

## II

*(Preparatory Acts)*

## COMMISSION

**Amended proposal for a European Parliament and Council Directive concerning the protection of personal data and privacy in the context of digital telecommunications networks, in particular the integrated services digital network (ISDN) and digital mobile networks <sup>(1)</sup>**

(94/C 200/04)

(Text with EEA relevance)

COM(94) 128 final — COD 288

*(Submitted by the Commission pursuant to Article 189a (2) of the EC Treaty on 14 June 1994)*

<sup>(1)</sup> OJ No C 277, 5. 11. 1990, p. 12.

## ORIGINAL PROPOSAL

**Proposal for a Council Directive concerning the protection of personal data and privacy in the context of public digital telecommunications networks, in particular the integrated services digital network (ISDN) and public digital mobile networks**

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 100a thereof,

Having regard to the proposal from the Commission,

In cooperation with the European Parliament,

Having regard to the opinion of the Economic and Social Committee,

- (1) Whereas Council Directive .../.../EEC, concerning the protection of individuals in relation to the processing of personal data, exhorts Member States to ensure the protection of privacy;

## AMENDED PROPOSAL

**Modified proposal for a Directive of the European Parliament and the Council concerning the protection of personal data and privacy in the context of digital telecommunications network, in particular the integrated services digital network (ISDN), and digital mobile networks**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 100a thereof,

Having regard to the proposal from the Commission <sup>(1)</sup>,

Having regard to the opinion of the Economic and Social Committee <sup>(2)</sup>,

- (1) Whereas Council Directive .../.../EEC, concerning the protection of individuals with regard to the processing of personal data and the free movement of such data, exhorts Member States to ensure the rights and freedom of natural persons with regard to the processing of personal data, and in particular their right to privacy, in order to ensure the free flow of personal data in the Community.

<sup>(1)</sup> OJ No C 277, 5. 11. 1990, p. 12.

<sup>(2)</sup> OJ No C 159, 17. 6. 1991, p. 38.

## ORIGINAL PROPOSAL

- (2) Whereas currently in the European Community new advanced digital public telephone networks are emerging which give rise to specific requirements concerning the protection of personal data and privacy of the user;
- (3) Whereas this is the case, in particular, with the introduction of the integrated services digital network (ISDN) and public digital mobile networks;
- (4) Whereas the Council, in its resolution of 30 June 1988 on the development of the common market for telecommunications services and equipment up to 1992<sup>(1)</sup>, has called for steps to be taken to protect personal data, in order to create an appropriate environment for the future development of telecommunications in the Community; whereas the Council has re-emphasized the importance of the protection of personal data and privacy in its resolution of 18 July 1989 on the strengthening of the coordination for the introduction of the integrated services digital network (ISDN) in the Community<sup>(2)</sup>;
- (5) Whereas the European Parliament has underlined the importance of the protection of personal data and privacy in telecommunications networks, in particular with regard to the introduction of the integrated services digital network (ISDN)<sup>(3)</sup> <sup>(4)</sup> <sup>(5)</sup>;
- (6) Whereas Commission recommendation 81/679/EEC calls for the adoption and ratification by Member States of the Council of Europe Convention for the protection of individuals with regard to automatic processing of personal data which spells out general principles for the protection of personal data;
- (7) Whereas a number of Member States have adopted and ratified this Convention;
- (8) Whereas Council Decision ... opens negotiations with a view to the accession of the European Economic Community, in the fields in which it is competent, to the Convention of the Council of Europe for the protection of individuals with regard to automatic processing of personal data;
- (9) Whereas Council Directive ... concerning the protection of individuals in relation to the processing of personal data implements the adoption of these general principles in the Community;

<sup>(1)</sup> OJ No C 257, 4. 10. 1988, p. 1.

<sup>(2)</sup> OJ No C 196, 1. 8. 1989, p. 4.

<sup>(3)</sup> OJ No C 7, 12. 1. 1987, p. 334.

<sup>(4)</sup> OJ No C 12, 16. 1. 1989, p. 69.

<sup>(5)</sup> OJ No C 12, 16. 1. 1989, p. 66.

