of the information on which they rely specified. Detailed procedures should be set out for keeping, in accordance with Article 61(f) of Regulation (EC) No 1083/2006, an account of amounts recoverable and of amounts withdrawn following cancellation of all or part of the contribution for an operation and for informing the Commission accordingly.
Pursuant to Article 71 of Regulation (EC) No 1083/2006, the Member States are, before the submission of the first interim application for payment or at least within twelve months of the approval of each operational programme, to submit to the Commission a description of the management and control systems, a report setting out the results of an assessment of the systems set up and an opinion on their compliance with the provisions of that Regulation on management and control systems. Since those documents are among the principal elements on which the Commission relies, in the context of the shared management of the Community budget, to satisfy itself that the financial assistance concerned is used by the Member States in accordance with the applicable rules and principles necessary for protecting the Community's financial interests, it is necessary to set out in detail the information that such documents should contain and the basis for the assessment and the opinion.

Operational programmes funded under the European territorial cooperation objective referred to in Article 3 of Regulation (EC) No 1083/2006 are presented by two or more Member States and have specific features, which are laid down in Regulation (EC) No 1080/2006. It is therefore appropriate to set out the specific information which the description of the management and control system for those programmes should contain.

Article 74 of Regulation (EC) No 1083/2006 provides, inter alia, that for operational programmes for which the total eligible public expenditure does not exceed EUR 750 million and for which the level of Community co-financing does not exceed 40% of the total public expenditure, a Member State may choose to rely more on national bodies and rules for carrying out certain functions related to the control and audit requirements. It is therefore necessary to set out which verifications, which audits of operations and which obligations can be carried out and executed according to national rules and by national bodies.

As part of their management and control obligations Member States are required to report and monitor irregularities. Detailed rules to implement that requirement were laid down in Commission Regulation (EC) No 1681/94 of 11 July 1994 concerning irregularities and the recovery of sums wrongly paid in connection with the financing of the structural policies and the organisation of an information system in this field (1), and Commission Regulation (EC) No 1831/94 of 26 July 1994 concerning irregularities and the recovery of sums wrongly paid in connection with the financing of the Cohesion Fund and the organisation of an information system in this field (2). It is appropriate, for reasons of clarity and simplification, to incorporate those rules into this Regulation.

(19) Provision should be made for the Commission to reimburse judicial costs when it requests a Member State to initiate or continue legal proceedings with a view to recovering amounts unduly paid following an irregularity, and for it to be supplied with information enabling it to decide on the apportionment of the loss from irrecoverable amounts pursuant to Article 70(2) of Regulation (EC) No 1083/2006. Regular contact should also be provided for between the Commission and the Member States on the subject of irregularities, for the use of the information supplied for making risk analyses and compiling reports, and for the provision of information to the relevant committees.

(20) In order to limit the administrative burden imposed by the reporting system while safeguarding the necessary level of information, Member States should, without prejudice to the obligations arising directly from Article 61(f) of Regulation (EC) No 1083/2006, not be obliged to report irregularities involving amounts below a certain threshold unless the Commission expressly so requests.

(21) In the light of Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data (1) and Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data (2), it is necessary to provide, in relation to the information and publicity measures and the audit work pursuant to this Regulation, that the Commission and the Member States should prevent any unauthorised disclosure of or access to personal data, and to specify the purpose for which the Commission and the Member States can process such data.

(22) For reasons of legal certainty and of equal treatment of all Member States, it is necessary to fix the rate applicable to the financial correction which the Commission may make when a Member State does not comply with its obligation to maintain in all the regions concerned during the programming period an agreed target level of public or equivalent structural expenditure. For reasons of simplification and proportionality, no financial correction should be applied if the difference between the agreed target level and the level achieved is equal to or less than 3 % of the agreed target level (de minimis threshold); for the same reasons, when the difference between the two levels is higher that 3 % of the agreed target level, the rate should be calculated by subtracting that de minimis threshold.

(23) The use of electronic means for the exchange of information and financial data leads to simplification, increased efficiency and transparency and to savings in time. In order to exploit these

advantages fully, while preserving the security of exchanges, a
common computer system should be established as well as a list
of documents of common interest to the Commission and the
Member States. It is therefore necessary to specify the format
each document should have and to provide a detailed description
of the information such documents should contain. For the same
reasons, it is necessary to specify how such a computer system
functions with regard to the identification of the party responsible
for uploading the documents and any updates thereto.

(24) In the framework of Directive 1999/93/EC of the European
Parliament and of the Council of 13 December 1999 on a
Community framework for electronic signatures (1), taking
account of the level of security and confidentiality required for
the financial management of the use of the Funds, of the state of
the art and of a cost-benefit analysis, it is necessary to require the
use of an electronic signature.

(25) In order to ensure the quick development and proper functioning
of the common computer system, the cost of its development
should be financed by the budget of European Communities
pursuant to Article 45 of Regulation (EC) No 1083/2006, and
the costs of the interface with national, regional, and local
computer systems should be eligible for a financial contribution
from the funds pursuant to Article 46 of the same Regulation.

(26) Building on the experience of the 2000-2006 programming
period, it is necessary to set out in detail the conditions which
financial engineering instruments should fulfil to be funded under
an operational programme, it being understood that contributions
to financial engineering instruments from the operational
programme and other public sources, as well as the investments
made by financial engineering instruments in individual enter-
prises, are subject to the rules on State aid including the
Community Guidelines on State aid to promote risk capital
investments in small and medium- sized enterprises (2).

