Proposal for a

COUNCIL DECISION

amending Decision 95/513/EEC on the equivalence of seed potatoes produced in third countries and Decision 95/514/EEC on the equivalence of field inspections carried out in third countries on seed-producing crops and on the equivalence of seed produced in third countries

(presented by the Commission)

EXPLANATORY MEMORANDUM

Directives 66/400/EEC, 66/401/EEC, 66/402/EEC, 66/403/EEC and 69/208/EEC on the marketing of beet seed, fodder plant seed, cereal seed, seed potatoes and seed of oil and fibre plants respectively, provide for the Council to determine whether seed or seed potatoes produced in third countries are equivalent to those in the Community.

By Decisions 95/513/EC and 95/514/EC the Council has determined for a limited period that seed and seed potatoes respectively produced in third countries are equivalent to those in the Community.

Those Council Decisions establish conditions in respect of package marking. Council Directive 98/95/EC has provided that without prejudice to the conditions determined under the authorisation procedures required under Community law in the case of seed and seed potatoes of a variety which has been genetically modified, any label or document, official or otherwise, which is affixed to or accompanies the seed or seed potatoes lot, shall clearly indicate that the variety has been genetically modified. In order to guarantee a proper information of the seed users and the consumers and avoid deceptive practices it is appropriate to apply the same requirements to seed and seed potatoes imported under the said decisions;.

Furthermore the Decisions 95/513/EC and 95/514/EC will expire respectively on 30 June 2000 and on 31 January 2000. It appears desirable to ensure continuation of the equivalence under a new Decision, until 31 December 2002.

There are no financial implications for the EC-budget.