## AMENDED PROPOSAL

- (2) Whereas currently in the European Community new advanced digital public telecommunications networks are emerging which give rise to specific requirements concerning the protection of personal data and privacy of the user;
- (3) Whereas this is the case, in particular, with the introduction of the integrated services digital network (ISDN) and digital mobile networks;
- (4) Whereas the Council, in its resolution of 30 June 1988 on the development of the common market for telecommunications services and equipment up to 1992<sup>(1)</sup> has called for steps to be taken to protect personal data, in order to create an appropriate environment for the future development of telecommunications in the Community; whereas the Council has re-emphasized the importance of the protection of personal data and privacy in its resolution of 18 July 1989 on the strengthening of the coordination for the introduction of the integrated services digital network (ISDN) in the European Community<sup>(2)</sup>;
- (5) Whereas the European Parliament has underlined the importance of the protection of personal data and privacy in telecommunications networks, in particular with regard to the introduction of the integrated services digital network (ISDN)<sup>(3)</sup> <sup>(4)</sup> <sup>(5)</sup>;

<sup>(1)</sup> OJ No C 257, 4. 10. 1988, p. 1.

<sup>(2)</sup> OJ No C 196, 1. 8. 1989, p. 4.

<sup>(3)</sup> OJ No C 7, 12. 1. 1987, p. 334.

<sup>(4)</sup> OJ No C 12, 16. 1. 1989, p. 69.

<sup>(5)</sup> OJ No C 12, 16. 1. 1989, p. 66.

## ORIGINAL PROPOSAL

- (10) Whereas in the case of public digital networks, specific legal, regulatory, and technical provisions must be made in order to protect personal data and the privacy of users with regard to the increasing risks connected with computerized storage and processing of personal data in such networks;
- (11) Whereas Member States are currently developing divergent provisions in this area;
- (12) Whereas given the obstacles resulting from these divergent legal, regulatory and technical provisions concerning the protection of personal data and privacy in the context of the implementation of public digital telecommunications networks, in particular the integrated services digital network (ISDN) and public digital mobile networks, the full establishment of a Community-wide market in telecommunications services and equipment requires the rapid introduction of harmonized provisions;
- (13) Whereas this Directive should determine the extent to which personal data may be collected, stored and processed in connection with the provision of telecommunications services;
- (14) Whereas the collection, storage and processing of personal data by a telecommunications organization is justified for the purposes of the provision of the intended service only and may not be used without specific authorization by law or the subscriber's prior consent for any other purpose; whereas such collection, storage and processing of personal data may, in particular, not be used to give such telecommunications organization any undue competitive advantage over other service providers;

## AMENDED PROPOSAL

- (6) Whereas in the case of telecommunications networks, specific legal, regulatory, and technical provisions must be made in order to protect personal data and the privacy of users with regard to the increasing risks connected with computerized storage and processing of personal data in such networks;
- (7) Whereas several Member States have already adopted diverging provisions in this area; whereas a number of Member States are currently developing legislation which bears the risk to increase the existing differences;
- (8) Whereas these divergent legal, regulatory, and technical provisions concerning the protection of personal data and privacy in the context of the implementation of telecommunications networks in the Community, in particular the integrated services digital network (ISDN) and digital mobile networks, create obstacles to the creation of an internal market for telecommunications in conformity with the objective set out in Article 8 A of the Treaty; whereas the importance of these differences and the necessity to ensure the freedom of transborder telecommunications within the Community require specific harmonization at Community level; whereas the harmonization envisaged is strictly limited, pursuant to the principle of subsidiarity, to the specific requirements which have arisen as a result of the introduction of new functionalities in telecommunications networks;
- (9) Whereas for all matters concerning protection of personal data and privacy in the context of telecommunications networks, which are not covered by the provisions of this Directive, including the rights of individuals, the Council Directive .../EEC, shall apply;

