COMMISSION IMPLEMENTING REGULATION (EU) 2022/1994

of 21 November 2022

amending the implementing technical standards laid down in Implementing Regulation (EU) 2021/451 as regards own funds, asset encumbrance, liquidity and reporting for the purposes of identifying global systemically important institutions

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and amending Regulation (EU) No 648/2012 ⁽¹⁾ and in particular to Article 415(3), first subparagraph, Article 415(3a), first subparagraph, Article 430(7), first subparagraph and Article 430(9), second subparagraph thereof,

Whereas:

- (1) Commission Implementing Regulation (EU) 2021/451 ⁽²⁾ lays down technical standards with regard to supervisory reporting and specifies the modalities according to which institutions are required to report information relevant to their compliance with Regulation (EU) No 575/2013. That Implementing Regulation should be amended to reflect the elements introduced in Regulation (EU) No 575/2013 by Regulation (EU) 2019/876 of the European Parliament and of the Council ⁽³⁾.
- (2) Regulation (EU) 2019/876 amended Regulation (EU) No 575/2013 to increase, inter alia, the degree of proportionality of the reporting requirements on liquidity. Therefore, it is necessary to specify the revised scope of the reporting requirements on additional liquidity monitoring metrics that are applicable to small and non-complex institutions in the Union in accordance with Implementing Regulation (EU) 2021/451. In line with the recommendations from the final report of the European Banking Authority (EBA) on the cost of compliance with reporting requirements referred to in Article 430(8) of Regulation (EU) No 575/2013, institutions that are not small and non-complex, but are neither large institutions, should, to some extent, also benefit from an increased degree of proportionality in additional liquidity monitoring metrics.
- (3) Regulation (EU) 2021/558 of the European Parliament and of the Council ⁽⁴⁾ together with Regulation (EU) 2021/557 of the European Parliament and of the Council ⁽⁵⁾ amended Regulation (EU) No 575/2013 and

⁽¹⁾ OJ L 176, 27.6.2013, p. 1.

⁽²⁾ Commission Implementing Regulation (EU) 2021/451 of 17 December 2020 laying down implementing technical standards for the application of Regulation (EU) No 575/2013 of the European Parliament and of the Council with regard to supervisory reporting of institutions and repealing Implementing Regulation (EU) No 680/2014 (OJ L 97, 19.3.2021, p. 1).

⁽³⁾ Regulation (EU) 2019/876 of the European Parliament and of the Council of 20 May 2019 amending Regulation (EU) No 575/2013 as regards the leverage ratio, the net stable funding ratio, requirements for own funds and eligible liabilities, counterparty credit risk, market risk, exposures to central counterparties, exposures to collective investment undertakings, large exposures, reporting and disclosure requirements, and Regulation (EU) No 648/2012 (OJ L 150, 7.6.2019, p. 1).

⁽⁴⁾ Regulation (EU) 2021/558 of the European Parliament and of the Council of 31 March 2021 amending Regulation (EU) No 575/2013 as regards adjustments to the securitisation framework to support the economic recovery in response to the COVID-19 crisis (OJ L 116, 6.4.2021, p. 25).

⁽⁵⁾ Regulation (EU) 2021/557 of the European Parliament and of the Council of 31 March 2021 amending Regulation (EU) 2017/2402 laying down a general framework for securitisation and creating a specific framework for simple, transparent and standardised securitisation to help the recovery from the COVID-19 crisis (OJ L 116, 6.4.2021, p. 1).

Regulation (EU) 2017/2402 ⁽⁶⁾, respectively, to introduce targeted adjustments to the securitisations framework. Those targeted adjustments should be reflected in the reporting requirements of Implementing Regulation (EU) 2021/451.

- (4) Regulation (EU) 2019/876 amended Regulation (EU) No 575/2013 with respect to the treatment of prudently valued software assets. In this respect, Commission Delegated Regulation (EU) 2020/2176 ⁽⁷⁾ amended Delegated Regulation (EU) No 241/2014 ⁽⁸⁾ to clarify the exemption of software assets from the deduction from Common Equity Tier 1 items. Implementing Regulation (EU) 2021/451 should be amended to provide competent authorities with information on institutions' implementation of the requirements of that Delegated Regulation.
- (5) The final report of the EBA on the cost of compliance recommended to exempt small and non-complex institutions from the reporting of certain asset encumbrance templates and to adjust the definition of the level of asset encumbrance. The Commission agrees with the recommendations on reducing the cost of compliance included in that report. It is therefore necessary to amend the corresponding provisions on reporting on asset encumbrance on an individual and a consolidated basis of Regulation (EU) 2021/451.
- (6) Implementing Regulation (EU) 2021/451 lays down the requirements for reporting of core information for the purposes of identifying global systemically important institutions (G-SIIs) and assigning G-SII buffer rates in accordance with a Union-specific methodology laid down in Commission Delegated Regulation (EU) No 1222/2014 ⁽⁹⁾. The indicators through which systemic importance is measured are equally applicable to banking groups and standalone institutions. Therefore, the reporting obligations should be extended to standalone institutions that meet the criteria for being included in the G-SII assessment exercise.
- (7) In order to improve the ability of competent authorities to effectively monitor and assess the institutions' risk profile, the institutions' compliance with prudential requirements, and to identify the risks that institutions may pose to the financial sector, a number of Annexes to Implementing Regulation (EU) 2021/451 should be amended.
- (8) In order to give clarity and sufficient time to prepare for the implementation of the reporting requirements introduced by this Regulation, institutions should start reporting in accordance with this Regulation not earlier than six months from its date of entry into force, in accordance with Article 430(7) of Regulation (EU) No 575/2013.
- (9) The provisions in this Regulation are closely linked, since Article 415(3), first subparagraph and Article 415(3a), first subparagraph, concern institutions' reporting obligations that are substantially aligned to other institutions' reporting obligations in accordance with Article 430 of Regulation (EU) No 575/2013. To ensure coherence between those provisions, the relevant implementing technical standards should be included in a single Regulation.
- (10) Implementing Regulation (EU) 2021/451 should therefore be amended accordingly.
- (11) This Regulation is based on the draft implementing technical standards submitted to the Commission by EBA.

⁽⁶⁾ Regulation (EU) 2017/2402 of the European Parliament and of the Council of 12 December 2017 laying down a general framework for securitisation and creating a specific framework for simple, transparent and standardised securitisation, and amending Directives 2009/65/EC, 2009/138/EC and 2011/61/EU and Regulations (EC) No 1060/2009 and (EU) No 648/2012 (OJ L 347, 28.12.2017, p. 35).

⁽⁷⁾ Commission Delegated Regulation (EU) 2020/2176 of 12 November 2020 amending Delegated Regulation (EU) No 241/2014 as regards the deduction of software assets from Common Equity Tier 1 items (OJ L 433, 22.12.2020, p. 27).

⁽⁸⁾ Commission Delegated Regulation (EU) No 241/2014 of 7 January 2014 supplementing Regulation (EU) No 575/2013 of the European Parliament and of the Council with regard to regulatory technical standards for Own Funds requirements for institutions (OJ L 74, 14.3.2014, p. 8).

⁽⁹⁾ Commission Delegated Regulation (EU) No 1222/2014 of 8 October 2014 supplementing Directive 2013/36/EU of the European Parliament and of the Council with regard to regulatory technical standards for the specification of the methodology for the identification of global systemically important institutions and for the definition of subcategories of global systemically important institutions (OJ L 330, 15.11.2014, p. 27).

- (12) EBA has conducted open public consultations on the draft implementing technical standards on which this Regulation is based, analysed the potential related costs and benefits and requested the advice of the Banking Stakeholder Group established in accordance with Article 37 of Regulation (EU) No 1093/2010 of the European Parliament and of the Council⁽¹⁰⁾,

PART I: GENERAL INSTRUCTIONS

1. STRUCTURE AND CONVENTIONS

1.1. STRUCTURE

1. Overall, the framework covers six topics:

(a) capital adequacy, an overview of regulatory capital; total risk exposure amount; prudent valuation; NPE loss coverage;

(b) group solvency, an overview of the fulfilment of the solvency requirements by all individual entities included in the scope of consolidation of the reporting entity;

(c) credit risk (including counterparty, dilution and settlement risks);

(d) market risk (including position risk in trading book, foreign exchange risk, commodities risk and CVA risk);

(e) operational risk;

(f) general governments exposures.

2. For each template legal references are provided. Further detailed information on more general aspects of the reporting of each block of templates, instructions concerning specific positions as well as validation rules are included in this part of this Implementing Regulation.

3. Institutions are to report only those templates that are relevant depending on the approach used for determining own funds requirements.

1.2. NUMBERING CONVENTION

4. The document follows the labelling convention set in points 5 to 8, when referring to the columns, rows and cells of the templates. Those numerical codes are extensively used in the validation rules.

5. The following general notation is followed in the instructions: {Template; Row; Column}.

6. In the case of validations inside a template, in which only data points of that template are used, notations do not refer to a template: {Row; Column}.

7. In the case of templates with only one column, only rows are referred to. {Template; Row}

8. An asterisk sign is used to express that the validation is done for the rows or columns specified before.

1.3. SIGN CONVENTION

9. Any amount that increases the own funds or the capital requirements shall be reported as a positive figure. On the contrary, any amount that reduces the total own funds or the capital requirements shall be reported as a negative figure. Where there is a negative sign (-) preceding the label of an item, no positive figure is expected to be reported for that item.

10. [empty]

PART II: TEMPLATE RELATED INSTRUCTIONS

1. CAPITAL ADEQUACY OVERVIEW (“CA”)

1.1. GENERAL REMARKS

11. The CA templates contain information about Pillar 1 numerators (own funds, Tier 1, Common Equity Tier 1), denominator (own funds requirements), and the application of Regulation (EU) No 575/2013 and Directive 2013/36/EU transitional provisions and is structured in five templates:

(a) Template CA1 contains the amount of own funds of the institutions, disaggregated in the items needed to get to that amount. The amount of own funds obtained includes the aggregate effect of the application of Regulation (EU) No 575/2013 and Directive 2013/36/EU transitional provisions per type of capital;

(b) Template CA2 summarises the total risk exposures amounts as defined in Article 92(3) of Regulation (EU) No 575/2013;

(c) Template CA3 contains the ratios for which Regulation (EU) No 575/2013 states a minimum level Pillar 2 ratios and some other related data;

(d) Template CA4 contains memorandums items needed, among others, for calculating items in CA1 as well as information with regard to Directive 2013/36/EU capital buffers;

(e) Template CA5 contains the data needed for calculating the effect of the application of Regulation (EU) No 575/2013 transitional provisions in own funds. CA5 will cease to exist once those transitional provisions expire.

12. The templates are to be used by all reporting entities, irrespective of the accounting standards followed, although some items in the numerator are specific for entities applying IAS/IFRS-type valuation rules. Generally, the information in the denominator is linked to the final results reported in the correspondent templates for the calculation of the total risk exposure amount.

13. The total own funds consist of different types of capital: Tier 1 capital (T1), which is the sum of Common Equity Tier 1 capital (CET1) and Additional Tier 1 capital (AT1) as well as Tier 2 capital (T2).

14. The application of Regulation (EU) No 575/2013 and Directive 2013/36/EU transitional provisions is treated as follows in CA templates:

(a) The items in CA1 are generally gross of transitional adjustments. That means that figures in CA1 items are calculated in accordance with the final provisions (i.e. as if there were no transitional provisions), with the exception of items summarizing the effect of those transitional provisions. For each type of capital (i.e. CET1; AT1 and T2), there are three different items in which all the adjustments due to those transitional provisions are included.

(b) Transitional provisions may also affect the AT1 and the T2 shortfall (i.e. AT1 or T2 the excess of deduction, regulated in Article 36(1), point (j) and Article 56 of Regulation (EU) No 575/2013, point (e) respectively), and thus the items containing those shortfalls may indirectly reflect the effect of those transitional provisions.

- (c) Template CA5 is exclusively used for reporting the effect due to the application of Regulation (EU) No 575/2013 transitional provisions.
15. The treatment of Pillar II requirements can be different within the Union (Article 104a(1) of Directive 2013/36/EU has to be transposed into national regulation). Only the impact of Pillar II requirements on the solvency ratio or the target ratio shall be included in the solvency reporting required under Regulation (EU) No 575/2013.
- a) The templates CA1, CA2 or CA5 only contain data on Pillar I issues.
- b) The template CA3 contains the impact of additional Pillar II-requirements on the solvency ratio on an aggregated basis. It mainly focuses on the target ratios themselves. There is no further link to the templates CA1, CA2 or CA5.
- c) The template CA4 contains one cell regarding additional own funds requirements relating to Pillar II. That cell has no link via validation rules to the capital ratios of the CA3 template and reflects Article 104a(1) of Directive 2013/36/EU which explicitly mentions additional own funds requirements as one possibility for Pillar II decisions.

1.6. TRANSITIONAL PROVISIONS and GRANDFATHERED INSTRUMENTS: INSTRUMENTS NOT CONSTITUTING STATE AID (CA5)

1.6.1. General remarks

16. CA5 summarises the calculation of own funds elements and deductions subject to the transitional provisions laid down in Articles 465 to 491, 494a and 494b of Regulation (EU) No 575/2013.

17. CA5 is structured as follows:

(a) Template CA5.1 summarises the total adjustments which need to be made to the different components of own funds (reported in CA1 in accordance with the final provisions) as a consequence of the application of the transitional provisions. The elements of this template are presented as “adjustments” to the different capital components in CA1, in order to reflect in own funds components the effects of the transitional provisions.

(b) Template 5.2 provides further details on the calculation of those grandfathered instruments which do not constitute state aid.

18. Institutions shall report in the first four columns the adjustments to Common Equity Tier 1 capital, Additional Tier 1 capital and Tier 2 capital as well as the amount to be treated as risk weighted assets. Institutions are also required to report the applicable percentage in column 0050 and the eligible amount without the recognition of transitional provisions in column 0060.
19. Institutions shall only report elements in CA5 during the period where transitional provisions laid down in Part Ten Regulation (EU) No 575/2013 apply.
20. Some of the transitional provisions require a deduction from Tier 1. If this is the case the residual amount of a deduction or deductions is applied to Tier 1 and there is insufficient AT1 to absorb this amount then the excess shall be deducted from CET1.

