#### **COMMISSION IMPLEMENTING REGULATION (EU) 2019/2072**

#### of 28 November 2019

establishing uniform conditions for the implementation of Regulation (EU) 2016/2031 of the European Parliament and the Council, as regards protective measures against pests of plants, and repealing Commission Regulation (EC) No 690/2008 and amending Commission Implementing Regulation (EU) 2018/2019

#### Article 1

#### Subject matter

This Regulation implements Regulation (EU) 2016/2031, as regards the listing of Union quarantine pests, protected zone quarantine pests and Union regulated non-quarantine pests, and the measures on plants, plant products and other objects to reduce the risks of those pests to an acceptable level.

#### Article 2

#### **Definitions**

- 1. For the purposes of this Regulation, the definitions provided for in Annex I shall apply.
- 2. In addition, the following definitions shall apply:
- (a) 'practically free from pests' means the extent of presence of pests, other than Union quarantine pests or protected zone quarantine pests, on the plants for planting or fruit plants, which is sufficiently low to ensure acceptable quality and usefulness of those plants;
- (b) 'official statement' means a phytosanitary certificate, as provided for in Article 71 of Regulation (EU) 2016/2031, a plant passport, as provided for in Article 78 of that Regulation, the mark on wood packaging material, wood or other objects, as referred to in Article 96 of that Regulation, or the official attestations as referred to in Article 99 of that Regulation;
- (c) 'systems approach' means the integration of different risk management measures, at least two of which act independently, and which, when applied together, achieve the appropriate level of protection against Union quarantine pests, protected zone quarantine pests and pests subject to the measures adopted pursuant to Article 30 of Regulation (EU) 2016/2031.

#### List of Union quarantine pests

The list of Union quarantine pests, as referred to in Article 5 of Regulation (EU) 2016/2031, is set out in Annex II to this Regulation.

The list of Union quarantine pests not known to occur in the Union territory is set out in Part A of Annex II and the list of Union quarantine pests known to occur in the Union territory is set out in Part B of Annex II.

#### Article 4

# List of protected zones and the respective protected zone quarantine pests

The list of the protected zones and the respective protected zone quarantine pests, as referred to in Article 32(3) of Regulation (EU) 2016/2031, is set out in Annex III to this Regulation.

#### Article 5

# List of Union regulated non-quarantine pests and specific plants for planting, with categories and thresholds

The list of Union regulated non-quarantine pests ('RNQPs') and specific plants for planting with categories and thresholds, as referred to in Article 37(2) of Regulation (EU) 2016/2031, are set out in Annex IV to this Regulation. Those plants for planting shall not be introduced into, or moved within, the Union if the presence of the RNQPs, or symptoms caused by RNQPs, on those plants for planting is above those thresholds.

The prohibition of introduction and movement provided for in the first paragraph shall apply only to the categories of plants for planting as provided for in Annex IV.

#### Article 6

# Measures to prevent the presence of RNQPs on specific plants for planting

- 1. The measures to prevent the presence of RNQPs concerning the movement within and introduction into the Union of specific plants for planting, as referred to in Article 37(4) of Regulation (EU) 2016/2031, are set out in Annex V to this Regulation.
- 2. The list set out in Annex IV to this Regulation and Annex V thereto shall not affect the measures adopted pursuant to Directives 66/401/EEC, 66/402/EEC, 68/193/EEC, 98/56/EC, 1999/105/EC, 2002/54/EC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC and 2008/90/EC concerning:
- (a) inspections, sampling and testing of the plants for planting concerned or the plants from which they originate;
- (b) the origin of the respective plants for planting from the areas or sites, which are free from, or with physical protection from, the RNQPs concerned;

- (c) treatments of the plants for planting concerned, or the plants from which they originate;
- (d) the production of the plants for planting.
- 3. In addition, the list set out in Annex IV to this Regulation and Annex V thereto shall not affect the exceptions for plants for planting, adopted pursuant to Directives 66/401/EEC, 66/402/EEC, 68/193/EEC, 98/56/EC, 1999/105/EC, 2002/54/EC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC and 2008/90/EC, from the requirements for marketing set out by those Directives, including:
- (a) exceptions concerning the supply of plants for planting to official testing and inspection bodies;
- (b) exceptions concerning the supply of plants for planting as grown to providers of services for processing or packaging, under the condition that the provider of services does not acquire title to the plants thus supplied and the identity of the plants is ensured;
- (c) exceptions concerning the supply of plants for planting under certain conditions to providers of services for the production of certain agricultural raw materials, intended for industrial purposes, or seed propagation for that purpose;
- (d) exceptions for plants for planting intended for scientific purposes, selection work, other test or trial purposes;
- (e) exceptions from marketing requirements concerning plants for planting not finally certified;
- (f) exceptions from marketing requirements set out in the provisions of Implementing Decision (EU) 2017/478;
- (g) exceptions from marketing requirements for plants for planting shown to be intended for export to third countries.

#### Article 7

# List of plants, plant products and other objects whose introduction into the Union from certain third countries is prohibited

The list of plants, plant products and other objects whose introduction into the Union territory is prohibited, together with the third countries, groups of third countries or specific areas of third countries to which the prohibition applies, as referred to in Article 40(2) of Regulation (EU) 2016/2031, is set out in Annex VI to this Regulation.

#### **▼**<u>M3</u>

The first paragraph shall apply without prejudice to any other acts setting out prohibitions, having a temporary character, adopted pursuant to Articles 40(2), 42(3) or 49(1) of Regulation (EU) 2016/2031, and concerning the introduction into the Union territory of certain plants, plant products or other objects to address particular phytosanitary risks which are not yet fully assessed.

List of plants, plant products and other objects originating from third countries, or in the Union territory and the corresponding special requirements for their introduction into or movement within the Union territory

1. The list of plants, plant products and other objects, originating from third countries, and the corresponding special requirements for their introduction into the Union territory, as referred to in Article 41(2) of Regulation (EU) 2016/2031, is set out in Annex VII to this Regulation

#### **▼** M3

The first subparagraph shall apply without prejudice to any other acts setting out special requirements, having a temporary character, adopted pursuant to Articles 41(2), 42(4) or 49(1) of Regulation (EU) 2016/2031, and concerning the introduction into the Union territory of certain plants, plant products or other objects to address particular phytosanitary risks which are not yet fully assessed.

**▼**<u>B</u>

2. The list of plants, plant products and other objects, originating in the Union territory, and the corresponding special requirements for their movement within the Union territory, as referred to in Article 41(2) of Regulation (EU) 2016/2031, is set out in Annex VIII to this Regulation.

#### **▼** M3

The first subparagraph shall apply without prejudice to any other acts setting out special requirements, having a temporary character, adopted pursuant to Articles 28(1), 30(1), 41(2), 42(4) or 49(1) of Regulation (EU) 2016/2031, and concerning the movement within the Union territory of certain plants, plant products or other objects to address particular phytosanitary risks which are not yet fully assessed.

**▼**B

#### Article 9

# List of plants, plant products and other objects, whose introduction into certain protected zones is prohibited

The list of plants, plant products and other objects, originating from third countries or within the Union territory, whose introduction into certain protected zones is prohibited, as referred to in Article 53(2) of Regulation (EU) 2016/2031, is set out in Annex IX to this Regulation.

#### Article 10

# List of plants, plant products and other objects to be introduced into, or moved within protected zones and corresponding special requirements for protected zones

The list of plants, plant products and other objects, the respective protected zones and the corresponding special requirements for protected zones, as referred to in Article 54(2) of Regulation (EU) 2016/2031, are set out in Annex X to this Regulation.

# List of plants, plant products and other objects, as well as the respective third countries of origin or dispatch, for which phytosanitary certificates are required

- 1. The list of plants, plant products and other objects, as well as the respective third countries of origin or dispatch, whose introduction into the Union territory requires a phytosanitary certificate, as referred to in Article 72(1) of Regulation (EU) 2016/2031, is set out in Part A of Annex XI to this Regulation.
- 2. The list of plants, subject to the exception from a phytosanitary certificate as provided for in the second subparagraph of Article 73 of Regulation (EU) 2016/2031, is set out in Part C of Annex XI to this Regulation.
- 3. All plants, other than the plants referred to in paragraphs 1 and 2, shall only be introduced into the Union, if they are accompanied by a phytosanitary certificate in accordance with the first subparagraph of Article 73 of Regulation (EU) 2016/2031. The available CN codes of those plants are listed in Part B of Annex XI to this Regulation.

#### Article 12

List of plants, plant products and other objects for which a phytosanitary certificate is required for their introduction into a protected zone from certain third countries of origin or dispatch

The list of plants, plant products and other objects, whose introduction into certain protected zones from certain third countries of origin or dispatch requires a phytosanitary certificate, as referred to in Article 74(1) of Regulation (EU) 2016/2031, is set out in Annex XII to this Regulation.

#### Article 13

#### List of plants, plant products and other objects for which a plant passport is required for their movement within the Union territory

- 1. The list of plants, plant products and other objects for which a plant passport is required for their movement within the Union territory, as referred to in Article 79(1) of Regulation (EU) 2016/2031, is set out in Annex XIII to this Regulation.
- 2. By way of derogation from paragraph 1, a plant passport shall not be required for the movement within the Union of seeds, which fulfil both of the following conditions:
- (a) they are subject to the exceptions referred to in Article 6(3); and

#### **▼** M6

(b) they are not subject to the special requirements of Annex VIII or Annex X to this Regulation or to those provided for by the implementing acts adopted pursuant to Articles 28(1), 30(1) or 49(1) of Regulation (EU) 2016/2031.

List of plants, plant products and other objects for which a plant passport with the designation 'PZ' is required for introduction into, and movement within certain protected zones

The list of plants, plant products and other objects for which a plant passport is required for their introduction into, or movement within certain protected zones, as referred to in Article 80(1) of Regulation (EU) 2016/2031, is set out in Annex XIV to this Regulation.

Plant passports referred to in the first paragraph shall bear the designation 'PZ'.

#### Article 15

#### Repeal of Regulation (EC) No 690/2008

Regulation (EC) No 690/2008 is repealed.

#### Article 16

#### Amendment of Implementing Regulation (EU) 2018/2019

Implementing Regulation (EU) 2018/2019 is amended as follows:

- (1) Article 2 is deleted;
- (2) Annex II is deleted.

#### Article 17

#### Transitional measures

Seeds and other plants for planting introduced into the Union territory, moved within the Union territory or produced, before 14 December 2019, pursuant to the applicable requirements of Directives 66/401/EEC, 66/402/EEC, 68/193/EEC, 98/56/EC, 2002/55/EC, 2002/56/EC, 2002/57/EC, 2008/72/EC, 2008/90/EC concerning the presence of RNQPs before that date, may, until 14 December 2020, be introduced into, or moved within, the Union territory if they comply with those requirements. As of 14 December 2020. Articles 5 and 6 shall apply to all plants for planting covered by this Regulation.

Plant passports, required by this Regulation for the movement of seeds and other plants for planting within the Union territory benefitting from the transitional period laid down in paragraph 1 of this Article, shall until 14 December 2020 only be required to attest their compliance with the rules concerning Union quarantine pests, protected zone quarantine pests or measures adopted pursuant to Article 30 of Regulation (EU) 2016/2031.

#### Article 18

#### Entry into force and application

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 14 December 2019.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

- Pre-basic seed,

#### ANNEX I

#### Definitions as referred to in Article 2(1)

For the purposes of this Regulation, the terms listed in Part A, when used in the Annexes to this Regulation, have the same meaning as defined in the respective Directives listed in the second column of Part B.

#### PART A

#### List of terms

— Basic seed,
— Certified seed,
— Standard seed,
— Vine,
— Initial propagating material,
— Basic propagating material,
— Pre-basic material,
— Basic material,
— Certified material,
— Standard material,
- Propagating material of ornamental plants,
— Forest reproductive material,
<ul> <li>Vegetable propagating and planting material,</li> </ul>
- Fruit plant propagating material and fruit plants intended for fruit production,
— Candidate pre-basic mother plant,
— Pre-basic mother plant,
— Basic mother plant,
— Certified mother plant,
— Conformitas Agraria Communitatis (CAC) material,
— Fodder plant seed,
— Cereal seed,
— Vegetable seed,
— Seed potatoes,
— Oil and fibre plants seed.

PART B
List of Directives and Annexes

1. ANNEXES TO THIS REGULATION	2. DIRECTIVES
ANNEX IV, Part A  (RNQPs concerning fodder plant seed)  ANNEX V, Part A  (Measures concerning fodder plant seed)	Directive 66/401/EEC
ANNEX IV, Part B  (RNQPs concerning cereal seed)  ANNEX V, Part B  (Measures concerning cereal seed)	Directive 66/402/EEC
ANNEX IV, Part C (RNQPs concerning vine propagating material)	Directive 68/193/EEC
ANNEX IV, Part D  (RNQPs concerning propagating material of ornamental plants)  ANNEX V, Part C  (Measures concerning ornamental plants)	Directive 98/56/EC
ANNEX IV, Part E  (RNQPs concerning forest reproductive material, other than seeds)  ANNEX V, Part D  (Measures concerning forest reproductive material, other than seeds)	Directive 1999/105/EC
ANNEX IV, Part F  (RNQPs concerning vegetable seed)  ANNEX V, Part E  (Measures concerning vegetable seed)	Directive 2002/55/EC
ANNEX IV, Part G  (RNQPs concerning seed potatoes)  ANNEX V, Part F  (Measures concerning seed potatoes)	Directive 2002/56/EC
ANNEX IV, Part H  (RNQPs concerning seed of oil and fibre plants)  ANNEX V, Part G  (Measures concerning seed of oil and fibre plants)	Directive 2002/57/EC
ANNEX IV, Part I  RNQPs concerning vegetable propagating and planting material  ANNEX V, Part H  (Measures concerning vegetable propagating and planting material)	Directive 2008/72/EC

1. ANNEXES TO THIS REGULATION	2. DIRECTIVES
ANNEX IV, Part J  (RNQPs concerning fruit propagating material and fruit plants intended for fruit production)	Directive 2008/90/EC
ANNEX XIII, point 4  Cereal seed	Directive 66/402/EEC
Annex XIII, point 5  Vegetable seed	Directive 2002/55/EC
ANNEX XIII, point 6 Oil and fibre plants seed	Directive 2002/57/EC

#### ANNEX II

#### List of Union quarantine pests and their respective codes

#### TABLE OF CONTENTS

#### Part A: Pests not known to occur in the Union territory

- A. Bacteria
- B. Fungi and oomycetes
- C. Insects and mites
- D. Nematodes
- E. Parasitic plants
- F. Viruses, viroids and phytoplasmas

#### Part B: Pests known to occur in the Union territory

- A. Bacteria
- B. Fungi and oomycetes
- C. Insects and mites
- D. Molluscs
- E. Nematodes
- F. Viruses, viroids and phytoplasmas

#### PART A

#### PESTS NOT KNOWN TO OCCUR IN THE UNION TERRITORY

	Quarantine Pests and their codes assigned by EPPO
	A. Bacteria
1.	Candidatus Liberibacter africanus [LIBEAF]
2.	Candidatus Liberibacter americanus [LIBEAM]
3.	Candidatus Liberibacter asiaticus [LIBEAS]
4.	Curtobacterium flaccumfaciens pv. flaccumfaciens (Hedges) Collins and Jones [CORBFL]
5.	Pantoea stewartii subsp. stewartii (Smith) Mergaert, Verdonck & Kersters [ERWIST]
6.	Ralstonia pseudosolanacearum Safni et al. [RALSPS]
7.	Ralstonia syzygii subsp. celebesensis Safni et al. [RALSSC]
8.	Ralstonia syzygii subsp. indonesiensis Safni et al.[RALSSI]
9.	Xanthomonas oryzae pv. oryzae (Ishiyama) Swings et al. [XANTOR]