## ORIGINAL PROPOSAL

## AMENDED PROPOSAL

- (15) Whereas this Directive should implement in the telecommunications sector the general principles concerning the subscriber's right to inspect the personal data stored about him/her, his right to request the rectification or erasure of such data, if necessary, as well as his right to prevent non-authorized disclosure of his personal data;
- (16) Whereas this Directive must provide for harmonization of the Member States' rules concerning the privacy in the field of itemized call statements;
- (17) Whereas, it is necessary, as regards the calling line identification, to protect both the right of the calling party to remain anonymous and the privacy of the called party with regard to unidentified calls;
- (18) Whereas safeguards must be provided for the users of teleshopping and videotext services against unauthorized use of their personal data as well as for the subscribers in general against intrusion into their privacy by means of unsolicited calls;
- (19) Whereas it is necessary to ensure that the introduction of technical features of telecommunications equipment for data protection purposes is harmonized in order to be compatible with the implementation of the internal market of 1992;
- (10) Whereas the personal data processed to establish calls are highly sensitive, in particular in the case of digital mobile networks; whereas the storage of these data should be limited to the period strictly necessary for the provision of the service;
- (11) Whereas currently diverging rules exist in the Member States with regard to the provision of itemized bills; whereas this Directive must provide for harmonization of the Member States' rules concerning the privacy in the field of itemized billing in order to avoid obstacles to the development of trans-European services;
- (12) Whereas, it is necessary, as regards the calling line identification, to protect both the right of the calling party to remain anonymous and the privacy of the called party with regard to unidentified calls; whereas, however, it is justified to override the elimination in specific exceptional cases;
- (13) Whereas directories are widely distributed and publicly available; whereas the right to privacy requires that the subscriber himself is able to determine to which extent his personal data are published in a directory;
- (14) Whereas measures must be taken to prevent the unauthorized access to communications in order to protect the confidentiality of communications;
- (15) Whereas safeguards must be provided for the users against intrusion into their privacy by means of forwarded calls as well as unsolicited calls and telefaxes;
- (16) Whereas it is necessary to ensure that the introduction of technical features of telecommunications equipment for data protection purposes is harmonized in order to be compatible with the implementation of the internal market of 1992;
- (17) Whereas where the rights of the users and subscribers are not respected, national legislation must provide for judicial remedy; whereas sanctions must be imposed on any person, whether governed by private or public law, who fails to comply with the national measures taken under this Directive;

## ORIGINAL PROPOSAL

## AMENDED PROPOSAL

- (20) Whereas the implementation of this Directive with regard to third countries must take into account the level of protection of personal data and privacy in those countries as provided for in Council Directive ...;
- (21) Whereas all matters concerning protection of personal data and privacy in the context of public digital telecommunications networks, which are not covered by the provisions of this Directive, the Council Directive mentioned above shall apply;
- (22) Whereas this Directive does not address issues of protection of personal data and privacy related to national security;
- (23) Whereas it is useful for the preparation of measures intended to implement or modify this Directive to draw on the experience of the Working Party on the protection of personal data composed of representatives of the supervisory authorities of the Member States, set up by Article 27 of Council Directive ...;
- (24) Whereas such measures must be prepared with the assistance of the committee composed of representatives of the Member states set up by Article 30 of Council Directive ...;
- (18) Whereas Member States, industries concerned and the European Community will have to cooperate in developing and manufacturing the technologies necessary for the implementation of this Directive; this cooperation will have to respect in particular the competition rules of the Treaty;
- (19) Whereas this Directive does not address issues of protection of personal data and privacy related to activities, such as national security, which are not governed by Community law; whereas processing carried out by a Member State's own authorities, organizations or other bodies in the course of activities which are not governed by Community law should be governed by the protection principles provided for in the resolution of the representatives of the Governments of the Member States of the European Communities meeting within the Council of ...;
- (20) Whereas the processing of personal data may not be used to give telecommunications organizations any undue competitive advantage over other service providers;
- (21) Whereas it is useful in the field of application of this Directive to draw on the experience of the Working Party on the protection of individuals with regard to the processing of personal data composed of representatives of the supervisory authorities of the Member States, set up in Article 31 of Council Directive ...;
- (22) Whereas such measures must be prepared with the assistance of the Committee composed of representatives of the Member States set up by Council Directive ...;

## ORIGINAL PROPOSAL

## AMENDED PROPOSAL

HAS ADOPTED THIS DIRECTIVE:

HAVE ADOPTED THIS DIRECTIVE:

*Article 1**Article 1***Objective**

1. This Directive provides for the harmonization of the provisions required to ensure an equal level of protection of privacy in the Community and to provide for the free movement of telecommunications equipment and services within and between Member States.

1. This Directive provides for the harmonization of the provisions required to ensure an equivalent level of protection of personal data and privacy in the Member States and to provide for the free movement of telecommunications equipment and services in the Community.

2. The Member States shall adopt the necessary specific provisions in order to guarantee the protection of personal data and privacy in the telecommunications sector in accordance with this Directive.

2. The Member States shall adopt the necessary specific provisions in order to guarantee the protection of personal data and privacy in the telecommunications sector in accordance with this Directive.

