COUNCIL REGULATION (EC) No 1257/1999

of 17 May 1999

on support for rural development from the European Agricultural Guidance and Guarantee Fund (EAGGF) and amending and repealing certain Regulations

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Articles 36 and 37 thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the European Parliament (2),

Having regard to the opinion of the Economic and Social Committee (3),

Having regard to the opinion of the Committee of the Regions (4),

Having regard to the opinion of the Court of Auditors (5),

(1) Whereas a common rural development policy should accompany and complement the other instruments of the common agricultural policy and thus contribute to the achievement of the policy's objectives as laid down in Article 33(1) of the Treaty;

(2) Whereas, according to Article 33(2)(a) of the Treaty, in working out the common agricultural policy and the special methods for its application, account is to be taken of the particular nature of agricultural activity which results from the social structure of agriculture and from structural and natural disparities between the various agricultural regions;

(3) Whereas, according to Article 159 of the Treaty, the implementation of the common policies is to take into account the objectives set out in Articles 158 and 160 for the common policy of economic and social cohesion and contribute to their achievement; whereas rural development measures should, therefore, contribute to this policy in regions whose development is lagging behind (Objective 1) and regions facing structural difficulties (Objective 2) as defined in Council Regulation (EC) No 1260/1999, of 21 June 1999 laying down general provisions on the Structural Funds (6);

(4) Whereas measures designed to support the improvement of agricultural structures were introduced into the common agricultural policy as early as 1972; whereas for almost two decades, attempts have been made to integrate agricultural structural policy into the wider economic and social context of rural areas; whereas the 1992 policy reform stressed the environmental dimension of agriculture as the largest land user;

(5) Whereas rural policy is currently carried out through a range of complex instruments;

(6) Whereas over the coming years, agriculture will have to adapt to new realities and further changes in terms of market evolution, market policy and trade rules, consumer demand and preferences and the Community's next enlargement; whereas these changes will affect not only agricultural markets but also local economies in rural areas in general; whereas a rural development policy should aim at restoring and enhancing the competitiveness of rural areas and, therefore, contribute to the maintenance and creation of employment in those areas;

(2) Opinion delivered on 6 May 1999 (not yet published in the Official Journal).
(7) Whereas these developments should be encouraged and supported by reorganisation and simplification of the existing rural development instruments;

(8) Whereas such reorganisation should take into account the experience gained in applying existing instruments and thus be based on those instruments, which are those implemented under the current priority objectives promoting rural development by speeding up the adjustment of agricultural structures in the framework of the reform of the common agricultural policy and facilitating the development and structural adjustment of rural areas (Objectives 5a and 5b), as laid down in Council Regulation (EEC) No 2052/88 of 24 June 1988 on the tasks of the Structural Funds and their effectiveness and on coordination of their activities between themselves and with the operations of the European Investment Bank and the other existing financial instruments (1) and Council Regulation (EEC) No 4256/88 of 19 December 1988 laying down provisions for implementing Regulation (EEC) No 2052/88 as regards the European Agricultural Guidance and Guarantee Fund (EAGGF) Guidance Section (2), and those introduced as accompanying measures to the 1992 common agricultural policy reform by Council Regulation (EEC) No 2078/92 of 30 June 1992 on agricultural production methods compatible with the requirements of the protection of the environment and the maintenance of the countryside (3), Council Regulation (EEC) No 2079/92 of 30 June 1992 instituting a Community aid scheme for early retirement from farming (4) and Council Regulation (EEC) No 2080/92 of 30 June 1992 instituting a Community aid scheme for forestry measures in agriculture (5);

(9) Whereas the framework of a reformed rural development policy should cover all rural areas in the Community;

(10) Whereas the three existing accompanying measures introduced by the 1992 reform of the common agricultural policy (agri-environment, early retirement and afforestation) should be supplemented by the scheme for less-favoured areas and areas with environmental restrictions;

(11) Whereas other rural development measures should form part of integrated development programmes for Objective 1 and may form part of programmes for Objective 2 regions;

(12) Whereas in rural areas, rural development measures should accompany and complement market policies;

(13) Whereas support from the EAGGF for rural development should be based on a single legal framework establishing measures eligible for support, their objectives and criteria for eligibility;

(14) Whereas, given the diversity of the Community’s rural areas, rural development policy should follow the principle of subsidiarity; whereas it should therefore, be as decentralised as possible and emphasis must be on participation and a ‘bottom up’ approach; whereas, therefore, eligibility criteria for rural development support should not go beyond what is necessary to achieve the objectives of rural development policy;