10.	Xanthomonas oryzae pv. oryzicola (Fang et al.) Swings et al. [XANTTO]
11.	Xanthomonas citri pv. aurantifolii (Schaad et al.) Constantin et al. [XANTAU]
12.	Xanthomonas citri pv. citri (Hasse) Constantin et al. [XANTCI]
	B. Fungi and oomycetes
1.	Anisogramma anomala (Peck) E. Müller [CRSPAN]
2.	Apiosporina morbosa (Schwein.) Arx [DIBOMO]
3.	Atropellis spp. [1ATRPG]
4.	Botryosphaeria kuwatsukai (Hara) G.Y. Sun and E. Tanaka [PHYOPI]
5.	Bretziella fagacearum (Bretz) Z.W de Beer, T.A. Duong & M.J. Wingfield, comb. nov. [CERAFA]
6.	Chrysomyxa arctostaphyli Dietel [CHMYAR]
7.	Cronartium spp. [1CRONG], except Cronartium gentianeum, Cronartium pini (Willdenow) Jørstad [ENDCPI] and Cronartium ribicola Fischer [CRONRI].
8.	Davidsoniella virescens (R.W. Davidson) Z.W. de Beer, T.A. Duong & M.J. Wingfield [CERAVI]
9.	Elsinoë australis Bitanc. & Jenkins [ELSIAU]
10.	Elsinoë citricola X.L. Fan, R.W. Barreto & Crous [ELSICI ]
11.	Elsinoë fawcettii Bitanc. & Jenkins [ELSIFA]
12.	Fusarium oxysporum f. sp. albedinis (Kill. & Maire) W.L. Gordon [FUSAAL]
13.	Guignardia laricina (Sawada) W. Yamam& Kaz. Itô [GUIGLA]
14.	Gymnosporangium spp. [1GYMNG], except: Gymnosporangium amelanchieris E. Fisch. ex F. Kern, Gymnosporangium atlanticum Guyot & Malenc Bon, Gymnosporangium clavariiforme (Wulfen) DC [GYMNCF], Gymnosporangium confusum Plowr. [GYMNCO], Gymnosporangium cornutum Arthur ex F. Kern [GYMNCR], Gymnosporangium fusisporum E. Fisch., Gymnosporangium gaeumannii H. Zogg, Gymnosporangium gracile Pat., Gymnosporangium minus Crowell, Gymnosporangium orientale P. Syd. & Syd., Gymnosporangium sabinae (Dicks.) G. Winter [GYMNFU], Gymnosporangium torminali-juniperini E. Fisch., Gymnosporangium tremelloides R. Hartig [GYMNTR]
15.	Coniferiporia sulphurascens (Pilát) L.W. Zhou & Y.C. Dai [PHELSU]
16.	Coniferiporia weirii (Murrill) L.W. Zhou & Y.C. Dai [INONWE]
17.	Melampsora farlowii (Arthur) Davis [MELMFA]
18.	Melampsora medusae f. sp. tremuloidis Shain [MELMMT]
19.	Mycodiella laricis-leptolepidis (Kaz. Itô, K. Satô & M. Ota) Crous [MYCOLL]
20.	Phoma andina Turkensteen [PHOMAN]
21.	Phyllosticta citricarpa (McAlpine) Van der Aa [GUIGCI]
22.	Phyllosticta solitaria Ellis & Everhart [PHYSSL]

23.	Phymatotrichopsis omnivora (Duggar) Hennebert [PHMPOM]
24.	Phytophthora ramorum (non-EU isolates) Werres, De Cock & Man in 't Veld [PHYTRA]
25.	Pseudocercospora angolensis (T. Carvalho & O. Mendes) Crous & U. Braun [CERCAN]
26.	Pseudocercospora pini-densiflorae (Hori & Nambu) Deighton [CERSPD]
27.	Puccinia pittieriana Hennings [PUCCPT]
28.	Septoria malagutii E.T. Cline [SEPTLM]
29.	Sphaerulina musiva (Peck) Quaedvl, Verkley & Crous. [MYCOPP]
30.	Stegophora ulmea (Fr.) Syd. & P. Syd [GNOMUL]
31.	Thecaphora solani Thirumulachar & O'Brien) Mordue [THPHSO]
32.	Tilletia indica Mitra [NEOVIN]
33.	Venturia nashicola S. Tanaka & S. Yamamoto [VENTNA]
	C. Insects and mites
1.	Acleris spp. (non-European) [1ACLRG]
2.	Acrobasis pyrivorella (Matsumura) [NUMOPI]
3.	Agrilus anxius Gory [AGRLAX]
4.	Agrilus planipennis Fairmaire [AGRLPL]
5.	Aleurocanthus citriperdus Quaintance & Baker [ALECCT]
6.	Aleurocanthus woglumi Ashby [ALECWO]
7.	Amauromyza maculosa (Malloch) [AMAZMA]
8.	Anomala orientalis Waterhouse [ANMLOR]
9.	Anoplophora glabripennis (Motschulsky) [ANOLGL]
10.	Anthonomus bisignifer Schenkling [ANTHBI]
11.	Anthonomus eugenii Cano [ANTHEU]
12.	Anthonomus grandis (Boh.) [ANTHGR]
13.	Anthonomus quadrigibbus Say [TACYQU]
14.	Anthonomus signatus Say [ANTHSI]
15.	Arrhenodes minutus Drury [ARRHMI]
16.	Aschistonyx eppoi Inouye [ASCXEP]

17.	Bactericera cockerelli (Sulc.) [PARZCO]
18.	Bemisia tabaci Genn. (non-European populations) known to be vector of viruses [BEMITA]
19.	Carposina sasakii Matsumara [CARSSA]
20.	Choristoneura spp. (non-European) [1CHONG]
21.	Cicadellidae (non-European) [1CICDF] known to be vector of Xylella fastidiosa, such as:  (a) Carneocephala fulgida Nottingham [CARNFU]  (b) Draeculacephala minerva Ball [DRAEMI];  (c) Graphocephala atropunctata (Signoret) [GRCPAT].  (d) Homalodisca vitripennis (Germar) [HOMLTR]
22.	Conotrachelus nenuphar (Herbst) [CONHNE]
23.	Dendrolimus sibiricus Chetverikov [DENDSI]
24.	Diabrotica barberi Smith and Lawrence [DIABLO]
25.	Diabrotica undecimpunctata howardi Barber [DIABUH]
26.	Diabrotica undecimpunctata undecimpunctata Mannerheim [DIABUN]
27.	Diabrotica virgifera zeae Krysan & Smith [DIABVZ]
28.	Diaphorina citri Kuwayana [DIAACI]
29.	Eotetranychus lewisi (McGregor) [EOTELE]
30.	Grapholita inopinata (Heinrich) [CYDIIN]
31.	Grapholita packardi Zeller [LASPPA]
32.	Grapholita prunivora (Walsh) [LASPPR]
33.	Heliothis zea (Boddie) [HELIZE]
34.	Hishimonus phycitis (Distant) [HISHPH]
35.	Keiferia lycopersicella (Walsingham) [GNORLY]
36.	Lopholeucaspis japonica Cockerell [LOPLJA]
37.	Liriomyza sativae Blanchard [LIRISA]
38.	Listronotus bonariensis (Kuschel) [HYROBO]
39.	Margarodes, non-European species [1MARGG], such as: (a) Margarodes prieskaensis (Jakubski) [MARGPR]; (b) Margarodes vitis (Philippi) [MARGVI]; (c) Margarodes vredendalensis de Klerk [MARGVR].
40.	Monochamus spp. (non-European populations) [1MONCG]
41.	Myndus crudus van Duzee [MYNDCR]

42.	Naupactus leucoloma Boheman [GRAGLE]
43.	Neoleucinodes elegantalis (Guenée) [NEOLEL]
44.	Oemona hirta (Fabricius) [OEMOHI]
45.	Oligonychus perditus Pritchard and Baker [OLIGPD]
46.	Pissodes cibriani O'Brien
47.	Pissodes fasciatus Leconte [PISOFA]
48.	Pissodes nemorensis Germar [PISONE]
49.	Pissodes nitidus Roelofs [PISONI]
50.	Pissodes punctatus Langor & Zhang [PISOPU]
51.	Pissodes strobi (Peck) [PISOST]
52.	Pissodes terminalis Hopping [PISOTE]
53.	Pissodes yunnanensis Langor & Zhang [PISOYU]
54.	Pissodes zitacuarense Sleeper
55.	Polygraphus proximus Blandford [POLGPR]
56.	Premnotrypes spp. (non-European) [1PREMG]
57.	Pseudopityophthorus minutissimus (Zimmermann) [PSDPMI]
58.	Pseudopityophthorus pruinosus (Eichhoff) [PSDPPR]
59.	Rhizoecus hibisci Kawai and Takagi [RHIOHI]
60.	Rhynchophorus palmarum (L.) [RHYCPA]
61.	Saperda candida Fabricius [SAPECN]
62.	Scirtothrips aurantii Faure [SCITAU]
63.	Scirtothrips citri (Moulton) [SCITCI]
64.	Scirtothrips dorsalis Hood [SCITDO]
65.	Scolytidae spp. (non-European) [1SCOLF]
66.	Spodoptera eridania (Cramer) [PRODER]
67.	Spodoptera frugiperda (Smith) [LAPHFR]
68.	Spodoptera litura (Fabricus) [PRODLI]
69.	Tecia solanivora (Povolný) [TECASO]

### F. Viruses, viroids and phytoplasmas 1. Beet curly top virus [BCTV00] 2. Black raspberry latent virus [TSVBL0] 3. Coconut cadang-cadang viroid [CCCVD0] 4. Chrysanthemum stem necrosis virus [CSNV00] Citrus tristeza virus (non-EU isolates) [CTV000] 5. 6. Citrus leprosis viruses [CILV00]: (a) CiLV-C [CILVC0]; (b) CiLV-C2 [CILVC2]; (c) HGSV-2 [HGSV20] (d) Citrus strain of OFV [OFV00] (citrus strain); (e) CiLV-N sensu novo. 7. Palm lethal yellowing phytoplasmas [PHYP56] 8. Potato viruses, viroids and phytoplasmas, such as: (a) Andean potato latent virus [APLV00]; (b) Andean potato mottle virus [APMOV0]; (c) Arracacha virus B, oca strain [AVBO00]; (d) Potato black ringspot virus [PBRSV0]; (e) Potato virus T [PVT000]; (f) Non-European isolates of potato viruses A, M, S, V, X and Y (including Yo, Yn and Yc) and Potato leafroll virus [PVA000, PVM000, PVS000, PVV000, PVX000, PVY000 (including Yo, PVYN00, PVYC00)] and [PLRV00]. Satsuma dwarf virus [SDV000] 10. Tobacco ringspot virus [TRSV00] 11. Tomato ringspot virus [TORSV0] 12. Viruses, viroids and phytoplasmas of Cydonia Mill., Fragaria L., Malus Mill., Prunus L., Pyrus L., Ribes L., Rubus L. and Vitis L., such as: (a) Blueberry leaf mottle virus [BLMOV0]; (b) Cherry rasp leaf virus [CRLV00]; (c) Peach mosaic virus [PCMV00]; (d) Peach rosette mosaic virus [PRMV00]; (e) American plum line pattern virus [APLPV0]; (f) Raspberry leaf curl virus [RLCV00]; (g) Strawberry witches' broom phytoplasma [SYWB00]; (h) Non-European viruses, viroids and phytoplasmas of Cydonia Mill., Fragaria L., Malus Mill., Prunus L., Pyrus L., Ribes L., Rubus L. and Vitis L. 13. Begomoviruses except: Abutilon mosaic virus [ABMV00], Sweet potato leaf curl virus [SPLCV0], Tomato leaf curl New Delhi Virus [TOLCND], Tomato yellow leaf curl virus [TYLCV0], Tomato yellow leaf curl Sardinia virus [TYLCSV],

Tomato yellow leaf curl Malaga virus [TYLCMA], Tomato yellow leaf curl Axarquia virus [TYLCAX]

14.	Cowpea mild mottle virus [CPMMV0]
15.	Lettuce infectious yellows virus [LIYV00]
16.	Melon yellowing-associated virus [MYAV00]
17.	Squash vein yellowing virus [SQVYVX]
18.	Sweet potato chlorotic stunt virus [SPCSV0]
19.	Sweet potato mild mottle virus [SPMMV0]
20.	Tomato chocolate virus [TOCHV0]
21.	Tomato marchitez virus [TOANV0]
22.	Tomato mild mottle virus [TOMMOV]
23.	Witches' broom disease of lime phytoplasma [PHYPAF]

#### ANNEX III

# List of protected zones and the respective protected zone quarantine pests and their respective codes

The protected zones listed in the third column of the following table respectively cover one of the following:

- (a) the whole territory of the Member State (1) listed;
- (b) the territory of the Member State listed with the exceptions specified within brackets;
- (c) only the part of the territory of the Member State which is specified within brackets.

	Protected zone quarantine pests	EPPO code	Protected zones
(a) <b>B</b> :	acteria		
1.	Erwinia amylovora (Burrill) Winslow et al.	ERWIAM	<ul> <li>(a) Estonia;</li> <li>(b) Spain (except the autonomous communities of Andalucía, Aragón, Castilla la Mancha, Castilla y León, Extremadura, the autonomous community of Madrid, Murcia, Navarra and La Rioja, the province of Guipuzcoa in the Basque Country, the comarcas of Garrigues, Noguera, Pla d'Urgell, Segrià and Urgell in the province of Lleida in Comunidad autonoma de Catalunya; and the municipalities of Alborache and Turís in the province of Valencia and the Comarcas de L'Alt Vinalopó and El Vinalopó Mitjà in the province of Alicante in Comunidad Valenciana);</li> <li>(c) France (Corsica);</li> <li>▶ M6 (d) Italy (Abruzzo, Apúlia, Basilicata, Calabria, Campania (except the municipalities of Agerola, Gragnano, Lettere, Pimonte and Vico Equense in the province of Naples, Amalfi, Atrani, Conca dei Marini, Corbara, Furore, Maiori, Minori, Positano, Praiano, Ravello, Scala and Tramonti in the province of Salerno), Lazio, Liguria, Lombardy (except the provinces of Milan, Mantua, Sondrio and Varese, and the communes of Bovisio Masciago, Cesano Maderno, Desio, Limbiate, Nova Milanese and Varedo in Monza Brianza Province), Marche (except the communes of Colli al Metauro, Fano, Pesaro and San Costanzo in the province of Pesaro e Urbino), Molise, Sardinia, Sicily (except the municipalities of Cesarò in the province of Messina, Maniace, Bronte, Adrano in the province of Catania and Centuripe, Regalbuto and Troina in the province of Enna), Tuscany, Umbria, Valle d'Aosta, Veneto (except the provinces of Rovigo and</li> </ul>

<sup>(</sup>¹) In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland/Northern Ireland in conjunction with Annex 2 to that Protocol, for the purposes of this Annex, references to Member States include the United Kingdom in respect of Northern Ireland.