*Article 2*

1. Without prejudice to the general provisions of Council Directive . . ., this Directive applies specifically to the collection, storage, and processing of personal data by telecommunications organizations in connection with the provision of public telecommunications services in public digital telecommunications networks in the Community, in particular via the integrated services digital network (ISDN) and public digital mobile networks.

2. In case a Member State has not yet implemented the integrated services digital network (ISDN) or public digital mobile networks, the provisions of this Directive will be implemented to the extent that they also apply to services based on analogue networks.

*Article 3**Article 2***Definitions**

For the purposes of this Directive,

In addition to the definitions given in Directive . . ./EEC, for the purposes of this Directive:

1. 'personal data' means any information relating to an identified or identifiable individual;

1. 'telecommunications organization' means a public or private body, to which a Member State grants special or exclusive rights for the provision of a public telecommunications network and, where applicable, public telecommunications services;

2. 'telecommunications organization' means a public or private body, to which a Member State grants special or exclusive rights for the provision of a public telecommunications network and, where applicable, public telecommunications services;

2. 'service provider' means a natural or legal person providing services whose provision consists wholly or partly in the transmission and routing of signals on a public telecommunications network, with the exception of radio broadcasting and television;

## ORIGINAL PROPOSAL

3. 'public telecommunications network' means the public telecommunications infrastructure which permits the conveyance of signals between defined network termination points by wire, by microwave, by optical means or by other electromagnetic means;
4. 'public telecommunications service' means a telecommunications service whose supply Member States have specifically entrusted *inter alia* to one or more telecommunications organizations.

## AMENDED PROPOSAL

3. 'subscriber' means any natural or legal person having subscribed to a telecommunications service of a telecommunications organization or another service provider;
4. 'user' means any person using a telecommunications service for private or business purposes without necessarily having subscribed to this service;
5. 'public telecommunications network' means the public telecommunications infrastructure which permits the conveyance of signals between defined network termination points by wire, by microwave, by optical means or by other electromagnetic means;
6. 'public telecommunications service' means a telecommunications service whose supply Member States have specifically entrusted *inter alia* to one or more telecommunications organizations.

## Article 3

## Services concerned

1. Without prejudice to the provisions of Council Directive . . . . ., this Directive applies to the processing of personal data by telecommunications organizations in connection with the provision of public telecommunications services in public digital telecommunications networks in the Community, in particular via the integrated services digital network (ISDN) and public digital mobile networks.

2. The principles concerning network security, billing data, subscriber directories, technical features and standardization as well as judicial remedies and sanctions as set out in Articles 4, 5, 6, 11, 14 and 16 of this Directive shall apply *mutatis mutandis* to public digital telecommunications services of service providers other than telecommunications organizations and to other telecommunications services provided to the public over the public telecommunications network.

The measures necessary for the application of other provisions of this Directive to service providers other than telecommunications organizations or measures that may prove necessary to give better effect to the application of the above paragraph shall be adopted by the Commission after consultation of the Working Party referred to in Article 17 and in accordance with the procedure laid down in Article 18.

## ORIGINAL PROPOSAL

## AMENDED PROPOSAL

*Article 4*

1. Collection, storage and processing of personal data by a telecommunications organization is justified for telecommunications purposes only, in particular in order to establish connections for the transmission of voice, data or image, to produce bills, to compile directories, and for other legitimate operational purposes, for example fault clearance, prevention of misuse of the telecommunications organization's equipment, or registration of incoming calls in accordance with Article 13 (1).

2. The telecommunications organization shall not use such data to set up electronic profiles of the subscribers or classifications of individual subscribers by category.

*Article 5*

1. Personal data of the subscriber may be collected and stored to the extent necessary to conclude, perform, amend or terminate the contract with the telecommunications organization. After termination of the contract the data are to be erased unless and for so long as they are required to deal with complaints, to recover charges or to comply with other obligations imposed by the law of the Member State, in conformity with Community law.

2. The contents of the information transmitted must not be stored by the telecommunications organization after the end of the transmission, except where required by obligations imposed by the law of the Member State, in conformity with Community law.

*Article 6*

The subscriber is entitled:

- to obtain at reasonable intervals and without excessive delay or expense confirmation of whether personal data relating to him/her are stored as well as communication to him/her of such data in an intelligible form,
- to obtain, as the case may be, rectification or erasure of such data if they have been processed in breach of the provisions which are imposed by the law of the Member State in conformity with Community law.

3. Member States shall ensure that the provisions of this Directive will, where technically possible, be also applied to the processing of personal data in connection with services provided via analogue networks.

