COMMISSION

THE VISUAL CHARACTERISTICS OF THE EURO COINS

(2001/C 373/01)

The first sentence of Article 106(2) of the Treaty establishing the European Community allows Member States to issue coins subject to approval by the ECB of the volume of the issue.

According to Article 106(2) second sentence, the Council is entitled to adopt measures to harmonise the denominations and technical specifications of all coins intended for circulation to the extent necessary to permit their smooth circulation within the Community.

On 3 May 1998 the Council adopted Regulation (EC) No 975/98 on denominations and technical specifications of euro coins intended for circulation ⁽¹⁾, laying down technical specifications of the euro coins as regards face value, diameter, thickness, weight, shape, colour, composition and form of edge. That Regulation was amended by Council Regulation (EC) No 423/1999 of 22 February 1999 ⁽²⁾.

On 3 May 1998 the Council adopted Regulation (EC) No 974/98 on the introduction of the euro ⁽³⁾ providing, *inter alia*, that the euro coins shall be the only coins which have the status of legal tender in all the participating Member States.

As regards the design of the euro coins, the Florence European Council, on 21 June 1996, indicated its wish to have one common face and one face with a national design. Accordingly a competition was organised at European level for the design of the common face of the euro coins and, on 16 June 1997, the Amsterdam European Council decided on and made public the winning series. The responsibility for the national faces lies with the Member States, which however had to comply with several common characteristics.

Based on Declaration No 6 on monetary relations with the Republic of San Marino, the Vatican City and the Principality of Monaco, annexed to the final Act of Maastricht, the Council on 31 December 1998 adopted three Decisions on the position to be taken by the Community regarding an agreement concerning the monetary relations with the Principality of Monaco ⁽⁴⁾, the Republic of San Marino ⁽⁵⁾ and the Vatican City ⁽⁶⁾, dealing, *inter alia*, with the introduction the euro coins in these States. In line with these Decisions, Monetary Agreements were concluded between Italy on behalf of the European Community and the Republic of San Marino, as well as the Vatican City, allowing those States, *inter alia*, to issue euro coins ⁽⁷⁾. A similar agreement is currently being finalised between France on behalf of the European Community and the Principality of Monaco.

⁽⁵⁾ Decision 1999/97/EC (OJ L 30, 4.2.1999, p. 33).

⁽⁶⁾ Decision 1999/98/EC (OJ L 30, 4.2.1999, p. 35).

⁽⁷⁾ Monetary Agreement between the Italian Republic, on behalf of the European Community, and the Republic of San Marino (OJ C 209, 27.7.2001, p. 1); Monetary Agreement between the Italian Republic, on behalf of the European Community, and the Vatican City (OJ C 299, 25.10.2001, p. 1).

Together with the characteristics of the euro coins as described in the Council Regulations, the designs of the common face and of the national faces will be essential for the recognition of the euro coins.

Photographs of the common face and the national faces of the euro coins, together with a brief factual description of the design, are hereby published with a view to establishing a reference.
