(Legislative acts)

**DEFINITIVE ADOPTION (EU, Euratom) 2022/182  
of the European Union's general budget for the financial year 2022**

THE PRESIDENT OF THE EUROPEAN PARLIAMENT,

having regard to the Treaty on the Functioning of the European Union, and in particular Article 314 thereof,

having regard to the Treaty establishing the European Atomic Energy Community, and in particular Article 106a thereof,

having regard to Council Decision (EU, Euratom) 2020/2053 of 14 December 2020 on the system of own resources of the European Union and repealing Decision 2014/335/EU, Euratom <sup>(1)</sup>,

having regard to Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU, and repealing Regulation (EU, Euratom) No 966/2012 <sup>(2)</sup>,

having regard to Council Regulation (EU, Euratom) 2020/2093 of 17 December 2020 laying down the multiannual financial framework for the years 2021 to 2027 <sup>(3)</sup>,

having regard to the Interinstitutional Agreement of 16 December 2020 between the European Parliament, the Council of the European Union and the European Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources <sup>(4)</sup>,

having regard to the draft general budget of the European Union for the financial year 2022, which the Commission adopted on 9 July 2021,

having regard to the position on the draft budget of the European Union for the financial year 2022, which the Council adopted on 6 September 2021 and forwarded to Parliament on 10 September 2021,

having regard to Letter of Amendment No 1/2022 to the draft general budget of the European Union for the financial year 2022, which the Commission presented on 12 October 2021,

having regard to the resolution adopted by Parliament on 21 October 2021 on the Council position on the draft general budget of the European Union for the financial year 2022,

having regard to the amendments to the draft general budget adopted by Parliament on 21 October 2021,

having regard to the letter of 22 October 2021 from the President of the Council stating that the Council was unable to approve all the amendments adopted by Parliament,

having regard to the letter to the President of the Council of 25 October 2021 convening the Conciliation Committee,

<sup>(1)</sup> OJ L 424, 15.12.2020, p. 1.

<sup>(2)</sup> OJ L 193, 30.7.2018, p. 1.

**GENERAL STATEMENT OF EXPENDITURE**

## INTRODUCTION TO THE UNION'S ANNUAL BUDGET

The Union's annual budget ('the budget'), as set out in Chapter 3 of Title II of Part Six of the Treaty on the Functioning of the European Union (TFEU), is the instrument which sets out and authorises the total amount of revenue and expenditure appropriations deemed necessary for the European Union and the European Atomic Energy Community for each year.

The budget is established and implemented in compliance with the principles of unity, budgetary accuracy, annuality, equilibrium, unit of account, universality, specification, sound financial management and transparency.

- The *principle of unity* and the *principle of budgetary accuracy* mean that all revenue and expenditure of the Union when it is charged to the budget must be incorporated in a single document.
- The *principle of annuality* means that the budget is adopted for one budgetary year at a time and that both commitment and payment appropriations for the current budgetary year must, in principle, be used in the course of the year.
- The *principle of equilibrium* means that forecasts of revenue for the budgetary year must be equal to payment appropriations for that year; borrowing to cover any budget deficit which may arise is not compatible with the own resources system and will not be authorised.
- In accordance with the *principle of unit of account*, the budget is drawn up and implemented in euros and the accounts must be presented in euros.
- The *principle of universality* means that total revenue is to cover total payment appropriations with the exception of a limited number of revenue items which are assigned to particular items of expenditure. Revenue and expenditure are entered in full in the budget without any adjustment against each other.
- The *principle of specification* means that each appropriation must have a given purpose and be assigned to a specific objective in order to prevent any confusion between appropriations.
- The *principle of sound financial management* is defined by reference to the principles of economy, efficiency and effectiveness.
- The *principle of transparency* ensures sound information on the implementation of the budget and the accounts.

The budget presents revenue and expenditure appropriations by section, one for each of the Union institutions as defined in Article 2, point 67, of the Financial Regulation. The revenue appropriations common to all Union institutions (own resources, surpluses, balances and adjustments) are presented in a separate section 'Total revenue'.

In accordance with Article 47 of the Financial Regulation, Commission revenue and the revenue appropriations and expenditure appropriations of the other Union institutions are classified according to their type or the use to which they are assigned. The section of the budget relating to the Commission is classified according to the purpose of the expenditure, with a view to enhancing transparency in the management of the budget with reference to the objectives of sound financial management and in particular efficiency and effectiveness.

On its expenditure side, the budget contains differentiated appropriations, which consist of commitment appropriations and payment appropriations, and non-differentiated appropriations. Commitment appropriations cover the total cost of the legal commitments entered into during the financial year, whereas payment appropriations cover payments made to honour the legal commitments entered into in the financial year or preceding financial years.

For 2022, the expenditure appropriations authorised by the budget totals EUR 169 515 791 060 in commitments and EUR 170 603 315 159 in payments, representing a variation rate of 1,6 % and of 1,5 % respectively by comparison with the 2021 budget (including amending budgets).

In accordance with Article 312 of the TFEU, the budget complies with the ceilings for the year 2022 of the multiannual financial framework (MFF) for the period 2021-2027 in accordance with Council Regulation (EU, Euratom) 2020/2093 of 17 December 2020 laying down the multiannual financial framework for the years 2021 to 2027 (OJ L 433I, 22.12.2020, p. 11). In this respect, this section ('General statement of expenditure') includes two overview tables presenting the budget according to the structure by heading of the MFF, at aggregate level as well as at cluster and programme level.

This section also includes the overview table of the establishment plan posts of all Union institutions (and bodies) and the overview table of buildings.

**GENERAL REVENUE**

## A. FINANCING OF THE UNION'S ANNUAL BUDGET

### Introduction

According to the equilibrium principle, the total budgeted revenue of the Union must equal the total budgeted expenditure of the Union. When determining Member States' own-resource contributions the starting point is the total amount of authorised expenditure. A small part of that amount is covered by other revenue (taxes levied on the salaries of Union staff, interest on late payments, fines and contributions from third countries to certain programmes, etc.). The remainder is financed by Member States' own-resource contributions.

Own resources can be divided into the following categories:

- traditional own resources, mainly customs duties, collected on behalf of the Union by the Member States;
- the own resource based on value added tax (VAT): a small proportion of the VAT collected by each Member State;
- the own resource based on plastic packaging waste that is not recycled: a small amount applied on the weight of non-recycled plastic packaging waste generated in each Member State;
- the own resource based on gross national income (GNI), which is a proportion of Member States' GNI aggregate. It serves as the balancing resource. It finances all spending not covered by other sources of revenue so that revenue and expenditure are always in balance.

The key for determining the own resources is Council Decision (EU, Euratom) 2020/2053 <sup>(1)</sup>. That Decision entered into force on 1 June 2021 after the ratification by all Member States according to their national constitutional requirements. It defines a new system of own resources, which includes the introduction of a new category of own resources, and provides that Member States contributions for 2021 be retroactively recalculated from 1 January 2021.

Budgetary revenue totals EUR 170 603 315 159. The uniform rate of call for the VAT-based own resource is 0,30 % whilst that for the GNI resource is 0,7713 %. Traditional own resources account for 10,50 % of the financing of the 2022 budget. The VAT-based own resource accounts for 11,18 %, the plastic-based own resource accounts for 3,52 % and the GNI-based own resource for 67,24 %. Other revenue for financial year 2022 is estimated at EUR 12 902 615 447.

Own resources needed to finance the 2022 budget account for 1,06 % of the total GNI.

The total amount of own resources allocated to the Union to cover annual appropriations for payments shall not exceed 1,40 % of the sum of all the Member States' GNIs (own resources ceiling). This ceiling is temporarily increased by 0,6 percentage points for the sole purpose of covering all liabilities of the Union for the allocation of the resources necessary for addressing the consequences of the COVID-19 crisis.

The appropriations to be covered by the own resources referred to in Article 2 of Decision (EU, Euratom) 2020/2053, include the costs associated to the funds borrowed on the capital markets and on behalf of the Union in the framework of the European Union Recovery Instrument <sup>(2)</sup>.

The tables below set out step by step the method used to calculate the financing of the 2022 budget.

<sup>(1)</sup> Council Decision (EU, Euratom) 2020/2053 of 14 December 2020 on the system of own resources of the European Union and repealing Decision 2014/335/EU, Euratom (OJ L 424, 15.12.2020, p. 1).

<sup>(2)</sup> See Article 5 of Decision (EU, Euratom) 2020/2053.

### Calculation of the financing of the budget

Allocation of resources of the Union in order to ensure, pursuant to Article 311 of the Treaty on the Functioning of the European Union (TFEU), the financing of the Union's annual budget

Revenue description	Budget 2022	Budget 2021 <sup>(1)</sup>	Change (%)
Miscellaneous revenue (Titles 3 to 6)	12 902 615 447	9 249 005 264	+ 39,50
Surplus available from the preceding financial year (Chapter 2 0, Article 2 0 0)	p.m.	1 768 617 610	—

Total revenue for Titles 2 to 6	<b>12 902 615 447</b>	<b>11 017 622 874</b>	+ 17,11
Net amount of customs duties and sugar levies (Chapters 1 1 and 1 2)	17 912 606 159	17 348 140 020	+ 3,25
VAT-based own resource at the uniform rate (Tables 1 and 2, Chapter 1 3)	19 071 387 750	17 940 791 850	+ 6,30
Plastic packaging waste own resource (Table 3, Chapter 1 7)	5 997 306 880	5 846 664 880	+ 2,58
Remainder to be financed by the additional resource (GNI-based own resource, Table 4, Chapter 1 4)	114 719 398 923	115 857 763 230	- 0,98
Appropriations to be covered by the own resources referred to in Article 2 of Decision (EU, Euratom) 2020/2053 <sup>(2)</sup> , <sup>(3)</sup>	<b>157 700 699 712</b>	<b>156 993 359 980</b>	+ 0,45
Total revenue <sup>(4)</sup>	<b>170 603 315 159</b>	<b>168 010 982 854</b>	+ 1,54

<sup>(1)</sup> The figures in this column correspond to those in the 2021 budget (OJ L 93, 17.3.2021, p. 1) plus amending budgets No 1/2021 to No 6/2021.  
<sup>(2)</sup> The own resources for the 2022 budget are determined on the basis of the budget forecasts adopted at the 181st meeting of the Advisory Committee on Own Resources on 26 May 2021.  
<sup>(3)</sup> This amount includes EUR 140 000 000 in relation to liabilities of the Union resulting from the borrowing referred to in Article 5 of Council Decision 2020/2053.  
<sup>(4)</sup> Article 310(1), third subparagraph, TFEU reads: 'The revenue and expenditure shown in the budget shall be in balance'.

*Remarks*

The GNI-based resource is an 'additional' resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments, the plastic-based own resource and other revenue in any particular year. By implication, the GNI-based resource ensures that the budget is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (plastic-based own resource, VAT-based resource, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States' GNI for financial year 2022 is 0,7713 %.

*Remarks*

The budgetary imbalance correction mechanism in favour of the United Kingdom (UK correction) was introduced by the European Council in Fontainebleau in June 1984 and the resulting own resources decision of 1985. The purpose of the mechanism is to reduce the UK budgetary imbalance through a reduction in its payments to the Union.

*Remarks*

In accordance with Article 18 of the Financial Regulation, the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 39 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 1(1) of Regulation (EU, Euratom) 2021/768.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 16 05 01 of the statement of expenditure in Section III 'Commission'.

*Remarks*

Under Article 7(1) of Regulation (EEC, Euratom) No 1553/89, Member States are to send the Commission a statement of the total amount of the VAT resources base for the previous calendar year before 31 July.

Each Member State is debited with an amount calculated on the basis of that statement according to Union rules and credited with the 12 payments actually made during the previous financial year.

Any corrections to those statements resulting from Commission controls in accordance with Article 9 of Regulation (EEC, Euratom) No 1553/89 or/and any changes to the GNI of previous financial years that have an effect on the capping of the 'VAT' base will lead to adjustments of the 'VAT' balances.

The Commission shall inform the Member States of the amounts resulting from that calculation before 1 February of the year following that in which the data for the adjustments were supplied.

*Legal basis*

*Remarks*

Result of the calculation for the netting of adjustments to the VAT and GNI-based resources of previous financial years.

This calculation is the product of multiplying the total amounts of the adjustments referred to in Article 10b(1) to (4) of Regulation (EU, Euratom) No 609/2014, with the exception of particular adjustments pursuant to Article 10b(2), points (b) and (c), of that Regulation, by the percentage that the GNI of that Member State represents of the GNI of all Member States, as applicable on 15 January to the budget in force for the year following that in which the data for the adjustments were supplied.

The Commission shall inform the Member States of the amounts resulting from that calculation before 1 February of the year following that in which the data for the adjustments were supplied.

CHAPTER 2 1 — BALANCES ADJUSTMENT (*cont'd*)2 1 3 **Plastic balances**

Financial year 2022	Financial year 2021	Financial year 2020
p.m.		

*Remarks**New article*

On the basis of the annual statement providing the calculation of the amount of the own resource based on non-recycled plastic packaging waste, each Member State shall, in the year following that in which that statement was sent, be debited or credited with an amount calculated as the difference between the amounts in the forecast for a given year and the real amounts in the statement for that same year.

After 31 July of the fifth year following a given financial year, changes shall no longer be taken into account, except on points notified within that time limit either by the Commission or by the Member State.

*Legal basis*

Council Decision (EU, Euratom) 2020/2053 of 14 December 2020 on the system of own resources of the European Union and repealing Decision 2014/335/EU, Euratom (OJ L 424, 15.12.2020, p. 1), and in particular Article 2(1), point (c), thereof.

Council Regulation (EU, Euratom) 2021/770 of 30 April 2021 on the calculation of the own resource based on plastic packaging waste that is not recycled, on the methods and procedure for making available that own resource, on the measures to meet cash requirements, and on certain aspects of the own resource based on gross national income (OJ L 165, 11.5.2021, p. 15).

Financial year 2022	Financial year 2021	Financial year 2020
p.m.		

*Remarks**New article*

Result of the calculation for the netting of adjustments to plastic-based own resources of previous financial years.

This calculation is the product of multiplying the total amounts of adjustments by the percentage that the GNI of that Member State represents of the GNI of all Member States, as applicable on 15 January to the budget in force for the year following that in which the data for the adjustments were supplied (the 'net amount').

The Commission shall inform the Member States of the amounts resulting from that calculation before 1 February of the year following that in which the data for the adjustments were supplied.

*Legal basis*

## CHAPTER 2 2 — ADJUSTMENT FOR THE NON-PARTICIPATION OF CERTAIN MEMBER STATES IN SPECIFIC POLICIES

## 2 2 0

*Adjustment for non-participation in the area of migration, border management and security policies*

Financial year 2022	Financial year 2021	Financial year 2020
p.m.	p.m.	- 670 555,37

*Remarks*

Article 3 of the Protocol on the position of Denmark and Article 5 of the Protocol on the position of Ireland, annexed to the Treaty on European Union and the Treaty on the Functioning of the European Union, grant full exemption to these Member States from supporting the financial consequences of some specific policies in the area of freedom, security and justice, with the exception of the related administrative costs. They can therefore obtain an adjustment to the own resources paid for each year in which they do not participate.

Each Member State's contribution to the adjustment mechanism is calculated by applying to the budget expenditure resulting from this operation or policy the scale of the aggregate GNI and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Regulation (EU) 2019/516 of 19 March 2019 on the harmonisation of gross national income at market prices (OJ L 91, 29.3.2019, p. 19).

Also in accordance with Article 332 TFEU, and based on Article 91(7) of Council Regulation (EU) 2017/1939 of 12 October 2017 implementing enhanced cooperation on the establishment of the European Public Prosecutor's Office ('the EPPO') (OJ L 283, 31.10.2017, p. 1), the expenditure of the EPPO shall be borne by the participating Member States.

The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the account referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 on the first working day of December, in accordance with Article 11 of that Regulation.

*Legal basis*

Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39), and in particular Article 11 thereof.

Protocol on the position of Denmark, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 3 thereof, and Protocol on the position of the United Kingdom and Ireland in respect of the area of freedom, security and justice, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 5 thereof.

Financial year 2022	Financial year 2021	Financial year 2020
p.m.	p.m.	0,—

*Remarks*

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) which manage Union programmes. The amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(5) of the Financial Regulation, interest generated by trust accounts used for Union programmes is used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 gives rise to the payment of interest by the Member State concerned. However, the recovery of amounts of interest below EUR 500 shall be waived.

For the VAT and GNI-based own resources, interest shall be payable only in relation to delays in entering amounts referred to in Article 12(2) of Regulation (EU, Euratom) No 609/2014.

For the own resource based on non-recycled plastic packaging waste, interest shall be payable only in relation to delays in entering the amounts stipulated in Article 11(1) of Regulation (EU, Euratom) 2021/770.

In the case of Member States belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its main refinancing operations on the first day of the month in which the due date fell, or 0 per cent, whichever is higher, increased by 2,5 percentage points. That rate shall be increased by 0,25 of a percentage point for each month of delay.

In the case of Member States not belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, or 0 per cent, whichever is higher, increased by 2,5 percentage points. For the Member States for which the central bank rate is not available, the interest rate shall be equal to the most equivalent rate applied on the first day of the month in question on the Member State's money market, or 0 per cent, whichever is higher, increased by 2,5 percentage points. That rate shall be increased by 0,25 of a percentage point for each month of delay.

The total increase shall not exceed 16 percentage points. The increased rate shall be applied to the entire period of delay.

*Remarks*

The Union guarantee is for borrowing-and-lending operations for third countries and for loans and other operations granted by financial establishments in third countries. This article also records the revenues stemming from previous external guarantees.

**CHAPTER 5 1 — EUROPEAN UNION GUARANTEE FOR OPERATIONS IN AND BORROWING-AND-LENDING OPERATIONS FOR THIRD COUNTRIES** (*cont'd*)

**5 1 0** (*cont'd*)

This article covers the External Action Guarantee, including the European Fund for Sustainable Development Plus (EFSD+), the European Union guarantee for the borrowing programmes contracted by the Union to provide macro-financial assistance to third countries and the Guarantee for Euratom borrowings to improve the degree of efficiency and safety of nuclear power stations in the countries of central and Eastern Europe and the Commonwealth of Independent States. It also covers the European Union guarantee for European Investment Bank loans to third countries and the abovementioned guarantees for macro-financial assistance and Euratom loans granted under previous MFFs, as well as the European Union guarantee for the European Fund for Sustainable Development (EFSD).

This article is intended to record any revenue arising from the exercise of rights in connection with a guarantee under Item 14 20 03 02 of the statement of expenditure in Section III 'Commission' provided that that revenue has not been deducted from expenditure.

A summary of borrowing-and-lending operations, including debt management, in capital and interest is given in the Annex 'Borrowing-and-lending operations' to Section III 'Commission'.

*Legal basis*

**CHAPTER 5 2 — SPECIAL LOANS AND RISK CAPITAL GRANTED BY THE COMMISSION**

**5 2 0** *Capital repayments and interest from Mediterranean third countries*

Financial year 2022	Financial year 2021	Financial year 2020
p.m.	p.m.	0,—

*Remarks*

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Articles 05 02 99, 14 02 99 and 15 02 99 of the statement of expenditure in Section III 'Commission' to Mediterranean third countries.

It also records capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans and risk capitals were granted at a time when those countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

**CHAPTER 5 2 — SPECIAL LOANS AND RISK CAPITAL GRANTED BY THE COMMISSION** (*cont'd*)**5 2 0** (*cont'd*)

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

*Legal basis*

For the legal basis, see remarks for Articles 05 02 99, 14 02 99 and 15 02 99 of the statement of expenditure in Section III 'Commission'.

6 6 0 1 Innovation Fund — Assigned revenue

Financial year 2022	Financial year 2021	Financial year 2020
p.m.	p.m.	

*Remarks*

This item is intended to record the external assigned revenue of the Innovation Fund (IF). This revenue results from the auctioning of the allowances and the unspent amounts from the previous NER300 fund in accordance with Article 10 and Article 10a(8) of Directive 2003/87/EC. The external assigned revenue becoming available on this item is intended to cover all expenditure related to the implementation tasks carried out by the Commission.

For financial year 2022, it is provisionally estimated that an amount of EUR 6,816 million will be needed in order to finance the contribution to the expenditure of the European Climate, Infrastructure and Environment Executive Agency's (CINEA) staff and administration incurred as a result of the Agency's role in the management of the Innovation Fund financed from Item 16 01 02 74. Additionally, in 2022, the amount of EUR 7,31 million will be recovered to prepare financing of 2023 expenditure.

As regards the operational expenditure for financial year 2022 financed from Article 16 03 01, the calls for proposals for projects of EUR 1 375 million are planned to be launched during that year.

*Legal basis*

Financial year 2022	Financial year 2021	Financial year 2020
10 789 848 852	6 821 332 100	

*Remarks*

This item is intended to record the net contributions from the United Kingdom resulting from the payments made in accordance with Article 148 of the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community.

The net contributions correspond to the differences between the amounts due by the United Kingdom to the Union and the amounts due by the Union to the United Kingdom.

This item also accommodates the assigned revenue included in the United Kingdom contribution to the Union budget.

The reference dates for payments by the United Kingdom to the Union or by the Union to the United Kingdom made after 31 December 2020 shall be 30 June and 31 October of every year. Payments shall be made in four equal monthly instalments for payments that have a reference date of 30 June and in eight equal monthly instalments for payments that have a reference date of 31 October. All payments shall be made by the last working day of each month, starting on the reference date or, where the reference date is not a working day, the last working day before the reference date.

- the costs of the European Science-Media Hub, the operations of which are overseen by the European Parliament's Panel for the Future of Science and Technology (STOA), in enhancing the interface between the European Parliament, the scientific community and the media, in order specifically to promote networking, training and knowledge dissemination. This includes for example:
  - organising activities and dealing with expenses (including travel expenses, accommodation and catering) in connection with invitations to journalists, stakeholders and other experts to cover the activities concerned,
  - setting up and maintaining networks at the interface between the European Parliament, the scientific community and the media,
  - organising seminars, conferences and training courses on current scientific and technological developments and issues and on the nature and effectiveness of science journalism,
  - harnessing expert information and analysis from academia, the media and other sources in the field of science and technology for the benefit of policy-makers and citizens,
  - making European Parliament research and other relevant material in the field of science and technology more widely available by written, audiovisual and other means,
  - developing techniques and methods for increasing the ability to identify and disseminate trustworthy sources in the field of science and technology,
  - supporting the installation, upgrading and use of state-of-the-art technical equipment and media facilities in support of such dialogue,
  - developing closer cooperation and, more generally, links between the European Parliament, relevant media outlets and universities and research centres in this field, including through promotion in the media of the role, and work of the European Science-Media Hub as well as its accessibility for citizens.

This appropriation may also be used to support dialogue between the European Parliament and the university community, the media, think tanks and citizens with regard to foresight work on the long-term trends to be addressed by European Union decision-makers, both in the field of science and more broadly, through seminars, publications and other activities set out above.

The amount of assigned revenue in accordance with Article 21(3) of the Financial Regulation is estimated at EUR 100.

**5 1 0 External Action Guarantee**

*Figures (Non-differentiated appropriations)*

Financial year 2022	Financial year 2021	Financial year 2020
p.m.	p.m.	0,—

*Remarks*

The Union's guarantee is for borrowing and lending operations for third countries and for loans and other operations granted by financial establishments in third countries. This article also records the revenues stemming from previous external guarantees.

This article covers the External Action Guarantee, including the European Fund for Sustainable Development Plus (EFSD+), the European Union guarantee for the borrowing programmes contracted by the Union to provide macro-financial assistance to third countries and the guarantee for Euratom borrowings to improve the degree of efficiency and safety of nuclear power stations in the countries of central and Eastern Europe and the Commonwealth of Independent States. It also covers the European Union guarantees for European Investment Bank loans to third countries and the guarantees for macro-financial assistance and Euratom loans granted under previous MFFs, as well as the European Union guarantee for the European Fund for Sustainable Development (EFSD).

This article is intended to record any revenue arising from the exercise of rights in connection with a guarantee under Item 14 20 03 02 of the statement of expenditure in this section provided that that revenue has not been deducted from expenditure.

A summary of borrowing-and-lending operations, including debt management, in capital and interest, is given in the Annex 'Borrowing-and-lending operations' to this section.

*Figures (Non-differentiated appropriations)*

Financial year 2022	Financial year 2021	Financial year 2020
p.m.	p.m.	0,—

*Remarks*

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Articles 05 02 99, 14 02 99 and 15 02 99 of the statement of expenditure in this section to Mediterranean third countries.

COMMISSION

**CHAPTER 5 2 — SPECIAL LOANS AND RISK CAPITAL GRANTED BY THE COMMISSION** (*cont'd*)**5 2 0** (*cont'd*)

It also records capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans and risk capitals were granted when those countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

*Legal basis*

For the legal basis, see the remarks for Articles 05 02 99, 14 02 99 and 15 02 99 of the statement of expenditure in this section.

*Figures (Non-differentiated appropriations)*

Financial year 2022	Financial year 2021	Financial year 2020
p.m.	p.m.	

*Remarks*

This item is intended to record the external assigned revenue of the Innovation Fund (IF). This revenue results from the auctioning of the allowances and the unspent amounts from the previous NER300 fund in accordance with Article 10 and Article 10a(8) of Directive 2003/87/EC. The external assigned revenue becoming available on this item is intended to cover all expenditure related to the implementation tasks carried out by the Commission.

For the financial year 2022, it is provisionally estimated that an amount of EUR 6.816 million will be needed in order to finance the contribution to the expenditure of the European Climate, Infrastructure and Environment Executive Agency's (CINEA) staff and administration incurred as a result of that Agency's role in the management of the Innovation Fund financed from Item 16 01 02 74. Additionally, in 2022, the amount of EUR 7.31 million will be recovered to prepare financing of 2023 expenditure.

As regards the operational expenditure financed from Article 16 03 01, for the financial year 2022, the calls for proposals for projects of EUR 1 375 million are planned to be launched during the year.

*Legal basis*

*Remarks*

This item is intended to record the net contributions from the United Kingdom resulting from the payments made in accordance with Article 148 of the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community.

The net contributions correspond to the differences between the amounts due by the United Kingdom to the Union and the amounts due by the Union to the United Kingdom.

This item also accommodates the assigned revenue included in the United Kingdom's contribution to the Union budget.

The reference dates for payments by the United Kingdom to the Union or by the Union to the United Kingdom made after 31 December 2020 shall be 30 June and 31 October of every year. Payments shall be made in four equal monthly instalments for payments that have a reference date of 30 June and in eight equal monthly instalments for payments that have a reference date of 31 October. All payments shall be made by the last working day of each month, starting on the reference date or, where the reference date is not a working day, the last working day before the reference date.

## New item

This item is intended to record the annual contributions from the European Coal and Steel Community (ECSC) in liquidation to the Union's annual budget for the years 2021 to 2025 that are resulting from the application of the Article 145 of the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community.

According to this Article, the Union is liable to the United Kingdom for its share in the net assets of the ECSC in liquidation on 31 December 2020 (EUR 183 282 282) and the related reimbursement shall be made in five equal annual instalments (EUR 36 656 456) from 2021 to 2025.

These contributions from the ECSC in liquidation therefore aim at fully compensating the effects of the corresponding reductions accounted for in the contributions to the Union's annual budget of the United Kingdom, as recorded under the item 6 6 0 2.

*Remarks*

Appropriations under this chapter are intended to cover expenditure of administrative nature (salaries, studies, meetings of experts, information and publications, etc.) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

**01 01 01** **Support expenditure for Horizon Europe**

*Remarks*

Besides the expenditure described at the level of this chapter, this appropriation is also intended to cover expenditure relating to officials, temporary and external staff as well as other administrative expenditure for the management of the specific research and innovation programme — Horizon Europe, in the form of indirect and direct actions, including administrative expenditure incurred by staff posted in Union delegations

- direct action, consisting of research activities, scientific and technical support activities, and exploratory research activities undertaken in the establishments of the JRC and in Union delegations,
- indirect action, consisting of programmes implemented as part of the JRC's activities conducted on a competitive basis.

Staff costs comprise the basic salary, allowances, miscellaneous indemnities and contributions based on the statutory provisions, including expenses related to the entry into service, change in the place of employment and termination of service.

This appropriation can be supplemented by appropriations that the JRC will earn by participating on a competitive basis in indirect actions and in scientific and technical activities in support of Union policies. The activities of a competitive nature conducted by the JRC shall consist of:

- activities carried out following grant or procurement procedures,
- activities on behalf of third parties,
- activities undertaken under an administrative agreement with other institutions or other Commission departments for the provision of technical-scientific services.

Revenue from competitive activities will be used to cover, inter alia, expenditure incurred on staff and resources in respect of activities in support of the Union's policies and work for third parties carried out by the JRC.

Remarks

Horizon Europe – the Framework Programme for Research and Innovation aims at delivering scientific, technological, economic and societal impact from the Union's investments in research and innovation so as to strengthen the scientific and technological bases of the Union and foster its competitiveness in all Member States including in its industry, deliver on the Union strategic priorities, contribute to the realisation of Union objectives and policies, contribute to tackling global challenges, including the Sustainable Development Goals by following the principles of the Agenda 2030 and the Paris Agreement, and strengthen the European Research Area. Horizon Europe shall thus maximise Union added value by focusing on objectives and activities that cannot be effectively realised by Member States acting alone, but in cooperation.

Horizon Europe shall:

- develop, promote and advance scientific excellence, support the creation and diffusion of high-quality new fundamental and applied knowledge, skills, technologies and solutions, training and mobility of researchers, attract talent at all levels and contribute to full engagement of Union's talent pool in actions supported under Horizon Europe,
- generate knowledge, strengthen the impact of research and innovation in developing, supporting and implementing Union policies and support the access to and uptake of innovative solutions in European industry, notably in SMEs, and in society to address global challenges, including climate change and the Sustainable Development Goals,
- foster all forms of innovation, facilitate technological development, demonstration and knowledge and technology transfer, strengthen deployment and exploitation of innovative solutions,
- optimise Horizon Europe's delivery for strengthening and increasing the impact and attractiveness of the European Research Area, to foster the excellence-based participations from all Member States, including low R&I performing Member States, in Horizon Europe and to facilitate collaborative links in European research and innovation.

Horizon Europe shall ensure the effective promotion of equal opportunities for all and the implementation of gender mainstreaming, including the integration of the gender dimension in R&I content.

Horizon Europe shall be implemented in synergy with other Union programmes while aiming for maximal administrative simplification.

**CHAPTER 01 02 — HORIZON EUROPE** (*cont'd*)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for this programme under this title for a total amount of EUR 5 412 000 000 in commitments. The amounts indicated in the budget remarks of the relevant budget lines under this title provide information about the expected amount of legal commitments in 2022.

Remarks

This appropriation is intended to provide attractive and flexible funding to enable talented and creative individual researchers, with an emphasis on early stage researchers, and their teams to pursue the most promising avenues at the frontier of science, regardless of their nationality and country of origin and on the basis of Union-wide competition based solely on the criterion of excellence.

The activities of the ERC shall support frontier research, in a bottom-up manner, carried out across all fields by principal investigators and their teams in competition at the European level, including early-stage career researchers.

*Remarks*

This appropriation is intended to cover the following activities and actions:

Under Horizon Europe, the Marie Skłodowska-Curie Actions (MSCA) will continue supporting the career development and training of researchers through trans-national, cross-sectoral and interdisciplinary mobility. This will be achieved *inter alia* through the development of excellent and innovative doctoral training programmes, high-quality training, employment and mentoring standards for researchers at all stages of their careers, and cooperation between academic and non-academic organisations in Europe and beyond.

The MSCA will contribute to the Commission's political priorities and missions, with specific focus on the European Green Deal, the Digital Agenda and Making Europe Stronger in the World.

The Commission will inform stakeholders and interested parties worldwide about the new phase of the Horizon Europe to raise awareness and facilitate their participation in MSCA. The Commission will also continue to inform the public about the positive impact of MSCA-funded research projects on their daily lives and to motivate pupils and students to consider a career in science and research. In addition, it will support the MSCA alumni as well as a network of national contact points dedicated to the MSCA.

**01 02 02** ***Global Challenges and European Industrial Competitiveness (Pillar II)****Remarks*

This pillar is intended to support the creation and better diffusion of high-quality new knowledge, technologies and sustainable solutions, reinforce the competitiveness of European industry, strengthen the impact of research and innovation in developing, supporting and implementing Union policies, and support the uptake of innovative solutions in industry, notably in SMEs and start-ups, and in society to address global challenges.

To maximise impact flexibility and synergies, research and innovation activities shall be organised in six clusters, interconnected through pan-European research infrastructures, which individually and together will incentivise interdisciplinary, cross-sectoral, cross-policy, cross border and international cooperation.

This pillar consists of the following six clusters:

- Health,
- Culture, Creativity and Inclusive Society,
- Civil Security for Society,
- Digital, Industry and Space,
- Climate, Energy and Mobility,
- Food, Bioeconomy, Natural Resources, Agriculture and Environment,

and the non-nuclear direct actions of the Joint Research Centre.

Social sciences and humanities shall be fully integrated across all clusters, including specific and dedicated activities. Activities from a broad range of Technology Readiness Levels, including lower Technology Readiness Levels, will be covered in this pillar of Horizon Europe. Each cluster contributes towards several Sustainable Development Goals; and many of those goals are supported by more than one cluster. Gender equality is a crucial factor in order to obtain sustainable economic growth; it is therefore important to integrate a gender perspective in all global challenges.

New item

The Innovative Health Initiative Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster 'Health'. It will help create a Union-wide health research and innovation ecosystem that facilitates the translation of scientific knowledge into tangible innovations. It will foster the development of safe, effective, people-centred and cost-effective products and services that target key unmet public health needs and drive cross-sectoral health innovation for a globally competitive European health industry. It will cover prevention, diagnostics, treatment and disease management affecting the population of the Union including the Europe's Beating Cancer Plan. The initiative will contribute to reaching the objectives of the new Industrial Strategy for Europe and the Pharmaceutical Strategy for Europe.

The Smart Networks and Services Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster 'Digital, Industry and Space'. This partnership will support technological sovereignty for smart networks and services in line with the new industrial strategy for Europe and the 5G cyber-security toolbox. It aims to help resolve societal challenges and to enable the digital and green transition. For the COVID-19 crisis, it will support technologies that respond to both the health crisis and the economic recovery. The partnership will enable European players to develop the technology capacities for 6G systems as a basis for future digital services towards 2030.

The Single European Sky ATM Research 3 Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster 'Climate, Energy and Mobility'. The initiative aims to digitally transform air traffic management, to make European airspace the most efficient and environmentally friendly sky to fly in the world and to support the competitiveness and recovery of Europe's aviation sector following the COVID-19 crisis. Its objectives are: improving connectivity, air-ground integration and automation, increasing flexibility and scalability of airspace management and the safe integration of unmanned aircraft.

These activities will help to maintain and enhance biodiversity and secure the long-term provision of ecosystem services, such as climate change adaptation and mitigation and carbon sequestration (both on land and sea). They will help reduce greenhouse gas and other emissions, waste and pollution from primary production (both terrestrial and aquatic), the use of hazardous substances, processing, consumption and other human activities. Activities will also foster participatory approaches to research and innovation, including the multi-actor approach and develop knowledge, and innovation systems at local, regional, national and European levels.

*Remarks*

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre (JRC).

High-quality and trusted scientific evidence is essential for good public policies. New initiatives and proposals for Union legislation need transparent, comprehensive and balanced evidence, whereas implementation of policies needs evidence to measure and monitor their impact and progress.

The JRC adds value to Union policies because its science is excellent, multi-disciplinary and independent of national, private and other external interests. Serving all areas of Union policy, it provides the cross-sectoral support that policymakers need to tackle increasingly complex societal challenges. The JRC's independence from special interests combined with its scientific-technical reference role enable it to facilitate consensus building between stakeholders and other actors such as citizens, and policy-makers. With its capacity to respond rapidly to policy needs, the JRC's activities are complementary with indirect actions aiming at supporting longer term policy objectives.

The JRC performs its own research and is a strategic manager of knowledge, information, data and competences to deliver high quality and relevant evidence for smarter policies. To achieve this, the JRC works together with the best organisations world-wide, and with international, national and regional experts and stakeholders. Its research contributes to the general objectives and priorities of Horizon Europe, provides independent scientific knowledge, advice and technical support for Union policies throughout the policy cycle, and is focussed on Union policy priorities, supporting a Europe that is safe and secure, prosperous and sustainable, social and stronger on the global scene.

This appropriation covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information and acquisition of consumables. This includes expenditure on scientific infrastructure directly incurred for the projects concerned, as well as expenses of external users accessing JRC physical research infrastructures in order to conduct research, undertake experimental development, or provide education and training.

It also covers expenditure of any type concerning research and scientific support tasks relating to activities under this item entrusted to the JRC within the framework of its participation on a competitive basis in support of the Union policies and on behalf of outside bodies.

CHAPTER 01 02 — HORIZON EUROPE (*cont'd*)

01 02 03 **Innovative Europe (Pillar III)**

*Remarks*

This pillar shall foster all forms of innovation, including non-technological innovation, primarily within SMEs including start-ups, by facilitating technological development, demonstration and knowledge transfer, and strengthen deployment of innovative solutions.

This pillar shall also provide for the activities developed under the European Institute of Innovation and Technology (EIT), in particular through its Knowledge and Innovation Communities (KICs). Systematic synergies shall be ensured between the European Innovation Council (EIC) and the EIT. Innovative companies stemming from an EIT KIC may be channelled to the EIC to create a pipeline of not yet bankable innovations, while high potential innovative companies funded by the EIC that are not already engaged in one of the EIT KICs may be offered access to this additional support.

Whilst the EIC and the EIT KICs may directly support innovations across the Union, the overall environment from which European innovations nurture and emerge must be further developed and enhanced: findings in fundamental research lead to market-creating innovations. It must be a common European endeavour to support innovation all across Europe, and in all dimensions and forms, including through complementary Union national and regional policies (including through effective synergies with the European Regional Development Fund and smart specialisation strategies) and resources whenever possible. Hence, this pillar provides also for renewed and reinforced coordination and cooperation mechanisms with Member States and associated countries, but also with private initiatives, in order to support all actors of the European innovation ecosystems, including at regional and local level.

Additionally, as a continued effort to enhance risk-finance capacities for research and innovation in Europe, this pillar will closely link with the InvestEU Programme. Building on the successes and the experiences gained under Horizon 2020 InnovFin, as well as under the European Fund for Strategic Investments, the InvestEU Programme will enhance access to risk finance for bankable entities, as well as for investors.

## Remarks

This appropriation is intended to contribute to support all types of innovation, reach out to all innovators across the Union and provide them with adequate support through:

- the development of an effective innovation ecosystem at Union level,
- the encouragement of cooperation and networking, and the exchange of ideas and knowledge,
- the development of open innovation processes in organisations,
- supporting funding and skills among national, regional and local innovation ecosystems.

Activities will include connecting with national and regional innovation actors and supporting the implementation of joint cross-border innovation programmes by Member States, regions and associated countries. This should be implemented in synergy inter alia with support from the European Regional Development Fund for innovation ecosystems and interregional partnerships around smart specialisation topics.

This appropriation is intended to cover EIT's staff and administrative expenditure, and operational expenditure relating to the work programme, including the Knowledge and Innovation Communities (KICs) designated by the EIT.

The overall mission of the EIT is to boost sustainable European economic growth and competitiveness by reinforcing the innovation capacity of the Member States and the Union. In particular, the EIT reinforces the Union's innovation capacity and addresses societal challenges through the integration of the knowledge triangle of higher education, research and innovation. The EIT operates through its KICs: large-scale European partnerships which address specific societal challenges by bringing together education, research and business organisations. The EIT provides grants to the KICs, monitors their activities, supports cross-KIC collaboration and disseminates results and good practices.

**01 02 04** **Widening participation and strengthening the European Research Area**

*Remarks*

The part 'Widening participation and strengthening the European Research Area' will support activities that contribute to attracting talent, fostering brain circulation and preventing brain drain, as well as a more knowledge-based and innovative and gender-equal Europe at the front edge of global competition and fostering transnational cooperation and thereby optimise national strengths and potential across the whole Europe. It will support a well-performing European Research Area, where knowledge and a highly skilled workforce circulate freely in a balanced manner, where the outcomes of R&I are widely disseminated to, as well as understood and trusted by, informed citizens, and where Union policy, notably R&I policy, is based on high quality scientific evidence.

Remarks

This appropriation is intended to reduce disparities and the existing divide in research and innovation performance by sharing knowledge and expertise across the Union by helping widening countries and the Union's outermost regions to attain a competitive position in the global value chains and the Union to fully benefit from R&I potential of all Member States. Further action, for example through the promotion of openness and diversity of project consortia, is therefore needed to counter the trend for closed collaborations, which can exclude large number of promising institutions and individuals, including newcomers, and to exploit the potential of the Union's talent pool by maximising and sharing the benefits of research and innovation across the Union.

*Remarks*

Appropriations under this chapter are intended to cover the Research and Training Programme of the European Atomic Energy Community for the period 2021-2025 (the 'Euratom Programme'). The Euratom Programme supports nuclear research and training activities. The Euratom Programme aims at enhancing nuclear safety, security and protection from ionising radiation, including through safe waste management and decommissioning activities. The Programme focuses also on the development of fusion energy, a potentially inexhaustible and climate-friendly energy source. The Euratom Programme provides, through the Joint Research Centre (JRC), an important independent scientific advice in support of the implementation of Union policies in the nuclear field. The Euratom Programme also seeks to strengthen the Union's nuclear competences, expertise and knowledge management and pursues improvements in the areas of education, training and access to research infrastructure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries associated to the Euratom Programme for participating in the Euratom Programme, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation aims to foster the development of fusion energy as a potential future energy source for electricity production and contribute to the implementation of the European fusion roadmap. A co-funded European Partnership in fusion research will implement this roadmap towards the goal of fusion electricity production by the second half of this century. The fusion research and development activity contributes also to maintain and further develop expertise and competence in the field in the Union.

*Remarks*

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre (JRC) to implement the Euratom Research and Training Programme. That programme shall contribute to the achievement of its specific objectives:

- improve the safe and secure use of nuclear energy and non-power applications of ionising radiation, including nuclear safety, security, safeguards, radiation protection, safe spent fuel and radioactive waste management and decommissioning,
- maintain and further develop expertise and competence in the Community,
- support the policy of the Community on nuclear safety, safeguards and security.

This appropriation also addresses the activities necessary for implementing safeguards pursuant to Chapter 7 of Title II of the Euratom Treaty and the obligations arising from the Treaty on the Non-Proliferation of Nuclear Weapons and implementation of the Commission's programme to support the International Atomic Energy Agency (IAEA).

It covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information and acquisition of consumables. This includes expenditure on scientific infrastructure directly incurred for the projects concerned, as well as expenses linked to the cost of using JRC physical research infrastructures by external users accessing in order to conduct research, undertake experimental development, or provide education and training.

This appropriation also covers expenditure of any type concerning research and scientific support tasks relating to activities under this article entrusted to the JRC within the framework of its participation on a competitive basis in support of Union policies and on behalf of outside bodies.

*Remarks*

The ITER project aims to demonstrate fusion as a viable and sustainable source of energy by building and operating an experimental fusion reactor as a major step towards the creation of prototype reactors for fusion power stations that are safe, sustainable, environmentally responsible and economically viable. Fusion is expected to play an important role in Europe's future energy landscape as a climate friendly energy source. It is particularly important following the 2015 Paris Agreement on climate change and the Union commitment to lead the way in decarbonising the economy and tackling climate change in a cost effective manner. In this regard, it will contribute to the European Green Deal objective of no net greenhouse gases emission in 2050 and will foster the mobilisation of European high-tech industries, which are involved in the construction of ITER and provide the Union with a global competitive advantage in this promising sector.

The European Joint Undertaking for ITER and the Development of Fusion for Energy has been established by Decision 2007/198/Euratom. The tasks of the Joint Undertaking are as follows:

- to provide the contribution of Euratom to the ITER International Fusion Energy Organisation,
- to provide the contribution of Euratom to broader approach activities with Japan for the rapid realisation of fusion energy,
- to prepare and coordinate a programme of activities in preparation for the construction of a demonstration fusion reactor and related facilities.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

This appropriation is intended to cover part of expenses of any kind incurred during the implementation of the high-flux reactor (HFR) supplementary research programme.

The scientific and technical objectives of the HFR supplementary research programme are the following:

- to ensure the safe and reliable operation of the HFR in order to guarantee the availability of the neutron flux for experimental purposes,
- to allow an efficient use of HFR by research institutes in a broad range of areas: improvement of safety of nuclear reactors, health (including the development of medical isotopes), nuclear fusion, fundamental research and training and waste management including the possibility to study the safety issues of nuclear fuels for reactor systems of interest to Europe.

The HFR supplementary research programme also allows the HFR to act as a training facility hosting doctoral and post-doctoral fellows in performing their research activities through national or European programmes.

*Remarks*

Appropriations under this chapter are intended to cover expenditure of administrative nature (such as studies, meetings of experts, and information and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Besides the expenditure described at the level of this chapter, this appropriation is also intended to cover expenses for preparation, monitoring, control, audit, evaluation and other activities for managing the InvestEU Programme and evaluating the achievement of its objectives. It may moreover cover expenses relating to the studies, meetings of experts, information and communication actions, including corporate communication of the political priorities of the Union, in so far as they are related to the objectives of the InvestEU Programme, as well as expenses linked to information technology networks focusing on information processing and exchange, including information technology tools and other technical and administrative assistance needed in connection with the management of the InvestEU Programme. These costs include, *inter alia*, various studies, external evaluations, monitoring visits and audits, as well as the organisation of the Advisory Board meetings, of InvestEU Investment Committee meetings and of InvestEU working groups.

Remarks

Appropriations under this chapter are intended to cover the costs of a Union guarantee provided under the InvestEU Fund for financing and investment operations carried out in support of the Union's internal policies. It also covers the costs for an advisory support mechanism to support the development of investable projects and access to financing and to provide related capacity building (InvestEU Advisory Hub). Finally, it also covers the costs of a database granting visibility to projects for which project promoters seek financing and which provides investors with information about investment opportunities (InvestEU Portal).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for this programme under this title for a total amount of EUR 6 074 000 000 in commitments in current prices. The amounts indicated in the budget remarks of the relevant budget lines under this title provide information about the expected amount of legal commitments in 2022.

## Remarks

Appropriations under this chapter are intended to cover actions focused on the development and modernisation of the trans-European networks in the fields of transport, energy and digital and to facilitate cross-border cooperation in the field of renewable energy, taking into account the long-term decarbonisation commitments and with emphasis on synergies among sectors.

**CHAPTER 02 03 — CONNECTING EUROPE FACILITY (CEF) (cont'd)**

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This appropriation is intended to cover actions to contribute to the development of projects of common interest relating to efficient, interconnected and multimodal networks and infrastructure for smart, interoperable, sustainable, inclusive, accessible, safe and secure mobility. Those projects will be mainly implemented through calls for proposals under multiannual work programmes constituting financing decisions within the meaning of Article 110 of the Financial Regulation.

This appropriation will support actions that take into account the long-term decarbonisation commitments of the Union. The implementation will take the form of studies, works and other accompanying measures necessary for the management and delivery of the CEF, in line with the sector specific guidelines, i.e. the TEN-T Guidelines.

Eligible actions will relate to the development of efficient, interconnected and multimodal networks in railways, inland waterways, maritime ports and road infrastructure along the TEN-T core network and for cross-border links, maritime ports and inland ports located on the TEN-T comprehensive network. Moreover, support will be provided to smart, interoperable, sustainable, multimodal, inclusive, accessible, safe and secure mobility, such as Motorways of the Sea, telematics application systems for all transport modes, new technologies and innovation with a specific focus on alternative fuels infrastructures, actions to remove interoperability barriers and actions improving transport infrastructure accessibility and resilience.

Assigned revenue received may give rise to additional appropriations under this budget line in accordance with Article 22(1) of the Financial Regulation.

Remarks

This appropriation is intended to cover actions to contribute to the development of projects of common interest relating to the deployment of safe and secure very high capacity digital networks and 5G systems, to the increased capacity and resilience of digital backbone networks in Union territory, as well to the digitalisation of transport and energy networks.

Actions foreseen under CEF include: the deployment of and access to very high-capacity networks, including 5G systems, capable of providing Gigabit connectivity in areas where socioeconomic drivers are located; the provision of very high-quality local wireless connectivity in local communities that is free of charge and without discriminatory conditions; uninterrupted coverage with 5G systems of all major transport paths, including the trans-European transport networks; the deployment of new or significant upgrades of existing backbone networks including submarine cables, within and between Member States and between the Union and third countries; and supporting operational digital platforms directly associated to transport or energy infrastructures.

This appropriation may also be used for technical and administrative assistance for the implementation of CEF, such as preparatory, monitoring, control, audit and evaluation activities including corporate information technology systems.

CHAPTER 02 04 — DIGITAL EUROPE PROGRAMME (*cont'd*)*Remarks*

Appropriations under this chapter are intended to cover actions focused on reinforcing Europe's capacities in high performance computing, artificial intelligence, cybersecurity and advanced digital skills and ensuring their wide use across the economy and society. Fostered simultaneously, these will help create a thriving data economy, promote inclusiveness and equal opportunities for all and ensure value creation. Most importantly, the programme will concentrate on the areas where no single Member State alone can ensure the level required for digital success. Focus will also be placed on those areas where public spending has the highest impact, notably on improving efficiency and quality of services in the areas of public interest such as health, environment, climate, mobility and public administrations, and helping small and medium-sized enterprises (SMEs) to adapt to digital change.

The Digital Europe Programme will also consider the added value of combining digital with other enabling technologies in order to maximise benefits from digitisation.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines

Remarks

Former Item PP 09 21 01

This appropriation is intended to cover actions to develop capacity in artificial intelligence (AI) in Europe in line with the Digital Services Act package. To this end, actions will focus on building-up and reinforcing core AI capacities, with a particular attention to data resources and federated cloud infrastructure, by making them accessible to all businesses and public administrations. Actions will also reinforce and foster links between existing AI testing and experimentation facilities in Member States and will support the establishment of libraries of AI algorithms.

*Remarks*

This appropriation is intended to cover the interoperability block of the Digital Europe Programme that is the successor of the ISA<sup>2</sup> programme that ended in December 2020.

Interoperability of European public services concerns all levels of administration: Union, national, regional and local. The aim of the interoperability block of the Digital Europe Programme is to eliminate fragmentation of European services, and to implement a holistic cross-sector and cross-border approach to interoperability. It will facilitate and support the design, development, update, use and deployment of interoperable solutions and frameworks by European public administrations, businesses and citizens. It will also offer public administrations access to testing and piloting of digital technologies, including their cross-border use.

The interoperability block will be implemented in close cooperation and coordination in the context of the Digital Europe Programme with DG CNECT, Member States and Commission services concerned via projects and accompanying measures (awareness raising, promotion, community building, etc.).

**Remarks**

EASA is the Union's agency for aviation safety. Its mission is to ensure the highest common level of safety protection for Union citizens, ensure the highest common level of environmental protection, establish a single regulatory and certification process among Member States, facilitate the internal aviation market and create a level playing field, and work with other international aviation organisations and regulators.

The main activities of EASA include the collection and analysis of safety intelligence and performance data to derive strategic action plans, the certification of aviation products and the approval of organisations in all aviation domains (design, production, maintenance, training, air traffic management, etc.), the preparation of regulatory material setting up common standards for aviation in Europe and the monitoring and inspections of the effective implementation of such standards in the Member States and the Union's neighbouring States that have signed aviation agreements with the Union.

The tasks performed by EASA cover the whole spectrum of the Union's aviation safety rules and have an important international component as EASA is legally mandated to cooperate with international actors in order to achieve the highest safety level for EU citizens globally (e.g. EU safety list, authorisation of third country operators, and implementation of technical assistance programming towards third countries). Established in 2002, EASA is composed of more than 800 aviation experts and administrators and it has 31 Member States (27 EU Member States + Switzerland, Iceland, Norway and Liechtenstein). It has four international offices in Montreal, Washington, Beijing and Singapore. Typically its budget consists mainly of fees and charges (64%), a subsidy from the Union (23%), earmarked funds (11%) and third country contributions (2%).

*Remarks*

EMSA is the Union agency for maritime safety. It sits at the heart of the Union's maritime safety network and fully recognises the importance of effective collaboration with many different interests and, in particular, between Union and international institutions, Member States' administrations and the maritime industry.

EMSA's activities include: providing technical and scientific assistance to the Member States and the Commission in the proper development and implementation of Union legislation on maritime safety, security, prevention of pollution by ships and maritime transport administrative simplification; monitoring the implementation of Union legislation through visits and inspections; improving cooperation with, and between, Member States; building capacity of national competent authorities; providing operational assistance, including developing, managing and maintaining integrated maritime services related to ships, ship monitoring and enforcement; carrying out operational preparedness, detection and response tasks with respect to pollution caused by ships and marine pollution by oil and gas installations; and, at the request of the Commission, providing technical and operational assistance to third countries.

*Remarks*

ERA contributes to the further development and effective functioning of a single European railway area without frontiers, by guaranteeing a high level of railway safety and interoperability, while improving the competitive position of the railway sector. In particular, the ERA contributes, on technical matters, to the implementation of Union legislation by developing a common approach to safety on the Union rail system and by enhancing the level of interoperability on the Union rail system. Further objectives of the ERA are to follow the reduction of national railway rules in order to support the performance of national authorities acting in the fields of railway safety and interoperability, to promote the optimisation of procedures, to monitor national safety authorities and conformity assessment bodies and to manage and keep up-to-date a number of registers vital for the smooth operation of the European railway area.

Remarks

ENISA was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, ENISA will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

ENISA's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

*Remarks*

By decision of 12 February 2021, the General Meeting of the European Investment Fund (EIF) approved a capital increase of the EIF and specified the terms and conditions for that capital increase. Regulation (EU) 2021/523 provides that the Union, represented by the Commission, is to subscribe up to 853 newly issued shares of the EIF. The subscription and the payment of up to EUR 375 000 000 for the shares is to be undertaken in accordance with the terms and conditions set by the EIF General Meeting and before the end of 2022.

This appropriation is intended to cover the financing of the price of newly issued shares of the capital of the EIF subscribed by the Union. Regulation (EU) 2021/523, and in particular Article 33 thereof, constitutes the legal basis for the payment of the paid-in capital.

The EIF was created in 1994. Its founder members were the European Community, represented by the Commission, the European Investment Bank (EIB) and a number of financial institutions. Union membership of the EIF is presently governed by Decision 94/375/EC.

Commission Decision of 2 March 2021 on the financing of Directorate General for Economic and Financial Affairs' activities and adoption of a corresponding annual work programme for 2021 (C(2021) 1361 final, Annex 2) allocates EUR 375 000 000 to this item.

This appropriation is intended to cover the financing of the technical and legal assistance necessary for the evaluation of the safety, environmental, economic and financial aspects of the projects for which financing in the form of a Euratom loan has been requested, including studies undertaken by the European Investment Bank (EIB). The measures are also intended to enable loan contracts to be concluded and carried out.

Appropriation under this item will also be used to cover or temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with Euratom borrowing and lending operations.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3), point (a), of the Financial Regulation.