1.6.2. C 05.01 - Transitional provisions (CA5.1)

21. Institutions shall report in CA5.1 template the transitional provisions to own funds components as laid down in Articles 465 to 491, 494a and 494b of Regulation (EU) No 575/2013, compared to applying the final provisions laid down in Part Two, Title II of that Regulation (EU) No 575/2013.
22. Institutions shall report in rows 0060 to 0065 information about the transitional provisions of grandfathered instruments. The figures to be reported in row 0060 of CA5.1 reflect the transitional provisions included in the of Regulation (EU) No 575/2013 in the version applicable until 26 June 2019 and can be derived from the respective sections of CA5.2. Rows 0061 to 0065 capture the effect of the transitional provisions of Articles 494a and 494b of Regulation (EU) No 575/2013.
23. Institutions shall report in rows 0070 to 0092 information about the transitional provisions of minority interests and additional Tier 1 and Tier 2 instruments issued by subsidiaries (in accordance with Articles 479 and 480 of Regulation (EU) No 575/2013).
24. In rows 0100 onwards institutions shall report information about the effect of the transitional provisions regarding unrealised gains and losses, deductions, additional filters and deductions and IFRS 9.
25. There might be cases where the transitional deductions of CET1, AT1 or T2 capital exceed the CET1, AT1 or T2 capital of an institution. That effect – if it results from transitional provisions – shall be shown in the CA1 template using the respective cells. As a consequence, the adjustments in the columns of the CA5 template shall not include any spill-over effects in the case of insufficient capital available.

It provides, for each of those entities within the scope of the reporting, the own funds requirements for each risk category and the own funds for solvency purposes.

31. In the case of proportional consolidation of participations, the figures related to own funds requirements and own funds shall reflect the respective proportional amounts.

2.3. INFORMATION ON THE CONTRIBUTIONS OF INDIVIDUAL ENTITIES TO GROUP SOLVENCY

32. The objective of the third part of template C 06.02 and template C 06.01 (information on the contributions of all entities within Regulation (EU) No 575/2013 scope of consolidation to group solvency), including those that are not subject to particular solvency requirements on an individual basis, in columns 0250 to 0400, is to identify which entities within the group generate the risks and raise own funds from the market, based on data that are readily available or can easily be reprocessed, without having to reconstruct the capital ratio on a solo or sub-consolidated basis. At the entity level, both risk and own fund figures are contributions to the group figures and not elements of a solvency ratio on a solo basis and as such must not be compared to each other.
33. The third part also includes the amounts of minority interests, qualifying AT1, and qualifying T2 eligible in the consolidated own funds.
34. As this third part of the template refers to “contributions”, the figures to be reported herein shall defer, when applicable, from the figures reported in the columns referring to detailed group solvency information.
35. The principle is to delete the cross-exposures within the same groups in a homogeneous way both in terms of risks or own funds, in order to cover the amounts reported in the group’s consolidated CA template by adding the amounts reported for each entity in “Group Solvency” template. A direct link to the CA template is not possible where the 1 % threshold is not exceeded.
36. The institutions shall define the most appropriate breakdown method between the entities to take into account the possible diversification effects for market risk and operational risk.
37. It is possible for one consolidated group to be included within another consolidated group. That means that the entities within a subgroup shall be reported entity-by-entity in the GS of the entire group, even if the sub-group itself is subject to reporting requirements. A subgroup that is subject to reporting requirements shall also report the GS template on an entity-by-entity basis, although those details are included in the GS template of a higher consolidated group.
38. An institution shall report data of the contribution of an entity when its contribution to the total risk exposure amount exceeds 1 % of the total risk exposure amount of the group or when its contribution to the total own funds exceeds 1 % of the total own funds of the group. That threshold does not apply in the case of subsidiaries or subgroups that provide own funds (in the form of minority interests or qualifying AT1 or T2 instruments included in own funds) to the group.

0070-0240	<p>INFORMATION ON ENTITIES SUBJECT TO OWN FUNDS REQUIREMENT</p> <p>The section of detailed information (i.e. columns 0070 to 0240) shall gather information only on those entities and subgroups which, being within the scope of consolidation (Part One, Title II, Chapter 2 of Regulation (EU) No 575/2013), are effectively subject to solvency requirements laid down in Regulation (EU) No 575/2013 or provisions at least equivalent to Basel provisions (i.e. reported yes in column 0030).</p> <p>Information shall be included about all individual institutions of a consolidated group that are subject to own funds requirements, regardless where they are located.</p> <p>The information reported in this part shall reflect the local solvency rules of the jurisdiction in which the institution is operating (therefore, for this template, it is not necessary to do a double calculation on an individual basis on the basis of the parent institution’s rules). When local solvency rules differ from Regulation (EU) No 575/2013 and a comparable breakdown is not given, the information shall be completed where data are available in the respective granularity. Therefore, this part is a factual template that summarises the calculations that the individual institutions of a group shall carry out, bearing in mind that some of those institutions may be subject to different solvency rules.</p>

3. CREDIT RISK TEMPLATES

3.1. GENERAL REMARKS

39. There are different sets of templates for the Standardised approach and the IRB approach for credit risk. Additionally, separate templates for the geographical breakdown of positions subject to credit risk shall be reported if the relevant threshold set out in Article 5(5) of this Implementing Regulation is exceeded.

3.1.1. Reporting of CRM techniques with substitution effect

40. Exposures to obligors (immediate counterparties) and guarantors which are assigned to the same exposure class shall be reported as an inflow as well as an outflow to the same exposure class.

41. The exposure type shall not change because of unfunded credit protection.

42. If an exposure is secured by an unfunded credit protection, the secured part shall be assigned as an outflow e.g. in the exposure class of the obligor and as an inflow in the exposure class of the guarantor. However, the type of the exposure shall not change due to the change of the exposure class.

43. The substitution effect in the COREP reporting framework shall reflect the risk weighting treatment effectively applicable to the covered part of the exposure. As such, the covered part of the exposure shall be risk weighted in accordance with the Standardised approach and shall be reported in the CR SA template.

3.1.2. Reporting of Counterparty Credit Risk

44. Exposures stemming from Counterparty Credit Risk positions shall be reported in templates CR SA or CR IRB independent from whether they are Banking Book items or Trading Book items.

3.2. C 07.00 - CREDIT AND COUNTERPARTY CREDIT RISKS AND FREE DELIVERIES: STANDARDISED APPROACH TO CAPITAL REQUIREMENTS (CR SA)

3.2.1. General remarks

45. The CR SA templates provide the necessary information on the calculation of own funds requirements for credit risk in accordance with the Standardised approach. In particular, they provide detailed information on:

a) the distribution of the exposure values according to the different, exposure types, risk weights and exposure classes;

b) the amount and type of credit risk mitigation techniques used for mitigating the risks.

3.2.2. Scope of the CR SA template

46. In accordance with Article 112 of Regulation (EU) No 575/2013 each SA exposure shall be assigned to one of the 16 SA exposure classes to calculate the own funds requirements.

47. The information in CR SA is required for the total exposure classes and individually for each of the exposure classes under the Standardised approach. The total figures as well as the information of each exposure class are reported in a separate dimension.

48. However the following positions are not within the scope of CR SA:

(a) Exposures assigned to exposure class "items representing securitisation positions" as referred to in Article 112, point (m), of Regulation (EU) No 575/2013, which shall be reported in the CR SEC templates.

(b) Exposures deducted from own funds.

49. The scope of the CR SA template shall cover the following own funds requirements:

(a) Credit risk in accordance with Chapter 2 (Standardised approach) of Part Three, Title II of Regulation (EU) No 575/2013 in the banking book, among which Counterparty credit risk in accordance with Part Three, Title II, Chapters 4 and 6 of that Regulation in the banking book;

(b) Counterparty credit risk in accordance with Part Three, Title II, Chapters 4 and 6 of Regulation (EU) No 575/2013 in the trading book;

(c) Settlement risk arising from free deliveries in accordance with Article 379 of Regulation (EU) No 575/2013 in respect of all the business activities.

50. The template shall include all exposures for which the own funds requirements are calculated in accordance with Part Three, Title II, Chapter 2 of Regulation (EU) No 575/2013 in conjunction with Part Three, Title II, Chapters 4 and 6 of Regulation (EU) No 575/2013. Institutions that apply Article 94 (1) of Regulation (EU) No 575/2013 also need to report their trading book positions referred to in Article 92(3), point (b), of that Regulation in this template when they apply Part Three, Title II, Chapter 2 of that Regulation to calculate the own funds requirements thereof (Part Three, Title II, Chapters 2 and 6 and Part Three, Title V of that Regulation). Therefore the template shall not only provide detailed information on the type of the exposure (e.g. on balance sheet/ off balance sheet items), but also information on the allocation of risk weights within the respective exposure class.

51. In addition, CR SA includes memorandum items in rows 0290 to 0320 to collect further information about exposures secured by mortgages on immovable property and exposures in default.
52. Those memorandum items shall only be reported for the following exposure classes:
- (a) Central governments or central banks (Article 112, point (a), of Regulation (EU) No 575/2013 of Regulation (EU) No 575/2013);
 - (b) Regional governments or local authorities (Article 112, point (b), of Regulation (EU) No 575/2013);
 - (c) Public sector entities (Article 112, point (c), of Regulation (EU) No 575/2013);
 - (d) Institutions (Article 112, point (f), of Regulation (EU) No 575/2013);
 - (e) Corporates (Article 112, point (g), of Regulation (EU) No 575/2013);
 - (f) Retail (Article 112, point (h), of Regulation (EU) No 575/2013).
53. The reporting of the memorandum items shall affect neither the calculation of the risk weighted exposure amounts of the exposure classes referred to in Article 112, points (a) to (c) and (f) to (h), of Regulation (EU) No 575/2013 nor of the exposure classes referred to in Article 112, points (i) and (j), of that Regulation reported in template CR SA.
54. The memorandum rows provide additional information about the obligor structure of the exposure classes “in default” or “secured by immovable property”. Exposures shall be reported in these rows where the obligors would have been reported in the exposure classes “Central governments or central banks”, “Regional governments or local authorities”, “Public sector entities”, “Institutions”, “Corporates” and “Retail” of CR SA, if those exposures were not assigned to the exposure classes “in default” or “secured by immovable property”. The figures reported, however, are the same as used to calculate the risk weighted exposure amounts in the exposure classes “in default” or “secured by immovable property”.
55. E.g. if an exposure, the risk exposure amounts of which are calculated in accordance with Article 127 of Regulation (EU) No 575/2013 and the value adjustments are less than 20 %, then that information shall be reported in CR SA, row 0320 in the total and in the exposure class “in default”. If this exposure, before it defaulted, was an exposure to an institution, then that information shall also be reported in row 0320 of exposure class “institutions”.
- 3.2.3. Assignment of exposures to exposure classes under the Standardised approach
56. In order to ensure a consistent categorisation of exposures into the different exposure classes referred to in Article 112 of Regulation (EU) No 575/2013 the following sequential approach shall be applied:
- (a) In a first step, the Original exposure pre-conversion factors shall be classified into the corresponding (original) exposure class referred to in Article 112 of Regulation (EU) No 575/2013, without prejudice to the specific treatment (risk weight) that each specific exposure shall receive within the assigned exposure class.
 - (b) In a second step the exposures may be redistributed to other exposure classes due to the application of credit risk mitigation (CRM) techniques with substitution effects on the exposure (e.g. guarantees, credit derivatives, financial collateral simple method) via inflows and outflows.
57. The following criteria shall apply to for the classification of the Original exposure pre-conversion factors into the different exposure classes (first step) without prejudice to the subsequent redistribution caused by the use of CRM techniques with substitution effects on the exposure or to the treatment (risk weight) that each specific exposure shall receive within the assigned exposure class.

58. For the purpose of classifying the original exposure pre-conversion factor in the first step, the CRM techniques associated to the exposure shall not be considered (note that they shall be considered explicitly in the second phase) unless a protection effect is intrinsically part of the definition of an exposure class as it is the case in the exposure class referred to in Article 112, point (i), of Regulation (EU) No 575/2013 (exposures secured by mortgages on immovable property).
59. Article 112 of Regulation (EU) No 575/2013 does not provide criteria for disjoining the exposure classes. This might imply that one exposure could potentially be classified in different exposure classes if no prioritisation in the assessment criteria for the classification is provided. The most obvious case arises between exposures to institutions and corporate with a short-term credit assessment (Article 112, point (n), of Regulation (EU) No 575/2013) and exposures to institutions (Article 112, point (f), of Regulation (EU) No 575/2013)/ exposures to corporates (Article 112, point (g), of Regulation (EU) No 575/2013). In that case, it is clear that there is an implicit prioritisation in that Regulation since it shall be assessed first if a certain exposure is fit for being assigned to Short-term exposures to institutions and corporates and only afterwards assessed if it fits for being assigned to exposures to institutions or exposures to corporates. Otherwise it is obvious that the exposure class referred to in Article 112, point (n), of Regulation (EU) No 575/2013 shall never be assigned an exposure. The example provided is one of the most obvious examples but is not the only one. It is worth noting that the criteria used for establishing the exposure classes under the Standardised approach are different (institutional categorisation, term of the exposure, past due status, etc.) which is the underlying reason for non-disjoint groupings.
60. For a homogeneous and comparable reporting it is necessary to specify prioritisation assessment criteria for the assignment of the Original exposure pre-conversion factor by exposure classes, without prejudice to the specific treatment (risk weight) that each specific exposure shall receive within the assigned exposure class. The prioritisation criteria presented below, using a decision tree scheme, are based on the assessment of the conditions explicitly laid down in Regulation (EU) No 575/2013 for an exposure to fit in a certain exposure class and, if that is the case, on any decision on the part of the reporting institutions or the supervisor on the applicability of certain exposure classes. Therefore, the outcome of the exposure assignment process for reporting purposes shall be in line with Regulation (EU) No 575/2013 provisions. That does not prohibit institutions from applying other internal assignment procedures that may also be consistent with all relevant Regulation (EU) No 575/2013 provisions and its interpretations issued by the appropriate fora.
61. An exposure class shall be given priority to others in the assessment ranking in the decision tree (i.e. it shall be first assessed if an exposure can be assigned to an exposure class, without prejudice to the outcome of that assessment) if otherwise no exposures would potentially be assigned to it. That will be the case where in the absence of prioritisation criteria one exposure class is a subset of others. Therefore, the criteria graphically depicted in the following decision tree would work on a sequential process.
62. With this background the assessment ranking in the decision tree mentioned below shall follow the following order:
1. Securitisation positions;
 2. Items associated with particular high risk;
 3. Equity exposures
 4. Exposures in default;
 5. Exposures in the form of units or shares in collective investment undertakings (“CIU”)/ Exposures in the form of covered bonds (disjoint exposure classes);
 6. Exposures secured by mortgages on immovable property;

7. Other items;
8. Exposures to institutions and corporates with a short-term credit assessment;
9. All other exposure classes (disjoint exposure classes) which include Exposures to central governments or central banks; Exposures to regional governments or local authorities; Exposures to public sector entities; Exposures to multilateral development banks; Exposures to international organisations; Exposures to institutions; Exposures to corporate and Retail exposures.
63. In the case of exposures in the form of units or shares in collective investment undertakings and where the look through approach or the mandate-based approach (Article 132a, points (1) and (2), of Regulation (EU) No 575/2013) is used, the underlying individual (in the case of the look through approach) and individual group of (in the case of the mandate-based approach) exposures shall be considered and classified into their corresponding risk weight line according to their treatment. However, all the individual exposures shall be classified within the exposure class of Exposures in the form of units or shares in collective investment undertakings (“CIU”).
64. “nth” to default credit derivatives, as specified in Article 134(6) of Regulation (EU) No 575/2013 that are rated shall be directly classified as securitisation positions. If they are not rated, they shall be considered in the “Other items” exposure class. In that latter case, the nominal amount of the contract shall be reported as the Original exposure pre-conversion factors in the line for “Other risk weights” (the risk weight used shall be that specified by the sum indicated under Article 134(6) of Regulation (EU) No 575/2013.
65. In a second step, as a consequence of credit risk mitigation techniques with substitution effects, exposures shall be reallocated to the exposure class of the protection provider.