#### ANNEX IV

# List of Union regulated non-quarantine pests ('RNQPs') and specific plants for planting, with categories and thresholds as referred to in Article 5

#### TABLE OF CONTENTS

- Part A: RNQPs concerning fodder plant seed
- Part B: RNQPs concerning cereal seed
- Part C: RNQPs concerning vine propagating material
- Part D: RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes
- Part E: RNQPs concerning forest reproductive material, other than seeds
- Part F: RNQPs concerning vegetable seed
- Part G: RNQPs concerning seed potatoes
- Part H: RNQPs concerning seed of oil and fibre plants
- Part I: RNQPs concerning vegetable propagating and planting material, other than seeds
- Part J: RNQPs concerning fruit propagating material and fruit plants intended for fruit production
- Part K: RNQPs concerning seeds of Solanum tuberosum
- Part L: RNQPs concerning plants for planting of *Humulus lupulus*, other than seeds

# PART A RNQPs concerning fodder plant seed

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for pre-basic seed	Thresholds for basic seed	Thresholds certified seed
Clavibacter michiganensis ssp. insi- diosus (McCulloch 1925) Davis et al. [CORBIN]	Medicago sativa L.	0 %	0 %	0 %
Ditylenchus dipsaci (Kuehn) Filipjev [DITYDI]	Medicago sativa L.	0 %	0 %	0 %

# PART B RNQPs concerning cereal seed

Nematodes					
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for pre-basic seed	Thresholds for basic seed	Thresholds for certified seed	
Aphelenchoides besseyi Christie [APLOBE]	Oryza sativa L.	0 %	0 %	0 %	
Fungi					
Gibberella fujikuroi Sawada [GIBBFU]	Oryza sativa L.	Practically free	Practically free	Practically free	

 $\label{eq:part_concerning} PART\ C$  RNQPs concerning vine propagating material

	KNQrs concerning vine propaga	ting material	
	Bacteria		
RNQPs or symptoms caused by RNQPs	Plants for planting other than seeds (genus or species)	Threshold for initial propagating material, basic propagating material, certified material	Threshold for standard material
Xylophilus ampelinus Willems et al. [XANTAM]	Vitis L.	0 %	0 %
	Insects and mites		
RNQPs or symptoms caused by RNQPs	Plants for planting other than seeds (genus or species)	Threshold for initial propagating material, basic propagating material, certified material	Threshold for standard material
Viteus vitifoliae Fitch [VITEVI]	Non-grafted <i>Vitis vinifera</i> L.	0 %	0 %
Viteus vitifoliae Fitch [VITEVI]	Vitis L. other than non-grafted Vitis vinifera L.	Practically free	Practically free
Viru	ses, viroids, virus-like diseases an	nd phytoplasmas	
RNQPs or symptoms caused by RNQPs	Plants for planting other than seeds (genus or species)	Threshold for initial propagating material, basic propagating material, certified material	Threshold for standard material
Arabis mosaic virus [ARMV00]	Vitis L.	0 %	0 %
Candidatus Phytoplasma solani Quaglino et al. [PHYPSO]	Vitis L.	0 %	0 %
Grapevine fanleaf virus [GFLV00]	Vitis L.	0 %	0 %
Grapevine fleck virus [GFKV00]	Rootstocks of Vitis spp. and their hybrids, except Vitis vinifera L.	0 % for initial propagating material N/A for basic propagating material and certified material	Not applicable
Grapevine leafroll associated virus 1 [GLRAV1]	Vitis L.	0 %	0 %
Grapevine leafroll associated virus 3 [GLRAV3]	Vitis L.	0 %	0 %

PART D

RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes

	Bacteria	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the propagating material of ornamental plants concerned and other plants for planting intended for ornamental purposes
Erwinia amylovora (Burrill) Winslow et al. #### ANNEX V

### Measures to prevent the presence of RNQPs on specific plants for planting

### TABLE OF CONTENTS

- Part A: Measures to prevent the presence of RNQPs on fodder plant seed
  - 1. Inspection of the crop
  - 2. Sampling and testing of fodder plant seed
  - 3. Additional measures for certain plant species
- Part B: Measures concerning cereal seed
  - 1. Inspection of the crop
  - 2. Sampling and testing of cereal seed
  - 3. Additional measures for seeds of Oryza sativa L.
- Part C: Measures to prevent the presence of RNQPs on propagating material of ornamental plants and plants for planting intended for ornamental purposes
- Part D: Measures to prevent the presence of RNQPs on forest reproductive material, other than seeds
  - 1. Visual inspections
  - 2. Measures per genera or species and category
- Part E: Measures to prevent the presence of the RNQPs on vegetable seed
- Part F: Measures to prevent the presence of the RNQPs on seed potatoes
- Part G: Measures to prevent the presence of RNQPs on seed of oil and fibre plants
  - 1. Inspection of the crop
  - 2. Sampling and testing of seed of oil and fibre plants
  - 3. Additional measures for seed of oil and fibre plants
- Part H: Measures to prevent the presence of RNQPs on vegetable propagating and planting material other than seeds
- Part I: Measures to prevent the presence of the RNQPs on seed of Solanum tuberosum
- Part J: Measures to prevent the presence of the RNQPs on plants for planting of Humulus lupulus, other than seeds

# PART A

# Measures to prevent the presence of RNQPs on fodder plant seed

# 1. Inspection of the crop

(1) The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out field inspections on the crop from which the fodder plant seed is produced concerning the presence of RNQPs in the crop to ensure that the presence of the RNQPs does not exceed the thresholds set out in this table:

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for production of pre-basic seed	Thresholds for the production of basic seed	Thresholds for the production of certified seed
Clavibacter michiganensis ssp. insidiosus (McCulloch 1925) Davis et al. [CORBIN]	Medicago sativa L.	0 %	0 %	0 %
Ditylenchus dipsaci (Kuehn) Filipjev [DITYDI]	Medicago sativa L.	0 %	0 %	0 %

The competent authority may authorise inspectors, other than the professional operators, to carry out the field inspections on its behalf and under its official supervision.

- (2) Those field inspections shall be carried out when the condition and the stage of development of the crop allow for an adequate inspection. There shall be at least one field inspection per year, at the most appropriate time for the detection of the respective RNQPs.
- (3) The competent authority shall determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.

The proportion of the crops for the production of seed to be officially inspected by the competent authority shall be at least 5 %.

#### 2. Sampling and testing of fodder plant seed

- (1) The competent authority shall:
  - (a) officially draw seed samples from lots of fodder plant seed;
  - (b) authorise seed samplers to carry out sampling on its behalf and under its official supervision;
  - (c) compare the seed samples drawn by itself with those of the same seed lot drawn by the seed samplers under official supervision as referred to in point (b);
  - (d) supervise the performance of the seed samplers provided for in point (2).
- (2) The competent authority or the professional operator under official supervision shall sample and test the fodder plant seed in accordance with up to date international methods.

Except for automatic sampling, the competent authority shall check-sample a proportion of at least 5 % of the seed lots entered for official certification. That proportion shall be as evenly spread as possible over natural and legal persons entering seed for certification, and the species entered, but may also be aimed at eliminating specific doubts.

(3) For automatic sampling, appropriate procedures shall be applied and it shall be officially supervised.

For the examination of seed for certification, samples shall be drawn from homogeneous lots. As regards the lot and sample weights, the table of Annex III to Directive 66/401/EEC shall apply.

### 3. Additional measures for certain plant species

The competent authorities, or the professional operators under the official supervision of the competent authorities, shall carry out the following additional inspections or take any other actions for certain plant species to ensure that the requirements, concerning the respective RNQPs and plants for planting, are fulfilled.

- (1) the pre-basic, basic and certified seeds of *Medicago sativa* L. to prevent the presence of *Clavibacter michiganensis* ssp. *insidiosus*, and in order to ascertain that:
  - (a) the seeds originate in areas known to be free from *Clavibacter michiganensis* spp. *insidiosus*; or

- (b) the crop has been grown on land on which no previous Medicago sativa L. crop has been present during the last three years prior to sowing, and no symptoms of Clavibacter michiganensis ssp. insidiosus are observed during field inspection at the site of production or no symptoms of Clavibacter michiganensis ssp. insidiosus have been observed on any Medicago sativa L. crop adjacent to it, during the previous cropping; or
- (c) the crop belongs to a variety recognised as being highly resistant to *Clavibacter michiganensis* ssp. *insidiosus* and the content of inert matter shall not exceed 0,1 % by weight;
- (2) the pre-basic, basic and certified seed of *Medicago sativa* L. to prevent the presence of *Ditylenchus dipsaci*, and in order to ascertain that:
  - (a) no symptoms of *Ditylenchus dipsaci* have been observed at the site of production during the previous cropping and no main host crops have been grown during the two preceding years on the site of production and appropriate hygiene measures have been taken to prevent infestation of the place of production; or
  - (b) no symptoms of *Ditylenchus dipsaci* have been observed at the site of production during the previous cropping and no *Ditylenchus dipsaci* has been found by laboratory tests on a representative sample; or
  - (c) the seeds have been subjected to an appropriate physical or chemical treatment against *Ditylenchus dipsaci* and have been found to be free of this pest after laboratory tests on a representative sample.

#### PART B

### Measures concerning cereal seed

### 1. Inspection of the crop

(1) The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out field inspections on the crop from which the cereal seed is produced, to confirm that the presence of the RNQPs does not exceed the thresholds set out in this table:

	Fungi and oomycetes				
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for the production of pre-basic seed	Thresholds for the production of basic seed	Thresholds for the production of certified seed	
Gibberella fujikuroi Sawada [GIBBFU]	Oryza sativa L.	Not more than 2 symptomatic plants per 200 m <sup>2</sup> seen during field inspections at appropriate times of a representative sample of the plants in each crop.	Not more than 2 symptomatic plants per 200 m <sup>2</sup> seen during field inspections at appropriate times of a representative sample of the plants in each crop.	Certified seed of the first generation (C1):  Not more than 4 symptomatic plants per 200 m² seen during field inspections at appropriate times of a representative sample of the plants in each crop.  Certified seed of the second generation (C2):  Not more than 8 symptomatic plants per 200 m² seen during field inspections at appropriate times of a representative sample of the plants in each crop.	

Nematodes				
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for the production of pre-basic seed	Thresholds for the production of basic seed	Thresholds for the production of certified seed
Aphelenchoides besseyi Christie [APLOBE]	Oryza sativa L.	0 %	0 %	0 %

The competent authority may authorise inspectors, other than professional operators, to carry out the field inspections on its behalf and under its official supervision.

(2) Those field inspections shall be carried out when the condition and the stage of development of the crop allow for an adequate inspection.

There shall be at least one field inspection per year, at the most appropriate time for the detection of the respective RNQPs.

(3) The competent authority shall determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.

The proportion of the crops for the production of seed to be officially inspected by the competent authority shall be at least 5 %

### 2. Sampling and testing of cereal seed

- (1) The competent authority shall:
  - (a) officially draw seed samples from lots of cereal seed;
  - (b) authorise seed samplers to carry out sampling on its behalf and under official supervision;
  - (c) compare the seed samples drawn by itself with those of the same seed lot drawn by the seed samples under official supervision as referred to in point (b):
  - (d) supervise the performance of the seed samplers as provided for in point (2).
- (2) The competent authority or the professional operator under the official supervision shall sample and test the cereal seed in accordance with up to date international methods.

Except for automatic sampling, the competent authority shall check-sample a proportion of at least 5 % of the seed lots entered for official certification. That proportion shall be as evenly spread as possible over natural and legal persons entering seed for certification, and the species entered, but may also be aimed at eliminating specific doubts.

(3) For automatic sampling, appropriate procedures shall be applied and it shall be officially supervised.

For the examination of seed for certification, samples shall be drawn from homogeneous lots. As regards the lot and sample weights, the provisions of the table of Annex III to Directive 66/402/EEC shall apply.

# 3. Additional measures for seeds of Oryza sativa L.

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out the following additional inspections or take any other actions to ensure that the requirements concering the respective RNQPs for the seed of *Oryza sativa* L. are fullfilled:

Seeds of Oryza sativa L. shall fulfil one of the following requirements:

- (a) originates in area known to be free from Aphelenchoides besseyi;
- (b) has been officially tested by the competent authorities by appropriate nematological tests on a representative sample from each lot, and have been found free from *Aphelenchoides besseyi*;
- (c) has been subjected to an appropriate hot water treatment or other appropriate treatment against Aphelenchoides besseyi.

# PART C

# Measures to prevent the presence of RNQPs on propagating material of ornamental plants and other plants for planting intended for ornamental purposes

The following measures shall be taken concerning the respective RNQPs and:

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the following table, are fulfilled

Bacteria				
RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements		
Erwinia amylovora (Burrill) Winslow et al.	Plants for planting other than seeds  Amelanchier Medik., Chaenomeles Lindl., Cotoneaster Medik., Crataegus Tourn. ex L., Cydonia Mill., Eriobtrya Lindl., Malus Mill., Mespilus Bosc ex Spach, Photinia davidiana Decne., Pyracantha M. Roem., Pyrus L., Sorbus L.	<ul> <li>(a) the plants have been produced in areas known to be free from Erwinia amylovora (Burrill) Winslow et al.; or</li> <li>(b) the plants have been grown in a production site that has been visually inspected at an appropriate time to detect the pest during the last growing season for the detection of that pest and plants showing symptoms of that pest, and any surrounding host plants, have been immediately rogued out and destroyed.</li> </ul>		
Pseudomonas syringae pv. persicae (Prunier, Luisetti & Gardan) Young, Dye & Wilkie	Plants for planting other than seeds  Prunus persica (L.) Batsch,  Prunus salicina Lindl.	<ul> <li>(a) the plants have been produced in areas known to be free from Pseudomonas syringae pv. persicae (Prunier, Luisetti &amp;. Gardan) Young, Dye &amp; Wilkie; or</li> <li>(b) the plants have grown in a site of production found free from the Pseudomonas syringae pv. persicae (Prunier, Luisetti &amp;. Gardan) Young, Dye &amp; Wilkie over the last complete growing season by visual inspection, and any symptomatic plants in the immediate vicinity have been rogued out and destroyed immediately; or</li> <li>(c) no more than 2 % of plants in the lot have shown symptoms during visual inspections, at appropriate times to detect the pest during the last growing season, and those symptomatic plants and any symptomatic plants in the immediate vicinity have been rogued out and destroyed immediately.</li> </ul>		
Spiroplasma citri Saglio	Plants for planting other than seeds  Citrus L., Citrus L. hybrids, Fortunella Swingle., Fortunella Swingle. hybrids,  Poncirus Raf., Poncirus Raf. hybrids	The plants derive from mother plants which have been visually inspected, at the most appropriate time to detect the pest, and found free from <i>Spiroplasma citri</i> Saglio, and  (a) the plants have been produced in areas known to be free from <i>Spiroplasma citri</i> Saglio, or		