Whereas consistency with other instruments of the common agricultural policy and with other common policies requires, however, basic support criteria to be laid down at Community level; whereas, in particular, unjustified distortions of competition resulting from rural development measures should be avoided;

Whereas, in order to ensure flexibility and to simplify legislation, the Council should confer all necessary implementing powers on the Commission in accordance with the third indent of Article 202 of the Treaty;

Whereas the structure of agriculture in the Community is typified by the existence of a large number of holdings which lack the structural conditions to ensure a fair income and living conditions for farmers and their families;

Whereas the aim of Community investment aid is to modernise agricultural holdings and to improve their viability;

Whereas Community conditions concerning eligibility for investment aid should be simplified as compared to the existing conditions laid down in Council Regulation (EC) No 950/97 of 20 May 1997 on improving the efficiency of agricultural structures (1);

Whereas the granting of specific benefits to young farmers may facilitate not only their establishment but also the structural adjustment of their holdings after their initial establishment;

Whereas the evolution and specialisation of agriculture require an appropriate level of general, technical and economic training for persons involved in agricultural and forestry activities, especially as regards new approaches to management, production and marketing;

Whereas a particular effort is needed to educate farmers in and inform them of agricultural methods compatible with the environment;

Whereas early retirement from farming should be encouraged in order to improve the viability of agricultural holdings, taking into account the experience acquired in the implementation of Regulation (EEC) No 2079/92;

Whereas support for less-favoured areas should contribute to the continued use of agricultural land, maintaining the countryside, maintenance and promotion of sustainable farming systems;

Whereas less-favoured areas should be classified on the basis of common criteria;

Whereas there is no need for any further classification of less-favoured areas at Community level;

Whereas conditions concerning eligibility for compensatory allowances should be laid down in order to ensure the efficiency of this support scheme and to ensure that its objectives are achieved;

Whereas for limitations on agricultural use in areas with environmental restrictions it might be necessary that support is granted to farmers to solve their specific problems arising from these limitations;

Whereas, in the coming years, a prominent role should be given to agri-environmental instruments to support the sustainable development of rural areas and to respond to society's increasing demand for environmental services;

Whereas the existing agri-environmental support under Regulation (EEC) No 2078/92 should be continued for targeted environmental measures, taking into account experience gained in the

implementation of this scheme as described in detail in the Commission's report presented pursuant to Article 10(2) of Regulation (EEC) No 2078/92;

(31) Whereas the agri-environmental aid scheme should continue to encourage farmers to serve society as a whole by introducing or continuing the use of farming practices compatible with the increasing need to protect and improve the environment, natural resources, soil and genetic diversity and to maintain the landscape and the countryside;

(32) Whereas improvements in the processing and marketing of agricultural products should be encouraged by support for investments in that field;

(33) Whereas such support can largely be based on existing conditions as currently laid down in Council Regulation (EC) No 951/97 of 20 May 1997 on improving the processing and marketing conditions for agricultural products (1). 

(34) Whereas it should be ensured that such investments are viable and that farmers have a share in the economic benefits of the action taken;

(35) Whereas forestry is an integral part of rural development and forestry measures should, therefore, be included under the rural development support scheme, whereas support for forestry should avoid distorting competition and should be market neutral;

(36) Whereas forestry measures should be adopted in the light of undertakings given by the Community and the Member States at international level and be based on Member States' forestry plans; whereas such measures should also take into account the specific problems of climate change;

(37) Whereas forestry measures should be based on those taken under the existing schemes laid down in Council Regulation (EEC) No 1610/89 of 29 May 1989 laying down provisions for implementing Regulation (EEC) No 4256/88 as regards the scheme to develop and optimally utilise woodlands in rural areas in the Community (2) and in Council Regulation (EEC) No 867/90 of 29 March 1990 on improving the processing and marketing conditions for forestry products (3); 

(38) Whereas the afforestation of agricultural land is especially important from the point of view of soil use and the environment and as a contribution to increasing supplies for certain forestry products, whereas the existing support for afforestation under Regulation (EEC) No 2080/92 should, therefore, be continued, taking into account the experience gained in the implementation of that scheme as described in detail in the Commission's report presented pursuant to Article 8(3) thereof;

(39) Whereas payments should be granted for activities to maintain and improve ecological stability of forests in certain areas;

