

**Proposal for a Council Regulation amending Regulation (EEC) No 2019/93 introducing specific measures for the smaller Aegean islands concerning certain agricultural products**

(2002/C 75 E/06)

COM(2001) 638 final — 2001/0260(CNS)

*(Submitted by the Commission on 7 November 2001)*

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Articles 36 and 37 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament,

Having regard to the opinion of the Economic and Social Committee,

Whereas:

- (1) Under Article 15 of Council Regulation (EEC) No 2019/93 of 19 July 1993 introducing specific measures for the smaller Aegean islands concerning certain agricultural products<sup>(1)</sup> the Commission must submit an annual report to Parliament and the Council on the implementation of the measures and, at the end of the third year of application of the specific supply arrangements, a general report on the economic situation of the Aegean islands, showing the impact of the measures taken. These reports are to be accompanied, where necessary, by appropriate proposals for amendments and changes to the measures provided for in that Regulation.
- (2) Analysis of the implementation of these measures points to the need for appropriate adjustments and changes, taking into account the results and experience gathered and the evolution of the context in which these measures have been applied. Council Regulation (EEC) No 2019/93 should therefore be amended accordingly.
- (3) In particular, the specific supply arrangements have proved to be poorly suited to the milk products (yoghurt) and sugar sectors, especially as regards passing on the advantages to the end user, while in the fruit and vegetables sector the arrangements expired at the end of 1997. These products should therefore be removed from the specific supply arrangements. The groups of islands should also be redefined on the basis of their distance from the usual ports of shipment in mainland Greece, taking into account supplies to the islands of final destination from islands of transit and of loading.

(4) The economic advantages of the specific supply arrangements must not provoke deflections of trade in the products concerned. Re-dispatching or re-exporting these products from the islands concerned should therefore be prohibited. In the case of processing, this prohibition should not apply to traditional exports and consignments.

(5) The support measures for local products introduced by Regulation (EEC) No 2019/93 for the private storage of certain local cheeses, programmes of initiatives for fruit, vegetables and flowers, and the ageing of locally produced liqueur wines have been shown to be poorly suited to the situation in these sectors on the Aegean islands due in particular to the short storage periods for the cheeses and liqueur wines and thus the negligible impact of the aid, and to the complexity of procedures and the way the proposed aid for fruit, vegetables and flowers was structured. This aid should not therefore be renewed.

(6) In order to continue to support traditional cattle farming in these islands, on the one hand, the stability of the special premium should be ensured for a specific number of male bovines also in receipt of the supplement to the special premium and the grant of the supplement to the suckler cow premium should be continued and, on the other, reference should be made to the new regulatory framework for the common organisation of the market in this sector since 1999.

(7) As regards the continued grant of aid for the cultivation of vines for the production of quality wines psr in the traditional areas of production, the references to the legislation on the common organisation of the market in this sector since 1999 should be updated.

(8) For the purposes of continuing to grant aid to traditional beekeeping and contributing to the continued improvement of quality in this sector, the activities of recognised associations of beekeepers should be encouraged and the number of hives eligible for such aid should be updated.

(9) Since the measures needed to implement this Regulation are management measures within the meaning of Article 2 of Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission<sup>(2)</sup>, they should be adopted by the management procedure provided for in Article 4 of that Decision.

<sup>(1)</sup> OJ L 184, 27.7.1993, p. 1. Regulation as last amended by Regulation (EC) No 1257/1999 (OJ L 160, 26.6.1999, p. 80).

<sup>(2)</sup> OJ L 184, 17.7.1999, p. 23.

(10) Article 13 of Regulation (EEC) No 2019/93, providing for derogations applicable to structural measures, has been repealed by Council Regulation (EC) No 1257/1999 of 17 May 1999 on support for rural development from the European Agricultural Guidance and Guarantee Fund (EAGGF) and amending and repealing certain Regulations<sup>(1)</sup>. The structures of certain holdings and processing and marketing firms in the Aegean islands are seriously defective and face specific difficulties. Provision should therefore be made for derogations for certain types of investments from the provisions limiting the grant of some structural aid provided for in Regulation (EC) No 1257/1999,

HAS ADOPTED THIS REGULATION:

#### Article 1

Regulation (EEC) No 2019/93 is hereby amended as follows:

4. Products covered by the specific supply arrangements may not be re-exported to third countries or re-dispatched to the rest of the Community.

5. Where the products referred to in paragraph 1 are processed in the smaller Aegean islands, the prohibition referred to in paragraph 5 shall not apply to traditional exports or to traditional shipments of the processed products to the rest of the Community.
