Sewage disposal for Greater Oporto (Leça subsystem)

5. Brief description

This project forms part of a bigger project aimed at providing an appropriate solution for the draining, treatment and disposal of sewage and waste water from the Leça Basin.

The Leça subsystem comprises various elements, this phase relating to the entire realization of element C (coastal outlet pipes) and the conclusion of element F (regulating and cleaning up streams).

The 'coastal outlet pipes' component comprises three pipes consisting of 9 354 metres of pressurized pipeline, 6 294 metres of gravity pipeline and 5 pumping stations.

The 'regulating and cleaning up of streams' component aims to regulate the course of the Picoutos and Joane streams and the construction of outlet pipes along their routes.

The project specifications must comply with the provisions of Council Directive 91/271/EEC ⁽¹⁾.

6. Principal objectives

The entire Leça subsystem will cover the heavily industrialized municipality of Matosinhos (400 installed industrial units) whose current population (160 000 inhabitants) is expected to double by the completion of the project (2 030).

Urban and industrial development has caused serious pollution of the Leça and adversely affected the quality of the water throughout nearly all the coastal area of the region.

The project is to remedy the situation, in particular by means of treating all the waste water, both domestic and industrial, and ensuring the appropriate treatment of effluents released into the sea so as to bring the quality of bathing water into line with the requirements of Council Directive 76/160/EEC ⁽²⁾.

⁽¹⁾ OJ No L 135, 30. 5. 1991, p. 40.

⁽²⁾ OJ No L 31, 5. 2. 1976, p. 1.

7. Work schedule

	Date of commencement	Date of completion
Design		
Land purchase	December 1992	October 1993
Principal work	November 1992	December 1994
Operational phase	January 1995	

8. Economic analysis

The cost-benefit study for the entire project and for a period of 20 years shows an internal rate of return of 4,7%.

Investment is justified given the nature of the project and taking into account its qualitative benefits.

9. Environmental impact study

An environmental impact study was conducted on the project and its various component parts to evaluate the effect of the construction and operation of the system on the environment. Particular attention was paid in the study to the circumstances in which final effluent was discharged into the sea.

Conclusions indicated that the construction phase would entail temporary adverse effects such as noise pollution and dust but no adverse effects for the flora and fauna of the region.

The operational phase will have a clearly positive effect on regulating the water courses and the quality of bathing water and public health. A negative aspect will be the (moderate) release of odours near the treatment plant.

The study already identifies measures to be taken to reduce adverse effects in both phases of the project.

With regard to the discharge of final effluent, the solution proposed for waste water is considered to be entirely compatible with Community norms and the primary treatment will be sufficient, since the design of the off-shore sewage pipe allows for the necessary dilution and dispersion.

The need for more sophisticated treatment has not been excluded and the study proposes a monitoring programme which will make it possible to evaluate the situation throughout the operational phase.

FINANCIAL IMPLEMENTING PROVISIONS

1. The financial provisions referred to in Article 9 of Regulation (EEC) No 792/93 shall be implemented as follows:

Community assistance

2. Community assistance shall be expressed as a percentage of eligible expenditure. If the actual expenditure incurred differs from the expenditure initially planned, the Community assistance granted shall be varied to take account of this but may not exceed the maximum amount stated in the Decision. A change of the rate of Community assistance or of the maximum amount of the grant will require a modification of decision according to the procedures described in point 12.

Commitments and payments

3. The Member State shall undertake to ensure that, for the project to which this Decision relates, all public or private bodies involved in the management and implementation of these operations maintain either a separate accounting system or an adequate accounting codification of all transactions concerned which will facilitate the verification of expenditure by the Community and national control authorities.
4. Budgetary commitments and payments shall be made in accordance with Article 9 (4), (5) and (6) of Regulation (EEC) No 792/93.
5. All payments of aid granted by the Commission under this Decision shall be made to the authority designated by the Member State, which shall also be responsible for refunding any overpaid amounts to the Commission. Payments shall be made to a single bank account designated by the Member State. As a general rule, the Commission shall make payments no later than two months after receipt of a valid application.

6. The Member State shall ensure that applications for payment and statements of expenditure actually incurred comply with the financing plan, including the schedule of expenditure, annexed to this Decision, as amended where appropriate, following the procedures laid down in points 12 and 13.
7. In accordance with Article 22 of Council Regulation (EEC) No 4253/88, all commitments and payments shall be in ecus.
8. Statements of expenditure in support of applications for payment shall be denominated in ecus or in national currency.
9. Member States which submit statements of expenditure in ecus shall convert the amounts of expenditure incurred in national currency into ecus using the rate for the month during which the expenditure was booked in the accounts of the authorities responsible for the financial management of projects. Each month the Commission shall inform the Member States of the rate to be used for that purpose.
10. Statements of expenditure in national currency shall be converted into ecus at the rate for the month when they were received by the Commission.

Recovery of undue payments

11. Any sum wrongly paid shall be repaid to the Commission by the authority designated in point 5. Interest on account of late payments shall be charged on sums not repaid in accordance with Article 24 (3) of Council Regulation (EEC) No 4253/88. If the authority designated under point 5 does not repay the amount due to the Community, the Member State shall refund this amount to the Commission.

Procedure for amending the project Decision

12. Any amendments to the Decision shall be made in accordance with the following procedures:
 - (a) amendments which entail a substantial change in the objectives or characteristics of the project, an increase or reduction in the rate of financing applied or the maximum amount of assistance or a substantial change in the financing plan or schedule of expenditure shall be made by means of a Commission decision taken in response to a request by the Member State or on the initiative of the Commission, after consultation with the Member State;
 - (b) in the case of other amendments, the Member State shall send the Commission a proposal for amendment. The Commission shall make its comments or signify its agreement within 20 working days of receipt of the proposal. The amendments shall be adopted when the Commission has given its agreement.
13. Any change in annual expenditure of less than 10% of the total expenditure planned for the project shall not be regarded as a substantial change.

Procedure for closing a project

14. The time limits for complying with the legal obligations contracted under this Decision shall be complied with and payments made in accordance with Article 4 of the Decision. These may be amended before they expire in accordance with the procedure in point 12 (b) provided that the extension does not exceed one year. For that purpose, the Member State shall send the Commission a proposal for amendment together with information justifying the amendment. Where the extension exceeds one year, the procedure in point 12 (a) shall apply.
15. If the time limit is not extended, any expenditure incurred after the dates indicated in Article 4 of the Decision shall not be eligible for assistance from the financial instrument.

This letter of notification shall also state the action to be taken in respect of Community funds already paid out for the project.
3. For projects in respect of which the above steps have been taken, the current and the remaining payments shall be considered suspended totally or in part until the Commission is satisfied that the necessary remedial measures have been taken.