(40) Whereas support should be granted for other measures relating to farming activities and their conversion; whereas the list of measures should be defined on the basis of experience and having regard to the need for rural development to be based partly on non-agricultural activities and services so as to reverse the trend towards the economic and social decline and depopulation of the countryside; whereas measures to remove inequalities and to promote equal opportunities for men and women should be supported;

(41) Whereas demand from consumers for organically-produced agricultural products and foodstuffs is increasing; whereas a new market for agricultural products is thus being created; whereas organic agriculture improves the sustainability of farming activ-

ities and thus contributes to the general aims of this Regulation; whereas the specific rural development support measures may concern the production, processing and marketing of organically-produced agricultural products;

(42) Whereas rural development measures eligible for Community support should comply with Community law and be consistent with other Community policies as well as with other instruments of the common agricultural policy;

(43) Whereas in the framework of this Regulation support should be excluded for certain measures eligible under other common agricultural policy instruments and in particular those falling within the scope of support schemes under common organisations of the market with the exceptions justified by objective criteria;

(44) Whereas, in view of existing aid to producer groups and their associations in several common organisations of the market, specific support to producer groups in the framework of rural development no longer appears to be necessary; whereas, therefore, the aid scheme existing under Council Regulation (EC) No 952/97 of 20 May 1997 on producer groups and associations thereof (1) should be discontinued;

(45) Whereas the financing of Community support for the accompanying measures and for other rural development measures in areas other than Objective 1 should come from the Guarantee Section of the EAGGF; whereas the basic financial rules laid down in Regulation (EC) No 1260/1999 have been adapted accordingly;

(46) Whereas the financing of Community support for rural development measures, in areas covered by Objective 1, should continue to come from the Guidance Section of the EAGGF except for the three existing accompanying measures and the support for less-favoured areas and areas with environmental restrictions;

(47) Whereas, with regard to the support for rural development measures covered by Objective 1 and Objective 2 programming, Regulation (EC) No 1260/1999 should apply, in particular as to integrated programming of these measures; whereas, however, rules concerning financing should take into account the Guarantee financing of measures in Objective 2 regions;

(48) Whereas rural development measures not covered by Objective 1 or Objective 2 programming should be subject to rural development programming pursuant to specific rules; whereas rates of assistance for such measures should be differentiated according to the general principles laid down in Article 29(1) of Regulation (EC) No 1260/1999 taking sufficiently into account the requirement of social and economic cohesion; whereas, as a result, those assistance rates should, in principle, be differentiated as between areas covered by Objective 1 and Objective 2 and other areas; whereas the rates laid down in this Regulation are the maximum rates of Community assistance;

(49) Whereas, in addition to rural development programmes, the Commission should be able to make provisions for studies on rural development on its own initiative notwithstanding the rural development initiative provided for in Articles 19 and 20 of Regulation (EC) No 1260/1999;

(50) Whereas appropriate rules should be established for the monitoring and evaluation of rural development support, using as a reference well-defined indicators to be agreed and established prior to programme implementation;

(51) Whereas rural development measures should be eligible for Member State support without any Community co-financing; whereas, in view of the considerable economic impact of such aid

and in order to ensure consistency with measures eligible for Community support and simplify procedures, specific State-aid rules should be established;

(52) Whereas it should be possible to adopt transitional rules to facilitate the transition from existing support schemes to the new rural development support scheme;

(53) Whereas the new support scheme provided for in this Regulation replaces existing support schemes which should therefore be repealed; whereas, as a consequence, the derogation in current schemes for outermost regions and for the Aegean Islands will equally have to be repealed; whereas new rules providing for the necessary flexibility, adaptations and derogations in order to meet the specific needs of those regions will be established when rural development measures are programmed,

HAS ADOPTED THIS REGULATION:

TITLE I

SCOPE AND OBJECTIVES

Article 1

1. This Regulation establishes the framework for Community support for sustainable rural development.

2. Rural development measures shall accompany and complement other instruments of the common agricultural policy and thus contribute to the achievement of the objectives laid down in Article 33 of the Treaty.

3. Rural development measures shall:
   — be integrated into the measures promoting the development and structural adjustment of regions whose development is lagging behind (Objective 1), and
   — accompany the measures supporting the economic and social conversion of areas facing structural difficulties (Objective 2) in the regions concerned, taking into account the specific targets of Community support under these objectives as laid down in Articles 158 and 160 of the Treaty and in Regulation (EC) No 1260/1999 and according to the conditions laid down in this Regulation.