3.2.4. Clarifications on the scope of some specific exposure classes referred to in Article 112 of Regulation (EU) No 575/2013

3.2.4.1. Exposure Class “Institutions”

66. Intra-group exposures referred to in Article 113, paragraphs 6 and 7 of Regulation (EU) No 575/2013 shall be reported as follows:

67. Exposures which fulfil the requirements of Article 113(7) of Regulation (EU) No 575/2013 shall be reported in the respective exposure classes where they would be reported if they were not intra-group exposures.

68. According to Article 113, paragraphs 6 and 7 of Regulation (EU) No 575/2013 an institution may, subject to the prior approval of the competent authorities, decide not to apply the requirements of paragraph 1 of that Article to the exposures of that institution to a counterparty which is its parent undertaking, its subsidiary, a subsidiary of its parent undertaking or an undertaking linked by a relationship within the meaning of Article 12(1) of Directive 83/349/EEC. That means that intra-group counterparties are not necessarily institutions but also undertakings which are assigned to other exposure classes, e.g. ancillary services undertakings or undertakings within the meaning of Article 12(1) of Council Directive 83/349/EEC ⁽²⁾. Therefore intra-group exposures shall be reported in the corresponding exposure class.

3.2.4.2. Exposure Class “Covered Bonds”

69. SA exposures shall be assigned to the exposure class “covered bonds” as follows:

70. Bonds referred to in Article 52(4) of Directive 2009/65/EC of the European Parliament and of the Council ⁽³⁾ shall fulfil the requirements of Article 129, paragraphs 1 and 2 of Regulation (EU) No 575/2013 to be classified in the exposure class “Covered Bonds”. The fulfilment of those requirements has to be checked in each case. Nevertheless, bonds referred to in Article 52(4) of Directive 2009/65/EC and issued before 31 December 2007 shall also be assigned to the exposure class “Covered Bonds” pursuant to Article 129(6) of Regulation (EU) No 575/2013.

3.2.4.3. Exposure class “Collective Investment Undertakings”

71. Where the possibility referred to in Article 132a (2) of Regulation (EU) No 575/2013 is used, exposures in the form of units or shares in CIUs shall be reported as on balance sheet items in accordance with the first sentence in Article 111(1) of Regulation (EU) No 575/2013.

3.3. CREDIT AND COUNTERPARTY CREDIT RISKS AND FREE DELIVERIES: IRB APPROACH TO OWN FUNDS REQUIREMENTS (CR IRB)

3.3.1. Scope of the CR IRB template

72. The scope of the CR IRB template covers:

- i. Credit risk in the banking book, among which:
 - Counterparty credit risk in the banking book;
 - Dilution risk for purchased receivables;
- ii. Counterparty credit risk in the trading book;
- iii. Free deliveries resulting from all business activities.

73. The scope of the template refers to the exposures for which the risk weighted exposure amounts are calculated in accordance with Part Three, Title II, Chapter 3, Articles 151 to 157 of Regulation (EU) No 575/2013 (IRB approach).

74. The CR IRB template does not cover the following data:

- i. Equity exposures, which are reported in the CR EQU IRB template;
- ii. Securitisation positions, which are reported in the CR SEC and/or CR SEC Details templates;
- iii. “Other non credit-obligation assets”, as referred to in Article 147(2), point (g), of Regulation (EU) No 575/2013. The risk weight for this exposure class has to be set at 100 % at any time except for cash in hand, equivalent cash items and exposures that are residual values of leased assets, in accordance with Article 156 of Regulation (EU) No 575/2013. The risk weighted exposure amounts for this exposure class shall be reported directly in the CA-Template;
- iv. Credit valuation adjustment risk, which is reported on the CVA Risk template;

The CR IRB template does not require a geographical breakdown of IRB exposures by residence of the counterparty. This breakdown shall be reported in the template CR GB.

Items i) and iii) do not apply to template CR IRB 7.

75. In order to clarify whether the institution uses its own estimates for LGD and/or credit conversion factors, the following information shall be provided for each reported exposure class:

“NO” = in case the supervisory estimates of LGD and credit conversion factors are used (Foundation IRB)

“YES” = in case own estimates of LGD and credit conversion factors are used (Advanced IRB). This includes all retail portfolios.

In case an institution uses own estimates of LGDs to calculate risk weighted exposure amounts for a part of its IRB exposures as well as supervisory LGDs to calculate risk weighted exposure amounts for the other part of its IRB exposures, an CR IRB Total for F-IRB positions and one CR IRB Total for A-IRB positions has to be reported.

3.3.2. Breakdown of the CR IRB template

76. The CR IRB consists of seven templates. CR IRB 1 provides a general overview of IRB exposures and the different methods to calculate risk weighted exposure amounts as well as a breakdown of total exposures by exposure types. CR IRB 2 provides a breakdown of total exposures assigned to obligor grades or pools (exposures reported under row 0070 of CR IRB 1). CR IRB 3 provides all relevant parameters used for the calculation of credit risk capital requirements for IRB models. CR IRB 4 presents a flow statement explaining changes in risk weighted exposure amounts determined under the IRB approach for credit risk. CR IRB 5 provides information on the results of backtesting of PDs for the models reported. CR IRB 6 provides all relevant parameters used for the calculation of credit risk capital requirements under the slotting criteria for specialised lending. CR IRB 7 provides an overview of percentage of exposure value subject to SA or IRB approaches for each relevant exposure class. The templates CR IRB 1, CR IRB 2, CR IRB 3 and CR IRB 5 shall be reported separately for the following exposure and sub-exposure classes:

1) Total

(The Total template must be reported for the Foundation IRB approach and, separately for the Advanced IRB approach.)

2) Central banks and central governments

(Article 147(2), point (a), of Regulation (EU) No 575/2013)

3) Institutions

(Article 147(2), point (b), of Regulation (EU) No 575/2013)

4.1) Corporate – SME

(Article 147(2), point (c), of Regulation (EU) No 575/2013). For the purpose of classification to this sub-exposure class the reporting entities shall use their internal definition of SME as applied in internal risk management processes.

4.2) Corporate – Specialised lending

(Article 147(8) of Regulation (EU) No 575/2013)

4.3) Corporate – Other

(All exposures to corporates as referred to in Article 147(2), point (c), of Regulation (EU) No 575/2013, not reported under 4.1 and 4.2).

5.1) Retail – Secured by immovable property SME

(Retail exposures as referred to in Article 147(2), point (d), of Regulation (EU) No 575/2013 in conjunction with Article 154(3) of that Regulation which are secured by immovable property). For the purpose of classification to this sub-exposure class the reporting entities shall use their internal definition of SME as applied in internal risk management processes.

5.2) Retail – Secured by immovable property non-SME

(Retail exposures as referred to in Article 147(2), point (d), of Regulation (EU) No 575/2013 which are secured by immovable property and not reported under 5.1).

Under 5.1 and 5.2, retail exposures secured by immovable property shall be considered any retail exposures secured by immovable property recognised as collateral, regardless of the ratio of the value of collateral to the exposure or of the purpose of the loan.

5.3) Retail – Qualifying revolving

(Retail exposures as referred to in Article 147(2), point (d), of Regulation (EU) No 575/2013 in conjunction with Article 154(4) of that Regulation).

5.4) Retail – Other SME

(Retail exposures as referred to in Article 147(2), point (d), of Regulation (EU) No 575/2013 not reported under 5.1 and 5.3). For the purpose of classification to this sub-exposure class the reporting entities shall use their internal definition of SME as applied in internal risk management processes.

5.5) Retail – Other non – SME

(Retail exposures as referred to in Article 147(2), point (d), of Regulation (EU) No 575/2013 which were not reported under 5.2 and 5.3).

For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. For figures corresponding to an aggregation of obligor grades or pools (e.g. total exposures), the exposure weighted average of the PDs assigned to the obligor grades or pools included in the aggregation shall be provided. The exposure value (column 0110) shall be used for the calculation of the exposure-weighted average PD.</p> <p>For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. All reported risk parameters shall be derived from the risk parameters used in the internal rating scale approved by the respective competent authority.</p> <p>It is neither intended nor desirable to have a supervisory master scale. If the reporting institution applies a unique rating scale or is able to report in accordance with an internal master scale, that scale shall be used.</p> <p>Otherwise, the different rating scales shall be merged and ordered in accordance with the following criteria: Obligor grades of the different rating scales shall be pooled and ordered from the lower PD assigned to each obligor grade to the higher. Where the institution uses a large number of grades or pools, a reduced number of grades or pools to be reported may be agreed with the competent authorities. The same applies for continuous rating scales: a reduced number of grades to be reported shall be agreed with the competent authorities.</p>

PD RANGE	Exposures shall be allocated to an appropriate bucket of the fixed PD range based on the PD estimated at the beginning of the reporting period for each obligor assigned to this exposure class (without considering any substitution effects due to CRM). Institutions shall map exposure by exposure to the PD range provided in the template, also taking into account continuous scales. All defaulted exposures shall be included in the bucket representing PD of 100 %.

3.3.4.1. Instructions concerning specific positions

81. In addition to template C 08.05, institutions shall report information included in template C 08.05.1 in case that they apply Article 180(1), point (f), of Regulation (EU) No 575/2013 for PD estimation and only for PD estimates in accordance with the same Article. Instructions are the same than for template C 08.05, with the following exceptions:

Columns	Instructions
0005	PD RANGE Institutions shall report the PD ranges in accordance with their internal grades that they map to the scale used by the external ECAI, instead of a fixed external PD range.
0006	EXTERNAL RATING EQUIVALENT Institutions shall report one column for each ECAI considered following Article 180(1), point (f), of Regulation (EU) No 575/2013. Institutions shall include in these columns the external rating to which their internal PD ranges are mapped.

3.3.5. C 08.06 - Credit risk and free deliveries: IRB approach to Capital Requirements (Specialised lending slotting approach (CR IRB 6))

3.3.5.1. General remarks

82. Institutions shall report the information included in this template in application of Article 438, point (e), of Regulation (EU) No 575/2013. Institutions shall report information on the following types of specialised lending exposures referred to in Table 1 of Article 153(5):

3.3.6. C 08.07 - Credit risk and free deliveries: IRB approach to Capital Requirements (Scope of use of IRB and SA approaches (CR IRB 7))

3.3.6.1. General remarks

83. For the purpose of this template, institutions calculating the risk-weighted exposure amounts under the IRB approach to credit risk shall allocate their exposures subject to Standardised approach laid down in Part Three, Title II, Chapter 2 of Regulation (EU) No 575/2013 or to the IRB approach laid down in Part Three, Title II, Chapter 3 of that Regulation, as well as the part of each exposure class subject to a roll-out plan. Institutions shall include the information in this template by exposure classes, in accordance with the breakdown of exposure classes included in the rows of the template.

84. Columns 0030 to 0050 should cover the full spectrum of exposures, so the sum of each row for those three columns should be 100 % of all exposure classes except of securitisation positions and deducted positions.

EXPOSURE CLASSES	Institutions shall include the information in this template by exposure classes, in accordance with the breakdown of exposure classes included in the rows of the template.

3.4. CREDIT AND COUNTERPARTY CREDIT RISKS AND FREE DELIVERIES: INFORMATION WITH GEOGRAPHICAL BREAKDOWN

85. All institutions shall submit information aggregated at a total level. Additionally, institutions fulfilling the threshold set in Article 5(5) of this Implementing Regulation shall submit information broken down by country regarding the domestic country as well as any non-domestic country. The threshold shall be considered only in relation to the CR GB 1 and CR GB 2 templates. Exposures to supranational organisations shall be assigned to the geographical area “other countries”.

86. The term “residence of the obligor” refers to the country of incorporation of the obligor. This concept can be applied on an immediate-obligor basis and on an ultimate-risk basis. Hence, CRM techniques with substitution effects can change the allocation of an exposure to a country. Exposures to supranational organisations shall not be assigned to the country of residence of the institution but to the geographical area “Other countries”, irrespective of the exposure class where the exposure to supranational organisations is assigned.

87. Data regarding “original exposure pre-conversion factors” shall be reported referring to the country of residence of the immediate obligor. Data regarding “exposure value” and “Risk weighted exposure amounts” shall be reported as of the country of residence of the ultimate obligor.

3.4.3. C 09.04 – Breakdown of credit exposures relevant for the calculation of the countercyclical buffer by country and institution-specific countercyclical buffer rate (CCB)

3.4.3.1. General remarks

88. This template aims at receiving more information regarding the elements of the institution-specific countercyclical capital buffer. The information required refers to the own funds requirements determined in accordance with Part Three, Title II and Title IV of Regulation (EU) No 575/2013 and the geographical location for credit exposures, securitisation exposures and trading book exposures relevant for the calculation of the institution-specific countercyclical capital buffer (CCB) in accordance with Article 140 of Directive 2013/36/EU (relevant credit exposures).

89. Information in template C 09.04 shall be reported for the “Total” of relevant credit exposures across all jurisdictions where those exposures are located and individually for each of the jurisdictions in which relevant credit exposures are located. The total figures as well as the information of each jurisdiction shall be reported in a separate dimension.

90. The threshold set in Article 5(5) of this Implementing Regulation shall not apply for the reporting of this breakdown.