*Remarks*

This appropriation is intended to cover support from the Union renewable energy financing mechanism with the aim of closing the gap, in part or entirely, as regards the national reference points in as much as renewable energy generated by installations financed by the financing mechanism would be statistically attributed to the participating Member States, reflecting their relative payments. That mechanism should facilitate the Member States with the opportunity to increase the sectoral share of renewable energy in the electricity, heating and cooling, and transport sector to territories facing serious socio-economic challenges deriving from the transition process towards a climate-neutral economy of the Union by 2050.

*Remarks*

This appropriation is intended to finance the activities necessary for the analysis, definition, promotion, monitoring, evaluation and implementation of the Union's transport policy, for all transport modes (road, rail, air, sea and inland waterways). The main actions and objectives are intended to support the Union's transport policy, including extension to third countries.

This appropriation covers all transport sectors such as transport safety, internal market of transport, optimisation of transport network, multimodality, logistics, passengers' rights and protection, the use of alternative fuels, clean vehicles procurement and urban mobility, social and gender aspects as well as safety and protection of transport users.

This appropriation is intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the rules and measures required to improve the security of inland, air and sea transport, including extension to third countries, technical assistance and specific training.

The main objectives are to develop and apply security rules in the field of transport and in particular:

- measures to prevent malicious acts in the transport sector,
- approximation of legislation, technical standards and administrative monitoring practices relating to transport security,
- definition of common indicators, methods and security objectives for the transport sector and collection of the data necessary for such definition,
- monitoring of measures taken on transport security by the Member States, in all modes,
- international coordination on transport security,
- promoting research into transport security.

*Remarks*

This appropriation is intended to cover expenditure incurred by the Commission to support the energy policy for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, financing, evaluation and implementation of a competitive, safe and sustainable European energy policy, of the internal energy market and its extension to third countries, of all aspects of energy supply security in a European and global perspective as well as the strengthening of the rights and protection of energy users by supplying quality services at transparent and comparable prices.

The principal endorsed objectives are to implement a progressive common European policy in line with the Energy Union strategy (COM(2015) 80) ensuring continuous energy supply security, good functioning of the internal energy market and access to transport networks of energy, observation of energy market, integrated governance and monitoring, analysis of modelling including scenarios on the impact of considered policies and the strengthening of the rights and protection of energy users, based on general and particular knowledge of global and European energy markets for all energy types.

This appropriation is also intended to cover experts' expenditure directly linked to the collection, validation and analysis of necessary information on energy market observation, as well as expenditure on information and communication, digital processing and visualisation of data, conferences and events promoting activities in the energy sector, electronic and paper publications, audio-visual products as well as the development of different web-based and social media activities directly linked to the achievement of the objective of the energy policy. This appropriation will also support an enhanced energy dialogue with the Union's key energy partners and international agencies in the field of energy.

*Remarks*

This appropriation is intended to cover expenditure on a set of measures designed to:

- develop electronic communications policy, and promote (including outside the Union), monitor and coordinate the implementation of the regulatory framework with a view to completing the internal market, promoting competition, investment and growth and protecting end-users over the entire range of issues in the e-communications field: economic analysis, impact assessment, policy development and regulatory compliance,
- develop policy and legislation with a particular focus on issues related to retail and consumer issues notably net neutrality, switching, roaming, demand and use stimulation and universal service,
- promote, monitor and review the implementation of the Union roaming policy as established under Regulation (EU) 2015/2120 of the European Parliament and of the Council of 25 November 2015 laying down measures concerning open internet access and amending Directive 2002/22/EC on universal service and users' rights relating to electronic communications networks and services and Regulation (EU) No 531/2012 on roaming on public mobile communications networks within the Union (OJ L 310, 26.11.2015, p. 1),
- develop and implement consistent market-based regulations to be applied by national regulatory authorities and to respond to individual notifications from those authorities, notably regarding relevant markets, competition and appropriate regulatory intervention, in particular for next generation access networks,
- develop policies across the board which will ensure that Member States manage all uses of spectrum, including the different internal market realms such as e-communications, 5G (including broadband internet), and innovation,
- promote and monitor the implementation of the regulatory framework for communication services, including the mechanism provided for in Article 7 of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive) (OJ L 108, 24.4.2002, p. 33),
- enable third countries to pursue a policy of opening up their markets to the same extent as in the Union,
- promote and monitor the implementation of the radio spectrum policy programme (Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7)),
- develop policies on copyright at Union level, including on Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases (OJ L 77, 27.3.1996, p. 20),

**CHAPTER 02 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS** (*cont'd*)**02 20 04** (*cont'd*)02 20 04 03 (*cont'd*)

- develop, implement and monitor policies in the context of the digital single market, on e-commerce in the Union, in particular those related to Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the Internal Market ('Directive on electronic commerce') (OJ L 178, 17.7.2000, p. 1), including the assessment of legal and economic barriers stemming from the internal market framework for electronic commerce or from related measures,
- support the implementation and take-up of policies in the context of eGovernment (in particular the eGovernment Action Plan 2016-2020) and eIDAS (Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC (OJ L 257, 28.8.2014, p. 73)) in order to advance the quality and innovation of public administrations and accelerate the large-scale public and private sector use of trusted identification and trust services in the digital single market.

Those measures consist, inter alia, in preparing analyses and progress reports, consulting stakeholders and the public, preparing communications, legislative proposals and monitoring the application of legislation, and translations of notifications and consultations under Article 32 of Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code (OJ L 321, 17.12.2018, p. 36).

This appropriation is also intended to cover, in particular, contracts for analyses and expert reports, specific studies, evaluation reports, coordination activities, grants and the part-financing of certain measures.

In addition, it is also intended to cover expenditure on meetings of experts, communication events, membership fees, information and publications directly linked to the achievement of the objectives of the policy or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

Remarks

Appropriations under this chapter are intended to contribute to the well-functioning of the single market for goods and services, including financial services, anti-money laundering and the free movement of capital, and to provide high quality European statistics on all Union policies, as per the purpose of the Programme for single market, competitiveness of enterprises, including small and medium-sized enterprises, and European statistics (the 'Single Market Programme'). In particular, the programme will support the design, implementation and enforcement of the Union legislation underpinning the proper functioning of the single market for goods and services, including financial services, anti-money laundering and the free movement of capital, as well as capacity building, coordination of joint actions between Member States and the Commission, and the international dimension of the internal market. It will also support women's participation and contribute to the empowerment of all actors of the single market: businesses, citizens including consumers, civil society and public authorities. The Single Market Programme brings together six preceding programmes from different policy areas, notably the grants and contracts part of the Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME), programmes on consumer protection, enhancing the participation of consumers and other end users in financial services policy-making, the development of international financial, auditing and corporate reporting standards, measures to contribute to a high level of health for humans, animals and plants along the food chain and in related areas and European statistics. In addition, the programme includes several other budgetary lines concerning, in particular market surveillance, company law, contract and extra-contractual law, standardisation and support for competition policy, customs and taxation. The impact assessment showed that one single programme will create synergies contributing to more agile and efficient budgetary spending.

**CHAPTER 03 02 — SINGLE MARKET PROGRAMME** (*cont'd*)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This appropriation is intended to cover expenditure arising from the management and development of the internal market governance tools (Your Europe, Single Digital Gateway, Your Europe Advice, SOLVIT, the Internal Market Information (IMI) system and the Single Market Scoreboard). These tools are providing a seamless range of services for citizens, business and public authorities, that aim to ensure a better functioning of the internal market in practice. The Your Europe on-line portal provides citizens and businesses with information on their Union rights in 23 languages of the Union. Since December 2020, Your Europe serves as the entry point for Single Digital Gateway, adding information on national and regional rights and procedures in English and the relevant national languages. Single Digital Gateway is also working towards digitalising the most important administrative procedures for citizens and business, including their accessibility cross-border, and establishing a system for the automated cross-border exchange of evidence needed for those procedures. Your Europe Advice offers citizens and businesses free of charge tailored advice on their rights in the internal market. SOLVIT is an informal problem-solving network, efficiently dealing with cross-border problems faced by citizens or businesses that result from an incorrect application or transposition of Union legislation by a Member State. SOLVIT also identifies wider issues and reports on such issues as detected in the SOLVIT-IMI database. IMI is a multilingual online application for administrative cooperation between Member States within the internal market, making it easy for authorities to exchange information and work together, on the basis of simple and unified procedures in their own language. The Single Market Scoreboard, showing Member States' performance in the most relevant policy areas and for internal market governance tools, is being developed to provide an even more complete vision of the internal market.

*Remarks*

This appropriation is intended to cover expenditures contributing to an effective enforcement, implementation, development, modernisation and communication of Union competition policy. It is intended to tackle the implications for competition and the functioning of the internal market resulting from the ongoing globalisation and transformation of the economy and business environment, in particular, the exponential growth and use of data, the increase of artificial intelligence and other digital tools and expertise. It should support networks and cooperation with national authorities and courts, as well as outreach activities to stakeholders.

These expenditures may include:

- development, maintenance, acquisition and modernisation of digital tools, big data and artificial intelligence solutions and related equipment and services,
- market data gathering, analyses and acquisition of other information sources,
- expertise, studies, surveys, consultations and market intelligence,
- capacity building, development and strengthening cooperation and cooperation structures with and between enforcement bodies, national courts and other relevant Member State authorities, third country authorities and international organisations,
- outreach activities and related services and material,
- other general expenditures directly linked to the achievement of the objectives of the programme and activities of the Directorate-General for Competition.

*Remarks*

This appropriation is intended to cover expenditure arising in connection with measures contributing to the completion of the internal market and its operation, strengthening, improvement and development in the area of financial services, financial stability, pensions, payment systems and the capital markets union, including sustainable finance. It shall contribute to making the internal market more effective, facilitating the prevention and removal of obstacles, supporting the development, implementation and enforcement of Union law in the areas of financial services (including market surveillance) and the free movement of capital. It shall also contribute to the development of governance tools.

The appropriation shall cover expenditure arising from the Commission's monitoring of financial markets and financial stability, the assessment of the implementation of Union legislation by Member States, the evaluation of whether existing legislation is fit for purpose and the identification of potential areas of action where new risks or opportunities emerge. This shall include the international dimension of Union policies. It may also cover expenditure to facilitate the involvement of stakeholders throughout the policy cycle. Such activities rely on the production of analyses, studies, training materials, surveys, conformity assessments, evaluations and statistics. The appropriation shall also, where necessary, cover the procurement of data and the cost of access to external databases; the development and maintenance of IT systems, including licences and internal charge-backs, and IT support to internal and external users of these systems; information and communication activities and tools; participation in meetings including of international organisations and associations; the costs of membership of bodies, organisations and associations; consultations and meetings; and any other assistance required to ensure the required operation, strengthening, improvement and development of the internal market.

*Remarks*

Within the internal market, the free movement of goods is the most developed of all four fundamental freedoms. However, the increasing number of illegal and non-compliant products on the market distorts competition and puts consumers at risk. Many businesses disregard the rules either through lack of knowledge or intentionally to gain a competitive advantage.

**CHAPTER 03 02 — SINGLE MARKET PROGRAMME** (cont'd)**03 02 01** (cont'd)

## 03 02 01 07 (cont'd)

Market surveillance ensures that non-food products on the Union market do not endanger European consumers and workers. It also ensures the protection of other public interests such as the environment, security and fairness in trade.

Under the Single Market Programme, support to market surveillance measures in the Union seeks to strengthen product compliance by providing the right incentives to entrepreneurs, intensifying compliance checks and controls of products at the external borders, and promoting closer cross-border cooperation between market surveillance enforcement authorities.

The Single Market Programme also contributes to the consolidation of the existing framework for market surveillance activities, to encourage joint actions of authorities from different Member States, to improve the exchange of information and to promote convergence and closer integration of activities.

**Remarks**

This appropriation is intended to support the competitiveness of enterprises, in particular that of small and medium-sized enterprises (SMEs), and to support their growth.

The implemented measures will include:

- networks and clusters bringing together a variety of stakeholders and support to strategically connect ecosystems,
- various forms of support for SMEs, including for social economy enterprises to foster access to markets and global value chains, entrepreneurship, the modernisation of industry and the competitiveness of sectors,
- various forms of support for SME's, including for social economy enterprises, to empower their investments in green and social sustainability that benefits the local and regional economic ecosystem,

- information sharing, dissemination, awareness raising and advisory services to increase SME's competitiveness and help them participate in the single market and beyond.

Projects will seek to improve conditions for SMEs and contribute to a favourable business environment including through capacity building, support to SME internationalisation, industrial transformation, skills development, and value chain collaboration, and help them increase their competitiveness and sustainability. They will rely on the services provided by clusters, entrepreneurship and business support networks.

In addition, projects will be put in place to support the implementation of the SME Strategy for a sustainable and digital Europe and the New Industrial Strategy for Europe; as well as current Commission priorities, including the European Green Deal and Better Regulation.

Support actions, directly linked to the achievement of the programme specific objectives are also considered for funding: meetings (including workshops), studies, information and publications and participation in study groups.

Key activities that have proven expertise and success in reaching and supporting SMEs will continue to be central.

The Enterprise Europe Network (EEN) will be further strengthened and supported, and will use its expertise to enable SMEs to improve their competitiveness and develop their business in the single market and beyond. EEN services will be further adapted and widened, to suit SME needs in respect of new policy priorities such as digitalisation, internationalisation, circular economy and skills. EEN will help SMEs and scale-ups understand sustainability issues, and put in place strategies and business plans to adapt and compete successfully.

Joint Cluster Initiatives will be used as a strategic tool for supporting the competitiveness, scaling up of SMEs, supported by the European Cluster Collaboration Platform and its European Resource Efficiency Knowledge Centre (EREK). By connecting specialised eco-systems, clusters create new business opportunities for SMEs and integrate them better in European and global strategic value chains. Support will be provided for the development of transnational partnership strategies and the implementation of joint activities, including for channelling direct support to SMEs for encouraging the uptake of advanced technologies, low-carbon solutions, and skills upgrading.

The 'Erasmus for Young Entrepreneurs' mobility scheme enables new or aspiring entrepreneurs to gain business experience by matching with an experienced entrepreneur from another country and thus allow strengthening entrepreneurial talents. It helps tackle unemployment and enables existing SMEs to create jobs and increase their turnover by expanding and internationalising their business.

Sustainable tourism will receive a special focus through sectorial support actions. The Union will support, inter alia,

- actions to build capacity of tourism businesses, in particular SMEs, in areas such as sustainability, digitalisation and innovation,
- actions to promote cross-border cooperation and peer learning among tourism stakeholders and public authorities responsible for tourism,
- foresight and socio-economic analysis regarding, inter alia, the long-term competitiveness of the tourism sector and promotion of Union tourism businesses.

*Remarks*

This appropriation is intended to cover the financing of European standardisation and stakeholder participation in setting up European standards. In particular, the appropriation will support financially the actions and the entities specified in Articles 15 and 16 of Regulation (EU) No 1025/2012.

European standards play an important role in the internal market. They are of vital interest for the competitiveness of undertakings, and especially SMEs. They are also a crucial tool to support Union legislation and policies in a number of key areas such as energy, climate change, information and communication technology, sustainable use of resources, innovation, product safety, consumer protection, worker's safety and working conditions and ageing population, thus positively contributing to the society as a whole.

European standardisation activities are governed by Regulation (EU) No 1025/2012 of the European Parliament and of the Council and implemented through a long standing public-private-partnership which is fundamental to achieve the objectives set in that Regulation as well as in general and sectorial Union standardisation policies.

*Remarks*

This appropriation is intended to cover expenditure in pursuit of the specific objective of supporting the development of high-quality financial and non-financial reporting and auditing standards globally and across the Union, facilitating their integration into Union legislation and promoting the innovation and development of best practices in corporate reporting. Union funding for these activities is vital to support the development of International Financial Reporting Standards (IFRS) which take account of Union interests and which are consistent with the legal framework of the internal market, to promote best practices in wider corporate reporting and to support public oversight for the transparent development of International Standards on Auditing (ISA). Union funding is also vital to support the development of European sustainability reporting standards that build on and contribute to the development of such standards at the global level.

The appropriations may be used for actions supporting the development, application, assessment and monitoring of corporate reporting and auditing standards, thereby contributing to the transparency of Union capital markets and enhancing investor protection, financial stability and sustainable finance.

## Remarks

Appropriations under this chapter are intended to cover expenditure to support tax policy, tax cooperation and administrative capacity building, including human competency and the development and operation of the European electronic systems.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

## Legal basis

*Remarks*

This appropriation is intended to cover the operations of Copernicus services, tailored to the needs of users, contributing to ensure access to data of the observation infrastructure necessary to operate Copernicus services and creating opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

This appropriation is also intended to cover the remaining development activities of the current Sentinels as well as the initiation of new missions' development.

**CHAPTER 04 02 — UNION SPACE PROGRAMME** (cont'd)**04 02 02** (cont'd)

This appropriation may also fund cross-cutting activities among the services or their articulation and co-ordination, as well as for the in-situ co-ordination, user uptake and training and communication.

In addition, in support of competitiveness and growth, this appropriation may also fund data dissemination and the incubation of new businesses by supporting more robust and innovative IT structures in Europe.

Copernicus services will facilitate access to key data required in policy formulation at Union, national, regional and local level in fields such as agriculture, forest monitoring, water management, transport, urban planning, climate change and many others. This appropriation covers mainly the implementation of delegation agreements for the Copernicus programme, pursuant to Article 58 of the Financial Regulation.

This appropriation is intended to cover all activities related to the set-up of Govsatcom and Space Situational Awareness (SSA) (covering Space Surveillance and Tracking (SST), space weather and near Earth objects (NEO) components of the Union Space Programme).

Under the GOVSATCOM component, satellite communication capacities and services shall be combined into a common Union pool of satellite communication capacities and services, with appropriate security requirements. This component comprises:

- (a) the development, construction, and operations of the ground segment infrastructure;
- (b) the procurement of governmental and commercial satellite communication capacities, services, and user equipment necessary for the provision of GOVSATCOM services;
- (c) measures necessary to further interoperability and standardisation of GOVSATCOM user equipment.

COMMISSION

Under the SSA component, a space surveillance and tracking system aiming to improve, operate and provide data, information and services related to the surveillance and tracking of space objects that orbit the Earth ('SST' sub-component) shall be complemented by observational parameters related to space weather events ('SWE' sub-component) and the risk monitoring of near earth objects approaching the Earth ('NEO sub-component').

The SST function shall support the following activities:

- (a) the establishment, development and operation of a network of ground-based and space-based SST sensors of the Member States, including sensors developed through the European Space Agency and nationally operated Union sensors, to survey and track objects and to produce a European catalogue of space objects;
- (b) the processing and analysis of SST data at national level in order to produce SST information and SST services referred to in Article 55 of Regulation (EU) 2021/696;
- (c) the provision of the SST services referred to in Article 55 to the SST users referred to in Article 56 of Regulation (EU) 2021/696;
- (d) monitoring and seeking synergies with initiatives promoting development and deployment of technologies for spacecraft disposal at the end of operational lifetime, of technological systems for the prevention and elimination of space debris as well as with the international initiatives in the area of the space traffic management;
- (e) technical and administrative support to ensure the transition between the Union Space Programme and the SST support framework established by Decision No 541/2014/EU of the European Parliament and of the Council of 16 April 2014 establishing a Framework for Space Surveillance and Tracking Support (OJ L 158, 27.5.2014, p. 227).

The space weather function may support the following activities:

- (a) the assessment and identification of the needs of the users in the sectors of transport, GNSSs, electric power grids and communications with the aim of setting out the space weather services to be provided;
- (b) the provision of space weather services to the space weather users, according to the identified users' needs and technical requirements.

The NEO function may support the following activities:

- (a) the mapping of Member States' capacities for detecting and monitoring near-Earth objects;
- (b) the promotion of the networking of Member States' facilities and research centres;
- (c) the development of the service referred to in the subsequent paragraph;
- (d) the development of a routine rapid response service able to characterize newly discovered near-Earth objects;
- (e) the creation of a European catalogue of near-Earth objects.

The Commission may put in place procedures to coordinate, with the involvement of the appropriate UN bodies, the actions of the Union and national public authorities concerned with civil protection in the event a near-Earth object is found to be approaching Earth.

Remarks

ERDF support under the Investment for jobs and growth goal and for the European territorial cooperation goal (Interreg) in the 2021-2027 and preceding programming periods.

It will cover the following three categories of regions:

- less developed regions, with a GDP per capita less than 75 % of the average GDP of the Union,
- transition regions, with a GDP per capita between 75 % and 100 % of the average GDP of the Union,
- more developed regions, with a GDP per capita above 100 % of the average GDP of the Union.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for programmes financed under the REACT-EU under Titles 05 and 07 for a total amount of EUR 50 620 000 000 in commitments. The amounts indicated in the budget remarks of the relevant budget lines under this title provide information about the expected amount of legal commitments in 2022.

**CHAPTER 05 03 — COHESION FUND (CF) (cont'd)***Remarks*

Cohesion Fund (CF) support under the Investment for jobs and growth goal in the 2021-2027 and preceding programming periods. The CF will support Member States whose gross national income (GNI) per capita, measured in Purchasing Power Standards (PPS) and calculated on the basis of Union figures for the period 2014-2016, is less than 90 % of the average GNI per capita of the EU-27 for the same reference period. The appropriation, while ensuring an appropriate balance and according to the investment and infrastructure needs specific to each Member State, is intended to support:

- investments in the environment, including areas related to sustainable development and energy which present environmental benefits,
- the Connecting Europe Facility (CEF).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

An amount transferred from the CF shall be spent exclusively in Member States eligible for funding from the CF.

The objective will be mainly implemented through calls for proposals under multiannual work programmes, which will constitute financing decisions in the meaning of Article 110 of the Financial Regulation.

It will support actions that take into account the long-term decarbonisation commitments of the Union. The implementation will take the form of studies, works and any other accompanying measures necessary for the management and delivery of the programme, in line with the sector specific guidelines, i.e. the TEN-T Guidelines.

Eligible actions will mainly relate to the development of efficient, interconnected and multimodal networks in railways, inland waterways, maritime ports and road infrastructure along the TEN-T core network and for cross-border links, maritime ports and inland ports located on the TEN-T comprehensive network.

In accordance with Article 4, point (4), of Regulation (EU) 2021/1153, up to 1 % of the overall CEF financial envelope will cover expenses pertaining to programme support actions and any other accompanying measures to support the preparation of projects and provide advisory to project promoters.

According to Article 27 of Regulation (EU) 2021/1153, financial resources allocated to the CEF shall also contribute to the corporate communication of the political priorities of the Union, to actions taken pursuant to the CEF and to the results obtained.

Remarks

This appropriation is intended to cover the continuation of aid under Regulation (EC) No 389/2006 to facilitate the reunification of Cyprus by encouraging the economic development of the Turkish Cypriot community with particular emphasis on economic integration of the island, on improving contacts between the two communities and with the Union and on preparation for the application of the Union *acquis*. Assistance is delivered in the areas specified in that Regulation, and includes notably the promotion of social and economic development, the development and restructuring of infrastructure, reconciliation, confidence building measures and support to civil society, bringing the Turkish Cypriot community closer to the Union, including scholarships for Turkish Cypriot students. Also, the TAIEX instrument is used for the preparation of legal texts for the purpose of these being applicable upon the entry into force of a comprehensive settlement of the Cyprus problem, as well as for the preparation of the Union *acquis* immediately following a political settlement for reunification.

COMMISSION  
TITLE 05 — REGIONAL DEVELOPMENT AND COHESION

**CHAPTER 05 04 — SUPPORT TO THE TURKISH CYPRIOT COMMUNITY** (*cont'd*)

**05 04 01** (*cont'd*)

The appropriations will, in particular, allow for the continuation of Union financial support to facilitate the intensification of the work of the Committee on Missing Persons in order to meet the goals of its strategic plan on the faster identification of missing persons, as well as the implementation of the decisions of the bi-communal Technical Committee on Cultural Heritage, which should include projects of minorities.

This appropriation is to be used, inter alia, to sustain the outcome of works, supplies and grants being funded under earlier allocations. In addition, grant schemes addressed to a large variety of economic and civil society beneficiaries (non-governmental organisations, students and teachers, schools, farmers, small villages, and the private sector) may continue. These activities aim at socio-economic development and are driven by the prospect of reunification. Priority should be given, where possible, to reconciliation projects that create bridges between the two communities and build confidence. These measures underline the strong desire and commitment of the Union to the Cyprus problem settlement and reunification.

COMMISSION  
TITLE 06 — RECOVERY AND RESILIENCE

**CHAPTER 06 01 — SUPPORT ADMINISTRATIVE EXPENDITURE OF THE 'RECOVERY AND RESILIENCE' CLUSTER** (*cont'd*)

*Remarks*

Appropriations under this chapter are intended to cover expenditure of administrative nature (such as studies, meetings of experts, information and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

Appropriations under this chapter are intended to cover expenditure relevant to Regulations (EU) 2021/240 and (EU) 2021/241 establishing a Recovery and Resilience Facility and a Technical Support Instrument.

The Recovery and Resilience Facility intends to promote the Union's economic, social and territorial cohesion by improving the resilience, crisis preparedness, adjustment capacity and growth potential of the Member States, by mitigating the social and economic impact of the COVID-19 crisis, and supporting the green and digital transitions, thereby contributing to restoring the growth potential of the economies of the Union, fostering employment creation in the aftermath of the COVID-19 crisis, and promoting sustainable growth. It is to provide Member States with financial support with a view to achieving the milestones and targets of reforms and investments as set out in their recovery and resilience plans.

In accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for this programme under this title for a total amount of EUR 337 969 000 000 in commitments. The amounts indicated in the budget remarks of the relevant budget lines under this title provide information about the expected amount of budgetary commitments in 2022.

COMMISSION  
TITLE 06 — RECOVERY AND RESILIENCE

**CHAPTER 06 02 — RECOVERY AND RESILIENCE FACILITY AND TECHNICAL SUPPORT INSTRUMENT** (*cont'd*)

The Technical Support Instrument intends to promote the Union's economic, social and territorial cohesion by supporting Member States' efforts to implement reforms. This is necessary to encourage investment, to increase competitiveness and to achieve sustainable economic and social convergence, resilience and recovery. The Instrument's objective is to support Member States' efforts to design, develop and implement reforms and prepare, develop, amend and implement recovery and resilience plans pursuant to Regulation (EU) 2021/241. This includes strengthening their institutional and administrative capacity, in order to properly quantify costing, milestones and targets, including at regional and local level, to facilitate socially inclusive, green and digital transitions, to effectively address the challenges identified in the country-specific recommendations and to implement Union law.

*Legal basis*

*Remarks*

The Union Civil Protection Mechanism intervenes in all phases of the disaster management cycle: prevention, preparedness and response, and its geographical scope is both within and outside the Union.

As regards prevention, the mechanism aims in particular at fostering a shared culture of prevention with activities supporting and promoting Member States' risk assessment and risk reduction efforts, such as the sharing of good practice, the compilation and dissemination of information from Member States on risk management activities including through cross-border projects, peer reviews, and advisory missions. The mechanism also provides funding to scale-up Member States' disaster risk management strategies and to support the development of projects leveraging disaster risk management investments.

Preparedness efforts are supported, in particular, through the pooling of civil protection capacities in the form of the European Civil Protection Pool (ECPP), as well as the development of additional capacities at Union level to complement national efforts (the rescEU reserve and the rescEU transition phase). Preparedness is also improved through training, exercises, the exchange of best practices and experts, all under the umbrella of the Union Civil Protection Knowledge Network. The mechanism also supports the study and development of disaster detection and early warning systems, and promotes scientific analysis and expert support.

Concerning the international dimension, the mechanism facilitates cooperation with the enlargement countries and countries under the European Neighbourhood Policy in the area of disaster management, through the funding of projects, training and policy dialogues.

In relation to response, the mechanism contributes through the Emergency Response Coordination Centre (ERCC) to the rapid and efficient deployment of national capacities, of ECPP modules and/or of its own capacities, as well as of trained experts and EU civil protection teams for operations in Member States or participating states, and in any third country. The mechanism support is financial, operational and facilitates coordination.

This article also covers a wide array of horizontal activities supporting the proper functioning of the mechanism. These include, among others, communication activities, project and IT support to operations, and other activities supporting policy development, such as workshops, seminars, projects, studies, surveys, modelling, scenario-building and contingency planning, as well as audits and evaluations.

**CHAPTER 06 06 — EU4HEALTH PROGRAMME** (cont'd)**06 06 01** (cont'd)*Remarks*

This appropriation is intended to cover the operational expenditure under the EU4Health Programme. Its objective is to protect people in the Union from serious cross-border threats to health; to improve the availability, accessibility and affordability, in the Union, of medicines, medical devices and crisis relevant products, and to support innovation regarding such products; to strengthen health systems and the healthcare workforce, including by digital transformation and by increased integrated and coordinated work among the Member States, sustained implementation of best practice and data sharing; and to increase the general level of public health.

The EU4Health Programme is to cater for a solid legal and financial framework for health crisis prevention, preparedness and response in the Union. This strand is to reinforce national and Union capacity for contingency planning and enable Member States to jointly cope with common health threats, in particular cross-border threats, where Union intervention can add tangible value. The programme complements health policies of the Member States and supports a 'One Health' approach, where applicable, in improving health outcomes through resilient, resource-efficient and inclusive health systems across the Member States, through better disease prevention and surveillance, health promotion, access, diagnosis and treatment, including the fight against cancer as well as cross-border collaboration in health. This programme is to also address non-communicable diseases, which have been shown to be a strong determinant of mortality from COVID-19.

COMMISSION

TITLE 06 — RECOVERY AND RESILIENCE

**CHAPTER 06 07 — EMERGENCY SUPPORT WITHIN THE UNION** (*cont'd*)**06 07 01** (*cont'd*)

Emergency support shall provide a needs-based emergency response, complementing the response of the affected Member States, aimed at preserving life, preventing and alleviating human suffering and maintaining human dignity. Emergency response may encompass assistance, relief and, where necessary, protection operations to save and preserve life in disasters or their immediate aftermath.

Following the activation through Council Regulation (EU) 2020/521 of the emergency support to tackle the COVID-19 outbreak in April 2020, this appropriation is intended to ensure a proper Union response in addressing the related health crisis.

The emergency support is to equip the Union with a broad toolbox commensurate with the large scale of the current COVID-19 pandemic. The needs-based emergency support allows the Union to deploy targeted measures strategically, addressing the needs related to the COVID-19 crisis where the scale, speed or cross-border nature of the solutions needed are best addressed through coordinated Union intervention. Such emergency support complements Member States' efforts and assistance provided through other Union instruments.

Coordinated action at Union level enables the current crisis to be addressed through, inter alia:

- funding of Advanced Purchase Agreements with COVID-19 vaccine developers/manufacturers,
- procurement and distribution to Member States of essential health-related products, including protective gear for hospital staff, testing supplies, therapeutics, diagnostics and training,
- transportation of essential medical cargo (including life-saving personal protective, testing and medical equipment, ventilators, masks, medicines, etc.),
- cross-border cooperation to alleviate the pressure on health systems in the most affected Union regions, including through the transportation of patients in need to cross-border hospitals which can offer free capacity as well as providing support for the transport of medical teams and personnel including operating costs,
- funding clinical trials for generating clinical evidence to repurpose existing treatments to treat COVID-19 patients, as well the collection of COVID-19 convalescent plasma to increase its availability as a direct treatment for COVID-19 patients,
- increasing testing facilities and capacity in Member States and training additional staff to perform sampling and analysis,
- reinforcement of medical capacities and deployment of temporary healthcare facilities and temporary extension of existing healthcare facilities to relieve pressure on existing structures and increase overall healthcare capacity,
- procurement and donation of ultraviolet (UV) disinfecting robots to hospitals throughout the Union,
- contributing to strengthening cross-border contact tracing through an EU digital platform connecting national contact tracing and warning apps, as well as an EU exchange platform connecting national Passenger Locator Form systems,
- support issuing and verifying of interoperable certificates of vaccination, test results and recovery from COVID-19 to facilitate free movement,

**CHAPTER 06 07 — EMERGENCY SUPPORT WITHIN THE UNION** *(cont'd)***06 07 01** *(cont'd)*

— contributing to strengthening contact tracing through the establishment of an EU wastewater monitoring system.

This appropriation may cover any of the humanitarian aid actions eligible for Union financing, and may consequently encompass assistance, relief and, where necessary, protection operations to save and preserve life in disasters or in their immediate aftermath.

This appropriation may also be used to finance other expenditure directly related to the implementation of emergency support in accordance with Regulation (EU) 2020/521.

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies are set out in Annex 'Staff' to this section.

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

According to Article 3 of Regulation (EC) No 851/2004 which defines the mission and tasks of the European Centre for Disease Prevention and Control (ECDC):

the current mission of ECDC should concentrate on communicable diseases (and outbreaks of unknown origin),

the ECDC should be a proactive centre of excellence as regards information and scientific knowledge on all aspects of communicable diseases that relate to their detection, prevention and control,

the ECDC should be an agent of change by actively supporting the whole system of the Union and the Member States in their efforts to strengthen their capacity to improve the prevention and control of communicable diseases.

Within the field of its mission, the ECDC shall:

- search for, collect, collate, evaluate and disseminate relevant scientific and technical data,
- provide scientific opinions and scientific and technical assistance including training,
- provide timely information to the Commission, the Member States, Union agencies and international organisations active within the field of public health,
- coordinate the European networking of bodies operating in the fields within the ECDC's mission, including networks arising from public health activities supported by the Commission and operating the dedicated surveillance networks,
- exchange information, expertise and best practices, and facilitate the development and implementation of joint actions.

This appropriation is also intended to cover operational expenditure relating to the following target areas:

- improving surveillance of communicable diseases in the Member States,
- strengthening the scientific support provided by the Member States and the Commission,
- enhancing the preparedness of the Union against emerging threats from communicable diseases, especially hepatitis B, including threats related to intentional release of biological agents, and diseases of unknown origin, and coordinating the response,
- strengthening the relevant capacity in the Member States through training,
- communicating information and building partnerships.

European Food Safety Authority (EFSA) is the cornerstone of the Union system of risk assessment for food and feed safety. Its scientific advice on existing and emerging risks underpins the policies and decisions of risk managers in the Union institutions and Member States with the objective of protecting consumer health. The Authority's most critical commitment is to provide objective, transparent and independent advice and clear communication grounded in the most up-to-date scientific methodologies, information and data available. The Authority is committed to the core standards of scientific excellence, openness, transparency, independence and responsiveness.

The establishment plan of the Authority, as the outgoing Chair of the Network of Agencies, includes one post to create a position for the Head of the Shared Support Office in Brussels. This is with the aim of promoting efficiency gains and synergies across agencies and with the institutions, so that individual agencies can focus their resources on core tasks. The financing of the post for the Head of the Shared Support Office will be shared between the agencies, which means that no additional funding for the Authority is required in this respect.

*Remarks*

This appropriation is intended to cover the cost of carrying out the Joint Harmonised EU Programme of Business and Consumer Surveys in the Member States and candidate countries. The programme was initiated by a Commission Decision in November 1961 and was modified through subsequent Council and Commission decisions. It was last approved by Commission Decision C(97) 2241 of 15 July 1997 and last presented in the Commission Communication C (2016) 6634 of 20 October 2016.

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases; software; equipment and the part-financing and support of measures relating to:

- fiscal policy including the monitoring of fiscal positions,
- the assessment of transposition and application by the Member States of the Union fiscal governance framework supporting the functioning of the economic and monetary union (EMU),
- economic monitoring, macro and micro-based analysis of the combination of measures and coordination of economic policies,
- the external aspects of the EMU,
- macroeconomic developments in the euro area,
- monitoring structural reforms and improving the operation of markets in the EMU and in the Union,
- coordination with financial institutions and analysis and development of financial markets, and borrowing and lending operations involving Member States,
- the facility providing financial assistance for Member States' balance of payments and the European financial stabilisation mechanism,
- cooperation with economic operators and decision-makers in the abovementioned fields,
- deepening and expanding the EMU,
- purchase of equipment, software development, maintenance and related training for the protection of the euro against counterfeiting.

COMMISSION  
TITLE 06 — RECOVERY AND RESILIENCE

**CHAPTER 06 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS** (*cont'd*)

**06 20 04** (*cont'd*)

06 20 04 01 (*cont'd*)

This appropriation is also intended to cover the funding of priority information measures on Union policies on all aspects of the rules and functioning of EMU, as well as on the benefits of closer policy coordination and structural reforms, and to address information needs of key stakeholders and citizens, in relation to the EMU.

This measure is designed to be an effective channel of communication and dialogue between the citizens of the Union and the Union institutions, and to take account of specific national and regional characteristics, where appropriate in cooperation with the Member State authorities. Emphasis will also be placed on preparing citizens for the introduction of the euro in Member States planning for its introduction.

It includes:

- the development of communication activities at central level (brochures, leaflets, newsletters, website design, development and maintenance, social media, exhibitions, stands, conferences, seminars, audio-visual products, opinion polls, surveys, studies, promotional material, coin design competitions, twinning programmes, training etc.), and similar activities at the national and regional level implemented in cooperation with the Commission's Representations,
- partnership agreements with Member States that wish to provide information about the euro or the EMU,
- cooperation and networking with Member States in the appropriate forums,
- communication initiatives in third countries, in particular to point out the international role of the euro and the value of financial integration.

The Commission, when implementing this article, should take duly into account the outcomes of the meetings of the Interinstitutional Group on Information (IGI).

The implementation of the Commission's communication strategy takes place in close coordination with the Member States and the European Parliament.

The Commission adopts a strategy and an annual work plan drawing on the orientations set out in its Communication of 11 August 2004 (COM(2004)0552) and it reports regularly to the relevant committee of the European Parliament on the implementation of the strategy and on planning for the coming year.

COMMISSION  
TITLE 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES

**CHAPTER 07 01 — SUPPORT ADMINISTRATIVE EXPENDITURE OF THE "INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES" CLUSTER** (cont'd)

*Remarks*

Appropriations under this chapter are intended to cover expenditure of administrative nature directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

**07 01 01 Support expenditure for the European Social Fund Plus (ESF+)**

*Remarks*

Besides the expenditure described at the level of this chapter, this appropriation is also intended to cover expenditure on external personnel at headquarters (contract staff, seconded national experts or agency staff).

Remarks

Appropriations under this chapter are intended to cover expenditure to support Member States to achieve high employment levels, fair social protection and a skilled and resilient workforce ready for the future world of work, as well as expenditure to support, complement and add value to the policies of the Member States to ensure equal opportunities, access to the labour market, fair working conditions, social protection and inclusion.

COMMISSION  
TITLE 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUESCHAPTER 07 02 — EUROPEAN SOCIAL FUND PLUS (ESF+) (*cont'd*)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for programmes financed under the REACT-EU under Titles 05 and 07 for a total amount of EUR 50 620 000 000 in commitments. The amounts indicated in the budget remarks of the relevant budget lines under this title provide information about the expected amount of legal commitments in 2022.

*Remarks*

This appropriation is intended to cover expenditure aiming to reduce the economic, social and territorial disparities, which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring, clean energy transition, digitalisation of the workplace, growing skills and labour shortages and the implications and impact of demographic change, including population ageing, in order to create a more social Europe. This is to be done in line with the principles of the European Pillar of Social Rights.

It will cover the following three categories of regions:

- less developed regions, with a GDP per capita less than 75 % of the average GDP of the Union,
- transition regions, with a GDP per capita between 75 % and 100 % of the average GDP of the Union,
- more developed regions, with a GDP per capita above 100 % of the average GDP of the Union.

Promotion of equality between women and men horizontally and through specific actions should be part of the support provided by the ESF+, in order to increase the participation of women in employment as well as conciliation between working and personal life, and combat the feminisation of poverty and gender discrimination in the labour market and in education and training.

*Remarks*

This appropriation is intended to cover the ESF+-funded technical assistance measures provided for in Article 35 of Regulation (EU) 2021/1060.

Technical assistance may support preparatory measures, monitoring, control, audit, evaluation, communication, including corporate communication on the political priorities of the Union, visibility and all administrative and technical assistance actions necessary for the implementation of the legislation on Union funds.

It may, in particular, be used to cover:

- IT related expenditure, including corporate IT, and related services,
- communication, dissemination and awareness raising expenditure, including corporate communication and events,
- expenditure related to studies, audits and evaluations,
- capacity building activities.

CHAPTER 07 02 — EUROPEAN SOCIAL FUND PLUS (ESF+) (*cont'd*)07 02 04 (*cont'd*)*Remarks*

This appropriation is intended to finance the implementation of the EaSI strand of the ESF+ programme. The general objective of the EaSI strand is to promote employment, equal access to the labour market, education and training, and social inclusion by providing financial support for the Union's objectives.

To achieve the general objectives of promoting a high level of employment, guaranteeing adequate social protection, combating social exclusion and poverty, improving working conditions and protecting workers' safety and health, the EaSI strand is in particular to:

- develop and disseminate high-quality comparative analytical knowledge in order to ensure that related policies are based on sound evidence and are relevant to needs, challenges and local conditions,
- facilitate effective and inclusive information sharing, mutual learning, peer reviews and dialogue on related policies at national, Union and international level in order to assist the design of appropriate policy measures,
- support social experimentations in the related areas and build up the stakeholders' capacity at national and local levels to prepare, design and implement, transfer or upscale the tested social policy innovations, in particular with regard to the scaling up of projects developed by local stakeholders in the field of the socio-economic integration of third-country nationals,
- facilitate the voluntary geographic mobility of workers and increase employment opportunities through developing and providing specific support services to employers and jobseekers with a view to the development of integrated European labour markets, ranging from pre-recruitment preparation to post-placement assistance in order to fill vacancies in certain sectors, professions, countries or border regions, or for particular groups, such as people in vulnerable situations,
- support the development of the market ecosystem around the provision of microfinance to microenterprises in start-up and development phases, in particular those that are created by or employ people in vulnerable situations,
- support networking at Union level and dialogue with and among relevant stakeholders in the related policy areas and contribute to build up the institutional capacity of involved stakeholders, including the public employment services, public social security and health insurance institutions, civil society, microfinance institutions and institutions providing finance to social enterprises and social economy,
- support the development of social enterprises and the emergence of a social investment market, facilitating public and private interactions and the participation of foundations and philanthropic actors in that market,
- provide guidance for the development of social infrastructure needed for the implementation of the European Pillar of Social Rights,
- support transnational cooperation in order to accelerate the transfer, and facilitate the scaling up, of innovative solutions, in particular for the related policy areas,
- support the implementation of relevant international social and labour standards in the context of harnessing globalisation and the external dimension of Union policies in the related policy areas.

TITLE 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES

**CHAPTER 07 03 — ERASMUS+ (cont'd)**

*Remarks*

Appropriations under this chapter are intended to cover Erasmus+: the Union programme for education and training, youth and sport. Its objective is to support the educational, professional and personal development of people in the fields of education and training, youth and sport, in Europe and beyond, thereby contributing to sustainable growth, quality jobs and social cohesion and to strengthening European identity and active citizenship. As such, the Erasmus+ programme is to be a key instrument for building a European education area, supporting the implementation of the European strategic cooperation in the field of education and training, including its underlying sectoral agendas, advancing youth policy cooperation under the 2019-2027 Union Youth Strategy and developing the European dimension in sport. The appropriations include preparing and carrying out activities as part of the European Year of Youth 2022.

The Erasmus+ programme has the following specific objectives:

- to promote the learning mobility of individuals and groups, and cooperation, inclusion and equity, excellence, creativity and innovation at the level of organisations and policies in the field of education and training,
- to promote non-formal and informal learning mobility and active participation among young people, and cooperation, inclusion, creativity and innovation at the level of organisations and policies in the field of youth,
- to promote the learning mobility of sport staff, and cooperation, quality, inclusion, creativity and innovation at the level of sport organisations and sport policies.

The objectives of the Erasmus+ programme are to be pursued through the following three key actions:

- learning mobility (key action 1),
- cooperation among organisations and institutions (key action 2),
- support to policy development and cooperation (key action 3).

The objectives shall also be pursued through Jean Monnet actions.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover the field of education and training of the Erasmus+ programme under indirect management. It shall support the three key actions.

Key action 1: Learning mobility

In the field of education and training, the Erasmus+ programme is to support the following actions: (a) the learning mobility of higher education students and staff; (b) the learning mobility of vocational education and training learners and staff; (c) the learning mobility of school pupils and staff; and (d) the learning mobility of adult education learners and staff.

Learning mobility may be accompanied by virtual learning and measures such as language support, preparatory visits, training and virtual cooperation. Learning mobility may be replaced by virtual learning for those persons who are unable to participate in learning mobility.

Key action 2: Cooperation among organisations and institutions

In the field of education and training, the Erasmus+ programme is to support partnerships for cooperation and exchanges of practices, including small-scale partnerships to foster a wider and more inclusive access to the programme.

Key Action 3: Support to policy development and cooperation

In the field of education and training, the Erasmus+ programme is to support the following actions: (a) the preparation and implementation of the Union general and sectoral policy agendas in education and training, including with the support of the Eurydice network or activities of other relevant organisations; (b) Union tools and measures that foster the quality, transparency and recognition of competences, skills and qualifications; (c) policy dialogue and cooperation with relevant stakeholders, including Union-wide networks, European organisations and international organisations in the field of education and training; (d) measures that contribute to the high-quality and inclusive implementation of the Erasmus+ programme; (e) cooperation with other Union instruments and support to other Union policies; and (f) dissemination and awareness-raising activities about European policy outcomes and priorities and about the Erasmus + programme.

*Remarks*

Appropriations under this chapter are intended to cover European Solidarity Corps activities.

The general objective of the European Solidarity Corps is to enhance the engagement of young people and organisations in accessible and high-quality solidarity activities, primarily volunteering, as a means to strengthen cohesion, solidarity, European identity and active citizenship in the Union and beyond, addressing societal and humanitarian challenges on the ground, with particular focus on the promotion of sustainable development, social inclusion and equal opportunities.

The specific objective of the European Solidarity Corps is to provide young people, including those with fewer opportunities, with easily accessible opportunities for engagement in solidarity activities that induce positive societal changes in the Union and beyond, while improving and properly validating their competences as well as facilitating their continuous engagement as active citizens. The appropriations include preparing and carrying out activities as part of the European Year of Youth 2022.

The objectives of the European Solidarity Corps are to be implemented under the following strands of actions: (a) participation of young people in solidarity activities addressing societal challenges and (b) participation of young people in humanitarian aid related solidarity activities (the European Voluntary Humanitarian Aid Corps).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this Chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This appropriation is intended to cover (1) the participation of young people in solidarity activities addressing societal challenges and (2) their participation in humanitarian aid related solidarity activities. It shall support the following actions:

## 1. Solidarity activities addressing societal challenges.

These actions are in particular to contribute to strengthening cohesion, solidarity, active citizenship and democracy within and outside the Union, while also responding to societal challenges with a particular focus on the promotion of social inclusion and equal opportunities. They take the form of (a) volunteering; (b) solidarity projects; (c) networking activities; and (d) quality and support measures.

## 2. Humanitarian aid related solidarity activities.

These actions are in particular to contribute to providing needs-based humanitarian aid aimed at preserving life, preventing and alleviating human suffering and maintaining human dignity and to strengthening the capacity and resilience of vulnerable or disaster-affected communities. They take the form of (a) volunteering; (b) networking activities; and (c) quality and support measures with particular focus on measures to ensure safety and security of participants.

*Remarks*

Appropriations under this chapter are intended to cover the Creative Europe programme.

The Creative Europe programme aims to safeguard, develop and promote European cultural and linguistic diversity and heritage, and to increase the competitiveness and the economic potential of the cultural and creative sectors, in particular the audiovisual sector.

The Creative Europe programme has the following specific objectives:

- enhancing artistic and cultural cooperation at the European level in order to support the creation of European works and strengthen the economic, social and external dimension of and innovation and mobility in Europe's cultural and creative sectors,
- promoting competitiveness, scalability, operation, innovation and sustainability, including through mobility, in the European audiovisual industry,
- promoting policy cooperation and innovative actions supporting all strands of the Creative Europe programme and promoting a diverse, independent and pluralistic media environment, and media literacy thereby fostering freedom of artistic expression, intercultural dialogue and social inclusion.

The Creative Europe programme is to cover the following strands:

- the Culture strand, which covers cultural and creative sectors with the exception of the audiovisual sector,
- the Media strand, which covers the audiovisual sector,
- the Cross-sectoral strand, which covers actions across all cultural and creative sectors.

*Remarks*

This appropriation is intended to cover the audiovisual sector (the Media strand) within the Creative Europe programme. In line with the objectives of the Creative Europe programme, the Media strand is to have the following priorities: (a) to nurture talent, competence and skills and to stimulate cross-border cooperation, mobility, and innovation in the creation and production of European audiovisual works, thereby encouraging collaboration across Member States with different audiovisual capacities; (b) to enhance the circulation, promotion, online distribution and theatrical distribution of European audiovisual works within the Union and internationally in the new digital environment, including through innovative business models; and (c) to promote European audiovisual works, including heritage works, and to support the engagement and development of audiences of all ages, in particular young audiences, across Europe and beyond.

Those priorities are to be addressed through support for the development, production, promotion, dissemination and access to European works with the objective of reaching diverse audiences within Europe and beyond, thereby adapting to new market developments and accompanying the implementation of Directive 2010/13/EU of the European Parliament and of the Council of 10 March 2010 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the provision of audiovisual media services (Audiovisual Media Services Directive) (OJ L 95, 15.4.2010, p. 1).

The priorities of the Media strand are to take into account the differences across countries regarding audiovisual content production, distribution and access as well as the size and specificities of the respective markets.

*Remarks*

Appropriations under this chapter are intended to contribute to protecting and promoting rights and values as enshrined in the Treaties, the Charter of Fundamental Rights of the European Union and the applicable international human rights conventions, in particular by supporting civil society organisations and other stakeholders active at local, regional, national and transnational level, and by encouraging civic and democratic participation, in order to sustain and further develop open, rights-based, democratic, equal and inclusive societies based on the rule of law.

Within the general objective, the Citizens, Equality, Rights and Values programme has the following specific objectives, which correspond to four strands: to protect and promote Union values (Union values strand); to promote rights, non-discrimination and equality, including gender equality, and to advance gender and non-discrimination mainstreaming; (equality, rights and gender equality strand); to promote citizens engagement and participation in the democratic life of the Union and exchanges between citizens of different Member States, and to raise awareness of their common European history (citizens' engagement and participation strand); and to fight violence, including gender-based violence (Daphne strand).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

*Remarks*

This appropriation is intended to focus on promoting equality and preventing and combating inequalities and discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation and respecting the principle of non-discrimination on the grounds provided for in Article 21 of the Charter of Fundamental Rights of the European Union; supporting, advancing and implementing comprehensive policies relating to women's rights, gender equality, racism and all forms of intolerance, the rights of the child and the rights of persons with disabilities; protecting and promoting Union citizenship rights and the right to the protection of personal data.

Those objectives will be pursued in particular through support to the following activities: awareness raising, mutual learning, analytical and monitoring activities, training, and ICT tools development and maintenance.

This appropriation will also support the European Network of Equality Bodies (Equinet).

*Remarks*

This appropriation is intended to focus on:

- supporting projects aimed at remembering defining events in modern European history, such as the coming to power of authoritarian and totalitarian regimes, including the causes and consequences thereof, and projects aimed at raising awareness among European citizens of their common history, culture, cultural heritage and values, thereby enhancing their understanding of the Union, of its origins, purpose, diversity and achievements and of the importance of mutual understanding and tolerance,
- promoting citizens and representative associations' participation in and contribution to the democratic and civic life of the Union by making known and publicly exchanging their views in all areas of Union action,
- promoting exchanges between citizens of different countries, in particular through town-twinning and networks of towns, so as to afford them practical experience of the richness and diversity of the common heritage of the Union and to make them aware that such richness and diversity constitute the foundation for a common future.

The above specific objectives will be pursued in particular through support to the following activities: town-twinning activities, network of towns and remembrance projects, awareness raising, mutual learning, analytical and monitoring activities, training, ICT tools development and maintenance, and support to civil society organisations.

This appropriation will also contribute to the technical and organisational support of European citizens' initiatives.

*Remarks*

This appropriation is intended to focus on protecting, promoting and raising awareness on rights by providing financial support to civil society organisations which are active at local, regional, national and transnational level in promoting and cultivating those rights, thereby also strengthening the protection and promotion of Union values and the respect for the rule of law and contributing to the construction of a more democratic Union, democratic dialogue, transparency and good governance.

The above specific objective will be pursued in particular through supporting civil society organisations and non-profit stakeholders active in the areas of the Citizens, Equality, Rights and Values programme to increase their capacity to react, to carry out advocacy activities to promote rights, and to ensure adequate access for all citizens to their services, counselling and support activities.

## Remarks

Appropriations under this article are intended to cover the staff of the decentralised agencies and of the European Public Prosecutor's Office (EPPO) and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies and the EPPO are set out in Annex 'Staff' to this section.

The agencies and the EPPO must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

*Remarks*

The European Foundation for the improvement of living and working conditions (Eurofound) delivers and disseminates important knowledge on work-related and social matters to contribute to sound and evidence-based policies in those fields. Its core activity relates to research in the areas of employment, working conditions, industrial relations and quality of life. The activities of Eurofound contribute to the following priorities: increasing labour market participation and combatting unemployment by creating jobs, improving labour market functioning and promoting integration and gender equality, improving working conditions and making work sustainable throughout the life course, developing industrial relations to ensure equitable and productive solutions in a changing policy context, and improving standards of living and promoting social cohesion in the face of economic disparities and social inequalities such as the gender employment gap and the gender pay gap.

Part of this appropriation is intended for studies on working conditions and industrial relations in support of policies ensuring more and better jobs, making work more sustainable and strengthening social dialogue in Europe.

Another part of this appropriation is intended for studies and forward looking research on labour markets, specifically the monitoring and anticipation of structural change, its impact on employment and the management of the consequences.

This appropriation will also cover research and gathering of knowledge on living conditions and quality of life with a particular focus on social policies and the role of public services in improving quality of life. Research into reconciliation of professional and private life and precarious employment, including breaking down by gender, is also covered by this appropriation.

Finally, this appropriation will be used for the analysis of the impact of digitalisation on all of the above described areas and for studies contributing to policies aimed at upward convergence in the Union.

*Remarks*

The European Agency for Safety and Health at Work (EU-OSHA) is committed to making Europe a safer, healthier and more productive place to work. EU-OSHA identifies and assesses new and emerging risks at work, and mainstreams occupational safety and health into other policy areas such as education, public health and research. EU-OSHA raises awareness and disseminates information on the importance of worker's health and safety to governments, employers' and workers' organisations, Union institutions, bodies and networks, and private companies.

EU-OSHA's objective is to provide the Union institutions and bodies, Member States and interested parties with technical, scientific and economic information and qualified expertise in the area of health and safety at work. Special attention will be paid to gender aspects in the area of health and safety at work.

This appropriation is intended to cover the measures necessary to accomplish EU-OSHA's tasks as defined in Regulation (EU) 2019/126, and in particular:

- awareness-building and risk anticipation measures, with special emphasis on small and medium-sized enterprises,
- operation of the European Risk Observatory based on examples of good practice collected from firms or specific branches of activity,
- preparation and provision of relevant tools for smaller enterprises to manage health and safety at work,
- operation of the network comprising the main component elements of the national information networks, including the national social partner's organisations, in accordance with national law or practice, as well as the national focal points,

Remarks

The European Institute for Gender Equality (EIGE) contributes to and strengthens the promotion of gender equality, including gender mainstreaming in all EU policies and the resulting national policies, and the fight against discrimination based on sex, and to raise Union citizens' awareness of gender equality by providing technical assistance to the Union institutions, in particular the Commission, and the authorities of the Member States.

