REGULATIONS

REGULATION (EU) 2022/2370 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 23 November 2022
amending Regulation (EC) No 851/2004 establishing a European centre for disease prevention and control

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 168(5) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee (1),

Having regard to the opinion of the Committee of the Regions (2),

Acting in accordance with the ordinary legislative procedure (3),

Whereas:

(1) The Union is committed as a priority to protecting and improving human health through the prevention of disease and by fighting against major cross-border health scourges by means of monitoring, assessing, communicating on, improving preparedness for, providing early warning of and combating serious cross-border threats to health.

(2) The European Centre for Disease Prevention and Control (the ‘Centre’) was established by Regulation (EC) No 851/2004 of the European Parliament and of the Council (4) as an independent European agency with the mission to identify, assess and communicate current and emerging threats to human health from communicable diseases.

(3) On 11 March 2020, the World Health Organization (WHO) declared the COVID-19 outbreak a global pandemic. Given the challenges experienced in responding to the pandemic, it became clear that the Union’s framework for health crisis preparedness and response should be strengthened to better use the potential of the Union’s and Member States’ capacities to respond to future pandemics.

(2) OJ C 300, 27.7.2021, p. 76.
In its decision of 5 February 2021 in strategic inquiry OI/3/2020/TE, the European Ombudsman identified some important gaps in the effectiveness of the Centre’s response to the COVID-19 pandemic, such as regarding complete and comparable data, the level of transparency and communications to the public. Those shortcomings should be addressed in this Regulation.

The capacity of the Centre to implement new tasks will depend on the level of financial assistance available from the Union, as well as on the internal and external human resources available. In order to be able to fulfil the new tasks entrusted to it as a result of the COVID-19 pandemic, the Centre will need sufficient funding and staffing. Project-oriented funds, such as those allocated under the EU4Health Programme, established by Regulation (EU) 2021/522 of the European Parliament and of the Council (5), are not sufficient to respond to the Centre’s needs in the future.

The overexploitation of wildlife and other natural resources and the accelerated loss of biodiversity pose a risk to human health. As the health of humans, animals and the environment are inextricably linked, it is crucial to follow the ‘One Health’ approach to addressing current and emerging crises.

In their joint opinion ‘Improving pandemic preparedness and management’, the Group of Chief Scientific Advisors to the Commission, the European Group on Ethics in Science and New Technologies and the Special Advisor to the President of the Commission on the response to COVID-19 recommend establishing ‘a standing EU advisory body for health threats and crises’.

This Regulation should therefore expand the mission and tasks of the Centre in order to enhance the Centre’s capacity to provide the required robust and independent scientific expertise, and to support actions which are relevant to the prevention, preparedness and response planning for and the combatting of serious cross-border threats to health in the Union, in accordance with Regulation (EU) 2022/2371 of the European Parliament and of the Council (6).

The COVID-19 pandemic has highlighted that major communicable diseases can have severe implications for patients with non-communicable diseases, such as delays in or the interruption to treatment for cancer patients and survivors, and for people with mental health issues. The healthcare professionals caring for patients with non-communicable diseases have had the challenge of diagnosing and caring for patients while trying to remain safe themselves. In addition, the diagnoses of certain diseases have been long delayed which has led to those diseases being detected when they are at an advanced stage. Furthermore, much still has to be learned about the effect of communicable diseases on non-communicable diseases, such as post-COVID-19 conditions. The COVID-19 pandemic has also put mental and neurological health in the spotlight. People living with dementia, their carers and family have indicated that the various social distancing and lockdown measures have had a major impact on their well-being, and there are indications that this speeded up the progress of the disease. Hence, the impact which a serious outbreak of a communicable disease can have on the prevention and treatment of non-communicable diseases and comorbidities needs to be considered, given the significant pressure it places on health system capacity.

The Centre should be tasked with providing timely epidemiological information and analysis of that information, epidemiological modelling, anticipation and forecasting, and with providing timely relevant risk assessments and science-based recommendations, which set out options for the prevention and control of communicable diseases. Risk assessments should be carried out in as short a period as possible, while ensuring that sufficient necessary information is gathered. The Centre’s actions should be consistent with the ‘One Health’ approach, recognising the interconnections between human and animal health and the environment, as many outbreaks of communicable diseases are of zoonotic origin. The Centre should, in close cooperation with Member States, monitor the capacity of Member States’ health systems to detect, prevent, respond to and recover from outbreaks of communicable diseases, identify gaps and provide science-based recommendations for the strengthening of health systems. The

(6) Regulation (EU) 2022/2371 of the European Parliament and of the Council of 23 November 2022 on serious cross-border threats to health and repealing Decision No 1082/2013/EU (see page 26 of this Official Journal).
monitoring of Member States' health system capacity should be based on agreed indicators. The Centre should
organise visits to Member States to provide additional support for prevention, preparedness and response planning
activities. The Centre should support the implementation of actions that are funded by the relevant Union funding
programmes and instruments, and are related to communicable diseases. It should also provide guidelines for case
management and support for professional networks to improve guidelines for treatment based on a thorough
assessment of the latest evidence. The Centre should support epidemic and outbreak responses in Member States
and third countries, including field response and personnel training, and provide the public with timely, objective,
reliable and easily accessible information on communicable diseases. The Centre should also establish clear
procedures for cooperation with the public health actors in third countries, as well as international organisations
competent in the field of public health, such as the WHO, hence contributing to the Union's commitment to
reinforcing partners' preparedness and response capacity.

(11) All recommendations, advice, guidance or opinions provided by the Centre under this Regulation are inherently
non-binding on their addressees. Recommendations issued by the Centre allow it to make its views known and to
suggest a line of action without imposing any legal obligation on those to whom such recommendations are
addressed.

(12) It is essential that the Centre have access to timely and complete data in order for it to be able to carry out risk
assessments in a timely manner and provide relevant recommendations. To effectively support the work of the
Centre and ensure the fulfilment of its mission, Member States should therefore communicate to the Centre, in a
timely manner, comparable data on the surveillance of communicable diseases, such as HIV, viral hepatitis B and C
and tuberculosis, as well as on related special health issues, namely antimicrobial resistance and healthcare-
associated infections. Member States should also provide available scientific and technical data and information
relevant to the Centre's mission, notify the Centre of any serious cross-border threats to health and provide
information on prevention, preparedness and response planning and on health system capacity. The Centre and the
Member States should agree on timelines, case definitions, indicators, standards, protocols and procedures for the
purposes of surveillance. Member States should inform the Centre about any delays in communicating data. In any
event, Member States should provide the data required by this Regulation, in so far as it does not conflict with
safeguarding national security.

(13) The Commission, in collaboration with the Centre, the European Environment Agency, the European Chemicals
Agency and the European Food Safety Authority, should foster systematic integration of the analysis and assessment
of risks associated with environmental, climate and food factors with epidemiological surveillance, taking into
consideration the weaknesses of national health systems and the focus on vulnerable groups in the population, in
order to work towards a holistic approach to the prevention and early detection of communicable diseases.

(14) To enhance prevention, preparedness and response planning activities in the Union, the Centre's operation of
dedicated networks and networking activities should be broadened to reflect the scope of Regulation (EU) 2022/
2371. To this end, the Centre should coordinate with and provide scientific and technical expertise to the
Commission, Member States and the Health Security Committee (HSC) established by that Regulation, through
dedicated networks of coordinating competent bodies, including by encouraging cooperation within the Union's
newly established networks of services supporting the use of substances of human origin.

(15) With a view to enhancing the effectiveness of epidemiological surveillance in the Union, the Centre should be tasked
with the continuous development of secure and interoperable digital platforms and applications, supporting
epidemiological surveillance at Union level, enabling the use of digital technologies, such as artificial intelligence
and computer modelling and simulation, in the compilation and analysis of data, and with providing Member States
with scientific and technical advice to establish integrated epidemiological surveillance systems.

