*Remarks*

The fundamental activity of the European Research Council (ERC) shall be to provide attractive long-term funding to support excellent investigators and their research teams to pursue ground-breaking, high-gain/high-risk research. Particular priority shall be given to assisting excellent starting researchers to make the transition to independence by providing adequate support at the critical stage, when they are setting up or consolidating their own research team or programme. The ERC shall also give support, as necessary, to emerging new ways of working in the scientific world with the potential to create breakthrough results and facilitate exploration of the commercial and social innovation potential of the research which it funds.

*Remarks*

Activities under the 'Future and emerging technologies' (FET) specific objective shall support fundamental science and technology research exploring new future technologies by challenging current paradigms and venturing into unknown areas. In addition, FET activities shall address a number of promising exploratory research themes with the potential to generate a critical mass of inter-related projects that, together, make up a broad and multifaceted exploration of the themes and build a European pool of knowledge. Finally, FET activities shall support ambitious large-scale, science-driven research aiming to achieve a scientific breakthrough. Such activities will benefit from the alignment of European and national agendas.

*Remarks*

Research infrastructures activity will ensure the implementation and operation of the ESFRI (European Strategy Forum for Research Infrastructure) and other world-class research infrastructures, including the development of regional partner facilities, for 2020 and beyond. In addition, the integration of and access to national research infrastructures and the development, deployment and operation of e-infrastructure will be ensured. The activity will also encourage research infrastructures to act as early adopters of technology, promote research and development (R&D) partnerships with industry, facilitate industrial use of research infrastructures and stimulate the creation of innovation clusters.

**08 02 02** **Industrial leadership***Remarks*

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

*Remarks*

The aim of this activity is to help companies and other types of organisation engaged in research and innovation (R&I) to gain easier access, via financial instruments, to loans, guarantees, counter-guarantees and hybrid, mezzanine and equity finance. Debt and equity facilities will be run in a demand-driven manner, though the priorities of particular sectors or of other Union programmes will be targeted if top-up funding is made available. The focus is on attracting private investments into R&I. The European Investment Bank (EIB) and the European Investment Fund (EIF) will play an important role, as entrusted entities, in implementing each financial instrument facility on behalf of and in partnership with the Commission. Part of this appropriation will be used to reinforce, in the form of paid-in capital, the EIF's capital base.

*Remarks*

To support the participation of SMEs in Horizon 2020 a dedicated market-oriented instrument will be introduced, which will target all types of innovative SMEs that wish to develop, grow and internationalise. In addition, support will be provided to research intensive SMEs in transnational research projects and to women-led start-ups. Activities enhancing the innovation capacity of SMEs and improving the framework conditions for innovation will also be supported.

In accordance with Regulation (EU) No 1291/2013, support will be provided to innovation in SMEs through the implementation of an SME instrument under a single management system and implemented in a bottom-up manner. In accordance with Annex II of that Regulation within the target of allocating a minimum of 20 % of the total combined budgets for the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' for SMEs, a minimum of 5 % of those combined budgets will be initially allocated to the dedicated SME instrument. A minimum of 7 % of the total budgets of the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' will be allocated to the dedicated SME instrument averaged over the duration of Horizon 2020.

08 02 03 **Societal challenges**

Remarks

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level and take a gender-sensitive approach while aiming for balanced participation of men and women.

Remarks

Lifelong health and well-being for all, high-quality and economically sustainable health and care systems, and opportunities for new jobs and growth in the health sector and its related industries are the aims of this activity. To that respect activities will focus on effective health promotion and disease prevention (e.g. understanding the determinants of health, developing better preventive vaccines). Particular attention will be paid to gender- and age-related health specificities. In addition, emphasis will be placed on managing, treating and curing disease, disability and reduced functionality (e.g. by transferring knowledge to clinical practice and scalable innovation actions, better use of health data, independent and assisted living). Furthermore, efforts will be made to improve decision-making in prevention and treatment provision, identify and support the dissemination of best practice in the healthcare sector, and support integrated care and the uptake of technological, organisational and social innovations empowering in particular older persons as well as disabled persons to remain active and independent. Finally, activities will be based on a gender-sensitive approach that recognises, amongst other things, the position of women in both the informal and the formal care sector.

*Remarks*

Efforts to ensure a secure, clean and efficient energy supply will focus on reducing the Union's energy consumption and carbon footprint (for example through affordable systems and components incorporating smart technologies) and securing a low-cost, low-carbon electricity supply (for example through research, development and full-scale demonstration of innovative renewables and carbon capture and storage technologies). There will be a special focus on alternative fuels and mobile energy sources and on developing a single, smart European electricity grid. Activities will also focus on multidisciplinary research for energy technologies and joint implementation of pan-European research programmes and world-class facilities. Furthermore, tools, methods and models for robust and transparent policy support will be developed and market uptake of energy innovation will be promoted. 85 % of the budget appropriations will be allocated to the renewable and end-use energy efficiency policy areas, including smart grids, energy storage and smart cities and communities from 2014 onwards.

In acknowledgment of the essential role of end-user energy efficiency and renewable energy for furthering energy security in the Union, market uptake measures will be supported through an 'Intelligent energy Europe III' programme to build capacity, improve governance and overcome market barriers so that energy efficiency and renewable energy solutions can be rolled out. Part of the appropriations in the overall energy challenge budget will therefore be spent on market uptake activities for existing renewable and energy efficiency technologies within the programme, carried out by a dedicated management structure, and will include support for sustainable energy policy implementation, capacity building and mobilisation of financing for investment, in line with what has been done to date.

The focus will also be on reinforcing the competitiveness and performance of European transport manufacturing industries and related services, by, for instance, developing the next generation of innovative transport means and preparing the ground for the following one. Activities aiming at improving the understanding of transport-related socioeconomic trends and prospects, and at providing policymakers with evidence-based data and analyses will also be supported.

CHAPTER 08 02 — HORIZON 2020 — RESEARCH (*cont'd*)08 02 03 (*cont'd*)08 02 03 05 (*cont'd*)

Regulation (EU) No 1291/2013 of the European Parliament and of the Council of 11 December 2013 establishing Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020) and repealing Decision No 1982/2006/EC (OJ L 347, 20.12.2013, p. 104).

08 02 03 06 Fostering inclusive, innovative and reflective European societies

*Remarks*

The aim of this activity is to contribute to making European societies more inclusive, innovative and reflective, by promoting smart, sustainable and inclusive growth. Actions will support coordinated policymaking through the development of evidence, tools, forward-looking activities and pilots to increase transnational efficiency and economic impact of research and innovation policies and achieve a well-functioning European Research Area and Innovation Union. Actions will also aim at closing the innovation divide, ensuring societal engagement in research and innovation and fostering gender balance in research teams, promoting coherent and effective cooperation with third countries and developing an understanding of Europe's intellectual basis: its history and the many European and non-European influences, as an inspiration for our lives today.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services (CESES) and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. Accordingly, Union authorising officers are encouraged to make full use of the possibilities offered by the Financial Regulation, including CESES contributions-in-kind to Union projects.

## Remarks

The aim of those activities is to fully exploit the potential of Europe's talent pool and to ensure that the benefits of an innovation-led economy are both maximised and widely distributed across the Union in accordance with the principle of excellence. By nurturing and connecting pools of excellence, the activities proposed will contribute to strengthening the European Research Area.

The activities will focus on teaming of excellent research institutions and low-performing RDI regions aiming at the creation of new (or significant upgrade of existing) centres of excellence in low performing RDI Member States and regions, twinning of research institutions, establishing 'ERA Chairs', a Policy Support Facility to improve the design, implementation, and evaluation of national/regional research and innovation policies, supporting access to international networks for excellent researchers and innovators who lack sufficient involvement in European and international networks and strengthening the administrative and operational capacity of transnational networks of national contact points, including through training.

## Remarks

This appropriation covers actions of a horizontal nature, which support the implementation of Horizon 2020. This includes, for example, activities which aim to support communication and dissemination, as well as make use of results to support innovation and competitiveness. This may also entail cross-cutting activities involving several priorities of Horizon 2020.

FCH 2 JU's objective is to tackle a series of obstacles to the commercialisation of fuel cells and hydrogen technologies by reducing the cost of FCH systems, increasing their efficiency and demonstrating their feasibility, thus paving the way for a strong, sustainable and globally competitive fuel cells and hydrogen sector in the Union. This budget line is intended to cover the operational costs of the FCH 2 JU.

FCH 2JU shall contribute to the implementation of Horizon 2020, and in particular the specific objectives 'Secure, clean and efficient energy' and 'Smart, green and integrated transport' of the priority 'Societal challenges'.

*Remarks*

Ongoing discussions on the post-2015 global development framework have viewed universal health coverage (UHC) as a fundamental enabler for ending extreme poverty by 2030 and a crucial factor in completing the unfinished agenda of the health-related Millennium Development Goals (MDGs) — notably MDGs 4, 5 and 6 on improving maternal health, reducing child mortality, and combating HIV and AIDS, malaria and tuberculosis respectively.

It is also important to include neglected tropical diseases (NTDs) in the new development framework, in addition to the MDG 6 diseases and in line with the corresponding roadmap from the WHO ([http://whqlibdoc.who.int/hq/2012/WHO\\_HTM\\_NTD\\_2012.1\\_eng.pdf](http://whqlibdoc.who.int/hq/2012/WHO_HTM_NTD_2012.1_eng.pdf)) and other prominent expert organisations.

*Objectives*

This project will produce a study that quantifies the role of poverty-related and neglected diseases (PRND) R & D in contributing to UHC and improving the health situation in low- and middle-income countries. The study will:

- track Union investment in PRND R & D and assess how corresponding technologies are being translated into a resource for UHC,
- examine how the correlation between PRND R & D and UHC can be improved with regard to the post-2015 global development framework and develop recommendations for R & D indicators that help advance the impact of UHC.

Developing essential medicines for PRNDs that are safe, effective, affordable, accessible and of assured quality contributes to achieving UHC, and adequately investing in UHC is an effective way of guaranteeing that available services and products are also accessible and of a suitable standard of quality. This correlation will play a crucial role in the post-2015 global development framework, not only for ensuring healthy lives, but also for helping to reduce poverty.

*Remarks*

The aim of this two-stage preparatory action is to identify the barriers that impede the development of a truly optimised single European transport system and to propose a set of actions which, collectively, can help to accelerate progress. The action fully supports Union and Commission initiatives. It will:

- inform future policy development and research and innovation programmes, at both Union and national level,
- address one of the seven challenges on which Horizon 2020 is based, namely ‘Smart, green and integrated transport’,
- contribute to implementation of EU2020 flagship initiatives such as ‘increasing accessibility and clean transport’ and ‘promoting innovation and excellence’.

The examination stage will:

- identify stakeholders (industry, research, administrations, regulators and civil society), and their opinions, needs and expectations,
- describe the current state of the system: public policy (at all levels); industry structures; market and regulatory conditions; mechanisms for stakeholder collaboration; transport programmes,
- look at similar issues in other world regions and identify lessons to be learned,
- identify opportunities to improve Europe’s transport system as a whole and barriers preventing this.

The roadmap stage will suggest actions, endorsed by a cross-section of stakeholders, which can accelerate progress towards an optimised transport system. It will examine:

- what, if any, new organisation(s) might help, without simply duplicating existing structures,

**CHAPTER 08 02 — HORIZON 2020 — RESEARCH** (*cont'd*)**08 02 77** (*cont'd*)08 02 77 04 (*cont'd*)

- how to develop a stronger ‘whole system’ mindset at all levels,
- ways to encourage existing initiatives to pay more attention to their interactions with the rest of the system,
- potential policy initiatives at Union, Member State and local levels.

The end result will be an in-depth analysis of the opportunities for and barriers to achieving a fully optimised transport system across Europe, plus committed stakeholders from all sectors.

**CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS** (*cont'd*)*Remarks*

The Euratom research and training programme (2014-2018) ('Euratom programme') complements Horizon 2020 in the field of nuclear research and training. Its general objective is to pursue nuclear research and training activities with an emphasis on continually improving nuclear safety and radiation protection, notably to contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. By supporting this research, the Euratom programme shall reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership, and societal challenges.

The indirect actions of the Euratom programme are focused on two areas: nuclear fission, safety and radiation protection, and fusion research and development programme.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

**08 03 01** *Operational expenditure for the Euratom Programme**Remarks*

The scope of the Euratom programme for indirect actions includes nuclear fission safety and radiation protection as well as the fusion research and development which aim to ensure the success of the ITER project while enabling Europe to reap its benefits. It will reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership and societal challenges.

*Remarks*

The Euratom activity in the field of fusion will support common research activities undertaken by the fusion stakeholders involved in the implementation of the tasks derived from the fusion roadmap. In addition, it will support joint activities to develop and qualify materials for a demonstration power plant as well as to address reactor operation issues and develop and demonstrate all relevant technologies for a fusion demonstration power plant. The activity will also implement or support knowledge management and technology transfer from the research co-funded by this programme to industry, exploiting all innovative aspects of the research. Furthermore, the activity will support the construction, refurbishment, use and continued availability of key research infrastructures under the Euratom programme.

## Remarks

The Euratom activity in the field of nuclear fission will provide support to joint research activities concerning the safe operation of reactor systems in use or which may be used in the future in the Union. It will also contribute to the development of solutions for the management of ultimate nuclear waste. In addition, the activity will support joint and/or coordinated research activities, placing emphasis on the risks from low doses from industrial, medical or environmental exposure. Furthermore, Euratom fission will promote joint training and mobility activities between research centres and industry as well as between different Member and Associated States while it will provide support for maintaining multidisciplinary nuclear competences.

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS (*cont'd*)08 03 51 (*cont'd*)

Fusion research, which includes activities that range from basic research to technology development, construction of major projects and training and education activities. It offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. The realisation of the ITER project therefore lies at the heart of the present Union strategy. It must be accompanied by a strong and focused European research and development programme on fusion to prepare for the exploitation of ITER and to develop the technologies and knowledge base that will be needed during ITER operation and beyond.

Fission research, which aims to establish a sound scientific and technical basis in order to accelerate practical developments for the safer management of long-lived radioactive waste, to promote safer, more resource-efficient and cost-effective nuclear energy and to ensure a robust and socially acceptable system of protection of man and the environment against the effects of radiation.

*Remarks*

The ITER project aims to demonstrate fusion as a viable and sustainable source of energy by building and operating an experimental fusion reactor as a major step towards the creation of prototype reactors for fusion power stations that are safe, sustainable, environmentally responsible, and economically viable. It will contribute to the Europe 2020 strategy and in particular to its Innovation Union flagship initiative as the mobilisation of European high-tech industries, which are involved in the construction of ITER, should provide the Union with a global competitive advantage in this promising sector.

The project brings together seven parties: the European Union, China, India, Japan, South Korea, Russia, and the United States.

*Remarks**Former Article 08 04 01 (in part)*

The European Joint Undertaking for ITER and the Development of Fusion for Energy provides the contribution of the European Atomic Energy Community (Euratom) to the joint implementation of the international ITER project. ITER, a major experimental facility which will demonstrate the scientific and technical feasibility of fusion power, will be followed by the construction of a demonstration fusion power plant (DEMO).

This Joint Undertaking has the following tasks:

- to provide the contribution of Euratom to the ITER International Fusion Energy Organisation,
- to provide the contribution of Euratom to broader approach activities with Japan for the rapid realisation of fusion energy,
- to prepare and coordinate a programme of activities in preparation for the construction of a demonstration fusion reactor and related facilities.

*Remarks*

The Research Fund for Coal and Steel funds every year innovative projects to enhance the safety, efficiency and competitive edge of the Union coal and steel industries. It was created in 2002 to build on the successes of the European Coal and Steel Community. The distribution of the budgets between coal (27,2 %) and steel (72,8 %) is defined in Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

Remarks

This appropriation is intended to cover expenditure on a set of measures designed to:

- coordinate a better regulatory framework for competition, investment and growth over the entire range of issues in the e-communications field: economic analysis, impact assessment, policy development, regulatory compliance,
- carry out and review the Union's policy on electronic communication networks and services with a view to launching initiatives designed to meet the challenges in this dynamically evolving sector (convergence of electronic communication with audiovisual and content delivery),
- facilitate the implementation of the Digital Agenda for Europe, in actions related to broadband targets through regulation, policy and public financial assistance, including coordination with cohesion policy in the areas relevant to electronic communications networks and services,
- develop policies and coordination measures which will ensure that Member States implement their national broadband plans with reference to the fixed and mobile infrastructure and their possible convergence, including coherence and economic efficiency of public interventions at Union and Member State levels,
- develop policy and legislation with a particular focus on issues related to access and authorisation of e-communications networks and services notably interoperability, interconnection, civil works, independence of regulators and new measures to strengthen the single market,
- facilitate the monitoring and implementation of relevant legislation in all Member States,
- provide coordination of infringement proceedings, and input to relevant State aid matters,
- develop policy and legislation with a particular focus on issues related to retail and consumer issues notably net neutrality, switching, roaming, demand and use stimulation and universal service,
- develop and implement consistent market-based regulations to be applied by national regulatory authorities and to respond to individual notifications from those authorities, notably regarding relevant markets, competition and appropriate regulatory intervention, in particular for next generation access networks,
- develop policies across the board which will ensure that Member States manage all uses of spectrum, including the different internal market realms such as e-communications, broadband internet and innovation,

CHAPTER 09 02 — REGULATORY FRAMEWORK FOR THE DIGITAL AGENDA FOR EUROPE (*cont'd*)

09 02 01 (*cont'd*)

- promote and monitor the implementation of the regulatory framework for communication services (including the mechanism provided for in Article 7 of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive) (OJ L 108, 24.4.2002, p. 33),
- enable third countries to pursue a policy of opening up their markets to the same extent as in the Union,
- promote and monitor the implementation of the radio spectrum policy programme (Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7)).

The specific objectives of these measures are:

- the formulation of a Union policy and strategy in the field of communication services and networks (including convergence between electronic communications and audiovisual environments, aspects related to the internet, etc.),
- the development of radio spectrum policy in the Union,
- the development of activities in the mobile and satellite communications sector, particularly as regards frequencies, and demand stimulation,
- an analysis of the situation and the legislation adopted in these areas, as well as State aid decisions,
- an analysis of the financial state of play and investment intensities in the sector,
- the coordination of these policies and initiatives as regards the international environment (e.g. WRC, CEPT, etc.),
- the development of activities and initiatives in relation to the Digital Agenda for Europe,
- the development of activities and initiatives in relation to Cohesion Policy,
- the development and maintenance of the database in relation to the radio spectrum policy programme and other actions related to monitoring and the implementation of the programme.

These measures consist, *inter alia*, in preparing analyses and progress reports, consulting stakeholders and the public, preparing communications, legislative proposals and monitoring the application of legislation, and translations of notifications and consultations under Article 7 of the Directive 2002/21/EC.

This appropriation is intended to cover, in particular, contracts for analysis and expert reports, specific studies, evaluation reports, coordination activities, grants and the part-financing of certain measures.

In addition, this appropriation is also intended to cover expenditure on meetings of experts, communication events, membership fees, information and publications directly linked to the achievement of the objectives of the policy or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under *ad hoc* service contracts.

*Remarks*

This appropriation is intended to cover the staff and administrative expenditure of the European Union Agency for Network and Information Security (Titles 1 and 2), and operational expenditure relating to the work programme only (Title 3).

The Agency was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, the Agency will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

The Agency's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 16 of Commission Regulation (EC, Euratom) No 2343/2002 constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Pursuant to Article 208 of the Financial Regulation and the corresponding Articles of the framework Financial Regulation for each of the bodies set up by the Communities, the role of the European Parliament and the Council has been strengthened.

*Remarks*

This appropriation is intended to cover the Office's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme only (Title 3).

BEREC acts as a specialised and independent expert advisory body assisting the Commission and the national regulatory authorities in the implementation of the Union regulatory framework for electronic communications in order to promote a consistent regulatory approach across the Union. BEREC is neither a Union body nor has legal personality.

The Office is established as a Union body with legal personality, providing BEREC with professional and administrative support in carrying out the tasks conferred on it by Regulation (EC) No 1211/2009.

The Office must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

This appropriation is intended to cover the following measures:

- the implementation of the Directive 2010/13/EU of the European Parliament and of the Council of 10 March 2010 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the provision of audiovisual media services (Audiovisual Media Services Directive) (OJ L 95, 15.4.2010, p. 1),
- the monitoring of the evolution of the media sector, including pluralism and freedom of the media, and
- the collection and dissemination of economic and legal information and analysis concerning the audiovisual sector and converging media and content industries.

This appropriation is also intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

*Remarks*

This preparatory action follows on from 2013's successful pilot project. The proposed European Centre for Press and Media Freedom is a logical extension of the Charter of Fundamental Rights of the European Union and the European Charter on Freedom of the Press, acting as a single European-level 'drop-in centre' for journalistic organisations, individuals and media actors alleging violations of those charters. It will be the sole centre in Europe that monitors and documents any such violations. It will also sound the alarm in acute cases, for instance by organising support from foreign colleagues for journalists who need help. The centre will benefit from input from a wide range of sources, including academic centres, regional partners all over Europe and various journalistic organisations.

The centre will cover all Member States and the candidate countries.

This will complement existing actions supported by the Union budget. More specifically, the centre will be the practical hands-on counterpart of the academically oriented Centre for Media Pluralism and Media Freedom based at the European University Institute in Florence. It will, furthermore, benefit from the momentum created by the High Level Group on Media Freedom and Pluralism set up by the Commission and by the European Parliament's resolution of 21 May 2013 on the EU Charter: standard settings for media freedom across the EU.

*Remarks*

This preparatory action follows on from the pilot project financed in 2013 and 2014 by the European Parliament, the main purpose of which was to test and apply the Media Pluralism Monitor (MPM) developed in 2009 at the request of the Commission by a consortium of European universities.

The MPM pilot project is currently being carried out by the Centre for Media Pluralism and Media Freedom (CMPF) at the Robert Schuman Centre for Advanced Studies/European University Institute, an academic centre established in 2011 by the Commission as part of the Union's ongoing efforts to improve the protection of media pluralism and media freedom in Europe and to assess what action needs to be taken at European or national level to further those objectives. Under the pilot project, the CMPF is testing a streamlined version of the 2009 MPM on a representative sample of nine Member States: Belgium, Bulgaria, Denmark, Estonia, France, Greece, Hungary, Italy and the United Kingdom. Those countries were selected on the basis of objective criteria so as to ensure the highest degree of neutrality and to allow broad implementation in different circumstances.

## Remarks

Actions under this article shall contribute to the objectives of the Connecting Europe Facility laid out in Article 3 of Regulation (EU) No 283/2014.

COMMISSION

TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 03 — CONNECTING EUROPE FACILITY (CEF) — TELECOMMUNICATION NETWORKS (*cont'd*)09 03 01 (*cont'd*)

Actions under this article shall contribute to the broadband-related objectives of the Connecting Europe Facility through studies and programme support actions, in particular technical assistance, as defined in Article 2 of Regulation (EU) No 1316/2013.

Actions under this article shall typically be carried out through grants or procurement, either under direct management in the meaning of Article 58(1)(a) of the Financial Regulation or indirect management in the meaning of Article 58(1)(c) of the same Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Legal basis*

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular Article 5(2)(a) thereof.

Regulation (EU) No 283/2014 of the European Parliament and of the Council of 11 March 2014 on guidelines for trans-European networks in the area of telecommunications infrastructure and repealing Decision No 1336/97/EC (OJ L 86, 21.3.2014, p. 14), and in particular Article 6(9) thereof and Section 3 of the Annex thereto.

## CHAPTER 09 04 — HORIZON 2020 (cont'd)

*Remarks*

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014-2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of the Union and ensuring optimum use thereof.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European Cooperation in the field of Scientific and Technical Research will be entered in Item 6 0 1 6 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

**CHAPTER 09 04 — HORIZON 2020** (cont'd)

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 09 04 50 01.

Administrative appropriations of this chapter will be provided under Article 09 01 05.

**09 04 01** *Excellent science**Remarks*

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without predetermined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

## 09 04 01 01 Strengthening research in future and emerging technologies

*Remarks*

The specific objective is to foster radically new technologies by exploring novel and high-risk ideas building on scientific foundations. By providing flexible support to goal-oriented and interdisciplinary collaborative research on various scales and by adopting innovative research practices, the aim is to identify and seize opportunities of long-term benefit for citizens, the economy and society.

Activities under the 'Future and Emerging Technologies' specific objective shall address the entire spectrum of science-driven innovation: from bottom-up, small-scale early explorations of embryonic and fragile ideas to building new research and innovation communities around transformative emerging research areas and large and federated research initiatives built around a research agenda aiming to achieve ambitious and visionary goals.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

*Remarks*

The specific objective is to endow Europe with world-class research infrastructure which is accessible to all researchers in Europe and beyond and fully exploit their potential for scientific advance and innovation.

Activities will focus on development, deployment and operation of e-infrastructure. In addition, activities for innovation, strengthening human resources for research infrastructure, policy development and international cooperation are foreseen.

An integrated and service-driven approach will be taken to deliver e-infrastructures that respond to the needs of European science, industry and society in terms of development and deployment of integrated e-infrastructure services for a wide range of research communities (de-siloing). Maximising coordination and synergies with e-infrastructure development at national level and expanding e-infrastructure beyond science as such, to the science-industry-society triangle.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

**09 04 02** **Industrial leadership***Remarks*

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

*Remarks*

The specific objective is to maintain and build global leadership in enabling technologies, which underpin competitiveness across a range of existing and emerging industries and sectors. In line with the Digital Agenda for Europe, the specific objective of ICT research and innovation is to enable Europe to develop and exploit the opportunities brought by ICT progress for the benefits of its citizens, businesses and scientific communities.

ICT underpins innovation and competitiveness across a broad range of private and public markets and sectors, and enables scientific progress in all disciplines. Over the next decade, the transformative impact of digital technologies, ICT components, infrastructures and services will be increasingly visible in all areas of life.

Activities will strengthen the Union's scientific and technology base and insure its global leadership in ICTs, help drive and stimulate innovation through ICT use and ensure that ICT progress is rapidly transformed into benefits for Europe's citizens, businesses, industry and governments. The activities under the 'Leadership in information and communications technology' specific objective will be primarily based on research and innovation agendas defined by industry and business, together with the research community and will have a strong focus on leveraging private sector investment.

09 04 03 **Societal challenges***Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test-beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

*Remarks*

The vision of the eHealth Action Plan 2012-2020 is to utilise and develop e-health to address several of the most pressing health and health systems challenges of the first half of the twenty-first century, namely:

- to improve chronic disease and multimorbidity (multiple concurrent disease) management and to strengthen effective prevention and health promotion practices,

**CHAPTER 09 04 — HORIZON 2020** (*cont'd*)**09 04 03** (*cont'd*)09 04 03 01 (*cont'd*)

- to increase the sustainability and efficiency of health systems by unlocking innovation, enhancing patient-/citizen-centric care and citizen empowerment and encouraging organisational changes,
- to foster cross-border healthcare, health security, solidarity, universality and equity,
- to improve legal and market conditions for developing e-health products and services.

ICT-based products and services have demonstrated their capacity to help address these major challenges in the form of personalised health, telehealth and telecare solutions, service robotics for health and care, support for prolonged active and independent living and home-based care. It is also a major new growth opportunity as large new markets for ICT-based products and services emerge to address health, demographic change and well-being.

Activities will cover development and exploitation of ICT for health, well-being and ageing well solutions. This will build on the emergence of underpinning technologies arising out of ICT in LEIT such as micro-nano systems, embedded systems, robotics, Internet of the future and cloud technologies. It will also build on further development of security- and privacy-enhancing technologies.

The ambient assisted living research and development joint programme will also be supported to contribute to market availability and exploitation of ICT-based products and services and the ICT innovation and pilot projects will be further supported in response to the European Innovation Partnership on Active and Health Ageing and the eHealth 2020 action plan.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services — CESES — and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. For that to be achieved, Union authorising officers are encouraged to make full use of the possibilities offered by the new Financial Regulation, including CESES contributions in kind to Union projects.

*Remarks*

The specific objective is to foster inclusive, innovative and reflective European societies in a context of unprecedented transformations and growing global interdependencies.

Activities will cover four main areas: ICT-enabled public sector innovation, understanding and preserving Europe's intellectual basis, learning and inclusion.

ICT-enabled public sector innovation refers to the use of ICT for the creation and implementation of new processes, products, services and methods of delivery which result in significant improvements in the efficiency, effectiveness and quality of public services. The future public administrations should be digital and cross-border by default. Activities cover fostering efficient, open and citizen-centric public services, involving the public sector as an agent for innovation and change as well as cross-border innovation measures or seamless delivery of public services.

The aim of the second challenge is 'to contribute to an understanding of Europe's intellectual basis: its history and the many European and non-European influences; as an inspiration for our lives today'.

The aim of the third challenge is to support the widespread adoption of ICT in schools and for training in Europe.

The fourth challenge is to get the elderly (aged 65 and above), the unemployed and low educated, migrants, people in need of care, people living in remote or poorer areas, persons with disabilities, and the homeless to fully participate in society. Activities focus on empowering them with the necessary digital skills and providing them with access to digital technologies.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

*Remarks**New item*

The specific objective is to secure societies, protecting freedom and security of the Union and its citizens.

The integrated portfolio of activities will develop solutions to protect our society and economy against accidental or man-made disruptions of the information and communication technologies our society and economy depends on; providing solutions for end-to-end secure ICT systems, services and applications; safeguarding the human right of privacy in the digital society; providing the incentives for the industry to supply secure ICT; stimulating the uptake of secure ICT. The aim is to ensure cyber security, trust and privacy in the Digital Single Market, whilst at the same time improving the competitiveness of the Union's security, ICT and service industries. Another objective is to increase users' trust in their participation in the digital society, and overcome citizens' concern with the disclosure of their personal information online because of security issues (e.g. internet usage for banking or purchases).

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

At a time when unemployment among the new generations is alarming, Europe must become an innovation-driven society in order to get back on the growth path. For this purpose, it is necessary to create new technologies and to reinvent the ways Union citizens can acquire, transfer and co-construct knowledge. Higher education and research are rapidly evolving. Creating new knowledge technologies requires training teachers, students and researchers alike as well as any individual who needs to adapt to new market demands. Given the ever-growing flow of data, a capacity is needed to empower Union citizens to access content and to learn anywhere and anytime in an open collaborative learning ecosystem. Many endeavours, such as citizen science, scientific discovery games and massive open online courses (MOOCs), show that — like many other sectors — education and research are rapidly evolving. Europe can only catch up and take the lead provided it invests in the next generation of tools and in the coming generations of individuals willing to reinvent learning, teaching and research tools.

The initiative 'Opening up education' proposed by the Commission aims at creating the basis for a stronger exploitation of ICT in education. The goal is to make access to education easier and increase efficiencies in learning through sharing and opening content to all individuals. While this initiative aims at making content available, there is still a need for mapping and certifying the knowledge acquired.

## CHAPTER 09 04 — HORIZON 2020 (cont'd)

09 04 77 (cont'd)

09 04 77 01 (cont'd)

Given the current youth unemployment that coexists with a lack of skilled workers in many Members States, the Union clearly lacks an essential component to fill this knowledge gap. The interests and the current knowledge of individuals should be matched not only with the most-demanded labour market skills but also with the possible learning roadmaps that can help them acquire the required knowledge and skills.

In order to fully exploit the potential of this new type of learning system for the labour market, methods are needed that are able to validate the quality of their learning. Consequently, a mechanism has to be found that allows individuals to assess their competencies (create their individual knowledge map), the knowledge required on the labour market and the learning path that can link the two, hence providing the right content to each individual. Only by doing so, can it be assured that the right content is available to the right target group of individuals. In order to be able to track the learning path, a validation of the acquired knowledge, possible through online certificates or badges must be made available.

This type of social and technological innovations can benefit all citizens regardless of their level of resources, the languages they speak, their age, their health or their cultural capital. Such a project will thus contribute to bridging the knowledge gap and reducing unemployment by helping especially the young currently unemployed to maximise their learning and find new career opportunities.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project proposal aims at testing well-being and healthcare service applications in open access FTTH networks. The future delivery of well-being and healthcare services is to rely on FTTH-based solutions, and the realisation of a full-scale high-speed e-health solution would contribute in achieving one of the targets of the Digital Agenda for Europe.

The project will explore, identify and test new and existing e-health applications to improve profitability and usability of services. The project aims, for instance, to evaluate patient empowerment and ability of well-being and healthcare professionals to share digital patient information. Open access FTTH networks have the potential to carry out a range of e-health solutions, e.g. personal health information management, patient in-home monitoring, sending X-rays from the central hospital to the rural area medical centre, and tele-physiotherapy.

## CHAPTER 09 04 — HORIZON 2020 (cont'd)

09 04 77 (cont'd)

09 04 77 02 (cont'd)

The project is to be implemented in rural regions with long distances and with already existing cooperative-based FTTH networks that operate in a real open access principle. Such network exists for instance in Southern Ostrobothnia. Being distant from the physical service providers and having demographic challenges, rural areas should be especially targeted when providing electronic well-being and healthcare solutions in the future.

FTTH is the most advanced technology to support specific well-being and healthcare service applications with fast symmetric connections and low latencies, notably by providing high speeds both downstream and upstream. Most importantly, the open access model enables all service providers to offer their services in the same fibre for free. This fair competition is considered to improve the promotion of services, value for money and accessibility.

This pilot project is unique and not redundant or in conflict with any national or Union programmes. The deployment of broadband networks is not the focus of this pilot project, and therefore it is not overlapping with the existing national or Union programmes of deployment of broadband in Member States.

The duration of this pilot project is two years.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project aims to accelerate the full use of Europe's intellectual capital to the benefit of citizens, entrepreneurs and scientists through new media tools.

The aim is to develop an e-infrastructure based on the concepts of social networks, to promote direct communication between researchers, businesses and media within the European Research Area (ERA).

Beginning from the strategic areas around the priority 'Societal challenges', as outlined in Europe 2020 strategy, the pilot project will support the creation of virtual clusters on these key themes creating a direct way for open dialogue between science and society.

**CHAPTER 09 04 — HORIZON 2020** (*cont'd*)**09 04 77** (*cont'd*)09 04 77 03 (*cont'd*)

The pilot project will promote active interaction between science, citizens and policymakers through the involvement of European media and social media, in order to support participation of citizens in research agenda setting, ongoing research processes, as well as in discussions on the results and impacts of research for society, policy and further research.

The objectives of the pilot project are:

- to develop a reliable, non-profit e-infrastructure (similar to social networks) as basic tool to promote stronger communication and dialogue across disciplines, sectors and borders,
- to integrate identity security of researchers and other actors to ensure a reliable and secure environment,
- to connect to existing research databases ensuring a single access point to research results from all countries and disciplines (interoperability) connecting also to existing European initiatives,
- to create virtual clusters on the topics of the 'societal challenges' that bring together researchers, industry, media and policymakers to enhance collaborations on these key themes, starting from the existing European collaborations and creating an easy and useful tool to facilitate dialogue and collaborations,
- to create a direct dialogue between these virtual clusters (see fourth indent) and citizens through the connection to leading European media.

The project intends to respond to some of the needs and concerns outlined in the Digital Agenda for Europe and Horizon 2020.

Current issues that the project will address: recent ICT developments have shown how the power of social networks and e-infrastructures can help harness the potential of networks.