(27) It is necessary to adopt the list of criteria to be used for iden-
tifying the areas where expenditure on housing can be eligible for
a contribution from the European Regional Development Fund
pursuant to Article 7(2) of Regulation (EC) No 1080/2006 and
the list of eligible interventions. Given the diversity of the
situations prevailing in the Member States concerned, it is appro-
priate to establish a list of criteria for identifying the areas experi-
cing or threatened by physical deterioration and social
exclusion where investment in housing may be eligible for co-
financing. It is also appropriate to set out that, in the case of
multi-family housing or housing designated for low-income
households or people with special needs, the interventions

eligible for co-financing should be those aimed at renovating the common parts of multi-family residential buildings or at delivering modern social housing of good quality through investing in the renovation and change of use of existing buildings owned by public authorities or non-profit operators.

(28) Article 56(4) of Regulation (EC) No 1083/2006 provides that rules on the eligibility of expenditure are to be laid down at national level, subject to the exceptions provided in the specific regulations for each Fund. With regard to Article 13 of Regulation (EC) No 1080/2006, common rules on the eligibility of expenditure should be laid down which are applicable to operational programmes under the European territorial cooperation objective in order to ensure consistency between the rules applicable to projects implemented in different Member States. Building upon experience with similar programmes in the programming period 2000-2006, it is appropriate to lay down common rules for the categories of expenditure for which national rules are most likely to differ. In order to reduce the administrative burden on beneficiaries and programme authorities, flat rates for overheads should under certain conditions be eligible.

(30) The measures provided for in this Regulation are in accordance with the opinion of the Coordination Committee of the Funds, HAS ADOPTED THIS REGULATION:

1. A communication plan, as well as any major amendments to it, shall be drawn up by the managing authority for the operational programme for which it is responsible or by the Member State to cover several or all operational programmes co-financed by the European Regional Development Fund (ERDF), the European Social Fund (ESF) or the Cohesion Fund.

2. The communication plan shall include at least the following:

(d) the administrative departments or bodies responsible for implementation of the information and publicity measures;

(e) an indication of how the information and publicity measures are to be evaluated in terms of visibility and awareness of operational programmes and of the role played by the Community.

**Article 3**

**Examination of compatibility of the communication plan**

The Member State or the managing authority shall submit the communication plan to the Commission within four months of the date of adoption of the operational programme or, where the communication plan covers two or more operational programmes, of the date of adoption of the last of these operational programmes.

In the absence of observations made by the Commission within two months of receipt of the communication plan, the plan shall be deemed to comply with Article 2(2).

If the Commission sends observations within two months of receipt of the communication plan, the Member State or the managing authority shall within two months send a revised communication plan to the Commission.

In the absence of further observations by the Commission within two months of submission of a revised communication plan, it shall be considered that the communication plan may be implemented.

(a) examples of information and publicity measures for the operational programme carried out when implementing the communication plan;

(b) the arrangements for the information and publicity measures referred to in Article 7(2)(d) including, where applicable, the electronic address at which such data may be found;

(c) the content of any major amendments to the communication plan.

The annual implementation report for the year 2010 and the final implementation report shall contain a chapter assessing the results of the information and publicity measures in terms of visibility and awareness of operational programmes and of the role played by the Community, as provided for in Article 2(2)(e).

3. The means used for implementing, monitoring and evaluating the communication plan shall be proportional to the information and publicity measures identified in the communication plan.

Article 5

Information measures for potential beneficiaries

1. The managing authority shall, in accordance with the communication plan, ensure that the operational programme is disseminated widely, with details of the financial contributions from the Funds concerned, and that it is made available to all interested parties.

It shall in addition ensure that information on the financing opportunities offered by joint assistance from the Community and the Member State through the operational programme is disseminated as widely as possible.

2. The managing authority shall provide potential beneficiaries with clear and detailed information on at least the following:

Article 7
Responsibilities of the managing authority relating to information and publicity measures for the public

1. The managing authority shall ensure that the information and publicity measures are implemented in accordance with the communication plan and that they aim at the widest possible media coverage using various forms and methods of communication at the appropriate territorial level.

The information referred to in Article 9 shall take up at least 25 % of the billboard.

When the operation is completed, the billboard shall be replaced by the permanent explanatory plaque referred to in paragraph 2.

4. Where an operation receives funding under an operational programme co-financed by the ESF and, in appropriate cases, where an operation receives funding under the ERDF or the Cohesion Fund, the beneficiary shall ensure that those taking part in the operation have been informed of that funding.

The beneficiary shall provide clear notice to the effect that the operation being implemented has been selected under an operational programme co-financed by the ESF, the ERDF or the Cohesion Fund.

Any document, including any attendance or other certificate, concerning such an operation shall include a statement to the effect that the operational programme was co-financed by the ESF or, where appropriate, the ERDF or the Cohesion Fund.

For small promotional objects, points (b) and (c) shall not apply.

Where an information or publicity measure promotes several operations co-financed by more than one Fund, the reference provided for in point (b) of the first paragraph shall not be required.

Article 10

Network and exchange of experience

1. Each managing authority shall designate the contact persons to be responsible for information and publicity and shall inform the Commission accordingly. In addition, Member States may designate a single contact person for all operational programmes.

