

RULES

of the Supply Agency of the European Atomic Energy Community determining the manner in which demand is to be balanced against the supply of ores, source materials and special fissile materials

THE SUPPLY AGENCY OF THE EUROPEAN ATOMIC ENERGY COMMUNITY,

Having regard to the provisions of the Treaty, and in particular the sixth paragraph of Article 60 thereof;

After consulting the Advisory Committee to the Agency;

Having regard to the Decision of the Euratom Commission of 5 May 1960 fixing the date on which the Supply Agency is to take up its duties and approving these Rules, and in particular Articles 3 and 4 of that Decision relating to procedures for the entry into force of these Rules;

Whereas, in order to carry out its duties in accordance with the principles set out in Article 52 of the Treaty, the Agency must, in respect of each product and on the basis of declarations covering users' estimated requirements and producers' estimated available supplies, have a complete knowledge of the situation on the market;

Whereas the procedures for balancing demand against supply must of necessity be determined in such a way as to enable various supply situations to be met;

Whereas the introduction of these procedures includes such transitional measures as will facilitate their progressive application;

HAS ADOPTED THE FOLLOWING PROVISIONS:

Article 1

Users shall, when so requested by the Agency, notify it in respect of a given period, as provided for in Article 3, of their estimated requirements of ores, source materials and special fissile materials and, on the basis of contracts already entered into, of their supply programmes.

The declarations shall specify:

- (1) Designation of product;
- (2) Nature and chemical and physical composition and other relevant specifications;
- (3) Quantities (in metric units);
- (4) Place of origin;
- (5) Intended use;
- (6) Delivery dates;
- (7) Price terms, which are not binding.

Article 2

Producers shall, when so requested by the Agency, notify it in respect of a given period, as provided for in Article 3, of stocks held by them at the start of the period, their estimated production and, on the basis of contracts already entered into, their delivery programmes.

The declarations shall specify:

- (1) Designation of product;
- (2) Nature and chemical and physical composition and other relevant specifications;
- (3) Quantities (in metric units);
- (4) Place of origin;
- (5) Delivery dates;
- (6) Price terms, which are not binding.

Article 3

The Agency shall, after obtaining the Opinion of the Advisory Committee, fix and publish in the *Official Journal of the European Communities* the time limit

within which, and the period in respect of which, users and producers must forward to the Agency the declarations referred to in Articles 1 and 2.

Article 4

When in possession of all the declarations made under Articles 1 and 2 of this Regulation the Agency shall, by means of a circular, communicate to users and producers in the Community information on general data and market trends, and also, where appropriate, on supply potential and possible outlets in third countries.

Article 5

If, in respect of a specific product and where in particular the Agency takes the initiative, the Commission, having heard the Advisory Committee, finds that the situation on the market shows a clear surplus of supply over demand, it may, by means of an appropriate directive, call upon the Agency to apply the simplified procedure set out below:

- (a) On the basis of information acquired through the declarations made under Articles 1 and 2 of this Regulation, the Agency shall, after obtaining the Opinion of the Advisory Committee, lay down the general conditions to be fulfilled in supply contracts covering that product;
- (b) These general conditions shall be made known to the parties concerned, who shall then be empowered to negotiate directly and to sign contracts;
- (c) Contracts shall be communicated to the Agency and deemed to be concluded by it if no objection is notified by the Agency to the parties concerned within eight days from the time of receipt of the contracts.

The procedure set out in this Article shall not apply to supply contracts relating to special fissile materials.

Article 6

Where exception is provided for by Article 5, demand shall be balanced against supply in accordance with the following procedure:

Users shall notify the Agency, by the dates and in respect of the periods fixed by it, of their

requirements in respect of supplies of ores, source materials and special fissile materials.

As soon as these requirements are known, the Agency shall, by inviting tenders and indicating all relevant specifications, fix the dates by which, and the periods in respect of which, producers in the Community are invited to submit their tenders.

By submitting their tenders, producers in the Community shall be considered to have fulfilled the obligation devolving upon them pursuant to the second subparagraph of Article 57 (2) of the Treaty. As soon as those tenders are received, the Agency shall decide whether it will exercise its right of option and, if it does so, the quantities that option will cover.

The Agency shall notify users of the tenders and of the number of applications it has received and shall make known to the parties concerned the terms on which their applications can be met and the procedures whereby contracts shall be concluded.

Article 7

Independently of the procedures laid down in Articles 5 and 6 of this Regulation, users may at any time make applications to or place orders with the Agency. Such orders shall be met on the best terms in relation to supplies available on the market.

Article 8

This Regulation shall enter into force in its entirety on 1 June 1960 for contracts relating to the supply of special fissile materials.

As regards contracts for the supply of ores and source materials, implementation of Articles 5 and 6 shall be deferred for six months from that date and shall take effect on 1 December 1960. During that period contracts falling within the provisions of this paragraph shall continue to be subject to the prior approval of the Commission, in accordance with Article 222 of the Treaty.

Done at Brussels, 5 May 1960.

For the Supply Agency of Euratom

The Director-General

E. SPAAK