In fact the problems of the existing online environment for research e-infrastructures are:

- size: the majority of existing networks are too small to go beyond the specific field and research group (according to Commission statistics, the average size of an online network of researchers is around 100 users). A large interoperable network is needed that allows researchers and other stakeholders to find the information they are looking for across sectors and disciplines with a familiar tool,
- reach: traditionally, networks bring together users within the same field and sector. In order to unlock the innovation capacity of Europe, the creation of transdisciplinary (inter-sectorial and inter-disciplinary) connections needs to be made easier,
- reliability: one of the major reasons why big networks in research have not been successful is that existing relations are still based on personal connection and the identities on online networks are not trusted. In order to really foster transdisciplinary connections, a system is needed where the identity verification creates a secure environment for all users engaged,

- trust: a pivotal aspect for any network is trust. Based on market studies a European social network/e-infrastructure would need to be developed in collaboration with the different stakeholders, be non-profit and have a clear IP policy developed together with researchers.

### DIRECT RESEARCH

#### *Remarks*

These remarks apply to all the budget lines in the 'Direct research' policy area (with the exception of Chapter 10 05).

These appropriations are intended to cover expenditure relating to:

- staff occupying posts on the authorised establishment plan of the Joint Research Centre (JRC) and external personnel implementing the Research and Innovation programmes,
- staff-related costs such as missions, training, medical services and recruitment,
- operation and functioning of the JRC institutes, administrative support, safety and security of the sites, IT related expenditure, non-recurrent costs and major research infrastructures,
- research and support activities including exploratory research, scientific and technical equipment, subcontracting of services, etc.,
- research and scientific support tasks relating to activities entrusted to the JRC within the framework of its participation on a competitive basis in support of the Union's policies and on behalf of outside bodies.

In accordance with Article 21 of the Financial Regulation, any revenue entered in Items 6 2 2 4 and 6 2 2 5 of the statement of revenue may give rise to the provision of additional appropriations.

Miscellaneous revenue may give rise to the provision of additional appropriations to be used in Chapters 10 02, 10 03 or 10 04 or Article 10 01 05, depending on their purpose.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

The additional appropriations will be provided under Items 10 02 50 01 and 10 03 50 01.

TITLE 10 — DIRECT RESEARCH

CHAPTER 10 01 — ADMINISTRATIVE EXPENDITURE OF THE 'DIRECT RESEARCH' POLICY AREA (*cont'd*)10 01 05 (*cont'd*)

In accordance with Article 21 of the Financial Regulation, any revenue entered in Items 6 0 1 3 and 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations.

The appropriations could be supplemented by appropriations that the Joint Research Centre will earn by participating on a competitive basis in indirect actions and in scientific and technical activities in support of Union policies. The activities of a competitive nature conducted by the JRC shall consist of:

- activities carried out following grant or procurement procedures,
- activities on behalf of third parties,
- activities undertaken under an administrative agreement with other institutions or other Commission departments for the provision of technical-scientific services.

*Remarks*

This appropriation is intended to cover expenditure relating to officials and temporary staff occupying posts on the authorised establishment plan of the Joint Research Centre implementing research and innovation programmes — Horizon 2020, and in particular:

- direct action, consisting of research activities, scientific and technical support activities, and exploratory research activities undertaken in the establishments of the Joint Research Centre,
- indirect action, consisting of programmes implemented as part of the Joint Research Centre's activities conducted on a competitive basis.

Staff costs comprise the basic salary, allowances, miscellaneous indemnities and contributions based on the statutory provisions, including expenses related to the entry into service, change in the place of employment and termination of service.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

## Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the Framework Programme for research and innovation which covers the 2014-2020 period.

**CHAPTER 10 02 — HORIZON 2020 — DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC) IN SUPPORT OF UNION POLICIES**  
(cont'd)

Horizon 2020 shall play a central role in the delivery of the Europe 2020 strategy for smart, sustainable and inclusive growth ('Europe 2020 strategy') by providing a common strategic framework for the Union's funding of excellent research and innovation, thus acting as a vehicle for leveraging private and public investment, creating new job opportunities and ensuring Europe's long-term sustainability, growth, economic development, social inclusion and industrial competitiveness, as well as addressing societal challenges across the Union.

This appropriation is intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre in accordance with Part VI of the Specific Programme Implementing Horizon 2020 'Non-nuclear direct actions of the Joint Research Centre (JRC)', in order to provide customer-driven scientific and technical support to Union policies. The JRC shall focus on:

- excellent science: the JRC will carry out research to enhance the scientific evidence base for policy making and to examine emerging fields of science and technology, including through an exploratory research programme,
- industrial leadership: the JRC will contribute to competitiveness in the Union through support to the standardisation process and standards with pre-normative research, development of reference materials and measurements, and harmonisation of methodologies in five focal areas (energy; transport; the flagship initiative 'Digital Agenda for Europe'; security and safety; consumer protection). It will carry out safety assessments of new technologies in areas such as energy and transport and health and consumer protection. It will contribute to facilitating the use, standardisation and validation of space technologies and data, in particular to tackle societal challenges,
- societal challenges: the JRC will carry out research on the following themes: health, demographic change and well-being; food security, sustainable agriculture and forestry, marine, maritime and inland water research and the bio-economy; secure, clean and efficient energy; smart, green and integrated transport; climate action, environment, resource efficiency and raw materials; Europe in a changing world — inclusive, innovative and reflective societies; secure societies — protecting freedom and security of Europe and its citizens.

## Remarks

The Research and Training Programme on European Atomic Energy Community (2014-2018) (Euratom Programme) is an integral part of Horizon 2020, the Framework Programme for Research and Innovation. The Euratom Programme will strengthen the research and innovation framework in the nuclear field and coordinate Member States' research efforts, thereby avoiding duplication, retaining critical mass in key areas, and ensuring public funding is used in an optimal way.

COMMISSION

TITLE 10 — DIRECT RESEARCH

**CHAPTER 10 03 — EURATOM PROGRAMME — DIRECT ACTIONS** (*cont'd*)

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The general objective of the Euratom Programme is to pursue nuclear research and training activities with an emphasis on continuous improvement of nuclear safety, security and radiation protection, in particular to potentially contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. It will cover both RTD indirect actions on the fusion research and development, nuclear fission, safety and radiation protection research activities, as well as the JRC direct actions in nuclear security and safety. The JRC will provide independent customer-driven scientific and technological support for the implementation and monitoring of Community policies, in particular in the field of nuclear safety and security research and training. By achieving these objectives, the Euratom Programme will reinforce outcomes under the three priorities of the Horizon 2020 Framework Programme: excellent science, industrial leadership and societal challenges. These objectives are clearly linked to those of the Europe 2020 and Energy 2020 strategies and the creation and operation of the European Research Area.

*Remarks*

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre to implement the Research and Training Programme of the European Atomic Energy Community (2014-2018). Direct actions under the Euratom Programme shall have the following specific objectives:

- to improve nuclear safety including: nuclear reactor and fuel safety, waste management, including final geological disposal as well as partitioning and transmutation; decommissioning, and emergency preparedness,
- to improve nuclear security including: nuclear safeguards, non-proliferation, combating illicit trafficking, and nuclear forensics,
- to increase excellence in the nuclear science base for standardisation,
- to foster knowledge management, education and training,
- to support the policy of the Union on nuclear safety and security.

This appropriation also addresses the activities necessary for implementing safeguards pursuant to Chapter 7 of Title II of the Euratom Treaty and the obligations arising from the Non-Proliferation Treaty and implementation of the Commission's programme to support the International Atomic Energy Agency (IAEA).

It covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information, acquisition of consumables, etc. This includes expenditure on scientific infrastructure directly incurred for the projects concerned.

## Remarks

This article is intended to receive the appropriations required for expenditure specific to the various tasks performed on behalf of outside bodies. It includes research and supply of services under contract to third parties, such as industry, national or regional authorities, as well as contracts in the context of Member States' research programmes. This may cover the following:

- the provision of supplies, services and work carried out in general against payment, including certified reference materials,
- the operation of facilities for the benefit of Member States, including the irradiation for outside bodies in the high-flux reactor (HFR) at the Petten establishment of the Joint Research Centre,
- the performance of research activities and the provision of services additional to the specific research programmes, including the industrial clubs for which the partners from industry must pay an enrolment fee and annual subscriptions,

**CHAPTER 10 04 — OTHER ACTIVITIES OF THE JOINT RESEARCH CENTRE** (*cont'd*)**10 04 02** (*cont'd*)

— cooperation agreements with third parties.

In accordance with Article 21 of the Financial Regulation, any revenue entered in Items 6 2 2 3 and 6 2 2 4 of the statement of revenue may give rise to the provision of additional appropriations.

Additional appropriations will be provided for this article, in accordance with Article 21 and Article 183(2) of the Financial Regulation, to cover specific expenditure for each contract with an outside body to the amount of the revenue to be entered in Item 6 2 2 3 of the statement of revenue.

*Remarks*

This appropriation is intended to cover part of expenses of any kind incurred during the implementation of the high flux reactor (HFR) supplementary programme.

The scientific and technical objectives of the supplementary programme are the following:

- to provide a safe, steady and reliable neutron flux for experimental purposes,
- to perform research and development on: material and fuel science for the improvement of the safety of existing nuclear and future reactors (both fission and fusion); radioisotopes for medical applications, reactor ageing and life management, and on waste management,
- to act as a training facility hosting doctoral and post-doctoral fellows in performing their research activities through national or European programmes.

In accordance with Article 21 of the Financial Regulation, this item will, in the course of the financial year, be provided with additional appropriations within the limits of the revenue from the Member States concerned (currently the Netherlands, Belgium and France) to be entered in Item 6 2 2 1 of the statement of revenue.

It may, in particular, be used to cover:

- expenditure incurred on external personnel at headquarters (contract agents, seconded national experts or agency staff) up to EUR 850 000, including support expenditure (representation expenses, training, meetings, missions relating to the external personnel financed under this line) required for the implementation of the EMFF and the completion of measures under its predecessor the European Fisheries Fund (EFF) relating to technical assistance,
- expenditure on external personnel (contract staff, local staff or seconded national experts) in the Union's delegations in third countries, as well as additional logistical and infrastructure costs, such as the cost of training, meetings, missions and renting of accommodation directly resulting from the presence in delegations of external personnel remunerated from the appropriations entered in this item,
- expenditure on mission by third country delegations attending meetings to negotiate fisheries agreements and joint committees,
- expenditure on studies, evaluation measures and audits, meetings of experts and the participation of stakeholders in ad hoc meetings, seminars and conferences pertaining to major topics, information and publications in the field of maritime affairs and fisheries,
- expenditure on information technology (IT) covering both equipment and services,
- participation of scientific experts in meetings of Regional Fisheries Management Organisations,
- any other expenditure on non-operational technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation may also cover expenditure for preparatory, monitoring, administrative and technical support, evaluation, audit and inspection measures related to fisheries market intervention previously financed under the common agricultural policy in accordance with Article 5(a) to (d) of Regulation (EC) No 1290/2005.

TITLE 11 — MARITIME AFFAIRS AND FISHERIES

CHAPTER 11 06 — EUROPEAN MARITIME AND FISHERIES FUND (EMFF) (*cont'd*)*Remarks*

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections, any revenue from which is entered in Item 6 5 0 0 of the statement of revenue. That revenue may give rise to the provision of additional appropriations, in accordance with Article 21 of the Financial Regulation, in specific instances where they are necessary to cover risks of cancellation or of reductions in corrections previously decided upon.

Regulation (EC) No 1260/1999 determines the conditions for repayment of an advance without having the effect of reducing the contribution from the Structural Funds towards the assistance concerned. Any revenue from the repayment of advances entered in Item 6 1 5 7 of the statement of revenue will give rise to the provision of additional appropriations in accordance with Articles 21 and 178 of the Financial Regulation.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the EMFF.

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with Article 21(3)(c) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Measures to combat fraud are funded under Article 24 02 01.

## Remarks

This appropriation is intended to cover the financing of the commitments remaining to be settled from earlier programming periods relating to EFF technical assistance measures as provided for in Article 46 of Regulation (EC) No 1198/2006. The technical assistance measures include studies, evaluations, measures aimed at the partners, measures to disseminate information, installation, operation and interconnection of computerised systems for the management, monitoring, audit, inspection and evaluation, improvements in evaluation methods and the exchange of information on practices in this field and the establishment of trans-national and Union networks of actors in the sustainable development of coastal fishing zones.

Technical assistance covers preparatory, monitoring, audit, evaluation, supervision and management measures required to implement the EFF.

This appropriation may, in particular, be used to cover:

- support expenditure (representation expenses, training, meetings, missions),
- information and publishing expenditure,
- expenditure on information technology and telecommunications,
- contracts for the provision of services,
- support for networking and exchange of best practices.

*Remarks*

This appropriation is intended to cover the payments for actions of the 2007 to 2013 period and relating to the expenditure incurred by Member States in implementing the monitoring and control systems applicable to the common fisheries policy for:

- investments relating to control activities carried out by administrative bodies or by the private sector including implementation of new control technologies such as electronic recording systems (ERS), vessel monitoring systems (VMS), automatic identification systems (AIS) connected with vessels detection systems (VDS) and the purchase and modernisation of control means,
- training and exchange programmes for civil servants responsible for monitoring control and surveillance tasks in the fisheries area,
- implementation of pilot inspection and observer schemes,
- cost/benefit analysis, assessment of expenditure and audits incurred by competent authorities in carrying out monitoring, control and surveillance,
- initiatives, including seminars and media tools, aimed at enhancing awareness both among fishermen and other players such as inspectors, public prosecutors and judges, and among the general public of the need to fight irresponsible and illegal fishing and on the implementation of the rules of the common fisheries policy,
- implementation of systems and procedures to enable traceability and instruments to control fleet capacity through the monitoring of engine power,
- pilot projects such as CCTV (closed circuit television).

This appropriation is also intended to cover the control actions under direct management included in the EMFF:

- joint purchase and/or chartering by several Member States belonging to the same geographical area, of patrol vessels, aircrafts and helicopters, provided they are used at least 60 % of the time for fisheries control,
- assessment and development of new control technologies, as well as processes for the exchange of data,
- operational expenditure related to control and evaluation by the Commission of the implementation of the common fisheries policy, in particular verification, inspection and audit missions, equipment and training for Commission officials, the organisation of or participation to meetings, including the exchange between Member States of information and best practices, studies, IT services and suppliers, and the charter or purchase by the Commission of inspection means as specified in Title X of Regulation (EC) No 1224/2009,

The Commission will continue supporting the functioning of the ACs with a financial contribution. It will participate in meetings when appropriate and analyse the recommendations issued by the ACs which may provide an input when drafting legislation. Through the consultation of stakeholders in the (R)ACs, the involvement of people working in fisheries and other interest groups in the common fisheries policy process will be strengthened, so that greater account of specific regional characteristics is taken.

Part of the appropriation is earmarked also for information and communication activities linked to the common fisheries policy and the integrated maritime policy as well as for communication activities addressed to the interested parties. Efforts will continue to be made to inform the stakeholders and the specialised media in the new Member States as well as in the candidate countries about the common fisheries policy and the integrated maritime policy.

Any revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

This appropriation is intended to cover the costs for the development and dissemination of market intelligence for fishery and aquaculture products. Specific actions include, inter alia:

- the full operation of the Market Observatory,
- gathering, analysing and disseminating economic knowledge and understanding of the Union market for fishery and aquaculture products along the supply chain, taking into account the international context,
- regular price surveys along the Union supply chain for fishery and aquaculture products and the conduct of analyses on market trends,
- provision of ad-hoc market studies and a methodology for price formation surveys,
- facilitating access to available data on fishery and aquaculture products collected pursuant to the Union legislation,
- making market information available to the adequate level to stakeholders.

Remarks

This appropriation is intended to cover EMFF technical assistance measures as provided for in Article 92 of Regulation (EU) No 508/2014.

Technical assistance covers preparatory, monitoring, audit, evaluation, supervision and management measures required to implement the EMFF.

It may, in particular, be used to cover:

- studies, evaluations and expert reports,
- actions to disseminate information, support networking, carry out communication activities, raise awareness and promote cooperation and exchange of experience, including with third countries,
- the installation, operation and interconnection of computerised systems for management, monitoring, audit, control and evaluation,
- actions to improve evaluation methods and the exchange of information on evaluation practices,
- actions related to audit,
- the establishment of trans-national and Union networks of actors in the sustainable development of coastal fishing zones.

It is intended to be used to:

- assess the feasibility for making the best possible use of active fishing vessels which need to be decommissioned from the Union fleet and of fishermen's experience and practical know-how to benefit both of the fishermen themselves and society at large,
- test under close to real-life conditions the technical and economic viability of redeploying — from fishing to maritime activities — individuals who have been active in the sector as crew members and who can no longer make their living from fishing and possess maritime experience and knowledge at risk of being lost in case alternative sources of income are sought in land-based activities,
- test under close to real-life conditions the feasibility of converting fishing vessels into vessels operating as a platform for a number of environmental and maritime activities outside fishing, in particular collecting marine litter,
- identify under close to real-life conditions the necessary operating costs of a vessel operating under such conditions and the potential sources of funding; however, any such funding should be limited to supporting the start-up of activities that are self-sustaining in the long term,

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This appropriation is intended to finance support measures for small-scale fishing which will help coordinate actions and channel funds from other instruments, with a view to dealing with the specific problems in this part of the fisheries sector.

The pilot project involves:

- analysing the Union's small-scale fishing sector,
- identifying the Union instruments and funding sources that could be used by this sector,
- establishing the uses to which the instruments, actions, measures and funding available are being put by the small-scale fishing sector,
- analysing the extent to which existing instruments can meet the needs of the small-scale fishing sector and, on the basis of that analysis, proposing any adjustments that may be necessary,
- supporting fishermen's groups, professional organisations and NGOs associated with small-scale fishing, with a view to their coordination, preparation and participation in advisory councils.

The intention is to lay the foundations for an Union support programme for small-scale inshore fishing and artisanal fishing which will help coordinate actions and channel funds from other instruments, with a view to dealing with the specific problems in this sector of the fishing industry.

Remarks

Objectives

Fishing communities in the outermost regions (ORs) are facing unique and atypical challenges. In response to those challenges, new fishing techniques have developed separately in different ORs. This pilot project will, by involving local fishing communities and stakeholders, explore the feasibility of transferring new fishing techniques from OR to OR.

The main objective is to encourage and share best practices, which may involve new low-environmental-impact fishing techniques, and promote offshore experimental fishing.

By doing this it may be possible to identify viable alternatives which allow the small-scale fishing sector to move its inshore fishing effort offshore, thus reducing fishing pressure on coastal resources. This may allow fishermen in ORs to maintain traditional fishing activities while moving to more environment-friendly and economically viable techniques.

This will also improve the supply to local markets of good-quality fish produced in situ, resulting in associated benefits for the tourism sector, and reduce the need for imports.

Specifications

The fishing practices to be developed in one or more ORs must be new to the region concerned. They could, however, be mature in another region but never have been introduced in the ORs in question. Exchange of good fishing practice among operators is key to success.

Fishing practices must have a low environmental impact, in that the techniques themselves must be environment-friendly and the fishing operations must be small in scale.

The project will involve an initial feasibility study, exchanges of views among experts from different regions and fishing trials involving scientific experts. The expected deliverable is a report detailing the technical aspects of the innovative fishing practices concerned, together with the yields obtained in the experimental trials. This will facilitate the transition towards viable alternative fishing practices for the ORs' small-scale fleets.

The report will also assess the potential investment needed (for example, in new gears) and assess the economic viability for fishermen to use the innovative fishing practices. As appropriate, synergies with the European Maritime and Fisheries Fund may be included in this assessment.

*Explanation*

All this points to the need to find fish further offshore or in new resources. In some ORs, such as the Azores and Madeira, offshore fishing is well developed and targeted at deep-water resources and, to some extent, large migratory fish, mainly using hook-and-line techniques with a very low environmental impact. In other ORs, particularly French ORs, techniques have been developed to fish for large migratory fish with anchored fish aggregating devices (FADs). Although some trials have been carried out, fishing for deep-water resources in French ORs has yet to be properly developed, and the know-how of the experts from the Azores and Madeira would be beneficial there. Similarly, while fishing over anchored FADs is well developed in French ORs, it is not in the Portuguese and Spanish ORs. Exchanges of fishing practices and experimental trials could be the starting point for adapting these techniques and using them more widely.

*Legal basis*

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

TITLE 12 — INTERNAL MARKET AND SERVICES

CHAPTER 12 02 — A SINGLE MARKET POLICY AND FREE MOVEMENT OF SERVICES (*cont'd*)12 02 01 (*cont'd*)*Remarks*

This appropriation is intended to cover expenditure arising in connection with measures contributing to the completion of the internal market and its operation and development, and measures contributing, in particular, to:

- greater proximity to citizens and businesses, including the development and strengthening of dialogue with citizens and businesses: via measures intended to make the operation of the internal market more effective, and to ensure that citizens and businesses are able to gain access to the most extensive rights and opportunities, resulting from the opening up and deepening of the internal market without borders and are able to exercise those rights and opportunities in full; and via monitoring and evaluation measures relating to the practical exercise by citizens and businesses of their rights and opportunities with a view to identifying and facilitating the removal of any obstacles which may be preventing them from exercising those rights in full,
- implementing and monitoring the provisions governing public contracts with a view to ensuring their optimum operation and that tenders are genuinely open, including the awareness-raising and training of the various parties to these contracts; the introduction and use of new technologies in the various fields of operation of these contracts; the continuous adaptation of the legislative and regulatory framework in the light of developments arising from these contracts, particularly the globalisation of markets and existing or future international agreements,
- improvement, through the European business test panel (EBTP), of the legal environment for citizens and businesses, for which promotion activities, awareness-raising and training actions could be envisaged; fostering cooperation, development and coordination of legislation in the field of company law and assistance with the creation of European limited companies and European economic interest groupings,
- strengthening administrative cooperation through, inter alia, the Internal Market Information System (IMI), the deepening of knowledge of internal market legislation in the Member States and its sound application by them, and support for administrative cooperation between the authorities responsible for implementing legislation relating to the internal market with a view to achieving the Lisbon strategic goals as set out in the annual policy strategy,
- the setting-up of a system that can effectively and efficiently deal with problems faced by citizens or businesses, arising from the misapplication of internal market legislation by a public administration in another Member State; production of feedback information through the Solvit system by means of an online database system which is accessible to all coordination centres and which will also be made accessible to citizens and businesses; support for the initiative through training measures, promotion campaigns and targeted actions with a particular focus on the new Member States,
- interactive policymaking, in so far as it concerns the completion, development and operation of the internal market, makes up part of the Commission's governance and of the regulatory policy initiatives to better respond to the demands of citizens, consumers and businesses. The appropriations entered under this article will also cover training, awareness-raising and network actions to the benefit of such participants with a view to making Union policymaking on the internal market more comprehensive and effective, and as part of the process of assessing the actual impact of internal market policies (or the lack of them) on the ground,
- a comprehensive review of regulations with a view to making necessary changes and producing an overall analysis of the effectiveness of the measures taken with a view to the sound operation of the internal market and the evaluation of the overall impact of the internal market on businesses and the economy, including the purchase of data and access by Commission departments to external databases, as well as targeted actions aimed at improving understanding of the functioning of the internal market and rewarding active participation in fostering the functioning of the internal market,

**CHAPTER 12 02 — A SINGLE MARKET POLICY AND FREE MOVEMENT OF SERVICES** (*cont'd*)**12 02 01** (*cont'd*)

- guaranteeing the completion and management of the internal market, especially in the fields of pensions, free movement of services, recognition of professional qualifications, and intellectual and industrial property: the development of proposals for putting in place a Union patent,
- broadening the strategy regarding the development of statistics on service sectors and statistical development projects in cooperation with Eurostat and the Organisation for Economic Cooperation and Development (OECD),
- monitoring the effects of removing obstacles to the internal market for services,
- the development of a unified area for security and defence, with action working towards the coordination of public procurement procedures for these products at Union level; appropriations may cover devising studies and awareness-raising measures regarding the application of the legislation adopted,
- strengthening and developing financial and capital markets and financial services provided to businesses and private individuals; adapting the market framework especially as regards the monitoring and regulation of the activities of operators and of transactions, so as to take account of changes at Union and global levels, of the reality of the euro and of new financial instruments, by putting forward new initiatives intended to consolidate, and provide a detailed analysis of, the results of the first Financial Services Action Plan,
- improvement of payment systems and retail financial services in the internal market; reduction in the cost of, and time needed for, such transactions, taking into account the internal market dimension; development of the technical aspects so as to establish one or more payment systems on the basis of the follow-up in respect of Commission communications; carrying out studies in this area,
- developing and strengthening the external aspects of the directives applicable in respect of financial institutions, the mutual recognition of financial instruments vis-à-vis third countries, international negotiations and assistance for third countries in establishing a market economy,
- implementing the many measures put forward in the Action Plan on company law and corporate governance which could lead to studies on a number of targeted subjects, with a view to drawing up the necessary legislative proposals,
- analysis of the effect of measures in place as part of the follow-up to the progressive liberalisation of postal services, coordination of Union policies on postal services with regard to international systems and in particular with regard to participants in Universal Postal Union (UPU) activities; cooperation with central and eastern European countries; practical implications of the application of the General Agreement on Trade (GATS) provisions to the postal sector and overlap with UPU regulations,
- implementing the law of the Union and international provisions in the field of money laundering, including participation in intergovernmental or ad hoc measures in this field; contributions relating to Commission participation as a member of the Financial Action Task Force (FATF) on money laundering created under the OECD,
- active participation in meetings held by international associations such as the International Association of Insurance Supervisors (IAIS/AICA) and the International Organisation of Securities Commission (IOSCO); this also comprises expenses related to the Commission's participation as a member of the group,
- development of evaluations and impact studies on the various aspects of the policies covered by this chapter for the purpose of devising new measures or revising existing measures relating to them,
- creation and maintenance of systems directly linked to putting into place and monitoring policies launched within the framework of the internal market for services,

COMMISSION

TITLE 12 — INTERNAL MARKET AND SERVICES

CHAPTER 12 02 — A SINGLE MARKET POLICY AND FREE MOVEMENT OF SERVICES (*cont'd*)12 02 01 (*cont'd*)

- support of activities which seek to contribute to the achievement of the Union's policy objectives by enhancing supervisory convergence and cooperation, and in the field of financial reporting, both inside and outside the Union.

In order to achieve these objectives, this appropriation covers the costs of consultation, studies, surveys, evaluations, participation, production and the development of publicity, awareness-raising and training materials (printed matter, audiovisual material, assessments, computer tools, the collection and dissemination of information, information and advice measures for citizens and businesses).

Part of this appropriation is intended to cover expenditure incurred by the Commission for ensuring the effective functioning of the European Observatory on Infringements of Intellectual Property Rights.

This appropriation is also intended to cover setting up a central coordination body assisting the Member States with market surveillance cooperation, building on existing structures and experience. This coordination body would support the cooperation, pooling of know-how and sharing of best practices between Member States to ensure the same high level of market surveillance throughout the Union, in accordance with Regulation (EC) No 765/2008 of the European Parliament and of the Council of 9 July 2008 setting out the requirements for accreditation and market surveillance relating to the marketing of products (OJ L 218, 13.8.2008, p. 30). To this end, regular joint training for representatives of national market surveillance authorities from all Member States will be organised, focusing on relevant practical aspects of market surveillance such as follow-up of complaints, monitoring accidents, verifying that corrective action has been taken, follow-up of scientific and technical knowledge concerning safety issues and coordination with customs authorities. Furthermore, exchanges of national officials and joint visit programmes will foster the exchange of experience between Member States. In addition, comparative data on the resources dedicated to market surveillance in the different Member States will be collected and discussed at the appropriate level with national authorities. The aim is to create awareness about the need to have adequate resources to guarantee efficient, comprehensive and consistent market surveillance throughout the internal market, and contribute to the upcoming revision of the Union product safety rules, particularly those concerning market surveillance, and the preparation of the follow-up to the Customs 2013 programme.

This appropriation is intended to cover expenditure on studies, surveys, meetings of experts, information activities and publications directly linked to the achievement of the objective of the programme or measures coming under this article, and any other expenditure on technical and administrative assistance.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover expenditure arising in connection with measures for the management and development of Solvit and for the implementation of the single market assistance services action plan.

The Solvit system has proved to be one of the most effective out-of-court dispute settlement mechanisms.

It can effectively and efficiently deal with problems faced by citizens or businesses, arising as a result of the misapplication of internal market legislation by a public administration in another Member State. Furthermore, the Solvit system is able to produce feedback information by using an online database system which is accessible to all coordination centres and to which citizens and businesses can directly submit their problems.

However, Solvit, like many other public assistance services relating to Union issues, is still not widely known among potential users of the system. At the same time citizens and businesses are often very confused about the right address for their requests for information, assistance or problem solving. To remedy this, the Commission has announced, as part of the single market review, that it will endeavour to create a single web-based access point guiding citizens and businesses to the right service. In October 2010 the Commission launched a new website, Your Europe, which provides citizens and businesses with information, and refers them directly to relevant services such as Solvit in the event that they need help. Your Europe, together with the Europe Direct call centre, represents the single contact point for the Solvit system. The Commission is to inform the competent committee of the European Parliament in a yearly report about the frequency of use of the contact point and possible measures to further improve it.

Member States should be urged to take appropriate measures to notify their citizens about the existence of the single contact point.

Moreover, in the Commission's action plan of 8 May 2008 on an integrated approach for providing single market assistance services to citizens and businesses, a range of actions was proposed to increase cooperation between the existing assistance services so that they can offer a better, faster and more streamlined overall service to citizens and businesses.

Promotion of all these services also needs to take place in a more coordinated way to avoid citizens and businesses being confused by too many brand names.

Additionally, the Commission is to inform the competent committee of the European Parliament about the concrete measures which have been undertaken in this field.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The Single Market Forum should be an annual event held preferably in the Member State which holds the Presidency of the Council of the Union. It could be preceded by a number of regional content-oriented preparatory events organised jointly by the Commission, the European Parliament and the Member State which holds the Presidency of the Council of the Union. This event should be an important platform for the exchange of best practice between stakeholders, informing citizens about their rights in the single market and examining the state of the single market. It should bring together representatives of citizen, business and consumer organisations as well as representatives of the Member States and the Union's institutions in order to establish a clear commitment to transpose, apply and enforce single market legislation. This should be a platform for discussing the Commission's legislative proposals in the area of the single market and for presenting citizens', businesses' and other stakeholders' expectations with regard to future legislative proposals. The aim of this event should also be to tackle incorrect transposition, misapplication and non-enforcement of single market legislation by improving coordination and governance of the single market. A steering committee should be created, comprised of Members of the European Parliament and representatives of the Commission and the Presidency-in-Office of the Council of the Union at the time of the event, which should work out the organisational arrangements for the Single Market Forum.

*Remarks*

The financial and economic crisis has significantly shaken the confidence of consumers, retail investors and SMEs in the legislative and regulatory framework that is meant to protect them from failings in the financial system. Therefore, it is more essential than ever that the concerns of end-users and other non-industry stakeholders should be taken into account in designing initiatives that aim to restore citizens' confidence in the soundness of the financial sector and in the ability of financial integration to deliver concrete benefits to them.

This preparatory action, which follows on from a successful pilot project, aims to enhance the capacity of civil society organisations to participate in Union policymaking in the area of financial services, with a view to providing policymakers with a counterweight to financial services sector lobbies, and to inform the wider public of the issues at stake in the regulation of financial markets for consumers, end-users, retail investors and other non-industry stakeholders.

*Remarks*

This appropriation is intended to fund stepped-up support measures for traditional retailing, with a view to revitalising and modernising it. The pilot project will help to coordinate measures and channel funding from various sources in order to address the sector's problems more effectively.

The pilot project will involve:

- (1) defining the features of the traditional trading sector and identifying the constraints and threats currently facing it;
- (2) proposing solutions to foster revitalisation and modernisation of the sector;
- (3) identifying Union instruments and funding directly or indirectly usable by the sector;
- (4) establishing the uses to which the instruments, actions, measures and funding available are being put by the sector;
- (5) analysing the extent to which existing instruments meet the needs of the traditional retailing sector and, on the basis of that analysis, proposing any adjustments that may be necessary;
- (6) implementing the proposals referred to in point (2);
- (7) analysing the results and assessing the feasibility of a possible future Union programme of support for traditional retailing.

## Remarks

This appropriation is intended to cover expenditure arising in connection with the programme to support specific activities in the field of financial services, financial reporting and auditing.

The general objective of this programme is to improve the conditions for the functioning of the internal market by supporting the operations, activities or actions of certain bodies in the fields of financial services, financial reporting and auditing.

Union funding is vital in order to ensure the efficient and effective supervision of the internal market in financial services, particularly in view of the recent financial crisis.

Activities such as developing or providing input to the development of standards, applying, assessing or monitoring standards or overseeing standard-setting processes in support of the implementation of Union policies in the field of financial reporting and auditing are covered by the programme.

It is the continuation of the Community programme to support specific activities in the field of financial services, financial reporting and auditing as established by Decision No 716/2009/EC of the European Parliament and of the Council of 16 September 2009 establishing a Community programme to support specific activities in the field of financial services, financial reporting and auditing (OJ L 253, 25.9.2009, p. 8).

*Remarks*

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof, as well as to the European Supervisory Authority (European Banking Authority), established by Regulation (EU) No 1093/2010, the European Supervisory Authority is to form part of a European System of Financial Supervision (ESFS). The main objective of the ESFS is to ensure that the rules applicable to the financial sector are adequately implemented to preserve financial stability and to ensure confidence in the financial system as a whole and sufficient protection for the customers of financial services.

This appropriation is intended to cover the Authority's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme (Title 3).

The Authority must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 20 of Commission Delegated Regulation (EU) No 1271/2013 of 30 September 2013 on the framework financial regulation of the bodies referred to in Article 208 of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council (OJ L 328, 7.12.2013, p. 42) constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The establishment plan of the European Banking Authority is set out in the 'Staff' Annex to this section.

*Remarks**New article*

The Single Resolution Board ('the Board') was established by Regulation (EU) No 806/2014. The Board will carry out specified tasks concerning the preparation for the resolution of banks and their actual resolution where they are failing or likely to fail.

This appropriation is intended to finance the administrative expenditures of the Board during its first months of operation in 2015, which are mainly composed of recruitment and staff expenditures, building and information technology costs and the first operational expenditures.

This financing provided by the Union budget will be reimbursed once the first annual contributions due by the banks to cover the administrative expenditures of the Board will have been collected by the Board, after which the Board is expected to become fully self-financed by its own revenues.

*Remarks*

This appropriation is intended to cover technical assistance measures for the Instrument for Pre-Accession Assistance:

- expenditure linked to the preparation, appraisal, approval, follow-up, control, audit and evaluation of multiannual programmes and/or individual operations and projects under IPA regional development component. These actions may include technical assistance contracts, studies, short-term expertise, meetings, exchange of experience, networking, information and publicity and awareness creation events, training activities and publications directly linked to the achievement of the objective of the programme and any other support measures carried out at the level of the Commission central services or the delegations in the beneficiary countries,
- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the benefit of beneficiary countries and the Commission,
- installation, operation and interconnection of computerised systems for management, inspection and evaluation,
- improvements in evaluation methods and the exchange of information on practices in this field.

This appropriation is also intended to support administrative learning and cooperation with non-governmental organisations and social partners.