(16) To strengthen the capacity of the Union and the Member States to assess the epidemiological situation and carry out
accurate risk assessment and response, the Centre should, in particular, identify emerging health threats, monitor
and report on trends in communicable diseases, support, coordinate and facilitate evidence-based response, provide
recommendations for the improvement of communicable disease prevention and control programmes established at
Union and national level, monitor, in close cooperation with Member States, the capacity of national health systems for diagnosis, prevention and treatment of communicable diseases, including in a gender-sensitive way, identify population groups at risk that require specific measures, analyse the correlation of disease incidence with societal, environmental and climate factors, and identify risk factors for transmission and disease severity of communicable diseases as well as research needs and priorities. The Centre should carry out those tasks on the basis of a set of common indicators developed in close collaboration and consultation with Member States. The Centre should work with designated national focal points for surveillance, which form a network that provides strategic advice to the Centre on such matters and would promote the use of enabling sectors, such as EU space data and services. Where possible and in order to minimise duplication of resources and efforts, national focal points should be the same as the national focal points provided for under the International Health Regulations (IHR).

(17) The Centre should help strengthen the capacity within the Union to diagnose, detect, identify and characterise infectious agents which have the potential to threaten public health, by ensuring the operation of a dedicated network of EU reference laboratories for public health set up in accordance with Regulation (EU) 2022/2371, and that such operation occurs in an integrated manner. That network will be responsible for the promotion of good practice in and alignment of diagnostics, testing methods, training in current and innovative procedures and use of tests, in order to ensure uniform surveillance, notification and standardised procedures for reporting of diseases, as well as improved quality of testing and surveillance.

(18) In the case of a serious cross-border threat to health posed by a communicable disease, the Centre should cooperate with Member States to safeguard patients in need of treatment using a substance of human origin from the transmission of such a communicable disease. The Centre should therefore establish and operate a network of services supporting the use of substances of human origin.

(19) With the aim of reducing the occurrence of epidemics and strengthening capacities to prevent communicable diseases in the Union, the Centre should, working in conjunction with Member States so as to take account of their experiences and respective circumstances, develop a framework for the prevention of communicable diseases which addresses such issues as vaccine preventable diseases, vaccine hesitancy, awareness of transmission routes, antimicrobial resistance, health education, health literacy, disease prevention and behaviour change.

(20) The Centre should enhance preparedness and response capacity at Union and national level by providing scientific and technical expertise to the Member States and the Commission. In this context, the Centre, in close collaboration with Member States and the Commission, should carry out various actions, including contributing to the development of frameworks for Union prevention, preparedness and response plans, regularly reviewing and updating those frameworks, providing science-based recommendations on capacities for prevention of, preparation for and response to disease outbreaks and on the strengthening of national health systems, including by providing training and sharing best practices. The frameworks for Union prevention, preparedness and response plans should be considered to be non-binding instruments. The Centre should broaden its collection and analysis of data in terms of epidemiological surveillance and related special health issues, progression of epidemic situations, unusual epidemic phenomena or new diseases of unknown origin, including in third countries, molecular pathogen data and health systems data. To this end, the Centre should ensure appropriate datasets as well as the procedures to facilitate consultation and secure data transmission and access, and the Centre should work towards enabling real-time sharing of data, carry out scientific and technical evaluation of prevention and control measures at Union level and work with the WHO, relevant Union agencies and other relevant bodies and organisations operating in the field of data collection.

(21) Within its mandate, the Centre should respond to the requests of Member States or the Commission in a timely manner.

(22) Regulation (EU) 2022/2371 provides for the Early Warning and Response System (EWRS) which enables the notification at Union level of alerts related to serious cross-border threats to health and which continues to be operated by the Centre. Given that modern technologies can be of substantial support in combating health threats and in containing and reversing epidemics, the Centre should work on updating the EWRS to enable the use of
artificial intelligence technologies and interoperable and privacy-preserving digital tools, such as mobile applications, with tracing functionalities identifying at-risk individuals. In carrying out that updating, the Centre should mitigate the risks, such as those related to biased datasets, flawed system design, lack of quality data and overdependence on automated decision-making, and should take into account the importance of establishing safeguards to mitigate those risks during the design and implementation phases of artificial intelligence technologies.

(23) The Centre should establish appropriate capacities to support international, cross-border interregional and field response, in accordance with Regulation (EU) 2022/2371. Those capacities should enable the Centre to mobilise and deploy outbreak assistance teams, known as the 'EU Health Task Force', to assist in local responses to disease outbreaks and collect field data. The Centre should therefore ensure that it has a permanent capacity to carry out missions in Member States, as well as in third countries, and to provide science-based recommendations on response to health threats. Teams from the EU Health Task Force should also be able to be deployed under the Union Civil Protection Mechanism with the support of the Emergency Response Coordination Centre. The effective operation of the EU Health Task Force should be based on in-depth country knowledge which can be gained through input from national experts. The Centre should also support the strengthening of preparedness capacities under the IHR in third countries, in order to address serious cross-border threats to health and the consequences thereof. In order to strengthen the operational interface between the Centre and Member States, the Centre should maintain mechanisms for regular secondments between the Centre, the Commission, Member States’ experts and international organisations, as well as introduce systematic and permanent working arrangements within the Centre, for example through desk officers.

(24) The EU Health Task Force to be developed by the Centre to support responses to outbreaks of diseases which can spread within or to the Union should be permanent and be accompanied by a framework for its mobilisation. In addition, it should facilitate the participation of Union field response experts in international response teams in support of and in close coordination with the Union Civil Protection Mechanism. The Centre should enhance the capability of its staff as well as experts from Member States and EEA countries, from candidate countries and potential candidates, as well as from European Neighbourhood Policy countries and partner countries as referred to in Regulation (EU) 2021/947 of the European Parliament and of the Council (7), to effectively participate in field missions and crisis management.

(25) Experts and stakeholders, including civil society organisations, should be engaged in and contribute to the Centre’s advisory processes. Compliance with rules on transparency and on conflicts of interest in relation to stakeholder engagement should be ensured.

(26) The Centre should work in close cooperation with competent bodies and international organisations in the field of public health, in particular the WHO. Such cooperation should take into consideration the need to avoid duplication of efforts.

(27) The Centre should communicate in an effective and transparent manner about current and emerging health risks to the general public. Scientific studies by the Centre should be accessible.

(28) In order to assess the effectiveness and efficiency of the legal provisions applicable to the Centre, it is appropriate to provide for a regular evaluation of the performance of the Centre by the Commission.

(29) This Regulation should not confer any regulatory powers on the Centre.

(30) The Centre should implement an information system capable of exchanging classified and sensitive non-classified information, in order to ensure that such information is managed with the utmost discretion.

Personal data concerning health are considered to be sensitive data under applicable Union legislation on data protection and therefore enjoy a higher level of protection. Any processing of personal data pursuant to this Regulation by Member States or the Centre is subject to Regulations (EU) 2016/679¹ and (EU) 2018/1725¹ of the European Parliament and of the Council, respectively, and Directive 2002/58/EC¹ of the European Parliament and of the Council. Processing of personal data under this Regulation should respect the data protection principles of lawfulness, fairness, transparency, purpose limitation, data minimisation, accuracy, storage limitation, integrity and confidentiality. Whenever possible, personal data should be anonymised. Where anonymisation would not allow the specific purpose of the processing to be achieved, the personal data should, where possible, be pseudonymised. In the case of cooperation between the health authorities of the Union and third countries, the WHO or other international organisations, transfers of personal data to third countries or international organisations should always comply with the rules laid down in Regulation (EU) 2018/1725.

In order to ensure uniform conditions for the implementation of this Regulation concerning the rapid mobilisation and responsiveness of the EU Health Task Force, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council¹.

Since the objectives of this Regulation, namely to expand the mission and tasks of the Centre in order to enhance the Centre’s capacity to provide the required scientific expertise and to support actions which combat serious cross-border threats to health in the Union, cannot be sufficiently achieved by the Member States but can rather, by reason of the cross-border nature of the health threats and the need for a rapid, better coordinated and coherent response to new emerging health threats, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.