EIGE carries out the following tasks, inter alia:

- collect, analyse and disseminate relevant objective, comparable and reliable information as regards gender equality, including results from research and best practices,
- develop methods to improve the objectivity, comparability and reliability of data at European level by establishing criteria that will improve the consistency of information and take into account gender issues when collecting data,
- develop, analyse, evaluate and disseminate methodological tools in order to support the integration of gender equality into all Union policies and the resulting national policies and to support gender mainstreaming in all Union institutions and bodies,
- organise meetings of experts to support the institute's research work, encourage the exchange of information among researchers and promote the inclusion of a gender perspective in their research,
- raise Union citizens' awareness of gender equality, disseminate information regarding best practices and make documentation resources accessible to the public,
- provide information to the Union Institutions on gender equality and gender mainstreaming in the accession and candidate countries.

*Remarks*

The EPPO is responsible for investigating, prosecuting and bringing to judgment the perpetrators of, and accomplices to, criminal offences affecting the financial interests of the Union which are provided for in Directive (EU) 2017/1371 of the European Parliament and of the Council of 5 July 2017 on the fight against fraud to the Union's financial interests by means of criminal law (OJ L 198, 28.7.2017, p. 29) and determined by Regulation (EU) 2017/1939. In that respect, the EPPO undertakes investigations, and carries out acts of prosecution and exercises the functions of prosecutor in the competent courts of the Member States, until the case has been finally disposed of.

This appropriation is intended in 2022 mostly to cover recruitment and staff related expenditure, buildings (including building security), infrastructure, close protection services for senior EPPO staff and information technology expenditures (Titles 1 and 2). It includes operational expenditure related to the EPPO case management system, the IT exchange platform between the EPPO Central Office, the European Delegated Prosecutors and other judicial and law enforcement authorities in the Member States, which is a key element for the establishment and good functioning of the EPPO, and provisions for the creation of the EPPO data centre, payment of the European Delegated Prosecutors and substantial translation costs for the operational needs of EPPO (Title 3).

*Remarks*

The objective of the European Labour Authority (ELA) is to contribute to ensuring fair labour mobility across the Union and assist Member States and the Commission in the coordination of social security systems within the Union. To this end, ELA is to facilitate access to information on rights and obligations regarding labour mobility across the Union as well as to relevant services; facilitate and enhance cooperation between Member States in the enforcement of relevant Union law across the Union, including facilitating concerted and joint inspections; mediate and facilitate a solution in cases of cross-border disputes between Member States; and support cooperation between Member States in tackling undeclared work.

This appropriation is intended to cover the measures necessary to accomplish the ELA's tasks, in particular:

- facilitate access to information and coordinate the European network of employment services (EURES),
- facilitate cooperation and the exchange of information between Member States with a view to the consistent, efficient and effective application and enforcement of relevant Union law,
- coordinate and support concerted and joint inspections,
- carry out analyses and risk assessments on issues of cross-border labour mobility,
- support Member States with capacity-building regarding the effective application and enforcement of relevant Union law,
- support Member States in tackling undeclared work,
- mediate in disputes between Member States on the application of relevant Union law.

*Remarks*

The objective of this activity is to promote fair geographic and professional mobility (including the coordination of social security schemes) of workers in Europe in order to overcome the obstacles to free movement of workers and to contribute to the establishment of a real labour market at European level.

This appropriation is intended to cover actions supporting the monitoring of Union law through financing of a network of experts on labour mobility, including free movement and posting of workers and social security, reporting regularly on the implementation of Union legal acts in the Member States and at Union level and analysing and evaluating the major trends in Member State legislation with regard to free movement of workers and coordination of social security systems. This appropriation is also intended to cover actions supporting governance of Union legal acts through meetings of committees, actions for awareness raising and implementation and other specific technical support, and the development of relevant digital tools such as the Electronic Exchange of Social Security Information (EESSI) system and their implementation.

This appropriation is intended to cover in particular:

- studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,

- the analysis and evaluation of the major trends in Member State legislation with regard to free movement of workers and coordination of social security systems, as well as the financing of networks of experts in those fields,
- the analysis and research on new policy developments in the domain of free movement of workers linked, for example, to the end of transitional periods and modernisation of social security coordination provisions,
- support for the work of the Administrative Commission for the Coordination of Social Security Systems and its sub-groups and for the follow-up of the decisions taken, as well as support for the work of the Technical and Advisory Committees on free movement of workers,
- support for actions preparing for the application of the new regulations on social security, including transnational exchanges of experience and information and training initiatives developed at national level,
- actions aimed at providing better service and raising public awareness, including measures aimed at identifying migrant workers' social security and employment problems, and measures speeding up and simplifying administrative procedures, gender-sensitive analysis of the barriers to free movement of workers and lack of coordination of social security systems and their impact on people with disabilities, including adaptation of administrative procedures to new information-processing techniques, in order to improve the system for acquiring rights and the calculation and payment of benefits pursuant to Regulations (EEC) No 1408/71, (EEC) No 574/72, (EC) No 859/2003, (EC) No 883/2004, (EC) No 987/2009, and (EU) No 1231/2010 and their future revisions,
- the development of information and actions to make members of the public aware of their rights with respect to free movement of workers and the coordination of social security schemes,
- the support to relevant digital tools such as the electronic exchange of social security information among Member States with a view to facilitating the implementation of Regulation (EC) No 883/2004 and its implementing Regulation (EC) No 987/2009, including the maintenance of the central node of the EESSI system, testing system components, helpdesk activities, support for further development of the system and training.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, shall be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2), points (b), (e) and (f), of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to increase the availability of general information given to citizens on topics concerning Europe and the Union, so as to allow citizens to make full use of their right to be informed about and involved in European policies and to increase the visibility of the work of the Union institutions, the decisions taken and the stages in the building of the Union. It concerns essentially the funding or co-funding of the production or dissemination of multimedia (radio, TV, internet, etc.) information products, including by pan-European media and networks made up of local and national media delivering news on European affairs, as well as the tools necessary to develop a policy in this respect.

This appropriation also covers support expenditure such as studies, meetings, *ex post* controls, expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, evaluation and audit on current or future activities, feasibility studies, publications, and the repayment of travel and related expenses of experts.

Where appropriate, the procurement and grant procedures may include the conclusion of framework partnerships, with a view to promoting a stable financing framework for the pan-European media funded under this appropriation.

*Remarks*

The Commission's executive services are provided to the President and the College of Commissioners in support of the communication activities of the President, College, Spokesperson's Service and Commission senior management by ensuring political and economic intelligence and media advice, and by feeding high quality country specific information and analysis from a variety of sources into the Commission's decision making process. This leads, ultimately, to better informed Union policy making for citizens.

Corporate communication products and services are provided to the external communication service of the Commission and reflect its role as leader in this area, ensuring coherence in the Commission's messaging by aligning all Commission communication services to contribute to a coherent and effective corporate communication on the political priorities. This leads, step by step, to the definition of clearer corporate messages and narratives, to distinctive visual branding and eventually brand recognition, and to economies of scale, thus contributes to achieving a better image for the Commission and the Union.

This appropriation is intended to cover expenditure to corporate communication actions which include costs for the production of content, provision of corporate technical services, dissemination of information through integrated communication actions, organisation of and participation in events, and studies and evaluations, where relevant.

This appropriation is intended to cover expenditure incurred within the Union for online multimedia and written information and other communication tools concerning the Union, for the purpose of providing all citizens with general information on the work of the Union institutions, the decisions taken and the stages in the building of the Union. This is a public service task. Online and other communication tools make it possible to gather citizens' questions or reactions on European topics. These tools are made accessible to people with disabilities, in accordance with Web Accessibility Initiative guidelines.

The main tools concerned are:

- the Europa site, which constitutes the main point of access putting at the disposal of citizens information which they might need in their daily lives and which therefore must be clearly structured, made ever more user-friendly and optimised for mobile devices,
- online press releases, databases and other online communication information systems,

This appropriation is also intended to fund:

- the improvement of the Europa site to optimise the site for mobile devices, to focus it on user needs and to professionalise the use of other online channels like social media, blogs and web 2.0, including all types of training, coaching and consultancy services for various groups of stakeholders,

COMMISSION

- the expenditure relating to hosting and licences costs associated with the Europa site,
- the costs of operation and maintenance of the Commission's social media presence including technical assistance, the purchase of licences for the necessary equipment and material,
- the exchange of best practices, knowledge transfer and professionalisation by financing visits of digital and other communication experts and practitioners,
- IT expenditure for development and maintenance of relevant information and management systems,
- the cost of subscriptions and access to online information sources such as press agencies, online news, information providers and external databases,
- the training and support required for accessing that information,
- evaluation and professionalisation expenditure.

This appropriation is intended to cover Eurobarometer and data analytics. This includes, inter alia, the analysis of trends in public opinion, mainly by means of opinion polls (e.g. general-public 'Eurobarometer' surveys, 'flash' surveys, by telephone, of specific populations on particular subjects, at regional, national or European level, or qualitative surveys), together with quality control of such surveys.

This appropriation also covers measures to improve the Commission's data analytics capacity with a view to fighting against disinformation and against the spreading of fake news.

This appropriation is intended to cover the costs of operating the Commission's television and radio studios and other audiovisual information facilities: staff and the purchase, hire, maintenance and repair of the necessary equipment and material (news coverage, audio-visual production, audio-visual media library etc.).

This appropriation also covers satellite rental to provide information on the Union's activities to television channels. It is to be managed in compliance with the principles of interinstitutional cooperation in order to ensure the dissemination of all information concerning the Union.

This appropriation covers equally qualitative media monitoring and analysis (including monitoring or analysis of social media activities), including the related subscriptions and licences.

This appropriation is also intended to cover general information for citizens on Union activities to increase the visibility of the work of the Union institutions, the decisions taken and the stages in the building of the Union, focusing mainly on the media. The tools developed for better understanding and reporting of topical issues in particular related to the political priorities of the Commission cover mainly:

- multimedia (photo, video, etc.) information material for the media and other platforms, including their publication or broadcasting and central deposit for long-term preservation or dissemination,
- graphic design,

*Remarks*

The Commission Communication's products and services are directly addressed to citizens in all Member States, providing information for and engagement with citizens to ensure that communication services for citizens are made available through simple, clear and understandable messages tailored to their needs, either via a mix of channels and media (traditional and new) or by directly communicating with citizens and stimulating exchange and engagement face to face. Together, this helps citizens to access up-to-date and user-friendly information on Union policies and values. It contributes to citizens' increased awareness and understanding of European affairs and, in turn, stimulate citizens' interest in engaging directly with "the faces of the Commission" be it locally, nationally or Europe-wide.

This appropriation is intended to cover expenditure on corporate communication actions which include costs for the production of content, provision of corporate technical services, dissemination of information through integrated communication actions, organisation of and participation in events, and studies and evaluations, where relevant.

This appropriation is intended to fund general information and communication or engagement activities addressed at citizens and stakeholders in all Member States, mainly incurred by the Commission Representations in the Member States, and covers:

- communication actions linked to specific annual or multiannual political priorities of the Commission, as formulated in the State of the Union Address of the Commission President, the Commission's Work Programme and the Joint Declaration (in the context of implementing the Interinstitutional Agreement of 13 April 2016 between the European Parliament, the Council of the European Union and the European Commission on Better Law-Making (OJ L 123, 12.5.2016, p. 1)), and ad hoc communication actions on a regional, national or international scale that fit in with the political priorities; those communication actions can be organised in partnership with the European Parliament, the European Economic and Social Committee, the Committee of the Regions or the Member States (national, regional and local level) in order to create synergies between the partners and to coordinate their information and communication activities on the Union,
- open door events for citizens from all walks of life,
- dialogues with citizens in the Member States, including in virtual and hybrid formats and covering events in the context of the Conference on the Future of Europe,
- seminars and conferences as well as workshops with more specific target groups, such as young people, applying participatory methods and using modern communication technologies,
- organisation of or participation in European events, exhibitions and public-relations activities, organisation of individual visits, etc.,
- direct communication actions targeting the general public (e.g. citizens' advice services),
- communication activities to fight disinformation,
- direct communication measures targeting stakeholders and opinion multipliers, in particular stepped-up measures involving the regional and national media, which is a major information outlet for a large number of Union citizens,
- management of information centres and multimedia installations for the general public,
- social media outreach in the Member States, including data analytics,
- local support activities for the Europe Direct and other networks supported by the Commission, such as training, coordination, assistance and promotion, which also includes production, storage and distribution of information material and communication products by these outlets as well as for them,
- expenditure on studies, logistical services, technical assistance, in particular for IT including web maintenance, meetings of experts and expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts as well as the repayment of travel and related expenses of persons invited to follow the work of the Commission,

- IT expenditure for development and maintenance of relevant information and management systems,
- the exchange of best practices, knowledge transfer and professionalisation by financing visits of digital communication experts and practitioners,
- information, seminars and support for journalists,
- evaluation and professionalisation expenditure.

Online tools make it possible to gather citizens' questions or reactions on European issues and have become an important tool to engage with citizens. The information covers all the Union institutions. The tools are to be made accessible to people with disabilities, in accordance with Web Accessibility Initiative guidelines.

The main types of tool concerned are:

- the internet sites, multimedia and written products of the Commission Representations in the Member States,
- online press releases, databases and other online communication information systems,
- complementary online channels in Commission Representations, such as local social media, blogs and other web 2.0 technologies,
- related data analytics.

This appropriation also covers the expenditure relating to the production for various target groups of (paper or digital) publications concerning the Union's activities that are often distributed through a decentralised network, mainly:

- the publications of the Commission Representations,
- the dissemination (also through a decentralised network) of specific basic information on the Union (in all the official Union languages) for the general public, coordinated from headquarters, and promotion of the publications.

This appropriation covers also local outreach cooperation between Commission Representation and European Parliament Liaison Offices in the Member States. The Commission manages the expenditure of joint actions and in particular the cost of joint communication projects for the benefit of both the European Parliament and the Commission. The local outreach cooperation of the two institutions must be based on principles jointly agreed by the two institutions and on joint work programmes approved by both Heads of Commission Representations and Heads of European Parliament Liaison Offices. The representatives of both institutions should also compile an annual assessment report on the implementation of joint work programmes.

The appropriation is also intended to support the design, development and up-date of communication content for the Europa Experience projects in the Member States.

This appropriation is intended to fund general information to citizens, mainly incurred at Commission headquarters in Brussels, and covers:

- the financing of the Europe Direct network throughout the Union (Europe Direct Information Centres, European documentation centres, Team Europe speakers); that network supplements the work of the Commission Representations and the European Parliament liaison offices in the Member States,
- support, training, coordination and assistance for the Europe Direct network,
- the financing of production, storage and distribution of information material and communication products by those outlets as well as for them,
- the operation of the Europe Direct Contact Centre (multilingual service centre),
- the financing of citizens' dialogues and similar face to face events or related online platforms in order to promote open dialogue between citizens and the Members of the College of Commissioners or the Commission's senior officials with regular attendance of representatives of other Union institutions and the Member States, in order to improve citizens' knowledge of Union topics and to allow citizens to make their voice heard *vis-à-vis* Union policymakers,
- ad hoc communication actions on a regional, national or international scale that fit in with the communication priorities,
- open door events for citizens from all walks of life,

- expenditure on issuing, in whatever medium, publications on matters of topical importance relating to Commission activities and the work of the Union, as well as the publications provided for in the Treaties and other institutional or reference publications, such as the General Report; the publications may be targeted at specific groups such as the teaching profession, young people, opinion leaders or the general public,
- the expenditure relating to the production for various target groups of written publications concerning the Union's activities that are often distributed through a decentralised network,
- the dissemination (also through a decentralised network) of specific basic information on the Union (in all the official Union languages) for the general public, coordinated from headquarters, and promotion of the publications,
- the IT expenditure for development and maintenance of relevant information and management systems,
- evaluation and professionalisation expenditure.

Communication actions can be organised in partnership with the European Parliament, the European Economic and Social Committee, the Committee of the Regions or the Member States in order to create synergies between these partners and to coordinate their information and communication activities on the Union.

This appropriation could furthermore serve to fund awareness raising and information activities on European Citizens' Initiatives in cooperation with Commission Representations and local Europe Direct Centres in the Member States.

This appropriation is intended to cover the cost of organising visits to the Commission, including administrative expenditure related to the visits. The Commission manages the related logistical arrangements, including operational costs and the organisation of contracted services. This appropriation covers establishing and creating or updating the installations of new information centres.

This appropriation is also intended to support the design, development and up-date of communication content for the Europa Experience projects in the Member States.

*Remarks*

This appropriation is intended to cover expenditure to promote European social dialogue in three main areas, as well as the cost of preliminary consultation meetings with trade union representatives.

Regarding the promotion of European social dialogue, strong and representative social partners are needed in order to improve the process of enhancing the functioning of social dialogue and to enhance competitiveness, resilience and fairness in the social market economy. Measures should help workers' and employers' organisations to address the overarching challenges facing European employment and social policy, as laid down in the Action Plan to implement the European Pillar of Social Rights, and, within the context of Union initiatives to address the consequences of the COVID-19 crisis, support the recovery and the digital and green transitions.

**CHAPTER 07 20 — PILOT PROJECTS, PREPARATORY ACTIONS, PREROGATIVES AND OTHER ACTIONS** (*cont'd*)**07 20 04** (*cont'd*)07 20 04 06 (*cont'd*)

Regarding actions on preliminary consultation meetings between European trade union representatives, the appropriation is intended to cover costs with a view to helping the European trade union representatives form their opinions and harmonise their positions regarding the development of Union policies. Costs are intended to cover in particular studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to economic monitoring, analysis of the combination of measures and coordination of economic policies.

This appropriation is intended to cover expenditure related to the promotion of European social dialogue and related measures, in particular for the following activities:

- studies, consultations, meetings of experts, negotiations, publications and other actions directly linked to the achievement of the objectives of the budget heading and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,
- actions undertaken by social partners to promote social dialogue (including capacity building of social partners in Member States and candidate countries) at cross-industry, sector and company level, including actions undertaken to promote equal participation of women and men in the decision-making bodies of both trade unions and employers' organisations,
- actions to improve knowledge and expertise on industrial relations across the Union and to exchange and disseminate relevant information,
- actions to improve the degree and quality of involvement of workers' and employers' representatives in Union policy- and law-making,
- actions on preliminary consultation meetings between European trade union representatives, notably to cover costs with a view to help them form their opinions and harmonise their positions regarding the development of Union policies, in particular following the COVID-19 crisis.

The appropriation is also intended to cover costs related to the promotion of information, consultation and participation of representatives of enterprises, in particular for the following activities:

- measures aimed at developing employee involvement in enterprises, meaning any mechanism, including information, consultation and participation, through which employees' representatives may exercise an influence on decisions to be taken within the enterprise, in particular by raising awareness and contributing to the application of Union law and policies in this area and the take-up and development of European Works Councils,
- initiatives to strengthen transnational cooperation between workers' and employers' representatives in respect of information, consultation and participation of employees within enterprises operating in more than one Member State and short training actions for negotiators and representatives in transnational information, consultation and participation bodies which may also involve social partners from candidate countries,

*Remarks*

This appropriation is intended to cover expenditure related to support analytical studies in the field of employment and social affairs, and analyses of and studies on the social situation, demography and demographic change and family.

Actions on analyses of and studies on the social situation, demography and demographic change and family aim to promote better policy responses in the Union and the Member States to demographic, employment and social challenges, including to the challenges of the digital and green transitions and the need to ensure just transitions and promote inclusive growth. The appropriation is intended to cover costs for producing and disseminating high quality analyses and comparative information in the context of the Commission's political guidelines and the Union's strategic objectives. This will support the identification of future priorities for employment and social policies, including gender-specific measures and the development of analytical, data and research capacities for assessing, evaluating and monitoring the socio-economic impacts of transitions to a digital, climate-neutral Europe, in particular through the following activities:

- actions promoting the development of comparative analysis and the exchange of views and experience at all relevant levels (regional, national, Union and international) regarding the employment, social and demographic situation and the socio-economic trends in the Union, as well as the gender pay gap and discrimination against women in the workplace,
- actions promoting the forward-looking identification of evidence gaps and socio-economic research and innovation needs,
- actions supporting an observatory of the social situation, the cooperation with respect to relevant activities by the Member States and international organisations, and the management of a technical support group for the European Alliance for Families,
- studies, meetings of experts, dissemination of knowledge, information and publications directly linked to the achievement of the objectives of the strategy or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation is intended to cover in particular expenditure on the reporting referred to in the TFEU, including annual Commission reports on employment and social developments in Europe, biennial reports on demographic change and its implications, (inputs to) reporting on socio-economic impacts of the transition to climate-neutrality and to a digital Europe, and Commission reports on problems concerning the social situation.

This appropriation is also intended to cover expenditure on analysis for the reporting referred to in TFEU, as well as for the dissemination of knowledge on major employment, social and demographic challenges and in particular challenges of the digital and green transitions, and the ways of tackling them.

*Remarks*

This appropriation is intended to cover expenditure on information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from Union action in the framework of the implementation of the Union social dimension. Those measures should help workers' organisations to address the overarching challenges facing European employment and social policy as laid down in the Action Plan to implement the European Pillar of Social Rights and within the context of Union initiatives to address the consequences of the COVID-19 crisis and to support the recovery and the digital and green transitions. Special attention will be given to training on gender challenges at work.

This appropriation is intended to cover in particular the following activities:

- support for the work programmes of the two specific trade union institutes, the European Trade Union Institute and the European Centre for Workers' Questions, which have been established to facilitate capacity building through training and research at European level, as well as to improve the degree of involvement of workers' representatives in European governance,
- information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from the implementation of Union action in the framework of the implementation of the Union social dimension,
- measures involving representatives of the social partners in the candidate countries with the specific purpose of promoting social dialogue at Union level.

This appropriation is also intended to promote equal participation of women and men in the decision-making bodies of workers' organisations.

Strong and competent social partners are needed to improve the process of relaunching and enhancing the functioning of social dialogue in order to support recovery and enhance competitiveness and fairness in the social market economy.

## Remarks

Appropriations under this chapter are intended to cover the financing of the CAP Strategic Plans interventions funded by the European Agricultural Fund for Rural Development (EAFRD) under the programming period 2021-2027, as well as 2014-2020 programmes in accordance with Regulation (EU) No 1305/2013 that are extended to 2021 and 2022 under transitional rules set out by Regulation (EU) 2020/2220. The appropriations may also be used for covering any outstanding payments for EAFRD measures prior to 2014 and for financing technical assistance at the initiative of the Commission within the limit of 0,25 % of the EAFRD envelope.

COMMISSION  
TITLE 08 — AGRICULTURE AND MARITIME POLICY

**CHAPTER 08 03 — EUROPEAN AGRICULTURAL FUND FOR RURAL DEVELOPMENT (EAFRD) (cont'd)**

The EAFRD delivers specific climate and environmental public goods, improves the competitiveness of the agriculture and forestry sectors, and promotes the diversification of economic activity and quality of life and work in rural areas including areas with specific constraints.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the Next Generation EU/European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for this programme under this title for a total amount of EUR 8 070 486 840 in commitments. The amounts indicated in the budget remarks of the relevant budget lines under this title provide information about the expected amount of legal commitments in 2022.

*Remarks*

Appropriations under this chapter are intended to cover expenditure related to the implementation of the common fisheries and maritime policy with a view to:

- fostering sustainable fisheries and the restoration and conservation of aquatic biological resources,

COMMISSION  
TITLE 08 — AGRICULTURE AND MARITIME POLICY

**CHAPTER 08 04 — EUROPEAN MARITIME, FISHERIES AND AQUACULTURE FUND (EMFAF) (cont'd)**

- fostering sustainable aquaculture activities, and processing and marketing of fisheries and aquaculture products, thus contributing to food security in the Union,
- enabling a sustainable blue economy in coastal, island and inland areas, and fostering the development of fishing and aquaculture communities,
- strengthening international ocean governance and enabling safe, secure, clean and sustainably managed seas and oceans.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

COMMISSION  
TITLE 09 — ENVIRONMENT AND CLIMATE ACTION

**CHAPTER 09 01 — SUPPORT ADMINISTRATIVE EXPENDITURE OF THE ‘ENVIRONMENT AND CLIMATE ACTION’ CLUSTER** (*cont’d*)

*Remarks*

Appropriations under this chapter are intended to cover expenditure of administrative nature (such as studies, meetings of experts and information and publications) directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on administrative technical assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

Appropriations under this chapter are intended to cover actions contributing to the shift towards a clean, circular, energy-efficient, low-carbon and climate-resilient economy, including through the transition to clean energy, to the protection and improvement of the quality of the environment and to halting and reversing biodiversity loss, thereby contributing to sustainable development.

The LIFE programme may provide funding in any of the forms laid down in the Financial Regulation, in particular grants, prizes and procurement. It may also provide financing in the form of financial instruments within blending operations, which shall be implemented in accordance with Regulation (EU) 2021/523.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This appropriation is intended to cover the expenditure related to the implementation of the specific sub-programme for nature and biodiversity of the LIFE programme.

It will provide support for the implementation of the EU Biodiversity Strategy and of Council Directive 79/409/EEC of 2 April 1979 on the conservation of wild birds (OJ L 103, 25.4.1979, p. 1) and Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7). Actions will cover both the terrestrial and the marine environment.

It includes:

- the financing of innovative techniques, methods and approaches for reaching the objectives of the Union legislation and policy on nature and biodiversity, and for contributing to the knowledge base and to the application of best practice, including through the support of the Natura 2000 network,
- the development, implementation, monitoring, reporting and enforcement of the relevant Union legislation and policy on nature and biodiversity objectives and tracking the Union's biodiversity-related expenditure, as well as related support. It also includes improving governance at all levels through enhancing capacities of public and private actors and the involvement of civil society in nature and biodiversity related policy development,
- the support of actions intended to catalyse the large-scale deployment of successful solutions/approaches for implementing the relevant Union legislation and policy on nature and biodiversity, by replicating results, integrating related objectives into other policies and into public and private sector practices, mobilising investment and improving access to finance.

*Remarks*

This appropriation is intended to cover the expenditure related to the implementation of the specific sub-programme for circular economy and quality of life of the LIFE programme.

This sub-programme aims to facilitate the transition towards a sustainable, circular, energy-efficient and climate-resilient economy and to protect, restore and improve the quality of the environment.

It supports projects focusing on delivering the European Green Deal. These will be actions related to the shift towards a resource-efficient economy, the management of natural resources, such as air, water and land towards achieving the zero-pollution ambition, the strengthening the implementation of environmental legislation, as well as the promotion of good environmental governance.

It includes:

- the financing of innovative techniques, methods and approaches for reaching the objectives of the Union legislation and policy on environment and to contribute to the knowledge base and to the application of best practices,
- the development, implementation, monitoring and enforcement of the relevant Union legislation and policy on environment, including by improving governance at all levels, in particular through enhancing capacities of public and private actors and the involvement of civil society,

*Remarks*

Appropriations under this chapter are intended to cover support from the public sector loan facility, the third pillar of the Just Transition Mechanism (JTM). It will support public investments, through preferential lending conditions. These investments will benefit the territories most negatively affected by the climate transition as identified in the territorial just transition plans for the purposes of the Just Transition Fund (JTF).

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2021/1229, it is envisaged to finance the total amount of the grant component mainly with assigned revenue and partly with appropriations programmed under the Multiannual Financial Framework (MFF) 2021-2027. The assigned revenue foreseen would stem from the estimated surpluses of the provisioning of the European Fund for Strategic Investments (EFSI) after its constitution phase, ending in 2022. Lastly, the public sector loan facility will be financed by assigned revenue from the repayments from financial instruments established by the programmes indicated in Annex I to Regulation (EU) 2021/1229.

*Remarks*

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies are set out in Annex 'Staff' to this section.

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and the Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This appropriation is intended to cover actions contributing to an efficient management of migration flows in line with the relevant Union *acquis* and in compliance with the Union's commitments on fundamental rights.

In particular, the Asylum, and Migration and Integration Fund is to contribute to strengthening and developing all aspects of the Common European Asylum System, including its external dimension; to supporting legal migration to the Member States including to the integration of third-country nationals; and finally to countering irregular migration and ensuring effectiveness of return to and readmission in third countries.

The Fund will promote common measures in the area of asylum, including Member States' efforts in receiving persons in need of international protection through resettlement and the transfer of applicants for or beneficiaries of international protection between Member States, supporting integration strategies and a more effective legal migration policy, so as to ensure the Union's long-term competitiveness and the future of its social model and reduce incentives for irregular migration through a sustainable return and readmission policy. The Fund will support the strengthening of cooperation with third countries to reinforce the management of flows of persons applying for asylum or other forms of international protection and avenues of legal migration and to counter irregular migration and ensure sustainability of return to and effective readmission in third countries.

*Remarks*

The European Union Agency for Asylum (EUAA), which replaces and succeeds the European Asylum Support Office (EASO) from 19 January 2022, acts as a centre of expertise on asylum and contributes to the development of the Common European Asylum System by facilitating, coordinating and strengthening practical cooperation among Member States on the many aspects of asylum. EUAA also helps Member States fulfil their European and international obligations to give protection to people in need, and it provides operational support to Member States with specific needs and to Member States whose asylum and reception systems are under particular pressure. Furthermore, EUAA provides evidence-based input to Union policymaking and legislation in all areas having a direct or indirect impact on asylum.

*Remarks*

This appropriation is intended to ensure strong and effective European integrated border management at the external borders while safeguarding the free movement of persons within them, in full compliance with the Union's commitments on fundamental rights, thereby contributing to guaranteeing a high level of security in the Union.

More specifically, the instrument for financial support for border management and visa ('the Instrument') should contribute to supporting effective European integrated border management at the external borders implemented by the European Border and Coast Guard as a shared responsibility of the European Border and Coast Guard Agency and of the national authorities responsible for border management, to facilitate legitimate border crossings, to prevent and detect illegal immigration and cross-border crime and to effectively manage migratory flows, as well as to supporting the common visa policy to facilitate legitimate travel and prevent migratory and security risks.

The Instrument will promote the implementation of European integrated border management defined by its components in accordance with Article 3 of Regulation (EU) 2019/1896 of the European Parliament and of the Council of 13 November 2019 on the European Border and Coast Guard and repealing Regulations (EU) No 1052/2013 and (EU) 2016/1624 (OJ L 295, 14.11.2019, p. 1): border control, search and rescue during border surveillance, risk analysis, cooperation between Member States (supported and coordinated by the European Border and Coast Guard Agency). The Instrument will also promote inter-agency cooperation, cooperation with third countries, technical and operational measures within the Schengen area related to border control and designed to address illegal immigration and to counter cross-border crime better and use of state-of-the-art technology, quality control and solidarity mechanisms. Furthermore, the Instrument will contribute to the improvement of the efficiency of visa processing in terms of detecting and assessing security and irregular migration risks, as well as facilitating visa procedures for *bona fide* travellers. The Instrument will support digitalisation of visa processing with the objective of providing fast, secure and client-friendly visa procedures for the benefit of both visa applicants and consulates.

*Remarks*

Appropriations under this chapter are intended to cover the financial support for customs control equipment ('the Instrument') to support the customs union and customs authorities to protect the financial and economic interests of the Union and its Member States, to ensure security and safety within the Union and to protect the Union from unfair and illegal trade while facilitating legitimate business activity. The Instrument for financial support for customs control equipment contributes to adequate and equivalent customs controls through the purchase, maintenance and upgrade of relevant, state-of-the-art and reliable customs control equipment.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

This appropriation is intended to support the purchase, maintenance and upgrade of customs controls equipment that has one or more of the following customs control purposes:

- non-intrusive inspection,
- indication of hidden objects on humans,
- radiation detection and nuclide identification,
- analysis of samples in laboratories,
- sampling and field analysis of samples,
- handheld search.

The Instrument for financial support for customs control equipment ('the Instrument') may also cover the purchase, maintenance and upgrade of customs controls equipment for testing new pieces or new functionalities in operational conditions. The Instrument may also cover expenses for preparation, monitoring, control, audit, evaluation and other activities for managing the Instrument and evaluating the achievement of its objectives.

It may moreover cover expenses relating to the studies, meetings of experts, information and communication actions, in so far as they are related to the objectives of the Instrument, as well as expenses linked to information technology networks focusing on information processing and exchange, including corporate information technology tools and other technical and administrative assistance needed in connection with the management of the Instrument.

Remarks

Appropriations under this chapter are intended to cover the decentralised agencies' staff and administrative expenditure (Titles 1 and 2) and, where applicable, operational expenditure relating to the work programme (Title 3).

The establishment plans of the agencies are set out in Annex 'Staff' to this section.

The agencies must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1) and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This appropriation is intended contribute to ensuring a high level of security in the Union, in particular by tackling terrorism and radicalisation, serious and organised crime and cybercrime and by assisting and protecting victims of crime.

In particular, the Internal Security Fund (ISF) aims to increase the exchange of information among and within the Union law enforcement and other competent authorities and other relevant Union bodies as well as with third countries and international organisations; to intensify cross-border joint operations among and within the Union law enforcement and other competent authorities in relation to serious and organised crime with a cross-border dimension; and to support effort to strengthen the capabilities in relation to combatting and preventing crime including terrorism in particular through increased cooperation between public authorities, civil society and private partners across the Member States.

The ISF should in particular support police and judicial cooperation and prevention in the fields of serious and organised crime, illicit arms trafficking, corruption, money laundering, drug trafficking, environmental crime, exchange of and access to information, terrorism, trafficking in human beings, exploitation of illegal immigration, child sexual exploitation, distribution of child abuse images and child pornography, and cybercrime. The ISF should also support the protection of people, public spaces and critical infrastructure against security-related incidents and the effective management of security-related risks and crises, including through the development of common policies (strategies, policy cycles, programmes and action plans), legislation and practical cooperation.

*Remarks*

Appropriations under this chapter are intended to cover the provision of funding for assisting Lithuania with the decommissioning of the Ignalina nuclear power plant, with specific emphasis on managing the radiological safety challenges, whilst ensuring broad dissemination to all Member States of knowledge thereby generated on nuclear decommissioning.

The appropriations should in particular cover the dismantling and decontamination of the Ignalina equipment and reactor shafts in accordance with the decommissioning plan, while ensuring the safe management of the decommissioning and legacy waste and disseminating the generated knowledge among Union stakeholders.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This appropriation is intended to support the financing of the decommissioning of the Ignalina (Lithuania) nuclear power plant.

The financial allocation for the Ignalina programme may also cover expenses related to the technical and administrative assistance for the implementation of the programme, such as preparatory, monitoring, control, audit and evaluation activities including corporate information technology systems, studies, expert meetings, information and communication actions (including corporate communication of the political priorities of the Union as far as they are related to the general objectives of Regulation (EU) 2021/101).

The financial allocation for the Ignalina programme may also cover the expenses of technical and administrative assistance necessary to ensure the transition between that programme and the measures adopted under Council Regulation (EC) No 1990/2006 of 21 December 2006 on the implementation of Protocol No 4 on the Ignalina nuclear power plant in Lithuania to the Act of Accession of the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia 'Ignalina Programme' (OJ L 411, 30.12.2006, p. 10) and Council Regulation (EU) No 1369/2013 of 13 December 2013 on Union support for the nuclear decommissioning assistance programme in Lithuania, and repealing Regulation (EC) No 1990/2006 (OJ L 346, 20.12.2013, p. 7).

At the end of each year, the Commission shall elaborate a progress report on the implementation of the work carried out in the previous years and present it to the European Parliament and to the Council.

*Remarks*

Appropriations under this chapter are intended to cover the provision of funding for decommissioning of nuclear facilities and management of radioactive waste, in line with the identified needs. For the period of 2021-2027, the appropriations should in particular cover:

- the assistance to Bulgaria and Slovakia in implementing the Kozloduy programme and the Bohunice programme, including management and storage of radioactive waste in line with the identified needs of the respective decommissioning plan, with specific emphasis on managing the safety challenges thereof,
- and the support to the decommissioning and radioactive waste management programme of the Joint Research Centre.

The programme established by Regulation (Euratom) 2021/100 will create knowledge in the nuclear decommissioning process and in the radioactive waste management resulting from the decommissioning activities.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

*Remarks*

This appropriation is intended to cover the activities carried out by the Joint Research Centre (JRC) to implement its Decommissioning and Waste Management Programme (2021-2027). Actions under this programme shall have the following specific objectives:

- to support the decommissioning plan and to carry out the activities in accordance with the national law of the host Member State for the dismantling and decontamination of the Commission's own nuclear installations at the JRC sites,
- safe management of associated radioactive waste,
- when appropriate, to prepare the optional transfer of the related nuclear liabilities from the JRC to the host Member States; such transfer shall not be imposed to any host Member State and shall be subject to mutual bilateral agreement between the Commission and the host Member States; this mutual bilateral agreement shall provide that all costs of the decommissioning of the Commission's own nuclear installations at the JRC sites and storage of the associated radioactive waste are paid by the Union and shall fully comply with Council Directive 2011/70/Euratom of 19 July 2011 establishing a Community framework for the responsible and safe management of spent fuel and radioactive waste (OJ L 199, 2.8.2011, p. 48),
- to develop ties and exchanges among Union stakeholders on nuclear decommissioning, with a view to ensure dissemination of knowledge and return of experience in all relevant areas such as research and innovation, regulation, training and to develop potential Union synergies.

It covers specific expenditure related to the activities of the JRC Decommissioning and Waste Management Programme, including the purchase of technical equipment, subcontracting of scientific and technical services, access to information and acquisition of consumables. This includes expenditure on technical infrastructure directly incurred for the activities concerned, as well as expenses for workshops and meetings in order to gather and disseminate knowledge and experience.

This appropriation is also intended to finance operations undertaken by the Commission on the basis of the powers conferred on it by Article 8 of the Euratom Treaty in accordance with the Interinstitutional Agreement of 16 December 2020 between the European Parliament, the Council of the European Union and the European Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources (OJ L 433I, 22.12.2020, p. 28).

The European Union Agency for Law Enforcement Training (CEPOL) is an agency of the Union dedicated to develop, implement and coordinate training for law enforcement officials. CEPOL contributes to a safer Europe by facilitating cooperation and knowledge sharing among law enforcement officials of the Member States, and to some extent from third countries, on issues stemming from Union priorities in the field of security; in particular, from the EU Policy Cycle on serious and organised crime. CEPOL brings together a network of training institutes for law enforcement officials in Member States and supports them in providing frontline training on security priorities, law enforcement cooperation and information exchange. CEPOL also works with Union bodies, international organisations and third countries to ensure that the most serious security threats are tackled with a collective response.

*Remarks*

The European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) provides the Union and Member States with a factual overview of European drug problems and a solid evidence base to support the drugs debate. It offers policymakers the data they need for drawing up informed drug laws and strategies. It also helps professionals and practitioners working in the field pinpoint best practice and new areas of research. While the EMCDDA is primarily European in focus, it also works with partners in other world regions, exchanging information and expertise. Collaboration with European and international organisations in the drugs field is also central to its work as a means of enhancing understanding of the global drugs phenomenon.

*Remarks*

This appropriation is intended to cover:

- expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the common policy on nuclear safety and security and of the rules and measures in the field of radiation protection,
- expenditure on measures and actions relating to monitoring and protection against the effects of ionising radiation and aimed at ensuring the health protection of the population and the protection of the environment against the dangers of radiation and radioactive substances; these actions relate to specific tasks provided for under the Euratom Treaty,
- expenditure related to verifying the operation and efficiency of systems to monitor the level of radioactivity in the air, water and soil and to ensure compliance with the basic standards in the Member States (Article 35 of the Euratom Treaty); this expenditure includes, in addition to subsistence allowances and travel (mission) expenses, costs for training, for preparatory meetings and for purchases of equipment to be used for inspections,
- expenditure linked to the implementation of the Commission's tasks referred to in point 31 of the European Council conclusions of 24 and 25 March 2011.

This appropriation may also cover expenditure on information and publications directly linked to the achievement of the objectives coming under this item.

*Remarks*

Appropriations under this chapter are intended to cover expenditure of operational nature, such as cooperative projects, directly linked to the achievement of the objectives of the European Defence Fund (EDF) and its predecessor, the European Defence Industrial Development Programme (EDIDP).

In particular, appropriations under this chapter will support the development of actions – understood as the development phase of new products and technologies or the upgrading of existing ones – in the field of defence. The ultimate goal of both EDF and EDIDP is to foster the competitiveness and innovativeness of the European defence technological and industrial base and reach a greater interoperability between Member States' capabilities, thereby contributing to the Union's strategic autonomy.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

Remarks

This appropriation is intended to cover the funding envisaged under EDF for collaborative development projects of defence products and technologies consistent with defence capability priorities commonly agreed by Member States within the framework of the Common Foreign and Security Policy, thus contributing to greater efficiency of defence spending within the Union, achieving greater economies of scale, reducing the risk of unnecessary duplication and as such reducing the fragmentation of defence products and technologies throughout the Union.

The EDF provides support for actions covering both new and upgrade of existing products and technologies where the use of pre-existing information needed to perform the upgrade is not subject, directly or indirectly to a restriction by non-associated third countries or non-associated third country entities. Eligible actions shall relate to one or more of the following activities:

- activities aiming to create, underpin and improve knowledge, products and technologies, including disruptive technologies, which can achieve significant effects in the area of defence,
- activities aiming to increase interoperability and resilience, including secured production and exchange of data, to master critical defence technologies, to strengthen the security of supply or to enable the effective exploitation of results for defence products and technologies,
- studies, such as feasibility studies to explore the feasibility of new or improved technologies, products, processes, services and solutions,
- the design of a defence product, tangible or intangible component or technology as well as the definition of the technical specifications on which such design has been developed which may include partial tests for risk reduction in an industrial or representative environment,
- the development of a model of a defence product, tangible or intangible component or technology, which can demonstrate the element's performance in an operational environment (system prototype),
- the testing of a defence product, tangible or intangible component or technology,
- the qualification of a defence product, tangible or intangible component or technology,

- the certification of a defence product, tangible or intangible component or technology,
- the development of technologies or assets increasing efficiency across the life cycle of defence products and technologies.

This appropriation may also cover the expenditure linked to the work of independent experts appointed by the Commission to assist in the evaluation of proposals and to advise on or assist with the monitoring of the implementation of actions carried out. Furthermore, this appropriation may be used to fund the organisation of dissemination activities, match-making events and awareness-raising activities, in particular with a view to opening up supply chains to foster the cross-border participation of SMEs.

*Remarks*

Appropriations under this chapter are intended to cover expenditure of an operational nature, such as collaborative research projects, research activities in disruptive defence technologies and support actions in the defence research sector.

The objective of the European Defence Fund (EDF) for the research window is to support collaborative research that could significantly boost the performance of future defence capabilities throughout the Union, aiming at maximising innovation and introducing new defence products and technologies, including disruptive ones, and the most efficient use of defence research spending in Europe.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

*Remarks*

Appropriations under this chapter are intended to cover operational expenditure related to actions carried out under a Regulation of the European Parliament and of the Council establishing the Neighbourhood, Development and International Cooperation Instrument – Global Europe (NDICI – Global Europe) whose general objective is to uphold and promote the Union's values and interests worldwide in order to pursue the objectives and principles of the Union's external action, as laid down in Article 3(5) and Articles 8 and 21 TEU.

In accordance with that general objective, the specific objectives of the NDICI — Global Europe are the following:

(a) to support and foster dialogue and cooperation with third countries and regions in the Neighbourhood, in Sub-Saharan Africa, in Asia and the Pacific, and in the Americas and the Caribbean;

(b) at global level, to protect, promote and advance democracy, rule of law and human rights, including gender equality, support civil society organisations, further stability and peace and address other global challenges including migration and mobility;

COMMISSION  
TITLE 14 — EXTERNAL ACTION

**CHAPTER 14 02 — NEIGHBOURHOOD, DEVELOPMENT AND INTERNATIONAL COOPERATION INSTRUMENT — GLOBAL EUROPE (NDICI — GLOBAL EUROPE) (cont'd)**

(c) to respond rapidly to: situations of crisis, instability and conflict; resilience challenges and linking of humanitarian aid and development action; and foreign policy needs and priorities.

At least 93% of the expenditure from the NDICI — Global Europe shall fulfil the criteria for official development assistance, established by the Development Assistance Committee of the Organisation for Economic Cooperation and Development.

Moreover, actions under the NDICI — Global Europe are expected to contribute 30 % of its overall financial envelope to climate objectives and 10 % to addressing the root causes of irregular migration and forced displacement and to supporting migration management and governance.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

Appropriations under this chapter are intended to cover operational expenditure concerning humanitarian aid, disaster prevention, disaster risk reduction, and preparedness in third countries.

The aid is granted to victims without discrimination or adverse distinction on the grounds of race, ethnic origin, religion, disability, sex, age, nationality or political affiliation. That aid is provided in accordance with international humanitarian law and should not be subject to restrictions imposed by other partner donors, as long as it is necessary to meet the humanitarian needs to which such situations give rise.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

COMMISSION  
TITLE 14 — EXTERNAL ACTION

**CHAPTER 14 03 — HUMANITARIAN AID** (*cont'd*)

**14 03 01** (*cont'd*)

*Remarks*

This appropriation is intended to cover the financing of humanitarian and food assistance operations of a humanitarian nature to help people in third countries who are the victims of conflicts or disasters, both natural and man-made (wars, outbreaks of fighting, etc.), or comparable emergencies, for as long as is necessary to meet the humanitarian needs that such situations give rise to.

This appropriation is also intended to cover the purchase and delivery of any product or equipment needed for the implementation of humanitarian aid operations, including the building of homes or shelters for affected groups of people, short-term rehabilitation and reconstruction work, particularly of infrastructure and facilities, the costs associated with external, expatriate or local staff, storage, international or national shipment, logistic support and distribution of relief and any other action aimed at facilitating freedom of access to the recipients of the aid.

This appropriation may also cover any other costs directly linked to the implementation of humanitarian aid operations, such as technical assistance within the requisite timescale and in a way which meets the needs of the recipients, satisfies the requirement to achieve the greatest possible degree of cost-effectiveness and provides greater transparency.

*Remarks*

This appropriation is intended to cover the financing of operations at country, regional and global levels to prepare the response for and mitigate the impact of disasters caused by rapid and slow on-set natural hazards (such as floods, cyclones, earthquakes, drought, sea level rise) or comparable emergencies caused by other threats (such as violence, conflict, industrial hazards, health related hazards, including epidemics). This appropriation is meant to ensure the development of relevant preparedness measures, such as early warning systems, purchase and transport of equipment (if required), contingency plans, and capacity building of national and local stakeholders.

**CHAPTER 14 03 — HUMANITARIAN AID** (*cont'd*)**14 03 02** (*cont'd*)

This appropriation may also cover any other costs directly linked to the implementation of preparedness operations, such as:

- the financing of scientific studies generating data and knowledge supporting better preparedness,
- the constitution of emergency stocks of goods and equipment for use in connection with humanitarian aid operations,
- the technical assistance necessary for the preparation and implementation of disaster preparedness projects, in particular expenditure incurred covering the cost of contracts of individual experts in the field and the infrastructure and logistics costs, covered by imprest accounts and expenditure authorisations, of the Directorate-General for Humanitarian Aid and Civil Protection units deployed throughout the world.

This appropriation is intended to provide funds for comprehensive Union actions to limit and manage impacts of climate change on vulnerable populations in developing countries, including displaced persons in the context of disasters and climate change.

Remarks

In accordance with Article 58(2), point (c), of the Financial Regulation, this appropriation is intended to finance expenditure related to preparatory measures in the field of Title V TEU to establish the conditions for Union actions in the field of the CFSP and the adoption of the necessary legal instruments. It may cover evaluation and analysis measures (*ex ante* evaluation of means, specific studies, organisation of meetings, fact-finding on the ground). In the field of Union crisis management operations and for EUSRs, in particular, preparatory measures may, inter alia, serve to assess the operational requirements for an envisaged action, to provide for a rapid initial deployment of personnel and resources (e.g. mission expenses, purchase of equipment, pre-financing of running and insurance costs in the start-up phase), or to take the necessary measures on the ground to prepare for the launching of the operation. It may also cover experts supporting Union crisis management operations on specific technical issues (e.g. identification and assessment of procurement needs) or security training for staff to be deployed to a CFSP mission/EUSR team.

Legal basis

Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

*Remarks*

This appropriation is intended to cover all the expenditure connected with the appointment of European Union Special Representatives (EUSRs) in accordance with Article 33 TEU.

EUSRs should be appointed with due regard for gender equality and gender mainstreaming policies, and the appointment of women EUSRs should therefore be promoted.

This appropriation covers expenditure on the salaries of EUSRs and on setting up their teams and/or support structures, including staff costs other than those relating to staff seconded by Member States or Union institutions. It also covers the costs of any projects implemented under the direct responsibility of an EUSR.

Remarks

Appropriations under this chapter are intended to cover operational expenditure related to actions carried out under Decision (EU) 2021/1764. Its general objective is to promote the economic and social development of the OCTs and to establish close economic relations between them and the Union as a whole. The association shall pursue this general objective by enhancing the OCTs' competitiveness, strengthening the OCTs' resilience, reducing their economic and environmental vulnerability and the promotion of cooperation between them and other partners.

In accordance with Article 3(5) and Article 21 TEU, the specific objectives of the association are the following:

- to foster and support cooperation with OCTs,
- to support and to cooperate with Greenland in addressing its major challenges as the raising of education level and to contribute to the capacity of the administration of Greenland to formulate and implement national policies.

Moreover, actions under Decision (EU) 2021/1764 are expected to contribute 30% of its overall financial envelope to climate objectives.

**CHAPTER 14 05 — OVERSEAS COUNTRIES AND TERRITORIES** (*cont'd*)

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

Appropriations under this chapter are intended to cover operational expenditure related to actions carried out under a Council Regulation establishing a European Instrument for International Nuclear Safety Cooperation (INSC) complementing the Neighbourhood, Development and International Cooperation Instrument — Global Europe on the basis of the Euratom Treaty whose general objective is to complement those nuclear cooperation activities that are financed under the NDICI — Global Europe, in particular in order to support the promotion of a high level of nuclear safety, radiation protection, and the application of effective and efficient safeguards of nuclear materials in third countries, building on the activities within the Community and in accordance with Regulation (Euratom) 2021/948.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

Macro-financial assistance (MFA) is a form of financial aid extended by the Union to partner countries experiencing a balance of payments crisis. MFA is designed for countries geographically, economically and politically close to the Union. These include candidate and potential candidate countries, countries covered by the European Neighbourhood Policy and, in certain circumstances, other third countries. In principle, MFA is only available to countries benefiting from an International Monetary Fund programme.

MFA is exceptional in nature and is mobilised on a case-by-case basis to help countries dealing with serious balance-of-payments difficulties. Its objective is to restore a sustainable external financial situation, while encouraging economic adjustments and structural reforms.

While MFA can take the form of medium/long-term loans or grants, or a combination of these, this article only covers the grant element of MFA operations.

Appropriations under this article will also be used to cover costs incurred in relation to MFA operations, and in particular: (i) costs incurred to conduct operational assessments in the beneficiary countries to obtain reasonable assurances on the functioning of administrative procedures and financial circuits, (ii) costs related to the implementation of the 'Better Regulation' guidelines, in particular for ex-post evaluations of MFA operations, and (iii) costs to cover comitology requirements.

The Commission will inform the European Parliament and the Council regularly of the macro-financial situation of the beneficiary countries and will report extensively on the implementation of MFA on a yearly basis.

*Remarks*

This article constitutes the structure for the External Action Guarantee provided by the Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default on a loan granted under this guarantee or the preceding budgetary guarantees.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 14 of Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39) applies.

A specific annex to this part of the statement of expenditure in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

This appropriation finances communication, information and outreach measures, systems and networks designed to project a strong, united voice for Europe in the world. The actions under this appropriation will strengthen the Union's capacity to promote its values and interests globally, enhance awareness of the Union's global role and, in that context, draw attention to the scale, ambition and impact of its common foreign and security policy, external relations, international cooperation and partnerships, neighbourhood, enlargement, conflict prevention and humanitarian policies and programmes. They will be based on a coordinated approach, linking the internal and external aspects of Union policies.

The communication, information and outreach measures concerned may address the general public or specific target audiences or stakeholder groups in the Member States or in third countries. They may be implemented directly by the Union centrally or at decentralised level in its delegations and offices in third countries, or in collaboration with public and private sector partners, service providers, international organisations and other stakeholders.

The communication, information and outreach measures financed by this appropriation include the design and implementation of:

- public diplomacy actions,
- strategic communication, including measures to counter global disinformation through the systematic tracking and exposing of disinformation spread by state and other actors,
- (integrated) campaigns, events and other communication, information and outreach actions,
- the EU Visitors programme managed jointly by the Commission and the European Parliament and other visitors' and networks and exchange programmes for media professionals and other stakeholders,
- information actions on Union citizens' rights following the United Kingdom's withdrawal from the Union.

Activities carried out in realising these measures include the (co-)production, procurement, distribution, organization and/or management of:

- briefings and information packs, study visits, press trips, for media professionals and other stakeholders,
- printed, audio-visual and electronic content,
- traditional, online and social media publications,
- media monitoring,

This appropriation is intended to cover coordination measures under the Union's development cooperation and humanitarian aid per the specific powers conferred to the Commission in Article 210 and Article 214(6) TFEU.

Pursuant to Article 210 TFEU, the Union and the Member States are to coordinate their policies on development cooperation at Union and international level and shall consult each other on their aid programmes, including in international organisations and during international conferences. They may undertake joint action. Member States shall contribute if necessary to the implementation of Union aid programmes. The Commission is allowed to take any useful initiative to promote this coordination.

Pursuant to Article 214(6) TFEU, the Commission is allowed to take any useful initiative to promote coordination between actions of the Union and those of the Member States, in order to enhance the efficiency and complementarity of Union and national humanitarian aid measures.

The measures covered by this appropriation are intended to provide the Commission with the means of support it needs to prepare, formulate and follow up coordination activities under its development policy and humanitarian aid at Union and international level.

Actions covered by this item will be:

- effectiveness, efficiency, relevance, impact and viability studies in the area of coordination,
- analyses, technical assistance, methodological support, monitoring and coordination activities in the priority areas of development policy (including budget support, public finance management and domestic revenue mobilisation), aid and development effectiveness (including joint programming/joint implementation and transparency), financing for development and sustainable finance, humanitarian aid, bilateral and multilateral partnerships,
- meetings of experts, organisation of events, dialogues and exchanges between the Commission, Member States, international organisations (UN, international financial institutions, etc.) and other international actors, including preparation of and participation to international fora such as the Global Partnership for Effective Development Cooperation or those under the policy stream financing for development and humanitarian aid, means of implementation, Agenda 2030 and new Consensus on Development and Humanitarian Aid,
- measures to support external initiatives in the sphere of coordination (including dissemination of information and development of information systems),
- the Commission's membership fees and contributions to relevant coordinating organisations and networks,
- IT-related expenditure including corporate information technology.

