AND OF THE COUNCIL****of 16 April 2014****granting an EU guarantee to the European Investment Bank
against losses under financing operations supporting investment
projects outside the Union***Article 1***EU guarantee**

1. The Union shall grant the European Investment Bank (EIB) a budgetary guarantee for financing operations carried out outside the Union ('EU guarantee'). The EU guarantee shall be granted as a global guarantee in respect of payments due to the EIB, but not received by it, in connection with loans, loan guarantees, and debt capital market instruments granted for or issued for the benefit of EIB investment projects that are eligible in accordance with paragraph 2.

2. Eligible for the EU guarantee shall be the EIB loans, loan guarantees, and debt capital market instruments that are granted for or issued for the benefit of investment projects carried out in eligible countries in accordance with the EIB's own rules and procedures, including the EIB's statement on environmental and social principles and standards, and in support of the relevant Union external policy objectives, where EIB financing has been granted in accordance with a signed agreement which has neither expired nor been cancelled ('EIB financing operations').

3. The EIB financing operations in support of Union external policies shall continue to be managed in accordance with the principles of sound banking practices.

4. The EU guarantee shall be restricted to 65 % of the aggregate amount disbursed and guaranteed under EIB financing operations, less amounts reimbursed, plus all related amounts.

5. The EU guarantee shall cover EIB financing operations signed during the period from 1 January 2014 to 31 December 2020.

6. If, on expiry of the period referred to in paragraph 5, the European Parliament and the Council have not adopted a decision granting a new EU guarantee to the EIB against losses under its financing operations outside the Union, that period shall be automatically extended once by six months.

▼M2*Article 2***Ceilings for EIB financing operations under EU guarantee**

1. The maximum ceiling of the EIB financing operations under EU guarantee throughout the period 2014-20 shall be EUR 32 300 000 000. Amounts initially earmarked for financing operations but subsequently cancelled shall not count against the ceiling.

▼ M2

This maximum ceiling shall be broken down into:

- (a) a maximum amount of EUR 30 000 000 000 under a general mandate, of which EUR 1 400 000 000 is earmarked for projects in the public sector directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration;
- (b) a maximum amount of EUR 2 300 000 000 under a private-sector lending mandate for projects directed towards the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration.

2. The maximum amounts referred to in paragraph 1 shall be broken down into regional ceilings and sub-ceilings as laid down in Annex I. Within the regional ceilings and over the period covered by this Decision, the EIB shall ensure a country distribution within the regions covered by the EU guarantee, balanced in line with Union external policy priorities which shall be reflected in the regional technical operational guidelines referred to in Article 5.

Article 3

General objectives and principles

1. The EU guarantee shall be granted only for EIB financing operations which have added value on the basis of the EIB's own assessment, and support any of the following general objectives:

- (a) local private-sector development, in particular support to micro, small and medium-sized enterprises (SMEs);
- (b) development of social and economic infrastructure, including transport, energy, environmental infrastructure, and information and communication technology;
- (c) climate change mitigation and adaptation;
- (d) the long-term economic resilience of refugees, migrants, host and transit communities, and communities of origin as a strategic response to addressing root causes of migration.

2. While preserving the EIB's distinct character as an investment bank, EIB financing operations carried out under this Decision shall contribute to the general Union interest, in particular the principles guiding Union external action, as referred to in Article 21 TEU and shall contribute to the implementation of international environmental agreements to which the Union is a party. The EIB governing bodies are encouraged to take the necessary measures to adapt the EIB activity to contribute to the Union external policies in an effective manner, and to adequately meet the requirements set out in this Decision.

▼ M2

3. Regional integration among countries, including in particular economic integration between pre-accession countries and beneficiaries, Neighbourhood and Partnership countries and the Union, shall be an underlying objective for EIB financing operations within areas covered by the general objectives set out in paragraph 1. The EIB shall undertake financing operations in beneficiary countries within areas covered by the general objectives by supporting foreign direct investments that promote economic integration with the Union.

4. In developing countries, as defined in the Organisation for Economic Cooperation and Development list of official development assistance recipients, the EIB financing operations shall contribute, in accordance with Articles 208 and 209 TFEU, to the objectives of the Union's development cooperation policy, in particular towards reducing poverty through inclusive growth and sustainable economic, environmental and social development.