Article 2

Support for rural development, related to farming activities and their conversion, may concern:
   — the improvement of structures in agricultural holdings and structures for the processing and marketing of agricultural products,
   — the conversion and reorientation of agricultural production potential, the introduction of new technologies and the improvement of product quality,
   — the encouragement of non-food production,
   — sustainable forest development,
   — the diversification of activities with the aim of complementary or alternative activities,
   — the maintenance and reinforcement of viable social fabric in rural areas,
   — the development of economic activities and the maintenance and creation of employment with the aim of ensuring a better exploitation of existing inherent potential,
   — the improvement of working and living conditions,
   — the maintenance and promotion of low-input farming systems,
Article 3

Support shall be granted for the rural development measures defined in Title II and under the conditions laid down therein.

TITLE II

RURAL DEVELOPMENT MEASURES

CHAPTER I

INVESTMENT IN AGRICULTURAL HOLDINGS

Article 4

Support for investment in agricultural holdings shall contribute to the improvement of agricultural incomes and of living, working and production conditions.

Such investment shall pursue one or more of the following objectives:

— to reduce production costs,
— to improve and redeploy production,
— to increase quality,
— to preserve and improve the natural environment, hygiene conditions and animal welfare standards,
— to promote the diversification of farm activities.

Article 5

Support for investment shall be granted to agricultural holdings:

— the economic viability of which can be demonstrated,
— which comply with minimum standards regarding the environment, hygiene and animal welfare, and
— where the farmer possesses adequate occupational skill and competence.

2. The conditions for support for investment laid down in paragraph 1 must be fulfilled at the time when the individual decision to grant support is taken.

3. Where investments are made in order to comply with newly introduced minimum standards relating to the environment, hygiene, and animal welfare, support may be granted in order to comply with the new standards. In such cases, a period of grace may be provided to farmers to meet these minimum standards where time is needed to solve specific problems involved in complying with such standards. The farmer shall comply with the relevant standards by the end of the investment period.

Article 6

Support shall not be granted for investment which has as its objective an increase in production for which no normal market outlets can be found.

Article 7

Member States shall set limits for total investment eligible for support.
The total amount of support, expressed as a percentage of the volume of eligible investment, is limited to a maximum of 40 % and 50 % in less-favoured areas.

Where investments are undertaken by young farmers, as referred to in Chapter II, these percentages may reach a maximum of 50 % and 60 % in less-favoured areas during a period not exceeding five years from the setting up. The age condition laid down in the first indent of Article 8 (1) must be met at the time of setting up.

CHAPTER II
SETTING UP OF YOUNG FARMERS

Article 8

1. Setting-up aid to facilitate the establishment of young farmers shall be granted under the following conditions:
   — the farmer is under 40 years of age,
   — the farmer possesses adequate occupational skill and competence,
   — the farmer is setting up on an agricultural holding for the first time,
   — as regards the holding:
     (i) economic viability can be demonstrated, and
     (ii) minimum standards regarding the environment, hygiene and animal welfare are complied with,
   and
   — the farmer is established as head of the holding.

Specific conditions may be applied in a situation where a young farmer is not established as sole head of the holding. These conditions must be equivalent to those required for a young farmer setting up as sole head of a holding.

2. The setting-up aid may comprise:

   (a) a single premium up to the maximum eligible amount specified in the \textit{Annex I}, and

   (b) an interest subsidy on loans taken on with a view to covering the costs arising from setting-up; the capitalised value of the interest subsidy may not exceed the value of the premium.

A support higher than the maximum amount referred to in point a) but not exceeding EUR 30 000 may be granted to young farmers who are using farm advisory services linked to the setting-up of their activity during a period of three years after setting-up.

CHAPTER III
TRAINING

Article 9

Support for vocational training shall contribute to the improvement of the occupational skill and competence of farmers and other persons involved in agricultural activities and forestry activities, and their conversion.

Training shall in particular be designed:

   — to prepare farmers and other persons involved in agricultural activities for qualitative reorientation of production, the application of production practices compatible with the maintenance and enhancement of the landscape, the protection of the environment, hygiene standards and animal welfare and acquisition of the skills needed to enable them to manage an economically viable farm, and
to prepare forest holders and other persons involved in forestry activities for the application of forest management practices to improve the economic, ecological or social functions of forests.

CHAPTER IV

EARLY RETIREMENT

Article 10

1. Support for early retirement from farming shall contribute to the following objectives:
   — to provide an income for elderly farmers who decide to stop farming,
   — to encourage the replacement of such elderly farmers by farmers able to improve, where necessary, the economic viability of the remaining agricultural holdings,
   — to reassign agricultural land to non-agricultural uses where it cannot be farmed under satisfactory conditions of economic viability.

2. Early retirement support may include measures to provide an income for farm workers.

Article 11

1. A transferor of a farm shall:
   — stop all commercial farming activity definitively; he may, however, continue non-commercial farming and retain the use of the buildings,
   — be not less than 55 years old but not yet of normal retirement age at the time of transfer, and
   — have practised farming for the 10 years preceding transfer.

2. The transferee of a farm shall:
   — succeed the transferor as the head of the agricultural holding or take over all or part of the land released. The economic viability of the transferee's holding must be improved within a period and in compliance with conditions to be defined in terms of, in particular, the transferee's occupational skill and competence and the surface area and volume of work or income, according to the region and type of production,
   — possess adequate occupational skill and competence, and
   — undertake to practise farming on the agricultural holding for not less than five years.

3. A farm worker shall:
   — stop all farm work definitively,
   — be not less than 55 years old but not yet of normal retirement age,
   — have devoted at least half of his working time as a family helper or farm worker to farm work during the preceding five years,
   — have worked on the transferor's agricultural holding for at least the equivalent of two years full-time during the four-year period preceding the early retirement of the transferor, and
   — belong to a social security scheme.

4. A non-farming transferee may be any other person or body who takes over released land to use it for non-agricultural purposes, such as forestry or the creation of ecological reserves, in a manner compatible with protection or improvement of the quality of the environment of the countryside.

5. The conditions laid down in this Article shall be applied throughout the period during which the transferor receives early retirement support.
Article 12

1. The maximum amounts eligible for Community support are laid down in the Annex I.

2. The duration of early retirement support shall not exceed a total period of 15 years for the transferor and 10 years for the farm worker. It shall not go beyond the 75th birthday of a transferor and not go beyond the normal retirement age of a worker.

Where in the case of a transferor a normal retirement pension is paid by the Member State, early retirement support shall be granted as a supplement taking into account the amount of the national retirement pension.

CHAPTER V

LESS-FAVoured AREAS AND AREAS WITH ENVIRONMENTAL RESTRICTIONS

Article 13

Support for less-favoured areas and areas with environmental restrictions shall contribute to the following objectives.

(a) Compensation for naturally less-favoured areas

— to ensure continued agricultural land use and thereby contribute to the maintenance of a viable rural community,
— to maintain countryside,
— to maintain and promote sustainable farming systems which in particular take account of environmental protection requirements.

(b) Compensation for areas with environmental restrictions

— to ensure environmental requirements and safeguard farming in areas with environmental restrictions.

Article 14

1. Farmers in less-favoured areas may be supported by compensatory allowances.

2. Compensatory allowances shall be granted per hectare of areas used for agriculture to farmers who:

— farm a minimum area of land to be defined,
— undertake to pursue their farming activity in a less-favoured area for at least five years from the first payment of a compensatory allowance, and
— apply usual good farming practices compatible with the need to safeguard the environment and maintain the countryside, in particular by sustainable farming.

3. Where residues of substances prohibited under Directive 96/22/EC or residues of substances authorised under that Directive but used illegally, are detected pursuant to the relevant provisions of Council Directive 96/23/EC in an animal belonging to the bovine herd of a producer, or where an unauthorised substance or product, or a substance or product authorised under Directive 96/22/EC but held illegally is found on the producer's holding in any form, the producer shall be excluded from receiving compensatory allowances for the calendar year of that discovery.

In the event of a repeated infringement, the length of the exclusion period may, depending on the seriousness of the offence, be extended to five years from the year in which the repeated infringement was discovered.

In the event of obstruction on the part of the owner or holder of the animals when inspections are being carried out and the necessary samples are being taken in application of national residue-monitoring

(1) OJ L 125, 23.5.1996, p. 3.
plans, or when the investigations and checks provided for under Directive 96/23/EC are being carried out, the penalties provided for in the first subparagraph shall apply.