## Remarks

Appropriations under this chapter are intended to cover operational expenditure related to actions carried out under Regulation (EU) 2021/1529 (IPA III), whose general objective will be to support its beneficiaries in adopting and implementing the political, institutional, legal, administrative, social and economic reforms required by those beneficiaries to comply with Union values and to progressively align to Union rules, standards, policies and practices with a view to Union membership, thereby contributing to their stability, security and prosperity.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

*Remarks*

This article is intended to enter appropriations resulting from the mobilisation of the European Globalisation Adjustment Fund for Displaced Workers (EGF) in accordance with Regulation (EU) 2021/691.

The objective of the EGF is to demonstrate solidarity and promote decent and sustainable employment in the Union by offering assistance to workers dismissed because of major restructuring events. Those events can result in particular from globalisation-related challenges, such as changes in world trade patterns, trade disputes, significant changes in the trade relations of the Union or the composition of the internal market and financial or economic crises, the transition to a low-carbon economy, digitisation or automation. The EGF thereby supports displaced workers in returning to decent and sustainable employment as soon as possible. Particular emphasis is placed on measures that help the most disadvantaged groups.

As such, the EGF contributes to the implementation of the principles defined under the European Pillar of Social Rights and the enhancement of social and economic cohesion among regions and Member States.

The actions undertaken by the EGF should be complementary to those of the ESF+ and there must be no double funding from those instruments. EGF-supported actions or measures should aim to ensure that the largest possible number of beneficiaries participating in those actions find sustainable employment as soon as possible.

**CHAPTER 16 04 — EUROPEAN UNION GUARANTEE FOR BORROWING-AND-LENDING OPERATIONS FOR MEMBER STATES** (*cont'd*)

*Remarks*

The budget lines included in this chapter mainly constitute the structure for the various guarantees provided by the Union in the framework of financial assistance instruments or mechanisms to Member States. They will enable the Commission to service the debt should one of them default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 14 of Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39) applies.

A specific annex in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

*Remarks*

In accordance with Article 143 TFEU, the Union offers assistance to Member States outside the euro area that are experiencing or threatened by difficulties regarding their balance of payments. That assistance takes the form of medium-term loans that are conditional on the implementation of policies designed to address underlying economic problems. Typically, balance-of-payments assistance from the Union is offered in cooperation with the International Monetary Fund (IMF) and other international institutions or countries.

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

*Remarks*

In accordance with Article 122(2) TFEU, the European Financial Stabilisation Mechanism (EFSM) was created for the Commission to provide financial assistance to Member States experiencing or threatened by severe financial difficulties caused by exceptional occurrences beyond its control, using bonds issued on behalf of the Union on the capital markets or borrowings from financial institutions. The EFSM was set up by and for euro area Member States.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under this stabilisation mechanism is to be limited to the margin available under the Union's own resources for payment appropriations.

*Remarks*

In accordance with Article 122 TFEU, the temporary support to mitigate unemployment risks in an emergency (SURE) is available to Member States that need to mobilise significant financial means to fight the negative economic and social consequences of the COVID-19 outbreak on their territory. It provides financial assistance to Member States to address sudden increases in public expenditure for the preservation of employment. Specifically, SURE is to act as a second line of defence, supporting short-time work schemes and similar measures, to help Member States protect jobs and thus employees and self-employed persons against the risk of unemployment and loss of income.

SURE allows for a financial assistance up to EUR 100 000 000 000 in the form of loans from the Union to affected Member States.

This appropriation is intended to cover the following expenditure incurred within Union territory:

- the payment of insurance premiums on the buildings or parts of buildings occupied by the institution,
- water, gas, electricity and heating charges,
- maintenance costs, calculated on the basis of current contracts, for premises, lifts, central heating, air-conditioning equipment, etc.; the expenditure incurred by regular cleaning operations, including the purchase of maintenance, washing, laundry and dry-cleaning products and by repainting, repairs and supplies used by the maintenance workshops (before contracts for an amount in excess of EUR 300 000 are renewed or concluded, and with a view to rationalising expenditure, the Commission must consult the other institutions with regard to the conditions (price, currency chosen, indexing, duration, other clauses) obtained by each of them for a similar contract),
- expenditure on the selective treatment, storage and removal of waste,
- the refurbishment of buildings, e.g. alterations to partitioning, alterations to technical installations and other specialist work on locks, electrical equipment, plumbing, painting or floor coverings, and the cost of changes to the cabling associated with fixtures, and the cost of the necessary equipment (before contracts for an amount in excess of EUR 300 000 are renewed or concluded, and with a view to rationalising expenditure, the Commission must consult the other institutions with regard to the conditions (price, currency chosen, indexing, duration, other clauses) obtained by each of them for a similar contract),
- expenses relating to conducting the audit of accessibility of buildings to persons with disabilities and reduced mobility and the introduction of necessary adaptations pursuant to such an audit so as to make buildings fully accessible to all visitors,
- the cost of legal, financial and technical consultancy fees prior to the acquisition, rental or construction of buildings,
- other expenditure on buildings, in particular management fees for multiple-tenanted buildings, costs of surveys of premises and charges for utilities (street cleaning and maintenance, refuse collection, etc.),
- technical assistance fees relating to major fitting-out operations for premises.

Appropriations to cover the equivalent expenditure in respect of research are entered under various items of the titles concerned.

This appropriation covers expenditure incurred within the territory of the Union, excluding the Commission Representations in the Union.

This appropriation is intended to cover budgetary adjustments:

- in situations where a claim is cancelled in full or in part after it has been booked to the accounts as revenue (in particular in the event of offsetting against a debt),
- in cases where VAT has not been recovered and where it is no longer possible to book the amount to the line that covered the principal expenditure,
- for any interest relating to the above cases, where it cannot be booked to another specific budget line.

This item is also intended to accommodate, if necessary, an appropriation to cover any losses resulting either from the liquidation or cessation of activities of financial institutions with which the Commission has accounts or from the management of financial assets.

The amount entered corresponds to the appropriations for the Office for the Administration and Payment of Individual Entitlements (PMO) set out in detail in the specific annex to this section.

In accordance with Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1074/1999 (OJ L 248, 18.9.2013, p. 1), the appropriations for, and staff of, the Supervisory Committee and its secretariat are entered in the budget and establishment plan of the PMO.

For the sake of transparency, the resources made available to the secretariat of Supervisory Committee of the European Anti-Fraud Office in the PMO's budget can be identified. Based on a secretariat of seven permanent posts and an allocation for one member of contract staff, the appropriations for the operation of the secretariat of Supervisory Committee of the European Anti-Fraud Office would amount to approximately EUR 1 000 000. This amount covers expenditure on staff costs, training, missions, internal meetings, buildings and IT.

The expenditure resulting from the mandate of the members of the Supervisory Committee of the European Anti-Fraud Office is covered by appropriations of EUR 200 000 in Article 20 03 18.

*Remarks*

This appropriation is intended to cover all expenditure resulting from the mandate of the members of the Supervisory Committee of the European Anti-Fraud Office (OLAF), namely:

- allowances granted to the members of the Supervisory Committee for the time dedicated to the fulfilment of their functions, as well as their travel expenses and ancillary costs,
- costs incurred by members of the Supervisory Committee officially representing the Supervisory Committee,
- all operating expenditure, such as the cost of purchase of equipment, stationery and office supplies and expenditure arising from communications and telecommunications (postal charges, telephone, fax and telegraph charges), documentation and library expenditure, the purchase of books and subscriptions to information media,
- travel, subsistence and incidental expenses of experts, invited by the members of the Supervisory Committee to participate in study groups and working parties, and the cost of organising such meetings where they are not covered by the existing infrastructure (in the headquarters of the institutions or external offices),
- expenditure on specialised studies and consultations contracted out to highly qualified experts (individuals or firms) where the members of the Supervisory Committee are unable to entrust such studies to suitable staff of OLAF.

Moreover, for the sake of transparency, the resources made available to the secretariat of the Supervisory Committee in the PMO's budget (Item 20 03 16 01) can be identified. Based on a secretariat of seven permanent posts and an allocation for one member of contract staff, the appropriations for the operation of the secretariat of the Supervisory Committee would come to around EUR 1 000 000. This amount covers expenditure on staff costs, training, missions, internal meetings, buildings and IT.

Remarks

This appropriation is intended to cover end user computing devices and support for end users. The scope includes costs to purchase, build, manage and run end user computing devices, and deliver centralised support to end users in the Commission. It covers in particular:

- personal computing infrastructure: client compute physical desktops, portable laptops, thin client machines, peripherals (including monitors, pointer devices and attached personal printers) used by individuals to perform work,
- mobile devices: client compute tablets, smart phones and apps used by individuals to perform work,
- end-user software: client related software used to author, create, collaborate and share documents and other content. Examples include email, communications, messaging, word processing, spreadsheets, presentations, desktop publishing, graphics and others,
- network printers: Examples include network connected personal printers, ink-jet printers, laser printers, departmental or copy-room printers,
- conferencing and audio/video: audio and video conferencing equipment typically used in conference rooms and dedicated telepresence rooms to enable workforce communications,
- IT helpdesk: centralised Tier 1 help desk resources that handle user requests, answer questions and resolve issues,
- desk-side support: local support resources that provide on-site support for moves, adds, changes and hands on issue resolution.

This appropriation covers expenditure incurred within the territory of the Union, excluding Joint Research Centre sites, for which expenditure is entered in the titles concerned. Similar expenditure incurred outside the Union is entered in the titles concerned.

Remarks

Former article 20 04 01 (in part)

This appropriation is intended to cover costs related to Data Centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- Data Centre facilities: purpose-built data centre facilities that house and protect critical IT equipment including the space, power, environment controls, racks, cabling and 'smart hand' support, this includes other facilities as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings;
- compute on-premises and cloud-based, this includes:
  - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services;
  - converged infrastructure: purpose-built appliances that provide compute, storage and network capabilities in one box;
  - mainframe: traditional mainframe computers and operations running legacy operating systems;
- storage on-premises and cloud-based: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements);

- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse. It includes:
  - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office working areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
  - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,
  - transport: data network circuits and associated access facilities and services; includes dedicated and virtual data networks and internet access, as well as includes usage associated with mobility and other data transit based on usage billing and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g. satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems, this includes database management software and tools, and outside services,
- delivery: costs to monitor, support, manage, and run IT operations; this includes:
  - IT service management: resources involved with the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 help desk),
  - program, product & project management: resources involved with managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
  - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate IT products, services and status of IT projects,
  - operations centre: centralised IT operations centre resources, including monitoring and intervention e.g., network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs to define, establish, enforce, and measure security, compliance, and disaster recovery readiness; this includes:
  - Security: IT security and cybersecurity resources setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,
  - compliance: IT compliance resources setting policy, establishing controls and measuring compliance to relevant legal and compliance requirements,
  - disaster recovery: IT disaster recovery resources setting disaster recovery policy, establishing process and means, dedicated failover facilities, performing disaster recovery testing,
- IT management infrastructure (including logistics): costs in relation to the management, administration and planning of IT infrastructure; this includes expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance, and vendor management.

*New article*

This appropriation is intended to cover costs related to the inter-institutional computer emergency response team for the Union's institutions, agencies and bodies (CERT-EU) whose mission is to contribute to the security of the ICT infrastructure of all constituents by helping to prevent, detect, mitigate and respond to cyber-attacks and by acting as the cyber-security information exchange and incident response coordination hub. CERT-EU is attached as a task force to the Commission IT department. It covers in particular:

- Prevention: the costs of collecting, assessing and distributing information about potential vulnerabilities in internet-facing web services, issuing warnings about potential security issues, providing actionable advice and documentation on security controls, conducting maturity assessments and reviewing capabilities.
- Digital Forensics and Incident Response & Social Media Assurance: the costs of providing incident support, digital forensics, artefact analysis and access to analytical tools.
- Cyber Threat Intelligence & Vulnerability Information: the costs of maintaining a threat intelligence fusion centre and issue threat alerts and reports, disseminating indicators of compromising and detection rules to networks of intrusion detection sensors and log management and correlation systems, and tracking top threat actors targeting the Union's institutions, agencies and bodies.

Remarks

This appropriation is intended to cover staff and administrative expenditure (Titles 1 and 2), and operational expenditure (Title 3) of the Translation Centre for bodies of the European Union.

The budgetary resources of the Translation Centre consist of financial contributions from the agencies for which it works and the institutions and bodies with which it cooperates, without prejudice to other revenue.

The amounts repaid in accordance with Article 17 of Commission Delegated Regulation (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (OJ L 122, 10.5.2019, p. 1) constitute assigned revenue (Article 21(3), point (b), of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The establishment plan of the Translation Centre is set out in Annex 'Staff' to this section.

Legal basis

Remarks

The appropriations in this title are intended for two circumstances only: (a) where no basic act exists for the action concerned when the budget is established; and (b) where there are serious grounds for doubting the adequacy of the appropriations or the possibility of implementing, under conditions consistent with sound financial management, the appropriations entered in the budget lines concerned. The appropriations entered in this article may be used only after transfer in accordance with the procedure laid down in Article 30 of the Financial Regulation for cases under point (a) and in Article 31 of the Financial Regulation for cases under point (b).

The breakdown is as follows (commitments, payments):

*Remarks*

The Solidarity and Emergency Aid Reserve may be used to finance:

a) assistance to respond to emergency situations resulting from major disasters that are covered by the European Union Solidarity Fund, the objectives and scope of which are set out in Council Regulation (EC) No 2012/2002 of 11 November 2002 establishing the European Union Solidarity Fund (OJ L 311, 14.11.2002, p. 3),

b) rapid responses to specific emergency needs within the Union or in third countries following events which could not be foreseen when the budget was established, in particular for emergency response and support operations following natural or man-made disasters, humanitarian crises, in cases of large-scale public health, veterinary or phytosanitary threats, as well as in situations of particular pressure resulting from migratory flows at the Union's external borders where circumstances so require.

201 332 382	25 000 000	197 385 000	20 000 000	0,—	0,—

*Remarks*

The aim of this reserve is to cover the European Globalisation Adjustment Fund for Displaced Workers (EGF) so as to enable the Union to demonstrate solidarity towards, and to provide support to people losing their jobs as a result of major structural changes caused by globalisation-related challenges.

The objective of the EGF is to demonstrate solidarity and promote decent and sustainable employment in the Union by offering assistance to workers who have been dismissed because of major restructuring events. Those events can result in particular from globalisation-related challenges, such as changes in world trade patterns, trade disputes, significant changes in the trade relations of the Union or the composition of the internal market and financial or economic crises, the transition to a low-carbon economy, digitisation or automation. The EGF thereby supports displaced workers in returning to decent and sustainable employment as soon as possible. Particular emphasis is placed on measures that help the most disadvantaged groups.

The maximum annual amount for the EGF is set in the MFF 2021-2027. The methods for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 9 of the Interinstitutional Agreement of 16 December 2020 between the European Parliament, the Council of the European Union and the European Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources.

*Legal basis*

Council Regulation (EU, Euratom) 2020/2093 of 17 December 2020 laying down the multiannual financial framework for the years 2021 to 2027 (OJ L 433I, 22.12.2020, p. 11).

- mainframe: traditional mainframe computers and operations running legacy operating systems,
- storage on-premises and cloud-based: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse; this includes:
  - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
  - voice: voice resources which enable or distribute voice services through on-premises equipment including PBX, VoIP and voicemail,
  - transport: data network circuits and associated access facilities and services; this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing; and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g. satellite) technologies,
- platform: costs associated with distributed databases and middleware systems, this includes database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations, this includes:
  - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
  - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
  - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
  - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g. network operations centre (NOC), global operations centre (GOC),

*Remarks*

This appropriation is intended to cover costs related to data centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- data centre facilities: purpose-built data centre facilities that house and protect critical IT equipment, including the space, power, environment controls, racks, cabling and "smart hand" support; this includes other facilities such as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings,
- compute on-premises and cloud-based; this includes:
  - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
  - converged infrastructure: purpose-built appliances that provide compute, storage and network capabilities in one box,
  - mainframe: traditional mainframe computers and operations running legacy operating systems,
- storage on-premises and cloud-based: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements);
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse, this includes:
  - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
  - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,

**CHAPTER O2 01 — ADMINISTRATIVE EXPENDITURE** (*cont'd*)O2 01 09 (*cont'd*)O2 01 09 03 (*cont'd*)

- transport: data network circuits and associated access facilities and services, this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing, and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems, this includes database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations, this includes:
  - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
  - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
  - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
  - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g., network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs of defining, establishing, enforcing, and measuring security, compliance, and disaster recovery readiness, this includes:
  - security: IT security and cybersecurity resources, setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,
  - compliance: IT compliance resources, setting policy, establishing controls and measuring compliance with relevant legal and compliance requirements,
  - disaster recovery: IT disaster recovery resources, setting disaster recovery policy, establishing process and means, dedicated failover facilities, performing disaster recovery testing,
- IT management infrastructure (including logistics): costs in relation to the management, administration and planning of IT infrastructure; this includes expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance, and vendor management.

- storage on-premises and cloud-based: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
  
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse; this includes:
  - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks; and wide area network equipment and support services directly connecting data centres, offices and third parties,
  
  - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,
  
  - transport: data network circuits and associated access facilities and services; this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
  
- platform: costs associated with distributed and mainframe databases and middleware systems. Costs include database management software and tools, and outside services,
  
- delivery: costs of monitoring, supporting, managing, and running IT operations; this includes:
  - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
  
  - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
  
  - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
  
  - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g., network operations centre (NOC), global operations centre (GOC),

04 01 09 03 (*cont'd*)

*Remarks*

This appropriation is intended to cover costs related to data centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- data centre facilities: purpose-built data centre facilities that house and protect critical IT equipment, including the space, power, environment controls, racks, cabling and "smart hand" support; this includes other facilities such as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings;
- compute on-premises and cloud-based; this includes:
  - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
  - converged infrastructure: purpose-built appliances that provide compute, storage and network capabilities in one box,
  - mainframe: traditional mainframe computers and operations running legacy operating systems,
- storage on-premises and cloud-based: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse; this includes:
  - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
  - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,
  - transport: data network circuits and associated access facilities and services; this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing, and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems; this includes database management software and tools, and outside services,

**CHAPTER 04 01 — ADMINISTRATIVE EXPENDITURE** (*cont'd*)04 01 09 (*cont'd*)04 01 09 03 (*cont'd*)

- delivery: costs of monitoring, supporting, managing, and running IT operations; this includes:
  - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
  - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
  - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
  - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g., network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs of defining, establishing, enforcing, and measuring security, compliance, and disaster recovery readiness; this includes:
  - security: IT security and cybersecurity resources, setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,
  - compliance: IT compliance resources, setting policy, establishing controls and measuring compliance with relevant legal and compliance requirements,
  - disaster recovery: IT disaster recovery resources, setting disaster recovery policy, establishing process and means, dedicated failover facilities, performing disaster recovery testing,
- IT management infrastructure (including logistics): costs in relation to the management, administration and planning of IT infrastructure; this includes expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance, and vendor management.

*Remarks*

This appropriation is intended to cover costs related to data centre facilities and communications services, as well as costs related to IT security and compliance. It covers in particular:

- data centre facilities: purpose-built data centre facilities that house and protect critical IT equipment, including the space, power, environment controls, racks, cabling and "smart hand" support; this includes other facilities such as computer rooms and closets that house IT equipment in corporate headquarters, call centres or other general purpose office buildings;
- compute on-premises and cloud-based; this includes:
  - servers: physical and virtual servers running on different operating systems; includes hardware, software and support services,
  - converged infrastructure: purpose-built appliances that provide compute, storage and network capabilities in one box,
  - mainframe: traditional mainframe computers and operations running legacy operating systems,
- storage on-premises and cloud-based: provides centralised data storage and securely holds information and data to be retrieved later. Storage may hold data for application programs and code, databases, files, media, email and other forms of information. It includes equipment and software for online storage (for the distributed compute infrastructure) and offline storage (for archive, backup and recovery to support data loss, data corruption, disaster recovery and compliance requirements),
- network: data and voice equipment along with the transport methods to connect systems and people and to enable people to converse, this includes:
  - LAN/WAN: physical and wireless local area network connecting equipment within the core data centres and connecting end users in office work areas to the organisation's broader networks, and wide area network equipment and support services directly connecting data centres, offices and third parties,
  - voice: voice resources which enable or distribute voice services through on premise equipment including PBX, VoIP, voicemail and handsets,

- transport: data network circuits and associated access facilities and services; this includes dedicated and virtual data networks and internet access, as well as usage associated with mobility and other data transit based on usage billing, and voice network circuits and associated access facilities and services, as well as usage associated with standard telephone calls. Both voice and data transport may include terrestrial and non-terrestrial (e.g., satellite) technologies,
- platform: costs associated with distributed and mainframe databases and middleware systems; this includes database management software and tools, and outside services,
- delivery: costs of monitoring, supporting, managing, and running IT operations; this includes:
  - IT service management: resources linked to the incident, problem and change management activities as part of the IT service management process (excludes the Tier 1 helpdesk),
  - program, product and project management: resources linked to managing and supporting IT related projects and/or continuous product development across business and IT-driven initiatives,
  - client management: resources or 'account managers' aligned with the lines of business to understand business needs, communicate on IT products, services and status of IT projects,
  - operations centre: centralised IT operations centre resources including monitoring and intervention, e.g., network operations centre (NOC), global operations centre (GOC),
- security, compliance, disaster recovery: costs of defining, establishing, enforcing, and measuring security, compliance, and disaster recovery readiness; this includes:
  - security: IT security and cybersecurity resources, setting policy, establishing process and means, measuring compliance and responding to security breaches and providing real-time operational security such as vulnerability scanning, managing firewalls, intrusion prevention systems, and security information and event management,
  - compliance: IT compliance resources, setting policy, establishing controls and measuring compliance with relevant legal and compliance requirements,
  - disaster recovery: IT disaster recovery resources, setting disaster recovery policy, establishing process and means, dedicated failover facilities, performing disaster recovery testing,
- IT management infrastructure (including logistics): costs in relation to the management, administration and planning of IT infrastructure; this includes expenditure for assistance on executive management, strategic management, enterprise architecture, IT finance, and vendor management.

## CHAPTER O6 02 — SPECIFIC ACTIVITIES (*cont'd*)

O6 02 01 (*cont'd*)

It is intended, in particular, for:

- searching for, gathering, examining, utilising and passing on to national investigation departments all information which is useful for the detection and pursuit of fraud (e.g. via databases),
- supporting efforts by Member States, in particular in the case of international fraud, when action has to be taken at Union level,
- financing measures to increase the effectiveness of preventive measures, inspections and investigations,
- strengthening cooperation with national administrations, in particular to combat cigarette smuggling,
- organising and participating in monitoring and on-the-spot inspections,
- financing travel expenses and subsistence allowances for inspectors and national magistrates working abroad in connection with control visits, on-the-spot inspections, coordination meetings and for the purposes of an inspection in general,
- covering travel expenses, subsistence allowances and ancillary costs of experts employed by the Office in the course of its investigations to give a professional opinion on a specific matter,
- covering the costs of conferences, congresses and meetings that the Office organises in its anti-fraud work.

Appropriations 2022	Appropriations 2021	Outturn 2020
150 000	150 000	28 083,—

*Remarks*

This appropriation is intended to cover the cost of information and communication measures undertaken by the Office.

The Office's external information and communication strategy is central to its work. The Office was set up as an independent investigative body and must therefore have its own communications strategy. The Office's work is often too technical to be immediately comprehensible to the general public. The Office has to inform its interlocutors and the public as a whole of its role and tasks. Public perception of the Office's work is of paramount importance.

**CHAPTER O6 02 — SPECIFIC ACTIVITIES** (*cont'd*)O6 02 02 (*cont'd*)

As a Commission service, the Office also needs to take account of the democratic deficit existing between the Union institutions and the citizens of Europe. The Commission has recognised this deficit and drawn up an action plan to address it.

The communications strategy that the Office has developed and continues to implement must demonstrate the Office's independence.

**PILOT PROJECTS**

**CHAPTER PP 01 — RESEARCH AND INNOVATION**

*Remarks*

The appropriations under this chapter are intended to finance the implementation of pilot projects of an experimental nature designed to test the feasibility of actions and their usefulness. Their total corresponds to the level of appropriations shown under Article 01 20 01.

*Legal basis*

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Despite the existing legislation, air pollution remains one of the major environmental problems in Europe. Transportation is one of the main contributors of air quality issues within cities. Transport-related emissions cover nitrogen oxide (NO<sub>x</sub>) and carbon dioxide (CO<sub>2</sub>) caused by combustion engine vehicles as well as fine dust (particulate matter PM<sub>2.5</sub> and PM<sub>10</sub>). Particulate matter emissions will especially continue to be a challenge not only in the existing fleet with a majority of combustion engine vehicles. This challenge is likely to continue even after full electrification of the fleet since electrification itself will avoid NO<sub>x</sub> and CO<sub>2</sub> emissions, but will only have little impact on fine dust emissions (PM<sub>2.5</sub> and PM<sub>10</sub>). This is due to the fact that only tailpipe emissions are avoided, but the main emitters of fine dust are considered to be brakes, tyres and road wear.

In recent years, great efforts have been made by tyre manufacturers (wear-optimised tyres) and brake manufacturers (optimised materials and coatings) to reduce emissions directly at the source. However, the emission reductions achieved are not sufficient. Also the actual fleet renewal would be too slow to have immediate impact on air quality in polluted cities. Therefore it has to be expected that, in the coming years, air quality issues will remain within European cities.

This indicates that other solutions are needed to reduce particulate emissions and improve air quality, beyond working towards the replacement of all conventional vehicles by electric vehicles or the incremental improvement of car engines and limitation of exhaust emissions.

In current legislation only exhaust emissions are regulated via European standards. Especially the regulations on emission limit standards Euro 5 and 6 for light passenger and commercial vehicles as well as EURO VI for heavy-duty vehicles have introduced stricter emission limits for exhaust emissions. Currently there are no regulations in force for non-exhaust emissions, but most recently several working groups are developing regulations for tyre and brake emissions, which are expected to be included in the Euro 7 standard.

**CHAPTER PP 01 — RESEARCH AND INNOVATION** (*cont'd*)PP 01 21 (*cont'd*)PP 01 21 01 (*cont'd*)

Latterly it has been shown that also new upcoming filtration technologies have the ability to compensate part of the vehicles emissions. This pilot project addresses the potential of these new approaches. The concrete filtration technologies to be investigated within this pilot project are:

(a) Brake dust particle filter which consists of a housing and a non-woven media. It is mounted behind the brake caliper. Due to this mounting location the filter is able to confine particles in a non-woven filter media directly after they are emitted at the contact area of the brake pad and the brake disc.

(b) Fine dust particle filter which is installed on the top of or underneath a vehicle. An installed fan actively conveys polluted ambient air through a filter media where the fine dust can be separated. In this way the filter is able to separate self-generated emissions as well as the emissions of ambient air and surrounding vehicles.

Both systems could in general be applied to all kinds of vehicles, including light, commercial and heavy-duty vehicles. To maximise the impact on the overall air quality the entire public transport bus fleet, taxi fleets or delivery vehicles could for example be equipped with these solutions, cleaning the air while driving or charging. In this way, those equipped vehicles would be leaving the air cleaner than before.

Within the pilot project, the focus is on particulate matter reduction by application of filtration solutions, confining emissions from brake (close to its source) and filtration of ambient polluted air through fine dust filters. Amongst the expected deliverables, this pilot project should provide quantifiable evidence on how such systems have to be tested to assess their performance, which impact on air quality such filtration technologies can have and how these solutions can supplement the measures in air pollution control plans to provide clean air to residents.

Therefore the concrete and specific objectives to be achieved during the pilot project are:

(1) Identification and assessment of the possible impact of retrofit filtration solutions for light, commercial and heavy-duty road vehicles

A holistic technology review for filtration retrofit solutions for light, commercial and heavy-duty road vehicles should be provided, to give an overview on available solutions on the market, including their respective potential impacts identified in publications and studies.

(2) Definition of a measurement procedure for the performance evaluation of active fine dust filters and brake dust particle filters

The performance of the described filtration systems do not only depend on their technical specifications but also on the environment in which they are operated. This includes environmental conditions like ambient temperature and humidity but also the current dust concentration since the separated particle mass of a filter is higher at higher concentrations. Currently there is no generally defined measuring procedure available to assess the performance of such systems and to be used for future regulations. Therefore it is the aim of this pilot project to build the experimental foundation for defining a measuring procedure. This should be done via the following steps:

(a) Laboratory tests evaluating the emission footprint reduction by brake dust particle filtration

COMMISSION  
PILOT PROJECTS**CHAPTER PP 01 — RESEARCH AND INNOVATION** (*cont'd*)PP 01 21 (*cont'd*)PP 01 21 01 (*cont'd*)

The emission reduction potential by filtration of brake dust should be evaluated. Due to the complex conditions in the vicinity of the brake and the wheelhouse, laboratory tests on an inertia dynamometer test bench should be done as a first step, following the approach of the Particle Measurement Programme working group. The laboratory tests should be performed for at least three vehicles, covering light and commercial vehicle brakes.

(b) Additional field tests evaluating the emission footprint reduction by brake dust filtration

The complex conditions in the wheelhouse near the brake cannot be properly covered by laboratory tests. Therefore additional field test should be performed for at least three vehicles, covering light and commercial vehicle brakes. Based on gravimetric measurement, the particulate matter reduction under real-driving conditions should be shown and compared to the laboratory results.

(c) Laboratory tests evaluating the emission footprint reduction by active ambient air filtration systems

The volume flow rate through the active air filter system is to be determined for several driving velocities on the lab scale. The laboratory setup allows reproducible testing independent of environmental conditions. Therefore wind tunnel experiments should be performed. Based on the determined volume flow rates, the emission reduction can be calculated based on the knowledge of typical ambient duct concentrations. The wind tunnel tests should be performed for at least three vehicles, covering light, commercial and heavy-duty vehicles.

(d) Additional field tests evaluating the emission footprint reduction by active ambient air filtration systems

The reduction potential of the identified solutions should be tested in addition in a field test under real-driving conditions. At least two retrofit solutions should be tested and the PM10 and PM2.5 reduction quantified under various ambient conditions (temperature, humidity, particulate matter concentration, traffic intensity). The field test should be performed for at least 20 vehicles, covering light, commercial and heavy-duty vehicles, in at least three European cities. The field test results should give indication for further legislation about the influence of environmental condition on the overall particulate matter footprint of vehicles.

(3) Feasibility study and demonstrator vehicle for integrated fine dust particle filtration systems

A feasibility study to investigate the possibilities to integrate the previously described retrofit solutions within future vehicles should be performed. Especially it should be outlined up to which extent filtration systems can be integrated into the future fleet. A holistic technical review has to be carried out to estimate the overall impact on the vehicle emission footprint.

Furthermore a prototype vehicle (demonstrator car) should be built to show the integrated concepts and for use in further field tests.

**CHAPTER PP 01 — RESEARCH AND INNOVATION** *(cont'd)*PP 01 21 *(cont'd)*PP 01 21 01 *(cont'd)*

## (4) Estimate of possible impact on air quality in cities

Within the previously defined field and laboratory tests, the performance of the filtration systems can only be assessed for a small number of vehicles. To transfer and to extrapolate these results to a possible coverage of the fleet, several scenarios should be investigated via simulations, e.g. assuming that a certain percentage of

buses in public transport

inner-city delivery vehicles

private cars in the future fleet

will be equipped with these filtration systems. This will give a clear indication for the legislation which emission reduction targets can be achieved.

## (5) Lifecycle analysis

In order to evaluate the sustainability of the filtration systems under investigation, a life cycle analysis should be performed for production phase, use phase and recycling phase, including in particular the aspects of CO<sub>2</sub> emissions, primary energy consumption and PM<sub>10</sub> emissions during production. Furthermore it should be assessed how the filtration systems influence fuel consumption and thus greenhouse gas emissions.

## (6) Assessment of shortcomings in the current measurement procedure and regulation as well as creating the basis for future legislation for non-exhaust emissions with a specific focus on retrofit solutions

Based on the findings a suggestion for future legislation should be given. In contrast to past regulations for exhaust emission, the case of integrated or retrofitted filtration systems poses the challenge that a vehicle needs to be considered in a certain environment and cannot be characterised as an independent object. This aspect is not taken into account in current regulations.

In this way, the pilot project will not only be a key enabler for realising sustainable transport within the existing fleet, but it will also drive the development of solutions for clean electro mobility.

Furthermore it can boost innovation in the European automotive industry and catalyse the development of other retrofit solutions and products outside of the scope of this project (cabin air filter, helmet filter, etc.). At the same time, the results can significantly improve healthy living and promote wellbeing of city inhabitants.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 01 — RESEARCH AND INNOVATION** (*cont'd*)PP 01 21 (*cont'd*)PP 01 21 02 (*cont'd*)*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project aims to overcome financial, legal and technical barriers to citizen-led renovation projects. A specific Union support service should be created for Citizens Energy Communities (CEC) and Renewable Energy Communities (REC) which are new actors enshrined in the Union legislation able to catalyse citizens' engagement in various aspects of the ecological transition, including renovation projects. The creation of such a service could build upon the experience of cooperatives that are successfully bundling projects at a neighbourhood scale. The support service would aim to strengthen community building and to scale up and replicate successful programmes. It should include:

1. A platform for sharing experience and models, in order to build strong community dynamics to mobilise European citizens around integrated building renovation and renewable deployment by means of CEC and REC.
2. Support for the development of investment plans, as identifying financing options is a key element for the creation of project pipelines. Looking for commonalities in order to scale the development of citizen-led projects. Investigating the development of models supporting renovation in conjunction with renewable deployment.
3. Providing evidence and indicators in order to raise awareness among existing CEC and REC about the value of energy renovations.
4. Providing technical assistance and coaching to citizens groups, existing community organisations as well as local authorities to set up citizen and renewable energy communities dealing with building renovation, access to home ownership and energy poverty.
5. Monitoring and supporting a strong transposition of Clean Energy package provisions concerning CEC and REC, which should be an opportunity for Member States to strengthen the role of citizens in the energy transition.

The goal of the pilot project will be to coach CEC and REC through the process of creating and implementing a territory transition.

PP 01 21 03 Pilot project — Promote worldwide a European way to digital innovation rooted in culture

*Remarks*

This pilot project intends to promote worldwide a European approach to innovation rooted in arts/culture and values. Such a culture/art-driven approach linking innovation, digital and the arts into local ecosystems of innovation in selected regions outside Europe will help promote a European approach to innovation as an alternative to US and Chinese approaches.

**CHAPTER PP 01 — RESEARCH AND INNOVATION** *(cont'd)*

PP 01 21 *(cont'd)*

PP 01 21 03 *(cont'd)*

The international activities shall comprise events (i.e. fairs, exhibitions, workshops, hackathons, and residencies of artists in local start-ups) where local and European businesses/start-ups meet with local and European artists and representatives of creative sectors. It is proposed to limit the activities to two selected regions - Africa and Middle East – with emerging economies where it is expected that innovation rooted in culture and the arts will resonate most strongly with local thinking. It is suggested to collaborate in these selected regions also with dominant digital players that show an increasing awareness to the worldwide social and environmental impact of digital progress. This pilot project builds among others on the S+T+ARTS=STARTS programme that promotes synergies between the arts and digital technology for a more human-centred innovation. Various Presidency conclusions on ‘crossovers from culture to businesses’ have recommended that the Union institutions facilitate collaboration between arts and technology for a systemic exploration of opportunities that overcomes the culture-engineering divide.

Type of applicants targeted by the call for proposals: art institutions and foundations, digital industry and industry/start-ups in various sectors interested in linking digital and art, development organisations, and culture organisations working on international level.

Description of the activities: residencies of artists in local start-ups/companies (via third party funding), exhibitions, workshops, transfer of digital technologies to local industry, educational measures.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project takes a Union-wide view of open source with a view of establishing common solutions to the challenges faced by public services in the Union and enhance the continued adaptation of open source by the following:

Solutions Catalogue

Creation of an online catalogue of open-source software used in Member States and Union institutions to allow for the identification of similar systems that are easily modifiable thus reducing re-development and proprietary systems due to lack of awareness of alternatives. It will also examine in which way local software can be made fit for Europe-wide use and suggest a European perspective for future open source solution developments.

Inventory

Creation of an inventory of open-source software used by public services in the Union, facilitating identification of the most critical open-source use within Europe, and allowing for further initiatives to protect and safeguard such software.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project complements the current actions that support SMEs during the COVID-19 crisis, but can also support entrepreneurs facing the challenges posed by becoming more digital and sustainable. Such a project can equip entrepreneurs with the right mindset, resilience and skills they need to adapt to a changing and difficult context. In the current context, entrepreneurs need to find solutions to pressing problems such as funding, management, scaling or becoming green. In order to face the challenges posed by the COVID-19 crisis, as well as by digitalisation and becoming sustainable, entrepreneurs need flexible and interactive training modules on areas such as financial literacy, pitching to investors or expanding one's business, as well as coaching and mentoring from either peers or experienced practitioners. This information can be hosted or linked to existing platforms, such as EEN, Digital Skills and Jobs Platform, EntreComp360, WEgate, and early warning mentors, so as to allow easy access to relevant information to all SMEs in Europe.

This pilot project received a B grade following the Commission's assessment in 2020 and it is currently under implementation. Based on the dialogue with the Commission and the results of the project, its implementation is to be continued by extending the number of beneficiaries, especially from the regions with a lower level of information (such as the Central and Eastern European countries), and the types of information and interactions covered by the project. This pilot project seeks to create an entrepreneurial online education platform designed to help European SMEs adapt to the current context. The platform will contain for example best practices in Europe, the Union funding solutions, training and interactive modules, peer-to-peer communication and free consultancy to beneficiaries. The online platform will integrate the training and consultancy modules, the expertise and the know-how used by the SME instrument mechanisms. This will enable a speedy implementation of the platform. The pilot project seeks the identification of local support stakeholders designed to animate the platform with local information and content, sometimes also in the local language.

**CHAPTER PP 01 — RESEARCH AND INNOVATION** (*cont'd*)PP 01 22 (*cont'd*)PP 01 22 01 (*cont'd*)*Remarks*

The overall objective of this pilot project is to create the first Union public database of human biology- based models and non-animal methods, providing open access to the scientific community with project evaluators and ethical review committees among others.

Roughly 10 million animals are used in procedures for research and testing across the Union each year and about 200 million worldwide. In 2017, the Commission's Joint Research Centre - European Union Reference Laboratory for alternatives to animal testing (DG JRC EURL ECVAM) embarked on a series of studies to review available and emerging non-animal models (NAM) being used for research in seven disease areas: 1) respiratory tract diseases 2) breast cancer 3) immune-oncology 4) immunogenicity of advanced therapeutic medicinal products 5) neurodegenerative disorders, 6) cardiovascular diseases and 7) autoimmunity. In 2020, the two first studies (on respiratory tract diseases and breast cancer) were published while the others were expected to follow in 2021. In spite of this remarkable effort, this work is in danger of quickly becoming outdated, given that the rapid increase in knowledge is accompanied by a decrease in the useful lifespan of that knowledge. Therefore, the aim of this pilot project is to develop an artificial intelligence (AI) automated database that collects and structures the NAMs in use for biomedical research. NAMs correspond to *in vitro* methods based on human cells and engineered tissues or *in silico* approaches employing computer modelling and simulation. Using AI to mine the vast body of published literature enables the creation and maintenance of an up-to-date, state of the art knowledge source collating NAMs applied to biomedical research. Moreover, the AI approach will allow the development of a sustainable design and implementation of the platform, which can be easily maintained by a third party and further refined through a community based support.

By understanding and sharing information on successful NAMs in biomedical research, it is expected that the transition of the scientific community towards human biology-based methodologies will be encouraged, facilitated and potentially accelerated. In fact, the use of human biology-based models and methods is vital to improve the relevance of biomedical research, to enhance the likelihood that results will translate to patients and to accelerate the transfer of research results into clinical and public health practices.

The use of AI is vital for the automation and cost-effective retrieval of the huge amount of data which will be required to ensure that the knowledge remains updated and current. In fact, the application of AI has already proven its worth and is frequently used by Union institutions such as EFSA for the automation of evidence-based science.

*Objectives:*

Ultimately, this pilot project will result in the development of the first Union public database of human biology-based NAM for biomedical research. This will be achieved through the following:

- Combining the results of the existing seven studies from DG JRC EURL ECVAM to create an initial database.
- Applying these results to enable training of an AI-boosted algorithm that will further populate the database and ensure it is kept up-to-date.
- Designing further integrations to expand the database to include NAMs for other human diseases.
- Developing a user-friendly web interface to facilitate public searches of content and allow filtering for NAM for specific human diseases.

- Providing recommendations on how to successfully deploy this AI-boosted NAM database to the scientific community.
- Providing specific recommendations to ensure long term sustainability of the database to all stakeholders (scientific community at large as well as Member States and competent authorities responsible for project evaluation).

PP 01 22 02 Pilot project — Establishing new common methodologies, including metrics and statistics and using data analytics, which are more adequate to analyse the gender gap in investments in innovative ventures at regional, national and European level (in particular European Innovation Council, European Investment Fund and European Investment Bank)

*Figures (Differentiated appropriations)*

Appropriations 2022		Appropriations 2021		Outturn 2020	
Commitments	Payments	Commitments	Payments	Commitments	Payments
890 500	222 625				

*Remarks*

Data is power and it could be used to target the development of financial products respectful of gender equality and diversity, to ensure that the innovation ecosystem empowers women-led venture capitals, women entrepreneurs and women-led business teams.

Currently, the OECD, the Eurostat and the European Institute for Gender Equality collect data about several gender aspects, but they require a certain harmonisation in order to be instrumental in addressing the gender gap. The methodologies and metrics used should be brought together to create a more holistic view and be able to use additional data allowing monitoring and evaluation of progress and policies. In addition, more regular and improved analytical studies need to be conducted to ensure the relevance of collected data (the latest analytical studies - European Commission, 2014; OECD, 2014 - on female entrepreneurship are based on data from almost a decade ago).

Specifically, with regard to investment data, there are currently only limited sources of data and this leads to repeated citing of the same unverified data, without the proper check about the biases and the errors contained therein. Much of the existing data that is available does not even allow a breakdown by gender.

To gain better insight based on robust data from reliable sources, data on investment by women and in women-led companies should be collected more systematically, in a structured and unbiased manner. Public investment institutions (European Commission, EIC, EIB, EIF, national and regional investment banks and investment schemes) should ensure that these data are collected and made available (always according to the FAIR principles) for analysts and policy makers to use. By making their collection and disclosure a condition for benefitting from their instruments, the data can be collected structurally. These data not only allow monitoring of the phenomenon, they also feed into the investment policies and the development of targeted instruments.

Addressing the gender investment gap from the policy perspective requires several steps that must be supported by reliable and updated data. First, policymakers should be put in a position to identify, observe and acknowledge the problem; second, they should understand why this huge gap exists; third, they should design effective policies and instruments to reduce it; then they should be able to monitor the progresses constantly and evaluate the results in order to adjust, adapt or redesign policies.

**CHAPTER PP 01 — RESEARCH AND INNOVATION** (*cont'd*)PP 01 22 (*cont'd*)PP 01 22 02 (*cont'd*)

The complexity of the issue requires a comprehensive mix of policies that jointly address the investment gap and create impact on the investment landscape. If we want to drive an effective and collective cultural change, these policies should range from education, skilling, reducing and removing barriers, to providing direct support and unbiased access to finance. In order to understand and monitor the impact, data that are currently split into large number of domains need to be brought together.

The project requires the Commission to:

- analyse the existing methodologies used by the different statistical bodies to collect data about investments in women-led ventures, aiming at creating better sources of data, develop ad hoc KPIs and perform statistics in VC and innovation ecosystems, with data breakdown on gender and diversity linked to hierarchy and performance;
- establish a comprehensive monitoring system of the way the investments which are supporting women-led ventures are made, with deal flows, ROI and performance data;
- establish new common methodologies to measure progress towards established goals and systematically monitor gender funding data in the different Union funding programmes;
- tracking & measuring the percentages of women-led businesses that EIF and EIB reach;
- create a new Union-wide repository for data and reports about investment by women and in women-led companies and venture capitals.

*Remarks*

The aim of this pilot project is to setup an observatory that tracks Member States initiatives and investments on innovation procurement in the digital economy and that engages public buyers, policy makers and citizens across Europe to share good practices. Using public investments smartly to speed up the adoption of innovative solutions is crucial for successful digital, green economic recovery. Europe needs to step up its game to safeguard its global competitiveness. This project, as cooperation between the Parliament and the Commission, could help in raising political visibility and impetus across Member States to make this happen.

Greater political engagement with continued regular Union-wide monitoring can reinforce the impact of economic recovery plans. It can encourage Member States to set higher ambitions for modernising public services with more cutting-edge digital solutions, which creates simultaneously high value jobs, including for innovative startups and SMEs.

*Remarks*

The objective of this pilot project is to develop and implement an organic system of dashboards and cockpits to allow policy makers and citizens to follow the implementation of the key Union budgetary policies linked to the Commission priorities and the implementation of the 2021- 2027 Multiannual Financial Framework.

The extensive use of analytics to monitor the implementation and execution of the Union budgetary policies is currently not exploiting the full potential that data can offer in this area. Monitoring and dashboarding is currently quite scattered by thematic areas or associated to specific actors and an overall detailed framework is still to be fully developed. The use of modern data management and business intelligence techniques offer the potential to exploit the wealth of data available in the Commission and to provide easy to use and intuitive visualisation and story-telling solutions drawing on an appropriate data ecosystem to answer to questions such as:

- How is the implementation of the Green Deal progressing based on available data;
- What is the progress achieved by the MFF initiatives at a given point? The project would cover the development of the data ecosystem and the associated solutions to provide an answer to this kind and other similar questions with the establishment of easy-to-consult dashboards and cockpits (set of interrelated dashboards) for citizens and policy makers. The proposed activities will be integrated in the Union budgetary performance framework and will complement and foster the on-going initiatives of the Commission, of Parliament and of the Council in this area, such as thematic policy scoreboards, knowledge repositories and monitoring systems.

*Remarks*

Thousands of Union-funded innovators developing innovations with market potential are being detected by the data-driven Innovation Radar initiative. A pilot project could meaningfully address the clearly visible opportunity to create a data-driven approach for building links between these communities via: (a) a digital platform; and, (b) targeted events (in person, virtual and hybrid). The Innovation Radar Bridge instrument can be linked directly with the European digital Innovation Hubs. This can lead to not only a measureable increase in interactions between these communities but also to growth in the injection of private growth capital into the commercial ventures of Union-funded innovators. This would build on the 'European Startups' pilot project that ends in Q1 2022.

**CHAPTER PP 01 — RESEARCH AND INNOVATION** (*cont'd*)PP 01 22 (*cont'd*)PP 01 22 05 (*cont'd*)

A thriving and growing community of Union-funded innovators developing innovations that are 'market ready' is emerging from programmes managed by the Commission such as Horizon Europe, LIFE programme and the Digital Europe Programme (all of which use the Innovation Radar method to detect such innovative potential at early stages). However, many such innovators do not have strong natural links to European investors who are seeking investment opportunities in key areas relating to Digital, Deep tech, Blockchain and Green Deal related breakthroughs. Moreover, there is a need to strengthen the links between these communities and policy makers (at Union, national and regional levels), given the strong contribution such innovations can make to key policy priorities such as climate change, COVID-19 recovery and the digital transition.

*Remarks*

This pilot project aims to engage Union regions in the monitoring process of the Sustainable Development Goals (SDGs). Taking into consideration the importance of timely, granular, reliable, relevant and up-to-date data for the success of the 2030 Agenda, the pilot project will provide a framework for regional authorities to monitor the SDGs in their territory. It will support and enhance regional statistical capacities in the collection of data, the monitoring and evaluation process. The data collected and consequently their evaluation will be made available to national and Union authorities for the overall evaluation of the progress towards the achievement of the SDGs. In addition, the project will provide tailored training to regional authorities for the proper collection and analysis of data to ensure the quality. In order to increase local ownership and increase openness and transparency, the project will make all the data available to the public and will create a platform where citizens can contribute to the definition of the priorities as well as to the monitoring and evaluation process. The data at regional level will be crucial in identifying potential gaps and areas in which action needs to be stepped-up as well-as the underlying reasons of the lack of progress. Conversely, it will pinpoint which factors facilitate the progress towards specific goals. Finally, the project will initiate a dialogue among Union regions on good practices and actions for the implementation of the 2030 Agenda.

The proposed steps to take for the implementation of this pilot project:

1. Determination of the focus level - NUTS 2;
2. Call and selection of the Union regions that will take part in the pilot project - building on the experience gathered by the competent Commission's DGs, the intention is to have a maximum of ten (10) regions/sub-national authorities participating in the pilot project, representative of different types, according to prior work on the SDG monitoring, geographic location, size, socio-economic conditions and statistical capacity;
3. Setting of the local SDG agenda - common priorities but also adapted to local characteristics;
4. Implementation strategy;

COMMISSION  
PILOT PROJECTS**CHAPTER PP 01 — RESEARCH AND INNOVATION** (*cont'd*)PP 01 22 (*cont'd*)PP 01 22 06 (*cont'd*)

5. Determination of methodology and selection of appropriate indicators - intention to cover all goals and most of the 169 targets - particular importance will be given to indicators that so far have not been used at regional level - the set of indicators will differ between the regions to reflect the local characteristics and needs;

6. Initiation of the monitoring process;

7. Collection of data;

8. Analysis and evaluation;

9. Reporting of the findings and coordination among regions about the steps ahead;

10. Feeding data to national authorities, the Commission and communication to the public;

11. Identification of shortcomings in the data;

12. Modifications to enhance the data collection and analysis procedure as well as the quality;

13. Identification of gaps vis-a-vis the progress towards the SDGs;

14. Drawing up a new action plan to address the gaps.

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The Union has the ambition to be a global leader in the fight against climate change and sustainability, mobilising the entire European economy with the objective to reach climate neutrality and change towards a circular economy while twinning this effort with the ongoing digital transformation. The green transition and the digital transformation will also constitute the two major pillars of the European post-COVID-19 economic recovery.

On the one hand, Europe must leverage the potential of digital technologies and solutions as enablers of the green transition since digital technologies have the potential to cut emissions across sectors by 10 times more than they themselves emit. A recent report produced by the GSMA and the Carbon Trust calculated that, in 2018, mobile technology enabled a cut in CO2 emissions almost 10 times greater than the global carbon footprint of the mobile industry itself. It is estimated that by 2030 digital solutions could help reduce CO2 emissions by 20%.

On the other hand, making 'Europe fit for the Digital Age' can also be at odds with the European Green Deal objectives. The ICT sector accounts for 5-9% of global energy consumption and without proper greening adjustment actions; this could increase to 20% by 2030. With more than 12 million tons per year, Europe ranks second only behind Asia in terms of e-waste. The generation of e-waste is growing by 3-5 % per year in the Union and less than 40% is being recycled. Value lost in e-waste, such as rare earth minerals and precious metals, is estimated at EUR 55 billion/year globally.

**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 01 (*cont'd*)

To ensure that new digital technologies, infrastructures and solutions enable the European climate goals (ICT for Green) and that the ICT sector itself reduces its carbon footprint (Green ICT), all relevant stakeholders must commit. They must improve energy efficiency, decrease overall energy consumption and utilise renewable sources where possible, as well as improve the material efficiency and circularity of their products to minimise e-waste and maximise the value for the economy and consumers.

Swift and resolute steps need to be taken by the market and policy-makers towards a more digital, circular, climate-neutral and modernised economy. Despite this, the Union does not have the forum to bring all relevant actors together. The Green Digital Alliance (GDA) is proposed as an initiative that aims to foster a strong commitment of the digital sector in favour of the environment. It should create a coherent and trusted framework that can underpin the digital industry's efforts not only to become climate-neutral but also to contribute to the climate objectives of other sectors such as agriculture, mobility, energy, urban development, and manufacturing.

Under the supervision of the Commission, the GDA will:

1. collect, screen and monitor commitments and results by market players and other organisations based on an agreed assessment and monitoring framework.
2. publish, examine and debate a study on the impact of new digital technologies on the environment.
3. propose and implement a Green ICT Scoreboard and a European Green Digital Award, to the most eco-friendly and disruptive European innovation, to be given at a yearly event co-organised by GDA. These initiatives will give visibility and reward good environmental practices.

The GDA will comprise the ICT industry and relevant stakeholders, including policy-makers from local and regional representatives and environmental NGOs. A trusted cooperative environment will be built to assess and monitor the commitments and their implementation, to share good practices and to develop policy recommendations.

Events are to be organised by the GDA and under the auspices of the Commission, in cooperation with local partners. Those can take place in different Member States, focusing on key policy areas linking the European Green Deal and the new Union digital and industrial strategies.

Areas linking the European Green Deal and the new Union industrial and digital strategies covers among other elements:

1. collection of pledges of the different organisations regarding their green targets to accelerate the progress towards the European Green Deal goals.
2. up-to-date methods assessing the impact of green digital technologies and services and monitoring the pledges of the members.
3. contributing to greening the ICT sector, with particular focus on the priorities of the Commission as defined in the European Green Deal, Digital Strategy package and Circular Economy Action Plan.
4. maximising the potential of ICT for Green, e.g. ensuring that artificial intelligence, 5G, cloud and edge computing and the internet of things can accelerate and maximise the impact of our environmental policies.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 01 (*cont'd*)

5. support to national and regional players implementing green public procurement for digital solutions.

6. improving the availability of information on the green characteristics of electronic devices sold in the Union.

The events should be web-streamed to ensure broad public coverage and accessibility to as many European citizens as possible. The outcomes of the events would contribute to policy evaluation.

PP 02 21 02 Pilot project — Enabling sustainable management and development of ports in the Rhine-Main-Danube basin

*Figures (Differentiated appropriations)*

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The ports on the Rhine-Main-Danube basin are significant nodes in the logistics and transport chains that form the economic backbone of the Danube region. While efficient ports are vital to the socio-economic development of their hinterland, the related ship traffic, the handling of cargo in the ports and the land-based hinterland connections can impact negatively the environment (e.g. pollution, CO<sub>2</sub>), the people and the economic potential of the port itself. Ports are also affected by environmental impacts (e.g. climate change i.e. extreme weather events, sea level rise, floods and droughts). Increasing environmental and climate awareness creates new challenges for the sustainable development of ports.

These challenges require the ports to identify and implement new environmentally friendly and sustainable solutions including energy efficiency improvements, environmental strategies and monitoring tools supporting the transition to renewable energy and zero-emissions, as well as full compliance with relevant Union environmental and climate legislation. Having in mind one important goal of the European Green Deal, the shift of cargo to inland waterway transport and rail, inland and sea-river ports in the Rhine-Main-Danube basin will become a focal point for sustainable development of the TEN-T Rhine-Main-Danube corridor.

To best manage the challenges in an effective way, a two-phase approach is envisaged:

- Phase 1 – pilot project – addressing environmental impacts stemming from the port activities of selected river and sea ports in the Rhine-Main-Danube basin by developing and implementing specific tools (Environmental Management Systems - EMS) and by defining a port specific action plan for sustainable port operations.
- Phase 2 – potentially, a preparatory action – building upon the findings of the pilot project and enabling the wide-scale roll out of an integrated ‘Green Danube Ports Action Plan’ as part of a new preparatory action. To this end, the recently established coordination and collaboration platform, the Rhine-Main-Danube basin Ports Network (DPN) could function as a multiplying governance structure.

**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 02 (*cont'd*)

In the pilot project, seven selected river and sea-river ports portraying a representative sample of the about seventy ports of the Danube region will jointly address their environmental responsibilities through the development and implementation of EMS, as well as the elaboration of port specific action plans creating a nucleus for wide-scale roll-out of environmentally sustainable port management and operations.

While each EMS is unique to an organisation's culture, structure, activities and environmental priority issues, within the project, the Plan-Do-Check-Act Model and the eco-management and auditing should be transferred from the beneficiary partners of the pilot project to other Rhine-Main-Danube basin ports as well as to identified target groups (users of the port, cargo owners, logistic service providers, general public). Therefore, an accessible generic framework supporting the planning of sustainable port operations, facilitating the mitigation of potential risks and encouraging port authorities and port and terminal operators to engage with sustainability agendas and plan their port operations and future capacity expansions and emerging port infrastructure project in a sustainable and smart manner will be defined. The elaborated port-specific action plans of the seven model ports should serve as good practices for the followers. Some of the measures proposed in the action plans will be of commercial relevance and even be bankable. Their implementation with the help of loans should be considered. Financing by financial institutions like EIB, EBRD but also new means of finance (energy contracting, crowd funding) will be investigated.

PP 02 21 03 Pilot project — Fostering digitisation of public sector and green transition in Europe through the use of an innovative European GovTech platform

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

*Objectives:*

This pilot project aims to support public administrations in the adoption of cost-effective and flexible digital solutions through the introduction of the GovTech ecosystem to the European public sector.

By following and scaling up the GovTech platform model, public administrations across Europe can work together more easily to solve shared challenges and more cost-effectively adapt existing projects to their individual needs. This includes, where feasible, the use of open source licensing.

The use of the GovTech model across the EU-27 would offer the benefits of scale to both public administrations and providers of digital services, as stated in the New SME Strategy (2020). Moreover, this project would help to develop the European GovTech market and support the public sector to access tailor made digital solutions quickly and efficiently. By creating a hub for different public administrations, participating businesses and citizens will be able to collaborate and exchange ideas, best practices can be circulated, and project costs shared, thereby enhancing interoperability and cross-border cooperation.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 03 (*cont'd*)

At the same time providers, in particular European SMEs and start-ups offering environmentally friendly, cutting-edge technologies or innovative solutions, would gain recognition as trusted partners in the delivery of modern digital solutions for public services. The project should be developed making use of the latest standards of service design available and in dialogue with a wide array of stakeholders, including public bodies and SMEs from across the Union.

This would support the modernisation of public administrations across the Union, by reinforcing efforts to achieve Europe's green transition through a more efficient adoption of innovative solutions. It is also an important tool to engage Union citizens.

This initiative also aims at supporting the Commission's objective to stimulate a digital transformation that will benefit everyone, including citizens and businesses. If fully implemented, the project will positively contribute to attaining the following objectives of the Union: (a) Digital Strategy, (b) New SMEs Strategy, (c) Industrial Strategy and (d) European Green Deal. This initiative also provides an important input into the new e-Government Action Plan, for which preparatory works are already underway, and as a response to the increasing digital needs. The innovative GovTech platform and solutions provided by cost-efficient and environmentally friendly enterprises will further contribute to the economic recovery of the Union, which is of critical importance in the post-COVID-19 reality.

The pilot project will achieve its objectives by combining top-down activities, bottom-up activities and direct research of citizens' views.

## Top-down activities:

This action aims to engage with public administration in a foresight exercise to promote the alignment of their strategies and implementation roadmaps of digital solutions. By doing so, the project will support the streamlining of public services and contribute towards Europe's sustainable transition. The scenario building approach, combined with the sharing of success stories, will be used to reveal the dynamics of a fast-evolving ecosystem. It should also identify where the use and joint sourcing of the digital solutions by public administrations may create new opportunities for SMEs and start-ups. This analysis will support efforts to use digital solutions in public administration to attain the Union's strategic objectives, including the fight against climate change and promoting the digital transition.

## Bottom-up activities:

This action aims to engage with the fast growing GovTech ecosystem to harvest ideas that help public administrations in adopting digital solutions. It will support the development or use of one common platform to gather challenges and allow other public administrations to contribute or form part of a consortium involved in a particular challenge and source solutions from providers. In the pilot phase, the action should concentrate on ideas to support one or more of the Union's objectives as mentioned in the strategic documents presented by the Commission in 2020.

For example: the Digital Innovation Challenge, launched by the pilot project 'Reuse of digital standards to support the SME sector', and approved under the 2019 budget, can be used as a source of inspiration given that this format has proven to be successful by engaging a wide ecosystem of players and crowdsource innovative ideas (\*).

**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** *(cont'd)*

PP 02 21 *(cont'd)*

PP 02 21 03 *(cont'd)*

Direct research with citizens:

In addition to the above-mentioned activities, this action aims also to use innovative service design methods to include the views of citizens in the above streams of work. This all-inclusive and all-embracing approach should try to unveil how citizens perceive the new opportunities offered by digital solutions in streamlining communication between administrations and citizens, or combating climate change and the role of public administrations in this process.

(\*) The Digital Innovation Challenge generated:

- more than 6 000 unique visits to its website,
- contact with more than 1 500 SMEs and start-ups,
- dialogue with more than 320 SMEs, e.g. in workshops, e-mails, info sessions,
- more than 100 registrations to the challenge (30% conversion),
- more than 49 complete applications with innovative ideas around the reuse of solutions provided by Union programmes (50% conversion) The top ideas touch upon (1) mobility / smart cities (2) cybersecurity and (3) FinTech,
- more than 10 applications were shortlisted and took part in a co-creation bootcamp.

The COVID-19 outbreak has dramatically affected the Union’s tourism sector, as a result of the forced closure of restaurants, bars, snack-bars, hotels and others all over Europe. It seems reasonable to expect that the aftermath of the crisis will bring changes to the way this sector operates. Particularly, consumers may become more concerned in ensuring the safety of the processes, that the staff is well-trained and that hygienic conditions are verified.

This pilot project aims at developing the digital infrastructure of SMEs operating in the tourism sector around the Union. While digitisation has always been important, this situation has significantly increased its value and importance for SMEs, which studies have shown are generally less digitalised than larger companies. If these companies do not adapt, many will go out of business.

In practice, this pilot project will support companies of the tourist sector, in particular SMEs, so they can develop and implement digital solutions as a strategy to overcome the challenges posed by this crisis. These solutions should include booking systems taking into account social distancing, artificial intelligence (AI) solutions managing crowds, and disinfection robots to clean quickly public spaces.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 04 (*cont'd*)

These solutions should be implemented on two levels. First: creating a free public digital platform for the different industries operating in the tourism sector. This platform will promote interaction between clients and companies through booking systems taking into account social distancing and AI solutions managing crowds, for instance, allowing to order food to take away or making bookings according to the plan of the restaurants, bars, hotels, etc. In practice, the owners may introduce videos, photos and other sources of information in the app, allowing clients to decide exactly where and when to sit and be provided services and make their bookings accordingly. On the other hand, owners can improve part of their systems by developing and implementing the necessary tools and infrastructure to better connect them with their clients. With this app, consumers will thus feel much more confident to go to bars, restaurants, hotels and other companies in the tourism sector.

Second: introducing digitisation in the in-house operations of companies operating in the sector, so that restaurants, bars or hotels not only increase their productivity, but also become safer for all the parties involved, which may prove to be particularly important in the near future. To attain this, companies can, for example, use disinfection robots to clean quickly public spaces or develop and implement solutions that decrease the need for person-to-person interactions, such as QR code systems or cashless payments systems.

The project will furthermore support the tourism sector by providing consultancy services to the owners. These contents are particularly designed for their type of businesses. And the fact that it is an EU app will not leave anyone - that is to say, any company - behind.

This pilot project will have as its main outcome an increased level of digitisation of the SMEs in the tourism sector, through which they are expected to become more prepared to deal with the changes brought on by the COVID-19 outbreak. Supporting the digitalisation of European SMEs is a clear priority of the Commission that has become even more important in the current situation. Given the importance of SMEs in the different industries of the tourism sector, both as a source of value-added and jobs, it is critical that effort is made to support the companies of this sector during this crisis.

PP 02 21 05 Pilot project — Sustainable rural mobility for COVID-19 resilience and support of ecotourism

Commitments	Payments	Commitments	Payments	Commitments	Payments
990 500	997 625	1 000 000	250 000		

*Remarks*

This pilot project pursues the ideas of the European Green Deal, the goal to 'leave no one behind' and to ensure a 'just transition', which need to be applied also to rural mobility. This pilot project aims indeed, on the one hand, to reduce CO2 emissions from transport in line with the targets set by the European Climate Law and, on the other, to promote better mobility connections in remote and rural areas as well as capacity building, taking into account and specifically including people who cannot, or do not, want to own a car - e.g. women, young, elderly, disabled and socially disadvantaged people - to foster accessibility and inclusion.

**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 05 (*cont'd*)

After one year of the COVID-19 pandemic, with all its socioeconomic consequences besides the devastating loss of lives, there have been obvious impacts among other aspects of the labour market into a more remote working culture. If certain aspects of the tele-working patterns are maintained, both for public and private sectors, this could trigger a remarkable amount of individuals and families to consider settling in rural areas, in order to benefit from cleaner air quality, closer contact to nature and a calmer and less noisy environment. Whether they do it or not might be highly dependent on whether they can be guaranteed a mobility not necessarily dependent on the use of private car in order to be able to commute to urban area when required professionally and to satisfy the needs of daily lives within the region. This, together with the already existing needs for population currently living in rural areas to be able to keep performing their existing economic activities while reducing their carbon footprint, requires further sustainable solutions at the rural level, making use and further developing smart and shared mobility options. Those could be also extremely useful also in view of the ever-growing demand for rural ecotourism, one natural component of which is making use of the most sustainable travel mode to reach the destination and move within the region.

With all this in mind, it is crucial from a public policy point of view to be aware of the current scenario and the twofold opportunity it represents of both mitigating and even reverting the current trend of rural exodus, which has aggravated the territorial imbalances between urban nodes and remote areas, while ensuring that also rural transport, which nowadays is heavily dependent on fossil fuels, contributes with its share to the timely emission reduction efforts required by the European Climate Law. In this regard, it is important to stress that transport accounts for a quarter of the overall emissions and is indeed the main sector which has not achieved a reduction of those in the last decades, which makes the project in each of its components crucial, and particularly fostering a modal shift.

While still maintaining the need for structural goals and related concrete initiatives proposed in the original proposal (i.e. increased availability and connectivity with public transport and commuting lines, as well as coordinated cooperative solutions for increased frequency of passage in mountainous regions with dispersed villages, among others) and particularly advancing on the opportunities that digitisation and the aimed digital transition offer for door-to-door journeys and sustainable and smart mobility, for instance in terms of shared e-bikes or car pooling also at the rural level, the latter can also be fostered by some creative simple solutions, such as the widespreading of the LEADER-supported 'Mitfahrerbanke' (co-riders' benches, in English). Those are indeed simple benches designed and placed strategically in villages to make it easier to take along and ride along on routes that are rarely used by public transport, offering both structural and punctual mobility solutions (for instance related to ecotourism) and hence promoting the shared mobility culture and hence protecting the environment.

In conclusion, beyond ideas for possible concrete additions, it is important to grant this pilot project continuity, as the EU policy process of sustainable mobility in rural areas is still at an early stage of development. The pilot project will therefore continue focusing on interconnecting mobility needs with already ongoing projects like 'smart villages', 'SMARTA' and others, and will in particular focus on the recovery potential of rural and remote areas in the post COVID-19 period. As mentioned, it should keep its aim to look at how to best organise and develop rural areas with their mobility solutions to connect smoothly and in the most sustainable way with the nearest urban agglomerations, as well as with neighbouring villages. In this sense, drawing on the success story of SUMP in the urban context, the establishment of a rural equivalent of integrative sustainable rural mobility plans could be considered.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 05 (*cont'd*)

Finally, and while awaiting the upcoming Commission Communication on a long-term vision for rural areas, this pilot project clearly falls within the scope of the objectives of the recently presented Sustainable and Smart Mobility Strategy (SSMS), and in particular its Flagship No 9 'Making mobility fair and just for all', which points out that it is crucial that mobility is available, accessible and affordable for all, and particularly that rural and remote regions are better connected. As explained, it has also clear links with other European objectives such as connectivity, intermodality (including walking and cycling, as active modes historically enrooted in rural mobility), sustainable regional development, cohesion, employment, Just Transition, digitalisation, research and development and innovation, and as such possibilities to establish links to other ongoing projects could be found, and particularly with the goal of establishing a European multimodal transport information, management and payment system, also present within the SSMS objectives.

The pilot project addresses industries that lack digitalisation. It should seek to identify the regions with a low Digital Technology Integration Index (DTII) and Digital Transformation Enablers' Index (DTEI). It will seek to identify the best match between digital technologies (Social Media, Big Data, Internet of Things, Robotics, 3d printing, Cybersecurity, Mobile services, Artificial Intelligence, Cloud Technologies, etc) and each industry (Aeronautics, Automotive, Biotechnology, Food, Chemicals, Construction, Cosmetics, Defence, Electrical and Electronic Engineering, etc) and to involve stakeholders from the industries most affected by the lack of digitalisation and operationalisation of remote working. The pilot project could also provide contingency plans for each industry, providing the protection mechanisms for processes and workers in order to ensure the continuation of their activities. The pilot project should also address industries considered of strategic importance.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project intends to provide support, knowledge and, in a later stage, invaluable lessons to accelerate the ongoing completion of the Single European Railway Area. The pilot project should identify and address shortcomings within the rail ecosystem by analysing one select route with a holistic approach centred on cross-border operations.

The route for the pilot project should be the one between Munich and Verona. Three Member States (DE/Bavaria, AT/Tyrol and IT/Veneto) would be involved along the line that includes one of the flagships of the TEN-T infrastructure cross-border construction projects: the Brenner Base Tunnel.

The holistic approach should ensure that all aspects and needs are identified and considered on an equal footing. The aim is to cover the entire transport chain, ranging from customers, to transport operators, to railway undertakings, as well as infrastructure managers and regulatory bodies.

The main goal is to establish a joint set of rules for the corridor infrastructure spanning three jurisdictions and eliminating the ensuing obstacles for rail traffic. Today, this type of joint arrangements are not foreseen by legislation. The actions required to prepare for this, and which could benefit other European infrastructure, should include:

Obligatory requirements to engage in collaborative decision-making in rail traffic operations and to engage in binding performance agreements between all stakeholders in a (multimodal) rail freight transport.

Strategic allocation of rail infrastructure capacity for different types of traffic (i.e. several years in advance), in this case in particular for international rail freight traffic, taking into account the overall needs and requirements from Italy, Austria and Germany, and the alternative road transport transiting the Alps.

Capacity management and traffic management at the level of the proposed corridor, e.g. by ensuring governance or appointing a supra-national entity in charge of defining and imposing such rules and procedures in a binding manner.

Requirements for joint decision-making by rail regulatory bodies as concerns international traffic going beyond the provisions on cooperation between regulatory bodies defined in Article 57 of Directive 2012/34/EU of the European Parliament and of the Council of 21 November 2012 establishing a single European railway area (OJ L 343, 14.12.2012, p. 32).

Joint centralised and automated traffic management, including interfaces with interlocking/signalling system, on networks of different rail infrastructure managers.

The methodology that emerges over the course of the work will be closely documented so the output will go beyond producing a recipe to optimise the pilot route in order to provide a European best practice guideline potentially applicable throughout the entire Single European Railway Area.

PP 02 21 09 Pilot project — IRS Smart Cities project: new railway station concept for green and socially inclusive smart cities

p.m.	525 000	700 000	175 000		

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project is intended to develop a shared methodology for transforming existing stations, or designing new ones into socio-technical systems operating simultaneously as city's greening engines for the surrounding environment, and new urban hubs aggregating multiple services fully integrated with energy-efficient and socially-inclusive mobility.

The pilot project is meant to contribute to the achievement of a climate-neutral society, as well as to the implementation of the UN Sustainable Development Goals concerned with sustainable, smart and inclusive cities, transport and infrastructure, resources management, climate mitigation and adaptation, reduction in the emissions of greenhouse gases, health, environmental protection and biodiversity regeneration, sustainable land use, and gender equality. As such it can furthermore contribute to the research and innovation activities of the Shift2Rail Joint Undertaking, or its successor in the context of infrastructure, digital and multimodality.

Railway stations connect multimodal mobility services and the rest of the urban environment. In most cases they also are nodes of the transportation, energy, telecommunications, water distribution and waste disposal infrastructure networks, with a high density of installed technical equipment. As such, they have a big unexploited potential both as new urban vital centres and as installations of advanced engineering solutions for environmental protection, sustainable solutions concerned with mobility, collaborative economy, and social services, contributing to pursue the objectives of the European Green Deal in terms of: mobilisation of the industry for a circular economy, clean and affordable energy supply, smart and resource-efficient building, zero urban pollution ambitions, respecting ecosystems and biodiversity, implementing the Farm to Fork Strategy, etc, in organic connection with smart and multimodal mobility (rail, e-mobility, car sharing, bike-sharing, etc.). Moreover, stations can give a response to health crises (e.g. COVID-19) and natural disasters (due to climate change), as they can be readapted or converted to temporary reception facilities, shelters, hospitals, and any other typology that needs availability of big spaces.

**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 09 (*cont'd*)

All these goals will be integrated and achieved within the project proposals developed for stations with a common methodology.

The model is aimed to develop a new concept analysis that should represent a paradigm shift in designing all the social activities connected with the railway stations in all the areas in which they operate, broadening its original purpose and functions as a simple departure/arrival point of rail transportation. The new railway station can be not only a less energy-wasting, less polluting facility, but in fact a greening plant in the city that contributes a net positive balance to the environment.

At the same time, it can become a dense node of economic and social activities inherently integrated with energy-efficient mobility solutions, multiplying opportunities and solutions for economic growth, collaborative economy, and social inclusion.

In order to achieve an adequate level of interoperability of the transportation networks in the Union, a certain degree of standardisation of the essential features of the railway stations is required and, as a consequence, most of the fundamental elements of the railway station design and operation can contribute to deliver innovation to a greater extent. For this reason, the new railway station concept design, operation and management must be conducted according to a common European-wide framework or methodology that, while enabling a sufficient latitude to accommodate specific local conditions or prevailing opportunities, may still guarantee the necessary degree of harmonisation and common objectives.

Furthermore, the Union needs to establish methods and tools to better assess the impacts – in all their dimensions – of innovative patterns affecting urban planning practices and urban mobility in general. A common methodology to streamline and coordinate these instruments will help decision-makers to develop policies in support of the participation from public and private actors to the implementation of innovative and coordinated solutions for mobility. Therefore, the resulting methodology should incorporate business modelling principles, behavioural-economic models and co-design approaches targeted at incorporating the inception into the design of the technical infrastructure. The inclusion of the socio-economic drivers of mobility, climate-friendly and social-inclusive behaviours and businesses will drive and complement the innovation brought in the stations and their surrounding areas, while providing economic actors with incentives for investments at the same time.

Bringing together station managers and railway operators, mayors and local administrations, public and private transport operators, Union institutions, citizens' representative bodies, NGOs, and research institutions around a common plan targeted to the urban environment surrounding and including the public stations will streamline public interventions and private investments, while providing an institutional framework to the model that will be created.

The pilot project will be developed through the implementation of at least four 'Living Labs' in four different Member States. It will follow an applied research pathway mixing fundamental research with the design and creation of new models that would be scalable and applicable to real contexts.

On the one hand, the pilot project's partners will cooperate in order to know, understand, and explain which operative options can make railway stations and their surrounding neighbourhoods becoming the primary driver of sustainable practices of mobility, logistics and work, and resilient infrastructures able to readapt when necessary. Successively, taking advantage of the outcomes of basic urban research, the project will investigate how stakeholders can fully benefit from the new model proposed which aims to create value for stakeholders and citizens.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 09 (*cont'd*)

Living Labs will be developed in the following way:

(1) Conducting workshops with committed stakeholders to establish a working methodology and management structure for the pilot, and to launch the project co-design activities in open collaboration and interface with the Shift2Rail Joint Undertaking or its successor.

(2) Conducting workshops to assess under-developed railway stations potential as multi-service, mobility-hub, urban greening infrastructures, with respect to their possible contribution to the UN Sustainable Development Goals and the European Green Deal's objectives.

(3) Developing methodological criteria and defining quantitative and qualitative deliverables for the co-design and the transformation of railway stations into multi-service, mobility-hub, urban greening infrastructures, while ensuring adequate evaluation of the results achieved once the plan is implemented compared to the initial expectations.

(4) An open and constantly upgrading approach to the management of the stations will empower citizens to co-develop alternate mobility solutions for social inclusion, collaborative economy, and e-and smart-mobility and implementing it more flexibly. The coherent adoption of the model should help local and national administrations achieving the following objectives:

- fostering territorial cohesion through public transport and alternative mobility solutions
- decarbonisation of mobility and urban energy sources
- defining mechanisms to ensure implementation of the circular economy principles within the each and every businesses and services operated in station and in uninterrupted continuity with its surrounding environment
- promoting new partnerships, especially between public administrations, large industrial groups, local institutions and SMEs while integrating citizens and collaborative small-sized solutions into the overall planning and policy-making process
- understanding how these infrastructures can be helpful for the community in case of emergency, sanitary crisis or natural disaster.

(5) Organising a final conference presenting the pilot project's results in every living lab and showcasing the attained models of transformed railway stations.

**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 21 (*cont'd*)PP 02 21 10 (*cont'd*)

As expanding the charging infrastructure and increasing grid capacity are important issues for the European Green Deal to succeed, this can be improved from the demand side by increasing both the energy efficiency and on-board power generation to vehicles. Study programmes do mention both energy efficiency of vehicles and innovations on grid/charging infrastructure utilising smart charging solutions. However, no studies have linked the combination of energy efficiency on vehicle-level, on-vehicle energy generation and the impact on charging infrastructure and tested this in real-life using pilot projects. The European Green Deal has announced that 1 million charging stations are needed to keep up with the introduction of electric vehicles. Focusing on energy efficiency and on-board solar power generation might offer less energy demand on this charging infrastructure. Policy can then be adapted to fit this opportunity. Early studies show promising results. An increase of 20% to 40% of the vehicle efficiency for vehicles decreases energy demand of these vehicles by almost 60%. Additionally, a grid operator in the Netherlands has shown that investments in charging infrastructure for electric vehicles might drop by over 30%. This is a result of self-charging energy-efficient vehicles able to charge at a fast charging rate even on 220 – 230 V grids. Energy flow models of research and technology organisation could be used to determine this effect in greater detail.

The goal of this pilot project is to assess the energy efficiency of personal vehicles, public transport vehicles and delivery vehicles (in terms of kilometres driven per kWh consumed), and the potential for on-board solar power generation by experimenting with real-life use cases. This pilot project will be one of the first experiments with on-board solar generation on a larger scale over different modalities and locations. The resulting charging requirements of each vehicle could provide evidence for strengthening Union policy on reducing emissions from transport further and faster. Such adapted policy moreover will stimulate the development of Union value chains for on-board solar power generation, which in turn has the potential to increase employment opportunities.

A comparative study will be conducted on charging needs of high and low energy efficient vehicles. The vehicles aim to have comparable specifications in terms of person capacity, load or volume. Besides energy efficiency, energy generating vehicles and non-energy generating vehicles will be assessed as well. Energy generation potential on vehicles differs per location, therefore different locations in the Union will be evaluated with a special focus on southern and eastern countries in the Union.

Finally, it will be assessed how specifically the quantity and spacing of elements in the charging infrastructure could be decreased. In conclusion, this pilot project should be able to yield insights into the effect of vehicle efficiency and on-board solar power generation which can provide added value to the drafting of Union policies to enable electric vehicles and stimulating Union value chains and employment in this field.

PILOT PROJECTS**CHAPTER PP 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PP 02 22 (*cont'd*)PP 02 22 01 (*cont'd*)*Remarks*

The objective of this pilot project is to analyse novel forms of contracting in the digital economy, such as for example, contracts exclusively concluded through smart products that operate autonomously or through voice-enabled smart assistance. While these technologies are promising for both citizens, consumers and businesses, new forms of AI-based contracting raise the question if national and Union private laws are adapted to these situations. Existing problems and obstacles in national and Union private laws to the (cross-border) use of those novel forms of contracting needs to be assessed. Potential contract law issues to be looked at:

- the conclusion of a contract (under which conditions and to what extent are contracts, in which autonomous devices are involved, binding for the parties);
- the consequences of errors (who bears the responsibility of errors caused by a smart product/incorrect voice transmission);
- information requirements imposed on the trader.

The objective of this pilot project is twofold:

- to propose a draft comprehensive Union strategy on UAM addressing all aspects that will impact the local decision-makers (national, regional or local level): vehicles, airspace management, safety, security, environmental impact, ground infrastructure, local transport network, energy, privacy, local economic impact, insurance, funding/financing, etc;
- to prepare a holistic guidance material or a handbook for local decision makers providing concrete support for the local deployment of UAM including the development of certification of vertiport operators.

*Remarks*

This pilot project continues the ongoing pilot project 'European Consumer Food Waste Forum' which brings together leading experts in the field and other relevant stakeholders to gather data and develop a variety of evidence-based, practical solutions to reduce food waste at the household/consumer level.

The first phase of the ongoing pilot project brings together experts from the Member States who will develop ways to bring closer multidimensional interventions in a variety of fields and will identify campaign tools, which can be applied to reduce consumer food waste. However, the first phase of the pilot project foresees limited funding for the dissemination of experts' findings, in particular through the production of related communication tools. It is expected that the experts will produce a substantial material of valuable findings and recommendations on how to reduce consumer food waste in the Member States.

The communication deliverables expected from the first phase include:

- A web page with the deliverables of the project;
- An executive summary of the project's deliverables (tools, best practices and recommendations for consumer food waste prevention) in all official languages of the Union;
- Three leaflets produced with key recommendations for priority target audiences, translated in all Union official languages; and
- A dissemination event organised at the Parliament.

The aim of the second phase of the pilot project is to facilitate - through interactive online tools and other communications outputs - the uptake of the findings of the food waste experts by stakeholders engaged in consumer food waste prevention. This way, the Forum's outcomes can help to inform the design of the most effective strategies, initiatives and tools to reduce consumer food waste, tailored to the needs of target audiences in the Member States.

Based on the deliverables of the European Consumer Food Waste Forum, the expected outcomes of the second phase are:

- Development of interactive online tools and other communications materials (e.g. short videos) to facilitate implementation by stakeholders of the Forum's evidence-based recommendations and best practices towards the reduction of consumer food waste;
- Organisation of a public event to disseminate the outcomes reaching a broader stakeholder community;
- The interactive online tool (including data visualisation) and other communication materials (e.g. videos) which will enrich the web page set up in the first phase. The online communications tools will be user-friendly and targeted at the primary user groups engaged in food waste prevention (e.g. public authorities, food business operators, educators, school students, consumers). While focussed on food waste prevention, they may also be linked with other consumer-targeted initiatives (e.g. on nutrition, donations, and community actions, ICT solutions etc.).

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Digital technology has lowered the entry cost to mass media and opened up a tightly regulated market to a whole range of new players. However, as the business model of traditional media disintegrates with it, a trend towards concentration of ownership can be observed. While the Internet remains a technological tool for accessing an unlimited variety of offer - market failures, regulatory shortcomings and the nature of algorithmic news distribution lead to significant limitations of media pluralism, which is an important precondition for the freedom of information and expression.

Thus, transparency of media ownership is considered a key prerequisite for safeguarding these freedoms. It elevates the public's level of media literacy and enables meaningful concentration control and regulatory action.

The pilot project will:

- create publicly available, searchable databases for up to six European countries in the respective relevant languages to provide profiles of the most relevant media outlets that shape public opinion, as well as of the corporate entities and individuals behind. The methodology of selecting the sample, of data research, analysis and presentation should be based on an existing one that is well documented, already tested and implemented in other parts of the world and thus can be considered as a widely accepted and legitimate instrument in this field;
- feature a narrative part to accompany the database and contextualize the county-specific environment in which media operates, including a detailed legal assessment that is based on a widely applied template to allow for comparative global analysis;
- include the measurement, computation and publication of up to ten indicators of risks to media pluralism in the legal, economic and technical domains, based on a reliable and tested methodology that builds on the already existing work of the Media Pluralism Monitor (MPM) in this field;
- publish and promote the findings and their usage by means of the online resource itself, but also through supporting actions, such as launch events and press conferences.

PP 03 21 03 Pilot project — Monitoring the impacts of free trade zones and guidelines for future modernisation in light of the European Green Deal

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

To contribute to regional development and to increase competitiveness, some Member States have created free trade zones, which offer an attractive combination of tax-and-tariff incentives and streamlined customs procedures and/or reduce legislation. Despite free zones existing for years in the Union, there is only very little research on their impact and few comprehensive processes for monitoring and evaluating their performance. In addition, free zones are being increasingly used outside the Union, especially in developing countries, with the objective to attract foreign direct investments.

In September 2019, the Council adopted a decision to meet the OECD recommendation on enhancing transparency in free trade zones. This pilot project helps the Commission to develop an impact assessment of the most relevant free zones in the Member States, such as 'logistics hubs', zones specialised in a certain industry or 'multi-activity' free zones (a zone being a mix of the two or specialised in several industries), to analyse their direct and indirect economic contributions, their social and environmental impacts as well as their support to regional integration and competitiveness and weight them against an estimate of the costs of these free zones for all Member States. In addition, the project would compare the use of free zones in the Union with their use by third country jurisdictions.

With the overall objective to look at whether the fiscal incentives of these free zones are effective, this study should specifically look at the estimates of job creation (and the quality of jobs created) and the impact of free zones in terms of foreign direct investments for the Member State (e.g. would these investments have been made in the country even without the free zone?). To the extent possible, the study could also look at the impact on the risk for existing domestic businesses to relocate from the national territory to the free zone and provide examples if it finds any. To the extent possible, the project should compare these results with existing literature looking at similar indicators for zones outside the Union.

In addition, this study should include some reflection on how to develop European guidelines to ensure the social and environmental impacts of free zones are in line with the European Green Deal's objectives. This pilot project will develop proposals to ensure fiscal incentives by Member States are also conditional on a range of social and environmental indicators in order to drive existing and potential future free zones towards a sustainable development impact, for example specialising them into manufacturing activities in renewable energy or innovative products offering low-cost solutions to meet the Paris Agreement's objectives.

The Parliament is currently working on the Commission legislative proposals on crypto assets and the Distributed Ledger Technology (DLT) pilot to create a new regulatory framework for these new types of assets which hold a lot of promise to unlock new sources of financing for SMEs and give consumers additional choice and opportunities. In that context, the challenges of regulating and supervising the next wave of DLT based technologies, decentralised finance (Defi), have been raised, as these applications often do not have an identifiable issuer. However, this could potentially be addressed by so called embedded supervision (see Raphael Auer, Embedded supervision: how to build regulation into blockchain finance, BIS Working Papers | No 811 | 16 September 2019). In order to inform and prepare the application of the new legislative instruments to decentralised finance, the purpose of this pilot project is to test develop an experimental pilot project for technical solution to allow supervisors to engage embedded supervision of Defi applications by directly linking supervisory data applications to Defi applications. The pilot project will be implemented by the Commission in close cooperation with the European Forum of Innovation Facilitators, which brings together supervisory sandboxes and innovation hubs from all Member States.

Ecotourism involves participation in the conservation of the natural areas visited, providing constructive ways for good management and conservation of these natural areas. It offers opportunities for nature experiences that provide a better understanding of this environment and the opportunity to discover and protect nature, culture and local traditions by tourists. Ecotourism and traditional handicraft products attract those tourists who want to interact with the natural environment and broaden their level of knowledge, understanding of local values.

Information campaigns should encourage tourists to take into account the importance of ecotourism, environment, water and forests and celebrate operators with best planning methods in terms of nature conservation and protection as well as sustainable development.

In order to support the further development of European ecotourism, to make European rural areas more attractive to tourists, such campaigns need to be financially supported.

*Remarks*

Within Europe, a broad framework of rules applies to commercial road transport. These rules concern minimum social, market and technical standards to be complied with by drivers, operators, vehicles and cargo.

Effective and efficient enforcement of these Union rules is crucial for improving road safety for all road users, ensuring adequate working conditions for those who earn their living carrying goods or passengers and safeguarding fair business conditions for those who invest in establishing a road transport company.

However, due to the ever-increasing cross border nature of transport operations, traditional enforcement came to its limits and is now broadly conceived as insufficient, burdensome and costly for the whole sector. Carriers and drivers lose money and business opportunities due to lengthy, random and unnecessary controls while enforcement authorities are facing insufficient human and financial resources to effectively control compliance with the complex framework of rules. In addition, the difficult access to data related to drivers, operators, vehicles and cargo leads to even more constraints for enforcement authorities.

The COVID-19 pandemic additionally showed the shortcomings of traditional enforcement based on physical controls and paper documents. The existing cross border enforcement tools in road transport allowing for electronic exchange of data for control purposes, such as ERRU, RESPER, TACHOnet have their own limitations and consequently they fall short of providing substantial efficiency gains and relief for authorities, operators and drivers alike.

In addition, the introduction of new provisions under Mobility Package 1 extends the scope of necessary controls thus requiring even more efforts from enforcement authorities. Future improvements of the smart tachograph and the equipment of control officers with remote detection devices to communicate with the tachograph while the vehicle is in motion is the first step. Furthermore harmonising risk-rating systems and enabling electronic exchange of documents on posting of drivers via IMI system as well as incorporation of the recently adopted eFTI regulation will be important next steps towards improving the effectiveness of road enforcement.

However, these systems and tools are insufficient to bring significant gains in simplification and efficiency of controls. In addition they are being deployed unconnectedly, which does not guarantee synergy effects.

Therefore, the necessity to create a connected modern road transport enforcement system is undisputed. Especially targeted risk-based controls, contactless and paperless inspections based on access to real-time digital data on drivers, operators, vehicles and cargo needs to become a reality across Europe. This would make controls less burdensome, less time consuming, less costly and more efficient.

The first step to create such a SEDEA (Single European Digital Enforcement Area), requires in-depth testing on the ground in order to draw the right conclusions on how to gradually replace traditional random physical controls at the roadside and at the premises with digital and targeted ones. This particular pilot project aims to provide the necessary data, which would allow the Commission to come up with sound strategy on digital enforcement in the future.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 03 — SINGLE MARKET** (*cont'd*)PP 03 22 (*cont'd*)PP 03 22 03 (*cont'd*)

## Scope:

The digital enforcement pilot project will cover the compliance with Union rules in three dimensions: human (drivers and operators), vehicle and freight. It will cover the controls of driving and rest time rules, posting, cabotage, all kind of licenses such as community license, driving license, driver's attestation, tachograph cards, roadworthiness test of vehicles, weights and dimensions, with the aim to gradually give controllers an access to this comprehensive set of data in real time. The ultimate goal is to provide solutions for replacing physical controls at the roadside and at the premises of road transport undertakings by remote/automated controls without stopping the vehicle and/or visiting the premises of the undertaking.

## Geographical area:

The large share of international transport on particular stretches of the SCAN-MED Corridor makes the problem of conventional roadside controls for hauliers and enforcement authorities visible. Consequently, the digitalisation of transport documents and data exchange systems between Member States are both in the interest of hauliers and of the responsible enforcement authorities and therefore comparatively well advanced on the SCAN-MED Corridor. In addition, the Austrian stretch is almost completely upgraded with ITS-G5. The pilot project will be looked upon favourably by the industry and the enforcement authorities, both of which are supported by the already existing ITS G5 infrastructure.

In 2016, the Court of Justice of the European Union clarified in its VOB decision (C-174/15) that the lending of e-books is permitted under the public lending exception enshrined in Directive 2006/115/EC of the European Parliament and of the Council of 12 December 2006 on rental right and lending right and on certain rights related to copyright in the field of intellectual property (OJ L 376, 27.12.2006, p. 28), but practical problems prevent libraries in Europe from using this exception. This pilot project will look at what practical improvements are needed in order to allow libraries to genuinely benefit from the public lending exception for e-books in practice. Whereas Member States had to transpose the Directive (EU) 2019/790 of the European Parliament and of the Council of 17 April 2019 on copyright and related rights in the Digital Single Market and amending Directives 96/9/EC and 2001/29/EC (OJ L 130, 17.5.2019, p. 92) by June 2021, mapping the national measures aiming at facilitating distance access to the libraries collections will help in systemising the harmonisation of Union copyright rules.

Directive (EU) 2019/790 has introduced a Union-wide exception that allows libraries to digitise their collections, but not to make them available online. According to Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of copyright and related rights in the information society (OJ L 167, 22.6.2001, p. 10), Member States can introduce exceptions that allow libraries to make available their digital collections through dedicated terminals on the premises of the institutions, not online. The pilot project will be based on one or more studies to assess whether national measures implementing Union copyright rules duly achieve the objectives of facilitating public access to culture and education while respecting rightsholders' interests, and whether these measures could be adjusted, either through additional national measures or by some targeted changes in the Union legal framework, so that Member States have more flexibility to address efficiently the needs to access libraries digital collections.

Digital learning and collaborative work solutions have become central for schools and universities. The pilot project could further assess what copyright issues have arisen in the context of education & research at a distance, notably in the light of the recent Union and national case-law, and what legal and technical solutions could be found to address the growing needs in the field of distance education and research.

**I. Context**

The COVID-19 crisis is extremely challenging not only for inter-state relations, but also for relations between neighbouring territories divided by national borders. It has generated deep pressure on cross-border regions which represent 40 % of the territory of the Union, and also on cross-border workers (representing 2 million people).

At the same time, the crisis revealed a lack of cooperation and coordination across borders as well as strong interdependencies of border areas seen as functional areas. Decisions on one side of the border have had a direct impact on the other side of the border.

At the beginning of 2020, the crisis first provoked uncoordinated border closures, as well as several uncooperative actions by both public and private actors. While some Member States decided to close entirely their borders, others drastically reduced the number of border-crossing points in order to slow down the spread of COVID-19. Although the free movement of people and goods is a cornerstone of the single market, the COVID-19 crisis has hindered the application of this key principle. Border bans or controls put cross-border workers, primarily in the health sector, but also in the field of construction, agriculture or transport in an alarming situation. Border shutdowns have had a strong negative impact on cross-border citizens, the local economies, businesses, the transport of essential goods and cross-border public services (e.g. education, healthcare). In some city regions or even whole Member States like Luxembourg, where the health system is heavily dependent on cross-border workers, the interruption of cross-border public transport connections created complicated situations. The situation has also had an impact on trust between partners across the borders which has been built over the years, and which is essential for cross-border cooperation.

Despite many years of institutionalised (Interreg) and informal cooperation between border regions, the existing relations did not always allow an efficient and quick response to cope with the outbreak of such a crisis. Existing cross-border structures such as the European Grouping for Territorial Cooperation were rarely involved in the elaboration or in the implementation of emergency measures despite their knowledge on the functioning of administrative and political organisation on both sides of the borders.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 05 — REGIONAL DEVELOPMENT AND COHESION** (*cont'd*)PP 05 21 (*cont'd*)PP 05 21 01 (*cont'd*)

Nonetheless, the COVID-19 crisis has also allowed the development of new forms and initiatives of cross-border cooperation, regarding particularly the healthcare sector. Several regions neighbouring to Grand Est (FR) demonstrated solidarity by welcoming hundreds of patients in their intensive care units and covering hospital transfer costs. In the cross-border conurbation of Gorizia (IT)-Nova Gorica (SI), although border controls were restored, the mayors of these two cities continued collaborating and exchanging on this common emergency. Thanks to daily updates from the Mayor of Gorizia, Nova Gorica was therefore able to better anticipate the situation and to adopt faster measures to keep the number of people infected in Nova Gorica lower than in the rest of Slovenia. The cross-border Cerdanya hospital (ES-FR) positively benefitted from its double belonging to two different healthcare systems, allowing a sound supply of masks and medicines and the reinforcement of cooperation with larger hospitals on both sides of the border (Barcelona and Perpignan), where intensive care units are available. Around Geneva, a new vignette for cross-border healthcare workers and dedicated traffic lanes were conceived in order to speed border crossing for these essential workers. These new forms of cooperation revealed the creativity and ability to reinforce cross-border cooperation.

Cross-border territories are unique laboratories of territorial cohesion and European policies. The experience of border regions during the unfolding COVID-19 crisis has illustrated a strong need for new solutions to empower cross-border territories in managing such emergencies. At the same time, this crisis is an opportunity to promote a new model of 'co-development' for integrated cross-border regions, by improving existing multilevel governance tools and by strengthening and establishing new cross-border public services.

**II. Objectives**

The overall objective of this pilot project is to improve the life of citizens in border regions by supporting more integrated and functional cross-border areas. Border regions are a very strong and visible example of the immediate effects of the COVID-19 crisis. Re-establishing border controls has hampered a whole eco-system. Therefore, based on a thorough analysis of the experience of border regions during the COVID-19 outbreak, this pilot project aims at helping border regions to better face future crises and to promote a new model of elaborating public policies, including public services, in border regions based on co-development and through improved multilevel governance. The pilot project combines therefore a short-term and a mid-term approach to provide practitioners and decision-makers with concrete tools and methodology that can be directly translated into reality, tangible for citizens, and applicable to all European borders.

**III. Expected results****1. An in-depth assessment of the COVID-19 crisis management in all European border regions.**

The assessment will give a comprehensive picture of the reaction and non-reaction to the crisis in border regions and their consequences. It implies gathering evidence and concrete examples on the difficulties faced by the border regions during the crisis, on the impact on different sectors and on cooperation initiatives emerging from the crisis. It should also analyse the role of existing cross-border structures in the management of the crisis. It will allow the Union to objectively measure the costs of non-cooperation. Through collecting practical and statistical evidence (cross-border functional urban areas, etc.), the analysis should also point out the strong interdependence of border territories, and should reveal that an uncoordinated measure on one side of the border has an impact on the other side of the border. Finally, it should point out the double nature of borders: boundaries of sovereign States guaranteeing the security of their own citizens; and local areas where people live. It requires the establishment of sound multilevel governance of the border, involving local actors.

**CHAPTER PP 05 — REGIONAL DEVELOPMENT AND COHESION** (*cont'd*)PP 05 21 (*cont'd*)PP 05 21 01 (*cont'd*)

2. A platform mapping out cross-border public services, obstacles and solutions to cross-border cooperation.

The platform should have a strong operational aspect by collecting information on public services in different sectors in border regions (health sector, judicial sector, economy, etc.). It would help in identifying the gaps, the needs and the existing structures to facilitate better integration of border regions. It should build on the work already carried out on cross-border public services, more specifically on cross-border public services operating in the field of civil protection and disaster management. Taking the health sector as an example, the platform may also gather information about the capacity of existing public services in the health sector, mapping key contacts over the borders and providing data on hospitals. Moreover, it will provide an overview of obstacles and existing solutions to cross-border cooperation in different domains. It should build on the experience gathered during the implementation of other initiatives such as the b-solutions project. The conditions to secure the updating of the platform, on the basis of a European network, should be defined.

3. An action plan to ease and to systematise solidarity across neighbouring regions.

Through this mechanism, border regions should be better equipped to react swiftly to different types of crisis (pandemic, environmental, security, natural disasters, migration, terrorist attacks, etc.) impacting borders and requiring the coordinated action of national and local authorities.

Based on the lessons learnt from the COVID-19 crisis, and from existing cross-border mechanisms, Interreg projects, dealing with civil protection, a protocol model should be developed in case of a crisis to ensure the free movement of cross-border workers and essential goods, social protection, harmonised communication, etc. This protocol of actions involving national and local authorities should guide, step by step, decision makers' actions. The protocol should integrate the development of new tools such as a 'laissez-passer' for frontier workers that would be mutually recognised by neighbouring regions.

4. Boosting the potential of border regions through co-development, cross-border spatial planning and multilevel governance.

The COVID-19 outbreak has shown that often the socio-economic cross-border interdependence is not tackled by means of systematic and coherent cooperation between public authorities across the border. Thus, the management of cross-border regions requires multilevel governance, as these regions are deeply interlinked and they share joint interests. The co-development approach should guide the elaboration of cooperative public policies including common spatial planning and the development of public services in different sectors (health sector, mobility, education, etc.), including a sustainable system for funding cross-border investment and management. This should include issues such as the social and fiscal status of cross-border working (including teleworking, etc.), that have proved essential during the crisis. This implies strong and permanent dialogue between policy makers from different levels of governance, with the involvement of cross-border institutions. Nowadays, there are many political structures on border regions which encourage political dialogue. However, the COVID-19 outbreak has shown that existing structures had difficulties to react swiftly. Paradoxically, border regions that were the most integrated had difficulties to coordinate a joint response. The natural reaction of these regions was to close borders while an efficient response would have been co-ordination. Based on the example of the French-German 'Cross-border Cooperation Committee', created by the Aachen Treaty, a similar political platform could be replicated at all Union borders and could have three tasks:

COMMISSION  
PILOT PROJECTS**CHAPTER PP 05 — REGIONAL DEVELOPMENT AND COHESION** (*cont'd*)PP 05 21 (*cont'd*)PP 05 21 01 (*cont'd*)

1. Producing evidence of cross-border integration and flows, analysing the role of joint investment and of cross-border public services.

2. Working on the resolution of legal and administrative obstacles to cooperation through different mechanisms (bilateral agreements, the European Cross-Border Mechanism (ECBM), conventions, etc.) involving local and national authorities as well.

3. Joint development of a common strategy for priority projects including public services. This political platform should reflect and act in a wide range of sectors that are essential for the development of both sides of the borders.

In light of the COVID-19 crisis, such political platforms should also be in charge of a coordinated plan for cross-border multi-level management of crisis impacting cross-border regions.

*Remarks*

This pilot project will encourage the green and blue recovery in the Atlantic by creating a precursor of a cooperation scheme at transatlantic level to foster exchanges of best practices and joint projects on the green recovery of maritime sectors important to Atlantic coastal regions, including outermost regions and non-Union regions. This pilot project is strongly innovative as it will go beyond the traditional INTERREG EA projects which only connect Atlantic Union regions. It will include Union Atlantic outermost and non-Union regions and thus promote the EU Green Deal beyond Union borders. Besides, it will go beyond the Galway and Belém Statements on Cooperation on Research as it will be a tool to improve regional development strategies such as regional investment in green marine leisure infrastructure and innovation policies to adapt to and mitigate climate change, which are key challenges identified in Atlantic RIS3 and the Atlantic Strategy Action Plan 2.0.

Developing a transatlantic cooperation will produce the following outcomes:

- improving policy making at regional level;
- internationalisation of SMEs of the Atlantic area;
- upskilling and reskilling stakeholders active in the key Atlantic sectors;
- enhancing the territorial cohesion of the Atlantic Area and the appropriation of the Green Deal and Atlantic Strategy principles by Union and non-Union regional and local authorities.

To achieve this goal, the pilot project will support:

- Three trans-sectorial and transatlantic workshops online with the aim to generate knowledge, exchange practices on how to enhance the sustainable development of the sector across the Atlantic. It will foster cross-fertilisation of existing projects, will enhance a dialogue between the four pillars of the Atlantic Strategy and will reflect on transversal topics such as SMEs development and youth entrepreneurs.

**CHAPTER PP 05 — REGIONAL DEVELOPMENT AND COHESION** (*cont'd*)PP 05 22 (*cont'd*)PP 05 22 01 (*cont'd*)

- Three study visits and three capacity-building trainings directed towards regional administrations, wishing to develop their skills and strengthen their cooperation at a transatlantic level. The capacity-building exercise will derive from the challenges identified in the workshops and will be a privileged tool for administration to enhance their transatlantic cooperation.
- The development of a database of contacts at a transatlantic level to foster dialogue and best practice exchanges.
- Key capitalisation activities such as the development of a catalogue of best practices compiling innovations identified in the workshops and study visits, the development of a roadmap on the transatlantic cooperation to foster sustainable development of Atlantic coastal territories, and other actions helping the transfer of best practices outside the consortium and enabling cross-fertilisation and capitalisation with current projects.

Such strategic actions for the Atlantic could only be developed if the area key players are involved as a network of regional authorities and key technical partners. Regional authorities have strong links with the clusters and SMEs operating in their territories. They also have developed links at a transatlantic level, which will be able to be mobilised quickly and will provide the pilot project with a network of stakeholders from the other side of the Atlantic.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The project addresses the failure to communicate Europe to younger generations of Europeans that is the result of a lack of a truly transnational public sphere for media, the fact that traditional media no longer attract young Europeans in the same way as the internet does and the fact that national media do not cover pan-European topics positively or in a way which unites people. Therefore, the project more effectively portrays the sense of togetherness which is at the heart of European identity and which is reflected in a common culture, similar lifestyles and shared values.

The younger generations of Europeans consume information and entertainment primarily online using new social media and content-sharing platforms. Therefore, it must be made clear that young Europeans get their information online. In order to enter into a dialogue about Europe via relevant themes and topics, attract younger European citizens to European ideas and values and empower truly European citizens through current and future information and dialogue platforms, the pilot project will take a radically new approach to providing news and information to young people.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 20 (*cont'd*)PP 07 20 06 (*cont'd*)

The pilot project is based on new concepts of editorial thinking, a new multiplatform strategy and a highly innovative and flexible technical infrastructure that allows fast adaptation, translation and conversion of content in many languages and formats across Europe, creating a highly innovative, digital product that intentionally stands out from traditional media.

The project is targeted at Europeans aged between 18 and 34, i.e. at a time of life when many young people are developing their political views and laying the foundations for their professional and private lives. The focus is on informative, thought-provoking, entertaining and emotive content. All content will be bundled on one specific online service. Furthermore, it is made accessible on all kinds of social media as well as other online gateways through which the target group can be reached.

The content deals with topics that are of current interest for young Europeans in the Union and will be put into context in order to make it compelling and appealing to the target group. The European perspective is created by comparing and contrasting regional experiences and points of view on matters of pan-European importance. Young Europeans share an interest in issues such as work, education, equality, love, culture and music. Nevertheless, there are significant differences between countries and between urban and rural areas. The aim is to address relevant topics of pan-European importance and at the same time provide a forum for local perspectives, allowing young users to identify strongly with the content.

Controversial opinions provide an impetus for debate. On political issues, a personal approach makes it easier to understand the effects of institutional decisions. In this context, well-known influencers and local personalities from social networks will have their say in addition to actors from the political sphere in order to bridge the gap between European affairs and the everyday reality of users' lives.

This ambitious pan-European and multilingual project launches offline and online an open, true, deep and constructive debate about recent and future life in Europe among young Europeans, using innovative formats on digital platforms, with the ultimate goal of creating greater awareness about European visions and realities and enhancing Europeans' commitment to European values and ideas so that they subsequently contribute to a more active civil society.

The project builds on a strong partnership of independent and innovative media across Europe, including the start-up and creative sector. The project also benefits from substantial investment in research and innovation, e.g. in automated translation in the media sector.

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The fight against doping in sport is essential to safeguard the integrity of sport and its values of fair play, respect and solidarity. It also promotes a healthy lifestyle and well-being for all citizens. But fighting doping is increasingly challenging. Today, to unveil cheats, the anti-doping system relies on more sophisticated tools than just conducting 'blood and urine-testing'. Nowadays, most of the doping infringements can be detected through investigations. The anti-doping system is thus confronted with a need to have the capacity to conduct investigations, to collaborate with law enforcement agencies and to protect whistleblowers.

The reality is, however, that an insufficient number of anti-doping organisations (ADOs), operating in too few countries, meet those conditions and this compromises the emergence of the strongest possible anti-doping system worldwide. The situation is critical and deserves the implementation of a specific strategy that includes close collaboration with the law enforcement agencies in all European countries.

Considering that law enforcement and government agencies possess investigative powers to attack source and supply of illegal substances, which in many cases uncover evidence of anti-doping rule violations, the core of the pilot project is to develop protocols for the European ADOs to ensure evidence gathering and information sharing between them and the law enforcement. Furthermore, this approach requires a broad implementation of the project. It should not be limited to a few Member States, but rather aimed at covering all the European countries, including third countries, to allow for a sufficient harmonisation of the investigative standards in the region and to avoid weakening its efficiency by leaving too many stakeholders outside of the harmonised system.

As a result, this pilot project will go much beyond sport and require cross-sectoral cooperation and significant investments, estimated at around EUR 1,5 million.

Taking the abovementioned into account, this pilot project cannot be funded by the existing programmes, such as the Erasmus+ programme.

The goals of the pilot project are as follows:

- to develop a set of complementary measures and activities that would address the issues mentioned above and that would be concretely beneficial to a maximum number of European ADOs and more globally to the anti-doping system;
- to allow for ADOs to partner with the World Anti-Doping Agency (WADA) to conduct investigations, protect whistleblowers and to cooperate on joint investigations with law enforcement agencies and the global network of investigators;
- to build capacity of the European anti-doping system, reduce the prevalence of doping in sport and maximise the health benefits generated by the practice of clean sport by the European youth.

The pilot project would be built on the following four pillars:

1. assistance to develop a robust legislative framework allowing for the sharing of information between ADOs, law enforcement agencies and WADA and for the protection of whistleblowers;
2. assistance to develop the best mechanism (forums, conferences or online platforms) for sharing information on legislation and best practices, on investigations, and on the protection of whistleblowers;

COMMISSION  
PILOT PROJECTS**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 01 (*cont'd*)

3. assistance to build capacity of ADOs in investigations through the provision of training sessions to employees or through the hiring of experts; and,

4. assistance to allow ADOs to contribute to the global networks of investigators.

The pilot project will contribute in many ways to the objectives of the Union, including by:

- protecting public health – doping is not just a problem affecting elite athletes and sport; but also, a threat to the society as a whole; especially youth. Research can attest a growth in the use of steroids and other prohibited substances by amateur athletes and youth to look and perform better.
- providing new tools to combat the organised crime – selling doping substances is a ‘low risk – highly profitable activity’. Research demonstrate the involvement of organised crime in the manufacturing and trafficking of doping substance in sports along other illicit substances. Sharing of information between ADOs and law enforcement ADOs will help optimising the fight against manufacturing and trafficking in doping substances.
- improving sports governance in and outside Europe - this project will contribute to strengthening the governance of sport organisations and to share Union values with other partners through the involvement of third countries in the implementation of the project.

Furthermore, this pilot project will help mitigate the impact of the COVID-19 pandemic on the anti-doping sector. The increase in expenditure on key branches of national economies due to the pandemic will result in a halt to the development of many ADOs. The project will allow for a partial restoration of their capacity. It will help ADOs increase their activities, including the economic ones and compensate a part of the potential diminution of government contribution to ADOs moving forward.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The current pandemic is not only a situation of unprecedented hazard for the life and wellbeing of Union citizens. It is also a major challenge for the fragile web of trust that connect the citizens with their states and the Union. The proposed observatory will examine the shift in narratives towards Europe and the nation state during and following the COVID-19 pandemic, providing basic recommendations for effective communication and to protect against disinformation campaigns.

The availability and quality of information is crucial to effective functioning of society, especially in a time of crisis. A lot of false information regarding COVID-19 is currently spreading in societies, especially via social media. One of the main strategies for fighting fake news is debunking, a strategy of confronting them with facts and accepted theories. Unfortunately, existing debunking strategies have proven very ineffective, especially as they do not work with individuals that have a strong belief in false information.