TITLE 13 — REGIONAL AND URBAN POLICY

## CHAPTER 13 01 — ADMINISTRATIVE EXPENDITURE OF THE 'REGIONAL AND URBAN POLICY' POLICY AREA (cont'd)

13 01 04 (cont'd)

13 01 04 02 (cont'd)

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers administrative expenditure under Chapter 13 05.

Remarks

This appropriation is intended to cover the technical assistance measures in the Cohesion Fund provided for in Articles 58 and 118 of Regulation (EU) No 1303/2013. Technical assistance may finance the preparatory, monitoring, administrative and technical support, evaluation, audit and inspection measures necessary for implementing that Regulation.

It may, in particular, be used to cover:

- support expenditure (representation expenses, training, meetings, missions, translations),
- expenditure on external personnel at headquarters (contract agents, seconded national experts or agency staff) up to EUR 1 340 000, as well as missions relating to such staff.

*Remarks*

Article 175 of the Treaty on the Functioning of the European Union provides that the objectives of economic, social and territorial cohesion set out in Article 174 shall be supported by the action it takes through the Structural Funds, which includes the European Regional Development Fund (ERDF). In accordance with Article 176, the ERDF is intended to help redress the main regional imbalances in the Union. The tasks, priority objectives and the organisation of the Structural Funds are defined in accordance with Article 177.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Article 39 of Regulation (EC) No 1260/1999, Articles 100 and 102 of Regulation (EC) No 1083/2006 and Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the ERDF.

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with Article 21(3)(c) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 82 of Regulation (EC) No 1083/2006 provides for specific rules on repayment of pre-financing applicable to the ERDF.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Measures to combat fraud are funded from Article 24 02 01.

*Remarks*

This appropriation is intended to cover the financing of commitments remaining to be settled from the 2000-2006 period for the special programme for peace and reconciliation in Northern Ireland and the border counties of Ireland. The special programme for peace and reconciliation was continued, in accordance with the decisions of the Berlin European Council, mentioned below, to provide EUR 500 000 000 (1999 prices) for the new period of validity of the programme (2000 to 2004). Following the request in the conclusions of the Brussels European Council of 17 and 18 June 2004, an additional EUR 105 000 000, to be allocated in 2005 and 2006, was added to align operations under the programme with the other programmes under the Structural Funds that came to an end in 2006.

## Remarks

This appropriation is intended to cover the ERDF commitments for the innovative measures and technical assistance remaining to be settled from the 2000-2006 programming period as provided for in Articles 22 and 23 of Regulation (EC) No 1260/1999. The innovative measures include studies, pilot projects and exchanges of experience. They were intended in particular to bring about a qualitative improvement in Structural Fund measures. Technical assistance covers preparatory, monitoring, evaluation, supervision and management measures required for implementation the ERDF. The appropriation may, in particular, be used to meet:

- support expenditure (representation expenses, training, meetings, missions),
- information and publishing expenditure,
- expenditure on information technology and telecommunications,
- contracts for the provision of services and studies,
- grants.

This appropriation is also intended to fund measures taken by partners in preparation for the 2007-2013 programming period.

## Remarks

This appropriation is intended to cover the settlement of commitments entered into, in earlier programming periods prior to 2000, by the ERDF in respect of innovative, preparatory, monitoring or evaluation measures, and any similar technical assistance measures provided for in the regulations concerned. It also funds the former multiannual measures, in particular those approved and implemented under the other Regulations mentioned below, which are not covered by the priority objectives of the Funds. This appropriation will also be used if necessary to cover financing where the corresponding commitment appropriations are not available or provided for in programming for 2000 to 2006.

## CHAPTER 13 03 — EUROPEAN REGIONAL DEVELOPMENT FUND AND OTHER REGIONAL OPERATIONS (cont'd)

## 13 03 14 (cont'd)

## Remarks

This appropriation is intended to cover the commitments remaining to be settled for projects from the 2000-2006 programming period in the regions bordering the candidate countries in accordance with the rules of the Interreg III Community initiative relating to cross-border, transnational and interregional cooperation. The measures take into account the communication from the Commission on the impact of enlargement on regions bordering candidate countries 'Community action for border regions' (COM(2001) 437 final).

## Remarks

This appropriation is intended to cover commitments remaining to be settled for programmes under the ERDF objective of the convergence in the 2007-2013 programming period. This objective is aimed at speeding up the convergence of the least-developed Member States and regions by improving conditions for growth and employment.

Part of this appropriation is intended to be used to address intra-regional disparities so as to ensure that the overall state of development of a given region does not hide poverty loops and disadvantaged territorial units.

In accordance with Article 105a(1) of Regulation (EC) No 1083/2006 as modified by point 7 of Annex III to the Treaty concerning the Accession of the Republic of Croatia to the European Union (OJ L 112, 24.4.2012), programmes and major projects which, on the date of accession of Croatia, have been approved under Regulation (EC) No 1085/2006 and the implementation of which has not been completed by that date, shall be considered to have been approved by the Commission under Regulation (EC) No 1083/2006, with the exception of the programmes approved under the components referred to in points (a) and (e) of Article 3(1) of Regulation (EC) No 1085/2006.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled for the PEACE programme under the European territorial cooperation objective of the ERDF of the 2007-2013 programming period.

The PEACE programme shall be implemented as a cross-border cooperation programme within the meaning of Article 3(2)(c) of Regulation (EC) No 1083/2006.

The PEACE programme shall promote social and economic stability in the regions concerned, including notably actions to promote cohesion between communities. The eligible area shall be the whole of Northern Ireland and the border counties of Ireland. This programme will be implemented in full compliance with the principle of additionality of structural fund operations.

In particular, it may be used to cover:

- support expenditure (representation expenses, training, meetings, missions),
- information and publishing expenditure,
- expenditure on information technology and telecommunications,
- contract for the provision of services and studies,
- grants.

This appropriation is intended to cover commitments from the 2007-2013 programming period remaining to be settled to ensure:

- the proper circulation of information through newsletters (including online), reports and conferences, and specifically an annual forum,
- the organisation of on-site events to familiarise all interested European regions with the Baltic Sea approach and the principles of macro-regions,
- successful governance of the strategy through the decentralised system that has been established and, in particular, the operation of the system of priority area coordinators and flagship project leaders,
- technical and administrative support for planning and coordination of activities related to the European Union Strategy for the Baltic Sea Region,
- availability of seed money for planning and preparing projects supporting the strategy,
- support for civil society participation,
- the continued helping of priority area coordinators in their coordination activity,
- participation in an implementation facility with the EIB, if requested by Baltic Member States,
- the development of a more ambitious communication strategy on the European Union Strategy for the Baltic Sea Region.

The continuation of the support to the technical assistance action should be used to:

- keep on helping priority area coordinators in their coordination activity,
- participate in an implementation facility with EIB, if requested by Baltic Member States,
- develop a more ambitious communication strategy on the European Union Strategy for the Baltic Sea Region.

*Remarks*

This appropriation is intended to finance the risk-sharing instruments from the ERDF Convergence envelope for Member States which are experiencing or threatened with serious difficulties with respect to their financial stability.

Reflows and amounts left-over after the completion of an operation covered by a risk sharing instrument may be reused within the risk-sharing instrument if the Member State still meets the conditions set out in Article 77(2) of Regulation (EC) No 1083/2006. If the Member State no longer meets those conditions, reflows and amounts left-over shall be considered to be assigned revenue.

Any assigned revenue resulting from repayment of reflows or amounts left-over entered in Item 6 1 4 4 of the statement of revenue shall give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation. At the request of the Member State concerned, additional commitment appropriations generated by this assigned revenue shall be added the following year to the cohesion policy financial allocation of the Member State concerned.

*Remarks*

This appropriation is intended to cover ERDF support under the investment for growth and jobs goal in less developed regions in the 2014-2020 programming period. The catching up process for these economically and socially lagging regions requires long-term sustained efforts. This category of regions includes regions with a GDP per capita less than 75 % of the average GDP of the Union.

Remarks

This appropriation is intended to cover ERDF support under the investment for growth and jobs goal in the 2014-2020 period in a new category of region — 'transition regions' — that replaces the 2007-2013 phasing-out and phasing-in system. This category of regions includes regions with a GDP per capita between 75 and 90 % of the average GDP of the Union.

Remarks

This appropriation is intended to cover ERDF support under the investment for growth and jobs goal in more developed regions in the 2014-2020 programming period. While interventions in the less developed regions will remain the priority for cohesion policy, this appropriation is thus intended to cover important challenges that concern all Member States such as global competition in the knowledge-based economy, the shift towards the low carbon economy and social polarisation exacerbated by the current economic climate. This category of regions includes regions with a GDP per capita above 90 % of the average GDP of the Union.

This appropriation is intended to cover the contribution of the Instrument of Pre-accession Assistance (IPA II) to ERDF transnational and interregional cooperation programmes in which the beneficiaries listed in Annex I of Regulation (EU) No 231/2014 participate.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks**Former Item 21 03 03 01 (in part)*

This appropriation is intended to cover support from the European Neighbourhood Instrument (ENI) under the European territorial cooperation goal in the 2014-2020 programming period for the Baltic Sea cross-border cooperation programme. Support under both the ENI and the European Regional Development Fund (ERDF) should be provided for the cross-border cooperation programmes between, on the one hand, Member States and, on the other hand, partner countries and/or the Russian Federation ('other cross-border cooperation participating countries') along the external borders of the Union, in order to promote integrated and sustainable regional development and cooperation between neighbouring border areas and harmonious territorial integration across the Union and with neighbouring countries.

Commitments will be transferred from Item 21 03 03 01 'Cross-border cooperation (CBC) — Contribution from Heading 4', after the adoption of the CBC programming document. Once programmes start to be implemented, commitments will show an increasing trend over the 2015-2020 period (as was the case for 2007-2013).

TITLE 13 — REGIONAL AND URBAN POLICY

CHAPTER 13 03 — EUROPEAN REGIONAL DEVELOPMENT FUND AND OTHER REGIONAL OPERATIONS (*cont'd*)13 03 77 (*cont'd*)13 03 77 12 (*cont'd*)

The preparatory action will promote social and economic stability in the regions concerned, including actions to develop cohesion between communities by means of opening space for familiarising with, and giving due acknowledgement to, each other's cultures and histories and will also highlight the added value of transnational cooperation. This should create a sustainable basis for a common platform giving access to regional expertise and increasing regional cooperation and should in addition allow lessons to be drawn from the experience of a macro-region strategy. The eligible area shall be the Danube macro-region and the surrounding countries in line with the European Neighbourhood Policy. The organisation of programmes should involve nongovernmental organisations, civil society organisations, in order to ensure that reconciliation efforts go also beyond the governmental sphere. The programmes eligible for funds shall involve participants from at least three Member States from the region.

*Remarks*

This pilot project focuses on providing support with a view to enhancing the value of two key Union funding sources for research, development and innovation — the European Structural and Investment Funds (ESIF) — and Horizon 2020) by actively promoting their combined use. The project will have two main objectives:

- to provide assistance to new Member States in the process of closing the innovation gap, in order to promote excellence across EU regions;
- to stimulate early and effective implementation of national and regional Smart Specialisation Strategies

*Scope of the project*

Building excellence in a given area of research and innovation often takes years if not decades of sustained efforts. The development of good national/regional research and innovation strategies for smart specialisation (RIS3) is considered essential for sustaining efforts at regional/national level over time. Therefore, the support by the Smart Specialisation Platform established jointly by DG JRC and DG REGIO (costing approximately EUR 1 600 000 per year) to Member States and regions to design and upgrade their RIS3 is essential. This will allow new Member States and regions catching up to identify a limited number of areas of good quality research and industrial activities with high innovation potential in their territory that will be further reinforced and developed using the ESIF to become more excellent and become more competitive in Horizon 2020 calls. This will also increase the capacity of new Member States to utilise results produced in more innovative regions under past framework programme projects, thus enabling them to enhance their own innovation capacity.

CHAPTER 13 03 — EUROPEAN REGIONAL DEVELOPMENT FUND AND OTHER REGIONAL OPERATIONS (*cont'd*)13 03 77 (*cont'd*)13 03 77 13 (*cont'd*)

The new activity within the Smart Specialisation Platform (S3P) needs to be further developed in order to facilitate the full exploitation of the potential synergies between Horizon 2020 and the ESIF.

The current pilot project needs to be continued in 2015, with an appropriate allocation, as building excellence in the area of research and innovation requires long-term effort and strategic planning.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The North Sea Region has the potential to act as an engine for growth in Europe, add value to the European Union and contribute to the objectives of the Europe 2020 strategy.

Whereas the Union has developed a regional strategy for the Baltic Sea area and work has begun on developing strategies for the Atlantic and Arctic regions, such a process has not yet started for the North Sea Region. A regional strategy for the North Sea Region is the missing link between the macro regional areas in the north-east and north-west of Europe.

The aim of this preparatory action is to analyse the region's growth potential and use the findings to investigate the added value of having a future shared macro regional strategy for the North Sea area, given the fact that a strong North Sea Region has the potential to act as an engine for growth in Europe and contribute to the objectives of the Europe 2020 strategy.

COMMISSION

TITLE 13 — REGIONAL AND URBAN POLICY

CHAPTER 13 03 — EUROPEAN REGIONAL DEVELOPMENT FUND AND OTHER REGIONAL OPERATIONS (*cont'd*)13 03 77 (*cont'd*)13 03 77 14 (*cont'd*)

The North Sea Commission General Assembly has developed the North Sea Region 2020 strategy paper in consultation with members and stakeholders in the North Sea Region. The strategy paper regards the North Sea Region as a territorial cooperation area, and its strategic focus is on the major challenges and common characteristics where transnational action and collaborative working is considered to give added value.

The strategy paper identifies five strategic priorities that are closely linked to the Europe 2020 objectives and contributes to the implementation of several (if not all) of the Europe 2020 flagship initiatives:

- managing maritime space,
- increasing accessibility and clean transport,
- tackling climate change,
- attractive and sustainable communities,
- promoting innovation and excellence.

The North Sea region strategy paper is a first step towards analysing the challenges and opportunities for the North Sea area and exploring the potential for regional growth in support of the Europe 2020 strategy.

*North Sea Region Preparatory Action*

To fully explore the regional growth potential in support of the Europe 2020 strategy and lay the grounds for a strong macro region, there is a need to carry out more in-depth analysis of the five strategic priorities identified in North Sea Region 2020 strategy paper and their added value in a European community context.

*Activities*

The preparatory action will finance a number of well coordinated initiatives over a three year period (2014-2017) and focus on:

- in-depth analyses/studies of the five priorities identified in the North Sea Region 2020 paper,
- stakeholder conferences to address the issues of commitment, cooperation and content,
- follow-up dialogue with all stakeholders, including EU Commission, Member States, and regional authorities.

The activities should be closely linked to the EU regional policy and should also facilitate synergies with other Union policy areas and programmes.

*Output*

The final output will be an in-depth analysis of the North Sea Region's growth potential, including possible intervention areas, and a white book to the Union and Member States about the added value of a shared regional strategy and cooperation for the North Sea Region.

*Implementation*

The appropriations for this preparatory action could be inserted in the EU budget under Title 13 'Regional policy', given the regional nature of the intended activities. DG REGIO should be responsible for implementing the preparatory action in cooperation with the North Sea Commission.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The international dimension of Union regional and urban policy gains on importance over the last years. Memoranda of Understanding on regional cooperation has been signed with China, Russia, Brazil and Ukraine; further cooperation has been developed with Moldova, Georgia, Chile, Argentina, Peru, South Africa, Uruguay and Japan. The dialogue in the field of regional and urban policy, being one of the components of the Union's diplomatic relations with third countries, requires further support. Moreover, the cooperation with third countries should focus on certain issues in relation to the reform of cohesion policy, namely its enhanced urban dimension.

The aim of the preparatory action is to promote the exchange of experience and best practice between the European Union and third countries on the theme of territorial development with particular reference to urban development, urban-rural partnership and urban cross-border cooperation.

The scope of this preparatory action should include:

- organisation of study visits for urban policy actors,
- organisation of seminars and workshops aiming at exchange of experience between the Union and third countries in relation to urban development, urban-rural partnership and urban cross-border cooperation,
- illustrating innovative good practice examples of cooperation between the Union and third countries cities and towns in different thematic areas,

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Implementation of this preparatory action should ideally set a best example for designing and implementing a genuine RIS 3 strategy in a specific Greek Region and should serve as a model for other convergence regions.

*Rationale*

Given that an important preparatory work has been already carried out by the Commission to incite Greece and its Regions to start designing an adequate Regional Innovation Smart Specialisation Strategy, the challenge still remains in development and implementation. Exchange of best practices is not sufficient to build competitive advantage by developing and matching research and innovation strengths with business needs of a particular territory. Therefore it is very important to strengthen current efforts by direct, professional and tailor made assistance to a Greek region heavily hit by the crisis.

Current fragmentation and lack of coordination efforts between central and regional governments does not guarantee that a proper entrepreneurial discovery process will be carried out in Greek regions. Therefore it is crucial to set up a sound and inclusive governance structure with relevant experience and human resources to plan and implement Research, Development and Innovation (R&D&I) measures in one of Greek regions as an example. To facilitate and accelerate the development process, an exchange of expertise with a specialist on economic geography and change processes from other Union regions should assist one of the Greek regions in the entrepreneurial discovery process. This help would also lower the burden on human resources of the Greek Authorities who need to build expertise. This expertise needs to be created with the help of best practice exchange on administration and regional economic development with a strong involvement of competent and experienced European specialists in the field of regional economic transformation based on knowledge.

**CHAPTER 13 03 — EUROPEAN REGIONAL DEVELOPMENT FUND AND OTHER REGIONAL OPERATIONS** (*cont'd*)**13 03 77** (*cont'd*)13 03 77 16 (*cont'd*)*Scope*

The aim of this preparatory action is to capture the economic potential in a selected region, and secondly, to explore the possibilities of its innovation potential and its expansion. The region proposed is one of the poorest in Greece and in the Union, the Region of Eastern Macedonia and Thrace. The Region of Eastern Macedonia and Thrace is a Convergence Region strongly hit by the crisis and the fierce competition of low labour cost neighbouring countries. Despite the presence of a university and a technological institute and other research bodies in the region, the links of the R&D&I activities with the needs of the local entrepreneurs are almost non-existent. The preparatory action should show the example that growth based on innovation and export orientation of the local productive forces is feasible.

This should serve as a growth paradigm for other regions of convergence in Greece and in Europe.

The funding available from the Union should support development and implementation of the regional smart specialisation strategy, concentrating in particular on:

- creating and/or strengthening the links between regional outward looking industry/manufacturing and Greek regional R&D&I bodies (preferably within the same region but outside the region as well),
- supporting Greek regional institutional R&D&I bodies in creating and/or strengthening links with regional outward oriented companies in providing concrete solutions to the technological needs of the exporting companies of the Region,
- stopping the brain drain by fully exploiting available technological equipment in the Technological Institute of the Region and the use of such equipment by local specialised personnel to provide technological solutions for the selected exporting companies and by creating a pool of highly qualified locals in business, trade and exports to assist and advise potential foreign investors,
- encouraging cooperation between the Managing Authority of the Regional Operational Programme and geographic economists of the Region and other geographic economists successfully implementing a RIS3 policy in a given Region in another European Member State, e.g. Germany.

*Duration — Form of assistance*

The duration of this preparatory scheme should not exceed one year from its launching and should not exceed the initially allocated funding either.

*Proposal for preparatory action in the Region of Eastern Macedonia — Thrace*

Considering the actions undertaken so far in the Region of Eastern Macedonia and Thrace (R-AMTH) on the 'smart specialisation strategy' the launching of pilot action is recommended to help shaping better the smart specialisation strategy of the Region, in particular, the selection of the priorities on which financing should concentrate. Hence, the following preparatory scheme is proposed:

13 03 77 16 (*cont'd*)

- activation of an industrial research and technology development programme directed to the needs of activities identified in the entrepreneurial discovery process. Up to now RIS3 — Regional Assessment: Eastern Macedonia — Thrace indicated some sectors where the region could have a competitive advantage like: geothermal energy, agriculture, livestock, fisheries and biotechnology, extraction and processing of marble and ICTs and automation,
- strengthening of cooperation and networking between researchers and research institutions of the R-AMTH with the productive forces of the region. Research bodies should demonstrate (e.g. under memoranda of understanding) their contribution to developing solutions for existing and potential users' needs for exploiting the results of tailor made research and development projects (focusing on industrial research and experimental development),
- stopping brain drain by (a) enabling a mobility research training program and optimise use of the research equipment of TEI Kavala and (b) creating a pool of highly qualified locals in business, trade and exports to assist and advise potential foreign investors,
- supporting the cooperation, the exchange of best practices and twining of the Managing Authority of the Regional Operational Programme and geographic economists for Eastern Macedonia and Thrace with a Managing Authority as well as geographic economists successfully implementing a RIS3 policy in a given Region in another European Member State.

*Monitoring and evaluation*

This one year preparatory scheme will be monitored by the Managing Authority of the Regional Operational Programme for Eastern Macedonia and Thrace. A limited number of specific output and result indicators should be set before the start of the preparatory scheme, measuring at least growth of turnover, growth of exports and jobs safeguarded and created.

A short evaluation study should be commissioned at the end of the preparatory scheme.

The results of the preparatory scheme should be presented in the region, in Athens in a special seminar to be organised by the European Parliament Representation in Athens and in the European Parliament in Brussels.

*Implementation of the preparatory action*

In order to maximise the synergies between the project and the work currently being done by the Joint Research Centre on smart specialisation in European regions, the Commission may implement the project through the Joint Research Centre, with the support of DG REGIO.

*Remarks*

Article 177, second paragraph, of the Treaty on the Functioning of the European Union provides that a Cohesion Fund is to be set up to support projects in the fields of the environment and trans-European networks in the area of transport infrastructure.

Article H of Annex II to Council Regulation (EC), No 1164/94 of 16 May 1994, establishing a cohesion Fund, Articles 100 and 102 of Council Regulation (EC) No 1083/2006 of 11 July 2006 laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund, and Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the Cohesion Fund.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law. Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with Article 21(3)(c) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

*Remarks*

This appropriation is intended to finance the risk sharing instruments from the Cohesion Fund envelope for Member States which are experiencing, or threatened with, serious difficulties with respect to their financial stability.

Reflows and amounts left-over after the completion of an operation covered by a risk sharing instrument may be reused within the risk-sharing instrument if the Member State still meets the conditions set out in Article 77(2) of Regulation (EC) No 1083/2006. If the Member State no longer meets those conditions, reflows and amounts left-over shall be considered to be assigned revenue.

**CHAPTER 13 04 — COHESION FUND (CF) (cont'd)****13 04 03** (cont'd)

Any assigned revenue resulting from repayment of reflows or amounts left-over entered in Item 6 1 4 4 of the statement of revenue shall give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation. At the request of the Member State concerned, additional commitment appropriations generated by this assigned revenue shall be added the following year to the cohesion policy financial allocation of the Member State concerned.

*Remarks*

This appropriation is intended to cover Cohesion Fund support under the Investment for growth and jobs goal in the 2014-2020 programming period. The Cohesion Fund will continue to support Member States with gross national income (GNI) per capita of less than 90 % of the Union average. The appropriation, while ensuring an appropriate balance and according to the investment and infrastructure needs specific to each Member State, is intended to support:

- investments in the environment, including areas related to sustainable development and energy which present environmental benefits,
- trans-European networks in the area of transport infrastructure, in compliance with the guidelines adopted by Decision No 661/2010/EU.

**13 05 01 Instrument for Structural Policies for Pre-accession (ISPA) — Completion of previous projects (2000 to 2006)**

Remarks

Aid provided by the Instrument for Structural Policies for Pre-accession (ISPA) was intended to help the candidate countries of Central and Eastern Europe in their accession to the Union. ISPA was used to help the beneficiary countries to comply with the *acquis* of the Union in the environment and transport fields.

*Remarks*

Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in the Western Balkans:

- support for political reforms,
- strengthening of the ability of the beneficiaries listed in Annex I of Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Part of this appropriation will be used for measures to help the beneficiary countries meet the requirements stemming from visa-free travel to and from the Schengen countries, or, in the case of Kosovo, measures to speed up the visa liberalisation process.

Part of this appropriation will be used for measures with a view to reconciliation between the countries, peoples and ethnic groups throughout the Western Balkans, and to support efforts to promote an impartial view on historical and political events.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

This article is intended to record appropriations resulting from the mobilisation of the European Union Solidarity Fund in the event of major disasters in the Member States. Assistance should be provided mainly in connection with natural disasters, but may also be provided, where warranted by the urgency of the situation, to the Member States concerned, with a deadline being laid down for use of the financial assistance awarded and provision being made for beneficiary states to substantiate the use made of the assistance they receive. Assistance received which is subsequently offset by third-party payments, under the 'polluter pays' principle, for example, or received in excess of the final valuation of damage should be recovered.

With the exception of the advance payment, the allocation of the appropriations will be decided on in an amending budget with the sole purpose of mobilising the European Union Solidarity Fund.

## Remarks

This appropriation is intended to cover expenditure on the implementation of the Fiscalis 2020 programme, and in particular the financing of joint actions, IT capacity building and human competency building.

It covers in particular:

- the cost of the acquisition, development, maintenance, operation and quality control of Union components of European Information Systems. The Union components of the European Information Systems are: (1) IT assets such as the hardware, the software and the network connections of the systems including the associated data infrastructure; (2) IT services necessary to support the development, maintenance, improvement and operation of the systems; (3) and any other elements which, for reasons of efficiency, security and rationalisation, are identified by the Commission as common to participating countries,
- expenses related to seminars, workshops, project groups, bilateral or multilateral controls, working visits, expert teams, public administration capacity building and supporting actions, studies, and communication projects,
- the costs related to implementation of provisions for common training actions,
- expenses pertaining to preparatory, monitoring, control, audit and evaluation activities required for the management of the programme and the achievement of its objectives,
- the costs of any other activity required in support of the objectives and priorities set out for the programme.

Any revenue from the contributions from acceding countries, candidate countries, potential candidates benefiting from a pre-accession strategy and, partner countries under the European Neighbourhood Policy, provided they reached a sufficient level of approximation of the relevant legislation and administrative methods to those of the Union for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

TITLE 15 — EDUCATION AND CULTURE

CHAPTER 15 01 — ADMINISTRATIVE EXPENDITURE OF THE 'EDUCATION AND CULTURE' POLICY AREA (*cont'd*)15 01 04 (*cont'd*)15 01 04 01 (*cont'd*)*Remarks*

This appropriation is intended to cover expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are required for the management of the programme and the achievement of its objectives; in particular, studies, meetings of experts, information and communication actions, including corporate communication of the political priorities of the Union as far as they are related to the general objectives of this item, expenses linked to IT focusing on information processing and exchange, together with all other technical and administrative assistance expenses incurred by the Commission for the management of the programme.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes as entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions from the countries of the European neighbourhood area in accordance with the procedures defined with those countries following the framework Agreements providing for their participation in Union programmes as entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contribution from the Swiss Confederation for participating in Union programmes entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

## CHAPTER 15 01 — ADMINISTRATIVE EXPENDITURE OF THE 'EDUCATION AND CULTURE' POLICY AREA (cont'd)

15 01 05 (cont'd)

15 01 05 02 (cont'd)

*Remarks*

This appropriation is intended to cover expenditure on external personnel implementing research and innovation programmes — Horizon 2020 in the form of indirect action under the non-nuclear programmes, including external personnel posted in Union delegations.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover the costs of in-service traineeships for graduates. This traineeship is designed to provide them with an overview of the objectives set and the challenges faced by the Union, an insight into how its institutions work and an opportunity to enhance their knowledge through work experience at the Commission.

This appropriation covers the payment of grants and other related costs (supplement for persons with disabilities, accident and sickness insurance, contribution to travelling costs linked to the traineeship, at the beginning and at the end of the traineeship, costs of events organised in the framework of the traineeship programme, e.g. visits, hosting and reception costs). It also covers the costs of evaluation in order to optimise the programme and communication and information campaigns.

The selection of trainees is based on objective and transparent criteria.

The amount of related assigned revenue pursuant to Article 21(2) to (3) of the Financial Regulation is estimated at EUR 1 181 431.

*Remarks*

In line with the general objective in particular the objectives of the ET 2020 strategic framework for European cooperation in education and training, as well as in support of the sustainable development of third countries in the field of higher education, this appropriation is intended to pursue the following specific objectives in the field of education and training:

- to improve the level of key competences and skills with particular regard to their relevance for the labour market and contribution to a cohesive society, notably through increased opportunities for learning mobility and strengthened cooperation between the world of education and training and the world of work,
- to foster quality improvements, innovation excellence and internationalisation at the level of education and training notably through enhanced transnational cooperation between education and training providers and other stakeholders,
- to promote the emergence and raise awareness of a European lifelong learning area, to complement policy reforms at national level and to support the modernisation of education and training systems, notably through enhanced policy cooperation, better use of Union transparency and recognition tools and the dissemination of good practices,
- to enhance the international dimension of education and training, notably through cooperation between Union and third country institutions in the field of vocational education and training (VET) and in higher education, by increasing the attractiveness of the European higher education institutions and supporting the Union's external action, including its development objectives through the promotion of mobility and cooperation between the Union and third country higher education institutions and targeted capacity building in third countries,
- to improve the teaching and learning of languages and to promote the Union's broad linguistic diversity and intercultural awareness, including minority and endangered languages, for example by supporting projects and networks providing educational materials, teachers training, use of endangered language as educational media, language regeneration and exchange of best practices, etc.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions from the countries of the European neighbourhood area in accordance with the procedures defined with those countries following the framework Agreements providing for their participation in Union programmes as entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contribution from the Swiss Confederation for participating in Union programmes entered under Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services (CESES) and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. Accordingly, Union authorising officers are encouraged to make full use of the possibilities offered by the Financial Regulation, including CESES contributions-in-kind to Union projects.

## Remarks

In line with the general objective, this appropriation is intended to pursue the following specific objectives in the area of youth:

- to improve the level of key competences and skills of young people, including those with fewer opportunities, as well as to promote participation in democratic life in Europe and the labour market, active citizenship, intercultural dialogue, social inclusion and solidarity, notably through increased learning mobility opportunities for young people, those active in youth work or youth organisations and youth leaders, and through strengthened links between the youth field and the labour market,
- to foster quality improvements in youth work, notably through enhanced cooperation between organisations in the youth field and/or other stakeholders,
- to support free, high-quality public education in such a way as to guarantee that no pupil is denied access to or forced to break off any level of education on economic grounds, with particular attention being paid to the first years of schooling, with a view to preventing early school-leaving and ensuring that children from the least-favoured sections of society can be fully integrated,
- to complement policy reforms at local, regional and national level and to support the development of knowledge and evidence-based youth policy as well as the recognition of non-formal and informal learning, notably through enhanced policy cooperation, better use of Union transparency and recognition tools and the dissemination of good practices,
- to enhance the international dimension of youth activities and the role of youth workers and organisations as support structures for young people in complementarity with the Union's external action, notably through the promotion of mobility and cooperation between the Union and third country stakeholders and international organisations and through targeted capacity building in third countries.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. Remarks

*Former articles 15 02 03 and 15 02 10*

In line with the general objective, this appropriation is intended to cover support of the implementation of Union policies in areas that correspond to the Chapter's specific objectives (Article 11) and activities (Article 12).

The Sport Chapter of the 'Erasmus+' programme pursues the following specific objectives in the area of sport:

- to tackle transnational threats to sport such as doping, match fixing, violence, racism and intolerance,
- to support good governance in sport and dual careers of athletes,
- to promote social inclusion, equal opportunities and health-enhancing physical activity through increased participation in sport, including by organising conferences and meetings with athletes to show and explain to students and teenagers how a good balance between sport, instruction and good nutrition can improve their life.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contribution from the Swiss Confederation for participating in Union programmes entered under Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

15 02 77 09 (cont'd)

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The aim of the preparatory action is to develop an e-platform for European Neighbourhood Policy (ENP) countries' administrations, local authorities, academic centres and civil society, allowing for flexible yet targeted exchange of know-how and knowledge in Union affairs and Union.

Due to recent political events and association-related contractual developments with some of the ENP countries, especially those entering the association phase of their relationship with the Union, a large number of advanced training modules on the Union and Union-ENP-related matters need to be added to complement the e-platform and policy and legal advice needs to be provided on request. Given that education and training activities offered through the e-platform are to further the development of the ENP countries' human capital and the personal development of learners, high quality of e-learning needs to be guaranteed. In order to ensure that the e-platform helps bridge the gap between education supply and labour market demand in the ENP countries in connection with Union affairs, evaluation tools and indicators for learning process performance/results should be developed and introduced as well. This will ensure the sustainability of the e-platform and allow a map of priorities for providing further support to beneficiaries to be produced.

The implementation of the preparatory action will be entrusted to the College of Europe (Natolin Campus), which has thorough and comprehensive knowledge of complex democratic transition processes and EU-oriented structural transformations, especially as regards EU association agreements and their implementation, as well as extensive experience of ENP matters, which is of the utmost importance for the e-platform's success.

*Remarks*

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020) of the European Union.

The programme shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

## CHAPTER 15 03 — HORIZON 2020 (cont'd)

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 15 03 50 01.

Administrative appropriations of this chapter will be provided under Article 15 01 05.

**15 03 01** *Excellent science**Remarks*

This priority of Horizon 2020 aims to reinforce and extend the excellence in the Union's science base and ensure a steady stream of world-class research to secure Europe's long-term competitiveness. It will support the best ideas, develop talent within Europe, provide researchers with access to priority research infrastructure, and make Europe an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without pre-determined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

*Remarks*

Europe needs a strong and creative human resource base, mobile across countries and sectors, and has to be attractive for the best researchers, European and non-European. This will be achieved by structuring and raising excellence in a substantial share of the high-quality initial training of early stage researchers and doctoral candidates and by supporting attractive career opportunities for experienced researchers in both public and private sectors worldwide. Researchers are encouraged to move between countries, sectors and disciplines to enhance their creative and innovative potential.

*Remarks*

This appropriation is intended to cover staff and administrative expenditure, and operational expenditure relating to the work programme of the European Institute of Innovation and Technology (EIT), including the knowledge and innovation communities (KIC) designated by the EIT.

In the framework of the EIT's Strategic Innovation Agenda (SIA) and Regulation (EU) No 1292/2013 of the European Parliament and of the Council of 11 December 2013 amending Regulation (EC) No 294/2008 establishing the European Institute of Innovation and Technology (OJ L 347, 20.12.2013, p. 174), the EIT will contribute to the general objective and priorities of 'Horizon 2020 — The Framework Programme for Research and Innovation', with the specific objective of integrating the knowledge triangle of higher education, research and innovation. The EIT aims to give Europe's innovation capacity a much needed boost and its overall goal is to create a new European way of delivering essential economic growth and societal benefits through innovation by helping transform innovative ideas into products and services that create sustainable growth and jobs.

COMMISSION

TITLE 15 — EDUCATION AND CULTURE

CHAPTER 15 03 — HORIZON 2020 (*cont'd*)15 03 05 (*cont'd*)

Knowledge and innovation communities (KICs) are the operational base of the EIT. They are excellence-driven partnerships, which bring together the whole innovation web in order to offer new opportunities for innovation in Europe and generate real impact in terms of new business creation and societal benefits. They address focused innovation topics and integrate public and private research organisations, innovative industries, higher education institutions, investors, start-ups and spin-offs. The first three KICs were designated in December 2009 and address the following societal challenges: climate change mitigation and adaptation (through Climate-KIC), sustainable energy (through KIC InnoEnergy) and future information and communication society (through EIT ICT Labs).