## ORIGINAL PROPOSAL

## AMENDED PROPOSAL

*Article 7*

1. In principle, all personal data processed in connection with telecommunication networks and services are to be kept confidential.

2. The personal data may not be disclosed outside the services or the network of the telecommunications organization without specific authorization by law or the subscriber's prior consent. A subscriber shall be held to have given such consent only where it is given by way of a specific response to a request by the telecommunications organization. Without the subscriber's prior consent, these personal data must not be disclosed to persons within the telecommunications organization who are not dealing with the relevant services provided.

3. The telecommunications organization must not make the provision of its service dependent upon such consent.

*Article 8*

1. The telecommunications organization must provide adequate, state-of-the-art protection of personal data against unauthorized access and use.

2. In case of particular risk of a breach of the security of the network, for example in the field mobile radio telephony, the telecommunications organization must inform the subscribers concerning such risk and offer them an end-to-end encryption service.

*Article 9*

1. Billing data containing the telephone number or identification of the subscriber station, the address of the subscriber and the type of station, the total number of units to be charged for the accounting period, the called telephone number, the type and duration of the calls made and/or the data volume transmitted as well as other information needed for billing such as advance payment, payment by instalments, disconnection and reminders, may be stored and processed.

2. Such a general storage of billing data is permissible up to the end of the statutory period during which the bill may be challenged.

*Article 4***Security**

In case of particular risk of a breach of the security of the network, for example in the field mobile radio telephony, the telecommunications organization must inform the subscribers concerning such risk and offer them encryption facilities.

*Article 5***Billing data**

1. For the purpose of billing, data containing the number or identification of the subscriber station, the address of the subscriber and the type of station, the total number of units to be charged for the accounting period, the called, subscriber number, the type and duration of the calls made and/or the data volume transmitted as well as other information needed for billing such as advance payment by instalments, disconnection and reminders, may be processed. Access to the storage of such data has to be restricted to the persons in charge of billing.

2. Such a storage of billing data is permissible only up to the end of the statutory period during which the bill may be challenged.

## ORIGINAL PROPOSAL

*Article 10*

1. Traffic data containing the personal data necessary to establish calls, or required for billing or other operational purpose, such as the telephone number of the calling and of the called subscriber, the time each call started and finished and the telecommunications service used by the subscriber, may be collected, stored and processed as far as this is necessary to provide the telecommunications service required.

2. The traffic data stored in the switching centres of the telecommunications organization must be erased after termination of the call unless the data are anonymized or are required for billing or other legitimate purposes in the meaning of Article 4.

*Article 11*

Upon application of the subscriber an itemized call statement may be produced, containing, among other items, the telephone numbers of the called subscribers without the last four digits.

*Article 12*

1. With regard to communications between subscribers linked to digital exchanges, the calling subscriber must have the possibility to eliminate via a simple technical facility the identification of his/her telephone number on the display of the called subscribers' terminal equipment, or its recording in a storage facility of this terminal, on a case-by-case basis.

The transmission of the telephone number may also be permanently eliminated by the telecommunications organization upon application of the calling subscriber.

2. The called subscriber may apply for permanent elimination of the identification of all incoming calls; he/she must also be able to turn off the display of his/her terminal equipment, or to eliminate the recording in the terminal's storage facility, in order to prevent the identification of the incoming calls, on a case-by-case basis.

The called subscriber must be able to limit the acceptance of incoming calls to those which identify the calling subscriber's number.

## AMENDED PROPOSAL

*Article 6***Traffic data**

Traffic data containing the personal data processed to establish calls and stored in the switching centres of the telecommunications organizations must be erased as soon as it is no longer necessary to provide the service required.

*Article 7***Itemized billing**

Where, upon application of the subscriber, an itemized bill is produced, Member States shall ensure the privacy of calling users and called subscribers is preserved.

*Article 8***Calling-line identification**

1. Where calling-line identification is offered, the calling subscriber must have the possibility to eliminate via a simple means the transmission of his/her subscriber number for the purpose of calling-line-identification on a per-call basis.

2. Member States shall ensure that, upon application, the subscriber obtains from the telecommunications organization a per-line elimination of the transmission of the subscriber number for the purpose of calling-line identification.

3. Member States shall ensure that, upon application, the subscriber obtains from the telecommunications organization a per-line elimination of the identification of all incoming calls; Member States shall ensure that in other cases the subscribers are able to prevent the access to the identification of incoming calls by unauthorized persons.