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		(b) the site of production has been found free from <i>Spiroplasma citri</i> Saglio over the last complete growing season by visual inspection of the plants, at the most appropriate time to detect the pest during the last growing season; or  (c) not more than 2 % of plants have shown symptoms during a visual inspection at the appropriate time to detect the pest during the last growing season, and all infected plants have been rogued out and destroyed immediately.
Xanthomonas arboricola pv. pruni (Smith) Vauterin et al.	Plants for planting other than seeds  Prunus L.	<ul> <li>(a) the plants have been produced in an area known to be free from Xanthomonas arboricola pv. pruni Vauterin et al.; or</li> <li>(b) the plants have grown in a site of production found free from Xanthomonas arboricola pv. pruni Vauterin et al. over the last complete growing season by visual inspection, and any symptomatic plants in the immediate vicinity, and the neighbouring plants, have been rogued out and destroyed immediately, unless they have been tested on the basis of a representative sample of symptomatic plants and it is shown in those tests that the symptoms are not caused by Xanthomonas arboricola pv. pruni Vauterin et al.; or</li> <li>(c) no more than 2 % of plants in the lot have shown symptoms during visual inspections at appropriate times during the last growing season, and those symptomatic plants and any symptomatic plants in the site of production and the immediate vicinity, and the neighbouring plants have been rogued out and destroyed immediately unless they are tested, on the basis of a representative sample of symptomatic plants and it is shown in those tests that the symptoms are not caused by Xanthomonas arboricola pv. pruni Vauterin et al.; or</li> <li>(d) in the case of evergreen species, the plants have been visually inspected, before movement and found free from symptoms of Xanthomonas arboricola pv. pruni Vauterin et al.</li> </ul>
Xanthomonas euvesi- catoria Jones et al.	Capsicum annuum L.	(1) In the case of seeds:  (a) the seeds originate in areas known to be free from <i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i> ;  or

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		(b) no symptoms of disease caused by Xanthomonas euvesicatoria Jones et al. have been observed in visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production;
		(c) the seeds have been subjected to official testing for <i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i> on a representative sample and using appropriate methods, whether or not following an appropriate treatment, and have been found in these tests to be free from <i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i>
		(2) In the case of plants other than seeds:
		(a) the seedlings have been grown from seeds that meet the requirements laid down in point (1) of this entry;
		and
		(b) young plants have been maintained in appropriate hygiene conditions to prevent infection.
Xanthomonas gardneri	Capsicum annuum L.	(1) In the case of seeds:
(ex Šutič) Jones et al.	Capsican annum E.	(a) the seeds originate in areas known to be free from <i>Xanthomonas</i> gardneri (ex Šutič) Jones et al.;
		or
		(b) no symptoms of disease caused by <i>Xanthomonas gardneri</i> (ex Šutič)  Jones <i>et al.</i> have been observed in visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production;
		or
		(c) the seeds have been subjected to official testing for <i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i> on a representative sample and using appropriate methods (whether or not following an appropriate treatment), and have been found in these tests to be free from <i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i>
		(2) In the case of plants other than seeds:
		(a) the seedlings have been grown from seeds that meet the requirements laid down in point (1) of this entry;
		and
		l

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		(b) young plants have been main in appropriate hygiene conditi prevent infection.
Xanthomonas perforans Jones et al.	Capsicum annuum L.	(1) In the case of seeds:  (a) the seeds originate in areas I to be free from Xanthon perforans Jones et al.;  or  (b) no symptoms of disease caus Xanthomonas perforans Jones have been observed in inspections at appropriate times the complete cycle of vegetation plants at the site of production; or  (c) the seeds have been subject official testing for Xanthon perforans Jones et al. on a reprotive sample and using appropriate treatment), and have found in these tests to be free Xanthomonas perforans Jones et al.  (2) In the case of plants other than  (a) the seedlings have been grown seeds that meet the requirement down in point (1) of this entrand  (b) the young plants have been tained in appropriate hy conditions to prevent infection
Xanthomonas vesicatoria (ex Doidge) Vauterin et al.	Capsicum annuum L.	(1) In the case of seeds:  (a) the seeds originate in areas to be free from Xanthomonas catoria (ex Doidge) Vauterin or  (b) no symptoms of disease caus Xanthomonas vesicatoria Doidge) Vauterin et al. have observed in visual inspectio appropriate times during complete cycle of vegetation plants at the site of productio or  (c) the seeds have been subject official testing for Xanthowesicatoria (ex Doidge) Vauta al. on a representative sampusing appropriate methods (wor not following an approtreatment), and have been for these tests to be free from homonas vesicatoria (ex Dougles) Vauterin et al.

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		<ul> <li>(2) In the case of plants other than seeds:</li> <li>(a) the seedlings have been grown from seeds that meet the requirements laid down in point (1) of this entry; and</li> <li>(b) young plants have been maintained in appropriate hygiene conditions to prevent infection.</li> </ul>
	Fungi and oomycetes	
RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
Cryphonectria parasitica (Murrill) Barr	Castanea L.	<ul> <li>(a) the plants have been produced in areas known to be free from Cryphonectria parasitica (Murrill) Barr;</li> <li>or</li> <li>(b) no symptoms of Cryphonectria parasitica (Murrill) Barr have been observed at the site of production since the beginning of the last complete cycle of vegetation;</li> <li>or</li> <li>(c) plants showing symptoms of Cryphonectria parasitica (Murrill) Barr have been rogued out, and the remaining plants have been inspected at weekly intervals and no symptoms have been observed at the site of production for at least three weeks before movement.</li> </ul>
Dothistroma pini Hulbary, Dothistroma septosporum (Dorogin) Morelet Lecanosticta acicola (von Thümen) Sydow	Pinus L.	<ul> <li>(a) the plants originate in areas known to be free from <i>Dothistroma pini</i> Hulbary, <i>Dothistroma septosporum</i> (Dorogin) Morelet and <i>Lecanosticta acicola</i> (von Thümen) Sydow; or</li> <li>(b) no symptoms of needle blight, caused by <i>Dothistroma pini</i> Hulbary, <i>Dothistroma septosporum</i> (Dorogin) Morelet or <i>Lecanosticta acicola</i> (von Thümen) Sydow, have been observed at the site of production or its immediate vicinity since the beginning of the last complete cycle of vegetation; or</li> <li>(c) appropriate treatments have been carried out against needle blight, caused by <i>Dothistroma pini</i> Hulbary, <i>Dothistroma septosporum</i> (Dorogin) Morelet or <i>Lecanosticta acicola</i> (von Thümen) Sydow, and the plants have been inspected before movement and found free from symptoms of needle blight.</li> </ul>

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
	Plants for planting  Seeds of Helianthus annuus L.	(a) the seeds originate in areas known to be free from <i>Plasmopara halstedii</i> (Farlow) Berlese & de Toni; or (b) no symptoms of <i>Plasmopara halstedii</i> (Farlow) Berlese & de Toni have been observed at the seed production site in at least two inspections at appropriate times, to detect the pest during the growing season; or (c) (i) the seed production site has been subject to at least two inspections at appropriate times to detect the pest, during the growing season; and (ii) no more than 5 % of plants have shown symptoms of <i>Plasmopara</i>
		halstedii (Farlow) Berlese & de Toni during these inspections, and all plants showing symptoms of Plasmopara halstedii (Farlow) Berlese & de Toni have been removed and destroyed immediately after inspection; and  (iii) at the final inspection no plants have been found showing symptoms of Plasmopara halstedii (Farlow) Berlese & de Toni;
		or  (d) (i) the seed production site has been subject to at least two inspections at appropriate times to detect the pest during the growing season; and  (ii) all plants showing symptoms of Plasmopara halstedii (Farlow) Berlese & de Toni have been removed and destroyed immediately after inspection;
		and  (iii) at the final inspection, no plants have been found showing symptoms of <i>Plasmopara halstedii</i> (Farlow) Berlese & de Toni, and a representative sample from each lot has been tested and found free from <i>Plasmopara halstedii</i> (Farlow) Berlese & de Toni; or
		(e) the seeds have been subjected to an appropriate treatment which has been demonstrated to be effective against all known strains of <i>Plasmopara halstedii</i> (Farlow) Berlese & de Toni.

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
Plenodomus tracheiphilus (Petri) Gruyter, Aveskamp & Verkley	Citrus L., Citrus L. hybrids, Fortunella Swingle, Fortunella Swingle hybrids, Poncirus Raf., Poncirus Raf. hybrids	(a) the plants have been produced in areas known to be free from <i>Plenodomus tracheiphilus</i> (Petri) Gruyter, Aveskamp & Verkleys;
		or  (b) the plants have been grown in a site of production that was found free from <i>Plenodomus tracheiphilus</i> (Petri) Gruyter, Aveskamp & Verkley over the last complete growing season, by at least two visual inspection at appropriate times, during that growing season, and any symptomatic plants in the immediate vicinity have been rogued out and destroyed immediately;
		(c) no more than 2 % of plants in the lot showing symptoms during at least two visual inspections at appropriate times to detect the pest during the last growing season, and those symptomatic plants and any other symptomatic plants in the immediate vicinity have been rogued out and destroyed immediately.
Puccinia horiana P. Hennings	Chrysanthemum L.	(a) the plants derive from mother plants which have been inspected at least monthly during the previous three months and no symptoms have been seen at the site of production;
		or  (b) mother plants showing symptoms have been removed and destroyed, along with plants within a 1m radius, and an appropriate physical or chemical treatment has been applied to the plants which have been inspected before movement and found free from symptoms.

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		(b) the plants have grown in a si production that has been found from the pest over the last con growing season by visual inspectithe plants, at the appropriate tir detect the pest.
Citrus tristeza virus (EU isolates)	Plants for planting other than seeds  Citrus L., Citrus L. hybrids, Fortunella Swingle, Fortunella Swingle hybrids, Poncirus Raf., Poncirus Raf. Hybrids	(a) the plants derive from mother which have been tested, within previous three years and found from Citrus tristeza virus;  and  (b) (i) the plants have been production areas known to be free Citrus tristeza virus;  or  (ii) the plants have grown in a seproduction found free from the complete growing season testing of a representative set of the plants at the approximate to detect the pest;  or  (iii) the plants have grown in a seproduction under phe protection from vectors, and free from Citrus tristeza virus the last complete growing season testing at random of the percarried out at the most approximate to detect the pest;  or  (iv) in the cases where there positive test result for the precof Citrus tristeza virus in a leplants have been tested individe and no more than 2 % of plants were found positive, are plants tested and found infect the pest have been rogued out destroyed immediately.
Impatiens necrotic spot tospovirus	Plants for planting other than seeds  **Begonia x hiemalis**, Fotsch, Impatiens L. New Guinea Hybrids**	(a) the plants have grown in a si production that has been subjected monitoring of relevant thrips verification (Frankliniella occidentalis Pergand, upon their detection, to approtreatments to ensure efficients suppression of their populations;

Requirements

# **▼**<u>B</u>

RNQPs or symptoms caused by RNQPs

		(b) (i) no symptoms of <i>Impatiens</i> necrotic spot tospovirus have been observed on plants at the site of production during the current growing period; or  (ii) any plants at the production site showing symptoms of <i>Impatiens</i> necrotic spot tospovirus during the current growing period have been rogued out and a representative sample of the plants to be moved has been tested and found free from <i>Impatiens</i> necrotic spot tospovirus.
Potato spindle tuber viroid	Capsicum annuum L.	<ul> <li>(a) no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation; or</li> <li>(b) the plants have been subjected to official testing for Potato spindle tuber viroid, on a representative sample and using appropriate methods, and have been found, in these tests, free from that pest.</li> </ul>
Plum pox virus	Plants of the following species of Prunus L., intended for planting, other than seeds:  Prunus armeniaca L., Prunus blireiana Andre, Prunus brigantina Vill.,— Prunus cerasifera Ehrh., Prunus cistena Hansen,— Prunus domestica Fenzl and Fritsch., Prunus domestica ssp. domestica L., Prunus domestica ssp. insititia (L.) K. Schneid, Prunus domestica ssp. italica (Borkh.) Hegi., Prunus dulcis (Mill.) D. A. Webb, Prunus glandulosa Thunb., Prunus holosericea Batal., Prunus hortulana Bailey, Prunus japonica Thunb., Prunus mandshurica (Maxim.) Koehne, Prunus maritima Marsh., Prunus mume Sieb. and Zucc., Prunus nigra Ait., Prunus persica (L.) Batsch, Prunus salicina L., Prunus sibirica L., Prunus simonii Carr., Prunus spinosa L., Prunus tomentosa Thunb., Prunus triloba Lindl., Prunus L. susceptible to Plum pox virus Fotsch	<ul> <li>(a) vegetatively propagated rootstocks of Prunus derived from motherplants which have been sampled and tested within the previous 5 years and found free from Plum pox virus; and</li> <li>(b) (i) the propagating material has been produced in areas known to be free from Plum pox virus; or</li> <li>(ii) no symptoms of Plum pox virus have been observed on propagating material in the production site over the last complete growing season in the most appropriate period of the year taking into account the climatic conditions and the growing conditions of the plant and the biology of Plum pox virus, and any symptomatic plants in the immediate vicinity have been rogued out and immediately destroyed; or</li> </ul>

Plants for planting

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements	
		(iii) symptoms of Plum pox virus have been observed on no more than 1 % of plants in the production site over the last complete growing season in the most appropriate period of the year taking into account the climatic conditions and the growing conditions of the plant and the biology of Plum pox virus, and any symptomatic plants in the immediate vicinity have been rogued out and immediately destroyed, and a representative sample of the remaining asymptomatic plants in the lots in which symptomatic plants were found has been tested and found free from the pest. A representative portion of plants not showing any symptoms of Plum pox virus upon visual inspection may be sampled and tested on the basis of an assessment of the risk of infection of those plants concerning the presence of that pest.	
Tomato spotted wilt tospovirus virus	Plants for planting other than seeds  Begonia x hiemalis Fotsch, Capsicum annuum L., Chrysanthemum L., Gerbera L., Impatiens L. New Guinea Hybrids, Pelargonium L.	<ul> <li>(a) the plants have grown in a site of production that has been subjected to a monitoring of relevant thrips vectors (Frankliniella occidentalis and Thrips tabaci) and, upon their detection, to appropriate treatments to ensure effective suppression of their populations;</li> <li>and</li> <li>(b) no symptoms of Tomato spotted wilt tospovirus have been observed on plants at the site of production during the current growing period; or</li> <li>(c) any plants at the production site showing symptoms of Tomato spotted wilt tospovirus during the current growing period have been rogued out and a representative sample of the plants to be moved has been tested and found free from Tomato spotted wilt tospovirus.</li> </ul>	

# PART D

# Measures to prevent the presence of RNQPs on forest reproductive material, other than seeds

# 1. Visual inspections

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, are fulfilled:

(a) forest reproductive material, other than seeds, of *Castanea sativa* Mill. is found free from *Cryphonectria parasitica* upon visual inspection at the production site or place;

(b) forest reproductive material, other than seeds, of *Pinus* spp. is found free from *Dothistroma pini*, *Dothistroma septosporum* and *Lecanosticta acicola*, upon visual inspection at the production site or place.

The visual inspections shall take place once a year, in the most appropriate period to detect those pests, taking into account the climatic conditions and the growing conditions of the plant, and the biology of the respective pests.

### 2. Requirements per genera or species and category

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take all other actions, concerning the following genera or species, to ensure that:

#### Castanea sativa Mill.

- (a) the forest reproductive material originates in areas known to be free from Cryphonectria parasitica; or
- (b) no symptoms of *Cryphonectria parasitica* have been observed at the place or site of production over the last complete growing season; or
- (c) forest reproductive material showing symptoms of Cryphonectria parasitica in the place or site of production has been rogued out, the remaining material has been inspected at weekly intervals and no symptoms of that pest have been observed at the place or site of production for at least three weeks before movement of that material.

### Pinus spp.

- (a) the forest reproductive material originates in areas known to be free from *Dothistroma pini*, *Dothistroma septosporum* and *Lecanosticta acicola*; or
- (b) no symptoms of needle blight, caused by Dothistroma pini, Dothistroma septosporum or Lecanosticta acicola, have been observed at the place or site of production or its immediate vicinity over the last complete growing season; or
- (c) appropriate treatments have been carried out in the place or site of production against needle blight, caused by *Dothistroma pini*, *Dothistroma septosporum* or *Lecanosticta acicola*, and the forest reproductive material has been visually inspected before movement and found free from symptoms of *Dothistroma pini*, *Dothistroma septosporum* or *Lecanosticta acicola*.