The EIT aims to generate tangible impact in the following areas:

- addressing key societal challenges: The KICs combine expertise from across disciplines to ensure innovative and global responses to complex societal challenges,
- setting a clear business-friendly framework: Turning new ideas into tangible new products, services or business opportunities will be the main benchmark of the EIT's and the KICs' success,
- enhancing the free flow of knowledge through co-location: The KICs are organised around co-location centres — geographical locations where most or the whole innovation chain is in close proximity. The emphasis is on people from diverse backgrounds (industry, SMEs, academia, nationality, gender, discipline, etc.) working together with face-to-face contact, thus leading to great mobility of knowledge,
- creating a new generation of entrepreneurs: people with an entrepreneurial mind-set are the drivers of innovation, thereby keeping our economies and societies moving. The EIT promotes entrepreneurship education as a key feature of KICs' Masters and doctoral programmes by shifting the emphasis from 'learning about' to 'learning by doing'. The Master and PhD programmes will provide students with the entrepreneurial skills they need to succeed in the knowledge economy, focusing on learning outcomes and the use of innovative teaching methods.

The EIT's strategic objectives for this period are to consolidate and synergise its operations and to prepare for achieving the priorities set out in the Strategic Innovation Agenda (2014-2020): firstly, by incentivising growth, impact and sustainability by continuing to strengthen its partnership with the three existing KICs whilst creating new KICs. By following an incremental development path in establishing new KICs, the EIT will ensure leading up to a total portfolio of nine KICs in the period 2014-2020 (equalling the set-up of 40-50 co-location centres across the Union); secondly, by enhancing the EIT's impact by fostering entrepreneurship-driven innovation across the Union through wide dissemination of novel innovation models attracting and developing talent from across Europe; and thirdly, by introducing new means of achieving impact, alongside results-oriented monitoring.

The establishment plan of the EIT is set out in Annex 'Staff' to this section.

Remarks

This appropriation is intended to cover the following measures relating to Cross-sectoral strand of the Creative Europe programme.

The cultural and creative sector facility will target the cultural and creative sectors and will have the following priorities: facilitate access to finance for small- and medium-sized enterprises and organisations in the European cultural and creative sectors; improve the capacity of financial institutions to assess cultural and creative projects, including technical assistance and networking measures.

This will be achieved through:

- providing guarantees to appropriate financial intermediaries from any country participating in the Creative Europe programme,
- providing financial intermediaries with additional expertise and capacity to evaluate risks associated with operators in the cultural and creative sectors.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions from the countries of the European neighbourhood area in accordance with the procedures defined with those countries following the framework Agreements providing for their participation in Union programmes as entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contribution from the Swiss Confederation for participating in Union programmes entered under Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenues may give rise to the provision of additional appropriations in accordance with Article 21(3)(i) of the Financial Regulation.

*Remarks*

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action would prepare a proposal for a more strategic approach to culture in the Union's external relations involving a higher level of stakeholders in Europe and representatives of third countries, cultural institutes and NGOs.

Work sessions therefore aim at mobilising resources for cultural cooperation and building up a Union definition of its potential cultural impact.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Fostering European integration through culture is a crucial issue in a digitalised European economy. In this context, it is urgent that Union officials assist European cultural stakeholders with finding new tools to help dissemination of audiovisual content. Digital revolution offers a tremendous opportunity for cross-border online dissemination of content for European stakeholders but this dissemination is often practically slowed down by linguistic borders. By providing new and diverse subtitled versions of selected TV programmes across all Europe, this project aims to assess the impact of linguistic differences on the transnational digital dissemination of audiovisual cultural content. This project includes a scientific evaluation to measure and compare the outreach of content and the audience with and without different languages versions, both in and outside Europe. The project allows a transparent selection of programmes to be supported and gives all European stakeholders the opportunity to use its experience and results. The objective is clearly to develop new business models for European media stakeholders and to enable Union institutions to base future policy initiatives on the outcome.

**CHAPTER 15 04 — CREATIVE EUROPE** (*cont'd*)**15 04 77** (*cont'd*)15 04 77 08 (*cont'd*)*Remarks*

Crowdfunding is proving to be a trusted vehicle to transfer money between potential customers and the cultural sector. Crowdfunding businesses are using a platform and network model — one brand will rule them all — something which has been seen in social network businesses. Europe's crowdfunding market is as fragmented as its nations, and US-based systems benefit from a homogenous internal market. In order to maintain an active language policy in the online world and link it to the cultural sector, an alternative strategy is needed. There are some interesting cases to learn from, including the hybridised funding structure CrowdCulture in Sweden, which links public funding with private donations.

The pilot project will, in a study, identify and analyse best practices in Europe's crowdfunding market in relation to cultural organisations.

CHAPTER 15 04 — CREATIVE EUROPE (*cont'd*)15 04 77 (*cont'd*)15 04 77 09 (*cont'd*)*Remarks*

This pilot project follows on from: Commission and European Parliament initiatives (the Agenda for Culture (2007) which, over the years, has shown the importance of a cultural dimension to Union's external relations), various own-initiative reports by Parliament's Committee on Culture (European Parliament resolutions of 12 May 2011 on the cultural dimensions of the EU's external actions (OJ C 377 E, 7.12.2012, p. 135) and on unlocking the potential of cultural and creative industries (OJ C 377 E, 7.12.2012, p. 142)) the Commission communication, and the preparatory action on culture in external relations.

The pilot project will support the establishment of networks of young creative professionals from the Union and partner countries with a view to encouraging exchanges, networking, professional development and long-term collaborative relations among young entrepreneurs and players in the cultural and creative sectors in the Union and partner countries. The Creative Europe programme illustrates the determination to engage at Union level with the creative and cultural sectors, making a substantial contribution to creativity and economic revitalisation in the Union and its relations with third countries.

15 04 77 10 Preparatory action — Crowdsourcing subtitling to increase circulation of European works

*Figures (Differentiated appropriations)*

*Remarks*

Many high-quality European works (television drama, documentaries, films, etc.) are not distributed outside their domestic markets as that would entail high subtitling costs. In this context, controlled crowdsourcing (wikis) appears to be a valid option. It would significantly lower the cost of subtitling, while maintaining the same translation quality as that provided by traditional audiovisual service companies.

**CHAPTER 15 04 — CREATIVE EUROPE** (*cont'd*)**15 04 77** (*cont'd*)15 04 77 10 (*cont'd*)

This preparatory action will test the impact of an online platform for crowdsourced subtitling files on the circulation of European works and will determine the conditions (relating in particular to governance and economic aspects, etc.) that need to be met for such a model to be viable in this area.

It will cover:

- implementation, promotion and operation of an online platform for crowdsourced subtitling files that can be used by any consumer for personal use or by other users for commercial purposes,
- making works with crowdsourced subtitles available online in the markets concerned,
- sharing the results of the trial with the general public, including stakeholders and policy-makers, by organising public workshops and by other means.

## Remarks

In accordance with the programme 'Europe for Citizens' and under the overall aim of bringing Europe closer to its citizens, the general objective of the programme is to contribute to the understanding about the Union and to foster European citizenship and improve conditions for civic participation at Union level.

COMMISSION  
TITLE 16 — COMMUNICATION

CHAPTER 16 02 — FOSTERING EUROPEAN CITIZENSHIP (*cont'd*)

16 02 01 (*cont'd*)

This appropriation is intended to cover actions such as partnerships, structural support, remembrance projects, Union history and its identity, citizens' meetings, networks of twinned towns, citizens' and civil societies projects, peer reviews, studies and communication services, support measures, events and support structures in the Member States.

This appropriation is also intended to promote European citizenship by informing citizens about their rights as Union citizens, and the impact of the Union on their daily life, in all languages of the Union. This will involve, in particular, information on the European Citizens' Initiatives, given the importance of this instrument of participatory democracy to citizens.

Future calls for proposals will give particular consideration to projects from civil society organisations promoting integration, linguistic diversity, cohesion and non-discrimination, with a special focus on European minorities.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The objective of the preparatory action is to enable the establishment in Brussels of a European Civil Society House (ECSH) as a cost-efficient resource centre and advice bureau on European rights and civic participation for citizens and civil society organisations. In order to achieve this goal there is a need to:

**CHAPTER 16 02 — FOSTERING EUROPEAN CITIZENSHIP** (cont'd)**16 02 77** (cont'd)

16 02 77 04 (cont'd)

- broaden the ECSH partnership base with key organisations at Union and national level,
- consult local authorities and other stakeholders to grow support for and develop the concept of the ECSH,
- plan the use of the physical premises of the ECSH in terms of a Union citizens' advice bureau shared by many similar organisations, generating economies of scale.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

In 1984, the Fontainebleau European Council introduced the concept of a People's Europe. The Council considered 'essential that the Community should respond to the expectations of the people of Europe by adopting measures to strengthen and promote its identity and its image both for its citizens and for the rest of the world'. Thirty years later the time has come to assess how Europeans perceive the Union. What is its added value? Why are we together?

The initial purpose of the European Union — to secure peace, to spread democracy and to bring prosperity — has been achieved. Today, however, many parts of Europe are in severe crisis, with heated discussions on the purpose of Union membership. The focal point of these discussions often seems to be the burning question: Why are 'we' together with 'them'?

Under Article 2 of the Treaty on the European Union, the right for every Union citizen to find his or her own path within the Union should be respected. Therefore, Union action must be linked to an understanding of local values and constitutions. In short, the promise of the Union has to be explained in terms of its added value for countries and citizens.

All Member States will have gone through a painstaking decision-making process prior to joining the Union - an emotional process followed by ongoing political discussions about both economic and ethical issues, with most countries involving citizens through referendums on major issues. Following accession, each country's membership has evolved. This pilot project will describe the relationship of each Member State with the Union to see if there are common perceptions about the Union in the various Member States.

COMMISSION

TITLE 16 — COMMUNICATION

CHAPTER 16 02 — FOSTERING EUROPEAN CITIZENSHIP (*cont'd*)16 02 77 (*cont'd*)16 02 77 05 (*cont'd*)

This will be done by interviewing citizens from all walks of life in every country. The aim of the interviews will be to understand how the Union is perceived in everyday life by its citizens. These findings will be compiled in a report in order to identify each country's specific relationship with the Union and thereby gain a clearer picture of the different national perceptions of the Union. These national profiles will then be compared in order to ascertain the extent to which there are shared perceptions of the EU among 'real people' in Member States. In short, the question to be answered is: what do people think are the most positive aspects of the Union, both now and for the future? Is there a common perception of the Union rather than 28 different perceptions? And if so, what is that perception?

The work of mapping out perceptions of the Union will be closely coordinated with ongoing similar initiatives, such as the pilot project 'The New Narrative on Europe', the 'Citizens Dialogue' and the initiative 'A Soul for Europe'.

It is therefore suggested that a start be made with a pilot project, discovering and mapping the perceptions about the Union within at least five Member States, with the aim of outlining common perceptions about the Union, if any, which go beyond the unique relationship that each country has with the Union.

The results of the Citizens' Dialogues could serve as a basis for the work of this pilot project. The results so far suggest that citizens expect a clear vision about three central questions:

- How much unity is wanted/needed and what are the areas where integration should take place?
- What would make the Union more democratic and how can Union politicians be made accountable for the decisions they make?
- What is the right balance between responsibility and solidarity?

Therefore the appropriation will be mainly used for:

- setting up focus groups composed of citizens from all Member States that would develop proposals as to how the Union can deliver on these visions,
- disseminating and further discussing the outcomes of the focus group meetings in traditional and social media,
- the results will be published in a report and serve as follow-up to and additional input for the 'New Narrative on Europe' as well as for targeted Union communication efforts.

*Remarks*

The budget authority included in the 2013 and 2014 EU budgets a pilot project to create a new narrative for Europe. The aim of that project was to mobilise personalities and opinion-makers from the creative, cultural and scientific sectors to formulate a new narrative to be issued in the form of a charter in advance of the 2014 European elections.

That charter has now been published, and the aim of this preparatory action is to enable the cultural committee behind the charter to continue its dialogue with citizens. The charter is to be seen as a beginning, with the arts community and citizens in Europe being invited to engage and participate in the ongoing discussion on the many narratives on Europe.

An overarching approach will be taken in the form of networks of citizens, cultural institutions and organisations spreading knowledge to the public and inviting citizens to play a role. Furthermore a corps of ambassadors will be established. The task of the ambassadors will be to interact with citizens in the ongoing debate about the new narrative and to engage with the European public.

Pilot project participants also agreed on the need to ensure the project's sustainability, since a narrative is an ongoing process.

Therefore, the preparatory action will:

- conduct events to publicise the charter on the new narrative for Europe in as many Member States as possible, thereby fostering dialogue and debate,
- support public events with broad media coverage that are organised by cultural, scientific and citizens' organisations and focus on the debate on the new narrative for Europe,
- ensure maximum inclusion of citizens by supporting independent media platforms covering the debate on the new narrative for Europe.

*Remarks*

This appropriation is intended to fund general information to citizens on operations concerning the Union, for the purpose of increasing the visibility of the work of the Union institutions, the decisions taken and the stages in the building of Europe. It concerns essentially the funding or co-funding of the production and/or dissemination of multimedia (radio, TV, internet, etc.), information products, including pan-European networks made up of local and national media, as well as the tools necessary to develop such a policy. This appropriation also covers evaluation expenditure. Part of this appropriation will be used for existing pan-European networks of local and national media (radio, television, internet, etc.).

The amount of assigned revenue pursuant to Article 21(3) of the Financial Regulation is estimated at EUR 50 000.

The Commission, when implementing this item, should take duly into account the outcome of the meetings of the Interinstitutional Group of Information (IGI).

*Legal basis*

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

This appropriation is intended to cover the funding of general information to citizens, focusing mainly on the media. The tools developed for better understanding and reporting of topical issues covers mainly:

- multimedia (photo, video, etc.) information material to feed the media and other platforms, including their publication/broadcasting and long-term preservation/dissemination,
- seminars and support for journalists.

This appropriation also covers evaluation expenditure.

The Commission, when implementing this item, should take duly into account the outcome of the meetings of the Interinstitutional Group on Information (IGI).

The amount of assigned revenue pursuant to Article 21(3) of the Financial Regulation is estimated at EUR 1 000.

*Legal basis*

*Remarks*

This appropriation is intended to fund general information to citizens and covers the expenditure on centralised and decentralised communication. The aim of local communication activities is in particular to provide target groups with the tools to gain a better understanding of burning topical issues.

These activities are implemented in the Member States through:

- communication operations linked to specific annual or multiannual communication priorities,
- ad hoc communication operations on a national or international scale that fit in with the communication priorities,
- seminars and conferences,
- organisation of or participation in European events, exhibitions and public-relations activities, organisation of individual visits, etc.,

- direct communication measures targeted at the general public (e.g. citizens' advice services),
- direct communication measures targeted at opinion multipliers, in particular stepped-up measures involving the regional daily press, which is a major information outlet for a large number of Union citizens,
- the management of information centres for the general public in the Commission Representations.

Communication operations can be organised in partnership with the European Parliament and/or the Member States in order to create synergies between the means of each partner and to coordinate their information and communication activities on the European Union.

This appropriation is also intended to cover expenditure on studies, evaluations, meetings of experts and expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts as well as the repayment of travel and related expenses of persons invited to follow the work of the Commission.

The amount of assigned revenue pursuant to Article 21(3) of the Financial Regulation is estimated at EUR 55 000.

The Commission, when implementing this item, should take duly into account the outcome of the meetings of the Interinstitutional Group on Information (IGI).

*Remarks*

This appropriation is intended to fund general information to citizens and cover specifically the opening and management of 'European Public Spaces' (EPS) in the Europe Houses that are formally hosting the EPS. The Commission is to manage the logistical arrangements for the EPS for the benefit of both institutions (the European Parliament and the Commission), including operational costs and the organisation of contracted services. The EPS must be run jointly by the two institutions on the basis of an assessment report on the management and the functioning of the EPS, as well as of a working programme for the year to come. Both these documents, which are drafted jointly by the two institutions and constitute the fundamental elements for allocation of funds for the following year, are to be presented to the budgetary authority in time to be taken into account in the budgetary procedure.

**CHAPTER 16 03 — COMMUNICATION ACTIONS** (*cont'd*)**16 03 02** (*cont'd*)16 03 02 03 (*cont'd*)*Remarks*

This appropriation is intended to cover online multimedia and written information and communication tools concerning the Union, for the purpose of providing all citizens with general information on the work of the Union institutions, the decisions taken and the stages in the building of Europe. Online tools make it possible to gather citizens' questions or reactions on European issues. This is a public service task. The information covers all the Union institutions. These tools must be made accessible to people with disabilities, in accordance with Web Accessibility Initiative (WAI) guidelines.

The main types of tool concerned are:

- the Europa site, which must constitute the main point of access to the existing information and websites concerning the administrative information which Union citizens might need in their daily lives and which therefore must be better structured, made more user-friendly and optimised for mobile devices,
- complementary online channels like social media, blogs and other web 2.0 technologies,
- the Europe Direct Contact Centre (00800-67891011),
- the internet sites, multimedia and written products of the Commission Representations in the Member States,
- online press releases, speeches, memos, etc. (Rapid).

This appropriation is also intended to:

- fund the restructuring of the Europa site in a more coherent way, to optimise the site for mobile devices, to focus it on user needs and to professionalise the use of other online channels like social media, blogs and web 2.0. This includes all types of training, coaching and consultancy services for various groups of stakeholders,
- cover the expenditure relating to hosting and licences costs associated with the Europa site,
- support the exchange of best practices, knowledge transfer and professionalisation by financing visits of digital communication experts and practitioners,
- cover information campaigns for facilitating access to these sources of information, especially for the operation of the Europe Direct Contact Centre, the general multilingual information service about EU matters,
- cover the expenditure relating to the production for various target groups of written publications concerning the Union's activities that are often distributed through a decentralised network, mainly:
  - the Representations' publications (paper newsletters and periodicals): each Representation produces one or more publications that are distributed among multipliers and cover various fields (social, economic and political),

TITLE 16 — COMMUNICATION

CHAPTER 16 03 — COMMUNICATION ACTIONS (*cont'd*)

16 03 77 (*cont'd*)

16 03 77 05 (*cont'd*)

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Social media and the internet have fundamentally changed access to information and communication between people. Union institutions should improve the way they use these ground-breaking tools. Union institutions can use social media networks and online platforms in more innovative ways. Union institutions have no joint communication policy on the use of these tools. Moreover, these tools are still too often used simply to spread a message, whereas they offer the opportunity for conversation between politicians and the people they serve and represent. In contrast to other media (television, radio, newspapers), the internet (and social media in particular) should be used to allow citizens to interact: to provide policy makers with ideas and to start discussion on policy proposals or projects.

The Union must adapt to online reality in its communication strategy. The Union must allow its citizens to interact and to contribute. Regrettably Union communication is currently still very much a top-down process which is neither interactive nor in tune with what the new media can do. Although the social network take-up rate (among Europe's internet users) is about 90 %, the Union's communication strategy does not yet embrace social networks, the internet and mobile services to improve access to information on Union policies or to involve Union citizens. Some Members of Parliament and Commissioners may be using social networks very actively, yet the main Union institutions can do a lot to open up, to include citizens better and to make information available, searchable and shareable.

'Share Europe Online' has successfully run as a pilot project since 2012, with positive responses from stakeholders at both the central institutional level and from the national offices implementing the project.

The pilot project sought to improve the way in which Union institutions use these new media, focusing on their local offices in Member States. The project introduced the practice of social media community management in European Parliament Information Offices and Commission Representations in order improve the provision of information to citizens online and make EU-related information more accessible. An important objective was to build the offices' capacity for enhanced activity on social media by upgrading their staff's skill base through training and coaching by the community managers appointed.

The pilot project has helped to narrow the gap in Union institutional communication via social networks in local languages and on local platforms, thanks to increased and more coordinated activity by the offices involved. The provision of EU-related content which is appealing, relevant to the national community and optimised for social sharing is leading to increased levels of interaction. This is fostering dialogue not only between the Union and its citizens, but also between citizens themselves.

The reach and influence of the institutions' activities are increasing thanks to more targeted communication and partnerships with opinion leaders and local actors, including grassroots and civil society organisations, extending the debate on European issues to a much wider public and broadening the European public sphere.

Through better insight into the conversations taking place on social media, the institutions are also improving their ability to listen and take stock of the concerns of citizens, who are increasingly organising themselves on these networks. 'Share Europe Online' aims to facilitate interaction and access to information, and not to send out opinions about the Union in a top-down manner, which would risk being perceived as propaganda.

**CHAPTER 16 03 — COMMUNICATION ACTIONS** (*cont'd*)**16 03 77** (*cont'd*)16 03 77 05 (*cont'd*)

The budget of the 'Share Europe Online' preparatory action should serve to consolidate the positive practice started under the pilot project in order to complete the upgrading of skills and facilitate further organisational change. The aim is to bring the European Parliament Information offices and Commission Representations up to the level of expertise required to take full advantage of the social media so as to foster interaction with citizens.

As in the pilot project, the preparatory action should involve people within the Union institutions as well as outside experts, civil society and grassroots organisations. Its implementation should be based on working methods jointly agreed between the Union institutions involved.

The rise of social networks has led businesses to create the job of 'community manager'. Community managers act as an interface between a company and its clients; they 'spread the good word about the company in a language that is specific to social networks, they manage virtual communities and understand and respond to their needs' ([http://www.colpis.cat/files/documents/388\\_material.pdf](http://www.colpis.cat/files/documents/388_material.pdf)). With this preparatory action, the 'EU community managers' introduced as part of the 'Share Europe Online' pilot project could continue to make information about the Union accessible and to represent the various Union institutions and provide independent information about the Union and its proceedings.

'Share Europe Online' should integrate parts of existing programmes such as Europe Direct, Euronews, the various web platforms, communication strategies and Union information archives. Furthermore, the preparatory action could continue the work already carried out under the 'Share Europe Online' pilot project.

Remarks

This appropriation is intended to cover expenditure for achieving the objectives established through the multiannual consumer programme for the years 2014-2020. The aim of the programme is to ensure a high level of consumer protection and to empower consumers in the heart of the internal market within the framework of an overall strategy for smart, sustainable and inclusive growth, by contributing to the protection of the health, safety, legal and economic interests of consumers, as well as to the promotion of their right to information, education and to organise themselves in order to safeguard their interests, supporting the integration of such consumer interests into other policy areas. The programme will complement, support and monitor the policies of Member States.

COMMISSION  
TITLE 17 — HEALTH AND CONSUMER PROTECTION

**CHAPTER 17 02 — CONSUMER POLICY** (*cont'd*)

**17 02 01** (*cont'd*)

This general objective shall be pursued through the following four specific objectives:

- safety: to consolidate and enhance product safety through effective market surveillance throughout the Union,
- information and education and support to consumer organisations: to improve consumers' education, information and awareness of their rights, to develop the evidence base for consumer policy and to provide support to consumer organisations, also taking into account the specific needs of vulnerable consumers,
- rights and redress: to develop and reinforce consumer rights, in particular through smart regulatory action, and to improve access to simple, efficient, expedient and low-cost redress including alternative dispute resolution,
- enforcement: to support enforcement of consumer rights by strengthening cooperation between national enforcement bodies and by supporting consumers with advice.

The new programme also needs to take into account new societal challenges which have grown in importance in recent years. They include: the increased complexity of consumer decision-making, the need to move towards more sustainable patterns of consumption, the opportunities and threats that digitalisation brings, an increase in social exclusion and the number of vulnerable consumers, and an ageing population.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This appropriation is intended to cover expenditure for setting up the European consumer travel application, 'Your Europe Travel'. The objective of this application is to establish a one-stop shop that offers information on consumer rights and cross-border issues, and to help travellers when they encounter problems while they are abroad and have limited access to information and advice services.

It will provide practical information for consumers and focus on real-life, cross-border situations, on topics ranging from travel and visa information, passenger and consumer rights, health cards, payment systems, road signs, and the European Consumer Centres (ECCs) that can provide assistance and advice in each of the Member States and in Norway and Iceland.

COMMISSION

TITLE 17 — HEALTH AND CONSUMER PROTECTION

CHAPTER 17 02 — CONSUMER POLICY (*cont'd*)17 02 77 (*cont'd*)17 02 77 03 (*cont'd*)

The strategy relating to the content of this 'smart' application will be defined by the Commission with the active involvement of the European Parliament. The strategy should be revised once a year to take into account new developments.

The application will make menus available which allow users to quickly find the information they need during a trip within the Union. It will be fully multilingual, i.e. available in any of the official Union languages. General Union information will also be available in all the official languages, detailed information in the language(s) of each Member State plus English, French and German.

The goal of this project is to develop a service concept and later an application that can be used by the citizens within the Union on mobile devices to assist them with travel issues, questions and problems. This intelligent application shall answer most questions based on a semantic analysis of the question and of the content available. It shall also offer the possibility of asking further questions, via the Europe Direct service, in the event that the first-line system provides an incomplete reply. Replies via Europe Direct will be given within its established deadlines, in accordance with its quality charter, and in the language of the consumer. The service will be free of charge, except for telecommunications costs.

The content will mostly syndicate existing content from the Commission's Your Europe and ECC Network websites so that it is adapted to each national context. In addition to information, it will include an interactive part/module to help solve disputes with traders. This will give consumers some quick tips to help them solve the issue in question by themselves while they are abroad. More complex issues will be signposted into the normal workflow of the ECC Network and relevant alternative dispute resolution/online dispute resolution options.

In addition to development and production costs, this appropriation is intended to cover the maintenance, running costs and publicity costs of the project for the next 5 years.

*Implementation*

The project should as a starting point draw on knowledge of the current situation with regard to communication with citizens on Union affairs, and should also research state-of-the-art relevant communication technologies.

The project should then apply a collaborative and participative approach to create concepts such as an interactive platform and captioning service by involving the citizens from all over Europe through a behavioural study, resulting in a basic service concept of the application that is created by actual end users.

The project will make the best possible use and/or integrate other relevant applications for mobile devices (Passenger rights, European Health Insurance card), websites for citizens (such as Your Europe, Travelling in Europe, European Youth Portal Travel Section), and services to citizens (such as Europe Direct), to ensure that duplication of efforts is avoided.

Finally, the project should implement the developed concept into a launched application, resulting in the 'European Consumer Travel Application' that can be accessed free of charge for the users from mobile devices.

## CHAPTER 17 02 — CONSUMER POLICY (cont'd)

17 02 77 (cont'd)

17 02 77 03 (cont'd)

This pilot project is estimated to have an overall timeline of 22 months and to have a total budget of EUR 650 000, which includes full implementation of the IT application and building up of the service platform. The completion of the project, including testing, is scheduled for November 2015.

An Editorial Board composed of the Commission and representatives of the ECC Network will be responsible for the editorial policy, including language and priorities for content selection.

*Legal basis*

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

*Remarks*

The pilot project will help small and medium-sized enterprises (SMEs) to comply with consumer protection law in the online environment. Better compliance with the rules would reduce problems for consumers and benefit traders by avoiding problems with the enforcement authorities.

— Training modules for SMEs on Union consumer contract and marketing law for the online environment, including on Directive 2011/83/EU (Consumer Rights Directive), Directive 2000/31/EC (e-Commerce Directive) and the applicable national legislation in the Member States will be produced by a contractor for the Commission and will be made available free of charge to consumer and business associations.

— The modules will be produced as offline learning courses for all Member States (plus Norway and Iceland) in the languages of all the Member States. In a second phase the modules could be adapted for online use to facilitate cross-border trade.

- Consumer and business associations will be encouraged to use these modules for offering training programmes to SMEs about their obligations.
- The project will have a start-up phase running from mid-2015 to mid-2016 for drafting training modules and organising the process, and an operational phase subsequently. The training modules will be improved and added to over time, as feedback will allow corrections to be made, and changing legislation or markets will necessitate additions.
- A kick-off conference with the full stakeholder base (consumer and business associations, legal practitioners, authorities), followed by a conference every two years, will make it possible to assess progress, analyse uptake, assess effectiveness and give visibility to the work.

COMMISSION

TITLE 17 — HEALTH AND CONSUMER PROTECTION

**CHAPTER 17 03 — PUBLIC HEALTH** (*cont'd*)**17 03 01** (*cont'd*)

The general objectives of the programme shall be to complement, support and add value to the policies of the Member States to improve the health of Union citizens and reduce health inequalities by promoting health, encouraging innovation in health, increasing the sustainability of health systems and protecting Union citizens from serious cross-border health threats.

The 'Public Health' programme 2014-2020 focuses on four specific objectives:

- supporting public health capacity building and contributing to innovative, efficient and sustainable health systems: identify and develop tools and mechanisms at Union level to address shortages of resources, both human and financial, and facilitate the voluntary up-take of innovation in public health intervention and prevention strategies,
- facilitating access to better and safer healthcare for Union citizens: increase access to medical expertise and information for specific conditions also beyond national borders, facilitate the application of the results of research and develop tools for the improvement of healthcare quality and patient safety through, inter alia, actions contributing to improve health literacy,
- promoting health, preventing diseases, and fostering supportive environments for healthy lifestyles: identify, disseminate and promote the uptake of evidence-based and good practices for cost-effective disease prevention and health promotion measures by addressing in particular the key lifestyle-related risk factors with a focus on the Union added value,
- protecting citizens from serious cross-border health threats: identify and develop coherent approaches and promote their implementation for better preparedness and coordination in health emergencies.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

*Legal basis*

Regulation (EU) No 282/2014 of the European Parliament and of the Council of 11 March 2014 on the establishment of a third Programme for the Union's action in the field of health for the period 2014-2020 (OJ L 86, 21.3.2014, p. 1).

*Remarks*

This appropriation is intended to cover the Centre's personnel and administrative expenditure. In particular, Title 1 covers the salaries of permanent staff and seconded experts, the costs relating to recruitment, interim services, staff training and mission expenses; Title 2 'Expenditure' relates to the renting of the Centre's office facilities, the fitting-out of premises, information and communication technology, technical installations, logistics and other administrative costs.

This appropriation is also intended to cover operational expenditure relating to the following target areas:

- improving surveillance of communicable diseases in the Member States,
- strengthening the scientific support provided by the Member States and the Commission,
- enhancing the preparedness of the Union against emerging threats from communicable diseases, especially hepatitis B, including threats related to intentional release of biological agents, and diseases of unknown origin, and coordinating the response,
- strengthening the relevant capacity in the Member States through training,
- communicating information and building partnerships.

This appropriation is also intended to cover the maintenance of the emergency facility (Emergency Operations Centre) linking the Centre online with national communicable disease centres and reference laboratories in Member States in the event of major outbreaks of communicable diseases or other illnesses of unknown origin.

The Centre must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The Centre's establishment plan is set out in Annex 'Staff' to this section.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

It will establish a network of exchange between experts and policy advisers across the Union, focusing on support and training for the development and implementation of policies, as well as specific activities, addressing health inequalities at national and subnational/regional level.

Priorities for the network will include, in particular, development of expertise in issues related to effectiveness of prevention policies, differences and discrimination in access to healthcare, as well as strategies to alleviate the social, environmental and behavioural factors contributing to health inequalities.

The pilot project will also carry out a review and evaluations of activities addressing health inequalities already supported through Union Structural Funds and programmes. Specific activities carried out under this pilot project will be defined after a consultation process among Member States involved and stakeholders in the field of public health and healthcare policies.

This pilot project will be aimed at improving the awareness and knowledge in key target groups for policy about the importance of addressing health inequalities and the opportunities to do so, in particular through the Structural Funds. It will also review and evaluate actions taken through the Structural Funds and programmes in this matter, thus promoting the development of better policymaking in future.

*Remarks*

Across the Member States the occurrence of non-communicable diseases (NCDs) is increasing at an unprecedented speed. At the same time, more and more Europeans are struggling with problems concerning, e.g. obesity and mental health. Isolated and vulnerable persons in particular struggle with problems linked to deteriorating health. Both men and women suffer from such health decline but their health issues are not the same and should be addressed differently.

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 77 (*cont'd*)17 03 77 13 (*cont'd*)

In 2011 the Commission published a comprehensive report on the state of the health of European men which showed important inequalities between women's and men's health. One of the key statements in the report is 'Improving men's health also has both direct and indirect benefits for women and children'. In 2009 the Commission published a similar report on the state of the health of European women.

There seems to be a growing recognition of the fact that men's and women's health problems are to be treated from different angles and therefore this project has the following objectives:

- to gather and assess — e.g. through European Community Health Indicators (ECHIs) — existing information on the differences of men's and women's (in particular the isolated and vulnerable) health in the participating Member States and on existing practices to address this issue,
- to increase the knowledge base on the lifestyles and attitudes towards individual (including mental) health, prevention, treatment, and rehabilitation of especially isolated and vulnerable persons, and identify the reasons why there seems to be greater reluctance in this specific group of people to change lifestyles and to seek the help of doctors or other health services. The studies can be both disease-specific and population-based,
- to analyse health systems across different Member States to identify what the causes of the relative underutilisation of health services by less advantaged groups are and what can be done to address it,
- on basis of the evidence collected to develop and test (gender-) targeted strategies to improve the health of these people, to facilitate their access to health services and to prevent health problems from occurring in the first place,
- to disseminate the results and best practice examples to Member States, in particular health providers in the primary sector, and to encourage follow-up on the results.

TITLE 17 — HEALTH AND CONSUMER PROTECTION

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 77 (*cont'd*)17 03 77 14 (*cont'd*)*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action is intended to continue the project which aims at underlining the importance of a correct and healthy diet with a focus on the ageing population.

The ageing of the population of Europe is a demographic phenomenon that is due to a decrease in fertility and to an increase of life expectancy among European citizens.

The population of Europe is expected to age over the next 40 years and this phenomenon is closely related to nutrition issues.

As recognised in various studies, nutrition has a strong and important impact in the treatment and prevention of several diseases and in maintaining good health and quality of life in an ageing population.

With advancing age, there is a high incidence of chronic diseases. Evidence points to the important effect of nutrition and, in particular, of a balanced and healthy diet based on fruit and vegetables, and on one's susceptibility to such diseases and their development and outcome.

This project also seeks to provide parents and children with information on nutrition. It will focus on the early years of life, and could therefore cover prenatal nutrition, breastfeeding, and childhood nutrition. The project has two main objectives, namely to educate parents on the importance of good nutrition for their children, and to educate children so they consciously make healthy lifestyle choices throughout their lives. The project will operate within the framework of the Health programme and will specifically address two of the programme's overarching objectives: that of promoting health and reducing health inequalities, and that of disseminating health information.