Regulation (EC) No 851/2004 should therefore be amended accordingly,

HAVE ADOPTED THIS REGULATION:

Article I

Regulation (EC) No 851/2004 is amended as follows:

(1) Article 2 is replaced by the following:

‘Article 2

Definitions

For the purposes of this Regulation, the following definitions apply:

(1) “competent body” means any structure, institute, agent or other scientific body recognised by Member States’ authorities as providing independent scientific and technical advice or capacity for action in the field of the prevention and control of human disease;

(2) “coordinating competent body” means a body in each Member State with a designated national coordinator responsible for institutional contacts with the Centre, as well as national focal points and operational contact points responsible for strategic and operational collaboration on scientific and technical issues for specific disease areas and public health functions;

(3) “dedicated network” means any specific network on diseases, related special health issues or public health functions that is supported and coordinated by the Centre and is intended to ensure collaboration between the coordinating competent bodies of the Member States;

(4) “communicable disease” means a communicable disease as defined in Article 3, point (3), of Regulation (EU) 2022/2371 of the European Parliament and of the Council (*);

(5) “serious cross-border threat to health” means a serious cross-border threat to health as defined in Article 3, point (1), of Regulation (EU) 2022/2371;

(6) “epidemiological surveillance” means epidemiological surveillance as defined in Article 3, point (5), of Regulation (EU) 2022/2371;

(7) “related special health issues” means related special health issues as referred to in Article 2(1), point (a)(ii), of Regulation (EU) 2022/2371;

(8) “monitoring” means monitoring as defined in Article 3, point (6), of Regulation (EU) 2022/2371;

(9) “health system capacity” means health system capacity as defined in Article 3, point (13), of Regulation (EU) 2022/2371.

(2) Article 3 is replaced by the following:

‘Article 3

Mission and tasks of the Centre

1. In order to enhance the capacity of the Union and the Member States to protect human health through the prevention and control of communicable diseases in humans and related special health issues, the mission of the Centre shall be to identify and assess current and emerging threats to human health from communicable diseases and related special health issues, to report thereon and, where appropriate, to ensure that information thereon is presented in an easily accessible way. The Centre shall act in collaboration with competent bodies of the Member States or on its own initiative, through a dedicated network. The mission of the Centre shall also be to provide science-based recommendations and support in coordinating the response at Union and national levels, as well as at cross-border interregional and regional level, to such threats, where appropriate. In providing such recommendations, the Centre shall, where necessary, cooperate with Member States and take into account existing national crisis management plans and the respective circumstances of each Member State.

In the case of other outbreaks of diseases of unknown origin that may spread within or to the Union, the Centre shall act on its own initiative until the source of the outbreak is known. In the case of an outbreak that is clearly not of a communicable disease, the Centre shall act only in cooperation with the coordinating competent bodies and upon their request, and provide a risk assessment.

In pursuing its mission, the Centre shall respect the responsibilities of the Member States, the Commission and other Union bodies or agencies, and the responsibilities of third countries and international organisations active within the field of public health, in particular the WHO, in order to ensure that there is comprehensiveness, coherence and complementarity of action and that actions are coordinated.
The Centre shall support the work of the Health Security Committee (HSC), established by Article 4 of Regulation (EU) 2022/2371, the Council, the Member States and, where relevant, other Union structures, in order to promote effective coherence between their respective activities and to coordinate responses to serious cross-border threats to health, within its mandate.

2. The Centre shall perform the following tasks:

(a) search for, collect, collate, evaluate and disseminate relevant scientific and technical data and information, using the most effective technologies, such as, where relevant, artificial intelligence, respecting European standards regarding ethical aspects;

(b) develop, in close collaboration and consultation with Member States, relevant common indicators for standardised data collection procedures and risk assessments;

(c) provide analyses, scientific and technical advice, opinions, guidelines, science-based recommendations and support for actions by the Union and Member States, to prevent and control communicable diseases and related special health issues, including risk assessments, analysis of epidemiological information, prevention, preparedness and response planning and epidemiological modelling, anticipation and forecasting;

(d) promote and coordinate the networking of bodies, organisations and experts operating in the Union in the fields relevant to the Centre’s mission, including networks arising from public health activities supported by the Commission, and operate dedicated networks on surveillance, while ensuring full compliance with the rules on transparency and conflicts of interest;

(e) promote and facilitate the exchange of scientific and technical information and expertise and of best practices, including through training, among Member States and other Union agencies and bodies;

(f) monitor, in close cooperation with Member States, their health system capacity and support the collection of data on their health system capacity to the extent necessary for the management of and response to communicable disease threats and related special health issues, based on the preparedness indicators referred to in Article 5b(2), point (b), of this Regulation and the elements set out in Article 7(1) of Regulation (EU) 2022/2371.

(g) organise on-site visits in Member States, on a case-by-case basis, in close collaboration with the Member States concerned, to provide additional support to prevention, preparedness and response planning activities as referred to in Article 5b;

(h) support national monitoring of response to major communicable diseases;

(i) contribute to defining research priorities and to facilitating the development and implementation of actions funded by relevant Union funding programmes and instruments, including the implementation of joint actions in the area of public health;

(j) provide, at the request of the Commission or the HSC, or on its own initiative, guidelines, recommendations and proposals for coordinated action for surveillance, monitoring, diagnosis and case management of communicable diseases and related special health issues, and support for professional networks to improve treatment guidelines in cooperation with relevant organisations and associations, national competent bodies and international organisations such as the WHO, while avoiding any duplication of existing guidelines;

(k) support, for example through the EU Health Task Force referred to in Article 11a, epidemic and outbreak response in Member States, based on in-depth country knowledge, and in third countries in cooperation with the WHO, in a manner that is complementary to, and in close coordination with, other emergency response instruments, in particular the Union Civil Protection Mechanism, and relevant instruments on the stockpiling of medical countermeasures;
(l) contribute to strengthening preparedness capacities under the IHR, including training, in Member States and in third countries, in particular partner countries, while ensuring that synergies with the work of the WHO are achieved;

(m) provide, at the request of the Commission or the HSC, or on its own initiative, timely, easily accessible and evidence-based communication messages to the public, in all official languages of the Union, on communicable diseases and threats to health posed by communicable diseases, as well as on the relevant prevention and control measures, with due regard for the competences of the Member States.

3. The Centre, the Commission, the relevant Union bodies or agencies and the Member States shall cooperate in a transparent manner to promote effective coherence and synergies between their respective activities.

(3) Article 4 is replaced by the following:

‘Article 4

Obligations of Member States

Member States shall coordinate and collaborate with the Centre, in relation to the mission and tasks set out in Article 3, by:

(a) communicating regularly to the Centre, in accordance with agreed timelines, case definitions, indicators, standards, protocols and procedures, data on the surveillance of communicable diseases, related special health issues and other serious cross-border threats to health undertaken in accordance with Article 13 of Regulation (EU) 2022/2371, and available scientific and technical data and information necessary for the Centre to fulfil its mission referred to in Article 3(2), point (e), of this Regulation, including relevant data on the capacity of health systems for crisis preparedness in relation to detecting, preventing, responding to and recovering from outbreaks of communicable diseases;

(b) notifying the Centre of any serious cross-border threats to health, as soon as detected, through the Early Warning and Response System (EWRS) provided for under Article 18 of Regulation 2022/2371, and promptly communicating any response measures taken, as well as any relevant information that is useful for coordinating the response as referred to in Article 21 of that Regulation;

(c) identifying, within the scope of the mission of the Centre, competent bodies and public health experts and organisations that could be available to assist in the Union response to serious cross-border threats to health, such as by undertaking missions to Member States, cross-border regions and third countries in cooperation with the WHO, in order to provide expert advice and carry out field investigations in the event of disease clusters or outbreaks;

(d) preparing national prevention, preparedness and response plans in accordance with Article 6 of Regulation (EU) 2022/2371 and reporting on prevention, preparedness and response planning and implementation at national level in accordance with Article 7 of that Regulation;

(e) facilitating the digitalisation of data collection and the data communication process between national and European surveillance systems to provide timely delivery of the necessary information; and

(f) informing the Centre about any delay in meeting the timelines referred to in point (a).’;

(4) Article 5 is replaced by the following:

‘Article 5

Operation of dedicated networks and networking activities

1. The Centre shall support and continuously develop the networking activities of competent bodies through the provision of coordination and scientific and technical expertise to the Commission and Member States and through the operation of dedicated networks.
2. The Centre shall ensure the integrated operation of the network for epidemiological surveillance referred to in Article 13(1) of Regulation (EU) 2022/2371, surveillance of health-related environmental hazards as referred to in Article 2(1), point (c), of that Regulation, and the integrated operation of a network of EU reference laboratories as referred to in Article 15 of that Regulation.