2. Community networks comprising the persons designated under paragraph 1 may be set up to ensure exchanges of good practice, including the results of implementation of the communication plan, and exchanges of experience in implementing the information and publicity measures under this Section.

3. Exchanges of experience in the field of information and publicity may be supported through technical assistance pursuant to Article 45 of Regulation (EC) No 1083/2006.

Section 3

Management and control systems

Article 12

Intermediate bodies

Where one or more of the tasks of a managing authority or certifying authority are performed by an intermediate body, the relevant arrangements shall be formally recorded in writing.

The provisions of this Regulation concerning the managing authority and certifying authority shall apply to the intermediate body.

Article 13

Managing authority and controllers

1. For the purposes of the selection and approval of operations pursuant to Article 60(a) of Regulation (EC) No 1083/2006, the managing authority shall ensure that beneficiaries are informed of the specific conditions concerning the products or services to be delivered under the operation, the financing plan, the time-limit for execution and the financial and other information to be kept and communicated.

It shall satisfy itself that the beneficiary has the capacity to fulfil these conditions before the approval decision is taken.

2. The verifications to be carried out by the managing authority pursuant to Article 60(b) of Regulation (EC) No 1083/2006, or by the relevant controllers designated by Member States in the case of the European territorial cooperation objective programmes pursuant to Article 16 of Regulation (EC) No 1080/2006, shall cover, as appropriate, administrative, financial, technical and physical aspects of operations.

Verifications shall ensure that the expenditure declared is real, that the products or services have been delivered in accordance with the approval decision, that the applications for reimbursement by the beneficiary are correct and that the operations and expenditure comply with Community and national rules. They shall include procedures to avoid double-financing of expenditure with other Community or national schemes and with other programming periods.

Verifications shall include the following procedures:

(a) administrative verifications in respect of each application for reimbursement by beneficiaries;

(b) on-the-spot verifications of individual operations.

3. Where on-the-spot verifications pursuant to point (b) of the third subparagraph of paragraph 2 are carried out on a sample basis for an operational programme, the managing authority, or the relevant controllers in the case of European territorial cooperation objective programmes, shall keep records describing and justifying the sampling method and identifying the operations or transactions selected for verification.
The managing authority, or the relevant controllers in the case of European territorial cooperation objective programmes, shall determine the size of the sample in order to achieve reasonable assurance as to the legality and regularity of the underlying transactions, having regard to the level of risk identified by the managing authority, or the relevant controllers as appropriate, for the type of beneficiaries and operations concerned. The managing authorities or the relevant controllers shall review the sampling method each year.

4. The managing authority, or the relevant controllers in the case of European territorial cooperation objective programmes, shall establish written standards and procedures for the verifications carried out pursuant to paragraph 2 and shall keep records for each verification, stating the work performed, the date and the results of the verification, and the measures taken in respect of irregularities detected.

5. Where the managing authority is also a beneficiary under the operational programme, arrangements for the verifications referred to in paragraphs 2, 3 and 4 shall ensure adequate separation of functions in accordance with Article 58(b) of Regulation (EC) No 1083/2006.

**Article 14**

**Accounting records**

1. The accounting records of operations and the data on implementation referred to in Article 60(c) of Regulation (EC) No 1083/2006 shall include the information set out in Annex III to this Regulation.

The managing, certifying and audit authorities and the bodies referred to in Article 62(3) of Regulation (EC) No 1083/2006 shall have access to that information.

2. At the written request of the Commission, the Member State shall provide the Commission with the information referred to in paragraph 1 within 15 working days of receipt of the request, or any other agreed period, for the purpose of carrying out documentary and on-the-spot checks.

3. In the accounting records maintained in accordance with Article 61(f) of Regulation (EC) No 1083/2006, any amount related to an irregularity reported to the Commission under Article 28 of this Regulation shall be identified by the reference number attributed to that irregularity or by any other adequate method.

**Article 15**

**Audit trail**

For the purposes of Article 60(f) of Regulation (EC) No 1083/2006, an audit trail shall be considered adequate where, for the operational programme concerned, it complies with the following criteria:

(a) it permits the aggregate amounts certified to the Commission to be reconciled with the detailed accounting records and supporting documents held by the certifying authority, managing authority, intermediate bodies and beneficiaries as regards operations co-financed under the operational programme;
(b) it permits verification of payment of the public contribution to the beneficiary;

c) it permits verification of application of the selection criteria established by the monitoring committee for the operational programme;

d) it contains in respect of each operation, as appropriate, the technical specifications and financing plan, documents concerning the grant approval, documents relating to public procurement procedures, progress reports and reports on verifications and audits carried out.

Article 16
Audits of operations

1. The audits referred to in Article 62(1)(b) of Regulation (EC) No 1083/2006 shall be carried out each 12-month period from 1 July 2008 on a sample of operations selected by a method established or approved by the audit authority in accordance with Article 17 of this Regulation.

The audits shall be carried out on-the-spot on the basis of documentation and records held by the beneficiary.

2. The audits shall verify that the following conditions are fulfilled:

(a) the operation meets the selection criteria for the operational programme, has been implemented in accordance with the approval decision and fulfils any applicable conditions concerning its functionality and use or the objectives to be attained;

(b) the expenditure declared corresponds to the accounting records and supporting documents held by the beneficiary;

(c) the expenditure declared by the beneficiary is in compliance with Community and national rules;

(d) the public contribution has been paid to the beneficiary in accordance with Article 80 of Regulation (EC) No 1083/2006.