This preparatory action will try to reach its target audiences through a range of channels, such as prenatal classes, hospitals, nurseries and preschool establishments, and schools. It should involve appropriate civil society organisations, such as health-orientated NGOs, as well as healthcare professionals such as, for instance, paediatric doctors and midwives, and national and regional health authorities. Cooperation between these different actors should aim to deliver targeted education about nutrition, independently of the food industry, to both parents and children. Information campaigns could be launched in the form of leaflets (to be given, for example, to pregnant mothers by midwives, or to parents by paediatric doctors) or presentations in schools.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Epilepsy is a disorder of the brain characterised by an enduring predisposition to generate epileptic seizures, and by the neurobiological, cognitive, psychological, and social consequences of this condition. The latter include premature death, stigmatisation, social exclusion, and reduced quality of life. While effective treatments are available, barriers exist in relation to the access to healthcare, resulting in a significant treatment gap. A European survey completed more than a decade ago indicated that there were insufficient resources and marked disparities in the availability of epilepsy care among Member States, but the situation at present is unknown. Adding to the difficulties in allocation of adequate resources, estimates of the prevalence and cost of epilepsy in Europe vary considerably. A recent review by the European Brain Council estimated that 2,6 million people in Europe have epilepsy whereas a WHO/ ILAE/IBE report estimates that 6 million people in Europe suffer from epilepsy. The true prevalence rate of epilepsy can probably vary somewhat between countries and regions, and possibly also over time. It is unclear, however, if the reasons for the pronounced variability, both between countries and within countries, in reported prevalence rates in Europe is explained by true differences in prevalence, by differences in methodology and lack of reliable data, or by a combination.

The burden of epilepsy in Europe is thus a field characterised by considerable knowledge gaps with major un-researched countries and regions, and by conflicting observations in countries where such research has been carried out. There is therefore an urgent need for a more definitive European-wide comprehensive study of the burden of epilepsy and of access to healthcare using appropriate and standardised methodology. Information derived from this study will be essential for action plans including decisions on allocation of resources for the provision of sustainable, adequate, equal, and cost-effective epilepsy care across Europe. A targeted approach to the delivery of care is especially important for a condition like epilepsy which reports a high burden of disease. Configuring the delivery of healthcare services to alleviating this burden throughout Europe requires accurate data not only on those needing treatment, on attitudes towards epilepsy in society and on existing barriers for access to healthcare, but in addition on the economic cost of care.

COMMISSION

TITLE 17 — HEALTH AND CONSUMER PROTECTION

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 77 (*cont'd*)17 03 77 15 (*cont'd*)

It is expected that a study on this scale will have a major impact on identifying if there are areas in Europe where epilepsy can be definitively assessed as being more prevalent than others. It is hoped that the study will also provide conclusive evidence of the prevalence rate of epilepsy in the Union which would have a major impact on how the disease is viewed in terms of policy decision making. Similarly a cost study would allow for better planning to manage the disease. The study is expected to identify deficiencies in what is currently perceived as fragmented epilepsy care with pronounced differences in resources between Member States and furthermore the need for the education of public and healthcare workers to combat the stigma associated with epilepsy. The proposed unique European study will facilitate a coordinated pan-European action to ensure equal epilepsy care and quality of life for people with epilepsy. It will also demonstrate the need for individual Member States to improve accessibility of epilepsy care, ultimately improving the life of people with epilepsy in Europe and reducing the costs of the disease.

*Aim of the project*

The aim of the project is to assess the burden of epilepsy as well as the available epilepsy healthcare in the Union to build a coordinated information platform across Member States involving NGOs, stakeholders and government organisations with regard to the burden of epilepsy. Good practices will be identified and recommendations made for better epilepsy care throughout the Union.

*The strategic objective* is to provide the necessary data for allocation of adequate resources for high-quality epilepsy care equal in all Member States thus closing the treatment gap, preventing the devastating consequences of epilepsy, reducing unemployment, stigma, and isolation, and securing improved quality of life for people with epilepsy, all in line with the recommendations of the European Parliament's Written Declaration on Epilepsy.

*Description of the project*

This project would first define a standardised methodology appropriate for the study of the stigma and public attitudes relating to epilepsy and its incidence, prevalence, and cost, and access to and organisation of epilepsy care. The proposed action is a standardised, prospective population-based study carried out in representative regions in 8-12 EU Member States. These will be selected to represent all Union regions, East, West, North, and South, and to include, in the main, countries where no data are available. Some countries where data are available from previous research will also be included to enable validation of the current methodology. Research teams will be established in the participating countries. These will utilise a multi-source methodology searching, in a defined geographical area, relevant hospitals, institutions, general practitioners, EEG laboratories to ascertain cases meeting the criteria for epilepsy as defined by the International League Against Epilepsy. The aim is to capture all age groups, disease duration, and severity. Direct healthcare cost and non-medical costs as well as indirect costs will be determined prospectively over a one-year period for each case with epilepsy as well as for matched controls without epilepsy. The analysis will include assessments of stigma, quality of life, employment and access to healthcare. The local research teams will use validated questionnaires to assess knowledge and attitudes towards epilepsy among the public and healthcare professionals in their regions as well as survey the regional health organisation for epilepsy care.

The results will be used to formulate recommendations to policymakers including methods for follow-up of their implementation and sustainability.

*Remarks*

Proposed area for investigation:

More than 10 % of Europeans suffer from chronic kidney disease (CKD), with a high risk of progression to total kidney failure requiring kidney replacement therapy — either dialysis or transplantation. The growing epidemic of diabetes and cardiovascular diseases is fuelling these numbers. Dialysis is resource-heavy, costing EUR 40 000 to EUR 80 000 per patient per year, depending on the country and method, while kidney transplantation costs nearly the same as dialysis in the first year, but less than 40 % of that amount in the following years. The prognosis, including life expectancy and quality of life, is much better after kidney transplantation than dialysis. Nearly 50 000 Europeans are on a waiting list for a kidney, and given the current shortage of donated organs, some of them will die waiting.

This pilot project will compare, from a macro-economic perspective, the various treatment modalities for CKD in Member States by investigating the factors that influence the treatment choice (by patient or doctor) and the impact of that choice on healthcare budgets. In addition, the project will examine obstacles to improving kidney donation and transplantation rates. It will answer the question: ‘Why is there such an enormous variability in practice in the overall management of CKD and access to transplantation in Europe, and how could these practices be harmonised in order to ensure equal and better quality of care while reducing costs?’

In times of economic crisis, it is crucial to find ways of improving the efficiency of the healthcare systems in the Member States. In the treatment of CKD, two main treatment modalities are currently available: dialysis and kidney transplantation.

With regard to dialysis, it is necessary to assess which type of dialysis would give a better outcome from two standpoints: first, for the patient (improved quality of life and better acceptance) and second, from a health economics point of view.

COMMISSION

TITLE 17 — HEALTH AND CONSUMER PROTECTION

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 77 (*cont'd*)17 03 77 16 (*cont'd*)

Transplantation is not used as frequently as dialysis, despite the fact that it makes for a far better quality of life and is more cost-efficient. Hence, an assessment of the different national organisational practices which play a role in facilitating transplantation (i.e. different organ donor policies, different consent systems, the existence of transplant coordinators, bilateral or multilateral agreements for cross-border exchange of organs between Member States, etc.) is essential in order to identify and support the practices which ultimately have a significant effect on transplantation waiting times.

These differences in donor policies greatly affect transplantation waiting times, and long waiting times on dialysis have major deleterious effects on kidney transplant candidates:

- the death rate on dialysis is higher when compared with the survival rate post-transplant,
- the longer the waiting time on dialysis, the lower the transplantation success and patient survival rate,
- finally, the costs of dialysis are much higher than those associated with a functioning kidney transplant, meaning that the longer the waiting time on dialysis is, the higher the total expenditure will be.

All these factors have a significant impact not only on access to transplantation but also on overall spending for the treatment of CKD. Therefore, it is critical to gather the necessary information about their impact on final treatment outcomes, in terms of both quality of care and cost-efficiency.

At present, some Member States are better organised than others with regard to dialysis treatment and kidney transplantation. This stems from the fact that some Member States have included the role of transplant donor coordination in their national structures and have established collaboration through specialised networks such as Eurotransplant and Scandiatransplant.

This project will assess the situation in the Member States, sharing and building on the expertise and data from existing initiatives and registers. In addition, the project will take into account the work done in the mid-term review of the Action Plan on Organ Donation and Transplantation, and other projects in the field, such as ETPOD, EULID, Elupsy and the Accord Joint Action, which focuses on living donation.

Given that advances in the implementation of health policies, including donation policies and waiting list policies, are the responsibility of the competent national authorities, the project will involve those authorities in cooperation with specialised organisations such as the European Society of Organ Transplantation (ESOT) and the European Transplant Coordinators Organisation (ETCO) and give them access to those organisations' expert input.

*Expected outcomes*

In summary, investigating the many factors that influence the choice of CKD treatment for kidney patients and the different organisational practices which play a role in facilitating kidney transplantation will help to bring about better and more cost-efficient kidney disease treatment practices in Member States.

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 77 (*cont'd*)17 03 77 16 (*cont'd*)

The overall project goal is to provide an overview of the different treatment modalities and the factors that influence the selection of those modalities in Member States, with a view to harmonising end-stage kidney disease treatments and improving the availability of transplantation across Member States, while at the same time reducing healthcare costs and improving the quality of care.

It is expected that some of the Member States participating in the project will be able to use it as a stepping stone towards successful implementation of Directive 2010/53/EU of the European Parliament and of the Council of 7 July 2010 on standards of quality and safety of human organs intended for transplantation and of the EU Action Plan on Organ Donation and Transplantation (OJ L 207, 6.8.2010, p. 14).

*Remarks*

This pilot project will focus on training and social awareness to encourage public reflection on organ donation. It will include training for social activists who will pass on the main positive aspects to the rest of society.

The project is for society as a whole, with special emphasis on families, economic and social actors and health professionals as potential social activists to support organ donors and recipients.

Awareness-raising activities will take place in schools and vocational training establishments, helping to increase organ and tissue donation and improve distribution processes and transplantation rates.

*Remarks**Aims*

- (1) To better understand the specific health inequalities experienced by lesbian, gay, bisexual, transgender and intersex (LGBTI) people, focusing in particular on overlapping inequalities stemming from discrimination on other grounds (e.g. age, disability, race and ethnicity) and the barriers faced by health professionals when providing care to those groups.
- (2) To provide health professionals with specific tools to ensure that they have the right skills and knowledge to overcome those barriers and contribute to the reduction of health inequalities.

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 77 (*cont'd*)17 03 77 18 (*cont'd*)*Description*

This project follows on from the Fundamental Rights Agency project 'Public authorities and fundamental rights of LGBT people', in which healthcare professionals were interviewed on specific health inequalities faced by LGBTI people. It will complement pilot projects 'Reducing health inequalities: building expertise and evaluation of actions' (Item 17 03 77 12) and 'Developing evidence-based strategies to improve the health of isolated and vulnerable persons' (Item 17 03 77 13), which address health inequalities, but not as experienced by LGBTI people. To bridge that gap will be the specific focus of this project.

*Outcomes*

- (1) Information will be gathered on specific health inequalities experienced by LGBTI people; particular attention will be paid to those within this group who are at risk of inequality as a result of age, disability, race or ethnic background.
- (2) Health professionals will be aware of both those health inequalities and the barriers that they themselves face when providing care to those groups. They will be equipped to overcome these barriers through training modules.
- (3) Training modules will be made available to all health stakeholders across the Union.

*Remarks*

The pilot project has been given an A rating by the Commission (pre-assessment). The Commission communication of 4 April 2014 on effective, accessible and resilient health systems stressed that accessibility to healthcare was one of the three pillars of the Union agenda for effective, accessible and resilient health systems.

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 77 (*cont'd*)17 03 77 19 (*cont'd*)

Access to healthcare in rural areas is a particular problem in various Member States. As populations move to urban areas, resulting in the decay of small and medium-sized cities, the issue of adequate healthcare provision in rural areas will grow in importance in other Member States as well.

The project will help to reduce disparities in healthcare accessibility and to ensure equitable access in rural areas within and among the Member States. Good practices on policies and tools used to improve access to healthcare in rural areas will be identified and exchanged, taking into account factors such as access to facilities and to medical professionals, as well as the cost and affordability of healthcare, the optimum size of healthcare services and the scope for cross-border collaboration between Member States. The specific activities to be carried out under this project will be laid down after a consultation process among Member States and stakeholders in the field of public health and healthcare policies.

*Remarks*

The Union's financial assistance helps accelerate the eradication or control of animal diseases by providing funds to supplement national financial resources and contributes to harmonising measures at Union level. The bulk of these diseases or infections are zoonoses communicable to man (BSE, brucellosis, avian influenza, salmonellosis, tuberculosis, etc.). Moreover, the persistence of the diseases in question hampers the smooth operation of the internal market; fighting them helps to improve the level of public health and to boost food safety in the Union.

This appropriation is also intended to cover the Union's contribution to measures for eliminating obstacles to the free movement of goods in these sectors, for veterinary support and as back-up action.

It consists in providing financial assistance:

- for the purchase, storage and formulation of foot-and-mouth antigens and of different vaccines,
- for the development of marker vaccines or tests that can distinguish between sick and vaccinated animals.

*Remarks*

The outbreak of some animal diseases in the Union could possibly have a major impact on the operation of the internal market and on the Union's commercial relations with third countries. Thus, it is important for the Union to make a financial contribution in order to allow the fastest eradication possible of any outbreak of a serious infectious disease in Member States by deploying Union resources to fight these diseases.

This appropriation is intended to cover curative actions to combat the pests and diseases threatening agricultural and horticultural crops, forests and landscape, among them the spread of exotic invasive species and diseases (such as pine nematode and others), which are becoming more frequent and are spreading.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project will focus on the management of transported animals with a certain focus on the main farm species and key stakeholders participating in the transport of animals (farmers, specialised transporters, traders, slaughterhouse operators and veterinarians).

The final output of the pilot project will be an analysis of the different practices on assessment of the animals in order to bring the best practices to light. Based on this analysis the project will establish standard operating procedures for transporting animals and a strategy to disseminate those procedures among stakeholders including possibly training courses as necessary.

*Animal transport — Background information*

Every year nearly 40 million farmed animals are transported between Member States. This transport of animals is necessary for farms specialised in breeding, rearing, fattening and for slaughterhouses.

CHAPTER 17 04 — FOOD AND FEED SAFETY, ANIMAL HEALTH, ANIMAL WELFARE AND PLANT HEALTH (*cont'd*)17 04 77 (*cont'd*)17 04 77 03 (*cont'd*)

However, there are a lot of different practices in the Member States, among others because of poor compliance of some requirements with Regulation (EC) No 1/2005 on the protection of animals during transport — e.g. conflicting veterinary assessments in animal transport.

Regulation (EC) No 1/2005 requires that animals are checked by the competent authority for fitness before they are transported on long journeys between Member States (and with third countries). Also for short or national journeys an assessment of the animal's fitness must be made.

A veterinarian/farmer at a farm might assess the animal's condition and approve the transport. Once the animal has arrived at, e.g. the slaughterhouse, the veterinarian then might declare the animal unsuitable for transport. Situations like these are not satisfactory for either the animals or the drivers.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

It is extremely important for small cheesemaking to continue and for the sector to expand, in view of the growing consumer demand for high-quality local produce. Small cheesemaking provides jobs and offers a way in to farming — in particular for young people — that does not call for the investment of very large sums of money.

Cheesemaking is governed, in the main, by Union rules which apply to farmers and food processing undertakings alike, including very small undertakings. Regrettably, in many cases those rules are applied by national and regional authorities in too rigid a manner, without paying any heed to the principles of adaptability and flexibility clearly established in the relevant legislation.

CHAPTER 17 04 — FOOD AND FEED SAFETY, ANIMAL HEALTH, ANIMAL WELFARE AND PLANT HEALTH (*cont'd*)17 04 77 (*cont'd*)17 04 77 04 (*cont'd*)

This project accordingly seeks to ensure that proper account is taken of small cheesemakers' need for flexibility and to secure final validation by the Commission, thus sending out a positive message about Union legislation and the Union in general, not just to farmers and cheesemakers but also to consumers.

The HACCP approach seeks to capitalise on experience in order to improve processes and thus ensure that a closer check is kept on food safety. It is an approach that normally draws on quality control resources of the kind only large companies are able to put in place. Under this project, small producers will come together to draw up guidelines for proper hygienic practice as a first step in a response to this need for continuous improvement that will be at least as effective, and in all probability more transparent.

One of the project's aims is to produce guidelines for proper hygienic practice validated by the Commission that can serve as a reference for all those working in this area.

The guidelines will therefore be based on how the professionals in the sector actually work, rather than on theory. The fact that they will be drawn up by the 11 trade organisations making up the FACE network, with the assistance of research centres operating in related sectors, will ensure that proper account is taken of traditional know-how in the various regions and that the knowledge and experience of implementing HACCP approaches tailored to small processing facilities that various groups have accumulated over a number of years are pooled and put to good use.

This innovative approach, based on self-organisation at European level and the participation of relevant partners, is also in line with the idea of professionals in each sector taking responsibility for health and hygiene issues that is put forward in the relevant legislation, with the legislative authorities setting the ultimate objectives and the professionals making the arrangement required in order to meet those objectives.

In view of the various challenges facing it (languages, logistics, organisational requirements, etc.), this ambitious multi-partner project is in need of financial support.

- IT and communication systems for efficient management of migration flows across borders, including investments in existing and future systems,
- infrastructures, buildings, communication and IT systems and operating equipment required for the processing of visa applications and consular cooperation, as well as other actions aimed at improving the quality of service for the visa applicants,
- training regarding the use of that equipment and those systems and the promotion of quality management standards and training of border guards, including where appropriate in third countries, regarding the execution of their surveillance, advisory and control tasks with respect to international human rights law, and taking into consideration a gender-sensitive approach, including the identification of victims of human trafficking and people smuggling,
- secondment of Immigration Liaisons Officers and document advisers in third countries and the exchange and secondment of border guards between Member States or between a Member State and a third country,
- studies, training, pilot projects and other actions gradually establishing an integrated management system for external borders as referred to in Article 3(3) of Regulation (EU) No 515/2014 including actions aiming to foster interagency cooperation either within Member States or between Member States and actions relating to the interoperability and harmonisation of border management systems,
- studies, pilot projects and actions aiming to implement the recommendations, operational standards and best practices resulting from the operational cooperation between Member States and Union agencies.

This appropriation is also intended to cover the expenditure related to actions in relation to and in third countries and in particular the following:

- information systems, tools or equipment for sharing information between Member States and third countries,
- actions relating to operational cooperation between Member States and third countries, including joint operations,
- projects in third countries aimed at improving surveillance systems to ensure cooperation with the Eurosur,
- studies, seminars, workshops, conferences, training, equipment and pilot projects to provide ad hoc technical and operational expertise to third countries,
- studies, seminars, workshops, conferences, training, equipment and pilot projects implementing specific recommendations, operational standards and best practices, resulting from the operational cooperation between Member States and Union agencies in third countries.

This appropriation is also intended to cover foregone fees from visas issued for the purpose of transit and additional costs incurred in implementing the Facilitated Transit Document (FTD) and the Facilitated Rail Transit Document (FRTD) scheme in accordance with Council Regulation (EC) No 693/2003 of 14 April 2003 establishing a specific Facilitated Transit Document (FTD), a Facilitated Rail Transit Document (FRTD) and amending the Common Consular Instructions and the Common Manual (OJ L 99, 17.4.2003, p. 8) and Council Regulation (EC) No 694/2003 of 14 April 2003 on uniform formats for Facilitated Transit Documents (FTD) and Facilitated Rail Transit Documents (FRTD) provided for in Regulation (EC) No 693/2003 (OJ L 99, 17.4.2003, p. 15).

CHAPTER 18 02 — INTERNAL SECURITY (*cont'd*)

18 02 01 (*cont'd*)

18 02 01 01 (*cont'd*)

At the Commission's initiative, this appropriation may be used to finance transnational actions or actions of particular interest to the Union. To be eligible for funding, those actions shall in particular pursue the following objectives:

- to support preparatory, monitoring, administrative and technical activities, required to implement external borders and visa policies, including to strengthen the governance of the Schengen area by developing and implementing the evaluation mechanism as established by Council Regulation (EU) No 1053/2013 of 7 October 2013 establishing an evaluation and monitoring mechanism to verify the application of the Schengen *acquis* and repealing the Decision of the Executive Committee of 16 September 1998 setting up a Standing Committee on the evaluation and implementation of Schengen (OJ L 295, 6.11.2013, p. 27), to verify the application of the Schengen *acquis* and the Schengen Borders Code in particular mission expenditure for experts of the Commission and the Member States participating in on site visits,
- to improve the knowledge and understanding of the situation prevailing in the Member States and third countries through analysis, evaluation and close monitoring of policies,
- to support the development of statistical tools, including common statistical tools, and methods and common indicators,
- to support and monitor the implementation of Union law and Union policy objectives in the Member States, and assess their effectiveness and impact, including with regard to the respect of human rights and fundamental freedoms, as far as the scope of this instrument is concerned,
- to promote networking, mutual learning, identification and dissemination of best practices and innovative approaches amongst different stakeholders at European level,
- to promote projects aiming at harmonisation and interoperability of border management-related measures in accordance with common Union standards with a view to developing an integrated European border management system,
- to enhance awareness of Union policies and objectives among stakeholders and the general public, including corporate communication on the political priorities of the Union,
- to boost the capacity of European networks to assess, promote, support and further develop Union policies and objectives,
- to support particularly innovative projects developing new methods and/or technologies with a potential for transferability to other Member States, especially projects aiming at testing and validating research projects,
- to support actions in relation to and in third countries as referred to in Article 4(2) of Regulation (EU) No 1053/2013,
- awareness-raising, information and communication activities in relation to Union home affairs policies, priorities and achievements.

This appropriation shall also cover financial assistance to address urgent and specific needs in the event of an emergency situation which means a situation of urgent and exceptional pressure where a large or disproportionate number of third-country nationals cross or are expected to cross the external border of one or more Member States.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Match fixing poses a serious threat to the integrity of sport and may be a way of laundering money for criminal groups. The aim of this pilot project is to ensure fair sports betting, to reduce corruption in sport and to prevent gambling from being used for criminal purposes. A range of expertise and experience should be combined in order to establish new integrated mechanisms that could involve cooperation between law enforcement authorities, online and offline betting operators, gambling organisations, sports federations, gambling regulators, sports clubs and athletes. Stepped-up information sharing between private actors and law enforcement authorities, as well as between police forces from different Member States, could lead to better prevention and faster response to suspicious activities at both national and international level.

*Actions:*

- collecting and analysing information from qualified sources: online and offline betting operators, gambling organisations, sports federations, gambling regulators and law enforcement authorities,
- developing risk indicators to be used at both national and Union level,
- assessing potential sports betting threats,
- enhancing information sharing and cooperation between private operators and police forces and between law enforcement authorities of different Member States,
- identifying sports events that could be targeted by corrupt athletes and/or criminals for match fixing purposes, including by monitoring the media, the internet and social networks,
- warning all stakeholders about specific risks of match fixing by disclosing information in an appropriate and timely manner,
- supporting competent authorities in undertaking investigations, where necessary, both within sport and in criminal circles,
- creating working groups or round tables at national level to promote the exchange of views and best practices between stakeholders,
- establishing mechanisms for anonymous reporting to national contact points.

This appropriation is also intended to cover actions related to the resettlement, transfer of applicants for and beneficiaries of international protection and other ad hoc humanitarian admission

At the Commission's initiative, the appropriation may be used to finance transnational actions or actions of particular interest to the Union. These actions shall, in particular, support:

- the furthering of Union cooperation in implementing Union law and in sharing good practices in the field of asylum, notably on resettlement and transfer of applicants for and/or beneficiaries of international protection from one Member State to another including through networking and exchanging information, including arrival support and coordination activities to promote resettlement with the local communities that are to welcome resettled refugees,
- the setting-up of transnational cooperation networks and pilot projects, including innovative projects, based on transnational partnerships between bodies located in two or more Member States designed to stimulate innovation, and to facilitate exchanges of experience and good practice,
- studies and research on possible new forms of Union cooperation in the field of asylum, and relevant Union law, the dissemination and exchange of information on best practices and on all other aspects of asylum policies, including corporate communication on the political priorities of the Union,
- development and application by Member States of common statistical tools, methods and indicators for measuring policy developments in the field of asylum,
- preparatory, monitoring, administrative and technical support, development of an evaluation mechanism, required to implement the policies on asylum,
- cooperation with third countries on the basis of the Union's Global Approach to Migration and Mobility, in particular in the framework of the implementation mobility partnerships, regional protection programmes,
- awareness-raising, information and communication activities in relation to Union home affairs policies, priorities and achievements.

This appropriation shall also cover urgent and specific needs in the event of an emergency situation.

CHAPTER 18 03 — ASYLUM AND MIGRATION (*cont'd*)

18 03 77 (*cont'd*)

18 03 77 08 (*cont'd*)

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The main objective of this preparatory action is to establish a network of contacts and discussion between targeted municipalities and local authorities in Member States which have just started a resettlement programme, or wish to participate in the near future, and Member States which are experienced in resettlement, drawing on the United Nations High Commissioner for Refugees (UNHCR) and non-governmental organisation (NGO) experiences and best practices in the resettlement and reintegration of refugees. The preparatory action will cover the following actions:

- identifying municipalities or local authorities in Member States that have just started resettlement programmes (e.g. Portugal, Romania) or are about to do so (e.g. Spain) and arranging meetings with selected municipalities or local authorities in resettlement countries (e.g. the United Kingdom and the Netherlands) with a view to strengthening 'new' resettlement programmes and ensuring that they are of a high quality and sustainable,
- identifying municipalities or local authorities or NGOs in Member States not yet participating in resettlement programmes, but wishing to join the network with a view to future participation in such programmes,
- holding meetings of representatives of the targeted local authorities and municipalities involved, along with the UNHCR, participating NGOs and representatives of resettled refugees, to lay down the activities to be developed jointly, including visits, exchanges of experience, training and thematic meetings focusing on issues such as housing, education and employment,
- designing a form for collecting information from the various stakeholders on procedures, types of monitoring prior to resettlement, types of information collected on the refugees to be resettled (including cultural, health and educational issues and diet), infrastructure, human resources, accommodation, reception, actions taken after resettlement for the integration of refugees, community participation in the process, any economic, legal or educational aid, the role of refugees already resettled in the integration process, and cooperation with NGOs,
- creating a task force, with the necessary human and technical resources, to make the practical arrangements for the project and in particular to provide for the necessary meetings, collect available information, create a website and content for it, thus increasing the exchange of information between the stakeholders in the resettlement process, and create links with existing resettlement-related projects and/or websites. This website will also allow information on past and future meetings between municipalities or local authorities to be made available to all interested parties on a systematic basis,
- collating the information gathered by the task force, which will then circulate it for discussion on the network, in order to draw conclusions on best practices.

The experience gained from the preparatory action will be recorded and passed on to the Resettlement Unit in the European Asylum Support Office (EASO) once it has been set up.

*Remarks*

The main objective of this preparatory action is to create a line of funding for the final benefit of victims of torture whether Union citizens and/or migrants present in the Union. It will enable rehabilitation centres to offer victims of torture as full rehabilitation as possible thus empowering torture victims to function properly in the society and to integrate faster in the European economies.

The preparatory action will cover the following actions:

- to provide victims with access to holistic rehabilitation such as multi-disciplinary support and counselling, including physical and psychotherapeutic treatment, legal services, and socio-economic support, by providing funds for the costs of rehabilitation centres for victims of torture (new or existing ones),
- to support the capacity building of rehabilitation centres via networking activities (in and outside Europe), research, training, development of common tools, exchange of good practices, peer supervision as a prevention of vicarious trauma, etc.,
- to support activities aiming at the empowerment of torture victims themselves and, in general, at supporting the integration capacities of torture victims in European countries,
- to support advocacy actions aiming at ensuring that Member States comply with the right to rehabilitation as defined in General Comment 3 to Article 14 of Convention Against Torture.

Since 2011, the implementation of the approved pilot project has been a success. The first call for proposals has been launched in October 2011 and resulted in 31 applications received from centres in 14 Member States. The total of requested grants in the Union amounted to EUR 6 000 000, showing the great need for financial support among rehabilitation centres. Out of the 31 proposals, only 4 projects have been financed.

The second call for proposal was launched in July 2012 with 25 applications submitted from various countries. As EUR 2 000 000 were available in 2012 (compared to only EUR 1 000 000 in 2011), 7 projects have been selected.

18 03 77 09 (*cont'd*)

The funds needed to support all the projects which applied for funding amounted to approximately EUR 8 000 000, showing the relevance of the fund and the needs to be covered.

The number of applications received so far demonstrates the needs in the Union for supporting the rehabilitation of torture victims.

CHAPTER 19 01 — ADMINISTRATIVE EXPENDITURE OF THE 'FOREIGN POLICY INSTRUMENTS' POLICY AREA (*cont'd*)19 01 04 (*cont'd*)19 01 04 01 (*cont'd*)

- expenditure on external personnel in Union delegations (contract staff, local staff or seconded national experts) for the purposes of devolved programme management in Union delegations in third countries or for internalisation of tasks of phased-out technical assistance offices, as well as the additional logistical and infrastructure costs, such as the cost of training, meetings, missions and renting of accommodation directly resulting from the presence in delegations of external personnel remunerated from the appropriations entered against this item,
- expenditure on studies, meetings of experts, information systems, awareness-raising, training, preparation and exchange of lessons learnt and best practices, as well as publications activities and any other administrative or technical assistance directly linked to the achievement of the objective of the programme,
- research activities on relevant issues and the dissemination thereof,
- expenditure related to the provision of information and communication actions, including the development of communication strategies and corporate communication of the political priorities of the Union.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers support expenditure under Chapter 19 02.

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries. This includes the costs associated with the update and maintenance of the 'electronic-Consolidated Targeted Financial Sanctions List (e-CTFSL)' necessary for the application of financial sanctions applied in pursuit of the specific CFSP objectives set out in the Treaty of the European Union,
- expenditure on studies, meetings of experts, information systems and publications directly linked to the achievement of the objective of the programme.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. *Remarks*

This appropriation is intended to cover:

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,
- expenditure on external personnel (contract agents, seconded national experts or agency staff) at headquarters intended to take over the tasks previously conferred on dismantled technical assistance offices. Expenditure on external personnel at headquarters is limited to EUR 336 727. This estimate is based on a provisional annual unit cost per man-year, of which 95 % is accounted for by remuneration for the personnel concerned and 5 % by the additional cost of training, meetings, missions, information technology (IT) and telecommunications relating to those staff members,
- expenditure on studies, meetings of experts, information systems, awareness-raising, training, preparation and exchange of lessons learnt and best practices, as well as publications activities and any other administrative or technical assistance directly linked to the achievement of the objective of the programme,

*Remarks*

This appropriation is intended to swiftly contribute to stability by providing an effective response to help preserve, establish or re-establish the conditions essential to the proper implementation of the Union's external policies and actions in accordance with Article 21 of the Treaty on the European Union. The technical and financial assistance may be undertaken in response to a situation of urgency, crisis or emerging crisis, a situation posing a threat to democracy, law and order, the protection of human rights and fundamental freedoms, or the security and safety of individuals, in particular those exposed to gender-based violence in situations of instability, or a situation threatening to escalate into armed conflict or severely destabilise the third country or countries concerned.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter and may be complemented by contributions for Union trust funds.

## Remarks

The High Representative of the Union for Foreign Affairs and Security Policy must ensure that the European Parliament is closely involved in all stages of the decision-making process. The joint consultation meetings provided for under point 25 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1), which are to be further intensified on the basis of the Declaration by the High Representative on political accountability (OJ C 210, 3.8.2010, p. 1), must enhance a continuous dialogue between the High Representative and the European Parliament on the main choices for and aspects of the Union's CFSP, including consultations prior to the adoption of mandates and strategies. In order to enhance interinstitutional CFSP coherence and provide up-to-date expert advice to all institutions as a means of developing a more coherent and effective CFSP, expert policy-relevant research will be provided, when appropriate, by the European Union Institute for Security Studies and others.

**19 03 01** **Support to preservation of stability through common foreign and security policy (CFSP) missions and European Union Special Representatives**

## Remarks

Common foreign and security policy (CFSP) crisis management measures and operations in the area of monitoring and verification of peace processes, conflict resolution and other stabilisation activities, the rule of law and police missions fall under this article. Operations may be established to monitor border crossings, peace or cease-fire agreements or more generally political and security developments. As with all actions financed under the budget chapter, relevant measures must be civilian in nature.

## Remarks

This appropriation is intended to cover the financing of any unforeseen measures under Article 19 03 01 decided on in the course of the financial year, which have to be implemented urgently.

This article is also intended as an element of flexibility in the CFSP budget, as described in the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

This appropriation is intended to cover the financing of preparatory measures to establish the conditions for Union actions in the field of the CFSP and the adoption of the necessary legal instruments. It may cover evaluation and analysis measures (*ex ante* evaluation of means, specific studies, organisation of meetings, fact-finding on the ground). In the field of Union crisis management operations and for European Union Special Representatives (EUSRs), in particular, preparatory measures may, inter alia, serve to assess the operational requirements for an envisaged action, to provide for a rapid initial deployment of personnel and resources (e.g. mission expenses, purchase of equipment, pre-financing of running and insurance costs in the start-up phase), or to take the necessary measures on the ground to prepare for the launching of the operation. It may also cover experts supporting Union crisis management operations on specific technical issues (e.g. identification and assessment of procurement needs) or security training for staff to be deployed to a CFSP mission/EUSR team.

It also covers follow-up measures and audits of common foreign and security policy measures and the financing of any expenditure on the regularisation of previously closed measures.

This appropriation is also intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the measures coming under Items 19 03 01 01, 19 03 01 02, 19 03 01 03, 19 03 01 04 and 19 03 01 07.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

CHAPTER 19 03 — COMMON FOREIGN AND SECURITY POLICY (CFSP) (*cont'd*)19 03 01 (*cont'd*)19 03 01 07 (*cont'd*)*Remarks*

This appropriation is intended to cover all the expenditure connected with the appointment of European Union Special Representatives (EUSRs) in accordance with Article 33 of the Treaty on European Union.

EUSRs should be appointed with due regard for gender equality and gender mainstreaming policies, and the appointment of women EUSRs should therefore be promoted.

This appropriation covers expenditure on the salaries of EUSRs and on setting up their teams and/or support structures, including staff costs other than those relating to staff seconded by Member States or Union institutions. It also covers the costs of any projects implemented under the direct responsibility of an EUSR.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

## Remarks

This appropriation is intended to cover cooperation with third countries to advance and promote Union and mutual interests under the Partnership Instrument, in particular with developed and developing countries which play an increasingly prominent role in the world affairs, including foreign policy, international economy and trade, multilateral forums, global governance and in addressing challenges of global concern or where the Union has significant interests. This cooperation includes measures supporting the Union's bilateral, regional or multilateral relationships in addressing challenges of global concern, the implementation of the international dimension of the 'Europe 2020' strategy, trade and investment opportunities and public diplomacy and outreach activities.

## CHAPTER 19 05 — COOPERATION WITH THIRD COUNTRIES UNDER THE PARTNERSHIP INSTRUMENT (PI) (cont'd)

## 19 05 01 (cont'd)

Part of these appropriations will also be used to implement the project 'Cooperation with Northern and Southern Transatlantic Dimension', which aims at increasing a broader transatlantic dialogue and cooperation involving Northern and Southern Atlantic countries in order to address common global challenges. The objective is to look into the feasibility of implementing common short and longer term goals in fields such as economic cooperation, global governance, development cooperation, climate change, security and energy. This preparatory action should serve to strengthen a triangular dialogue, or even an extended Atlantic dialogue, as well as to promote the idea of a wider Atlantic Community.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

This appropriation is intended to cover the technical and financial assistance provided under this external instrument in order to promote the international dimension of higher education for the implementation of the 'Erasmus+' programme.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

*Remarks*

This appropriation is intended to cover expenditure on information outreach on the Union's external relations. The information activities to be carried out under this article fall into two broad categories: horizontal activities and logistical support from headquarters, and activities carried out by Union delegations in third countries and vis-à-vis international organisations.