Article 15

1. Compensatory allowances shall be fixed at a level which:
   — is sufficient in making an effective contribution to compensation for existing handicaps, and
   — avoids overcompensation.
2. Compensatory allowances shall be duly differentiated, taking into account:
   — the situation and development objectives peculiar to a region,
   — the severity of any permanent natural handicap affecting farming activities,
   — the particular environmental problems to be solved where appropriate,
   — the type of production and, where appropriate, the economic structure of the holding.
3. Compensatory allowances shall be fixed between the minimum and maximum amounts set out in the ►A1 Annex I ◄.

Compensatory allowances higher than this maximum amount may be granted provided that the average amount of all compensatory allowances granted at the programming level concerned does not exceed this maximum amount. Member States may, for the purpose of calculating the average amount, present a combination of several regional programmes. However, in cases duly justified by objective circumstances, the average amount may be increased to the maximum average amount set out in the ►A1 Annex I ◄.

Article 16

1. Payments to compensate for costs incurred and income foregone may be made to farmers who are subject to restrictions on agricultural use in areas with environmental restrictions as a result of the implementation of Directives 79/409/EEC (1) and 92/43/EEC (2), if and in so far as such payments are necessary to solve the specific problems arising from the implementation of those Directives.
2. Payments shall be fixed at a level which avoids overcompensation; this is especially necessary in the case of payments in less-favoured areas.
3. The maximum amount eligible for Community support is laid down in the ►A1 Annex I ◄. This amount may be increased in duly justified cases to take account of specific problems.
   A support higher than this maximum amount may be granted during a period not exceeding five years from the date the provision imposing new restrictions becomes mandatory in accordance with Community legislation. This support shall be granted annually on a degressive basis and shall not exceed the amount set out in the ►A1 Annex I ◄.

Article 17

Less-favoured areas shall include:

mountain areas (Article 18),
— other less-favoured areas (Article 19), and
— areas affected by specific handicaps (Article 20).

Article 18

1. Mountain areas shall be those characterised by a considerable limitation of the possibilities for using the land and an appreciable increase in the cost of working it due:
   — to the existence, because of altitude, of very difficult climatic conditions, the effect of which is substantially to shorten the growing season,
   — at a lower altitude, to the presence over the greater part of the area in question of slopes too steep for the use of machinery or requiring the use of very expensive special equipment, or
   — to a combination of these two factors, where the handicap resulting from each taken separately is less acute but the combination of the two gives rise to an equivalent handicap.

2. Areas north of the 62nd Parallel and certain adjacent areas shall be treated in the same way as mountain areas.

Article 19

Less-favoured areas which are in danger of abandonment of land-use and where the conservation of the countryside is necessary, shall comprise farming areas which are homogeneous from the point of view of natural production conditions and exhibit all of the following characteristics:
   — the presence of land of poor productivity, difficult cultivation and with a limited potential which cannot be increased except at excessive cost, and which is mainly suitable for extensive livestock farming,
   — production which results from low productivity of the natural environment which is appreciably lower than the average, with regard to the main indices of economic performance in agriculture,
   — a low or dwindling population predominantly dependent on agricultural activity, the accelerated decline of which would jeopardise the viability of the area concerned and its continued habitation.

Article 20

1. Less-favoured areas may include other areas affected by specific handicaps, in which farming should be continued, where necessary and subject to certain conditions, in order to conserve or improve the environment, maintain the countryside and preserve the tourist potential of the area or in order to protect the coastline.

2. Areas referred to in paragraph 1 may not exceed 10 % of the area of the Member State concerned.

CHAPTER Va

MEETING STANDARDS

Article 21a

Support to help farmers to adapt to demanding standards based on Community legislation in the fields of the environment, public, animal and plant health, animal welfare and occupational safety shall contribute to the following objectives:
(a) a more rapid implementation of demanding Community standards by Member States;

(b) the respect of those standards by farmers;

(c) the use of farm advisory services by farmers, as provided for in Council Regulation (EC) No 1782/2003 of 29 September 2003 establishing common rules for direct support schemes under the common agricultural policy and support schemes for producers of certain crops (1), in assessing the performance of farm businesses and identifying improvements required with regard to the statutory management requirements as set out in that Regulation.

**Article 21b**

1. Temporary support intended to contribute partly to costs incurred and income foregone may be granted to farmers who have to apply demanding standards based on Community legislation and newly introduced in national legislation.

For Member States applying Article 16, support shall not be granted under this Chapter to a farmer to apply standards based on the Community legislation referred to in Article 16.