3. Where problems detected appear to be systemic in nature and therefore entail a risk for other operations under the operational programme, the audit authority shall ensure that further examination is carried out, including additional audits where necessary, to establish the scale of such problems. The necessary preventive and corrective action shall be taken by the relevant authorities.

4. Only expenditure falling within the scope of an audit carried out pursuant to paragraph 1 shall be counted towards the amount of expenditure audited, for the purposes of reporting in the tables in point 9 of Annex VI and point 9 of Annex VIII.

Article 17
Sampling

1. The sample of operations to be audited each year shall in the first instance be based on a random statistical sampling method as set out in paragraphs 2, 3 and 4. Additional operations may be selected as a complementary sample as set out in paragraphs 5 and 6.
2. The method used to select the sample and to draw conclusions from the results shall take account of internationally accepted audit standards and be documented. Having regard to the amount of expenditure, the number and type of operations and other relevant factors, the audit authority shall determine the appropriate statistical sampling method to apply. The technical parameters of the sample shall be determined in accordance with Annex IV.

3. The sample to be audited each twelve-month period shall be selected from those operations for which, during the year preceding the year in which the annual control report pursuant to Article 18(2) is communicated to the Commission, expenditure has been declared to the Commission for the operational programme or, where appropriate, for the operational programmes covered by a common management and control system. For the first 12-month period, the audit authority may decide to group the operations for which expenditure has been declared to the Commission in 2007 and 2008 as a basis for the selection of the operations to be audited.

4. The audit authority shall draw conclusions on the basis of the results of the audits relating to expenditure declared to the Commission during the year referred to in paragraph 3 and communicate them to the Commission in the annual control report.

In operational programmes for which the projected error rate is above the materiality level, the audit authority shall analyse its significance and take the necessary actions, including making appropriate recommendations, which will be communicated in the annual control report.

5. The audit authority shall regularly review the coverage provided by the random sample, having regard in particular to the need to have sufficient audit assurance for the declarations to be provided at partial and final closure for each operational programme.

It shall decide on the basis of professional judgment whether it is necessary to audit a complementary sample of additional operations in order to take account of specific risk factors identified and to guarantee for each programme sufficient coverage of different types of operation, beneficiaries, intermediate bodies and priority axes.

6. The audit authority shall draw conclusions on the basis of the results of the audits of the complementary sample and communicate them to the Commission in the annual control report.

Where the number of detected irregularities is high or where systemic irregularities have been detected, the audit authority shall analyse the significance thereof and take the necessary actions, including making appropriate recommendations, which shall be communicated in the annual control report.

The results of the audits on the complementary sample shall be analysed separately from those of the random sample. In particular, irregularities detected in the complementary sample shall not be taken into account when the error rate of the random sample is calculated.

**Article 18**

**Documents presented by the audit authority**

1. The audit strategy referred to in Article 62(1)(c) of Regulation (EC) No 1083/2006 shall be established in accordance with the model in Annex V to this Regulation. It shall be updated and reviewed annually and, if necessary, during the course of the year.
2. The annual control report and the opinion referred to in Article 62(1)(d) of Regulation (EC) No 1083/2006 shall be based on the systems audits and audits of operations carried out pursuant to Article 62(1)(a) and (b) of that Regulation in accordance with the audit strategy and shall be drawn up in accordance with the models set out in Annexes VI and VII to this Regulation.

For European territorial cooperation objective programmes, the annual control report and the opinion shall cover the whole of the programme and all programme expenditure eligible for a contribution from the ERDF.

The closure declaration and final control report shall be drawn up in accordance with the model set out in Annex VIII to this Regulation.

For European territorial cooperation objective programmes, the closure declaration and final control report shall cover the whole of the programme and all programme expenditure eligible for contribution from the ERDF.

4. If there is a limitation in the scope of examination or if the level of irregular expenditure detected does not allow the provision of an unqualified opinion for the annual opinion referred to in Article 62(1)(d) of Regulation (EC) No 1083/2006 or in the closure declaration referred to in point (e) of that Article, the audit authority shall give the reasons and estimate the scale of the problem and its financial impact.

5. In the event of partial closure of an operational programme, the declaration relating to the legality and regularity of the transactions covered by the statement of expenditure referred to in Article 88 of Regulation (EC) No 1083/2006 shall be drawn up by the audit authority in accordance with the model in Annex IX to this Regulation and submitted with the opinion referred to in Article 62(1)(d)(ii) of Regulation (EC) No 1083/2006.

(c) electronic versions of original documents;

(d) documents existing in electronic version only.

5. The procedure for certification of conformity of documents held on commonly accepted data carriers with the original document shall be laid down by the national authorities and shall ensure that the versions held comply with national legal requirements and can be relied on for audit purposes.

6. Where documents exist in electronic version only, the computer systems used must meet accepted security standards that ensure that the documents held comply with national legal requirements and can be relied on for audit purposes.

Where the amounts relate to expenditure registered in the accounts of the certifying authority during a period of more than one month, the exchange rate in the month during which expenditure was last registered may be used. Where the expenditure has not been registered in the accounts of the certifying authority, the most recent accounting exchange rate published electronically by the Commission shall be used.

