Joint declaration by the European Parliament, Council and Commission on the treatment of NGEU interest costs and repayments in the 2021-2027 MFF

(2020/C 444 I/04)

The three Institutions agree that expenditures covering the financing costs of Next Generation EU shall aim at not reducing EU programmes and funds.

The three Institutions agree that the treatment of NGEU interest costs and repayments in the 2021-2027 MFF, currently forecast at EUR 12.9 billion for the seven years, is without prejudice to how this matter will be addressed in future MFFs from 2028 onwards.

The three Institutions agree to work towards introducing sufficient new own resources with a view to covering an amount corresponding to the expected expenditure related to repayment and interest costs.
