

**COMMISSION IMPLEMENTING REGULATION (EU) 2015/1491**  
**of 3 September 2015**  
**amending Regulation (EU) No 37/2010 as regards the substance ‘virginiamycin’**  
**(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 470/2009 of the European Parliament and of the Council of 6 May 2009 laying down Community procedures for the establishment of residue limits of pharmacologically active substances in foodstuffs of animal origin, repealing Council Regulation (EEC) No 2377/90 and amending Directive 2001/82/EC of the European Parliament and of the Council and Regulation (EC) No 726/2004 of the European Parliament and the Council <sup>(1)</sup>, and in particular Article 14 in conjunction with Article 17 thereof,

Having regard to the opinion of the European Medicines Agency formulated by the Committee for Medicinal Products for Veterinary Use,

Whereas:

- (1) Article 17 of Regulation (EC) No 470/2009 requires that the maximum residue limit (hereinafter ‘MRL’) for pharmacologically active substances intended for use in the Union in veterinary medicinal products for food-producing animals or in biocidal products used in animal husbandry is established in a regulation.
- (2) Table 1 of the Annex to Commission Regulation (EU) No 37/2010 <sup>(2)</sup> sets out the pharmacologically active substances and their classification regarding MRLs in foodstuffs of animal origin.
- (3) Virginiamycin is not yet included in this table.
- (4) An application for the establishment of MRLs for virginiamycin in chicken has been submitted to the European Medicines Agency (hereinafter ‘EMA’).
- (5) The EMA, based on the opinion of the Committee for Medicinal Products for Veterinary Use, has recommended the establishment of a MRL for virginiamycin in chicken, applicable to muscle, skin and fat, liver and kidney, provided that the substance is not used for animals from which eggs are produced for human consumption.
- (6) According to Article 5 of Regulation (EC) No 470/2009 the EMA is to consider using MRLs established for a pharmacologically active substance in a particular foodstuff for another foodstuff derived from the same species, or MRLs established for a pharmacologically active substance in one or more species for other species.
- (7) The EMA has considered that the extrapolation of the MRL for virginiamycin from chicken to poultry is appropriate.
- (8) Regulation (EU) No 37/2010 should therefore be amended accordingly.
- (9) It is appropriate to grant the stakeholders concerned a reasonable period of time to take measures that may be required to comply with the new MRL.
- (10) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Veterinary Medicinal Products,

<sup>(1)</sup> OJ L 152, 16.6.2009, p. 11.

<sup>(2)</sup> Commission Regulation (EU) No 37/2010 of 22 December 2009 on pharmacologically active substances and their classification regarding maximum residue limits in foodstuffs of animal origin (OJ L 15, 20.1.2010, p. 1).

HAS ADOPTED THIS REGULATION:

*Article 1*

The Annex to Regulation (EU) No 37/2010 is amended as set out in the Annex to this Regulation.

*Article 2*

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 3 November 2015.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 3 September 2015.

*For the Commission*  
*The President*  
Jean-Claude JUNCKER

---

## ANNEX

In Table 1 of the Annex to Regulation (EU) No 37/2010, an entry for the following substance is inserted in alphabetical order:

Pharmacologically active Substance	Marker residue	Animal Species	MRL	Target Tissues	Other Provisions (according to Article 14(7) of Regulation (EC) No 470/2009)	Therapeutic Classification
Virginiamycin	Virginiamycin factor S1	Poultry	10 µg/kg 30 µg/kg 10 µg/kg 60 µg/kg	Muscle Skin and fat Liver Kidney	Not for use in animals from which eggs are produced for human consumption	Anti-infectious agents/ Antibiotics'