#### PART E

#### Measures to prevent the presence of the RNQPs on vegetable seed

The following measures shall be taken concerning the respective RNQPs and plants for planting: the competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the third column of the following table, are fulfilled.

Bacteria			
RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements	
Clavibacter michiganensis ssp. michiganensis (Smith) Davis et al.	Solanum lycopersicum L.	<ul> <li>(a) the seeds have been obtained by means of an appropriate acid extraction method or an equivalent method; and</li> <li>(b) (i) the seeds originate in areas known to be free from Clavibacter michiganensis ssp. michiganensis (Smith) Davis et al.;</li> </ul>	

# <u>▼B</u>

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		<ul> <li>(ii) no symptoms of disease caused by Clavibacter michiganensis ssp. michiganensis (Smith) Davis et al. have been observed in visual inspections at appropriate times to detect the pest during their complete cycle of vegetation of the plants at the site of production;</li> <li>or</li> <li>(iii) the seeds have been subjected to official testing for Clavibacter michiganensis ssp. michiganensis (Smith) Davis et al. on a representative sample and using appropriate methods, and have been found, in those tests, to be free from the pest.</li> </ul>
Xanthomonas axonopodis pv. phaseoli (Smith) Vauterin et al.	Phaseolus vulgaris L.	<ul> <li>(a) the seeds originate in areas known to be free from Xanthomonas axonopodis pv. phaseoli (Smith) Vauterin et al.; or</li> <li>(b) the crop from which the seed was harvested was visually inspected at appropriate times during the growing season and found free from Xanthomonas axonopodis pv. phaseoli (Smith) Vauterin et al.; or</li> <li>(c) a representative sample of the seeds has been tested and found free from Xanthomonas axonopodis pv. phaseoli (Smith) Vauterin et al. in those tests.</li> </ul>
Xanthomonas fuscans subsp. fuscans Schaad et al.	Phaseolus vulgaris L.	<ul> <li>(a) the seeds originate in areas known to be free from Xanthomonas fuscans subsp. fuscans Schaad et al.; or</li> <li>(b) the crop from which the seed was harvested was visually inspected at appropriate times during the growing season and found free from Xanthomonas fuscans subsp. fuscans Schaad et al.; or</li> <li>(c) a representative sample of the seeds has been tested and found free from Xanthomonas fuscans subsp. fuscans Schaad et al. in those tests.</li> </ul>

Ditylenchus dipsaci (Kuehn) Filipjev	Allium cepa L., Allium porrum L.	<ul> <li>(a) the crop has been visually inspected at least once at an appropriate time to detect the pest since the beginning of the last complete cycle of vegetation and no symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev have been observed; or</li> <li>(b) the harvested seeds have been found to be free of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev after laboratory tests on a representative sample;</li> <li>or</li> </ul>

RNQPs or symptoms caused by RNQPs	Plants for planting	Measures				
		(c) the planting material has been subjected to an appropriat chemical or physical treatment against <i>Ditylenchu dipsaci</i> (Kuehn) Filipjev and the seeds have been foun to be free of this pest after laboratory tests on a represer tative sample.				
	Viruses, viroids, virus-lil	ke diseases and phytoplasmas				
RNQPs or symptoms caused by RNQPs	Plants for planting	Measures				
Pepino mosaic virus	Solanum lycopersicum L.	(a) the seeds have been obtained by means of an appropriate acid extraction method or an equivalent method, and:				
		(b) (i) the seeds originate in areas where Pepino mosaic virus is known not to occur; or				
		(ii) no symptoms of diseases caused by Pepino mosaic virus have been observed on the plants at the place of production during their complete cycle of vegetation; or				
		(iii) the seeds have been subjected to official testing for Pepino mosaic virus, on a representative sample and using appropriate methods, and have been found, in those tests, free from the pest.				
Potato spindle tuber viroid	Capsicum annuum L., Solanum lycopersicum L.	(a) (i) the seeds originate in areas where Potato spindle tuber viroid is not known to occur; or				
		(ii) no symptoms of diseases caused Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation; or				
		(iii) the seeds have been subjected to official testing for Potato spindle tuber viroid, on a representative sample and using appropriate methods, and have been found, in those tests, free from the pest.				

# PART F

# Measures to prevent the presence of the RNQPs on seed potatoes

The competent authority or, if so required, the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements concerning the respective RNQPs and plants for planting, provided for in the following table, are fulfilled.

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements		
Blackleg ( <i>Dickeya</i> Samson et al. spp.; <i>Pectobacterium</i> Waldee emend. Hauben et al. spp.)		<ul> <li>(a) In the case of pre-basic seed potatoes: official inspections show that they derive from mother plants which are free from <i>Dickeya</i> Samson <i>et al.</i> spp. and <i>Pectobacterium</i> Waldee emend. Hauben <i>et al.</i> spp. </li> <li>(b) In the case of all categories: the growing plants have been subjected to official field inspection by competent authorities.</li> </ul>		

RNQPs or symptoms caused by RNQPs	Plants for planting	(a) In the case of pre-basic seed potatoes:  official inspections show that they derive from metacearum Liefting et al  (b) In the case of all categories:  (i) plants have been produced in areas known to be from Candidatus Liberibacter solanacearum Liet et al., taking into account the possible presence of vectors;  or  (ii) no symptoms of Candidatus Liberibacter solanacearum Liefting et al. have been seen deficial inspections by competent authorities growing plants at the site of production since start of the last complete cycle of vegetation.			
Candidatus Liberibacter solanacearum Liefting et al.	Solanum tuberosum L.				
Candidatus Phytoplasma solani Quaglino et al.	Solanum tuberosum L.	<ul> <li>(a) In the case of pre-basic seed potatoes:     official inspections show that they derive from plants which are free from <i>Candidatus</i> Phyto solani Quaglino et al.</li> <li>(b) In the case of all categories:     (i) no symptoms of <i>Candidatus</i> Phytoplasma Quaglino et al. have been seen at the pl production during official inspection since the of the last complete cycle of vegetation;     or     (ii) any plants at the site of production sl symptoms have been rogued out, with their p tubers, and destroyed, for any stocks in symptoms have been seen in the growing official post harvest tuber testing has been out, for each lot, to confirm the abser <i>Candidatus</i> Phytoplasma solani Quaglino et al.</li> </ul>			
Mosaic symptoms caused by viruses and: symptoms caused by: — Potato leaf roll virus	Solanum tuberosum L.	<ul> <li>(a) In the case of pre-basic seed potatoes: they derive from mother plants which are free Potato virus A, Potato virus M, Potato virus S, virus X, Potato virus Y and Potato leaf roll virus Where methods of micro-propagation are compliance with this point shall be establish official testing, or testing under official supervision the mother plant.  Where methods of clonal selection are used, common with this point shall be established by official testing under official supervision, of the clonal states that the case of all categories, the growing plants have subjected to official inspection by the consultation.</li> </ul>			

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements				
Potato spindle tuber viroid	Solanum tuberosum L.	<ul> <li>(a) In the case of clonal stock:     Official testing, or testing under official supervision, has shown that they derive from mother plants which are free from Potato spindle tuber viroid.</li> <li>(b) In the case of pre-basic and basic seed potatoes:     no symptoms of Potato spindle tuber viroid have been found.     or     for each lot, official post-harvest testing of tubers have been performed and those tubers have been found free from Potato spindle tuber viroid.</li> <li>(c) In the case of certified seed potatoes, official visual inspection has shown that they are free from the pest, and testing is carried out if any symptoms of the pest are seen.</li> </ul>				
	T					
RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements				
Symptoms of virus infection	Solanum tuberosum L.	During official inspection of the direct progeny, the number of symptomatic plants shall not exceed the percentage indicated in Annex IV.				
RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements				
Candidatus Liberibacter solanacearum Liefting et al.	Solanum tuberosum L.	The competent authority has subjected the lots to official inspection and confirms that they comply with the respective provisions of Annex IV.				
Ditylenchus destructor Thorne	Solanum tuberosum L.	The competent authority has subjected the lots to official inspection and confirms that they comply with the respective provisions of Annex IV.				
Black scurf affecting tubers over more than 10 % of their surface as caused by <i>Thanatephorus cucumeris</i> (A.B. Frank) Donk	Solanum tuberosum L	The competent authority has subjected the lots to offici inspection and confirms that they comply with the respective provisions of Annex IV.				
Powdery scab affecting tubers over more than 10 % of their surface as caused by <i>Spongospora subterranea</i> (Wallr.) Lagerh.	Solanum tuberosum L	The competent authority has subjected the lots to official inspection and confirms that they comply with the respective provisions of Annex IV.				

In addition, the competent authorities shall carry out official inspections to ensure that the presence of RNQPs on the growing plants shall not exceed the thresholds set out in the following table:

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the growing plants for pre-basic seed potatoes		Threshold for the growing plants for basic	Threshold for the growing plants for certified seed
		PBTC	PB	seed potatoes	potatoes
Blackleg ( <i>Dickeya</i> Samson <i>et al. spp.</i> [1DICKG]; <i>Pectobacterium</i> Waldee emend. Hauben <i>et al. spp.</i> [1PECBG])	Solanum tuberosum L.	0 %	0 %	1,0 %	4,0 %
Candidatus Liberibacter solanacearum Liefting et al. [LIBEPS]	Solanum tuberosum L.	0 %	0 %	0 %	0 %
Candidatus Phytoplasma solani Quaglino et al. [PHYPSO]	Solanum tuberosum L.	0 %	0 %	0 %	0 %
Mosaic symptoms caused by viruses and symptoms caused by leaf roll virus [PLRV00]	Solanum tuberosum L.	0 %	0,1 %	0,8 %	6,0 %
Potato spindle tuber viroid [PSTVD0]	Solanum tuberosum L.	0 %	0 %	0 %	0 %

# PART G

# Measures to prevent the presence of RNQPs on seed of oil and fibre plants

# 1. Inspection of the crop

(1) The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out field inspections on the crop from which the seed of oil and fibre plants is produced to ensure that the presence of the RNQPs does not exceed the thresholds set out in the following table:

Fungi and oomycetes					
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for the production of pre-basic seed	Thresholds for the production of basic seed	Thresholds for the production of certified seed	
Plasmopara halstedii (Farlow) Berlese & de Toni [PLASHA]	Helianthus annuus L.	0 %	0 %	0 %	

The competent authority may authorise inspectors, other than the professional operators, to carry out the field inspections on its behalf and under its official supervision.

## **▼**B

(2) Those field inspections shall be carried out when the condition and the stage of development of the crop allow for an adequate inspection.

There shall be at least one field inspection per year, at the most appropriate time for the detection of the respective RNQPs.

(3) The competent authority shall determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.

The proportion of the crops for the production of seed to be officially inspected by the competent authority shall be at least 5 %.

#### 2. Sampling and testing of seed of oil and fibre plants

- (1) The competent authority shall:
  - (a) officially draw seed samples from lots of seed of oil and fibre plants;
  - (b) authorise seed samplers to carry out sampling, on its behalf and under its official supervision;
  - (c) compare the seed samples drawn by itself with those of the same seed lot drawn by the seed samplers under official supervision;
  - (d) supervise the performance of the seed samplers as provided for in point (b).
- (2) The competent authority or the professional operator under the official supervision shall sample and test the seed of oil and fibre plants in accordance with up to date international methods.

Except for automatic sampling, the competent authority shall check-sample a proportion of at least 5 % of the seed lots entered for certification. That proportion shall be as evenly spread as possible over natural and legal persons entering seed for certification, and the species entered, but may also be aimed at eliminating specific doubts.

- (3) For automatic sampling, appropriate procedures shall be applied and it shall be officially supervised.
- (4) For the examination of seed for certification and the examination of commercial seed, samples shall be drawn from homogeneous lots. As regards the lot and sample weights, the table of Annex III to Directive 2002/57/EC shall apply.

## 3. Additional measures for seed of oil and fibre plants

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out the following additional inspections and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, are fulfilled:

- (1) Measures on seed of *Helianthus annuus* L. to prevent the presence of *Plasmopora halstedii* 
  - (a) the seeds of Helianthus annuus L. originate in areas known to be free from Plasmopara halstedii;

or

 (b) no symptoms of Plasmopara halstedii have been observed at the production site in at least two inspections at appropriate times during the growing season;

- (c) (i) the production site has been subject to at least two field inspections at appropriate times to detect the pest during the growing season; and
  - (ii) no more than 5 % of plants have shown symptons of *Plasmopara halstedii* during field inspection, all plants showing symptoms of *Plasmopara halstedii* have been removed and destroyed immediately after inspection; and
  - (iii) at the final inspection no plants have been found showing symptoms of *Plasmopara halstedii*;

or

- (d) (i) the production site has been subject to at least two field inspections at appropriate times during the growing season; and
  - (ii) all plants showing symptoms of *Plasmopara halstedii* have been removed and destroyed immediately after inspection; and
  - (iii) at the final inspection, no plants have been found showing symptoms of *Plasmopara*. halstedii, and a representative sample from each lot has been tested and found free from *Plasmopara* halstedii or(e) the seeds have been subjected to an appropriate treatment which has been demonstrated to be effective against all known strains of *Plasmopara halstedii* (Farlow) Berlese & de Toni.
- (2) Measures on seeds of Helianthus annuus L. and Linum usitatissimum L. to prevent the presence of Botrytis cinerea
  - (a) seed treatment authorised for use against Botrytis cinerea has been applied;

or

- (b) the set tolerance on seed is not exceeded on the basis of laboratory test of a representative sample.
- (3) Measures on seeds of Glycine max (L.) Merryl to prevent the presence of Diaporthe caulivora (Diaporthe phaseolorum var. caulivora)
  - (a) Seed treatment authorised for use against *Diaporthe caulivora* (*Diaporthe phaseolorum* var. *caulivora*) has been applied;

or

- (b) the set tolerance on seed is not exceeded on the basis of laboratory test of a representative sample.
- (4) Measures on seeds of Glycine max (L.) Merryl to prevent the presence of Diaporthe var. sojae
  - (a) seed treatment authorised for use against Diaporthe var. sojae has been applied;

or

- (b) the set tolerance on seed is not exceeded on the basis of laboratory test of a representative sample.
- (5) Measures on seeds of Linum usitatissimum L. to prevent the presence of Alternaria linicola
  - (a) seed treatment authorised for use against Alternaria linicola has been applied;

or

(b) the set tolerance on seed is not exceeded on the basis of laboratory test of a representative sample.

- (6) Measures on seeds of Linum usitatissimum L. to prevent the presence of Boeremia exigua var. linicola
  - (a) seed treatment authorised for use against Boeremia exigua var. linicola has been applied;

or

- (b) the set tolerance on seed is not exceeded on the basis of a laboratory test of a representative sample.
- (7) Measures on seeds of Linum usitatissimum L. to prevent the presence of Colletotrichum lini
  - (a) seed treatment authorised for use against Colletotrichum lini has been applied;

or

- (b) the set tolerance on seed is not exceeded on the basis of a laboratory test of a representative sample.
- (8) Measures on seeds of *Linum usitatissimum* L. to prevent the presence of *Fusarium* (anamorphic genus), other than *Fusarium oxysporum* f. sp. *albedinis* (Kill. & Maire) W.L. Gordon and *Fusarium circinatum* Nirenberg & O'Donnell.
  - (a) seed treatment authorised for use against Fusarium (anamorphic genus), other than Fusarium oxysporum f. sp. albedinis (Kill. & Maire) W.L. Gordon and Fusarium circinatum Nirenberg & O'Donnell, has been applied;

or

(b) the set tolerance on seed is not exceeded based on laboratory test of a representative sample.

