ANNEX

Description of the goods	Classification (CN code)	Reasons
(1)	(2)	(3)
<p>A forged article (so-called heat sink) made of aluminium (not produced by casting), in the form of a circular plate with a diameter of approximately 50 mm, to which cooling pins with a height of approximately 30, 40 or 50 mm are attached.</p> <p>It is presented to be used in various products to dissipate the heat produced by LED modules. (See image) (*).</p>	7616 99 90	<p>Classification is determined by general rules 1 and 6 for the interpretation of the Combined Nomenclature and by the wording of CN codes 7616, 7616 99 and 7616 99 90.</p> <p>Classification under CN code 9405 99 00 as a part of lamps or lighting fittings is excluded because, upon presentation to customs authorities, the article is not identifiable by its shape or other specific features as a part designed solely or principally for an article under heading 9405 (see also the Harmonised System Explanatory Notes to Chapter 94, Parts, first paragraph).</p> <p>The article is not adapted for use as part of a specific product. Therefore, upon presentation, it cannot be identified as a part of goods of any specific heading (for example, under heading 8539, 8541 or 8543). Consequently, classification as a part of articles is excluded.</p> <p>The article is therefore to be classified under CN code 7616 99 90 as other articles of aluminium not produced by casting.</p>
