COMMISSION DECISION (EU) 2021/2147

of 3 December 2021

on the approval of civil aviation security equipment with 'EU Stamp' marking

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 300/2008 of the European Parliament and of the Council of 11 March 2008 on common rules in the field of civil aviation security and repealing Regulation (EC) No 2320/2002 (¹), and in particular Article 4(3) thereof,

Whereas:

(1) The detailed measures for the implementation of the common basic standards referred to in Article 4(3) of Regulation (EC) No 300/2008 include procedures for approval and use of civil aviation security equipment.

(2) Commission Implementing Regulation (EU) 2015/1998 (²) establishes a harmonised regime of approval for the installation of civil aviation security equipment.

(3) Steps taken to ensure that civil aviation security equipment meets the required performance standards have been harmonised to ensure the best implementation of the common basic standards in aviation security.

(4) The Commission acknowledges the common evaluation process of the European Civil Aviation Conference as a mandatory pre-condition for the approval of civil aviation security equipment. The Commission grants a temporary 'EU Stamp pending' marking status to equipment confirmed by the common evaluation process only after it has received the Level 2 reports.

(5) Security equipment approved at national level by derogation from the harmonised regime of approval should not automatically receive the 'EU Stamp' marking. The Commission may grant a temporary 'EU Stamp pending' marking status to equipment approved at national level only after it has received the test reports.

(6) The Commission should adopt a decision to grant an 'EU Stamp' marking to equipment that has received a temporary 'EU Stamp pending' marking status.

(7) The Commission should maintain a consolidated Union database listing equipment allowed for installation and use throughout the Union,

HAS ADOPTED THIS DECISION:

Article 1

The list of approved civil aviation security equipment with 'EU Stamp' marking is set out in the Annex.

The 'Union database on supply chain security — security equipment' shall be updated accordingly.

(¹) OJ L 97, 9.4.2008, p. 72.

(²) Commission Implementing Regulation (EU) 2015/1998 of 5 November 2015 laying down detailed measures for the implementation of the common basic standards on aviation security (OJ L 299, 14.11.2015, p. 1).

Article 2

This Decision shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

Done at Brussels, 3 December 2021.

For the Commission
The President
Ursula VON DER LEYEN

ANNEX

List of approved civil aviation security equipment with 'EU Stamp' marking

PART ONE

New entries

1. WALK-THROUGH METAL DETECTION (WTMD) EQUIPMENT

WTMD equipment that has passed the location indication test can be used in combination with Shoe Metal Detection equipment and are indicated with (SMD).

For the evaluation of WTMD equipment (Standard 1 and Standard 2), there is no requirement for a maximum Non-Threat Alarm Rate.

Unique identifier	Manufacturer	Designation	Detailed configuration					Standard	Status

2.   HAND-HELD METAL DETECTION (HHMD) EQUIPMENT

Left intentionally blank

3.   X-RAY EQUIPMENT

Left intentionally blank

4.   EXPLOSIVE DETECTION SYSTEM (EDS) EQUIPMENT

4.1.   **EDS for hold baggage**

Any full tests started prior to 1 January 2016 did not test the configuration for shielding capacity.

The term 'tray' can include totes, tubs, bins etc.

Any configurations meeting the standard 3.1 for EDS are automatically considered as having achieved EDS Standard 3.

4.2. **EDS for cabin baggage**

The concept of operations applied for EDS for cabin bags equipment depends on the standard achieved.

Standard C1: screening requires the divestment of electronics and liquids, aerosols and gels (LAGs).

Standard C2: allows screening of baggage containing portable computers and other large electrical items.

Standard C3: allows screening of baggage containing portable computers and other large electrical items and LAGs.

Standard C4: same concept of operations as Standard C3.

5.   THREAT IMAGE PROJECTION (TIP)

Left intentionally blank

6.   EXPLOSIVE TRACE DETECTION (ETD) EQUIPMENT

For the performance of ETD equipment, two sampling methods have been considered during the evaluation:

— (H) means the equipment has passed the tests with hand swabbing,

— (W) means the equipment has passed the tests with wand swabbing.

For the performance of ETD equipment, two fields of use have been considered during the evaluations:

— (P) means the equipment has passed the tests for the screening of passengers, persons other than passengers, items carried, cabin baggage and hold baggage,

— (C) means the equipment has passed the tests for the screening of cargo and mail, in-flight supplies, airport supplies and air carrier materials loaded in the aircraft hold.

7. LIQUID EXPLOSIVE DETECTION SYSTEM (LEDS) EQUIPMENT

On the basis of the concept of operations provided by the manufacturer, the LEDS performance was tested for a given type of operations:

— (A) means the LEDS screens individual containers and requires containers to be opened for sampling,

— (B) means the LEDS screens individual containers with no requirement for containers to be opened,

— (C) means the LEDS screens multiple containers with no requirement for containers to be opened.

When type A, B or C equipment is used, LAG containers must be removed from cabin baggage and screened separately.

— (D) means the LEDS screens LAG containers with no requirement for containers to be opened (original seal remains intact),

— (D+) means the LEDS is additionally capable to screen LAG containers with complex electronics (e.g. laptops) present in cabin baggage.

When type D or D+ equipment is used, LAG containers do not need to be removed from cabin baggage.

11.   SECURITY SCANNERS

On the basis of the concept of operations provided by the manufacturer, the security scanner performance was tested for a given type of operations:

— (A) means a security scanner with automatic threat detection and indication of the location of detected objects on a stick figure.