*Measures carried out from headquarters:*

- the European Union visitors programme (EUVP), carried out jointly by the European Parliament and the Commission, provides some 170 participants a year, chosen by the Union delegations, with the opportunity of experiencing contact with the Union by visiting the European Parliament and the Commission as part of a made-to-measure individual programme of visits based on a theme,
- the production and distribution of publications on priority themes as part of an annual programme,
- the production and dissemination of audiovisual material,
- the development of information delivered via electronic media (the Internet and electronic message systems),
- the organisation of visits for groups of journalists,
- the support for the information activities of opinion leaders that are consistent with the Union's priorities.

The Commission will continue to fund news broadcasts in Farsi.

*Decentralised measures carried out by Union delegations in third countries and vis-à-vis international organisations:*

In accordance with the communication goals laid down for each region and each country, the Union delegations propose an annual communication plan, which, once approved by headquarters, is assigned a budgetary allocation covering the following activities:

Remarks

This appropriation is intended to cover the following actions:

*Activities supporting the conduct of ongoing and new multi- and bilateral trade negotiations*

Actions aim to strengthen the Union's negotiating position in ongoing multilateral trade negotiations (in the context of the Doha Development Agenda) as well as ongoing and new bilateral and regional trade negotiations, to ensure that Union policy conception is based on comprehensive and up-to-date expert information and to build coalitions for their successful completion, including:

- meetings, conferences and seminars in connection with the preparation of policy and negotiating positions and with the conduct of ongoing as well as new trade negotiations,
- development and implementation of a consistent and comprehensive communication and information strategy, promoting the Union's trade policy and raising awareness of the detail and objectives of the Union's trade policy and ongoing negotiation positions, both within and outside the Union,
- information activities and seminars for State and non-State actors (including civil society and business actors) to explain the state of play of ongoing negotiations and of the implementation of existing agreements.

*Studies, evaluations and impact assessments in relation to trade agreements and policies*

Actions to ensure that the Union's trade policy is underpinned by, and takes proper account of, *ex ante* and *ex post* evaluation results, including:

- impact assessments carried out in view of possible new legislative proposals and sustainable impact assessments carried out in support of ongoing negotiations in order to analyse the potential economic, social and environmental benefits of trade agreements and, where necessary, to propose flanking measures to combat any negative outcomes for specific countries or sectors,

**CHAPTER 20 02 — TRADE POLICY** (*cont'd*)**20 02 01** (*cont'd*)

- evaluations of the policies and practices of the Directorate-General for Trade to be carried out following its multiannual evaluation plan,
- expert, legal and economic studies related to ongoing negotiations and existing agreements, policy developments and trade disputes.

*Trade-related technical assistance, training and other capacity-building actions towards third countries*

Actions aiming to strengthen the capacity of third countries to participate in international, bilateral or bi-regional trade negotiations, to implement international trade agreements and to participate in the world trading system, including:

- projects involving training and capacity-building actions aimed at developing country officials and operators, mainly in the field of sanitary and phyto-sanitary measures,
- reimbursement of the expenses of participants in forums and conferences designed to build awareness and expertise in trade affairs among developing country nationals,
- management, operating, further development and promotion of the Export Helpdesk that provides business in partner countries with information on access to Union markets, and facilitates efforts by business to take advantage of market access opportunities offered by the international trading system,
- trade-related technical assistance programmes arranged in the forum of the World Trade Organisation (WTO) and other multilateral organisations, in particular WTO Trust Funds, in the framework of the Doha Development Agenda.

*Market access activities supporting the implementation of the Union's market access strategy*

Actions in support of the Union's market access strategy, which aims at removing or lowering barriers to trade, identifying trade restrictions in third countries and, where appropriate, removing obstacles to trade. These actions may include:

- maintenance, operating and further development of the market access database, available to economic operators via the Internet, listing trade barriers and other information affecting Union exports and Union exporters; purchase of the necessary information, data and documentation for this database,
- specific analysis of the various obstacles to trade in key markets, including analysis of the implementation by third countries of their obligations under international trade agreements in connection with the preparation of negotiations,
- conferences, seminars and other information activities (e.g. production and distribution of studies, information packs, publications and leaflets) to inform businesses, Member States officials and other actors about trade barriers and trade policy instruments aimed at protecting the Union against unfair trading practices such as dumping or export subsidies,
- support to the European industry for the organisation of activities specifically geared towards market access issues.

*Activities supporting the implementation of existing rules and monitoring of trade obligations*

COMMISSION  
TITLE 20 — TRADE

CHAPTER 20 02 — TRADE POLICY (*cont'd*)

20 02 01 (*cont'd*)

Actions to support the implementation of existing trade agreements and the enforcement of related systems that enable effective implementation of these agreements as well as the conduct of investigations and inspection visits to ensure third countries are respecting the rules, including:

- exchange of information, training, seminars and communication activities to support the implementation of existing Union legislation in the area of dual-use export controls,
- activities to facilitate investigations carried out in the context of the trade defence investigations with the aim of defending Union producers against unfair trade practices by third countries (anti-dumping, anti-subsidy and safeguards instruments) that can be harmful to the economy of the Union. In particular, activities will focus on the development, maintenance, operations and security of information technology systems supporting trade defence activities, the production of communications tools, the purchase of legal services in third countries and the conducting of expert studies,
- activities supporting the advisory group on monitoring the implementation of the EU-Korea Free Trade Agreement and other free trade agreements such as the Central America Association Agreement and the Colombia-Peru Free Trade Agreement. This includes financing of the members' and experts' travel expenses and accommodation,
- activities with a view to promoting the Union's external trade policy through a process of structured dialogue with key opinion formers of civil society and stakeholders, including small and medium-sized enterprises, on external trade issues,
- activities related to the promotion and communication on trade agreements, both within the Union and in partner countries. This will primarily be implemented by means of production and dissemination of audiovisual, electronic and graphical support and printed publications, subscriptions to trade relevant media and databases, translation of communication materials into non-Union languages, media-oriented actions, including new media products,
- development, maintenance and operating of information systems in support of the operational activities in the 'Trade' policy area such as: Integrated Statistical Database (ISDB), Dual-Use e-system, Market Access Database, Export Helpdesk, Export Credit Database, SIGL and SIGL Wood systems, Civil Society platform and tools for monitoring and supporting trade agreements.

*Legal and other expert assistance required in implementation of existing trade agreements*

Actions to ensure that the Union's trading partners effectively adhere to and comply with obligations arising under the WTO and other multilateral and bilateral agreements, including:

- expert studies, including inspection visits, as well as specific investigations and seminars on implementation by third countries of their obligations under international trade agreements,
- legal expertise, especially on questions of foreign law, required to facilitate defence by the Union of its position in WTO dispute-settlement cases, other expert studies necessary for the preparation, management and follow-up to WTO dispute settlement cases,
- arbitration costs, legal expertise and fees incurred by the Union as party to the disputes arising from the implementation of international agreements concluded under Article 207 of the Treaty on the Functioning of the European Union.

*Investor to State dispute settlement as established by international agreements*

**CHAPTER 20 02 — TRADE POLICY** (*cont'd*)**20 02 01** (*cont'd*)

The following expenditure is to support:

- arbitration costs, legal expertise and fees incurred by the Union as party to the disputes arising from the implementation of international agreements concluded under Article 207 of the Treaty on the Functioning of the European Union,
- payment of a final award or of an award settlement paid to an investor in the context of such international agreements.

*Activities supporting trade policy*

This appropriation is also intended to cover general expenditure on translations, press events, information and publications directly linked to the achievement of the objective of the programme or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, such as the maintenance of the Directorate-General for Trade and Trade Commissioner's Internet site.

Any revenue in the context of the management by the Union of the financial responsibilities linked to investor-state dispute settlement may give rise to the provision of additional appropriations in accordance with Article 21(4) of the Financial Regulation.

Part of this appropriation will cover a comprehensive communication strategy to engage the general public and all stakeholders and maximise transparency with regard to the activities of the Directorate-General for Trade, especially with regard to the Transatlantic Trade and Investment Partnership (TTIP). This will include translations, engagement and dialogue events, such as press or stakeholder events, publishing of information, consultations and follow-up and publications directly linked to the achievement of the objective of the programme or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, such as maintenance of DG TRADE's and the Trade Commissioner's websites. Activities to engage the public and all stakeholders are crucial to a transparent, successful and comprehensive trade policy.

*Legal basis*

Council and Commission Decision 98/181/EC, ECSC, Euratom of 23 September 1997 on the conclusion, by the European Communities, of the Energy Charter Treaty and the Energy Charter Protocol on energy efficiency and related environmental aspects (OJ L 69, 9.3.1998, p. 1).

Council Decision 98/552/EC of 24 September 1998 on the implementation by the Commission of activities relating to the Community market access strategy (OJ L 265, 30.9.1998, p. 31).

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

*Remarks*

This appropriation is intended to fund multilateral programmes and initiatives in the field of trade-related assistance to strengthen the capacity of developing countries to participate effectively in the multilateral trading system and regional trading arrangements and to improve their trade performance.

Multilateral initiatives and programmes to be funded under this appropriation will support the following actions:

*Assistance for trade policy, participation in negotiations and implementation of trade agreements*

Actions to strengthen the capacity of developing countries to formulate their trade policy and to strengthen the institutions involved in trade policy, including comprehensive and updated trade reviews and assistance in integrating trade into their respective policies for economic growth and development.

Actions to strengthen the capacity of developing countries to participate effectively in international trade negotiations and to implement international trade agreements.

Research to advise policymakers how best to ensure that the specific interests of small producers and workers in developing countries are reflected across all policy areas and promote an enabling environment for producers' access to trade-related sustainability assurance schemes.

This assistance is primarily targeted at the public sector.

*Trade development*

Actions to reduce supply-side constraints which impact directly on the ability of developing countries to exploit their international trading potential, including, in particular, private-sector development.

This appropriation complements the Union's geographical programmes and should only cover multilateral initiatives and programmes that offer real added value to the Union's geographical programmes, in particular the Integrated Framework for Least Developed Countries.

The Commission will provide a biannual report on implementation and results obtained and on the main outcomes and effects of aid for trade assistance. The Commission will provide information on a total figure for all aid for trade finance coming from within the general budget of the Union, and a total figure for aid for trade from within all 'trade-related assistance' provided.

**CHAPTER 20 02 — TRADE POLICY** (*cont'd*)**20 02 03** (*cont'd*)*Legal basis*

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

*Remarks*

This appropriation is intended to cover:

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,
- expenditure on external personnel at headquarters (contract agents, seconded national experts or agency staff) intended to take over the tasks previously conferred on dismantled technical assistance offices; expenditure on external personnel at headquarters is limited to EUR 7 600 714. This estimate is based on a provisional annual unit cost per man-year of which 93 % is accounted for by remuneration for the staff concerned and 7 % by the additional cost of training, meetings, missions, information technology (IT) and telecommunications relating to those staff members,
- expenditure on external personnel in Union delegations (contract staff, local staff or seconded national experts) for the purposes of devolved programme management in Union delegations in third countries or for internalisation of tasks of phased-out technical assistance offices, as well as the additional logistical and infrastructure costs, such as the cost of training, meetings, missions and renting of accommodation directly resulting from the presence in delegations of external personnel remunerated from the appropriations entered against this item,
- expenditure on studies, meetings of experts, information systems, awareness-raising, training, preparation and exchange of lessons learnt and best practices, as well as publications activities and any other administrative or technical assistance directly linked to the achievement of the objective of the programme,
- research activities on relevant issues and the dissemination thereof,
- expenditure related to the provision of information and communication actions, including the development of communication strategies and corporate communication of the political priorities of the Union.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons, to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers support expenditure under Chapter 21 02.

*Remarks*

The primary objective of the Union's development policy is poverty reduction, as laid down in the Treaty. The European Consensus on Development provides the general policy framework, guidance and the focus to direct implementation of Regulation (EU) No 233/2014.

Appropriations in this chapter will be used for the pursuit of poverty reduction, sustainable economic, social and environmental development and consolidating and supporting democracy, the rule of law, good governance, human rights and the relevant principles of international law, including those reflected in the Millennium Development Goals and in the emerging post-2015 international development framework. Synergies with other Union external instruments shall be sought where appropriate, without any loss of focus on the above basic objectives.

In principle, 100 % of expenditure in the geographic programmes and at least 95 % of expenditure in the thematic programmes and 90 % of expenditure in the pan-African programme must conform to the OECD/DAC criteria for Official Development Assistance (ODA).

As a general rule, at least 20 % of appropriations should be used for basic social services and secondary education.

*Remarks*

*Former Article 21 02 12*

The purpose of development cooperation under this article is primarily its contribution to support the promotion of democracy, good governance, equality, respect for human rights and for the rule of law, and fostering sustainable development and economic integration, as well as to achieving the Millennium Development Goals and post-2015 global development commitments.

**CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)****21 02 01** (cont'd)

The Commission must continue to report annually on the benchmark used in the past for the assistance to developing countries that is to be allocated to social infrastructure and services, recognising that the Union contribution must be seen as part of overall donor support for the social sectors and that a degree of flexibility must be the norm. Moreover, the Commission will endeavour to ensure that a benchmark of 20 % of its assistance under the DCI will be dedicated to basic social services, with a focus on health and education, and to secondary education, this being an average across all geographical areas, and recognising that here too a degree of flexibility must be the norm, for example where exceptional assistance is involved. This appropriation is intended to cover cooperation schemes in developing countries, territories and regions in Latin America in order to:

- contribute to the achievement of MDGs targets in the region,
- support trade union, non-governmental organisations and local initiatives to monitor the impact to the investments on the national economy, particularly respect for labour, environmental, social and human rights standards,
- support gender equality through supporting actions to combat harmful traditional practices such as FGM and child marriage,
- foster the development of civil society,
- combat poverty and social exclusion and promote social cohesion,
- contribute to improve social standards with focus on education, including education and vocational training for employment, and health, and to the improvement of social protection schemes,
- promote a more favourable climate for economic expansion and enhanced productive sector, encourage the transfer of know-how, promote contact and collaboration between business players bi-regionally,
- promote private sector development, incl. an SME-friendly business climate via i.e. legal property rights, reducing unnecessary administrative burden, improving access to credit, improving associations of small and medium-sized enterprises,
- support efforts towards food security and combat malnutrition,
- support regional integration; in Central America, foster region's development via enhanced benefits derived from the EU-Central America association agreement,
- promote the sustainable use of natural resources, including water, and the combating of climate change (mitigation and adaptation),
- support efforts for improving good governance and help consolidate democracy, human rights and the rule of law,
- promote policy reform particularly in the area of justice and security and support related actions to enhance development of countries and regions,
- gender equality and the empowerment of women.

Where assistance is delivered via budget support, the Commission shall support efforts of partner countries to develop parliamentary oversight and audit capacities and transparency.

TITLE 21 — DEVELOPMENT AND COOPERATION

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)21 02 01 (*cont'd*)

Appropriations under this article are subject to evaluations that shall include aspects of input activities and chain of results (output, outcome, impact). The findings of the evaluations shall be used in the formulation of subsequent measures financed with these appropriations.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter and may be complemented by contributions for Union trust funds.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services (CESES) and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. Accordingly, Union authorising officers are encouraged to make full use of the possibilities offered by the Financial Regulation, including CESES contributions-in-kind to Union projects.

*Remarks*

*Former Article 21 02 14*

The appropriation is intended to cover the financing of development schemes in Asian developing countries, in particular in countries where the poorest live, aimed at improving human and social development as well as tackling macroeconomic and sectoral problems. Emphasis is placed on economic and social governance and development, improving the human rights situation, democratisation, education, vocational training, lifelong learning, academic and cultural exchange, scientific and technological exchange, the environment, regional cooperation, disaster prevention and reconstruction measures, as well as the promotion of sustainable energy and information and communications technology.

It is also intended to cover support for the development of civil society and, in particular, support for the activities of non-governmental organisations promoting and defending the rights of vulnerable groups, such as women, children, ethnic minorities and people with disabilities.

**CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)****21 02 02** (cont'd)

Utilisation of this appropriation is dependent on observance of the principles underpinning Union action. Appropriate consideration shall be given to the areas described below, reflecting jointly-agreed strategies, partnerships, cooperation and trade agreements. Priorities will be established in accordance with the European Consensus for development and the Agenda for change and with the subsequent conclusions of the Council.

This appropriation is intended to include actions related to inclusive and sustainable growth for human development. Sectors that may be addressed include:

- social protection and jobs, and universal access to health and education,
- business environment, regional integration and world markets,
- sustainable agriculture, nutrition and energy,
- climate change and environment,
- encouraging social cohesion, in particular social inclusion, fair income distribution, decent work and equity and gender equality,
- establishing inclusive partnerships around trade, investment, aid, migration, civil registration, research, innovation and technology,
- supporting an active and organised civil society for development and fostering public private partnerships,
- supporting climate change mitigation and adaptation, the promotion of sustainable consumption and production as well as investments in clean technologies, sustainable energies, transport, sustainable agriculture and fisheries, the protection of and enhancement of biodiversity and ecosystem services, including water, sanitation and forests, and decent job including creation for young people and women, in the green economy,
- encouraging greater regional integration and cooperation in a result-oriented way through support to different processes of regional integration and dialogue,
- contributing to preventing and responding to health risks, including those originating at the interface between animals, humans and their various environments,
- supporting disaster preparedness and post-disaster long-term recovery, including in the field of food and nutrition security and assistance to uprooted people,
- strengthening the capacity to provide universal access to basic social services particularly in health and education.

This appropriation will address actions related to:

- democracy, human rights including children's and women's rights and the rule of law,
- gender equality and the empowerment of women and girls,
- public sector management,

- tax policy and administration,
- corruption and transparency,
- civil society and local authorities,
- building and strengthening legitimate, effective and accountable public institutions and bodies, through promotion of institutional reforms (including on good governance and anti-corruption, public financial management, taxation and public administration reform) and legislative, administrative and regulatory reforms in line with international standards, in particular in fragile States and countries in conflict and post-conflict situations,
- in the context of the security and development nexus, fighting against corruption and organised crime, production, consumption and trafficking of drugs and against other forms of trafficking, and supporting efficient border management and cross-border cooperation and improving civil registration.

The purpose of development cooperation under this heading is its contribution to achieving the Millennium Development Goals as well as the promotion of democracy, good governance, respect for human rights and for the rule of law, fostering sustainable development and economic integration and promoting conflict prevention, conflict resolution and reconciliation.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. *Remarks*

*Former Article 21 02 10*

The overarching purpose of this appropriation is to contribute to the creation of conditions for sustainable and inclusive economic and social development, social cohesion, democratisation and the improvement of people's lives. Emphasis shall be put on support to food security and sustainable agriculture, water and sanitation, the provision of health and education services and access to sustainable energy security, with a steady focus on those most in need. Disaster preparedness and climate change adaptation are of great relevance.

Possibilities to stimulate creation of employment opportunities and to promote decent working conditions shall receive attention. Support for SME development can be given, with a view in particular to promote economic diversification and social development.

When and where governance reform efforts of a meaningful nature and genuine democratisation processes exist, providing support for them shall be a priority. Similarly, allocations to border management and anti-drugs programmes shall depend on the outlook for achieving significant results.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. TITLE 21 — DEVELOPMENT AND COOPERATION

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)21 02 04 (*cont'd*)*Remarks**Former Article 21 02 09*

Emphasis must be placed on operations influencing economic organisation and institutional development, improving the human rights situation, including freedom of expression, freedom of assembly, freedom of the press and media, freedom of religion and belief, including the right to relinquish beliefs, and promoting and protecting digital freedoms, the strengthening of civil society, including operations concerning democratisation, universal access for children of both sexes and women as well as children with disabilities to primary and secondary education, the environment, and the sustainable management of natural resources, including tropical forests, regional cooperation, disaster prevention and risk reduction, including climate-change-related hazards, and reconstruction measures, as well as the promotion of sustainable energy, the fight against climate change and the promotion of digital freedoms in connection with internet and information and communication technology use.

This appropriation is also intended to cover measures promoting conflict prevention, conflict resolution and reconciliation.

It is also intended to cover support for the development of civil society and, in particular, support for the activities of non-governmental organisations promoting and defending the rights of vulnerable groups, such as women, children, LGBTI people, ethnic and religious minorities, atheists and people with disabilities.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter and may be complemented by contributions for Union trust funds.

Accordingly, Union authorising officers are encouraged to make full use of the possibilities offered by the Financial Regulation, including CESES contributions-in-kind to Union projects.

This appropriation may include actions related to:

- democracy, human rights and the rule of law,
- gender equality and the empowerment of women and girls,
- public sector management,
- tax policy and administration,

**CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)****21 02 04** (cont'd)

- corruption and transparency,
- civil society and local authorities,
- development-security nexus,
- support for microcredit schemes,
- capacity building to assist agricultural producers in developing countries to meet Union hygiene and phytosanitary standards necessary for access to the Union market,
- support for refugees and displaced populations,
- promoting social development, social cohesion and fair income distribution.

*Remarks**Former Article 21 02 15*

This appropriation is intended to cover Union operations in the framework of the Afghanistan reconstruction process. It is supplemented by expenditure from other chapters and articles, to which different procedures apply.

The Commission will monitor compliance with the conditions for the Union contribution to this process, notably full implementation of the post-Bonn process. It will keep the European Parliament and the Council informed on its findings and conclusions.

This appropriation is intended to support basic social services and economic development in Afghanistan.

This appropriation is also intended to support the Afghanistan national drug control strategy, including halting the production of opium in Afghanistan, and the disruption and destruction of the opium networks and illegal export routes to European countries.

COMMISSION

TITLE 21 — DEVELOPMENT AND COOPERATION

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)21 02 05 (*cont'd*)

A relevant part of this appropriation must be exclusively devoted to fund the start-up of the five-year plan for phasing out opium cultivation by replacing it with alternative production in order to obtain a verifiable outcome in this field, in line with the demands expressed in the European Parliament resolution of 16 December 2010 on a new strategy for Afghanistan (OJ C 169 E, 15.6.2012, p. 108).

This appropriation is also intended to support the Union contribution to the processes for the return of Afghan refugees and displaced persons to their country and regions of origin in accordance with the commitments entered into by the European Community at the Tokyo Conference in January 2002.

This appropriation is also intended to finance activities of women's organisations which have worked for a long time for Afghan women's rights.

The Union should increase its financial assistance in Afghanistan for areas such as health (construction and renovation of hospitals, prevention of child mortality) and small and medium-sized infrastructure projects (repairing of road network, embankments, etc.), as well as effectively implementing job security and food security schemes.

Part of this appropriation is intended to be used for mainstreaming of disaster risk reduction, based on ownership and national strategies of disaster-prone countries.

Part of this appropriation is intended to be used, with due regard for the Financial Regulation, to improve the situation of women, with priority for actions in the fields of health and education, and to support their active involvement in all areas and at all levels of decision-making.

Particular attention will also be paid to the situation of women and girls in all other actions and projects supported by this appropriation.

Any income from financial contributions from Member States and other donor countries, including in both cases their public and parastatal agencies, or from international organisations to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, pursuant to the relevant basic act, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation is intended to cover assistance to the Government in reducing unemployment from around 25 % (2013) to 14 % (2020) and assistance to the State in fulfilling its developmental and transformative role, including improving service delivery.

Employment creation has been identified as one of three priority areas in South Africa's recently developed National Development Plan 2030 (the other areas being education, training and innovation, and building a capable state) because unemployment is at the heart of South Africa's triple challenge of unemployment, poverty and inequality. The support is expected to contribute to improving employment creation policymaking and implementation, including in the area of 'green jobs' and green technology for low carbon development; reducing the cost of doing business, especially for small, medium, and micro-sized enterprises (SMME); and enhancing actions in the area of skills development and placement assistance.

The support is expected to contribute to strengthening systems of oversight; improving relations between national, provincial, and local government; enhancing public service staff with the authority, experience, competence and support they need to do their jobs; and promoting of an active citizenry in policy design, implementation, and monitoring and evaluation.

Also, the overall objective of this programme is to contribute to the implementation of South Africa's recently developed National Development Plan 2030 and the accompanying outcome-based approach, which aim to improve the conditions of life of South Africans including halving poverty and unemployment, while being aligned with the Millennium Development Goals (MDGs). The programme purpose is to contribute to the overall objective in the areas of decent employment creation through inclusive economic growth and the establishment of an efficient, effective and development oriented public service and an empowered, fair and inclusive citizenship.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. TITLE 21 — DEVELOPMENT AND COOPERATION

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)**21 02 07** *Global public goods and challenges and poverty reduction, sustainable development and democracy**Remarks*

This programme is intended to benefit primarily the poorest and least developed countries and the most disadvantaged sections of the population in countries covered by Regulation (EU) No 233/2014.

This appropriation is intended to cover poverty reduction and fostering sustainable development as a component under the Global Public Goods and Challenges (GPGC) thematic programme. The objective of the programme is to support inclusive sustainable development by addressing the main global public goods and challenges in a flexible and cross-cutting manner. The main areas of action include environment and climate change, sustainable energy, human development (including health, education, gender, equality, identity, employment, skills, social protection, social inclusion, and economic-development-related aspects such as growth, jobs, trade and private-sector engagement), food and nutrition security, sustainable agriculture, and migration and asylum. This thematic programme will also enable a swift response to be made to unforeseen events and global crises affecting the poorest populations. By promoting synergies across the various sectors, the GPGC programme will reduce fragmentation of Union development cooperation and increase coherence and complementarity with other Union programmes and instruments.

This appropriation is intended to provide financial support to actions in developing countries under the 'Human development subtheme', covering health, education, gender issues and other aspects of human development, of the 'Global public goods and challenges' thematic programme. It should primarily benefit the poorest sections of the populations in the countries it covers.

The health component shall support universal access to good quality essential health services. Priority areas should include child and maternal health, sexual and reproductive health and rights, access to family planning, protection against HIV/AIDS, tuberculosis, malaria and other poverty-related diseases, including neglected diseases, and access to psychological support for victims of violence.

Equal access and quality of education shall be supported, including for migrants, women and girls, with an emphasis on countries furthest from achieving global targets.

In relation to gender equality, programmes to promote women's and girls' economic and social empowerment shall be supported. Addressing sexual and gender-based violence and supporting victims shall also be priorities. Helping to eradicate gender-biased sex selection practices shall also be among the objectives.

The appropriation can also be used for activities in support of children and youth; non-discrimination; employment, skills, social protection and social inclusion; growth, jobs and private sector engagement and culture.

## CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)

21 02 07 (cont'd)

21 02 07 04 (cont'd)

In the area of food and nutrition security and sustainable agriculture, the overall objective is to improve food security for the poorest and more vulnerable, to help eradicate poverty and hunger for current and future generations and to better address under-nutrition thereby reducing child mortality. This objective will be pursued in line with the Union policy will focus on enhancing the incomes of smallholder farmers, the resilience of vulnerable communities and on helping partner countries reducing the number of stunted children by 7 million by 2025. As food security is a global challenge, the GPGC programme will focus on activities and approaches to address global public goods and challenges that provide strong multiplier to the agricultural, livestock and fisheries sector, the food and nutrition security situation of households, the rural economy and food systems, and the resilience of the most vulnerable households to shocks and stresses. This will complement and add value to the support provided through geographical programmes.

The following three components are included in the theme:

- *Component 1: Generating and exchanging knowledge and fostering innovation* that will generate and apply new knowledge to the challenges of food and nutrition security mainly at international and continental levels. This component will work with existing global and regional initiatives, but also envisages new partnerships that are needed to ensure that knowledge generated by research is used by beneficiaries to improve their income and livelihoods,
- *Component 2: Strengthening and promoting governance and capacity at the global, continental, regional and national levels, for all relevant stakeholders.* This component will support international initiatives addressing food and nutrition security, including land, sustainable fisheries, and improve the effectiveness of dialogue on food and nutrition security issues. It will also foster a coordinated international effort to generate reliable, accessible and timely information and analytical capacity to support evidence-based policymaking and to strengthen and/or set up sustainable regional and national information systems for food security (ISFS) institutions. This component may also support capacity development initiatives of stakeholders such as civil society organisations, farmers' organisations and other inter-professional groups along the value chain,
- *Component 3: Supporting the poor and nutrition-insecure to react to crises and strengthen resilience.* This component will provide support to countries where there will not be bilateral programmes under geographical programming, to countries which suffer from the consequences from a major unforeseen crisis and/or shock, including natural and man-made disasters, epidemics and major food and nutrition crises in fragile and food crisis prone countries, this component will also support innovative approaches to strengthen prevention and to build resilience. Where relevant, interventions will be also designed in order to enhance synergies and complementarities between humanitarian and development interventions. Joint analysis of the situation performed by humanitarian and development stakeholders will be encouraged.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services (CESES) and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. This appropriation shall be used for implementing initiatives under the 'migration and asylum' thematic area of the 'Global Public Goods and Challenges' (GPGC) programme with the aim of enhancing the governance and maximising the development impact of migration and mobility.

In particular, the GPGC programme in the area of migration and asylum aims to enhance the governance of migration in and by developing countries, placing particular attention on maximising the positive impact and minimising the negative impact of migration and mobility on development in low- and middle-income countries of origin and destination. Protection of the human rights of migrants and support for Union commitments to ensure policy coherence for development on migration will be pursued as cross-cutting objectives.

The programme will focus on initiatives at global level as well as multi-regional level (e.g. to support cooperation along south-south or south-north migratory routes). A limited number of national projects to support new cooperation activities with priority countries for the Union's external migration policy may also be launched.

- an increased capacity of European and southern civil society networks, platforms and alliances to ensure a substantive and continued policy dialogue in the field of development and to promote democratic governance and empowerment of women,
- an increased level of awareness of Union citizens regarding development issues and mobilising active public support for poverty reduction and sustainable development strategies in partner countries.

Possible activities to be supported by this programme:

- interventions in partner countries which support vulnerable and marginalised groups by providing basic services delivered through civil society organisations,
- capacity development of the targeted actors complementary to support granted in the framework of the national programme, actions aiming at:
  - creating enabling environment for citizen participation and civil society action and the capacity of civil society organisations to participate effectively in policy formulation and in the monitoring of policy implementation processes,
  - facilitating an improved dialogue and better interaction between civil society organisations, local authorities, the State and other development actors in the context of development,
- coordination, capacity development and institutional strengthening of civil society networks, within their organisations and between different types of stakeholders active in the European public debate on development as well as coordination, capacity development and institutional strengthening of southern networks of civil society organisations and umbrella organisations,
- raising public awareness of development issues, empowering people to become active and responsible citizens and promoting formal and informal education for development in the Union and in candidate countries and potential candidates, to anchor development policy in European societies, to mobilise greater public support for action against poverty and for more equitable relations between developed and developing countries, to raise awareness of the issues and difficulties facing developing countries and their peoples, and to promote the right to a process of development in which all human rights and fundamental freedoms can be fully realised and the social dimension of globalisation.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the transfer agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter and may be complemented by contributions for Union trust funds.

*Former Article 21 02 11*

This appropriation is intended to support the implementation of the Joint Africa-EU Strategy (JAES). In particular the pan-African programme shall be used to provide specific support to development cooperation activities of cross-regional, continental and trans-continental nature, as well as relevant JAES initiatives in the global arena. The pan-African programme will work in close cooperation with other instruments, notably the European Neighbourhood Instrument (ENI), the European Development Fund (EDF) and the thematic programmes under the Development Cooperation Instrument (DCI), and will concentrate on specific initiatives agreed in the framework of JAES, ensuring the necessary coherence and synergy and preventing duplications and overlaps.

This will be used in the followings main priority development areas:

- development of peace, security, democratic governance and human rights, with a support to the African governance architecture through cooperation with AU Commission and other related institutions such as the pan-African Parliament, the African Court for People and Human Rights; civil society organisations,
- support to regional integration at the continental level, including harmonisation of policies, standards and regulations, and capacity building to promote regional integration, trade and investments,

**CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)****21 02 09** (cont'd)

- on migration, mobility and employment, targeting improvements in the areas of remittances, mobility and labour migration, fight against trafficking in human beings, irregular migration and international protection,
- good stewardship of natural resources (this includes areas such environment and climate change, raw materials and agriculture) and development-oriented use of the wealth they can bring,
- development of a knowledge-based and skilled-based society, in order to develop competitiveness and sustain growth, through support to higher education and research at continental level, by providing support to the AU flagship initiatives in these areas, and supporting the improvement and availability of accurate statistical data.

Support will also be provided in order to develop the Africa-EU partnership, to tackle global issues in the worldwide arena, and to reinforce civil society for specific action at continental level.

Part of this appropriation is intended to be used for operations carried out by the Confederation of European Senior Expert Services (CESES) and its member associations, including technical assistance, advisory services and training in selected public and private sector enterprises and institutions. ## TITLE 21 — DEVELOPMENT AND COOPERATION

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)21 02 20 (*cont'd*)*Remarks*

This appropriation is intended to cover the technical and the financial assistance provided under this external instrument in order to promote the international dimension of higher education for the implementation of the 'Erasmus+' programme.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

## Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Two fundamental issues the people and countries in the Horn of Africa suffer from are (1) the absence of participatory government and stability and (2) the absence of democracy and democratic processes and genuine participation of the people. Both are related to a fundamental and lasting crisis in governance in all countries of the Horn. In fact the impact of this crisis is felt in the whole of north-east Africa as well as in Europe. Unless the issues are addressed by the Union and others with a comprehensive perspective, there is no hope for sustainable livelihoods, economic growth and a peaceful and stable region. An Arab Spring scenario in this region, without a long-term vision and long-term investment from the international community to underpin it, will lead nowhere.

The proposed pilot project addresses these issues with a two-part strategy, each part building on the other. Both are essential in order to develop long-term, credible alternatives to the Horn's military dictatorial regimes.

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)21 02 77 (*cont'd*)21 02 77 15 (*cont'd*)

*First part:* Ensure sufficient space for civil society, coupled with strategic investment in genuine civil society actors. Civil society in the Horn of Africa and its diaspora in Africa faces increasing challenges in terms of ability to function and human rights abuses. Government policy in the countries in the Horn is increasingly based on distrust and focused on control and containment rather than support or facilitation of civil society. Authorities in the Horn view civil society as a threat, if not a direct opponent, and do not allow their policies to be complemented, let alone challenged, by civil society. However civil society plays a key part in democratic systems and processes. The tightening environment for civil society therefore needs to be challenged at national and regional level to allow civil society to be part of democratic processes. Civil society actors themselves need to be strengthened to effectively deal with this increasingly difficult environment to operate in as well as deal with future democratic processes.

*Second part:* Strengthen youth and youth movements in the Horn of Africa with a view to effectively preparing them for future democratic changes. Young people, both in the Horn and in the diaspora in Africa, are the future for their countries but lack skills and knowledge, as well as life experience in a peaceful and democratic environment. They also lack the means to develop those skills and their governments hardly invest in young people. They are often housed in refugee camps. The displacement and often unclear legal status mean that learning opportunities pass them by. In order to train future leaders and senior government officials and establish genuine democratic processes, external investment in the Horn's youth is essential. Investment in their skills, tapping effectively into their enthusiasm, dreams and hopes for the future is more strategic than investment in changing the current establishment.