Section 5

2. The information referred to in Article 14(1), together with information collected by the Commission in the course of its audits, shall be used by the Commission for the sole purpose of fulfilling its responsibilities pursuant to Article 72 of Regulation (EC) No 1083/2006. The European Court of Auditors and the European Anti-Fraud Office shall have access to that information.

3. The information referred to in Section 4 may not be sent to persons other than those in the Member States or within the Community institutions whose duties require that they have access to it, unless the Member State supplying such information has expressly so agreed.

4. Any personal data included in the information referred to in Article 7(2) (d) shall be processed only for the purpose specified in that Article.

Section 6

Financial correction for non-respect of additionality

Article 38

Rates of financial correction

1. Where the Commission makes a financial correction in accordance with Article 99(5) of Regulation (EC) No 1083/2006, the correction shall be calculated in accordance with paragraph 2 of this Article.
2. The rate of financial correction shall be obtained by subtracting 3 percentage points from the difference between the agreed target level and the level achieved, expressed as a percentage of the agreed target level, and then dividing the result by 10.

The financial correction shall be determined by applying that rate of financial correction to the Structural Fund contribution to the Member State concerned under the convergence objective for the full programming period.

3. If the difference between the agreed target level and the level achieved, expressed as a percentage of the agreed target level, referred to in paragraph 2, is 3 % or less, no financial correction shall be made.

4. The financial correction shall not exceed 5 % of the Structural Fund allocation to the Member State concerned under the convergence objective for the full programming period.

As soon as the cause of force majeure ceases, the Member State shall record the corresponding documents into the computer system for data exchange without delay.

By way of derogation from paragraph 2, the date taken into account for forwarding shall be deemed to be the date of sending of the documents in hard copy.

**Section 8**

Financial engineering instruments

**Article 43**

1. Articles 43 to 46 shall apply to financial engineering instruments in the form of actions which make repayable investments, or provide guarantees for repayable investments, or both, in the following:
(a) enterprises, primarily small and medium-sized enterprises (SMEs), including micro-enterprises, as defined in Commission Recommendation 2003/361/EC (1) as of 1 January 2005;

(b) public-private partnerships or other urban projects included in integrated plans for sustainable urban development, in the case of urban development funds;

(c) funds or other incentive schemes for energy efficiency and use of renewable energy in buildings, including in existing housing.

2. Financial engineering instruments, including holding funds, shall be independent legal entities governed by agreements between the co-financing partners or shareholders or as a separate block of finance within a financial institution.

   Where the financial engineering instrument is within a financial institution, it shall be set up as a separate block of finance, subject to specific implementation rules within the financial institution, stipulating, in particular, that separate accounts are kept which distinguish the new resources invested in the financial engineering instrument, including those contributed by the operational programme, from those initially available in the institution.

   The Commission may not become a co-financing partner or shareholder in financial engineering instruments.

3. When managing authorities or holding funds select financial engineering instruments, the financial engineering instruments shall submit a business plan or other appropriate document.

   The terms and conditions for contributions from operational programmes to financial engineering instruments shall be set out in a funding agreement, to be concluded between the duly mandated representative of the financial engineering instrument and the Member State or the managing authority, or the holding fund where applicable.

   The funding agreement shall include at least the following elements:

   (a) the investment strategy and planning;

   (b) provisions for monitoring of implementation;

   (c) an exit policy for the contribution from the operational programme out of the financial engineering instrument;

   (d) provisions for the winding-up of the financial engineering instrument, including the reutilisation of resources returned to the financial engineering instrument from investments or left over after all guarantees have been honoured that are attributable to the contribution from the operational programme.

4. Management costs may not exceed, on a yearly average, for the duration of the assistance any of the following thresholds, unless a higher percentage proves necessary following a competitive tender, in accordance with applicable rules:

   (a) 2 % of the capital contributed from the operational programme to holding funds, or of the capital contributed from the operational programme or holding fund to the guarantee funds;

(b) 3 % of the capital contributed from the operational programme or the holding fund to the financial engineering instrument in all other cases, with the exception of micro-credit instruments directed at micro-enterprises;

c) 4 % of the capital contributed from the operational programme or the holding fund to micro-credit instruments directed at micro-enterprises.

5. Returns from equity, loans and other repayable investments, and from guarantees for repayable investments, less a pro rata share of the management costs and performance incentives, may be allocated preferentially to investors operating under the market economy investor principle. Such returns may be allocated up to the level of remuneration laid down in the by-laws of the financial engineering instruments, and they shall then be allocated proportionally among all co-financing partners or shareholders.

6. Enterprises, public private partnerships and other projects included in an integrated plan for sustainable urban development, as well as operations for energy efficiency and use of renewable energy in buildings, including in existing housing which are supported by financial engineering instruments, may also receive a grant or other assistance from an operational programme.

7. Managing authorities shall take precautions to minimise distortion of competition in the venture capital or lending markets and the private guarantee market.

Article 44

1. Where the Structural Funds finance financial engineering instruments organised through holding funds, the Member State or managing authority shall conclude a funding agreement with the holding fund, setting out the funding arrangements and objectives.

