COMMISSION DIRECTIVE 2008/89/EC

of 24 September 2008

amending, for the purposes of its adaptation to technical progress, Council Directive 76/756/EEC concerning the installation of lighting and light-signalling devices on motor vehicles and their trailers

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Directive 76/756/EEC should therefore be amended in order to allow the fitting of these devices.

Having regard to the Treaty establishing the European Community,

(4) In order to take into account further amendments to UN/ECE Regulation No 48 ⁽⁴⁾ on which the Community has already voted, it is appropriate to adapt Directive 76/756/EEC to technical progress by aligning it to the technical requirements of this UN/ECE Regulation. In the interest of clarity Annex II to Directive 76/756/EEC should be amended.

Having regard to Directive 2007/46/EC of the European Parliament and of the Council of 5 September 2007 establishing a framework for the approval of motor vehicles and their trailers, and of systems, components and separate technical units intended for such vehicles ⁽¹⁾, and in particular Article 39(2) thereof,

(5) Directive 76/756/EEC should therefore be amended accordingly.

Whereas:

(6) The measures provided for in this Directive are in accordance with the opinion of the Technical Committee — Motor Vehicles,

(1) Council Directive 76/756/EEC of 27 July 1976 on the approximation of the laws of the Member States relating to the installation of lighting and light-signalling devices on motor vehicles and their trailers ⁽²⁾ is one of the separate Directives in the context of the EC type approval procedure established under Council Directive 70/156/EEC of 6 February 1970 on the approximation of the laws of the Member States relating to the type approval of motor vehicles and their trailers ⁽³⁾. The provisions of Directive 70/156/EEC relating to systems, components and separate technical units for vehicles therefore apply to Directive 76/756/EEC.