This pilot project invests in the following countries: Sudan and South Sudan, Eritrea, Ethiopia, Somalia (Somaliland, Puntland) and Djibouti. It will invest at national as well as (sub-)regional level but assumes that a regional approach takes primacy.

People in the Horn of Africa suffer from the absence of participatory government, stability, democracy and genuine participation. Unless these issues are addressed comprehensively, there is no hope for sustainable livelihoods, economic growth, peace and stability in the region.

The pilot project aims to contribute to long-term, credible alternatives to military dictatorial regimes in the Horn, by ensuring sufficient space for civil society and strengthening youth and youth movements.

*Djibouti:* The actions proposed by the project are needed because civil society organisations (CSOs) in Djibouti are underdeveloped and play only a marginal role in the development process of the country. The project could also focus on providing support to reinforce the lack of familiarity of CSOs with participatory processes and the number of increase of implementing partner in the country.

*Ethiopia:* Support to CSOs and to democratisation in Ethiopia is particularly appropriate, given the difficult environment for CSOs at the moment. However, it is recommended that the project is redesigned to focus on the youth component as other components are already covered by other instruments and budget lines (EDF, DCI-CSO/LA thematic programme, EIDHR). The project could also focus on providing support to reinforce the lack of familiarity of CSOs with participatory processes and the number of increase of implementing partner in the country.

*Eritrea:* for Eritrea the support to democratisation and youth is most important. At the same time, one should take into account that the space for CSOs to work in Eritrea is extremely limited.

*Sudan and South Sudan:* Overlap with the geographical programmes is avoided by providing capacity building to different Government structures, in particular the Judiciary, under the governance/rule of law component. Synergies with other instruments, such as EIDHR and the CSO/LA thematic programme of the DCI, should be encouraged.

*Regional perspective:* The regional component of this project is particularly useful, as it is not covered by any existing instrument.

The project should also formulate complementary activities such as increased capacity building to youth associations and set up of additional networks between targeted organisations in the benefiting countries, as well as to extend the duration of the action in order to ensure the sustainability of the project.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Despite collaboration between the World Organisation for Animal Health (OIE) and the Union on the evaluation of the performance of veterinary services (PVS), on the governance of animal health services and on avian influenza, there is a very urgent need to strengthen and fund veterinary services in developing countries, as explained below.

Animal diseases are responsible for a 20 % loss of livestock output globally and a 30 % loss in developing countries. Almost one billion people in developing countries (sub-Saharan Africa and south-east Asia) rely on livestock for their survival. Livestock health is critical to poverty reduction. However, problems can only be dealt with at source if recognised quickly and professionally.

**CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)****21 02 77** (cont'd)

21 02 77 16 (cont'd)

Recent international efforts to address animal and human influenza have clearly highlighted the need to further encourage a cross-sectoral approach to good governance, to strengthen public health and animal health systems to comply with international standards, and to promote alliances between the public and private sectors in those fields.

The burden of animal diseases, including their economic impact (on primary production, on trade and on processed products) as well as the need to address all animal diseases, both zoonotic (e.g. tuberculosis, brucellosis, rabies and anthrax) and non-zoonotic (e.g. foot-and-mouth disease, *peste des petits ruminants*) must be taken into account in order to protect consumers, pets (which can transmit diseases to humans) and livestock in the Union as well. Additional work is required in neighbouring countries, in developing countries and in transition economies, notably in sub-Saharan Africa, to prevent and control emerging diseases and to improve biosecurity. This will support the delivery of global public goods and will contribute to ultimately ensuring food security, food safety, public health and poverty alleviation. Enabling good governance of public and private components of veterinary services and better cooperation between them and public health services is key to a better and safer world.

Some 125 countries have already benefited from an initial evaluation of the performance of their national veterinary services (PVS evaluation) on the basis of international standards for the quality and evaluation of veterinary services. PVS pathway follow-up actions are part of a continuous process and aim to sustainably improve compliance of veterinary services with international quality standards, and also act as an efficient permanent safeguard for animals, humans and agricultural production throughout the world. These actions need to be implemented in developing countries, notably in sub-Saharan Africa, as well as in neighbouring countries in order to monitor the progress made and help strengthen veterinary services and animal health systems on the basis of national needs and priorities (PVS gap analysis).

The PVS pathway facilitates and improves the development of appropriate legislation for national animal health systems, early detection, global transparency as regards national sanitary status through the notification of animal diseases including zoonoses, rapid response to outbreaks, biosecurity measures, compensation for farmers in the event of compulsory slaughter, vaccination (if necessary) and capacity-building for and cooperation between the public and private sectors (notably farmers, pastoralists, and private veterinarians), as well as guarantees that quality drugs are used.

Unfortunately, PVS evaluations completed to date have demonstrated worrying weaknesses and major shortcomings in more than 100 countries. This situation threatens early detection and global transparency as regards national sanitary status and zoonoses and increases dramatically the global cost on fighting pandemics and animal diseases, with disastrous effects on the billion people directly dependent on livestock.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

It is intended to fund the establishment of a Europe-wide network bringing together MNCs with activities in developing countries and headquarters in Europe and organisations providing family planning services. The project will select most specifically companies' factories based most notably in countries with a high unmet need for family planning. This Europe-wide network will aim to provide a forum for the exchange of ideas, information and experiences in the field of family planning linked to corporate social responsibility (CSR) and at providing opportunities for collaboration between companies and family planning organisations to increase access to family planning for factory workers in countries with a high unmet need for family planning.

Ultimately the appropriation will establish one pilot project exploring the linkages between CSR and the provision of voluntary family planning services in factories.

*Project activities*

Phase 1: Mapping of MNCs present in the Union employing high levels of female factory workers in developing countries with high unmet need for family planning.

Phase 2: Setting up a forum for the exchange of ideas, information and experience in the field of family planning linked to CSR.

Phase 3: Supporting the implementation of a voluntary family planning CSR pilot in one factory.

Phase 4: Document and disseminate the outcome of this pilot.

This pilot project should aim at reactivating the Cauca area's small-scale farming economy in order to continue creating a viable path for the small communities to exit the armed and social conflicts of the region. To this aim the pilot project should ensure the construction, development and maintenance of physical infrastructure facilities and the creation of a distribution centre to commercialise the agricultural products produced by these communities and their further distribution at local and regional level, as well as facilitate potential conflict-settlement like in other hot spot areas in Colombia.

TITLE 21 — DEVELOPMENT AND COOPERATION

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)21 02 77 (*cont'd*)21 02 77 19 (*cont'd*)

Northern Mali and Northern Niger are subject to recurrent health crises with some of the lowest health indicators especially on sexual and reproductive health. Although the post-crisis situations in these two countries are quite different, the root causes of low health indicators are similar: large rural areas, sociocultural barriers, inadequate health infrastructure, lack of health competencies and capacities notably on the number of medical professionals, and the low retention rate of skilled medical staff. While these challenges are common across sub-Saharan Africa, the largely nomadic population in the target area of this project have additional needs that are currently not met by the health system. Indeed the health system often fails to address the mobile nature of these pastoralist groups. This results in increased vulnerability of these groups which is already affected by a lack of adequate nutrition, gender inequalities, maternal and child mortality rates and low access to quality of healthcare services and information.

The parallel post-crisis situation in these two regions would help drawing lessons learnt and best practices on resilience and linking relief, rehabilitation and development (LRRD) that would be highly relevant for the Union in the framework of the AGIR initiative, and best practices from this pilot project could be replicated within this and other initiatives.

Using the health sector as an example with particular emphasis on sexual and reproductive health, the preparatory action will aim to establish baselines, draw operational recommendations on resilience and LRRD and capitalise on them to impulse reinforcing health capacities of communities as regard the needs of nomadic groups in the context of post-crisis in Mali and Niger.

*Objectives*

The overall objective of the project is to build capacity of health workers to provide quality services targeted to the specific needs of nomadic groups (in a post-crisis situation), with a particular emphasis on sexual and reproductive health. Using the health sector as an example, the preparatory action will evaluate and compile best practices on resilience building and linking relief rehabilitation and development in the context of post-crisis in Northern Mali and Northern Niger. Finally, it would also develop innovative methods as well as improve health training curriculum addressing the needs of nomadic groups. Expected results from this project will be reliable and comprehensive health data collected at community and local levels, in order to improve health programming and increase the accountability of the national and local health systems; best practices with regards to building resilience and LRRD will be shared and disseminated and health training curriculum will be developed to enhance local capacity to address health needs of the nomadic groups.

The primary target group is the nomadic population in rural Northern Mali and Northern Niger, and in particular the most vulnerable and most at-risk groups of this population (women, girls and infants below five). The secondary target group includes professional and community health workers in the same regions.

The action will be implemented by local civil society organisations and humanitarian actors that have local staff present in the region, in alignment with national priorities and government plans (including reaching UN Millennium Development Goals 4 and 5, as both Mali and Niger are countdown countries<sup>(1)</sup>) and in close coordination with all actors present in the regions: the local and national authorities, local and national health facilities and training facilities, the communities, as well as the development actors (EU, donors, UN agencies, the private sector, NGOs, authorities and community health and medical workers), taking into account efforts under the AGIR initiative.

<sup>(1)</sup> Both Mali and Niger are so-called 'countdown countries' meaning that progress is needed to reach the MDGs by 2015, in particular on MDG 4 and 5 (infant mortality and maternal mortality).

**CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)****21 02 77** (cont'd)

21 02 77 19 (cont'd)

*Project activities*

The preparatory action will have three phases.

*First phase: conduct operational research to determine health baselines of nomadic groups*

The action will aim to establish baselines on health indicators and study the determinants to access to quality healthcare (geographical, financial, socio cultural, etc.) of nomadic local populations, and in particular for the most vulnerable and most at-risk groups (women, girls and infants below five). It will also map out the existing health capacities and initiatives (including the AGIR and other international initiatives, government-run health facilities and training centres but also traditional and community health workers). Eventually, the research will evaluate the provision of basic healthcare to nomadic groups' needs and prevention information and services (including maternal, and child care, vaccination, nutrition, reproductive health, gender-based violence, etc.) <sup>(1)</sup>.

*Second phase: provide operational recommendations and compile best practices for LRRD and resilience building for knowledge transfer to the AGIR and other related initiatives*

Based on the assessment, the action will analyse how the nomadic groups' needs have been addressed in the emergency response and the post-crisis phase (coordination and warning mechanisms) by all development actors (EU actors, donors, UN agencies, the private sector, NGOs, authorities and community health and medical workers). It will highlight best practices in both countries notably combining mobile and static health services and the provision of dual animal and human interventions, drawing on the similarities and different approaches taken in each country.

Finally it will provide operational recommendations for future Union involvement notably in the context of AGIR on how to maintain a long-term resilience-oriented perspective towards nomadic groups also during crisis and emergency response interventions without destabilising the local and national formal and informal structures.

*Third phase: build and retain capacity to address nomadic groups' health needs among professional and community health workers for resilient health systems*

The action will leverage some of the lessons learnt by considering health capacity to address health needs of nomadic groups. This phase will focus on developing a specialised training curriculum based on the needs of nomadic communities and documenting evidence-based intervention strategies which have demonstrated results and ownership among nomadic groups. This will be done in partnership with training facilities as well as local and national authorities. The training will include the full range of basic healthcare and prevention including the reference of pregnant women to health centres. It will also contain training on the collection and monitoring of data on health status of nomadic groups. The training will target health workers with a special focus on women community-based health workers and traditional birth attendants in order to increase access to health services for nomadic groups. Training will be aligned with national priorities and in support of existing institutions.

---

<sup>(1)</sup> By basic care we mean: maternal and child health, vaccination and nutrition (specifically acute undernourished children and lactating mothers), reproductive healthcare (emergency obstetric care, antenatal and post-partum care, access to family planning methods, prevention of unsafe abortion, etc.) surveillance for epidemics and treatment of diseases (including HIV/AIDS), medical care, early psychological and clinical management especially of gender-based violence (sexual aggression, early and forced marriage, FGM/C, etc.).

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Owing to a long history of crisis in the region, extreme poverty is rife in South Kivu Province in the east of the Democratic Republic of Congo (DRC).

With 84,7 % of its inhabitants living below the poverty line, this is one of the DRC's three poorest provinces (the others are Équateur and Bandundu).

The situation is no better in Luhwindja than in any other of the province's 18 chiefdoms. In the past, more than 90% of the chiefdom's population lived on artisanal mining.

Today, almost all of the mines are run by the Banro Corporation, whose industrial-scale operations make it difficult for other activities which could be of greater benefit to the local communities to be carried out.

**CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (cont'd)****21 02 77** (cont'd)

21 02 77 20 (cont'd)

In order to survive, those communities are obliged to dig for gold at other sites that are deemed dangerous, often with disastrous consequences. The school non-attendance rate is alarmingly high, with large numbers of young girls and boys from poor families giving up their studies to go to work in the mines.

Article 53(f) of the Act of 10 January 2009 on the protection of children prohibits all forms of labour which, owing to their nature or the conditions under which they are carried out, are likely to be harmful to the health, growth, safety, development, dignity or morals of children.

Girls as young as 13 and women who have become heads of household are obliged to engage in prostitution in order to keep the local community on an even keel, given, in particular, that most of the men have no source of income.

Prostitution and its attendant problems, including physical violence and drug taking, are rife in the mines in operation in Luhwindja chiefdom.

Efforts need to be made by the government, civil society and the UN agencies to find ways of ensuring that Millennium Development Goal 1 (eradication of extreme poverty and hunger) is met in this area.

*Objectives*

The prevalence of child labour and of prostitution (involving both women and girls) in Luhwindja's mines is clearly indicative of the level of poverty in the area.

The overall aim of this project is to help improve living conditions for the inhabitants of Luhwindja chiefdom, with special emphasis being placed on providing the young people who have given up their studies to work in the mines with the guidance they require.

Special attention will be paid to the sex workers (women and girls) living at the mines, most of whom contract HIV/AIDS and other sexually transmitted diseases at an early age, and to the issue of unwanted pregnancies. Work in this area will be carried out in cooperation with Panzi Hospital, which is run by Dr Denis Mukwege.

There will also be close cooperation with local and national authorities, local communities and other development stakeholders (donors, UN agencies, private sector bodies and NGOs).

*Project activities*

There will be three main stages:

*Stage 1: opening a remedial education centre for children between the ages of five and 15 working at mines in Luhwindja (USD 800 000):*

— Raising awareness among local people of national and international child protection legislation and agreements.

- Building a remedial education centre for children rescued from the mines, some of whom have never been to school.
- Fitting the centre out with the necessary equipment. Once built, the centre will need to have the teaching and other materials required to give the children the best possible learning environment and offer them a chance to continue their studies afterwards.
- Recruiting the necessary staff. Staff with the specific qualifications and teaching skills required to handle 'outlaw' children will be recruited. The staff will also be responsible for enrolling children from the mines, with the assistance of their parents.
- Providing psycho-social counselling. Given that they come from dangerous, atypical backgrounds, once enrolled the children will first spend three months at a psycho-social guidance centre. A psychologist will be recruited for this purpose.
- Streaming the children on the basis of their level of schooling. There will be three different levels: Level 1 will be for children who have never been to school and those who left school in the first and second years of primary school. These children will be taught to second-year primary level.
- The second level will be for children who went no further than the third or fourth year of primary school. These children will be taught to fourth-year primary level.
- The third level will be for children who went no further than the fifth year of primary school or failed the sixth year. These children will be taught to sixth-year primary level.

At the end of each school year, all the children at sixth-year level will take the TENAFEP (national primary school leaving test), in preparation for going on to secondary school.

School meals will be provided to encourage children to attend classes and dissuade parents from sending them to work in the mines.

The money which the children earned in the mines helped to cover household expenses. With a view to putting an end to this practice, provision has been made for the families of the children at the centre each to be given a food package (a bag of rice and a small can of oil) every month.

- Assessing the project's impact on the basis of the number of children enrolled from the mines, their progress to secondary school, whether local or situated elsewhere, the degree of involvement of the local community and local authorities in dealing with the problem of child labour in the mines, and the quality of the education provided to the children.

*Stage 2: setting up a vocational training centre for adolescents (16 to 18 year-olds) from the Luhwindja mines (USD 1 150 000):*

- Raising awareness among local people of national and international child protection legislation and agreements. The adolescents involved need to be apprised of their rights and obligations.
- Building the vocational training centre. In line with local circumstances, the following courses will be offered: clothes making, building, carpentry, improved cooking facilities, and fitting and welding.
- Fitting the centre out with the necessary equipment. The skills learned at the centre will be backed up by practical experience gained on traineeships with local NGOs, State-owned companies, etc.
- Recruiting the necessary staff. Staff qualified to teach the various courses will be recruited either locally or from outside the area.
- Providing psycho-social counselling. Experience shows that various forms of social deviancy, including drug taking and prostitution, are common in this age group.
- Helping the young people to choose a course. Following psycho-social counselling, the young people will be helped to choose a course. The aim is to raise their sense of self-worth and enable them to make a contribution to society.
- Assessing the project's impact on the beneficiaries and determining whether the training provided has helped to address local problems. Assessments and reports will be drafted and sent to donors.

*Stage 3: helping sex workers (women and girls) living at mines in Luhwindja to find other means of earning a living (USD 760 000):*

- Recruiting the necessary staff. Technicians and other staff specialised in dealing with 'marginalised' women and girls will be recruited for the project.
- Making the sex workers aware of their human rights. During the information sessions, screening for HIV/AIDS and similar diseases will be offered to project beneficiaries on a voluntary basis.

The tests will be performed by nurses at Panzi Hospital, run by Dr Denis Mukwege. If necessary, referrals for psycho-medical care will be made.

- Providing the sex workers with information on issues relating to the management of income-generating activities and birth control.

In view of the extreme socio-economic conditions in which they live, they will be taught various birth control strategies. The association could even sign agreements with the sex workers with a view to limiting the number of births and keeping the women and girls away from the mines.

- Setting up a team to monitor compliance with the agreements, including the undertaking not to go back to the mines. A sizeable proportion of the children born to sex workers live and work at the mines.
- Helping the young women to find income-generating activities (farming jobs, small retail jobs, etc.) that will enable them to support their households. The aim is to empower them.

Assessing the project; determining whether beneficiaries have honoured their undertaking not to return to prostitution in the mines, whether the income-generating activities are going well and whether the birth control advice is being put into practice.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action is intended to contribute to the Union's strategy to support the welfare of the people of Eastern Africa and to help lift them from poverty into self-sustaining economic growth.

It aims at strengthening capacities, ownership and political commitment of local actors to initiate structural change to support the development of social enterprises which constitute an important pillar of the social economy and civil society. These enterprises will in particular produce and deliver goods and services in the fields of sustainable agricultural and livestock production, natural resource management, energy efficiency, culture and education, as well as health and care services

CHAPTER 21 02 — DEVELOPMENT COOPERATION INSTRUMENT (DCI) (*cont'd*)21 02 77 (*cont'd*)21 02 77 21 (*cont'd*)

Social enterprises, together with cooperatives, are operators in the social economy that are trading goods and services to achieve a social impact <sup>(1)</sup> rather than make a profit for their owners or shareholders, and that are managed in an open and responsible manner and, in particular, involve employees, consumers and stakeholders affected by their commercial activities <sup>(2)</sup>. The ILO has made significant efforts to highlight the importance of their role for promoting economic sustainability, social justice, ecological balance, decent work political stability, conflict resolution and gender equality <sup>(3)</sup>, and the Preparatory Action will integrate the lessons learnt from ILO's work.

The process of starting, developing and replicating social enterprises and cooperatives will often need to be based on the innovative use and combination of resources to pursue opportunities to catalyse social change and/or address social needs, propelled by social entrepreneurs.

The innovative approach of this preparatory action is based on bringing together under-utilised resources and drivers for local development, and will develop and test new ways and means to develop sustainable communities in two Eastern African countries (Kenya and Ethiopia) with strong roots in the social economy, by

- mobilising and empowering social entrepreneurs to move from informal entrepreneurship to social businesses that allow the development of skills, self-esteem, mutual responsibility, income and welfare,
- establishing local development partnerships of key institutions, stakeholders and personalities that promote and support the creation and development of social enterprises, embedded in an ecosystem conducive for their development and sustainability, that are based on the principles of participation, co-ownership and democratic management,
- mobilising and involving diaspora communities living in Europe that play a significant economic role in the flow of capital into Eastern Africa, but also have socio-political links with the region,
- facilitating learning from peers by exploiting and utilising the experience and expertise of social economy actors in the new Member States of the Union that have managed to develop new social economy structures and new business models for social enterprises in the transformation period from State-controlled economies to social market economies.

To this end, the preparatory action will apply an experimental approach, and test the conditions for success under different configurations:

- it will involve partnership between local social economy initiatives in Eastern Africa with diaspora communities in Europe and social economy actors in the new Member States,

<sup>(1)</sup> Social impact is generated through solidarity action with the disadvantaged and the excluded; with the young generation and with the elderly, solidarity with future generations (through, e.g. using natural resources efficiently, or reducing emissions and waste) Increasing the quality of life for all through producing services and products that meet collective needs and contribute to community and social capital development, through, e.g. producing and distributing healthy and affordable food, or facilitating access to and delivering education and lifelong learning.

- it will identify and empower local development partnerships in different European countries and in at least two Eastern African countries that could collaborate in establishing social enterprises and developing a social economy ecosystem in the communities of the African partners,
- the transnational local partnerships will be established and developed between local social economy initiatives in big cities, medium-sized towns and rural villages.

The preparatory action will include analytical work (participative baseline assessment and strategy developments, feasibility assessments); organisational work (coordination cells to prepare and provide technical assistance to the activities of the partners), the establishment of learning spaces (through study visits, learning seminars, secondments, cooperation between social enterprises, etc.) and the development of an infrastructure and the activation of an ecosystem for social enterprises, community-based cooperatives, and producer groups. It will result in launching transnational partnerships between local social economy initiatives from Eastern Africa and Eastern Europe, assisted by diaspora communities and experienced social economy actors from the new Member States.

It is expected that the development of social economy initiatives will enhance local community development in Eastern Africa and strengthen the processes of poverty prevention, notably through the reduction of informal employment, access to co-ownership of the means of production and the development of an infrastructure for boosting the social economy.

*Remarks*

Existing research and development (R&D) funding mechanisms dedicated to neglected tropical diseases (NTDs) tend to take a siloed approach: gaps persist between the different phases of the R&D cycle and linkages with fringe issues such as WASH and education programmes are not addressed as part of a multi-sector approach. Likewise, the need for equally important incremental research, which can help to significantly improve the acceptability of treatments and diagnostics to populations affected by NTDs, tends to be overlooked.

With the objective of addressing some of the R&D gaps for NTDs, this pilot project will contribute to or co-fund an alternative model that relies on an innovative and coordinated approach to address persistent R&D gaps stemming from market failures. The model will identify a specific part of the gap in R&D for NTDs that disproportionately affect developing countries, and will provide crucial elements for the development of high-quality, accessible, affordable and suitable health solutions.

This project will build on the work carried out under previous preparatory actions and pilot projects on global health research and innovation and support efforts to address identified and recognised gaps in line with the WHO process in connection with the report available at [http://www.who.int/phi/cewg\\_report/en/](http://www.who.int/phi/cewg_report/en/) and with the list of demonstration projects identified and preselected by the Global Technical Consultative Meeting on Health R&D Demonstration Projects.

In doing so, while seeking to improve acceptability, the project will contribute to meeting at least one of the following objectives:

- recommending effective and efficient mechanisms for coordination with other current initiatives,
- proposing innovative ways of decoupling the price of the final product from the cost of the R&D,
- maximising public-public and public-private partnerships in knowledge sharing, including open knowledge innovation approaches,
- strengthening research, development and production capacity, including through technology transfer, in developing countries.

## Remarks

The pilot project will support NGOs, victims, and witnesses seeking justice for international crimes and also support international and DRC lawyers representing victims in strategic litigation at national, regional and international level;

## Expected results:

- detailed information on international crimes, in particular crimes involving sexual and gender-based violence (SGBV), and progress with efforts to combat impunity,
- national lawyers properly trained and able to support victims of international crimes before national courts,
- national human rights organisations better able to support victims in combating impunity for the most serious crimes,
- better protection for those involved in combating impunity,
- cases brought before regional human rights bodies, development of case law supporting access by SGBV victims to justice and reparation,
- a stronger prosecution strategy for the Office of the Prosecutor at the International Criminal Court (ICC), in particular on sexual crimes, and better victim access to the ICC,
- intergovernmental organisations informed, so that they may take action against impunity for the most serious crimes,
- statements and tangible acts (laws and institutional reforms) by national authorities in support of action against impunity for the most serious crimes.

## CHAPTER 21 03 — EUROPEAN NEIGHBOURHOOD INSTRUMENT (ENI) (cont'd)

21 03 01 (cont'd)

21 03 01 01 (cont'd)

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter and may be complemented by contributions for Union trust funds.

- security and the prevention and settlement of conflicts,
- support to refugees.

An adequate level of appropriations should be reserved for the support of civil society organisations.

Part of this appropriation will be used for measures focusing on the many frozen conflicts in the Eastern Neighbourhood and to support the search for political solutions to those conflicts.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

This appropriation is intended to cover the ERDF support under the European territorial cooperation goal in the 2014-2020 programming period to cross-border and sea-basin cooperation programmes under the European Neighbourhood Instrument (ENI).

It is intended in particular to finance cross-border cooperation programmes along the external borders of the Union between partner countries and Member States to promote integrated and sustainable regional development between neighbouring border regions, including the Baltic Sea and the Black Sea, and harmonious territorial integration across the Union and with neighbouring countries.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Appropriations under this item will be mainly used to finance the multi-country umbrella programmes that will supplement the country financial allocations. The purpose of the multi-country umbrella programmes — as stipulated in Regulation (EU) No 232/2014 — is to facilitate the implementation of the incentive-based approach.

Appropriations under this item will also be used to cover actions aiming to:

- provide general support to the functioning of the Union for the Mediterranean,
- provide general support to the functioning of the Eastern Partnership initiative,
- provide general support to the functioning of the other regional cooperation frameworks, such as Northern Dimension and Black Sea Synergy.

It will also be used for actions improving the level and capacity of implementation of Union assistance as well as for actions aiming to inform the general public and the potential beneficiaries of assistance and to increase visibility.

*Remarks*

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

It is also intended to cover the completion of the financial protocols with Mediterranean countries, including, inter alia, support for the Euro-Mediterranean Investment Facility within the European Investment Bank and covers the execution of non-EIB financial aid provided for in the third and fourth generation of financial protocols with the southern Mediterranean countries. The protocols cover the period 1 November 1986 to 31 October 1991 for the third generation of financial protocols and the period 1 November 1991 to 31 October 1996 for the fourth generation of financial protocols.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any income from financial contributions from Member States and other donor countries, including in both cases their public and parastatal agencies, or from international organisations to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, pursuant to the relevant basic act, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

As diversity and complexity of national legislations in requested states and limited legal expertise and institutional capacities in requesting states remain major obstacles in the field of asset recovery to Arab Spring countries in transition, it is of crucial importance to offer substantial legal and technical assistance to southern Mediterranean partner countries concerned.

This preparatory action, based on existing Union initiatives supporting Egyptian and Tunisian authorities engaged in the recovery of misappropriated assets stolen by former dictators and their regimes, aims to strengthen Union action in this field through capacity-building as well as promoting cooperation and expertise and information sharing between requesting and requested states, and the revision of national legislations as appropriate.

This preparatory action covers start-up costs for and finances annual running costs of this support mechanism.

*Remarks*

The general objective will be to contribute to the development and consolidation of democracy and respect for human rights, in accordance with Union policies and guidelines and in close cooperation with civil society.

Key areas of activity will include:

- enhancing respect for and observance of human rights and fundamental freedoms, including women's rights, as proclaimed in the Universal Declaration of Human Rights and other international and regional human rights instruments, with a focus on freedom of expression, freedom of assembly and digital freedoms, and strengthening their protection, promotion and monitoring, mainly through support to relevant civil society organisations, human rights defenders, and victims of repression and abuse,

- supporting and consolidating democratic reforms in third countries except European Union Electoral Observation Missions, by enhancing participatory and representative democracy, empowerment of women, strengthening the overall democratic cycle, and improving the reliability of electoral processes.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the transfer agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter and may be complemented by contributions for Union trust funds.

## Remarks

This appropriation is intended to cover the 'assistance in addressing global and trans-regional threats and emerging threats', defined in Article 5 of Regulation (EU) No 230/2014 establishing an Instrument contributing to stability and peace.

It is intended to cover actions aiming to help safeguard countries and populations against risks either of an intentional, accidental or natural origin. This may, inter alia, include:

**CHAPTER 21 05 — INSTRUMENT CONTRIBUTING TO STABILITY AND PEACE (ICSP) — GLOBAL AND TRANS-REGIONAL AND EMERGING THREATS** (*cont'd*)**21 05 01** (*cont'd*)

- the promotion of civilian research activities as an alternative to defence-related research, and support for the retraining and alternative employment of scientists and engineers having formerly been employed in weapons-related areas,
- support for measures to enhance safety practice related to civilian facilities where sensitive chemical, biological, radiological or nuclear materials or agents are stored, or are handled in the context of civilian research programmes,
- support, within the framework of Union cooperation policies and their objectives, for the establishment of civil infrastructure and relevant civilian studies necessary for the dismantlement, remediation or conversion of weapons-related facilities and sites where these are declared as no longer belonging to a defence programme,
- strengthening the capacity of the competent civilian authorities involved in the development and enforcement of effective control of the trafficking in chemical, biological, radiological and nuclear materials or agents (including the equipment for their production, or delivery or effective border controls), including through the installation of modern logistical evaluation and control equipment. The actions relate to natural and industrial disasters as well as criminal activities,
- support to IAEA to upgrade their technical capacity to detect the illicit trafficking of radioactive materials,
- the development of the legal framework and institutional capacities for the establishment and enforcement of effective export controls on dual-use goods, including measures of regional cooperation,
- the development of effective civilian disaster preparedness, emergency planning, crisis response, and capabilities for clean-up measures in relation to possible major environmental incidents in this field.

Other measures in the field of global and trans-regional threats will cover:

- strengthening the capacity of law enforcement and judicial and civil authorities involved in the fight against terrorism — countering violent extremism — and organised crime, including illicit trafficking of people, drugs, firearms and explosive materials, cybercrime, falsified medicine and in the effective control of illegal trade and transit. A new priority is to address global and trans-regional effects of climate change with a potentially destabilising impact,
- support for measures to address threats to international transport, and critical infrastructure, including passenger and freight traffic, energy operations and energy distribution, electronic information and communication networks,
- ensuring an adequate response to major threats to public health, such as pandemics with a potential transnational impact.

Such measures may be adopted under this instrument in the context of stable conditions, where they aim to address specific global and trans-regional threats having a destabilising effect, and only to the extent that an adequate and effective response cannot be provided under related Union instruments for external assistance.

Remarks

This appropriation is intended to cover the financing of the promotion of an effective nuclear safety and nuclear security culture at all levels, in particular through:

- continuous support for regulatory bodies, technical support organisations, and the reinforcement of the regulatory framework, notably concerning licensing activities in order to establish strong independent regulatory oversight,
- support for the safe transport, treatment and disposal of spent nuclear fuel and radioactive waste both from nuclear power plant and from other (orphan) sources, (medical applications, uranium mining),
- the development and implementation of strategies for decommissioning existing installations and the remediation of former nuclear sites,
- the promotion of effective regulatory frameworks, procedures and systems to ensure adequate protection against ionising radiations from radioactive materials, in particular from high activity radioactive sources, and their safe disposal,

**CHAPTER 21 06 — INSTRUMENT FOR NUCLEAR SAFETY COOPERATION (INSC) (cont'd)**

**21 06 01** (cont'd)

- the financing of stress tests based on the *acquis*,
- the establishment of the necessary regulatory framework and methodologies for the implementation of nuclear safeguards, including for the proper accounting and control of fissile materials at State and operators level,
- the establishment of effective arrangements for the prevention of accidents with radiological consequences as well as the mitigation of such consequences should they occur, and for emergency planning, preparedness and response, civil protection and rehabilitation measures,
- measures to promote international cooperation (including in the framework of relevant international organisations, notably IAEA) in the abovementioned fields, including the implementation and monitoring of international conventions and treaties, exchange of information and training and research,
- the enhancement of emergency preparedness in case of nuclear accidents, as well as training and tutoring *inter alia* to increase the capacities of the regulators.

This appropriation is intended also to fund health and environmental projects as regards the consequences of the Chernobyl accident, which affect human health and the environment, especially in Ukraine and Belarus.

Priority will be given to address the needs in the countries being part of the European Neighbourhood Policy.

Relevant work previously carried out under the Instrument for Pre-accession Assistance (IPA) will be taken over by the INSC in order to ensure a comprehensive approach.

Remarks

New article

This appropriation is intended to cover the Union's contribution to the completion of the Chernobyl shelter after the accident of 1986.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. *Remarks*

This appropriation is intended to cover the financing of *ex ante* and *ex post* evaluations, monitoring and support measures during the programming, preparation and implementation stages of development operations, strategies and policies, including the following:

- effectiveness, efficiency, relevance, impact and viability studies and the development of impact measurements and indicators for development cooperation,
- monitoring of operations in the course of implementation and after their completion,
- support measures to improve the quality of monitoring systems, methodologies and practices concerning ongoing operations and the preparation of future operations,
- feedback of information and information activities on findings, conclusions and recommendations of evaluations into the decision-making cycle,
- methodological developments to improve the quality and utility of evaluations, including research, feedback, information and training activities thereon.

This appropriation also covers the financing of audit activities concerning the management of programmes and projects implemented by the Commission in the external aid field, and the financing of training activities, based on the special rules governing Union external aid and organised for external auditors.

This appropriation is moreover intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, as well as capacity-building and training activities for the principal players involved in the design and implementation of external aid programmes.

Finally, this appropriation is intended to cover expenditure on studies and elaboration of methodological tools, meetings of experts, information and publications, as well as knowledge-sharing and training activities concerning the design and implementation of external assistance programmes, in particular on the project and programme cycle management and on capacity development.

*Legal basis*

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

*Remarks*

Budget financing provides the Commission with the means of support it needs to prepare, formulate and follow up coordination measures under its development policy. Policy coordination is crucial to the consistency, complementarity and aid and development effectiveness.

Coordination measures are essential in defining and shaping the Union development policy at a strategic and programming level. The specific nature of the Union development policy is directly enshrined in the Treaties (Articles 208 and 210 of the Treaty on the Functioning of the European Union). Union aid and the national policies of the Member States in the sphere of development cooperation need to complement and reinforce each other and this cannot work without coordination. Article 210 of the Treaty on the Functioning of the European Union calls on the Commission to act as coordinator of the Member States' and the Union's development policies and of action in development cooperation.

**CHAPTER 21 08 — DEVELOPMENT AND COOPERATION WORLDWIDE** (*cont'd*)**21 08 02** (*cont'd*)

Coordination is not only a major factor in the Commission's value added vis-à-vis the policies of the Member States but also a priority in the work schedule at the point where the agendas of the Union and the international community intersect. It therefore reflects a steadily growing demand from the other European institutions, as recognised by the Member States and by the European Parliament at the European Council in Barcelona in March 2002.