#### PART H

# Measures to prevent the presence of RNQPs on vegetable propagating and planting material, other than seeds

#### Visual inspection

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that:

- (a) the plants shall at least appear, on visual inspection, to be practically free from pests listed in the table in this point, in respect of the genus or species concerned.
- (b) any plants showing visible signs or symptoms of the pests listed in the tables in this point, at the stage of the growing crop, have been treated properly immediately upon their appearance or, where appropriate, have been eliminated.
- (c) in the case of bulbs of shallots and garlic, the plants derive directly from material which, at the stage of the growing crop, has been checked and found to be practically free from any pest listed in the tables in this point.

In addition, the competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the following table, are fulfilled:

Bacteria			
RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements	
Clavibacter michiganensis ssp. michiganensis (Smith) Davis et al.	Solanum lycopersicum L.	The plants have been grown from seeds which comply with the requirements laid down in Annex V, Part E and have been maintained free from infection by appropriate hygiene measures.	

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
Xanthomonas euvesicatoria Jones et al.	Capsicum annuum L., Solanum lycopersicum L.	<ul><li>(a) seedlings have been grown from seeds that meet the requirements laid down in Part E for vegetable seeds; and</li><li>(b) young plants have been maintained in appropriate hygiene conditions to prevent infection.</li></ul>
Xanthomonas gardneri (ex Šutič 1957) Jones et al.	Capsicum annuum L., Solanum lycopersicum L.	<ul><li>(a) seedlings have been grown from seeds that meet the requirements laid down in Part E for vegetable seeds; and</li><li>(b) young plants have been maintained in appropriate hygiene conditions to prevent infection.</li></ul>
Xanthomonas perforans Jones et al.	Capsicum annuum L., Solanum lycopersicum L.	<ul><li>(a) seedlings have been grown from seeds that meet the requirements laid down in Part E for vegetable seeds; and</li><li>(b) young plants have been maintained in appropriate hygiene conditions to prevent infection.</li></ul>
Xanthomonas vesicatoria (ex Doidge) Vauterin et al.	Capsicum annuum L., Solanum lycopersicum L.	<ul><li>(a) seedlings have been grown from seeds that meet the requirements laid down in Part E for vegetable seeds; and</li><li>(b) young plants have been maintained in appropriate hygiene conditions to prevent infection.</li></ul>

## Fungi and oomycetes

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
Fusarium Link (anamorphic genus), other than Fusarium oxysporum f. sp. albedinis (Kill. & Maire) W.L. Gordon and	Asparagus officinalis L.	(a) (i) the crop has been visually inspected at an appropriate time for the detection of the pest during the growing season, a representative sample of the plants have been uprooted and no symptoms of <i>Fusarium</i> Link have been observed; or
Fusarium circinatum Nirenberg & O'Donnell		(ii) the crop has been visually inspected at least twice at appropriate times for the detection of the pest during the growing season and plants showing symptoms of <i>Fusarium</i> Link have been rogued out immediately with no symptoms seen at a final inspection of the growing crop; and
		(b) the crowns have been visually inspected before movement and no symptoms of <i>Fusarium</i> Link have been seen.
Helicobasidium brebissonii (Desm.) Donk	Asparagus officinalis L.	(a) (i) the crop has been visually inspected at an appropriate time for the detection of the pest during the growing season, a representative sample of the plants have been uprooted and no symptoms of <i>Helicobasidium brebissonii</i> (Desm.) Donk have been observed; or
		(ii) the crop has been visually inspected at least twice at appropriate times for the detection of the pest during the growing season and plants showing symptoms of <i>Helicobasidium brebissonii</i> (Desm.) Donk have been rogued out immediately with no symptoms seen at a final inspection of the growing crop; and
		(b) the crowns have been visually inspected before movement and no symptoms of <i>Helicobasidium brebissonii</i> (Desm.) Donk have been seen.

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements	
Stromatinia cepivora Berk.	Allium cepa L., Allium fistulosum L., Allium porrum L.	<ul> <li>(a) the plants are module-raised transplants grown in medium free from <i>Stromatinia cepivora</i> Berk.;</li> <li>or</li> <li>(b) (i) — the crop has been visually inspected at an appropriate time for the detection of the pest during the growing season and no symptoms of <i>Stromatinia cepivora</i> Berk. have been observed; or</li> <li>— the crop has been visually inspected at an appropriate time for the detection of the pest during the growing season and plants showing symptoms of <i>Stromatinia cepivora</i> Berk. have been rogued out immediately with no symptoms seen at an additional final inspection of the growing crop; and</li> <li>(ii) the plants have been visually inspected before movement and no symptoms of <i>Stromatinia cepivora</i> Berk. have been seen.</li> </ul>	
Stromatinia cepivora Berk.	Allium sativum L.	<ul> <li>(a) (i) the crop has been visually inspected at an appropriate time for the detection of the pest during the growing season and no symptoms of <i>Stromatinia cepivora</i> Berk. have been observed; or</li> <li>(ii) the crop has been visually inspected at an appropriate time for the detection of the pest during the growing season and plants showing symptoms of <i>Stromatinia cepivora</i> Berk. have been rogued out immediately with no symptoms seen at an additional final inspection of the growing crop;</li> <li>and</li> <li>(b) the plants or sets have been visually inspected before movement and no symptoms of <i>Stromatinia cepivora</i> Berk. have been seen.</li> </ul>	
Verticillium dahliae Kleb. [VERTDA]	Cynara cardunculus L.	<ul> <li>(a) mother plants derive from pathogen tested material; and</li> <li>(b) the plants have been grown in a site of production of which the cropping history is known, with no records of the occurrence of <i>Verticillium dahliae</i> Kleb.; and</li> <li>(c) plants have been visually inspected at appropriate times since the beginning of the last complete cycle of vegetation and found free from symptoms of <i>Verticillium dahliae</i> Kleb.</li> </ul>	

## Nematodes

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
Ditylenchus dipsaci (Kuehn) Filipjev	Allium cepa L., Allium sativum L.	In the case of plants, other than the plants for the production of a commercial crop:  (a) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation and no symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev have been observed;  or

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		(b) (i) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation and not more than 2 % of plants have shown symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev infestation, and  (ii) the plants found to be infected by that pest have been rogued out immediately, and  (iii) the plants have then been found to be free from that pest through laboratory tests on a representative sample;
		(c) the plants have been subjected to an appropriate chemical or physical treatment against <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev and ave been found to be free from that pest after laboratory tests on a representative sample.
		In the case of plants for production of a commercial crop:
		(a) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation and no symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev have been observed;
		or
		(b) (i) the crop has been inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation;
		(ii) plants showing symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev have been rogued out immediately, and
		(iii) the plants have been found to be free from that pest after laboratory tests on a representative sample;
		or
		(c) the plants have been subject to an appropriate physical or chemical treatment and have been found to be free of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev after laboratory tests on a representative sample.
	Viruses, viroids, virus-lil	ke diseases and phytoplasmas
RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
Leek yellow stripe virus	Allium sativum L.	(a) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation and no symptoms of Leek yellow stripe virus have been seen;
		or

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
		(b) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation in which not more than 10 % of the plants showed symptoms of Leek yellow stripe virus, with those plants rogued out immediately and not more than 1 % of plants showing symptoms seen in a final inspection.
Onion yellow dwarf virus	Allium cepa L., Allium sativum L.	(a) the crop has been visually inspected at least once at an appropriate time since the beginning of the last complete cycle of vegetation and no symptoms of Onion yellow dwarf virus have been seen;
		(b) (i) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation in which not more than 10 % of the plants showed symptoms of Onion yellow dwarf virus; and
		(ii) the plants rogued found infected by that pest have been rogued out immediately; and
		(iii) not more than 1 % of plants show symptoms of that pest have been seen in a final inspection.
Potato spindle tuber viroid	Capsicum annuum L., Solanum lycopersicum L.	<ul> <li>(a) no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation; or</li> <li>(b) the plants have been subjected to official testing for Potato spindle tuber viroid, on a representative sample and using appropriate methods, and have been found, in these tests, free from that pest.</li> </ul>
Tomato spotted wilt tospovirus	Capsicum annuum L., Lactuca sativa L., Solanum lycopersicum L., Solanum melongena L.	<ul> <li>(a) the plants have grown in a site of production that has been subjected to a monitoring regime of relevant thrips vectors (<i>Frankliniella occidentalis</i> Pergande and <i>Thrips tabaci</i> Lindeman) and upon detection of those vectors appropriate treatments are carried out to ensure effective suppression of populations; and</li> <li>(b) (i) no symptoms of Tomato spotted wilt tospovirus have been observed on plants at the site of production during the current growing period; or</li> <li>(ii) any plants at the production site showing symptoms of Tomato spotted wilt tospovirus during the current growing period have been rogued out and a representative sample of the plants to be moved has been tested and found free from the pest.</li> </ul>

RNQPs or symptoms caused by RNQPs	Plants for planting	Requirements
Tomato yellow leaf curl virus	Solanum lycopersicum L.	(a) no symptoms of Tomato yellow leaf curl virus have been observed on the plants; or
		(b) no symptoms of Tomato yellow leaf curl disease have been observed on the place of production

#### PART I

# Measures to prevent the presence of RNQPs on seed of Solanum tuberosum

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the following requirements are fulfilled concerning the presence of RNQPs on seed of *Solanum tuberosum*:

- (a) the seeds originate in areas where Potato spindle tuber viroid is not known to occur; or
- (b) no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation; or
- (c) the plants have been subjected to official testing for Potato spindle tuber viroid, on a representative sample and using appropriate methods, and have been found, in these tests, free from that pest.

#### PART J

#### Measures to prevent the presence of RNQPs on plants for planting of Humulus lupulus L., other than seeds

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the third column of the following table, are fulfilled:

Fungi		
Plants for planting	Measures	
Humulus lupulus L.	(a) the plants for planting derive from mother plants which have been visually inspected at the most appropriate time and found free from symptoms of <i>Verticillium dahliae</i> ; and	
	(b) (i) the plants for planting have been produced in a place of production known to be free from <i>Verticilium dahliae</i> ; or	
	(ii) — the plants for planting have been isolated from production crops of <i>Humulus lupulus</i> ; and	
	— the production site has been found free from Verticillium dahliae over the last complete growing season at appropriate times by visual inspection of the foliage at the most appropriate time; and	
	— the cropping and soil borne disease history of fields has been recorderd and there has been a rest period from host plants of at least four years between findings of <i>Verticillium dahliae</i> and the next planting.	
	Plants for planting	

	Fungi			
RNQPs or symptoms caused by RNQPs	Plants for planting	Measures		
Verticillium nonalfalfae Inderbitzin, H.W. Platt, Bostock, R.M. Davis & K.V. Subbarao [VERTNO]	Humulus lupulus L.	(a) the plants for planting derive from mother plants which have been visually inspected at the most appropriate time and found free from symptoms of <i>Verticillium nonal-falfae</i> ; and		
		(b) (i) the plants for planting have been produced in a place of production known to be free from <i>Verticillium nonalfalfae</i> ; or		
		(ii) — the plants for planting have been isolated from production crops of <i>Humulus lupulus</i> ; and		
		<ul> <li>the production site has been found free from Verticillium nonalfalfae over the last complete growing season at appropriate times by visual inspection of the foliage; and</li> </ul>		
		— the cropping and soil borne disease history of fields have been recorderd and there has been a rest period from host plants of at least four years between findings of <i>Verticillium nonalfalfae</i> and the next planting.		

 ${\it ANNEX~VI}$  List of plants, plant products and other objects whose introduction into the Union from certain third countries is prohibited

	Description	CN Code	Third country, group of third countries or specific area of third country

The CN code of an associated plant shall apply In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland/Northern Ireland in conjunction with Annex 2 to that Protocol, for the purposes of this Annex, references to the United Kingdom do not include Northern Ireland.

#### ANNEX VIII

# List of plants, plant products and other objects, originating in the Union territory and the corresponding special requirements for their movement within the Union territory

The competent authorities, or the professional operators under the official supervision of the competent authorities, shall check, at the most appropriate times to detect the respective pest as applicable, the fulfilment of the requirements laid down of the following table.

	Plants, plant products and other objects	Requirements
1.	Machinery and vehicles which have been operated for agricultural or forestry purposes	The machinery or vehicles have been:  (a) moved from an area free from <i>Ceratocystis platani</i> (J. M. Walter) Engelbr. & T. C. Harr., established by the competent authorities in accordance with the relevant International Standards for Phytosanitary Measures, or  (b) cleaned and made free from soil and plant debris prior to movement out of the infected area.
2.	Plants for planting with roots, grown in the open air	Official statement that the place of production is known to be free from <i>Clavibacter sepedonicus</i> (Spieckermann and Kottho) Nouioui <i>et al.</i> and <i>Synchytrium endobioticum</i> (Schilb.) Percival.
3.	Plants for planting of stolon, or tuber-forming species of <i>Solanum</i> L., or their hybrids, being stored in gene banks or genetic stock collections	Official statement that the plants shall have been held under quarantine conditions and shall have been found free from any Union quarantine pests by laboratory testing.  Each organisation or research body holding such material shall inform the competent authority of the material held.
4.	Plants for planting of stolon or tuber-forming species of <i>Solanum</i> L., or their hybrids, other than those tubers of <i>Solanum tuberosum</i> L. specified in entries 5, 6, 7, 8, or 9 and other than culture maintenance material being stored in gene banks or genetic stock collections, and other than seeds of <i>Solanum tuberosum</i> L. specified in entry 21	Official statement that the plants shall have been held under quarantine conditions and shall have been found free from any Union quarantine pests by laboratory testing.  The laboratory testing shall:  (a) be supervised by the competent authority concerned and executed by scientifically trained staff of that authority or of any officially approved body;  (b) be executed at a site provided with appropriate facilities sufficient to contain Union quarantine pests and maintain the material including indicator plants in such a way as to eliminate any risk of spreading Union quarantine pests;

	Plants, plant products and other objects	Requirements
		(c) be executed on each unit of the material:
		(i) by visual examination at regular intervals during the full length of at least one vegetative cycle, having regard to the type of material and its stage of development during the testing programme, for symptoms caused by any Union quarantine pests,
		(ii) by laboratory testing, in the case of all potato material at least for:
		— Andean potato latent virus,
		— Andean potato mottle virus,
		— Arracacha virus B. oca strain,
		<ul> <li>Potato black ringspot virus,</li> </ul>
		— Potato virus T,
		<ul> <li>non-European isolates of potato viruses A, M,</li> <li>S, V, X and Y (including Y<sup>o</sup>, Y<sup>n</sup> and Y<sup>c</sup>) and</li> <li>Potato leaf roll virus (including Y<sup>o</sup>),</li> </ul>
		<ul> <li>— Clavibacter sepedonicus (Spieckermann and Kottho) Nouioui et al.,</li> </ul>
		— Ralstonia solanacearum (Smith) Yabuuchi et al. emend. Safni et al.; Ralstonia pseudosol- anacearum Safni et al., Ralstonia syzigii subsp. celebensis Safni et al. and Ralstonia syzigii subsp. indonesiensis Safni et al.
		(iii) in the case of seeds of Solanum tuberosum L., other than those specified in point 21, at least for the viruses and viroids listed above, with the exception of Andean potato mottle virus and non-European isolates of potato viruses A, M, S, V, X and Y (including Y°, Yn and Yc) and Potato leafroll virus;
		(d) include appropriate testing on any other symptom observed in the visual examination in order to identify the Union quarantine pests having caused such symptoms.
5.	Tubers of Solanum tuberosum L., for planting	Official statement that the provisions of Union law to combat <i>Synchytrium endobioticum</i> (Schilb.) Percival have been complied with.
6.	Tubers of Solanum tuberosum L., for planting	Official statement that:  (a) the tubers originate in an area known to be free from Clavibacter sepedonicus (Spieckermann and Kottho) Nouioui et al.,  or  (b) the provisions of Union law to combat Clavibacter sepedonicus (Spieckermann and Kottho) Nouioui et al. have been complied with.

	Plants, plant products and other objects	Requirements
7.	Tubers of Solanum tuberosum L., for planting	Official statement that the tubers originate:  (a) in areas where <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i> is known not to occur,  or  (b) in a place of production found free from <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i> , or considered to be free thereof, as a consequence of the implementation of an appropriate procedure aiming at eradicating <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i>
8.	Tubers of Solanum tuberosum L., for planting	Official statement that the tubers originate:  (a) in areas where Meloidogyne chitwoodi Golden et al. and Meloidogyne fallax Karssen are known not to occur, or  (b) in areas where Meloidogyne chitwoodi Golden et al. and Meloidogyne fallax Karssen are known to occur and:  (i) the tubers originate in a place of production which has been found free from Meloidogyne chitwoodi Golden et al. and Meloidogyne fallax Karssen based on an annual survey of host crops by visual inspection of host plants at appropriate times and by visual inspection both externally and by cutting of tubers after harvest from potato crops grown at the place of production,  or  (ii) the tubers have been randomly sampled after harvest and checked for the presence of symptoms, after having applied an appropriate method to induce symptoms or laboratory tested, as well as inspected visually both externally and by cutting tubers, at appropriate times to detect the presence of those pests and in all cases at the time of closing of the packages, or containers before movement, and found free from symptoms of Meloidogyne chitwoodi Golden et al. and Meloidogyne fallax Karssen.
9.	Tubers of Solanum tuberosum L., for planting, other than those to be planted in accordance with point (b) of Article 4(4) of Directive 2007/33/EC	Official statement that the provisions of Union law to combat <i>Globodera pallida</i> (Stone) Behrens and <i>Globodera rostochiensis</i> (Wollenweber) Behrens are complied with.
10.	Tubers of Solanum tuberosum L., for planting, other than tubers of those varieties officially accepted in one or more Member States pursuant to Directive 2002/53/EC	Official statement that the tubers:  (a) belong to advanced selections, and  (b) have been produced within the Union, and  (c) have been derived in direct line from material which has been maintained under appropriate conditions and has been subjected within the Union to official quarantine testing and has been found, in these tests, free from Union quarantine pests.

	Plants, plant products and other objects	Requirements
11.	Tubers of Solanum tuberosum L., other than those mentioned in entries 3, 4, 5, 6, 7, 8, 9, or 10	There shall be a registration number on the packaging, or in the case of loose-loaded tubers transported in bulk, on the accompanying documents, demonstrating that the tubers have been grown by an officially registered producer, or originate from officially registered collective storage or dispatching centres located in the area of production, and indicating that:  (a) the tubers are free from <i>Ralstonia solanacearum</i> (Smith) Yabuuchi et al. emend. Safni et al.  and  (b) the provisions of Union law to combat <i>Synchytrium endobioticum</i> (Schilb.) Percival,  and  where appropriate, <i>Clavibacter sepedonicus</i> (Spieckermann and Kottho) Nouioui et al.,  and <i>Globodera pallida</i> (Stone) Behrens and <i>Globodera rostochiensis</i> (Wollenweber) Behrens are complied with.
12.	Plants for planting with roots, of <i>Capsicum</i> spp., <i>Solanum lycopersicum</i> L. and <i>Solanum melongena</i> L., other than those to be planted in accordance with point (a) of Article 4(4) of Directive 2007/33/EC	Official statement that the provisions of Union law to combat <i>Globodera pallida</i> (Stone) Behrens and <i>Globodera rostochiensis</i> (Wollenweber) Behrens are complied with.
13.	Plants for planting of Capsicum annuum L., Solanum lycopersicum L., Musa L., Nicotiana L., and Solanum melongena L., other than seeds	Official statement that:  (a) the plants originate in areas which have been found free from <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i> , or  (b) no symptoms of <i>Ralstonia solanacearum</i> (Smith) Yabuuchi <i>et al.</i> emend. Safni <i>et al.</i> have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation.
14.	Plants for planting with roots, grown in the open air, of Allium porrum L., Asparagus officinalis L., Beta vulgaris L., Brassica spp. and Fragaria L. and bulbs, tubers and rhizomes, grown in the open air, of Allium ascalonicum L., Allium cepa L., Dahlia spp., Gladiolus Tourn. ex L., Hyacinthus spp., Iris spp., Lilium spp., Narcissus L. and Tulipa L., other than those plants, bulbs, tubers and rhizomes to be planted in accordance with points (a) or (c) of Article 4(4) of Directive 2007/33/EC	There shall be evidence that the provisions of Union law to combat Globodera pallida (Stone) Behrens and Globodera rostochiensis (Wollenweber) Behrens are complied with.

	Plants, plant products and other objects	Requirements
15.	Plants for planting of <i>Cucurbitaceae</i> and <i>Solanaceae</i> other than seeds, originating from areas:  (a) where <i>Bemisia tabaci</i> Genn. or other vectors of Tomato leaf curl New Delhi Virus are not known to occur  (b) where <i>Bemisia tabaci</i> Genn. or other vectors	Official statement that:  (a) the plants originate in an area known to be free from Tomato leaf curl New Delhi Virus,  or  (b) no symptoms of Tomato leaf curl New Delhi Virus have been observed on the plants during their
	of Tomato leaf curl New Delhi Virus are known to occur	complete cycle of vegetation.  Official statement that:  (a) the plants originate in an area known to be free from Tomato leaf curl New Delhi Virus,  or  (b) no symptoms of Tomato leaf curl New Delhi Virus have been observed on the plants during their complete cycle of vegetation,
		and  (i) their site of production has been found free from Bemisia tabaci Genn. and other vectors of Tomato leaf curl New Delhi Virus on official inspections carried out at appropriate times to detect the pest, or  (ii) the plants have been subjected to an effective treatment ensuring the eradication of Bemisia tabaci Genn and other vectors of Tomato leaf curl New Delhi Virus.
16.	Plants for planting of Juglans L. and Pterocarya Kunth, other than seeds	Official statement that the plants for planting:  (a) have been grown throughout their life, or since their introduction into the Union, in an area free from Geosmithia morbida Kolarík, Freeland, Utley & Tisserat and its vector Pityophthorus juglandis Blackman, established by the competent authorities in accordance with the relevant International Standards for Phytosanitary Measures,  or  (b) originate in a place of production, including its vicinity of at least 5 km radius, where neither symptoms of Geosmithia morbida Kolarík, Freeland, Utley & Tisserat and its vector Pityophthorus juglandis Blackman, nor the presence of the vector, have been observed during official inspections within a period of two years prior to movement, the plants for planting have been visually inspected prior to movement and handled and packaged in ways to prevent infestation after leaving the place of production, or  (c) originate in a site of production, with complete physical isolation, and the plants for planting have been visually inspected prior to movement and handled and packaged in ways to prevent infestation after leaving the place of production.

	Plants, plant products and other objects	Requirements
17.	Plants for planting of <i>Platanus</i> L., other than seeds	Official statement that:  (a) the plants originate in an area known to be free from Ceratocystis platani (J. M. Walter) Engelbr. & T. C. Harr., established by the competent authorities in accordance with the relevant International Standards for Phytosanitary Measures, or  (b) have been grown in a place of production established as free from Ceratocystis platani (J. M. Walter) Engelbr. & T. C. Harr. in accordance with the relevant International Standards for Phytosanitary Measures:  (i) which is registered and supervised by the competent authorities, and  (ii) which has been subjected annually to official inspections for any symptoms of Ceratocystis platani (J. M. Walter) Engelbr. & T. C. Harr., including its immediate vicinity, carried out at the most appropriate times of the year to detect the presence of the pest concerned, and  (iii) a representative sample of the plants has been subjected to testing for the presence of Ceratocystis platani (J. M. Walter) Engelbr. & T. C. Harr., at appropriate times of the year to detect the presence of the pest.
18.	Plants of Citrus L., Choisya Kunth, Fortunella Swingle, Poncirus Raf., and their hybrids and Casimiroa La Llave, Clausena Burm f., Murraya J. Koenig ex L., Vepris Comm., Zanthoxylum L., other than fruits and seeds	Official statement that the plants:  (a) originate in an area free from <i>Trioza erytreae</i> Del Guercio, established by the competent authorities in accordance with relevant International Standards for Phytosanitary Measures, or  (b) have been grown in a place of production, which is registered and supervised by the competent authorities in the Member State of origin, and  where the plants have been grown during a period of one year, in an insect proof site of production against the introduction of <i>Trioza erytreae</i> Del Guercio, and  where, during a period of at least one year prior to the movement, two official inspections were carried out at appropriate times and no signs of <i>Trioza erytreae</i> Del Guercio have been observed in that site, and  prior to movement are handled and packaged in ways to prevent infestation after leaving the place of production.

	Plants, plant products and other objects	Requirements
19.	Plants for planting of Vitis L., other than seeds	Official statement that the plants for planting:  (a) originate in an area known to be free from Grapevine flavescence dorée phytoplasma,  or  (b) originate in a site of production where:  (i) no symptoms of Grapevine flavescence dorée phytoplasma on Vitis spp. have been observed at the site of production and in its immediate vicinity since the beginning of the last complete cycle of vegetation and in the case of plants used for the propagation of Vitis spp., no symptoms of Grapevine flavescence dorée phytoplasma on Vitis spp. have been observed at the site of production and in its immediate vicinity since the beginning of the two complete cycles of vegetation,  (ii) monitoring of the vectors is conducted and appropriate treatments are carried out to control the vectors of Grapevine flavescence dorée phytoplasma,  (iii) abandoned Vitis L. from the immediate vicinity of the site of production have been monitored during the growing season for symptoms of Grapevine flavescence dorée phytoplasma, and in case of symptoms have been rogued out or tested and found free of Grapevine flavescence dorée phytoplasma,  or  (c) have undergone hot water treatment according to international standards.
20.	Fruits of Citrus L., Fortunella Swingle, Poncirus Raf., and their hybrids	The packaging shall bear an appropriate origin mark.
21.	Seeds of Solanum tuberosum L., other than those specified in entry 3	Official statement that:  (a) the seeds derive from plants complying, as applicable, with the requirements set out in points 4, 5, 6, 7, 8 and 9, and that the seeds:  (b) originate in areas known to be free from Synchytrium endobioticum (Schilb.) Percival, Clavibacter sepedonicus (Spieckermann and Kottho) Nouioui et al., Ralstonia solanacearum (Smith) Yabuuchi et al. emend. Safni et al., or comply with all of the following requirements:  (i) they have been produced in a site where, since the beginning of the last cycle of vegetation, no symptoms of disease caused by the Union quarantine pests referred to in point (a) have been observed;

	Plants, plant products and other objects	Requirements
		<ul> <li>(ii) they have been produced at a site where all of the following actions have been taken:</li> <li>— prevention of contact with and hygiene measures concerning staff and items, such as tools, machinery, vehicles, vessels and packaging material, from other sites producing solanaceous plants to prevent infection are ensured;</li> <li>— only water free from all Union quarantine pests referred to in this point is used.</li> </ul>
22.	Wood of Juglans L. and Pterocarya Kunth, other than in the form of:  — chips, particles, sawdust, shavings, wood waste and scrap obtained in whole or part from these plants,	Official statement that the wood:  (a) originates in an area known to be free from <i>Geosmithia morbida</i> Kolarík, Freeland, Utley & Tisserat and its vector <i>Pityophthorus juglandis</i> Blackman, established by the competent authorities in accordance with the relevant International Standards for Phytosanitary
	<ul> <li>wood packaging material, in the form of packing cases, boxes, crates, drums and similar packings, pallets, box pallets and other load boards, pallet collars, dunnage, whether or not actually in use in the transport of objects of all kinds, except dunnage supporting consignments of wood, which is constructed from wood of the same type and quality as the wood in the consignment and which meets the same Union phytosanitary requirements as the wood in the consignment,</li> <li>but including that which has not kept its natural round surface.</li> </ul>	Measures; or  (b) has undergone an appropriate heat treatment to achieve a minimum temperature of 56 °C for a minimum duration of 40 continuous minutes throughout the entire profile of the wood. There shall be evidence thereof by a mark 'HT' put on the wood or on any wrapping in accordance with current usage; or  (c) has been squared to entirely remove the natural rounded surface.
23.	Isolated bark and wood of <i>Juglans</i> L. and <i>Pterocarya</i> Kunth, in the form of chips, particles, sawdust, shavings, wood waste and scrap obtained in whole or part from these plants.	Official statement that the wood or isolated bark:  (a) originates in an area free from <i>Geosmithia morbida</i> Kolarík, Freeland, Utley & Tisserat and its vector <i>Pityophthorus juglandis</i> Blackman, established by the competent authorities in accordance with the relevant International Standards for Phytosanitary Measures, or  (b) has undergone an appropriate heat treatment to achieve a minimum temperature of 56 °C for a minimum duration of 40 continuous minutes throughout the entire profile of the bark or the wood. There shall be evidence thereof by a mark 'HT' put on any wrapping in accordance with current usage.

	Plants, plant products and other objects	Requirements
24.	Wood of <i>Platanus</i> L., including wood which has not kept its natural round surface.	Official statement that:  (a) the wood originates in areas known to be free from Ceratocystis platani (J. M. Walter) Engelbr. & T. C. Harr.,  or  (b) the wood has undergone kiln-drying to below 20 % moisture content, expressed as a percentage of dry matter, at time of manufacture, achieved through an appropriate time/temperature schedule, and indicated by a mark 'kiln-dried', 'KD' or another internationally recognised mark, put on the wood or on its packaging in accordance with current commercial usage.
25.	Wood packaging material, in the form of packing cases, boxes, crates, drums and similar packings, pallets, box pallets and other load boards, pallet collars, dunnage, whether or not actually in use in the transport of objects of all kinds, except raw wood of 6 mm thickness or less, processed wood produced by glue, heat and pressure, or a combination thereof, and dunnage supporting consignments of wood, which is constructed from wood of the same type and quality as the wood in the consignment and which meets the same Union phytosanitary requirements as the wood in the consignment.	Official statement that the wood packaging material:  (a) originates in an area, free from Geosmithia morbida Kolarik, Freeland, Utley & Tisserat and its vector Pityophthorus juglandis Blackman, established by the competent authorities in accordance with the relevant International Standards for Phytosanitary Measures, or  (b) is made of debarked wood, as specified in Annex I to FAO International Standard for Phytosanitary Measures No 15 on Regulation of wood packaging material in international trade, and  (i) has been subjected to one of the approved treatments as specified in Annex I to that International Standard, and  (ii) displays a mark as specified in Annex II to that International Standard, indicating that the wood packaging material has been subjected to an approved phytosanitary treatment in accordance with this standard.

