

COMMISSION REGULATION (EEC) No 314/78

of 16 February 1978

on the distillation for the 1977/78 wine year of wines suitable for producing certain potable spirits obtained from wine with a registered designation of origin

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 816/70 of 28 April 1970 laying down additional provisions for the common organization of the market in wine⁽¹⁾, as last amended by Regulation (EEC) No 2560/77⁽²⁾, and in particular Article 6d (5) thereof,

Whereas Article 6d (1) of Regulation (EEC) No 816/70 provides that in years in which the harvest of wine suitable for producing certain potable spirits obtained from wine with a registered designation of origin exceeds by 1 000 000 hectolitres the volume of wine used for this purpose in the previous wine year, it may be decided that the wines in question may be distilled; whereas this condition is fulfilled in the case of the 1977/78 wine year; whereas distillation of these wines should therefore be permitted;

Whereas it should be made clear that this distilling operation which was formerly governed by Article 6b of Regulation (EEC) No 816/70, remains subject to the provisions of Council Regulation (EEC) No 1931/76 of 20 July 1976 laying down general rules governing the distillation of wines provided for in Articles 6b, 6c, 24a and 24b of Regulation (EEC) No 816/70⁽³⁾, as last amended by Regulation (EEC) No 1675/77⁽⁴⁾;

Whereas, in accordance with Regulation (EEC) No 1931/76 and in order to facilitate control measures, time limits must be laid down for the lodging of applications for approval, for the approval itself and for the distillation in question;

Whereas those parties which have applied to enter into a distillation contract must be informed in good time of the outcome of the approval procedure;

Whereas the items to be included in the distillation contracts should be specified;

Whereas Article 2a of Regulation (EEC) No 1931/76 makes provision for limiting distillation to products

with an alcoholic strength of 86° or more; whereas this provision should be applied, since the market in potable spirits is at present oversupplied and may be disturbed if products with an alcoholic strength of 85° or less are produced as a result of these distillation operations;

Whereas, in order to allow producers to receive the whole of the buying-in price with the minimum delay, there should be provision requiring the payments referred to in Article 3 (1) and (3) of Regulation (EEC) No 1931/76 to be made within 30 days after the conditions laid down therein have been fulfilled;

Whereas the prices of the wines intended for distillation are not such as to permit the sale, under normal conditions, of the products obtained from such distillation; whereas it is therefore necessary to pay an aid and to fix its amounts at a level which, having regard to normal costs, will permit its sale;

Whereas technical criteria for the approval of distillers should be laid down; whereas provision should also be made to enable approval in principle to be withdrawn from the distiller in the event of default on his part, except in cases of *force majeure* or inevitable accident;

Whereas the intervention agencies referred to in Article 6 of Regulation (EEC) No 1931/76 and the Commission must be informed of the progress of the distillation operations and must in particular receive information as to the quantities of table wine distilled and the quantities of alcohol obtained;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Wine,

HAS ADOPTED THIS REGULATION:
