FOR OFFICIAL USE ONLY

NEGOTIATIONS FOR THE ACCESSION OF PORTUGAL

23rd Report
on the
examination of Community secondary legislation

Supplement to the previous reports
on acts relating to

CUSTOMS LEGISLATION

(Commission Communication to the Council)

COM(82) 739 final

I.

1. In continuation of the systematic examination of Community secondary legislation undertaken with the Portuguese Delegation in accordance with the brief received from the Council, the Commission has carried out an interim supplementary examination of the acts adopted by the institutions of the European Communities in the field of customs legislation.

The supplementary examination covered general acts adopted and/or published after the closing dates for the previous examinations of Community legislation in the field in question and in force on 1 March 1982 (inclusive of acts published in Official Journal of the European Communities No L 56 of 27 February 1982).

2. Subject to the remarks made below, the results of the supplementary examination are set out in the two annexes to this report:

Annex I lists the new acts examined which do not require any technical adaptation to take account of Portugal's accession;

Annex II gives details of the technical adaptations which need to be made to certain acts and which will have to be specified in the accession instruments.

3. In the course of this interim supplementary examination it was found that certain acts which were in force and were examined at the time of the previous examinations have since lapsed or have been amended by new acts adopted subsequently.

Any amendments which consequently need to be made to the technical adaptations set out in the conclusions of the reports embodying the results of the previous examinations are given in Annex II to this report in the form of corrections or additions to be made to the said previous conclusions.

II.

The examination of the acts in question gives rise to the following remarks:

1. Acts of a contractual nature

As in the previous reports the Community acts of a contractual nature which, it has been found, will require adaptations at a later stage by means of protocols to be concluded with the partner countries in question are listed in Annex I and marked with an asterisk so that they can be identified at the appropriate time after the signing of the instruments of accession.

2. Generalized preferences - Rules of origin

No mention is made in this report of Commission Regulation (EEC) No 3817/81 of 23 December 1981 (OJ No L 384 of 31 December 1981, p.1) since it is applicable only for 1982. Any acts adopted with a view to the multiannual application of generalized preferences for subsequent years will be examined at a later stage in the operation. However, in response to the wish expressed by the Portuguese Delegation, relevant information has been provided about the system of generalized preferences as applied by the Community on an annual basis.

3. Value for customs purposes

The following should be added to the remarks set out in paragraph II.5 of the fifteenth report¹:

- (a) The acts listed in point II.5(a) concerning a system of standard average values have been repealed and replaced by a system of simplified procedures for determining the value for customs purposes of certain perishable goods.

In order to see what adaptations should be made to the Regulation in question it will be necessary to stipulate the Portuguese marketing centres to be used in the calculation of the unit prices per NIMEXE tariff heading for the products in question.

This issue will have to be resolved in the framework of the substantive negotiations.

¹COM(81)529 final of 24 September 1981.

- (b) The reasons given for not stating at this stage the nature of the adaptations to be made to the various acts in question remain valid; such adaptations will depend on the outcome of the substantive negotiations on this issue, which have not yet been successfully concluded.

Consequently, the regulations in question are listed in Annex II.B to this report among the acts requiring permanent adaptation after the signing of the act of accession, but the wording of the adaptations is being held over temporarily.

- (c) In view of the fact that dismantling of the residual customs duties within the enlarged Community will be carried out gradually over a transitional period, it is proposed that application of the acts in question to Portugal be deferred until the end of that period.

4. The other problems raised in the previous reports remain open and do not call for any additional comments.

Supplementary list of Community
acts examined in the field of
CUSTOMS LEGISLATION

NOT REQUIRING TECHNICAL ADAPTATIONS
to be specified in the act of accession¹

¹The contractual acts marked with an asterisk will require adaptations to take account of Portugal's accession but it will not be possible to make them until a later stage, through protocols to be drawn up in agreement with the other Contracting Parties.