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 02 (*cont'd*)

Research shows that Twitter, YouTube, Facebook and other influential social media provide a crucial boost for the international network of disinformation (Smith and Graham 2019). Feeding on fear and chaos, spreading fake news and misinterpreting the data, these agents are stronger than ever (Fernández-Luque and Bau 2015). However, social media provide not only a new set of tools for spreading disinformation but also a great weapon against it.

Recent research demonstrates the important role of narratives in framing facts and information in a package that can be easily transmitted across society and how studying narratives can be the key to better understanding how ideas spread across social media and why certain ideas take hold over others. The use of this methodology in understanding the flow of information during the COVID-19 outbreak could be vital in finding a different way to inform society and to keep disinformation and misinformation at bay.

The pilot project will create a European Observatory on Narrative Distribution to monitor and analyse how new narratives are created and spread within European public discourse, decipher the emotional values that guide successful narratives, map sources and key actors active in the spreading of these narratives and develop recommendations for effective communication and policy.

Building on the work developed for the Commission-funded study on 'Mechanisms that Shape Social Media and their Impact on Society' the project developed by Re-Imagine Europa and the Center for Systemic Risk Research at the University of Warsaw, the Observatory would identify the dominant narratives by combining Natural Language Processing and more traditional methods of qualitative narratology. Using advanced algorithms and analysing the most qualitatively representative examples, it would establish dominant narrative patterns and answer questions such as: 'How is the ongoing crisis influencing the dominant models, metaphors and narratives shaping our perception of identity and community?', 'Are European values at risk in an increasing polarised and weaponised information ecosystem?', 'How are external actors manipulating European public discourse to sow discord and fracture society?', 'What are the values and narratives that unite and separate us?' and 'How are our different value systems and experiences shaping the development of a European identity?'

Remembering the words of Ludwig Wittgenstein: 'the world we see is defined and given meaning by the words we choose. In short, the world is what we make of it.'

The Observatory would be coordinating with existing European projects and infrastructures including the European Digital Media Observatory (EDMO) and SoBigData++ to ensure that there is no duplication of effort and that resources are used to support the investigative and research work and make use of the infrastructures and technical support available. The project would support action at national and multi-national level focussed on detecting and analysing disinformation campaigns linked to COVID-19. The results of the pilot project would be made available to other European and national projects and ensure sharing of best practices and recommendations for effective communication.

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Worldwide academic evidence shows that loneliness, the absence of support networks or communicative skills have health (physical and mental) and social consequences on an individual level, as well as an economic impact on the working capacity of people and on the interconnectedness of society. Loneliness has many symptoms (e.g. depression) which sometimes get medical treatment, while the root causes of the problem remain unsolved. The effect of loneliness has been showcased on a large scale during the COVID-19 crisis, proving the negative effects of isolation on social cohesion and mental health. The impact of loneliness and the COVID-19 will have a major impact on European's demography, not only in terms of health and social connectedness, but also on the economy by way of productivity.

In a fast moving and changing world, with frequently more virtual than physical contact, especially during times of confinement, self-isolation or quarantine, with ageing and culturally diverse populations and with complex demands on the skills of workers, an increasing number of people feel left behind. The individuality of society erodes into isolation and culminates in loneliness. In the few countries, where loneliness studies have been carried out before the COVID-19 crisis, about 80% of the population states they feel lonely occasionally and a consistent 10-13% feel lonely permanently. Not only the elderly but especially the young population is deeply affected, with peaking numbers at the young adolescent age. At this moment, the few existing studies use different criteria, varying age groups and definitions. On the Union level several small-scale initiatives have taken place:

- the policy brief on 'Loneliness – an unequally shared burden in Europe', presenting evidence and data on the subject;
- the project 'VulnerABLE' aimed at better understanding of how best to improve the health of people living in vulnerable and isolated situations, identify and recommend evidence-based policy strategies, and raise awareness of the findings and support capacity-building within Member States;
- a peer review with the participation of several Member States focusing on projects, measures and strategies for tackling social isolation, loneliness and social exclusion in older age which took place in Germany in September 2019;
- the European Quality of Life Survey, providing information on loneliness, amongst others the upcoming report on 'Living, working and COVID-19'.

While these activities provide for different and partial perspectives to loneliness, it is evident that a comprehensive study using comparable data is needed to gain more a complete insight in order to provide for effective and sustainable solutions with the involvement of stakeholders. The study should thus provide new added value, while avoiding duplications.

Loneliness and its lasting effect on social exclusion and mental health issues occurs in every age and gender group. In most countries loneliness hits men harder, yet the data is sparse. Apparently, the East-West and North-South divide also reflects in the gender disparities, with mostly women reporting loneliness in the East, while more men seem to suffer loneliness in Western Europe.

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 04 (*cont'd*)

Some Member States have started an active policy to combat loneliness on national, regional or local level. Many initiatives have been launched by charity or phone projects, developers of housing of mixed age groups, living room meet ups for elderly people. Ireland, for example, has a national plan on tackling loneliness amongst senior citizens. Yet, a European approach is missing and the disparities between Member States are significant. A European perspective as well as a Union-wide network and data are crucial to understand loneliness and its impact on the social exclusion and mental health of the population to then be able to counteract and find tangible solutions together with the regional and local level.

## The pilot project

This pilot project aims to study and compare current national and regional loneliness policies, to gather comprehensive and comparable Union-wide data, to analyse the impact of the COVID-19 crisis and to coherently provide best practices and recommendations to combat the social exclusion and mental health issues related to loneliness.

The pilot project is divided into four phases:

(1) The first phase will be taking stock of loneliness studies and initiatives on local, regional, national and international level, be it private or public. These initiatives will be subject to analysis as to what extent and in which specific areas they are suitable to help to alleviate or prevent loneliness. An integral part of this first phase would be to conduct a comprehensive Union-wide study on the impacts of loneliness based on existing and newly gathered data, including the (lasting) impact of COVID-19, disaggregated by gender differences and reflecting regional disparities.

(2) The second phase will bring all the initiatives together in an easily accessible and user-friendly platform, to directly support stakeholders and afflicted persons and to provide information on road maps to alleviate loneliness.

(3) The third phase will (virtually) bring together actors and stakeholders dealing with the topic of loneliness ('patients', organisations, unions, charity and volunteer organisations, policy makers, societal innovators). A summit will provide the opportunity to discuss aspects, root causes and symptoms of loneliness and its impact on social exclusion and mental health, different phases and profiles of loneliness (age groups, gender, cultural background, location, etc.) to define where and when loneliness starts as well as to debate the role of social media and digitalisation (online hate speech impact on mental health, etc).

(4) The fourth phase will be a follow-up at Union level and will comprise the presentation of best practices and recommendations to combat the social exclusion and mental health issues related to loneliness, based upon the outcome of the former phases. A clear outline will be presented on focus groups and the most effective measures, on short- and long-term goals, as well as an overview of stakeholder groups.

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

It is a widespread concern that technological advances (especially in the era of artificial intelligence) could create unemployment. However, although many jobs may be lost, new ones will be created. Gaming is transforming our culture and redefining the ways that young people consume entertainment. Gaming is rapidly becoming the most important and influential medium of our time.

There are now more than 2,5 billion gamers across the world that will spend USD 152,1 billion on games in 2019. These numbers grow year on year at rates close to 10%. In Europe, 54 % of the Union's population play video games, which equals some 250 million players in the Union and their average playtime per week is 8,7 hours.

Games are not only an increasing economic and cultural powerhouse, but also the new social medium where people get together for any excuse. To learn, to connect, to express themselves, to share knowledge and experience, and even to engage in new work or economic activities.

Sports are exploding and beginning to compete with traditional sports events. In 2019, more than 100 million people watched the 'League of Legends' World Championship, cementing not only its place as the most popular e-sport but as one of the most popular cultural events in the world.

Another example of the power of gaming is Roblox, an interactive blocky world that enables young programmers to make a living creating and sharing games in a community of over 120 million players. It announced that its seventh annual Bloxy Awards ceremony staged inside Roblox's game world drew more than 4 million concurrent players during the peak of the show, and raised USD 100 000 for non-profit organisations.

Just observing the facts and looking at the big impact video games are already having on current generations, it seems quite urgent for our governments and policy-makers to gain a better understanding of it, and to learn how could Europe play a smarter and more active role not only in its use but also in its creation.

*Measures and outcomes*

This pilot project will create an interdisciplinary European network of experts, thinkers and leaders willing to share their vision about the value and potential of gaming in the future of our society, our culture and our economy.

The network will hold a series of exchange meetings with stakeholders of key sectors and influence groups in areas like politics, finance, law, education, culture, science and health, looking to shape a European agenda for games.

In order to preserve the full independence of all the discussions and conclusions, it is important that the network stay from the beginning out of the influence of entities and lobbies driven by commercial or economic interests. This means that members will participate at a personal level and not representing a particular company or organisation.

Observations and conclusions of all these meetings will lead to shareable reports that will point out strategic areas of collaboration between the games industry and the public sector, particularly at European level, in order to promote the understanding of the opportunities and challenges ahead for the European video game sector.

*Remarks*

This appropriation is also intended to cover commitments remaining to be settled from previous years under the pilot project.

*Initial situation:*

According to the 2016 FRA Minorities and Discrimination Survey [1], 80 % of Roma are at-risk-of-poverty (86% in Bulgaria, 58% in Czechia, 70% in Romania, 87% in Slovakia). This rate is much higher than the overall EU poverty rate of 24% (40% in Bulgaria, 13% in Czechia, 39% in Romania, 18% in Slovakia) [2]. Poverty is particularly high among Roma living in marginalised communities, notably in Slovakia, Bulgaria, Romania, Hungary and Czechia. Furthermore, Roma rank among those who are the most affected by long-term poverty and inter-generational reproduction of poverty.

Figures from the 2011 joint study by the World Bank, United Nations Development Programme (UNDP) and the European Commission showed that one-third of Roma children go to bed hungry at least once a month because there is not enough food. Experiences of deprivation in the early years of childhood significantly influence people's later life chances and trajectories.

Being poor is not just about a lack of income and material assets, it also implies being disadvantaged in many other ways. Material poverty is often coupled with experiencing disadvantage in (or being excluded from) access to education, employment, health- and social care, and housing; as well as importantly, from social relations and networks [3]. Moreover, there is a strong interdependence of poverty with spatial segregation, which further restrains access to such material, skills and social assets. It narrows the chances for secure livelihoods and thus leads to absolute poverty and social exclusion.

Perceptions implying that the individual is responsible for being poor and that Roma poverty is an issue of ethnicity or ethnic minority fail to recognize that poverty is a complex multidimensional phenomenon resulting from numerous factors. Many of these lie outside one's personal control, and are indeed linked to broader transformations in social policy and governance regimes. It is however clear that persons excluded from the labour market are the most threatened by poverty.

Social protection policies instituted under the new political regimes in Central and Eastern European countries, which to a large extent rely on the means-tested assessment and payment of welfare benefits, have so far not been effective in getting the long-term poor, including Roma, out of poverty. State support comes in a form of social benefits, which serve to cover basic life needs, childcare, and housing or to support work activation. However, there are significant limitations of system design, when it comes to both preserving dignity and allowing for access to a wider range of assets, and providing tailored support and incentives for people to effectively climb out of the poverty conditions and lifestyles.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 07 (*cont'd*)

This decreases the effectiveness of help and over time translates into the following more visible symptoms:

- Socially excluded communities frequently settle on vacant sites, owned by the state, municipalities and more rarely on private land, which are unsuitable for residential use or are too remote from the urban web. This has direct implications on both the quality of housing conditions and access to viable employment opportunities. Most Roma and vulnerable people are engaged in primarily temporary, precarious and unofficial work.
- In addition to income from seasonal employment and often unregistered labour activities, many Roma households rely on means-tested welfare benefits provided to large families and citizens of no financial means. Because of poor economic and living conditions and lack of financial literacy, Roma frequently spend their income from work and welfare benefits in the first days of the month and are then not able to provide for their basic needs during the rest of the month.
- Living in prolonged scarcity also has important psychological effects, and sometimes engenders dependencies and addictions that enhance precarity and the inability to make effective decisions or plan for the long term (or even the full month ahead).
- Most Roma households lack access to financial services, have low levels of savings and limited knowledge of effective household finance. Consequently, Roma often become indebted and fall victims of usury, which drags them in to a vicious circle of worsening poverty.

Efforts to promote Roma inclusion without ensuring a welfare benefits distribution system that is 'fit for purpose', and without the availability of financial services, will overlook a major barrier that can be addressed relatively effectively.

There is at present an acute need for further adjustment and piloting experimentation models for welfare benefits redistribution and effective support to answer the needs of vulnerable people in a multi-dimensional way, starting from a whole-person approach and rolling out into the different areas of life.

The pilot project seeks to overcome conceptions of poverty as transitory or individualised phenomenon alone, attributed to a person or group's own failings. It starts from seeing poverty and marginality also as societal phenomena to be addressed from a systems-level perspective and from an intent for preserving the dignity of those being helped. This also includes the assumption that the poor are often in the best place to decide what to spend their resources on (which is supported by economic research and longitudinal data [4]), but also that they should be supported and empowered in a number of additional ways.

Furthermore, the current COVID-19 crisis spells an important turning point, revealing the danger of responses that expose or produce divides in society between those who are protected and those who are not. It prompts to look at new universal solutions with broader and more comprehensive coverage- both in mitigating the consequences of the crisis and in planning for the changing economy and world of work in the aftermath and longer term.

There is need for experimenting with innovative financial and policy instruments to pave further for the more effective welfare delivery and investments supporting better outcomes for marginalised people. The pilot project will thus combine elements and seek to:

- support social policy experimentation, through the delivery of welfare benefits coupled with a progressive incentive package, through e-pay cards; and

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 07 (*cont'd*)

- support empowerment, notably through strategies of entrepreneurship and restored sense of dignity and agency, for bridging social isolation stemming from long-term poverty.

Using financial inclusion to give Roma access to the basic and vital services is as important a component of Roma inclusion as employment, housing, health or education. Households that can access and understand basic financial services and handle a savings account are likely to use social benefits more productively.

Policymakers in cooperation with project management can link financial inclusion and personal and business development support with human development outcomes.

The pilot project:

The aim of this pilot project is, while respecting competencies and responsibilities of Member States in defining and organising their social protection systems, including the way in which benefits are distributed, to test an alternative delivery mechanism of welfare benefits, paid weekly under E-pay cards, combined with continuous empowerment through entrepreneurship and self-development coaching work and financial literacy trainings.

The BIG scheme is envisioned as the combination of existing welfare benefits, with allowances to cover for costs associated to the participation in capacity building activities, and incentives to beneficiaries for reaching the goals stipulated in their individual/family action plan. It will be combined with measures, which help build the capacity of individuals to (re)integrate the labour market and society. This could serve as steps of a ladder allowing individuals and families to restore their agency and progressively climb out of poverty circles.

The pilot project will directly support policy experimentation through testing an alternative approach to understanding and addressing poverty:

- Security – living with a mind-set of scarcity and deprivation puts psychological pressure and constricts the mental bandwidth of persons living in deprivation, thereby preventing them from planning for the long-term or making better decisions in the now;
- Expanded range of assets – emphasising poverty as more than a distributional (cash-poor) or material issue, seeing the relation to social isolation and access to a spectrum of 'assets' (material, skills, social and citizenship) to enable households to pursue new and more viable livelihood strategies;
- 'Human venturing' – investing in people as an alternative approach to benefit provisioning, essentially serving as 'venture capital for the people'; and representing a new way for investing in human capacities (just as we do for companies) and breaking through socio-cultural environments.

In relation to the first issue, the policy experimentation is underlined by multi-country research showing that poor people receiving unconditional welfare benefits do not blow the money on desires rather than needs.

In relation to the second issue, it will help recipients of social benefits, especially vulnerable and socially excluded communities, to sustain different livelihood strategies in order to get out of the vicious circle of poverty and indebtedness. It will also create the conditions for economic development and for improving the standards of living of the poorest.

Innovative instruments will be used to support the financing of the expanded benefits provision, through the combination of public and private (notably philanthropic) resources for better social outcomes.

This pilot project is part of the Union's efforts to:

- support social innovation and new, holistic approaches to social service provision, the empowerment of disadvantaged groups and delivering transformative solutions to key social challenges, in particular Roma inclusion;
- stimulate cross-sectoral collaborations and social impact partnerships (public-private and civic engagement) as a new avenue for public value creation;
- pioneer the use of new instruments and blended support (financial instruments, grant and capacity building) for projects with high social externalities;
- in the longer term, support the development of the social investment market and social impact interventions, through the testing or refinement of models which could be scaled up across Europe.

Activities:

The pilot project will explore how innovative, impact-oriented approaches could allow to improve the effectiveness of social policies currently based on the payment of means-tested welfare benefits by shifting towards a system based on smart activation. This approach would also reduce the administrative costs associated with the current delivery system of social benefits to marginalised Roma communities; and increase public spending efficiency in the long run.

The pilot project will test and develop innovative solutions, under a multi-country, pan-European approach, which could be further replicated and scaled to deliver improved sustainable outcomes and societal well-being in the Union.

The pilot project will include the following elements:

(1) an enhanced delivery mechanism of welfare benefits, to be implemented in several Member States with large concentration of Roma; 500 recipients per Member State.

As regards existing welfare benefits, they will be:

- paid to each individual (on a weekly basis): each man and each woman will receive welfare benefits, paid directly to them and not to a 'household head'. Paying individually is a vital feminist principle, which has been systematically abused in all social security systems over the past century;
- unconditional; recipients will not be required to spend the money in any specific way. However, pre-existing conditions in national legislation such as those linked to the mandatory school attendance of children will need to be respected as a prerequisite for additional allowances;
- non-withdrawable: recipients will not have their welfare benefits withdrawn for any reason during the course of the pilot project. The allowances beyond this amount will be linked to specific elements and activities in a gradation (e.g. connected to kindergarten attendance, social and work occupations, progressively providing stepping stones in the path out of poverty and dependence);
- delivered through basic E-pay cards linked to a free or low cost bank account.

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 07 (*cont'd*)

(2) Capacity and capability building through empowerment and self-development coaching, job training, economic and financial literacy courses. In addition to the need to improve the financial literacy of families, the pilot project will also aim at promoting an approach linking allowances to participation in active inclusion measures effectively leading to employment and empowerment.

(3) Provision of micro-loans for personal projects aiming at improving the living conditions (optional).

(4) Engagement of all stakeholders (national, regional and local authorities, financial institutions, employers, not-for-profit organisations, etc.).

While contributing to the objectives of the European Pillar of Social Rights Action Plan, this pilot project will also be closely aligned with and seek to provide input to the EU Action Plan for a Strong Social Europe for Just Transitions, the European Semester as well as the implementation of the EU initiative for Roma equality and inclusion.

It could be implemented under a social outcome contracting mechanism.

After being tested in multiple sites with significant Roma communities, the model could inspire reforms of the welfare systems in Bulgaria, Czechia, Romania, Hungary, Slovakia and other countries.

The need to implement pilot project has been highlighted by the disproportionated impact of the pandemic on Roma Communities. The COVID-19 outbreak has widened long-standing exclusion, poverty and discrimination against some of the disadvantaged and rights deprived groups in the Union, including its largest ethnic minority, the Roma people. [5] The offer of occasional jobs in precarious employment, where Roma are engaged, has decreased leaving them unemployed. The informal nature of the jobs makes it impossible to claim the special benefits aimed at preservation of the job because those benefits are connected with the formal employment. [6] Likewise, the social protection systems providing extra protection during the pandemic do not cover informal jobs. This in turn has led to increasing already alarmingly high level of poverty and marginalisation of Roma. The lack of the ability to make long-term decision as well as insufficient financial literacy has been particularly highlighted during the pandemic because Roma do not have sufficient savings to overcome the decrease in income resulting from the lack of informal employment. The pandemic also revealed the inadequate sanitary facilities housing in marginalised Roma communities. Moreover, the access to distant learning due to the lack of digital technologies in marginalised Roma communities has been severely impacted by the pandemic.

The pandemic has illustrated the shortages of the traditional way of delivery of social benefits. It further justifies the need for social experimentation provided for in the pilot project. The innovative approaches to delivery of social benefits through the E-pay card combined with the activities aimed at capacity building, financial literacy courses as well as possible micro loans for will thus pave the way out of poverty. It will help to remedy the serious situation fully revealed by the pandemic. This will contribute to target of the Action Plan for the implementation of the European Pillar of Social Rights to lift 15 million people out of poverty, including 5 million children. The pilot project will also contribute to the implementation of the Council Recommendation on Roma equality, inclusion and participation as well as the Recommendation for Child Guarantee.

According to the assessment of the beneficiary selected through Financing Decision C(2021)3754, the full and effective implementation of the pilot project requires a budget of at least EUR 4 million, for an estimated duration of 2,5 years. The increased budget (additional EUR 2 million in commitments for 2022) for the second year of the pilot project's implementation will thus enable to implement all activities of the pilot project in three Member States selected from those with large share of Roma communities, namely Romania, Bulgaria and Slovakia. It will also enable to lay strong foundation for possible scale-up activities of the pilot project.

PP 07 21 08 Pilot project — Media representation and inclusion for refugees and migrants

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Media (re)presentation and visibility of vulnerable groups like migrants and refugees remains very marginal in the mainstream media across Europe. Migration and refugee movements are global issues, the impact of which affects Europe locally, nationally and at the Union level. Before the migration management crisis of 2015, migrants and refugees were mostly missing in the mainstream media. Disinformation and stigmatising is happening mostly in national discourses, rather than at the Union level, but the impact of them is felt at much larger scale. After 2015, media started exploiting migration issues to fuel negative, anti-European and nationalist rhetoric in the Member States, creating dangerous precedents in shifting public opinion, and even affecting electoral results, let alone the challenges posed on Union solidarity.

Information about media representation of migrants and refugees is not abundant, but there are numerous examples collected and featured across the literature. The Commission's 2018 Special Eurobarometer 469: Integration of immigrants in the European Union, confronts the public opinion with facts and figures that bring clarity to the distorted image and perceptions promoted across the Union, about migration. The refugees and migrants of different backgrounds are rarely asked or quoted in the media stories. They are pointed at, but rarely heard. Decided for, but rarely involved. Portrayed predominantly in a stigmatising ways in the media: as dangerous outsiders, as victims, as criminals, as those who would take your jobs – migrants and refugees perspectives and voices have been mostly missing in the mainstream media.

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 08 (*cont'd*)

This pilot project aims to address these recurring issues by promoting and investing in inclusive media in Europe, which takes into account those voices. It aims to change current media narratives and break stigmas about the place and role of the refugees and migrants in European societies and communities. It will enable their voices to be integrated in the common media discourses and digital platforms. It will ensure that non-Euro-centric perspectives and visions of people outside of, but relevant to the idea of Europe, permeate and become integral part of the European media discourses. It will contribute to the values of non-discrimination, diversity, fair inclusion of newcomers – refugees and migrants – in the European media. It will help dealing with disinformation and polarising media discourses, through cooperation and skills development. The pilot project will involve Union citizens, local, national and European policymakers, media (public, national and international), migrants and refugees, professional and civic platforms and stakeholders engaged in the topic.

Extending the pilot project by one year will ensure continuity and scaling up of its outcomes (e.g. good practices, knowledge transfer, recommendations) that benefit newcomers as well as other excluded groups by investing in skills and competences in critical journalism, diversity media content production, as well as informed consumption. In order to achieve a Europe-wide effect, the pilot project will in its second year expand its network and enable cross-border media collaborations across more Member States.

Key actions:

- (1) Map out and study existing good practices (policies, legal basis, instruments, programmes, tools, etc.) related to inclusive media and disseminate them across the Union through experts' conference, multi-stakeholder activities and publications (online and offline).
- (2) Develop specific recommendations to mainstream inclusive media narratives and communication throughout Union programmes.
- (3) Expand and build upon the existing good practices and community of knowledge across all Member States, in order to mainstream successful inclusion and ethical media models involving media, public broadcasters, European Broadcasters Union etc.
- (4) Promote professional knowledge exchange and peer learning for journalists in sensitive reporting.
- (5) Establish new collaborative practices, peer learning and professional training for newcomers-refugees and migrants) to foster their critical media and internet approaches, knowledge, skills and consumption; provide them with skills and tools to change the way news are created and spread.
- (6) Complement the existing and develop new tools to deal with disinformation targeting refugees and migrants, and to allow for greater cooperation between fact-checkers and researchers on how to shape positive narratives on migration. Work closely with the European Digital Media Observatory (EDMO) in analysing the phenomenon of disinformation and developing joint solutions.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 21 (*cont'd*)PP 07 21 09 (*cont'd*)*Remarks*

The number of significant crises the Union has undergone demonstrates that Union needs to involve citizens more closely in a bottom-up exercise. Citizens' assemblies are exercises in deliberative democracy which bring together a cross-section of society to debate and advise on specific societal challenges. Although Union citizens' dialogues took place in the past, those temporary assemblies would be a rare chance for citizens to take the reins from their representatives and hash out the issues for themselves. If formulated correctly, citizens can transform consensus on important issues to consensus on a way to act better.

Positive outcomes would help bring citizens closer to the Union.

This should particularly be the case with young people throughout the Union. Making them part of the conversation about Europe's future is crucial: they will live with consequences of the decisions we make in the years to come.

This pilot project will offer financing to facilitate the identification in local governments of councillors responsible for disseminating not only the programmes and projects financed by the Union in that municipality but also communicating to the citizens of their municipality the general political initiatives and measures carried out by the Union through regular declarations to local media, debates, and seminars.

The strategy should be oriented to cooperate with Europe Direct network using instruments hosted by local authorities and regional governments and linked with other activities ongoing in order to reinforce the role of existing structures and tools.

Building an interactive platform for local representatives to join, put them in touch with one another and create bonds between them will be very helpful.

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 22 (*cont'd*)PP 07 22 01 (*cont'd*)*Remarks*

Europe's cultural heritage in all its diversity bears enormous multiple values to Europe's citizens and their communities and living environment, both urban and rural. As such, it is a key asset for the future of Europe. It bridges our past, present and future, by connecting people, including young people, across borders, cultures and generations, and strengthens our sense of pride and belonging (both at local and European levels). It also fosters social cohesion and inclusion and contributes to sustainable development especially by playing a key role in climate action as well as the green and digital transformation of our way of life. The successful European Year of Cultural Heritage in 2018, with its unprecedented mobilisation of heritage actors - both public and private - at all levels and throughout the entire continent, including candidate member states, clearly demonstrated the potential of cultural heritage to raise citizens' awareness of and engagement in the European project based on shared history and values, especially among the younger generations.

The objective of the pilot project is to properly and effectively sustain the legacy of the European Year of Cultural Heritage 2018 by supporting the setting up of a 'European Heritage Hub', as an autonomous advocacy and knowledge platform bringing together all heritage stakeholders. It will be working under the auspices of the Commission's expert group on cultural heritage to ensure coherent and concerted action with the Commission (DG EAC) for the benefit of a continuous and enhanced dialogue and action by all Union institutions and stakeholders. It will also seek to strengthen the engagement of citizens (especially young generation) with Europe's cultural heritage. This will be achieved by mainstreaming youth in all activities of the platform.

The existing heritage stakeholders' landscape is extremely rich and varied yet still fragmented and therefore in need of stronger coordination. Everyone would thus hugely benefit from a permanent and dynamic 'hub' that will foster, on a continuous basis and in a flexible and cost-effective manner, synergies between various projects (many of which are funded by the Union programmes), various Union policy programmes which have a direct or indirect impact on cultural heritage, and various heritage-related initiatives and best practices developed by heritage stakeholders at all levels of governance (local, regional, national, European and international). Such a 'European Heritage Hub' will serve the interests and reflect the concerns of the entire 'cultural heritage ecosystem' covering tangible, intangible and digital cultural heritage, but also create synergies with all other relevant policy areas such as environment, climate action, urban and rural development, research, innovation, education as well as external relations.

The main objective of such a platform will be to pool voices, forces and resources – both public and private - for the benefit of a holistic and integrated approach to cultural heritage policies at all levels, notably at the Union level, and ensure that all relevant Union and national policies and priorities duly incorporate a cultural heritage dimension. In doing so, it shall respect the cross-cutting priorities of:

- Inclusiveness, diversity and equality, notably by targeting young people through communication campaigns, engaging and empowering projects as well as training opportunities;
- Green transformation and the fight against climate change, notably by mobilising cultural heritage stakeholders to address the most pressing topic of climate change and cultural heritage, both as a threat to cultural heritage and as an opportunity to develop adaptation and mitigation measures.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 22 (*cont'd*)PP 07 22 01 (*cont'd*)

The following add-on activities can be developed (non-exhaustive list):

- Interactive online advocacy and knowledge platform gathering relevant policy and project documents and news from cultural heritage stakeholders at all governance levels;
- Meaningful and imaginative communication campaigns (online and offline), including the ones targeting young people;
- Research and analysis of emerging trends and phenomena with regard to cultural heritage to support evidenced-based policy-making;
- Capacity-building activities with regards, among others, to Union policies, programmes, funding opportunities as well as the green and digital transition;
- Joint projects to create better synergies between, inter alia the Creative Europe programme (including European Heritage Label), Erasmus+ programme, the European Solidarity Corps and Horizon Europe programme.

To function in the most efficient and cost-effective way, the 'European Heritage Hub' will be established with:

- A bottom-up approach: the Hub will be set up and run by a leading civil society organisation representative of Europe's cultural heritage ecosystem;
- Target participants: bringing together and mobilising a widest possible spectrum of heritage stakeholders, both public and private, to reflect the richness and variety of Europe's cultural heritage ecosystem;
- Partnership: establishing bridges and synergies between various existing European initiatives, including expert working groups, networks and fora, related to cultural heritage;
- Coherence: Under the auspices of the Commission's expert group on cultural heritage, enhance a holistic and integrated approach to cultural heritage by all Union institutions and their key European and international partners (both intergovernmental and non-governmental).
- Mainstreaming: developing synergies with similar platforms which are active in related policy fields, such as architecture, urban planning, environment, climate action, cohesion, Sustainable Development Goals, energy, education, tourism, development, cultural diplomacy;
- Adequate financial support to ensure efficient and cost-effective coordination and outreach.

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 22 (*cont'd*)PP 07 22 02 (*cont'd*)*Remarks*

New technologies are dramatically and constantly changing the opinion-making dynamics and the media landscape. While they allow to easily distribute information of public interest to wider audiences, fostering plurality, the way information is created, searched and distributed online, they also may accentuate polarisation in which a person is exposed to news, sources and ideas that adhere to her expressed preferences. This in combination with the profit driven platforms, which share data for purely commercial reasons, can significantly undermine the potential to encounter and debate opposing viewpoints and, as such, may poses a risk for ethical journalism, media pluralism and European democracy itself.

At the same time, journalists and other media actors face violence, threats, harassment or public shaming in the Union mainly because of their investigative activities to protect the public interest from the misuse of power, corruption, human rights violations or criminal activities, and according to the Council of Europe Platform for the Protection of Journalism and Safety of Journalists, more than half of the cases of abuses against media professionals are committed by state actors.

We have witnessed a tidal wave of disinformation and propaganda rapidly disseminated through the internet and other media. Given the social and political consequences, it is more crucial than ever that our citizens be critical users of both media and social media the media. It is necessary to invest adequate financial resources in media and digital literacy and in developing common Union strategies, together with journalists, academics, international and civil society organisations, in order to empower citizens and online users to recognise and be aware of dubious sources of information and to spot and expose deliberately false content and propaganda.

The 'European Festival of Journalism and Media Information Literacy' is aimed to reinforce dialogue, cooperation and partnership in the Union, among journalists, media outlets including public service media, civil society organizations and media literacy professionals, focusing on the crucial questions of our time, with a special attention on youth, including student journalists, people and social media on how to tackle disinformation in the age of post-truth.

Each year, journalists from all over Europe will be invited to submit online prior contributions, on a dedicated platform, and bring forward concrete proposals for improving legislation and working conditions for the sector at both European and national levels. Under the auspices of this event, media professionals will be able to elaborate new proposals, monitor the implementation of existing rules and set out deliverables in areas such as the protection and safety of journalists, social security, a new business model for media, the role and impact of digitalisation on the media sector, the role of media in tackling disinformation or increasing media literacy. The event will then gather media professionals from different backgrounds, i.e. large media corporations, freelancers, independent investigative journalists, local media outlets, as well as representatives of press associations and media freedom NGOs, inviting national and European authorities' representatives as guest speakers or observers. This format will not only improve journalists' awareness of existing measures and of best practices, but will also allow national and European authorities to connect and better understand the needs of the sector in the form of an annual structured dialogue. Every year, the event will produce a list of policy recommendations, taking into account contributions which have been submitted by journalists all around Europe, and set out conclusions to be drawn therefrom. These recommendations should then constitute the basis for policy actions in the field of media freedom, included in the working programmes of the European Commission, as well as other relevant

European and national authorities.

The 'European Festival of Journalism and Media Information Literacy' should become a powerful tool to raise awareness on the valuable but ever more difficult work of journalists and press freedom violations in the Union. To reach this purpose, it will be a traveling festival, taking place in a different Member State every year, and examine the alarming situation of press freedom, rising disinformation particularly with regard to the pandemic and climate crisis and journalists' working conditions. With regard to implementation, the Commission will launch a yearly call for tenders addressed to media professionals, media organisations, relevant NGOs and academic partners, in order to ensure the organisation of the event.

For the purpose of increasing inclusiveness and encouraging participation to the event, the entity in charge of the organisation will dedicate a part of the budget to subsidising costs associated with the participation in this event of journalists and representatives of media associations with limited financial means such as small and local media representatives or freelancers.

PP 07 22 03 Pilot project — European Homelessness Count

Appropriations 2022		Appropriations 2021		Outturn 2020	
Commitments	Payments	Commitments	Payments	Commitments	Payments

*Remarks*

It is estimated that the number of people experiencing homelessness has gone up by 70 % in Europe in the last ten years and this figure is likely to worsen as a result of the COVID-19 crisis. At Union level there are however no reliable data on homelessness based on common criteria or indicators. This is recognised by the European Parliament, the Commission and experts as an important barrier for an effective policy response.

Comparable and regularly collected data on homelessness will allow the Commission to better support Member States to make progress towards ending homelessness by 2030, an objective all Member States, Union institutions and relevant civil society stakeholders have committed to in the Lisbon Declaration, and to achieve Principle 19 of the European Pillar of Social Rights on 'housing and assistance for the homeless'. Comparable data collected at local level will support evidence-based and better targeted action through the 'European Platform on Combatting Homelessness' that has been set-up as a part of the European Pillar of Social Rights Action Plan.

The pilot project therefore aims to stimulate regular collection of data on homelessness at local level. Local authorities are best placed to address homelessness together with social services and civil society actors, and need reliable data to inform their policies. The pilot project will build on existing robust and effective methodologies, such as point-in-time counts, point of prevalence, and surveys. Complementarity should be explored with the work of EUROSTAT on the different dimensions of homelessness including rough sleeping, people staying in homeless shelters, people about to be released from an institution without having secured accommodation, and people forced to sleep on the sofa with family or friends (sofa surfers).

**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 22 (*cont'd*)PP 07 22 03 (*cont'd*)

The pilot project will promote a common methodology among interested local authorities and coordinate a common European homelessness count at the same moment/in the same period. The aim will be to repeat such count on a regular basis, and expanding the number of cities participating over time. The results will inform local, national and Union authorities and policymakers about the evolution of the nature and scope of homelessness, and the different dimensions and profiles of homelessness. It will also help to create public and political awareness about homelessness and contribute to creating the willingness to solve it. Whilst building on different methodologies the pilot project will work on making data comparable and drawing lessons about the trends at the Union level.

This pilot project will be the first concrete action launched by the European Parliament and the Commission following the launch of the European Platform on Combatting Homelessness in Lisbon in June 2021.

*Remarks*

For sport to maximise its relevance and assume its responsibility in creating a more sustainable Europe, an innovative concept is needed that contributes to people and planet. This pilot project will use the power of sport to make European citizens aware of the importance of sustainability and help them to understand how they can contribute to social cohesion and environmental protection. In addition, this initiative will be in line with the objectives of the New European Bauhaus.

The aims of the pilot project are to:

1. Raise awareness, inspire behaviour, and lead the thinking in European society on how sport can enable and accelerate social and environmental transformation;
2. Engage Union citizens to actively participate in sustainable measures using the communicative power of sport, its major events and leading ambassadors.

The pilot project will focus on examples of inspirational behaviour and practices at grassroots level that can be multiplied and on methods to engage citizens and sport stakeholders in communities to co-create and cooperate on sustainable sport practices.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PP 07 22 (*cont'd*)PP 07 22 05 (*cont'd*)*Remarks*

Local and regional news media play an important role for their communities. Not only do they provide information not available elsewhere and hold local power to account, they act as a binding force for the communities and an empowering force for their audiences. Without strong local media, disinformation and false stories, amplified by social media, can spread more easily at the regional level. Thus, local news have a unique and invaluable role in democratic societies.

However, successful operation and in some instances the very existence of local news media have become uncertain across areas of the Union. Already before the pandemic, their audiences are increasingly shifting to digital and mobile media environments, including social media. Meanwhile, advertisers are primarily moving to mostly US-dominated online platforms. Facing monetisation difficulties online and struggling due to diminishing advertising revenues, the traditional business model of these local news media has been completely undermined. This has resulted in shrinking newsrooms, 'ghost newsrooms', consolidations and even bankruptcies which in turn has not only reduced media pluralism subsequently, but in some cases even lead to complete 'news deserts' on local level, thus, denting the democratic processes at the local level. The fallout from the COVID-19 outbreak and the consequent abrupt loss of advertising revenues is further challenging the situation for the local media. There is a great risk of further undermining a crucial part of our democratic infrastructure.

The goal of the pilot project is to map the local and regional media ecosystem in the Member States, identifying existing and emerging 'news deserts' and noticeable lack of media pluralism, thus, creating a better repository of knowledge at a level for which there is insufficient data ('news deserts', access to local news); and to provide such local, regional media and community media with a tailored support that is directly linked to situations such as 'news deserts', 'ghost newsrooms' or a noticeable lack of media pluralism in areas of need.

In order to prevent formation of the 'news deserts' and to help restore the local and regional media fabric in areas in which there is insufficient provision of quality news and, thus, a pending threat to an effective access to diverse quality content, the pilot project aims to:

- support the mapping of the local and regional media ecosystem in the Member States in order to identify 'news deserts' and areas that are at risk of becoming such; and
- provide targeted and tailored support to independent local, regional media and community media in already existing or soon to become 'news deserts'. The support should focus on or include the adoption of new technologies such as AI, data and similar by local, regional and community media, for which the sector is still not comprehensively equipped.

*Remarks*

The underwater soundscape holds a wide range of information on the prevailing geological, biological and human activity in the marine environment. Within the context of Directive 2008/56/EC of the European Parliament and of the Council of 17 June 2008 establishing a framework for community action in the field of marine environmental policy (Marine Strategy Framework Directive) (OJ L 164, 25.6.2008, p. 19) (MSFD), where Descriptor 11 focuses specifically on underwater noise, the research and monitoring of underwater sound has grown considerably over the last few years and various research projects are already recording underwater sound in European seas. Being able to filter out the individual components (detecting and identifying certain types of ships, marine organisms, offshore human activities, etc.) from these complex underwater sound recordings and making them open and easily available, opens a plethora of possible valorisation options (ranging from automated environmental monitoring to offshore security applications).

A specific application lies in the development of tools to support the MSFD, and more specifically Descriptor 11. The precise knowledge of the sound signature of both biotic and abiotic sources, is needed to be able to connect measured sounds to the source and to identify the biotic and abiotic presences in an area. This requires libraries with underwater sound reference signals, which are currently only starting to be developed for deep-water environments and where little or nothing exists for shallow seas. The underwater soundscape in shallow seas is typically more complex than in deep-water environments as they are characterised by a lot of reflections and sound sources, especially so in highly impacted and highly dynamic areas, with intensive human activities.

PILOT PROJECTS**CHAPTER PP 08 — AGRICULTURE AND MARITIME POLICY** (*cont'd*)PP 08 22 (*cont'd*)PP 08 22 01 (*cont'd*)

The pilot project will build and test a prototype of an open reference library for marine underwater sound signatures focused on shallow, highly dynamic sea areas. It includes the:

- setting up of a database of underwater sounds together with whatever information is known about their source; since the availability of databases for sound in shallow seas is limited, it is necessary to ensure that sufficient measurements can be made available to build, fill and evaluate the prototype; where possible it will be built on existing data sets, where necessary scientifically based recording and processing of additional sound signals will be carried out in order to achieve a representative fill and to be able to make the necessary links with related (open) data streams that can strengthen the interpretation.
- using this database to train artificial intelligence algorithm for attribution of source; research, development and implementation of advanced methodologies for the deployment of artificial intelligence and neural networks to build a framework for sound source classification, and the subsequent development of open source packages for automated signal classification. Testing of the procedures in a shallow seas use case.
- making the database and software publicly available; although the use of the database will be mainly focused on professional purposes, such an initiative also has great potential for involving the wider society in research and innovation (e.g. citizen science/ocean literacy), tying in with the ambitions of the EU Open Science Policy ,as embedded throughout the Horizon Europe programme.

*Remarks*

Where once the iron curtain separated countries from each another, nature now connects them in a unique continuity of natural habitats which span the length of the European continent.

The European Green Belt runs through 16 Member States, five candidate countries, one potential candidate and two third countries. This is Europe's longest green network, a flagship of green infrastructure, which must be protected and conserved for future generations.

Building on the success of the BEST (voluntary scheme for Biodiversity and Ecosystem Services in Territories of European overseas) initiative, it is proposed to implement a similar scheme for such services along the European Green Belt for young volunteers or jobseekers.

The project shall therefore be called BEST BELT (Biodiversity and Ecosystem Services and Training along the European Green BELT)

COMMISSION  
PILOT PROJECTS**CHAPTER PP 09 — ENVIRONMENT AND CLIMATE ACTION** (*cont'd*)PP 09 21 (*cont'd*)PP 09 21 02 (*cont'd*)

Actions could be based on:

(1) Training and education of young volunteers and jobseekers for biodiversity and ecosystem services:

Volunteers and jobseekers from all over Europe and participating countries should have the possibility to apply via a platform offered by the Commission to different projects along the European Green Belt. These projects can be carried out by NGOs, universities, companies, state or regional authorities. Before diving into fieldwork, the volunteers and jobseekers shall receive a training on biodiversity and ecosystem services facilitated and they shall be prepared for the work they are going to do on site. Also, units for working in a multicultural environment as well as harassment courses shall be part of the trainings before the field work. This would increase their knowledge and networks.

(2) Ecosystem and biodiversity services in combination with climate change adaptation and mitigation:

The work executed in the area of the European Green Belt shall be used to explore the synergies of providing ecosystem and biodiversity together with climate change adaptation and mitigation measures. Activities for designation and management of protected areas shall be carried out in the field. Together with experts, specific goals shall be set for each project, identifying the work needed on the ground.

(3) Capacity building and outreach activities and involving organisations in the Region:

This project should also involve local communities and different actors in the field. The works happening on the ground shall be explained to the communities and also local authorities shall be trained on the links between interconnected environmental issues (biodiversity, climate change and land degradation) and related processes.

Best practice examples shall be shared along projects on the belt and each year a competition between the projects for innovative ideas and work shall be held.

For further outreach also Member States, NGOs, regional organisations and International Organisations shall be involved in a multi stakeholder approach. A blueprint could be the Green List approach developed by the IUCN.

(4) Raising awareness for the importance of biodiversity:

By connecting activities for ecosystem preservation and restoration with information given to tourists travelling the Iron Curtain Trail, education on environmental issues can be spread easily and in a low-threshold fashion. Different levels of knowledge, adapted to e.g. families can make the Iron Curtain Trail more attractive, thus fostering sustainable tourism.

PP 09 22 01 *(cont'd)*

*Remarks*

Climate change and biodiversity loss are strongly interlinked. Climate change impacts the ecosystems and changes the habitats of species, which impacts their ability to survive. The more the temperatures rise, the fewer species will be able to survive. On the other hand, poor ecosystem health exacerbates the effects of climate change, when healthy ecosystems mitigate the impacts of climate change. Still, climate change gets much more attention in the public debates compared to biodiversity.

Economic pressures on the use of natural resources are high and growing, and economic growth has not yet been achieved without a loss of biodiversity. Currently, we are losing biodiversity at an alarming rate and there is an urgent need for action.

We need more protected areas. According to the EU biodiversity strategy, we should protect at least 30 % of our land and sea areas. Untouched areas are so scarce, that even if we would protect all of them, that would not be enough. Now, with the ongoing negotiations on the biodiversity convention, we should shift from the principle of no-net-loss to the net-plus principle. This means that also the compensation principle should be more ambitious than before. When a new land area is taken to use, an area of the same or bigger size should be restored or it should be compensated by protecting a new area.

The EU's biodiversity strategy for 2030 focuses on sustainable use, but more focus should be given to binding targets for conservation, restoration and use.

Through carbon offsets and compensations, it is possible to better link climate to biodiversity. This can be done, for example, by connecting the voluntary carbon offsets and compensations, e.g. the ones that you can buy when you buy a flight ticket or the ones companies are using to compensate for their emissions, so that they claim to be carbon neutral, to biodiversity conservation and restoration. This could be done through directing the payments to funds that buy areas to be conserved or restored, or to the conservation of old grown forest and the restoration or conservation of terminal felled forests and peatlands, to support their rewilding in the next decades and centuries.

Currently, many voluntary offset schemes exist, but there is no guarantee of their real-life impact and they risk to be greenwashing.

The pilot project will discover how the climate offsets and compensations, and maybe ETS in the future, can be linked to directly benefit biodiversity conservation and restoration.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 09 — ENVIRONMENT AND CLIMATE ACTION** (*cont'd*)PP 09 22 (*cont'd*)PP 09 22 02 (*cont'd*)*Remarks*

As maritime traffic increases, although offering a promising international growth to a port, it creates a concern on the environmental burden to the local and regional community. In an effort to mitigate such an environmental impact, many port authorities have adopted a new strategy envisaging a self-sustained port in terms of energy autonomy and zero-emission production, with the use of new technologies that will help manage resources in a more sustainable and cost-effective manner. In fact, the use of Renewable Energy Sources (RES) to cover the energy needs of port activities along with the availability of electric charging services to hybrid and fully electric vessels and the operation of vessels using electricity provided by the ports while at berth (On-shore Power Supply, OPS) are considered some of the most innovative and impactful characteristics of a modern port. The implementation of such actions can drastically reduce vessel emissions and noise inside the port areas, and are especially critical for a continuously expanding port.

In this respect, upgrades and optimisation of the port energy network and the corresponding operational framework can significantly improve the environmental performance of the port transforming it into a greener, technologically advanced pillar of the maritime industry. The introduction of integrated technical applications related to the power grid of the port, the energy storage, the monitoring and the energy management are expected to provide a sustainable holistic solution that will upgrade the future energy profile of the port, providing also the shipping industry with access to more sustainable and greener sources of energy.

Ports adopting such a strategy and implementing such investments are becoming de facto energy hubs

- managing the flow of energy from:
  - the local electrical grid
  - RES to ships (wind-, wave-, sun-to-power)
  - floating power sources (barges that provide additional energy to the port, gas-to-power)
  - waste (waste-to-power),
- managing energy storage in batteries other storage means
- storing green hydrogen (produced from RES) for use in fuel cells
- managing the flow of energy to:
  - port's own energy requirements
  - vessels at berth (OPS)
  - charging electric or hybrid vessels
- maintaining an 'electric cooperation' of the port and local grids by integrating both for reasons also of 'peak shaving'.

There are certainly technical issues to be tackle dealing with grid capacity and technologies but the problems are not merely or only technical. After the steps of implementing full port electrification and energy management, ports are confronted with several related commercial and financial challenges. In fact, there are various alternative operating models of ports as energy key players; indicatively:

- Closed distribution network operator: the port acts as the sole operator of a small, closed distribution grid being responsible only for distribution of power from the energy providers to the ship-clients. In this case, the port may charge a tariff for the use of the port grid by ship operators. This may be the case for liner vessels (container carriers, Ro-Ro, Ro-Pax vessels) or cruise vessels calling at specific ports regularly. Each vessel manager may select an own power supplier with whom that manager may have a long-term contract for the purchase of power.

**CHAPTER PP 09 — ENVIRONMENT AND CLIMATE ACTION** *(cont'd)*

PP 09 22 *(cont'd)*

PP 09 22 02 *(cont'd)*

- Energy provider: the port can deal with the energy transactions and perform energy trading (buy and sell), such as making short- and long-term contracts with producers and ship-clients. This may be the case for charter vessels (tankers, bulk carriers, etc.) that may call at a port on occasion. The vessel manager will not sign a long-term contract with an electricity provider but will instead opt to purchase the electricity directly from the port or from the port supplier.
- Energy producer: the port can produce energy especially via RES or Energy Storage Units, aiming at providing ships with that energy.

As the energy market is unbundled, these alternative operating schemes are not always compatible with one another and, hence, the port will be obliged to select which is the most beneficial scheme according to their own business model. Currently the way to deal with this, is for a port to analyse business risks, make an appropriate business plan, but eventually select one single option for the commercial structure of the pricing model on a sub-optimal *modus operandi* (i.e., not covering all cases).

In an era when RES and OPS are essentially necessary measures for the greening of port activities and when to this end significant investments are needed, a pricing model, which is not flexible due to the current regulatory requirements for energy, poses an additional hurdle to the adoption of such beneficial technologies and creates a significant bottleneck in the implementation of Green Deal targets in ports and shipping.

Therefore, a regulatory framework that is especially for ports must be established that overcomes these obstacles and allows the ports (being probably the nodes of the network with the highest concentrated external costs) to flexibly manage their energy system. Moreover, it will create a port network that is free from obstacles and bottlenecks and capable of moving goods, services, capital, and people seamlessly. Finally, it will create new commercial opportunities to companies operating, thus fostering port competitiveness, sustainability, and better integration of ports in the transportation and energy networks and in the international value chain.

*Remarks*

The European Green Deal has set ambitious goals for public and private stakeholders to take action to combat climate change. Its implementation will require an abundance of resources, including viable and actionable data to allow governments to identify risks, tailor policy response and resource allocation, and monitor progress at the local, national and regional level. Satellite imagery provides policy-makers with a unique view of the Earth and its needs. The Copernicus programme will be at the core of the European Green Deal monitoring strategy. In addition, the Union has the Copernicus Contributing Missions that fill in the gaps for demand of high resolution and area coverage needed for environmental and climate policy development. The use of contributing missions with monitoring capability shall be considered if higher temporal cadence or spatial resolution is required, to augment Sentinel missions monitoring capabilities.

COMMISSION  
PILOT PROJECTS**CHAPTER PP 09 — ENVIRONMENT AND CLIMATE ACTION** (*cont'd*)PP 09 22 (*cont'd*)PP 09 22 03 (*cont'd*)

New space technology can deliver real-time and detailed information on large areas that allow stakeholders to receive real-time alerts and take action on time. Such datasets can be at a more frequent cadence, greater resolution and have access to more past data to inform current trends and can come with sophisticated analytics. Concurrently, this allows for a full complementarity of new space monitoring missions to Sentinel missions. The Sentinels act as the radiometric reference for ensuring seamless interworking. This is also essential for retaining forward compatibility, comparability and continuity, especially when future evolved Sentinel satellite missions become operational.

Union institutions and Member States rely on Copernicus for space-based data sets to track deforestation, biodiversity loss, soil degradation, and agricultural land use. However, complementarities with contributing monitoring satellite data have not been sufficiently explored, potentially leaving Union programmes without complete data sets, or capabilities (such as analytics). This pilot project is therefore necessary to produce a gap analysis of where commercial data and Copernicus capabilities can be complementary, and demonstrate the potential added value of detailed and near-real-time data sets.

This study will take place over one year, with the intention to initiate a demonstrator pilot project in the next financial year.

Europe's capacity to compete in the global market will depend on its capacity to convert scientific and technological knowledge into innovative products and services. The premise is that enhanced collaboration between art and (digital) technology would not only stimulate innovation and thereby enhance the competitiveness of Europe; it would also help unleash creativity in society and in European regions. Multiple presidency conclusions on 'crossovers from culture to businesses' have invited the Union institutions to consider enhancing collaboration between arts and technology for a holistic exploration of opportunities that overcomes the traditional boundaries of sectors, disciplines or the culture-engineering divide. The Commission - DG CONNECT - has reacted by launching the S+T+ARTS=STARTS programme focused on promoting innovation in industry, with the arts as the catalyst for unconventional thinking and exploration.

The goal of this action is to stimulate the creation of centres across Europe that can serve as venues for engineers in industry (digital industry and other sectors) to work together with artists and other creatives. Such centres could be physical buildings or consist in a set of activities in a region that stimulate collaborations between art and technology to enhance innovation in local economy and for urban/regional development. The action will engage the private sector (industry, foundations) and public sector (city councils, structural funding initiatives) in setting up or creating such local centres.

Applicants targeted: art institutions, foundations, digital industry and industry in various sectors interested in linking digital and art in innovation activities, regional players in innovation.

Description of the activities: residencies of artists in industry and technology institutions (via third part funding) working on concrete small-scale projects, exhibitions, workshops, dissemination, educational activities.

## INTRODUCTION

Evidence-informed policymaking (EIPM) has become more important than ever due to the ever-increasing complexity of economic, social and environmental challenges we are facing. The current policy challenges are characterised by a mixture of complexity, uncertainty and ambiguity. These challenges ultimately have an impact on citizens at local and regional level, which is why EIPM matters even more at those levels of governance. Moreover, in the current climate of populism, post truth and fake news, public scrutiny and the accountability of science are crucial aspects to enhance the democratic processes.

The pilot project 'Science meets Parliaments/Science meets Regions' addressed these challenges mainly through the organisation of events on various policy topics and the financing of studies in support of this event, as well as some pilot training course for national, regional and local policymakers.

As the pilot phase is ending, it is clear that there is still a real need for this tool, especially at regional and local level. It is also obvious that the next steps should work towards a clearer focus and structural impact across regions and cities in Europe, beyond the pioneering work in the pilot project.

This will be the main objective of the preparatory action, which will primarily address Commission policy priorities topics in line with the Commission policy priorities:

- European Green Deal,
- digital transition,
- promoting an economy that works for people,
- enhancing European democracy,
- promoting the European way of life,

The regional and local actors across Europe are actively involved in reaching these policy objectives in particular:

- contributing to make Europe the first climate-neutral continent by 2050, while boosting the competitiveness of industry and ensuring a fair transition for the territories and workers affected,
- implementing the social pillar and supporting SMEs investment and financing,
- enhancing the integration of migrants at local level and fighting poverty,
- increasing investment in technologies such as block chain and artificial intelligence,
- giving a stronger role to European citizens in decision-making in order to build trust in the institutions/public sectors as well as in the democratic processes,

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 01 — RESEARCH AND INNOVATION** (*cont'd*)PA 01 21 (*cont'd*)PA 01 21 01 (*cont'd*)

The preparatory action will also aim at filling the gap in the Union instruments dealing with EIPM, which target mainly the national authorities (governments) and do not foresee any networking initiative at European level to share practices, methods and instruments.

## OBJECTIVES

Building on the successful results achieved during the pilot phase, the preparatory action aims at strengthening local science for policy ecosystems through the following objectives:

- (1) building awareness and mutual understanding at regional, interregional and national level on policy-relevant questions and the kind of evidence needed to answer them;
- (2) supporting regional and local decision-makers and policymakers to develop skills to understand, obtain, assess and utilize targeted, reliable high-quality evidence as well as engaging with stakeholder;
- (3) creating a community of practitioners across Europe that share experiences and knowledge in order to enhance the local ecosystem for EIPM.

## ACTIONS OR TYPES OF FINANCIAL INTERVENTIONS

## 1. Country-based component

In cooperation with the Committee of the Regions, a 'recommendations guide' of implementation of the post 2020 policies will be elaborated. Then, this strand will finance 10 innovation camps at regional and municipal level to address key challenges framed in one of the abovementioned Commission policy priorities. The project proposals have to be submitted by regions or cities in partnership with local stakeholders (universities, development agencies, etc.). Furthermore, the project should target structural impact, and preferably be embedded in a process at national or regional level, with the aim of putting in place policies, programmes or strategies.

This component will also support pairing schemes between policy-makers and scientists, in order to build policy makers' capacity to use research in their work. Through creating these connections, the programme aims to facilitate a long term dialogue between the two communities, to make research more accessible, and to increase policy-makers' use of evidence in their work.

## 2. Multi-countries component

This strand will support initiatives, such as conferences or workshops, which involve at least two regions or cities, possibly based on existing partnerships. The topic of the initiative should be in line with one of the above-mentioned Commission policy priorities. This component will allow regions and cities to share experiences with others facing similar challenges, or having complementary expertise and capacity.

**CHAPTER PA 01 — RESEARCH AND INNOVATION** (*cont'd*)PA 01 21 (*cont'd*)PA 01 21 01 (*cont'd*)

## 3. Community-building component

This component will support the creation of a European community of practitioners involving the participants in the preparatory action and in the previous pilot project. It will finance actions such as:

- training courses for policy-makers on EIPM and citizen engagement;
- training courses for national, regional and local schools of government of academies (training the trainers);
- a study on the practices and tools to strengthen the capacity to create and use evidence at regional and local level across Europe; aiming to provide a broad overview of EIPM at subnational level;
- a platform to share best practices and examples of EIPM at subnational level;
- an annual conference organised jointly with the European Parliament and the Committee of the Regions.

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The aim of this preparatory action is to develop a strategy designed to increase access to education tools in the European areas and communities that mostly need such support. Remote areas like mountain areas, rural areas, islands or deltas are particularly significant for this preparatory action. The preparatory action will consist in identifying the best available solutions and practices in the field and will lead to implementing and testing some of the most suitable solutions on a large scale or for a larger number of beneficiaries.

*Remarks*

The UN Sustainable Development Goals (SDGs) include specific goals on water, in particular SDG 6 – ‘Ensure access to water and sanitation for all’ and SDG 14 ‘Conserve and sustainably use the oceans, seas and marine resources for sustainable development’. Other goals like SDG 11 – ‘Make cities and human settlements inclusive, safe, resilient and sustainable’ emphasise the need for a system approach to tackle the issues raised by SDGs holistically beyond resource efficiency.

Following a first pilot project, this preparatory action will emphasise links with other resources (including in particular energy) and position sustainable water management in a broader context. The world economic forum has issued a reflection on ‘water and the 4th industrial revolution’, that points to a convergence of the digital, physical and biological domains. It mentions digital technologies like ‘The Internet of Things’, virtual and augmented reality and artificial intelligence that are inducing process changes in businesses and society, but more importantly also social changes on values, behaviour and identities. Indeed, many of the goals identified in the UN SDG address raising of problem awareness and to ‘promote responsible behaviour, educate about the importance of efficiency of use of resources’.

The main premise of this call is that a joint approach of the digital with the arts will help induce changes in our mind-sets, on a business, on a societal and on an individual level. Art and its capacity to present data and induce novel experiences (not the least with novel digital technologies like AR/VR) might be a game changer in the way information can induce changes of values and behaviour. Another important aspect is community involvement where digital and the arts can play jointly an equally important role in enabling participatory collective data gathering. Art can ultimately drive creative solutions to SDG goals by questioning established patterns and pushing technology to limits. Among others, the action will build on S+T+ARTS programme -innovation at the nexus of Science, Technology, and the ARTS. With STARTS, DG CONNECT - has promoted art as a fruitful element in helping digital technologies making a difference for humans and environment.

Applicants targeted: organisations working at the interface of art with technology and ecology, technology institutions and end-users willing to team up with artists, art institutions, foundations.

Description of the activities: residencies of artists in industry and technology institutions and concrete small-scale activities that point to new pathways for policy and society (via third part funding), exhibitions, dissemination, awareness raising actions, educational activities...

The platform supports data-driven policymaking - at regional, national and European levels - by providing macro-level trusted insights into the growth potential of various startup ecosystems. It has already informed and will be an important tool to monitor progress towards, for example, the targets set out in the recent Commission Communication on the 2030 Digital Compass (COM(2021) 118 final) and the impact of the EU Startup Nations Standard adopted by 25 Member States to date. A follow-up ‘European Startups 2.0’ project would support the consolidation of the platform and its transition to becoming a self-sustaining resource available to policymakers and other private and public technology ecosystem holders in the medium- and longer-term.

Startups and scaleups are key to Europe’s future economy and society. They have become a significant contributor of new, quality jobs and are by far the fastest and most resilient growing job engine with 10% year-on-year growth. Two million people are now employed in tech startups across Europe and this is expected to rise to 3,2 million by 2025. Startups and scaleups have a proven capacity to develop breakthrough innovations in response to real world needs, create new jobs and build synergies with Europe’s strong traditional industries. The role startups can play in the recovery from the ongoing crisis - and in accelerating the green and digital transformation - cannot be understated.

*Remarks*

The New European Bauhaus (NEB) initiative, announced by President von der Leyen in her 2020 State of the Union address, is an environmental, economic, social and cultural project, aiming to combine sustainability, investment, affordability, accessibility and design in order to help deliver the European Green Deal and its overarching goal for the Union to become the world’s first ‘climate-neutral bloc’ by 2050.

Values and idea. The core values of the NEB are sustainability, aesthetics and inclusiveness. Its ambition is to develop an interdisciplinary framework to support, facilitate and accelerate the green transformation by combining sustainability, innovation, circularity and quality of experience, including aesthetics. This framework will embrace industrial, educational, artistic and cultural spheres creating bridges between science, research, technology and enterprises, on one hand, and culture, architecture, art and design, on the other hand. It will also help to promote social inclusion, including affordability and accessibility. To sum up, the NEB is about finding innovative, creative and suitable solutions to complex societal problems (in buildings and beyond) through co-creation.

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 01 — RESEARCH AND INNOVATION** (*cont'd*)PA 01 22 (*cont'd*)PA 01 22 03 (*cont'd*)

Timeline: the NEB will unfold in three phases: co-design (from October 2020 to summer 2021), delivery (from September 2021 onward) and dissemination (from January 2023 onward). The phases will overlap, as individuals and communities interested in the first ideas are likely to become partners to deliver and scale up the initiative.

Management: the NEB is managed by the core project team in the Joint Research Centre under the steering of President's cabinet. The work is coordinated with the two Lead Commissioners: Mariya Gabriel and Elisa Ferreira and supported by the Steering network with core DGs and cabinets (EAC, RTD, ENER, CLIMA, ENV, GROW, CNNECT, REGIO, EMPL, SecGen, Com). In addition, the External High-level Roundtable of Experts provides an informal advice on the initiative.

Given an interdisciplinary and horizontal nature of the NEB initiative coupled with a complexity of interlinkages between existing structures, frameworks, regulations and financial instruments it is important to streamline the standards and guidance in one platform and make them available to potential NEB partners and project beneficiaries.

In light of the above, a preparatory action New European Bauhaus Knowledge Management Platform will be launched. The aim of this preparatory action will be to streamline the standards and guidance around the three dimensions of the NEB (sustainability, aesthetics, inclusiveness) and information about NEB projects funding opportunities. This will allow potential partners and beneficiaries to align with the NEB standards while designing and implementing their transformation projects and well as help them to match project ideas with available funding.

The following steps will be taken in order to reach the aim of the preparatory action:

1. to identify and classify the requirements and standards, guidelines, codes of practices related to the three dimensions of the NEB (sustainability, aesthetics, inclusiveness) and the existing funding opportunities in order to find synergies, gaps and define further needs; identify and reach out to potential partners in order to establish the NEB stakeholders fora;

2. to establish the NEB Knowledge Management Platform designed in a user-centric manner which - on the one hand - will disseminate the collected information about standards, guidance and project funding opportunities among the identified NEB partners and a broader public and - on the other hand - will serve as a depository of ideas and platform for discussion, exchange of best practices for the interested parties;

3. to develop a methodology for project self-assessment and design a dedicated practical toolkit to guide the preparation and implementation of individual local transformation projects. For each requirement to be aligned to the NEB principles (from the integration of inclusion, sustainability and quality of experience values to the multidisciplinary and collaborative approach) a number of indicators and their related assessment criteria will be established to assist a proper identification and assessment of NEB projects.

The EU Blockchain Observatory and Forum aims to mobilise blockchain stakeholders involving private companies, public bodies, academia, civil society and individuals in technical and policy discussions about the future development of blockchain. It is also a trustworthy knowledge base about Union blockchain ecosystem including (i) publication of deep dive analysis of thematic issues, the technological and policy trends; (ii) mapping blockchain projects across the Union and the world; and (iii) workshops around topics where acting at Union level would be required or would have an impact.

Blockchain and Distributed Ledger Technologies (DLTs) as a 'trust technology' can provide responses to various challenges identified in the course of integration of different digital services, securing cyber and social security, and improving the efficiency of economy and society, ranging from identity and document exchange management to self-executing contracts, processing information flows and ensuring the maintenance of repositories and registries. Europe is well placed to lead the development of new trusted public, commercial and industrial services and applications based on blockchain and DLTs. Europe has academics, innovative entrepreneurs, start-ups and large firms eager to use such technologies in their sectors.

While blockchain and DLTs are increasingly adopted in different domains, it has been increasingly highlighted that a sound and healthy scaling up of technology is hampered by fragmented information and knowledge as well as chasm between policy-making and expert knowledge on technology. In order to unlock advantages that the technology brings, a coherent and balanced approach is necessary to scale up blockchain ecosystem across the public and private sector by dissolving the information and knowledge disparity, linking the existing projects in Europe, and mobilising the stakeholders.

The EU Blockchain Observatory and Forum has built a community with strong credibility around its events and thematic reports and has become a recognised player in Europe and on the international scene since its launch in February 2018 under the previous EP pilot project (2017/2018).

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 20 (*cont'd*)PA 02 20 01 (*cont'd*)

Under this preparatory action, island authorities and communities are taught how to write open tenders themselves. The open tenders are then for private clean-energy companies to competitively respond to with proposals, in particular in connection with solar, wind energy, storage (not only batteries) and district heating or cooling.

Rapidly falling renewable energy costs and increasing numbers of clean-energy providers mean that Union islands should now be transitioning to clean energy, provided that their authorities know how to write, evaluate and award tenders. For islands with low administrative budgets, this process is risky, as it makes highly technical, financial and legal demands. This preparatory action will provide islands with off-the-shelf templates for tendering and will be developed throughout its duration by taking island representatives to visit renewable energy experts for islands and sites around Europe, where profitable clean-energy projects are already being delivered, where possible involving renewable energy communities, in order to share first-hand experiences and learn about the latest project life-cycle budgeting for islands. These real-life training classes and site visits will then be distilled into free, open-access online training courses at the end of the preparatory action.

This preparatory action reverses the normal Union project process, in that, instead of providing a successful standalone proposal in response to a Commission open tender, it will teach island communities how to write tenders themselves, to which they will receive responses that they have been trained to process and manage.

In short, it follows the well-known mantra: 'Give a person a fish and he will eat for a day; teach a person to fish and he will eat for a lifetime.'

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The preparatory action is unique in that it brings together, through the new framework of the Global Covenant of Mayors, villages and rural areas which are at the forefront of climate change action. Union villages and rural authorities around the world, having a closer knowledge of climate change challenges for rural territories and having pushed for an ambitious global climate agreement, will join forces to lead the efforts to achieve the climate objective of zero emissions by 2050.

**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 20 (*cont'd*)PA 02 20 02 (*cont'd*)

Union villages will work closely together within and beyond the Union for overall capacity building and, specifically, to share experiences, transfer knowledge and know-how on sustainable energy and climate planning, share best examples on climate change mitigation and adaptation, and share knowledge about Union innovative financial instruments in support of sustainable energy investments.

The preparatory action involves analysis of existing good practices for sustainable energy and climate planning implemented in villages and rural areas and the development of innovative integrated rural strategies to properly address access to energy and energy poverty, climate change mitigation and reduction of greenhouse gas emissions, as well as adaptation of rural territories to climate change.

These strategies should be in line with the 'Clean Planet for All' strategy (Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee, the Committee of the Regions and the European Investment Bank of 28 November 2018 'A Clean Planet for all – A European strategic long-term vision for a prosperous, modern, competitive and climate neutral economy' (COM (2018) 773 final)) and the 'Clean Energy for all Europeans' package (Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee, the Committee of the Regions and the European Investment Bank of 30 November 2016 'Clean Energy for all Europeans' (COM(2016) 860 final)),“ as well as the United Nations Sustainable Development Goals and 'Sustainable Energy for All' objectives.

Finally, provision is made for the transparent monitoring, reporting and verification of greenhouse gas emissions in line with the requirements of the United Nations Framework Convention on Climate Change.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The preparatory action establishes a European platform of regions on artificial intelligence (AI) and big data (BD) so as to enhance public administration efficiency and user-centred services. The rapid integration of digital technologies poses a number of challenges for national, regional and local governments. An important aspect of this transformation concerns the expectations of citizens and businesses about their interaction with governments. This requires the digital transformation of governments to rise to the challenge.

Public administrations need to change the way they work and organise themselves. They have to ensure the skills needed to use new digital tools; they need to work collaboratively and engage with citizens and businesses.

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 20 (*cont'd*)PA 02 20 03 (*cont'd*)

The Union's vision is to make public administration open, interoperable, efficient, inclusive, borderless and user-friendly by providing a new digital environment for public services. In its Communication of 19 April 2016 entitled 'EU eGovernment Action Plan 2016-2020: Accelerating the digital transformation of government (COM(2016) 179 final) and Communication of 14 September 2016 entitled 'Connectivity for a Competitive Digital Single Market – Towards a European Gigabit society (COM(2016) 587 final), the Commission considers that digital transformation of public administration is the key to a successful Digital Single Market.

The Union's common effort includes a consistent legal basis, policies and financing programmes for digital interoperability and innovative solutions for public administrations.

However, there is a need for a Union tool to support a platform of regions able to address digital transformation of public administration across Europe.

AI and BD are driving a new social and economic paradigm in Europe and beyond. Regions need to be part of the process as the level of government closest to citizens.

Use of AI and BD by public administrations has increased, demonstrating great potential in a broad range of sectors - from mobility to environmental monitoring and geophysical simulations, and from smart power grids to personalised healthcare. A European platform of regions will contribute to exchanging and developing common responses and solutions. European regions can provide significant input into making public administration systems more efficient and capable of generating public value and delivering better public services.

A move towards a European platform of regions for digital transformation has already started, proving that regional engagement represents added value for the digital single market objectives to modernise public administration and reduce the digital divide. To that end, two European high-level seminars have been organised in Brussels, on digital transformation of public administration, with the participation of European regions, businesses and the Commission - (DG DIGIT, DG CONNECT, DG ECOFIN and the Secretary-General). The meetings have been promoted by the Regional Government of Emilia-Romagna, with the involvement of Hessen, Catalonia, Flanders, Wallonia, Île-de-France, Nouvelle-Aquitaine and Trondheim and, from the business side, IT and AI providers. Emilia-Romagna hosts the European Centre for Medium-Range Weather Forecasts, has been selected to be a European HPC Supercomputing Centre and is establishing an international foundation on BD and AI for human development.

## Objectives and activities

The digital transformation platform of European regions will:

- share knowledge on Union, national and regional legislation and regulatory frameworks so as to enhance the use of AI and BD,
- share models to enhance strategic drivers towards digitalisation, in particular infrastructures, data and services, digital skills and communities,
- improve sharing of data sets and knowledge on AI and BD applications for public services,
- enhance the AI and BD skills and capabilities of civil servants,
- develop and share new ways of working, including smart working.

**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 20 (*cont'd*)PA 02 20 03 (*cont'd*)

Specifically, the preparatory action focuses on the following activities:

- establishment of the platform of regions for AI and BD, connecting regional governments, ICT agencies, suppliers and enterprises,
- development of pilot testing arrangements in connection with the cultural transformation stemming from the digital workplace and smart working,
- two European hackathons on the use of shared data, standards and interoperability for public administrations,
- two seminars for the co-creation of user-centred public services based on AI and BD,
- peer learning for managers in connection with AI and BD.

The platform involves a dozen European regions from different Member States.

The preparatory action complements the ISA2 programme. Specifically, the Join Up platform can contribute to the action.

The Centre for Innovation and Civic Imagination (CICI) is an instrument for social innovation, communication, research and promotion, as well as a forum for discussion and information for citizens, the public and experts in various fields. The CICI also aims to become a permanent laboratory in which to develop and test different forms of collaboration between city actors in order to support participatory practice and promote discussions on urban innovation projects. It manages analysis processes, develops pilot projects for the community and seeks to solve the city's pressing problems and plan future projects, and identify complementary functions in relation to the current dynamics of the city. One of the particularities of the CICI is the effective organisation of open meetings and innovation methodologies recommended by the Commission, using the concept of the quadruple helix (addressing themes for analysis with the participation of experts in public administration location, academics, the business environment and the NGO sector), or even the quintuple helix model, by involving the citizen - a direct beneficiary of measures aimed at increasing the quality of life in the city. The CICI coordinates and guides complex networks of participatory governance.

EU Road Safety Exchange + (EURSE) (II) will consolidate the work on exchange of knowledge and best practice of the pilot project and expand the scope to a larger number of Member States. A longstanding programme ensures continuous peer support, essential to achieving both national and European targets for reducing road deaths and serious injuries, as well as high-level visibility and ownership for road safety in the Member States. It provides new tools and solutions based on international good practice and establishes consistent partnership between countries. Targeted action on key topics will help close the significant road safety performance gap between Member States.

The preparatory action will expand the number of participants of the EU Road Safety Exchange project and identify participating countries based on their potential for achieving significant road safety improvements. Twinning experts would be selected based on their proven record of implementing effective road safety measures on the subjects of interest. The preparatory action will set up a new mechanism for exchange and systematic follow-up to ensure that professionals in participating Member States have the necessary knowhow and tools to introduce long-term reforms in road safety, in line with national resilience and recovery plans. The activities envisaged include online thematic workshops, study visits on the ground, as well as systematic follow-up and a final conference to share knowledge and experience with a wider audience.

**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 22 (*cont'd*)PA 02 22 02 (*cont'd*)*Remarks*

The inland waterways transport is changing benefitting from emerging technologies that lead to a safer, digital and more sustainable sector. Autonomous vessel operations will open new business opportunities, as well as new challenges, supporting the digitalisation and sustainability challenges of the Union. EU Space Data from Galileo, EGNOS and Copernicus will be key enablers of this transformation, by facilitating reliable and robust positioning information and harmonised images of the fairways and environment, needed for safe and green autonomous operations.

The need for highly accurate, resilient positioning is agreed for operations like: navigation in narrow fairways, bridge passing, waterways locks, auto-mooring and simultaneous berthing operations. Further automation (with no human in the loop) would welcome additional features that will be provided by Galileo differentiators, not leveraged yet, such as authentication and integrity in the position.

The definition of autonomous operation may rely on robust images of the area to be navigated. Today, operators and manufacturers rely on diverse sources of such data that lead to a non-harmonised approach. However, Copernicus images will ensure a homogeneous Union approach, supporting the safe integration of simultaneous autonomous operations as well as integration with manned traffic. The preparatory action shall be focused on:

- attendance to existing working groups addressing solutions for autonomous vessels, including different public/private platforms and interviewing key industrial stakeholders, such as shipping associations, port operators, relevant maritime and inland waterways authorities;
- contribution to standardisation work within CESNI (Comité Européen pour l'Élaboration de Standards dans le Domaine de Navigation Intérieure);
- identification of the user requirements for the safe navigation in inland waterways where autonomous, remotely piloted and manually piloted vessels will co-exist;
- definition of concept of operations and positioning performance needs for different operations of autonomous vessels;
- identification of main challenges to be overcome to ensure safe operation and resilient positioning;
- identification and analysis of the technical and regulatory barriers (e.g. lack of standards and regulation), industry value chain and new business models that could emerge in inland waterways navigation taking advantage of the three-dimensional synergies between satellite-based navigation, imagery and telecom;
- identification of the possible actions at national, regional and local level to boost business development, and support SMEs/start-ups to deliver EU Space based solutions to realize the future Union autonomous vessels capability for inland waterways;
- prototyping of onboard equipment that uses Galileo differentiators to address the main needs not covered so far by existing equipment, with focus on the use of Galileo authentication to prevent spoofing or use of fake signals, preventing accidents. Equipment prototypes developed within this pilot project should be based, when available, on existing commercial off-the-shelf components;

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 02 — EUROPEAN STRATEGIC INVESTMENTS** (*cont'd*)PA 02 22 (*cont'd*)PA 02 22 02 (*cont'd*)

- design of a safety case with Copernicus images to define the waterways to be tested;
- analysis of how much information is needed to be transmitted to have updated inland electronic navigational charts and the minimum speed of communication to guarantee a safe operation, including whether the vessel needs to download the information of the fairway in the port or can do while navigating;
- implementation of several demonstrations along selected inland waterways where it is expected that in the future autonomous vessels will coexist with manually piloted vessels. The aim is to demonstrate feasibility and added value in line with the Commission guidelines on Maritime Autonomous Surface Ships (MASS).

The vessels in the demonstration shall be equipped at least with:

- High-end GNSS receivers that include Galileo authentication and EGNOS.
- High-bandwidth communication means to:
  - download the information from Copernicus related to the fairway;
  - download the information of the hull contour of all the vessels navigating in the same inland waterway;
  - send to the monitoring centre all the sensors information;
  - receive from the monitoring centre control inputs in case that there is the need to remotely operate the vessel.
- Contribution to draft a new standard for minimum requirements for EU Space Data to guarantee safe autonomous vessel navigation in inland waterways in support of future regulatory initiatives.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The preparatory action builds on the success of the Erasmus for Young Entrepreneurs Global (EYE Global)/Achieve Leadership in Entrepreneurship and Cooperation Opportunities (ALECO) pilot project. It contributes towards achieving objectives of the Union in the field of entrepreneurship and economic growth by supporting the creation of start-ups across the Union.

The action is a one-way mobility scheme for new entrepreneurs of the Union providing for a stay of up to three months in the US, Canada, Singapore or South Korea. The destination countries have been selected on the basis of the progress made by the current pilot, trade relevance (including the existence of Free-Trade Agreements) and the existence of advanced start-up support ecosystems.

Up to 350 candidates from Member States are selected from the target group and given the opportunity to gain experience from successful and experienced host entrepreneurs and to interact with the host's start-up ecosystem.

The target group of participants includes profiles with the following eligibility criteria: (a) future entrepreneurs with ready-to-implement business plans and giving a binding commitment to start up a firm; (b) entrepreneurs who have started a business in the last three years, either alone or in partnership.

The Union budget supports the participating entrepreneurs by covering travel costs and subsistence costs in the chosen destinations for the duration of their stay and by funding the necessary measures to identify host entrepreneurs and promote the programme in the destination countries.

Arrangements for implementation of the action build on existing arrangements for the EYE Global pilot project, including delegation to the relevant executive agency where applicable, with provision being made for resources to be adjusted where necessary.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

As a follow-up to the existing pilot project under Item PP 03 18 02, and having regard to paragraph 40 of the European Parliament recommendation of 4 April 2017 to the Council and the Commission following the inquiry into emission measurements in the automotive sector (OJ C 298, 23.8.2018, p. 140), this preparatory action continues to fund measures relating to third-party testing of RDE in relation to transposition of Regulation (EC) No 715/2007 of the European Parliament and of the Council of 20 June 2007 on type approval of motor vehicles with respect to emissions from light passenger and commercial vehicles (Euro 5 and Euro 6) and on access to vehicle repair and maintenance information (OJ L 171, 29.6.2007, p. 1).

In the past, qualified third parties provided authorities at Union and national level with reliable information on the emission behaviour of vehicles. That information was rarely made available by the authorities responsible. Funding should be made available to allow them to provide reliable data from on-road emissions testing of passenger cars which is independent of the data provided by manufacturers and regulatory authorities in order to promote transparency and improve market surveillance.

Third parties will use validated test procedures as laid down in Regulation (EC) No 715/2007 and Commission Regulation (EU) 2017/1151 of 1 June 2017 supplementing Regulation (EC) No 715/2007 of the European Parliament and of the Council on type-approval of motor vehicles with respect to emissions from light passenger and commercial vehicles (Euro 5 and Euro 6) and on access to vehicle repair and maintenance information, amending Directive 2007/46/EC of the European Parliament and of the Council, Commission Regulation (EC) No 692/2008 and Commission Regulation (EU) No 1230/2012 and repealing Commission Regulation (EC) No 692/2008 (OJ L 175, 7.7.2017, p. 1), including the four RDE packages and the guidelines outlined in the Commission notice of 26 January 2017. They will publish the results of their measurements in order to support the development of best practice procedures and the provision of broader information to the authorities responsible and the public.

The focus of the work will be on lifetime compliance that can be assessed by testing vehicles which are outside the parameters currently regulated by either in-service conformity or market surveillance, i.e. vehicles more than five years old or which have been driven for more than 100 000 km. Such testing will provide extremely useful information on the quality of current emission control systems and will help in providing necessary information for the development of the new legislative proposal on emissions. The testing should include RDE tests and laboratory tests on older vehicles, as well as measurement of all possible pollutants, including those not currently regulated.

Independent third parties will thus contribute to better oversight of how exhaust standards are performing in practice and the extent to which the Union's objectives in terms of air quality and climate policy are being achieved. They will contribute to a broader understanding of exhaust reduction strategies with regard to acceleration, high speed, ambient temperature and other criteria. Their specific test procedure will be documented transparently and should take into account current rules on RDE and the latest research.

The abundance of money laundering, tax evasion and tax avoidance revelations over the last few years has significantly shaken the confidence of Union citizens, businesses and trade unions in the robustness and fairness of Union rules against money laundering, tax evasion and tax avoidance. When three out of four citizens expect the Union to do more on taxation, it is essential to ensure that public interests and interests of all stakeholders are taken into account in designing initiatives to strengthen European rules against financial crimes, tax evasion and tax avoidance.

**CHAPTER PA 03 — SINGLE MARKET** (*cont'd*)PA 03 20 (*cont'd*)PA 03 20 04 (*cont'd*)

This preparatory action creates a specialised and independent observatory on Union tax and financial crime matters, its main functions being to:

- create a publicly-accessible repository of data on tax evasion and tax avoidance in the Union and the effects of policy reform in these domains;
- disseminate the available data in a user-friendly manner and inform the wider public of issues relating to tax fairness, including related issues such as anti-money-laundering rules, for business and individual taxpayers and the wider public;
- provide secretarial and management functions for a future multi-stakeholder expert forum, which inter alia would be a consultative body in charge of methodological guidance in the area of taxation and financial crime;
- produce evidence and recommendations relating to combating tax evasion, tax avoidance and financial crime on the basis of the work of the forum;
- liaise with different international organisations and national administrations on issues relating to Union tax and anti-money-laundering policymaking (i.e. anti-money-laundering legislation is necessary to counter tax evasion).

Given the role of this observatory, implementation of this preparatory action should be led by the Commission's DG TAXUD, in close collaboration with other relevant DGs.

This preparatory action is a follow-up to previous pilot projects and continues to address the issue of dual quality, taking fully into account the results of the pilot projects, thus ensuring continuity. It focuses on extending the scope of research to include non-food products (e.g. detergents, cosmetics, toiletries and baby products, as provided for under the pilot projects), with samples from all Member States. In addition, it focuses on the feasibility of creating a permanent quality monitoring centre by Member States, NGOs or private sector initiatives etc. for products sold on the internal market, with a view to long-term action to resolve the issue of dual quality on the internal market.

This preparatory action is implemented via procurement. The Commission will launch a study which will be carried out with the help of the Commission's Joint Research Centre.

The preparatory action will include the collection of information on the relevant socio-economic impacts of the most welfare-friendly alternatives, such as, but not limited to: investment and operating costs and return on investment required to shift to the new system(s); throughput per hour; meat quality and safety; occupational health and safety; and sustainability.

The preparatory action will be concluded with a comparative analysis of the alternatives investigated both from an animal welfare and socio-economic point of view, in order to highlight the pros and cons of each alternative method under a common methodology.

All the results of this preparatory action will have to be made publicly available. The preparatory action will include the publication of one or more scientific papers in relevant peer-reviewed journals as well as technical factsheet for market operators. It will also include the organisation of a final conference presenting the key findings.

PA 03 22 01 Preparatory action — Analysis of life-cycle GHG emissions of Union buildings

*Figures (Differentiated appropriations)*

Appropriations 2022		Appropriations 2021		Outturn 2020	
Commitments	Payments	Commitments	Payments	Commitments	Payments

*Remarks*

Buildings are responsible for approximately 40% of Union energy consumption and 36% of the greenhouse gas (GHG) emissions because of their energy consumption. However, over their whole life-cycle they consume more energy than this. It is estimated that the life-cycle GHG emissions of buildings currently add up to something closer to 50% of the Union total, but there is no precise figure at Union level.

Therefore, the concept of the 'whole life-cycle carbon' of a building should be used to fully consider the total amount of operational and embodied carbon emissions throughout its life-cycle. It comprises four main phases: production, construction process, operation and end of life.

**CHAPTER PA 03 — SINGLE MARKET** (*cont'd*)PA 03 22 (*cont'd*)PA 03 22 01 (*cont'd*)

There is data available on emissions from industries related to construction (e.g. manufacture of steel and glass), however, this is only one part of the picture and other approaches are also relevant to fully comprehend the GHG emissions of buildings. Examples include urban mining and reuse of construction products, more efficient use of built spaces, action to lengthen the service life of buildings, and optimal use of low carbon materials. Without understanding the precise scale of the issue across the whole construction ecosystem, it is difficult to formulate effective policy responses, which would achieve maximum GHG reductions in a cost-effective manner.

There are various sources of potential data that could enable a study to calculate an estimate of embodied emissions of buildings at Union level. Typically, such a calculation would require estimates of the volume of construction work carried out, which materials have been manufactured and used in construction, which building types have been constructed/renovated, floor areas and heights/volumes built, how far the materials have been transported to the site. But the sources of such data are disparate, and nobody has carried out such calculations at Union level or in the vast majority of Member States. The use of reference building typologies would greatly aid such calculations, and also enable modelling of scenarios that are based on typical buildings.

The aim: this preparatory action aims to devise and put into practice a methodology to gather new and existing data on the embodied emissions of the Union building stock.

The preparatory action will make use of reference building typologies to model:

- a complete picture of the current embodied GHG emissions of the Union building stock; and
- the impact of scenarios of increased activity, such as accelerated rates of renovation and uptake of more circular approaches in construction.

The preparatory action will make use of various sources of data available from existing national initiatives, and assess the usefulness of other data sources. Examples of such sources include the EU Building Stock Observatory, the European Construction Sector Observatory, Eurostat, national data (for example on housing and construction output), information contained in Energy Performance Certificates (e.g. construction characteristics, dates of construction/renovation, building floor area/dimensions), and research work including new surveys where necessary.

Expected outcome:

- The data gathered on the embodied emissions of the Union building stock will provide a basis for future interventions, including legislation, in the fields of resource efficiency, energy and climate policies, as well as creating a valuable resource for further research.
- The preparatory action will develop a methodology to integrate and make use of existing data sources on buildings embodied carbon, identify gaps and collect new data sources, enabling much needed comparability and interoperability of data.
- It will thus provide new data on the GHG emissions embodied in the various life-cycle phases of buildings, for each Member State across the Union's building stock.

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 03 — SINGLE MARKET** (*cont'd*)PA 03 22 (*cont'd*)PA 03 22 01 (*cont'd*)

Contribution to the Union legislation:

- The preparatory action will greatly contribute to the European Green Deal and its objectives of reducing GHG emissions in the building sector.
- This preparatory action will feed into the Renovation Wave action 'Developing a 2050 whole life-cycle performance roadmap to reduce carbon emissions from buildings and advancing national benchmarking with Member States', which is due by 2023.
- The Construction Products Regulation, the Waste Framework Directive, and the Energy Performance of Buildings Directive will benefit from the results of this preparatory action.
- New legislation to specifically tackle whole life-cycle emissions of Union buildings could be foreseen in the future.

PA 03 22 02 Preparatory action — Developing a system for the automated measuring of tail length and tail lesions of pigs at the slaughter line

Appropriations 2022		Appropriations 2021		Outturn 2020	
Commitments	Payments	Commitments	Payments	Commitments	Payments
1 500 000	375 000				

*Remarks*

In spite of the substantial efforts of the Commission and of the Parliament to disseminate information and best practise on keeping pigs with intact tails, routine tail docking is still practised in most Member States, in violation of Council Directive 2008/120/EC of 18 December 2008 laying down minimum standards for the protection of pigs (OJ L 47, 18.2.2009, p. 5) (Pigs Directive). To make progress towards compliance with the provisions of the Pigs Directive, it is of uttermost importance to reliably and cost-efficiently monitor the levels of tail docking and tail lesions in all pig farms. Such data will be extremely useful for advisory, benchmarking an potentially enforcement purposes. The automatic detection of pig tail length and lesions at the slaughterhouse provides the most promising tool for uniform and fair monitoring of tail condition across slaughterhouses and Member States. Several slaughterhouses and Member States are interested in adopting automated systems to score pig tail length and damage at slaughter, but return on investment has so far not been perceived as high enough, especially as there is no system ready for commercial application.

This preparatory action will consist of a joint effort between researchers, governments, industry partners and NGOs across Member States, to achieve a validated, harmonised and fair system of tail length and lesion assessment by automatically measuring lesions at the slaughterhouse. It will consist of the following work packages: a) developing, calibrating and testing an automated system based on the analysis of camera footage in slaughterhouses characterised by different conditions and docking levels; b) developing the software to connect the system to the ICT system of the participating slaughterhouses, and converting the data automatically into reports; c) validating the system and comparing the outcomes to other data sources, such as visual assessments by trained assessors; d) assessing the functionality and impact of the system (including the costs) by discussing the outcomes with relevant stakeholders and e) piloting the system in practise, in the first instance as an aid for farmers to further refine their farm management so as to prevent tail biting and avoid routine tail docking.

*Remarks*

The objective of the preparatory action is to support the leverage of new technologies to improve market surveillance activities, also with the view to overcome the challenges posed by new technologies and e-commerce. Building on the pilot project 'Assessing the challenges and opportunities for market surveillance activities in relation to new technologies and digital supply chain' and its final study, the aim of this preparatory action is to help developing technologies, including artificial intelligence, that have the highest potential to support market surveillance authorities in their daily tasks. One example is the developing of a product tracking compliance control tool, allowing market surveillance authorities to digitally obtain the product information needed to perform their inspections by using a scanning system reading the product ID. The preparatory action can also help financing the development of ecommerce surveillance systems.

PA 03 22 04 Preparatory action — Establishing basis for a tourism common policy

*Remarks*

The scope of this preparatory action is to prepare proposals with a view to the adoption of future actions for creating the basis for a future tourism common policy, building on the work being done in the context of the pilot project for quality of tourism accommodation.

A comprehensive European tourism policy must be developed supporting the creation of the European Tourism Union; This policy shall facilitate tourism to align with the Digital Agenda and the Green Deal.

To create the basis for a tourism common policy the preparatory action will explore options to develop different instruments as the followings: data basis for policymakers, sharing good practices, technical and administrative support for tourism SMEs, diversification of the European tourism product such as cultural and sustainable tourism, agrotourism, wildlife tourism, ecotourism, common rules for overtourism a crisis management mechanism, harmonising the national rules and legislation for all tourism activities including skills and qualifications, an European travel guarantee scheme, promoting the European brand in third countries

The actions include:

- development of a tourism agenda based on the lessons drawn from deficiencies uncovered by the COVID-19 pandemic;
- establishment of a code of good practices relating to hotels star rating systems;
- increasing the consumers awareness on the inconsistencies between the hotel star rating systems and between the star rating and the quality of the services;
- a common framework for online accommodation platforms related to the volume and format of the information provided by the stake holders;
- a common framework for online accommodation platforms in order to allow consumers to combine the ratings and reviews and to compare different hotels;
- an online tool to combine customer reviews and star ratings;
- the establishment of a shared framework of criteria and procedures for a hotel star rating system stars at Union level;
- the creation of a multi-stakeholder platform to allow customers to evaluate the quality of the offered services based on consumers review and rating schemes.

*Remarks*

The Tourism of Tomorrow Lab (To of To Lab) aims at creating the 'European business intelligence Centre for Tourism'. It is a public and private European partnership of regions, destinations, tech travel providers, travel companies and other agents. A cooperation platform among destinations and for European tourism stakeholders with data providers (big data, intermediaries).

Since the outbreak, this project is even more necessary in the situation of managing the pandemic impacts and recovery of tourism as well as the design of the post-pandemic tourism regeneration. Having the correct tools to assess the impact of COVID-19 on the tourism sector, will allow destinations to prepare possible scenarios to be expected. Once the destinations understand the different situations ahead, it is useful to test the evolution of the main tourism origin markets and quickly detect signs of reactivation at a global level, national, regional or even local level.

**CHAPTER PA 03 — SINGLE MARKET** (*cont'd*)PA 03 22 (*cont'd*)PA 03 22 05 (*cont'd*)

Decision making process already integrates traditional data, however, still in a very limited way (for initial diagnosis, for a specific policy action, for a final analysis). Moreover, big data, involves high cost of many of the solutions available, requires a technical infrastructure and a high skilled technical team, not only for aggregating the great amount of data to be readable, but also data analysts that are able to make sense of this data. Big data is fragmented and requires an important normative work of conceptualization and measurement.

Most DMOs are engaged into (commercial) relationship with big data players. The Tourism of Tomorrow Lab will complement and enrich these relations. Many different big data solutions are being implemented, but due to their cost, they are just 'one -time' experience, and many times they are not used to solve a real problem or to ask a specific question.

This preparatory action will support aggregation of fragmented data to produce reliable information in a coherent manner, so this data can be used for evidence-based policymaking.

As such, the To of To Lab will deliver services as a common data department for any destination involved in a cooperative manner. It will offer space for cooperative competition. It will not be a data warehouse where destinations can obtain any kind of big or traditional data, but a place where traditional data and big data make sense together in order to solve real life problems, to adapt to the European Green Deal, EU Climate Law, the Sustainable Development Goals (SDGs) and to become climate neutral by 2050.

Furthermore, the report on establishing a Union strategy for sustainable tourism adopted in March 2021 by the European Parliament asked for a European Agency for Tourism in the long-term and a short-term solution – creation of a tourism department in one of the existing executive agencies. The aim, among others, is to provide the Union and its Member States with data to allow them to implement informed strategies. This preparatory action is a first phase for the implementation of this objective. It is also in line with the European Data Strategy and the call for the Commission to incorporate tourism in the governance framework for common data spaces.

Thus, the preparatory action will consist of making possible to launch To of To Lab operationally:

1. Recruiting the team;
2. Gathering the users – investors and other public private players across DMOs and travel-tech players;
3. Ensuring the systematic connection with official statistic bodies to insert To of To Lab methodology in the Sustainable Tourism Measurement principles and ETIS already well established;
4. Creating a common methodology searching coherence and supporting destinations monitor SDG and Green Deal;
5. Implementing the methodology through a pilot exercise involving destinations and using real data.

*Remarks*

A significant amount of public investment is spent through public procurement, and e-procurement was beneficial in fighting fraud, resulting in savings for all parties, increased transparency, and simplified and shortened processes. In this context, the creation of a European framework for enhancing transparency in public procurement would be a crucial step forward. Such a framework could be implemented through the Tenders Electronic Daily (TED) website, which already allows access to public procurement notices and could become a valuable tool to analyse and expose procurement data (e.g. values of contracts awarded per country, per company, by sector of activity, etc.; number of bids per procedure; information about subcontracting, namely towards third countries).

This preparatory action will focus on improving data normalization, accessibility and transparency:

- retrieving, processing and appropriately storing data contained in the notices published, for improved search and generation of predefined and customised reporting;
- implementing user-friendly, clear and self-explanatory visualisation of relevant data in TED, using graphics, dynamic tools and machine translation;
- further automating exchange and validation of data between national authorities and TED in order to limit discrepancies and errors, reduce red tape and facilitate reuse;
- privileging the use of normalised information, i.e. predefined lists of values rather than free text descriptions, and promote the use of key identifiers, e.g. buyer, seller;
- collecting expertise to find patterns and define rules to be used in building automated expert systems for infringement/fraud detection based on TED data;
- gathering best practices regarding automatized data exchange in the procurement workflow within and between Member States;
- promoting innovative projects to increase the completeness, accuracy, accessibility and readability of TED data.

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PA 07 20 (*cont'd*)PA 07 20 02 (*cont'd*)*Remarks*

Grassroots sports is a traditional and slowly evolving area. Society in general and individuals' needs and preferences regarding sports, however, change more rapidly. Indeed, participation figures highlight a growing mismatch between the provision of opportunities for sports via traditional sports organisations and the demand for sports from individuals. The way in which sports associations and clubs are organised and their lack of innovation prevents them from bridging this gap. This project will challenge parties outside the traditional sports structure to propose innovative solutions to bring sports supply into line with individuals' demand at all levels, and provide a sports innovation ecosystem to make it possible for new ways of playing sports to be offered to the general public faster.

In order to produce a working innovative ecosystem for grassroots sports organisations, two things are needed: new, soft programmes offering sports in new ways, and a flexible sports infrastructure able to host different sports at a single location.

This preparatory action aims to identify and test multiple promising innovations in both categories. To achieve this, innovation challenges will be organised that select and reward promising innovations by any interested party (institution, company, start-up, individual(s) or other parties), which can be introduced and tested over a substantial period (minimum six months). The funding will be invested in soft programmes and new (small) sports infrastructure.

The expected outcomes of this preparatory action include:

- the development of new forms of practices as well as soft programmes to promote it;
- better integration of new ways of practicing sport and physical activity in the offer of traditional sport federations and organisations;
- an increased participation of young generations to sport;
- the development of light sport facilities, which directly complement the previous expected results.

The applicant organisations have to be based in one of the Member States.

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The preparatory action builds on pilot project 'Capacity-building for Roma civil society and strengthening its involvement in the monitoring of national Roma integration strategies' (Item PP 07 14 01), which is nearing completion, and by drawing lessons from that project it continues, in an improved way, contributing to the strengthening and further capacity building of Roma and pro-Roma civil society as well as to the monitoring mechanism regarding Roma inclusion, especially by producing and disseminating independent reports in which civil society coalitions could present alternative information and data to what is contained in the reports submitted by Member States concerning the implementation of their strategies. These civil society reports could provide local knowledge to help national and European policy processes and reflect on the real social impact of government measures.

Monitoring focuses on the local implementation of strategies in the four priority areas (employment, education, housing, health), as regards anti-discrimination, combating anti-Gypsyism and promoting gender equality, and will also provide information on the level of involvement of civil society, the use of Union funds and the mainstreaming of Roma inclusion measures.

This preparatory action is implemented through a procurement.

*Remarks*

With a view to contributing to Europe's digital sovereignty and to a European Public Sphere, this preparatory action adapts existing technological means and further develops solutions to create a platform capable of improving European citizens' access to trusted information from across Europe.

Such a platform supports collaborative editorial and media projects, involving broadcasters and publishers, across Europe to extend their reach. Technical tools provided by the platforms combine existing technology solutions and include translation modules (text to text, speech to text and speech to speech), technologies based on artificial intelligence (AI), search engines, transparent algorithms and/or content recommendation. This platform provides citizens contextualised information from across Europe which they can access via well-established online offers, thus ensuring high audience rates and supporting pan-European cooperation in original reporting.

**CHAPTER PA 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PA 07 21 (*cont'd*)PA 07 21 01 (*cont'd*)

An identification system provides citizens with a cross-device access as well as personalisation of their experience. Broadcasters and publishers cooperate with technology developers who adapt existing technology to ensure user-friendly solutions. The technical solutions can be applied to other content genres (e.g. educational, sports, entertainment) and integrated into different digital applications (e.g. (Re) Players apps, News apps) of broadcasters. The technical solutions combine existing AI-based and open-source technologies and apply maximum transparency with regard to the algorithms. Users are informed about why they see what they see.

In the first year of the preparatory action translation facilities were ready for up to 8 to 10 languages (English, German, French, Italian, and Spanish plus three to five other European languages, representing the different geographic regions). Transparent and agreed rules covering editorial and legal aspects as well as technical workflows provide a clear cooperation basis.

During the second year of the preparatory action, the partner base will be extended, and the number of languages increased to a minimum of 15 official Union languages. The project is based on common values, the respect for human dignity, freedom, democracy, equality, the rule of law and human rights, providing Union citizens with a safe environment. The project is open to be complemented by other projects offered by broadcasters (e.g. documentary collections, specific programmes for young audiences); and other stakeholders, e.g. museums and libraries, will be invited to join if they subscribe to the same values.

According to the 2019 World Press Freedom Index compiled by Reporters without Borders, the Union as well as the Balkans registered the second biggest deterioration in its regional score measuring the level of constraints and violations on press freedom. The 2019 report shows that the number of countries in the Union and the Balkans regarded as safe, where journalists can work in complete security, continues to decline.

With the deterioration of press and media freedom in Member States and candidate countries for several years in a row showing a worrying trend, it is crucial to continue providing concrete protection to journalists including fact-finding, advocacy, monitoring, informing the European public and awareness-raising through the pan-European rapid response mechanism on violations of media freedom.

COMMISSION

The right to freedom of expression needs strong defence to protect democracy strengthen public discourse and guarantee an enabling environment for investigative and independent journalists.

The pan-European response mechanism on violations of press and media freedom will continue to make violations visible and provide practical help to journalists under threat, in collaboration with European, regional and local stakeholders in the field of media freedom. The practical help must encompass tools to protect journalists under threat: providing direct advice and legal support as well as offering shelter and assistance so they can continue their profession. Delegates will be sent to affected countries and advocacy will support fighting impunity. Monitoring of the situation will provide reliable and comprehensive information to the public as well as European authorities. This will help promoting awareness raising and allow early warnings. Instruments will be adjusted according to individual needs on a case-by-case basis. This unique toolkit contained in the rapid response mechanism will prevent further violations and will improve press and media freedom.

The pan-European response mechanism has been funded over the last two years in the context of a pilot project. Building on the success of the pilot project and to ensure its continuity, the pan-European response mechanism should now continue as a preparatory action.

In a moment of increased global competition in the audio-visual sector, international cooperation in scriptwriting becomes ever more crucial to create works that can travel across borders. More cooperation is also necessary at European level to allow European players to scale up and face the increasing risk of 'brain-drain' of European audio-visual professionals towards third countries.

The ambition of the proposed scheme is to respond to the need for European story telling suitable for co-production.

There is an untapped potential to foster a community of writers from all across Europe with comparable understanding of the craft of writing series for television. In addition, in order to bring out stories that reflect European culture, both the one held in common or the one specific to different respective countries, it is necessary to encourage the emergence of strong teams of creators (e.g. screenwriters, showrunners and other authors) from several European countries.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The work of independent media organisations and investigative journalists is crucial to reveal wrongdoing throughout the Union and beyond its borders, including money laundering and corruption. Quality investigative journalism requires proper tools and resources. Yet, investigative journalists are extremely vulnerable professionals with very limited resources.

The aim of this preparatory action is to create an emergency support fund for investigative journalists and media organisations to improve press and media freedom and to prevent violations thereof by supporting the production of quality independent journalistic content in the public interest, including through cross-border cooperation.

This preparatory action builds on the previous pilot projects on cross-border investigative journalism fund, which aimed to ensure continued trust in independent media sources and the protection of journalists across the Union by providing Union funding for collaborative investigative journalism in the public interest based on an expert jury model

The preparatory action promotes pan-European, collaborative projects which contribute to bottom-up change by modifying incentives for ethical and trusted journalism through innovative tools and processes. Such projects are particularly important in the midst of the COVID-19 crisis when the capacity for dedicated support of news organisations is limited.

Funding from this budget line should be accessible to professional organisations and associations, consortiums, editors, publishers as well as freelancers provided that they meet adequate criteria. To meet the needs of media organisations and to safeguard media independence, funding should *inter alia* be provided to cover expenditure for fact-finding missions, for training and tools contributing to the development of investigative capabilities, for TV-related investigative projects, for the subscription to software programmes correlating data and databases, and for the production of expensive documents required to support an investigation. Subject to strict conditions, the preparatory action should also provide funding to cover a bail and/or the legal fees of investigative journalists concerned if they are clearly related to a past or ongoing investigation.

When necessary, this pan-European emergency support fund could also be used as a model for longer-term core funding for media organisations and investigative journalists under threat. It should be flexible enough to adjust to changing needs to ensure that they can perform their work safely and independently, thus ensuring the sustainability of media and a greater diversity of journalistic sources in Member States and candidate countries.

*Remarks*

This preparatory action will fill the existing gap in communicating Europe to young European generations, by creating a truly transnational public media sphere and better portraying the sense of togetherness, which is at the heart of European identity and which is reflected in a common culture, similar lifestyle and shared values. Existing policy is predominantly geared towards the bolstering and digital transformation of a struggling media sector severely impacted by the pandemic. Support for the growth of media spaces generating European public exchange however is limited, despite its importance and lack of tested viable initiatives.

In order to enter into a new dialogue about Europe via relevant themes and topics; in order to attract younger Europeans to European ideas and values; and in order to empower truly European citizens through digital platforms, the preparatory action will sustain and widen a radically new approach of providing trustworthy information and a safe space of debate to youngsters via social media, their main source of information and communication channel.

Foreign interference on social media has become a real threat to democracy and the cohesion of Europe. The narrative on the Union and Europe must be driven by Europeans and not handed over to foreign sources intended on weakening European cohesion. The contents and platforms funded as part of this preparatory action aim to make an important contribution to the process of attaining Europe's 'Digital Sovereignty', for which the necessary digital infrastructure and the capacity for the creation of engaging and trustworthy media content are equally important.

**CHAPTER PA 07 — INVESTING IN PEOPLE, SOCIAL COHESION AND VALUES** (*cont'd*)PA 07 22 (*cont'd*)PA 07 22 01 (*cont'd*)

The preparatory action will be based on a pilot project that set up a cooperation between European media organisations to create successful social media content and innovative concepts of pan-European collaborative editorial thinking. Since the pilot project was initially directed to be implemented in at least five official Union languages, the preparatory action will ensure widening the project to a larger number of official languages, a crucial step to reach more representative share of European youth. Complemented by the European Democracy Action Plan, the Digital Services Act aims to curb the spread of illegal content and societal harms online. While illegal content needs to be identified, highlighted and removed, it is crucial to simultaneously counter it with reliable and trustworthy information. This preparatory action contributes greatly to this aim by focusing on social media platforms, which is an environment in which disinformation is particularly prevalent. The content will deal with topics that are of proven interest or concern for young Europeans, such as education and skills, the COVID-19 pandemic, gender and diversity or sustainability and climate change, and will be put into context in order to make it compelling and appealing to the target group. The European perspective is created by comparing and contrasting regional experiences and points of view on matters of pan-European importance. The aim is to address relevant topics of pan-European importance and at the same time give a forum to local perspectives, allowing young users to identify strongly with the content. The preparatory action will pay particular attention to addressing non-cosmopolitan audiences and young Europeans with fewer opportunities in their mother tongue.

This ambitious pan-European and multilingual initiative will create offline and online, open, true, deep and constructive debates about current and future life in Europe among young Europeans, using innovative formats on digital platforms, with the ultimate goal of creating greater awareness about European visions and realities and greater engagement of Europeans towards European values and ideas and subsequently contributing to a more active civil society. The Action Plan to support recovery and transformation of the media and audio-visual sectors aims not least to promote collaborative and cross-border journalism, relying on the sharing and networking of best practices in this domain. The preparatory action is of great benefit to this aim, as it supports such best practices relating to cross-border cooperation and also to innovation in the media sector.

Aligning with a multitude of Union objectives as well as building on existing initiatives, this preparatory action will fill the gap of decisively supporting the European Public Sphere by driving innovation in the European media space to stimulate a lasting debate on a common future among European youth.

PREPARATORY ACTIONS**CHAPTER PA 09 — ENVIRONMENT AND CLIMATE ACTION** (*cont'd*)PA 09 20 (*cont'd*)PA 09 20 02 (*cont'd*)*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The objective of this preparatory action is to put in place a tool for collecting environmental data with the help of honey bees and bee products. This will enable evaluation of pollution exposure and diffusion in the environment at landscape level. It will also enable evaluation of plant diversity across landscapes.

Despite the considerable impact of various environmental pollutants, in particular pesticides, on human wellbeing and nature, there are still major data and information gaps regarding exposure. Honey bees come into contact with diverse matrices due to their biological needs and behaviour. During their wide-ranging foraging activity (up to 15 km radius) they are exposed to pollutants present in the atmosphere, soil, vegetation and water. Numerous plants are visited every day to collect nectar, secretions from sap-feeding insects, pollen and/or water, while plant gums are collected for propolis production. While flying they also come into contact with airborne particles, which stick to their body hairs or are inhaled via spiracles. Contaminants are brought back to the beehives and may be found in bee products, such as honey, wax, propolis, pollen and bee bread. Honey bees and their products could also be an excellent tool for monitoring other environmental pollutants besides pesticides, such as heavy metals, particulate matter, volatile organic compounds and sulphur dioxide.

Honey bees are already used as bioindicators of the level of environmental contamination. Studies have been performed using bees and bee products as biological monitoring instruments to measure environmental quality. Various levels of environmental monitoring with honey bees have already been described, with varying degrees of complexity and sensitivity. Prompted by concern for honey bee colony losses, beekeepers, beekeeper technicians and scientists in parts of Europe began analysing the contaminant content of bees and bee products. The results are often the same: bees are exposed to a wide variety of contaminants simultaneously and consecutively.

Furthermore, there are considerable knowledge gaps as regards plant species richness and abundance across various landscapes in the Union. Such knowledge is essential for evaluation of habitat quality as well as evaluation of pressures that different land uses may exert on habitats. Collection and analysis of pollen from beehives offers a promising avenue to gather invaluable data and information that can help to close those knowledge gaps.

Environmental data and information generated through monitoring using honey bees would support Union policies in the following areas:

- public health and food safety;
- plant and animal health, including bee health;
- agriculture rural development, including beekeeping;
- agricultural production and food security;
- environmental protection (nature, air, water, soil);
- biodiversity.

**CHAPTER PA 09 — ENVIRONMENT AND CLIMATE ACTION** (*cont'd*)PA 09 20 (*cont'd*)PA 09 20 02 (*cont'd*)

It would in particular support effective actions under:

- Directive 2009/128/EC of the European Parliament and of the Council of 21 October 2009 establishing a framework for Community action to achieve the sustainable use of pesticides (OJ L 309, 24.11.2009, p. 71);
- Regulation (EC) No 1107/2009 of the European Parliament and of the Council of 21 October 2009 concerning the placing of plant protection products on the market and repealing Council Directives 79/117/EEC and 91/414/EEC (OJ L 309, 24.11.2009, p. 1);
- the common agricultural policy;
- EU biodiversity policy, including the EU Pollinators Initiative;
- Directive (EU) 2016/2284 of the European Parliament and of the Council of 14 December 2016 on the reduction of national emissions of certain atmospheric pollutants, amending Directive 2003/35/EC and repealing Directive 2001/81/EC (OJ L 344, 17.12.2016, p. 1);
- Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions on industrial emissions (integrated pollution prevention and control) (OJ L 334, 17.12.2010, p. 17).

In this way, environmental monitoring through honey bees would contribute towards the achievement of the Sustainable Development Goals in the Union, in particular Goals 2 ('Zero hunger'), 3 ('Good health and wellbeing'), 12 ('Responsible consumption and production'), 14 ('Life below water') and 15 ('Life on land').

In 2018, the Union funded the pilot project 'Environmental monitoring of pesticide use through honey bees'. This preparatory action builds on that pilot project. It will further expand the scope to other environmental pollutants as well as monitoring of plant diversity. The preparatory action is a citizen science project in which beekeepers will play a key role by collecting samples from beehives.

Activities of the preparatory action:

- The preparatory action funds Union-wide implementation of the monitoring methodology currently being developed and tested by the pilot project. Furthermore, the action looks to expand the monitoring to include other environmental pollutants and plant diversity.

Specifically, activities under this preparatory action will:

- explore how to expand the monitoring protocol to include environmental pollutants besides pesticides, and develop relevant modules;
- implement the monitoring protocol by sampling beehives across various land uses in all Member States;
- carry out chemical and pollen analysis of samples;
- develop IT infrastructure to create, store, manage, process and share data;

*Remarks*

Natural and semi-natural grasslands are amongst the richest European ecosystems in terms of plant, insect and bird species diversity. Many Natura 2000 sites throughout the Union have been legally designated to maintain and restore this extraordinary grassland biodiversity and the ecosystem services that flow from them. Grasslands often depend on dedicated management regimes like mowing or grazing. Despite a high level of protection on paper and several successful conservation and restoration initiatives at local level, the biodiversity of Natura 2000 grasslands has suffered further declines over the last few decades. The key to turning this around is to maintain the necessary mowing and grazing practices, with low fertilizer input, at a landscape scale as part of sustainable and economically viable farming system.

The evolution of grassland cover in Natura 2000 is increasingly well monitored in certain parts of the Union. This information is still highly heterogeneous and often not easily accessible to the public. Moreover, data on relative effectiveness of Natura 2000 site management is largely lacking. The strengthened earth observation capacities of the Union through its COPERNICUS programme offer unprecedented observation potential to map and monitor land cover with high accuracy. The current Copernicus catalogue of land cover products for Natura 2000 is only updated once every six years and offers mostly generic land cover information that is predominately used by experts. As such, the potential to apply these observation capacities for grassland monitoring and management is not yet fully exploited.

COMMISSION  
PREPARATORY ACTIONS**CHAPTER PA 09 — ENVIRONMENT AND CLIMATE ACTION** (*cont'd*)PA 09 22 (*cont'd*)PA 09 22 02 (*cont'd*)

First-phase: pilot project `Copernicus for Natura 2000`

In late 2019, the pilot project `Copernicus for Natura 2000` (COP4N2K) was launched to use Copernicus technology to better monitor Natura 2000 sites. This project created an automated model system for tracking the evolution of grassland cover in Europe's Natura 2000 network on a yearly basis, producing detailed land cover maps since 1992 (when the Habitats Directive was adopted). Efforts are being made to ensure that a large audience, including Member States' administrations, protected area managers, land users and the general public, will be able to access and understand the provided grassland trends and its related indicators. All data are being made public through a dedicated online Viewer `EU Grassland Watch`.

Second-phase: preparatory action `EU Grassland Watch`

The first-phase pilot project was to come to an end in late-2021 with promising results. An interim evaluation made clear that a second-phase pilot support would be required to assure timely follow-up for full implementation and accessibility. The preparatory action will focus on four main items that need significant further development:

- (1) The available resources in the first phase only covered half of all Natura 2000 sites with significant grassland occurrence. Scaling up will allow the completion of the (historical) picture of EU Natura 2000 grasslands.
- (2) The quality of the available maps will benefit from recent improvements in identification of different grassland types and higher spatial resolutions.
- (3) Information on the current grassland cover will also be further refined at site level by linking-up with existing administrative databases, such as national Land Parcel Identification Systems (LPIS). This will help inform appropriate site management.
- (4) The project will help bring the geospatial information on grasslands closer to decision makers and other key stakeholders by (a) an interactive and regularly updated public website; and (b) a series of direct interactions (e.g. webinar training, site visits, etc.) with selected actors at national or regional levels. These initiatives could bridge technological gaps by helping stakeholders to understand the benefit of these tools and use the available information, and in turn share their practical needs to inform future developments.

The fully functional `EU Grassland Watch` can help the Union and its Member States to better monitor biodiversity, the pressures it faces and the sustainability of Natura 2000 protected grasslands. The increased transparency and accessibility will not only help to prevent future negative impacts, but also to reverse historical declines by identifying priority areas for grassland restoration.

*Remarks*

In view of the alarming data contained in reports such as the European Drug Report 2019, there is an urgent need for stronger Union-wide coordinated action on monitoring the Darknet to counter rising threats from criminal activities such as trafficking and distribution of drugs and other illegal substances, illegal arms trading and human trafficking. Hard-to-track communication on the Darknet has become a key element of such illegal operations, especially cross border, and its effective monitoring remains a challenge for Member State law enforcement authorities. Not all Member State law enforcement authorities possess adequate means to systematically monitor the Darknet or effectively coordinate joint Union actions and cooperation in this area, but examples of good practices and results do exist, albeit fragmented and uneven across the Union.

This preparatory action aims to develop software and hardware for efficient Darknet monitoring at Union level, which will be made available to the Union and Member State law enforcement authorities, together with training and assistance in coordination and capacity building for joint European Darknet monitoring.

**OTHER ANNEXES**

COMMISSION

**EUROPEAN ECONOMIC AREA**

Under the Agreement establishing the European Economic Area, the EEA EFTA States take part in a wide range of Union policies covered by heading 1, 2, 3, 5, 6 and 7 of the multiannual financial framework in exchange for a financial contribution to operating appropriations calculated by applying a 'proportionality factor'. This proportionality factor is equal to the sum of the ratios obtained by dividing the gross domestic product at market prices of each EEA EFTA State by the gross domestic product at market prices of all the Member States plus that of the EEA EFTA State concerned

For 2022 the proportionality factor is estimated at 2,51% (on the basis of 2020 figures), i.e. 2,33% for Norway, 0,14% for Iceland and 0,04% for Liechtenstein. For budget lines that only cover payments on commitments of the previous programming period, the factor is estimated at 2,15% (on the basis of 2020 figures), i.e. 1,99% for Norway, 0,12% for Iceland and 0,04% for Liechtenstein.

These financial contributions will not be formally entered into the budget; each budget heading relating to activities in which the EEA EFTA States take part will refer to the EFTA contribution as a memorandum item. A summary table, listing the budget headings concerned and the amounts of the EFTA contribution for each budget heading, is published as an annex to the general budget of the Union. The total EEA EFTA contribution for the operational part for 2022 is estimated at about EUR 613 486 246 in commitment appropriations. The EEA EFTA States will also share in the administrative expenditure directly linked to the implementation of these policies.

(\*) The proportionality factors applied to calculate the financial contribution are based on the following participation per EEA EFTA State and per Union programme.

(†) Participation rate is 100 % of appropriations if not stipulated differently.

(‡) Figures presented in this document are provisional pending full agreement with EEA EFTA States on their participation to the 2021-2027 MFF programmes.

(§) In accordance with Protocols 31 and 32 to the EEA Agreement, EEA EFTA States contribution to the provisioning fund under InvestEU Programme is calculated based on the financial products selected by EEA EFTA States.

## A. INTRODUCTION

This Annex is drawn up in accordance with Article 38(1) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

It provides information on the amounts of the borrowing-and-lending operations guaranteed by the Union budget: loans for balance-of-payments support (BOP), assistance under the European Financial Stability Mechanism (EFSM), borrowing operations to provide macro-financial assistance to third countries (MFA), Euratom borrowings to contribute to the financing required for improving the degree of efficiency and safety of nuclear power stations in certain third countries, assistance under the European Instrument for temporary Support to mitigate Unemployment Risks in an Emergency (SURE) and European Investment Bank loans in certain third countries.

At 31 December 2020, outstanding operations covered by the Union budget totalled EUR 122 207 370 751, of which a total of EUR 87 918 804 813 referred to operations inside the Union and EUR 34 288 565 938 outside the Union (including accrued interest and rounding, exchange rate applicable at 31 December 2020).

## **B. BRIEF PRESENTATION OF THE VARIOUS CATEGORIES OF BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET**

### **I. SINGLE FACILITY PROVIDING MEDIUM-TERM FINANCIAL ASSISTANCE FOR MEMBER STATES' BALANCES OF PAYMENTS**

#### **1. Legal basis**

Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1).

Council Regulation (EC) No 1360/2008 of 2 December 2008 amending Regulation (EC) No 332/2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 352, 31.12.2008, p. 11).

Council Decision 2009/290/EC of 20 January 2009 providing Community medium-term financial assistance for Latvia (OJ L 79, 25.3.2009, p. 39).

Council Decision 2009/459/EC of 6 May 2009 providing Community medium-term financial assistance for Romania (OJ L 150, 13.6.2009, p. 8).

Council Regulation (EC) No 431/2009 of 18 May 2009 amending Regulation (EC) No 332/2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 128, 27.5.2009, p. 1).

#### **2. Description**

In accordance with Regulation (EC) No 332/2002, the Union may grant loans to Member States which are experiencing, or are seriously threatened with, difficulties in their balance of current payments or capital movements. Only Member States which have not adopted the euro may benefit from this facility. The outstanding amount of loans was limited to EUR 12 000 000 000 in principal.

On 2 December 2008, the Council decided to extend the facility to EUR 25 000 000 000.

On 20 January 2009, the Council decided to provide Community medium-term financial assistance for Latvia in the form of a medium-term loan of a principal of up to EUR 3 100 000 000 for a maximum average maturity of 7 years.

On 6 May 2009, the Council decided to provide Community medium-term financial assistance for Romania in the form of a medium-term loan of a principal of up to EUR 5 000 000 000 for a maximum average maturity of 5 years.

On 18 May 2009, the Council decided to extend the facility to EUR 50 000 000 000.

#### **3. Effect on the budget**

Since both parts of these borrowing-and-lending operations are carried out on identical terms, they affect the budget only if the guarantee is activated in case of default. As at 31 December 2020, the outstanding capital amount under this instrument is EUR 200 000 000.

### 2. Description

Article 122(2) TFEU provides for the possibility of the Union granting financial assistance to a Member State which is in difficulties or is seriously threatened with severe difficulties caused, inter alia, by exceptional occurrences beyond its control.

The guarantee provided by the Union is for borrowings raised on the capital markets or from financial institutions.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under the European financial stabilisation mechanism shall be limited to the margin available under the Union's own resources for payment appropriations.

This item constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) shall apply.

On 7 December 2010, the Union decided to make available to Ireland a loan amounting to a maximum of EUR 22 500 000 000, with a maximum average maturity of 7,5 years (OJ L 30, 4.2.2011, p. 34).

On 30 May 2011, the Union decided to make available to Portugal a loan amounting to a maximum of EUR 26 000 000 000 (OJ L 159, 17.6.2011, p. 88).

#### 2. Description

On 11 December 2013, the European Parliament and the Council decided to make macro-financial assistance available to Jordan in the form of loans for a maximum amount of EUR 180 000 000 and with a maximum maturity of 15 years, to cover Jordan's balance of payments needs as identified in the IMF programme. The facility was fully disbursed in two equal tranches in 2015.

On 15 May 2014, the European Parliament and the Council decided to make macro-financial assistance available to Tunisia in the form of loans for a maximum amount of EUR 300 000 000 and with a maximum maturity of 15 years, to cover Tunisia's balance of payments needs as identified in the IMF programme. The first two tranches, each of EUR 100 000 000, were both disbursed in 2015 and the third tranche in July 2017.

On 6 July 2016, the European Parliament and the Council decided to provide further macro-financial assistance to Tunisia in the form of loans for a maximum amount of EUR 500 000 000 (three loan instalments of EUR 200 000 000, EUR 150 000 000 and EUR 150 000 000). The first tranche of EUR 200 000 000 was disbursed in October 2017, the second tranche of EUR 150 000 000 was disbursed in July 2019 and the third and last tranche of EUR 150 000 000 was disbursed in November 2019.

On 14 December 2016, the European Parliament and the Council decided to provide further macro-financial assistance to Jordan in the form of loans for a maximum amount of EUR 200 000 000 (two loan instalments of EUR 100 000 000). The first tranche of EUR 100 000 000 was disbursed in October 2017 and the second and last tranche of EUR 100 000 000 was disbursed in July 2019.

On 15 January 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Jordan in the form of loans for a maximum amount of EUR 500 000 000 in two instalments with principal amounts of EUR 250 000 000 and EUR 250 000 000 respectively. The first tranche of EUR 250 000 000 was disbursed in November 2020.

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Jordan and Tunisia in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance will be provided in the form of loans for a maximum total amount of EUR 200 000 000 for Jordan and EUR 600 000 000 for Tunisia (two loan instalments of EUR 300 000 000).

##### 2. Description

On 17 November 1997, the Council decided to grant a European Union guarantee for an exceptional borrowing-and-lending operation for Georgia of a maximum amount of EUR 142 000 000 with a maximum duration of 15 years.

The first tranche of EUR 110 000 000 was paid to Georgia on 24 July 1998. The second tranche is no longer to be made.

On 12 July 2002, the Council decided to make available to Ukraine a long-term loan facility of a maximum principal amount of EUR 110 000 000 with a maximum maturity of 15 years, with a view to ensuring a sustainable balance-of-payments situation, strengthening the country's reserve position and facilitating the implementation of the necessary structural reforms. The total amount of the facility was disbursed in 2014.

On 7 July 2010, the European Parliament and the Council decided to make available to Ukraine a long-term loan facility of a maximum principal amount of EUR 500 000 000 with a maximum maturity of 15 years, with a view to ensuring a sustainable balance-of-payments situation. The facility was fully disbursed in two equal tranches in 2014 and 2015.

## COMMISSION

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET  
(BY WAY OF INDICATION)

On 12 August 2013, the European Parliament and the Council decided to make macro-financial assistance available to Georgia of a maximum amount of EUR 46 000 000 (up to EUR 23 000 000 in the form of grants and up to EUR 23 000 000 in the form of loans) for a maximum maturity of 15 years. The first tranche of EUR 10 000 000 was disbursed in April 2015 and the second tranche of EUR 13 000 000 was disbursed in May 2017.

On 14 April 2014, the Council decided to make macro-financial assistance available to Ukraine in the form of loans for a maximum amount of EUR 1 000 000 000 and with a maximum maturity of 15 years, to cover Ukraine's urgent balance of payments needs as identified in the IMF programme. The total amount of EUR 1 000 000 000 was disbursed in 2014.

On 15 April 2015, the Council decided to make macro-financial assistance available to Ukraine of a maximum amount of EUR 1 800 000 000 and with a maximum maturity of 15 years, with a view to supporting Ukraine's economic stabilisation and a substantive reform agenda. The assistance is to contribute to covering Ukraine's balance of payments needs as identified in the IMF programme. The first tranche of EUR 600 000 000 was disbursed in July 2015 and the second tranche of EUR 600 000 000 was disbursed in March 2017.

On 18 April 2018, the Council decided to make macro-financial assistance available to Georgia of a maximum amount of EUR 45 000 000, with a view to supporting Georgia's economic stabilisation and a substantive reform agenda. Of that maximum amount, up to EUR 35 000 000 shall be provided in the form of loans and up to EUR 10 000 000 in the form of grants. The release of the Union's macro-financial assistance is subject to the approval of the Union budget for the relevant year by the European Parliament and the Council. The assistance shall contribute to covering Georgia's balance of payments needs as identified in the IMF programme. The first tranche of EUR 15 000 000 was disbursed in December 2018 and the remaining tranche of EUR 20 000 000 was disbursed in November 2020 (together with the first tranche of EUR 75 000 000 for Georgia under the special MFA COVID-19 programme).

On 4 July 2018, the Council decided to make macro-financial assistance available to Ukraine of a maximum amount of EUR 1 000 000 000, with a view to supporting Ukraine's economic stabilisation and substantive reform agenda. That assistance shall contribute to covering Ukraine's balance of payments needs as identified in the IMF programme. The first tranche of EUR 500 000 000 was disbursed in December 2018 and the second tranche of EUR 500 000 000 was disbursed in June 2020.

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Georgia and Ukraine in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance will be provided in the form of loans for a maximum total amount of EUR 150 000 000 for Georgia (two loan instalments of EUR 75 000 000) and EUR 1 200 000 000 for Ukraine (two loan instalments of EUR 600 000 000). The first tranche of EUR 75 000 000 for Georgia was disbursed in November 2020 and the first tranche of EUR 600 000 000 for Ukraine was disbursed in December 2020.

### 3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1), any defaults are covered by that fund within the limit of the amount available.

The effect on the budget is thus limited to:

- one annual payment to or, exceptionally, from the Guarantee Fund to maintain its target amount of 9 % of the guaranteed operations,
- activation of the budget guarantee should the debtor default.

**2. Description**

On 17 November 1997, the Council decided to grant a European Union guarantee for an exceptional borrowing-and-lending operation for Armenia for a maximum amount of EUR 28 000 000 with a maximum duration of 15 years.

On 30 November 2009, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for Armenia in the form of a long-term loan for a maximum amount of EUR 65 000 000 in principal for a maximum duration of 15 years. The first tranche of EUR 26 000 000 was disbursed in 2011, the second and final one in 2012.

On 22 October 2013, the European Parliament and the Council decided to make macro-financial assistance available to the Kyrgyz Republic of a maximum amount of EUR 30 000 000 (up to EUR 15 000 000 in the form of grants and up to EUR 15 000 000 in the form of loans) for a maximum maturity of 15 years. The first tranche of EUR 5 000 000 was disbursed in 2015 and the second tranche in April 2016.

On 13 September 2017, the European Parliament and the Council decided to make macro-financial assistance available to Moldova of a maximum amount of EUR 100 000 000 (up to EUR 40 000 000 in the form of grants and up to EUR 60 000 000 in the form of loans with a maximum maturity of 15 years), with a view to supporting Moldova's economic stabilisation and a substantive reform agenda. The first tranche of EUR 20 000 000 was disbursed in October 2019.

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Moldova in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance will be provided in the form of loans for a maximum total amount of EUR 100 000 000 (two loan instalments of EUR 50 000 000). The first tranche of EUR 50 000 000 was disbursed in November 2020.

**3. Effect on the budget**

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1), any defaults are covered by that fund within the limit of the amount available.

**2. Description**

On 10 May 1999, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for Bosnia and Herzegovina in the form of a long-term loan for a maximum amount of EUR 20 000 000 in principal for a maximum duration of 15 years (Bosnia I).

The first tranche of EUR 10 000 000, for a maximum duration of 15 years, was paid to Bosnia and Herzegovina on 21 December 1999. The second tranche of EUR 10 000 000 was paid in 2001.

On 8 November 1999, the Council again decided to grant a European Union guarantee for a borrowing-and-lending operation for the former Yugoslav Republic of Macedonia in the form of a long-term loan for a maximum amount of EUR 50 000 000 in principal for a maximum duration of 15 years (FYROM II).

The first tranche of EUR 10 000 000, for a maximum duration of 15 years, was paid to the former Yugoslav Republic of Macedonia in January 2001, the second tranche of EUR 12 000 000 in January 2002, the third tranche of EUR 10 000 000 in June 2003 and the fourth tranche of EUR 18 000 000 in December 2003.

On 16 July 2001, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for the Federal Republic of Yugoslavia (Serbia and Montenegro I) in the form of a long-term loan for a maximum amount of EUR 225 000 000 in principal for a maximum duration of 15 years. The loan was paid in a single tranche in October 2001.

On 5 November 2002, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for Bosnia and Herzegovina in the form of a long-term loan for a maximum amount of EUR 20 000 000 in principal for a maximum duration of 15 years (Bosnia II).

The first tranche of EUR 10 000 000, for a maximum duration of 15 years, was paid to Bosnia and Herzegovina in 2004, and the second tranche of EUR 10 000 000 in 2006.

On 5 November 2002, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for Serbia and Montenegro (Serbia and Montenegro II) in the form of a long-term loan for a maximum amount of EUR 55 000 000 in principal for a maximum duration of 15 years.

The first tranche of EUR 10 000 000 and the second tranche of EUR 30 000 000, for a maximum duration of 15 years, were paid to Serbia and Montenegro in 2003, and the third tranche of EUR 15 000 000 in 2005.

The loan to Albania IV of EUR 9 000 000, for a maximum duration of 15 years, was fully disbursed in 2006.

On 30 November 2009, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for Serbia in the form of a long-term loan for a maximum amount of EUR 200 000 000 in principal for a maximum duration of 8 years. The first tranche of EUR 100 000 000 was paid in 2011.

On 30 November 2009, the Council decided to grant a European Union guarantee for a borrowing-and-lending operation for Serbia in the form of a long-term loan for a maximum amount of EUR 100 000 000 in principal for a maximum duration of 15 years. The two tranches of EUR 50 000 000 were each paid in 2013.

On 25 May 2020, the European Parliament and the Council decided to provide further macro-financial assistance to Albania, Bosnia and Herzegovina, Kosovo, Montenegro and North Macedonia in view of the urgency entailed by the exceptional circumstances caused by the COVID-19 pandemic and the associated economic consequences. The assistance will be provided in the form of loans for a maximum total amount of EUR 180 000 000 for Albania (two loan instalments of EUR 90 000 000), EUR 250 000 000 for Bosnia and Herzegovina (two loan instalments of EUR 125 000 000), EUR 100 000 000 for Kosovo (two loan instalments of EUR 50 000 000), EUR 60 000 000 for Montenegro (two loan instalments of EUR 30 000 000), and EUR 160 000 000 for North Macedonia (two loan instalments of EUR 80 000 000). The first tranches for Kosovo, Montenegro and North Macedonia were disbursed in November 2020 and the first tranche for Albania in March 2021.

### 3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1), any defaults are covered by that fund within the limit of the amount available.

The effect on the budget is thus limited to:

- one annual payment to or, exceptionally, from the Guarantee Fund to maintain its target amount of 9 % of the guaranteed operations,
- activation of the budget guarantee should the debtor default.

**1. Legal basis**

Council Decision 77/270/Euratom of 29 March 1977 empowering the Commission to issue Euratom loans for the purpose of contributing to the financing of nuclear power stations (OJ L 88, 6.4.1977, p. 9).

**2. Description**

Pursuant to Decision 94/179/Euratom (OJ L 84, 29.3.1994, p. 41), the European Union extends the scope of Euratom borrowings under Decision 77/270/Euratom to the improvement of the degree of efficiency and safety of nuclear power stations in the countries of central and eastern Europe and the Commonwealth of Independent States.

The maximum amount of Euratom borrowings for the Member States and third countries remains fixed at EUR 4 000 000 000.

In 2000, the Commission decided on a loan for Kozloduy in Bulgaria (EUR 212 500 000) and the last instalment was in 2006. In 2000, the Commission granted a loan to K2R4 in Ukraine but reduced the loan amount to the EUR equivalent of USD 83 000 000 in 2004. K2R4 was granted a loan of EUR 39 000 000 (first tranche) in 2007, USD 22 000 000 in 2008, and USD 10 335 000 in 2009 under the 2004 Commission Decision. In 2004, the Commission decided on a loan for Cernavodă in Romania (EUR 223 500 000). A first instalment of EUR 100 000 000 and a second one of EUR 90 000 000 were disbursed in 2005 and the last one of EUR 33 500 000 in 2006.

In 2013, the Commission decided to grant a loan to Energoatom, Ukraine, of EUR 300 000 000 for safety upgrades of nuclear power plants. The loan will be provided in cooperation with the EBRD, which provides another EUR 300 000 000 loan in parallel. The conditions precedent to the initial availability of the loan have been assessed as fully met in 2015 and the loan was declared effective.

On 27 May 2015, the Commission authorised disbursements under the Euratom loan to Energoatom in the amount of up to EUR 100 000 000, subject to Energoatom having drawn the loan amount granted by the EBRD in an amount not less than EUR 50 000 000. These loans benefit from State guarantees which cover 100% of the amounts outstanding at year end. The first tranche of EUR 50 000 000 was disbursed in May 2017 and the second tranche of EUR 50 000 000 was disbursed in July 2018. A third tranche of EUR 100 000 000 was disbursed in July 2020.

**3. Effect on the budget**

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1), any defaults are covered by that fund within the limit of the amount available.

The effect on the budget is thus limited to:

- one annual payment to or, exceptionally, from the Guarantee Fund to maintain its target amount of 9 % of the guaranteed operations,
- activation of the budget guarantee should the debtor default.

From 1 January 2007, loans with Bulgaria and Romania cease to be external actions (see Regulation (EC, Euratom) No 2273/2004 of 22 December 2004 amending Regulation (EC, Euratom) No 2728/94 establishing a Guarantee Fund for external actions (OJ L 396, 31.12.2004, p. 28)) and are therefore covered directly by the Union budget and no longer by the Guarantee Fund.

## 2. Union budget guarantee

Pursuant to the Council Decision of 8 March 1977, the Union guarantees loans to be granted by the European Investment Bank as part of the Union's financial commitments towards the Mediterranean countries.

This decision was the basis for the contract of guarantee signed by the European Economic Community and the European Investment Bank on 30 October 1978 in Brussels and 10 November 1978 in Luxembourg introducing a global guarantee of 75 % of all appropriations made available for loans in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Egypt, Jordan, Syria, Israel, Greece, former Yugoslavia and Lebanon.

The contract of guarantee is extended for each new Financial Protocol.

Decision 97/256/EC was the basis for a contract of guarantee between the European Community and the European Investment Bank signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997 setting up a guarantee restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums.

Decision 1999/786/EC was the basis for a contract of guarantee between the European Community and the European Investment Bank signed in Brussels on 18 April 2000 and in Luxembourg on 23 May 2000 setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums.

Decision 2000/24/EC was the basis for a contract of guarantee between the European Community and the European Investment Bank signed in Brussels on 19 July 2000 and in Luxembourg on 24 July 2000 setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums.

Decision 2005/47/EC was the basis for a restated and amended contract of guarantee between the European Community and the European Investment Bank signed in Brussels on 30 August 2005 and in Luxembourg on 2 September 2005 setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums.

Decision 2006/1016/EC was the basis for a contract of guarantee between the European Community and the European Investment Bank signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations less amounts reimbursed, plus all related sums. That Decision has been replaced by Decision No 633/2009/EC of the European Parliament and of the Council.

Decision No 1080/2011/EU was the basis for a contract of guarantee between the European Union and the European Investment Bank signed in Luxembourg and in Brussels on 22 November 2011 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations less amounts reimbursed, plus all related sums.

Decision (EU) 2018/412 was the basis for a contract of guarantee between the European Union and the European Investment Bank signed in Luxembourg and in Brussels on 3 October 2018 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations less amounts reimbursed, plus all related sums.

### 3. Description

Under the Financial Protocols concluded with Mediterranean third countries, global amounts are laid down for loans to be granted by the European Investment Bank from its own funds. The European Investment Bank (EIB) grants the loans for purposes which may contribute to the economic and social development of the countries in question (transport infrastructures, ports, water supply, production and distribution of energy, agricultural projects and promotion of small and medium-sized businesses).

On 14 April 1997, the Council decided to renew the Community guarantee to the EIB for loans for projects in the following Mediterranean countries: Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Syria, Tunisia, Turkey, Gaza and the West Bank. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 2 310 000 000 is for the abovementioned Mediterranean countries. It covered a period of three years beginning on 31 January 1997 (with a possible extension of six months).

The EIB is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

On 29 November 1999, the Council decided to grant a Community guarantee to the EIB against losses under loans for projects for the reconstruction of the earthquake-stricken areas of Turkey. The guarantee is restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 600 000 000 and covered a period of three years beginning on 29 November 1999 (with a possible extension of six months).

The EIB is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

On 22 December 1999, the Council decided once again to grant the EIB the Community guarantee against losses resulting from loans for projects carried out in the following Mediterranean countries: Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Syria, Tunisia, Turkey, Gaza and the West Bank. The overall ceiling of the appropriations made available for all countries under Decision 2000/24/EC is equivalent to EUR 19 460 000 000. The guarantee is limited to 65 % of the total value of the appropriations made available plus all the related amounts. It covers a period of seven years from 1 February 2000 to 31 January 2007. As at the end of that period the loans granted by the EIB had not reached the abovementioned total values, the period was automatically extended by six months.

On 4 December 2000, the Council decided to establish an EIB special action programme in support of the consolidation and intensification of the EC-Turkey Customs Union. The value of those loans is limited to an overall ceiling of EUR 450 000 000.

Decision 2005/47/EC restructured the Mediterranean regional mandate to exclude Cyprus, Malta and Turkey, which were included in the South Eastern Neighbours mandate.

(BY WAY OF INDICATION)

Decision 2006/1016/EC grants a Community guarantee to the EIB against losses under loans and loan guarantees for projects outside the Community for loans in the following Mediterranean countries: Algeria, Egypt, West Bank and Gaza, Israel, Jordan, Lebanon, Libya (eligibility to be decided by the Council), Morocco, Syria and Tunisia. The overall ceiling of the appropriations made available for all countries under Decision 2006/1016/EC is equivalent to EUR 27 800 000 000 and covers the period beginning on 1 February 2007 and ending on 31 December 2013 with a possible extension of six months. The Community guarantee is restricted to 65 %.

Decision 2006/1016/EC has been replaced by Decision No 633/2009/EC.

Decision No 1080/2011/EU, which entered into force on 30 October 2011, increased the aggregate amount of credits disbursed and guarantees provided under EIB financing operations from EUR 25 800 000 000 to EUR 29 484 000 000 (EUR 2 000 000 000 for financing of climate change operations and EUR 1 684 000 000 for enhancing EIB risk operations).

Decision No 466/2014/EU granted an EU guarantee to the EIB against losses under financing operations supporting investment projects outside the Union (pre-accession countries, neighbourhood and partnership countries, Asia and Latin America, South Africa) throughout the period 2014-2020. It has been amended by Decision (EU) 2018/412. The maximum ceiling of the EIB financing operations, as per the amending Decision, is not to exceed EUR 32 300 000 000 broken down into regional ceilings and sub-ceilings as well as into:

- (a) a maximum amount of EUR 30 000 000 000 under a general mandate, of which EUR 1 400 000 000 is earmarked for projects in the public sector directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration; and
- (b) a maximum amount of EUR 2 300 000 000 under a private-sector lending mandate for projects directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration.

The EU guarantee is restricted to 65 % of the aggregated outstanding amount.

#### 4. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1), subsequently amended by Council Regulation (EC, Euratom) No 480/2009 (OJ L 145, 10.6.2009, p. 10) and Regulation (EU) 2018/409 (OJ L 76, 19.3.2018, p. 1), any defaults are covered by that fund within the limit of the amount available.

The effect on the budget is thus limited to:

- one annual payment to or, exceptionally, from the Guarantee Fund to maintain its target amount of 9 % of the guaranteed operations,
- activation of the budget guarantee should the debtor default,
- the granting, in a series of cases, of interest-rate subsidies of 2 % in non-repayable aid, subject to the overall amounts laid down by the Financial Protocols.

Loans with new Member States cease to be external actions (see Regulation (EC, Euratom) No 2273/2004 of 22 December 2004 amending Regulation (EC, Euratom) No 2728/94 establishing a Guarantee Fund for external actions (OJ L 396, 31.12.2004, p. 28)) and are therefore covered directly by the Union budget and no longer by the Guarantee Fund.

## 2. Union budget guarantee

Decision 90/62/EEC was the basis for the contract of guarantee signed by the European Economic Community and the European Investment Bank (EIB) on 24 April 1990 in Brussels and 14 May 1990 in Luxembourg concerning loans in Hungary and Poland, and the extension of this contract to loans in Czechoslovakia, Romania and Bulgaria signed on 31 July 1991 in Brussels and Luxembourg.

This contract of guarantee was the subject of an instrument signed in Brussels on 19 January 1993 and in Luxembourg on 4 February 1993 to replace the Czech and Slovak Federal Republic by the Czech Republic and the Slovak Republic from 1 January 1993.

Decision 93/696/EC was the basis for a contract of guarantee signed by the European Community and the EIB in Brussels on 22 July 1994 and in Luxembourg on 12 August 1994.

Decision 97/256/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997.

Decision 98/348/EC and Decision 98/729/EC were the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997.

Decision 2000/24/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 19 July 2000 and in Luxembourg on 24 July 2000.

Decision 2005/47/EC was the basis for a restated and amended contract of guarantee between the European Community and the EIB signed in Brussels on 30 August 2005 and in Luxembourg on 2 September 2005 setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums.

Decision 2006/1016/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations less amounts reimbursed, plus all related sums. That Decision has been replaced by Decision No 633/2009/EC of the European Parliament and of the Council.

Decision No 1080/2011/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg and in Brussels on 22 November 2011 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations less amounts reimbursed, plus all related sums.

Decision (EU) 2018/412 was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg and in Brussels on 3 October 2018 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations less amounts reimbursed, plus all related sums.

### 3. Description

In response to a call made by the Council on 9 October 1989, the Board of Governors of the European Investment Bank (EIB) decided on 29 November 1989 to authorise the Bank to provide loans from its own resources to finance investment projects in Hungary and Poland for a total amount not exceeding EUR 1 000 000 000. These loans are granted to finance investment projects which satisfy the Bank's usual requirements for loans from its own resources.

On 14 May 1991 and 15 March 1993, the Council decided that this guarantee should be extended to any loans that the EIB might make in the other countries of central and eastern Europe (Czechoslovakia, Bulgaria and Romania) over a period of 2 years up to a maximum of EUR 700 000 000.

On 13 December 1993, the Council decided to renew for 3 years the Community guarantee for EUR 3 000 000 000 in EIB loans for projects in Poland, Hungary, the Czech Republic, the Slovak Republic, Romania, Bulgaria, Estonia, Latvia, Lithuania and Albania.

The budget guarantee covers all aspects of debt-servicing (repayment of capital, interest, related costs) in connection with these loans.

On 14 April 1997, the Council decided to renew the Community guarantee to the EIB for loans for projects in Albania, Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovak Republic and Slovenia. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 3 520 000 000 is for the abovementioned countries of central and eastern Europe. It covers a period of 3 years beginning on 31 January 1997. As at the end of that period, the loans granted by the EIB had not attained the overall amounts referred to above, the period was automatically extended by six months.

On 19 May 1998, the Council decided to grant a Community guarantee to the EIB against losses under loans for projects in the former Yugoslav Republic of Macedonia. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 150 000 000 for a period of 2 years beginning on 1 January 1998. As at the end of that period, the loans granted by the EIB had not attained the overall amounts referred to above, the period was automatically extended by six months.

On 14 December 1998, the Council decided to amend Decision 97/256/EC in order to extend the Community guarantee to the EIB to loans for projects in Bosnia and Herzegovina. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is EUR 100 000 000 for a period of two years beginning on 22 December 1998. As at the end of that period, the loans granted by the EIB had not attained the overall amounts referred to above, the period was automatically extended by six months.

The EIB is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

On 22 December 1999, the Council decided to renew the Community guarantee to the EIB for loans for projects in Albania, the former Yugoslav Republic of Macedonia, Bosnia and Herzegovina, Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovak Republic and Slovenia. The overall ceiling of the appropriations made available for all countries under Decision 2000/24/EC is equivalent to EUR 19 460 000 000. The guarantee is restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums. It covers a period of seven years beginning on 1 February 2000 and ending on 31 January 2007. As at the end of that period, the loans granted by the EIB had not attained the overall amounts referred to above, the period was automatically extended by six months.

The EIB is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

On 7 November 2000, the Council decided to extend the guarantee granted by the Community to the EIB to loans for projects in Croatia.

On 6 November 2000, the Council decided to extend the guarantee granted by the Community to the EIB to loans for projects in the Federal Republic of Yugoslavia.

Decision 2005/47/EC restructured the Mediterranean regional mandate to exclude Cyprus, Malta and Turkey which were included in the South Eastern Neighbours mandate.

Decision 2006/1016/EC grants a Community guarantee to the EIB against losses under loans and loan guarantees for projects outside the Community for loans in the following candidates: Croatia, Turkey, the former Yugoslav Republic of Macedonia and potential candidate countries: Albania, Bosnia and Herzegovina, Serbia, and Kosovo. The overall ceiling of the appropriations made available for all countries under Decision 2006/1016/EC is equivalent to EUR 27 800 000 000 and covers the period beginning on 1 February 2007 and ending on 31 December 2013 with a possible extension of 6 months. The Community guarantee is restricted to 65 %. This Decision has been replaced by Decision No 633/2009/EC.

Decision No 1080/2011/EU, which entered into force on 30 October 2011, increased the aggregate amount of credits disbursed and guarantees provided under EIB financing operations from EUR 25 800 000 000 to EUR 29 484 000 000 (EUR 2 000 000 000 for financing of climate change operations and EUR 1 684 000 000 for enhancing EIB risk operations).

Decision No 466/2014/EU granted an EU guarantee to the EIB against losses under financing operations supporting investment projects outside the Union (pre-accession countries, neighbourhood and partnership countries, Asia and Latin America, South Africa) throughout the period 2014-2020. It has been amended by Decision (EU) 2018/412. The maximum ceiling of the EIB financing operations, as per the amending Decision, is not to exceed EUR 32 300 000 000 broken down into regional ceilings and sub-ceilings as well as into:

- (a) a maximum amount of EUR 30 000 000 000 under a general mandate, of which EUR 1 400 000 000 is earmarked for projects in the public sector directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration; and
- (b) a maximum amount of EUR 2 300 000 000 under a private-sector lending mandate for projects directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration.

The EU guarantee is restricted to 65 % of the aggregated outstanding amount.

### 3. Description

Pursuant to Decision 93/115/EEC the Union guarantees, on a case-by-case basis, loans made by the European Investment Bank (EIB) in third countries with which the European Union has concluded cooperation agreements.

Decision 93/115/EEC set an overall limit of EUR 250 000 000 a year for a period of 3 years.

On 12 December 1996, the Council granted the EIB a 100 % Community guarantee for loans for projects of mutual interest in certain third countries (Asian and Latin American developing countries) with which the Community has concluded cooperation agreements. This guarantee was restricted to an overall ceiling of EUR 275 000 000 to be granted in 1996 (with a possible extension of six months).

On 14 April 1997, the Council decided to renew the Community guarantee to the EIB for loans for projects in the following countries of Asia and Latin America: Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Ecuador, Guatemala, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Salvador, Uruguay, Venezuela, Bangladesh, Brunei, China, India, Indonesia, Macao, Malaysia, Mongolia, Pakistan, Philippines, Singapore, Sri Lanka, Thailand and Vietnam. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 900 000 000 is for the abovementioned countries of Asia and Latin America. It covered a period of 3 years beginning on 31 January 1997 (with a possible extension of six months).

The EIB is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

On 22 December 1999, the Council decided to renew the Community guarantee to the EIB for loans for projects in the following countries of Asia and Latin America: Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Ecuador, Guatemala, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Salvador, Uruguay, Venezuela, Bangladesh, Brunei, China, India, Indonesia, Laos, Macao, Malaysia, Mongolia, Nepal, Pakistan, Philippines, Singapore, South Korea, Sri Lanka, Thailand, Vietnam and Yemen. The guarantee is restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available for all countries under Decision 2000/24/EC is equivalent to EUR 19 460 000 000. It covers a period of seven years beginning on 1 February 2000 and ending on 31 January 2007. As at the end of that period, the loans granted by the EIB had not attained the overall amounts referred to above, the period was automatically extended by six months.

The EIB is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

Decision 2005/47/EC was the basis for a restated and amended contract of guarantee between the European Community and the EIB signed in Brussels on 30 August 2005 and in Luxembourg on 2 September 2005 setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums.

Decision 2006/1016/EC grants a Community guarantee to the EIB against losses under loans and loan guarantees for projects outside the Community for loans in the following Latin America countries: Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay, Venezuela and in the following Asia countries: Afghanistan\*, Bangladesh, Bhutan\*, Brunei, Cambodia\*, China, India, Indonesia, Iraq\*, South Korea, Laos, Malaysia, Maldives, Mongolia, Nepal, Pakistan, the Philippines, Singapore, Sri Lanka, Taiwan\*, Thailand, Vietnam, Yemen and Central Asia countries: Kazakhstan\*, Kyrgyzstan\*, Turkmenistan\*, Uzbekistan\* (\*: eligibility to be decided by the Council). The overall ceiling of the appropriations made available for all countries under Decision 2006/1016/EC is equivalent to EUR 27 800 000 000 and covers the period beginning on 1 February 2007 and ending on 31 December 2013 with a possible extension of six months. The Community guarantee is restricted to 65 %. That Decision has been replaced by Decision No 633/2009/EC.

Decision No 1080/2011/EU, which entered into force on 30 October 2011, increased the aggregate amount of credits disbursed and guarantees provided under EIB financing operations from EUR 25 800 000 000 to EUR 29 484 000 000 (EUR 2 000 000 000 for financing of climate change operations and EUR 1 684 000 000 for enhancing EIB risk operations).

Decision No 466/2014/EU granted an EU guarantee to the EIB against losses under financing operations supporting investment projects outside the Union (pre-accession countries, neighbourhood and partnership countries, Asia and Latin America, South Africa) throughout the period 2014-2020. It has been amended by Decision (EU) 2018/412. The maximum ceiling of the EIB financing operations, as per the amending Decision, is not to exceed EUR 32 300 000 000 broken down into regional ceilings and sub-ceilings as well as into:

(a) a maximum amount of EUR 30 000 000 000 under a general mandate, of which EUR 1 400 000 000 is earmarked for projects in the public sector directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration; and

(b) a maximum amount of EUR 2 300 000 000 under a private-sector lending mandate for projects directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration.

The EU guarantee is restricted to 65 % of the aggregated outstanding amount.

### 3. Description

In accordance with the provisions of Decision 95/207/EC, the Union will guarantee European Investment Bank (EIB) loans to South Africa up to a maximum total amount of EUR 300 000 000.

The budget guarantee covers all the debt-servicing (repayment of principal, interest and ancillary costs) in connection with these loans.

On 14 April 1997, the Council decided to renew the Community guarantee to the EIB for loans for projects in the Republic of South Africa. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 375 000 000 is for the Republic of South Africa. It covered a period of three years beginning on 1 July 1997 (with a possible six-month extension).

The EIB is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

On 22 December 1999, the Council decided to renew the Community guarantee to the EIB for loans for projects in the Republic of South Africa. ## 2. Description

Article 122(1) TFEU allows the Council to decide, on a proposal from the Commission and in a spirit of solidarity between Member States, upon the measures appropriate to respond to the socio-economic situation following the COVID-19 outbreak.

Article 122(2) TFEU enables the Council to grant Union financial assistance to a Member State that is in difficulties or is seriously threatened with severe difficulties caused by exceptional occurrences beyond its control.

The creation of a European instrument for temporary support to mitigate unemployment risks in an emergency (SURE) following the COVID-19 outbreak should enable the Union to respond to the crisis in the labour market in a coordinated, rapid and effective manner and in a spirit of solidarity among Member States, thereby alleviating the impact on employment for individuals and the most affected economic sectors and mitigating the direct effects of this exceptional situation on public expenditure by the Member States.

Article 220(1) of Regulation (EU, Euratom) 2018/1046 <sup>(1)</sup> states that financial assistance by the Union to Member States can take the form of a loan. Such loans should be granted to Member States where the COVID-19 outbreak has led to a sudden and severe increase, as from 1 February 2020, in actual and possibly also planned public expenditure due to national measures. That date ensures equal treatment for all Member States and allows for coverage of their actual and possibly also planned increases in spending relating to the effects on the labour markets of the Member States, irrespective of when the COVID-19 outbreak occurred in each specific Member State. The national measures, which are understood to be in line with the relevant fundamental rights principles, should be directly related to the creation or extension of short-time work schemes and to similar measures, including measures for self-employed persons, or to some health-related measures. Short-time work schemes are public programmes that in certain circumstances allow businesses experiencing economic difficulties to temporarily reduce the hours worked by their employees, who are provided with public income support for the hours not worked.

Article 5 of Council Regulation (EU) 2020/672 of 19 May 2020 states that the maximum amount of financial assistance shall not exceed EUR 100 000 000 000 for all Member States.

### 3. Effect on the budget

The COVID-19 outbreak has had a massive and disruptive impact on the economic system of each Member State. It therefore calls for collective contributions by Member States in the form of guarantees supporting the loans from the Union budget. Such guarantees are necessary to enable the Union to grant loans of a sufficient order of magnitude to Member States in order to support labour market policies which are under the greatest strain. To ensure that the contingent liability arising from such loans is compatible with the applicable multiannual financial framework and own-resources ceilings, the guarantees provided by the Member States should be irrevocable, unconditional and on demand, while additional safeguards should enhance the robustness of the system. In line with the complementary role of such guarantees, and without prejudice to their irrevocable, unconditional and on-demand nature, the Commission is expected, before calling on the guarantees provided by Member States, to draw on the margin available under the own-resources ceiling for payment appropriations to the extent that it is deemed sustainable by the Commission, having regard, inter alia, to the total contingent liabilities of the Union, including under the balance of payments facility established by Regulation (EC) No 332/2002 <sup>(1)</sup>. In the relevant call on guarantees, the Commission should inform the Member States about the extent to which the available margin has been drawn. The need for guarantees provided by Member States may be reviewed if an agreement on a revised own-resources ceiling is reached.

Since both parts of these borrowing-and-lending operations are carried out on identical terms, they affect the budget only if the guarantee is activated in case of default. As at 31 December 2020 the outstanding capital amount under this instrument is EUR 39 500 000 000.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE UNION BUDGET  
(BY WAY OF INDICATION)

### Technical notes on tables

Exchange rate: the amounts in column 2 'Equivalent at date of disbursement' are converted at the rate applicable on the date of signature. As regards refinancing operations, Table 1 shows both the initial operation (e.g. in 1979) and the replacement operation (e.g. in 1986), the amount for the latter being converted at the rate of the initial operation. The resulting duplication affects the annual figures but is eliminated in the total.

All other amounts are converted at the rate applicable at 31 December 2020.

Column 3 'Initial amount paid up to 31 December 2020': with reference to 1986, for example, this column shows the cumulative total of all amounts received up to 31 December 2020 under loans signed in 1986 (Table 1), including refinancing (which produces some duplication).

Column 4 'Amount outstanding at 31 December 2020': these are net figures, with no duplication as a result of refinancing operations. They are obtained by subtracting from the column 3 figure the cumulative total of repayments made up to 31 December 2020, including repayments in respect of refinancing operations (total not given in the tables).

Column 7 = column 4 – column 5.

MFA 2011: following the loan agreement signed by Montenegro on 9 February 2010 pursuant to Council Decision 2008/784/EC of 2 October 2008 establishing a separate liability of Montenegro, and reducing proportionally the liability of Serbia with regard to the long-term loans granted by the Community to the State Union of Serbia and Montenegro (formerly the Federal Republic of Yugoslavia) pursuant to Decisions 2001/549/EC and 2002/882/EC (OJ L 269, 10.10.2008, p. 8), the loans initially granted to Serbia and Montenegro in 2001, 2003 and 2005 have been re-initiated with a virtual starting date in 2011 in order to implement the splitting of the countries.

## Introduction to the nomenclature

The nomenclature for the Multiannual Financial Framework (MFF) 2021-2027, as decided following the adoption of Budget 2021, allows for clearer, more informative and better aligned links between the MFF headings and programmes.

Since the 2021 budget and in line with the political agreement on the MFF 2021-2027, the budget nomenclature is structured by programme cluster (policy area) corresponding to the 'purpose' within the meaning of Article 47 of the Financial Regulation.

The first 15 titles correspond to the programme clusters within MFF headings 1 to 6 as presented in the MFF 2021-2027 proposals of May 2018 and 2020. Title 16 includes expenditure outside the annual ceilings set out in the MFF, mainly special instruments.

Within these first 16 titles, the structure in chapters has been harmonised as follows:

- Chapter 01 groups the support expenditure financed from the envelopes of the programmes included in the title as requested by the Financial Regulation.

The support expenditure of each programme is classified in articles (and further broken down to item level where necessary) following the sequence of the operational chapters.

The operating subsidies of executive agencies charged to the envelopes of the programmes delegated to them are presented under standardised items allowing them to be easily identified across the whole nomenclature: XX 01 XX 7X.

- Chapters 02 to 07 (number varying from one title to another) group the operational expenditure of the programmes included in the title, broken down in articles (and items) that correspond to the specific objectives defined in the sectoral legal bases;
- Chapter 10 groups the Union contributions to the decentralised agencies included in the title;
- Chapter 20 groups the following types of expenditure:
  - Article 01 includes the total expenditure of the pilot projects of the title;
  - Article 02 includes the total expenditure of the preparatory actions of the title;
  - Article 03 includes expenditure that is not part of a programme but for which a basic act exists;
  - Article 04 includes the expenditure relating to actions financed under the prerogatives of the Commission and specific powers conferred on the Commission.

Title 20 includes the administrative expenditure of the Commission and Title 21 the pensions (of former staff and members of all EU institutions) and the contributions to the European Schools. These two titles include the expenditure falling under the MFF heading 7 'European Public Administration'.

Finally, Title 30 constitutes the 'provisions' title foreseen in the Article 49 of the Financial Regulation.

Two complementary nomenclatures

The main nomenclature of the Commission is complemented by two nomenclatures under the annexes 1 and 2 of its section:

- In accordance with Article 65 of the Financial Regulation, Annex 1 set out in further detail the expenditure of the six offices (O1 to O6). That annex follows a structure by office similar to Title 20 of the main nomenclature where the total expenditure of each office is entered into specific budget lines (under chapter 3);

- Annex 2 presents each individual ongoing pilot project and preparatory action with the following standardised structure:
- A separate title is provided for the pilot projects 'PP' and for the preparatory actions 'PA';
- Within each of these two titles, chapters corresponding to the programme cluster from which pilot projects and preparatory actions are financed. The total expenditure by chapter in Annex 2 corresponds to the amounts of expenditure presented under Articles XX 20 01 and XX 20 02 of the main nomenclature for pilot projects and preparatory actions, respectively;
- Within each chapter, articles correspond to the budgetary year in which the pilot projects and preparatory actions were adopted.

#### Correspondence tables

The tables below present, for each of the three nomenclatures (Main – pilot projects and preparatory actions – Offices), the correspondence at budget line level between the 2021 budget and the 2022 budget.

*Figures (Non-differentiated appropriations)*

Appropriations 2022	Appropriations 2021	Outturn 2020
p.m.	53 682	92 090,—

*Remarks*

This appropriation is intended to cover costs for services relating to the establishment and payment of entitlements for officials and temporary and other staff of the European Committee of the Regions. Such services may include services offered by the Commission's Office for the Administration and Payment of Individual Entitlements, which will enhance interinstitutional cooperation and generate benefits from economies of scale, thus bringing about savings. Such services may include the following:

- transfer of pension rights from and to the country of origin,
- calculation of pension rights,
- establishment and payment of resettlement allowances,
- management of files relating to unemployment benefits and payment of benefits to those who qualify.

It is also intended to cater for expenditure for the provision of other horizontal human resources-related services to officials, temporary and other staff of the European Committee of the Regions (and their family members) throughout their career such as opening up access for European Committee of the Regions staff to the activities organised by the Commission's Welcome Office and the handling of expat administrative support files related to Protocol No 7 on the privileges and immunities of the European Union.

In the event that the handling of other non-strategic human resources processes with pecuniary impact (such as the establishment of individual rights pursuant to the provisions of Annex VII to the Staff Regulations) would be outsourced, the related expenditure shall also be covered from this appropriation.

In order to generate further economies of scale, the provision of such services will, as a rule, be operated through enhanced interinstitutional cooperation.

*Remarks*

This appropriation is intended to cover:

- expenditure incurred for further training and professional development courses, including language courses run on an interinstitutional basis, course fees, the cost of trainers and logistical costs, such as room and equipment hire, as well as miscellaneous connected costs, such as refreshments and food, the expenses of attendance at courses, conferences and congresses under the European Union Military Staff's terms of reference,
- enrolment fees for seminars and conferences.

The amount of assigned revenue in accordance with Article 21(2) and (3) of the Financial Regulation is estimated at EUR 7 500.

The budget for training should clearly demonstrate and support the importance of fostering gender equality, sensitivity and fighting gender bias, including anti-harassment policy, across our own institutions (including EEAS HQ, Union delegations, and CSDP missions and operations) also in selection procedures. This should include mandatory training and initiatives, with special attention to middle and upper management responsibility in these areas, in line with the provisions in the Gender Action Plan III and the related Staff Working Document.

## 2 2 5 0 Pilot project — Towards the creation of a European Diplomatic Academy

Appropriations 2022	Appropriations 2021	Outturn 2020
990 500		

*Remarks*

The main objective of the pilot project will be to investigate and analyse the possibilities for a creation, under the current framework, of a European Diplomatic Academy. This pilot project will establish a robust evidence base to decide on options as regards the possibilities for a creation, under the current framework, of a European Diplomatic Academy providing training, including in support of preparation for possible entry into the EEAS and Union delegations, through a developed teaching of courses and subjects:

- A study of existing, national and where appropriate international, academies and their programmes with the aim of envisaging what a European Diplomatic Academy would be able to add to this landscape. This can also entail an analysis of existing academic institutions such as the European University Institute (EUI), the College of Europe and other structures such as the European Security and Defence College (ESDC) and the European School of Administration (EUSA). This study will also analyse the potential set-up and delivery model of such an academy as well as its cost.

**CHAPTER 2 2 — OTHER OPERATING EXPENDITURE** (*cont'd*)2 2 5 (*cont'd*)2 2 5 0 (*cont'd*)

- Several projects can be run in parallel to the study in order to test possible features of the European Diplomatic Academy in practice and evaluate their impact and inform the study, such as a European Diplomatic Academy pilot course / dry run consisting of a two-month residential pilot programme for a selected group of 60 recruits and trainee diplomats from Member States and Union institutions; and 'Erasmus for Diplomats' allowing some 60 young diplomats in their first years of service to spend up to two months in the Foreign Service of another Member State or in the EEAS, including a randomly selected Union Delegation. This pilot course of 'Erasmus for Diplomats' can also explore the possibility for EEAS staff to spend up to two months at headquarters in Member States different from the one of their nationality. If these pilot courses are successful, they can lead to a one-year academic programme.

The pilot project will be able to finance the study, under the actual conditions, of the creation of such a European Diplomatic Academy, and the running of these two pilot courses as described above.

*Legal basis*