This appropriation covers various forms of action:

*Action A: Coordination at European and international levels:*

- effectiveness, efficiency, relevance, impact and viability studies in the area of coordination, meetings of experts and exchanges between the Commission, Member States, and other international actors (US, emerging donors, etc.) and international forums such as South-South cooperation,
- research, communication, consultation, and evaluation services, including for technical assistance,
- monitoring of policies and operations in the course of implementation,
- support measures to improve the quality of the monitoring of ongoing operations and the preparation of future operations, including capacity-building,
- measures to support external initiatives in the sphere of coordination,
- the preparation of common positions, statements and initiatives,
- the organisation of events relating to coordination,
- the Commission's membership fees to the international organisations and networks,
- the dissemination of information through the production of publications and the development of information systems.

This appropriation will also cover the financing of activities in the area of research for policymaking in development, building on the experience of the initiative 'Mobilising European Research on Development Policies' and of the European Report on Development. These activities include support to cutting edge research and structured debate to enhance synergies between researchers and policymakers, the objective being to refine the European perspective on key development challenges and enhance the Union's influence on the international development agenda on the basis of independent knowledge and excellence.

COMMISSION

TITLE 21 — DEVELOPMENT AND COOPERATION

CHAPTER 21 08 — DEVELOPMENT AND COOPERATION WORLDWIDE (*cont'd*)21 08 02 (*cont'd*)*Action B: Raising awareness*

This appropriation covers the financing of activities designed to draw attention to action by the Union and the Member States in the development field and to raise public awareness of development issues. It will also provide the necessary financing for preparing, launching and promoting the 'European Year for Development 2015' which has been proposed by the Commission following an initiative by the European Parliament. In this respect the Commission may co-finance, as in previous European Years, awareness-raising activities with Member States, in particular aiming at those countries where development cooperation (as a donor) does not have a long established tradition, and with civil society organisations. This European Year should lead to additional activities to be financed within Europe and in third countries in the context of the international process deciding on and launching the global post-2015 development framework which will replace the Millennium Development Goals. Every activity financed pursuant to this action must include the following two components, which are complementary in the Commission's view:

- an 'information' component, designed to promote the various activities which the Union undertakes in the development aid field and the activities which it conducts in partnership with the Member States and other international institutions,
- an 'awareness-raising' component, covering public opinion in the Union, and in developing countries.

These activities consist mainly, though not exclusively, of financial support for schemes in the audiovisual, publications, seminars and events fields as applied to development, the production of information material, the development of information systems, and also the Lorenzo Natali prize for journalism in the development field.

These activities are directed at public and private sector partners, and at the Union's representations and delegations in the Member States.

This appropriation is moreover intended to cover the funding of priority information and communication activities directed towards the citizens of the Union and dealing with the Union's external policies as a whole.

The areas which will be covered by information activities include those below, but may embrace other aspects of the Union's external relations, particularly in relation to the future of the Union's external policy:

- addressing the weak public perception of external assistance. The objective is to make clear that external assistance is an integral part of what the Union does and is one of the crucial policies that define the Union and its role in the world, and to raise awareness of the fact that the Union is delivering tangible results on behalf of Union citizens to fight poverty and to provide high-quality sustainable development worldwide,
- the 'European Neighbourhood Policy' (ENP). The ENP was launched on the basis of a communication from the Commission to the Council and the European Parliament of 11 March 2003 entitled 'Wider Europe — Neighbourhood: A new framework for relations with our eastern and southern neighbours' (COM(2003) 104 final). The actions which are part of this activity will continue to provide information on the activities of the Union in the framework of its European Neighbourhood Policy,

COMMISSION  
TITLE 21 — DEVELOPMENT AND COOPERATIONCHAPTER 21 08 — DEVELOPMENT AND COOPERATION WORLDWIDE (*cont'd*)21 08 02 (*cont'd*)

- information activities, to be carried out in cooperation with the Council, on the aims and development of the common foreign and security policy,
- the organisation of visits for groups of representatives of civil society.

The Commission has adopted two communications to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final and COM(2002) 350 final). They propose an interinstitutional framework for cooperation between the institutions and with the Member States for the development of a communication and information policy strategy for the Union.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of Union information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years on the basis of information provided by the Commission.

Finally, this appropriation is intended to cover:

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,
- expenditure on printing, translation, studies, meetings of experts, information and the purchase of information material directly linked to the achievement of the objective of the programme.

It also covers the costs of publication, production, storage, distribution and dissemination of information material, in particular via the Publications Office of the European Union, and other administrative costs related to coordination.

*Remarks*

This appropriation is intended to cover administrative costs directly linked to the implementation of the Instrument for Pre-Accession Assistance (IPA), the phasing out of pre-accession assistance, TAIEX and the support to the economic development of the Turkish Cypriot community, in particular:

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,
- expenditure on external personnel at headquarters (contract agents, seconded national experts or agency staff), limited to EUR 7 019 624. This estimate is based on a provisional annual unit cost per man-year, of which an estimated 90 % is accounted for by the remuneration of the personnel concerned and 10 % by the additional cost of training, meetings, missions (including long-term missions), information technology (IT) and telecommunications relating to that personnel,
- expenditure on external personnel in Union delegations (contract staff, local staff or seconded national experts) for the purposes of devolved programme management in Union delegations in third countries or for internalisation of tasks of phased-out technical assistance offices, as well as in Commission Post-Accession Transitions Teams remaining in new Member States during the phasing-out period (contract staff, agency staff) working on tasks directly related to completion of accession programmes. In both cases, it also covers additional logistical and infrastructure costs, such as the cost of training, meetings, missions and renting of accommodation directly resulting from the presence in Union delegation of external personnel remunerated from the appropriations entered against this item,
- expenditure on studies, meetings of experts, information systems, awareness-raising, training, preparation and exchange of lessons learnt and best practices, as well as publications activities and any other administrative or technical assistance directly linked to the achievement of the objective of the programme.
- research activities on relevant issues and the dissemination thereof;
- expenditure related to the provision of information and communication actions, including the development of communication strategies and corporate communication of the political priorities of the Union.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers expenditure on administrative management under Chapters 22 02 and 22 03.

*Remarks*

This appropriation is intended to cover the operating costs of the Education, Audiovisual and Culture Executive Agency relating to the management of programmes in the ‘Enlargement’ policy area. The mandate of the agency includes managing the legacy for the 2007-2013 programming period for the Youth, Tempus and Erasmus Mundus programmes in which IPA beneficiaries are involved. It will also cover, under the ‘Erasmus+’ programme, the operating costs of certain actions of that programme in order to promote the international dimension of higher education and other actions.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the ‘European Economic Area’ Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

22 02 01 (cont'd)

22 02 01 01 (cont'd)

*Remarks*

Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in the Western Balkans:

- support for political reforms,
- strengthening of the ability of the beneficiaries listed in Annex I to Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

*Remarks*

This appropriation is intended to cover the continuation of aid under Regulation (EC) No 389/2006 to facilitate the reunification of Cyprus by encouraging the economic development of the Turkish Cypriot community with particular emphasis on economic integration covering the areas specified in that Regulation, notably actions for rural development, restructuring of infrastructure, reconciliation and confidence building measures and scholarships in Member States for Turkish Cypriot students. The TAIEX instrument will be used for the preparation of legal texts to prepare for the application of the Union *acquis* immediately following any political settlement for reunification.

The appropriations will also allow for the continuation of Union financial support to facilitate the intensification of the work of the Committee on Missing Persons in order to meet the goals of its strategic plan on the faster identification of missing persons, as well as the implementation of the decisions of the bicomunal Technical Committee on Cultural Heritage, which should include minorities' projects.

This appropriation is to be used, amongst others, to sustain the outcome of works, supplies and grants being funded under earlier allocations. In addition, grant schemes addressed to a large variety of beneficiaries within the civil society of the community (non-governmental organisations, students and teachers, schools, farmers, small villages, the private sector) may continue. These activities aim at socio-economic development and are reunification driven. Priority should be given, where possible, to reconciliation projects which create bridges between the two communities and build confidence. These measures underline the strong desire and commitment of the Union to a Cyprus settlement and reunification.

*Legal basis*

Council Regulation (EC) No 389/2006 of 27 February 2006 establishing an instrument of financial support for encouraging the economic development of the Turkish Cypriot community (OJ L 65, 7.3.2006, p. 5).

- fees and reimbursable expenses incurred through service contracts to undertake audits and evaluations of partners and actions of the Directorate-General for Humanitarian Aid and Civil Protection,
- expenditure on studies, information systems and publications, on public awareness and information campaigns, and on any other measure highlighting the Union character of the aid,
- expenditure on external personnel at headquarters (contract agents, seconded national experts or agency staff) limited to EUR 1 800 000. These personnel are intended to take over the tasks that were entrusted to external contractors handling the administration of individual experts and to manage programmes in third countries. That amount, based on an estimated annual cost per person/year, is intended to cover the remuneration of the external personnel in question and training, meetings, missions, information technology (IT) expenditure and telecommunications expenditure related to their tasks,
- expenditure related to the purchase and maintenance of security, specialised IT and communication tools and technical services necessary for the establishment and functioning of the Emergency Response Centre. This centre ('crisis room') will be operational on a 24-hour basis and responsible for the coordination of the Union's civilian disaster response, in particular to ensure full consistency and efficient cooperation between humanitarian aid and civil protection,
- expenditure on the development, maintenance, operation and support of information systems, intended for internal use or to improve coordination between the Commission and other institutions, national administrations, agencies, non-governmental organisations, other partners in humanitarian aid, and Directorate-General for Humanitarian Aid and Civil Protection experts in the field.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons, to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers administrative expenditure under Articles 23 02 01 and 23 02 02.

*Remarks*

This appropriation is intended to cover:

- expenditure on technical and/or administrative assistance relating to the identification, preparation, management, monitoring, audit, supervision and evaluation of the Civil Protection Financial Instrument and the Union Civil Protection Mechanism,
- expenditure related to the purchase and maintenance of security, specialised IT and communication tools and technical and human services necessary for the establishment and functioning of the Emergency Response Centre. This centre ('crisis room') will be operational on a 24-hour basis and responsible for the coordination of the Union's civilian disaster response, in particular to ensure full consistency and efficient cooperation between humanitarian aid and civil protection,
- expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

## Remarks

This appropriation is intended to cover the financing of humanitarian and food aid operations of a humanitarian nature to help people in countries outside the Union who are the victims of conflicts or disasters, both natural and man-made (wars, outbreaks of fighting, etc.), or comparable emergencies, for as long as is necessary to meet the humanitarian needs that such situations give rise to. It will be carried out in accordance with the rules on humanitarian aid under Regulation (EC) No 1257/96.

The aid is granted to victims without discrimination on the grounds of race, ethnic origin, religion, disability, sex, age, nationality or political affiliation. That assistance is provided as long as it is necessary to meet the humanitarian needs to which such situations give rise.

This appropriation is also intended to cover the purchase and delivery of any product or equipment needed for the implementation of humanitarian aid operations, including the building of homes or shelters for affected groups of people, short-term rehabilitation and reconstruction work, particularly of infrastructure and facilities, the costs associated with external, expatriate or local staff, storage, international or national shipment, logistic support and distribution of relief and any other action aimed at facilitating freedom of access to the recipients of the aid.

This appropriation may be used to finance the purchase and delivery of food, seeds, livestock or any product or equipment needed for the implementation of the humanitarian and food aid operations.

This appropriation may also cover any other costs directly linked to the implementation of humanitarian aid operations and the cost of the measures that are essential for implementing food aid operations of a humanitarian nature within the requisite timescale and in a way which meets the needs of the recipients, satisfies the requirement to achieve the greatest possible degree of cost-effectiveness and provides greater transparency.

## COMMISSION

## TITLE 23 — HUMANITARIAN AID AND CIVIL PROTECTION

CHAPTER 23 02 — HUMANITARIAN AID, FOOD AID AND DISASTER PREPAREDNESS (*cont'd*)23 02 01 (*cont'd*)

It covers, inter alia:

- feasibility studies on humanitarian operations, evaluations of humanitarian aid projects and plans, visibility operations and information campaigns linked to humanitarian operations,
- the monitoring of humanitarian aid projects and plans, the promotion and development of initiatives intended to increase coordination and cooperation so as to make aid more effective and improve the monitoring of projects and plans,
- the supervision and coordination of the implementation of aid operations forming part of the humanitarian and food aid concerned, in particular the terms for the supply, delivery, distribution and use of the products involved, including the use of counterpart funds,
- measures to strengthen Union coordination with the Member States, other donor countries, international organisations and institutions (in particular those forming part of the United Nations), non-governmental organisations and organisations representing the latter,
- the financing of technical assistance contracts to facilitate the exchange of technical know-how and expertise between Union humanitarian organisations and agencies or between such bodies and those of third countries,
- studies and training linked to the achievement of the objectives of the humanitarian and food aid policy area,
- action grants and running cost grants in favour of humanitarian networks,
- humanitarian mine-clearance operations including public awareness campaigns for local communities on anti-personnel mines,
- expenditure incurred by the network on humanitarian assistance (NOHA), pursuant to Article 4 of Regulation (EC) No 1257/96. This is a one-year multidisciplinary postgraduate diploma in the humanitarian field designed to promote greater professionalism amongst humanitarian workers and involving several participating universities,
- the transport and distribution of aid, including any related operations such as insurance, loading, unloading, coordination, etc.,
- back-up measures that are essential for the programming, coordination and optimum implementation of the aid, the cost of which is not covered by other appropriations, e.g. exceptional transport and storage operations, processing or preparation of foodstuffs on the spot, disinfection, consultants' services, technical assistance and equipment directly involved in providing the aid (tools, utensils, fuel, etc.),
- pilot schemes concerning new forms of transport, packaging or storage, studies of food aid operations, visibility operations linked to the humanitarian operations, and information campaigns to increase public awareness,

**CHAPTER 23 02 — HUMANITARIAN AID, FOOD AID AND DISASTER PREPAREDNESS** (cont'd)**23 02 01** (cont'd)

- the storage of food (including administrative costs, futures operations, with or without options, training of technicians, purchase of packaging and mobile storage units, cost of maintaining and repairing stores, etc.),
- the technical assistance necessary for the preparation and implementation of humanitarian aid projects, in particular expenditure incurred covering the cost of contracts of individual experts in the field and the infrastructure and logistics costs, covered by imprest accounts and expenditure authorisations, of the Directorate-General for Humanitarian Aid and Civil Protection units deployed throughout the world.

In order to ensure full financial transparency under Articles 58 to 61 of the Financial Regulation, the Commission, when concluding or modifying agreements on the management and implementation of projects by international organisations, will make every effort to commit to sending all their internal and external audits regarding the use of Union funds to the European Court of Auditors and to the Internal Auditor of the Commission.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

## Remarks

This appropriation is intended to cover expenditure on actions in the field of civil protection. It is aimed at supporting, coordinating and supplementing the actions of the Member States, EFTA States and candidate countries having signed an appropriate agreement with the Union in the field of preparedness and prevention with regard to natural and man-made disasters, including acts of terrorism and technological, radiological or environmental accidents, marine pollution and acute health emergencies, occurring inside the Union. It also aims to facilitate closer cooperation between the Member States in the field of civil protection.

It covers, in particular:

- actions in the field of prevention aimed at supporting and promoting Member States' risk assessment and mapping activity, such as the sharing of good practice, the compilation and dissemination of information from Member States on risk management activity including peer reviews,
- the creation and management of a 24/7 Emergency Response Coordination Centre (ERCC). This covers, amongst others, the purchase and maintenance of security, specialised IT and communication tools and technical services necessary for the establishment and functioning of the ERCC. This centre is operational on a 24-hour basis 7 days a week and responsible for the coordination of the Union's civilian disaster response, in particular to ensure full consistency and efficient cooperation between humanitarian aid and civil protection. The ERCC needs advanced technology to maximise the gathering of information and facilitate the dissemination of information to various stakeholders, partners and teams in the field during major emergencies. In a crisis situation, more information rapidly available to decision-makers translates into saved lives,

**CHAPTER 23 03 — THE UNION CIVIL PROTECTION MECHANISM** (*cont'd*)**23 03 01** (*cont'd*)23 03 01 01 (*cont'd*)

- the creation of a 'European Emergency Response Capacity', a 'stand-by' capability for resources and equipment to be made available to a Member State in the event of an emergency,
- the development and management of a certification and registration process for the 'European Emergency Response Capacity'. This includes also the development of capacity goals and quality requirements,
- the identification of significant response capacity gaps in the 'European Emergency Response Capacity' and support to the development of required capacities,
- the identification of intervention experts, modules and other support available in Member States for assistance interventions in case of emergencies,
- the development and maintenance of a network of trained experts of Member States to assist at headquarters level in the monitoring, information and coordination tasks of the ERCC,
- a programme of lessons learnt from civil protection interventions and exercises in the framework of the Union Civil Protection Mechanism,
- a training programme for intervention teams, external personnel and experts, to provide the knowledge and tools needed to participate effectively in Union interventions and to develop a common European intervention culture,
- the management of a training network open to training centres for civil protection and emergency management personnel and other relevant actors to provide guidance on Union and international civil protection training,
- the management of an exercises programme including command post exercises, full-scale exercises and exercises for civil protection modules to test interoperability, train civil protection officials and create a common intervention culture,
- exchanges of experts to enhance understanding of Union civil protection and to share information and experience,
- information and communication (ICT) systems, in particular CECIS (Common Emergency Communication and Information System), facilitating the exchange of information with Member States during emergencies, to improve efficiency and to enable the exchange of 'EU classified' information. This covers the costs of development, maintenance, operation and support (hardware, software and services) of the systems. It also covers the cost of project management, quality control, security, documentation and training linked to the implementation of such systems,
- the study and development of civil protection modules within the meaning of Article 4 of Decision No 1313/2013/EU including support to improve their interoperability,

- the study and development of disaster detection and early warning systems,
  - the study and development of scenario-building, asset mapping and plans for the deployment of response capacities,
  - workshops, seminars, projects, studies, surveys, modelling, scenario-building and contingency planning, capacity-building assistance, demonstration projects, technology transfer, awareness-raising, information, communication and monitoring, assessment and evaluation,
- other supporting and complementary actions necessary in the framework of the Union Civil Protection Mechanism to achieve a high level of protection against disasters and enhance the Union's state of preparedness to respond to disasters,
- expenditure on audits and evaluation as enshrined in the Civil Protection Financial Instrument and the Union Civil Protection Mechanism.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

This appropriation is intended to cover expenditure on actions in the field of civil protection. It is aimed at supporting, coordinating and supplementing the actions of the Member States, EFTA States, acceding countries, candidate countries and potential candidates having signed an appropriate agreement with the Union in the field of preparedness and prevention with regard to natural and man-made disasters, including acts of terrorism and technological, radiological or environmental accidents, marine pollution and acute health emergencies, occurring in third countries. It covers in particular the mobilisation of experts to assess prevention and preparedness needs in third countries in the event of disasters, and the basic logistical support for such experts.

It is also aimed at providing financial support for certain actions covered under Articles 21 and 22 of Decision No 1313/2013/EU to candidate countries not participating in the Union Civil Protection Mechanism and countries under the European Neighbourhood Policy to the extent that they complement funding available from the Instrument for Pre-Accession Assistance and the European Neighbourhood Instrument.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover expenditure related to civil protection intervention within the Union under the Union Civil Protection Mechanism:

- the provision of support to Member States in obtaining access to equipment and transport resources,
- the provision of additional transport resources and associated logistics, necessary for ensuring a rapid response to major emergencies and complementing the transport provided by the Member States,
- the mobilisation of experts to assess assistance needs and facilitate Union assistance in Member States in the event of disasters, and the basic logistical support for such experts,
- the deployment of trained experts of Member States to the Emergency Response Coordination Centre (ERCC) in order to assist in the monitoring, information and coordination tasks of the ERCC,
- any supporting and complementary action in order to facilitate the coordination of response in the most effective way.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. This appropriation is intended to cover expenditure related to civil protection intervention in third countries under the Union Civil Protection Mechanism:

- mobilisation of experts to assess assistance needs and facilitate European assistance in third countries in case of disasters,
- the provision of support to Member States in obtaining access to equipment and transport resources,
- the provision of European civil protection assistance, including the provision of relevant information on means of transport as well as associated logistics, in the event of disaster,
- support for consular assistance to the citizens of the Union in major emergencies in third countries regarding civil protection activities, upon request from the consular authorities of the Member States,
- any supporting and complementary action in order to facilitate the coordination of response in the most effective way.

Implementing partners may include authorities of the Member States or of beneficiary countries and their agencies, regional and international organisations and their agencies, non-governmental organisations, public and private operators and individual organisations or operators (including staff seconded from Member State administrations) with appropriate specialised expertise and experience.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. *Remarks*

Natural disasters, including those resulting from climate change, are trans-boundary in nature. It is hence imperative that preparedness activities take place in a more coordinated way, cutting across national borders, transferring knowledge and raising the awareness of state, regional and local authorities and citizens alike. In Europe, there are several research centres and centres of excellence that have already developed a capacity to analyse and evaluate disaster risks and to warn their State authorities in order to prevent damage and casualties, prepare the relevant communities in advance of a disaster and take stock of the early-warning information in order for it to be used when making targeted investments co-financed by the European Structural and Investment Funds (ESIF) so that the relevant thematic objectives are achieved. In addition, there is the European Response Coordination Centre (ERCC) which is operated within the Directorate-General for Humanitarian Aid and Civil Protection and has been set up to support a coordinated and faster response to disasters both inside and outside Europe using resources from 32 countries participating in the Union Civil Protection Mechanism. The ERCC is currently relying on several key European detection and alert systems, which provide information that allows the ERCC to successfully react to disasters as well as on the scientific expertise of the Joint Research Centre (JRC) to analyse the impact of natural events (including their impact on infrastructure that may cause technological disasters).

**CHAPTER 23 03 — THE UNION CIVIL PROTECTION MECHANISM** (*cont'd*)23 03 77 (*cont'd*)23 03 77 03 (*cont'd*)

However, in the face of growing challenges, the above resources and expertise are no longer sufficient to coordinate the Union response at ERCC level and to manage the future European emergency capacity, which requires a stronger focus on forecasting, planning and coordination, instead of only responding to emergencies. Experience has also shown that preventing and preparing for disasters is more cost-effective than responding to them.

Furthermore, there is no coordinated mechanism in place for reporting either to the ERCC or to all Member States that might be affected by a potential disaster extending beyond national boundaries (e.g. storms). At present, each Member State largely relies upon its own capacity.

To address the above challenges and to achieve the goal of fully exploiting science and technology within the disaster risk management field in a cost-efficient manner, a European pilot project is necessary. The pilot project will build on the experience of the North-Eastern Atlantic, Mediterranean and Connected Seas Tsunami Warning and Mitigation System (NEAMTWS) network, which has brought together five partners to monitor on a round-the-clock basis tsunami incidents in the North-East Atlantic, Mediterranean and connected seas and to warn the Union's and the Member States' authorities. The pilot project will:

- identify relevant scientific centres across Europe that could provide expertise for disaster risk management policymaking and emergency operations,
- bring together those scientific centres and create enlarged scientific partnerships (European Union Centres of Excellence Network) for different hazards, associating them with scientific centres in the immediate Union neighbourhood, if necessary, in compliance with the Union Civil Protection Mechanism legislation,
- bridge the existing reporting and linkage gap between the European Union Centres of Excellence Network and the ERCC; this could be done by defining and implementing a governance structure linking the European Union Centres of Excellence Network, the JRC and the ERCC.

In this manner, relevant disaster information will be transmitted to all actors concerned in a coordinated and timely way, increasing both preparedness and response levels of the Member States and the Union through the ERCC. Setting up and expanding such a network will require the large-scale involvement of European scientific centres that are already using state-of-the-art monitoring technology or can be funded to upgrade accordingly, where this is necessary for satisfactory regional coverage. They could set up, implement and test a common, efficient and coordinated reporting methodology while extending it to cover a large geographical area in Europe (at least 10 countries). A large network is a prerequisite for the success of such an endeavour, as the geographical spread of disaster risks needs to be taken into account.

*Remarks*

This appropriation is intended to cover the implementation of the European Voluntary Humanitarian Aid Corps initiative ('EU Aid Volunteers').

The objective of the EU Aid Volunteers initiative shall be to contribute to strengthening the Union's capacity to provide needs-based humanitarian aid aimed at preserving life, preventing and alleviating human suffering, and maintaining human dignity, and to strengthening the capacity and resilience of vulnerable or disaster-affected communities in third countries, particularly by means of disaster preparedness, disaster risk reduction and by enhancing the link between relief, rehabilitation and development. That objective shall be attained through the added value of joint contributions of EU Aid Volunteers, expressing the Union's values and solidarity with people in need and visibly promoting a sense of Union citizenship.

This appropriation is intended to cover the following measures and items of expenditure:

- development and maintenance of standards and procedures regarding candidate and EU Aid Volunteers,
- development and maintenance of a certification mechanism for sending and hosting organisations,

- identification and selection of candidate volunteers,
- establishment of a training programme and support for training of candidate volunteers and apprenticeship placements,
- establishment, maintenance and updating of a database of EU Aid Volunteers,
- deployment of EU Aid Volunteers in order to support and complement humanitarian aid in third countries,
- capacity-building of hosting organisations,
- establishment and management of a network for the EU Aid Volunteers initiative,
- communication and awareness-raising,
- ancillary activity that furthers the accountability, transparency and effectiveness of the EU Aid Volunteers initiative.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

This appropriation is intended to cover expenditure relating to the European Anti-fraud Office (OLAF), including for OLAF staff posted in Union delegations, the objective of which is to combat fraud within an interinstitutional framework.

The amount of assigned revenue pursuant to Article 21(3) of the Financial Regulation is estimated at EUR 20 000.

In accordance with Article 18 of Regulation (EU) No 883/2013, the appropriations for, and staff of, the Supervisory Committee and its secretariat are entered in the budget and establishment plan of OLAF. Nevertheless, for the sake of transparency, the resources made available to the Supervisory Committee in OLAF's budget can be identified. Based on a secretariat of seven permanent posts and an allocation for one member of contract staff, the appropriations for the operation of the Supervisory Committee in 2015 would come to around EUR 1 200 000. This amount covers expenditure on the Supervisory Committee's staff costs, training, missions, internal meetings, buildings and allowances.

*Remarks*

This appropriation is intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this item, as well as any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, as the contracts of technical assistance offices expire during subsequent years.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

*Remarks*

Decision No 922/2009/EC established a programme on 'Interoperability solutions for European public administrations' (ISA) as a successor to the IDABC programme, which came to an end in December 2009.

The ISA programme aims at facilitating the efficient and effective electronic cross-border and cross-sector interaction between European public administrations in support of the delivery of electronic public services.

In order to do so, the ISA programme must contribute to establishing the related organisational, financial and operational framework by ensuring the availability of common frameworks, common services and generic tools and by increasing the awareness of information and communication technology aspects of Union legislation.

The ISA programme thus contributes to the reinforcement and implementation of Union policies and legislation.

The programme is implemented in close cooperation and coordination with Member States and sectors, via studies, projects and accompanying measures.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

*Remarks*

Recent discoveries of vulnerabilities in critical information infrastructure have drawn the broader public's attention to the need to understand how governance and quality of the underlying software code relates to basic safety and public trust in applications that are used on a day-to-day basis. As both the general public and the EU institutions regularly use free and open-source software - from end-user device applications to server systems - the need for coordinated efforts to ensure and maintain the integrity and security of that software has been highlighted by the European Parliament itself. This pilot project will offer a systematic approach to achieving a goal to which the EU institutions themselves can contribute, namely ensuring that widely used critical software can be trusted.

The pilot project has three parts:

Part one comprises a comparative study and a feasibility study. The comparative study will analyse and compare the Debian Free Software Guidelines and social contract[0] compliance decisions in Debian[1] with current code sharing practices and compliance determinants within the activities of the Commission's vulnerability test centre and CITnet's Application Lifecycle management system relating to projects which are currently funded by ISA and published on JoinUp[2]. This study will also make a general assessment of the Commission's current code governance models and identify processes similar to processes within Debian. The aim is to develop best practices with regard to code review and code quality assessment for the purpose of mitigating security threats, in particular in activities relating to free software and open standards funded by the European Union. The feasibility study will identify agents and stakeholders, estimate time frames and funding models, determine deliverables and long-term impacts in, of and for projects where such best practices could be applied.

CHAPTER 26 03 — SERVICES TO PUBLIC ADMINISTRATIONS, BUSINESSES AND CITIZENS (*cont'd*)26 03 77 (*cont'd*)26 03 77 02 (*cont'd*)

The second part of the pilot project will cover the development of a unified inventory methodology for the Commission and Parliament in particular and the compilation of a full inventory of free software and open standards in use within all the EU institutions. The inventory will provide a basis for determining where the results of the first part of the pilot project could be successfully applied.

The third part will involve an exemplary code review of software and software libraries that are in active use both by the general European public and by EU institutions. This part of the pilot project will identify and focus in particular on software or software components whose exploitation could lead to a severe disruption of public or EU services and unauthorised access to personal data, forming the basis for a public tender on this matter.

*Remarks*

This pilot project will support the development of a single online platform for the proactive publication of all EU institutions' unclassified documents. The main steps and deliverables for the building of this web platform will be:

- identification, listing and type registration of all unclassified documents relevant to the EU institutions, based on a 'publically-available by default' approach,

**CHAPTER 26 03 — SERVICES TO PUBLIC ADMINISTRATIONS, BUSINESSES AND CITIZENS** (*cont'd*)**26 03 77** (*cont'd*)26 03 77 03 (*cont'd*)

- assessment of technical challenges to be addressed in order to ensure safe storage and transmission of all documents,
- compatibility of existing EU registers of documents in order to facilitate a single online access point via the new online platform,
- design of a web platform architecture allowing optimum and user-friendly navigation,
- development of a built-in search engine for document searching, identification and downloading.

Technical development of the online platform will be based on the principles of open standard software, taking into account ongoing interinstitutional harmonisation and rationalisation efforts in terms of metadata and formats, information systems and document management.

The pilot project will focus primarily on documents relating to one of the EU institutions, thus providing a best-practice tool which could then be extended to all EU institutions and related bodies (including regulatory and executive agencies). The Publications Office could coordinate the project, given the number of online services it already offers the public.

This online platform will help to ensure genuine transparency, as repeatedly called for by the European Parliament, and prevent needless litigation that could generate unnecessary costs and burdens for both the institutions and the general public.

CHAPTER 26 03 — SERVICES TO PUBLIC ADMINISTRATIONS, BUSINESSES AND CITIZENS (*cont'd*)26 03 77 (*cont'd*)26 03 77 04 (*cont'd*)*Remarks*

The project will support the implementation of secure electronic communications within the European institutions. One way of making electronic communications significantly more secure is to apply state-of-the-art encryption technology to the institutions' email services. By properly protecting its own communications, the EU can set an example for citizens, the private sector and national public sectors. The project will involve the development of EU encryption standards which are guaranteed not to be compromised or weakened by third-country governments.

The project will support the IT services of the Council, Council Presidency, Commission and Parliament in implementing the systems needed for secure communications by Commissioners, MEPs and staff members of all institutions involved in EU decision-making. The project will determine and implement the best method for safeguarding electronic communications. In the longer term, it could encompass both written communications (emails and text messages) and voice communications (fixed and mobile telephony).

A steering group composed of Commission, Council and Parliament representatives will designate and oversee a central service within one of the institutions that will be responsible for day-to-day management of the communications system.

This pilot project is in line with Parliament's call for its Secretariat to carry out by December 2014 at the latest, under the responsibility of the President of Parliament, a thorough review and assessment of Parliament's IT security dependability. This review and assessment covers budgetary resources, staff resources, technical capabilities, internal organisation and all other issues connected with achieving a high level of security for Parliament's IT systems.

CHAPTER 26 03 — SERVICES TO PUBLIC ADMINISTRATIONS, BUSINESSES AND CITIZENS (*cont'd*)26 03 77 (*cont'd*)26 03 77 05 (*cont'd*)*Remarks*

Engaged and empowered citizens all over Europe are developing and applying democratic values and working methods at all levels of society using old and new information and communications technologies. It is therefore essential for democracy that EU institutions commit to providing open knowledge and free software solutions implementing the most significant standards and tools emerging, as regards legislation, to enhance understanding of their impact in the different phases of the legislative process. Citizens' ability to use, and participate in the preparation of standard-compliant and process-compatible documents throughout the law-making process in the EU is of key importance for the legitimacy of the EU project as a whole. Needless to say, such use and participation will benefit from integration with other projects involving multilingual technologies and localisation processes, as well as the removal of silos and unnecessary proprietary dependencies.

One tool in this area is LEOS, a web-based application for drafting legislation envisioned by the Commission. It is financed via the ISA programme, which means that it could eventually be integrated with more cost-efficient and maintenance-proofed distributions such as Debian, ensuring that the code is continuously tested to work together with other tools for drafting high-quality legislation.

A more visionary example is the open development of AT4AM — Parliament's automatic tool for amendments [1]. However, its use outside Parliament is limited due to the lack of linked open data integration [2], minimal funding to help NGOs to install and run the AT4AM software on their own servers [3], and insufficient collaboration with free software projects that bridge XML and RDF formats (in particular the Akoma Ntoso schema) [4].

The pilot aims will cover:

- promotion of deployment, development, maintenance and use of EU law-making tools in and by civil society,
- integration of LEOS with linked open data projects,
- collaboration with Parliament to ensure LOD interoperability with AT4AM,
- development of Akoma Ntoso and RDF data formats for LEOS and AT4AM.

Remarks

This appropriation is intended to cover any expenditure incurred during a declared crisis which has activated one or more business continuity plans, and the nature and/or the amount of which has not made it possible to post it on the other administrative budget lines of the Commission.

The budgetary authority will be informed of the incurred expenditure at the latest three weeks after the crisis has ended.

Activities with no budget line:

- promotion of good financial management,
- administrative support and management of the Directorate-General for Budget,
- multiannual financial framework and budgetary procedure,
- policy strategy and coordination for the Directorate-General for Budget.

*Remarks*

This appropriation is intended to cover budgetary adjustments:

- for imprest accounts, where all appropriate measures have been taken by the authorising officer to deal with the situation and where the adjustment expenditure cannot be booked to another specific budget line,
- in situations where a claim is cancelled in full or in part after it has been booked to the accounts as revenue (in particular in the event of offsetting against a debt),
- in cases where VAT has not been recovered and where it is no longer possible to book the amount to the line that covered the principal expenditure,
- for any interest relating to the above cases, where it cannot be booked to another specific budget line.

This item is also intended to accommodate, if necessary, an appropriation to cover any losses resulting from the liquidation or cessation of activities of a bank with which the Commission has accounts for the purposes of imprests.

## Remarks

In accordance with Article 18 of the Financial Regulation, the balance from each financial year is to be entered in the budget for the following financial year as revenue in the case of a surplus or as a payment appropriation in the case of a deficit.

The estimates of such revenue or payment appropriations are entered in the budget during the budgetary procedure and in a letter of amendment submitted pursuant to Article 39 of the Financial Regulation. They are drawn up in accordance with Regulation (EC, Euratom) No 1150/2000.

After the close of accounts for each financial year, any discrepancy with the estimates is entered in the budget for the following financial year through an amending budget.

A surplus is entered in Article 3 0 0 of the statement of revenue.

## Legal basis

Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities' own resources (OJ L 130, 31.5.2000, p. 1).

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).