2. Support may be granted during a period not exceeding five years from the date the standard becomes mandatory in accordance with Community legislation.

To be eligible for support, the standard should impose new obligations or restrictions on farming practice which have a significant impact on typical farm operating costs and which concern a significant number of farmers.

For Directives for which the implementation deadline has been exceeded and which are not yet correctly implemented by the Member State, support may be granted during a period not exceeding five years from 28 October 2003.

3. Support shall not be payable where the non-application of a standard is due to the non-respect by the applicant farmer of a standard already transposed in national legislation.

**Article 21c**

1. Support shall be granted annually in the form of a flat rate aid and on a degressive basis, in equal instalments. Member States shall modulate the level of payment per standard with regard to the level of obligations resulting from the application of the standard. Payment shall be fixed at a level which prevents overcompensation. Costs related to investments shall not be taken into account when determining the level of annual support.

2. The maximum eligible annual amount, per holding, of support is set out in the Annex.

**Article 21d**

1. Support may be granted to farmers to help them meet costs arising from the use of the farm advisory services which identify and where necessary, propose improvements relating to the application by farmers of statutory environmental, public, animal and plant health and animal welfare standards.

2. Farm advisory services for which support may be granted shall be in accordance with Chapter III of Title II of Regulation (EC) No 1782/2003 and the provisions adopted in implementation thereof.

3. The total amount of support for the use of advisory services as referred to in paragraph 1, shall be limited to a maximum of 80 % of the eligible cost, without exceeding the maximum eligible amount as set out in the Annex.

CHAPTER VI
AGRI-ENVIRONMENT AND ANIMAL WELFARE

Article 22
Support for agricultural methods designed to protect the environment, maintain the countryside (agri-environment) or improve animal welfare shall contribute to achieving the Community’s policy objectives regarding agriculture, the environment and the welfare of farm animals.

Such support shall promote:
(a) ways of using agricultural land which are compatible with the protection and improvement of the environment, the landscape and its features, natural resources, the soil and genetic diversity,
(b) an environmentally-favourable extensification of farming and management of low-intensity pasture systems,
(c) the conservation of high nature-value farmed environments which are under threat,
(d) the upkeep of the landscape and historical features on agricultural land,
(e) the use of environmental planning in farming practice,
(f) the improvement of animal welfare.

Article 23
1. Support shall be granted to farmers who give agri-environmental or animal welfare commitments for at least five years. Where necessary, a longer period shall be determined for particular types of commitments in view of their effects on the environment or animal welfare.

(a) income foregone,
(b) additional costs resulting from the commitment given, and

Costs related to investments shall not be taken into account when calculating the level of annual support. Costs for non-remunerative investments which are necessary to comply with a commitment may be taken into account in calculating the level of annual support.

2. Maximum amounts per year eligible for Community support are laid down in the Annex. When support is calculated on an area basis, these amounts shall be based on that area of the holding to which agri-environmental commitments apply.

CHAPTER VIa
FOOD QUALITY

Article 24a
Support for agricultural production methods designed to improve the quality of agricultural products and for promotion of those products shall contribute to the following objectives:

2. The duration of such support shall not exceed a period of five years.

Article 24d

1. Support shall be granted to producer groups for activities intended to inform consumers about and promote agricultural products or foodstuffs designated under Community or national food quality schemes as described in Article 24b and selected for support by the Member State under the measure provided for in Articles 24a, 24b and 24c.

Where investments are made in order to comply with newly introduced minimum standards relating to the environment, hygiene, and animal welfare, support may be granted in order to comply with the new standards. In such cases, a period of grace may be provided to small processing units to meet these minimum standards where time is needed to
solve specific problems encountered in complying with such standards. The small processing units shall comply with the relevant standards by the end of the investment period.

2. Investment must contribute to improving the situation of the basic agricultural production sector in question. It must guarantee the producers of such basic products an adequate share in the resulting economic benefits.

Article 33b
Support for semi-subsistence farms undergoing restructuring
1. Support for semi-subsistence farms undergoing restructuring shall contribute to the following objectives:
   (a) to help ease rural transition problems as the agricultural sector and rural economy of the new Member States are exposed to the competitive pressure of the single market;
   (b) to facilitate and encourage the restructuring of farms not yet economically viable.
For the purpose of this Article, ‘semi-subsistence farms’ shall mean farms which primarily produce for their own consumption, but also market a proportion of their output.
2. To benefit from the support, the farmer must present a business plan which:
   (a) demonstrates the future economic viability of the farm;
   (b) contains details of investments required;
   (c) describes specific milestones and targets.
3. Compliance with the business plan referred to in paragraph 2 shall be reviewed after three years. If the objectives set out in the plan have not been achieved by the time of the three-year review, no further support shall be granted, but there will be no requirement to repay monies already received.
4. Support shall be paid annually in the form of flat rate aid up to the maximum eligible amount specified in Annex II and for a period not exceeding five years.