5. To ensure that private-sector investments have the greatest development impact, the EIB shall endeavour to contribute to creating favourable conditions for private enterprise and investment and shall ensure as a priority that the local private sector in beneficiary countries, including cooperatives and social enterprises, is strengthened through support to local investment as provided for in point (a) of paragraph 1. EIB financing operations supporting the general objectives set out in paragraph 1 shall endeavour to also enhance its support for investment projects run by SMEs from the recipient country and from the Union, enabling access to finance for new investment projects run by SMEs. EIB financing operations shall allow SMEs to take advantage of, inter alia, market access for SMEs in the eligible countries and their integration into global value chains and shall further contribute to enhancing competitiveness of Union companies.

In order to effectively monitor and evaluate the use of funds for the benefit of the SMEs concerned, the EIB shall carry out thorough due diligence and establish and maintain adequate contractual provisions imposing standard reporting obligations on both the financial intermediaries and the final beneficiaries. The EIB shall endeavour to identify and contribute to addressing the obstacles to funding faced by SMEs.

The EIB shall cooperate with financial intermediaries that can support the specific needs of SMEs in the countries of operation and that comply with the requirements of Article 13, as transposed into agreements under the third subparagraph of paragraph 1 of that Article.

6. EIB financing operations supporting the general objective set out in point (b) of paragraph 1 shall support investment projects predominantly in the areas of transport, energy, environmental infrastructure, information and communication technology, health and education. This includes production and integration of energy from renewable sources, energy-efficiency measures, energy systems transformation enabling a switch to lower carbon-intensive technologies and fuels, sustainable energy security and energy infrastructure, including for gas production and transportation to Union energy market, as well as electrification of rural areas, environmental infrastructure such as water and sanitation and green infrastructure, telecommunications and broadband network infrastructure.

▼ M2

7. EIB financing operations supporting the general objectives set out in point (c) of paragraph 1 shall support investment projects in climate-change mitigation and adaptation that contribute to the overall objectives of the United Nations Framework Convention on Climate Change and of the Paris Agreement adopted under that Convention, in particular by avoiding or reducing greenhouse-gas emissions and reducing the carbon footprint in the areas of renewable energy, energy efficiency and sustainable transport, or by increasing resilience to the adverse impacts of climate change on vulnerable countries, sectors and communities.

The eligibility criteria for climate action projects are defined in the EIB Climate Strategy. On the basis of the methodologies for the assessment of project greenhouse-gas emissions and emission variations drawn up by the EIB, an analysis of the carbon footprint shall be included in the environmental assessment procedure to determine whether project proposals optimise energy-efficiency improvements.

Over the period covered by this Decision, the EIB shall endeavour to sustain a high level of climate-relevant operations, the volume of which shall represent at least 25 % of the total EIB financing operations outside the Union. EIB financing under this Decision shall be consistent with reaching the target of at least 35 % of total EIB financing operations in emerging economies and developing countries outside the Union by 2020.

EIB financing operations shall, inter alia, integrate concrete actions to phase out financing projects detrimental to the achievement of Union's climate objectives and step up efforts to support renewable energy sources and energy efficiency.

The EIB shall enhance the climate-change adaptation elements in its contribution to projects across EIB financing operations within the EIB External Lending Mandate.

8. EIB financing operations supporting the general objectives set out in point (d) of paragraph 1 shall support investment projects that address root causes of migration and contribute to long-term economic resilience and to the United Nations sustainable development goals and safeguard sustainable development in beneficiary countries.

While ensuring the full respect of human, labour and social rights, fundamental freedoms and gender equality by implementing a rights-based approach encompassing all human and social rights in line with the principles of transparency, participation, non-discrimination and accountability, EIB financing operations shall:

- (a) address increased needs for infrastructure and related services to cater directly or indirectly for the influx of migrants while also benefitting the local population;

▼ M2

- (b) boost employment opportunities for host and refugee communities;
- (c) foster economic integration and enable refugees to become self-reliant; or
- (d) strengthen humanitarian action and support for creation of decent jobs.

EIB financing operations shall support the following:

- (a) the private sector in the areas of SMEs and mid-caps, corporate finance and microfinance;
- (b) the public sector, including municipalities and public-sector entities, in terms of infrastructure and services, including healthcare and special facilities for children, sanitation services and school education, to address significantly increased needs.

9. EIB financing operations supporting the general objectives set out in paragraph 1 shall recognise that gender equality is a cross-cutting issue which is crucial to achieving sustainable development and an important element for project due diligence. A gender perspective shall be applied to all such financing operations. The EIB shall ensure that all EIB financing operations comply with the commitments set out in its Gender Strategy and Gender Action Plan.

10. The EIB shall seek to ensure that companies participating in projects co-financed by the EIB adhere to the principles of pay transparency and gender equality and to the principle of equal pay as set out in Directive 2006/54/EC of the European Parliament and of the Council⁽¹⁾. EIB decisions on project financing shall take into account action by potential beneficiary companies with regard to equal pay and corporate social responsibility.

11. The EU guarantee shall cover only EIB financing operations carried out in eligible countries that have concluded a framework agreement with the EIB establishing the legal conditions under which such operations are to be carried out and which shall be compatible with the EIB's Statement of Environmental and Social Principles and Standards and its Environmental and Social Handbook.

1. The list of countries potentially eligible for EIB financing under EU guarantee is set out in Annex II. The list of countries eligible for EIB financing under EU guarantee is set out in Annex III and shall include no countries other than those listed in Annex II. For countries not listed in Annex II, eligibility for EIB financing under the EU guarantee shall be decided on a case-by-case basis in accordance with the ordinary legislative procedure.

The Commission's decisions shall be based on an overall assessment, including economic, social, environmental and political aspects, in particular those related to the democracy, human rights and fundamental freedoms as well as the relevant European Parliament resolutions and Council decisions and conclusions.

3. Delegated acts amending Annex III shall not affect the EU guarantee coverage of EIB financing operations signed before the entry into force of those delegated acts, subject to paragraph 4.

4. Disbursements on EIB financing operations benefiting from a Comprehensive Guarantee as referred to in Article 8(1) shall not be made in countries not listed in Annex III.

*Article 5***Contribution of EIB financing operations to Union policies**

1. The Commission shall update, together with the EIB, the existing regional technical operational guidelines for EIB financing operations within one year following the entry into force of this Decision.

The regional technical operational guidelines shall be consistent with the wider Union regional policy framework set out in Annex IV. In particular, the regional technical operational guidelines shall ensure that EIB financing under this Decision is complementary to corresponding Union assistance policies, programmes and instruments in the different regions.

▼M2

In the case of EIB financing operations falling under this Decision, where the Commission delivers an unfavourable opinion, that operation shall not be covered by the EU guarantee.

*Article 6***Cooperation with the Commission and the EEAS**

1. The consistency of EIB external actions with Union external policy objectives shall be further strengthened, with a view to maximising synergies between EIB financing operations and Union budgetary resources, in particular through the updating of the regional technical operational guidelines referred to in Article 5, for which the EEAS shall be consulted on policy issues, as appropriate, as well as through regular and systematic dialogue and early exchange of information on:

▼ B

2. The cooperation referred to in paragraph 1 shall be facilitated by coordination between the Commission, the EIB and the relevant European and international financial institutions operating in the different regions, carried out where appropriate in the context of memoranda of understanding or other Union regional cooperation frameworks.

▼ B*ANNEX IV***REGIONAL POLICY FRAMEWORK****▼ M2**

EIB activity in partners participating in the pre-accession process takes place in the framework established in the Accession and European Partnerships which set out the priorities for pre-accession countries and beneficiaries with a view to making progress in moving closer to the Union, and which provide a framework for Union assistance. The Stabilisation and Association Process is the Union policy framework for the Western Balkans. It is based on progressive partnership, in which the Union offers trade concessions, economic and financial assistance and contractual relationships through stabilisation and association agreements. Pre-accession financial assistance helps pre-accession countries and beneficiaries prepare for the obligations and challenges of Union membership. Such assistance supports the reform process, including preparations for eventual membership. It focuses on institution-building, alignment with the *acquis* of the Union, preparation for Union policies and instruments and promotion of measures to achieve economic convergence.

▼ B

EIB activity in Neighbourhood countries takes place in the framework of the new European Neighbourhood Policy set out in the Joint Communication entitled 'A new response to a changing Neighbourhood', adopted by the High Representative of the Union for Foreign Affairs and Security Policy and the Commission on 25 May 2011, and the Council conclusions adopted on 20 June 2011, which calls notably for greater support to partners committed to building democratic societies and undertaking reforms, in line with the 'more for more' and 'mutual accountability' principles, and provides the strategic policy framework for the Union relations with the neighbours. In the framework of this cooperation, EIB financing under this Decision will also be targeted at policies promoting inclusive growth and job creation contributing to social stability in line with an incentive-based approach supporting Union external policy objectives, including in relation to migration issues.

In order to achieve these objectives the Union and its partners implement jointly agreed bilateral action plans defining a set of priorities including on political and security issues, trade and economic matters, environmental and social concerns and integration of transport and energy networks.

