

Commission communication in the framework of the implementation of the Directive 97/23/EC of the European Parliament and of the Council on the approximation of the laws of the Member States concerning pressure equipment

(Text with EEA relevance)

(Publication of titles and references of harmonised standards under the directive)

(2008/C 111/10)

The following list contains references to harmonised standards for pressure equipment and harmonised supporting standards for materials used in manufacturing pressure equipment. In the case of a harmonised supporting standard for materials, presumption of conformity to the essential safety requirements is limited to technical data of materials in the standard and does not presume adequacy of the material to a specific item of equipment. Consequently the technical data stated in the material standard shall be assessed against the design requirements of this specific item of equipment to verify that the essential safety requirements of the PED are satisfied.

ESO (*)	Reference and title of the harmonised standard (and reference document)	Reference of superseded standard	Date of cessation of presumption of confor- mity of superseded standard (Note 1)
CEN	EN 19:2002 Industrial valves — Marking of metallic valves	—	
CEN	EN 287-1:2004 Qualification test of welders — Fusion welding — Part 1: Steels EN 287-1:2004/A2:2006 EN 287-1:2004/AC:2004	— Note 3	Date expired (30.9.2006)
CEN	EN 334:2005 Gas pressure regulators for inlet pressures up to 100 bar	—	
CEN	EN 473:2000 Non destructive testing — Qualification and certification of NDT personnel — General principles EN 473:2000/A1:2005	— Note 3	Date expired (30.4.2006)

Note 1 Generally the date of cessation of presumption of conformity will be the date of withdrawal ('dow'), set by the European Standardisation Organisation, but attention of users of these standards is drawn to the fact that in certain exceptional cases this can be otherwise.

Note 3 In case of amendments, the referenced standard is EN CCCC:YYYY, its previous amendments, if any, and the new, quoted amendment. The superseded standard (column 3) therefore consists of EN CCCC:YYYY and its previous amendments, if any, but without the new quoted amendment. On the date stated, the superseded standard ceases to give presumption of conformity with the essential requirements of the directive.

Note:

— Any information concerning the availability of the standards can be obtained either from the European Standardisation Organisations or from the national standardisation bodies of which the list is annexed to the Directive 98/34/EC of the European Parliament and of the Council ⁽¹⁾ amended by the Directive 98/48/EC ⁽²⁾.

— Publication of the references in the *Official Journal of the European Union* does not imply that the standards are available in all the Community languages.

— This list replaces all the previous lists published in the *Official Journal of the European Union*. The Commission ensures the updating of this list.