The called subscriber must be able to limit the acceptance of incoming calls to those where the identification of the calling subscriber's number has not been eliminated.

## ORIGINAL PROPOSAL

3. With regard to communications between a subscriber linked to an analogue exchange and subscribers linked to digital exchanges, the former subscriber is to be informed of the identification of his/her telephone number and to be offered the permanent elimination of the feature upon application. This subscriber must also have the possibility to eliminate the identification on a case-by-case basis.

*Article 13*

1. For a limited period of time, the telecommunications organization may override the elimination of the calling line identification:

- (a) upon application of a subscriber requesting the tracing of malicious calls. In this case, the data containing the identification of the calling subscriber will be stored by the telecommunications organization and be made available upon request to the public authority charged with the prevention or pursuit of criminal offences of the Member State concerned;
- (b) upon specific court order, in order to prevent or pursue serious criminal offences.

2. A permanent override function must be made available upon request:

- (a) to organizations recognized by a Member State which answer and deal with emergency calls; and
- (b) to fire brigades operated or recognized by a Member State.

3. The telecommunications organizations shall take the necessary steps to ensure that the override function is operational on a national and Community-wide basis.

*Article 14*

1. Calls may be forwarded from the called subscriber to a third party only if this party has agreed; the third party may limit automatic forwarding to those calls which identify the calling subscriber's number; the third party must be informed via a specific signal of the message that the call has been forwarded.

2. The calling subscriber must be informed automatically during the establishment of the connection that the call is being forwarded to a third party.

## AMENDED PROPOSAL

4. The provisions set out in paragraphs (1) and (2) shall also apply with regard to calls to third countries originating in the Community; the provisions set out in paragraph (3) shall also apply to incoming calls originating in third countries.

5. The options set out in this Article must be offered free of charge.

*Article 9***Exceptions**

1. Member States shall ensure that, for a limited period of time, the telecommunications organization may override the elimination of the calling line identification in exceptional cases:

- (a) upon application of a subscriber requesting the tracing of malicious calls; in this case, the data containing the identification of the calling subscriber will be stored by the telecommunications organization and be made available upon request to the public authority charged with the prevention or pursuit of criminal offences of the Member State concerned;
- (b) upon specific court order, in order to prevent or pursue serious criminal offences.

2. Member States shall ensure that a permanent override function is made available upon request:

- (a) to organizations recognized by a Member State which answer and deal with emergency calls; and
- (b) to fire brigades operated or recognized by a Member State.

3. The telecommunications organizations shall take the necessary steps to ensure that the override function is operational on a national and Community-wide basis.

*Article 10***Call forwarding**

Calls may be forwarded from the called subscriber to a third party only if this party has agreed; for this purpose ways and means of agreement by a third party will have to be developed and provided for as well as the possibility to stop automatic forwarding.

## ORIGINAL PROPOSAL

## AMENDED PROPOSAL

*Article 15*

1. If the content of telephone calls is made accessible to third parties via technical devices, such as loudspeakers or other on-hook equipment, or stored on tape for own use or use by third parties, provision must be made in order that the parties concerned are informed via an appropriate procedure of such diffusion or storage before the diffusion or storage is initiated and for as long as it continues.

2. Paragraph 1 does not apply in the cases covered by Article 13 (1).

*Article 16*

1. The telecommunications organization must ensure that the telephone number as well as other personal data of the subscriber, in particular concerning the quantity and nature of his/her orders when using a teleshopping service or concerning the information requested via a videotex service, is stored only to the extent strictly necessary to supply the service and is only used by the service provider for purposes authorized by this subscriber.

2. Subject to the provisions of Article 20, the service provider may not set up electronic profiles of the subscribers or classifications of individual subscribers by category, without their prior consent.

*Article 11***Directories**

Personal data contained in a directory should be limited to what is strictly necessary to identify a particular subscriber, unless the subscriber has given his consent to the publication of additional personal data. The subscriber shall be entitled, free of charge, not to have his or her sex indicated and to be omitted from the directory at his or her request.

*Article 12***Surveillance of communications**

1. Member States shall take appropriate measures to ensure that listening or tapping devices or other means of interception or surveillance of communications by third parties are applied only subject to authorization by the competent judiciary or administrative national authorities in conformity with national legislation.