It shall in particular:

(a) ensure the continuous development of automated digital platforms and applications, including the digital platform for surveillance established under Article 14 of Regulation (EU) 2022/2371, that are subject to human oversight, support epidemiological surveillance at Union level, and support Member States with scientific and technical data and advice to establish integrated surveillance systems enabling real-time surveillance for preparedness, where appropriate and feasible, benefiting from existing Union space infrastructure and services;

(b) provide quality assurance by monitoring and evaluating the epidemiological surveillance activities of the dedicated networks on surveillance to ensure optimal operation, including by developing surveillance standards and monitoring data completeness and indicators;

(c) maintain databases for such epidemiological surveillance, coordinate with the hosts of other relevant databases and work towards harmonised approaches to data collection and modelling in order to produce comparable Union-wide data; in carrying out that role, the Centre shall minimise the risks that may emerge from the transfer of inaccurate, incomplete or ambiguous data from one database to another, and shall establish robust procedures for data quality review;

(d) communicate the results of the analysis of data to the Commission, the HSC and the Member States, make databases accessible to and usable by Member States to support national policymaking and bilateral and multilateral collaboration between Member States, and propose communication messages to Member States to inform the public;

(e) promote and support harmonised and rationalised operating methodologies for epidemiological surveillance in collaboration with the competent bodies;

(f) ensure the interoperability of automated applications and other digital tools that support cross-border public health activities, including for contact tracing and warning applications, developed at Union level or national level in close collaboration with Member States;

(g) ensure the interoperability of the digital platforms for surveillance with digital infrastructure enabling health data to be used for healthcare, research, policy-making and regulatory purposes, and make use of other relevant data, for example environmental factors or phenomena with the potential to have a severe impact on health at Union or cross-border interregional level, or socio-economic risk factors, among others, if useful as regards fulfilling the Centre’s mission more effectively.

The digital platforms and applications referred to in the second subparagraph, point (a), shall be implemented with privacy-enhancing technologies taking into account the state of the art.

3. The Centre, through the operation of the network for epidemiological surveillance, shall:

(a) monitor and report on trends in communicable diseases over time and across Member States and in third countries in cooperation with the WHO, based on agreed indicators, to assess the present situation and facilitate appropriate evidence-based action, including through the identification of specifications for harmonised data collection from Member States;

(b) detect, monitor and report on serious cross-border threats to health referred to in Article 2(1), points (a)(i) and (a)(ii), of Regulation (EU) 2022/2371, including threats to substances of human origin, or in Article 2(1), point (d), of that Regulation, with regard to source, time, population and place in order to provide a rationale for public health action;
(c) support the national reference laboratories referred to in Article 15 of Regulation (EU) 2022/2371 in the implementation of the external quality control schemes, including professional testing schemes;

(d) contribute to the evaluation and monitoring of communicable disease prevention and control programmes in order to provide the evidence for science-based recommendations to strengthen and improve those programmes at Union and national level;

(e) monitor and assess the capacity of health systems to diagnose, prevent and treat major communicable diseases, as well as the resilience of the national health systems in the event of major disease outbreaks, based on preparedness indicators referred to in Article 5b(2), point (b);

(f) identify population groups at risk and in need of targeted prevention and response measures, and support Member States in ensuring that those measures also target persons with disabilities;

(g) contribute to the assessment of the burden of communicable diseases, such as with regard to disease prevalence, clinical complications, hospitalisation and mortality, by using among other types of data, stratified data on age, gender, disability and other elements, if available;

(h) carry out epidemiological modelling, anticipation and scenario development for response, and coordinate such efforts with a view to exchanging best practices, improving modelling capacity across the Union and ensuring international cooperation; and

(i) identify risk factors for disease transmission and the associated disease burden, provide analysis of the correlation between disease transmission, on the one hand, and social, economic, climatic and environmental risk factors, on the other, following the ‘One Health’ approach for zoonotic, food and waterborne diseases and other relevant diseases and special health issues, and identify population groups most at risk, including the correlation between disease incidence and severity with societal and environmental factors, and research priorities and needs.

4. Each Member State shall designate a coordinating competent body and shall also designate a national coordinator, national focal points and operational contact points, as relevant, for public health functions, including epidemiological surveillance, and for various disease groups and individual diseases, as well as for providing support for preparedness and response.

The national focal points shall form networks that provide scientific and technical advice to the Centre.

National focal points and operational contact points designated for disease-specific interactions with the Centre shall form disease-specific or disease-group-specific networks whose tasks shall include the transmission of national surveillance data as well as the submission of proposals for the prevention and control of communicable diseases to the Centre.

Member States shall notify the Centre and other Member States of the designations provided for in this paragraph and of any change thereto.

5. The Centre shall cooperate with the competent bodies, in particular on preparatory work for scientific opinions, scientific and technical assistance, the collection of comparable data based on common formats that allow for ease of aggregation, and the identification of emerging health threats.

6. The Centre shall ensure the operation and coordination of the network of EU reference laboratories referred to in Article 15 of Regulation (EU) 2022/2371, for the purposes of diagnosis, detection, identification, genetic sequencing and characterisation of infectious agents that have the potential to pose a threat to public health.

7. The Centre shall provide scientific and technical assistance to help Member States develop their detection and sequencing capacities, in particular those Member States that do not have sufficient capacities.
8. By encouraging cooperation between experts and reference laboratories, the Centre shall foster the development of sufficient capacity within the Union for the diagnosis, detection, identification and characterisation of infectious agents that have the potential to pose a threat to public health. The Centre shall maintain and extend such cooperation and support the implementation of quality assurance schemes.

9. The Centre shall ensure the operation and coordination of the network of Member State services supporting the use of substances of human origin, in order to help to ensure that such substances are microbiologically safe, by monitoring, assessing and helping to address relevant disease outbreaks that have the potential to pose serious cross-border threats to health, and to safeguard patients in need of such substances.

(5) the following article is inserted:

‘Article 5a

Prevention of communicable diseases

1. The Centre shall support Member States in strengthening their communicable disease prevention and control capacities, and in improving and facilitating the data collection process with interoperable sharing of data.

2. In close collaboration with Member States, the European Medicines Agency (EMA) and other relevant Union bodies and agencies, as well as with international organisations, the Centre shall develop a framework for the prevention of communicable diseases and related special health issues, including socio-economic risk factors, vaccine preventable diseases, antimicrobial resistance, health promotion, health education, health literacy and behaviour change.

3. The Centre may provide guidelines for the creation of communicable disease prevention and control programmes. It shall evaluate and monitor such programmes in order to provide evidence for science-based recommendations for the purposes of coordinating, strengthening and improving such programmes at national, cross-border interregional and Union level, and, where appropriate, at international level.

4. The Centre shall monitor the level of vaccination coverage in respect of major communicable diseases in each Member State, taking into account the specificities of national and regional vaccination schedules.