(a) 5 %, 5 %, 4 %, 3 % and 2 % of the value of the production up to EUR 1 000 000 marketed respectively in the first, second, third, fourth and fifth year, and

(b) 2,5 %, 2,5 %, 2,0 %, 1,5 % and 1,5 % of the value of the production exceeding EUR 1 000 000 marketed respectively in the first, second, third, fourth and fifth year.

In any case, support shall not exceed the maximum eligible amounts laid down in Annex II.

In the case of Malta, a minimum aid for a sector of production where the total output is extremely small may be established. The sector concerned and the aid level shall be determined by the Commission.

Full-time farmers in Malta

Specific temporary support shall be granted to full-time farmers to enable them to adapt to the changes in the market environment resulting from the dismantling of levies upon accession.

Support shall be paid annually on a degressive basis for a period not exceeding five years. Three types of payment shall be envisaged:
(a) payment per hectare for irrigated land;

(c) payment per livestock unit for livestock farm.

Payment shall be established in relation to the expected drop in farm income due to the dismantling of levies, and consequent falls in prices for agricultural produce. Payment shall be fixed at a level which avoids overcompensation, in particular in relation to product-specific State aid under the SMPPMA.

Maximum eligible amounts per agricultural holding for the three categories of payments shall be adopted by the Commission.

SUBCHAPTER III

DEROGATIONS

Article 33k

General provisions

This Subchapter lays down the cases in which the new Member States may derogate from the eligibility criteria set for the measures defined in Chapters I, IV, V and VII.

2. By way of derogation from the second subparagraph of Article 7, the total amount of support for investment in agricultural holdings, expressed as a percentage of the volume of eligible investment, shall be limited to a maximum of 50 % and, in less favoured areas, 60 %. Where investments are undertaken by young farmers, as referred to in Chapter II, these percentages may reach a maximum of 55 % and, in less favoured areas, 65 %.

2b. By way of derogation from Articles 21a, 21b and 21c, costs linked to investments needed to comply with a standard set by the Community before the date of accession, and binding for farmers from this date, or a later date, may be taken into consideration for determining the level of annual support. This possibility is limited to the first three years of the period of support, up to an annual ceiling of EUR 25 000.

per farm. During this investment period, the degressivity provided for in Article 21c shall not apply. Loss of income and additional costs resulting from compliance with the standard may not be taken into consideration until the end of the investment period.

Investments supported under the first subparagraph are not eligible for the support provided for in Chapter I.

By way of derogation from the second indent of Article 26(1), support for investment shall be granted to enterprises which have been granted a transitional period after accession in order to meet the minimum standards regarding the environment, hygiene and animal welfare. In this case, the enterprise shall comply with the relevant standards by the end of the specified transitional period or the end of the investment period, whichever is the earlier.

The amount of support shall be subject to the maximum amounts set out in Annex I to this Regulation and shall be calculated in relation to the size of the milk quota and the total farming activity on the holding.

Milk quotas allocated to a transferor shall be returned to the national milk quota reserve with no additional compensation payment.

2. By way of derogation from Article 21, Malta may exceed the limit of 10% laid down for the total extent of the areas referred to in Article 20.

By way of derogation from Article 24(2), the maximum amounts per year eligible for Community support laid down in Annex I may be increased in the case of the measure to maintain and preserve rubble walls in Malta. The maximum amount per hectare payable under this derogation shall be established by the Commission.

3. By way of derogation from Article 31(1), support may be granted by Estonia for the afforestation of abandoned agricultural land on condition that such land has been in use within the previous five years. In this case, such support may only include, in addition to planting costs, the annual premium per hectare provided for in the first indent of the second subparagraph of Article 31(1).

**CHAPTER X**

**IMPLEMENTING RULES**

**Article 34**

Detailed rules for the implementation of this Title shall be adopted in accordance with the procedure laid down in Article 50(2) of Regulation (EC) No 1260/1999.

These rules may in particular define:
