141 000 ECU

The Financial Controller approved this proposal on 26 March 1982 in accordance with Article 21(4) of the Financial Regulation and certified that the appropriations are available.

The international exhibition on energy at Knoxville, Tennessee, USA, will take place from 1 May to 31 October 1982.

The Council decision on Commission participation in the exhibition was approved by Parliament in 1980.

The Commission requested an overall budget of 875 000 ECU over three financial years. The budgetary authority approved a total appropriation of 680 000 ECU over three years, divided as follows:

1980:	85 000 ECU
1981:	355 000 ECU
1982:	240 000 ECU
	680 000 ECU

When the overall budget of 680 000 ECU was fixed in July 1980, exchange rates were as follows:

1 ECU	=	§ 1.42737
§ 1	=	0.70058 ECU

Since then the dollar has risen sharply and the administrative rate in March 1982 was:

1 ECU	=	1.01647
§ 1	=	0.98379 ECU

This 40.5% increase means that the overall budget of 680 000 ECU, which was worth some § 970 000 when it was approved, is now worth only § 691 200.

Since most of the expenditure (e.g. on mounting the stand, American architects, local firms, printed material (such as leaflets), stickers, local staff, the European Day and other information activities and operating expenses for the six months of the exhibition) has to be paid in dollars in the United States, the Commission has insufficient money.

The annexed tables summarize commitments in dollars (Table 1) and orders still to be placed in dollars (Table 5) with US firms. These contracts are directly affected by the rise in the dollar. The tables show both the cost in ECU when the commitment was entered into and the cost in ECU at the

exchange rate applicable at the time the budget was approved (June 1980). The shortfall is therefore evident.

These tables also list contracts with European firms (Tables 2 and 3) which, although drawn up, as required by Commission rules, in a currency other than the dollar, are wholly or partly affected by the rise in the dollar because they are for work to be carried out in the United States and the contracting firms based their prices on the current dollar exchange rate.

The total effect of the depreciation of the ECU amounts to 141 028 ECU (Table 6) and the Commission therefore proposes to transfer 141 000 ECU from Chapter 101 (Contingency Reserve) to item 2721 in Section III A of the general budget (Participation of the Communities in international exhibitions).

Decoration of the facade of the Community pavillion

Since this work is to be done in Knoxville, the German firm DURMA submitted a tender calculated in dollars in response to the invitation to tender put out by our American architects. DURMA's tender was the lowest and it was awarded the contract. In accordance with Commission rules, this was then converted at the current exchange rate into DM so that the Commission could make its order and pay its share in DM to the company's German account. The other partners are paying their contributions in dollars to the local account of the firm in Knoxville.

Note: This is a joint order by the five participants (France, Germany, Italy, the United Kingdom and the Commission). The Commission is responsible for one fifth of the cost.

Decoration of the Commission's stand

The invitation to tender was issued in Europe and those participating submitted an inclusive price in national currency covering design, execution, transport, assembly, maintenance of the audio-visual exhibition for six months, etc. As regards that part of the work to be carried out on the spot (e.g. transport, assembly, maintenance and removal), which was therefore payable in the USA in dollars, these tenders were based on the exchange rate current on 1 October 1981, the date the tender was submitted.

The contract was awarded to PRODES, Rome, whose inclusive price of Lit 295 million included:

assembly at and removal from Knoxville	Lit 25.000.000
maintenance of the audio-visual exhibition, included in the total price of the exhibition	approx. Lit 12.000.000