5. The Centre shall coordinate independent, post-marketing monitoring studies of the effectiveness and safety of vaccines, and shall collect new information, use the relevant data collected by competent bodies, or both. That work shall be conducted jointly with EMA and in particular through a new vaccine monitoring platform.

(6) the following article is inserted:

‘Article 5b

Prevention, preparedness and response planning

1. The Centre shall provide science-based recommendations and scientific and technical expertise to the Member States and the Commission, in collaboration with relevant Union bodies and agencies, international organisations and, where relevant, representatives of civil society, such as representatives of patient organisations and public health organisations, in accordance with appropriate working arrangements established with the Commission in the field of prevention, preparedness and response planning.

2. The Centre shall, in close collaboration with the Member States and the Commission:

(a) without prejudice to Member States’ competences in the area of prevention, preparedness and response planning, contribute to the development, regular review and updating of frameworks for national preparedness plans and of threat-specific preparedness plans for adoption by the HSC, and to the development, regular review and updating of the Union prevention, preparedness and response plan in accordance with Article 5 of Regulation (EU) 2022/2371;
(b) develop preparedness, monitoring and evaluation frameworks, and develop indicators for preparedness based on the IHR, in cooperation with the WHO, which frameworks and indicators are to be discussed within the HSC;

(c) facilitate self-assessments by Member States of their prevention, preparedness and response planning and external evaluation of such planning, when accepted by the Member State concerned and in a manner that is complementary to the IHR, and contribute to the activities referred to in Articles 7 and 8 of Regulation (EU) 2022/2371;

(d) ensure assessment of preparedness gaps and the provision of targeted support to Member States and, at their request and in cooperation with the WHO, to third countries that conclude agreements with the Union in accordance with Article 30;

(e) develop exercises, stress tests, in-action and after-action reviews, and support and complement Member States in those activities, and organise additional actions to address gaps identified in preparedness capacity and capability;

(f) develop and support specific preparedness activities addressing, amongst other things, vaccine preventable diseases, antimicrobial resistance, laboratory capacity and biosecurity, based on identified gaps or at the request of the Member States or the Commission;

(g) support the integration of research preparedness in the prevention, preparedness and response plans;

(h) support and complement additional targeted activities addressing at-risk groups and community preparedness;

(i) based on indicators referred to in Article 3(2), point (b), and in point (b) of this subparagraph, and in close cooperation with the Member States, monitor the capacity of Member States’ health systems to detect, prevent, respond to and recover from outbreaks of communicable diseases, identify gaps and provide science-based recommendations for the strengthening of health systems, to be implemented with Union support, as appropriate;

(j) bolster the modelling, anticipation and forecasting capacity of the Centre; and

(k) maintain regular secondment mechanisms between the Centre, the Commission, Member States’ experts and international organisations, including a EU Health Task Force, which support the activities referred to in points (d), (f), (h) and (i) of this subparagraph and Article 5a(1).

The secondment mechanisms referred to in the first subparagraph, point (k), shall contribute to the strengthening of the operational interface between the Centre and Member States.);

(7) Article 6 is amended as follows:

(a) the following paragraph is inserted:

‘1a. The Centre shall provide concrete analyses and independent science-based recommendations for actions to prevent and control communicable diseases and other serious cross-border threats to health, on its own initiative or at the request of the Commission or the Member States through the HSC.’;

(b) paragraph 3 is replaced by the following:

‘3. The Centre may promote and initiate scientific studies that are necessary for the performance of its mission, and applied scientific studies and projects on the feasibility, development and preparation of its activities. The Centre shall avoid duplication with research and health programmes of the Commission, the Member States, the Union or the WHO, as well as with other relevant programmes, and shall liaise between the public health and research sectors.

To promote and initiate the studies referred to in the first subparagraph, the Centre shall request access to health data made available or exchanged through digital infrastructure and applications, so that such health data can be used for healthcare, health research, policy-making and regulatory purposes linked to public health.'
For the purposes of the studies referred to in the first subparagraph, the Centre shall also make use of other relevant data, for example on environmental and socio-economic factors.

3a. The Centre may use its resources and make use of reference laboratories, in order to perform field research, data gathering and data analysis, for the purposes of helping relevant national bodies gather reliable data.

(c) paragraph 4 is replaced by the following:

‘4. The Centre shall consult with the HSC, the Commission and other relevant Union bodies or agencies with regard to the planning and priority setting of research and public health studies, taking into account the opinion of the Advisory Forum.’

(8) Article 7 is replaced by the following:

‘Article 7

Procedure for scientific opinions

1. The Centre shall issue a scientific opinion on matters falling within its mission:
   (a) in all cases where Union legislation provides that the Centre is to be consulted;
   (b) at the request of the European Parliament or a Member State;
   (c) at the request of the Commission, the HSC or EMA; and
   (d) on its own initiative.

2. Requests for a scientific opinion as referred to in paragraph 1 shall clearly explain the scientific issue to be addressed and the Union interest concerned, and shall be accompanied by sufficient background information regarding that issue. Where necessary, if scientific opinions are focused on a specific Member State, the Member State concerned shall have the opportunity to contribute with expertise.

3. The Centre shall ensure that it has the ability to anticipate and react quickly in order to issue scientific opinions within a mutually agreed time frame. The Centre's scientific opinions shall be accessible and shall be operational for policy makers.

4. Where different requests are made on the same issue or where the request does not comply with paragraph 2, the Centre may refuse to issue a scientific opinion or propose amendments to that request in consultation with the institution, committee, agency or Member State that made the request. If the request is refused, the Centre shall provide the institution, committee, agency or Member State that made the request with the reasons for the refusal.

5. Where the Centre has already delivered a scientific opinion on the specific issue covered by a request and it concludes that no scientific elements justify re-examination of the issue, information supporting that conclusion shall be given to the institution, committee, agency or Member State that made the request.

6. The Centre's internal rules shall specify requirements regarding the format, explanatory background and transparency rules for the publication of a scientific opinion.’

(9) Article 8 is replaced by the following:

‘Article 8

Operation of the Early Warning and Response System

1. The Centre shall support and assist the Commission by operating the EWRS in accordance with Article 18 of Regulation (EU) 2022/2371 and by ensuring, together with the Member States, the capacity to respond to health threats in a coordinated and timely manner.

2. The Centre shall:
   (a) analyse the content of messages it receives via the EWRS;
   (b) provide information, expertise, advice, training and risk assessments to Member States and the Commission; and
   (c) ensure that the EWRS is efficiently and effectively linked with other Union alert systems.
3. The Centre shall work with the Commission, the HSC and Member States to improve the reporting of relevant data through the EWRS, with a view to encouraging digitalisation of that process and its integration into national surveillance systems.

4. The Centre shall work with the Commission and the HSC to continuously update the EWRS, including for the use of modern technologies such as digital mobile applications, artificial intelligence and computer modelling and simulation models, or other technologies for automated contact tracing and warning applications, building upon the contact tracing technologies developed by the Member States, and to define the functional requirements of the EWRS.

5. The Centre shall work with the Commission, the HSC and the eHealth Network and relevant experts in the Member States to further define the functional requirements for contact tracing and warning applications, or, if necessary, other digital tools, and their interoperability, taking into account existing infrastructure and services, such as geolocation services provided by the EU Space Programme.

6. The Centre shall be responsible for ensuring the legality, security and confidentiality of the processing operations of personal data carried out within the EWRS and in the context of the interoperability of contact tracing and warning applications or, if necessary, other digital tools, in accordance with Articles 33 and 36 of Regulation (EU) 2018/1725 of the European Parliament and of the Council (*).

(10) the following article is inserted:

‘Article 8a

Public health risk assessment

1. The Centre shall provide risk assessments, in accordance with Article 20 of Regulation (EU) 2022/2371, in the case of a serious cross-border threat to health referred to in Article 2(1), points (a)(i) and (a)(ii), of that Regulation, including where it relates to substances of human origin that can potentially be impacted by communicable diseases, or in Article 2(1), point (d), of that Regulation. Such risk assessments shall be provided in a timely manner.

