COUNCIL DECISION

of 19 December 2006

amending Decision 90/424/EEC on expenditure in the veterinary field

(2006/965/EC)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 37 thereof,

Having regard to the proposal from the Commission,

Having regard to the Opinion of the European Parliament (1),

Having regard to the Opinion of the European Economic and Social Committee (2),

Whereas:

(1) The Community co-finances activities of the Member States on animal disease and zoonoses eradication, control and monitoring on the basis of annual programmes approved in accordance with the requirements and procedure laid down in Article 24 of Council Decision 90/424/EEC of 26 June 1990 on expenditure in the veterinary field (3).

(2) A review of the procedures for Community co-financing of animal disease and zoonoses eradication, control and monitoring programmes, taking into account in particular the experience gained from the work carried out by the Task Force for monitoring disease eradication in the Member States established in accordance with action 29 of the White Paper on Food Safety, has shown that a multi-annual approach for these programmes and a new list of diseases and zoonoses would lead to better results.

(3) That review also showed that a list with a limited number of animal diseases and zoonoses eligible for co-financing would increase the efficiency and effectiveness of the eradication, control and monitoring programmes. The list of diseases and zoonoses which reflects Community priorities and whose eradication benefits from the Community financial contribution should be established taking into account the potential impact of such diseases and zoonoses on public health and on international and intra-Community trade of animals or product from animal origin. The specific provisions for the control of zoonoses should therefore be deleted. There should be a possibility to amend the list by comitology procedure to take into account emerging animal diseases or new epidemiological and scientific evidence.

(4) In order to simplify the procedure for the approval of the eradication, control and monitoring programmes submitted by the Member States to the Commission, provision should be made for a single decision approving the programmes qualifying for a Community financial contribution to replace the two decisions currently required, one listing the programmes qualifying for financial contribution and the second on the approval of the programmes.

(5) In order to allow the Commission to monitor the implementation of the programmes, Member States should report regularly to the Commission on the activities carried out, on the results achieved and the expenditure incurred.

(6) Council Decision 90/638/EEC of 27 November 1990 laying down Community criteria for the eradication and monitoring of certain animal diseases (4) lays down the technical and information requirements for the eradication, control and monitoring programmes for which Community financing is sought. Those technical requirements and information should be updated and adjusted in a regular and timely fashion in order to match technical and scientific progress and feedback from experience in the implementation of the programmes. It is therefore appropriate to enable the Commission to adopt, and update as necessary, those technical criteria. Council Decision 90/638/EEC should be repealed accordingly.

(2) Opinion delivered on 26 October 2006 (not yet published in the Official Journal).

Commission Decision 2004/292/EC of 30 March 2004 on the introduction of the Traces system (1) establishes the integration of the pre-existing computerised systems (Animo and Shift) into the new system. It is therefore appropriate to take into account the technical developments achieved in the computerisation of the veterinary procedures and to provide for the resources needed for the hosting, management and the maintenance of the integrated computerised veterinary systems taking into account the existence of national databases, where appropriate.

Information gathering activities are necessary to allow better development and implementation of legislation in the fields of animal health and food safety. Moreover, there is a pressing need to disseminate as widely as possible information regarding animal health and food safety legislation throughout the Community. It is therefore desirable to extend the scope of Decision 90/424/EEC so as to include the financing of information policy in the field of animal protection to animal health and food safety in products of animal origin.

Council Decision 2006/53/EC amending Decision 90/424/EEC established that Community financial contribution shall be granted for eradication measures carried out by the Member States to combat avian influenza. It is desirable that this contribution covers also the costs incurred by the Member States for compensation to owners for their losses due to the destruction of eggs.

Furthermore, Decision 90/424/EEC provides that technical and scientific assistance shall be granted to Member States for the development of Community veterinary legislation and training. Having regard to the past experience, it is desirable to extend the possibility for this assistance to international organisations such as the World Organisation for Animal Health (OIE) and the Food and Agriculture Organisation (FAO).

For the sake of clarity, it is also appropriate to modify Decision 90/424/EEC in order to enable a Member State to inform the Commission of being directly threatened by the occurrence of the animal diseases in a third country or another Member State and to extend the animal diseases referred to in Article 6 of that Decision to those provided for in the Annex.

Decision 90/424/EEC should therefore be amended accordingly,

HAS ADOPTED THIS DECISION:

COMMISSION DECISION
of 18 December 2006
(notified under document number C(2006) 6567)

(2006/966/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 91/414/EEC of 15 July 1991 concerning the placing of plant protection products on the market (1), and in particular the fourth subparagraph of Article 8(2) thereof,

Whereas:

(1) Article 8(2) of Directive 91/414/EEC provided for the Commission to carry out a programme of work for the examination of the active substances used in plant protection products which were already on the market on 25 July 1993. Detailed rules for the carrying out of this programme were established in Regulation (EEC) No 3600/92 of 11 December 1992 laying down the detailed rules for the implementation of the first stage of the programme of work referred to in Article 8(2) of Council Directive 91/414/EEC concerning the placing of plant protection products on the market (2).

(2) Commission Regulation (EC) No 933/94 of 27 April 1994 laying down the active substances of plant protection products and designating the rapporteur Member States for the implementation of Regulation (EEC) No 3600/92 (3), designated the active substances which should be assessed in the framework of Regulation (EEC) No 3600/92, designated a Member State to act as rapporteur in respect of the assessment of each substance and identified the producers of each active substance who submitted a notification in due time.

(3) Alachlor is one of the 89 active substances designated in Regulation (EC) No 933/94.

(4) In accordance with Article 7(1)(c) of Regulation (EEC) No 3600/92, Spain, being the designated rapporteur Member State, submitted on 20 July 1999 to the Commission the report of its assessment of the information submitted by the notifiers in accordance with Article 6(1) of that Regulation.

(5) On receipt of the report of the rapporteur Member State, the Commission undertook consultations with experts of the Member States as well as with the main notifiers as provided for in Article 7(3) of Regulation (EEC) No 3600/92. It appeared that further data were required. Commission Decision 2001/810/EC (4) laid down a deadline for data submission by the notifier, which expired 25 May 2002. The same decision set a further deadline of 31 December 2002 for specified long term studies.

(6) The Commission organised a tripartite meeting with the main data submitters and the rapporteur Member State for this active substance on 19 December 2003.

(7) The assessment report prepared by Spain has been reviewed by the Member States and the Commission within the Standing Committee on the Food Chain and Animal Health. This review was finalised on 4 April 2006 in the format of the Commission review report for alachlor.

The review of alachlor revealed a number of open questions which were addressed by the Scientific Panel on Plant health, Plant protection products and their Residues. The Scientific Panel was asked to comment on two questions. The first question was whether the occurrence of nasal turbinate tumours observed in the rat carcinogenicity study was relevant to humans and, if so, whether a genotoxic mechanism is involved. The second question was whether the information presented for the metabolites 65, 85, 54, 25, 76 and 51, which exceed the level of 0.1 µg/l, was sufficient to demonstrate that they are not relevant. In its opinion (1) on the first question, the Scientific Panel concluded that the strength of the evidence suggests that a mode of action other than genotoxicity is involved in the occurrence of nasal turbinate tumours observed in the rat carcinogenicity studies. While the mode of action could be relevant to humans, it is extremely unlikely that concentrations of the active metabolite would be achieved to initiate the chain of events terminating in cancer. On the second question, the Scientific Panel concluded that metabolites 65, 54 and 25 have been adequately tested for toxicity, but the toxicity database is inadequate in the case of the soil metabolites 85, 76 and 51. The genotoxicity database is also inadequate for soil metabolites 85, 76 and 51. For metabolite 25 the Scientific Panel was unable to conclude that this metabolite was safe from the point of view of genotoxicity. It is concluded that while the information presented for metabolites 65 and 54 is sufficient to demonstrate that they are not relevant, a similar conclusion cannot be reached for metabolites 85, 76, 51 and 25.

During the evaluation of this active substance, other areas of concern have been identified. It was found that the expected concentration in groundwater of some of the above metabolites exceed the maximum acceptable limit of 0.1 µg/l. In addition, it could not be precluded that alachlor has a carcinogenic potential. In this context, alachlor has been classified as a carcinogen of category 3 by Commission Directive 2004/73/EC (2) of 29 April 2004 adapting to technical progress for the 29th time Council Directive 67/548/EEC (3) on the approximation of the laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances. In this case, it was considered appropriate to increase the safety factors used in the setting of an acceptable operator exposure level (AOEL). The exposure resulting from the handling of the substance and its application at the rates, i.e. the intended doses per hectare, proposed by the notifier, would exceed this level and, in other words, lead to an unacceptable risk for the operators.

Consequently, as these concerns remain unresolved, assessments made on the basis of the information submitted have not demonstrated that it may be expected that, under the proposed conditions of use, plant protection products containing alachlor satisfy in general the requirements laid down in Article 5(1)(a) and (b) of Directive 91/414/EEC.

Alachlor should therefore not be included in Annex I to Directive 91/414/EEC.

Measures should be taken to ensure that existing authorisations for plant protection products containing alachlor are withdrawn within a prescribed period and are not renewed and that no new authorisations for such products are granted.

Any period of grace for disposal, storage, placing on the market and use of existing stocks of plant protection products containing alachlor allowed by Member States, should be limited to a period no longer than 12 months to allow existing stocks to be used in no more than one further growing season.

This decision does not prejudice the submission of an application for alachlor according to the provisions of Article 6 (2) of Directive 91/414/EEC in view of a possible inclusion in its Annex I.

The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health.

HAS ADOPTED THIS DECISION:

**Article 1**

Alachlor shall not be included as active substance in Annex I to Directive 91/414/EEC.

**Article 2**

Member States shall ensure that:

(a) Authorisations for plant protection products containing alachlor are withdrawn by 18 June 2007:

---

(b) from 19 December 2006 no authorisations for plant protection products containing alachlor are granted or renewed under the derogation provided for in Article 8(2) of Directive 91/414/EEC.

**Article 3**

Any period of grace granted by Member States in accordance with the provisions of Article 4(6) of Directive 91/414/EEC, shall be as short as possible and shall expire not later than 18 June 2008.

**Article 4**