91. In order to determine the geographical location, the exposures shall be allocated on an immediate obligor basis as provided for in Commission Delegated Regulation (EU) No 1152/2014 ⁽⁴⁾. Therefore, CRM techniques shall not change the allocation of an exposure to its geographical location for the purpose of reporting information set out in this template.

3.5. C 10.01 AND C 10.02 – EQUITY EXPOSURES UNDER THE INTERNAL RATINGS BASED APPROACH (CR EQU IRB 1 AND CR EQU IRB 2)

3.5.1. General remarks

92. The CR EQU IRB template consists of two templates: CR EQU IRB 1 provides a general overview of IRB exposures of the equity exposure class and the different methods to calculate total risk exposure amounts. CR EQU IRB 2 provides a breakdown of total exposures assigned to obligor grades in the context of the PD/LGD approach. “CR EQU IRB” refers to both “CR EQU IRB 1” and “CR EQU IRB 2” templates, as applicable, in the following instructions.

93. The CR EQU IRB template provides information on the calculation of risk weighted exposure amounts for credit risk (Article 92(3), point (a), of Regulation (EU) No 575/2013) in accordance with Part Three, Title II, Chapter 3 of Regulation (EU) No 575/2013 for equity exposures as referred to in of Article 147(2), point (e), of that Regulation.

94. In accordance with Article 147(6) of Regulation (EU) No 575/2013, the following exposures shall be assigned to the equity exposure class:

- (a) non-debt exposures conveying a subordinated, residual claim on the assets or income of the issuer;
- (b) debt exposures and other securities, partnerships, derivatives, or other vehicles, the economic substance of which is similar to the exposures specified in point (a).

95. Collective investment undertakings treated in accordance with the simple risk weight approach as referred to in Article 152(4), point (a), of Regulation (EU) No 575/2013 or treated in accordance with the fall-back approach of Article 152(6) of that Regulation shall also be reported in the CR EQU IRB template.

96. In accordance with Article 151(1) of Regulation (EU) No 575/2013, institutions shall provide the CR EQU IRB template when applying one of the three approaches referred to in Article 155 of Regulation (EU) No 575/2013:

- the Simple Risk Weight approach;
- the PD/LGD approach;
- the Internal Models approach.

In accordance with Article 155 of Regulation (EU) No 575/2013, institutions may employ different approaches (Simple Risk Weight approach, PD/LGD approach or Internal Models approach) to different portfolios when they use these different approaches internally.

Moreover, institutions applying the IRB approach shall also report in the CR EQU IRB template risk-weighted exposure amounts for those equity exposures which attract a fixed risk-weight treatment (without however being explicitly treated in accordance with the Simple Risk Weight approach or the (temporary or permanent) partial use of the Standardised approach for credit risk), e.g. equity exposures attracting a risk-weight of 250 % in accordance with Article 48(4) of Regulation (EU) No 575/2013, respectively a risk-weight of 370 % in accordance with Article 471(2) of the Regulation.

97. The following equity claims shall not be reported in the CR EQU IRB template:

- Equity exposures in the trading book (where institutions are not exempted from calculating own funds requirements for trading book positions (Article 94 of Regulation (EU) No 575/2013)).
- Equity exposures subject to the partial use of the Standardised approach (Article 150 of Regulation (EU) No 575/2013), including:
- Equity exposures grandfathered in accordance with Article 495(1) of Regulation (EU) No 575/2013;
- Equity exposures to entities the credit obligations of which are assigned a 0 % risk weight under the Standardised approach, including those publicly sponsored entities where a 0 % risk weight can be applied (Article 150(1), point (g), of Regulation (EU) No 575/2013),
- Equity exposures incurred under legislated programmes to promote specified sectors of the economy that provide significant subsidies for the investment to the institution and involve some form of government oversight and restrictions on the equity investments (Article 150(1), point (h), of Regulation (EU) No 575/2013),

- Equity exposures to ancillary services undertakings the risk weighted exposure amounts of which may be calculated in accordance with the treatment of “other non credit-obligation assets” (Article 155(1) of Regulation (EU) No 575/2013),
- Equity claims deducted from own funds in accordance with Articles 46 and 48 of Regulation (EU) No 575/2013.

3.6. C 11.00 – SETTLEMENT/DELIVERY RISK (CR SETT)

3.6.1. General remarks

99. This template requests information on both trading and non-trading book transactions which are unsettled after their due delivery dates, and their corresponding own funds requirements for settlement risk as referred to in Article 92(3), point (c)(ii) and Article 378 of Regulation (EU) No 575/2013.

100. Institutions shall report in the CR SETT template information on the settlement/delivery risk in connection with debt instruments, equities, foreign currencies and commodities held in their trading or non-trading book.

101. In accordance with Article 378 of Regulation (EU) No 575/2013, repurchase transactions, securities or commodities lending and securities or commodities borrowing in connection with debt instruments, equities, foreign currencies and commodities are not subject to own funds requirements for settlement/delivery risk. Note however that, derivatives and long settlement transactions unsettled after their due delivery dates shall nevertheless be subject to own funds requirements for settlement/delivery risk as determined in Article 378 of Regulation (EU) No 575/2013.
102. In case of unsettled transactions after the due delivery date, institutions shall calculate the price difference to which they are exposed. That is the difference between the agreed settlement price for the debt instrument, equity, foreign currency or commodity in question and its current market value, where the difference could involve a loss for the institution.
103. Institutions shall multiply that difference by the appropriate factor of Article 378, Table 1 of Regulation (EU) No 575/2013 to determine the corresponding own funds requirements.
104. In accordance with Article 92(4), point (b), of Regulation (EU) No 575/2013, the own funds requirements for settlement/delivery risk shall be multiplied by 12,5 to calculate the risk exposure amount.
105. Note that own funds requirements for free deliveries as laid down in Article 379 of Regulation (EU) No 575/2013 are not within the scope of the CR SETT template. Those own funds requirements shall be reported in the credit risk templates (CR SA, CR IRB).

3.7. C 13.01 - CREDIT RISK – SECURITISATIONS (CR SEC)

3.7.1. General remarks

106. Where institution acts as originator, the information in this template shall be required for all securitisations for which a significant risk transfer is recognised. Where the institution acts as investor, all exposures shall be reported.
107. The information to be reported shall be contingent on the role of the institution in the securitisation process. As such, specific reporting items shall be applicable for originators, sponsors and investors.
108. This template shall gather joint information on both traditional and synthetic securitisations held in the banking book.

3.7.2. Instructions concerning specific positions

111. These templates gather information on a transaction basis (versus the aggregate information reported in CR SEC, MKR SA SEC, MKR SA CTP, CA1 and CA2 templates) on all securitisations the reporting institution is involved in. In cases where institutions hold at least one position in the securitisation, regardless of whether there has been a significant risk transfer or not, institutions shall report information on all the positions they hold (either in the banking book or trading book). Positions held include those positions retained due to Article 6 of Regulation (EU) 2017/2402 and, where Article 43(6) of that Regulation applies, Article 405 of Regulation (EU) No 575/2013 in the version applicable on 31 December 2018.
- b. Securitisations, the ultimate underlying of which are financial liabilities originally issued by the reporting institution and (partially) acquired by a securitisation vehicle. That underlying could include covered bonds or other liabilities and shall be identified as such in column 0160.
- c. Positions held in securitisations where the reporting institution is neither originator nor sponsor (i.e. investors and original lenders).

Template C 14.01 shall only be reported for those securitisation positions treated under the securitisations framework.

113. These templates shall be reported by consolidated groups and stand-alone institutions ⁽⁶⁾ located in the same country where they are subject to own funds requirements. In case of securitisations involving more than one entity of the same consolidated group, the entity-by-entity detail breakdown shall be provided.

114. Because of Article 5 of Regulation (EU) 2017/2402, which establishes that institutions investing in securitisation positions shall acquire a great deal of information on them in order to comply with due diligence requirements, the reporting scope of the template shall be applied to investors to a limited extent. In particular, they shall report columns 0010-0040; 0070-0110; 0160; 0190; 0290-0300; 0310-0470.

115. Institutions playing the role of original lenders (not performing also the role of originators or sponsors in the same securitisation) shall generally report the template to the same extent as investors.

3.8.2 Breakdown of the SEC DETAILS template

116. The SEC DETAILS consists of two templates. SEC DETAILS provides a general overview of the securitisations. SEC DETAILS 2 provides a breakdown of the securitisation positions subject to own funds requirements in accordance with Part Three, Title II, chapter 5, section 3 of Regulation (EU) No 575/2013 by approach applied.

117. Securitisation positions in the trading book shall only be reported in columns 0010-0020, 0420, 0430, 0431, 0432, 0440 and 0450-0470. For columns 0420, 0430 and 0440, institutions shall take into account the RW corresponding to the own funds requirement of the net position.

4. OPERATIONAL RISK TEMPLATES

4.1 C 16.00 – OPERATIONAL RISK (OPR)

4.1.1 General Remarks

136. This template provides information on the calculation of own funds requirements in accordance with Articles 312 to 324 of Regulation (EU) No 575/2013 for Operational Risk under the Basic Indicator Approach (BIA), the Standardised Approach (TSA), the Alternative Standardised Approach (ASA) and the Advanced Measurement Approaches (AMA). An institution cannot apply TSA and ASA for the business lines retail banking and commercial banking at the same time at solo level.

137. Institutions using the BIA, TSA or ASA shall calculate their own funds requirement, based on the information at financial year-end. Where audited figures are not available, institutions may use business estimates. Where audited figures are used, institutions shall report the audited figures which are expected to remain unchanged. Deviations from this “unchanged” principle are possible, for instance if during that period the exceptional circumstances, such as recent acquisitions or disposals of entities or activities, are met.

138. Where an institution can justify its competent authority that – due to exceptional circumstances such as a merger or a disposal of entities or activities – using a three year average to calculating the relevant indicator would lead to a biased estimation for the own funds requirement for operational risk, the competent authority may permit the institution to modify the calculation in a way that would take into account such events. The competent authority may also on its own initiative require an institution to modify the calculation. An institution that has been in operation for less than three years may use forward looking business estimates in calculating the relevant indicator, provided that it starts using historical data as soon as those data are available.
139. By columns, this template presents information, for the three most recent years, on the amount of the relevant indicator of the banking activities subject to operational risk and on the amount of loans and advances (the latter only applicable in the case of ASA). Next, information on the amount of own funds requirement for operational risk is reported. Where applicable, it must be detailed which part of that amount is due to an allocation mechanism. Regarding AMA, memorandum items are added to present a detail of the effect of the expected loss, diversification and mitigation techniques on own funds requirement for operational risk.
140. By rows, information is presented by method of calculation of the operational risk own funds requirement detailing business lines for TSA and ASA.
141. This template shall be submitted by all institutions subject to operational risk own funds requirement.

4.1.2. Instructions concerning specific positions

Columns	
0010-0030	<p>RELEVANT INDICATOR</p> <p>Institutions using the relevant indicator to calculate the own funds requirement for operational risk (BIA, TSA and ASA) shall report the relevant indicator for the respective years in columns 0010 to 0030. Moreover, in case of a combined use of different approaches as referred in Article 314 of Regulation (EU) No 575/2013, institutions shall also report, for information purposes, relevant the indicator for the activities subject to AMA. The same shall apply for all other AMA banks.</p> <p>Hereafter, the term “relevant indicator” refers to “the sum of the elements” at the end of the financial year as referred to in Article 316, Table 1, point 1 of Regulation (EU) No 575/2013.</p> <p>Where the institution has less than 3 years of data on “relevant indicator” available, the available historical data (audited figures) shall be assigned by priority to the corresponding columns in the template. Where, for instance, historical data for only one year is available, those data shall be reported in column 0030. Where it seems reasonable, the forward looking estimates shall be included in column 0020 (estimate of next year) and column 0010 (estimate of year +2).</p> <p>Furthermore, where there are no historical data on “relevant indicator” available, the institution may use forward-looking business estimates.</p>
0040-0060	<p>LOANS AND ADVANCES (IN THE CASE OF ASA APPLICATION)</p> <p>These columns shall be used to report the amounts of the loans and advances, as referred to in Article 319(1), point (b), of Regulation (EU) No 575/2013, for business lines “commercial banking” and “retail banking”. Those amounts shall be used to calculate the alternative relevant indicator that leads to the own funds requirements corresponding to the activities subject to the alternative standard approach (Article 319(1), point (a), of Regulation (EU) No 575/2013).</p> <p>For the “commercial banking” business line, securities held in the non-trading book shall also be included.</p>
0070	<p>OWN FUND REQUIREMENT</p> <p>The own fund requirement shall be calculated in accordance with the approaches used and in accordance with Articles 312 to 324 of Regulation (EU) No 575/2013. The resulting amount shall be reported in column 0070.</p>

Columns	
0071	<p>TOTAL OPERATIONAL RISK EXPOSURE AMOUNT</p> <p>Article 92(4) of Regulation (EU) No 575/2013</p> <p>Own funds requirements in column 0070 multiplied by 12.5.</p>
0080	<p>OF WHICH: DUE TO AN ALLOCATION MECHANISM</p> <p>Where a permission to use the AMA at consolidated level (Article 18(1) of Regulation (EU) No 575/2013) has been granted in accordance with Article 312(2) of that Regulation, operational risk capital shall be allocated between the different entities of the group on the basis of the methodology applied by the institutions to consider diversification effects in the risk measurement system used by a EU parent credit institution and its subsidiaries or jointly by the subsidiaries of an EU parent financial holding company or an EU parent mixed financial holding company. The result of that allocation shall be reported in this column.</p>
0090-0120	<p>AMA MEMORANDUM ITEMS TO BE REPORTED IF APPLICABLE</p>
0090	<p>OWN FUNDS REQUIREMENT BEFORE ALLEVIATION DUE TO EXPECTED LOSS, DIVERSIFICATION AND RISK MITIGATION TECHNIQUES</p> <p>The own funds requirement reported in column 090 is the one of column 070 but calculated before taking into account the alleviation effects due to expected loss, diversification and risk mitigation techniques (see below).</p>
0100	<p>(-) ALLEVIATION OF OWN FUNDS REQUIREMENTS DUE TO THE EXPECTED LOSS CAPTURED IN BUSINESS PRACTICES</p> <p>In column 100, the alleviation of own funds requirements due to expected loss captured in internal business practices (as referred to in Article 322(2), point (a), of Regulation (EU) No 575/2013) shall be reported.</p>
0110	<p>(-) ALLEVIATION OF OWN FUNDS REQUIREMENTS DUE TO DIVERSIFICATION</p> <p>The diversification effect reported in this column shall be the difference between the sum of own funds requirements calculated separately for each operational risk class (i.e. a “perfect dependence” situation) and the diversified own funds requirement calculated by taking into account correlations and dependencies (i.e. assuming less than “perfect dependence” between the risk classes). The “perfect dependence” situation occurs in the “default case”, that is where the institution does not use explicit correlations structure between the risk classes, hence the AMA capital is calculated as the sum of the individual operational risk measures of the chosen risk classes. In that case, the correlation between the risk classes is assumed to be 100 % and the value in the column has to be set to zero. Conversely, where the institution calculates an explicit correlations structure between risk classes, it has to include in this column the difference between the AMA capital as stemming from the “default case” and the AMA capital obtained after applying the correlations structure between the risk classes. The value reflects the “diversification capacity” of the AMA model, that is the ability of the model to capture the not simultaneous occurrence of severe operational risk loss events. In column 110, the amount by which the assumed correlation structure decreases the AMA capital relative to the assumption of 100 % correlation has to be reported.</p>
0120	<p>(-) ALLEVIATION OF OWN FUNDS REQUIREMENT DUE TO RISK MITIGATION TECHNIQUES (INSURANCE AND OTHER RISK TRANSFER MECHANISMS)</p> <p>The impact of insurance and other risk transfer mechanisms as referred to in Article 323 of Regulation (EU) No 575/2013 shall be reported in this column.</p>

Rows	
0010	<p>BANKING ACTIVITIES SUBJECT TO BASIC INDICATOR APPROACH (BIA)</p> <p>This row shall present the amounts corresponding to activities subject to the BIA to calculate the own funds requirement for operational risk (Articles 315 and 316 of Regulation (EU) No 575/2013).</p>
0020	<p>BANKING ACTIVITIES SUBJECT TO STANDARDISED (TSA)/ ALTERNATIVE STANDARDISED (ASA) APPROACHES</p> <p>The own funds requirement calculated in accordance with the TSA and ASA (Articles 317, 318 and 319 of Regulation (EU) No 575/2013) shall be reported.</p>
0030-0100	<p>SUBJECT TO TSA</p> <p>Where the TSA is used, the relevant indicator for each respective year shall be distributed in rows 0030 to 0100 amongst the business lines referred to in Article 317, Table 2 of Regulation (EU) No 575/2013. The mapping of activities into business lines shall follow the principles described in Article 318 of Regulation (EU) No 575/2013.</p>
0110-0120	<p>SUBJECT TO ASA</p> <p>Institutions using the ASA (Article 319 of Regulation (EU) No 575/2013) shall report for the respective years the relevant indicator separately for each business line in rows 0030 to 0050 and 0080 to 0100 and in rows 0110 and 0120 for business lines “commercial banking” and “retail banking”.</p> <p>Rows 110 and 120 shall present the amount of the relevant indicator of activities subject to ASA, distinguishing between the amount corresponding to the business line “commercial banking” and the amounts corresponding to the business line “retail banking” (Article 319 of Regulation (EU) No 575/2013). There can be amounts for the rows corresponding to “commercial banking” and “retail banking” under the TSA (rows 0060 and 0070) as well as under the ASA rows 0110 and 0120 (e.g. if a subsidiary is subject to TSA whereas the parent entity is subject to ASA).</p>
0130	<p>BANKING ACTIVITIES SUBJECT TO ADVANCED MEASUREMENT APPROACHES AMA</p> <p>The relevant data for AMA institutions (Article 312(2) and Articles 321, 322 and 323 of Regulation (EU) No 575/2013) shall be reported.</p> <p>Where different approaches are combined as indicated in Article 314 of Regulation (EU) No 575/2013, information on relevant indicator for activities subject to AMA shall be reported. The same shall apply for all other AMA banks.</p>

4.2. OPERATIONAL RISK: DETAILED INFORMATION ON LOSSES IN THE LAST YEAR (OPR DETAILS)

4.2.1. General Remarks

142. Template C 17.01 (OPR DETAILS 1) summarises the information on the gross losses and loss recoveries registered by an institution in the last year by event types and business lines. Template C 17.02 (OPR DETAILS 2) provides detailed information on the largest loss events in the most recent year.
143. Operational risk losses that are related to credit risk and are subject to own funds requirements for credit risk (boundary credit-related operational risk events) are neither considered in template C 17.01 nor template C 17.02.
144. In case of a combined use of different approaches for the calculation of own funds requirements for operational risk in accordance with Article 314 of Regulation (EU) No 575/2013, losses and recoveries registered by an institution shall be reported in C 17.01 and C 17.02, irrespective of the approach applied to calculate own funds requirements.

145. "Gross loss" means a loss - as referred to in Article 322(3), point (b), of Regulation (EU) No 575/2013 - stemming from an operational risk event or loss event type before recoveries of any kind, without prejudice to "rapidly recovered loss events" as defined below.
146. "Recovery" means an independent occurrence related to the original operational risk loss that is separate in time, in which funds or inflows of economic benefits are received from first or third parties, such as insurers or other parties. Recoveries are broken down into recoveries from insurance and other risk transfer mechanisms and direct recoveries.
147. "Rapidly recovered loss events" means operational risk events that lead to losses that are partly or fully recovered within five working days. In case of a rapidly recovered loss event, only the part of the loss that is not fully recovered (i.e. the loss net of the partial rapid recovery) shall be included into the gross loss definition. As a consequence, loss events that lead to losses that are fully recovered within five working days shall not be included into the gross loss definition, and neither into the OPR DETAILS reporting.
148. "Date of accounting" means the date when a loss or reserve/provision was first recognised in the Profit and Loss statement, against an operational risk loss. Those date logically follow the "Date of occurrence" (i.e. the date when the operational risk event happened or first began) and the "Date of discovery" (i.e. the date on which the institution became aware of the operational risk event).
149. Losses caused by a common operational risk event or by multiple events linked to an initial operational risk event generating events or losses ("root-event") are grouped. The grouped events shall be considered and reported as one event, and thus the related gross loss amounts, respectively amounts of loss adjustments, shall be summed up.
150. The figures reported in June of the respective year shall be interim figures, while the final figures shall be reported in December. Therefore, the figures in June shall have a six-month reference period (i.e. from 1 January to 30 June of the calendar year) while the figures in December shall have a twelve-month reference period (i.e. from 1 January to 31 December of the calendar year). Both for data reported in June and December, "previous reporting reference periods" shall mean all reporting reference periods until and including the one ending at the preceding calendar year end.
- 4.2.2. C 17.01: Operational risk losses and recoveries by business lines and loss event types in the last year (OPR DETAILS 1)
- 4.2.2.1. General Remarks
151. In template C 17.01, the information shall be presented by distributing the losses and recoveries above internal thresholds amongst business lines (as listed in Article 317, Table 2 of Regulation (EU) No 575/2013, including the additional business line "corporate items" referred to in Article 322(3), point (b), of Regulation (EU) No 575/2013) and loss event types (as referred to in Article 324 of Regulation (EU) No 575/2013). It is possible that the losses corresponding to one loss event are distributed amongst several business lines.
152. Columns present the different loss event types and the totals for each business line, together with a memorandum item that shows the lowest internal threshold applied in the data collection of losses, revealing within each business line the lowest and the highest threshold where there is more than one threshold.
153. Rows present the business lines, and within each business line, information on the number of loss events (new loss events), the gross loss amount (new loss events), the number of loss events subject to loss adjustments, the loss adjustments relating to previous reporting periods, the maximum single loss, the sum of the five largest losses and the total loss recoveries (direct loss recoveries as well as recoveries from insurance and other risk transfer mechanisms).

154. For the total business lines, data on the number of loss events and the gross loss amount shall also be reported for certain ranges based on set thresholds, that is 10,000, 20,000, 100,000, and 1,000,000. The thresholds are set in EUR and are included for comparability purposes of the reported losses among institutions. Those thresholds do therefore not necessarily relate to the minimum loss thresholds used for the internal loss data collection, to be reported in another section of the template.

5. MARKET RISK TEMPLATES

158. These instructions refer to the templates for the reporting of the calculation of own funds requirements in accordance with the Standardised Approach for foreign exchange risk (MKR SA FX), commodities risk (MKR SA COM), interest rate risk (MKR SA TDI, MKR SA SEC, MKR SA CTP) and equity risk (MKR SA EQU). Additionally, instructions for the template for the reporting of the calculation of own funds requirements in accordance with the internal models approach (MKR IM) are included in this part.

159. The position risk on a traded debt instrument or equity (or debt or equity derivative) shall be divided into two components in order to calculate the capital required against it. The first shall be its specific-risk component — that is the risk of a price change in the instrument concerned due to factors related to its issuer or, in the case of a derivative, the issuer of the underlying instrument. The second component shall cover its general risk — that is the risk of a price change in the instrument due (in the case of a traded debt instrument or debt derivative) to a change in the level of interest rates or (in the case of an equity or equity derivative) to a broad equity- market movement unrelated to any specific attributes of individual securities. The general treatment of specific instruments and netting procedures can be found in Articles 326 to 333 of Regulation (EU) No 575/2013.

5.1.1. General Remarks

160. This template captures the positions and the related own funds requirements for position risks on traded debt instruments under the Standardised Approach (Article 325 (2), point (a), of Regulation (EU) No 575/2013). The different risks and methods available under of Regulation (EU) No 575/2013 are considered by rows. The specific risk associated with exposures included in MKR SA SEC and MKR SA CTP has only to be reported in the Total template of the MKR SA TDI. The own funds requirements reported in those templates shall be transferred to cell {0325;0060} (securitisations) and {0330;0060} (CTP) respectively.

161. The template has to be filled out separately for the “Total”, plus a pre-defined list of following currencies: EUR, ALL, BGN, CZK, DKK, EGP, GBP, HRK, HUF, ISK, JPY, MKD, NOK, pLN, RON, RUB, RSD, SEK, CHF, TRY, UAH, USD and one residual template for all other currencies.

5.2. C 19.00 - MARKET RISK: STANDARDISED APPROACH FOR SPECIFIC RISK IN SECURITISATIONS (MKR SA SEC)

5.2.1. General Remarks

162. This template requests information on positions (all/net and long/short) and the related own funds requirements for the specific risk component of position risk in securitisations/ re-securitisations held in the trading book (not eligible for correlation trading portfolio) under the Standardised Approach.

163. The MKR SA SEC template presents the own funds requirement only for the specific risk of securitisation positions in accordance with Article 335 of Regulation (EU) No 575/2013 in connection with 337 of that Regulation. Where securitisation positions of the trading book are hedged by credit derivatives, Articles 346 and 347 of Regulation (EU) No 575/2013 apply. There is only one template for all positions of the trading book, irrespective of the approach institutions apply to determine the risk weight for each of the positions in accordance with Part Three, Title II, Chapter 5 of Regulation (EU) No 575/2013. The own funds requirements of the general risk of those positions shall be reported in the MKR SA TDI or the MKR IM template.

164. Positions which receive a risk weight of 1 250 % can alternatively be deducted from CET1 (see Article 244(1), point (b), Article 245(1), point (b), and Article 253 of Regulation (EU) No 575/2013). Where this is the case, those positions have to be reported in row 0460 of CA1.

5.3. C 20.00 - MARKET RISK: STANDARDISED APPROACH FOR SPECIFIC RISK FOR POSITIONS ASSIGNED TO THE CORRELATION TRADING PORTFOLIO (MKR SA CTP)

5.3.1. General Remarks

165. This template requests information on positions of the Correlation Trading Portfolio (CTP) (comprising securitisations, nth-to-default credit derivatives and other CTP positions included in accordance with Article 338(3) of Regulation (EU) No 575/2013) and the corresponding own funds requirements under the Standardised Approach.
166. The MKR SA CTP template presents the own funds requirement only for the specific risk of positions assigned to the CTP in accordance with Article 335 of Regulation (EU) No 575/2013 in conjunction with Article 338, paragraphs 2 and 3 of that Regulation. If CTP-positions of the trading book are hedged by credit derivatives, Articles 346 and 347 of Regulation (EU) No 575/2013 apply. There is only one template for all CTP-positions of the trading book, irrespective of the approach institutions apply to determine the risk weight for each of the positions in accordance with Part Three, Title II, Chapter 5 of Regulation (EU) No 575/2013. The own funds requirements for the general risk of these positions are reported in the MKR SA TDI or the MKR IM template.
167. The template separates securitisation positions, n-th to default credit derivatives and other CTP-positions. Securitisation positions shall always be reported in rows 0030, 0060 or 0090 (depending on the role of the institution in the securitisation). N-th to default credit derivatives shall always be reported in row 0110. The "other CTP-positions" are positions that are neither securitisation positions nor n-th to default credit derivatives (see Article 338(3) of Regulation (EU) No 575/2013), but they are explicitly "linked" to one of those two positions (because of the hedging intent).
168. Positions which receive a risk weight of 1 250 % can alternatively be deducted from CET1 (see Article 244(1), point (b), Article 245(1), point (b) and Article 253 of Regulation (EU) No 575/2013). Where this is the case, those positions have to be reported in row 0460 of CA1.

5.7. C 24.00 - MARKET RISK INTERNAL MODEL (MKR IM)

5.7.1. General Remarks

174. This template provides a breakdown of VaR and stressed VaR (sVaR) figures by the different market risks (debt, equity, FX, commodities) and other information relevant for the calculation of the own funds requirements.

175. Generally, it depends on the structure of the model of the institutions whether the figures for general and specific risk can be determined and reported separately or only as a total. The same holds true for the decomposition of the VaR /Stress-VaR into the risk categories (interest rate risk, equity risk, commodities risk and foreign exchange risk). An institution can refrain from reporting those decompositions if it proves that reporting those figures would be unduly burdensome.

6.2. C 32.02 - PRUDENT VALUATION: CORE APPROACH (PRUVAL 2)

6.2.1. General remarks

178. The purpose of this template is to provide information on the composition of the total AVA to be deducted from own funds under Articles 34 and 105 of Regulation (EU) No 575/2013 alongside relevant information about the accounting valuation of the positions that give rise to the determination of AVAs.

179. This template shall be completed by all institutions that:

(a) are required to use the core approach because they exceed the threshold referred to in Article 4(1) of Delegated Regulation (EU) 2016/101, either on an individual basis or on a consolidated basis as set out in Article 4(3) of that Regulation; or

(b) have chosen to apply the core approach despite not exceeding the threshold.