2. Risk assessments referred to in paragraph 1 shall include general and targeted science-based recommendations and options for response as a basis for coordination in the HSC, such as concerning:

(a) a forecast of the evolution of a health crisis and the risk of a health emergency;

(b) the Member States’ health system capacity to the extent it is necessary for the management of and the response to communicable disease threats and related special health issues, in order to support Member States;

(c) identification of vulnerable groups in society;

(d) identification of possible protective non-pharmaceutical measures and assessment of their efficacy.

3. For the purposes of paragraph 1, the Centre shall coordinate the preparation of risk assessments, by involving national focal points or Member States’ experts, relevant agencies or international organisations such as the WHO, where appropriate.

The Centre shall establish rules of procedure for risk assessments, especially regarding the involvement of experts to ensure that Member State expertise is independent and representative.

4. Where the risk assessment falls outside the mandate of the Centre, and at the request of the agency or body carrying out the risk assessment within its mandate, the Centre shall, without undue delay, provide the agency or body with any relevant information and data that are at its disposal.
5. The Centre shall work together with Member States to improve their risk assessment capacity.

(11) the following article is inserted:

‘Article 8b

Response coordination

1. The Centre shall support response coordination in the HSC as referred to in Article 21 of Regulation (EU) 2022/2371, in the case of a serious cross-border threat to health referred to in Article 2(1), points (a)(i) and (a)(ii), of that Regulation, including where it relates to substances of human origin that can potentially be impacted by communicable diseases, or in Article 2(1), point (d), of that Regulation, in particular by providing science-based recommendations and options for:

(a) national or cross-border interregional responses to the serious cross-border threat to health;

(b) the adoption of guidelines for the Member States for the prevention and control of the serious cross-border threat to health.

2. The Centre shall support a Union coordinated response at the request of a Member State, the Council, the Commission, the HSC or Union bodies or agencies.

(12) Article 9 is amended as follows:

(a) paragraphs 1, 2 and 3 are replaced by the following:

‘1. The Centre shall provide scientific and technical expertise to the Member States, the Commission and other Union bodies or agencies in the development, regular examination and updating of preparedness plans, on training activities and in the development of intervention strategies within the scope of its mission.

2. The Centre may be requested by the Commission, the Member States, the HSC or third countries that conclude agreements with the Union in accordance with Article 30, in particular partner countries, and international organisations, in particular the WHO, to provide scientific or technical assistance in any field within the scope of its mission. The assistance may include aiding the Commission and the Member States to develop technical guidelines on good practice and on protective measures to be taken in response to human health threats, providing expert assistance, mobilising and coordinating investigation teams and assessing the efficiency of response measures. The Centre shall provide evidence-based scientific and technical expertise and assistance within its mandate, and in accordance with the applicable agreements as well as with the appropriate working arrangements established with the Commission with regard to third countries and international organisations.

3. Requests made to the Centre for scientific or technical assistance shall be accompanied by a set deadline, which shall be mutually agreed with the Centre.’;

(b) paragraph 5 is replaced by the following:

‘5. The Centre shall inform its Management Board, referred to in Article 14, Member States’ authorities and the Commission of any such request and of its outcomes.’;

(c) paragraph 6 is replaced by the following:

‘6. The Centre shall, as appropriate, support and coordinate training programmes, in particular in relation to epidemiological surveillance, field investigations, preparedness and prevention, response to public health emergencies, public health research and risk communication. Those programmes shall take into consideration the need for training to be kept up-to-date, take into account the training needs of Member States and shall respect the principle of proportionality.’;
(13) Article 11 is amended as follows:

(a) paragraph 1 is replaced by the following:

‘1. The Centre shall:

(a) coordinate standardisation of data collection procedures, and validation, analysis and dissemination of data at Union level;

(b) seek, where appropriate, the expertise and guidance of the Member States to ensure that there is a correct understanding of the health data made available, their limitations and the national context and information systems.’;

(b) the following paragraph is inserted:

‘1a. The Centre shall collect data and information, and provide links to relevant research data and outputs on:

(a) epidemiological surveillance;

(b) the progression of epidemic situations, including for modelling, anticipation and scenario development and the assessment of vulnerable groups;

(c) unusual epidemic phenomena or new communicable diseases of unknown origin, including those in third countries, in cooperation with the WHO;

(d) pathogen data, including at molecular level, if required for epidemiological surveillance and for detecting or investigating serious cross-border threats to health;

(e) health systems data required for managing communicable diseases and related special health issues; and

(f) implementation of the Centre’s recommendations by Member States and the outcomes thereof.’;

(c) paragraph 2 is replaced by the following:

‘2. For the purposes of paragraph 1, the Centre shall:

(a) develop, together with the competent bodies of the Member States and the Commission, appropriate procedures to facilitate consultation and data transmission and access;

(b) carry out scientific and technical evaluations of prevention and control measures at Union level;

(c) work in close cooperation and in a transparent manner with relevant bodies operating in the field of data collection of the Union, third countries, the WHO and other international organisations;

(d) develop solutions to access relevant health data, whether publicly available or made available or exchanged through digital infrastructure, in order to allow the health data to be used for healthcare, health research, policy-making and regulatory purposes linked to public health; and provide and facilitate controlled and timely access to health data to support public health research.’;

(d) the following paragraphs are added:

‘4. In situations of urgency related to the severity or novelty of a serious cross-border threat to health or to the rapidity of its spread among the Member States, at the request of the Commission, the HSC, EMA, the Member States or on its own initiative, the Centre shall make available epidemiological forecasts as referred to in Article 5(3), point (h). Such forecasts shall be prepared objectively, reliably and on the basis of the best available information, and in cooperation with other institutions and working groups established with Member States’ experts. The forecasts shall be made easily accessible.

5. In situations of urgency related to the severity or novelty of a serious cross-border threat to health or to the rapidity of its spread among the Member States, the Centre shall provide data and easily accessible relevant analyses on the basis of the best available information, as quickly as possible and in accordance with Article 8a(1).’;
the following article is inserted:

‘Article 11a

Support for international and field preparedness and response

1. The Centre shall establish a EU Health Task Force and ensure that there is a permanent capacity and an enhanced emergency capacity to mobilise and use it. The EU Health Task Force shall provide assistance with regard to requests for prevention, preparedness and response planning, local responses to outbreaks of communicable diseases and after-action reviews in Member States and in third countries, in cooperation with the WHO. The EU Health Task Force shall include the Centre’s staff and experts from Member States, fellowship programmes and international and non-profit organisations.

The Centre shall develop capacities to conduct field epidemiology and research, and gather relevant data, such as on the variants of communicable diseases, using the dedicated network of EU reference laboratories or its own resources.

2. The Centre, in cooperation with the Commission, shall develop a framework to define the organisational structure and the use of the permanent capacity of the EU Health Task Force.

At the joint request of the Commission and Member States, the enhanced emergency capacity of the EU Health Task Force shall be mobilised. The Commission shall, by means of implementing acts, adopt the procedures concerning the mobilisation of the enhanced emergency capacity of the EU Health Task Force. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 30a(2).

3. The Centre shall ensure that the EU Health Task Force is coordinated with, complementary to and integrates the capacities of the European Medical Corps, other relevant capacities under the Union Civil Protection Mechanism and mechanisms of international organisations.

4. Through the EU Health Task Force, the Centre shall provide Union field response experts in international response teams mobilised by the WHO Health Emergencies Programme mechanism and the Global Outbreak Alert and Response Network (GOARN), in accordance with appropriate working arrangements established with the Commission.

5. The Centre shall facilitate the development of field response capabilities and crisis management expertise among the Centre’s staff and experts from Member States and EEA countries, from candidate countries and potential candidates, as well as from European Neighbourhood Policy countries and partner countries, at the request of the Commission and in collaboration with the Member States.

