(As an agreement was reached between Parliament and Council, Parliament's position corresponds to the final legislative act, Decision No 377/2013/EU.)

ANNEX TO THE LEGISLATIVE RESOLUTION

Statement by the Commission

The Commission recalls that, according to Article 3d of the Directive 2003/87/EC, revenues generated from the auctioning of aviation allowances should be used to tackle climate change in the EU and third countries, inter alia, to reduce greenhouse gas emissions, to adapt to the impacts of climate change in the EU and third countries, especially developing countries, to fund research and development for mitigation and adaptation, including in particular in the fields of aeronautics and air transport, to reduce emissions through low-emission transport and to cover the cost of administering the Community scheme. The proceeds of auctioning should also be used to fund contributions to the Global Energy Efficiency and Renewable Energy Fund, and measures to avoid deforestation.

⁽¹⁾ Council Decision 2002/358/EC of 25 April 2002 concerning the approval, on behalf of the European Community, of the Kyoto Protocol to the United Nations Framework Convention on Climate Change and the joint fulfilment of commitments thereunder (OJ L 130, 15.5.2002, p. 1.).

⁽²⁾ Not yet published in the Official Journal.

Tuesday 16 April 2013

The Commission notes that Member States shall inform the Commission of actions taken pursuant to Article 3d of the Directive 2003/87/EC on the use of revenues generated from the auctioning of aviation allowances. Specific provisions on the content of this reporting are set out in Regulation (EU) No 525/2013 on a mechanism for monitoring and reporting greenhouse gas emissions and for reporting other information at national and Union level relevant to climate change and repealing Decision No 280/2004/EC ⁽¹⁾. Further details will be set out in a Commission implementing act under Article 18 of that Regulation. Member States will make the reports public, and the Commission will publish aggregate Union information on these in an easily accessible form.

The Commission emphasizes that a global market-based mechanism putting an international price on carbon emissions from international aviation transport could, in addition to achieving its primary goal of emission reductions, help provide the necessary resources to support international climate change mitigation and adaptation measures.