180. For the purposes of this template, “upside uncertainty” shall mean the following: As determined by Article 8(2) of Delegated Regulation (EU) 2016/101, AVAs are calculated as the difference between the fair value and a prudent valuation that is determined on the basis of a 90 % confidence that institutions can exit the exposure at that point or better within the notional range of plausible values. The upside value or “upside uncertainty” is the opposing point in the distribution of plausible values at which institutions are only 10 % confident that they can exit the position at that point or better. The upside uncertainty shall be calculated and aggregated on the same basis as the total AVA but substituting a 10 % level of certainty for the 90 % used when determining the total AVA.

0230	<p>FUTURE ADMINISTRATION COSTS</p> <p>Adjustment applied in the institution's fair value to reflect administrative costs that are incurred by the portfolio or position but are not reflected in the valuation model or the prices used to calibrate inputs to that model, and thus that can be identified as addressing the same source of valuation uncertainty as the Future administrative costs AVA.</p>
0240	<p>EARLY TERMINATION</p> <p>Adjustments applied in the institution's fair value to reflect contractual or non-contractual early termination expectations that are not reflected in the valuation model and thus can be identified as addressing the same source of valuation uncertainty as the Early termination AVA.</p>
0250	<p>OPERATIONAL RISK</p> <p>Adjustments applied in the institution's fair value to reflect the risk premium that market participants would charge to compensate for operational risks arising from hedging, administration and settlement of contracts in the portfolio, and thus can be identified as addressing the same source of valuation uncertainty as the operational risk AVA.</p>
0260	<p>DAY 1 P&L</p> <p>Adjustments to reflect instances where the valuation model plus all other relevant fair value adjustments applicable to a position or portfolio did not reflect the price paid or received at first day recognition, i.e. the deferral of day one gains and losses (IFRS 9.B5.1.2.A).</p>

6.3. C 32.03 - PRUDENT VALUATION: MODEL RISK AVA (PRUVAL 3)

6.3.1. General remarks

181. This template is to be completed only by institutions that exceed the threshold referred to in Article 4(1) of Delegated Regulation (EU) 2016/101 at their level. Institutions that are part of a group breaching the threshold on a consolidated basis are required to report this template only where they also exceed the threshold at their level.

182. This template shall be used to report details of the top 20 individual model risk AVAs in terms of AVA amount that contribute to the total category level model risk AVA computed in accordance with Article 11 of Delegated Regulation (EU) 2016/101. That information corresponds to the information reported in column 0050 of template C 32.02.

183. The top 20 individual model risk AVAs, and corresponding product information, shall be reported in decreasing order starting from the largest individual model risk AVAs.

184. Products corresponding to those top individual model risk AVAs shall be reported using the product inventory required by Article 19(3), point (a), of Delegated Regulation (EU) 2016/101.

185. Where products are sufficiently homogenous with respect to the valuation model and the model risk AVA, they shall be merged and shown on one line for the purpose of maximising coverage of this template in respect of the total category level Model Risk AVA of the institution.

8. NPE LOSS COVERAGE (NPE LC)

8.1. GENERAL REMARKS

200. The NPE loss coverage templates contain information about non-performing exposures (NPEs) for the purposes of calculating the minimum loss coverage requirement for non-performing exposures as specified in Articles 47a, 47b and 47c of Regulation (EU) No 575/2013.

201. The block of templates consists of a set of three templates:

- a) The calculation of deductions for NPEs (C 35.01): this is an overview template indicating the applicable amount of insufficient coverage, calculated as the difference between the total minimum coverage requirements for NPEs and the total provisions and adjustments or deductions already made. The template covers both the non-performing exposures where forbearance measure has not been granted, and non-performing forborne exposures.
- b) Minimum coverage requirements and exposure values of non-performing exposures, excluding forborne exposures that fall under Article 47c(6) of Regulation (EU) No 575/2013 (C 35.02): the template calculates the total minimum coverage requirements for non-performing exposures that are not non-performing forborne exposures that fall under Article 47c(6) of Regulation (EU) No 575/2013, indicating the factors to be applied on the exposure values for the purposes of this calculation given whether the exposure is secured or unsecured and given the time since the exposure became non-performing.
- c) Minimum coverage requirements and exposure values of non-performing forborne exposures that fall under Article 47c(6) of Regulation (EU) No 575/2013 (C 35.03): the template calculates the total minimum coverage requirements for non-performing forborne exposures that fall under Article 47c(6) of Regulation (EU) No 575/2013, indicating the factors to be applied on the exposure values for the purposes of this calculation given whether the exposure is secured or unsecured and given the time since the exposure became non-performing.

202. The the minimum loss coverage requirement for non-performing exposures applies to (i) exposures, originated on and after 26 April 2019, that become non-performing, and (ii) exposures originated before 26 April 2019 when they are modified after that date in a way that increases their exposure value to the obligor (Article 469a of Regulation (EU) No 575/2013), that become non-performing.

203. Institutions shall calculate the deductions for NPEs in accordance with Article 47c(1), points (a) and (b), of Regulation (EU) No 575/2013,, including the calculation of minimum coverage requirements and total provisions and adjustments or deductions, at individual exposure level (“transaction based”) and not at debtor or portfolio levels.

204. For the purposes of calculating the deductions for NPEs, institutions shall differentiate between the unsecured and secured part of a NPE in accordance with Article 47c(1) of Regulation (EU) No 575/2013. To this end, institutions shall report exposure values and minimum coverage requirements separately for the unsecured part of NPEs and for the secured part of NPEs.
205. For the purposes of mapping of relevant applicable factors and calculating minimum coverage requirements, institutions shall classify the secured part of NPEs depending on the type of credit protection in accordance with Article 47c(3) of Regulation (EU) No 575/2013 as follows: (i) “secured by immovable property or residential loan guaranteed by an eligible protection provider as referred to in Art. 201”, (ii) “secured by other funded or unfunded credit protection” or (iii) “guaranteed or insured by an official export credit agency”.. When a non-performing exposure is secured by more than one type of credit protection, its exposure value shall be allocated according to the quality of the credit protection, starting from the one with the best quality.

GENERAL INSTRUCTIONS

1. STRUCTURE AND CONVENTIONS

1.1. Structure

1. The framework consists of five sets of templates which comprise a total of nine templates according to the following scheme:

- (a) Part A: Encumbrance overview:

- AE-ASS template. Assets of the reporting institution;
- AE-COL template. Collateral received by the reporting institution;
- AE-NPL template. Own covered bonds and securitisations issued and not yet pledged;
- AE-SOU template. Sources of encumbrance;

- (b) Part B: Maturity data:

- AE-MAT template. Maturity data;

- (c) Part C: Contingent encumbrance:

- AE-CONT template. Contingent encumbrance;

- (d) Part D: Covered bonds:

- AE-CB template. Covered bonds issuance;

- (e) Part E: Advanced data:

- AE-ADV-1 template. Advanced template for assets of the reporting institution;
- AE-ADV-2 template. Advanced template for collateral received by the reporting institution.

2. For each template legal references are provided as well as further detailed information regarding more general aspects of the reporting.

1.2. Accounting standard

3. Institutions shall report carrying amounts under the accounting framework they use for the reporting of financial information in accordance with Articles 11 and 12. Institutions that are not required to report financial information shall use their respective accounting framework. In AE-SOU, institutions shall generally report carrying amounts gross of accounting netting, if any, in line with the reporting on a gross basis of encumbrance of assets and collateral.
4. For the purposes of this Annex, “IAS” and “IFRS” refer to the international accounting standards as defined in Article 2 of Regulation (EC) No 1606/2002. For institutions which report under IFRS standards, references have been inserted to the relevant IFRS standards.

1.3. Numbering convention

5. The following general notation is used in these instructions to refer to the columns, rows and cells of a template: {Template; Row; Column}. An asterisk sign is used to indicate that the validation is applied to the whole row or column. For example {AE-ASS; *; 2} refers to the data point of any row for column 2 of the AE-ASS template.
6. In the case of validations within a template the following notation is used to refer to data points from that template: {Row; Column}.

1.4. Sign convention

7. Templates in Annex XVI shall follow the sign convention described in Annex V, Part 1, points 9 and 10.

1.5. Level of application

8. The level of application of the reporting on asset encumbrance follows that of the reporting requirements on own funds under Article 430(1), first subparagraph, point (a), of Regulation (EU) No 575/2013. Consequently, institutions that are not subject to prudential requirements in accordance with Article 7 of that Regulation are not required to report information on asset encumbrance.

1.6. Proportionality

9. For the purposes of Article 19(3), point (c), of this Regulation, the asset encumbrance level shall be calculated as follows:
 - Carrying amount of encumbered assets and collateral = {AE-ASS;0010;0010}– {AE-ASS;0015;0010} + {AE-COL;0130;0010};
 - Total assets and collateral = {AE-ASS;0010;0010} + {AE-ASS;0010;0060}– {AE-ASS;0015;0010} + {AE-COL;0130;0010}+{AE-COL;0130;0040};
 - Asset encumbrance ratio = (Carrying amount of encumbered assets and collateral)/(Total assets and collateral).

10. [Deleted]

1.7. Definition of encumbrance

11. For the purposes of this Annex and Annex XVI, an asset shall be treated as encumbered if it has been pledged or if it is subject to any form of arrangement to secure, collateralise or credit enhance any transaction from which it cannot be freely withdrawn.

It is important to note, that assets pledged that are subject to any restrictions in withdrawal, such as assets that require prior approval before withdrawal or replacement by other assets, shall be considered encumbered. The definition is not based on an explicit legal definition, such as title transfer, but rather on economic principles, as the legal frameworks may differ in this respect across countries. The definition is however closely linked to contractual conditions. The EBA sees the following types of contracts being well covered by the definition (this is a non-exhaustive list):

- secured financing transactions, including repurchase contracts and agreements, securities lending and other forms of secured lending;
- various collateral agreements, for instance collateral placed for the market value of derivatives transactions;
- financial guarantees that are collateralised. If there is no impediment to withdrawal of collateral, such as prior approval, for the unused part of guarantee, then only the used amount shall be allocated (on a pro-rata allocation);
- collateral placed at clearing systems, CCPs and other infrastructure institutions as a condition for access to service. This includes default funds and initial margins;

- central bank facilities. Pre-positioned assets shall not be considered encumbered, unless the central bank does not allow withdrawal of any assets placed without prior approval. As for unused financial guarantees, the unused part, i.e. above the minimum amount required by the central bank, shall be allocated on a pro-rata basis among the assets placed at the central bank;
- underlying assets from securitisation structures, where the financial assets have not been de-recognised from the institution's financial assets. The assets that are underlying retained securities do not count as encumbered, unless those securities are pledged or provided as collateral in any way to secure a transaction;
- assets in cover pools used for covered bond issuance. The assets that are underlying covered bonds count as encumbered, except in certain situations where the institution holds the corresponding covered bonds ("own-issued bonds");
- as a general principle, assets which are being placed at facilities that are not used and can be freely withdrawn shall not be considered encumbered.

TEMPLATE-RELATED INSTRUCTIONS

2. PART A: ENCUMBRANCE OVERVIEW

12. The encumbrance overview templates differentiate assets which are used to support funding or collateral needs at the balance sheet date ("point-in time encumbrance") from those assets which are available for potential funding needs.
13. The overview template shows the amount of encumbered and non-encumbered assets of the reporting institution in a tabular format by products. The same breakdown also applies to collateral received and own debt securities issued other than covered bonds and securitisations.

2.1. Template AE-ASS. Assets of the reporting institution

2.1.1. General remarks

14. This point sets out instructions that apply to the main types of transaction that are relevant when completing the AE templates:

All transactions that increase the level of encumbrance of an institution have two aspects that shall be reported independently throughout the AE templates. Such transactions shall be reported both as a source of encumbrance and as an encumbered asset or collateral.

The following examples describe how to report a type of transaction of this Part but the same rules apply to the other AE templates.

(a) **Collateralised deposit**

A collateralised deposit shall be reported as follows:

- (i) the carrying amount of the deposit is registered as a source of encumbrance in {AE-SOU; r0070; c0010};
- (ii) where the collateral is an asset of the reporting institution: its carrying amount shall be reported in {AE-ASS; *; c0010} and {AE-SOU; r0070; c0030}; its fair value shall be reported in {AE-ASS; *; c0040};
- (iii) where the collateral has been received by the reporting institution, its fair value shall be reported in {AE-COL; *; c0010}, {AE-SOU; r0070; c0030} and {AE-SOU; r0070; c0040}.

(b) **Repo/matching repos**

A repurchase agreement (hereinafter "repo") shall be reported as follows:

- (i) the gross carrying amount of the repo shall be reported as a source of encumbrance in {AE-SOU; r0050; c0010};

(ii) the collateral of the repo shall be reported as follows:

- where the collateral is an asset of the reporting institution: its carrying amount shall be reported in {AE-ASS; *; c0010} and {AE-SOU; r0050; c0030}; its fair value shall be reported in {AE-ASS; *; c0040};
- where the collateral has been received by the reporting institution through a previous reverse repurchase agreement (matching repo), its fair value shall be reported in {AE-COL; *; c0010}, {AE-SOU; r0050; c0030} and in {AE-SOU; r0050; c0040}.

(c) Central bank funding

As collateralised central bank funding is only a specific case of a collateralised deposit or a repo transaction in which the counterparty is a central bank, the rules in this point 14(a) and (b) apply.

For operations where it is not possible to identify the specific collateral to each operation, as collateral is pooled together, the collateral breakdown shall be done on a proportional basis, based on the composition of the pool of collateral.

Assets that have been pre-positioned with central banks are not encumbered assets unless the central bank does not allow withdrawal of any assets placed without prior approval. For unused financial guarantees, the unused part, i.e. the amount above the minimum required by the central bank, is allocated on a pro-rata basis among the assets placed at the central bank.

(d) Securities lending

For securities lending with cash collateral the rules for repos/matching repos apply.

Securities lending without cash collateral shall be reported as follows:

- (i) the fair value of the securities borrowed shall be reported as a source of encumbrance in {AE-SOU; r0150; c0010}. When the lender does not receive any securities in return for the securities lent but receives a fee instead, {AE-SOU; r0150; c0010} shall be reported as zero;
- (ii) where the securities lent as collateral are an asset of the reporting institution: their carrying amount shall be reported in {AE-ASS; *; c0010} and {AE-SOU; r0150; c0030}; their fair value shall be reported in {AE-ASS; *; c0040};
- (iii) where the securities lent as collateral are received by the reporting institution, their fair value shall be reported in {AE-COL; *; c0010}, {AE-SOU; r0150; c0030} and {AE-SOU; r0150; c0040}.