6. By establishing a mechanism for mobilising and using the EU Health Task Force, the Centre shall maintain the permanent capacity of the EU Health Task Force and enhance the country-specific knowledge necessary to carry out missions to Member States, at the joint request of the Commission and Member States concerned, to provide science-based recommendations on preparedness for and response to threats to health and to carry out after-action reviews, within its mandate.

7. At the request of the Commission and Member States, the Centre shall engage in long-term capacity-building projects aimed at strengthening preparedness capacities under the IHR in non-European third countries, in particular partner countries.’;

Article 12 is amended as follows:

(a) paragraph 1 is replaced by the following:

‘1. The Centre shall communicate, on its own initiative, information about its activities and the results of its work within the scope of its mission, after having given prior information to the Member States and to the Commission.'
The Centre shall ensure that the public or any interested party is rapidly given objective, reliable, evidence-based and easily accessible information with regard to its activities and the results of its work. The Centre shall make scientific information available to the general public, including through a dedicated website, as well as through an active presence on social media or analogous platforms. It shall also publish its scientific opinions, produced in accordance with Article 6, in a timely manner. Information relevant for citizens of the Union shall be made available in all the official languages of the Union to ensure appropriate outreach to citizens of the Union. The Centre shall facilitate the fight against misinformation regarding vaccination and against the causes of vaccine hesitancy.

(b) paragraph 3 is replaced by the following:

‘3. The Centre shall cooperate, as appropriate, with the competent bodies in the Member States, the WHO and other interested parties with regard to public information campaigns.’

(16) Article 14 is amended as follows:

(a) in paragraph 2, the third subparagraph is replaced by the following:

‘Members’ term of office shall be three years and may be extended.’

(b) in paragraph 5, points (d), (e) and (f) are replaced by the following:

‘(d) adopt, before 31 January each year, the Centre’s work programme for the coming year;

(e) adopt a draft single programming document in line with Article 32 of Commission Delegated Regulation (EU) 2019/715 (*) and the related Commission guidelines for the single programming document; the single programming document shall be adopted where a positive opinion has been given by the Commission and, as regards multiannual programming, after consulting the European Parliament and the Council;

(f) ensure that the Centre’s work programme for the coming year and multiannual programmes are consistent with the Union’s legislative and policy priorities in the area of the Centre’s mission and tasks, and fully take into account the recommendations adopted in the annual Commission opinion on the draft single programming document referred to in Article 32(7) of Delegated Regulation (EU) 2019/715;

(g) adopt, before 31 March each year, the general report on the Centre’s activities for the previous year;

(h) adopt the financial rules applicable to the Centre after the Commission has been consulted;

(i) determine by unanimity of its members, by way of derogation from Article 15(1), the rules governing the languages of the Centre, including the possibility of a distinction between the internal workings of the Centre and the external communication, taking into account the need to ensure access to, and participation in, the work of the Centre by all interested parties in both cases.

The financial rules applicable to the Centre as referred to in the first subparagraph, point (h), of this paragraph shall not derogate from Delegated Regulation (EU) 2019/715, unless specifically required for the Centre’s operation and the Commission has given its prior consent.

(17) in Article 16(2), point (b) is replaced by the following:

‘(b) drawing up draft work programmes, taking into account the recommendations adopted in the annual Commission opinion on the draft single programming document in accordance with Article 32(7) of Delegated Regulation (EU) 2019/715; the Commission opinion shall be submitted to the Management Board at the earliest possible stage.’
(18) Article 17 is replaced by the following:

‘Article 17

Appointment of the director

1. The director shall be appointed by the Management Board on the basis of a list of at least three candidates proposed by the Commission after an open competition, following publication in the Official Journal of the European Union and elsewhere of a call for expressions of interest which has been validated by the Management Board. That appointment shall be for a period of five years, which may be extended once for a further period of up to five years.

2. Before appointment, the candidate nominated by the Management Board shall be invited without delay to make a statement before the European Parliament and to answer questions put by members of that institution.

(19) Article 18 is amended as follows:

(a) paragraph 2 is replaced by the following:

‘2. Members of the Advisory Forum shall not be members of the Management Board. Advisory Forum members’ term of office shall be three years and may be extended.’;

(b) in paragraph 4, point (f) is replaced by the following:

‘(f) scientific and public health priorities to be addressed in the work programme; and

(g) key publications under preparation by the Centre, such as forecasting studies.’;

(c) paragraph 8 is replaced by the following:

‘8. The Centre shall engage with public health experts, with representatives of professional or scientific bodies and non-governmental organisations, in particular those having recognised experience in disciplines related to the work of the Centre, as well as in other areas such as environmental protection, with dedicated networks and with the Advisory Forum, to cooperate on specific tasks. In addition, the Commission, the Member States or the Advisory Forum may propose experts, including experts from third countries, or representatives of professional or scientific bodies, or non-governmental organisations to be consulted by the Centre on an ad-hoc basis.’;

(20) in Article 19, paragraph 2 is replaced by the following:

‘2. The members of the Management Board, the director, the members of the Advisory Forum, as well as external experts participating in scientific panels shall make a declaration of commitment and a declaration of interests indicating either the absence of any interest which might be considered prejudicial to their independence or any direct or indirect interest which might be considered prejudicial to their independence. Those declarations shall be made annually in writing and shall be available to the public.’;

(21) Article 20 is amended as follows:

(a) paragraph 3 is replaced by the following:

‘3. Decisions taken by the Centre pursuant to Article 8 of Regulation (EC) No 1049/2001 may give rise to the lodging of a complaint to the Ombudsman or form the subject of an action before the Court of Justice of the European Union, under the conditions laid down in Articles 228 and 230 of the Treaty on the Functioning of the European Union (TFEU), respectively.’;

(b) paragraph 4 is deleted;

(22) the following article is inserted:

‘Article 20a

Personal data protection

1. This Regulation shall be without prejudice to the obligations of Member States relating to their processing of personal data under Regulation (EU) 2016/679 (*) and Directive 2002/58/EC (**) of the European Parliament and of the Council, and to the obligations of Union institutions, bodies, offices and agencies relating to their processing of personal data under Regulation (EU) 2018/1725, when fulfilling their responsibilities.
2. The Centre shall not process personal data except in cases where it is necessary for the fulfilment of its mission. Where appropriate, personal data shall be rendered anonymous in such a manner that the data subject is not identifiable.

(23) Article 21 is replaced by the following:

‘Article 21

Professional secrecy and confidentiality

1. Without prejudice to Article 20, the Centre shall not divulge to third parties confidential information that it receives for which confidential treatment has been requested and justified, except for information which must be made public, if circumstances so require, in order to protect public health. If the confidential information has been submitted by a Member State, that information shall not be disclosed without the prior consent of that Member State.

The Commission’s rules on security regarding the protection of EU classified information, laid down in Commission Decisions (EU, Euratom) 2015/443 (*) and (EU, Euratom) 2015/444 (**) shall apply to the work of the Centre and its staff.

2. Members of the Management Board, the director, members of the Advisory Forum, as well as external experts participating in the scientific panels and the staff of the Centre, even after their duties have ceased, shall be subject to the obligation of professional secrecy pursuant to Article 339 TFEU.

3. The conclusions of the scientific opinions delivered by the Centre relating to foreseeable health effects shall on no account be kept confidential.

4. The Centre shall lay down in its internal rules the practical arrangements for implementing the confidentiality rules referred to in paragraphs 1 and 2.

5. The Centre shall take all necessary measures to facilitate the exchange of information relevant to its tasks with the Commission, the Member States and, where appropriate, other Union institutions, Union bodies, offices and agencies, and international organisations and third countries, in accordance with appropriate working arrangements established with the Commission.

6. The Centre shall develop, deploy and operate an information system capable of exchanging classified and sensitive non-classified information as specified in this Article.