The Union for the Mediterranean, the Eastern Partnership, the Black Sea Synergy, the Union Strategy for the Danube Region and the Union Strategy for the Baltic Sea Region are multilateral and regional initiatives aimed at fostering cooperation between the Union and the respective group of Neighbourhood partner countries facing common challenges and/or sharing a common geographical environment. The Union for the Mediterranean aims to relaunch the Euro-Mediterranean integration process by supporting mutual economic, social and environmental development on both sides of the Mediterranean and supports improved socioeconomic development, solidarity, regional integration, sustainable development and knowledge building, underlining the need to increase financial cooperation to support regional and transnational projects. The Union for the Mediterranean supports, in particular, the creation of maritime and land highways, the de-pollution of the Mediterranean, the Mediterranean solar energy plan, the Mediterranean Business Development Initiative, civil protection initiatives and the Euro-Mediterranean university.

The Eastern Partnership aims to create the necessary conditions to accelerate political association and further economic integration between the Union and Eastern partner countries. The Eastern Partnership will provide additional impetus to the economic and social and regional development of the partner countries. It will facilitate good governance, including in the financial sector, promote regional development and social cohesion and help to reduce partner countries' socioeconomic disparities.

▼B

The Union Strategy for the Baltic Sea Region supports a sustainable environment and optimal economic and social development in the Baltic Sea region. The Union Strategy for the Danube Region supports, in particular, the development of transport, energy connections and security, sustainable environment and socioeconomic development in the Danube region. The Eastern Partnership aims to create the necessary conditions to accelerate political association and further economic integration between the Union and Eastern partner countries. Russia and the Union have a wide-ranging strategic partnership, distinct from the European Neighbourhood Policy and expressed through the Common Spaces and Roadmaps. These are complemented at multilateral level by the Northern Dimension which provides a framework for cooperation between the Union, Russia, Norway and Iceland (Belarus, Canada and the United States are observers to the Northern Dimension).

EIB activity in Latin America takes place in the framework of the Union, Latin America and the Caribbean Strategic Partnership. As highlighted in the 30 September 2009 Commission Communication from the Commission to the European Parliament and the Council entitled 'The European Union and Latin America: Global Players in Partnership', the Union's priorities in the field of cooperation towards Latin America are the promotion of regional integration and the eradication of poverty and social inequality in order to promote sustainable economic and social development. These policy objectives will be fostered taking into account the different level of development of Latin American countries. Bilateral dialogue and cooperation will be pursued in areas of common interest for both regions, including environment, climate change, disaster risk reduction and energy, science, research, higher education, technology and innovation.

In Asia, the Union is deepening its strategic partnerships with China and India and negotiations are progressing on new partnership and free trade agreements with South-East Asian countries. At the same time, development cooperation remains high on the Union's agenda with Asia; the Union development strategy for the Asian region aims at eradicating poverty by supporting broad-based sustainable economic growth, promoting a conducive environment and conditions for trade and integration within the region, enhancing governance, increasing political and social stability, and supporting the achievement of the 2015 Millennium Development Goals. Policies are being put in place jointly to address common challenges, such as climate change, sustainable development, security and stability, governance and human rights, as well as the prevention of, and response to, natural and humanitarian disasters.

The Union Strategy for a new partnership with Central Asia adopted by the European Council of 21-22 June 2007 has strengthened regional and bilateral dialogue and Union cooperation with Central Asian countries on major issues facing the region, such as poverty reduction, sustainable development and stability. The implementation of the strategy has brought about important advances in the fields of human rights, the rule of law, good governance and democracy, education, economic development, trade and investment, energy and transport and environmental policies.

EIB activity in South Africa takes place in the framework of the Joint EU Country Strategy Paper for South Africa. The main focal areas identified in that Strategy Paper are employment creation and capacity development for service delivery and social cohesion. EIB activities in South Africa have taken place in high complementarity with the Union development cooperation programme, namely through the EIB focus on private sector support and investments in expansion of infrastructure and social services (housing, electric power, drinking water purification and municipal infrastructure). The mid-term

▼B

review of the EU Country Strategy Paper for South Africa conducted in 2009-10 has proposed the strengthening of actions in the area of climate-change through activities supporting the creation of green jobs. For the period 2014-20, EIB activity is expected to support in a complementary fashion Union external co-operation policies, programmes and instruments by continuing to focus on key EU-South Africa priorities in order to promote equitable and sustainable economic growth, contribute to employment creation and capacity development, and support the sustainable provision and equitable access to basic infrastructure and services.