(e) Derivatives (liabilities)

Collateralised derivatives with a negative fair value shall be reported as follows:

- (i) the carrying amount of the derivative shall be reported as a source of encumbrance in {AE-SOU; r0020; c0010};
- (ii) the collateral (initial margins required to open the position and any collateral placed for the market value of derivatives transactions) shall be reported as follows:
 - where it is an asset of the reporting institution: its carrying amount shall be reported in {AE-ASS; *; c0010} and {AE-SOU; r0020; c0030}; its fair value shall be reported in {AE-ASS; *; c0040};
 - where it is collateral received by the reporting institution, its fair value shall be reported in {AE-COL; *; c0010}, {AE-SOU; r0020; c0030} and {AE-SOU; r0020; c0040}.

(f) Covered bonds

Covered bonds for the entire asset encumbrance reporting are instruments referred to in Article 52(4), first subparagraph, of Directive 2009/65/EU, irrespective of whether those instruments take the legal form of a security or not.

No specific rules apply to covered bonds where there is no retention of part of the securities issued by the reporting institution.

In case of retention of part of the issuance and in order to avoid double counting, the following treatment shall apply:

- (i) where the own covered bonds are not pledged, the amount of the cover pool that is backing those securities retained and not yet pledged shall be reported in the AE-ASS templates as non-encumbered assets. Additional information about the retained covered bonds not yet pledged (underlying assets, fair value and eligibility of those available for encumbrance and nominal of those non-available for encumbrance) shall be reported in the AE-NPL template;
- (ii) where the own covered bonds are pledged, then the amount of the cover pool that is backing those securities retained and pledged shall be included in the AE-ASS template as encumbered assets.

The following table sets out how to report covered bond issuance of EUR 100 of which 15 % is retained and not pledged and 10 % is retained and pledged as collateral in a EUR 11 repo transaction with a central bank, where the cover pool comprises unsecured loans and the carrying amount of the loans is EUR 150.

SOURCES OF ENCUMBRANCE				
Type	Amount	Cells	Loans encumbered	Cells
Covered bonds	75 % (100) = 75	{AE-Sources, r110, c010}	75 % (150) = 112.5	{AE-Assets, r100, c010} {AE-Sources, r110, c030}
Central bank funding	11	{AE-Sources, r060, c010}	10 % (150) = 15	{AE-Assets, r100, c010} {AE-Sources, r060, c030}
NON ENCUMBRANCE				
Type	Amount	Cells	Non-encumbered loans	Cells
Own covered bonds retained	15 % (100) = 15	{AE-Not pledged, r010, c040}	15 % (150) = 22.5	{AE-Assets, r100, c060} {AE-Not pledged, r020, c010}

(g) Securitisations

Securitisations mean debt securities held by the reporting institution originated in a securitisation transaction as defined in Article 4(1), point (61), of Regulation (EU) No 575/2013.

For securitisations that remain in the balance sheet (non-derecognised), the rules for covered bonds apply.

For derecognised securitisations, there is no encumbrance where the institution holds some securities. Those securities will appear in the trading book or in the banking book of the reporting institutions as any other security issued by a third party.

2.2. Template: AE-COL. Collateral received by the reporting institution

2.2.1. General remarks

15. For the collateral received by the reporting institution and the own debt securities issued other than own covered bonds or securitisations, the category of “non-encumbered” assets is split between those “available for encumbrance” or potentially eligible to be encumbered and those “non-available for encumbrance”.
16. Assets are “non-available for encumbrance” when they have been received as collateral and the reporting institution is not permitted to sell or re-pledge the collateral, except in the case of a default by the owner of the collateral. Own debt securities issued other than own covered bonds or securitisations are non-available for encumbrance when there is any restriction in the terms of the issuance to sell or re-pledge the securities held.
17. For the purposes of the asset encumbrance reporting, securities borrowed in exchange for a fee without providing cash-collateral or non-cash collateral shall be reported as collateral received.

2.3.1. General remarks

- (a) where those securities are pledged, the amount of the cover pool/underlying assets that are backing them shall be reported in the AE-ASS template as encumbered assets. The source of funding in the event of pledging own covered bonds and securitisations is the new transaction in which the securities are being pledged (central bank funding or other type of secured funding) and not the original issuance of covered bonds or securitisations;
- (b) where those securities are not yet pledged, the amount of the cover pool/underlying assets that are backing those securities shall be reported in the AE-ASS template as non-encumbered assets.

4. PART C: CONTINGENT ENCUMBRANCE

4.1. General remarks

22. Institutions shall present in this template the level of asset encumbrance that results in a number of stressed scenarios.
23. Contingent encumbrance refers to the additional assets which may need to be encumbered when the reporting institutions faces adverse developments triggered by an external event over which the reporting institution has no control (including a downgrade, decrease of the fair value of the encumbered assets or a general loss of confidence). In those cases, the reporting institution will need to encumber additional assets as a consequence of already existing transactions. The additional amount of encumbered assets shall be net of the impact of the institution's hedge transactions against the events described under the aforementioned stressed scenarios.
24. This template includes the following two scenarios for reporting contingent encumbrance which are set out in more detail in sections 4.1.1. and 4.1.2. The information reported shall be the institution's reasonable estimate based on the best available information.
- (a) Decrease of the fair value of the encumbered assets by 30 %. This scenario only covers a change in the underlying fair value of the assets, and not any other change which may affect its carrying amount such as foreign exchange gains or losses or potential impairment. The reporting institution may then be forced to post more collateral in order to keep the value of the collateral constant.
- (b) A 10 % depreciation in each currency in which the institution has aggregate liabilities amounting to or exceeding 5 % of the institution's total liabilities.
25. The scenarios shall be reported independently of each other, and significant currency depreciations shall also be reported independently of depreciations of other significant currencies. Consequently, institutions shall not take correlations between the scenarios into account.

4.1.1. Scenario A: Decrease of 30 % of encumbered assets

26. It shall be assumed that all encumbered assets decrease 30 % in value. The need of additional collateral arising from such a decrease shall take into account existing levels of over-collateralisation, such that only the minimum collateralisation level is maintained. The need of additional collateral shall also take into account the contractual requirements of the contracts and agreements impacted, including threshold triggers.
27. Only contracts and agreements, where there is a legal obligation to supply additional collateral shall be included. This shall include covered bond issues where there is a legal requirement to uphold minimum levels of over collateralisation but no requirement to maintain existing rating levels on the covered bond.

4.1.2. Scenario B: Depreciation of 10 % in significant currencies

28. A currency shall be a significant currency if the reporting institution has aggregate liabilities in that currency amounting to or exceeding 5 % of the institution's total liabilities.
29. The calculation of a 10 % depreciation shall take into account both changes on the asset and liability side, i.e. focus the asset-liability mismatches. For instance a repo transactions in USD based on USD assets does not cause additional encumbrance, whereas a repo transaction in USD based on a EUR asset causes additional encumbrance.
30. All transactions which have a cross-currency element shall be covered by this calculation.

4.2. Template: AE-CONT. Contingent encumbrance

5. PART D: COVERED BONDS

5.1. General remarks

32. The information in this template shall be reported for all UCITS-compliant covered bonds issued by the reporting institution. UCITS-compliant covered bonds are the bonds referred to in Article 52(4), first subparagraph, of Directive 2009/65/EC. Those are covered bonds issued by the reporting institution if the reporting institution is in relation to the covered bond subject by the applicable law to special public supervision designed to protect bond-holders and if for such covered bond it is required that sums deriving from the issue of those bonds shall be invested in accordance with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in the event of failure of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.

33. Covered bonds issued by or on behalf of the reporting institution that are not UCITS-compliant covered bonds shall not be reported within the AE-CB templates.

34. The reporting shall be based on the statutory covered bond regime, i.e. the legal framework which applies to the covered bond programme.

6. PART E: ADVANCED DATA

6.1. General remarks

35. Part E follows the same structure as in the encumbrance overview templates in Part A with different templates for the encumbrance of the assets of the reporting institution and for the collateral received: AE-ADV1 and AE-ADV2 respectively. Consequently, matching liabilities correspond to the liabilities that are secured by the encumbered assets and no one-to-one relation has to exist.

ANNEX XIX

INSTRUCTIONS FOR COMPLETING THE ADDITIONAL MONITORING TOOLS TEMPLATE OF ANNEX XVIII

1. Additional Monitoring Tools

1.1. General

1. [empty]
2. Total funding shall be all financial liabilities other than derivatives and short positions;
3. Funding of any type with open maturity including on sight deposits shall be considered as maturing overnight.
4. Original maturity shall represent the time between the date of origination and the date of maturity of funding. The date of the maturity of the funding shall be determined in accordance with point 12 of Annex XXIII. This means that in case of optionality such as in the case of point 12 of Annex XXIII, the original maturity of a funding item can be shorter than the time elapsed since its origination.
5. Residual maturity shall represent the time between the end of the reporting period and the date of maturity of funding. The date of the maturity of the funding shall be determined in accordance with point 12 of Annex XXIII.
6. For the purposes of calculating the original or residual weighted average maturity, deposits maturing overnight or funding of any type with open maturity shall be considered to have a one day maturity.
7. For the purposes of calculating the original and residual maturity, where there is funding with a notice period or a cancellation or early withdrawal clause for the institution's counterparty, a withdrawal at the first possible date shall be assumed.
8. For perpetual liabilities, except where subject to optionality as referred to in point 12 of Annex XXIII, a fixed 20 years original and residual maturity shall be assumed.
9. For calculating the percentage threshold referred to in templates C 67.00 by significant currency, institutions shall use a threshold of 1 % of total liabilities in all currencies.

1.2. Concentration of funding by counterparty (C 67.00)

1. In order to collect information about the reporting institutions' concentration of funding by counterparty in template C 67.00, institutions shall apply the instructions contained in this Section.
2. Institutions shall report the top ten largest counterparties or a group of connected clients as defined in Article 4(1), point (39), of Regulation (EU) No 575/2013, where the funding obtained from each counterparty or group of connected clients exceeds a threshold of 1 % of total liabilities in rows 020 to 110 of Section 1 of the template. The counterparty reported in item 1.01 shall be the largest amount of funding received from one counterparty or group of connected clients, which is above the 1 % threshold as at the reporting date. Item 1.02 shall be the second largest above the 1 % threshold, and similarly with the remaining items.
3. Where a counterparty belongs to several groups of connected clients, it shall be reported only once in the group with the highest amount of funding.
4. Institutions shall report the total of all other remaining funding in Section 2

5. The sum of Section 1 (Top ten Counterparties) and Section 2 (All other funding) shall equal an institution's total funding as per its balance sheet reported under the financial reporting framework (FINREP - representing financial liabilities adjusted for the exclusion of derivatives and short positions, in line with point 2 from Section 1.1) for those reporting periods in which both reports are available (e.g. Finrep Q1 and C 67.00 March/Q1).
6. For each counterparty, institutions shall report all of the columns 0010 to 0080.
7. Where funding is obtained in more than one product type, the type reported shall be the product in which the largest proportion of funding was obtained. Identification of the underlying holder of securities may be undertaken on a best efforts basis. Where an institution has information concerning the holder of securities by virtue of its role as the custodian bank, it shall consider that amount for reporting the concentration of counterparties. Where there is no information available on the holder of the securities, the corresponding amount does not have to be reported.
8. Instructions concerning specific columns:

1.4. Prices for Various Lengths of Funding (C 69.00)

1. Institutions shall report the information about the transaction volume and prices paid by institutions for funding obtained during the reporting period and still present at the end of the reporting period in template C 69.00 in accordance with the following original maturities:
 - (a) overnight in columns 0010 and 0020;
 - (b) greater than overnight and less than or equal to 1 week in columns 0030 and 0040;
 - (c) greater than 1 week and less than or equal to 1 month in columns 0050 and 0060;
 - (d) greater than 1 month and less than or equal to 3 months in columns 0070 and 0080;
 - (e) greater than 3 months and less than or equal to 6 months in columns 0090 and 0100;
 - (f) greater than 6 months and less than or equal to 1 year in columns 0110 and 0120;
 - (g) greater than 1 year and less than or equal to 2 years in columns 0130 and 0140;
 - (h) greater than 2 years and less than or equal to 5 years in columns 0150 and 0160;
 - (i) greater than 5 years and less than or equal to 10 years in columns 0170 and 0180.

In case of currency revaluations, no new funding is obtained in the original currency and the reporting institution has not paid anything beyond the original price at the initial deposit of the funds. Thus, a positive increment caused by the currency revaluation is not reported in this template.

Funding sources with original maturity above 10 years shall not be reported.

2. For the purposes of determining the maturity of the funding obtained, institutions shall ignore the period between trade date and settlement date, e.g. a three-month liability settling in two weeks' time shall be reported in the 3 months maturity (columns 0070 and 0080).
3. The spread reported in the left hand column of each time bucket shall be one of the following:
 4. the spread payable by the institution for liabilities less than or equal to one year, if they were to have been swapped to the benchmark overnight index for the appropriate currency no later than close of business on the day of the transaction;
 5. the spread payable by the firm at issuance for liabilities with an original maturity greater than one year, were they to be swapped to the relevant three month benchmark index for the appropriate currency (e.g. such as 3M euribor for EUR), no later than close of business on the day of the transaction.
6. Solely for the purposes of spread calculation under points a) and b) above, on the basis of historical experience, the institution may determine the original maturity with or without taking into account optionality, as appropriate.
7. Spreads shall be reported in basis points with a negative sign in case the new funding is cheaper than under the relevant benchmark rate. They shall be calculated on a weighted average basis.
8. For the purposes of calculating the average spread payable across multiple issuances/deposits/loans, institutions shall calculate the total cost in the currency of issue ignoring any FX swap, but they shall include any premium or discount and fees payable or receivable, taking as a basis the term of any theoretical or actual interest rate swap matching the term of the liability. The spread shall be the liability rate minus the swap rate.
9. The amount of funding obtained for the funding categories listed in the "Item" column shall be reported in the "volume" column of the applicable time bucket.
10. In the column "volume", institutions shall provide the amounts representing the carrying amount of the new funding obtained in the applicable time bucket in accordance with original maturity.