(24) Article 22 is amended as follows:

(a) in paragraph 3, point (d) is replaced by the following:

‘(d) any voluntary contribution from the Member States; and

(e) any revenue from contribution agreements or grant agreements exceptionally concluded between the Commission and the Centre.’
(b) the following paragraph is inserted:

‘3a Financing from the Union budget may be awarded to the Centre for the costs that it incurs in implementing its work programme established in conformity with the objectives and priorities of the work programmes adopted by the Commission in accordance with Regulation (EU) 2021/522 of the European Parliament and the Council (*), and the Research and Innovation programmes of the Union. That financing shall not cover expenditure already covered by the general budget of the Union or by any other resource of the Centre set out in paragraph 3 of this Article.

(c) paragraph 5 is replaced by the following:

‘5. Each year, on the basis of a draft drawn up by the director, the Management Board shall produce an estimate of revenue and expenditure for the Centre for the following financial year. That estimate, including a draft establishment plan, shall be included in the draft single programming document provided for in Article 14(5), point (e), of this Regulation. In accordance with Article 40 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council (*), by 31 January each year the Centre shall send to the European Parliament, the Council and the Commission its draft single programming document, as endorsed by its Management Board.

(d) paragraph 7 is replaced by the following:

‘7. On the basis of the estimate, the Commission shall enter in the preliminary draft general budget of the Union the estimates it considers necessary for the establishment plan and the amount of the subsidy to be charged to the general budget, which it shall place before the budgetary authority in accordance with Article 314 TFEU.’;

(25) Article 23 is amended as follows:

(a) paragraph 2 is replaced by the following:

‘2. By 1 March following each financial year, the Centre’s accounting officer shall communicate the provisional accounts to the Commission’s accounting officer together with a report on the budgetary and financial management for that financial year. The Commission’s accounting officer shall consolidate the provisional accounts of the institutions and decentralised bodies in accordance with Article 245 of Regulation (EU, Euratom) 2018/1046.’;

(b) paragraph 4 is replaced by the following:

‘4. On receipt of the Court of Auditors’ observations on the Centre’s provisional accounts, pursuant to Article 246 of Regulation (EU, Euratom) 2018/1046, the director shall draw up the Centre’s final accounts under the director’s own responsibility and forward them to the Management Board for an opinion.

The Centre shall inform the Commission without delay of cases of presumed fraud and other financial irregularities, of any completed or ongoing investigations by the European Public Prosecutor’s Office (EPPO) or the European anti-Fraud Office (OLAF), and of any audits or controls by the Court of Auditors or the Internal Audit Service (IAS), without endangering the confidentiality of the investigations. That obligation to inform the Commission is without prejudice to Article 24(1) of Council Regulation (EU) 2017/1939 (*).

(c) paragraphs 8 and 9 are replaced by the following:

8. The director shall send the Court of Auditors a reply to its observations by 30 September. The director shall also send a copy of that reply to the European Parliament, the Council, the Commission and the Management Board.

9. The director shall submit to the European Parliament, at the latter’s request, any information required for the smooth application of the discharge procedure for the financial year in question, as laid down in Article 261(3) of Regulation (EU, Euratom) 2018/1046;:

(26) Article 24 is replaced by the following:

‘Article 24

Application of the Financial Regulation

Article 70 of Regulation (EU, Euratom) 2018/1046 shall apply to the discharge of the Centre’s budget, its audits and accounting rules.’;

(27) Article 25 is amended as follows:

(a) paragraph 1 is replaced by the following:

(b) paragraph 3 is replaced by the following:

‘3. The decisions concerning funding and the implementing agreements and instruments resulting therefrom shall explicitly indicate that the EPPO may exercise its competences, including its competence to investigate, and that the Court of Auditors and OLAF may carry out, if necessary, on-the-spot checks of the recipients of the Centre’s funding and the agents responsible for allocating it, in accordance with their respective legal frameworks;’;

(c) the following paragraph is added:

‘4. Without prejudice to paragraphs 1 to 3, working arrangements with third countries and with international organisations, grant agreements, grant decisions and contracts of the Centre shall grant the necessary rights and access required by the Court of Auditors, OLAF and the EPPO, in the exercise of their respective competences;’;

(28) Article 26 is amended as follows:

(a) paragraph 1 is replaced by the following:

‘1. The Centre shall be a body of the Union. It shall have legal personality;’;

(b) the following paragraph is inserted:

‘1a. In each of the Member States, the Centre shall enjoy the most extensive legal capacity accorded to legal persons under their laws. It may, in particular, acquire or dispose of movable and immovable property and may be party to legal proceedings;’;

(c) paragraph 2 is replaced by the following:

‘2. Protocol No 7 on the Privileges and Immunities of the European Union annexed to the Treaties shall apply to the Centre and its staff;’;

(29) in Article 27, paragraph 1 is replaced by the following:

‘1. The contractual liability of the Centre shall be governed by the law applicable to the contract in question. The Court of Justice of the European Union shall have jurisdiction to give judgment pursuant to any arbitration clause contained in a contract concluded by the Centre;’;
Article 28 is replaced by the following:

Examination of legality

1. Member States, members of the Management Board and third parties directly and individually concerned may refer any act of the Centre, whether express or implied, to the Commission for examination of the legality of that act (administrative appeal).

2. Any administrative appeal shall be made to the Commission within 15 days of the day on which the party concerned first became aware of the act in question.

3. The Commission shall take a decision within one month. If no decision has been taken within that period, the administrative appeal shall be deemed to have been dismissed.

4. An action for annulment of the Commission's explicit or implicit decision referred to in paragraph 3 of this Article to dismiss the administrative appeal may be brought before the Court of Justice of the European Union in accordance with Article 263 TFEU.

The following article is inserted:

Article 30a

Committee procedure

1. The Commission shall be assisted by the committee on serious cross-border threats to health established by Regulation (EU) 2022/2371. That Committee shall be a committee within the meaning of Regulation (EU) No 182/2011 of the European Parliament and of the Council (*)

2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Where the Committee delivers no opinion, the Commission shall not adopt the draft implementing act and Article 5(4), third subparagraph, of Regulation (EU) No 182/2011 shall apply.

Article 31 is replaced by the following:

Review clause

1. By 2025, the Commission shall submit a report to the European Parliament, the Council and the Management Board on the Centre's activities, including an assessment of:

(a) how the Centre progressed with implementing the amended mandate in light of the COVID-19 pandemic;

(b) the Centre's compliance with the obligations laid down in Regulation (EU) 2022/2371 and other relevant Union legislation;

(c) how effectively the Centre's activities address international, Union or national health priorities;

(d) the extent to which the work of the Centre is targeted at and affects Member States' capacities.

The report shall reflect the views of the stakeholders, at both Union and national level.

The report shall be accompanied by an independent study commissioned by the Commission.
2. By 2025, and every 5 years thereafter, the Commission shall commission an independent external evaluation of the Centre’s performance in relation to its objectives, mandate, tasks and procedures. That independent external evaluation shall be done on the basis of terms of reference, which shall, if necessary, be discussed with the Management Board.

The independent external evaluation shall, in particular, address the possible need to amend the mandate of the Centre and the financial implications of any such amendment. The first evaluation shall examine the feasibility of extending the mandate of the Centre to address the impact of cross-border threats to health on non-communicable diseases.

The Management Board shall examine the conclusions of the independent external evaluation and may issue recommendations, if necessary, to the Commission regarding changes in the Centre, its working practices and the scope of its mission. The Commission shall forward the evaluation report and the recommendations to the European Parliament and the Council.

3. On the basis of the independent external evaluation referred to in paragraph 2 or where it considers that the continued operation of the Centre is no longer justified with regard to its assigned objectives, mandate and tasks, the Commission may propose that the relevant provisions of this Regulation be amended accordingly.

4. The Commission shall report to the European Parliament, to the Council and to the Management Board, where relevant, on the recommendations of the Management Board and on the findings of its evaluations carried out under paragraphs 2 and 3. Those findings shall be made public.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Strasbourg, 23 November 2022.