2. Member States shall ensure that the content of telephone calls must not be made accessible to third parties via technical devices, such as loudspeakers or other on-hook equipment, or be stored on tape for own use or use by third parties without the consent of the users concerned.

3. Paragraph (2) does not apply in cases covered by Article 9 (1).

## ORIGINAL PROPOSAL

*Article 17*

1. Subscribers who receive unsolicited calls for advertising purposes or for the purpose of offering the supply or provision of goods and services may notify the telecommunications organization conveying such messages that they do not wish to receive these calls.

2. The telecommunications organization must take the steps necessary to terminate the transmission of such messages to the subscribers concerned. Furthermore, the telecommunications organization must keep a list of the notifications in a form specified and available for inspection by the regulatory authority, in order to prevent such calls in future.

*Article 18*

1. In implementing the provisions of this Directive, Member States shall ensure, subject to paragraphs (2) and (3) of this Article, that no mandatory requirements for specific technical features are imposed on terminal or other telecommunications equipment which could impede the placing of equipment on the market and the free circulation of such equipment in and between Member States.

2. Where provisions can only be implemented by requiring specific technical features, Member States shall inform the Commission according to the procedures provided for by Council Directive 83/189/EEC <sup>(1)</sup> which lays down a procedure for the provision of information in the field of technical standards and regulations.

3. Where required, the Commission will ensure the drawing up of common European standards for the implementation of specific technical features, in accordance with Council Directive ..., on the approximation of the laws of the Member States concerning telecommunications terminal equipment, including the mutual recognition of their conformity, and Council Decision 87/95/EEC of 27 December 1986 on standardization in the field of information technology and telecommunications <sup>(2)</sup>.

<sup>(1)</sup> OJ No L 109, 26. 4. 1983, p. 8.

<sup>(2)</sup> OJ No L 36, 7. 2. 1987, p. 31.

## AMENDED PROPOSAL

*Article 13***Unsolicited calls**

1. Notwithstanding the provisions of Directive .../.../EC, on the protection of consumers in respect of contracts negotiated at a distance (distance selling), Member States shall take appropriate measures to ensure that unsolicited calls for promotional or advertising/research purposes are not allowed in respect of subscribers who do not wish to receive these calls.

2. The use of automatic call devices for transmitting pre-recorded messages may only be used in respect of subscribers who have given their consent.

3. Paragraphs (1) and (2) apply accordingly to telefax messages.

*Article 14***Technical features and standardization**

1. In implementing the provisions of this Directive, Member States shall ensure, subject to paragraphs (2) and (3) of this Article, that no mandatory requirements for specific technical features are imposed on terminal or other telecommunications equipment which could impede the placing of equipment on the market and the free circulation of such equipment in and between Member States.

2. Where provisions can only be implemented by requiring specific technical features, Member States shall inform the Commission according to the procedures provided for by Council Directive 83/189/EEC <sup>(1)</sup> which lays down a procedure for the provision of information in the field of technical standards and regulations.

3. Where required, the Commission will ensure the drawing up of common European standards for the implementation of specific technical features, in accordance with Council Directive 91/263/EEC on the approximation of the laws of the Member States concerning telecommunications terminal equipment, including the mutual recognition of their conformity <sup>(2)</sup>, and Council Decision 87/95/EEC of 27 December 1986 on standardization in the field of information technology and telecommunications <sup>(3)</sup>.

<sup>(1)</sup> OJ No L 109, 26. 4. 1983, p. 8.

<sup>(2)</sup> OJ No L 128, 23. 5. 1991, p. 1.

<sup>(3)</sup> OJ No L 36, 7. 2. 1987, p. 31.

## ORIGINAL PROPOSAL

*Article 19*

1. The provisions of this Directive relating to the telephone service shall be applied to other public digital telecommunications services to the extent that these services present similar risks for the privacy of the user.

2. The measures necessary for the implementation of paragraph 1 shall be adopted by the Commission after consultation of the Working Party referred to in Article 22 and in accordance with the procedure laid down in Article 23.

*Article 20*

To the extent that the full achievement of the objectives of this Directive requires the application of its provisions to service providers other than telecommunications organizations, the Commission may adopt the measures necessary for the application of this Directive to those service providers after consultation of the Working Party referred to in Article 22 and in accordance with the procedure laid down in Article 23.

*Article 21*

The details of the application of this Directive and the modifications necessary to adapt this Directive to new technical developments shall be determined by the Commission in accordance with the procedure laid down in Article 23.