11. As for all items, also for off-balance sheet commitments, institutions shall only report the related amounts reflected in the balance sheet. An off-balance sheet commitment provided to the institution shall only be reported in C 69.00 after a drawdown. In the case of a drawdown, the volume and spread to be reported shall be the amount drawn and applicable spread at the end of the reporting period. Where the drawdown cannot be rolled-over at the discretion of the institution, the actual maturity of the drawdown shall be reported. Where the institution has already drawn on the facility at the end of the previous reporting period, and where the institution subsequently increases the usage of the facility, only the additional amount drawn shall be reported.
12. Deposits placed by retail customers shall consist of deposits as defined in Article 411, point (2), of Regulation (EU) No 575/2013.
13. For funding that has rolled over during the reporting period that is still outstanding at the end of the reporting period the average of spreads applying at that time (i.e. end of reporting period) shall be reported. For the purposes of C 69.00, funding that rolled over and is still there at the end of the reporting period shall be considered to represent new funding.
14. By way of deviation from the rest of Section 1.4, the volume and spread of sight deposits shall only be reported where the depositor did not have a sight deposit in the preceding reporting period or where there is an increase in the deposit amount compared to the previous reference date, in which case the increment shall be treated as new funding. The spread shall be that of the end of the period.
15. Where there is nothing to report, cells relating to spreads shall be left empty.
16. Equity shall not be reported in this template.

1. This template collects information about the volume of funds maturing and new funding obtained i.e. “roll-over of funding” on a daily basis over the month preceding the reporting date.
2. Institutions shall report, in calendar days, the funding they have maturing in accordance with the following time buckets in accordance with the original maturity:
 - (a) overnight in columns 0010 to 0040;
 - (b) between 1 and 7 days in columns 0050 to 0080;

3. For each time bucket described in point2, the amount maturing shall be reported in the left-hand column, the amount funds rolled over shall be reported in the “Roll over” column, new funds obtained shall be reported in the “New Funds” column and the net difference between new funds on the one hand and roll-over minus maturing funds on the other shall be reported in the right-hand column.
4. Total net cash flows shall be reported in column 290 and shall equal the sum of all “Net” columns numbered 0040, 0080, 0120, 0160, 0200, 0240 and 0280.
5. The average term of funding, in days, for maturing term funds shall be reported in column 0300.

7. The average term of funding, in days, for new term funds shall be reported in column 0320.
8. The “Maturing” amount shall comprise all liabilities that were contractually withdrawable by the provider of the funding or due on the relevant day in the reporting period. It shall always be reported with a positive sign.
9. The “Roll-over” amount shall comprise the maturing amount as defined in points 2 and 3 that remains with the institution on the relevant day of the reporting period. It shall always be reported with a positive sign. Where the maturity of the funding has changed due to the roll-over event, the “roll-over” amount shall be reported in a time bucket in accordance with the new maturity.

10. The “New funds” amount shall comprise actual inflows of funding on the relevant day in the reporting period. It shall always be reported with a positive sign.
11. The “Net” amount shall be considered as a change of funding within a particular original maturity time band on the relevant day of the reporting period, and shall be calculated by adding in the “net” column the new funds plus the roll over funds minus the maturing funds.

**INSTRUCTIONS FOR COMPLETING THE CONCENTRATION OF COUNTERBALANCING CAPACITY
TEMPLATE (C 71.00) OF ANNEX XX**

Concentration of Counterbalancing Capacity by issuer/counterparty (CCC) (C 71.00)

1. In order to collect information about the reporting institutions' concentration of counterbalancing capacity by the ten largest holdings of assets or liquidity lines granted to the institution for this purpose under template C 71.00, institutions shall apply the instructions contained in this Annex.
2. Where an issuer or counterparty is assigned to more than one product type, currency or credit quality step, the total amount shall be reported. The product type, currency or credit quality step to be reported shall be the ones that are relevant to the largest proportion of the counterbalancing capacity concentration.
3. The counterbalancing capacity in C 71.00 shall be the same as that in C 66.01 with the qualification that the assets reported as counterbalancing capacity for the purposes of C 71.00 shall be unencumbered to be available for the institution to convert into cash on the reporting reference date.
4. For calculating the concentrations for the purpose of reporting template C 71.00 by significant currency, institutions shall use the concentrations in all currencies.
5. When an issuer or counterparty belongs to several groups of connected clients, it shall be reported only once in the group with the higher counterbalancing capacity concentration.
6. Except for row 0120, concentrations of counterbalancing capacity with a central bank as issuer or counterparty shall not be reported in this template. In the event that an institution has pre-positioned assets at a central bank for standard liquidity operations and to the extent that these assets fall under the top ten issuers or counterparties of unencumbered counterbalancing capacity, the institution shall report the original issuer and the original product type.

0010	<p>Issuer Name</p> <p>The name of the top ten issuers of unencumbered assets or counterparties of undrawn committed liquidity lines granted to the institution shall be recorded in column 0010 in a descending fashion. The largest item will be recorded in 1.01, the second in line item 1.02, and so on. Issuers and counterparties forming a group of connected clients shall be reported as one single concentration.</p> <p>The issuer or counterparty name recorded shall be the full name of the legal entity which issued the assets or granted the liquidity lines, including any references to the company type in accordance with the national company law.</p>

With regard to the separate reporting in significant currencies as specified under Article 415(2) of Regulation (EU) No 575/2013, institutions shall make an assessment of the currency in which the flow is likely to occur and shall report the item only in that significant currency, in line with the instructions for the separate reporting of significant currencies in the liquidity coverage requirements (LCR), in accordance with Regulation (EU) 2021/451.</p>

INSTRUCTIONS FOR COMPLETING THE MATURITY LADDER TEMPLATE OF ANNEX XXII

PART I: GENERAL INSTRUCTIONS 668

PART II: INSTRUCTIONS CONCERNING SPECIFIC ROWS 670

PART I: GENERAL INSTRUCTIONS

1. In order to capture the maturity mismatch of an institution’s activities (“maturity ladder”) in the template of Annex XXII, institutions shall apply the instructions contained in this Annex.
2. The maturity ladder monitoring tool shall cover contractual flows and contingent outflows. The contractual flows resulting from legally binding agreements and the residual maturity from the reporting date shall be reported in accordance with the provisions of those legal agreements.
3. Institutions shall not double count inflows.
4. In the column “initial stock”, the stock of items at the reporting date shall be reported.
5. Only the blank white cells of the template in Annex XXII shall be completed.
6. The section of the maturity ladder template entitled “Outflows and inflows” shall cover future contractual cash flows from all on- and off- balance sheet items. Only outflows and inflows pursuant to contracts valid at the reporting date shall be reported. Interest **outflows and inflows** from all on and off balance sheet instruments other than guarantees shall be included in all relevant items of the “outflows” and “inflows” sections, in the corresponding time bucket where they fall due. Payments and receipts of interest that fall due after 5 years from the reporting reference date shall be excluded from the maturity ladder.
7. The section of the maturity ladder template entitled “Counterbalancing capacity” shall represent the stock of unencumbered assets or other funding sources which are legally and practically available to the institution at the reporting date to cover potential contractual gaps. Only outflows and inflows pursuant to contracts existing at the reporting date shall be reported.
8. Cash outflows and inflows in the respective sections “outflows” and “inflows” shall be reported on a gross basis with a positive sign. Amounts due to be paid and received shall be reported respectively in the outflow and inflow sections.
9. For the section of the maturity ladder template entitled “counterbalancing capacity” outflows and inflows shall be reported on a net basis with a positive sign if they represent inflows and with a negative sign if they represent outflows. For cash flows, amounts due shall be reported. Securities flows shall be reported at current market value. Flows arising on credit and liquidity lines shall be reported at the contractual available amounts.
10. Contractual flows shall be allocated across the twenty-two time buckets in accordance with their residual maturity, with days referring to calendar days.
11. All contractual flows shall be reported, including all cash-flows from non-financial activities such as taxes, bonuses, dividends and rents. Cash-flows from non-financial activities shall be reported in the corresponding time bucket where they fall due. These cash flows shall be excluded from the maturity ladder where they fall due after 5 years from the reporting reference date.
12. In order for institutions to apply a conservative approach in determining contractual maturities of flows, they shall ensure all of the following:
 - (a) where an option to defer payment or receive an advance payment exists, the option shall be presumed to be exercised where it would advance outflows from the institution or defer inflows to the institution;

- (b) where the option to advance outflows from the institution is solely at the discretion of the institution, the option shall be presumed to be exercised only where there is a market expectation that the institution will do so. The option shall be presumed not to be exercised where it would advance inflows to the institution or defer outflows from the institution. Any cash outflow that would be contractually triggered by this inflow – as in pass-through financing – shall be reported at the same date as this inflow;
 - (c) deposits maturing overnight, including sight deposits and non-maturing deposits, shall be reported as overnight in column 0020. In addition, those transactions with no contractually specified maturity shall be reported in column 0025;
 - (d) open repos or reverse repos and similar transactions which can be terminated by either party on any day shall be considered to mature overnight unless the notice period is longer than one day in which case they shall be reported in the relevant time bucket in accordance with the notice period;
 - (e) retail term deposits with an early withdrawal option shall be considered to mature in the time period during which the early withdrawal of the deposit would not incur a penalty in accordance with point (b) of Article 25(4) of Delegated Regulation (EU) 2015/61.
 - (f) where the institution is not able to establish a minimum contractual payment schedule for a particular item or part thereof following the rules set out in this paragraph, it shall report the item or part thereof as greater than 5 years in column 0220.
13. [empty]
14. Foreign Exchange (“FX”) swaps maturing shall reflect the maturing notional value of cross-currency swaps, FX forward transactions and unsettled FX spot agreements in the applicable time buckets of the template.
15. Cash flows from unsettled transactions shall be reported, in the short period before settlement, in the appropriate rows and buckets.
16. Items where the institution has no underlying business, such as where it has no deposits of a certain category, shall be left blank.
17. Past due items and items for which the institution has a reason to expect non- performance shall not be reported.
18. Where the collateral received is re-hypothecated in a transaction that matures beyond the transaction in which the institution received the collateral, a securities outflow in the amount of the fair value of the collateral received shall be reported in the counterbalancing capacity section in the relevant bucket in accordance with the maturity of the transaction that generated the reception of the collateral.
19. Where according to Article 16 of the Delegated Regulation (EU) 2015/61 the sight deposits that the reporting credit institution maintains with the central institution are treated as liquid assets, the sight deposits should be treated as a contractual interbank inflow in the maturity ladder.
20. Intragroup items shall not affect the reporting on a consolidated basis.
21. The non-withdrawable part of the central bank reserves shall not be reported anywhere in the template.

If the physically settled asset will qualify as CBC in section 3, this flow shall be included in the appropriate time bucket and appropriate row in this section. It shall be a negative amount in case of an outflow and positive in case of an inflow;</p> <p>2. for cash and securities inflows and outflows related to derivatives for which there is no collateral agreement in place or where only partial collateralisation is required, a distinction shall be made between contracts that involve optionality and other contracts:</p> <p>(a) flows related to option-like derivatives shall be included only if they are in the money. These flows shall be proxied by applying both of the following:</p> <p>(i) including the current market value or net present value of the contract as inflow in line 2.4 of the maturity ladder “derivatives cash-inflows” at the latest exercise date of the option where the bank has the right to exercise the option;</p> <p>(ii) including the current market value or net present value of the contract as outflow in line 1.5 of the maturity ladder “derivatives cash-outflows” at the earliest exercise date of the option where the bank’s counterparty has the right to exercise the option;</p> <p>(b) flows related to other contracts than those referred to in point (a) shall be included by projecting the gross contractual flows of cash in the respective time buckets in lines 1.5 “derivatives cash- outflows” and 2.4 “derivatives cash-inflows” and the contractual flows of securities in the counterbalancing capacity of the maturity ladder, using the current market-implied forward rates applicable on the reporting date where the amounts are not yet fixed.</p> <p>In accordance with the above:</p> <p>Regarding derivatives under point 1, the return of collateral that was already received or paid shall not be reported in the maturity ladder.</p> <p>Regarding derivatives under point 2, the return of collateral that was already received or paid shall be reported in section 3 of the maturity ladder. A positive mutation shall only be recognised if it would qualify as counterbalancing capacity on return. If the return of collateral already received (paid) represents cash collateral the return of collateral shall be reported in row 1.6 other outflows (row 2.6 other inflows) in the appropriate time bucket</p> <p>For the purposes of this row, a situation in which collateral exchanged with a counterparty does not fully equal the value changes in the derivative, shall still be treated as adequately collateralised if the discrepancy does not exceed the minimum transfer amount.</p>

The return of collateral already received (paid) shall be reflected as a negative (positive) mutation in the time bucket corresponding to the maturity of the derivative. A positive mutation shall only be recognised if it would qualify as counterbalancing capacity on return.</p> <p>A change to the contractually available amount of credit and liquidity lines reported in item 3.8 shall be reported as a flow in the relevant time bucket. REPORTING INSTRUCTIONS FOR THE PURPOSE OF IDENTIFYING G-SIIs AND ASSIGNING G-SII BUFFER RATES**Table of Contents**

PART I: GENERAL INSTRUCTIONS	691
1. STRUCTURE AND CONVENTIONS	691
1.1. STRUCTURE	691
1.2. NUMBERING CONVENTION	691
1.3. SIGN CONVENTION	691
PART II: TEMPLATE RELATED INSTRUCTIONS	692
1. GENERAL REMARKS	692
2. INSTRUCTIONS CONCERNING SPECIFIC POSITIONS	692

PART I: GENERAL INSTRUCTIONS

1. Structure and conventions

1.1. Structure

1. This reporting requirements aiming to support the identification of globally systemically important institutions (G-SIIs) and assigning corresponding G-SII buffer rates consist of one template capturing information on indicators of global systemic importance and particular items needed for the application of the Union’s methodology for identifying G-SIIs and assigning corresponding G-SII buffer rates.

1.2. Numbering convention

2. The document follows the labelling convention set in points 3 to 5, when referring to the columns, rows and cells of the templates. Those numerical codes are extensively used in the validation rules.
3. The following general notation is followed in the instructions: {Template; Row; Column}.
4. Where references are made inside a template, and therefore only data points of that template are used, the notation does not include a template: {Row; Column}. Where templates have only one column, only rows are referred to {Template; Row}.
5. An asterisk sign is used to express that the reference captures the rows or columns specified before.

1.3. Sign convention

6. Any amount that increases the value of the indicator, the assets, liabilities or exposures shall be reported as a positive figure. Any amount that reduces the the value of the indicator, the assets, liabilities or exposures shall be reported as a negative figure. Where there is a negative sign (-) preceding the label of an item, no positive figure is expected to be reported for that item.

PART II: TEMPLATE RELATED INSTRUCTIONS

1. General remarks

8. The template is divided into two sections. The upper section on G-SII indicators includes the indicators for identifying globally systemically important institutions as defined in the methodology developed by the Basel Committee on Banking Supervision. The lower section contains a number of items needed to calculate the relevant indicators in accordance with the methodology defined on the basis of Article 131(18) of Directive 2013/36/EU ⁽¹⁾.
9.