Protected zones

#### ANNEX IX

# List of plants, plant products and other objects, whose introduction into certain protected zones is prohibited

The protected zones listed in the third column of the following table respectively cover one of the following:

(a) the whole territory of the Member State listed;

Plants, plant products and other objects

- (b) the territory of the Member State listed with the exceptions specified within brackets:
- (c) only the part of the territory of the Member State which is specified within brackets.

CN code

1.	Plants and live pollen for pollination other than fruit and seeds, originating in third countries other than Switzerland and other than those recognised as being free from Erwinia amylovora (Burr.) Fruits of <i>Phoenix dactylifera</i> L.	Dates, fresh or dried: 0804 10 00	All third countries

ANNEX XII

List of plants, plant products and other objects for which a phytosanitary certificate is required for their introduction into a protected zone from certain third countries of origin or dispatch

Plants, plant products and other objects	CN code and its respective description under Council Regulation (EEC) No 2658/87	Country of origin or dispatch
1. Plants of		
Beta vulgaris L., intended for industrial processing.	Sugar beet, fresh: ex 1212 91 80	Third countries other than Switzerland.
	Mangold roots, fresh: ex 1214 90 10	
2. Parts of plants of		
Eucalyptus l'Hérit.	Foliage, branches and other parts of plants of <i>Eucalyptus</i> spp., without flowers or flower buds, and grasses, mosses and lichens, being goods of a kind suitable for bouquets or for ornamental purposes, fresh:  ex 0604 20 90	Third countries other than Switzerland.
	Eucalyptus spp. seeds: ex 1209 99 10	
	Plants and parts of plants of <i>Eucalyptus</i> spp.(including seeds and fruits), of a kind used primarily in perfumery, in pharmacy or for insecticidal, fungicidal or similar purposes, fresh, chilled, not frozen nor dried, whether or not cut, but not crushed nor powdered:	
	ex 1211 90 86	
	Vegetable products of plants of <i>Eucalyptus</i> spp., not elsewhere specified or included: ex 1404 90 00	
3. Parts of plants, other than frui		
Amelanchier Med.	Cut flowers and flower buds of a kind suitable for bouquets or for ornamental purposes, fresh: ex 0603 19 70	Third countries other than Switzerland.
	Foliage, branches and other parts of plants, without flowers or flower buds, and grasses, mosses and lichens, being goods of a kind suitable for bouquets or for ornamental purposes, fresh, dried, dyed, bleached, impregnated or otherwise prepared:  — Fresh:	
	ex 0604 20 90	
	Vegetable products not elsewhere specified or included:	
	ex 1404 90 00	

	T	T
Plants, plant products and other objects	CN code and its respective description under Council Regulation (EEC) No 2658/87	Country of origin or dispatch
Chaenomeles Lindl.	Cut flowers and flower buds of a kind suitable for bouquets or for ornamental purposes, fresh: ex 0603 19 70	Third countries other than Switzerland.
	Foliage, branches and other parts of plants, without flowers or flower buds, and grasses, mosses and lichens, being goods of a kind suitable for bouquets or for ornamental purposes, fresh, dried, dyed, bleached, impregnated or otherwise prepared:  - Fresh:  ex 0604 20 90	
	Vegetable products not elsewhere specified or included: ex 1404 90 00	
Cotoneaster Ehrh.	Cut flowers and flower buds of a kind suitable for bouquets or for ornamental purposes, fresh: ex 0603 19 70	Third countries other than Switzerland.
	Foliage, branches and other parts of plants, without flowers or flower buds, and grasses, mosses and lichens, being goods of a kind suitable for bouquets or for ornamental purposes, fresh, dried, dyed, bleached, impregnated or otherwise prepared:  - Fresh: ex 0604 20 90	
	Vegetable products not elsewhere specified or included: ex 1404 90 00	
Crataegus L.	Cut flowers and flower buds of a kind suitable for bouquets or for ornamental purposes, fresh: ex 0603 19 70	Third countries other than Switzerland.

#### ANNEX XIII

# List of plants, plant products and other objects for which a plant passport is required for movement within the Union territory

- 1. All plants for planting, other than seeds.
- Plants, other than fruits and seeds, of Choisya Kunth, Citrus L., Fortunella Swingle, Poncirus Raf., and their hybrids, Casimiroa La Llave, Clausena Burm. f., Murraya J. Koenig ex L., Vepris Comm., Zanthoxylum L. and Vitis
- 3. Fruits of *Citrus L., Fortunella Swingle, Poncirus Raf.* and their hybrids, with leaves and peduncles.
- 4. Wood, where it:
  - (a) is considered a plant product within the meaning of point 2 of Article 2 of Regulation (EU) 2016/2031; and
  - (b) has been obtained in whole or part from *Juglans* L., *Platanus* L. and *Pterocarya* L., including wood which has not kept its natural round surface; and
  - (c) falls under the respective CN code and corresponds to one of the following descriptions laid down in Part II of Annex I to Regulation (EEC) No 2658/87:

CN code	Description
4401 12 00	Non-coniferous fuel wood, in logs, in billets, in twigs, in faggots or in similar forms
4401 22 00	Non-coniferous wood, in chips or particles
4401 40 90	Wood waste and scrap (other than sawdust), not agglomerated
ex 4403 12 00	Non-coniferous wood in the rough, treated with paint, stains, creosote or other preservatives, not stripped of bark or sapwood, or roughly squared
ex 4403 99 00	Non-coniferous wood (other than tropical wood, oak ( <i>Quercus</i> spp.), beech ( <i>Fagus</i> spp.), birch ( <i>Betula</i> spp.), poplar and aspen ( <i>Populus</i> spp.) or eucalyptus ( <i>Eucalyptus</i> spp.)), in the rough, whether or not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives
ex 4404 20 00	Non-coniferous split poles; piles, pickets and stakes of non-coniferous wood, pointed but not sawn lengthwise
ex 4407 99	Non-coniferous wood (other than tropical wood, oak ( <i>Quercus</i> spp.), beech ( <i>Fagus</i> spp.), maple ( <i>Acer</i> spp.), cherry ( <i>Prunus</i> spp.), ash ( <i>Fraxinus</i> spp.), birch ( <i>Betula</i> spp.) or poplar and aspen ( <i>Populus</i> spp.)), sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or end-jointed, of a thickness exceeding 6 mm

Seed, where its movement is carried out within the scope of application of Directive 66/402/EEC, and for which specific RNQPs have been listed according to Article 37(2) of Regulation (EU) 2016/2031 in Annex IV, of:

<sup>—</sup> Oryza sativa L.

6.	Seed, where its movement is carried out within the scope of application of Directive 2002/55/EC, and for which specific RNQPs have been listed according to Article 37(2) of Regulation (EU) 2016/2031 in Annex IV, of:
	— Allium cepa L.,
	— Allium porrum L.,
	— Capsicum annuum L.,
	— Phaseolus coccineus L.,
	— Phaseolus vulgaris L.,
	— Pisum sativum L.,
	— Solanum lycopersicum L.,
	— Vicia faba L.
7.	Seeds of Solanum tuberosum L.
8.	Seed, where its movement is carried out within the scope of application of Directive 66/401/EC, and for which specific RNQPs have been listed according to Article 37(2) of Regulation (EU) 2016/2031 in Annex IV, of:
	— Medicago sativa L.
9.	Seed, where its movement is carried out within the scope of application of Directive 2002/57/EC, and for which specific RNQPs have been listed according to Article 37(2) of Regulation (EU) 2016/2031 in Annex IV, of:
	— Brassica napus L.,
	— Brassica rapa L.,
	— Glycine max (L.) Merrill,
	— Helianthus annuus L.,
	— Linum usitatissimum L.,
	— Sinapis alba L.
10.	Seed, where its movement is carried out within the scope of application of Directive 98/56/EC, and for which specific RNQPs have been listed according to Article 37(2) of Regulation (EU) 2016/2031 in Annex IV, of:
	— Allium L.,
	— Capsicum annuum L.
	— Helianthus annuus L.
	— Prunus avium L.,
	— Prunus armeniaca L.,
	— Prunus cerasus L.,
	— Prunus domestica L.,
	— Prunus dulcis (Mill.) D. A. Webb,
	— Prunus persica (L.) Batsch,

- 11. Seed, where its movement is carried out within the scope of application of Directive 2008/90/EC, and for which specific RNQPs have been listed according to Article 37(2) of Regulation (EU) 2016/2031 in Annex IV, of:
  - Prunus avium L.,
  - Prunus armeniaca L.,
  - Prunus cerasus L.,
  - Prunus domestica L.,
  - Prunus dulcis (Mill.) D. A. Webb,
  - Prunus persica (L.) Batsch,
  - Prunus salicina Lindley.

#### ANNEX XIV

List of plants, plant products and other objects for which a plant passport with the designation 'PZ' is required for introduction into, and movement within certain protected zones

- Plants of Abies Mill., Larix Mill., Picea A. Dietr., Pinus L. and Pseudotsuga Carr.
- Plants for planting, other than seeds, of Ajuga L., Beta vulgaris L., Cedrus
  Trew, Crossandra Salisb., Dipladenia A.DC., Euphorbia pulcherrima
  Willd., Ficus L., Hibiscus L., Mandevilla Lindl., Nerium oleander L.,
  Platanus L., Populus L., Prunus L., Quercus spp., other than Quercus
  suber, Ulmus L. and plants for planting of Begonia L., other than corms,
  seeds and tubers.
- Plants, other than fruit and seeds, of Aesculus hippocastanum L., Amelanchier Med., Arbutus unedo L., Camellia L., Castanea Mill., Chaenomeles Lindl., Cotoneaster Ehrh., Crataegus L., Cydonia Mill., Eriobotrya Lindl., Eucalyptus L'Herit., Lithocarpus densiflorus (Hook. & Arn.) Rehd., Malus Mill., Mespilus L., Photinia davidiana (Dene.) Cardot, Pyracantha Roem., Pyrus L., Rhododendron L., other than Rhododendron simsii Planch., Sorbus L., Syringa vulgaris L., Taxus L., Umbellularia californica (Hook. & Arn.) Nutt., Vaccinium L., Viburnum L. and Vitis L.
- 4. Plants of Palmae, intended for planting, having a diameter of the stem at the base of over 5 cm and belonging to the following taxa: Areca catechu L., Arenga pinnata (Wurmb) Merr., Bismarckia Hildebr. & H. Wendl., Borassus flabellifer L., Brahea Mart., Butia Becc., Calamus merrillii Becc., Caryota cumingii Lodd. ex Mart., Caryota maxima Blume, Chamaerops L., Cocos nucifera L., Copernicia Mart., Corypha utan Lam., Elaeis guineensis Jacq., Howea forsteriana Becc., Jubaea Kunth, Livistona R. Br., Metroxylon sagu Rottb., Phoenix L., Pritchardia Seem. & H. Wendl., Ravenea rivularis Jum. & H. Perrier, Roystonea regia (Kunth) O. F. Cook, Sabal Adans., Syagrus Mart., Trachycarpus H. Wendl., Trithrinax Mart., Washingtonia Raf.
- Live pollen for pollination of Amelanchier Med., Chaenomeles Lindl., Cotoneaster Ehrh., Crataegus L., Cydonia Mill., Eriobotrya Lindl., Malus Mill., Mespilus L., Photinia davidiana (Dene.) Cardot, Pyracantha Roem., Pyrus L. and Sorbus L.
- 6. Tubers of Solanum tuberosum L., intended for planting.
- 7. Plants of Beta vulgaris L., intended for industrial processing.
- 8. Soil from beet and unsterilized waste from beet (Beta vulgaris L.)
- 9. Seeds of Beta vulgaris L., Castanea Mill., Dolichos Jacq. and Gossypium spp.
- 10. Fruits (bolls) of Gossypium spp. and unginned cotton.
- 11. Wood, where it:
  - (a) is considered a plant product within the meaning of point 2 of Article 2 of Regulation (EU) 2016/2031; and
  - (b) has been obtained in whole or part from
    - conifers (Pinales), excluding wood which is bark-free,
    - Castanea Mill., excluding wood which is bark-free,
    - Platanus L., including wood which has not kept its natural round surface; and
  - (c) falls under the respective CN code and corresponds to one of the following descriptions laid down in Part II of Annex I to Regulation (EEC) No 2658/87:

CN code	Description
4401 11 00	Coniferous fuel wood, in logs, in billets, in twigs, in faggots or in similar forms
4401 12 00	Non-coniferous fuel wood, in logs, in billets, in twigs, in faggots or in similar forms
4401 21 00	Coniferous wood, in chips or particles
4401 22 00	Non-coniferous wood, in chips or particles
4401 40 90	Wood waste and scrap (other than sawdust), not agglomerated
ex 4403 11 00	Coniferous wood in the rough, treated with paint, stains, creosote or other preservatives, not stripped of bark or sapwood, or roughly squared
ex 4403 12 00	Non-coniferous wood in the rough, treated with paint, stains, creosote or other preservatives, not stripped of bark or sapwood, or roughly squared
ex 4403 21	Coniferous wood of pine ( <i>Pinus</i> spp.) in the rough, not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives, of which any cross-sectional dimension is 15 cm or more
ex 4403 22 00	Coniferous wood of pine ( <i>Pinus</i> spp.) in the rough, not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives, other than of which any cross-sectional dimension is 15 cm or more
ex 4403 23	Coniferous wood of fir ( <i>Abies</i> spp.) and spruce ( <i>Picea</i> spp.) in the rough, not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives, of which any cross-sectional dimension is 15 cm or more
ex 4403 24 00	Coniferous wood of fir ( <i>Abies</i> spp.) and spruce ( <i>Picea</i> spp.) in the rough, not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives, other than of which any cross-sectional dimension is 15 cm or more
ex 4403 25	Coniferous wood, other than of pine ( <i>Pinus</i> spp.), fir ( <i>Abies</i> spp.) or spruce ( <i>Picea</i> spp.), in the rough, not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives, of which any cross-sectional dimension is 15 cm or more
ex 4403 26 00	Coniferous wood, other than of pine ( <i>Pinus</i> spp.), fir ( <i>Abies</i> spp.) or spruce ( <i>Picea</i> spp.), in the rough, not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives, other than of which any cross-sectional dimension is 15 cm or more
ex 4403 99 00	Non-coniferous wood (other than tropical wood, oak ( <i>Quercus</i> spp.), beech ( <i>Fagus</i> spp.), birch ( <i>Betula</i> spp.), poplar and aspen ( <i>Populus</i> spp.) or eucalyptus ( <i>Eucalyptus</i> spp.)), in the rough, whether or not stripped of bark or sapwood, or roughly squared, other than treated with paint, stains, creosote or other preservatives
ex 4404	Split poles; piles, pickets and stakes of wood, pointed but not sawn lengthwise
4406	Railway or tramway sleepers (cross-ties) of wood

CN code	Description
ex 4407	Coniferous wood, sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or end-jointed, of a thickness exceeding 6 mm
ex 4407 99	Non-coniferous wood (other than tropical wood, oak ( <i>Quercus</i> spp.), beech ( <i>Fagus</i> spp.), maple ( <i>Acer</i> spp.), cherry ( <i>Prunus</i> spp.), ash ( <i>Fraxinus</i> spp.), birch ( <i>Betula</i> spp.) or poplar and aspen ( <i>Populus</i> spp.)), sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or end-jointed, of a thickness exceeding 6 mm

12. Isolated bark of Castanea Mill, and conifers (Pinales).
