

Operative part of the judgment

Articles 184 to 187 of Council Directive 2006/112/EC of 28 November 2006 on the common system of value added tax must be interpreted as not precluding a capital goods adjustment scheme, laid down in national rules in which the adjustment is to be spread over several years, from providing that, in the year the goods in question are first used, where that year is also the first adjustment year, the total amount of the initial deduction for those capital goods is adjusted in a single step, if, when first used, it becomes apparent that that deduction deviates from the deduction which the taxable person was entitled to apply on the basis of the actual use of those goods.