The funding agreement shall, where appropriate, take account of the following:

(a) as regards financial engineering instruments supporting enterprises, primarily SMEs, including micro-enterprises, the conclusions of an evaluation of gaps between supply of such instruments, and demand for such instruments;

(b) as regards urban development funds, urban development studies or evaluations and integrated urban development plans included in operational programmes;

(c) as regards funds or other incentive schemes for energy efficiency and use of renewable energy in buildings, including in existing housing the relevant Union and national regulatory frameworks and the relevant national strategies.
2. The funding agreement referred to in paragraph 1 shall, in particular, make provision for:

(a) the terms and conditions for contributions from the operational programme to the holding fund;

(b) calls for expression of interest addressed to financial engineering instruments in accordance with applicable rules;

(c) the appraisal and selection of financial engineering instruments by the holding fund;

(d) the setting up and monitoring of the investment policy or the targeted urban development plans and actions;

(e) reporting by the holding fund to Member States or managing authorities;

(f) monitoring of the implementation of investments;

(g) audit requirements;

(h) an exit policy for the holding fund out of the financial engineering instruments;

(i) the provisions for the winding-up of the holding fund, including the reutilisation of resources returned from investments made or left over after all guarantees have been honoured which are attributable to the contribution from the operational programme.

In the case of financial engineering instruments supporting enterprises, the provisions on the setting up and monitoring of the investment policy referred to in point (d) of the first subparagraph shall comprise at least an indication of the targeted enterprises and the financial engineering products to be supported.

Article 45

Additional provisions applicable to financial engineering instruments for enterprises

Financial engineering instruments for enterprises referred to in Article 43(1)(a) shall invest only in activities which the managers of the financial engineering instruments judge potentially economically viable.

They shall not invest in firms in difficulty within the meaning of the Community Guidelines on State aid for rescuing and restructuring firms in difficulty (\(^1\)) as of 10 October 2004.

\(^1\) OJ C 244, 1.10.2004, p. 2.
Article 46

Urban development funds

1. Where Structural Funds finance urban development funds, those funds shall invest in public-private partnerships or other projects included in an integrated plan for sustainable urban development. Such public-private partnerships or other projects shall not include the creation and development of financial engineering instruments such as venture capital, loan and guarantee funds for enterprises.

2. For the purposes of paragraph 1, urban development funds shall invest by means of loans and guarantees, or equivalent instruments and by means of equity.

3. Where Structural Funds finance urban development funds, the funds concerned shall not re-finance acquisitions or participations in projects already completed.

Without prejudice to the list of ineligible expenditure in Article 7 of Regulation (EC) No 1080/2006, Articles 49 to 53 of this Regulation shall apply in accordance with Article 13 of Regulation (EC) No 1080/2006 to the determination of the eligibility of expenditure under operations selected as part of an operational programme under the European territorial cooperation objective.

Article 49
Financial charges and guarantee costs

The following charges and costs shall be eligible for a contribution from the ERDF:

(a) charges for transnational financial transactions;

(b) where the implementation of an operation requires a separate account or accounts to be opened, the bank charges for opening and administering the account or accounts;

(c) legal consultancy fees, notarial fees, costs of technical and financial experts, and accountancy and audit costs, if they are directly linked to the co-financed operation and are necessary for its preparation or implementation or, in the case of accounting and audit costs, if they relate to requirements imposed by the managing authority;

(d) the cost of guarantees provided by a bank or other financial institution to the extent to which the guarantees are required by national or Community legislation.

Fines, financial penalties and expenditure on legal disputes shall not be eligible.
Article 50

1. In addition to technical assistance for the operational programme pursuant to Article 46 of Regulation (EC) No 1083/2006, the following expenditure paid by public authorities in the preparation or implementation of an operation shall be eligible:

(a) the costs of professional services provided by a public authority other than the beneficiary in the preparation or implementation of an operation;

(b) the costs of the provision of services relating to the preparation and implementation of an operation provided by a public authority which is itself the beneficiary and which is executing an operation for its own account without recourse to outside service-providers.

2. The public authority concerned shall either invoice the costs referred to in paragraph 1(a) to the beneficiary or certify those costs on the basis of documents of equivalent probative value which permit the identification of real costs paid by that authority for that operation.

3. The costs referred to in point (b) of paragraph 1 shall be eligible if they do not arise from statutory responsibilities of the public authority or its day-to-day management, monitoring and control tasks and relate either to expenditure actually and directly paid for the co-financed operation or to in-kind contributions, as referred to in Article 51.

Article 51

In-kind contributions

Overheads shall be eligible provided that they are based on real costs attributable to the implementation of the operation concerned or on the average real costs attributable to operations of the same type.
Flat rates based on average costs may not exceed 25% of those direct costs of an operation which can affect the level of overheads. The calculation of flat rates shall be properly documented and periodically reviewed.

The first and second paragraphs shall only apply to operations approved before 13 October 2009 and where the option available to Member States in Article 7(4)(i) of Regulation (EC) No 1080/2006 has not been exercised.

Article 53

ANNEX I

INSTRUCTIONS FOR CREATING THE EMBLEM AND A DEFINITION OF THE STANDARD COLOURS

SYMBOLIC DESCRIPTION
Against a background of blue sky, twelve golden stars form a circle representing the union of the peoples of Europe. The number of stars is fixed, twelve being the symbol of perfection and unity.

HERALDIC DESCRIPTION
On an azure field a circle of twelve golden mullets, their points not touching.

