Proposal for a

COUNCIL REGULATION (EC)

**establishing the lists of species to be recorded in the fisheries logbook and landing
declaration**

(presented by the Commission)

EXPLANATORY MEMORANDUM

The present proposal for a Council Regulation establishes the lists of species to be recorded in the fisheries logbook and landings declaration. Masters of fishing vessels shall keep a logbook of their operation and submit landing declarations of their catches in accordance with Council Regulation (EEC) No 2847/93 establishing a control regime applicable to the Common Fisheries Policy. In accordance with Art. 6(2) of this Regulation the species to be entered in the logbook and the landing declaration shall be those subject to TACs or quotas as well as others included in the lists to be decided by the Council.

The present proposal establishes the complete list of species to be recorded as well as the procedure for the adoption of simplified lists applicable to vessels operating in specific zones.

The annex sets out the complete list of species to be recorded. This list includes species subject to TAC and quota as well as species subject to technical conservation measures provided for in Regulations (EEC) No 3094 and 1866/86, species subject to international measures for the conservation and protection of living marine resources and species of particular scientific or commercial interest.

In order to facilitate the recording of species by fishermen operating exclusively in specific zones, it is provided for the adoption by simplified lists for fisheries limited to specific zones. The species set out in simplified lists shall be drawn from the annex to the proposed Regulation. Simplified lists will only contain the species relevant for the vessels concerned.

Catch reporting and landing declaration are the basis for fisheries management and enforcement of conservation measures.

This proposal should contribute to systematic recording of regulated and highly migratory species. The information derived from such recording will facilitate better scientific analysis of the exploitation of marine resources. The measures concerning regulation of exploitation rates of stocks are drawn up in the light of these analysis.

The present list of species to be recorded is without prejudice to the provisions on recording of species to be agreed in the framework of fisheries Agreements concluded between the Community and third countries, and international Conventions to which the Community is a Party.

laying down certain technical measures for conservation of fish resources in the Mediterranean⁽⁵⁾ in Fisheries Agreements concluded between the Community and third countries as well as highly migratory species subject to international regulation, species of particular scientific and commercial interest and those species provided for under the NAFO Convention on future multilateral cooperation in the Northwest Atlantic Fisheries Organisation (NAFO)⁽⁶⁾;

Whereas it is necessary to provide for the adoption of simplified lists of species to be recorded in accordance with the present regulation with respect to fisheries limited to certain zones;

Whereas the present list of species is without prejudice to the provisions concerning the recording of species provided for in fisheries agreements concluded between the Community and certain third countries and international conventions to which the Community is a Party.

HAS ADOPTED THIS REGULATION:

Article 1

1. The species which shall be recorded in the logbook, as provided for in Articles 6 and 10 of Council Regulation (EEC) N° 2847/93, and in the landing declaration, as provided for in Articles 8 and 10 of the said regulation, are set out in the list of species provided in the Annex to this regulation.
2. Simplified lists of species which shall be recorded in accordance with paragraph 1, for fisheries limited to certain zones, may be adopted in accordance with the procedure laid down in Article 36 of Regulation (EEC) N° 2847/93. These lists shall only contain species drawn from the list of species provided in the Annex to this regulation.

⁽⁵⁾ OJ N° L 171 of 06.07.1994, p. 1.

⁽⁶⁾ OJ N° L 378 of 30.12.1978, p. 1.

Article 2

Article 1 (1) shall apply without prejudice to provisions concerning the recording of species under fisheries agreements concluded between the Community and third countries and International Conventions to which the Community is a Party. Pursuant to those provisions, lists of species which shall be recorded in accordance with Article 1 (1), may be adopted in accordance with the procedure laid down in Article 36 of Regulation (EEC) N° 2847/93.

Article 3

This regulation shall enter into force on the seventh day following of its publication in the Official Journal of the European Communities.

This regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Council,