GEOMETRIC DESCRIPTION

The emblem has the form of a blue rectangular flag of which the fly is one-and-a-half times the length of the hoist. Twelve gold stars situated at equal intervals form an invisible circle whose centre is the point of intersection of the diagonals of the rectangle. The radius of the circle is equal to one third of the height of the hoist. Each of the stars has five points which are situated on the circumference of an invisible circle whose radius is equal to 1/18th of the height of the hoist. All the stars are upright, i.e. with one point vertical and two points in a straight line at right angles to the mast. The circle is arranged so that the stars appear in the position of the hours on the face of a clock. Their number is invariable.

REGULATION COLOURS
The emblem is in the following colours:

— PANTONE REFLEX BLUE for the surface of the rectangle;

— PANTONE YELLOW for the stars.

FOUR-COLOUR PROCESS
If the four-colour process is used, recreate the two standard colours by using the four colours of the four-colour process.

— PANTONE YELLOW is obtained by using 100 % ‘Process Yellow’.

— PANTONE REFLEX BLUE is obtained by mixing 100 % ‘Process Cyan’ and 80 % ‘Process Magenta’.
INTERNET

PANTONE REFLEX BLUE corresponds in the web-palette colour RGB: 0/51/153 (hexadecimal: 003399) and PANTONE YELLOW corresponds in the web-palette colour RGB: 255/204/0 (hexadecimal: FFCC00).

MONOCHROME REPRODUCTION PROCESS

Using black, outline the rectangle in black and print the stars in black on white.

Using blue (Reflex Blue), use 100 % with the stars reproduced in negative white.

REPRODUCTION ON A COLOURED BACKGROUND

If there is no alternative to a coloured background, put a white border around the rectangle, the width of the border being 1/25th of the height of the rectangle.

ANNEX IV

TECHNICAL PARAMETERS FOR RANDOM STATISTICAL
SAMPLING PURSUANT TO ARTICLE 17 (SAMPLING)

1. A random statistical sampling method allows conclusions to be drawn from
the results of audits of the sample on the overall expenditure from which the
sample was taken, and hence provides evidence to obtain assurance on the
functioning of the management and control systems.

2. The assurance provided on the functioning of the systems is determined by
the degree of confidence resulting from the conclusions of the system audits
and from the audits of operations in the sample selected by a random statisti-
cal sampling method. In order to obtain a high level of assurance, that is, a
reduced audit risk, the audit authority should combine the results of system
audits and audits of operations. The audit authority first evaluates the reli-
ability of the systems (high, average or low) taking into account the results of
systems audits, so as to determine the technical parameters of the sampling, in
particular the confidence level and the expected error rate. Member States may
also use the results of the report on the compliance assessment pursuant to
Article 71(2) of Regulation (EC) No 1083/2006. The combined level of
assurance obtained from the systems audits and the audits of operations
should be high. The confidence level used for sampling operations should
not be less than 60 % with a maximum materiality level of 2 %. For a system
evaluated as having low reliability, the confidence level used for sampling
operations should not be below 90 %. The audit authority should describe in
the annual control report the way assurance has been obtained.

3. The reliability of management and control systems is determined using criteria
established by the audit authority for systems audits, including a quantified
assessment of all key elements of the systems and encompassing the main
authorities and intermediate bodies participating in the management and
control of the operational programme. A record of the assessments carried
out is kept in the audit file.

4. Where the management and control system is common to a number of similar
operational programmes, for example for the same Fund, in accordance with
Article 71(4) of Regulation (EC) No 1083/2006, a single sample guaranteeing
the same technical parameters of confidence and materiality levels and taking
into account the same expected rate of error, as indicated above, may be
selected for all programmes together.

5. Where the number of operations for a given reference year is insufficient to
allow the use of a statistical method for the random selection of the sample, a
non-statistical method may be used. The method applied must ensure a
random selection of the sample. The size of the sample must be determined
taking into account the level of assurance provided by the system, and must
be sufficient to enable the audit authority to draw valid conclusions (for
example low sampling risk) on the effective functioning of the system.

Part B: Closure declaration

To the European Commission, Directorate-General …

1. INTRODUCTION

I, the undersigned, representing the … (name of the body designated by Member State), have for the operational programme … (name of the operational programme, CCI code number, period) examined the results of the audit work carried out on this programme by or under the responsibility of the audit authority in accordance with the audit strategy (and have carried out the additional work I judged necessary). The results of the examination and any additional work I have performed are summarised in the attached final control report (which also contains the information required by the annual control report for the period 1 January 2015 to 31 December 2016). I have planned and performed this work with a view to obtaining a reasonable assurance as to whether the payment application for the final balance of the Community contribution to the operational programme is correct and valid and the underlying transactions covered by the final statement of expenditure are legal and regular.

2. SCOPE OF THE EXAMINATION

The examination was carried out in accordance with the audit strategy in respect of this programme and reported in the attached final control report pursuant to Article 62(1)(e) of Council Regulation (EC) No 1083/2006.

Either

There were no limitations on the scope of the examination.

Or

The scope of the examination was limited by the following factors:

(a) …

(b) …

(c) etc.

(Indicate any limitation on the scope of the examination, for example any systemic problems, weaknesses in the management and control system, lack of supporting documentation, cases under legal proceedings, etc., and estimate the amounts of expenditure and the Community contribution affected. If the audit authority does not consider that the limitations have an impact on the final expenditure declared, this should be stated.)

3. IRREGULARITIES AND ERROR RATES

Either

The cases of irregularity and error rates found in the audit work are not such as to preclude an unqualified opinion given the satisfactory way they have been dealt with by the managing authority and the trend in the level of their occurrence over time.

Or

The cases of irregularity and error rates found in the audit work and the way they have been dealt with by the managing authority are such as to preclude an unqualified opinion. A list of these cases is provided in the final control report, together with an indication of their possible systemic character and the scale of the problem. The amounts of total declared expenditure and public contribution that could be affected are … respectively. As a consequence, the corresponding Community contribution that could be affected is …
4. OPINION

Either

(Unqualified opinion)

If there were no limitations on the scope of the examination and the cases of irregularity and error rates and the way they have been dealt with by the managing authority do not preclude an unqualified opinion:

Based on the examination referred to above, it is my opinion that the final statement of expenditure presents fairly, in all material respects, the expenditure paid under the operational programme, that the application for payment of the final balance of the Community contribution to this programme is valid and that the underlying transactions covered by the final statement of expenditure are legal and regular.

Or

(Qualified opinion)

If there were limitations on the scope of the examination and/or the cases of irregularity and error rates and the way they have been dealt with by the managing authority call for a qualified opinion but do not justify an unfavourable opinion for all the expenditure concerned:

Based on the examination referred to above, it is my opinion that the final statement of expenditure presents fairly, in all material respects, the expenditure paid under the operational programme, that the application for payment of the final balance of the Community contribution to this programme is valid and that the underlying transactions covered by the final statement of expenditure are legal and regular, except with regard to the matters referred to at point 2 and/or to the observations at point 3 regarding the error rates and cases of irregularity and the way they have been dealt with by the managing authority, the impact of which is quantified above. I estimate the impact of these qualifications to be … of the total expenditure declared. The Community contribution affected is thus …

Or

(Adverse opinion)

If there were major limitations on the scope of the examination error rates and cases of irregularity and the way they have been dealt with by the managing authority such that no conclusion can be reached on the reliability of the final statement of expenditure without considerable further work:

Based on the examination referred to above, and in particular in view of the matters referred to at point 2 and/or the error rates and cases of irregularity and the fact that they have not been dealt with satisfactorily by the managing authority as reported at point 3, it is my opinion that the final statement of expenditure does not present fairly, in all material respects, the expenditure paid under the operational programme, that, as a consequence, the application for payment of the final balance of the Community contribution to this programme is not valid and that the underlying transactions covered by the final statement of expenditure are not legal and regular.

(1) Where a common system applies to two or more operational programmes, a description of the common system may be accompanied by a single report and opinion.
(2) Where the opinion is issued by the audit authority, the latter should provide a separate ‘Declaration of Competence and Operational Independence’ on its own functions under Article 62 of Council Regulation (EC) No 1083/2006.
(3) Indicate the body or bodies and the aspects of their systems that appear not to comply with the requirements.

(1) Specify if the rate is real or nominal. If the financial analysis is conducted in constant prices, a financial discount rate expressed in real terms shall be used. If the analysis is conducted in current prices, a discount rate in nominal terms shall be used.

(2) Investment cost should have exclude contingencies in accordance with working document number 4.

(3) This does not apply: (i) for projects subject to the rules on State aids in the meaning of Article 107 of the Treaty (see point G.1), pursuant to Article 55(9) of Regulation (EC) No 1833/2006, and (ii) if operating costs are higher than revenues the project is not considered as revenue generating in the sense of Article 56 of Regulation (EC) No 1833/2006, in which case, ignore lines 9 and 10 and set funding gap to 100%.

Where VAT is recoverable, the costs and revenues should be based on figures excluding VAT.

H. FINANCING PLAN

The decision amount and other financial information in this section must be coherent with the basis (total or public cost) for the co-financing rate of the priority axis. Where private expenditure is not eligible for financing under the priority axis it shall be excluded from the eligible costs, where private expenditure is eligible it may be included.

(12) This application does not replace notification to the Commission under Article 198(2) of the Treaty. A positive decision by the Commission on the major project under Regulation (EC) No 1088/2006 does not constitute state aid approval.

\(^1\) Ineligible costs comprise: (i) expenditure outside the eligibility period, (ii) expenditure ineligible under national rules (Articles 59(4) of Regulation (EC) No 1083/2006), (iii) other expenditure not presented for co-financing. \(\(\text{H(3.2.1)}\)\). The starting date for eligibility of expenditure is the date of receipt of the draft operational programme by the Commission or 1 January 2007, whichever is the earlier.

\(^2\) Contingencies should not exceed 10% of total investment cost net of contingencies. These contingencies may be included in the total eligible costs used to calculate the planned contribution of the funds — Section H.2.

\(^3\) A price adjustment may be included, where relevant, to cover expected inflation where the eligible cost values are in constant prices.

\(^4\) Where VAT is considered as eligible, give reasons.

\(^5\) Total cost must include all costs incurred for the project, from planning to supervision and must include VAT even if VAT is considered non-eligible.

### H.2. Total planned resources and planned contribution from the Funds

The funding gap rate was already presented under Section E.1.2. This should be applied to the eligible cost to calculate the ‘amount to which the co-financing rate for the priority axis applies’ (Article 41(3) of Council Regulation (EC) No 1083/2006). This is then multiplied by the co-financing rate of the priority axis to determine the Union contribution.
